• PR #36424: (jfindlay) skip some mac_timezone tests @ 2016-09-20 06:43:47 UTC
  – PR #36194: (jfindlay) skip some mac_timezone tests (refs: #36424)
  – ae1fc430c2 Merge pull request #36424 from jfindlay/bp-36194
  – a20a2148bf skip some mac_timezone tests

• ISSUE #36388: (qurczak) pkg.list_upgrades return debug information rather than packages list (refs: #36428)

• PR #36428: (terminalmage) A couple fixes for Antergos Linux @ 2016-09-20 06:42:16 UTC
  – 6319e3419a Merge pull request #36428 from terminalmage/issue36388
  – b0069ad0d8 pacman.py: use os_family grain to assign as pkg virtual module
  – 5d632dbfca Properly set os grain for Antergos
  – 0ae8dca2d0 pkg.list_upgrades: Ignore "downloading" lines in pacman output

• ISSUE #36373: (frioux) Salt-API does not validate input properly (refs: #36425)

• PR #36425: (whiteinge) Check for dictionary explicitly since we're accessing it as one @ 2016-09-20 06:41:40 UTC
  – 155bd14b5e Merge pull request #36425 from whiteinge/salt-api-dict-payload
  – 063ed258f Check for dictionary explicitly since we're accessing it as one

• ISSUE saltstack/salt#18341: (falzm) Dry-running state.highstate only returns the first change (refs: #36199)

• PR #36199: (thatch45) skip all failhards if test=True @ 2016-09-20 05:38:32 UTC
  – 420be364ee Merge pull request #36199 from thatch45/fix_18341
  – e13d61f06a skip all failhards if test=True

• PR #36418: (rallytime) Back-port #36246 to 2016.3 (refs: #37120) @ 2016-09-19 21:56:52 UTC
  – PR #36246: (twangboy) Fix test_issue_6833_pip_upgrade_pip test on OS X (refs: #36418, #37120)
Salt Documentation, Release 3002.2

- b2365f553e Merge pull request #36418 from rallytime/bp-36246
- aab02f28b4 Ensure we have a test venv created using virtualenv < 13.0

- **PR #36419:** (rallytime) Back-port #36329 to 2016.3 @ 2016-09-19 21:56:33 UTC
  - PR #36329: (oz123) Fix a minor typo in docs (refs: #36419)
  - bc703e062c Merge pull request #36419 from rallytime/bp-36329
  - ff6eb7a25 Fix a minor typo in docs

- **PR #36420:** (rallytime) Back-port #36365 to 2016.3 @ 2016-09-19 21:56:17 UTC
  - PR #36365: (Kimamisa) Fix a minor typo in docs (refs: #36420)
  - fba067f7fc Merge pull request #36420 from rallytime/bp-36365
  - 864e513fca Fix a minor typo in docs

- **PR #36413:** (rallytime) [2016.3] Merge forward from 2015.8 to 2016.3 @ 2016-09-19 18:59:31 UTC
  - 3d2590e28c Merge pull request #36413 from rallytime/merge-2016.3
  - c64e489f6f Merge branch '2015.8' into '2016.3'
    - 9bc4eeb71e Fix typo (#36409)
    - ac5c812e4b Fix OS identification for CloudLinux (#36408)
    - bb4d6f58a git.latest: fail gracefully for misconfigured remote repo (#36391)
    - ad7045ad3b Merge pull request #36315 from puneetk/patch-6
      - 3ac308ac76 Update aptpkg.py
      - 892cc4cd48 Update aptpkg.py
      - cbe98d97a3 Fix pylint whitespace errors
      - e5371ac720 No force_yes parameter to pkg.upgrade #21248
    - 2aa6df859a Merge pull request #36381 from twangboy/fix_win_service
      - 04edeac59 Add '/y' switch to the net stop and start commands
    - 373c5db180 Merge pull request #36384 from twangboy/update_setup_req
      - a817ae1c2 Add windows requirements file

- **ISSUE #36371:** (nasenbaer13) _extern_path in fileclient is broken (refs: #36305)

- **PR #36305:** (gtmanfred) cache query args with url as well @ 2016-09-19 18:30:51 UTC
  - a8a3a9f021 Merge pull request #36305 from gtmanfred/2016.3
  - 70e7fd58b cache query args with url as well

- **PR #36389:** (cachedout) Pr 36386 @ 2016-09-17 11:54:37 UTC
  - PR #36386: (xiaoanyunfei) fix salt-api's default opts were covered by salt-master #35734 (refs: #36389, #36650, #saltstack/salt`#36389`_)
  - PR #35734: (xiaoanyunfei) fix salt-api's default opts were covered by salt-master (refs: #36386)
  - 602bd2d1ef Merge pull request #36389 from cachedout/pr-36386
  - f5d63d93ce Lint
  - 93269c8b65 fix salt-api log and pid

5114 Chapter 28. Release Notes
Salt Documentation, Release 3002.2

- PR #36352: (pass-by-value) Update versionadded and release notes
- PR #36369: (rallytime) [2016.3] Merge forward from 2015.8 to 2016.3 @ 2016-09-16 16:31:14 UTC
  - 495d365e54 Merge pull request #36369 from rallytime/merge-2016.3
  - 37ae4188a Merge branch '2015.8' into '2016.3'
  - 40b2e3d189 Merge pull request #36353 from rallytime/refresh-db-clean-up
    * 275319193a Check for Ign/Hit membership instead of == in aptpkg.refresh_db
    * df9db3624 Merge pull request #36355 from rallytime/bp-36288
      * 70ffda80f0 Schema test requires jsonschema 2.5.0 or above
  - 3f308d7694 postgres_extension: report changes when an extension was installed (#36335)
  - d2a583bc22 Merge pull request #36337 from cachedout/conduct
    * 2fb61b9c9f SaltStack's code of conduct
  - ef128ad0b0 Return None when find_file identifies the path as a directory (#36342)
- PR #36249: (alertedsnake) Quote postgres privilege target names (refs: #36280)
- PR #36330: (silienius) set __virtualname__ to 'service'
- ISSUE #36338: (jbonachera) infoblox.present state does not use "infoblox_server", "infoblox_user" or "infoblox_password" arguments (refs: #36339)
  - PR #36339: (jbonachera) Use infoblox_* values if present in arguments
  - PR #36345: (gtmanfred) remove help message from glance module
  - PR #36346: (rallytime) Add resize2fs unit test from blockdev_test to disk_test
  - PR #36344: (rallytime) [2016.3] Merge forward from 2015.8 to 2016.3 (refs: #36346)
  - ISSUE #36292: (loregordon) pkg.check_db is not available in salt 2016.3? (refs: #36350)
  - PR #36350: (terminalmage) Add note about yumpkg.check_db removal in Boron @ 2016-09-15 20:32:32 UTC
  - f09c3e499f Merge pull request #36350 from terminalmage/docs
  - b815c88577 Add note about yumpkg.check_db removal in Boron
- PR #36344: (rallytime) [2016.3] Merge forward from 2015.8 to 2016.3 (refs: #36346) @ 2016-09-15 17:38:57 UTC
  - a33da842c0 Merge pull request #36344 from rallytime/merge-2016.3
  - d1f560147d Merge branch '2015.8' into '2016.3'
  - dc518c5340 Skip test_resize2fs if resize2fs does not exists (#36325)
- ISSUE #36308: (ahammond) salt-cloud defaults to IPv6 rather than IPv6 (refs: #36312)
  - PR #36312: (ahammond) merge error overwrites correct ssh_host with stale data in ip_address
  - ISSUE #35819: (cable2999) pkg.group_installed doesn’t handle missing package group (refs: #salt-stack/salt #35907_
  - PR saltstack/salt#35907: (rallytime) Catch CommandExecutionError when the group in group_installed
doesn’t exist (refs: #36299)
- PR #36299: (rallytime) Gate the pkg.group_installed state test: not all pkg modules have group_install @ 2016-09-14 19:04:26 UTC
  - 6a3019bbf1 Merge pull request #36299 from rallytime/gate-pkg-group-installed-test

28.2. Previous Releases
- 9e15df9b23 Switch the order of the decorator
- ee997be6d8 Fix pkg group test by passing a list instead of str
- c7d8867096 Gate the pkg.group_installed state test: not all pkg modules have group_install

**ISSUE #33686** (BretFisher) blockreplace marker_end isn't applied with newline (refs: #salt-stack/salt#36273`_`_, #36273)

- PR saltstack/salt#36273: (techhat) Add append_newline flag for #33686 (refs: #36295)
- PR #36295: (rallytime) Back-port #36273 to 2016.3
- PR #36273: (techhat) Add append_newline flag for #33686 (refs: #36295)
- PR #36296: (rallytime) Back-port #36124 to 2016.3
- PR #36124: (twangboy) Skip test on all OS's but linux (refs: #36296)

**PR #36297: (rallytime) [2016.3] Merge forward from 2015.8 to 2016.3 @ 2016-09-14 16:07:30 UTC**

- a8a72e985f Merge pull request #36297 from rallytime/merge-2016.3
- e2f1cf6025 Merge branch '2015.8' into '2016.3'
  * b9b8e45362 Merge pull request #36272 from terminalmage/improved-gitfs Logging
    * 223a20e987 Improved gitfs/git_pillar error logging
  * abb6aeb4b Merge pull request #36277 from terminalmage/gitfs-check-key-path
    * 4fee18c820 salt.utils.gitfs: Check for existence of ssh keys
  * ed22bd331 Integration tests fixes for 2015.8 (#36262)
  * 297a12c387 Fix misspelling of "occurred" in log messages/exceptions (#36270)
- PR #36178: (cachedout) Filter out pub kwargs from cloud runner

**PR #36238: (pass-by-value) Add ability to clone from a snapshot to salt-cloud vmware driver @ 2016-09-14 05:31:51 UTC**

- fc7a1d536f Merge pull request #36238 from pass-by-value/vmware_clone_from_snapshot
- dd670b18f Fix lint error and add try except
- d96981639b Add ability to clone from a snapshot to salt-cloud vmware driver
- PR #36263: (meksh) Integration tests fixes for 2016.3

**PR #36264: (rallytime) [2016.3] Merge forward from 2015.8 to 2016.3 @ 2016-09-13 18:25:41 UTC**

- d634fd8628 Merge pull request #36264 from rallytime/merge-2016.3
- f603757b55 Merge branch '2015.8' into '2016.3'
- 931486ba35 Merge pull request #36096 from twangboy/update_setup
  * dc1988add5 fix download when requests not present
  * b447b9ff5f Add additional required dll’s
- b0d6ff5c8 Merge pull request #36244 from terminalmage/gen-back-bug
  * 36b21fd9b salt.filesserver.Fileserver: Don't try to split a list in _gen_back
- dcc938099e Merge pull request #36245 from terminalmage/roots-bug
  * 75d4997b70 roots backend: Don't include '.' or '..' in empty_dirs
- fdf40907b7 Some unit tests fixes (#36227)
ISSUE #33525: (anlutro) file.serialize no longer indents/pretty-prints in 2016.3 (refs: #35688)

PR #35688: (cachedout) Splat serializer default configs into the serializer kwargs @ 2016-09-13 09:21:46 UTC
  - de06116075 Merge pull request #35688 from cachedout/issue_33525
  - 4910e8191c Provide fallback for serializers without opts
  - a238666aba Add serializer test
  - 345fd2a9e5 Splat serializer default configs into the serializer kwargs

ISSUE #36021: (mirceaulinic) Scheduled runners not executed (for proxy minions, at least) (refs: #36025)

PR #36025: (mirceaulinic) Potential fix for #36021 @ 2016-09-13 07:46:41 UTC
  - d9d477ed45 Merge pull request #36025 from cloudflare/CF-FIX-36021
  - 03007be6b1 Potential fix for #36021
  - PR #36183: (opdude) Fix timezones states on OS X

PR #36235: (rallytime) [2016.3] Merge forward from 2015.8 to 2016.3 @ 2016-09-12 17:40:42 UTC
  - fcbeb40c3 Merge pull request #36235 from rallytime/merge-2016.3
  - 99dcf84b62 Merge branch '2015.8' into '2016.3'
    * 4e9490eebe Merge pull request #36214 from vutny/postgres-extension-doc
      - 5fe548f043 postgres_extension state module: fix docstrings
    * 5b7b96c0b7 Merge pull request #36205 from vutny/postgres-tablespace-doc
      - 78296b90d8 Add missing maintenance_db kwarg to postgres_tablespace.present docstring
    * 6a5f7cb346 Ignore states that do not have a numeric jid, i.e. 'req' (#36185)

ISSUE #35423: (Ch3LL) Stacktrace when running state.sls against an sls does not exist (refs: #36137)

ISSUE #33915: (mattglv) Orchestration runner output on Success vs Failures in 2016.3.0 (refs: #36137)

ISSUE #25664: (sdm24) 2015.5.2 MySQL Returner: salt-run jobs.lookup_jid doesn't return full result for highstate output (refs: #35559)

PR #36137: (cachedout) Allow highstate outputter to show all results @ 2016-09-12 16:37:49 UTC
  - PR #35559: (Jlin317) Fix highstate outputter when it’s given multiple results (refs: #36137)
  - 7b96197c5e Merge pull request #36137 from cachedout/issue_35423
  - 1e8431f2b8 Allow highstate outputter to show all results

ISSUE #35340: (dqminh) Custom modules are only resynced to minions at highstate (refs: #36217)
  - PR #36217: (cachedout) Docs clarification for module sync and state.apply

ISSUE #35480: (jelenak) 200 processes of salt-master (2016.3.2) (refs: #36184, #36555, #37254)

PR #36184: (DmitryKuzmenko) Disable signal handling while handling signal @ 2016-09-11 22:59:08 UTC
  - 6eb6655e17 Merge pull request #36184 from DSRCorporation/bugs/35480_master_shutdown
  - 229504efef Removed unused import.
  - ca8b7e076 Don't run the same signal handler twice. Catch os.kill errors.

PR #36203: (xiaoyunfei) fix owner of MultiprocessingLoggingQueue (refs: #37119) @ 2016-09-11 09:15:15 UTC
  - f11f093f8c Merge pull request #36203 from xiaoyunfei/logowner
- 74dc90c7bb cancel pr last
- 90e4a25dd0 Merge branch 'logowner' of https://github.com/xiaoanyunfei/salt into logowner
  * bd61b88fc8 fix log owner
  * 58160ed6c0 Merge branch '2016.3' of github.com:saltstack/salt into 2016.3
  * f2de71782b move back
  * b8214824fd add simplify code
  * aee9385c6b Merge branch '2016.3' of github.com:saltstack/salt into 2016.3
  * 1074b3355d Merge branch '2016.3' of github.com:saltstack/salt into 2016.3
  * ea0d74cd27 fix salt-api opts
- f8d87b2f2f fix logqueue owner
- PR #36193: (thatch45) Fix stack trace in salt-ssh gitfs
* PR #36188: (rallytime) [2016.3] Merge forward from 2015.8 to 2016.3 @ 2016-09-09 18:59:20 UTC
  - f035121291 Merge pull request #36188 from rallytime/merge-2016.3
  - 521a7b2470 Merge branch '2015.8' into '2016.3'
  - d4628f3c6b Allow additional kwargs in states.dockerng.image_present (#36156)
  - 24b0387b92 Back-port #36070 to 2015.8 (#36169)
  - 116d7ae3e5 If windows pkg db hasn't been created yet, refresh the db instead of stacktracing (#36008)
* ISSUE #35819: (cable2999) pkg.group_installed doesn't handle missing package group (refs: #saltstack/salt#35907)
* PR #35907: (rallytime) Catch CommandExecutionError when the group in group_installed doesn't exist @ 2016-09-09 10:14:16 UTC
  - 1d5f9d363b Merge pull request #35907 from rallytime/fixed-35819
  - d7380d38be requires_system_grains decorator needs a grains=None kwarg
  - b20f6b9384 Catch CommandExecutionError when group_installed doesn't exist
* ISSUE saltstack/salt#35972: (tjyang) DeprecationWarning: The "osmajorrelease" will be a type of an integer.
  (refs: #36068)
  - PR saltstack/salt#35637: (cachedout) Add Nitrogen release notes (refs: #36068)
* PR #36068: (rallytime) Remove grains type deprecation warning from 2016.3 @ 2016-09-09 10:00:50 UTC
  - 40127bbef5 Merge pull request #36068 from rallytime/fixed-35972
  - 2b7679ef6 Remove grains type deprecation warning from 2016.3
* ISSUE #36094: (UtahDave) Windows stacktraces on msgpack on Carbon (refs: #36152)
* PR #36152: (cachedout) Remove unnecessary unpack @ 2016-09-09 09:13:47 UTC
  - 24bd0373ad Merge pull request #36152 from cachedout/issue_36094
  - 95eb95a0f8 Remove unnecessary unpack
* PR #36158: (rallytime) [2016.3] Merge forward from 2015.8 to 2016.3 @ 2016-09-08 21:53:50 UTC
  - dc3a68ed8c Merge pull request #36158 from rallytime/merge-2016.3
  - 7f955bda0a Merge branch '2015.8' into '2016.3'
- 624702288 Fix issue with cp.push (#36136)
- 0e13118f6e Document owner kwarg for postgres_schema.present state function (#36147)
- 4cc8ea9577 Merge pull request #36146 from meaksh/tests-fixes-for-2015.8
  - 9f9aa4779c rename darwin_sysctl.py to mac_sysctl.py
  - 2cf636db89 modules.darwin_sysctl: __virtual__ return err msg.
  - f74ac15f50 Remove test for file dir behavior
  - c65ae9f20 Fix tests that assert CommandExecutionError (#32485)
  - f8c0b439b8 Fixed more lint
  - 63ff731009 Fixed tests
  - 04b1aa9c9c Fixed use of assert_has_calls in tests.
  - 46e4bb58be5 Fixed LoadAuthTestCase
  - 4e9733ad6d Rename dockerio.py unit tests to dockerio_test.py
  - ec0cc943e0 Make sure spm tests are picked up by runtests.
  - 260534849 Fix missing first data in stream when subscribing stream using a function ‘read_async’.
  - 305bab8e00 Fixed _interfaces_ifconfig output for SunOS test
  - b5ca02e867 Fix tests that assert CommandExecutionError (#32485)
  - 1f6340f6 Fix tests (#35693)
  - 5977f1f54c Skip utils_test if timelib is not installed (#32699)
  - d1b9a461e Fixing skipped boto tests to prevent errors if boto3 does not exists.
- c4dfe3887 Merge pull request #35954 from morganwillcock/upgrade-on-batteries
  - 10819470f2 win_pkg: report failure for failed launch of Scheduled Task
  - e0978220f7 win_pkg: allow minion upgrade when using batteries
- 94b7659304 Merge pull request #36129 from terminalmage/pygit2-ssl_verify
  - 640f0c17c6 pygit2: Prevent traceback on initial gitfs setup
- 7cdbc546f1 Back-port #36062 to 2015.8 (#36118)
  - PR #36170: (rallytime) Back-port #36154 to 2016.3
  - PR #36154: (DavidWittman) Remove unclosed backticks in walkthrough doc (refs: #36170)
- ISSUE #36055: (gladiatr72) 2016.3.3 -- missing salt-cloud events on the master event bus (refs: #36161)
- PR #36161: (jacobhammons) Adds #36055 to release notes @ 2016-09-08 17:11:36 UTC
  - 4cc8a841f Merge pull request #36161 from jacobhammons/relnotes
  - ecb9979be7 Adds #36055 to release notes
- PR #36139: (meaksh) Fixing unit tests for 2016.3 @ 2016-09-08 13:20:21 UTC
  - 1f909038fc Merge pull request #36139 from meaksh/tests-fixes-for-2016.3
  - 52a7ed605e Fixed _interfaces_ifconfig output for SunOS test
  - 158bcbff65 Fix tests that assert CommandExecutionError (#32485)
- 8b480167e1 Fix tests (#35693)
- 29814f9d43 Skip utils_test if timelib is not installed (#32699)
- d1d806f893 Fix PortageConfigTestCase in case of portage is not present
- 1c260e4bd0 Fix tests to prevent errors when libcloud is not present
- 71efbf28cd Fixing skipped boto tests to prevent errors if boto3 does not exists.

- **PR #36143**: (multani) doc: fix doc formatting for salt.states.mount @ 2016-09-08 13:11:03 UTC
  - 3eb3df55ad Merge pull request #36143 from multani/fix-doc-state-mount
  - 035a212a9b doc: fix doc formatting for salt.states.mount

- **ISSUE saltstack/salt#18419**: (jasonrm) salt-cloud fails to run as non-root user (refs: #35483)

- **ISSUE #36057**: (Inveracity) Regression in opennebula cloud provider (refs: #36070)

- **ISSUE #34806**: (jerrykan) salt-cloud ignores sock_dir when firing event (refs: #35483)

- **PR #36070**: (rallytime) Use __utils__ instead of salt.utils.cloud in opennebula driver (refs: #36169) @ 2016-09-08 01:18:45 UTC
  - **PR #35483**: (gtmanfred) use __utils__ in salt.cloud (refs: #35855, #37057, #36070)
  - 70da628018 Merge pull request #36070 from rallytime/fx-36057
  - de4f77cb8f Fixup failing test: need to mock __utils__ instead of salt.utils.cloud call
  - 25e3f2b4b8 Use __utils__ instead of salt.utils.cloud in opennebula driver

- **PR #36089**: (terminalmage) Support running git states / remote exec func as a different user in Windows @ 2016-09-08 01:17:23 UTC
  - b7556a2aeb Merge pull request #36089 from terminalmage/issue35565
  - 796156c5f5 Add attribution
  - 2e56527ead Move command logging to before win_runs
  - 91eafddda6 Pass the "password" param to git module functions
  - 7871065d32 Use "user" instead of "runas" in _git_run() helper
  - 5943b4662c Add "password" param to func which support the user parameter
  - 5c7b9f0341 Make "password" an explicit argument, not a kwarg

- **PR #35923**: (kstreee) Fixes a bug that Ctrl-c not working on Salt CLI. @ 2016-09-07 11:47:50 UTC
  - 45ba2e806b Merge pull request #35923 from kstreee/fx-cli-stalling
  - 6569267afc Fixes a bug that Ctrl-c not working on Salt CLI

- **ISSUE #18341**: (falzm) Dry-running state.highstate only returns the first change (refs: #36078)

- **PR #36078**: (thatch45) Failhard test=True fix @ 2016-09-07 05:10:35 UTC
  - 48dc5ad4ee Merge pull request #36078 from thatch45/failhard_test
  - 9b36904149 Fix failhard causing test=True to failhard too soon

- **ISSUE #34515**: (vermondcole) Please actually implement skip_verify for archive.extracted (refs: #34529)

- **PR #34529**: (Ch3LL) Add skip_verify for archive.extracted @ 2016-09-06 21:05:31 UTC
  - 4081176af Merge pull request #34529 from Ch3LL/add_skip_verify_archive
  - 38203e3d2c add tornado web app to serve up static file for test
- 617f5680e4 add windows path and add custom tar
- c5035118bf add skip_verify option to archive.extracted

• PR #36073: (rallytime) [2016.3] Merge forward from 2015.8 to 2016.3 @ 2016-09-06 19:45:48 UTC
  - fc41c744a0 Merge pull request #36073 from rallytime/merge-2016.3
  - e9c634685b Merge branch '2015.8' into '2016.3'
  - fa09050150 consul: fix formatting of consul.agent_join (#36061)
  - PR saltstack/salt#36030: (whiteinge) Add include_* kwargs to the *_dict key functions (refs: #36040)
  - PR #36040: (rallytime) Add docs for new kwargs added to the wheel key module
  - PR #36047: (whiteinge) Doc cherrypy deemphasize urlencoded

• PR #36039: (rallytime) [2016.3] Merge forward from 2015.8 to 2016.3 @ 2016-09-02 21:50:47 UTC
  - 74143999d3 Merge pull request #36039 from rallytime/merge-2016.3
  - 5f499cf4d1 Merge branch '2015.8' into '2016.3'
  - 1b39c7ed48 Merge pull request #35978 from DSRCorporation/bugs/28462_update_auth_data_on_reauth
    * 778ae9a9ff Update auth data on reauth.
  - b652271ddc Fix type error in networkfbsd osmajorrelease compare (#36016)
  - bc81818075 Merge pull request #36018 from meaksh/bp-36000-to-2015.8
    * 8c05d2aacc5 Lint for #35916
    * b5fe6100ee Check for single quote before splitting on single quote

• ISSUE saltstack/salt#35683: (JensRantil) Salt wheel key documentation improvements (refs: #35824, #saltstack/salt#35824)
  - PR saltstack/salt#35824: (rallytime) Add more documentation to the wheel key module (refs: #36038)
  - PR #36038: (rallytime) Back-port #35824 to 2016.3

  - d248ab0120 Merge pull request #36004 from rallytime/merge-2016.3
  - 318b1f21d Merge branch '2015.8' into '2016.3'
  - 67bf10cf8b Avoid traceback in mac_user.py when user.chhome is invoked from a user state (#35901)
  - 2da501071e Merge pull request #35967 from twangboy/improve_show_sls_2015.8
    * 2ed9a82ef8 Allow full path to be passed to show_sls
  - d86ba15b3 Merge pull request #35981 from cachedout/cptestcase_license
    * dd56f2dd00 Update Salt’s licensing information to include cptestcase
- PR #35952: (twangboy) Load UserProfile when using RunAs (2016.3) @ 2016-09-01 15:18:15 UTC
  - f7b85cb70b Merge pull request #35952 from twangboy/fix_win_runas_2016.3
  - 3721a09ea3 Load UserProfile on RunAs
- PR #35959: (rallytime) [2016.3] Merge forward from 2015.8 to 2016.3 @ 2016-08-31 22:14:54 UTC
  - b83a35e4d Merge pull request #35959 from rallytime/merge-2016.3
  - bb4605fbee Merge branch '2015.8' into '2016.3'
  - 0f0f15d048 Merge pull request #35956 from jacobhammons/dot12
    * 3e21e35933 Version docs to 2015.8.12
  - d2db4ea7a2 cachedir should be /cloud not /master (#35897)
  - f4edcc0d66 Better logging when file_recv_max_size is exceeded (#35914)
- PR #35955: (jacobhammons) Version docs to 2016.3.3 @ 2016-08-31 20:35:55 UTC
- a87b91a8ea Merge pull request #35955 from jacobhammons/dot3
- ac8fe6f9e Version docs to 2016.3.3

**ISSUE #875:** (dhoffutt) state pkg won’t install package nscd (refs: #35865)
- PR #35865: (jacobhammons) Fix incremental doc builds - OS X, postgres returner, tcp transport doc updates

**ISSUE #35829:** (amontalban) FreeBSD pkg.latest speed improvement (refs: #35904)
- PR #35904: (amontalban) Fixes #35829 for branch 2016.3
- PR #35931: (vutny) Salt Cloud: add centos default user for official CentOS AMIs
- PR saltstack/salt#35892: (cachedout) Fixup Docker test (refs: #35926)
- PR saltstack/salt#35581: (pbdeuchler) Correctly check if image is in current tags (refs: #35926)
- PR #35926: (ticosax) [dockerng] Mention that docker image names must be given with repository
- PR #35981: (pbdeuchler) Correctly check if image is in current tags (refs: #35926)

**ISSUE #35825:** (tjyang) "drac__virtual__ returned False" from salt-run drac.version host (refs: #35868)
- PR #35868: (rallytime) Add more helpful return messages for drac runner @ 2016-08-31 01:33:27 UTC
- ca06c62900 Merge pull request #35868 from rallytime/fixed-35825
- 00ae17248e Update error message to be more helpful and fix doc formatting
- 30a422bfe0 Add more helpful return messages for drac runner

**ISSUE #35903:** (rallytime) [2016.3] Merge forward from 2015.8 into 2016.3 @ 2016-08-30 17:15:36 UTC
- 95b89d9ce9 Merge pull request #35903 from rallytime/merge-2016.3
- 9e55f5e5f5 Merge branch '2015.8' into '2016.3'
- 08e10f69eb Clarifies how to create aliased functions (#35891)
- 6dd5f68a08 Merge pull request #35856 from vutny/2015.8
  * eceedadfa5 salt-cloud: fix path to Salt Master socket dir
- 336d1a700d Merge pull request #35880 from terminalimage/issue35747
  * 123a611066 pacman.py: Fix incorrect return in pkg.latest_version
- 6383451c99 Merge pull request #35884 from terminalimage/clarify-pkg-latest-logic
  * b0b419d1d8 Fix condition for Gentoo USE flag update
  * 154247d1e6 Add clarifying comments to the pkg.latest state

**ISSUE saltstack/salt#18419:** (jasonrm) salt-cloud fails to run as non-root user (refs: #35483)

**ISSUE #34806:** (jerrykan) salt-cloud ignores sock_dir when firing event (refs: #35483)

**PR #35855:** (vutny) [REGRESSION] salt-cloud: fix path to Salt Master socket dir (refs: #35856) @ 2016-08-30 07:09:04 UTC
- PR #35483: (gtmanfred) use __utils__ in salt.cloud (refs: #35855, #37057, #36070)
- cbf8081401 Merge pull request #35855 from vutny/salt-cloud-fix-sock_dir
- a662ea5337 salt-cloud: fix path to Salt Master socket dir

**PR #35881:** (whiteinge) Add fail-safe in case Salt gives us data we can't serialize @ 2016-08-30 06:43:11 UTC
- f0987cf27a Merge pull request #35881 from whiteinge/salt-api-catch-serializer-error
- 6e27fad21f Add fail-safe in case Salt gives us data we can’t serialize

- **ISSUE #35837:** (JensRantil) Doc improvement: Mention engine under extension modules (refs: #35864)
  - **PR #35864:** (rallytime) Add engines to list of extension module options in master config docs

- **ISSUE #35835:** (JensRantil) Incorrect SQS config documentation statement (refs: #35861)
  - **PR #35861:** (rallytime) Fix IAM roles statement to be boto version specific in sqs_events

- **ISSUE #35834:** (JensRantil) Incorrect SQS engine config (refs: #35860)
  - **PR #35860:** (rallytime) Fix doc formatting for sqs_events engine example config

- **PR #35859:** (rallytime) [2016.3] Merge forward from 2015.8 to 2016.3 @ 2016-08-29 18:21:04 UTC
  - 96747bc3bb Merge pull request #35859 from rallytime/merge-2016.3
  - 5f93d682aa Merge branch '2015.8' into '2016.3'
  - eda2ae0add Merge pull request #35781 from thatch45/ssh_deploy_more
    - 2558dcc100 follow up on the re-deploy if there is a checksum mismatch
  - 165237412c Merge pull request #35815 from gtmanfred/2015.8
    - 805d43598e list_nodes_min should return a minimum dictionary
  - b12c6577d2 Merge pull request #35833 from terminalmage/2015.8-top-file-merging-docs
    - c534d88280 More clarification/correction in minion docs
    - e966ea4885 One more tweak to top file merging docs

- **ISSUE #34478:** (hujunya) makedir bug in the file module (refs: #35849)

- **PR #35849:** (theredcat) Fix potential infinite loop with no error when using recursive makedirs @ 2016-08-29 11:37:19 UTC
  - dc705ff675 Merge pull request #35849 from theredcat/fix_file_makedirs_infinite_loop
  - 86d5398b28 Fix potential infinite loop with no error when using recursive makedirs

- **PR #35682:** (vutny) [BACKPORT] Fix empty fun_agrs field in Reactor generated events @ 2016-08-29 04:11:06 UTC
  - **PR #35659:** (vutny) Fix empty fun_agrs field in Reactor generated events (refs: #35682)
  - **PR #35059:** (vutny) Add fun_agrs field to events generated by execution of Master modules (refs: #35659, #35682)
  - 433743f609 Merge pull request #35682 from vutny/backport-35659
  - 78d16a8057 [BACKPORT] Fix empty fun_agrs field in Reactor generated events

- **ISSUE #34973:** (szjur) Syndic stops forwarding job results if the local salt-master is restarted (refs: #35792)

- **PR #35792:** (DmitryKuzmenko) Reconnect syndic to event bus if master disappeared. @ 2016-08-29 02:13:19 UTC
  - 30c2db7b09 Merge pull request #35792 from DSRCorporation/bugs/34973_syndic_reconnect_master_2016.3
  - 9afdbb0e97 Reconnect syndic to master event bus if master disappears.
  - ab1af002e Fixed syndic event bus connection.
  - ea8e1385c1 Fixed syndic unhandled future exception if master is stopped.

- **PR #35817:** (rallytime) [2016.3] Merge forward from 2015.8 to 2016.3 @ 2016-08-26 20:44:18 UTC
- 43c08ae431 Merge pull request #35817 from rallytime/merge-2016.3
- e8e73b55ac Merge branch '2015.8' into '2016.3'
- d285fe64b7 Merge pull request #35811 from rallytime/bp-35576
  - 04c063b315 Updated user.py to redact password when test=true
- e212c55b7a Schedule documentation update (#35745)
- eb4df299b Better unicode handling in gitfs (#35802)
- 0ee237a9cb Remove extra "to" in top.rst docs (#35808)
- 2fc61763d8 Correct the top_file_merging_strategy documentation (#35774)
- PR #35788: (hu-dabao) fix 34241, webutil.useradd_all is deprecated

- ISSUE saltstack/salt#33536: (murzick) pkgrepo.managed does not disable a yum repo with "disabled: True" (refs: #35055)
- ISSUE #33536: (murzick) pkgrepo.managed does not disable a yum repo with "disabled: True" (refs: #35055, #35806)
  - PR #35810: (rallytime) Back-port #35806 to 2016.3
  - PR #35806: (rallytime) Bump the deprecation warning in pkgrepo state to Nitrogen (refs: #35810)
  - PR #35055: (galet) #33536 pkgrepo.managed does not disable a yum repo with "disabled: True" (refs: #35055)

  - PR #35796: (fix7) Fix #35741
  - PR #35807: (jacobhammons) Adds mock for tornado.locks
  - PR #35800: (alexander-bauer) Trivial documentation spelling fix
- PR #35763: (isbm) Sphinx crash: documentation config fix @ 2016-08-25 21:12:39 UTC
  - 9b5ee2155e Merge pull request #35763 from isbm/isbm-doc-conf-sphinx-crashfix
  - a56ae4e8f5 Configure importing Mock to handle 'total' method from psutils properly
  - 9c057d0266 Return psutil back to the list of mocked imports
  - 3d7758461e Improve Mock to be flexible and able to mock methods from the mocked modules
- ISSUE #35771: (bdrung) Spelling errors in salt 2016.3.2 (refs: #35773)
  - PR #35773: (rallytime) Documentation spelling fixes
- PR #35767: (rallytime) [2016.3] Merge forward from 2015.8 to 2016.3 @ 2016-08-25 16:09:37 UTC
  - e355c1cf90 Merge pull request #35767 from rallytime/merge-2016.3
  - 8ad6a12c80 Merge branch '2015.8' into '2016.3'
  - 2a12795bac Fixes Windows download paths (#35742)
- ISSUE #20575: (starchy) "salt --subset=n" appears to always choose the same nodes (refs: #35753)
- PR #35753: (rallytime) Fixup the unit.client_test.LocalClientTestCase.test_cmd_subset from #35720 @ 2016-08-25 15:55:23 UTC
  - PR #35720: (hu-dabao) fix 20575, make subset really return random subset (refs: #35753)
  - b3f6367621 Merge pull request #35753 from rallytime/fx-client-unit-test
- 92f8c836e8 Add cmd_mock back in to function spec
- a671f0a092 Fixup the unit.client_test.LocalClientTest.test_cmd_subset from #35720

- **ISSUE #35458**: (iggy) SALT.STATES.APACHE_MODULE needs version annotations (refs: #35732)
  - **PR #35732**: (rallytime) Add versionadded for enabled function in apache_module state

- **PR #35373**: (rallytime) [2016.3] Merge forward from 2015.8 to 2016.3 @ 2016-08-24 19:48:45 UTC
  - bab0e3d449 Merge pull request #35373 from rallytime/merge-2016.3
  - 61e37d5956 Merge branch '2015.8' into '2106.3'
  - 06a75be8bd Merge pull request #35701 from gtmanfred/2015.8
    * 2d2bc1ffe8 use aws.get_location in s3 modules
  - 79bc01b88c Make test runs behave better (#35708)

- **PR #35729**: (cachedout) Remove docs mocks for msgpack and psutils @ 2016-08-24 14:42:06 UTC
  - 7877ff1d5e Merge pull request #35729 from cachedout/fix_docs_build
  - fdb01d5ad Remove docs mocks for msgpack and psutils

- **PR #35628**: (jf) Fix user.present state reporting for groups when remove_groups=false @ 2016-08-24 08:15:31 UTC
  - 962e493304 Merge pull request #35628 from jf/fix_user.present_reporting_when_remove_groups=false
  - 1f818c832e Fix user.present state reporting for groups when remove_groups=false

- **PR #35696**: (xiaoanyunfei) fix maximum recursion depth bug @ 2016-08-24 08:01:16 UTC
  - 02d866c6550 Merge pull request #35696 from xiaoanyunfei/2016.3
  - 5db925526 fix maximum recursion depth

- **PR #35720**: (hu-dabao) fix 20575, make subset really return random subset (refs: #35753) @ 2016-08-24 07:03:58 UTC
  - 79d10ae2d Merge pull request #35720 from hu-dabao/fix-20575
  - 70af980c01 fix 20575, make subset really return random subset

- **PR #35700**: (rallytime) [2016.3] Merge forward from 2015.8 to 2016.3 @ 2016-08-23 17:23:40 UTC
  - 5d0b9a248e Merge pull request #35700 from rallytime/merge-2016.3
  - 9e9923c3f4 Merge branch '2015.8' into '2016.3'
  - aee5b62542 Merge pull request #35680 from terminalmage/issue35630
    * d76659a63a Don't use six.text_type() in salt.utils.gitfs
  - 746792388 Fixup doc formatting for the sqs_events engine (#35663)

- **PR #35634**: (hu-dabao) fix 34922, StopIteration should not throw exception out @ 2016-08-23 08:13:08 UTC
  - f305389172 Merge pull request #35634 from hu-dabao/fix-34922
  - fe338f41f fix 34922, StopIteration should not throw exception out

- **PR #35679**: (twangboy) Revert to vcredist 12 (2013) @ 2016-08-23 08:05:40 UTC
  - e45aa55d79 Merge pull request #35679 from twangboy/change.vcredist.version.2016.3
  - 3d6d473d48 Revert to vcredist 12 (2013)

- **PR #35662**: (rallytime) [2016.3] Merge forward from 2015.8 to 2016.3 @ 2016-08-22 19:03:43 UTC
- 9fe0972761 Merge pull request #35662 from rallytime/merge-2016.3
- 1d819d7cc2 Merge branch '2015.8' into '2016.3'
  * 399e9f57cc Update release notes for 2015.8.12 (#35614)
  * f7f8221169 Everything in the sample master config file should be commented out (#35611)
  * c9070c212f Merge pull request #35569 from rallytime/test-for-35384
    - 30f42d5352 Write test for multiple unless commands where 1st cmd passes and 2nd fails
- PR #35661: (justinta) Backport #35627 to 2016.3
- PR #35627: (cachedout) Comment boto lambda test (refs: #35661)

* PR #35615: (hu-dabao) fix 35591, verify the acl file exist before proceed @ 2016-08-21 04:41:32 UTC
  - 67692f868c Merge pull request #35615 from hu-dabao/fix-35591
  - 402b83e4d3 change file verification to exist
  - 7355eb4ecd move python lib import after absolute_import
  - 69a2427670 fix 35591, verify the acl file exist before proceed

* PR #35485: (cro) Cassandra returner bugfixes and documentation. @ 2016-08-20 02:42:28 UTC
  - de6ca3909 Merge pull request #35485 from cro/jpmc_cass_return
  - 0b01a7a266 Six import for range.
  - 7e87d4170d Fix Py3 lint?
  - d4336d011c [1,2,3] -> range(1,4)
  - cec7f6a7ec remove unneeded import
  - e3155345f Add timeout documentation.
  - 901ab8b74c Remove unnecessary log statements
  - 1954c1a3f3 Update cassandra returner for JPMC

* ISSUE #35519: (morganwillcock) win_dism state doesn’t handle all success return codes (refs: #35520)

* PR #35520: (morganwillcock) Check for all success return codes in win_dism state @ 2016-08-20 02:35:01 UTC
  - edeff51d4 Merge pull request #35520 from morganwillcock/dism-return-codes
  - 0b95b8569 Check for all success return codes in dism state

* PR #35616: (xbglowx) Remove duplicate auth_tries in minion docs @ 2016-08-20 02:32:50 UTC
  - 27211dbd64 Merge pull request #35616 from xbglowx/2016.3
  - 280f0fdcc Remove duplicate auth_tries in minion docs

* ISSUE #34992: (szjur) Syndic strips vital parts of events (such as 'retcode' and 'success') (refs: #35552)

* PR #35552: (DmitryKuzmenko) Syndic fix: don’t strip ‘retcode’ and ‘success’ from events. @ 2016-08-20 02:00:40 UTC
  - 25ac9bac6 Merge pull request #35552 from DSRCorporation/bugs/34992_syndic_strip_retcode
  - d03629g6f6f Syndic fix: don’t strip ‘retcode’ and ‘success’ from events.

* ISSUE #25664: (sdm24) 2015.5.2 MySQL Returner: salt-run.jobs.lookup_jid doesn’t return full result for high-state output (refs: #35559)
28.2.57 Salt 2016.3.5 Release Notes

Version 2016.3.5 is a bugfix release for 2016.3.0.

Statistics

- Total Merges: 190
- Total Issue References: 112
- Total PR References: 281

Security Fixes

CVE-2017-5192 local_batch client external authentication not respected

The LocalClient.cmd_batch() method client does not accept external_auth credentials and so access to it from salt-api has been removed for now. This vulnerability allows code execution for already-authenticated users and is only in effect when running salt-api as the root user.

CVE-2017-5200 Salt-api allows arbitrary command execution on a salt-master via Salt's ssh_client

Users of Salt-API and salt-ssh could execute a command on the salt master via a hole when both systems were enabled.

We recommend everyone on the 2016.3 branch upgrade to a patched release as soon as possible.

Improved Checksum Handling in file.managed, archive.extracted States

When the source_hash argument for these states refers to a file containing checksums, Salt now looks for checksums matching the name of the source URI, as well as the file being managed. Prior releases only looked for checksums matching the filename being managed. Additionally, a new argument (source_hash_name) has been added, which allows the user to disambiguate ambiguous matches when more than one matching checksum is found in the source_hash file.

A more detailed explanation of this functionality can be found in the file.managed documentation, in the section for the new source_hash_name argument.

Changelog for v2016.3.4..v2016.3.5

Generated at: 2018-05-27 05:09:33 UTC

• PR #38833: (Ch3LL) add 2016.3.5 changelog to release notes @ 2017-01-19 23:27:26 UTC
  – a04ab86da1 Merge pull request #38833 from Ch3LL/add_release_notes_2016.3.5
  – 374dc1ab88 skip 2016.3.5 due to :doc: references
  – 31f324c4ff add 2016.3.5 changelog to release notes
• PR #38812: (rallytime) Update pyobjects test to be a list @ 2017-01-18 21:06:01 UTC
  – d140f64e4b Merge pull request #38812 from rallytime/pyobjects-test
  – f3e84c1ab7 Update pyobjects test to be a list
• ISSUE #36598: (ikkaro) CloudClient vmware driver reusing SI bug (refs: #38813)
• PR #38813: (gtmanfred) catch SIGPIPE in vmware connection @ 2017-01-18 21:05:42 UTC
  – 50f03f8057 Merge pull request #38813 from gtmanfred/2016.3
  – ce3472ec2c catch SIGPIPE in vmware connection
• PR #38809: (twangboy) Fix get_hostname to handle longer computer names @ 2017-01-18 19:32:00 UTC
  – 23b8b47258 Merge pull request #38809 from twangboy/fix_hostname_2016.3
  – d57a51f9f9 Fix tests for get_hostname
  – 7ca3fd7484 Fix get_hostname to handle longer computer names
• ISSUE #38388: (johje349) No INFO logs in minion log file (refs: #38808)
• PR #38808: (vutny) Fix #38388 @ 2017-01-18 18:19:36 UTC
- 103bbdde8 Merge pull request #38808 from vutny/fix-38388
- 9bd203ffcc Fix #38388

**ISSUE #38604** (jsandas) Using "batch" with saltmod errors with "ValueError: need more than 2 values to unpack" (refs: #38668)

**PR #38668** (terminalmage) Fix proposal for #38604 @ 2017-01-18 17:53:09 UTC
- f3ae3cd5c8 Merge pull request #38668 from terminalmage/issue38604
- 0ea97cdad9 Merge pull request #10 from cachedout/pr-38668
  * db81af035 Munge retcode into return data for batching
  - a642a995dc Return the ret data from batch execution instead of raw data

**ISSUE #38622** (mikejford) Incorrect saltenv argument documentation in salt.modules.state (refs: #38789)

**PR #38789** (rallytime) Update some saltenv refs to environment in salt.modules.state docs @ 2017-01-18 15:39:22 UTC
- c6a19a9e5a Merge pull request #38789 from rallytime/fix-38622
- af41fe0c6e Update some saltenv refs to environment in salt.modules.state docs

**PR #38790** (cachedout) Fix typo in pyobjects test @ 2017-01-18 15:38:57 UTC
- e0bf700020 Merge pull request #38790 from cachedout/fix_pyobjects_test_typo
  - a66ab5f0f Fix typo in pyobjects test

**ISSUE #38629** (Arabus) Conflicting documentation about default value of pillar opts (refs: #38792)

**PR #38792** (rallytime) Update pillar tutorial lanuage regarding pillar_opts settings @ 2017-01-18 15:38:19 UTC
- 6e9785dea Merge pull request #38792 from rallytime/fix-38629
- 1e125e2844 Update pillar tutorial lanuage regarding pillar_opts settings

**PR saltstack/salt#38707** (alexbleotu) Fixed prepending of root_dir override to the other paths (refs: #38796)

**PR #38796** (cachedout) Revert "Fixed prepending of root_dir override to the other paths" @ 2017-01-17 23:18:18 UTC
- 3417adc617 Merge pull request #38796 from saltstack/revert-38707-root_dir_fix-gh
  - cb080f3b8 Revert "Fixed prepending of root_dir override to the other paths"

**ISSUE #38524** (rbjorklin) salt-api seems to ignore rest_timeout since 2016.11.0 (refs: #38585, #38527)

**ISSUE #38479** (tyeapple) api_logfile setting takes no effect (refs: #38585)

**PR #38585** (rallytime) Follow up to PR #38527 @ 2017-01-17 18:40:01 UTC
- PR #38570: (rallytime) [2016.11] Merge forward from 2016.3 to 2016.11 (refs: #38585)
- PR #38560: (Ch3LL) fix api logfile (refs: #38585)
  - PR #38527: (rbjorklin) salt-api no longer forces the default timeout (refs: #38585)
  - bab3479a3c Merge pull request #38585 from rallytime/follow-up-38527
  - 05587201b6 Pylint fix: add line at end of file
  - fa01367599 Keep a copy of the DEFAULT_API_OPTS and restore them after the test run
  - 2ad07634d9 Test clean up
- fd2ee7db30 Add some simple unit tests for salt.config.api_config function
- 3d2feca83b Make sure the pidfile and log_file values are overridden by api opts
- 1f6b540e46 Make sure the pidfile and log_file values are overridden by api opts
- 04d307f917 salt-api no longer forces the default timeout

**PR #38707:** (alexbleotu) Fixed prepending of root_dir override to the other paths @ 2017-01-17 15:40:13 UTC
- 0fb6bb7b77 Merge pull request #38707 from alexbleotu/root_dir_fix-gh
- 0ba8c88be3 Fixed prepending of root_dir override to the other paths

**PR #38774:** (vutny) DOCS: add C++ compiler installation on RHEL required for bundled 0mq @ 2017-01-17 15:21:00 UTC
- 96c9dc10f7 Merge pull request #38774 from vutny/dev-test-docs
- 4620dc4afa DOCS: add C++ compiler installation on RHEL required for bundled 0mq

**PR #38749:** (vutny) pkg build modules throw better exception message if keyid wasn't found @ 2017-01-17 02:13:08 UTC
- aedfb7a43 Merge pull request #38749 from vutny/pkg-build-better-exception-msg
- 53f2be5b21 pkg build modules throw better exception message if keyid wasn't found

**PR #38743:** (rallytime) [2016.3] Merge forward from 2015.8 to 2016.3 @ 2017-01-17 01:46:01 UTC
- 8466b34e82 Merge pull request #38743 from rallytime/merge-2016.3
- d24776f5e9 Merge branch '2015.8' into '2016.3'
- 6869621ed1 Merge pull request #38731 from rallytime/merge-2015.8
  - 9eb191b6ac Pylint fix
  - b910499dbe Various follow up fixes
  - e8309a6bbf Add release notes for 2015.8.13
  - f881f36b77 Merge pull request #20 from rallytime/2015.8.12_follow_up-batch-tests
    - 34282322c0 Clean up tests and docs for batch execution
  - c80b20b957 Merge pull request #19 from whiteinge/batchclient
    - 3d8f3d18f6 Remove batch execution from NetapiClient and Saltnado
  - 97b06f4923 Lintfix
  - d1516664f7 Add explanation comment
  - 62f2c87080 Add docstring
  - 9b6a786aeb Explain what it is about and how to configure that
  - 5ea3579e10 Pick up a specified roster file from the configured locations
  - 3a8614c5df Disable custom rosters in API
  - c0e5a1171d Add roster disable flag
  - 9c599b98f Merge pull request #38602 from terminalmage/fix-boto-test
    - 3424a108ac Fix failing unit.states.boto_vpc_test.BotoVpcRouteTableTestCase.test_present_with_routes

**ISSUE #38747:** (jackywu) There is no code to use parameter 'event_publisher_pub_hwm' in saltstack-2016.3 (refs: #38723)
• PR #38723: (rallytime) Remove "event_publisher_pub_hwm" and "salt_event_pub_hwm" from config/__init__.py @ 2017-01-15 18:36:14 UTC
  - PR #29294: (skizunov) ZeroMQ no longer required when transport is TCP (refs: #38723)
    - a642def79 Merge pull request #38723 from rallytime/fix-38674
    - 706c885f55 Remove "event_publisher_pub_hwm" and "salt_event_pub_hwm" from config/__init__.py
• PR #38669: (rallytime) Update bootstrap script version to latest release @ 2017-01-15 18:03:27 UTC
  - fc54af10b Merge pull request #38669 from rallytime/update-bootstrap-script
  - 78ba76e34c Update bootstrap script version to latest release
• PR #38693: (twangboy) Update jinja2 to 2.9.4 @ 2017-01-15 14:40:46 UTC
  - 50d417f267 Merge pull request #38693 from twangboy/update_jinja
  - e0c7e5549b Update jinja2 to 2.9.4
• PR #38739: (vutny) DOCS: correct examples of running test suite @ 2017-01-15 14:35:47 UTC
  - f4233bb18d Merge pull request #38739 from vutny/fix-runtests-doc
  - b872bb63f6 DOCS: correct examples of running test suite
  - PR #38735: (vutny) DOCS: add links to File State Backups page where necessary
  - PR #38720: (dereckson) Proofread jinja_to_execution_module tutorial
• ISSUE #36548: (abonillasuse) openstack auth with nova driver (refs: #38647)
• PR #38647: (gtmanfred) Allow novaclient to use keystoneauth1 sessions for authentication @ 2017-01-10 17:48:26 UTC
  - 7b850d472d Merge pull request #38647 from gtmanfred/nova
  - 5be9b60851 add documentation about using keystoneauth for v3
  - 7b657ca4ae add the ability to use keystone v2 and v3
  - 5646ae1b34 add ability to use keystoneauth to authenticate in nova driver
• ISSUE #38648: (ericuldall) No release file error from PPA on Ubuntu (refs: #38650)
• ISSUE #38572: (COLABORATI) ppa:saltstack/salt failure (refs: #38650)
• ISSUE #34504: (AvinashDeluxeVR) Installation documentation for Ubuntu server and Windows minion leads the user to use different salt versions. (refs: #38650)
• PR #38650: (rallytime) Remove the installation instructions for out-of-date community ppa @ 2017-01-10 17:47:45 UTC
  - 383768d383 Merge pull request #38650 from rallytime/remove-ubuntu-ppa-docs
  - 30429b2e44 Remove the installation instructions for out-of-date community ppa
• ISSUE #38087: (UtahDave) The 'data' field in the return from a minion below a syndic is wrapped in an extra 'data' field. (refs: #38657)
• PR #38657: (DmitryKuzmenko) Publish the 'data' field content for Syndic events @ 2017-01-10 16:59:33 UTC
  - 7df56e3b5 Merge pull request #38657 from DSRCorporation/bugs/38087_syndic_event_format_fix
  - 594c33f396 Publish the 'data' field content for Syndic events
• PR #38649: (Ch3LL) fix unit.modules.file_test @ 2017-01-10 16:44:45 UTC
  - 83987511fd Merge pull request #38649 from Ch3LL/test_apply_template
Salt Documentation, Release 3002.2

- 47f8b68e0b fix unit.modules.file_test

- ISSUE #37355: (Firewire2002) salt-ssh - ImportError: No module named backports.ssl_match_hostname (refs: #38626, #saltstack/salt#37358`

  - **PR #33601**: (mchugh19) Fix slack engine to run on python2.6 (refs: #38531)
    - 0056620a53 Merge pull request #38531 from rallytime/bp-33601
    - c36cb9825 remove the unnecessary double trigger
    - 38414493bf fix spacing lint error
    - 8c1d0f710 Remove unnecessary type from alias commands. Deduplicate alias handling to autodetect function selection. Add error reporting to slack connectivty problems. Cleanup slack's unicode conversion
    - c2f23bc45e Fix slack engine to run on python2.6
- **ISSUE #38187**: (curiositycasualty) username/password saved as cleartext when using URIs with user:pass@ format (refs: #38541)
- **PR #38541**: (techhat) Strip user:pass from cached URLs @ 2017-01-04 15:39:57 UTC
  - 50242c7f17 Merge pull request #38541 from techhat/issue38187
  - eae3a435dd Strip user:pass from cached URLs
- **ISSUE #30454**: (favoretti) Using yaml serializer inside jinja template results in unicode being prepended by 'python/unicode' (refs: #30481, #38554)
- **PR #38554**: (multani) Fix YAML deserialization of unicode @ 2017-01-04 15:31:16 UTC
  - **PR #30481**: (basepi) Add yaml_safe jinja filter (refs: #38554)
– Salt Documentation, Release 3002.2

- 325dc56e59 Merge pull request #38554 from multani/fix/30454
- 2e7f743371 yaml: support unicode serialization/deserialization
- df76113c5e jinja: test the "yaml" filter with ordered dicts
- f7712d1417 Revert "Add yaml_safe filter"
- PR #38536: (UtahDave) add note about pyVomomi locale workaround

- ISSUE #38353: (Ch3LL) salt-cloud gce specifying (refs: #38542)
  - PR #38542: (Ch3LL) fix gce image bug

- ISSUE #38449: (swalladge) Parsing issues in list_tab (salt/modules/cron.py) (refs: #38487)

- PR #38487: (gtmanfred) Fix crontab issues with spaces @ 2017-01-01 20:33:29 UTC
  - ec60f9c721 Merge pull request #38487 from gtmanfred/2016.3
  - 048b9f6b9d add test
  - c480c11528 allow spaces in cron env
  - c529ec83c4 allow crons to have multiple spaces

- ISSUE #37684: (thusoy) State execution duration is timezone-dependent (refs: #38491)

- PR #38491: (gtmanfred) Use UTC for timing in case timezone changes @ 2017-01-01 20:30:57 UTC
  - c5ba11b5e0 Merge pull request #38491 from gtmanfred/timing
  - 79368c7528 Use UTC for timing in case timezone changes

- ISSUE #38472: (jinn) file.managed Unable to manage file: 'hash_type' (2016.3.4) (refs: #38503)

- PR #38503: (jinn) Hash type fallback for file management @ 2017-01-01 17:36:51 UTC
  - 86f0aa0bb3 Merge pull request #38503 from jinn/issue_38472_jinn
  - 0cd9d299f Hash type fallback for file management

- PR #38457: (bshelton229) Stops git.latest checking for local changes in a bare repo @ 2016-12-30 14:28:47 UTC
  - cd2ba4bd1b Merge pull request #38457 from bshelton229/git-latest-head-bug
  - 558e7a771a Stops git.latest checking for local changes in a bare repo

- PR #38385: (dragon788) Use unambiguous long names with double dashes @ 2016-12-29 17:10:48 UTC
  - 36e21b22cb Merge pull request #38385 from dragon788/2016.3-double-dash
  - 86c4b56f47 Newline for lint compat
  - 9d9b686057 Address review comments, consistency of quotes
  - df9bd5e7f9 Use unambiguous long names with double dashes

- ISSUE #38209: (limited) Accepting a minion causes tornado to exit (refs: #38474)

- PR #38474: (cachedout) Allow an existing ioloop to be passed to salt-key @ 2016-12-29 16:28:51 UTC
  - 59f2560d88 Merge pull request #38474 from cachedout/key_loop
  - de504538e1 Allow an existing ioloop to be passed to salt-key

- ISSUE #38438: (ji) file.line with mode=delete breaks on empty file (refs: #38467)

- PR #38467: (gtmanfred) file.line fail with mode=delete @ 2016-12-28 20:00:33 UTC
  - 3d0c752acd Merge pull request #38467 from gtmanfred/2016.3

28.2. Previous Releases 5135
- 7b7c6f3878 file.line fail with mode=delete

- **PR #38434**: (slinn0) Make sysctl.persist fail when failing to set a value into the running kernel @ 2016-12-27 15:37:53 UTC
  - 940025d5c4 Merge pull request #38434 from slinn0/issue_38433_fixes
  - 22a87a33fe Fixes for https://github.com/saltstack/salt/issues/38433
  - **PR #38421**: (rallytime) Update deprecation notices to the correct version
  - **PR #38420**: (rallytime) Removed various deprecation notices from salt/modules/* files (refs: #38421)

- **ISSUE #38282**: (sash-kan) file.managed fails when file (which contains utf-characters in the name) exists (refs: #38415)
  - **PR #38415**: (terminalmage) file.managed: Fix failure when filename contains unicode chars

- **PR #38419**: (Ch3LL) fix scsci docs example @ 2016-12-22 18:57:51 UTC
  - 2c6b5d4055 Merge pull request #38419 from Ch3LL/fixed_scsi
  - 234043b8bb fix scsci docs example
  - **PR #38407**: (terminalmage) Improve pillar documentation

- **ISSUE #38372**: (fanirama) Issue with cron.file. Source: salt://path/to/crontab_file not found (refs: #38398)

- **PR #38398**: (terminalmage) Fix call to file.get_managed in cron.file state @ 2016-12-22 16:46:14 UTC
  - 423b1fd4ff Merge pull request #38398 from terminalmage/issue38372
  - c370daa914 Fix call to file.get_managed in cron.file state
  - **PR #38382**: (heewa) Fix http.query when result has no text

- **PR #38390**: (meaksh) Add "try-restart" to fix autorestarting on SUSE systems @ 2016-12-21 16:06:24 UTC
  - b57b5c7d38 Merge pull request #38390 from meaksh/2016.3-fix-try-restart-for-autorestarting-on-SUSE-systems
  - de6ee05c0 add try-restart to fix autorestarting on SUSE systems

- **PR #38221**: (UtahDave) Fix default returner @ 2016-12-20 20:34:36 UTC
  - 2c6a39760a Merge pull request #38221 from UtahDave/fixed_default_returner
  - 385642765b remove a blank line to satisfy linter
  - 9c248aa14c validate return opt, remove default.
  - 88b37f9fe7 specify allowed types and default for "returner"
  - 11863a6f6e add examples of default minion returners
  - e7c6012655 add support for default returners using return

- **PR #38288**: (terminalmage) archive.extracted: don't try to cache local sources (2016.3 branch) @ 2016-12-18 13:07:11 UTC
  - 98902ef992 Merge pull request #38288 from terminalmage/archive-extracted-local-source-2016.3
  - 84565e379f75 Update tests to reflect change in cache behavior
  - 5a08d7e70a archive.extracted: don't try to cache local sources (2016.3 branch)

- **PR #38312**: (cro) Backport feature allowing proxy config to live in pillar OR /etc/salt/proxy @ 2016-12-18 12:39:01 UTC
  - bf37667f8a Merge pull request #38312 from cro/proxy_config_in_cfg
- 2006c4000e Typo
- 689d95b10f Backport feature allowing proxy config to live in pillar OR /etc/salt/proxy.

**ISSUE #12788**: (whiteinge) Comb through docs to replace :doc: roles with :ref: (refs: #38320)

**PR #38320**: (rallytime) Cleanup doc internal markup references @ 2016-12-18 12:31:28 UTC
- c83db5a785 Merge pull request #38320 from rallytime/cleanup-doc-refs
- 62978cb7a0 Don't check the doc/conf.py file for doc markup refs
- 770e732d76 Add a unit test to search for new doc markup refs
- 5c42a361a0 Remove ".doc:" references from all doc/topics/installation/* files
- 23bce1c929 Remove ".doc:" references from all doc/topics/releases/* files
- 4aafa41d22 Remove ".doc:" references from a bunch of doc/* files
- 02bfe7912c Remove more ".doc:" references from doc/* files
- 6e32267d0c Remove ".doc:" references in salt/* files
- PR #38281: (mikejford) Add nick to args for create_multi

**ISSUE #38290**: (dragon788) Need to use machine automation friendly output (refs: #38313)

**PR #38313**: (dragon788) 2016.3 chocolatey fix @ 2016-12-16 17:20:39 UTC
- 235682b1e6 Merge pull request #38313 from dragon788/2016.3-chocolatey-fix
- 1f5fc17551 Use machine readable output for list
- cdbdbfe3c Added limit-output to eliminate false packages

**ISSUE #38174**: (NickDubelman) [syndic] Why can’t a syndic node signal when all of its minions have returned? (refs: #38279)

**ISSUE #32400**: (rallytime) Document Default Config Values (refs: #38279)

**PR #38279**: (rallytime) Add docs for syndic_wait setting @ 2016-12-15 18:30:31 UTC
- 9e78ddc80e Merge pull request #38279 from rallytime/fix-38174
- 4a62d01577 Add docs for syndic_wait setting

**PR #38248**: (meaksh) Successfully exit of salt-api child processes when SIGTERM is received @ 2016-12-15 09:16:27 UTC
- fc9e1df35 Merge pull request #38248 from meaksh/salt-api-successfully-close-child-processes
- ee66ae9855 Successfully exit of salt-api child processes when SIGTERM.

**PR #38254**: (terminalmage) Also check if pillarenv is in opts @ 2016-12-15 09:10:24 UTC
- 3c718ed35e Merge pull request #38254 from terminalmage/check-pillarenv
- fa9ad311c6 Also check if pillarenv is in opts
- PR #38256: (rallytime) [2016.3] Bump latest release version to 2016.11.1

**PR #38198**: (vutny) Add missing requirements for running unit tests: libcloud and boto3 @ 2016-12-13 14:12:20 UTC
- 004e46afe7 Merge pull request #38198 from vutny/unit-tests-require-libcloud-boto3
- a6098bac1a Remove note about SaltTesting installation, now it is in the requirements
- 004b8113e Add missing requirements for running unit tests: libcloud and boto3
• PR #38213: (rallytime) Skip test_cert_info tls unit test on pyOpenSSL upstream errors @ 2016-12-13 12:05:01 UTC
  - 9d497bc74c Merge pull request #38213 from rallytime/skip-tls-test
  - bdb807fc7c Skip test_cert_info tls unit test on pyOpenSSL upstream errors
• PR #38224: (whiteinge) Allow CORS OPTIONS requests to be unauthenticated @ 2016-12-13 12:02:30 UTC
  - 203109dd17 Merge pull request #38224 from whiteinge/cors-options-unauthed
  - de4d3227ab Allow CORS OPTIONS requests to be unauthenticated
• PR #38223: (whiteinge) Add root_dir to salt-api file paths @ 2016-12-13 07:44:19 UTC
  - PR #37272: (vutny) Get default logging level and log file from default opts dict (refs: #38223)
  - 721a5fecc9 Merge pull request #38223 from whiteinge/salt-api-root_dirs
  - bbf390c0e Add root_dir to salt-api file paths
• ISSUE #38162: (747project) git_pillar does not detect changes to remote repository when told to update (refs: #38191)
• PR #38191: (terminalmage) Clarify the fact that git_pillar.update does not fast-forward @ 2016-12-12 09:45:48 UTC
  - 70f7d22ad6 Merge pull request #38191 from terminalmage/issue38162
  - 1ae543a98a Clarify the fact that git_pillar.update does not fast-forward
• PR #38194: (vutny) Document the requirements for running ZeroMQ-based integration tests @ 2016-12-12 09:42:11 UTC
  - 28171cbf5c Merge pull request #38194 from vutny/integration-test-requirements-doc
  - e9f419ff64 Document the requirements for running ZeroMQ-based integration tests
• PR #38185: (rallytime) Back-port #38181 to 2016.3 @ 2016-12-09 22:27:44 UTC
  - PR #38181: (rallytime) Reset socket default timeout to None (fixes daemons_tests failures) (refs: #38185)
  - a4ef037ab1 Merge pull request #38185 from rallytime/bp-38181
  - 609f814454 Reset socket default timeout to None (fixes daemons_tests failures)
• PR #38163: (Ch3LL) enabled ec2 cloud tests @ 2016-12-09 18:01:57 UTC
  - 65b2ad7b14 Merge pull request #38163 from Ch3LL/enabled_ec2_cloud
  - be74c54f5a enabled ec2 cloud tests
• PR #38177: (vutny) Correct cp.get_file_str docstring and add integration tests @ 2016-12-09 16:55:35 UTC
  - b63f74e034 Merge pull request #38177 from vutny/fix-cp-get-file-str
  - a449980672 Correct cp.get_file_str docstring and add integration tests
• PR #38153: (vutny) Master config includes may contain errors and be safely skipped @ 2016-12-08 17:43:34 UTC
  - 7596313be0 Merge pull request #38153 from vutny/master-includes-error-tolerance
  - cd0154ee93 Master config includes may contain errors and be safely skipped
  - PR #38134: (rallytime) Skip daemon unit tests when running on Python 2.6
• ISSUE #38091: (tjyang) [WARNING ] salt.loaded.int.module.zenoss.__virtual__() is wrongly returning None. (refs: #38102)
• PR #38102: (rallytime) Add False + msg tuple return if requests is missing for zenoss module @ 2016-12-07 13:24:37 UTC
  - d3d98d4eb Merge pull request #38102 from rallytime/fix-38091
  - 4f79d5a0d1 Add False + msg tuple return if requests is missing for zenoss module

• ISSUE #36707: (do3meli) slow FreeBSD sysctl module with test=true (refs: #36794)

• PR #38104: (rallytime) Back-port #36794 to 2016.3 @ 2016-12-07 13:23:48 UTC
  - PR #36794: (do3meli) FreeBSD sysctl module now handels config_file parameter in show method (refs: #38104)
  - 8c8bc2734 Merge pull request #38104 from rallytime/bp-36794
  - c906c8a0d5 Pylint fixes
  - da3eb83e6 FreeBSD sysctl module now handels config_file parameter in show method

• ISSUE #35342: (morganwillcock) win_pkg: refresh_db doesn't remove cached items which have been renamed or removed (refs: #38083)

• PR #38083: (twangboy) Only delete .sls files from winrepo-ng [DO NOT MERGE FORWARD] @ 2016-12-06 14:13:35 UTC
  - fbc87769b9 Merge pull request #38083 from twangboy/fix_refresh_db
  - 978af6d83c Remove only .sls files from the cached winrepo-ng

• PR #38059: (rallytime) Call exec_test for the Syndic daemon in tests.unit.daemons_test.py @ 2016-12-04 04:18:41 UTC
  - PR #38057: (rallytime) [2016.11] Merge forward from 2016.3 to 2016.11 (refs: #38059)
  - PR #38034: (cachedout) Modify daemons test to use multiprocessing (refs: #38059)
  - 9dcfde6f6 Merge pull request #38059 from rallytime/daemons-test-fix
  - eb372b27d8 Add missing "not" statement: The last syndic test should assertFalse()
  - 4e10f8e018 Call exec_test for the Syndic daemon in tests.unit.daemons_test.py

• ISSUE #37939: (Talkless) file.comment always report changes in test=True mode (refs: #38039)

• PR #38039: (rallytime) Check to see if a line is already commented before moving on @ 2016-12-02 20:08:35 UTC
  - 9cd42b93f Merge pull request #38039 from rallytime/fix-37939
  - 1da7aacfbe Update unit tests to account for additional file.search call
  - 8a685b1820 Check to see if a line is already commented before moving on
  - f2c045520d Write an integration test demonstrating the issue

• ISSUE #38037: (dmurphy18) pkg.latest and yumpkg.latest_version return incorrect package versions 2016.3 and 2016.11 (refs: #38045)

• PR #38045: (terminalmage) yumpkg.py: don't include non-upgrade versions found by "yum list available" @ 2016-12-02 20:07:38 UTC
  - a34a763984 Merge pull request #38045 from terminalmage/issue38037
  - 65289503d9 Simplify logic for matching desired pkg arch with actual pkg arch
  - 3babdca94 yumpkg.py: don't include non-upgrade versions found by "yum list available"
  - PR #38034: (cachedout) Modify daemons test to use multiprocessing (refs: #38059)
• **PR #37995**: (rallytime) [2016.3] Merge forward from 2015.8 to 2016.3 @ 2016-11-30 20:12:55 UTC
  - 6942d5d95b Merge pull request #37995 from rallytime/merge-2016.3
  - b44e1b921c Merge branch '2015.8' into '2016.3'
    * 7a7e36728f Merge pull request #37978 from terminalmage/ext_pillar_first-docs
      - 61ed9a8657 Add clarifying language to ext_pillar_first docs
  - **PR #38002**: (laleocen) fix broken yaml code block
• **ISSUE #35088**: (Modulus) salt/cloud/ec2.py encoding problems. (refs: #37912)
• **PR #37912**: (attiasr) fix encoding problem aws responses @ 2016-11-30 18:10:30 UTC
  - 3dd45fbedf Merge pull request #37912 from attiasr/fix_aws_response_encoding
  - ba4ec4e7f1 use Requests result encoding to encode the text
  - abe4e3b98 fix encoding problem aws responses
• **PR #37950**: (vutny) Set default Salt Master address for a Syndic (like for a Minion) @ 2016-11-30 18:09:04 UTC
  - 69a7a4ac42d Merge pull request #37950 from vutny/fix-starting-up-syndic
  - 7d9be9abce syndic_master: correct default value, documentation and example config
  - 92a7c7ed1b Set default Salt Master address for a Syndic (like for a Minion)
  - **PR #37964**: (terminalmage) Add clarification on expr_form usage and future deprecation
• **ISSUE #37867**: (tobiasBora) Bug into lsb_release that crash salt (refs: #37962)
  - **PR #37962**: (cachedout) Catch possible exception from lsb_release
• **ISSUE #37945**: (gstachowiak) Missing exception handling in salt.master.Maintenance. Process never completes. (refs: #37961)
  - **PR #37961**: (cachedout) Handle empty tokens safely
• **PR #37272**: (vutny) Get default logging level and log file from default opts dict (refs: #38223) @ 2016-11-28 23:04:20 UTC
  - ea46639ce7 Merge pull request #37272 from vutny/fix-getting-default-logging-opts
  - e5ce52388a Fix description in the Salt Syndic usage info
  - 518a3d7ee Add unit tests for Salt parsers processing logging options
  - 83d6a44254 Add ssh_log_file option to master config and documentation
  - e8a0915460 Fix configuration example and documentation for syndic_log_file option
  - e64dd3ed6b Correct default attributes for various parser classes
  - 82a2e216b3 Fix default usage string for Salt command line programs
  - 45dfaf292f Fix reading and updating logfile and pidfile config options for Salt API
  - f47253c21b Fix reading and applying Salt Cloud default configuration
  - fad5bec936 Work with a copy of default opts dictionaries
  - b7c2e4811e5 Fix log_level_logfile config value type
  - 1bd76a1d96 Fix setting temporary log level if CLI option omitted
  - 121848cc77 Fix obtaining log_granular_levels config setting
  - 44cf07fec2 Make CLI options take precedence for setting up logfile_logger
– 61afaf1792 Fix setting option attributes when processing log_level and log_file
– 3c60e2388e Fix processing of log_level_logfile config setting
– 55a0af5bbd Use attribute functions for getting/setting options and config values
– c2f52d091e Fix getting Salt API default logfile option
– f2422373c1 Remove processing of unused and undocumented cli_*_log_* config options
– 2065e8311c Get default logging level and file from default opts dict

• PR #37925: (kontrolld) Fix missing ipv6 options centos network @ 2016-11-28 22:38:43 UTC
  – f2f957da6c Merge pull request #37925 from kontrolld/add-ipv6-centos-network
  – ac2b477412 Adding IPv6 functionality for CentOS /etc/sysconfig/network

• ISSUE #37059: (basepi) Beacon fileserver operations cause scheduled jobs with fileserver operations to hang (refs: #37899)

• PR #37899: (DmitryKuzmenko) Clear functions context in schedule tasks for ZeroMQ. @ 2016-11-28 22:23:45 UTC
  – c07ad11279 Merge pull request #37899 from DSRCorporation/bugs/37059_schedule_task_hang
  – 9497748546 Clear functions context in schedule tasks for ZeroMQ.

• ISSUE #37737: (b-harper) python client api CloudClient multiple calls needed (refs: #37928)

• PR #37928: (techhat) Don’t modify self.opts directly @ 2016-11-28 21:07:40 UTC
  – a55519db40 Merge pull request #37928 from techhat/issue37737
  – a09a60e89b Don’t modify self.opts directly

• PR #37929: (gtmanfred) add list_nodes_min to nova driver @ 2016-11-28 21:05:40 UTC
  – 9d17f1ce90 Merge pull request #37929 from gtmanfred/2016.3
  – c7d2c73503 add list_nodes_min to nova driver

• PR #37926: (kontrolld) Fixes no IPv6 functionality in /etc/sysconfig/network @ 2016-11-28 20:40:00 UTC
  – 3bb743b59f Merge pull request #37926 from kontrolld/fix-ipv6-centos-network
  – 3ed42e5b44 updated
  – 3b3bc4f239 Fixes no IPv6 functionality in /etc/sysconfig/network

• PR #37921: (rallytime) [2016.3] Merge forward from 2015.8 to 2016.3 @ 2016-11-28 19:54:40 UTC
  – 271170a9f3 Merge pull request #37921 from rallytime/merge-2016.3
  – 523a67c422 Merge branch '2015.8' into '2016.3'
    * 4cdc6cf5ec Update earlier release channels’ docs with Carbon release notes (#37914)
    * d31491a7fe [2015.8] Update version numbers in doc config for 2016.11.0 release (#37918)

• PR #37924: (cachedout) Update test for new gem ver @ 2016-11-28 18:17:53 UTC
  – 6cd6429ac0 Merge pull request #37924 from cachedout/fix_gem_states
  – 894cca3427 Update test for new gem ver

• PR #37916: (rallytime) [2016.3] Update version numbers in doc config for 2016.11.0 release @ 2016-11-28 17:09:08 UTC
  – c35ba1f390 Merge pull request #37916 from rallytime/doc-update-2016.3
– bd40592289 [2016.3] Update version numbers in doc config for 2016.11.0 release

• ISSUE #37287: (aaronm-cloudtek) salt.states.ddns.present: 'NS' record type always returns as changed (refs: #37785)

• PR #37785: (aaronm-cloudtek) respect trailing dot in ddns name parameter @ 2016-11-28 14:02:10 UTC
  – e13a2488c8 Merge pull request #37785 from Cloudekt/ddns-respect-trailing-dot
  – 262e3b3697 respect trailing dot in ddns name parameter

• ISSUE #37870: (fj40crawler) salt.states.augeas.change returns None when test=True (refs: #37895)

• PR #37895: (fj40crawler) Change return value for salt/states/augeas.py to be True instead of None @ 2016-11-28 13:49:27 UTC
  – c03b389422 Merge pull request #37895 from fj40crawler/fix-augeas-return-for-test
  – ddc238df36 Fixed augeas_test.py to match True v.s. None for test_change_in_test_mode
  – ef75c459c0 Merge branch '2016.3' of github.com:saltstack/salt into fix-augeas-return-for-test
  – b0fe0cd256 Change return value for salt/states/augeas.py to be True instead of None for cases where salt
    is run with test=True. Fixes #37870

• PR #37907: (Talkless) Fix server trust in test run of svn.latest @ 2016-11-28 13:47:39 UTC
  – fdbc31e8d8 Merge pull request #37907 from Talkless/patch-2
  – 072a319490 Fix server trust in test run of svn.latest

• PR #37896: (toanju) rh networking: add missing values @ 2016-11-27 10:30:35 UTC
  – f39f6f443f Merge pull request #37896 from toanju/2016.3
  – c9536488e rh networking: add missing values

• PR #37886: (bdrung) Fix various spelling mistakes @ 2016-11-25 02:59:36 UTC
  – ea935e5a91 Merge pull request #37886 from bdrung/fix-typo
  – 9a51ba5c5b Fix various spelling mistakes

• ISSUE #37732: (dhaines) list_semod() (from modules/selinux.py) incompatible with policycoreutils-2.5 (RHEL 7.3) (refs: #37736)

• PR #37736: (dhaines) handle semodule version >=2.4 (#37732) and fix typo @ 2016-11-24 01:44:20 UTC
  – 371b0a86d9 Merge pull request #37736 from dhaines/issue-37732
  – 7ef590a505 Update selinux.py
  – 516a676ea3 fix indexing error
  – 4e49c1e991 fix typo
  – b16f2d8400 handle semodule version >=2.4 (#37732) and fix typo

• PR #37797: (clan) check count of columns after split @ 2016-11-24 01:28:59 UTC
  – 87ae666bf Merge pull request #37797 from clan/extfs
  – acf09606f check count of columns after split

• PR #37762: (twangboy) Add pre_versions to chocolatey.installed @ 2016-11-24 01:27:29 UTC
  – f7c7109152 Merge pull request #37762 from twangboy/fixed_chocolatey_state
  – 9696b6dfa5 Use keyword args instead of relying on ordering
- 398aa074d Add pre_versions to the available arguments

- **PR #37866**: (meaksh) Backport #37149 #36938 and #36784 to 2016.3 @ 2016-11-23 21:54:17 UTC
  - **PR #37857**: (meaksh) Backport #37149 and #36938 to 2015.8 (refs: #37866)
  - **PR #37856**: (meaksh) Backport #36784 to 2015.8 (refs: #37866)
  - **PR #37149**: (dincamihai) Fix pkg.latest_version when latest already installed (refs: #37857, #37866)
  - **PR #36938**: (wanparo) acl.delfacl: fix position of -X option to setfacl (refs: #37857, #37866)
  - **PR #36784**: (moio) OS grains for SLES Expanded Support (refs: #37856, #37866)

- 56ba92d55 Merge pull request #37866 from meaksh/2016.3-bp-37149-36938-36784

- 9d8d578109 Fix pkg.latest_version when latest already installed

- ffca0d491c - acl.delfacl: fix position of -X option to setfacl

- 3dfed6b841 Adjust linux_acl unit test argument ordering

- f185ecdde1 core.py: quote style fixed

- 8404d13424 Setting up OS grains for SLES Expanded Support (SUSE’s Red Hat compatible platform)

- **ISSUE #32829**: (tyhunt99) Dockerng appears to not be using docker registries pillar data (refs: #36893)

- **PR #37863**: (rallytime) Back-port #36893 to 2016.3 @ 2016-11-23 17:09:09 UTC
  - **PR #36893**: (tyhunt99) add option to force a reauth for a docker registry (refs: #37863)
  - d0cc7f0d56 Merge pull request #37863 from rallytime/bp-36893
  - 4c70534991 Add versionadded to reauth option in dockerng module
  - 5ca2c388c2 added documentation for the new reuth option in docker registry configuration
  - 5b0c11ab47 add option to force a reauth for a docker registry

- **PR #37847**: (laleocen) add multiline encryption documentation to nacl

- **ISSUE #37787**: (elyulka) user.present state fails to change loginclass on FreeBSD (refs: #37827)
  - **PR #37827**: (silenius) add missing chloginclass
  - **PR #37826**: (rallytime) Update branch refs to more relevant branch
  - **PR #37822**: (laleocen) add documentation for multiline encryption using nacl (refs: #37826)

- **ISSUE #19269**: (markuskramerIgitt) Undocumented feature names: of file.directory (refs: #37823)
  - **PR #37823**: (rallytime) Add "names" option to file state docs: point users to highstate doc examples

- **ISSUE #15697**: (arthurlogilab) keystone.user_present should not re-set the password when user exists (refs: #37821)
  - **PR #37821**: (rallytime) Clarify keystone.user_present password state docs with default behavior

- **ISSUE #5999**: (pille) libvirt.keys does not work (refs: #37820)
  - **PR #37820**: (rallytime) Add some dependency documentation to libvirt docs

- **PR #37772**: (bdrung) Support initializing OpenSSL 1.1 @ 2016-11-21 20:28:51 UTC
  - 485270f74 Merge pull request #37772 from bdrung/openssl1.1
  - 819c9658ed Support initializing OpenSSL 1.1

- **ISSUE #37383**: (edwardsdanielj) Orchestration arguments (kwarg) not being interpreted / How I learned to stop worrying about documentation and love experimenting (refs: #37817)

---

**28.2. Previous Releases**
- **PR #37817**: (rallytime) Update orchestrate runner file.copy doc example

- **ISSUE #37653**: (gravyboat) Salt.cron docs don’t wrap @hourly and @daily correctly in quotes for the examples (refs: #37816)

- **ISSUE #31953**: (sjorge) Documentation for salt.states.cron is incorrect (refs: #32157)

- **PR #37816**: (rallytime) Back-port #32157 to 2016.3 @ 2016-11-21 20:22:27 UTC
  - **PR #32157**: (cachedout) Add quotes to cron doc (refs: #37816)
  - c5d3d8b66a Merge pull request #37816 from rallytime/bp-32157
  - d9c297119e Add quotes to cron doc

- **PR #37812**: (rallytime) Back-port #37790 to 2016.3 @ 2016-11-21 18:46:40 UTC
  - **PR #37790**: (sofixa) Update cloud/proxmox.rst with more options and LXC (refs: #37812)
  - 97e6b6aabe Merge pull request #37812 from rallytime/bp-37790
  - ca3b6e7874 Update proxmox.rst with more options and LXC

- **ISSUE #37751**: (freach) Documentation salt.states.dockerng.running: "privileged" property undocumented (refs: #37789)

- **PR #37811**: (rallytime) Back-port #37789 to 2016.3 @ 2016-11-21 18:46:21 UTC
  - **PR #37789**: (fedusia) issue: 37751 (refs: #37811)
  - 27703c54bc Merge pull request #37811 from rallytime/bp-37789
  - ba3fe48e1 fix comment
  - a021f76a9b issue: 37751 Add documentation for option privileged

- **PR #37810**: (rallytime) Back-port #37775 to 2016.3 @ 2016-11-21 18:45:53 UTC
  - **PR #37775**: (calve) Document python argument in salt.states.virtualenv_mod (refs: #37810)
  - adac9d7c0c Merge pull request #37810 from rallytime/bp-37775
  - 2bed91437b Document python argument in salt.states.virtualenv_mod

- **ISSUE #37742**: (blaketmiller) Cannot match on nodegroup when checking minions (refs: #37763)
  - **PR #37763**: (cachedout) Add nodegroup check to ekminions

- **ISSUE #37725**: (secumod) salt-call incorrectly parses master hostname:port from minion config (refs: #37766)
  - **PR #37766**: (cachedout) Fix ip/port issue with salt-call

- **ISSUE #33709**: (msummers42) Any/All Salt-SSH invocations in 2016.3.0 Fails with AttributeError: 'module' object has no attribute 'BASE_THORIUM_ROOTS_DIR' (refs: #37767)
  - **PR #37767**: (cachedout) Add thorium path to syspaths

- **PR #37760**: (hu-dabao) Fix couchbase returner and add couple of more features @ 2016-11-18 00:28:23 UTC
  - bff949f4e9 Merge pull request #37760 from hu-dabao/fixed CB returner
  - de372f277e 1. returner no need to check whether the jid exists for external job cache setup 2. add full_ret to return_doc so that the document will be informative 3. make ttl as a config attribute because salt-minion does not have keep_jobs attribute 4. add password into config attribute 5. update the documents accordingly

- **ISSUE #36629**: (yhekma) The pillar run module does not honor saltenv (refs: #37738)
- **PR #37738**: (terminalmage) Allow pillar.get to retrieve fresh pillar data when saltenv passed @ 2016-11-17 23:13:04 UTC
  - 1f976ac212 Merge pull request #37738 from terminalmage/issue36629
  - da46678c51 Allow pillar.get to retrieve fresh pillar data when saltenv passed
  - **PR #37745**: (cro) Switch default filter tag for ONE resources from user only to all resources

- **ISSUE #37498**: (githubcdr) service.restart salt-minion fails on Ubuntu 14.04.5 LTS (refs: #37748, #38587)
  - **PR #37748**: (silenius) check for SERVICE_DIR in __virtual__ in salt.modules.daemontools

- **ISSUE #37734**: (Ch3LL) Joyent Cloud Size Issue (refs: #37735)
  - **PR #37735**: (Ch3LL) change size and image of joyent profile @ 2016-11-16 21:07:52 UTC
    - fa7883115e Merge pull request #37735 from Ch3LL/fix_joyent_profile
    - 9ef41dcfc change size and image of joyent profile

- **PR #37731**: (rallytime) [2016.3] Merge forward from 2015.8 to 2016.3 @ 2016-11-16 17:13:02 UTC
  - 98e25c68aa Merge pull request #37731 from rallytime/merge-2016.3
  - ec1389711f Merge branch '2015.8' into '2016.3'
    - f417dbbe99 Merge pull request #37718 from terminalmage/docs
      - 23b8b2a3f4 Fix incorrectly-formatted RST
  - **PR #37724**: (cachedout) Warn on AES test for systems with > 1 core

- **PR #37721**: (terminalmage) Fix for pillar setting 'environment' key in __gen_opts() @ 2016-11-16 16:04:53 UTC
  - 35655d521f Merge pull request #37721 from terminalmage/zd909
  - acdd5513da Update git_pillar docs to reflect info from bugfix
  - 433737d2dc Fix for pillar setting 'environment' key in __gen_opts()

- **PR #37719**: (terminalmage) Fix incorrectly-formatted RST (2016.3 branch) @ 2016-11-16 08:20:53 UTC
  - 99ca7c003 Merge pull request #37719 from terminalmage/docs-2016.3
  - f163b4c724 Fix incorrectly-formatted RST

- **PR #37694**: (cachedout) Catch differences in git URLs in npm state @ 2016-11-16 01:56:18 UTC
  - 8dea695c7c Merge pull request #37694 from cachedout/npm_git
  - 0e3be2366a Catch differences in git URLs in npm state

- **ISSUE #37665**: (kluoto) boto_elb state fails as key is overwritten by the code (refs: #37705)

- **PR #37705**: (rallytime) Don't overwrite the "key" variable passed in to _listeners_present func @ 2016-11-15 21:26:37 UTC
  - 329448c877 Merge pull request #37705 from rallytime/fix-37665
  - 3b7e9ece3b Don't overwrite the "key" variable passed in to _listeners_present func

- **PR #37707**: (Ch3LL) add timeout increase on azure tests @ 2016-11-15 21:24:25 UTC
  - **PR #37239**: (Ch3LL) Fix cloud tests timeout (refs: #37707)
  - ac9a316b50 Merge pull request #37707 from Ch3LL/fix_timeout_azure
  - 363122c675 add timeout increase on azure tests

- **PR #37704**: (twangboy) Fix test disabled 2016.3 [DO NOT MERGE FORWARD] @ 2016-11-15 16:48:52 UTC
- 1ece265354 Merge pull request #37704 from twangboy/fix_test_disabled_2016.3
- a0429cf839 Use nfsd instead of apsd for test_disabled

- **PR #37690**: (twangboy) Update pyzmq to 15.3.0 for 2016.3 [DO NOT MERGE FORWARD] @ 2016-11-15 03:10:36 UTC
  - 44f05acbff Merge pull request #37690 from twangboy/update_pyzmq_2016.3
  - cf55342150 Update pyzmq to version 15.3.0

- **PR #37680**: (rallytime) Back-port #32965 to 2016.3 @ 2016-11-15 02:56:46 UTC
  - **PR #32965**: (kevinquinno) Fix 'present' option when used without 'key_type' (refs: #37680)
  - a743db85e6 Merge pull request #37680 from rallytime/bp-32965
  - 1865b13645 Fix 'present' option when used without 'key_type'

- **ISSUE #35964**: (edgan) salt-ssh doesn’t set the return code to non-zero on highstate rendering error (refs: #35965)

- **PR #37681**: (rallytime) Back-port #35965 to 2016.3 @ 2016-11-14 21:19:22 UTC
  - **PR #35965**: (edgan) Set the return code to 1 on salt-ssh highstate errors (refs: #37681)
  - 700f3fa57f Set the return code to 1 on salt-ssh highstate errors

- **PR #37668**: (rallytime) [2016.3] Merge forward from 2015.8 to 2016.3 @ 2016-11-14 15:43:25 UTC
  - 1b456b55dc Merge pull request #37668 from rallytime/merge-2016.3
  - e6f84c6b02 Merge branch '2015.8' into '2016.3'
  - a01b66556f Add docs for rotate_aes_key (#37641)

- **ISSUE #37492**: (JensRantil) Failing salt -b 1 minion state.highstate has wrong exit code (refs: #37625)

- **PR #37625**: (cachedout) Return with proper retcodes in batch mode @ 2016-11-12 20:29:09 UTC
  - 305e51d1c0 Merge pull request #37625 from cachedout/issue_37492
  - b6031524e5 Return with proper retcodes in batch mode

- **ISSUE #34547**: (sebw) salt-cloud deployment fails when deploy: True (refs: #37607)

- **PR #37639**: (rallytime) Back-port #37607 to 2016.3 @ 2016-11-11 20:29:20 UTC
  - **PR #37607**: (techhat) Try the connection again, in case it’s been reset (refs: #37639)
  - **PR #35673**: (cro) Proxies don’t handle reusing the SmartConnect instances very well. D... (refs: #37607)
  - **PR #34059**: (alexbleotu) Vmware common gh (refs: #37607)
  - 7510cd4da9 Merge pull request #37639 from rallytime/bp-37607
  - 9914e93bc4 Pylint: Remove kwargs that are not in the 2016.3 branch
  - d941e9354d Disable pylint warning
  - 940ee49a0b Lint fix
  - 69893f0c38 Try the connection again, in case it’s been reset

- **ISSUE saltstack/salt#37118**: (gtmanfred) group in file.find module unable to be a list (refs: #37349)

- **ISSUE #37118**: (gtmanfred) group in file.find module unable to be a list (refs: #37349)

- **PR #37638**: (rallytime) Back-port #37349 to 2016.3 @ 2016-11-11 20:29:01 UTC
• **PR #37349**: (haeac) Pull request for Bug #37118 (refs: #37638)
  - 24ca96010d Merge pull request #37638 from rallytime/bp-37349
  - ba2105bc39 Fix for Bug #37118, the wrong parameter was being used to convert the group name to group id.

• **ISSUE #37643**: (Ch3LL) digital ocean list_keypairs limits to 20 keys (refs: #37644)

• **PR #37644**: (Ch3LL) digital ocean list_keypairs: increase limit for ssh keys parsed @ 2016-11-11 20:28:46 UTC
  - e1e8b81d16 Merge pull request #37644 from Ch3LL/fix_37643
  - c02961a2f5 list_keypairs: increase limit for ssh keys parsed

• **ISSUE #37541**: (yhekma) salt-minion does not clean up temp files for templates (refs: #37540, #37640)

• **PR #37640**: (rallytime) Add known issue #37643 to 2016.3.4 release notes @ 2016-11-11 20:28:12 UTC
  - a97c2ad34b Merge pull request #37640 from rallytime/update-release-notes
  - 6d6de12aff Grammatical fix
  - 24d7f20e16 Add known issue #37541 to 2016.3.4 release notes

• **PR #37642**: (cro) Forward-port change from 2015.8 adding release note for rotate_aes_key @ 2016-11-11 20:27:07 UTC
  - fab3eea237 Merge pull request #37642 from cro/rotate_aes_doc
  - 1ca5b958c6 Forward-port change from 2015.8 adding release note for rotate_aes_key

• **ISSUE #37628**: (TronPaul) [git 2016.3] Refreshing of an s3 file server results in an exception (refs: #37629)

• **PR #37629**: (TronPaul) fix __opts__ and provider being None in salt.utils.aws:get_location @ 2016-11-11 09:49:47 UTC
  - 4c07b3534a Merge pull request #37629 from TronPaul/fix-s3fs-opts
  - a452ced20 fix __opts__ and provider being None issue

• **PR #37481**: (thatch45) Raet internal client reference fix @ 2016-11-11 04:39:41 UTC
  - 200d9fcb6e Merge pull request #37481 from thatch45/raet_client
  - 50d911160b Attempted fix, needs user verification

• **PR #37611**: (jeanpralo) Fix cmd batch raw @ 2016-11-11 02:53:58 UTC
  - b14faf1c68 Merge pull request #37611 from jeanpralo/fix-cmd-batch-raw
  - 4f16840ef1 add integration test for salt.client.LocalClient.cmd_batch
  - ead47e4baa update ret dict to avoid hanging
  - 0a2f153b6e fix dict key for raw support to avoid exception

• **PR #37614**: (gtmanfred) remove redundant code @ 2016-11-11 02:49:13 UTC
  - 35c8333d04 Merge pull request #37614 from gtmanfred/2016.3
  - 71c2d89a9 remove redundant code

• **PR #37627**: (cachedout) Exempt pip.iteritems from test_valid_docs test @ 2016-11-11 02:48:37 UTC
  - 4fab707bdd Merge pull request #37627 from cachedout/pr-36706
  - 94df2f8e6f Exempt pip.iteritems from test_valid_docs test
• ISSUE #36644: (b1naryth1ef) env_vars not properly validated/casted to strings w/ virtualenv/upgrade/pip.install (refs: #36706)
• PR #36706: (siccrusher) Add basic sanity checks for env_vars in pip.install function @ 2016-11-11 02:47:16 UTC
  - ee74f3116e Merge pull request #36706 from siccrusher/fix_env_var_validation
  - fb27f8b69e Revert change
  - 79f3e838fd Use fully-qualified path for six
  - 0ca1222833 Update pip.py
  - b15de371c * Ensure src is python3 compatible
  - 0976a2d1ae * Before passing on the env_vars dictionary ensure all values are strings. Fixes #36644
• ISSUE #37491: (JensRantil) "Failed to authenticate! ..." error should exit non-zero (refs: #37626)
• PR #37626: (cachedout) Exit with proper retcode on hard client failures @ 2016-11-11 02:38:47 UTC
  - 902a97575e Merge pull request #37626 from cachedout/issue_37491
• PR #37617: (terminalmage) Clarify docs for git_pillar dynamic env feature @ 2016-11-11 01:52:52 UTC
  - 845f835177 Merge pull request #37617 from terminalmage/git_pillar-docs
  - 8cdf5dbb51 Clarify docs for git_pillar dynamic env feature
• PR #36627: (sjmh) Skip rest of loop on failed func match @ 2016-11-10 23:47:12 UTC
  - 3079d78332 Merge pull request #36627 from sjmh/fix_skip_nomatch
  - b3baaf30d0 Skip rest of loop on failed func match
• PR #37600: (mcalmer) change TIMEZONE on SUSE systems (bsc#1008933) @ 2016-11-10 21:54:04 UTC
  - a71e7c77b3 Merge pull request #37600 from mcalmer/fix-timezone-on-SUSE
  - 3530b542f0 change TIMEZONE on SUSE systems (bsc#1008933)
• ISSUE #37238: (cmclaughlin) Restarting master causes minion to hang (refs: #37438, #37602)
• ISSUE #37018: (tsaridas) get events from python (refs: #37438, #37602)
• PR #37602: (DmitryKuzmenko) Handle master restart in appropriate places using salt.event listener. @ 2016-11-10 21:53:20 UTC
  - PR #37438: (DmitryKuzmenko) Fix for #37238 salt hang on master restart (refs: #37602)
  - 39b75878cf Merge pull request #37602 from DSRCorporation/bugs/37238_salt_hang_on_master_restart
  - d3d987b19c Handle master restart in appropriate places using salt.event listener.
• PR #37608: (gtmanfred) allow multiline returns from docker for mac @ 2016-11-10 21:48:59 UTC
  - 019e1a721b Merge pull request #37608 from gtmanfred/2016.3
  - 74ae1e372 allow multiline returns from docker for mac
• ISSUE #37592: (craigafinch) State git.latest does not work with SSH (refs: #37604)
• ISSUE #37551: (viict) git.latest "Not a valid commit name" (refs: #37604, #37571)
  - PR #37604: (terminalmage) Documentation improvements and corrections
  - PR #37579: (pass-by-value) Use existing VM's VDD size if not specified in the cloud profile
• ISSUE #37541: (yhekma) salt-minion does not clean up temp files for templates (refs: #37540, #37640)
- **PR #37540**: (yhekma) Added prefix to tempfile for template @ 2016-11-10 00:37:18 UTC
  - fdd13b4145 Merge pull request #37540 from yhekma/2016.3
  - 93a59f8034 Added prefix to tempfile for template
- **ISSUE #37084**: (aaronm-cloudtek) x509.certificate_managed does not work with m2crypto >=0.25 (refs: #37578)
  - PR #37578: (clinta) Update for m2crypto changes removing lhash
  - PR #37584: (clinta) Fix eauth example for limiting args
- **ISSUE #37551**: (viict) git.latest "Not a valid commit name" (refs: #37604, #37571)
  - PR #37571: (terminalmage) Add a test to ensure we don’t check for fast-forward before fetching
- **ISSUE #33645**: (ketzacoatl) saltutil.sync_all does not sync custom pillar modules to masterless minions (refs: #33833)
- **ISSUE #25297**: (Akilesh1597) perform ‘refresh_pillar’ as a part of ‘sync_all’ (refs: #25361, #37521)
- **PR #37553**: (rallytime) Back-port #37521 to 2016.3 @ 2016-11-08 23:11:07 UTC
  - PR #37521: (genuss) refresh_pillar() should be called always with refresh=True during saltutil.sync_all (refs: #37553)
  - PR #33833: (terminalmage) Support syncing pillar modules to masterless minions (refs: #37521)
  - PR #25561: (tedski) perform refresh_pillar as part of sync_all when refresh=True (refs: #37521)
  - b01c247ea9 Merge pull request #37553 from rallytime/bp-37521
  - 0f392b05f4 refresh_pillar() should be called always
  - PR saltstack/salt#37549: (Mrten) sqlite is not found in 2015.8 (refs: #37565)
- **PR #37565**: (rallytime) Back-port #37549 to 2016.3 @ 2016-11-08 23:10:25 UTC
  - PR #37549: (Mrten) sqlite is not found in 2015.8 (refs: #37565)
  - 694df30d40 Merge pull request #37549 from rallytime/bp-37549
  - c92a90b8e5 Update sqlite3.py
  - fb76557a2a sqlite is not found in 2015.8
- **ISSUE #37511**: (jdelic) service.dead now only operates if the service file exists (refs: #37562)
  - PR #37562: (terminalmage) Fix regression in service.dead state
- **ISSUE #37554**: (sjmh) salt-api doesn’t dynamically re-read nodegroups configuration (refs: #37560)
  - PR #37560: (whiteing) Skip config type checking for sdb values
  - PR #37556: (rallytime) Don’t pass the vpc id to boto.vpc.create_internet_gateway func
  - PR #37543: (multani) Documentation rendering fixes
- **ISSUE saltstack/salt#31081**: (JensRantil) salt.modules.file.line documentation unclarities (refs: #37457)
- **PR #37457**: (rallytime) Fixup file.line docs to be more clear and consistent @ 2016-11-08 00:29:20 UTC
  - 96b8b9a849 Merge pull request #37457 from rallytime/fix-31081
  - 25821bb8db Clarify which modes use "before", "after", and "indent" options
  - 8b2db9e7b Clarify file.line state docs as well
  - b2615892eb Move note about using mode=insert with location options to mode section
- db0b0cefb8 Fixup file.line docs to be more clear and consistent

- **ISSUE #35799**: (davegiles) dsc.apply_config hangs (no error) on empty directory on target (refs: #37526)

- **PR #37526**: (twangboy) Remove loop from dsc.apply_config @ 2016-11-08 00:23:11 UTC
  - 7de790ffed Merge pull request #37526 from twangboy/fix_35799
  - fc4260911c Remove unnecessary format
  - c934a2bfa7 Remove the loop from apply_config
  - **PR saltstack/salt#37515**: (rallytime) [carbon] Merge forward from 2016.3 to carbon (refs: #37534)

- **PR #37534**: (rallytime) Back-port fix needed from #37515 @ 2016-11-08 00:14:46 UTC
  - **PR #37515**: (rallytime) [carbon] Merge forward from 2016.3 to carbon (refs: #37534)
  - 94811df2ea Merge pull request #37534 from rallytime/bp-merge-forward-fix
  - d1b2af1d69 Add missing source_hash_name args to a couple funcs

- **PR #37533**: (whiteinge) Return a 504 response instead of 500 for Salt timeouts @ 2016-11-08 00:14:15 UTC
  - 17adb0c9f9 Merge pull request #37533 from whiteinge/salt-api-504-timeouts
  - 63226aeda6 Return a 504 response instead of 500 for Salt timeouts

- **ISSUE saltstack/salt#36679**: (lorengordon) Command 'Import-Module ServerManager' failed with return code: 1 (refs: #37502, #37519, #37502)
  - **PR #37502**: (cachedout) Log proper message on returners that cannot be loaded (refs: #37519)
  - **PR #37519**: (rallytime) Update returner __virtual__() return messages for loader @ 2016-11-07 23:06:23 UTC
  - 19475aada6 Merge pull request #37519 from lorengordon/bp-36736
  - 21c2664b6a Fix issue 36679 win_servermanager failure

- **ISSUE #37444**: (Tanoti) Returning False from __virtual__ in a returner does not return expected error (refs: #37502, #37519, #37502)
  - **PR saltstack/salt#37502**: (cachedout) Log proper message on returners that cannot be loaded (refs: #37519)

- **PR #37519**: (rallytime) Update returner __virtual__() return messages for loader @ 2016-11-07 23:06:23 UTC
  - 19475aada6 Merge pull request #37519 from lorengordon/bp-36736
  - fb261a31f3 Update returner __virtual__() return messages for loader

- **ISSUE #35016**: (pingangit) TypeError: save_minions() got an unexpected keyword argument 'syndic_id' (refs: #37527)

- **PR #37527**: (rallytime) Add syndic_id=None kwarg to save_minions funcs in returners @ 2016-11-07 23:04:03 UTC
  - fe6dab850 Merge pull request #37527 from rallytime/fix-35016
  - 2944b244aa Add syndic_id=None kwarg to save_minions funcs in returners
  - **PR #37530**: (gtmanfred) fix Lithium to 2015.5.0

- **PR #37514**: (rallytime) [2016.3] Merge forward from 2015.8 to 2016.3 @ 2016-11-07 16:51:06 UTC
  - 743164844d Merge pull request #37514 from rallytime/merge-2016.3
  - 41166ae0d4 Merge branch '2015.8' into '2016.3'

  - c7f4d7f76a Merge pull request #37386 from rallytime/fix-34841
  - c70492a1fe Fix win_useradd.chgroups return when cmd.run_all retcode != 0

• **ISSUE #34263**: (vernondcole) Use of dnsmasq.set_config injects unintentional text into the configuration file. (refs: #37390)

• **PR #37390**: (rallytime) Don’t insert __pub* keys into dnsmasq config file with set_config function @ 2016-11-02 06:31:53 UTC
  - 34b6c6459a Merge pull request #37390 from rallytime/fix-34263
  - e082f5338 Fix failing test now that we’re raising a CommandExecutionError
  - c6a3476abb Filter out the __pub keys passed via **kwargs for dnsmasq.set_config
  - fd380c79b9 Add test case to reproduce dnsmasq.set_config failure in #34263

• **ISSUE #35163**: (SolarisYan) salt file.mkdir (refs: #35287, #35189)

• **PR #37391**: (rallytime) Back-port #35287 to 2016.3 @ 2016-11-02 06:18:26 UTC
  - PR #35287: (dere) 2016.3 (refs: #37391)
  - PR #35189: (dere) return value for file.mkdir instead of None (refs: #35287)
  - 798b2acbe3 Merge pull request #37391 from rallytime/bp-35287
  - 0e1bea5a4 Simplify return value to “True”.
  - 13022c5cc4 return value for mkdir instead of None

• **ISSUE #37264**: (junster1) Parsing __grains__ with json.dumps in a module is returning an empty dict in 2016.3.3 (refs: #37279)

• **PR #37279**: (gtmanfred) initialize super class of NamespacedDictWrapper @ 2016-11-01 15:12:49 UTC
  - 1a4833b3a1 Merge pull request #37279 from gtmanfred/2016.3
  - 597f34d657 initialize super class of NamespacedDictWrapper

• **PR #37351**: (jfindlay) modules.mac_power: give macOS time to change setting (refs: #37426) @ 2016-10-31 19:15:40 UTC
  - 351175931c Merge pull request #37351 from jfindlay/mac_set
  - 0c5805ed84 modules.mac_power: give macOS time to change setting

• **PR #37340**: (cachedout) SIGILL -> SIGKILL in process test @ 2016-10-31 08:50:10 UTC
  - 25c987e33a Merge pull request #37340 from cachedout/ill_kill_3
  - a6b471f9e SIGILL -> SIGKILL in process test

• **ISSUE #35480**: (jelenak) 200 processes of salt-master (2016.3.2) (refs: #37306)

• **PR #37306**: (DmitryKuzmenko) Don’t use os.wait() on subprocesses managed by multiprocessing. @ 2016-10-31 06:55:30 UTC
Salt Documentation, Release 3002.2

- 7f1654894d Merge pull request #37306 from DSRCorporation/bugs/35480_master_shutdown_no_process_error
- b6937ebaa8 Don’t use os.wait() on subprocesses managed by multiprocessing.

• ISSUE #34998: (exomega) placementgroup parameter for salt-cloud is undocumented (refs: #37314)

• PR #37314: (rallytime) Document the existence of placementgroup option in ec2 driver @ 2016-10-31 06:42:33 UTC
  - bf8ba97d54 Merge pull request #37314 from rallytime/fix-34998
  - 39459ed30b Document the existence of placementgroup option in ec2 driver

• ISSUE #36148: (alex-zel) Eauth error with openLDAP groups (refs: #37219)

• PR #37219: (alex-zel) Fix freeipa ldap groups @ 2016-10-28 04:33:37 UTC
  - e0baf4b193 Merge pull request #37219 from alex-zel/fix-freeipa-ldap-groups
  - b5b2e7e097 Remove trailing whitespaces
  - 32f906b020 Add support for FreeIPA

28.2.58 Salt 2016.3.6 Release Notes

Version 2016.3.6 is a bugfix release for 2016.3.0.

Statistics

• Total Merges: 119
• Total Issue References: 52
• Total PR References: 163
• Contributors: 43 (Adaephon-GH, Ch3LL, DmitryKuzmenko, Foxlik, GideonRed-zz, The-Loeki, UtahDave, alexbleotu, anlutro, bobrik, cachedout, cro, dincamihai, drawsmcgraw, fboismenu, galet, garethgreenaway, grep4inux, gtmanfred, jacobhammons, jfindlay, joe-niland, lvgr01, mbom2004, mcalmer, mchugh19, meiksh, mirceaclunic, morganwilcock, narendraingale2, nasenbaer13, ni3mm4nd, rallytime, s0undt3ch, sergeizv, smarsching, techhat, terminalmage, thatch45, twangboy, velom, vutny, yue9944882)

Security Fix

CVE-2017-7893 Compromised salt-minions can impersonate the salt-master. (Discovery credit: Frank Spierings)

Changelog for v2016.3.5..v2016.3.6

Generated at: 2018-05-27 13:45:07 UTC

• PR #40232: (rallytime) Update release notes for 2016.3.6 @ 2017-03-22 21:09:35 UTC
  - 24c4ae9c21 Merge pull request #40232 from rallytime/update-release-notes
  - 2ead188b4f Update release notes for 2016.3.6

• ISSUE #39854: (Foxlik) quoted space in authorized_keys confuses ssh.py (refs: #39855)

• PR #39855: (Foxlik) Use regular expression instead of split when replacing authorized_keys @ 2017-03-22 18:28:32 UTC
• **PR #40221**: (rallytime) Back-port #39179 to 2016.3 @ 2017-03-22 17:40:34 UTC
  - PR #39179: (mcalmer) fix error parsing (refs: #40221)
  - fd10430018 Merge pull request #40221 from rallytime/bp-39179
  - 07dc2de084 fix error parsing

• **ISSUE #40203**: (frogunder) 2016.3.6. Minion don’t connect to older master. (refs: #40206)

• **PR #40206**: (cro) Leave sign_pub_messages off by default. @ 2017-03-22 16:43:03 UTC
  - a27a2cc3bb Merge pull request #40206 from cro/sign_pub_take2
  - 01048de83f leave sign_pub_messages off on minion by default.
  - a82b005507 Leave sign_pub_messages off by default.

• **PR #40193**: (rallytime) Back-port #40117 to 2016.3 @ 2017-03-22 16:42:21 UTC
  - PR #40117: (narendraingale2) Fix force remove (refs: #40193)
  - d1abb4cbab Merge pull request #40193 from rallytime/bp-40117
  - cf1857904b More optimization.
  - 5a08266814 Removed debug statement
  - f557f7c6bb Added fix for issue 39393
  - bb62278b73 Reverting changes.
  - a9107cde44 Added if condition for broken link.

• **PR #40196**: (twangboy) Update dependencies for PyOpenSSL @ 2017-03-22 16:40:46 UTC
  - 0f1ffd4d8a Merge pull request #40196 from twangboy/win_fix_deps
  - 6761527793 Update dependencies for PyOpenSSL

• **PR #40184**: (terminalmage) Link to minion start reactor example from FAQ. @ 2017-03-21 17:33:09 UTC
  - b0501515cb Merge pull request #40184 from terminalmage/link-reactor-example
  - a42be82993 Link to minion start reactor example from FAQ.

• **PR #40182**: (terminalmage) Add support for "stopped" state to dockerng's mod_watch @ 2017-03-21 15:40:29 UTC
  - d4e6c58526 Merge pull request #40182 from terminalmage/dockerng-mod_watch-stopped
  - 4629a26fb7 Add support for "stopped" state to dockerng's mod_watch

• **PR #40171**: (Ch3LL) additional PRs/issues for 2016.3.6 release notes @ 2017-03-20 22:14:17 UTC
  - a0b4082484 Merge pull request #40171 from Ch3LL/2016.3.6_release
  - 9c68d892f6 additional PRs/issues for 2016.3.6 release notes

• **PR #40120**: (sergeizv) gce: Exclude GCENodeDriver objects from _expand_node result @ 2017-03-20 21:44:42 UTC
  - 33ba7821f7 Merge pull request #40120 from sergeizv/gce-expand-node-fix
  - 9d0f8e7e01 gce: Exclude GCENodeDriver objects from _expand_node result
- **PR #40122**: (meaksh) Adding "pkg.install downloadonly=True" support to yum/dnf execution module @ 2017-03-20 21:44:15 UTC
  - 48843977c3 Merge pull request #40122 from meaksh/2016.3-yum-downloadonly-support
  - 067f3f77c2 Adding downloadonly support to yum/dnf module
- **PR #40159**: (cro) Turn on sign_pub_messages by default. @ 2017-03-20 21:00:49 UTC
  - 60e1d4e2f3 Merge pull request #40159 from cro/sign_pub
  - e663b761fb Fix small syntax error
  - 0a0f46b14 Turn on sign_pub_messages by default. Make sure messages with no 'sig' are dropped with error when sign_pub_messages is True.
- **PR #40123**: (twangboy) Adds support for inet_pton in Windows to network util @ 2017-03-20 16:25:47 UTC
  - 28e4fc17b6 Merge pull request #40123 from twangboy/win_fix_network
  - 06df655e9f Adds support for inet_pton in Windows to network util
- **ISSUE #39995**: (frogunder) Head of Develop - Multimaster error (refs: #40141)
- **ISSUE #39118**: (bobrik) Minion ipv6 option is not documented (refs: #39289, #39131)
- **PR #40141**: (bobrik) Use the first address if cannot connect to any @ 2017-03-20 15:06:57 UTC
  - PR #39289: (bobrik) Autodetect IPv6 connectivity from minion to master (refs: #39766, #40141)
  - 35ddb79f59 Merge pull request #40141 from bobrik/fallback-resolve
  - af154deedf Use the first address if cannot connect to any
- **PR #40059**: (terminalmage) Fix traceback when virtualenv.managed is invoked with nonexistant user @ 2017-03-16 20:46:43 UTC
  - 116201f345 Merge pull request #40059 from terminalmage/fix-virtualenv-traceback
  - e3cfd29d6b Fix traceback when virtualenv.managed is invoked with nonexistant user
- **PR #40000**: (rallytime) Back-port #40056 to 2016.3 @ 2017-03-16 19:42:58 UTC
  - PR #40056: (thatch45) update mention bot blacklist (refs: #40090)
  - a01b52b9a3 Merge pull request #40090 from rallytime/bp-40056
  - ae012db87a update mention bot blacklist
- **PR #40057**: (cachedout) More mentionbot blacklists @ 2017-03-16 18:10:11 UTC
  - d1570bba4c Merge pull request #40057 from cachedout/ollie_blacklist
  - 0ac2e83d37 Merge branch '2016.3' into ollie_blacklist
- **PR #40070**: (Ch3LL) update 2016.3.6 release notes with additional PR's @ 2017-03-16 15:43:22 UTC
  - d36db1a6e Merge pull request #40070 from Ch3LL/2016.3.6_release
  - a1f8b49bd1 update 2016.3.6 release notes with additional PR's
- **PR #40018**: (meaksh) Allows overriding 'timeout' and 'gather_job_timeout' to 'manage.up' runner call @ 2017-03-15 19:43:01 UTC
  - 8dcf7c7751 Merge pull request #40018 from meaksh/2016.3-handling-timeouts-for-manage.up-runner
  - 9f5c3b7dcd Allows to set custom timeouts for 'manage.up' and 'manage.status'
  - 2102d9c75c Allows to set 'timeout' and 'gather_job_timeout' via kwargs
• **PR #40038**: (velom) correctly parse "pkg_name==version" from pip freeze @ 2017-03-15 19:30:03 UTC
  - 22fc5299a2 Merge pull request #40038 from velom/fix-pip-freeze-parsing
  - 3fae91d879 correctly parse "pkg_name==version" from pip freeze

• **ISSUE #40036**: (oogali) UnboundLocalError: local variable 'ifcfg' referenced before assignment (refs: #40053)

• **PR #40053**: (gtmanfred) Update rh_ip.py @ 2017-03-15 18:57:32 UTC
  - 3584f935fa Merge pull request #40053 from saltstack/rh_ip_patch
  - 219947acdb Update rh_ip.py

• **ISSUE #40011**: (tsaridas) salt-minion does not shutdown properly 2016.11.3 rh6 (refs: #40041)

• **PR #40041**: (terminalmage) Fix transposed lines in salt.utils.process @ 2017-03-15 17:58:24 UTC
  - 837432d3d2 Merge pull request #40041 from terminalmage/issue40011
  - 5b5d1b375c Fix transposed lines in salt.utils.process

• **PR #40021**: (Ch3LL) 2016.3.6 release notes with change log @ 2017-03-14 21:06:18 UTC
  - ee7f9b1200 Merge pull request #40021 from Ch3LL/2016.3.6_release
  - f3e7e4fb2a Add 2016.3.6 Release Notes

• **PR #40016**: (terminalmage) Attempt to fix failing grains tests in 2016.3 @ 2017-03-14 18:34:32 UTC
  - 26895b7be2 Merge pull request #40016 from terminalmage/fix-grains-test
  - 0ec81a4cde Fixup a syntax error
  - 5d84b40bfd Attempt to fix failing grains tests in 2016.3

• **PR #39980**: (vutny) [2016.3] Allow to use bg kwarg for cmd.run state function @ 2017-03-14 17:16:14 UTC
  - 0c61d064ad Merge pull request #39980 from vutny/cmd-run-state-bg
  - a81dc9dfc1 [2016.3] Allow to use bg kwarg for cmd.run state function

• **ISSUE #39942**: (Foxlik) Web Documentation not in sync with release 2016.11.3 (refs: #39994)

• **PR #39994**: (rallytime) Add a versionadded tag for dockerng ulimits addition @ 2017-03-13 20:58:02 UTC
  - b04248455 Merge pull request #39994 from rallytime/ulimits-dockerng-version
  - 37bd800fac Add a versionadded tag for dockerng ulimits addition

• **PR #39988**: (terminalmage) Add comment explaining change from #39973 @ 2017-03-13 18:37:29 UTC
  - **PR #39973**: (terminalmage) Don't use docker.Client instance from context if missing attributes (refs: #39988)
    - e125c94ba5 Merge pull request #39988 from terminalmage/dockerng-timeout
    - bd2519ed1b Add comment explaining change from #39973

• **PR #39973**: (terminalmage) Don't use docker.Client instance from context if missing attributes (refs: #39988) @ 2017-03-11 14:57:50 UTC
  - cd0336e868 Merge pull request #39973 from terminalmage/dockerng-timeout
  - 869416e7db Don't use docker.Client instance from context if missing attributes

• **PR #39962**: (cachedout) Disable mention bot delay on 2016.3 @ 2017-03-10 20:24:08 UTC
  - 282c607d26 Merge pull request #39962 from cachedout/disable_mentionbot_delay_3
  - 7a638f204b Disable mention bot delay on 2016.3

28.2. Previous Releases
* More mentionbot blacklists

- **PR #39937**: (cachedout) Fix --non-gpg-checks in zypper module @ 2017-03-10 18:02:51 UTC
  - 1e0c88ae08 Merge pull request #39937 from cachedout/gpg_zypper
  - 13ed0d1209 Fix --non-gpg-checks in zypper module

- **PR #39929**: (terminalmage) Scrap event-based approach for refreshing grains (2016.3 branch) @ 2017-03-09 22:03:16 UTC
  - 4526fc6e08 Merge pull request #39929 from terminalmage/pr-39770-2016.3
  - cf0100dabe Scrap event-based approach for refreshing grains

- **ISSUE #22080**: (The-Loeki) CIDR matching for IPv6 / improve IPv6 support in utils.network (refs: #39919)

- **PR #39919**: (The-Loeki) CIDR matching supports IPv6, update docs @ 2017-03-09 16:03:00 UTC
  - 111110caf8 Merge pull request #39919 from The-Loeki/patch-1
  - 170cbadc54 CIDR matching supports IPv6, update docs

- **PR #39899**: (techhat) Update cleanup function for azure @ 2017-03-08 23:28:33 UTC
  - caf10e9988 Merge pull request #39899 from techhat/cleanupdisks
  - baf4579e63 Update cleanup function for azure

- **PR #39871**: (terminalmage) Squelch warning for pygit2 import @ 2017-03-07 20:40:18 UTC
  - fc95f3654 Merge pull request #39871 from terminalmage/squelch-import-warning
  - 2b2ec69d04 Squelch warning for pygit2 import

- **PR #39794**: (cachedout) Clean up errors which might be thrown when the monitor socket shuts down @ 2017-03-04 16:12:37 UTC
  - f223fa8906 Merge pull request #39794 from cachedout/clean_monitor_socket_shutdown
  - 2e683e788b Clean up errors which might be thrown when the monitor socket shuts down

- **PR #39819**: (terminalmage) Improve the Top File matching docs @ 2017-03-04 16:06:40 UTC
  - 4002dc1947 Merge pull request #39819 from terminalmage/top-file-matching-docs
  - 7178c77eee Improve the Top File matching docs

- **PR #39820**: (ni3mm4nd) Add missing apostrophe in Beacons topic documentation @ 2017-03-04 16:05:29 UTC
  - c08aaeb7fd Merge pull request #39820 from ni3mm4nd/beacons_topic_doc_typo
  - 804b12048c Add missing apostrophe

- **PR #39826**: (cachedout) Add group func to yubikey auth @ 2017-03-04 16:02:14 UTC
  - cbd2a4e3cc Merge pull request #39826 from cachedout/yubikey_fix
  - 6125ef02d Add group func to yubikey auth

- **ISSUE #39622**: (drawsmcgraw) boto_vpc.create_subnet does not properly assign tags (refs: #39624)

- **PR #39624**: (drawsmcgraw) Address issue 39622 @ 2017-03-03 15:59:04 UTC
  - f575ef459f Merge pull request #39624 from drawsmcgraw/39622
  - 13ada50be33 Fix indentation lint errors
  - 545026352f Address issue 39622

- **ISSUE #39119**: (frogunder) Head of 2016.3 - Salt-Master uses 90 seconds to restart (refs: #3976)
• **PR #39796**: (cachedout) Stop the process manager when it no longer has processes to manage @ 2017-03-02 23:03:13 UTC
  - 1f3619c1e5 Merge pull request #39796 from cachedout/master_shutdown
  - e31d46c1b8 Stop the process manager when it no longer has processes to manage
• **ISSUE #39333**: (jagguli) Not Available error - Scheduling custom runner functions (refs: #39791)
• **ISSUE #38514**: (githubcdr) Unable to schedule runners (refs: #39791)
• **PR #39791**: (gtmanfred) load runners if role is master @ 2017-03-02 19:43:41 UTC
  - 53341cf152 Merge pull request #39791 from gtmanfred/2016.3
  - 3abf843bf load runners if role is master
• **ISSUE #39782**: (sergeizv) salt-cloud show_instance action fails on EC2 instances (refs: #39784)
• **ISSUE #33162**: (jfindlay) Key error with salt.utils.cloud.cache_node and EC2 (refs: #39784, #33164)
• **PR #39784**: (sergeizv) Fix 39782 @ 2017-03-02 16:08:51 UTC
  - PR #33164: (jfindlay) cloud.clouds.ec2: cache each named node (refs: #39784)
  - c234c25092 Merge pull request #39784 from sergeizv/fix-39782
  - b71c3fe13c Revert "cloud.clouds.ec2: cache each named node (#33164)"
• **ISSUE #39336**: (GevatterGaul) salt-minion fails with IPv6 (refs: #39766)
• **ISSUE #39118**: (bobrik) Minion ipv6 option is not documented (refs: #39289, #39131)
• **PR #39766**: (rallytime) Restore ipv6 connectivity and "master: <ip>:<port>" support @ 2017-03-02 02:55:55 UTC
  - PR #39289: (bobrik) Autodetect IPv6 connectivity from minion to master (refs: #39766, #40141)
  - PR #25021: (GideonRed-zz) Introduce ip:port minion config (refs: #39766)
  - 4ee59be22c Merge pull request #39766 from rallytime/fx-ipv6-connection
  - 65b239664e Restore ipv6 connectivity and "master: <ip>:<port>" support
• **ISSUE #33187**: (usbportnoy) Deploy to jboss TypeError at boss7.py:469 (refs: #39761, #39170)
• **PR #39761**: (cachedout) Properly display error in jboss7 state @ 2017-03-01 18:43:23 UTC
  - a24da31131 Merge pull request #39761 from cachedout/issue_33187
  - c2df29edh2 Properly display error in jboss7 state
• **PR #39728**: (rallytime) [2016.3] Bump latest release version to 2016.11.3 @ 2017-02-28 18:07:44 UTC
  - 0888bce32ef Merge pull request #39728 from rallytime/update-release-ver-2016.3
  - c9bc8af8f2 [2016.3] Bump latest release version to 2016.11.3
• **PR #39619**: (terminalmage) Add a function to simply refresh the grains @ 2017-02-28 00:20:27 UTC
  - b52d8beec68 Merge pull request #39619 from terminalmage/zd1207
  - c7df4b494a6 Fix mocking for grains refresh
  - 7e0ced3b45 Properly hand proxy minions
  - 692c456da3 Add a function to simply refresh the grains
• **ISSUE #39482**: (bobrik) file.managed and file mode don’t mention default mode (refs: #39487)
• **PR #39487**: (bobrik) Document default permission modes for file module @ 2017-02-24 23:49:00 UTC
- 3f8b56e733 Merge pull request #39487 from bobrik/mode-docs
- 41ef69b3ca Document default permission modes for file module

• ISSUE #39169: (blueyed) Using batch-mode with salt.state in orchestration runner considers all minions to have failed (refs: #39641)

• PR #39641: (smarsching) Return runner return code in a way compatible with check_state_result @ 2017-02-24 23:07:11 UTC
  - f7389bf1f5 Merge pull request #39641 from smarsching/issue-39169-2016.3
  - 88c2d9a540 Fix return data structure for runner (issue #39169).

• PR #39633: (terminalmage) Fix misspelled argument in salt.modules.systemd.disable() @ 2017-02-24 18:21:36 UTC
  - fc970b6a16 Merge pull request #39633 from terminalmage/fix-systemd-typo
  - ca54541abe Add missing unit test for disable func
  - 17109e1522 Fix misspelled argument in salt.modules.systemd.disable()

• PR #39613: (terminalmage) Fix inaccurate documentation @ 2017-02-24 06:07:35 UTC
  - 53e78d67f6 Merge pull request #39613 from terminalmage/fix-docs
  - 9342eda377 Fix inaccurate documentation

• PR #39600: (vutny) state.file: drop non-relevant examples for source_hash parameter @ 2017-02-23 16:55:27 UTC
  - 4e2b852f83 Merge pull request #39600 from vutny/state-file-docs
  - 9b0427c27a state.file: drop non-relevant examples for source_hash parameter

• PR #39584: (cachedout) A note in the docs about mentionbot @ 2017-02-23 15:12:13 UTC
  - ed83420417 Merge pull request #39584 from cachedout/mentionbot_docs
  - 652044b18f A note in the docs about mentionbot

• PR #39583: (cachedout) Add empty blacklist to mention bot @ 2017-02-23 02:22:57 UTC
  - d3e50b4f2f Merge pull request #39583 from cachedout/mentionbot_blacklist
  - 62491c900d Add empty blacklist to mention bot

• PR #39579: (rallytime) [2016.3] Pylint: Remove unused import @ 2017-02-22 23:46:33 UTC
  - 8352e6b44b Merge pull request #39579 from rallytime/fx-lint
  - 65889e1f30 [2016.3] Pylint: Remove unused import

• PR #39578: (cachedout) Add mention-bot configuration @ 2017-02-22 23:39:24 UTC
  - 43dba3254c Merge pull request #39578 from cachedout/2016.3
  - 344499eeef7 Add mention-bot configuration

• PR #39542: (twangboy) Gate ssh_known_hosts state against Windows @ 2017-02-22 20:16:41 UTC
  - 8f7a0f9d96 Merge pull request #39542 from twangboy/gate_ssh_known_hosts
  - c90a52ef27 Remove expensive check
  - 6d645ca40e Add __virtual__ function

• ISSUE #39118: (bobrik) Minion ipv6 option is not documented (refs: #39289, #39131)
• PR #39289: (bobrik) Autodetect IPv6 connectivity from minion to master (refs: #39766, #40141) @ 2017-02-22 19:05:32 UTC
  - c10965833a Merge pull request #39289 from bobrik/autodetect-ipv6
  - 27611a1b244 Move new kwargs to the end of argument list
  - 0df6b922e7 Narrow down connection exception to socket.error
  - e8a2ce0488 Do no try to connect to salt master in syndic config test
  - af9578631e Properly log address that failed to resolve or pass connection check
  - 9a34fbeb9 Actually connect to master instead of checking route availability
  - c49839c65 Avoid bare exceptions in dns_check
  - 29f376676d Rewrite dns_check to try to connect to address
  - 55965ce505 Autodetect IPv6 connectivity from minion to master

• PR #39569: (s0undt3ch) Don’t use our own six dictionary fixes in this branch @ 2017-02-22 18:59:49 UTC
  - 3fb928b63a Merge pull request #39569 from s0undt3ch/2016.3
  - 49da135abd Don’t use our own six dictionary fixes in this branch

• PR #39508: (dincamihai) Openscap @ 2017-02-22 18:36:36 UTC
  - 91e3319df8 Merge pull request #39508 from dincamihai/openscap
  - 9fedb8a607 Always return oscap’s stderr
  - 0eceed2cd02 Include oscap returncode in response

• ISSUE #30802: (kjelle) Missing ulimits on docker.running / dockerng.running (refs: #39562)

• PR #39562: (terminalmage) Add ulimits to dockerng state/exec module @ 2017-02-22 16:31:49 UTC
  - fbe2194a93 Merge pull request #39562 from terminalmage/issue30802
  - c50374041d Add ulimits to dockerng state/exec module
  - da24040c1a Try the docker-py 2.0 client name first
  - PR #39544: (terminalmage) dockerng.get_client_args: Fix path for endpoint config for some versions of docker-py

• ISSUE #39447: (Foxlik) dockerng keeps restarting privileged container (refs: #39483)

• PR #39498: (terminalmage) Resubmit PR #39483 against 2016.3 branch @ 2017-02-20 19:35:33 UTC
  - PR #39483: (Foxlik) dockerng: compare sets instead of lists of security_opt (refs: #39498)
  - dff35b58f8 Merge pull request #39498 from terminalmage/pr-39483
  - 20b9097a45 dockerng: compare sets instead of lists of security_opt

• PR #39497: (terminalmage) Two dockerng compatibility fixes @ 2017-02-19 17:43:36 UTC
  - 6418ce725ed Merge pull request #39497 from terminalmage/docker-compat-fixes
  - cbdf0270bac docker: make docker-exec the default execution driver
  - a6a1d58aa Handle docker-py 2.0’s new host_config path

• PR #39423: (dincamihai) Openscap module @ 2017-02-17 18:31:04 UTC
  - 9c4292f9b4e Merge pull request #39423 from dincamihai/openscap
  - 9d1342ac1 OpenSCAP module
• ISSUE #39444: (clem-compilatio) salt-cloud - IPv6 and IPv4 private_ips - preferred_ip sends False to is_public_ip (refs: #39464)

• PR #39464: (gtmanfred) skip false values from preferred_ip @ 2017-02-16 22:48:32 UTC
  – 7dd2502360 Merge pull request #39464 from gtmanfred/2016.3
  – f829d6f9fc skip false values from preferred_ip

• PR #39460: (cachedout) Fix mocks in win_disim tests @ 2017-02-16 19:27:48 UTC
  – db359ff2e3 Merge pull request #39460 from cachedout/win_disim_test_fix
  – e652a45592 Fix mocks in win_disim tests

• PR #39426: (morganwillcock) win_dism: Return failure when package path does not exist @ 2017-02-16 00:09:22 UTC
  – 9dbba9b57 Merge pull request #39426 from morganwillcock/dism
  – a7d5118262 Return failure when package path does not exist

• PR #39431: (UtahDave) Fix grains.setval performance @ 2017-02-15 23:56:30 UTC
  – 56162706e3 Merge pull request #39431 from UtahDave/fix_grains.setval_performance
  – 391bbecd90 add docs
  – 709c197f84 allow sync_grains to be disabled on grains.setval

• ISSUE #39304: (Auha) boto_s3_bucket documentation dependency clarification (refs: #39405)

• PR #39405: (rallytime) Update :depends: docs for boto states and modules @ 2017-02-15 17:32:08 UTC
  – 239e16e612 Merge pull request #39405 from rallytime/fix-39304
  – bd1fe03ce7 Update :depends: docs for boto states and modules

• ISSUE #38762: (oz123) Configuration information for custom returners (refs: #39411)

• PR #39411: (rallytime) Update external_cache docs with other configuration options @ 2017-02-15 17:30:40 UTC
  – 415102f346 Merge pull request #39411 from rallytime/fix-38762
  – e13febe58d Update external_cache docs with other configuration options
  – PR #39421: (terminalmage) Update docs on upstream EPEL7 pygit2/libgit2 issues
  – PR #39409: (terminalmage) salt.fileserver.roots: Fix regression in symlink_list
  – PR #39337: (terminalmage) Don’t re-walk the roots fileserver in symlink_list() (refs: #39409)

• PR #39362: (dincamihai) Add cp.push test @ 2017-02-14 18:42:11 UTC
  – 8b8ab8ef8e Merge pull request #39362 from dincamihai/cp-push-test-2016.3
  – 91383c5a19 Add cp.push test

• PR #39380: (joe-niland) Quote numeric user names so pwd.getpwnam handles them properly @ 2017-02-14 18:33:33 UTC
  – 4b726f955b Merge pull request #39380 from joe-niland/quote-numeric-usernames
  – c2edfdd464 Quote numeric user names so pwd.getpwnam handles them properly

• PR #39400: (meaksh) Prevents 'OSError' exception in case certain job cache path doesn't exist @ 2017-02-14 18:27:04 UTC
  – 1116d32df9 Merge pull request #39400 from meaksh/2016.3-fix-local-cache-issue
- e7e559ef5c Prevents 'OSErrro' exception in case path doesn't exist

- **PR #39300**: (terminalmage) Replace more usage of str.format in the loader @ 2017-02-13 19:01:19 UTC
  - PR #39227: (terminalmage) Loader optimization (refs: #39300)
  - 6c854da1d4 Merge pull request #39300 from terminalmage/loader-optimization
  - d3e5d1525e Replace more usage of str.format in the loader

- **PR #39337**: (terminalmage) Don't re-walk the roots fileserver in symlink_list() (refs: #39409) @ 2017-02-13 18:41:17 UTC
  - 5286b5ff1b Merge pull request #39337 from terminalmage/issue34428
  - a7d2135dc2 Don't re-walk the roots fileserver in symlink_list()

- **PR #39339**: (cro) Add link to external pillar documentation for clarification. @ 2017-02-13 18:40:13 UTC
  - ce781dee65 Merge pull request #39339 from cro/pillar_filetree_doc
  - 410810cc2a Clarification on external pillar usage.
  - PR #39316: (terminalmage) Document the upstream RedHat bug with their pygit2 package

- **PR #39313**: (rallytime) [2016.3] Merge forward from 2015.8 to 2016.3 @ 2017-02-10 16:23:23 UTC
  - 9de559ff4a Merge pull request #39313 from rallytime/merge-2016.3
  - 0b8dddf12b Merge branch '2015.8' into '2016.3'
  - fc551bc5df Merge pull request #39293 from sergeizv/grammar-fix
    * 702b586d3 Rewrap paragraph
    * e6a5178e6a Grammar fix
  - 8a1b45632a Merge pull request #39295 from sergeizv/typo-fix
    * 5df36d58d Fix typo
  - cfafaece34 Merge pull request #39296 from sergeizv/whitespace-fix
    * 14dc1d14c0 Whitespace fix in docs Makefile
  - 0b4df4a47 Merge pull request #39294 from sergeizv/fix-link
    * 04bde6e6d2 Fix link in proxyminion guide

- **ISSUE #38595**: (yue9944882) Redis ext job cache occurred error (refs: #38610)
  - PR #39299: (rallytime) Back-port #38610 to 2016.3
  - PR #38610: (yue9944882) Fix #38595 - Unexpected error log from redis retuner in master's log (refs: #39299)

- **PR #39297**: (cro) Add doc to recommend pgjsonb for master job caches @ 2017-02-09 22:49:59 UTC
  - f16027d30e Merge pull request #39297 from cro/pg_returner_docs
  - 28bac649ae Typo
  - 19fedcdd23 Add doc to recommend pgjsonb for master job caches

- **PR #39286**: (terminalmage) Allow minion/CLI saltenv/pillarenv to override master when compiling pillar @ 2017-02-09 21:22:46 UTC
  - 77e50ed8b7 Merge pull request #39286 from terminalmage/fix-pillarenv-precedence
  - 3cb9833e57 Allow minion/CLI saltenv/pillarenv to override master when compiling pillar

• ISSUE #39220: (lvg01) state.file.line skips leading spaces in content with mode:ensure and indent:False (refs: #39221)

• PR #39221: (lvg01) Fix bug 39220 @ 2017-02-09 18:12:29 UTC
  - 52440416ca Merge pull request #39221 from lvg01/fix-bug-39220
  - e8a41d6341 Remove to early content stripping (stripping is allready done when needed with ident:true), fixes #39220
  - a4b169e0bd Fixed wrong logic, fixes #39220

• ISSUE saltstack/salt#33536: (murzick) pkgrepo.managed does not disable a yum repo with "disabled: True" (refs: #35055)

• ISSUE #33536: (murzick) pkgrepo.managed does not disable a yum repo with "disabled: True" (refs: #35055)
  - PR #39251: (terminalmage) Better handling of enabled/disabled arguments in pkgrepo.managed
  - PR #35055: (galet) #33536 pkgrepo.managed does not disable a yum repo with "disabled: True" (refs: #39251)

• PR #39227: (terminalmage) Loader optimization (refs: #39300) @ 2017-02-08 19:38:21 UTC
  - 8e88f71dd9 Merge pull request #39227 from terminalmage/loader-optimization
  - c750662946 Loader optimzation

• ISSUE #38856: (haynes) salt-cloud throws an exception when ec2 does not return encoding (refs: #39228)

• PR #39228: (gtmanfred) default to utf8 encoding if not specified @ 2017-02-08 19:36:57 UTC
  - bc89b297f8 Merge pull request #39228 from gtmanfred/2016.3
  - afe047b08 default to utf8 encoding if not specified

• PR #39231: (terminalmage) Add clarification for jenkins execution module @ 2017-02-08 19:34:45 UTC
  - d9b0671dbd Merge pull request #39231 from terminalmage/clarify-jenkins-depends
  - ad1b1255f2 Add clarification for jenkins execution module

• PR #39232: (terminalmage) Avoid recursion in s3/svn ext_pillars @ 2017-02-08 19:33:28 UTC
  - ddcff89a84 Merge pull request #39232 from terminalmage/issue21342
  - c88896c277 Avoid recursion in s3/svn ext_pillars

• ISSUE #38697: (fboismenu) On Windows, ip.get_all_interfaces returns at most 2 DNS/WINS Servers (refs: #38793)
  - PR #39230: (rallytime) Fix the win_ip_test failures
  - PR #38793: (fboismenu) Fix for #38697 (refs: #39197, #39230)

• ISSUE #33187: (usbportnoy) Deploy to jboss TypeError at boss7.py:469 (refs: #39761, #39170)

• PR #39199: (rallytime) Back-port #39170 to 2016.3 @ 2017-02-07 16:19:52 UTC
PR #39170: (grep4linux) Added missing source_hash_name argument in get_managed function (refs: #39199)

- df5f934c34 Merge pull request #39199 from rallytime/bp-39170
- c129905310 Added missing source_hash_name argument in get_managed function Additional fix to #33187 Customer was still seeing errors, this should now work. Tested with 2015.8.13 and 2016.11.2

• ISSUE #37174: (mikeadamz) The State execution failed to record the order in which all states were executed spam while running pkg.upgrade from orchestration runner (refs: #39206)

- PR #39206: (cachedout) Ignore empty dicts in highstate outputter @ 2017-02-07 16:11:36 UTC
  - 2621c119fd Merge pull request #39206 from cachedout/issue_issue_37174
  - be31e0559c Ignore empty dicts in highstate outputter

- PR #39209: (terminalmage) Sort the return list from the fileserver.envs runner @ 2017-02-07 16:07:08 UTC
  - dd440452ea Merge pull request #39209 from terminalmage/sorted-envs
  - e6dda4a625 Sort the return list from the fileserver.envs runner

- PR #39202: (rallytime) [2016.3] Pylint fix

• ISSUE #38697: (fboismenu) On Windows, ip.get_all_interfaces returns at most 2 DNS/WINS Servers (refs: #38793)

- PR #39197: (cachedout) Pr 38793 @ 2017-02-06 19:23:12 UTC
  - PR #38793: (fboismenu) Fix for #38697 (refs: #39197, #39230)
  - ab76054127 Merge pull request #39197 from cachedout/pr-38793
  - f3d35fb5c6 Lint fixes
  - 624f25b78d Fix for #38697

- PR #39166: (Ch3LL) fix boto ec2 module create_image doc @ 2017-02-06 18:27:17 UTC
  - fa45cbc359 Merge pull request #39166 from Ch3LL/fixed_boto_ec2_docs
  - 90a696331 fix boto ec2 module create_image doc

- PR #39173: (rallytime) Restore "Salt Community” doc section @ 2017-02-06 18:19:11 UTC
  - PR #30770: (jacobhammons) Doc restructuring, organization, and cleanup (refs: #39173)
  - PR #10792: (cachedout) Documentation overhaul (refs: #39173)
  - a40cb46249 Merge pull request #39173 from rallytime/restore-community-docs
  - 5aedd42a0 Restore "Salt Community” doc section

• ISSUE #38704: (nasenbaer13) Archive extracted fails when another state run is queued (refs: #38705)
  - PR #39077: (terminalmage) Apply fix from #38705 to 2016.3 branch
  - PR #38705: (nasenbaer13) Fix for #38704 archive extracted and dockerio states (refs: #39077)
  - PR #39146: (gtmanfred) update vmware getting started doc
  - PR #39145: (garethgreenaway) [2016.3] Fix when targeting via pillar with Salt syndic

• PR #38804: (alexbleotu) Second attempt to fix prepending of root_dir to paths @ 2017-02-02 16:10:37 UTC
  - cd8077ab81 Merge pull request #38804 from alexbleotu/root_dir_fix-2016.3-gh
  - b3bdd3b04a Add missing whiteline
- c7715acd53 Merge pull request #3 from cro/ab_rootdirfix
  * 8cbafaaaf1 When running testsuite, salt.syspaths.ROOT_DIR is often empty.
- b12dd4a426 Merge pull request #1 from cro/ab_rootdirfix
  * bfc537aca Remove extra if statements (rstrip will check for the presence anyway).
- 97521b3468 Second attempt to fix prepending of root_dir to paths

- **ISSUE #39118** (bobrik) Minion ipv6 option is not documented (refs: #39289, #39131)
- **PR #39131** (bobrik) Clarify ipv6 option for minion and interface for master, closes #39118
- **PR #3916** (terminalmage) Don’t abort pillar.get with merge=True if default is None

- **PR #39091** (terminalmage) Run test_valid_docs in batches @ 2017-02-01 19:09:05 UTC
  - cc9b69b6bc Merge pull request #39091 from terminalmage/update-test-valid-docs
  - d76f0380d0 add debug logging for batch vars
  - b4afea2a25 Don’t fail test if data is empty
  - b3a5d549c1 Account for trimmed value in ‘salt -d’ output
  - 909916c78e Run test_valid_docs in batches
- **PR #39081** (terminalmage) Move fileclient tests to tests/integration/fileserver/fileclient_test.py
  - **PR #39067** (rallytime) Bump openstack deprecation notice to Oxygen

- **PR #39047** (rallytime) [2016.3] Merge forward from 2015.8 to 2016.3 @ 2017-01-30 23:48:14 UTC
  - a24af5ac46 Merge pull request #39047 from rallytime/merge-2016.3
  - b7321f6464 Merge branch '2015.8' into '2016.3'
  - 56ca6f6f7 Add 2015.8.14 release notes file (#39046)
  - 5943fe65d3 Update 2015.8.13 release notes (#39037)
- **PR #39045** (rallytime) Add 2016.3.6 release notes file
- **PR #39042** (rallytime) [2016.3] Update release numbers for doc build
- **PR #39038** (rallytime) Update 2016.3.5 release notes

- **PR #39028** (terminalmage) Clarify delimiter argument @ 2017-01-30 18:20:26 UTC
  - 5b09dc4198 Merge pull request #39028 from terminalmage/clarify-delimiter-argument
  - f29ef071f3 Clarify delimiter argument
  - **PR #3903** (rallytime) Back-port #38972 to 2016.3
  - **PR #38972** (rallytime) Add CLI Example for rest_sample_utils.get_test_string function (refs: #39030)

- **ISSUE #38753** (alexbleotu) __proxy__ dunder is not injected when invoking the salt variable in sls files (refs: #38899, #38829)
- **ISSUE #38557** (alexbleotu) Proxy not working on develop (refs: #38829)
- **ISSUE #38265** (mirceaulinic) __utils__ object not available in proxy module (refs: #38899, #38829)
- **ISSUE #32918** (mirceaulinic) Proxy minions reconnection (refs: #38829)
  - **PR #38899** (cro) Enable __proxy__ availability in states, highstate, and utils. Enable __utils__ for prox-ies.
- PR #38829: (cro) MANY dunder variable fixes for proxies + proxy keepalive from @mirceaulinic (refs: #38899)
- PR #37864: (mirceaulinic) Proxy keepalive feature (refs: #38829)

- ISSUE #37938: (johje349) Memory leak in Reactor (refs: #38951)
- ISSUE #33890: (hvnsweeting) salt memleak when running state.sls (refs: #38951)

- PR #38951: (DmitryKuzmenko) Keep the only one record per module-function in depends decorator. @ 2017-01-27 17:05:42 UTC
  - da96221741 Merge pull request #38951 from DSRCorporation/bugs/37938_fix_depends_decorator_memleak
  - 0b18f34678 Keep the only one record per module-function in depends decorator.

- ISSUE #34780: (joehoyle) S3fs broken in 2016.3.1 (refs: #38982)
- PR #38982: (rallytime) Set response when using "GET" method in s3 utils @ 2017-01-27 17:04:48 UTC
  - 8516ed7b70 Merge pull request #38982 from rallytime/fix-34780
  - 1583c5579a Set response when using "GET" method in s3 utils

- PR #38989: (anlutro) Documentation: fix SLS in environment variable examples @ 2017-01-27 17:00:08 UTC
  - cfdbe99e12 Merge pull request #38989 from alprs/docfix-state_pt3_env
  - 52a9a16c60 fix SLS in environment variable examples

- PR #39000: (rallytime) Skip the test_badload test until Jenkins move is complete @ 2017-01-27 16:58:21 UTC

  - 405d86a2ca Merge pull request #38847 from terminalmage/issue38825
  - 11a47803ce Use log.exception() instead
    - e40fac589a Catch MinionError in file.source_list

- ISSUE #36121: (Ashald) TemplateNotFound/Unable to cache file (refs: #38875)

- PR #38875: (terminalmage) Reactor: fix traceback when salt:// path is nonexistant @ 2017-01-24 15:23:39 UTC
  - b5df104fc2 Merge pull request #38875 from terminalmage/issue36121
  - fbc4da2c4 reactor: ensure glob_ref is a string
    - 2e443d79a3 cp.cache_file: add note re: return for nonexistent salt:// path

- ISSUE #37413: (Snarfingcode666) Salt-cloud vmware missing reboot command (refs: #38887, #38890)

- PR #38890: (cro) Backport #38887 to 2016.3: Enable resetting a VM via salt-cloud & VMware driver @ 2017-01-24 15:15:35 UTC
28.2.59 Salt 2016.3.7 Release Notes

Version 2016.3.7 is a bugfix release for 2016.3.0.

Security Fix

CVE-2017-12791 Maliciously crafted minion IDs can cause unwanted directory traversals on the Salt-master

This release corrects a flaw in minion ID validation which could allow certain minions to authenticate to a master despite not having the correct credentials. To exploit the vulnerability, an attacker must create a salt-minion with an ID containing characters that will cause a directory traversal. Credit for discovering the security flaw goes to: Vernhk@qq.com

Changelog for v2016.3.6..v2016.3.7

Generated at: 2018-05-27 14:09:17 UTC

• 11d176ff1b Add release notes for 2016.3.7 release
• dc649ded51 Add clean_id function to salt.utils.verify.py
28.2.60 Salt 2016.3.8 Release Notes

Version 2016.3.8 is a bugfix release for 2016.3.0.

Security Fix

CVE-2017-14695 Directory traversal vulnerability in minion id validation in SaltStack. Allows remote minions with incorrect credentials to authenticate to a master via a crafted minion ID. Credit for discovering the security flaw goes to: Julian Brost (julian@0x4a42.net)

CVE-2017-14696 Remote Denial of Service with a specially crafted authentication request. Credit for discovering the security flaw goes to: Julian Brost (julian@0x4a42.net)

Changelog for v2016.3.7..v2016.3.8

Generated at: 2018-05-27 14:11:36 UTC

- 8cf08bd7be Update 2016.3.7 Release Notes
- 0425defe84 Do not allow IDs with null bytes in decoded payloads
- 31b38f50eb Don't allow path separators in minion ID

28.2.61 Salt 2016.3.9 Release Notes

Version 2016.3.9 is a bugfix release for 2016.3.0.

Master Changes

The following options have been added to the master config file:

- allow_minion_key_revoke - This option controls whether a minion can request that the master revoke its key. When True, a minion can request a key revocation and the master will comply. If it is False, the key will not be revoked by the master.

- require_minion_sign_messages - This requires that minions cryptographically sign the messages they publish to the master. If minions are not signing, then log this information at loglevel INFO and drop the message without acting on it.

- drop_messages_signature_fail - Drop messages from minions when their signatures do not validate. Note that when this option is False but require_minion_sign_messages is True, minions MUST sign their messages, but the validity of their signatures is ignored.

- minion_sign_messages - Causes the minion to cryptographically sign the payload of messages it places on the event bus for the master. The payloads are signed with the minion's private key so the master can verify the signature with its public key.
# 28.2.62 Salt 2015.8.0 Release Notes - Codename Beryllium

## 2015.8.0 Detailed Change List

Extended changelog courtesy of Todd Stansell (https://github.com/tjstansell/salt-changelogs)

*Generated at: 2015-09-09T18:15:43Z*

This list includes all pull requests merged into the 2015.8 branch between the forking of the branch from develop and the release of 2015.8.0.

Statistics:

- Total Merges: 682
- Total Issue references: 342
- Total PR references: 866

Pull Requests:

- #26993: (whiteinge) Backport #26975
- #26970: (cachedout) Revert "better path query parsing in fileserver"
- #26980: (terminalmage) Use human-readable cachedirs for gitfs-backed winrepo
- #26969: (TheBigBear) URL of salt windows downloads has changed
- #26968: (TheBigBear) URL of salt windows downloads has changed
- #26958: (s0undt3ch) Bradthurber bootstrap command line help doc update
- #26949: (rallytime) Back-port #25148 to 2015.8
- #26914: (cro) Add salt-proxy script and manpage to setup.py so they will get installed.
- #26909: (terminalmage) Don't try to git clone from /tmp on Windows
- #26910: (s0undt3ch) Sometimes the event system is just too fast
- #26905: (s0undt3ch) Exit the loop if run_once is true
- #26897: (msteed) spm file hash part deux
- #26900: (s0undt3ch) If no tag is passed, don't actually subscribe to anything.
- #26880: (s0undt3ch) Restore backwards compatibility to salt.utils.event
- #26896: (msteed) spm remove: use pkgfiles to calculate file hashes
- #26891: (jtand) Fixed an unboundlocalerror
- #26892: (cachedout) Make the testing ioloop the current one
- #26886: (jtand) Gets the azure version correctly on python-azure 1.0.0
- #26870: (rallytime) Back-port #26834 to 2015.8
- #26865: (dmurphy18) Fix apt preferences for apts, repos for pbuilder building for Debian
- #26873: (terminalmage) Properly handle getting local config values in older git versions
- #26869: (rallytime) Fix provider --> driver change for salt-cloud lxc
- #26858: (terminalmage) Fix a couple version checks for git state and execution module
- #26853: (UtahDave) Fix salt-cloud on windows
- #26852: (basepi) [2015.8] Only reference msgpack if it imported successfully
• #26835: *(terminalmage)* Backport #26572 to 2015.8
• #26836: *(jacobhammons)* Added rst source for salt-proxy man page, added build and copy lines ...
• #26818: *(terminalmage)* Support empty repositories in git.latest
• #26819: *(rallytime)* Make sure we’re calling _validate_name in the correct place in 2015.8 Linode driver
• #26841: *(l2ol33rt)* Fix reference before assignment in sqs engine
• #26822: *(terminalmage)* Add some missing imports for masterless winrepo
• #26831: *(basepi)* [2015.8] Merge forward from 2015.5 to 2015.8
• #26826: *(techhat)* Pass a package name to unregister_file()
• #26757: *(cachedout)* Fix various filehandle leaks
• #26816: *(gtmanfred)* rev defaults to HEAD
• #26801: *(jacobhammons)* Added doc for dockerng minion configuration options
• #26808: *(anlutro)* Fix git init argument formatting
• #26807: *(terminalmage)* Move salt.utils.itersplit() to salt.utils.итertools.split()
• #26796: *(jacobhammons)* Add doc for __states__
• #26764: *(sjorge)* salt.utils.is_proxy() is no longer always true on SunOS/Illumos/SmartOS
• #26772: *(sjorge)* pull in smartos 'virt' module from develop
• #26726: *(terminalmage)* Redact HTTPS Basic Auth in states/funcs which deal with git remotes
• #26769: *(terminalmage)* Use --track to set tracking branch on older git versions
• #26765: *(basepi)* [2015.8] Merge forward from 2015.5 to 2015.8
• #26761: *(sjorge)* fix SPM paths on smartos/illumos esky
• #26751: *(terminalmage)* Fixes for masterless winrepo
• #26745: *(rallytime)* Make sure pyrax configs are in place before checking for deps
• #26746: *(rallytime)* Make sure nova configs are set before checking for dependencies
• #26750: *(basepi)* [2015.8] Add __utils__ to state modules
• #26752: *(cro)* Fix typo in some diagram labels
• #26747: *(basepi)* [2015.8] Add __states__ to state modules, for cross-calling states
• #26744: *(basepi)* [2015.8] Fix issue from #26717
• #26737: *(dmurphy18)* Fix to allow for package naming other than just salt
• #26742: *(rallytime)* Only warn about vsphere deprecation if vsphere is configured
• #26733: *(sjorge)* Refactor of smartos_vmadm module
• #26735: *(s0undt3ch)* Add .hg and .cvs to spm_build_exclude
• #26720: *(UtahDave)* Updates for winrepo in 2015.8 to support jinja, while maintaining backwards compat
• #26719: *(jodv)* Backport 26532 to 2015.8
• #26721: *(rallytime)* Linode Driver Cleanup
• #26707: *(techhat)* Add top_level_dir to FORMULAs
• #26723: *(s0undt3ch)* Handle SPM paths in the setup script
• #26717: (basepi) [2015.8] Revert loader changes from #26645
• #26712: (techhat) Move SPM paths around
• #26680: (TheBigBear) add more python libs info in `--versions-report`
• #26716: (terminalmage) Allow git identity to be a list
• #26691: (garethgreenaway) Fixes to ipset module for 2015.8
• #26701: (kev009) Ignore the first element of kern.disks split, which is the sysctl name (new disks grain)
• #26678: (terminalmage) Restructure git.latest rewrite to work better when following HEAD
• #26679: (rallytime) Back-port #26661 to 2015.8
• #26684: (techhat) Add reactor formulas to spm
• #26682: (basepi) [2015.8] Merge forward from 2015.5 to 2015.8
• #26674: (rallytime) Back-port #26653 to 2015.8
• #26670: (techhat) Set up SPM to install -conf packages
• #26657: (jfindlay) top file compilation fixes
• #26659: (TheBigBear) minor doc edits - spelling
• #26654: (jfindlay) merge #26650
• #26567: (jtand) Added git version check to git module
• #26649: (twangboy) Fixed Lint for real in win_repo.py
• #26608: (jacobhammons) 2015.8.0 release notes and doc/conf.py updates
• #26646: (basepi) [2015.8] Merge forward from 2015.5 to 2015.8
• #26645: (rallytime) Back-port #26390 to 2015.8
• #26642: (twangboy) Added function to render winrepo Jinja
• #26625: (twangboy) Correctly detect packages with no version, docs
• #26575: (msteed) Update spm for integration into raas
• #26635: (cro) Don’t report windows as a proxy.
• #26622: (rallytime) [2015.8] Also add -Z to script args for cloud tests
• #26619: (rallytime) Apply cloud test fixes from 2015.5 to 2015.8
• #26603: (terminalmage) Fixes for git.latest, git module integration tests, etc.
• #26577: (basepi) [2015.8] Merge forward from 2015.5 to 2015.8
• #26534: (cachedout) Bump required Tornado version to 4.2.1
• #26666: (cachedout) Don’t stacktrace trying to publish without a master
• #26541: (terminalmage) Make winrepo execution module use the same code as the runner
• #26530: (basepi) [2015.8] Merge forward from 2015.5 to 2015.8
• #26570: (cachedout) Fix haproxy docs to be valid
• #26562: (cachedout) Fix suprious error message with systemd-detect
• #26557: (jfindlay) add docs to #26550
• #26544: (nmadhok) Do not raise KeyError when calling avail_images if VM/template is in disconnected state
• #26501: (terminalmage) Update git_pillar docs, add git.list_worktrees function
• #26521: (terminalmage) Work around upstream git bug when cloning repo as root
• #26518: (krak3n) Fix for #25492
• #26514: (evverx) Unmask a runtime masked services too
• #26529: (mnalt) bugfix: fix service.enable for missing rc.conf
• #26516: (techhat) Move more path operations into SPM loader
• #26533: (cachedout) Fix too aggressive even init check
• #26522: (cro) Do not load package provider if its not a proxy
• #26531: (cachedout) Fix failing event tests and modify event init
• #26433: (cro) Add support for default proxy config options, change default location of proxy config and log to /etc/salt/proxy and /var/log/proxy
• #26504: (nmadhok) [Backport] Adding ability to specify the virtual hardware version when creating VM
• #26517: (cachedout) Better fix for opensuse tornado httpclient
• #26479: (rallytime) Don’t allow VMs with duplicate names to be created in EC2/AWS
• #26488: (cachedout) Don’t pass unsupported kwarg to tornado
• #26451: (terminalmage) Use ‘rpm -qa’ instead of repoquery to list installed packages
• #26491: (jacobhammons) doc site css fix for tiny fonts that appeared in code or pre tags in ...
• #26442: (rallytime) Hide API Key from debug logs for Linode Driver
• #26441: (rallytime) Refactor a few linode functions to be useful with salt-cloud command
• #26485: (s0undt3ch) One more missed typo
• #26495: (basepi) [2015.8] Merge forward from 2015.5 to 2015.8
• #26492: (cachedout) Fix schedule test error on py26
• #26489: (cachedout) Fixing more tarfile tests on py2.6
• #26475: (cachedout) Better object checking on asyncreq cleanup
• #26477: (cachedout) Fix integration.modules.git.GitModuleTest.test_archive on py26
• #26469: (jtand) --annotate and --message aren’t valid options in older versions of git.
• #26439: (basepi) [2015.8] Merge forward from 2015.5 to 2015.8
• #26464: (rallytime) Back-port #26456 to 2015.8
• #26463: (rallytime) Back-port #26455 to 2015.8
• #26449: (s0undt3ch) The CLI options are not meant to include underscores.
• #26270: (sjorge) salt.modules.network now supports SmartOS and SunOS < Solaris 11
• #26436: (TheBigBear) minor edits
• #26410: (basepi) [2015.8] Merge forward from 2015.5 to 2015.8
• #26427: (anlutro) git.latest with no rev: fix concatenation error (NoneType and str)
• #26307: (cachedout) Fix bug in top file ordering
- #26428: (cro) Update docs to reflect new pillar structure
- #26429: (cachedout) Add release note regarding tcp transport on freebsd
- #26418: (driskell) Fix forward-merged caching from 2015.5 into 2015.8 to be compatible with the new match_func
- #26252: (DmitryKuzmenko) Issues/24048 http client 2015.8
- #26413: (evervx) Fix service.[start,restart,reload,force-reload] for masked services
- #26393: (dmurphy18) Added option parameters to make_repo to allow for configuration settings
- #26422: (TheBigBear) no dots in SLS filename _AND_ any directories (incl git repos)
- #26323: (0xf10e) Fix Credentials used in glance Exec Module
- #26341: (terminalmage) Rewrite git state and execution modules
- #26419: (terminalmage) Only use pygit2.errors if it exists
- #26423: (eliasp) doc - Correct function name for peer configuration
- #26401: (cachedout) Adapt proxy minion to tornado (w/lint)
- #26400: (rallytime) Back-port #26318 to 2015.8
- #26397: (s0undt3ch) A single isinstance() check for all types is enough
- #26385: (gtmanfred) don't require volume endpoint in nova driver
- #26287: (techhat) Break out SPM components into loaders
- #26384: (TheBigBear) Fix shell quoting for cmd.run
- #26391: (rallytime) Back-port #26367 to 2015.8
- #26383: (rallytime) Allow the creation of a VM without a profile
- #26375: (s0undt3ch) [2015.8] Schema DictItem required attribute fixes
- #26363: (garethgreenaway) Fixes to mount state 2015.8
- #26347: (0xf10e) Load 'pkgng' as 'pkg' on FreeBSD 9 when providers:pkg == 'pkgng'
- #26361: (TronPaul) sign security token
- #26346: (TronPaul) Fix s3 using IAM credentials
- #26331: (mnalt) fix bug in sysrc to allow for empty rc variables
- #26334: (rallytime) Call salt.utils.cloud.bootstrap in GCE Driver provisioning
- #26308: (dmurphy18) Support for environment overrides building packages
- #26279: (TheScriptSage) Merge changes for pull#26083`_ and pull#25632`_ into 2015.8
- #26224: (cachedout) Cleanup of a few cases to move to salt.utils.fopen
- #26260: (nmadhok) Correct spelling of integration in docs
- #26226: (rallytime) Fix #25463
- #26248: (nmadhok) Initial commit of unit tests for vmware cloud driver
- #26228: (basepi) [2015.8] Merge forward from 2015.5 to 2015.8
- #26244: (nmadhok) Backport additions to VMware cloud driver from develop to 2015.8 branch
- #26235: (sjorge) salt.utils.is_smartos_zone, inverse of is_smartos_globalzone
- #26221: (sjorge) SmartOS grain fixes
- #26218: (terminalmage) Add warning about file.recurse unicode errors with vim swap files.
- #26214: (rallytime) Back-port #24878 to 2015.8
- #26211: (techhat) Move SPM to its own directory
- #26197: (TronPaul) Fix GitFS when whitelisting base
- #26200: (anlutro) Make it possible to run salt-cloud as current user
- #26201: (kev009) Avoid VBOX storage emulation bugs in FreeBSD disks grain
- #26188: (basepi) [2015.8] Merge forward from 2015.5 to 2015.8
- #26194: (basepi) Allow virtual grains to be generated even if virt-what is not available
- #26176: (rallytime) Back-port #26165 to 2015.8
- #26169: (terminalmage) Fix attribute error in gitfs' find_file functions
- #26170: (nmadhok) [Backport] Make sure variable is a dictionary before popping something from it.
- #26143: (nmadhok) VMware cloud driver fixes [forward port from 2015.5 into 2015.8]
- #26173: (jacobhammons) Updates to cloud docs for the provider > driver change
- #26125: (evverx) Use timedatectl set-timezone to tzsetting if available
- #26145: (sjorge) smartos_imgadm cleanup
- #26148: (terminalmage) Refactor winrepo support
- #26128: (sjorge) imgadm.avail should return multiple results
- #26109: (jfindlay) fix quote indent
- #26089: (anlutro) User state/module: fix coercing of None into string "None" in GECOS
- #26081: (cachedout) Move invocation routine up
- #26086: (rallytime) Back-port #26019 to 2015.8
- #26087: (rallytime) Back-port #26059 to 2015.8
- #26052: (jtand) Rh_ip fix
- #26078: (cachedout) Fix missing key in error return
- #26074: (basepi) [2015.8] Re-apply #25358 in 2015.8
- #26069: (jfindlay) fix win_firewall.delete_rule
- #26066: (s0und1t3ch) [2015.8] Update to latest bootstrap stable release v2015.06.08
- #26049: (basepi) [2015.8] Merge forward from 2015.5 to 2015.8
- #26026: (anlutro) Fix httpasswd result false positive in test mode
- #26037: (rallytime) Back-port #25489 to 2015.8
- #26004: (techhat) Allow updating a single SPM repo at a time
- #26012: (cachedout) Merge kwargs into opts for tcp client
- #26007: (anlutro) file.managed: wrap os.remove in if isfile, don't remove on success
- #26009: (terminalmage) Add winrepo and dockerng information to 2015.8.0 release notes
- #26006: (basepi) Revert #25727 in favor of #25645
- #26001: (cachedout) Fix failing tests
- #25978: (anlutro) Correct service state changes in test mode
- #25982: (sjorge) salt.modules.smartos_* limit to global zone only
- #25989: (rallytime) Back-port #25832 to 2015.8
- #25988: (cachedout) Move #25642 to 2015.8
- #25999: (s0und3ch) Include subschema defaults
- #25997: (s0und3ch) Allow getting a defaults dictionary from schema defaults
- #25979: (basepi) [2015.8] Merge forward from 2015.5 to 2015.8
- #25902: (basepi) [2015.8] Merge forward from 2015.5 to 2015.8
- #25956: (anlutro) Fix user argument to cron functions
- #25946: (sjorge) Fix for salt.utils.decorators under esky
- #25957: (anlutro) Remove temporary file after file.managed with checkcmd
- #25874: (rallytime) Back-port #25668 to 2015.8
- #25929: (sjorge) salt.module.pkgin's __virtual__() should not return None if pkg_info is not present
- #25952: (garethgreenaway) Log when event.fire and event.fire_master fail 2015.8
- #25944: (sjorge) Smartos libcrypto nonesky fix
- #25906: (dmurphy18) Cherry-pick of pkgbuild changes from develop branch
- #25925: (sjorge) Create default log location in smartos esky buildscript
- #25928: (cachedout) Fix stacktrace for non-existant states
- #25922: (jacksontj) Correct max_wait -> max_auth_wait in MultiMinion
- #25907: (rallytime) Back-port #25892 to 2015.8
- #25910: (terminalmage) Pass osarch to check_32()
- #25849: (basepi) Repress template error for GPG renderer (can't seek an OrderedDict)
- #25868: (rallytime) Back-port #25404 to 2015.8
- #25896: (cachedout) Lint
- #25876: (jacksontj) Fixes for 2015.8
- #25867: (rallytime) Back-port #25370 to 2015.8
- #25845: (jacobhammons) updated versionadded
- #25836: (jacksontj) Keep track of SyncWrapper's IOLoop usage
- #25859: (0xf10e) warn_until(Carbon,...) instead of Boron
- #25505: (0xf10e) Glance state module for 2015.8 "Beryllium"
- #25843: (jtand) Fixed a lint error in parsers.py
- #25835: (techhat) spm update_repo doesn't always require arguments
- #25837: (jacobhammons) regenerated man pages
- #25830: (sjorge) Loading of libcrypto on smartos esky fixed
- #25808: (jfindlay) add highstate opts to config/__init__.py, update docs
• #25820: (sjorge) Prerequisite to fix the smartos libcrypto loading
• #25781: (anlutro) Fix iptables.build_rule
• #25764: (gtmanfred) allow use of cloudnetworks in ssh_interface
• #25736: (jfindlay) insert explicit formatter number
• #25742: (rallytime) Back-port #25731 to 2015.8
• #25741: (rallytime) Back-port #25727 to 2015.8
• #25712: (cachedout) Fix outputter for state.apply
• #25698: (rallytime) Back-port #25659 to 2015.8
• #25690: (anlutro) Fix highstate duration alignment (again)
• #25684: (davidjb) Fix doc around Include/Exclude for states
• #25549: (techhat) Switch Scaleway to salt.utils.cloud.bootstrap()
• #25667: (jfindlay) add 2015.8.0rc2 autogenerated changelog
• #25653: (anlutro) Properly align highstate duration sum
• #25663: (rallytime) Back-port #25638 to 2015.8
• #25639: (terminalmage) Don't do pre-flight check on git_pillar if it is not configured
• #25587: (cachedout) Fix prereq in salt.state
• #25628: (anlutro) Highstate output: show duration in seconds instead of milliseconds when appropriate
• #25631: (basepi) Remove trailing whitespace
• #25627: (basepi) [2015.8] Merge forward from 2015.5 to 2015.8
• #25626: (basepi) Fix the highstate outputter if 'duration' is not present
• #25601: (terminalmage) Fix error message when local bin pkg path is not absolute
• #25595: (terminalmage) Bring git_pillar up to feature parity with gitfs
• #25619: (cachedout) Lint stateconf changes
• #25578: (davidjb) Allow parent relative includes in state files
• #25610: (s0undt3ch) [2015.8] Update the bootstrap script to latest release v2015.07.22
• #25599: (jfindlay) fix transport settings in #25596
• #25596: (jfindlay) Tcp test
• #25591: (garethgreenaway) Return data for scheduled jobs in 2015.8 default to True.
• #25588: (basepi) Fix some of the retcode work from #23105
• #25583: (jtand) Fixed lint error where pprint wasn't imported.
• #25572: (rallytime) Back-port #25570 to 2015.8
• #25575: (rallytime) Make Sure Scaleway driver works with deprecation paths
• #25564: (basepi) [2015.8] Merge forward from 2015.5 to 2015.8
• #25566: (techhat) Fix download process for SPM repo updates
• #25553: (techhat) Switch SoftLayer to salt.utils.cloud.bootstrap()
• #25552: (techhat) Update pricing for SoftlayerHW
• #25547: (techhat) Switch Parallels to salt.utils.cloud.bootstrap()
• #25548: (techhat) Switch Proxmox to salt.utils.cloud.bootstrap()
• #25543: (techhat) Switch GCE to salt.utils.cloud.bootstrap()
• #25546: (techhat) Switch CloudStack to salt.utils.cloud.bootstrap()
• #25558: (cachedout) Lint config_test
• #25515: (s0undt3ch) salt.utils.schema fixes
• #25514: (garethgreenaway) fixes to schedule.add documentation in 2015.8
• #25508: (s0undt3ch) [2015.8] Update bootstrap script to latest stable release, v2015.07.17
• #25501: (basepi) Add optional job end time to the local_cache returner
• #25491: (s0undt3ch) Let's call it for what it is!
• #25462: (rallytime) Wrap is_profile_configured calls in try/except block
• #25439: (rallytime) Reduce digital_ocean API call frequency
• #25451: (s0undt3ch) Salt-SSH Scan roster bugfixes (And Py3 support)
• #25449: (ruzarowski) Exclude dotfiles and directories from minion key lists (Fixes #25448)
• #25421: (basepi) [2015.8] Merge forward from 2015.5 to 2015.8
• #25412: (basepi) [2015.8] Merge forward from 2015.5 to 2015.8
• #25415: (bechtoldt) [docs] declare YAML as code block
• #25407: (rallytime) Back-port #23236 to 2015.8
• #25409: (rallytime) Back-port #24422 to 2015.8
• #25394: (rallytime) Back-port #25355 to 2015.8
• #25393: (rallytime) Back-port #25289 to 2015.8
• #25387: (cachedout) Lint #25319
• #25319: (ruzarowski) [cloud:EC2] Move SourceDest logic to _update_enis and add alias for delete_interface_on_terminate
• #25310: (anlutro) Add an "is list" test to the jinja environment
• #25264: (ruzarowski) Fix AttributeError in fileserver update_opts
• #25372: (rallytime) Don't stacktrace when provisioning instances with softlayer* drivers
• #25315: (ruzarowski) [cloud:EC2] Move handling of AssociatePublicIpAddress to associate_eip/allocate_new_eip logic depending on value type
• #25312: (ruzarowski) [cloud:EC2] Introduce eni Name property to set name tag value after its creation
• #25311: (ruzarowski) [cloud:EC2] Add ability to attach an existing eni
• #25280: (rallytime) Remove deprecation warnings for Beryllium
• #25329: (twangboy) Fixed some documentation errors
• #25300: (s0undt3ch) Fix ordering issue & Added requirements support
• #25283: (jfindlay) ensure ret is always defined
• #25252: (jfindlay) make args optional with default values in win_firewall.delete_rule
• #25257: (notpeter) Document SourceDestCheck added in #25242.
The 2015.8.0 feature release of Salt contains several major new features. As usual the release notes are not exhaustive and primarily include the most notable additions and improvements. Hundreds of bugs have been fixed and many modules have been substantially updated and added.

**New SaltStack Installation Repositories**

SaltStack now provides installation repositories for several platforms, with more to come. See the following links for instructions:

- Red Hat / CentOS 5, 6, 7
- Debian 8
- Windows
Send Event on State Completion

A `fire_event` global state keyword argument was added that allows any state to send an event upon completion. Useful for custom progress bars and checking in on long state runs. See `fire_event`.

ZeroMQ socket monitoring

If `zmq_monitor` is enabled, log all ZMQ events for socket monitoring purposes. Verbose, but useful.

SPM (Salt Package Manager)

Allows Salt formulas to be packaged for ease of deployment. See `spm`.

**Note:** The `spm` executable was not included in the Debian or Ubuntu packages for the 2015.8.0 or the 2015.8.1 releases. This executable will be included in an upcoming release. As a workaround, copy the SPM script from the salt library installation into `/usr/local/bin` or your local equivalent.

Specify a Single Environment for Top Files

A new `default_top` option was added to load the state top file from a single, specific environment, rather than merging top data across all environments. Additionally, new `top_file_merge_strategy` and `env_order` options were added for more control over top file merging. See The Top File.

Tornado TCP Transport

Implemented a pure-TCP transport, in addition to ZeroMQ and RAET. The new transport uses Tornado, which allows Salt to use a standardized set of libraries for asynchronous behavior, which should greatly improve reliability and performance.

**Note:** Tornado is considered expiremental in this release. The following known issues were being investigated at the time of release:

- TCP tests show performance degredation over time (issue #26051)
- TCP transport stacktrace on windows minion: Future exception was never retrieved (issue #25718)
- [freebsd] TCP transport not working in 2015.8.0rc3 (issue #26364)

Proxy Minion Enhancements

Proxy Minions have undergone a significant overhaul in 2015.8, see Proxy Minion Enhancements.
Engines

Salt engines are long-running, external processes that leverage Salt. See Salt Engines.

Core Changes

- Add system version info to versions_report, which appears in both salt --versions-report and salt '*' test.versions_report. Also added is an alias test.versions to test.versions_report. (issue #21906)
- Add colorized console logging support. This is activated by using %(colorlevel)s, %(colormsg)s, %(colorname)s, %(colorprocess)s in log_fmt_console in the config file for any of salt-master, salt-minion, and salt-cloud.

Git Pillar

The git external pillar has been rewritten to bring it up to feature parity with gitfs. Support for pygit2 has been added, bringing with it the ability to access authenticated repositories.

Using the new features will require updates to the git ext_pillar configuration, further details can be found in the pillar.git_pillar docs.

Salt Cloud Improvements

- Pricing data from several cloud providers (GCE, DigitalOcean, SoftLayer_HW, EC2)
- All cloud providers now use standardized bootstrapping code.
- Modified the Linode Salt Cloud driver to use Linode's native API instead of depending on apache-libcloud or linode-python.

Salt Cloud Changes

- Changed the default behavior of rename_on_destroy to be set to True in the EC2 and AWS drivers.
- Changed the default behavior of the EC2 and AWS drivers to always check for duplicate names of VMs before trying to create a new VM. Will now throw an error similarly to other salt-cloud drivers when trying to create a VM of the same name, even if the VM is in the terminated state.
- When querying for VMs in digital_ocean.py, the number of VMs to include in a page was changed from 20 (default) to 200 to reduce the number of API calls to Digital Ocean.Ocean.

State and Execution Module Improvements

- New and improved Docker state and execution modules (state and execution module).
Git State and Execution Modules Rewritten

The git state and execution modules have gone through an extensive overhaul.

Changes in the `git.latest` State

- The `branch` argument has been added, allowing for a custom branch name to be used in the local checkout maintained by the `git.latest` state. This can be helpful in avoiding ambiguous refs in the local checkout when a tag is used as the `rev` argument. If no `branch` is specified, then the state uses the value of `rev` as the branch name.
- The `always_fetch` argument no longer has any effect, and will be removed in a future release. The state now detects whether or not a fetch is needed based on comparisons made between the local and remote repositories.
- The `force_fetch` argument has been added to force a fetch if the fetch is not a fast-forward (for instance, if someone has done a reset and force-pushed to the remote repository).
- The `remote_name` argument has been deprecated and renamed to `remote`.
- The `force` argument has been deprecated and renamed to `force_clone` to reduce ambiguity with the other "force" arguments.
- Using SHA1 hashes (full or shortened) in the `rev` argument is now properly supported.
- Non-fast-forward merges are now detected before the repository is updated, and the state will not update the repository if the change is not a fast-forward. Non-fast-forward updates must be overridden with the `force_reset` argument. If `force_reset` is set to `True`, the state will only reset the repository if it cannot be fast-forwarded. This is in contrast to the earlier behavior, in which a hard-reset would be performed every time the state was run if `force_reset` was set to `True`.
- A `git pull` is no longer performed by this state, dropped in favor of a fetch-and-merge (or fetch-and-reset) workflow.

`git.config_unset` state added

This state allows for configuration values (or entire keys) to be unset. See here for more information and example SLS.

`git.config` State Renamed to `git.config_set`

To reduce confusion after the addition of `git.config_unset`, the `git.config` state has been renamed to `git.config_set`. The old `config.get` name will still work for a couple releases, allowing time for SLS files to be updated.

In addition, this state now supports managing multivar git configuration values. See here for more information and example SLS.
Initial Support for Git Worktrees in Execution Module

Several functions have been added to the execution module to manage worktrees (a feature new to Git 2.5.0). State support does not exist yet, but will follow soon.

New Functions in Git Execution Module

- `git.config_get_regexp`
- `git.config_unset`
- `git.is_worktree`
- `git.list_branches`
- `git.list_tags`
- `git.list_worktrees`
- `git.merge_base`
- `git.merge_tree`
- `git.rev_parse`
- `git.version`
- `git.worktree_rm`
- `git.worktree_add`
- `git.worktree_prune`

Changes to Functions in Git Execution Module

**git.add**

- `--verbose` is now implied when running the `git add` command, to provide a list of the files added in the return data.

**git.archive**

- Now returns `True` when the `git archive` command was successful, and otherwise raises an error.
- The `overwrite` argument has been added to prevent an existing archive from being overwritten by this function.
- The `fmt` argument has been deprecated and renamed to `format`.
- Trailing slash no longer implied in `prefix` argument, must be included if this argument is passed.
**git.checkout**

- The `rev` argument is now optional when using `-b` or `-B` in `opts`, allowing for a branch to be created (or reset) using HEAD as the starting point.

**git.clone**

- The `name` argument has been added to specify the name of the directory in which to clone the repository. If this option is specified, then the clone will be made within the directory specified by the `cwd`, instead of at that location.
- The `repository` argument has been deprecated and renamed to `url`.

**git.config_get**

- The `setting_name` argument has been deprecated and renamed to `key`.
- The `global` argument has been added, to query the global git configuration
- The `all` argument has been added to return a list of all values for the specified key, allowing for all values in a multivar to be returned.
- The `cwd` argument is now optional if `global` is set to `True`.

**git.config_set**

- The value(s) of the key being set are now returned.
- The `setting_name` argument has been deprecated and renamed to `key`.
- The `setting_value` argument has been deprecated and renamed to `value`.
- The `is_global` argument has been deprecated and renamed to `global`.
- The `multivar` argument has been added to specify a list of values to set for the specified key. The `value` argument is not compatible with `multivar`.
- The `add` argument has been added to add a value to a key (this essentially just adds an `--add` to the `git config` command that is run to set the value).

**git.fetch**

- The `force` argument has been added to force the fetch when it is not a fast-forward. This could have been achieved in previous Salt versions by including `--force` in the `opts` argument, this argument is just for convenience and to match the usage of other functions with `force` arguments.
- The `refspects` argument has been added to allow for one or more refspecs to be provided which override the one(s) specified by the `remote.remote_name.fetch` git configuration option.
**git.ls_remote**

- The **repository** argument has been deprecated and renamed to **remote**.
- The **branch** argument has been deprecated and renamed to **ref**.
- The **opts** argument has been added to allow for additional CLI options to be passed to the `git ls-remote` command.

**git.merge**

- The **branch** argument has been deprecated and renamed to **rev**.

**git.status**

- Return data has been changed from a list of lists to a dictionary containing lists of files in the modified, added, deleted, and untracked states.

**git.submodule**

- Added the **command** argument to allow for operations other than **update** to be run on submodules, and deprecated the **init** argument. To do a submodule update with init=True moving forward, use `command=update opts='--init'`.
- OpenStack Glance API V2 execution module
- Amazon VPC state module
- RallyDev execution module
- BambooHR execution module
- Stormpath execution, state modules
- Remove unused argument **timeout** in jboss7.status.
- Deprecate **enabled** argument in pkgrepo.managed in favor of **disabled**.
- Archive module changes: In the `archive.tar` and `archive.cmd_unzip` module functions, remove the arbitrary prefixing of the options string with `-`. An options string beginning with a `--long-option`, would have uncharacteristically needed its first `-` removed under the former scheme. Also, tar will parse its options differently if short options are used with or without a preceding `-`, so it is better to not confuse the user into thinking they’re using the non-`-` format, when really they are using the with-`-` format.
- Added `__states__` to state modules, for cross-calling states. This enables using existing states when writing custom states. See *cross calling states.*
Windows Improvements

- Enhanced the windows minion silent installation with command line parameters to configure the salt master and minion name. See Silent Installer Options.
- Improved user management with additional capabilities in the user module for Windows.
- Improved patch management with a new module for managing windows updates (win_wua).
- Turned on multi-processing by default for windows in minion configuration.

Windows Software Repo Changes

A next-generation (ng) windows software repo is available for 2015.8.0 and later minions. When using this new repository, the repo cache is compiled on the Salt Minion, which enables pillar, grains and other things to be available during compilation time.

See the Windows Software Repository documentation for more information.

Changes to legacy Windows repository

If you have pre 2015.8 Windows minions connecting to your 2015.8 Salt master, you can continue to use the legacy Windows repository for these Salt minions.

If you were previously using this repository and have customized settings, be aware that several config options have been renamed to make their naming more consistent.

See the Windows Software Repository documentation for more information.

Win System Module

The unit of the timeout parameter in the system.halt, system.poweroff, system.reboot, and system.shutdown functions has been changed from seconds to minutes in order to be consistent with the linux timeout setting. (issue #24411) Optionally, the unit can be reverted to seconds by specifying in_seconds=True.

Other Improvements

- Sanitize sensitive fields in http.query
- Allow authorization to be read from Django and eauth
- Add templating to SMTP returner
- New REST module for SDB
- Added rest_timeout config option and timeout argument to jobs api call
- Provide config options for Raet lane and road buffer count. (Useful for BSD kernels)
- Implemented ZeroMQ socket monitor for master and minion
- Add end time to master job cache for jobs (optional, off by default)
- Tornado is now the default backend for http.request
- Support pillarenv selection as it's done for saltenv
- salt was updated to use python-crypto version 2.6.1, which removes the dependency on python-m2crypto.
Deprecations

- The `digital_ocean.py` Salt Cloud driver was removed in favor of the `digital_ocean_v2.py` driver as DigitalOcean has removed support for APIv1. The `digital_ocean_v2.py` was renamed to `digital_ocean.py` and supports DigitalOcean's APIv2.
- The `vsphere.py` Salt Cloud driver has been deprecated in favor of the `vmware.py` driver.
- The `openstack.py` Salt Cloud driver has been deprecated in favor of the `nova.py` driver.
- The use of `provider` in Salt Cloud provider files to define cloud drivers has been deprecated in favor of using `driver`. Both terms will work until the 2017.7.0 release of Salt. Example provider file:

```
my-ec2-cloud-config:
  id: 'HJGRYCILJKJYG'
  key: 'kdjgfsqm;woormgl/aserigjksjhasdfgn'
  private_key: /etc/salt/my_test_key.pem
  keyname: my_test_key
  securitygroup: default
  driver: ec2
```

- The use of `lock` has been deprecated and from `salt.utils.fopen`. `salt.utils.flopen` should be used instead.
- The following args have been deprecated from the `rabbitmq_vhost.present` state: `user`, `owner`, `conf`, `write`, `read`, and `runas`.
- The use of `runas` has been deprecated from the `rabbitmq_vhost.absent` state.
- Support for `output` in `mine.get` was removed. `--out` should be used instead.
- The use of `delim` was removed from the following functions in the `match` execution module: `pillar_pcre`, `pillar`, `grain_pcre`,

Security Fixes

CVE-2015-6918 - Git modules leaking HTTPS auth credentials to debug log

Updated the Git state and execution modules to no longer display HTTPS basic authentication credentials in log level debug output on the Salt master. These credentials are now replaced with REDACTED in the debug output. Thanks to Andreas Stieger <asteiger@suse.com> for bringing this to our attention.

Major Bug Fixes

- Fixed minion failover to next master on DNS errors (issue #21082)
- Fixed memory consumption in SaltEvents (issue #25557)
- Don't lookup outside system path in which() util (issue #24085)
- Fixed broken jobs rest api call (issue #23408)
- Fixed stale grains data using in modules (issue #24073)
- Added `ssh_identities_only` config flag for ssh-agent configured environments (issue #24096)
- Fixed "object has no attribute" errors for Raet transport (issue #21640)
- Flush event returners before master exit (issue #22814)
- Fix CommandExecutionError in grains generation with lspci missing (issue #23342)
Salt Documentation, Release 3002.2

- Fix salt-ssh against CentOS 7 when python-zmq not installed (issue #23503)
- Fix salt-ssh issues related to out-of-date six module (issue #20949)
- Fix salt-ssh thin generation after previous run was interrupted (issue #24376)
- Use proper line endings on Windows with "file.managed" w/contents (issue #25675)
- Fixed broken comment/uncomment functions in file.py (issue #24620)
- Fixed problem with unicode when changing computer description (issue #12255)
- Fixed problem with chocolatey module not loading (issue #25717)
- Fixed problem adding users to groups with spaces in the name (issue #25144)
- Fixed problem adding full name to user account (issue #25206)
- Fixed gem module stack trace (issue #21041)
- Fixed problem with file.managed when test=True (issue #20441)
- Fixed problem with powershell hanging while waiting for user input (issue #13943)
- Fixed problem where the salt-minion service would not consistently start (issue #25272)
- Fixed problem where pkg.refresh_db would return True even when winrepo.p was not found (issue #18919)
- Could someone please provide end to end example for Proxy Minion with REST (issue #25500)
- Proxy minions stopped working between 2014.7 and 2015.5 (issue #25053)
- Proxy minion documentation includes outdated code sample (issue #24018)
- Proxy Minion documentation missing grains example (issue #18273)
- Improve process management in proxy minion (issue #12024)
- Proxy minion never comes up with message ‘I am XXX and I am not supposed to start any proxies.’ (issue #25908)
- Fixed an issue that caused an exception when using Salt mine from pillar. (issue #11509)

28.2.63 Salt 2015.8.1 Release Notes

Version 2015.8.1 is a bugfix release for 2015.8.0.

Statistics

- Total Merges: 201
- Total Issue References: 39
- Total PR References: 135
- Contributors: 40 (DmitryKuzmenko, The-Loeki, TheBigBear, basepi, bechtoldt, bernieke, blueyed, cachedout, cedwards, clinta, cro, deuscapturus, dmurphy18, dsmsky, eliasp, flowhamster, isbm, jacksontj, jacobhammons, jfindlay, justinta, l2ol33rt, macgyver13, meggiebot, mstead, multani, nasenbaer13, perfinion, ppr kut, rallytime, rhealitycheck, ruzarowski, ryan-lane, s0undt3ch, systembell, techhat, terminalmage, ticosax, twangboy, whiteinge)
Security Fixes

CVE-2015-6941 The Windows `user` module and `salt-cloud` display passwords in log when log level is set to `debug` or more verbose.

For the Windows `user` module, the password is now replaced with the string `XXX-REDACTED-XXX`.

For `salt-cloud`, debug logging no longer displays `win_password` and `sudo_password` authentication credentials.

CVE-2015-6918 Git state/execution modules log HTTPS auth credentials when log level is set to `debug` or more verbose.

These credentials are now replaced with `REDACTED` in the debug output. Thanks to Andreas Stieger <asteiger@suse.com> for bringing this to our attention.

Major Bug Fixes

- Add support for `spm.d/*.conf` configuration of SPM (issue #27010)
- Fix proxy grains breakage for non-proxy minions (issue #27039)
- Fix global key management for git state
- Fix passing `http auth` to `util.http` from `state.file` (issue #21917)
- Fix `multiprocessing: True` in windows (on by default)
- Add `pkg.info` to pkg modules
- Fix name of `serial` grain (this was accidentally renamed in 2015.8.0)
- Merge config values from `master.d/minion.d` conf files (rather than flat update)
- Clean grains cache on grains sync (issue #19853)
- Remove streamed response for fileclient to avoid HTTP redirection problems (issue #27093)
- Fixed incorrect warning about `osrelease` grain (issue #27065)
- Fix authentication via Salt-API with tokens (issue #27270)
- Fix `winrepo` downloads from https locations (issue #27081)
- Fix potential error with `salt-call` as non-root user (issue #26889)
- Fix global minion provider overrides (issue #27209)
- Fix backward compatibility issues for pecl modules
- Fix Windows uninstaller to only remove `./bin, salt*, nssm.exe, uninst.exe` (issue #27383)
- Fix misc issues with mongo returner.
- Add `sudo` option to cloud config files (issue #27398)
- Fix regression in RunnerClient argument handling (issue #25107)
- Fix `dockerng.running` replacing creation hostconfig with runtime hostconfig (issue #27265)
- Fix `dockerng.running` replacing creation hostconfig with runtime hostconfig (issue #27265)
- Increased performance on boto asg/elb states due to `__states__` integration
- Windows minion no longer requires powershell to restart (issue #26629)
- Fix x509 module to support recent versions of OpenSSL (issue #27326)
Some issues with proxy minions were corrected.

Known Issues

• Proxy minions currently cannot execute a highstate because of the way the proxymodule is being loaded internally. This will be fixed in a future release.

Changelog for v2015.8.0..v2015.8.1

• PR #27588: (jfindlay) add autogenerated 2015.8.1 release notes @ 2015-10-01 04:52:32 UTC
  - 87d86e4b3e Merge pull request #27588 from jfindlay/2015.8
  - f2eb20f26b add autogenerated 2015.8.1 release notes
• PR #27584: (jacobhammons) added changes list to 2015.8.1 release notes @ 2015-10-01 04:32:47 UTC
  - f7510baf33 Merge pull request #27584 from jacobhammons/release-notes
  - ee4a3b3549 added changes list for 2015.8.1
• ISSUE #27532: (centromere) salt-cloud does not recognize terminated instances (refs: #27575)
• PR #27575: (rallytime) Don’t report existing instances as running only if they’re actually terminated in EC2 @ 2015-09-30 22:17:24 UTC
  - 1a31b19f15 Merge pull request #27575 from rallytime/fix-27532
  - 57c6535fc2 Make sure message is the most accurate. Instance may be stopped or shutting down.
  - da6b4b3604 Don’t report existing instances as running only if they’re actually terminated
• ISSUE #27290: (pirogoeth) Grains set in minion_opts do not appear in a call to grains.items. (refs: #27573)
• PR #27573: (basepi) [2015.8] Use the custom yaml serializer for minion_opts for salt-ssh @ 2015-09-30 21:16:22 UTC
  - bee78a4e5c Merge pull request #27573 from basepi/salt-ssh.grains.minion_opts.27290
  - 0785438b3f Use the custom yaml serializer for minion_opts for salt-ssh
• ISSUE #27326: (ralphvanetten) Signing the X509 CA certificate does not work on Debian 8 (refs: #27514)
• PR #27514: (clinta) Recent Versions of OpenSSL don’t allow importing incomplete PEMs @ 2015-09-30 19:33:12 UTC
  - a4a53ecf5 Merge pull request #27514 from clinta/2015.8-27326
  - 515e62bfa7 change "None" to empty string
  - 2898f24169 fix 27326 and fix minor errors in docs.
• PR #27564: (jacobhammons) Man pages @ 2015-09-30 19:29:37 UTC
  - 6ecf0228adc Merge pull request #27564 from jacobhammons/man-pages
  - cc37dc1087 updated version in salt.7
  - a9dc823a13 regenerated man pages for 2015.8.1
• ISSUE #26629: (efficks) Windows minion: Remove powershell dependencies (refs: #27522)
• PR #27522: (twangboy) Removed dependency on powershell to restart salt-minion @ 2015-09-30 16:19:29 UTC
- fd11e0cd95 Merge pull request #27522 from twangboy/fix_26629
- 163e54505d Fixed tests... hopefully
- dc8c01ed07 Fixed some lint
- 2c0f12696 Removed dependency on powershell to restart salt-minion

**PR #27550:** (rallytime) [2015.8] Clean up salt-cloud logging and make it more useful @ 2015-09-30 15:48:53 UTC
  - eb76531e96 Merge pull request #27550 from rallytime/cloud-logging
  - 9e0fcd543 Don’t commit private-ip changes from testing another bug...
  - 78c85fb31 Add unit tests for new recursive function
  - d9a2d6e9c5 [2015.8] Clean up salt-cloud logging and make it more useful

**ISSUE #27281:** (lrhazi) Wrong path for yum repo in installation-rhel-repo (refs: #27517)

**ISSUE #27179:** (samhamilton) Debian Install Instructions Shows Two Different Repos (refs: #27517)

**PR #27517:** (jacobhammons) Updated install docs @ 2015-09-30 15:19:51 UTC
  - 1f7ea7c764 Merge pull request #27517 from jacobhammons/install-docs
  - 167fd230f4 Fixed a duplicated link ID
  - c05fa71f91 Updated install docs Refs #27281 Refs #27179

**PR #27526:** (eliasp) Add missing newlines before param listing to fix doc rendering @ 2015-09-30 15:19:04 UTC
  - 2a4c11ae24 Merge pull request #27526 from eliasp/2015.8-modules.slack_notify-doc-params
  - 204e669f3f Add missing newlines before param listing to fix doc rendering

**PR #27525:** (basepi) [2015.8] Merge forward from 2015.5 to 2015.8 @ 2015-09-30 03:38:22 UTC
  - e5de9409c2 Merge pull request #27525 from basepi/merge-forward-2015.8
  - 1f3eb1c526 Remove useless mocked unit test
  - 73b90f155e Merge remote-tracking branch 'upstream/2015.5' into merge-forward-2015.8
    * 6d77f66c3 Merge pull request #27516 from basepi/merge-forward-2015.5
      * a089f10fa Merge remote-tracking branch 'upstream/2014.7' into merge-forward-2015.5
      * 5262f01325 Merge pull request #27335 from rallytime/cloud-logging-7
      * adeb1c4d84 Pylint Fix
      * 588c1378f4 Salt-cloud logging clean up for windows functions
      * 986000135c [2014.7] Fixup salt-cloud logging
    * 68d784c3dd Merge pull request #27472 from cachedout/fix_27447
      * 5e745ad6da Change recommended schema for data field in mysql event table
    * ee6e0ed057 Merge pull request #27468 from cachedout/fix_27351
      * 0bc37c0d41 Fix test
      * f9a19720de fix sysctl truncating newline on os x
    * a214cf84e Merge pull request #27479 from aboe76/fixed_locale_suse
      * a8f2d181be fix locale on opensuse and suse #27438
    * 931f593b51 Merge pull request #27483 from rallytime/fix-17103
- 441241eb90 Change sync_outputters to sync_output for consistency, but alias sync_outputters
- 105528720b Outputters should sync to output, not outputters, on the minion.

* 9c2c028953 Merge pull request #27484 from rallytime/bp-27434-and-27470
  - 5de2ee35ab Minor doc fixup.
  - af656ce7e87 Doc: copy key to server via ssh-copy-id

* 927874d316 Merge pull request #27469 from twangboy/fix_27433
  - a996ea46e2 Added quotes to version numbers example

* 38a53403f Merge pull request #27467 from cachedout/lint_27375
  - 4e54a98f5e Lint #27375
  - 278ade52d2 file.managed: check contents_[pillar|grain] result

* ed6207a438 Merge pull request #27419 from rallytime/fix-9856
  - 551396564a Ammend error log to include multiple tips for troubleshooting.

* 73fa89edf7 Merge pull request #27426 from rallytime/fix-16753
  - 60c8d81e66 Don’t stacktrace if there are conflicting id errors in highstate

* 5dd1b70475 Merge pull request #27408 from rallytime/fix-27406-for-2015.5
  - 39a4ae5a6c Remove hdd: 19 refs from SL docs - no longer available from SoftLayer.
  - de2f9234d3 Use correct default for bandwith
  - 42d8127f79 Don’t set the optional_products default to a boolean, and then try to loop.
  - 9d8a3d8303 Fix avail_locations function for the softlayer_hw driver in 2015.5

* 8f9a3cfbaf Merge pull request #27410 from jacobhammons/doc-updates
  - a9fdecada1 Fix css layout Refs #27389 sample typo fix in linux_acl additional module folders listed in dynamic-modules

* 3746085587 Merge pull request #27336 from rallytime/cloud-logging-five
  - 7956b36076 [2015.5] Fixup salt-cloud logging

* 5a3be10a3e Merge pull request #27358 from lorengordon/escape-search-replacement-text
  - 88bb1fbff Escape search replacement text, fixes #27356

* 6759f79ded Merge pull request #27345 from rallytime/docs-for-19236
  - 1d3925bbbf Added version tag for ex_disk_type option
  - f23369300c Allow use of rst header links by separating options out from yaml example

* c2efb291e2 Merge pull request #26903 from bersace/fix-defaults-modules
  - 474d7afc95 fixup! Review defaults loading
  - 36141d226e fixup! Review defaults loading
  - 62b6495358 fixup! Review defaults loading
  - cf06248b8 fixup! Review defaults loading
  - 2c58bab977 fixup! Review defaults loading

  • 3807cd5c4e Merge pull request #27496 from blueyed/fixed-gitpython-version
  • 8969363c88 Fix version reporting of gitpython
• PR #27502: (ticosax) Add test to check we don't call inspect_image on absent images. @ 2015-09-29 15:15:09 UTC
  • PR #25162: (ticosax) [dockerng] Do not call inspect_image if we know the image is not downloaded (refs: #27502)
  • 057fd0729d Merge pull request #27502 from ticosax/backport-test-from-develop
- fadd9bd43e Add test to check we don’t call inspect_image on absent images.

- **PR #27497**: (blueyed) dockerng: fix image_present for forced, non-existent image @ 2015-09-29 13:49:46 UTC
  - f3da6e4bb8 Merge pull request #27497 from blueyed/dockerng-fix-404-private-forced
  - e3c6ce4a3a dockerng: fix image_present for forced, non-existent image

- **ISSUE #27205**: (msummers42) In git.config_set state CommandExecutionError occurs when global=True when using salt 2015.8.0 (refs: #27411)

- **PR #27411**: (terminalmage) Fix invocation of git.config_get and git.config_set @ 2015-09-28 22:53:01 UTC
  - 284984e6ba Merge pull request #27411 from terminalmage/issue27205
  - c3a17ae992 add missing commas
  - f2751ef7c4 Fix shadowed outer-scope attributes
  - 81a6c27010 Fix invocation of git.config_get and git.config_set

- **ISSUE #27217**: (nasenbaer13) Gitfs cleans up wrong directories (refs: #27218, #27477, #27276, #27382)

- **PR #27477**: (terminalmage) Don’t append role to hash_cachedir @ 2015-09-28 22:26:34 UTC
  - cbcb5475b6 Merge pull request #27477 from terminalmage/issue27217
  - 185e99970 Second attempt to fix #27217

- **PR #27474**: (whiteinge) Add fake pymongo version attribute for the docs @ 2015-09-28 21:49:25 UTC
  - 2f7183260 Merge pull request #27474 from whiteinge/docs-pymongo-fix
  - 6db54e668a Add fake pymongo version attribute for the docs

- **PR #27466**: (blueyed) Fix version reporting of python-gnupg and mysql-python @ 2015-09-28 20:25:01 UTC
  - 9202f956f3 Merge pull request #27466 from blueyed/fx-gnupg-version
  - 9c1454fe59 Fix version reporting of mysql-python
  - 437f4407e Fix version reporting of python-gnupg

- **PR #27465**: (ticosax) Fix usage of dockerng "cmd" was #27459 @ 2015-09-28 19:27:41 UTC
  - **PR #27459**: (terminalmage) Fix usage of dockerng "cmd" (refs: #27465)
  - **PR #27444**: (ticosax) docker-py expect only command argument not cmd (refs: #27459)
  - **PR #27331**: (terminalmage) dockerng: Allow both cmd and command to be used to specify command (refs: #27459, #27444)
  - 6d8e9af297 Merge pull request #27465 from ticosax/fx-dockerng-cmd
  - a1ed6da56 Skip test if docker-py is not installed
  - 6f7769aa94 Correct log messages/docstrings
  - cc8471bd1b dockerpy expect only command argument not cmd

- **ISSUE #27409**: (pcn) 2015.8.0 API (cherrypy) fails to lookup job id via pepper (refs: #27417)

- **ISSUE #25107**: (whiteinge) Regression in RunnerClient argument handling (refs: #25243)

- **PR #27417**: (whiteinge) Backport #25243 into 2015.8 @ 2015-09-28 19:15:53 UTC
  - **PR #25243**: (DmitryKuzmenko) Runnerclient regression fix (refs: #27417)
  - aefe6d794a Merge pull request #27417 from whiteinge/bp-25243
  - 53e7a6b7c5 RunnerClient support old style commands with kwargs on top level.
- 10b522b86c Revert "Fixed GET /jobs/<id> requests"

- **PR #27423**: (dmurphy18) Changes to support configurable repository for Debian / Ubuntu @ 2015-09-28 17:34:22 UTC
  - a07411a4d9 Merge pull request #27423 from dmurphy18/dgm_envfix
  - 63407fd2a9 Changes to support configurable repository for Debian / Ubuntu

- **ISSUE #26689**: (double-yaya) Salt - SSH using machine IP to execute commands, without having to write a roster file (refs: #27398)

- **PR #27428**: (rallytime) Back-port #27398 to 2015.8 @ 2015-09-28 15:03:16 UTC
  - **PR #27398**: (flowhamster) Allow cloud roster to use sudo (refs: #27428)
  - d4d96bb3fc Merge pull request #27428 from rallytime/bp-27398
  - 696932ae2 doc: added documentation to cloud roster and fixed whitespace
  - b4334649d5 Allow cloud roster to use sudo

- **PR #27429**: (rallytime) Back-port #27344 to 2015.8 @ 2015-09-28 15:01:20 UTC
  - **PR #27344**: (rhealitycheck) Mongo returners patch 1 (refs: #27429)
  - 668ce69d7e Merge pull request #27429 from rallytime/bp-27344
  - e39a57afe1 Update mongo_return.py
  - f796c9a44b Update mongo_return.py
  - 30d07cb27 Update mongo_return.py
  - 44ef4b48fb Update mongo_future_return.py
  - 34b160b841 Update mongo_return.py
  - b2b5623da3 Update mongo_future_return.py
  - 07f9a8b95b Update mongo_return.py
  - b7dcd83b4d Update mongo_future_return.py
  - 540b3f2690 Update mongo_return.py
  - 405edd0718 Update mongo_future_return.py
  - 5c753a54ff Update mongo_return.py
  - 06e05befa7 Update mongo_future_return.py

- **PR #27450**: (ticosax) [dockerng] Fix typo in docstring @ 2015-09-28 14:27:35 UTC
  - c639931340 Merge pull request #27450 from ticosax/fix-typo
  - 9cea62de67 Fix typo in docstring

- **PR #27430**: (jacksontj) Fix bug introduced in eee0291ff865f1e22f4dc2447a74aa28a3ce7f @ 2015-09-26 01:09:40 UTC
  - 333c305ba0 Merge pull request #27430 from jacksontj/2015.8
  - d2aff12f8f Fix bug introduced in eee0291ff865f1e22f4dc2447a74aa28a3ce7f

- **PR #27418**: (terminalmage) Don’t always remove dest path in salt.utils.files.rename() @ 2015-09-25 23:09:59 UTC
  - 1f4ca089a2 Merge pull request #27418 from terminalmage/file-rename
- 7bc0949d48 Don’t always remove dest path in salt.utils.files.rename()

- **ISSUE #27032**: (lorenorgordon) Windows Installer: Please be more kind to existing configurations (refs: #27383)

- **PR #27383**: (twangboy) Uninstaller only removes specific files and dirs @ 2015-09-25 22:47:24 UTC
  - ec5fa1829 Merge pull request #27383 from twangboy/fix_27032
  - 63a7305ae9 Uninstaller only removes specific files and dirs

- **PR #27416**: (rallytime) Backport #27399 to 2015.8 @ 2015-09-25 22:39:07 UTC
  - **PR #27399**: (multani) Various documentation fixes (refs: #27416)
  - 9ab3c6dc5d Merge pull request #27416 from rallytime/bp-27399
  - 1d848118c9 doc: fixed indentation in salt.renderers.jinja’s documentation
  - 5fd053a033 doc: fixed indentation in salt.modules.consul’s documentation
  - 6bee6a6b2f doc: fix etcd state documentation typos
  - 97e69eb97 doc: fix state’s top documentation typo
  - b411730d60 doc: fix documentation formatting for state blockdev
  - ce91bb9446 doc: fix formatting in state boto_elb
  - c69229875e doc: fix links in Docker state documentation
  - 15b751d6e2 doc: Docker state use ports and not port_bindings anymore
  - 880b6e0944 doc: fix link to docker-py documentation
  - 33db0c27f8 doc: fix RAET links
  - e69ba2f943 doc: fix rendering of salt.states.hipchat

- **ISSUE #27093**: (TheBigBear) 2015.8.0 winrepo downloader corrupts some installers (refs: #27394, #27163)

- **PR #27394**: (jacksontj) Remove streamed response for fileclient to avoid HTTP redirection problems @ 2015-09-25 21:55:31 UTC
  - **PR #27163**: (terminalmage) Workaround upstream tornado bug affecting redirects (refs: #27394)
  - 9842d9728b Merge pull request #27394 from jacksontj/2015.8
  - 01132c305c Re-add files.rename call instead of os.rename
  - acf2d51440 Remove streamed response for fileclient to avoid HTTP redirection problems
  - a6ecf35f25 Revert "Remove unused import"
  - 66c73a3996 Revert "Workaround upstream tornado bug affecting redirects"

- **PR #27415**: (ryan-lane) Backwards compat fixes for pecl module @ 2015-09-25 19:40:55 UTC
  - 44b246bf93 Merge pull request #27415 from lyft/fix-pecl
  - 8be8ef585c Backwards compat fixes for pecl module

- **PR #27407**: (meggiebot) Adding stretch label definition @ 2015-09-25 18:10:46 UTC
  - d76a77e911 Merge pull request #27407 from saltstack/meggiebot-patch-1
  - 1c779700f6 Adding stretch label definition

- **ISSUE #27209**: (justinta) Provider overrides appear to be broken (refs: #27388)

- **PR #27388**: (basepi) [2015.8] Fix global provider overrides @ 2015-09-25 16:49:03 UTC
- db6acfd832 Merge pull request #27388 from basepi/provider.overrides.27209
- d87147e14b Don't use ret.items(), forces load of all modules
- a5ee33a9ad pack __salt__ before loading provider overrides

- **ISSUE #27354**: (gravyboat) salt-ssh roster docs should note the requiretty option (refs: #27386)
- **PR #27386**: (rallytime) Document tty: True usage in salt-ssh roster file @ 2015-09-25 15:44:12 UTC
- b72e0b1133 Merge pull request #27386 from rallytime/fix-27354
- 08c04da48b Document tty: True usage in salt-ssh roster file

- **PR #27380**: (justinta) Skipping Async tests @ 2015-09-25 15:13:04 UTC
- 51e765078a Merge pull request #27380 from jtd/async_tests
- fd0dedeb99 Skipping Async tests

- **ISSUE #27217**: (nasenbaer13) Gitfs cleans up wrong directories (refs: #27218, #27477, #27276, #27382)
- **PR #27382**: (terminalmage) Revert "fixes #27217 clear_old_remotes clears wrong directory (gitfs)" @ 2015-09-24 22:54:23 UTC
- 63aaf6517 Merge pull request #27382 from terminalmage/revert-27218
- 237974f9e Revert "fixes #27217 clear_old_remotes clears wrong directory (gitfs)"

- **PR #27361**: (cro) Correct some issues with proxy minions @ 2015-09-24 16:03:38 UTC
- 12a021da11 Merge pull request #27361 from cro/pxm_doc
- 1a2c41c9e3 Add versionadded.
- 93a6397598 func_alias should be list_ and should have a corresponding list_fn.
- 0221f7ee4e Pylint
- 3a297d8036 Add release notes for proxy fixes.
- 39df44b841 Pylint
- e3ebf9bcec Fix some problems with the rest_sample, remove unnecessary file and make sure that rest_service has the right contents.
- f4944fe68a Fix typo in docs

- **PR #27364**: (ruzarowski) SaltCloud[EC2] Fix missing credentials in modify_eni_properties api call @ 2015-09-24 13:55:39 UTC
- cff74510de Merge pull request #27364 from ruzarowski/2015.8-modify-eni-properties-api-call
- 100eea4d5 Issue #27121 - Remove leftover code comment
- c58e7a00f3 Issue #27121 - Attempt to fix missing credentials when modifying eni properties
- 5d292a221e Merge remote-tracking branch 'upstream/2015.8' into 2015.8
- 4dbd9ebb30 Merge remote-tracking branch 'upstream/2015.8' into 2015.8

- **PR #27349**: (jfindlay) add freebsd install docs to release notes @ 2015-09-24 13:51:02 UTC
- 928ef59a8a Merge pull request #27349 from jfindlay/doc_typos
- e509cfca17 fix typo in 2015.8.0 pull list
- 7137e371d3 add FreeBSD documentation to 2015.8.0 notes

- **ISSUE #26889**: (UtahDave) salt-call w/non root user outputs repeating error (refs: #27343)
• PR #27343: (cachedout) Close io loop before deleting attribute @ 2015-09-24 13:49:55 UTC
  - 331230ea4f Merge pull request #27343 from cachedout/issue_26889
  - 2b648e51af Close io loop before deleting attribute

• PR #27337: (rallytime) [2015.8] Fixup salt-cloud logging @ 2015-09-24 13:49:17 UTC
  - cd82ead005 Merge pull request #27337 from rallytime/cloud-logging-eight
  - ed18384108 Merge pull request #7 from jtand/cloud-logging-eight
    * a6c1d0b408 Fixed a bug where logging_command wasnt set as a key in a couple spots
  - 8bb7cb7ff4 Use correct indexes
  - c3483002b0 [2015.8] Fixup salt-cloud logging

• PR #27332: (terminalmage) Adjust dockerng/dockerio docstrings @ 2015-09-24 13:45:34 UTC
  - b2f8418fffc Merge pull request #27332 from terminalmage/adjust-dockerng-docstring
  - bd6fd8e5c Add deprecation notice to dockerio state module
  - 17829ab38d Fix name of dockerng module in dockerio docstring
  - ed5ae75180 Adjust dockerng docstrings

• PR #27353: (cachedout) Fix case where var not set in config @ 2015-09-23 21:45:32 UTC
  - ac9ec2532 Merge pull request #27353 from cachedout/fix_retry_get
  - ea286e1874 Fix case where var not set in config

• ISSUE #21390: (fyatzeck) Having trouble with GCE cloud profile assigning static IP and enabling IP forward (refs: #27350)

• PR #27350: (rallytime) Allow IP-forwarding in GCE driver @ 2015-09-23 21:36:41 UTC
  - 3f6b06116f Merge pull request #27350 from rallytime/fix-21390
  - 2bf566d934 Allow IP-forwarding in GCE driver
  - 484015a7a3 Added version tag for ex_disk_type option
  - a71eb97b2 Allow use of rst header links by separating options out from yaml example

• ISSUE #27103: (twangboy) Salt-Minion doesn't display logs for new processes with multiprocessing on (refs: #27305)

• PR #27305: (cachedout) Re-init logging system on Windows when using multiprocessing @ 2015-09-23 15:32:32 UTC
  - 6f3da863fc Merge pull request #27305 from cachedout/issue_27103
  - 7a7492d186 Fix typo
  - 22ce653482c Re-init logging system on Windows when using multiprocessing

• PR #27331: (terminalmage) dockerng: Allow both cmd and command to be used to specify command (refs: #27459, #27444) @ 2015-09-23 15:27:43 UTC
  - 68a33ae2 Merge pull request #27331 from terminalmage/dockerng-cmd
  - 7d4eaac8ae dockerng: Allow both cmd and command to be used to specify command

• PR #27327: (ismb) Fix a typo in the RPM output @ 2015-09-23 14:27:42 UTC
  - a3f4fa1106 Merge pull request #27327 from ismb/ismb-pkg-info-typofix
• PR #27312: (basepi) [2015.8] Merge forward from 2015.5 to 2015.8 @ 2015-09-22 22:52:14 UTC
  - a789303d75 Merge pull request #27312 from basepi/merge-forward-2015.8
  - 647080d064 Add missing import
  - 95e70f0bef Merge remote-tracking branch 'upstream/2015.5' into merge-forward-2015.8
  - ca4597b93a Merge pull request #27310 from basepi/merge-forward-2015.5
    - 7b75e4aed1 Merge remote-tracking branch 'upstream/2014.7' into merge-forward-2015.5
    - e90412d3b8 Merge pull request #27252 from jfindlay/version.2014.7
      - 3d28307a00 2014.7 -> 2014.7.0
  - 982c21c79f Merge pull request #27308 from terminalmage/fix-refresh_db-regression
    - 77686fb7ce Fix refresh_db regression in yumpkg.py
  - 775af9ad0 Merge pull request #27286 from terminalmage/return_retry_timer
    - 540adfcf1 Add default values for new minion config options
    - 453b883820 Add a configurable timer for minion return retries
  - 02482c0572 Merge pull request #27278 from rallytime/bp-27256
    - 1beddf6311 Fix error handling in salt.modules.file.statvfs
  - e36c019c37 Merge pull request #27277 from rallytime/bp-27230
    - 3ce77db1bc Fix typo in AWS doc config
  - b2286476e Merge pull request #27253 from jfindlay/version.2015.5
    - 967e3bb72a 2015.5 -> 2015.5.0
  - 51a0193b54 Merge pull request #27244 from garethgreenaway/ec2_create_snapshot_no_return_data_exception
    - 820fd57eb9 Fixing the cause when the r_data from aws.query is empty and an exception happens
      when looking for the snapshotID
  - 26540f15bc Merge pull request #27231 from jfindlay/cronchange
    - 1e335297e2 only write cron file if it is changed
• PR #27303: (jacobhammons) Updated module doc index using https://github.com/saltstack/salt/pull... @ 2015-09-22 19:29:04 UTC
  - c3b690273b Merge pull request #27303 from jacobhammons/ref-updates
  - 7ac98a03b6 Updated module doc index using https://github.com/saltstack/salt/pull/27203
• ISSUE #27081: (TheBigBear) winrepo - SSLError: [Errno 1] _ssl.c:510: error:14090086:SSL routines:SSL3_GET_SERVER_CERTIFICATE:certificate verify failed (refs: #27301)
• PR #27301: (twangboy) Pass ca_bundle for windows (fixes SSL Error) @ 2015-09-22 19:00:45 UTC
  - aaa2db9943 Merge pull request #27301 from twangboy/fix_27081
  - 5c4f5f8944 Changed windows gate to check for verify_ssl option
  - e2fe5a60b5 Pass ca_bundle for windows (fixes SSL Error)
• PR #27300: (rallytime) Back-port #27287 to 2015.8 @ 2015-09-22 16:59:07 UTC
  - PR #27287: (rhealitycheck) Mongo returners patch 1 (refs: #27300)
- 55f4050146 Merge pull request #27300 from rallytime/bp-27287
- e49a6dc449 Update mongo_return.py
- 6315332b9 Update mongo_future_return.py

- **PR #27288**: (rallytime) Filter on 'name', not 'id', when listing images @ 2015-09-21 22:37:26 UTC
  - d96462af48 Merge pull request #27288 from rallytime/do-cleanup
  - 6e16fad760 Use name in all places, not id.
  - 9b34542cb0 Filter on 'name', not 'id', when listing images

- **PR #27283**: (justinta) __grains__['osrelease'] returns a string @ 2015-09-21 19:18:44 UTC
  - 688f24e9e4 Merge pull request #27283 from jtand/yumpkg_yum_fix
  - b73f528b4 __grains__['osrelease'] returns a string. Cast to int for correct comparison

- **ISSUE #27217**: (nasenbaer13) Gitfs cleans up wrong directories (refs: #27218, #27477, #27276, #27382)

- **PR #27276**: (rallytime) Back-port #27218 to 2015.8 @ 2015-09-21 19:05:54 UTC
  - PR #27218: (nasenbaer13) fixes #27217 clear_old_remotes clears wrong directory (gitfs) (refs: #27276)
  - 78d44a5c74 Merge pull request #27276 from rallytime/bp-27218
  - 6c0991d527 fixes #27217 clear_old_remotes clears wrong directory (gitfs)

- **PR #27275**: (rallytime) Back-port #27213 to 2015.8 @ 2015-09-21 19:05:18 UTC
  - PR #27213: (macgyver13) Make get_event compatible with salt/client (refs: #27275)
  - d5ce81e8e7 Merge pull request #27275 from rallytime/bp-27213
  - 5d4c90c479 Make get_event compatible with salt/client

- **PR #27274**: (rallytime) Back-port #27272 to 2015.8 @ 2015-09-21 18:54:48 UTC
  - PR #27272: (techhat) Make sure list_nodes_full contains a name attribute (refs: #27274)
  - 2be216451 Merge pull request #27274 from rallytime/bp-27272
  - f3ea3259a5 Make sure list_nodes_full contains a name attribute

- **PR #27271**: (isbm) Bugfix: crash on token authentication via API @ 2015-09-21 15:53:09 UTC
  - c0943dd4d1 Merge pull request #27271 from isbm/isbm-bufix-27270
  - fc524c17b9 Reduce the criteria that would match empty iterables as well as None or False values
  - 3152af78b5 Fix the crash on token auth via API (http://git.io/vn4tx)

- **ISSUE #19947**: (gczuucz) Unable to supply provisioning script to softlayer create() (refs: #27251)

- **PR #27251**: (rallytime) Add support for post_uri in SoftLayer cloud drivers @ 2015-09-21 15:43:16 UTC
  - b11ce6ac2a Merge pull request #27251 from rallytime/fix-19947
  - aafb776808 Add support for post_uri in SoftLayer cloud drivers

- **ISSUE #21879**: (bechtoldt) Reference pages in documentation are outdated again (refs: #27260, #25019, #21880)

- **ISSUE #19262**: (bechtoldt) salt.pillar.file_tree doesn't appear in the documentation (refs: #27260, #25019)

- **PR #27260**: (bechtoldt) add missing module doc references @ 2015-09-21 05:48:38 UTC
  - PR #25019: (bechtoldt) add missing module documentation to references (refs: #27260)
  - PR #24421: (bechtoldt) add missing module documentation (refs: #27260, #25019)
- **PR #21880**: (bechtoldt) update references, fixes #21879 (refs: #27260, #25019)
- **PR #20039**: (bechtoldt) completing some doc references (refs: #27260, #25019)
- de6e5ab6e6c Merge pull request #27260 from bechtoldt/missing.refs
- 3a7d31a91c add missing module references

- **PR #27254**: (jfindlay) 2015.2,2015.8,Beryllium -> 2015.8.0 @ 2015-09-18 23:44:46 UTC
  - 1a32b9f778 Merge pull request #27254 from jfindlay/version.2015.8
  - 8ea15f498e 2015.2,2015.8,Beryllium - 2015.8.0

- **ISSUE #25079**: (jondonas) Salt-cloud does not check for duplicate ssh keys when using provider such as DigitalOcean (refs: #27245)

- **PR #27245**: (rallytime) If two ssh keynames are found in DigitalOcean, abort and warn the user. @ 2015-09-18 21:42:36 UTC
  - f3a847823b Merge pull request #27245 from rallytime/fix-25079
  - 4b0f7cced1 If two ssh keynames are found in DigitalOcean, abort.

- **ISSUE #27065**: (loregordon) 2015.8.0: yumpkg reporting "Unexpected osrelease grain '6.7'" (refs: #27241)

- **PR #27241**: (jfindlay) osrelease is only an integer for fedora @ 2015-09-18 21:40:50 UTC
  - e4a5b004ae Merge pull request #27241 from jfindlay/yumwarn
  - 1f7570250f osrelease is only an integer for fedora

- **PR #27234**: (basepi) [2015.8] Merge forward from 2015.5 to 2015.8 @ 2015-09-18 20:41:38 UTC
  - 8c71fc6d7c Merge pull request #27234 from basepi/merge-forward-2015.8
  - be2b0fc497 Merge remote-tracking branch 'upstream/2015.5' into merge-forward-2015.8
    - 579f375f74 Merge pull request #27233 from basepi/release.notes.stubs
      - f4563ea9b7 Add stub release notes for 2015.5.6
    - f5a32d3ef2 Merge pull request #27208 from basepi/nop.state.201423
      - 9414b05b2c Add test.nop example
      - a84c67b8f Add test.nop state
    - 59a07ca6e8 Merge pull request #27201 from jfindlay/sshash
      - 1b620b77cd rename hash_host arg to hash_known_hosts
      - 12f4ae37c update hash_known_hosts docs in ssh module
    - 560515c4e5 Merge pull request #27214 from jacksontj/2015.5
      - e7526db44 Correctly support https, port 443 is not a requirement
    - 7a34cc7742d Merge pull request #27172 from rallytime/bp-27150
      - 0d7ee4b209 Merge conf values from master.d/minion.d conf files

- **PR #27240**: (isbm) Backport of the fix of 'pkg.info*' for Beryllium @ 2015-09-18 20:02:15 UTC
  - 2d6c75cba7 Merge pull request #27240 from isbm/isbm-pkg.info-tz-bugfix-backport-2015.8
  - 19a361851a Return install date only if possible.
  - ff857bc6aa Return RPM package time in UTC timezone
  - eaa0f370bf Remove time fraction and return ISO in UTC
ce9570f6ce6 Return UTC timestamp for modification of path.

• **ISSUE #27222:** (pprkut) Support firewalld zone configuration in network.managed state for rh7 systems (refs: #27223)

• **PR #27223:** (pprkut) Support firewalld per interface zone config on rh7 systems @ 2015-09-18 19:44:45 UTC
  - 80a45b74ed Merge pull request #27223 from M2Mobi/zone
  - 48023669e7 Support permanent per interface firewalld zone configuration on rh7 systems.
  - **PR #27239:** (bechtoldt) test #27238 prevent keyerror when partition doesn’t exist (refs: #27238)

• **PR #27238:** (bechtoldt) salt.modules.disk.percent() throws KeyError when partition doesn’t exist (refs: #27239) @ 2015-09-18 19:44:45 UTC
  - 652b2999af Merge pull request #27238 from bechtoldt/fix_disk_percent_keyerror
  - 0511f611bb prevent KeyError by checking whether partition even exists

• **PR #27232:** (basepi) [2015.8] Add stub release notes for 2015.8.1 @ 2015-09-18 19:37:00 UTC
  - 253ac5e0c3c Merge pull request #27232 from basepi/release.notes.stubs
  - 25410706ee Add stub release notes for 2015.8.1

• **ISSUE #24573:** (bailsman) cloud.profile RuntimeError: dictionary changed size during iteration (refs: #27199)

• **PR #27199:** (rallytime) Avoid RunTimeError (dictionary changed size during iteration) with keys() @ 2015-09-18 15:44:27 UTC
  - c542cd49d0 Merge pull request #27199 from rallytime/fix-24573
  - 6b2a00e947 Avoid RunTimeError (dictionary changed size during iteration) with keys()

• **PR #27206:** (rallytime) Don’t repeat GCE setup instructions, and make the use of .json files clearer @ 2015-09-18 14:38:40 UTC
  - 6b79ad69a9 Merge pull request #27206 from rallytime/gce-doc-cleanup
  - cc6e9031 Don’t repeat GCE setup instructions, and make the use of .json files clearer

• **PR #27210:** (rallytime) Refactor some digital ocean functions @ 2015-09-18 14:38:01 UTC
  - 1d022eb5de Merge pull request #27210 from rallytime/do-clean-up
  - 808a5b3b81 Make sure we set the full data to the ret variable
  - 9b635004e2 Refactor some digital_ocean functions to help simplify the driver

• **PR #27197:** (basepi) [2015.8] Merge forward from 2015.5 to 2015.8 @ 2015-09-17 19:53:22 UTC
  - 8c204a45ab Merge pull request #27197 from basepi/merge-forward-2015.8
  - 2c2a5f85ac Merge remote-tracking branch 'upstream/2015.5' into merge-forward-2015.8
    - e956d885f Merge pull request #27194 from rallytime/bp-27180
      - 327d343fef file copy ret result True if no change in test mode
    - a02d043309 Merge pull request #27176 from basepi/merge-forward-2015.5
      - 66f4641be3 Merge remote-tracking branch 'upstream/2014.7' into merge-forward-2015.5
      - c186e51764 Merge pull request #27117 from jacobhammons/release-docs-2014.7
      - b69e11e0a4 made 2014.7 an archived release minor doc site updates
      - 69d758ee2b Merge pull request #27114 from cachedout/warn_on_insecure_log
507fb04683 Issue warning that some log levels may contain sensitive data
aa71bae8aa Merge pull request #27075 from twangboy/fix_password_2014.7
c0689e3215 Replaced password with redacted when displayed

de2027426e Merge pull request #27170 from rallytime/gce-docs
    a07db909bd Update Getting Started with GCE docs to use cloud.profiles or cloud.profiles.d examples

28cfdfd067 Merge pull request #27167 from rallytime/bp-27148
d12be52355 Pass filepointers to the serialize load functions.

4495f4f4d0 Merge pull request #27168 from techhat/gateimpacket
    cc448f9d1c Add further gating of impacket library

3e5ef0d30 Merge pull request #27166 from rallytime-fix-27100
    50fb3a489a Allow a full-query for EC2, even if there are no profiles defined

f1c9de7ed9 Merge pull request #27162 from rallytime/softlayer-service
d281068c70 Be explicit in using "SoftLayer" for service queries in SoftLayer drivers

59e9f9d8de Merge pull request #27149 from twangboy/fix_27133
    7992b7e20a Fixed some tests... hopefully...
d4c8e30f5d Fixed problem with add/remove path

097fcd1017 Merge pull request #27147 from rallytime-fix-11669
    55312ea03f Provide a more friendly error message.
    3655856c7 Enforce bounds in the GCE Regex

f5c3f157dd Merge pull request #27128 from eguven/2015.5-fix-test-diff
    ec2d68a84a don't show diff for test run if show_diff=False

0881dbb3e Merge pull request #27116 from jacobhammons/release-docs-2015.5
    6e323b6dd3 Update latest to 2015.8, 2015.5 is now previous Assorted style and minor updates

440855b182 Merge pull request #27033 from jfindlay/none
    3334b9d548 fix comment and unit test for reg state
    391a09d5ac update reg state unit tests
    ebbf2b05ca Fixed reg state module for None, 0, and " values

35fc74132a Merge pull request #26942 from Arabus/fix-docker.run
    e61e1de1f5 Fixes value typo for dockerio.loaded state
    39fa11b696 further linting
    4aecc3797c Further Linting to quiet the linter
    7eff8ad070 Code Linting and cmd call fix
    a51676e0eb Fixes #17088 olyif and unless should run on the host
d0c61288b8f Fixes #17088 retcode now returns True or False based on return status

- **PR #27195**: (jacobhammons) Fixed sphinx / latex build warnings and errors @ 2015-09-17 17:28:37 UTC
  - 430c48c5ea Merge pull request #27195 from jacobhammons/doc-build
  - fad87e34a2 Fixed lint errors
  - e56f02b025 re-add cheatsheet do-over
  - 60a8330561 re-added cheatsheet.tex
  - f7a9e25d52 Fixed sphinx / latex build warnings and errors Added missing modules to contents

- **PR #27182**: (bernieke) fix restart_on_error @ 2015-09-17 17:24:01 UTC
  - 8f8e75c5ff Merge pull request #27182 from Awingu/2015.8
  - 693b81f7e4 fix restart_on_error #27127

- **ISSUE #27093**: (TheBigBear) 2015.8.0 winrepo downloader corrupts some installers (refs: #27394, #27163)

- **PR #27163**: (terminalmage) Workaround upstream tornado bug affecting redirects (refs: #27394) @ 2015-09-17 16:09:01 UTC
  - 97d2a5fdde Merge pull request #27163 from terminalmage/issue27093
  - 80b396db73 Handle potential ValueError when checking content length
  - a89c987943 Remove unused import
  - 469e18f74c Workaround upstream tornado bug affecting redirects
  - f2a562ac60 Add salt.utils.files.rename() for cross-platform renaming

- **ISSUE #19954**: (gczuczy) Multiple disks on softlayer (refs: #27173)

- **ISSUE #22724**: (ty2u) digital_ocean_v2.py doesn’t restore snapshot (refs: #26824)

- **PR #27164**: (rallytime) Make sure changes from #26824 to digital_ocean_v2.py driver make it to digital_ocean.py in 2015.8 @ 2015-09-16 18:55:17 UTC
  - PR #26824: (systembell) [salt-cloud] Fix creating droplet from snapshot in digital_ocean provider (refs: #27164)
  - 0e04588d58 Merge pull request #27164 from rallytime/add-26824-changes-to-2015.8
  - a44bd763dd Make sure changes from #26824 to digital_ocean_v2.py driver make it to digital_ocean.py in 2015.8

- **ISSUE #19853**: (ksalman) master needs a way to invalidate grains on the minion (refs: #27143)
• PR #27143: (cachedout) Clean grains cache on grains sync @ 2015-09-16 16:27:06 UTC
  - 38d93a96fe Merge pull request #27143 from cachedout/clean_grains_cache_on_sync
  - 0a6609f80 Break apart long line
  - 6de2c950c Better error checking
  - 252f7c7ea9 Clean grains cache on grains sync

• ISSUE #18582: (mainframe) Allow merging file_roots and pillar_roots from different config files included from master.d (refs: #27150)

• PR #27150: (cachedout) Merge config values from master.d/minion.d conf files (refs: #27172) @ 2015-09-16 15:36:41 UTC
  - 626cbe61ce Merge pull request #27150 from cachedout/issue_18582
  - 6351a9d80 Merge config values from master.d/minion.d conf files

• ISSUE #27135: (SEJeff) Regression in core grains in the latest version of salt (refs: #27137)

• PR #27137: (jfindlay) revert serial grain regression @ 2015-09-15 21:52:25 UTC
  - PR #22267: (The-Loeki) modify _hw core grains to use the new smbios module, add system uuid (refs: #27137)
  - 72fad569b0 Merge pull request #27137 from jfindlay/serial
  - 78c9687f0e revert serial grain regression

• PR #27144: (rallytime) Don’t stacktrace on softlayer_hw.show_all_prices if a code isn’t supplied @ 2015-09-15 21:52:09 UTC
  - 58b56b9d78 Merge pull request #27144 from rallytime/softlayer-fixes
  - 3963a5cf0f Don’t stacktrace on softlayer_hw.show_all_prices if a code isn’t supplied

• PR #27139: (jacobhammons) Updated key instruction on rhel7 @ 2015-09-15 16:06:14 UTC
  - b71de75c1c Merge pull request #27139 from jacobhammons/rhel-doc
  - 7ed9626f0e Updated key instruction on rhel7

• PR #27134: (isbm) Backport to 2015.8: "pkg.info" @ 2015-09-15 15:57:46 UTC
  - 0d8248930e Merge pull request #27134 from isbm/isbm-pkg.info-backport-2015.8
  - b606a37a7 Lintfix: E7801, C0321
  - cb4706c7e8 Add license extraction for Dpkg.
  - 38753fe8b2 Enhance filter for the "technical" fields that are not generally needed as a package information for the CMDB
  - ffe8f14dae Implement additional package information merger
  - 2aaac469d0 Fix the size and installed-size keys
  - 3fc389435b Add homepage translator key
  - 25040c9c71 Docfix
  - 911ba1ba1 Add alias for ‘info’ of deprecation in v. Boron
  - 306958d1d0 Fix renamed method
  - 6ba269fbc6 Remove 'N/A' when no data.
  - 137eb75ca2 Rename existing 'info' to 'info_available'
- 7b376d5c3 Implement compatible 'info_installed'. Returned keys are common to other systems with other package managers
- ca7d0d5025 Implement compatible 'info_installed'. Returned keys are common to other systems with other package managers
- c1faebf0b5 Implement compatible 'info_installed'. Returned keys are common to other systems with other package managers
- f14f4036df Lint: regexp as a string
- cabe863b81 Implement package info function
- 0668f1da53 Implement getting package installation time
- e03716e5b5 Implement getting general packages information
- 8737d690f6 Extract package description
- a283d53737 Lintfix the regexp string
- fc9c959678 Convert time to ISO 8601
- 9fb9296276 Return a detailed information about package(s)

- **PR #27119**: (l2ol33rt) Boto dynamodb module should be using layer 2 abstractions @ 2015-09-15 14:09:57 UTC
  - 7f512852ef Merge pull request #27119 from l2ol33rt/boto_dynamo_module_fix
  - 46c7aee367 Boto dynamodb util should be using layer 2 abstractions

- **PR #27092**: (perfinion) salt/master: chdir to root not homedir @ 2015-09-15 14:09:24 UTC
  - 100e340111 Merge pull request #27092 from perfinion/chdir-fix-2015.8
  - 284d268855 salt/master: chdir to root not homedir

- **PR #27131**: (jacobhammons) Install docs @ 2015-09-15 12:34:38 UTC
  - 7483556b5f Merge pull request #27131 from jacobhammons/install-docs
  - d1e8af9b66 added command to remove key from rhel6
  - 69d64f177d moved rhel5 commands to separate lines
  - 90431278ea Install instruction updates for rhel6 and debian

- **PR #27124**: (jfindlay) Backport #27123 @ 2015-09-15 08:37:43 UTC
  - **PR #27123**: (cedwards) update for freebsd installation documentation (refs: #27124)
  - fc8afcc9f9 Merge pull request #27124 from jfindlay/bp-27123
  - 016fb5fafe Update freebsd.rst
  - 026fc9a884 update for freebsd installation documentation

- **PR #27111**: (basepi) [2015.8] Merge forward from 2015.5 to 2015.8 @ 2015-09-15 07:29:30 UTC
  - 06d2d3470c Merge pull request #27111 from basepi/merge-forward-2015.8
  - ab519fb5ff Remove heavily-mocked unit tests
  - 274464a85b Merge remote-tracking branch 'upstream/2015.5' into merge-forward-2015.8
    - 59f2a0c7ae Merge pull request #26977 from abh/2015.5-ntppeer
    - df3de817f Add support for PEERNTP network interface configuration on RH derived systems

28.2. Previous Releases
Chapter 28. Release Notes

* e05b1f3951 Merge pull request #27023 from jfindlay/htwebutilpass
  * 9f3d7890a6 add test support for htpasswd state mod
* 9f99c0027 Merge pull request #27074 from twangboy/fix_password_2015.5
  * fd55357456 Replaced password with redacted when displayed
* 46b44f85ed Merge pull request #27073 from rallytime/remove-lxc-warning
  * 76c056d02b Remove "use develop branch" warning from LXC tutorial now that 2015.5.0 has been released
* caab21d99c Merge pull request #27054 from rallytime/bp-27029
  * 0be393be22 Removed check for no package name
* 0227e1cb57 Merge pull request #27053 from rallytime/bp-26992
  * 83798aff3c Do not use full return for documentation.
  * d9d5bbaa68 Summary requires full return information.
* b72a0ef86d Merge pull request #27052 from rallytime/bp-26930
  * d9787aa318 aptpkg.mod_repo: Raise when key_url doesn't exist
* 8b554dd16f Merge pull request #27049 from johanek/repoquery-dedupe
  * c113916a23 When running repoquery to check for available versions of packages, run once for all packages rather than once per package
* cc2c9f3b969 Merge pull request #27070 from stanislavb/2015.5
  * 1e6e5ddc9c Deprecate salt.utils.iam in Carbon
* e23aca8ccf Merge pull request #27030 from jfindlay/winreg
  * 120be78e0 remove trailing line in win_path exec module
  * b36a7107b2 update win_path exec module unit tests
  * a2dc6f2dd7 Fixes win_path module, migrates from reg.(set|get)_key to reg.(set|get)_value
* 843c28b435 Merge pull request #27025 from cachedout/issue_25581
  * ecc09d9b93 Lint
  * bfcaab9ef4 Better try and error handling for prep_jid
* b9baa0b39a Merge pull request #27035 from terminalmage/useradd-contextmanager
  * e430e9f76c Update user states to reflect changes to login class handling
  * f24b979e7c useradd.py: Use contextmanager to prevent leaked filehandles
* 1cddf7a92 Merge pull request #27034 from rallytime/softlayer-doc-fix
  * cb64f8145 Update softlayer docs for where to find apikey
* 9e06d3f01a Merge pull request #27024 from rallytime/bp-27004
  * 54d6cf4c7 Fix 'dict' object has no attribute split
  * bb29d73c71 Fix 'dict' object has no attribute split
  * 5f1a9c46aa Fix 'dict' object has no attribute split
  * 2bfd9724e Fix 'dict' object has no attribute split
* 9ab2cae1e4 Merge pull request #27027 from rallytime/bp-27013
• 19a6e9cb1c Remove unwanted debug statement.
• 2c8beb238f Merge pull request #27026 from rallytime/bp-27011
  • f8518d545f Move giant eventlisten.sh example out of the state.event docstring
• e8dccc62f7 Merge pull request #26972 from twangboy/fix_20522
  • 0110786fa9 Catch the 404 error from fileclient
• fbc95f4685 Merge pull request #26951 from terminalmage/fix-timezone
  • 30a4915762 Update tests to reflect changes to timezone module
  • b6f926919f Fix timezone module for CentOS
• f2ad3c333c Merge pull request #26875 from marccardinal/patch-2
  • 36d5a62262 LXC gateway provisioned only when IP is provided
• 7b2e7b37df Merge pull request #26997 from twangboy/fix_symlink_windows
  • 89cc02d4e0 Added versionadded
  • 835177b0c8 Fixed symlinks for windows (don't use user root)
• 5389a85894 Merge pull request #27001 from twangboy/fix_reg_docs
  • 2980bba17 Minor clarification
  • 4684b2dd1d Added CLI example for reg.delete_key_recursive
• 37814f5df Merge pull request #26996 from jacobhammons/beacon-doc
  • e475ea688e Fixed typo
  • 240153d9e New content added to beacon docs.
• 4ba7eed711 Merge pull request #26868 from joejulian/2015.5_lvm_vg_symlink_fix
  • 3dfb33849a Use the actual device name when checking vgdisplay
• 1537e945be Merge pull request #26955 from dsumsky/s3-pillar-module-cache-fix-2015.5
  • 8219acff7 - fixed pylint warnings
  • a3b10e8ab1 - fixed broken caching in S3 ext_pillar module (file_md5 was a list) - added debugging messages - static parameters are available as module parameters now
• 3e902e86b1 Merge pull request #26987 from rallytime/bp-26966
  • 6a29eac0f URL has changed
• eddb532713 Merge pull request #26915 from rallytime/joyent-tests
  • d4ad42d697 Update Joyent Cloud Tests

  - e327d9a84 Remove redundant parens
  - eee0291ff8 Code clean up of cloud drivers and files

- **PR #27010**: (rallytime) Back-port #26988 to 2015.8 @ 2015-09-10 16:30:30 UTC
  - PR #26988: (s0undt3ch) Process spm.d/*.conf and add prefix root dir support to SPM directories (refs: #27010)
  - 590c46f4e3 Merge pull request #27010 from rallytime/bp-26988
  - 93b30b5ba8 Whitespace
  - 685fa911e7 Version Added for new apply_spm_config function
  - 9612a6c7ad Process spm.d/*.conf and add prefix root dir support to SPM directories

- **PR #26985**: (rallytime) Fix versionadded tag @ 2015-09-10 16:29:38 UTC
  - ec185d77fa Merge pull request #26985 from rallytime/versionadded-fix
  - 79eb606cb7 Fix versionadded tag
28.2.64 Salt 2015.8.10 Release Notes

Version 2015.8.10 is a bugfix release for 2015.8.0.

This release includes fixes for two issues discovered in 2015.8.9:

- Pip state broken in 2015.8.9 with pip < 6.0 (issue #33376)
- Fix traceback in logging for config validation (PR #33386)

Final Release of Debian 7 Packages

Regular security support for Debian 7 ended on April 25th 2016. As a result, 2016.3.1 and 2015.8.10 will be the last Salt releases for which Debian 7 packages are created.

Important Post-Upgrade Instructions for Linux Mint

As a result of some upstream changes, the os grain on Mint Linux is now being detected as LinuxMint (issue #33295). Run the following command after you upgrade to 2015.8.10 to reset the os grain to Mint and the os_family grain to Debian:

```
salt -G 'os:LinuxMint' grains.setvals "{'os': 'Mint', 'os_family': 'Debian'}"
```

Changelog for v2015.8.9..v2015.8.10

Generated at: 2018-05-28 00:51:57 UTC

- c3d2c4eaae Fix traceback in logging for config validation (#33386)
- 2a060ea1e8 restore whitespace
- aa1f45d664 blast, put the try/except int he right place
- be1a7659a3 maintain the fallabck because I am totally sick of this crap

28.2.65 Salt 2015.8.11 Release Notes

Version 2015.8.11 is a bugfix release for 2015.8.0.

Statistics

- Total Merges: 122
- Total Issue References: 70
- Total PR References: 221
- Contributors: 48 (AAAbouZaid, BlaineAtAffirm, DmitryKuzmenko, The-Loeki, abednarik, babilen, bebehei, cachedout, clinta, complexsplit, cro, danslimmon, dcolish, dincamihai, edgan, gerhardqux, ghedo, isbm, ja-
ocshammons, jfindlay, jody, justinta, l13t, lomeroe, lorengordon, lvg01, mcalmer, meaksh, morganwillcock, oeufete, opdude, phistrom, rallytime, rmarcinik, ryan-lane, sacren, steverweber, techhat, tegbert, terminal-
mage, thatch45, the-glu, thegoodduke, ticosax, tveastman, twangboy, vatny, zer0def)
Ubuntu 16.04 Packages

SaltStack is now providing official Salt 2015.8 packages for Ubuntu 16.04.

Returner Changes

- Any returner which implements a `save_load` function is now required to accept a `minions` keyword argument. All returners which ship with Salt have been modified to do so.

New Master Configuration Parameter

- `rotate_aes_key` - if `True`, causes Salt to generate a new AES key whenever a minion key is deleted. This eliminates the chance that a deleted minion could continue to eavesdrop on communications with the master if it continues to run after its key is deleted.

Changelog for v2015.8.10..v2015.8.11

*Generated at: 2018-05-28 01:16:12 UTC*

- PR #34682: (jfindlay) update 2015.8.11 release notes
- PR #34676: (cachedout) Revert "Modify lodaer global test to use populated dunders" @ 2016-07-14 18:12:55 UTC
  - 3192e1674b Merge pull request #34676 from cachedout/partial_revert_34644
  - 64a154826a Revert "Modify lodaer global test to use populated dunders"
- PR #34601: (lorendgordon) Clarifies the proper way to reference states @ 2016-07-14 14:20:41 UTC
  - 3b6f1089b2 Merge pull request #34601 from lorendgordon/clarify-doc
  - bfe0d0b8a Clarifies the proper way to reference states
  - PR saltstack/salt#34644: (cachedout) Cleanup loader errors (refs: #34651)
  - PR #34651: (rallytime) Lint 34644
  - PR #34647: (cachedout) Adjust the mine test a little bit to give it a better chance of success
- PR #34642: (justinta) Check that mysqladmin exists before running mysql integration tests @ 2016-07-13 18:12:44 UTC
  - 8a0209101e Merge pull request #34642 from jtand/mysql_integration_cleanup
  - dd1559a599 Check that mysqladmin exists before running mysql integration tests.
- PR #34618: (justinta) Network state integration test test=True @ 2016-07-13 16:30:15 UTC
  - 3e612c3794 Merge pull request #34618 from jtand/network_integration_fix
  - 34b9f9cefc Changed network state test to use test=True
  - b261683b0 Some small changes
  - ed59113e94 Change network state integration test to use test=True
- PR #34617: (rallytime) [2015.8] Merge forward from 2015.5 to 2015.8 @ 2016-07-12 20:11:40 UTC
  - 9f123543e5 Merge pull request #34617 from rallytime/merge-2015.8
  - 3026df346f Merge branch '2015.5' into '2015.8'
ISSUE #33649: (tyhunt99) 2016.3.0 dockerng state fails comparing cmd configuration (refs: #salt-stack/salt#33851, #33851)

- PR saltstack/salt#33851: (ticosax) [dockerng] Add support for edge case when Cmd and Entrypoint can't be blanked (refs: #34593)
- PR #34593: (rallytime) Back-port #33851 to 2015.8
- PR #33851: (ticosax) [dockerng] Add support for edge case when Cmd and Entrypoint can't be blanked (refs: #34593)
- PR #34590: (oeuftete) [2015.8] dockerng: When sorting list actual_data, make it a list
- PR #34591: (justinta) Gate docker unit test to check for docker
- PR #34560: (terminalmage) Add a bunch of documentation on getting files from other environments

ISSUE #34397: (jaredhanson11) ignore_epoch needs to be passed through to version_cmp functions (refs: #34531)

- PR #34531: (terminalmage) Support ignore_epoch argument in version comparisons @ 2016-07-08 16:43:36 UTC
  - 91e0656d44 Merge pull request #34531 from terminalmage/issue34397
  - d0fec1b8f6 salt/modules/zypper.py: accept ignore_epoch argument
  - 5ae9463c1f salt/modules/yumpkg.py: accept ignore_epoch argument
  - c2791117af salt/modules/rpm.py: accept ignore_epoch argument
  - c5de8b880d salt/modules/ebuild.py: accept ignore_epoch argument
  - 4ee8e037f salt/modules/aptpkg.py: accept ignore_epoch argument
  - 5b123b403c Pass ignore_epoch to salt.utils.compare_versions()
  - 07368fac40 Accept ignore_epoch argument for salt.utils.compare_versions()

- PR #34545: (terminalmage) Handle cases where Docker Remote API returns an empty ExecutionDriver @ 2016-07-08 16:34:30 UTC
  - e99befe4d7 Merge pull request #34545 from terminalmage/docker-exec-driver
  - dd5838e242 Handle cases where Docker Remote API returns an empty ExecutionDriver

- PR #34546: (rallytime) Rename unit.states.boto_secgroup to unit.states.boto_secgroup_test @ 2016-07-08 16:16:42 UTC
  - 7120d43df0 Merge pull request #34546 from rallytime/rename-boto-secgroup-test
  - f8a362be7 Rename unit.states.boto_secgroup to unit.states.boto_secgroup_test

- PR #34537: (rallytime) Rename tests.unit.simple to tests.unit.simple_test @ 2016-07-08 00:08:36 UTC
  - ca9f06182d Merge pull request #34537 from rallytime/rename-simple-test
  - ceefbfe34c Rename tests.unit.simple to tests.unit.simple_test

  - PR #34527: (rallytime) [2015.8] Update bootstrap script to latest stable
  - PR #34521: (cachedout) Prevent many errors in the test suite in loader tests
  - PR #34507: (AAboutZaid) Fix wrong order of retention_policy_exists.
• PR #34518: (terminalmage) Fix pkg.latest integration test for non-LTS ubuntu @ 2016-07-07 19:29:13 UTC
  - 685df80929 Merge pull request #34518 from terminalmage/fix-pkg.latest-test
  - 4aef44ecdf Fix pkg.latest integration test for non-LTS ubuntu

• PR #34513: (cachedout) Lower the log level for modules which cannot be loaded to trace @ 2016-07-07 17:00:48 UTC
  - a516f116d1 Merge pull request #34513 from cachedout/lower_loader_log
  - 733c5d00c0 Lower the log level for modules which cannot be loaded to trace

• PR #34498: (rallytime) Use -O in the wget example in the bootstrap tutorial for the develop branch @ 2016-07-07 16:30:46 UTC
  - 63f0451041 Merge pull request #34498 from rallytime/bootstrap-tutorial-doc-fix
  - 23c5739c3b Use -O in wget develop example in bootstrap tutorial
  - PR #34503: (rallytime) Rename some unit test files by adding _test

• ISSUE #34302: (ghost) Salt gitfs loads top files from all branches and tags (refs: #34505)
  - PR #34505: (terminalmage) Improve top file merging documentation
  - PR #34492: (zer0def) Gracefully handle non-XML output in GlusterFS execution module.
  - PR #34489: (justinta) Use skipTest for network state integration test

• ISSUE #34261: (vernondcole) salt.modules.dnsmasq documentation errors (refs: #34488, #34323)
  - PR #34488: (rallytime) Update dnsmasq.get_config docs to use correct config_file param.

• PR #34462: (terminalmage) Use --always when available to git describe @ 2016-07-06 03:59:33 UTC
  - e2f576e847 Merge pull request #34462 from terminalmage/git-describe-always
  - 6ef7ee198e Restrict use of --always to git 1.5.6 and newer
  - c554b22fc8 modules/git: added --always parameter for git.describe().

• PR #34467: (rallytime) Back-port #34457 to 2015.8 @ 2016-07-06 03:56:58 UTC
  - PR #34457: (ryan-lane) Only access key metadata if we found key metadata (refs: #34467)
  - 85f1f18239 Merge pull request #34457 from rallytime/bp-34457
  - 74687341f Only access key metadata if we found key metadata

• PR #34432: (twangboy) Fix file.append @ 2016-07-05 23:14:22 UTC
  - 9e15337b74 Merge pull request #34432 from twangboy/fix_file.append
  - 13f1fddc8 Remove refactoring code
  - 78f7c530bb Remove unit tests, integration tests written
  - b83392eda Remove len() in favor of boolean test
  - 4373408163 Fix line error
  - 2479b53e2f Fix erroneous report on newline code
  - 75b6ed1f5 Change back to binary read
  - 65753cfff6 Use os.linesep instead of n
  - a55d63f086 Fix object names
  - 3e2fe12e5e Add new line if missing
- 0b7821c8db Fix file.append state

- **PR #34429** (terminalmage) Skip version checking for targeted packages in pkg.latest state @ 2016-07-05 17:50:41 UTC
  - 91e995bb41 Merge pull request #34429 from terminalmage/pkg-latest-versioncheck
  - 667f31a72a Skip version checking for targeted packages in pkg.latest state
  - **PR #34455** (cro) Forgot reference to inotify

- **PR #34451** (rallytime) [2015.8] Merge forward from 2015.5 to 2015.8 @ 2016-07-05 15:57:54 UTC
  - 7bb0868c66 Merge pull request #34451 from rallytime/merge-2015.8
  - 55a91e22be Merge branch '2015.5' into '2015.8'
  - 8c72ee56e4 Merge pull request #34435 from cachedout/backport_config_dir_integration
    - 0e2c71a537 Backport change to integraiton test suite

- **ISSUE #34390** (mgresser) Use rpmdev-vercmp to determine correct version of rpms in CentOS5 (refs: #34401)

- **PR #34401** (terminalmage) Use rpmdev-vercmp as a fallback for version comparison on RHEL5 @ 2016-07-01 17:42:24 UTC
  - e65d1ae374 Merge pull request #34401 from terminalmage/rpm-version_cmp
  - 7ceed4182e Use rpmdev-vercmp as a fallback for version comparison on RHEL5

- **PR #34366** (steverweber) Update service.py @ 2016-07-01 17:40:31 UTC
  - 5ddf417432 Merge pull request #34366 from steverweber/fix_servicerestart
  - 7847c39024 Update service.py

- **PR #34426** (cro) Document that inotify is Linux only @ 2016-07-01 17:04:38 UTC
  - 485454febb Merge pull request #34426 from cro/inotify-linux-only
  - 54a0a2f5ba Document that inotify is Linux only

- **PR #34392** (cro) Clarify that salt-cloud doesn't get installed by bootstrap @ 2016-06-30 18:16:23 UTC
  - fe18bbb527 Merge pull request #34392 from cro/salt-cloud-doc-clarify
  - 6ce575d40 Clarify that salt-cloud doesn't get installed by bootstrap

- **PR #34373** (justinta) Network state integration test @ 2016-06-30 15:05:44 UTC
  - 45b88b10d7 Merge pull request #34373 from jtand/network_state_integration_test
  - 1d24053e36 network.system sls file
  - 4a9e6af542 network.routes sls file
  - 76c90b2ef6 network.managed sls file
  - 84a36369fa Added network state integration test
  - **PR #34377** (terminalmage) Optimize pkg integration tests and add a couple new tests

- **PR #34368** (rallytime) [2015.8] Merge forward from 2015.5 to 2015.8 @ 2016-06-29 17:54:49 UTC
  - af8ef1e461 Merge pull request #34368 from rallytime/merge-2015.8
  - 3bec0cb510 Merge branch '2015.5' into '2015.8'
  - 970aaa46af Merge pull request #34252 from gtmanfred/2015.5
    - 82183f1572 return list of nodes for lxc driver when called directly

28.2. Previous Releases
- PR #34344: (rallytime) Back-port #34324 to 2015.8
- PR #34324: (cachedout) Test custom grains matcher (refs: #34344)

**ISSUE #33674: (edgan) salt-ssh returns a zero code on jinja template failure. (refs: #34316)

**ISSUE #28300: (srkunze) [salt-ssh] Does not return non-zero exit code (refs: #34316)
- PR #34342: (rallytime) Back-port #34316 to 2015.8
- PR #34316: (edgan) Making salt-ssh pass proper return codes for jinja rendering errors (refs: #34342)
- PR #34339: (terminalmage) Revert py3modernize lint changes

**ISSUE #34261: (vernondcole) salt.modules.dnsmasq documentation errors (refs: #34488, #34323)
**ISSUE #34249: (ssgward) Clarify doc on file.copy (refs: #34323)
**ISSUE #34247: (gravyboat) Update logging docs to mention profile level (refs: #34323)

**ISSUE #33694: (hjc) Document That Local Files Can Be Used as a Source for File States (refs: #34323)
- PR #34323: (jacobhammons) Doc clarifications to file modules, addition of new profile log lev...
- PR #34325: (terminalmage) Remove unnecessarily-disabled sanity check

**PR #34335: (rallytime) [2015.8] Merge forward from 2015.5 to 2015.8 @ 2016-06-28 15:07:15 UTC
- c5890a0eca Merge pull request #34335 from rallytime/merge-2015.8
- 2296587536 Merge branch '2015.5' into '2015.8'
- 6ce545d92 Merge pull request #34313 from rallytime/bootstrap-2015.5
  - c7db73be92 [2015.5] Update to latest bootstrap script v2016.06.27
- PR #34319: (rallytime) Back-port #34244 to 2015.8
- PR #34244: (the-glu) Typo in dockerio doc (refs: #34319)

**PR #34312: (rallytime) [2015.8] Update to latest bootstrap script v2016.06.27 @ 2016-06-27 17:41:24 UTC
- dd4c937009 Merge pull request #34312 from rallytime/bootstrap-2015.8
- 944a393f89 [2015.8] Update to latest bootstrap script v2016.06.27

**PR #34307: (rallytime) Fix test example in integration testing docs @ 2016-06-27 17:41:24 UTC
- 91703d2dc4 Merge pull request #34307 from rallytime/fx-test-example
- f4a0543fe Fix test example in integration testing docs

**PR #34233: (thegoodduke) ipset: fix the comment containing blank @ 2016-06-24 19:28:34 UTC
- d235b1245b Merge pull request #34233 from thegoodduke/for_2015.8_ipset
- 4da5e35bf4 ipset: fix the comment containing blank

**ISSUE #34037: (bobrik) salt-call ignores --config-dir resulting in failing gpg renderer (refs: #34257)

**PR #34257: (rallytime) Use 'config_dir' setting instead of CONFIG_DIR in gpg renderer @ 2016-06-24 17:25:04 UTC
- 65c5675a3f Merge pull request #34257 from rallytime/fx-34037
• d7a5e9b10e Remove test that doesn't actually test anything
• c4c037d600 Use 'config_dir' setting instead of CONFIG_DIR in gpg renderer

• **ISSUE #34273**: (clinta) file.recurse does not properly cache files, adds a pipe to path (refs: #34274)
• **PR #34274**: (clinta) Don't escape source before calling managed @ 2016-06-24 17:23:35 UTC
  - 203870f147 Merge pull request #34274 from clinta/2015.8
  - 6572454918 Don't escape source before calling managed

• **PR #34258**: (rallytime) [2015.8] Merge forward from 2015.5 to 2015.8 @ 2016-06-24 14:27:06 UTC
  - a59dc85a15 Merge pull request #34258 from rallytime/merge-2015.8
  - ea91b67cd Merge branch '2015.5' into '2015.8'
  - 8d5ed91980 Merge pull request #34225 from richardscollin/fixed-win-set-datetime
    * 6286771ef7 Fix win_system.set_system_date_time
  - cb1e8b082 Merge pull request #34232 from thegoodduke/for_2015.5_ipset
    * 344eb0762 ipset: fix comment containing blank

• **ISSUE #33873**: (hrumph) refresh: True not working with pkg.installed state (refs: #34093)
• **PR #34093**: (terminalmage) Catch CommandExecutionError in pkg states @ 2016-06-23 21:00:13 UTC
  - 92962957c8 Merge pull request #34093 from terminalmage/issue33873
  - 5ed65d746 win_pkg: refresh pkg database if refresh=True passed to version() or list_pkgs()
  - 0078ade35 Catch CommandExecutionError in pkg states

• **PR #34136**: (meaksh) Fixed behavior for SUSE OS grains in 2015.8 @ 2016-06-23 20:24:58 UTC
  - PR #34134: (meaksh) Fixed behavior for SUSE OS grains in 2016.3 (refs: #34136)
  - PR #33903: (meaksh) Fetching grains['os'] from /etc/os-release on SUSE systems if it is possible (refs: #34134)
  - cb599787c Merge pull request #34136 from meaksh/salt-suse-os-detection-2015.8
  - 97f1958863 some cleanup and formatting
  - 7c8e5d78f better way to check for openSUSE Leap
  - 548971bdc9 Fix for SUSE OS grains in 2015.8

• **ISSUE #34074**: (fooka03) Unable to use S3 file backend with 2016.3.1 on Ubuntu 14.04 or 16.04 (refs: #34208)
• **ISSUE #32916**: (giannello) file.managed memory usage with s3 sources (refs: #33599)
  - PR #34208: (lomeroe) fix regression from #33681 which causes pulling a list of s3 objects ...
  - PR #33681: (rallytime) Back-port #33599 to 2015.8 (refs: #34208)
  - PR #33599: (lomeroe) Fix s3 large file download (refs: #33681)

• **ISSUE #34213**: (terminalmage) gitfs w/pygit2 - corner case, traceback with short hexadecimal environment names (refs: #34218)
• **ISSUE #34212**: (terminalmage) gitfs: commit SHAs no longer available as fileserver environments (refs: #34218)
  - PR #34218: (terminalmage) Fix a pair of gitfs bugs
• **ISSUE #34043**: (rallytime) state execution stacktraces when psutil isn't installed (refs: #34182)
• **PR #34182:** (rallytime) Handle child PIDs differently depending on the availability of psutils @ 2016-06-22 19:22:06 UTC
  - **PR #33942:** (cachedout) ZD 762 (refs: #34182)
  - 6d643cd528 Merge pull request #34182 from rallytime/fix-34043
  - b7d49c5052 Handle child PIDs differently depending on the availability of psutils
  - **PR #34188:** (terminalmage) Clarify pkg.list_repo_pkgs docstring for held packages
  - **PR #34206:** (terminalmage) Change target for dockerng assuming default status to Nitrogen release

• **PR #34184:** (rallytime) [2015.8] Merge forward from 2015.5 to 2015.8 @ 2016-06-21 21:43:46 UTC
  - 1c4369d093 Merge pull request #34184 from rallytime/merge-2015.8
  - 8e36e90966 Merge branch '2015.5' into '2015.8'
  - 5411ebb3b4 Merge pull request #34141 from jtand/boto_vpc_test_fix
    * b7ac6c735a Moved imports to top, out of _get_moto_version function
    * 02f9ba99ba Updated version check. Moved check into its own function
    * d445026c56 Updated test to work with new moto version. Changed strings to unicode

• **ISSUE #33972:** (morganwillcock) 2016.3.1 breaks diskusage beacon (refs: #34176, #34103)

• **PR #34176:** (rallytime) Back-port #34103 to 2015.8 @ 2016-06-21 20:01:46 UTC
  - **PR #34103:** (morganwillcock) Fix diskusage beacon (refs: #34176)
  - **PR #34174:** (cachedout) Fix diskusage beacon (refs: #34103)
  - c059d6c08c Merge pull request #34176 from rallytime/bp-34103
  - 2e5e7ed03c Fix diskusage beacon

• **ISSUE #34114:** (onorua) can't read PID from lock file due to exception if gitfs_global_lock is enabled (refs: #34179)

• **PR #34179:** (terminalmage) Raise the correct exception when gitfs lockfile is empty @ 2016-06-21 20:00:59 UTC
  - 5cbaaed167 Merge pull request #34179 from terminalmage/issue34114
  - 86d1b88e864 Raise the correct exception when gitfs lockfile is empty

• **PR #34178:** (terminalmage) Remove unnecessary comment @ 2016-06-21 19:15:37 UTC
  - 67deded119 Merge pull request #34178 from terminalmage/remove-comment
  - 4965be72b1 Remove unnecessary comment
  - **PR #34165:** (mcalmer) fix salt --summary to count not responding minions correctly
  - **PR #34175:** (rallytime) Back-port #34128 to 2015.8
  - **PR #34128:** (bebehei) doc: add missing dot (refs: #34175)
  - **PR #34174:** (rallytime) Back-port #34066 to 2015.8
  - **PR #34066:** (complexsplit) Typo fix (refs: #34174)

• **PR #34077:** (rallytime) Add some grains targeting tests @ 2016-06-21 16:06:30 UTC
  - 3669048654 Merge pull request #34077 from rallytime/grains-tests
  - 2199bb8a78 Add integration tests for grains.append
  - 37cfe70724 Add some grains targeting tests
- **PR #34142**: (ismb) Move log message from INFO to DEBUG. @ 2016-06-20 18:57:34 UTC
  - 65fb5b4d7 Merge pull request #34142 from ismb/ismb-getid-loglevel-shift
  - 23667b702 Move log message from INFO to DEBUG.
- **PR #34100**: (terminalimage) Update documentation on "refresh" behavior in pkg states
- **PR #34072**: (jfindlay) modules.pkg int tests: skip refresh_db upon error
- **PR #34069**: (rallytime) Add a test to check for disconnected minion messaging @ 2016-06-16 21:18:38 UTC
  - 1b76de157 Merge pull request #34069 from rallytime/test-minion-return-message
  - 60561ac6fc Add a test to check for disconnected minion messaging
- **ISSUE #30100**: (armooo) Masterless gitfs performance (refs: #34048)
- **PR #34048**: (terminalimage) RFC: proposed fix for multiple fileserver updates in masterless runs @ 2016-06-16 21:10:59 UTC
  - 3119693dac Merge pull request #34048 from terminalimage/issue30100
  - 715e7af8a4 Ensure only one fileserver update in a masterless run
- **PR #34011**: (rallytime) Back-port #33948 and #34009 to 2015.8 @ 2016-06-16 15:41:02 UTC
  - **PR #34009**: (rallytime) Back-port #33948 to 2016.3 + add log message (refs: #34011)
  - **PR #33948**: (cachedout) Save an entire minion cache traversal on each master pub (refs: #34011, #34009)
  - d03024931 Merge pull request #34011 from rallytime/bp-33948-2015.8
  - a4660d1f7 Warn when custom returners don’t have minions kwarg in save_load
  - 78befde62f Add note to release notes about returner minions kwarg change
  - 4e7f35fa36 Fix loop over cache in auth checking!
  - 06963e0505 Save an entire minion cache traversal on each master pub
- **PR #34051**: (tegbert) Fixed a bug in the consul.py module that was preventing services
- **PR #34045**: (jacobhammons) Updated latest release version @ 2016-06-15 19:22:43 UTC
  - 8ba117c7f6 Merge pull request #34045 from jacobhammons/release-prev
  - 43b4a12aa2 Updated latest release version
- **PR #34020**: (twangboy) Always make changes to minion config if set (2015.8)
- **PR #34030**: (vutny) More YAML indentation fixes in state module examples
- **PR #34003**: (vutny) states.file: fix indentation in YAML examples (refs: #34030)
- **PR #34018**: (rallytime) [2015.8] Merge forward from 2015.5 to 2015.8 @ 2016-06-14 22:53:19 UTC
  - 5b5eacca9 Merge pull request #34018 from rallytime/merge-2015.8
  - 77f4f3087 Merge branch '2015.5' into '2015.8'
  - 871f79666c Lint fix for #34000 (#34005)
  - f758e42172 Fix incorrectly written test (#34000)
  - cf6281b4cf Add loader.utils() example to calling minion_mods (#33953)
  - 6b98e8a9ea Merge pull request #33880 from terminalimage/zh744
    * ea726d11c8 pkg.uptodate: Pass kwargs to pkg.list_upgrades
Salt Documentation, Release 3002.2

- de90b35d2b salt/modules/zypper.py: add fromrepo support to list_upgrades
- 35fbb06df5 salt/modules/win_pkg.py: add kwargs to list_upgrades
- bf5505f425 salt/modules/solarisips.py: add kwargs to list_upgrades
- 6e89a8be98 salt/modules/pkgutil.py: add kwargs to list_upgrades
- 5179dbce4 salt/modules/pacman.py: add kwargs to list_upgrades
- 46e5a52784 salt/modules/macports.py: add kwargs to list_upgrades
- 76143b76ca salt/modules/ebuild.py: add kwargs to list_upgrades
- b40fc9bc62 salt/modules/brew.py: add kwargs to list_upgrades
- 4f11c16d86 salt/modules/aptpkg.py: add fromrepo support to list_upgrades
- cb88960ed1 Merge pull request #33904 from rallytime/bp-33806
- 638ccf501d Work around upstream cherrypy bug
- PR #34003: (vutny) states.file: fix indentation in YAML examples (refs: #34030)

- ISSUE #20809: (lorenegordon) Function pam.read_file is not available? (refs: #34002)
- PR #34002: (lorenegordon) Remove loader test for pam module

- PR #33990: (jacobhammons) Adds links to several current Salt-related projects @ 2016-06-14 01:15:20 UTC
- c4ab6a074 Merge pull request #33990 from jacobhammons/community-projects
- b20213fd79 Adds links to several current Salt-related projects Removes the salt_projects.rst file which hasn't been updated in a long time, this is replaced by the updated topics/projects/index.rst file Adds a note about Salt Pack to the installation doc

- PR #33983: (twangboy) Clarify the account_exists parameter @ 2016-06-14 01:11:48 UTC
- 444c15792c Merge pull request #33983 from twangboy/fix_docs_join_domain
- b057be04b4 Fix typo, more documentation
- d8c2f3e57a Clarify the account_exists parameter

- PR #33951: (jfndlay) modules.gem int tests: more fixes @ 2016-06-14 00:46:43 UTC
- 9bd2317992 Merge pull request #33951 from jfndlay/gem_tests
- 2eb633ecad modules.gem int tests: only check known installed gems
- 9f3e18b037 modules.gem int tests: (un)install a non-core gem

- PR #33984: (jfndlay) Add docs and tests to disk state @ 2016-06-14 00:43:38 UTC
- 53baa6e6be1 Merge pull request #33984 from jfndlay/disk_capacity
- 6cbe31e6c2 states.disk: rewrite unit tests
- 82c77b533f states.disk.status: validate percent values
- aedc4e15e5 states.disk: add documentation

- PR #33985: (rallytime) Write some more simple batch command tests @ 2016-06-14 00:38:05 UTC
- fa5eb6a69 Merge pull request #33985 from rallytime/more-batch-tests
- 3e7ab8c7b3 Write some more simple batch command tests
- PR #33684: (jfndlay) add acl unit tests
- PR #33942: (cachedout) ZD 762 (refs: #34182)
• **PR #33946**: (rallytime) Back-port #33698 to 2015.8 @ 2016-06-13 15:55:22 UTC
  - **PR #33698**: (opdude) Vsphere fixes (refs: #33946)
  - 0281d491c6 Merge pull request #33698 from rallytime/bp-33698
  - 50f8f9d7b9 Make sure we only use GetConnection if we are using a proxy salt minion
  - 1505c5724b Fix a bug with self signed certificates and creating a new VM
• **ISSUE #33911**: (xlotlu) salt-ssh + grains.filter_by Type error: filter_by() got an unexpected keyword argument 'base' (refs: #33952)
• **PR #33952**: (rallytime) Add base argument to salt-ssh grains wrapper for filter_by func @ 2016-06-13 15:51:33 UTC
  - df3f51955 Merge pull request #33952 from rallytime/fix-33911
  - 03b7cbbd2c Add base argument to salt-ssh grains wrapper for filter_by func
  - **PR #33962**: (jacobhammons) Adds a "Generated on <timestamp>" line to the html footer
• **ISSUE #29525**: (apergos) master config setting ping_on_rotate is broken if minion_data_cache is disabled (refs: #33765)
  - **PR #33765**: (cachedout) Correct issue with ping on rotate with minion cache
• **PR #33888**: (jfindlay) random.org checks @ 2016-06-10 15:45:07 UTC
  - 378dd7ca06 Merge pull request #33888 from jfindlay/random_check
  - 6acee3cc30 modules.random_org._query: only return text if present
  - 82f95429db modules.random_org_unit tests: skip if random.org down
  - 1f9422e0cd utils.http.query: also except gaierror with tornado
• **ISSUE #31499**: (Reiner030) FeatureRequest: boto_elb misses connection_settings - idle_timeout (refs: #33936)
  - **PR #33936**: (rallytime) Add connecting_settings to boto_elb state attributes list
• **ISSUE #29249**: (timcharper) salt-cloud sync_after_install: all does not seem to sync anything at all (refs: #33917)
  - **PR #33917**: (techhat) Wait for up to a minute for sync_after_install
• **PR #33877**: (rallytime) [2015.8] Merge forward from 2015.5 to 2015.8 @ 2016-06-09 14:50:42 UTC
  - ef6da0be5a Merge pull request #33877 from rallytime/merge-2015.8
  - 398534a9e7 Fix ret return from merge-conflict resolution
  - b8e4706074 Merge branch '2015.5' into '2015.8'
  - cdda593c50 Merge pull request #33829 from terminalmage/update-versionchanged
    - f7028eb1c6 Update versionchanged directive
  - b8e6c144d8 Merge pull request #33833 from terminalmage/issue33645
    - 91745c2a67 Support syncing pillar modules to masterless minions
  - e061788e81 Merge pull request #33814 from terminalmage/archive-extracted-xz
    - 897a716df2 Support extraction of XZ archives in archive.extracted state
  - fa983e91cf Merge pull request #33778 from sodium-chloride/2015.5-2016-0604-1938
    - a5fb6d7a69 Fix minor docstring issues
  - b9133326c8 Merge pull request #33726 from jfindlay/sysmod_skip_valid_docs_glance
• ebee8a89af glance.warn_until shouldn't be checked for a doc string
  – 137f0b19f3 Merge pull request #33611 from TargetHolding/2015.5
• 1dd15a603b solve' TypeError: expected string or buffer' in json/decoder.py
• eaf42ca892 solve AttributeError: 'module' object has no attribute 'exception'

• ISSUE #33810: (chiro79) locate.locate fails always (refs: #33827)
• PR #33827: (cachedout) Fix broken locate.locate function @ 2016-06-08 13:49:57 UTC
  – ec09095c45 Merge pull request #33827 from cachedout/issue_33810
  – 9d36f1e474 Fix broken locate.locate function
• PR #33839: (cachedout) Fix another unit test stacktrace in pkg_resource @ 2016-06-08 13:32:55 UTC
  – f7b3d0ed9a Merge pull request #33839 from cachedout/fix_pkgresource_test_stacktrace
  – 435547a747 Fix another unit test stacktrace in pkg_resource
• PR #33840: (cachedout) Remove matcher tests @ 2016-06-08 13:31:41 UTC
  – 5f081ef31c Merge pull request #33840 from cachedout/remove_matcher_unit_tests
  – 6297448377 Remove matcher tests
• PR #33836: (cachedout) Fixing more stupid unit tests @ 2016-06-07 21:34:04 UTC
  – cda032dab2 Merge pull request #33836 from cachedout/fix_winserver_manager_test
  – 453fb1ac91 Fixing more stupid unit tests
• PR #33805: (jfindlay) states.pkg int tests: skip if pkg mgr unavailable @ 2016-06-07 14:40:47 UTC
  – 1db559afe9 Merge pull request #33805 from jfindlay/pkg_tests
  – 0c069ddc95 states.pkg int tests: skip if pkg mgr unavailable
• PR #33808: (jfindlay) fix some problems with the gem module integration tests @ 2016-06-07 14:40:25 UTC
  – 3984b65486 Merge pull request #33808 from jfindlay/gem_tests
  – f7c19a1a58 modules.gem int tests: relax version checks
  – 6af47d2ba7 modules.gem int tests: remove pkgs before testing install
• PR #33770: (jfindlay) service state integration tests @ 2016-06-07 14:37:54 UTC
  – c30d8a8c61 Merge pull request #33770 from jfindlay/service_tests
  – f13f914755 states.service: add integration tests
  – 90ae79c39 states.service.mod_watch: update unit test
  – d210a92f09 states.service.mod_watch: update sfun and force docs
• PR #33691: (justinta) Gem integration test @ 2016-06-06 11:13:23 UTC
  – 7fdfebe9a28 Merge pull request #33691 from jfindlay/gem_integration_test
  – ff2daee103d ubuntu doesn't install default gems when ruby is installed
  – 504df9a65a Fixed lint error
  – 0cb1bfa0d3 Removed extra :
  – 86f59b3e80 Made more pythonic
  – 2f36f34981 Fixed salt.util import. Added status check to make sure external resource is available
- 400a71ec33 Removed redundancies
- 91db411bea A couple lint fixes
- c97f3319b9 Add check for gem binary
- 210aceb402 Refactored tests to not use return messages
- 9d437bd45d Removed artifact from testing
- 134e1fa888 Fixed typos, and added destructiveTest decorator
- 37bc3ad8fd Fixed typo, uninstalled to uninstall
- 5b23b91ac6 Integration test for gem module

- **PR #33777**: (sacren) Fix minor docstring issue of arg being missing @ 2016-06-06 10:44:59 UTC
  - bb4194bb79 Merge pull request #33777 from sodium-chloride/2015.8-2016-0604-1939
  - c1fd830a1a Fix minor docstring issue of arg being missing

- **ISSUE #31219**: (gladiatr72) when the minions have all been destroyed... (refs: #33759)

- **PR #33759**: (cachedout) Catch no minions exception in batch mode @ 2016-06-03 21:22:49 UTC
  - c7499ea409 Merge pull request #33759 from cachedout/issue_31219
  - 15a39f8646 Catch no minions exception in batch mode

- **ISSUE #33554**: (jfindlay) local cache missing directories while running test suite (refs: #33653)

- **PR #33719**: (cachedout) Catch oserror for race condition @ 2016-06-03 17:25:26 UTC
  - **PR #33653**: (cachedout) Create missing jid dir if it doesn’t exist (refs: #33719)
  - 47d6686071 Merge pull request #33719 from cachedout/fixup_33653
  - 635efa248b Change to just surround the mkdir
  - 21b7123a60 Catch oserror for race condition

- **PR #33712**: (meaksh) Fix for groupadd execution module failures in SLES11 systems @ 2016-06-03 16:13:06 UTC
  - 11e39e7203 Merge pull request #33712 from meaksh/fix-for-groupadd-module-failures-in-SLE11-2015.8
  - ab738416ba pylint fix
  - bf27e5d36e test_members cleanup
  - ba815dbf76 improvements on groupadd unit tests
  - 3bbc5ae0d9 one line is better
  - a53dc192c9 fix groupadd module for sles11 systems

- **PR #33718**: (rallytime) Back-port #33700 to 2015.8 @ 2016-06-03 16:10:44 UTC
  - **PR #33700**: (sacren) Fix incorrect args passed to timezone.set_hvclock (refs: #33718)
  - 2c450a7949 Merge pull request #33700 from rallytime/bp-33700
  - a6a44621a Fix speed issue
  - a41146730a Fix incorrect args passed to timezone.set_hvclock

- **ISSUE #33725**: (terminalmage) git_pillar w/pygit2 fails to checkout a non-master branch when remote repo has no master branch (refs: #33727)

- **PR #33727**: (terminalmage) Fix git_pillar edge case for remote repos without a master branch @ 2016-06-03 16:03:59 UTC
• PR #33728: (jfindlay) Make configurable_test_state configurable in test mode @ 2016-06-03 16:02:57 UTC
  – 015e50e8c8 Merge pull request #33728 from jfindlay/test_state_test
  – 87e018af2a states.test.configurable_test_state: add unit tests
  – c2d0679c4b states.test.configurable_test_state: refactor change_data
  – f06ff1af1f states.test.configurable_test_state test mode

• PR #33729: (twangboy) Add exclude option to win_servermanager @ 2016-06-03 15:53:13 UTC
  – 1cf8fe3f1d Merge pull request #33729 from twangboy/fix_win_servermanager
  – 2de91d166f Fix docstring
  – 9870479d99 Add exclude option to state
  – 50bd76e206 Add exclude option

• ISSUE #31816: (vutny) Deprecate or update the [http://debian.saltstack.com/](http://debian.saltstack.com/) (refs: #33743)

• PR #33743: (vutny) Debian installation docs: drop section about community-maintained repo @ 2016-06-03 15:29:45 UTC
  – 6c150d840d Merge pull request #33743 from vutny/drop-debian-community-repo-doc
  – 8621f5be54 Debian installation docs: drop section about community-maintained repository

• ISSUE #33554: (jfindlay) local cache missing directories while running test suite (refs: #33653)
  – PR #33653: (cachedout) Create missing jid dir if it doesn’t exist (refs: #33719)

• PR #33654: (twangboy) Fix win servermanager @ 2016-06-02 17:55:45 UTC
  – 8a566ff4b9 Merge pull request #33654 from twangboy/fix_win_servermanager
  – 6c7b21676a Fix lint and tests
  – 4775e6bd0 Add additional params to state
  – b0a3f3234d Add additional params to install and remove

• ISSUE #33424: (thuoy) Error logging with non-environment branches in gitfs (refs: #33679)

• PR #33679: (terminalmage) Only compile the template contents if they evaluate to True @ 2016-06-02 17:20:00 UTC
  – 996ff56dd4 Merge pull request #33679 from terminalmage/issue33424
  – 9da40c4437 Append empty dictionaries for saltenvs with no top file
  – 5eb1b3ca62 Only compile the template contents if they evaluate to True

• PR #33685: (jfindlay) modules.cp.get_url: add test for https:// @ 2016-06-01 22:25:41 UTC
  – c8dc70b96a Merge pull request #33685 from jfindlay/get_url_test
  – 2b5035fd60 modules.cp.get_url: add test for https://

• PR #33581: (dincamihai) Call zypper refresh after adding/modifying a repository @ 2016-06-01 22:25:11 UTC
  – 5e022ff29c Merge pull request #33581 from dincamihai/2015.8
  – 788730ea72 DRY test
  – 1d3769ecfa Improve zypper_patchet_config looks
– 42d8d4195c Assert only gpgautoimport: True works
– ced75e8e62 Reverse if conditions and rename variable
– 80bfe5c52 Reduce dicts and lists to one line where possible
– 1d5d6d7d60 Update test method names to pass pylint
– c7ae5907ee Call zypper refresh after adding/modifying a repository

- **ISSUE #32916**: (giannello) file.managed memory usage with s3 sources (refs: #33599)
- **PR #33681**: (rallytime) Back-port #33599 to 2015.8 (refs: #34208) @ 2016-06-01 21:14:29 UTC
  - PR #33599: (lomeroe) Fix s3 large file download (refs: #33681)
  - 069ee15b7c Merge pull request #33681 from rallytime/bp-33599
  - 4514a599b use requests streaming for uploads/downloads to file (return_bin unchanged) allows downloading files larger than amount of memory (non-stream reads into memory before writing to disk or uploading)
  - 4a9b23f03f first go at having requests use streaming for get/put requests

- **ISSUE #33393**: (babilen) pip.installed does not work with ancient pip versions (refs: #33396)
- **PR #33396**: (babilen) Issue 33393 @ 2016-06-01 21:12:03 UTC
  - 13537c4891 Merge pull request #33396 from babilen/issue-33393
  - 57e0475cd4 Make pip InstallationError import more robust
  - 291a3e21fa Remove duplicated code.

- **PR #33652**: (terminalmage) Lower the log level for failed auths @ 2016-06-01 16:37:09 UTC
  - 7bce4ece1a Merge pull request #33652 from terminalmage/zh723
  - 411841603a Lower the log level for failed auths

- **ISSUE #33582**: (waxie) mysql module gives traceback if no working authentication (refs: #33615)
- **PR #33615**: (danslimmon) Fix crash on unconnectable MySQL server (resolves #33582) @ 2016-05-31 16:03:51 UTC
  - 504989388a Merge pull request #33615 from danslimmon/mysql-traceback-33582
  - 180099ae9f Wrote test for broken server connection
  - c6c3ff02e3 Added some error checking to resolve #33582.

- **PR #33558**: (twangboy) Fix win servermanager @ 2016-05-27 22:05:43 UTC
  - b47182e47c Merge pull request #33558 from twangboy/fix_win_servermanager
  - 62a6bde0ea Fix comment when already installed
  - 79bc7195dc Fix unit tests
  - 56a6f6bb83 Fix changes
  - 8ebe99ec5e Fix restart_needed
  - 6e478cbda0 Add restart needed
  - 72ebf26616 Add missing import
  - 193583be96 Use dictionary compare for changes in remove
  - 1ae7dd76c1 Use dictionary compare for changes

28.2. Previous Releases 5229
• ISSUE #33544: (tjuup) Salt 2016.3.0 (Boron) clean_old_jobs fails (refs: #33555)

• PR #33555: (cachedout) Fix crashing Maintenance process @ 2016-05-26 19:25:39 UTC
  – 58d89d66e3 Merge pull request #33555 from cachedout/issue_33544
  – fe7ee7a470 Fix crashing Maintenance process

• PR #33501: (meaksh) unit tests for rpm.checksum() and zypper.download() @ 2016-05-26 14:34:27 UTC
  – d052908729 Merge pull request #33501 from meaksh/zypper-download-check-signature-2015.8
  – eeaef25c79 lint issue fixed
  – 6b6febb211 unit tests for rpm.checksum() and zypper.download()

• ISSUE #33319: (ghost) Salt interprets jinja syntax in contents pillar (refs: #33513)

• PR #33513: (rallytime) Add a section to the jinja docs about escaping jinja @ 2016-05-26 14:24:58 UTC
  – e2d0c4abb1 Merge pull request #33513 from rallytime/fix-33319
  – 81c1471209 Add a section to the jinja docs about escaping jinja

• PR #33520: (jacobhammons) Updated version numbers in the docs for the 2016.3.0 release @ 2016-05-26 14:15:00 UTC
  – fabc15e616 Merge pull request #33520 from jacobhammons/release-notes.8
  – 42e358af7d Updated version numbers in the docs for the 2016.3.0 release

• PR #33507: (rallytime) [2015.8] Merge forward from 2015.5 to 2015.8 @ 2016-05-25 19:14:41 UTC
  – 5a6b037cbd Merge pull request #33507 from rallytime/merge-2015.8
  – 03b0c97520 Merge branch '2015.5' into '2015.8'
  – 6f7fda0354 Merge pull request #33486 from jtan/d/2015.5
    * d1e210ff8 Merge branch '2015.5' of https://github.com/saltstack/salt into 2015.5
    * ee2ae0ea8a Added docstring examples to glance.image_schema and schema_get
    * 59e90064e6 modules.swift.head does not have a body. Should not be checked for a docstring right now.
  – f72ec1479b Merge pull request #33482 from rallytime/pillar-opt-docs
    * 087564528d Add pillar_opt docs to master.rst
  – dc644b145d Merge pull request #33488 from rallytime/fix-18752
    * ba9f4181f Add docs for the syndic_finger config
  – a4e84aa7d2 Merge pull request #33454 from scubahub/2015.5
    * df3c0b8e78 Correct (and make consistent) determination of the test flag.
  – 3a52ace673 manage account information for pam (#33473)

• ISSUE #15252: (gravyboat) Standalone minion docs don’t explain what file is being modified. (refs: #33503)

• PR #33503: (rallytime) Add docs about minion config file in standalone minion docs @ 2016-05-25 17:23:08 UTC
  – ee76b3eb06 Merge pull request #33503 from rallytime/fix-15252
  – cfc07f7641 Add docs about minion config file in standalone minion docs

• PR #33474: (cachedout) Fix diskusage beacon (refs: #34103) @ 2016-05-25 17:10:54 UTC
  – e96648e461 Merge pull request #33474 from cachedout/issue_29451
Salt Documentation, Release 3002.2

- a2bac3a0d Remove debugging
- 68d8050cb8 Fix diskusage beacon

- **PR #33465**: (meaksh) jobs.exit_success allow to check if a job has executed and exit successfully @ 2016-05-25 16:52:53 UTC
  - 3fb6bf719 Merge pull request #33465 from meaksh/check-if-job-returns-successfully-2015.8
  - 9deb70fd8e jobs.exit_success() now works parsing the results of jobs.lookup_id()
  - 7ba40c4f31 jobs.exit_success allow to check if a job has executed and exit successfully
- **PR #33487**: (justinta) Add docstring examples to glance.py and nova.py [2015.8] @ 2016-05-25 16:47:25 UTC
  - 70eb7b66f3 Merge pull request #33487 from jand/glance_doc_fixes
  - 0b1caeo05d9 Added docstring examples to glance methods and nova.list
  - ebf1256545 Don't need to check swift.head due to it having no body

- **ISSUE #33423**: (warden) etcd profile doesn't work when used in master conf file (refs: #33481)
- **PR #33481**: (rallytime) Fix docs about etcd config options and add pillar_opts doc (refs: #33482) @ 2016-05-25 16:41:56 UTC
  - 56ea979916 Merge pull request #33481 from rallytime/fix-33423
  - 7fd3e8f361 Fix docs about etcd config options and add pillar_opts doc

- **ISSUE #16319**: (lsh-0) create a postgresql query function (refs: #33490)
- **PR #33490**: (rallytime) Document the postgres.psql_query function @ 2016-05-25 16:41:22 UTC
  - 2394cd4bf Merge pull request #33490 from rallytime/fix-16319
  - 0c55489d1 Document the postgres.psql_query function
- **PR #33480**: (jfindlay) states.service: minor doc updates @ 2016-05-25 16:38:14 UTC
  - ede232f0f1 Merge pull request #33480 from jfindlay/service_doc
  - 29c00a1b1b states.service: clarify function description language
  - 6a9ae09e79 states.service.__virtual__: add load fail reason
- **PR #33483**: (twangboy) Return full pending computer name (2015.8)

- **ISSUE #32444**: (justindesilets) Feature Request - jobs runner list by target (refs: #33491)
  - **PR #33499**: (cachedout) Use six.string_types in jobs runner
  - **PR #33491**: (BlaineAtAffirm) fix jobs.list_jobs failing with search_target (refs: #33499)
- **ISSUE #32444**: (justindesilets) Feature Request - jobs runner list by target (refs: #33491)
- **PR #33491**: (BlaineAtAffirm) fix jobs.list_jobs failing with search_target (refs: #33499) @ 2016-05-25 15:11:22 UTC
  - 2e24a04565 Merge pull request #33491 from BlaineAtAffirm/2015.8
  - 7599b18995 fix jobs.list_jobs failing with search_target

- **ISSUE #33467**: (beelit94) Orchestration gives exception when a target does not exist (refs: #33478)
- **ISSUE #32479**: (ssgward) Orchestration gives exception when a target does not exist (refs: #32484, #33478)
- **PR #33478**: (rallytime) Back-port #32484 to 2015.8 @ 2016-05-24 19:14:23 UTC
- PR #32484: (cachedout) Only unsub if we have a jid (refs: #33478)
- 1861af427e Merge pull request #33478 from rallytime/bp-32484
- 042f17efa4 Only unsub if we have a jid

- PR #33457: (rallytime) Make doc formatting consistent and use correct version

  added @ 2016-05-24 17:52:34 UTC

  - b8154b678e Merge pull request #33457 from rallytime/doc-formatting
  - 82f8f3eff Make doc formatting consistent and use correct version
  - PR #33477: (terminalmage) Don't allow a "repo" kwarg for pkgrepo.managed

- ISSUE #29451: (githubcdr) 2015.8.3 pillar beacons bugged? (refs: #33476)

  - PR #33476: (cachedout) Allow for config entry to be a list in a dict for beacons

- PR #33469: (meaksh) check the RPM signature of zypper pkg.download packages and report errors @ 2016-05-24 16:09:05 UTC

  - 9f6a4b4c45 Merge pull request #33469 from meaksh/zypper-download-check-signature-2015.8
  - a65071a6d1 simpler rpm.checksum function
  - 80fe303e38 Renamed check_sig to checksum and some refactoring
  - d56e3f4258 bugfix: showing errors when a package download fails using zypper pkg.download
  - 8a21b9149e check the signature of downloaded RPM files

- ISSUE #33389: (DaveQB) Too many hostnames in pillar? (refs: #33459)

  - PR #33459: (rallytime) Add docs about PyYAML's 1024 character limitations for simple keys
  - PR #33464: (isbm) Prevent several minion processes on the same machine
  - PR #33432: (dincamihai) Make --gpg-auto-import-keys a global param when calling zypper

- ISSUE #32446: (sel-fish) " salt '*' saltutil.wheel minions.connected " not work (refs: #33414)

  - PR #33414: (rallytime) Fix the saltutil.wheel function and add integration tests

- ISSUE #29286: (harlanbarnes) Can't disable Job Cache? (refs: #33328)

  - PR #33440: (rallytime) Make sure the path we're removing is present first - avoid an OSError
  - PR #33328: (rallytime) Update job_cache and keep_jobs docs to be more specific to their behavior (refs: #33440)

- ISSUE #26913: (imchairmanm) manage.bootstrap runner quotation escape bug (refs: #33443)

  - PR #33443: (rallytime) Avoid a syntax error by using ' instead of escaped '
  - PR #33436: (rmarcinik) Fix virtual function

- PR #33438: (rallytime) [2015.8] Merge forward from 2015.5 to 2015.8 @ 2016-05-23 17:50:51 UTC

  - 6e94a4a03b Merge pull request #33438 from rallytime/merge-2015.8
  - 7c41c34528 Merge branch '2015.5' into '2015.8'

    * 2cc650965a update 2015.5.11 release notes (#33412)
    * dc8ce2d8b1 Fix traceback in logging for config validation (#33386) (#33405)

- ISSUE #33395: (fimnisme) salt doc error (refs: #33421)

- PR #33398: (lvg01) Fix LVM parameter devices as a pure list. Comma seperated lists are c...
- PR #33406: (rallytime) Back-port #33387 to 2015.8
- PR #33387: (tveastman) Spelling correction. (refs: #33406)

- ISSUE #33298: (loренgordon) Windows: pkg.install returns failed for msiexec/instmsi exit code 3010 (ERROR_SUCCESS_REBOOT_REQUIRED) (refs: #33321)
- PR #33321: (loренgordon) Update windows pkg.[install|remove] error logic

- ISSUE #29252: (mitar) reload_modules is not documented for the pkg state (refs: #33374)
- PR #33374: (rallytime) Add note about reload_modules functionality for pkg.installed

- ISSUE #31430: (The-Loeki) Salt Coding Style regarding absolute_imports (refs: #33377)
- PR #33377: (rallytime) Add note to absolute_imports practice about __future__ import

- ISSUE #21720: (kaithar) Revisiting aliases.file option. (refs: #33380)
- PR #33380: (rallytime) Document how to set the alias file location for alias state

- PR #33403: (jacobhammons) 2015.8.10 release notes @ 2016-05-20 16:02:50 UTC
- 3c9def310c Merge pull request #33403 from jacobhammons/dot10
- e850c298a9 2015.8.10 release notes

- PR #33381: (rallytime) [2015.8] Merge forward from 2015.5 to 2015.8 @ 2016-05-20 15:58:11 UTC
- 91059224f6 Merge pull request #33381 from rallytime/merge-2015.8
- 5ae32b20f Merge branch '2015.5' into '2015.8'
  * d15f5e2cecf Merge pull request #33383 from thatch45/2015.5
    * 5ebcba21c restore whitespace
    * 1d8b289db1 blast, put the try/except int he right place
    * 081e6c5b83 maintain the fallback because I am totally sick of this crap
  * 755acfb97e Improve doc clarity for disable_modules documentation (#33379)
- 8ef769780e Merge branch '2015.5' into '2015.8'
  * 2b5ad128bf Better YAML syntax error handling (#33375)
  * bb3e98cad2 Merge pull request #33372 from jacobhammons/release-update
    * 5ce502160b revved 2015.8 branch to .9 in version selector
- PR #33386: (terminalmage) Fix traceback in logging for config validation (refs: #33405)

- ISSUE #27737: (mpaolini) name param never mentioned in pillar_ext git documentation (refs: #33369)
- PR #33369: (rallytime) Add note about name parameter in git_pillar docs

- ISSUE #32913: (hrumph) Possible problem with salt.states.pkg.installed documentation (refs: #33362)
- PR #33362: (rallytime) Add win_pkg to list of modules that support "version" in pkg.installed

- ISSUE #27779: (jbourne) [Doc] Hipchat returner documentation update (refs: #33365)
- PR #33365: (rallytime) Add note to docs about api settings for Hipchat API v2
- PR saltstack/salt-bootstrap#828: (vutny) Fix bootstrapping from git on Debian 8 by installing latest tornado via pip (refs: #32857)

28.2. Previous Releases
- PR #820: (dcolish) Refactor of cli parsers, normalize around conf_file (refs: #saltstack/salt-bootstrap#828)
- PR #32857: (vutny) Add initscripts, SystemD service units and environment files for Debian

**PR #33370: (jacobhammons) Update docs version to 2015.8.9 @ 2016-05-19 19:59:15 UTC**
- 8052a658e Merge pull request #33370 from jacobhammons/2015.8.9
- 146b4df0be Updates docs version to 2015.8.9 Adds note regarding the os grain on Mint Linux Adds an FAQ regarding grains that change due to upstream changes

**PR #33366: (rallytime) [2015.8] Merge forward from 2015.5 to 2015.8 @ 2016-05-19 19:41:40 UTC**
- 3e5689abf Merge pull request #33366 from rallytime/merge-2015.8
- 52b3128678 Merge branch '2015.5' into '2015.8'
- 55be0abf4d Expanded documentation for boto_elb state and module (#33341)

**ISSUE #33313: (morganwillcock) pkg.py: pkgs parameter documented as not supported on Windows (refs: #33361)**

**ISSUE #33313: (mou) If no fileserver backend initialized there should be warning or error message on performing various file operations (refs: #33361)**
- PR #33361: (rallytime) Remove mentions of windows not supporting pkgs param

**ISSUE #29286: (harlanbarnes) Can't disable Job Cache? (refs: #33328)**
- PR #33328: (rallytime) Update job_cache and keep_jobs docs to be more specific to their behavior (refs: #33440)

**ISSUE #33295: (andrew-vant) Linux Mint service module not correctly detected. (refs: #33359)**
- PR #33359: (terminalmage) Properly detect newer Linux Mint distros

**ISSUE #32260: (jagguli) git.latest UnboundLocalError: local variable 'desired_upstream' referenced before assignment (refs: #33340)**
- PR #33340: (terminalmage) Fix UnboundLocalError in git.latest
- PR #33339: (phistrom) states.boto_elb Describe parameters in register_instances function
- PR #33347: (rallytime) Fix some link errors in the test writing tutorial
- PR #33312: (twangboy) Fix network.managed for windows
- PR #33327: (cro) Bp 28467 calm mine
- PR #28467: (jodv) Make mine.update more manageable for large environments (refs: #33327)
- PR #33334: (jfindlay) import ps from psutil_compat in beacons

**ISSUE #21520: (jfindlay) sudo.salt_call is broken (refs: #25089)**
- PR #33318: (jfindlay) remove redundant, incorrect sudo_runas config documentation
- PR #25089: (jfindlay) fix minion sudo (refs: #33318)
- PR #22480: (thatch45) Add sudo user docs into salt (refs: #33318)
- PR #20226: (thatch45) Allow sudo priv escalation (refs: #25089, #33318)

**ISSUE #33323: (terminalmage) Overeager globbing in systemd.py for sysv service detection (refs: #33324)**
- PR #33324: (terminalmage) Disambiguate non-exact matches when checking if sysv service is enabled

**ISSUE #30130: (dreampuf) Non-root minion not work with state.sls module (refs: #33325)**
- PR #33325: (cachedout) Allow concurrency mode in state runs if using sudo

- ISSUE #29674: (jakehilton) Salt Master Hang (refs: #33333)
  - PR #33333: (DmitryKuzmenko) Fix master hanging after a request from minion with removed key.

- ISSUE #33266: (Timandes) Method grains.items returns unexpected manufacturer information (refs: #33302)
  - PR #33306: (rallytime) Back-port #33302 to 2015.8
  - PR #33302: (The-Loeki) Cleanup comments in smbios.get output (fixes #33266) (refs: #33306)

- ISSUE #23643: (falzm) Error in iptables module: argument --match-set: expected 2 argument(s) (refs: #33314, #33301, #28325)
  - PR #33314: (gerhardqux) Fix iptables --match-set (#23643)
  - PR #33301: (gerhardqux) Fix iptables --match-set (#23643) (refs: #33314)
  - PR #28325: (l13t) Fix issue with --match-set option. #23643 (refs: #33314)

- PR #33308: (rallytime) [2015.8] Merge forward from 2015.5 to 2015.8 @ 2016-05-17 19:26:05 UTC
  - d0ed1616b0 Merge pull request #33308 from rallytime/merge-2015.8
  - 1c43a62f85 Merge branch '2015.5' into '2015.8'
    * 9b42a05519 Added some more docs for master and minion config settings (#33292)
  - 5004d2fa61 Merge branch '2015.5' into '2015.8'
  - 8acee5e06c Fix iptables --match-set (#23643) (#33301)
  - 757ef20a31 fix "loose" typo (#33290)
  - b7d98d64d Add auth_tries config option to minion.rst docs (#33287)
  - 061851bcbf Document minion_id_caching config value (#33282)

### 28.2.66 Salt 2015.8.12 Release Notes

Version 2015.8.12 is a bugfix release for 2015.8.0.

#### Statistics

- Total Merges: 58
- Total Issue References: 43
- Total PR References: 117
- Contributors: 29 (Azidburn, Ch3LL, UtahDave, bobrik, cachedout, cedwards, deepakhj, dere, gongled, gtmnafred, hrunph, hu-dabao, isbm, jacobhammons, jfindlay, jmesquita, junovitch, justinta, kev009, martinhoefling, multani, rallytime, randomed, sjorge, terminalmage, thatch45, theothergraham, twangboy, whiteinge)
Changelog for v2015.8.11..v2015.8.12

Generated at: 2018-05-28 01:19:12 UTC

- PR #35614: (rallytime) Update release notes for 2015.8.12
- PR #35611: (rallytime) Everything in the sample master config file should be commented out
- ISSUE #35384: (ghost) The unless requisite stops at first successful command (refs: #35569)
  - PR saltstack/salt#35545: (hu-dabao) fix-35384, fix cmd.run unless (refs: #35566)
- PR #35569: (rallytime) Write test for multiple unless commands where 1st cmd passes and 2nd fails @ 2016-08-19 19:28:01 UTC
  - PR #35566: (rallytime) Back-port #35545 to 2015.8 (refs: #35569)
  - PR #35545: (hu-dabao) fix-35384, fix cmd.run unless (refs: #35569, #35566)
  - c9070c212f Merge pull request #35569 from rallytime/test-for-35384
  - 30f42d5352 Write test for multiple unless commands where 1st cmd passes and 2nd fails
- PR #35600: (rallytime) Update release notes for 2015.8.12
- PR #35599: (rallytime) Update release notes for 2015.8.12
- PR #35584: (terminalmage) Update linux_sysctl tests to reflect new context key
- PR #35575: (terminalmage) Add warning about AWS flagging of nmap usage
- PR #35577: (terminalmage) Unit file changes for 2015.8.12, 2016.3.3 @ 2016-08-18 20:36:25 UTC
  - 26a7f7d9f7 Merge pull request #35577 from terminalmage/unit-file-changes
  - 6cb0b4f73 pkg/salt-syndic.service: change Type to notify
  - 175ba99e0e pkg/salt-minion.service: remove KillMode, change Type to notify
  - 540ec28954 pkg/salt-master.service: remove KillMode
  - 69fad464ab pkg/salt-api.service: change Type to notify
  - PR saltstack/salt#35545: (hu-dabao) fix-35384, fix cmd.run unless (refs: #35566)
  - PR #35566: (rallytime) Back-port #35545 to 2015.8 (refs: #35569)
  - PR #35545: (hu-dabao) fix-35384, fix cmd.run unless (refs: #35569, #35566)
- PR #35492: (terminalmage) Clarify config.get docstring
- ISSUE saltstack/salt#18419: (jasonrm) salt-cloud fails to run as non-root user (refs: #35483)
- ISSUE #34806: (jerrykan) salt-cloud ignores sock_dir when firing event (refs: #35483)
- PR #35483: (gtmanfred) use __utils__ in salt.cloud @ 2016-08-18 13:32:22 UTC
  - 205d8e2e7b Merge pull request #35483 from gtmanfred/2015.8
  - 2d8ec1e9db use __opts__ in salt.utils.cloud for cache functions
- PR #35546: (whiteinge) Salt api eauth fail gracefully @ 2016-08-18 07:21:55 UTC
  - 70fa2d0901 Merge pull request #35546 from whiteinge/salt-api-eauth-fail-gracefully
  - eb3574adae Don't fail hard if the user's permissions cannot be found
  - ec597bd54c Change groups check in token to look for truthy values
  - PR #35525: (UtahDave) add missing glob import
- **PR #35540**: (rallytime) Whitespace fix for 2015.8

- **ISSUE #33803**: (dmurphy18) systemd notification is not fully supported by Salt (refs: #35510)

- **ISSUE #33516**: (Ch3LL) When upgrading from 2015.8.10 to 2016.3.0 on centos7/redhat7 I have to restart the salt-minion twice (refs: #35510)

- **PR #35510**: (terminalmage) Better systemd integration @ 2016-08-17 18:54:11 UTC
  - fd3274c800 Merge pull request #35510 from terminalmage/issue33516
  - 5b5f19d269 Update zypper unit test to reflect call to config.get
  - 2730eb5116 Add note about systemd-run usage in package states
  - e2d9e87e10 salt/modules/systemd.py: Use systemd-run --scope where needed
  - 22919a25bc Notify systemd on salt-api start
  - a40b3fa08 Notify systemd on syndic start
  - e847d3af30 Notify systemd on minion start
  - d64888af3c salt/modules/zypper.py: Use systemd-run --scope where needed
  - 2e17976722 salt/modules/yumpkg.py: Use systemd-run --scope where needed
  - 86b59c1e74 salt/modules/pacman.py: Use systemd-run --scope where needed
  - e3292b6d5 salt/modules/ebuild.py: Use systemd-run --scope where needed
  - c7d213a3e3 salt/modules/aptpkg.py: Use systemd-run --scope where needed
  - f83e6ef242 Add unit tests for salt.utils.systemd
  - 5b12f030c6 Add func to salt.utils.systemd to tell if scopes are available

- **PR #35513**: (cachedout) Might be a good idea to be able to download the software we make

- **PR #35302**: (Ch3LL) Add job cache test @ 2016-08-17 10:45:28 UTC
  - 9f87081ce8 Merge pull request #35302 from Ch3LL/add_job_cache_test
  - ccb2a5cadf remove unused imports
  - 512ae811d remove TMP and add integration.TMP
  - c9b7c3cf80 need to add returners option in other places
  - 7316d7a02 fix pylint
  - 50a4f0fe6a fix comment
  - 6837acf742 add job cache integration tests

- **PR #35512**: (cachedout) Fixup 35419 @ 2016-08-17 10:11:17 UTC
  - 1c82c6be3 Merge pull request #35512 from cachedout/fixup_35419
  - 253662541a Fix import
  - f16a037b66b Fixes consul.agent_service_register which was broken for registering service checks.

- **PR #35497**: (deepakhj) Fixes spacing in requirements files @ 2016-08-17 09:34:15 UTC
  - e1a373fa4c Merge pull request #35497 from deepakhj/2015.8
  - 685db4ab88 Fix spacing

- **PR #35508**: (terminalmage) Add Carbon to versionadded for git.diff @ 2016-08-17 06:17:12 UTC
• 4048255ed6 Merge pull request #35508 from terminalmage/update-docstring
• 67c945fceb Add Carbon to versionadded for git.diff
• PR #35486: (rallytime) Update bootstrap script to latest stable (2016.08.16)

• ISSUE #35296: (szjur) cp.push_dir gets confused when using upload_path and is probably insecure too (refs: #35413)

• PR #35413: (cachedout) Resolve path issues with cp.push @ 2016-08-16 16:40:39 UTC
  - 240fc12863 Merge pull request #35413 from cachedout/issue_35296
  - fb8a12d677 Fix silly error
  - 3646cf1afa Additional checks on master and integration test
  - 09efde7634 Splat the list into os.path.join
  - fc0d5878bc Set file_recv on test master
  - 81c4d136c5 Transition file push paths to lists

• ISSUE saltstack/salt#35380: (anlutro) salt-ssh with sudo stopped working (refs: #35476)

• PR #35476: (cachedout) Fixup SSH bug where sudo without sudo user would break @ 2016-08-16 15:41:25 UTC
  - c3319b2a8b Merge pull request #35476 from cachedout/issue_35380
  - c05cf33d1 Fixup SSH bug where sudo without sudo user would break

• PR #35471: (terminalmage) win_pkg: Fix traceback when package is not installed @ 2016-08-16 02:02:00 UTC
  - 004778e966 Merge pull request #35471 from terminalmage/issue34479
  - e24363e43 win_pkg: Fix traceback when package is not installed

• PR #35448: (isbm) Add ignore_repo_failure option to suppress zypper's exit code 106 on … @ 2016-08-16 01:39:43 UTC
  - 5e9428e32d Merge pull request #35448 from isbm/isbm-zypper-106-fix
  - dd826a848 Add ignore_repo_failure option to suppress zypper's exit code 106 on unavailable repos

• PR #35451: (isbm) Bugfix: zypper mod repo unchanged @ 2016-08-16 01:38:25 UTC
  - 1473474b04 Merge pull request #35451 from isbm/isbm-zypper-mod_repo-unchanged
  - 8790197d86 Fix Unit test for suppressing the exception removal on non-modified repos
  - 3f00c697a Remove zypper’s raise exception if mod_repo has no arguments and/or no changes

• ISSUE saltstack/salt#34279: (vmadura) Salt 2016.3.1 - Master Side Pillar Cache (backend: Disk) never Expires. (refs: #35453)

• ISSUE #34279: (vmadura) Salt 2016.3.1 - Master Side Pillar Cache (backend: Disk) never Expires. (refs: #35453)

• PR #35453: (theothergraham) fixes #34279 - disk cache ttl expiry @ 2016-08-16 01:34:33 UTC
  - a8c4f17f50 Merge pull request #35453 from theothergraham/fix_CacheDisk
  - ae5b233d51 fixes #34279

• PR #35459: (thatch45) Ensure that output for salt-ssh gets back @ 2016-08-16 01:29:16 UTC
  - d8c35b5260 Merge pull request #35459 from thatch45/shim_fix
  - 10037b00cb Some environments refuse to return the command output
  - PR #35460: (rallytime) [2015.8] Update bootstrap script to latest stable (2016.08.15)
- **ISSUE** saltstack/salt#35010: (vchav73) cp.push_dir returns incorrect result for non-existent directories (refs: #35442)
  - PR #35442: (cachedout) Fix cp.push_dir pushing empty dirs

- **ISSUE** saltstack/salt#35387: (mzealey) Document reload_grains and reload_pillar (refs: #35436)
  - PR #35436: (cachedout) Minor doc fixup

- **ISSUE** saltstack/salt#35121: (sjorg) file.append always returns in change (refs: #35132)

- **PR** #35132: (sjorg) fixes , causing lots of mayhem (onchange) with 2016.3.2 for me @ 2016-08-15 07:11:22 UTC
  - a0b128a85a Merge pull request #35132 from sjorge/2015.8-35121
  - 5cb38c8ae0 switch to fpread().splitlines(), as per @lorenegordon suggestion
  - 634f1ddd5 fixes #35121, causing lots of mayhem (onchange) with 2016.3.2 for me
  - PR saltstack/salt#34573: (cedwards) Update freebsd rst (refs: #35394)
  - PR #35394: (rallytime) Back-port #34573 to 2015.8
  - PR #34573: (cedwards) Update freebsd.rst (refs: #35394)
  - PR #35359: (terminalmage) Clean up open filehandles

- **PR** #35339: (isbm) Bugfix: Prevent continuous restart, if a dependency wasn’t installed @ 2016-08-11 16:15:17 UTC
  - 9ea7a34c30 Merge pull request #35339 from isbm/isbm-2015.8-minion-importerror-fix
  - 12a60b7be Fix continuous minion restart if a dependency wasn’t installed

- **PR** #35357: (twangboy) Fix file.recurse with clean: True on Windows (2015.8) @ 2016-08-11 00:44:14 UTC
  - fd9b05ace4 Merge pull request #35357 from twangboy/file.recurse.clean.2015.8
  - d328e0157 Fix file.recurse with clean: True

- **PR** #35323: (thatch45) Fix issue with bad error check in salt-vt @ 2016-08-10 11:33:49 UTC
  - 4618b433e9 Merge pull request #35323 from thatch45/ssh_crazy
  - 8a5b47b5d7 Collect all error data from the wfuncs call
  - 11864c31b7 supress a stack trace to show clean ssh error
  - 9f8fa282fa wow this solves an issue!

- **PR** #35325: (kev009) Fix freebsd netstat route on fbsd 10+ @ 2016-08-10 11:33:12 UTC
  - cfae862972 Merge pull request #35325 from kev009/fbsd-netstat-route
  - 0d49dd3c29 Fix fbsd netstat route on fbsd 10+

- **ISSUE** #35264: (bobrik) ssh_known_hosts.present is not idempotent in test=true with port (refs: #35301)
  - PR #35301: (bobrik) Pass port to ssh.check_known_host, closes #35264

- **ISSUE** #34945: (babilen) file.recurse breaks directory permissions (refs: #35309)
  - PR #35309: (terminalmage) file.recurse: Do not convert octal mode string to int

- **ISSUE** #35051: (terminalmage) Runner/Wheel funcs still print return data to console when invoked from orchestration (refs: #35290)
  - PR #35290: (terminalmage) Resolve a couple bugs in orchestration output @ 2016-08-09 15:27:00 UTC
    - 2efc1b333b Merge pull request #35290 from terminalmage/issue35051
- d621aa7b61 Update runner/wheel unit tests to reflect new key in ret dict
- 90c12a9c7b Add __orchestration__ key to orch returns for runner/wheel funcs
- 7b8c3b86e7 Suppress error about invalid changes data for orchestration jobs
- 54a1704d6c Suppress event for wheel/runner funcs executed from orchestration
- f409f62bf2 Accept print_event option in WheelClient.cmd()
- b42b25ccce Add cmd func for RunnerClient
- 480065fe00 Add print_event option to client mixins

• ISSUE #31074: (turtletraction) salt-ssh sudo_user execution not running as sudo_user (refs: #35211)

• PR #35211: (cachedout) Alternative sudo users for salt-ssh @ 2016-08-08 15:40:55 UTC
  - f8158124d5 Merge pull request #35211 from cachedout/issue_31074
  - 6f53232e6d Better error handling and a workaround for group mismatch.

- **PR #35241:** (terminalmage) Ensure max recursion in gitfs results in no blob object being returned. @ 2016-08-06 07:53:49 UTC
  - 4bcaf97d0 Merge pull request #35241 from terminalmage/gitfs-fixes
  - e05648c2d Break from loop when file is found
  - 676488601 Ensure that failed recursion results in no blob object being returned
  - PR saltstack/salt#35039: (whiteinge) Add saltenv support to module.run (refs: #35245)

- **PR #35245:** (rallytime) Back-port #35039 to 2015.8 @ 2016-08-06 07:52:44 UTC
  - PR #35039: (whiteinge) Add saltenv support to module.run (refs: #35245)
  - f6d736e0b Merge pull request #35245 from rallytime/bp-35039
  - 51ab9c6d4 Add saltenv support to module.run

- **ISSUE #35214:** (tdenny) git.latest fails on non-fast-forward when a fast-forward is possible (refs: #35249)

- **PR #35249:** (terminalmage) Fix regression in git.latest @ 2016-08-06 07:52:15 UTC
  - d65a5c7134 Merge pull request #35249 from terminalmage/issue35214
  - bcd5129e9f Fix regression in git.latest when update is fast-forward
  - e2e8bb6fe Add integration test for #35214

- **ISSUE saltstack/salt#34691:** (dmacvicar) beacons.list does not include beacons configured from the pillar/ext_pillar (refs: #saltstack/salt#34827, #34827)
  - PR saltstack/salt#35146: (cachedout) Don’t discard running beacons config when listing beacons (refs: #35174)
  - PR saltstack/salt#34827: (thatch45) fix beacon list to include all beacons being processed (refs: #35146, # saltstack/salt#35146)
  - PR #35174: (rallytime) Back-port #35146 to 2015.8
  - PR #35146: (cachedout) Don’t discard running beacons config when listing beacons (refs: #35174)
  - PR saltstack/salt#35135: (rallytime) Add missing CLI Examples to aws_sqs module funcs (refs: #35173)
  - PR #35173: (rallytime) Back-port #35135 to 2015.8
  - PR #35135: (rallytime) Add missing CLI Examples to aws_sqs module funcs (refs: #35173)
  - PR #35145: (jacobhammons) doc version update to 2015.8.11, updates to release notes

- **PR #35114:** (terminalmage) Add clarification docs on a common git_pillar misconfiguration @ 2016-08-02 00:30:48 UTC
  - 81845ec31d Merge pull request #35114 from terminalmage/git_pillar-env-remap-docs
  - 5951554e9f Add clarification docs on a common git_pillar misconfiguration

- **ISSUE saltstack/salt#34767:** (hrumph) Ensure that pkg.installed function refreshes properly with windows. (refs: #34768)

- **ISSUE #34767:** (hrumph) Ensure that pkg.installed function refreshes properly with windows. (refs: #34768)

- **PR #34768:** (hrumph) Fixes #34767 @ 2016-08-01 21:46:16 UTC
  - 88a9fb1b31 Merge pull request #34768 from hrumph/bad-installed-state
– e1fcb8311d Put pkg.latest_version in try/except structure Move refreshed or refresh to different spot
   (just for code tidyness)
– e0b6261659 changed name of variable 'refreshed' to 'was_refreshed'
– 340110b4b4 Move check for rtag to outermost-nesting in function
– ac67c6b493 Lint fix
– 0435a1375e Get rid of repetition in code by using new "refreshed" variable instead
– 3b1dc978e2 Lint fix
– a9bd1b92b9 lint fixes
– 71d69343ef Fixes #34767

• PR #35043: (rallytime) Start release notes file for 2015.8.12 @ 2016-08-01 17:22:04 UTC
  – 343576408f Merge pull request #35043 from rallytime/new-release-notes
  – bdcc81a384 Start release notes file for 2015.8.12

• PR #35050: (terminalmage) [orchestration] Properly handle runner/wheel funcs which accept a 'saltdev' argument
   @ 2016-08-01 15:48:08 UTC
  – 848bf0272f Merge pull request #35050 from terminalmage/fixed-saltdev-arg
  – 40ca7cf17 Avoid needlessly running 2 argspecs in salt.utils.format_call()
  – fd186b7e4c Pass environment as 'saltdev' if runner/wheel func accepts a saltdev argument
  – 951b52ab93 Pass __env__ from saltmod orch states to to saltutil.[runner,wheel]

• PR #35066: (jfindlay) returners.postgres_local_cache: do not log in __virtual__ @ 2016-07-30 01:32:17 UTC

• PR #34818: (justinta) Skip mysql state test if mysqladmin is not available @ 2016-07-20 16:10:35 UTC
  - 98fa4a404e Merge pull request #34818 from jtdand/mysql_state_integration_test_cleanup
  - 9abb691bb Skip mysql state test if mysqladmin is not available

• ISSUE saltstack/salt#26278: (jiahua-h) "order: first" doesn't work? (refs: #34803)
• ISSUE saltstack/salt#24744: (anlutro) Allow states to define order: first (refs: #34803)
• ISSUE #24744: (anlutro) Allow states to define order: first (refs: #34803)

• PR #34803: (junovitch) salt/state.py: set 'chunk['order'] = 0' with 'order: first'; fixes #24744 @ 2016-07-20 13:56:20 UTC
  - 6636f2b4a9 Merge pull request #34803 from junovitch/issue_24744
  - 64c850410f salt/state.py: set 'chunk['order'] = 0' with 'order: first'; fixes #24744

• PR #34773: (randomed) Bugfix: Startup states on minions are not being written to mysql returner @ 2016-07-19 12:39:53 UTC
  - 58021035a9 Merge pull request #34773 from randomed/mysql-returner-startup/2015.8
  - 0cd55eb7d7 Add jid=req handling for mysql returner. It should also store the return jid into the jid list table.
  - PR #34751: (cachedout) Remove unnedeed config test
  - PR #34606: (isbm) Bugfix: Exit on configuration read (backport) (refs: #34751)

• PR #34754: (cachedout) Disable test @ 2016-07-18 18:40:50 UTC
  - f19caac8e4 Merge pull request #34754 from cachedout/disable_mid_test
  - 4690c6e65 Disable test

• ISSUE saltstack/salt#34678: (martinhoefling) config.get module is broken due to bug in dictupdate.py (refs: #34726, #saltstack/salt#34726)`_`_, #34741)
  - PR saltstack/salt#34726: (martinhoefling) Always loop over updated keys in non recursive update (refs: #34741)

• PR #34741: (rallytime) Back-port #34726 to 2015.8 @ 2016-07-18 18:00:23 UTC
  - PR #34726: (martinhoefling) Always loop over updated keys in non recursive update (refs: #34741)
  - 81f29006f2 Merge pull request #34741 from rallytime/bp-34726
  - d94911093 Loop over updated keys in non recursive update

• ISSUE saltstack/salt#34703: (Cashwini) Is it possible to return output from python execution module to a file on salt master? (refs: #34721)

• PR #34721: (rallytime) Add output_file option to master config docs @ 2016-07-16 20:04:03 UTC
  - e9e5b8e38b Merge pull request #34721 from rallytime/fix-34703
  - 9cb03d05a5 Add output_file option to master config docs

• ISSUE saltstack/salt#32276: (javicacheiro) pkg.installed using sources from master fails with file not found after first succesful run (refs: #34689)
• PR #34689: (Azidburn) fix second run problems with pkg.installed using sources @ 2016-07-15 21:19:39 UTC
  – 08d00f3a61 Merge pull request #34689 from Azidburn/fix_pkg_sources
  – 2c0fc919b3 fix second run problems with pkg.installed using sources

• PR #34695: (isbm) Bugfix: Zypper pkg.list_products returns False on some empty values (2015.8) @ 2016-07-15 21:08:00 UTC
  – 4cb1ded520 Merge pull request #34695 from isbm/isbm-zypper-product-boolean-values
  – 5ed5142fbc Update test data for 'registerrelease' and 'productline' fields
  – 21444ee240 Bugfix: return boolean only for 'isbase' and 'installed' attributes

28.2.67 Salt 2015.8.13 Release Notes

Version 2015.8.13 is a bugfix release for 2015.8.0.

Security Fixes

CVE-2017-5192 local_batch client external authentication not respected

The LocalClient.cmd_batch() method client does not accept external_auth credentials and so access to it from salt-api has been removed for now. This vulnerability allows code execution for already-authenticated users and is only in effect when running salt-api as the root user.

CVE-2017-5200 Salt-api allows arbitrary command execution on a salt-master via Salt's ssh_client

Users of Salt-API and salt-ssh could execute a command on the salt master via a hole when both systems were enabled.

We recommend everyone on the 2015.8 branch upgrade to a patched release as soon as possible.

28.2.68 Salt 2015.8.2 Release Notes

Version 2015.8.2 is a bugfix release for 2015.8.0.

Statistics

• Total Merges: 379
• Total Issue References: 138
• Total PR References: 351
• Contributors: 83 (DmitryKuzmenko, JaseFace, LovelsGrief, MasterNayru, Oro, SmithSamuelM, The-Loeki, TheBigBear, aboe76, ajacoutot, anluto, avinashh, basepi, bdrung, bechtoldt, bernieke, blueyed, cachedout, cbuechler, cedwards, clarkperkins, cro, dkiser, douglas-vaz, dr4Ke, eguven, eliasp, erchn, eyj, favadi, flavio, garethgreenaway, gravyboat, gtmanfred, hedinfaok, hexedpackets, hyn-salt, isbm, itsamenathan, jacksontj, jacobhammons, jeffreyctang, jejenone, jfindlay, johnscoop, justinta, keesbos, latham, ldobson, lomeroe, martinhoefling, mbarrien, mbologna, merll, mrosedale, msteen, multani, nasenbaer13, nmadhok, notpeter, opdude, papertigers, pass-by-value, plastikos, quantongan, rallytime, redmcg, rowilla, ruzarowski, ryan-lane, s0undt3ch, sdm24, sjansen, skizunov, srkunze, techhat, terminalmage, ticosax, tkwilliams, toddtomkinson, twangboy, twellspring, whiteinge)
Important: A significant orchestrate issue (#29110) was discovered during the release process of 2015.8.2, so it has not been officially released. Please use 2015.8.3 instead.

Changelog for v2015.8.1..v2015.8.2

Generated at: 2018-05-27 23:17:44 UTC

- **PR #28865:** (jfindlay) add 2015.8.2 release notes @ 2015-11-13 17:30:18 UTC
  - af297b0ae Merge pull request #28865 from jfindlay/2015.8
  - 1f847fc9ba add 2015.8.2 release notes

- **ISSUE #27392:** (ahammond) schedule running state.orchestrate fails (refs: #28730)

- **PR #28730:** (garethgreenaway) Fixes to how return_job is handled in the scheduler for the salt master. @ 2015-11-13 16:58:20 UTC
  - 15672a3f5a Merge pull request #28730 from garethgreenaway/27392_2015_8_scheduler_return_job_master
  - 882350a543 Fixing the salt scheduler so that it only attempts to return the job data to the master if the scheduled job is running from a minion's scheduler.

- **PR #28848:** (cro) Lint @ 2015-11-13 13:46:36 UTC
  - 5560cb662b Merge pull request #28848 from cro/fx2_multi_creds
  - f032b9f7dc Lint
  - 6bb6705c3e Merge branch ‘fx2_multi_creds’ of git://github.com/cro/salt into cro
  - 3b7d22248c Fix fallback credentials, add grains based on dracr.server_info and dracr.inventory, fix short-circuited for loop that was preventing retrieval of most data from CMC and DRAC devices, format responses from racadm more clearly.
  - b86c614564 Better logic around fallback credentials.
  - 2701826a99 Update fx2.py, fix typos in new fallback parameters.
  - 8ce5348808 Better variable name.
  - 92038b8718 Default configuration file for proxy minions.

- **PR #28842:** (cachedout) Add transport setting to shell test @ 2015-11-12 21:43:11 UTC
  - 778ace3ca5 Merge pull request #28842 from cachedout/tcp_shell_test
  - 785bf9f55 Add transport setting to shell test

- **PR #28837:** (basepi) [2015.8] Merge forward from 2015.5 to 2015.8 @ 2015-11-12 21:17:14 UTC
  - 5639971744 Merge pull request #28837 from basepi/merge-forward-2015.8
  - 1c91ad6765 fix lint
  - 4b706ac76a Merge remote-tracking branch ‘upstream/2015.5’ into merge-forward-2015.8
    - eb904665dc Merge pull request #28832 from basepi/backport.28826
      - 57be72eb91 Add backports_abc and singledispatch_helpers to thin as well
      - 897cad627b Add singledispatch to the thin
    - eff811a0ad Merge pull request #28833 from basepi/increase.gather_job_timeout.8647
- c09243dd01 Increase the default gather_job_timeout
  - e4a036365d Merge pull request #28829 from basepi/merge-forward-2015.5
  - f8b8441485 Merge remote-tracking branch 'upstream/2014.7' into merge-forward-2015.5
  - 76e69b4b8f Merge pull request #28777 from rallytime/bp-28740-2014.7
  - da5fac2b36 Back-port #28740 to 2014.7
  - 45c73ebf2f Merge pull request #28716 from rallytime/bp-28705
  - 32e7bd3ea0 Account for new headers class in tornado 4.3
  - f4fe921965 Merge pull request #28717 from cachedout/umask_note
  - 1874300e08 Add note about recommended umask
  - 5aeab71f76 Merge remote-tracking branch 'upstream/2015.5' into merge-forward-2015.8
    - 93562631aa Merge pull request #28756 from MrCitron/fix-25775
      - 82075e809c Add logs and correct pylint error
      - e31e22d96a Fix 25775
    - 30cc48e37f Merge pull request #28786 from chrigl/fix-28783
      - ba6d814553 closes #28783
    - 8f1d0b636e Merge pull request #28776 from rallytime/bp-28740-2015.5
      - 49256b7d90 Back-port #28740 to 2015.5
    - 77d4b980f1 Merge pull request #28760 from dmyerscough/28732-Fix-cherrypi-api-keys-endpoint
      - 206d1684b2 Fixing CherryPy key bug
    - 6f804975f Merge pull request #28746 from rallytime/bp-28718
      - 092f441cad Account for no POST data
- ISSUE #28549: (ldelossa) dockerng module issue (refs: #28827)
- PR #28827: (jacksontj) Cleanup virtual_timer in loader @ 2015-11-12 19:39:29 UTC
  - c4fb185147 Merge pull request #28827 from jacksontj/2015.8
  - f49502f648 __modules__ isn't a global, although __salt__ is
  - c734cb8876 Fix virtual_timer branch such that it will catch exceptions.
- PR #28836: (cachedout) Cast to dict to fix wheel tests in tcp @ 2015-11-12 19:22:44 UTC
  - 21520c6c1d Merge pull request #28836 from cachedout/fix_tcp_wheel_tests
  - 8d3244166b Cast to dict to fix wheel tests in tcp
- PR #28834: (cachedout) Fix breakage in tcp server @ 2015-11-12 18:57:18 UTC
  - 560671a170 Merge pull request #28834 from cachedout/tcp_revert_master_uri
  - 755d493bed Fix breakage in tcp server
- PR #28804: (cachedout) TCP test fixes @ 2015-11-12 18:39:25 UTC
  - 224602437a Merge pull request #28804 from cachedout/tcp_test_fixes
  - f799971280 Change logic
  - 52ed06500a Fix typo
Salt Documentation, Release 3002.2

- 9b18f372e6 Normalize IPC check among transports
- e8ead2bfed Allow for tcp transport in publish
- e33b903e7b Allow for tcp transport in mine
- 3d80e67a2d Allow for tcp transport in auth

- **ISSUE #28828**: (basepi) salt-ssh doesn't package tornado's new deps in the thin (refs: #28826)
- **PR #28826**: (basepi) [2015.8] Add new tornado deps to salt-ssh thin (refs: #28832) @ 2015-11-12 18:14:43 UTC
  - 49992070db Merge pull request #28826 from basepi/salt-ssh.singledispatch.thin
  - 1e1a74fd61 Add backports_abcs and singledispatch_helpers to thin as well
  - da1a2773dd Add singledispatch to the thin
- **PR #28759**: (jfjndlay) simplify stdin use of stdin in at.present state @ 2015-11-12 18:11:55 UTC
  - PR #28187: (sjansen) fix at.present (refs: #28759)
  - af52c3272f Merge pull request #28759 from jfjndlay/at
  - 987d1fee7c simplify stdin use of stdin in at.present state
- **PR #28824**: (rallytime) Back-port #28778 and #28820 to 2015.8 @ 2015-11-12 18:06:31 UTC
  - PR #28820: (cro) Add versionadded directives for chronos and marathon proxy grains. (refs: #28824)
  - PR #28778: (toddtomkinson) marathon and chronos proxy minions (refs: #28824)
  - 08891cb210 Merge pull request #28824 from rallytime/bp-28778-and-28820
  - ab5943995b Change versionaddeds to 2015.8.2 from Boron
  - da7ad0df99 Add versionadded directives.
  - 4bddd10f5f documentation updates
  - 675bc2acce more pylint fixes
  - 8e19b5c518 pylint fixes
  - ba9487f45 marathon and chronos proxy minions
- **ISSUE #23271**: (twisty7867) Unicode paths break file states with masterless minion on Vagrant/Ubuntu 14.04 (refs: #28803)
- **PR #28803**: (jfjndlay) decode strings to utf-8 @ 2015-11-12 04:59:38 UTC
  - 30ea94439c Merge pull request #28803 from jfjndlay/sdecodes
  - 11163380cf sdecode chunk name in state compiler
  - 7f95c483e1 sdecode strings in file state
  - 4d4d0526d sdecode strings in highstate outputter
- **ISSUE #25363**: (syphernl) rabbitmq_{user|vhost}.present in test=True reports unnecessary changes (refs: #28269)
- **ISSUE #24856**: (pruiz) rabbitmq_user state incorrectly reports result=True when using test=true (refs: #28269)
- **PR #28782**: (rallytime) Fixes to rabbitmq user state @ 2015-11-12 00:59:57 UTC
  - PR #28269: (rallytime) Refactor rabbitmq_user state to use test=True correctly (refs: #28782, #28772)
  - 59b505ff7c Merge pull request #28782 from rallytime/rabbitmq-user-state
  - e2b0fee57e Don’t change perms list, only existing perms should be a dictionary.
- 7601647d69 Revert "rabbitmq.list_user_permissions returns a dict, not a list. Don't expect a list."

- **ISSUE #28429** (cbuechler) salt-cloud VMware driver fails with uncustomizable guest when not customizing guest (refs: #28789)

- **PR #28789** (nmadhok) Provide ability to enable/disable customization for newly create VMs using VMware salt-cloud driver @ 2015-11-11 22:48:57 UTC
  - 098d48ad26 Merge pull request #28789 from nmadhok/2015.8-customization-fix
  - 9294ebd984 Provide ability to enable/disable customization for new VMs. Fixes #28429

- **ISSUE #28692** (mrosedale) puppet.run fails with arguments (refs: #28768)

- **PR #28768** (mrosedale) 2015.8 @ 2015-11-11 19:29:11 UTC
  - 1e510be55b Merge pull request #28768 from mrosedale/2015.8
  - fbbdccc02e Update puppet.py
  - 1c14ab4410 Update puppet.py
  - 59bdc6ae5e Merge pull request #1 from mrosedale/mrosedale-patch-1
    * c26ea916aa Update puppet.py

- **ISSUE #25363** (syphernl) rabbitmq_{user|vhost}.present in test=True reports unnecessary changes (refs: #28269)

- **ISSUE #24856** (pruiz) rabbitmq_user state incorrectly reports result=True when using test=true (refs: #28269)

- **PR #28772** (rallytime) rabbitmq.list_user_permissions returns a dict, not a list. Don't expect a list. @ 2015-11-11 18:17:09 UTC
  - **PR #28269** (rallytime) Refactor rabbitmq_user state to use test=True correctly (refs: #28782, #28772)
  - a6cad46301 Merge pull request #28772 from rallytime/rabbitmq-user-state
  - 07482211eb rabbitmq.list_user_permissions returns a dict, not a list. Don't expect a list.

- **ISSUE #28724** (quantonganh) Exception occurred when calling boto_vpc.route_table_present with test=True (refs: #28725)

- **PR #28774** (rallytime) Back-port #28725 to 2015.8 @ 2015-11-11 18:16:27 UTC
  - **PR #28725** (quantonganh) boto_vpc: return an empty dict in case cannot get the route tables (refs: #28774)
  - d570ac48f4 Merge pull request #28774 from rallytime/bp-28725
  - c3420461c3 boto_vpc: return an empty dict in case cannot get the route tables

- **PR #28775** (rallytime) Back-port #28740 to 2015.8 @ 2015-11-11 17:57:24 UTC
  - **PR #28740** (MasterNayru) Add missing S3 module import (refs: #28777, #28775, #28776)
  - 806d1b3669 Merge pull request #28775 from rallytime/bp-28740
  - 8a2780da18 Add missing S3 module import

- **PR #28755** (rallytime) Move most vmware driver list_* functions to use salt.utils.vmware functions @ 2015-11-11 17:49:16 UTC
  - f273c46f07 Merge pull request #28755 from rallytime/vmware-utils
  - 5abe010023 Move most vmware driver list_* functions to use salt.utils.vmware functions

- **ISSUE #28655** (sjorge) possible issue with state module boto_cfn/docke... (refs: #28744)
• PR #28744: (jfindlay) import gate elementtree @ 2015-11-11 16:29:12 UTC
  - 0d912bf0d4 Merge pull request #28744 from jfindlay/elementtree
  - e321d6002 import gate elementtree in artifactory module
  - f203f697b import gate elementtree in boto_iam state
  - 9845d2f2c6 import gate elementtree in boto_cfn state
• ISSUE #28726: (feigenblatt) user.present ignores "createhome: False" (refs: #28758)
• PR #28758: (jfindlay) remove redundant logic in useradd execution module @ 2015-11-11 16:22:21 UTC
  - b65e78351 Merge pull request #28758 from jfindlay/user
  - dbd582cd8d fix doc formatting in user.present state
  - 3824d2e9fc only change/report new home when createhome is True
  - 3fb81611f remove redundant logic in useradd execution module
• PR #28757: (mbarrien) Bug fix: pip command to not quote spaces in cmd line args @ 2015-11-11 16:08:46 UTC
  - 6eced26013 Merge pull request #28757 from mbarrien/fix-pip-cmd
  - 6df6cb28a6 Fix pip command to not quote spaces in cmd line args
• PR #28764: (multani) Various documentation fixes @ 2015-11-11 16:06:10 UTC
  - 356bf2987d Merge pull request #28764 from multani/fix/docs
  - 1a31b69763 doc: fix documentation formatting in salt.utils.jinja
  - 59c105b4b9 doc: fix documentation formatting in salt.states.boto_iam*
  - cb1b67c8ee doc: fix documentation formatting in in salt.modules.lxc
  - cb03a89e52 doc: fix documentation formatting in salt.modules.aptpkg
• PR #28752: (aboee6) Update openSUSE grain for tumbleweed @ 2015-11-11 03:54:37 UTC
  - d77c7ae470d Merge pull request #28752 from aboee6/suse_tumbleweed_grain
  - 764cb1ef0 Update openSUSE grain for tumbleweed
• ISSUE #28712: (hexedpackets) Service registration in the Consul module is broken (refs: #28713)
• PR #28713: (hexedpackets) Rename consul.list to consul.list_keys. @ 2015-11-11 00:57:23 UTC
  - a620bc559e Merge pull request #28713 from hexedpackets/fix-consul-module
  - 0889907b3c Make consul.list a function alias.
• PR #28719: (jacobhammons) removed dependencies info from docs @ 2015-11-10 00:04:53 UTC
  - decc31a766 Merge pull request #28719 from jacobhammons/spm
  - d7017be031 removed dependencies info from docs
• PR #28709: (basepi) [2015.8] Merge forward from 2015.5 to 2015.8 @ 2015-11-09 23:38:27 UTC
  - 989069f44a Merge pull request #28709 from basepi/merge-forward-2015.8
  - 2d04ddc108 Merge remote-tracking branch 'upstream/2015.5' into merge-forward-2015.8
    - f40c617bad Merge pull request #28705 from cachedout/tornado_http_headers
    - 7ac6cdefe0 Account for new headers class in tornado 4.3
  - c90431eddc Rip out unit test that doesn’t apply anymore
– aeeaa7c90d Merge remote-tracking branch 'upstream/2015.5' into merge-forward-2015.8
  * 604a7b4199 Merge pull request #28699 from rallytime/bp-28670
    · e436b23296 putils can fail to look-up a uid and raise a KeyError
  * 7bd3eb8370 Merge pull request #28703 from rallytime/bp-28690

  - b05dfc5c8 decode path and url to utf-8 in url.create
• ISSUE #28476: (ColorFuzzy) state.sls UnicodeDecodeError (refs: #28533)
• PR #28533: (jfindlay) decode highstate error messages to utf-8 @ 2015-11-04 14:47:55 UTC
  - 2e08264db Merge pull request #28533 from jfindlay/decode_err
  - 9c9bb75c37 decode highstate error messages to utf-8
• PR #28547: (nmadhok) [Backport] [2015.8] Tasks can be in queued state instead of running @ 2015-11-04 04:13:30 UTC
  - cfc3146b2d Merge pull request #28547 from nmadhok/2015.8-task-error
  - 3f1b1f9ee6b Tasks can be in queued state instead of running. Fixes #28511
• PR #28535: (techhat) Fail gracefully if 169.254* isn't available @ 2015-11-03 22:39:38 UTC
  - 7e22e7cf24 Merge pull request #28535 from techhat/fixcreds
  - 8d9224bd09 Catch timeouts too
  - fa46db2a3 Lint
  - f05a5e0936 Fail gracefully if 169.254* isn't available
• PR #28536: (cro) Default configuration file for proxy minions. @ 2015-11-03 21:26:27 UTC
  - 9a5208e8aa Merge pull request #28536 from cro/proxyconf
  - 1e031c4940 Default configuration file for proxy minions.

• ISSUE #28469: (mlalpho) state boto_secgroup.present fails to find vpc_name (refs: #28710, #28534)

• PR #28534: (rallytime) Add versionadded directive for vpc_name arg in boto_secgroup.present @ 2015-11-03 19:30:04 UTC
  - 2bc78a32ef Merge pull request #28534 from rallytime/fix-28469
  - ebe3b3ae7 Add versionadded directive for vpc_name arg in boto_secgroup.present

• PR #28516: (rallytime) Back-port #28489 to 2015.8 @ 2015-11-03 14:05:54 UTC
  - PR #28489: (TheBigBear) Update windows-package-manager.rst (minor edit) adding missing single quote pairs. (refs: #28516)
  - c6a6fe0089 Merge pull request #28516 from rallytime/bp-28489
  - ebe3b3ae7 Add versionadded directive for vpc_name arg in boto_secgroup.present

• PR #28506: (basepi) [2015.8] Log minion list for all rosters, at debug level @ 2015-11-03 14:05:22 UTC
  - 36a217acbd Merge pull request #28506 from basepi/salt-ssh.minions.log.debug
  - 06cb50494 Log minion list for all rosters, at debug level

• PR #28514: (basepi) [2015.8] Merge forward from 2015.5 to 2015.8 @ 2015-11-03 01:19:33 UTC
  - 8cbea63e40 Merge pull request #28514 from basepi/merge-forward-2015.8
  - 463a03b2a9 Merge remote-tracking branch 'upstream/2015.5' into merge-forward-2015.8
  - 63ce8f78d5 Merge pull request #28512 from basepi/merge-forward-2015.5
    - 61c382133a Merge remote-tracking branch 'upstream/2014.7' into merge-forward-2015.5
    - 4bf56cad3f Merge pull request #28461 from cachedout/issue_28455
      - 097838ec0c Wrap all cache calls in state.sls in correct umask
      - f3e61db045 Merge pull request #28407 from DSRCompany/issues/24910_token_auth_fix_2014
        - b7b5bec309 Don't request creds if auth with key.

• PR #28502: (cachedout) Lint #28427 @ 2015-11-02 21:09:20 UTC
  - PR #28427: (cro) More updates (refs: #28502)
  - b919f5f8d Merge pull request #28502 from cachedout/lint_28427
  - 459a342102 Lint #28427
  - d354885c3d Lint
  - dbb1f0899e Lint
  - 749383c413 Lint
  - 0fa067ea30 Add datacenter getter/setter, change 'dell_switch' to just 'switch', trap call to change_password.
  - 4bcb5a508b Add datacenter getter/setter, change 'dell_switch' to just 'switch', trap call to change_password.

• PR #28464: (basepi) [2015.8] Merge forward from 2015.5 to 2015.8 @ 2015-11-02 20:18:21 UTC
- 238411c8ce Merge pull request #28464 from basepi/merge-forward-2015.8
- 6f6e687cb4 Mock master_uri for even tests
- 3286a5250f Merge remote-tracking branch ‘upstream/2015.5’ into merge-forward-2015.8
  - 37ceae1e88 Merge pull request #28448 from gwaters/add-redhat-notes
    - e70990704a added a note to the tutorial for those that redhat so they can use the state file too.
  - 5ef50d60cd Merge pull request #28406 from rallytime/bp-28381
    - e5322d2c44 Add FreeBSD detection for VirtualBox
- 30d5f7bbae Merge pull request #28413 from rallytime/bp-28400
  - ae1921b922 Do not execute _preflight_check if not_installed list is empty in _find_install_targets. Calling with empty list on rhel/centos cause execution of repo-query --whatprovides without pkg list which is memory consumptive task for host and also for red hat satellite server.
  - 045d540aff Merge pull request #28366 from erchn/fix_yumpkg_mod_repo_disabled
    - 8187a4ce20 re-arrange things a bit to have less overall changes
    - f1d570ff18 move todelete above disabled check, add comment
    - 64feec413f also remove disabled key from repo_opts
    - 2f2eb7b66 mark repo not enabled when pkgrepo state passes in disable: True
- 3923f4a569 Merge pull request #28373 from beverlcl/fix-use_carrier-28372
  - 32cfcecb6 Fixing bug #28372 for use_carrier option on bonding network interfaces.
- e07e3f257b Merge pull request #28359 from rallytime/bp-28358
  - 9cabc582b docstring typo fix - list returners not runners
- 282be7ba5a Merge pull request #28346 from twangboy/fix_installer
  - f65e3e5275 Updated documentation to reflect the new parameter
  - a0c5223554 Fixes #27923 and #28000
- 7858f04ebc Merge pull request #28315 from gwaters/update-pillar-doc
  - b15285c0b4 adding a working example of setting pillar data on the cli
- 45305cecf29 Merge pull request #28211 from terminalmage/legacy_git_pillar-2015.5
  - 0d6a4ac115 Remove non-functional test
  - ab991d61d9 Fix for ext_pillar being compiled twice in legacy git_pillar code (2015.5 branch)
- a6cc84c407 Merge pull request #28263 from cachedout/issue_26411-1
  - 3b880a5f07 New channel for event.fire_master
  - 29e9533a9b Stand up a new channel if using salt-call
- 788e1463d8 Merge pull request #28293 from cachedout/fix_28271
  - 499ed8519b Minor grammar changes to #28271
- e178af0b90 Merge pull request #28271 from gwaters/update-tutorial-documentation
  - f96d39483d updated the tutorial with gravyboat’s suggestions
- b1f4a2bdf4 I think I changed the wrong header, updated to fix
- 846b3aece1 I found you can not run the cp.push commands until after enabling the feature in the conf, so I wanted to update the docs so others who try these commands won’t bump into the same issue I had.
  * e3eff9b909 Merge pull request #28280 from 0xf10e/patch-1
    - 6d4316b0ac Correct Jinja function load_* to import_*
  * 909fa3dc97 Merge pull request #28255 from cachedout/cli_opt
    - a2408157de Add __cli opt
  * 0fa094ae11 Merge pull request #28213 from rallytime/boto_route53_state
    - 237d64ff11 If record returned None, don’t continue with the state. Something went wrong.
  * 1768014705 Merge pull request #28238 from basepi/fixed.schedule_present.28217
    - 087a8dc3c2 Only insert enabled if it’s a dict
    - 5b49f41fab Fix schedule comparison to adjust for ‘enabled’ being added in schedule.list
    - 2dc1226ab8 Build new item with ‘enabled’ if available
  * bddd4c92de Merge pull request #28174 from lorengordon/file-replace-multiline
    - acdef2da60 Update docstrings with new guidance
    - 0835b005b7 Use a test that makes the extra file read unnecessary
    - 6d6e121a6e5 Use flags when checking whether content was added previously
    - b25e609e9e Set flags=8 since now the file is read as a MULTILINE string by default
    - 89e8dcedfd Use finally block to ensure mmap object is closed
    - 5aea6647c9 Add support for multiline regex in file.replace
  * 2225925fb5 Merge pull request #28175 from twangboy/fixed_19673
    - ae8fbb208f Fixes #19673

- ISSUE #15583: (dr4Ke) state grain.present should accept dict values (isn’t it?) (refs: #26945)
- ISSUE #11870: (gpkvt) Nested Grain-Support for grains.present / grains.absent (refs: #26945)
- PR #28486: (rallytime) Back-port #26945 to 2015.8 @ 2015-11-02 18:43:35 UTC
  - PR #26945: (dr4Ke) Feature state grains support nested and dict (refs: #28486)
  - a25ce38fd8 Merge pull request #28486 from rallytime/bp-26945
  - 8d26bbd777 grains module and state: documentation fixes
  - df7e936910 grains module and state: use a unique object...
  - df8e1184c grains module documentation fixes
  - 25e9a5c9ad grains state and module: fix version strings

  - c92326f5ea grains module: yaml representer for OrderedDict
  - 2c9c8d4073 grains state doc update
  - 576252da05 grains state: list_present, list_absent support nested grain
  - 62a1f37d86 grains state: nested support for grains.append
- 3019a055c9 grains state: rewrite doc + example
- c19c8517a grains state: more tests
- cc84e4a2c grains state tests: test the grain file content as well
- 1c5cd4c82d grains state: changes comment more accurate
- 563fd2b56c grains state: use DEFAULT_TARGET_DELIM
- c63913e602 grains module: simpler comment for already set key
- 2000180791 grains.present uses grains.set
- a03c79b13b module grains.set default comment is a string
- 64e9e2c3b3 grains.absent uses set(None)
- 6b8c245b87 grains state: new tests for nested grains

- **PR #28472:** (gtmanfred) overwrite more than one value with names @ 2015-11-02 17:56:53 UTC
  - f3640b3ad6 Merge pull request #28472 from gtmanfred/2015.8
  - 8b90cced5 overwrite more than one value with names

- **PR #28493:** (rallytime) Back-port #28492 to 2015.8 @ 2015-11-02 17:54:09 UTC
  - **PR #28492:** (cedwards) Updated FreeBSD installation docs (refs: #28493)
  - e31ef51053 Merge pull request #28493 from rallytime/bp-28492
  - ffc77259c9 Updated FreeBSD installation docs:

- **PR #28494:** (whiteinge) Fix filter_by passing incorrect parameters to match functions @ 2015-11-02 17:53:55 UTC
  - 38c77206db Merge pull request #28494 from whiteinge/match-filter_by-argfix
  - e61ac75d6f Fix filter_by passing incorrect parameters to match functions

- **ISSUE #23685:** (Snergster) inotify beacon on file. 'change' event to reactor to reset file to known state will cause loop (refs: #28388)

- **PR #28491:** (rallytime) Back-port #28388 to 2015.8 @ 2015-11-02 17:13:23 UTC
  - **PR #28388:** (cachedout) Beacon state disable (refs: #28491)
  - d19affd44d Merge pull request #28491 from rallytime/bp-28388
  - f740a19477 Working right now
  - 700eaed0 Disable starting to come to life
  - f8b17748ef More fixing
  - 04585a2878 Documentation for disable_during_state_run
  - dbdb53689d Add documentation note in inotify beacon
  - 40217fe813 More refactoring and add new option to disable during state run
  - 19af5e5ed3 Starting on refactor of beacon config parsing

- **ISSUE #12363:** (joehealy) unable to manage password expiry of windows users (refs: #28465)

- **PR #28465:** (twangboy) Fix #12363: Password Expiration in Windows @ 2015-11-02 17:01:18 UTC
  - f7042ba967 Merge pull request #28465 from twangboy/fix_12363
  - bcf7d58dbb Fixed array if there’s a problem with user.info
- 4b36cb88b6e Added documentation to win_shadow
- fc8f197f69 Fix #12363

- **ISSUE #28484**: (nasenbaer13) Elasticcache subnet group creation raises TypeError (refs: #28485)
- **PR #28485**: (nasenbaer13) Fix invalid usage of _get_conn causing #28484 @ 2015-11-02 16:47:52 UTC
  - ec0cbec0b Merge pull request #28485 from eyj/fix_28484
  - 9d80b6070 Fix invalid usage of _get_conn causing #28484

- **ISSUE #28453**: (sdm24) Fix Formatting for Nodegroup Targetting Docs (refs: #28454)
- **ISSUE #28268**: (gravyboat) Update nodegroup docs to explain how to target via nodegroups (refs: #28306)
- **PR #28454**: (sdm24) Fixed nodegroup doc formatting to correctly link to pillar_opts in the master config @ 2015-11-02 15:14:40 UTC
  - **PR #28306**: (sdm24) Updated the Nodegroup docs to include how to target nodegroups in SLS Jinja (refs: #28454)
  - 1116798f21 Merge pull request #28454 from sdm24/fix-formating-in-nodegroup-docs
  - b968581eb1 Fixed nodegroup doc formatting to correctly link to pillar_opts in the master config

- **PR #28487**: (cachedout) Lint 28456 @ 2015-11-02 14:52:27 UTC
  - fac7803a59 Merge pull request #28487 from cachedout/lint_28456
  - 58fe15437a Lint #28456
  - 322a8bb606 updated states.virtualenv_mod comments to reflect that some kwargs need 'distribute: True'

- **ISSUE #24775**: (ymote) jinja returned host ip address with square bracket (refs: #28457)
- **PR #28457**: (sdm24) Clarified comments for grains/core.py for ip_interfaces, ip4_interfaces, and ip6_interfaces, to explicitly state that the ips for each interface are passed as a list @ 2015-11-02 14:47:59 UTC
  - 22a4f14625 Merge pull request #28457 from sdm24/update-grain-ip-interfaces-comments
  - eb92afe238 Clarified comments for grains/core.py for ip_interfaces, ip4_interfaces, and ip6_interfaces, to explicitly state that the ips for each interface are passed as a list

- **PR #28473**: (anlutro) Show check_cmd output on failure @ 2015-11-02 14:15:30 UTC
  - 5818b28c85 Merge pull request #28473 from alprs/feature-cmd_check_output
  - a772ce330a fix tests
  - 90b01e9e0d show check_cmd output on failure

- **PR #28460**: (justinta) Skipped wipes test if wipes does not exist on OS @ 2015-10-31 04:09:32 UTC
  - cfe39df7ac Merge pull request #28460 from jtand/wipe_fs_fix
  - 7ca79f17b Skipped wipes test if wipes does not exist on OS

- **PR #28426**: (terminalmage) pkgbuild.built: make template engine optional @ 2015-10-30 17:13:36 UTC
  - 9b44b5e347 Merge pull request #28426 from terminalmage/pkgbuild-template
  - 6d32497848 pkgbuild.built: make template engine optional

- **ISSUE #28123**: (hrumph) local.cmd not working for windows minions (refs: #28422)

- **PR #28422**: (cachedout) Handle windows logging on thread_multi [WIP] @ 2015-10-30 17:12:26 UTC
  - 31777cb4e9 Merge pull request #28422 from cachedout/issue_28123
- fd3b2a9e20 Handle windows logging on thread_multi

- **ISSUE #13513**: (ironwilliamcash) Windows Registry Key Problem on 64bit Machine (refs: #28425)

- **PR #28425**: (twangboy) Fix #13513 - Reflection @ 2015-10-30 17:07:23 UTC
  - f9992fc948 Merge pull request #28425 from twangboy/fix_13513
  - beb141df69 Fixed some lint
  - 0d747355c4 Fix #13513

- **ISSUE #27980**: (rayba) salt-cloud 2015.5.0 azure provider could not be loaded (refs: #28417)

- **PR #28417**: (rallytime) Add note about azure sdk version to getting started docs @ 2015-10-29 19:47:05 UTC
  - 4c8cd064a4 Merge pull request #28417 from rallytime/azure-version-warning
  - 8e3a2b87e7 Add note about azure sdk version to getting started docs

- **ISSUE #28392**: (jacksontj) AsyncZeroMQReqChannel does not implement tries (2015.8) (refs: #28410)

- **PR #28410**: (jacksontj) Add retries to the zeromq.AsyncReqMessageClient (refs: #28576) @ 2015-10-29 18:05:50 UTC
  - 7ead823731 Merge pull request #28410 from jacksontj/2015.8
  - 70b5ae9b1d Add retries to the zeromq.AsyncReqMessageClient

- **ISSUE #28382**: (cedwards) [FreeBSD] user state option empty_password: True fails with Traceback (refs: #28395)

- **PR #28404**: (rallytime) Back-port #28395 to 2015.8 @ 2015-10-29 16:09:20 UTC
  - **PR #28395**: (cedwards) Updating bsd_shadow to match mainline shadow (refs: #28404)
  - 50845a1e91 Merge pull request #28404 from rallytime/bp-28395
  - badcb677e9 Use correct version release number
  - c5c66b8bab Updating bsd_shadow to match mainline shadow

- **PR #28405**: (opdude) Detect legacy versions of chocolatey correctly @ 2015-10-29 15:57:30 UTC
  - c746b564b4 Merge pull request #28405 from Unity-Technologies/hotfix/choco-version-detect
  - 0076d73872 Make sure we exit out correctly when checking for choco version
  - 157e0f446d Detect legacy versions of chocolatey correctly

- **PR #28187**: (sjansen) fix at.present (refs: #28759) @ 2015-10-29 15:49:18 UTC
  - 4304001a8f Merge pull request #28187 from sjansen/patch-1
  - 52c915e29d fix at.present

- **PR #28375**: (merll) Merge pillar includes correctly @ 2015-10-29 15:12:48 UTC
  - 5efac26c10 Merge pull request #28375 from Precis/fix-pillar-include-loop
  - f8e2c26473 Variable err is from previous loop, too.
  - 042314246f Unit test for merging included pillars.
  - a42c51f9bf Do not merge previous values in pillar include loop.

- **PR #28376**: (ryan-lane) Support update of route53 records with multiple values @ 2015-10-29 14:54:47 UTC
  - **PR #28374**: (ryan-lane) Support update of route53 records with multiple values (refs: #28376)
  - a69b124aaa Merge pull request #28376 from lyft/multivalue-route53-values-2015.8

---

**28.2. Previous Releases**
- Support update of route53 records with multiple values

**PR #28377:** (terminalmage) Deprecate 'always' in favor of 'force' in pkgbuild.built @ 2015-10-29 14:42:22 UTC
- Merge pull request #28377 from terminalmage/force-pkgbuild
- Add versionadded directive
- Deprecate 'always' in favor of 'force' in pkgbuild.built

**PR #28380:** (cro) Add missing call for service provider @ 2015-10-29 14:26:55 UTC
- Merge pull request #28380 from cro/sshprox_fix
- Add missing call for the service provider

**ISSUE #28202:** (guettli) Docs: Difference between modules.cron.rm_job and modules.cron.rm (refs: #28348)

**PR #28348:** (jfindlay) salt.utils.alias informs user they are using a renamed function @ 2015-10-28 20:46:36 UTC
- Merge pull request #28348 from jfindlay/alias
- Add a missing call for the service provider

**ISSUE #28087:** (DmitryKuzmenko) Revert "Update __init__.py" (refs: #28361)
- Merge pull request #28087 from rallytime/bp-28087
- Revert "Update __init__.py"

**PR #28361:** (rallytime) Back-port #28087 to 2015.8 @ 2015-10-28 20:44:32 UTC
- Merge pull request #28361 from rallytime/bp-28087
- Revert "Update __init__.py"

**PR #28360:** (multani) Various documentation fixes @ 2015-10-28 20:43:20 UTC
- Merge pull request #28360 from multani/fix/docs
- doc: fix warnings in clouds.linode
- doc: simplified states.postgres_tablespace introduction
- doc: fix rendering of titles in the /ref/states/all/ index page

**PR #28370:** (rallytime) Back-port #28276 to 2015.8 @ 2015-10-28 20:37:49 UTC
- Merge pull request #28370 from rallytime/bp-28276
- Correct state pkg.updtodate to succeed when packages are up-to-date

**ISSUE #27890:** (dkiser) pillar recurse list strategy (refs: #27891)

**ISSUE #25954:** (tbaker57) [2015.8.0rc2] pillar merge strategy default behaviour change (refs: #28353)
• PR #28353: (merll) Consider each pillar match only once. @ 2015-10-28 15:05:21 UTC
  - PR #27891: (dkiser) introduce recurse_list pillar_source_merging_strategy (refs: #28353, #28013)
  - 3942b4d0e6 Merge pull request #28353 from Precis/fix-pillar-sls-matches
  - 2f3f2d6f2a Consider each pillar match only once.
• PR #28334: (anlutro) iptables needs -m comment for --comment to work @ 2015-10-28 14:24:52 UTC
  - 9d8beac0c4 Merge pull request #28334 from alprs/fix-iptables_comment
  - 170ea7c50d iptables needs -m comment for --comment to work
• ISSUE #27789: (eduherraiz) UnicodeDecodeError: 'ascii' codec can’t decode byte in 2015.8.0 (refs: #28340, #27833)
• PR #28340: (jfndlay) sdecode file and dir lists in fileclient @ 2015-10-28 14:23:10 UTC
  - 700b6e6e8f Merge pull request #28340 from jfndlay/decode_client
  - bd9151b5e3 sdecode file and dir lists in fileclient
• PR #28344: (ryan-lane) Fix iptables state for non-filter tables @ 2015-10-28 14:21:54 UTC
  - 48448ca9a48 Merge pull request #28344 from lyft/fix-iptables-non-filter
  - 2ba0b763d Fix iptables state for non-filter tables
• PR #28343: (rallytime) Back-port #28342 to 2015.8 @ 2015-10-28 13:58:28 UTC
  - PR #28342: (gravyboat) Fix up a dup doc entry for the file state. (refs: #28343)
  - 72f0c106cf Merge pull request #28343 from rallytime/bp-28342
  - 03d15dd090 Fix up a dup doc entry.
• PR #28330: (rallytime) Back-port #28305 to 2015.8 @ 2015-10-27 17:20:35 UTC
  - PR #28305: (rowilla) Fix Cabal states. (refs: #28330)
  - 64d6c2362a Merge pull request #28330 from rallytime/bp-28305
  - 46d6bcb62b Fix Cabal states.
• ISSUE #21216: (syphernl) State rabbitmq_plugin missing proper error handling (refs: #28270)
• PR #28270: (rallytime) Refactor RabbitMQ Plugin State to correctly use test=true and format errors @ 2015-10-27 17:18:35 UTC
  - a44e8d8dab Merge pull request #28270 from rallytime/refactor_rabbitmq_plugin_state
  - 9e40c3a6a6 Fine tuning and fix tests
  - 0d0916cdd1 Pylint fix
  - 196b18146d Refactor RabbitMQ Plugin State to correctly use test=true and format errors
• ISSUE #25363: (syphernl) rabbitmq_[user|vhost].present in test=True reports unnecessary changes (refs: #28269)
• ISSUE #24856: (pruiz) rabbitmq_user state incorrectly reports result=True when using test=true (refs: #28269)
• PR #28269: (rallytime) Refactor rabbitmq_user state to use test=True correctly (refs: #28782, #28772) @ 2015-10-27 17:17:42 UTC
  - 4ef6d07eba5 Merge pull request #28269 from rallytime/refactor_rabbitmq_user_state
  - aebbcb88ea Pylint fix
- 19b8b868a3 Clean-up/fixes to rabbitmq_user state and test adjustments
- 3e0e8fc8c6 Refactor rabbitmq_user state to use test=True correctly

• ISSUE #27855: (dverbeek84) boto_vpc is not reading availability_zone (refs: #28299, #28168)
• PR #28299: (rallytime) Add test for availability_zone check to boto_vpc_tests @ 2015-10-27 14:17:11 UTC
  - PR #28168: (rallytime) Make sure availability zone gets passed in boto_vpc module when creating subnet (refs: #28299)
  - 93a930615e Merge pull request #28299 from rallytime/tests-for-28168
  - 65fd850246 Get the list indice to compart before looking at keys
  - 95defb87c5 Add test for availability_zone check to boto_vpc_tests

• ISSUE #28268: (gravyboat) Update nodegroup docs to explain how to target via nodegroups (refs: #28306)
• PR #28306: (sdm24) Updated the Nodegroup docs to include how to target nodegroups in SLS Jinja (refs: #28454) @ 2015-10-27 14:07:12 UTC
  - 0ab7c0053d Merge pull request #28306 from sdm24/update-nodegroup-docs-with-state-targeting
  - 02c9e9d8c0 Update nodegroups.rst
  - b2c3307c2e Update nodegroups.rst
  - e79a930f57 updated nodegroups.rst
  - f2a6bc94df Updated the Nodegroup docs to include how to target nodegroups in SLS Jinja

• ISSUE #27435: (LukeCarrier) firewalld state: firewalld.prepare calls new_service, not add_service (refs: #28308)
• PR #28308: (rallytime) Firewalld state services should use --add-service, not --new-service @ 2015-10-27 14:02:45 UTC
  - bba26ffeca Merge pull request #28308 from rallytime/fixtures-27435
  - d37298f973 Don't forget to pass the zone!
  - fc2a6f3d55 Firewalld state services should use --add-service, not --new-service

• ISSUE #2744: (rallytime) [2015.5] Multi-Master Minions Block on Authentication (refs: #28302)
• PR #28302: (DmitryKuzmenko) Always close socket even if there is no stream. @ 2015-10-27 01:08:41 UTC
  - 044737ba6e Merge pull request #28302 from DSRCompany/issues/21744_fix_context_term
  - b06c66fa68 Always close socket even if there is no stream.

• PR #28282: (keesbos) Fix for __env__ in legacy git_pillar @ 2015-10-26 21:20:25 UTC
  - 2f2f31906d Merge pull request #28282 from keesbos/git-pillar-env-fix
  - 46b93a4c6 Fix for __env__ in legacy git_pillar

• PR #28258: (pass-by-value) Add service module for ssh proxy example @ 2015-10-26 14:57:47 UTC
  - 6a92bfb402 Merge pull request #28258 from pass-by-value/ssh_service
  - 04bc1c64ad Add versionadded information
  - 76d83859f1 Add service module for ssh proxy example

• PR #28294: (bechtoldt) correct a bad default value in http utility @ 2015-10-26 14:45:27 UTC
  - PR #25668: (techhat) Sanitize sensitive fields in http.query() (refs: #28294)
  - 25778cf1ba Merge pull request #28294 from bechtoldt/fixtures-bad_param_default_val
- 4852c03d08 don’t iterate over var that is NoneType

- **PR #28185**: (justinta) Added single package return for latest_version, fixed other bug. @ 2015-10-26 14:09:40 UTC
  
  - 0245820b73 Merge pull request #28185 from jtand/zypper_pkg
  
  - 457f5d085 Added back nfo.get lines after finding the problem in them
  
  - 5cd15c9e3 Added single package return for latest_version, fixed other bug.

- **PR #28297**: (cachedout) Lint fix proxy junos @ 2015-10-26 13:59:44 UTC
  
  - **PR #28116**: (jejeneone) converted junos proxy minion to new __proxy__ global (refs: #28297)
  
  - 443b486c22 Merge pull request #28297 from cachedout/lint_fix_proxy_junos
  
  - 5194d9a2ef Lint
  
  - 28eff3caf2 converted junos proxy minion to new __proxy__ global added cli() in junos.py module to execute arbitrary command

- **ISSUE #28209**: (basepi) Legacy git_pillar configs cause duplicate ext_pillar calls (refs: #28210)

- **PR #28210**: (terminalmage) Fix for ext_pillar being compiled twice in legacy git_pillar code (refs: #28211) @ 2015-10-26 12:36:58 UTC
  
  - c8dd79d683 Merge pull request #28210 from terminalmage/legacy_git_pillar
  
  - 86f00e71bf Remove non-functional test
  
  - b80da6e23a Fix for ext_pillar being compiled twice in legacy git_pillar code

- **ISSUE #28203**: (edhgoose) blockdev.formatted failing on 2nd+ run, despite disk already being formatted (refs: #28265)

- **PR #28265**: (jfindlay) fix blockdev execution and state modules @ 2015-10-26 12:27:36 UTC
  
  - 62485e567f Merge pull request #28265 from jfindlay/blockdev
  
  - 0dc72135de update blockdev exec and state module unit tests
  
  - 07253cb5fb move fstype checks to blockdev execution module
  
  - 20ec4a1d6 move fs create logic from blockdev state to module
  
  - 613671a85c safer examples in blockdev exec module docs
  
  - 359df1bc7 refactor dump in blockdev exec module
  
  - 88acc9356d check, notify for deps in blockdev exec/state mods

- **PR #28266**: (rallytime) Back-port #28260 to 2015.8 @ 2015-10-26 12:20:56 UTC
  
  - **PR #28260**: (justinta) Ioflo lint (refs: #28266)
  
  - 556d7d583e Merge pull request #28266 from rallytime/bp-28260
  
  - 03509e60b2 Removed unnecessary blank line
  
  - 2d6c978797 Moved lint disable to end of offending line
  
  - d13fe0cf53 Disabled lint check for ioflo

- **PR #28253**: (rallytime) Back-port #28063 to 2015.8 @ 2015-10-23 18:10:56 UTC
  
  - **PR #28063**: (SmithSamuelM) Fixes broken Salt Raet. master.flo file path broken (refs: #28253)
  
  - acd2214c9d Merge pull request #28253 from rallytime/bp-28063
– db4aa58f7b Changed reference to reflect refactoring of ioflo package locations as of ioflo 1.2.3. Deprecated package locations still supported in ioflo for now.
– 87abf84b54 Changed reference to reflect refactoring of ioflo package locations as of ioflo 1.2.3. Deprecated package locations still supported in ioflo for now.
– 19a81dcb77 Fixed exception in loader when no file extension.
– 2afe86803c Raet Salt broken when config moved to package directory. The path to the master.flo file no longer worked. This fixes.
– a177bf8f47 fixed unit tests missing close of roadstack caused error on other tests.

• ISSUE #28227: (jfindlay) DigitalOcean FreeBSD profile fails with `image: 10.2` (refs: #28231)
• PR #28231: (rallytime) Make sure we’re comparing strings when getting images in the DO driver @ 2015-10-23 13:49:37 UTC
  – 570e7faa3b Merge pull request #28231 from rallytime/fix-28227
  – 0985780f12 Make sure we’re comparing strings when getting images in the DO driver.
• PR #28224: (techhat) Optimize create_repo for large packages @ 2015-10-23 13:40:06 UTC
  – 1e55513ce3 Merge pull request #28224 from techhat/spmoptimize
  – faee552df2 Optimize create_repo for large packages.
• ISSUE #27374: (mool) boto_route53 state doesn’t create a record (refs: #28214, #28213)
• PR #28214: (rallytime) Don’t stacktrace if invalid credentials are passed to boto_route53 state @ 2015-10-23 13:37:30 UTC
  – PR #28213: (rallytime) If record returned None, don’t continue with the state. Something went wrong (refs: #28214)
  – f269fa0905 Merge pull request #28214 from rallytime/fix_boto_route53_stacktrace
  – cdeb8c98ce Pylint Fix
  – 11c476b0ad Don’t stacktrace if invalid credentials are passed to boto_route53 state.
• PR #28228: (rallytime) Back-port #27562 to 2015.8 @ 2015-10-23 13:34:42 UTC
  – PR #27562: (techhat) Add dependency resolution to SPM (refs: #28228)
  – 0775d159f8 Merge pull request #27562 from rallytime/bp-27562
  – 847809541e Updates as per @s0undt3ch
  – cf5f6df1f9 Add dependency resolution to SPM.
• ISSUE #28230: (jfindlay) DigitalOcean FreeBSD fails to bootstrap: Please use the freebsd@ user to access this droplet. (refs: #28232)
• PR #28232: (rallytime) Add documentation to supply the ssh_username: freebsd config to DO docs @ 2015-10-23 13:31:52 UTC
  – af241dc054 Merge pull request #28232 from rallytime/fix-28230
  – 8b06ab4335 Add documentation to supply the ssh_username: freebsd config to DO docs.
• PR #28198: (jacobhammons) Added note regarding missing spm exe on Debian/Ubuntu @ 2015-10-22 04:40:18 UTC
  – 36dc12c62c Merge pull request #28198 from jacobhammons/docs
  – cfadda0c0c Added note regarding missing spm exe on Debian/Ubuntu. Minor fixes to spm docs.

Chapter 28. Release Notes
• **PR #28182**: (erchn) Some fixes for nova driver for Rackspace @ 2015-10-21 21:26:18 UTC
  - fbad88fb99 Merge pull request #28182 from erchn/fix_nova_rackspace
  - 7b54f04ba2 wrap server_list[_detailed] in try/except block for TypeError
  - b7f8487615 rackconnectv3 default to False, not 'False' get private_ips in rackconnectv2 environment and populate data object get public_ips and put in data object before returning "result" structure

• **ISSUE #27454**: (MrFishFinger) firewallld returns a dictionary rather than a string in the ret['comment'] (refs: #28181)

• **PR #28181**: (rallytime) Revamp firewallld state to be more stateful. @ 2015-10-21 21:19:18 UTC
  - a1a924f170 Merge pull request #28181 from rallytime/fix-27454
  - 3e13880af8 Make sure we catch all potential exceptions
  - cb4efa87e8 Make sure state returns False when execution module calls fail
  - 232b2825e4 Revamp firewallld state to be more stateful.

• **PR #28176**: (cro) Add ping function @ 2015-10-21 20:49:54 UTC
  - d93ad103c7 Merge pull request #28176 from cro/ssh_no_ping
  - 3e05437f15 Add ping function

• **PR #28167**: (The-Loeki) file.serialize needs to add a final newline to serialized files @ 2015-10-21 17:12:33 UTC
  - 8e0f39381 Merge pull request #28167 from The-Loeki/patch-1
  - 46bf6d4fa3 Update file.serialize test for Python serialized
  - 6683fd087 file.serialize needs to add a final newline to serialized files

• **ISSUE #27855**: (dverbeek84) boto_vpc is not reading availability_zone (refs: #28299, #28168)

• **PR #28168**: (rallytime) Make sure availability zone gets passed in boto_vpc module when creating subnet (refs: #28299) @ 2015-10-21 14:48:03 UTC
  - 559a517ad6 Merge pull request #28168 from rallytime/fix-27855
  - 50fb77dc50 Make sure availability zone gets passed in boto_vpc module when creating subnet

• **ISSUE #26107**: (thecosmicfrog) Issue targeting nodegroups - Invalid compound target: ( L@ ... ) (refs: #28148)

• **ISSUE #24660**: (Mrten) nodegroups not backwards compatible (refs: #28148)

• **PR #28148**: (basepi) [2015.8] Only expand nodegroups to lists if there is a nested nodegroup @ 2015-10-21 13:20:06 UTC
  - dcd90363fe Merge pull request #28148 from basepi/fix.nodegroup.backwards.compat.24660
  - 11d6a2b6ac Add some docs
  - 036d767a98 Keep track of recursive nodegroup_comp calls, keep list format if it’s recursing
  - 155634a0aa Finish thought
  - 528b16756b Only expand nodegroups to lists if there is a nested nodegroup

• **PR #28155**: (basepi) [2015.8] Merge forward from 2015.5 to 2015.8 @ 2015-10-20 23:48:41 UTC
  - 053ad408c7 Merge pull request #28155 from basepi/merge-forward-2015.8
  - c4c889f97b Merge remote-tracking branch 'upstream/2015.5' into merge-forward-2015.8
  - ab18dcd637 Merge pull request #28140 from rallytime/bsd-installation-doc
- 458a544d83 Add OpenBSD installation documentation to 2015.5 branch
- fad38eb3c3 Merge pull request #28138 from rallytime/bp-28130-sizes-only
  - 6ab31e1886 Pylint
  - 37e4ed58a9 Added missing comma
  - 667f5e669f Added a bunch of instance sizes and updated some outdated ones
- ce8f58536 Merge pull request #28097 from jacksontj/2015.5
  - 75e04bcb4bc For all multi-part messages, check the headers. If the header is not your minion_id, skip the message
- 9cdb970289 Merge pull request #28117 from rallytime/fix-23655
  - dfb908e405 Clean up stacktrace when master can't be reached in lxc cloud driver
- bf7ed0a397 Merge pull request #28110 from terminalmage/masterless-mode
  - ed90103124 Add explanation of file_client: local setting masterless mode
- a569ef4980 Merge pull request #28109 from rallytime/fix-27940
  - 18b2245611 Add created reactor event to lxc cloud driver
- d4604f6b26 Merge pull request #27996 from rallytime/fix-21845
  - f8380d751e Provide empty string as default stdout instead of None
  - f9406b5828 Don't fail if pip package is already present and pip1 is installed
- 28b97c514f Merge pull request #28056 from rallytime/bp-28033
  - af2c5ab759 Fixed win_useradd.py
- dfc3aab774 Merge pull request #28059 from rallytime/bp-28040
  - 76a0d4937b Revert "Allow passing in auth_version, defaulting to 2."
  - 63d5675d34 default auth_version = 2
  - 8072716888 remove extra spaces
  - 977056f04 cleanup whitespace, default to None to be consistent with profile
  - f4adfe98c0 Allow passing in auth_version, defaulting to 2.
  - fab1ad39af Rackspace support for swift module.
- d1fa036b55 Merge pull request #28047 from cachedout/issue_27534
  - 6ea37d6bca Context manager
  - 4d66fb371 Lint
  - 59018289dc Restore FTP functionality to file client
- fd2ca2df1b Merge pull request #28032 from twangboy/fix_win_path
  - 2bc93314 Fixed win_path.py
- 88c1770be4 Merge pull request #28037 from rallytime/bp-28003
  - 4f5f1fb1e Fix PR #26336
- de72d8bd2 Merge pull request #28031 from jacobhammons/relnotes6
  - 05927bb6f0 Updated release notes with additional CVE information
- 16c0272849 Merge pull request #28008 from jfindlay/host_path
  - 9f7047dd3c platform independent line endings in hosts mod
- d41018fa8e Merge pull request #28012 from rallytime/fix-28010
  - 0d7059e0c2 Clean up stack trace when something goes wrong with minion output
- f72807001 Merge pull request #27995 from jacobhammons/pillar-doc
  - 2870af2ba3 added link to grains security FAQ to targeting and pillar topics.
- efede904a7 Merge pull request #27986 from jacobhammons/dot6
  - bb61c68c11 Changed current release to 5.6 and added CVE to release notes
- 831ec680d9 Merge pull request #27913 from pass-by-value/proxmox_verify_ssl
  - 0b721efe37 Set default
- 41ccb3a30 Merge pull request #27876 from terminalimage/gitpillar-AttributeError-2015.5
  - 07794c837a 2015.5 branch: Fix traceback when 2015.8 git ext_pillar config schema used

- **PR #28149**: (pass-by-value) Add clarification to cloud profile doc about host @ 2015-10-20 19:46:05 UTC
  - 53dd01fc24 Merge pull request #28149 from pass-by-value/proxmox_profile_doc_change
  - bc371c55cd Add clarification to cloud profile doc about host

- **PR #28146**: (cachedout) Lint dracr.py @ 2015-10-20 17:55:07 UTC
  - 7badd634ae Merge pull request #28146 from cachedout/lint_dracr
  - 8b057f39e8 Lint dracr.py

- **ISSUE #28118**: (basepi) Salt-cloud Linode driver using RAM number for disk size (refs: #28141)

- **PR #28141**: (rallytime) Don’t use RAM for root disk size in linode.py @ 2015-10-20 17:32:29 UTC
  - 5f99bd4dc6 Merge pull request #28141 from rallytime/fix-28118
  - 5f9f8e41554 Don’t use RAM for root disk size in linode.py

- **PR #28143**: (justinta) Removed blank line at end of chassis.py @ 2015-10-20 16:39:35 UTC
  - 7cd0440c33 Merge pull request #28143 from jtand/lint_fix
  - 427df955c9 removed extraneous file
  - 1a58283f23 Removed blank line at end of chassis.py

- **PR #28021**: (blueeyed) Handle includes in include_config recursively @ 2015-10-20 16:19:37 UTC
  - 858875e9fd Merge pull request #28021 from blueeyed/recursive-include
  - 1d80520958 Handle includes in include_config recursively

- **ISSUE #27998**: (papertigers) pkgin install broken (refs: #28001)

- **PR #28095**: (rallytime) Back-port #28001 to 2015.8 @ 2015-10-20 16:18:11 UTC
  - **PR #28001**: (papertigers) #27998 Cleanup pkgin isatty mess (refs: #28095)
  - 4dbad6b0c Merge pull request #28095 from rallytime/bp-28001
  - ddf8a8d2bb Cleanup pkgin isatty mess

- **ISSUE #28060**: (LoveIsGrief) Default paths for test environment (refs: #28061)

- **PR #28096**: (rallytime) Back-port #28061 to 2015.8 @ 2015-10-20 16:15:34 UTC
- PR #28061: (LoveIsGrief) Fix #28060 - Default paths for test environment (refs: #28096)
- 572487073c Merge pull request #28096 from rallytime/bp-28061
- cb8a72d580 Fix #28060

- PR #28139: (rallytime) Back-port #28103 to 2015.8 @ 2015-10-20 16:15:05 UTC
  - PR #28103: (ajacoutot) OpenBSD salt package: update list of dependencies. (refs: #28140, #28139)
  - 9ce526260b Merge pull request #28139 from rallytime/bp-28103
  - bc9159a126 OpenBSD salt package: update list of dependencies.

- ISSUE #26844: (double-yaya) The function "state.sls" is running as PID XXXX and was started at .... with jid XXXX always shows the current jid (refs: #28098, #28097)

- PR #28098: (jacksontj) For all multi-part messages, check the headers. If the header is not ... @ 2015-10-20 15:00:08 UTC
  - 97dfb00a68 Merge pull request #28098 from jacksontj/2015.8
  - 6d26842925 For all multi-part messages, check the headers. If the header is not your minion-id or a broadcast, drop the message.

- ISSUE #3436: (madduck) Pillar does not handle Unicode data (refs: #28134, #saltstack/salt`#28134`_)

- PR #28134: (bernieke) fix unicode pillar values #3436 @ 2015-10-20 14:51:10 UTC
  - b4875e585a Merge pull request #28134 from Awingu/2015.8
  - 53285f7781 fix unicode pillar values #3436

- PR #28076: (redmcg) Replace option 'i' with an explicit query format @ 2015-10-20 13:59:57 UTC
  - f90a21029 Merge pull request #28076 from redmcg/2015.8
  - 07413ec162 Remove unnecessary padding from rpm.info
  - 4987530986 Replace option 'i' with an explicit query format

- PR #28119: (jacksontj) Check if the remote exists before casting to a string. @ 2015-10-20 12:34:10 UTC
  - 3f6db52d1bf Merge pull request #28119 from jacksontj/fetch_issue
  - c012dce2f6 Check if the remote exists before casting to a string.

- ISSUE #28080: (githubcdr) Salt minion locale module missing on Archlinux (refs: #28105)

  - 5173ef43c8 Decode unicode names in fileclient/server

• PR #27981: (jstinta) Fixed trailing whitespace lint @ 2015-10-15 15:10:15 UTC
  - fc1375f39 Merge pull request #27981 from justinta/cloudstack-lint
  - 5e5f9a0c2 Fixed trailing whitespace lint
• PR #27969: (jeffreycntag) fix parse of \{ on next line @ 2015-10-15 15:04:33 UTC
  - 1ae302b202 Merge pull request #27969 from jeffreycntag/logrotate_parse
  - dc9b2bc367 lint fixes
  - 8c6197d42e fix parse of \{ on next line

• PR #27978: (terminalmage) Add note about dockerng.inspect_image usage @ 2015-10-15 14:54:10 UTC
  - a4ba982b1d Merge pull request #27978 from terminalmage/dockerng-inspect_image-docstring
  - 595fa6939 Add note about dockerng.inspect_image usage

• PR #27955: (pass-by-value) Bp 27868 @ 2015-10-15 12:43:37 UTC
  - PR #27868: (pass-by-value) Add SSHConnection object
  - bd9d1ed8b5 Merge pull request #27955 from pass-by-value/bp-27868
  - c02ec8b943 Fix pylint errors
  - 6553d135d0 Add SSHConnection object

• PR #27953: (The-Loeki) Fix CloudStack cloud for new 'driver' syntax @ 2015-10-15 12:38:58 UTC
  - c5080a80f Merge pull request #27953 from The-Loeki/patch-1
  - f0d5c9375 Pop deprecated 'provider' into new 'driver' key
  - 4eb09edd1 Fix CloudStack cloud for new 'driver' syntax

• PR #27965: (ryan-lane) Fail in boto_asg.present if alarms fail @ 2015-10-15 12:32:53 UTC
  - 7006c34627 Merge pull request #27965 from lyft/HOTFIX-boto-asg-fix
  - b8f4079c33 Fail in boto_asg.present if alarms fail

• PR #27958: (twangboy) Added new functionality to win_task.py @ 2015-10-15 12:30:31 UTC
  - 6e624c1f48 Merge pull request #27958 from twangboy/update_win_task
  - 6edba246 Added run_wait function
  - 5731bdcadb Clarified an error
  - 23b9c1c199 Added new functionality

• ISSUE #27956: (The-Loeki) Salt-cloud CLI 2015.8 borks out with global name '__opts__' is not defined (refs: #27959)

• PR #27959: (techhat) Change __opts__ to self.opts @ 2015-10-14 22:29:13 UTC
  - 1efa87a964 Merge pull request #27959 from techhat/issue27956
  - bc1e48122 Change __opts__ to self.opts

• PR #27943: (rallytime) Back-port #27910 to 2015.8 @ 2015-10-14 20:27:20 UTC
  - PR #27910: (twellspring) htpasswd state add comment about dependency on apache2-utils (refs: #27943)
  - 877e217388 Merge pull request #27943 from rallytime/bp-27910
  - 33b3d8f5b3 Clarify that apache2-utils is for Debian-based distros
  - 8ca0bc823c Add dependency on apache2-utils

• PR #27944: (rallytime) Back-port #27909 to 2015.8 @ 2015-10-14 20:26:52 UTC
  - PR #27909: (twellspring) htpasswd module add comment about dependency on apache2-utils (refs: #27944)
• PR #27946: (justinta) Changed grain to look at osmajorrelease instead of osrelease @ 2015-10-14 19:54:08 UTC
  - f29ca5f87b Merge pull request #27946 from jтанd/pkgrepo-fix
  - d88ac2589f Changed grain to look at osmajorrelease instead of osrelease

• ISSUE #27815: (tbaker57) Documentation regarding associate_eip for EC2 profiles (refs: #27914)

• PR #27914: (rallytime) Use eipalloc instead of eni in EC2 interface properties example @ 2015-10-14 14:37:52 UTC
  - bb900d428b Merge pull request #27914 from rallytime/fix-27815
  - 13a9be9053 Use eipalloc instead of eni in EC2 interface properties example

• PR #27926: (rallytime) Back-port #27905 to 2015.8 @ 2015-10-14 14:35:37 UTC
  - PR #27905: (itsamenathan) Small documentation error for beacon disable (refs: #27926)
  - 679ce60905 Merge pull request #27926 from rallytime/bp-27905
  - 30e6b055ec Small documentation error fixed

• ISSUE #27911: (ryan-lane) rules_egress in boto_secgroup should not manage egress rules, if set to None (refs: #27927)

• PR #27927: (ryan-lane) Do not manage ingress or egress rules if set to None @ 2015-10-14 14:03:17 UTC
  - 3b4d86467b Merge pull request #27927 from lyft/boto_secgroup-fixes-2015.8
  - 0fedcc9a0b Update docs
  - 9cc65bba76 Do not manage ingress or egress rules if set to None

• PR #27928: (rallytime) Back-port #27908 to 2015.8 @ 2015-10-14 14:00:50 UTC
  - PR #27908: (lathama) Documentation note kwargs for mdadm state already mentioned in module (refs: #27928)
  - b0f9db409d Merge pull request #27928 from rallytime/bp-27908
  - 7feb06223 Sneaky white space
  - 31d54bbe63 Note kwags for mdadm in state

• ISSUE #27661: (alf) The dockerng module uses deprecated API in docker-py (refs: #27676)

• PR #27676: (ticosax) [dockerng] WIP No more runtime args passed to docker.start() @ 2015-10-14 13:38:41 UTC
  - 2d0b16559e Merge pull request #27676 from ticosax/no-more-arg-to-docker-start
  - a1d0ba392f fixup! Do not pass any argument to docker.start
  - 8cddbb15c4 prevent potential error while reporting mismatch versions to user.
  - 65e8762e1f Do not pass any argument to docker.start
  - d8cca2a009 docker.version_info is now provided.

• PR #27885: (basepi) [2015.8] Merge forward from 2015.5 to 2015.8 @ 2015-10-13 22:44:20 UTC
  - 722327ee5f Merge pull request #27885 from basepi/merge-forward-2015.8
  - 5ecd5615f2 Remove failing heavily-mocked test
- 3b5e16db67 Merge remote-tracking branch ‘upstream/2015.5’ into merge-forward-2015.8
  - c9c3b7760e Merge pull request #27726 from jfindlay/hashhosts
    - ebce47de7c add docs to ssh.recv_known_host exec module fcn
    - b6ee16b1e5 deprecate hash_hostname in favor of hash_known_hosts
  - 18e31584b0 Merge pull request #27776 from jfindlay/local_msg
    - 03afa3cf8a return message when local jobs_cache not found
  - 86cc7b5537 Merge pull request #27766 from jfindlay/debmail
    - ee7bda2c27 better check for deb del error
  - c224386ec9 Merge pull request #27758 from iggy/patch-1
    - 0994b6a8c Remove redundant text from syslog returner
  - 34a005041f Merge pull request #27841 from terminalmage/issue27832
    - 8e09bd6a3 Detect Manjaro Linux as Arch derivative
  - 3944a498ad Merge pull request #27852 from rallytime/bp-27806
    - a84bf18bc4 Empty string is falsy
  - 7508a1c474 Merge pull request #27838 from basepi/fx.runner.highstate.outputter.27831
    - 8ae9b66d19 Don’t pop ‘outputter’, we expect it further down
  - d178315f93 Merge pull request #27791 from ego/2015.5-postgres-user-groups-backport
    - 2cafc1d21d6 fix test
    - bc90c5bfe improve change reporting for postgres_user groups
    - 8712be91a backport postgres_user groups

- ISSUE #26908: (twangboy) Fix service.restart salt-minion for other locales (refs: #27882)
- ISSUE #26906: (mblixter) Bug fix #22020 causes a new bug due to the expected date format for the /SD parameter in schtask.exe (refs: #27882)
- PR #27882: (twangboy) Created win_task.py module @ 2015-10-13 16:54:13 UTC
  - 36f05fb526 Merge pull request #27882 from twangboy/win_task_module
  - 56c3f3eb2 Fixed an egregious error with an import
  - 07939ea29c More lint
  - 14e060ed9c Fixed some tests
  - 1e1b29426 Fixed some lint
  - 082277a727 Win_service.py to use the new task module
  - 2212b52620 Created win_task.py module
- ISSUE #27738: (fphhotchips) Git Pillar locks not managed by fileserver runner (refs: #27802)
- PR #27802: (terminalmage) Correct warning logging when update lock is present for git_pillar/winrepo, add runner function for clearing git_pillar/winrepo locks @ 2015-10-13 15:09:11 UTC
  - 577191696d Merge pull request #27802 from terminalmage/issue27738
  - 1db3b5489 Fix comment in docstring that trailed off mid-sentence
  - 94b5fc572f Process both old and ng winrepo configs when clearing git locks
- 7f4366d42e Add CLI example
- 3952c66888 Change log message to reflect new runner function
- c00ef7188f Add cache.clear_git_lock runner function
- d7ca297f7b Add salt.fileserver.clear_lock()
- 947ed5f739 Clarify docstring

• ISSUE #26632: (ryanwalder) postgres_user crashes when trying to add groups formed in a list (refs: #27886)

• PR #27886: (rallytime) Handle group lists as well as comma-separated group strings. @ 2015-10-13 15:00:10 UTC
  - d655bb3616 Merge pull request #27886 from rallytime/fix-26632
  - d235abf907 Handle group lists as well as comma-separated group strings.

• ISSUE #26313: (anlutro) Timezone module error when timedatectl fails to query server (refs: #27746)

• PR #27746: (anlutro) timezone module: handle timedatectl errors @ 2015-10-13 14:55:27 UTC
  - a158cd50e6 Merge pull request #27746 from alprs/fix-timedatectl_failure
  - f616b550b2 lint - use indexed curly brace formatting
  - bc0f167850 update timezone mod unit tests for errors
  - ef26f067b2 timezone module: handle timedatectl errors

• ISSUE #27710: (anlutro) salt-ssh and system.reboot/shutdown (refs: #27816)

• PR #27816: (anlutro) Make system.reboot use shutdown -r when available @ 2015-10-13 14:52:06 UTC
  - 9dc19ca979 Merge pull request #27816 from alprs/fix-reboot_delay
  - 04ef51e524 make system.reboot use shutdown -r when available

• PR #27874: (rallytime) Add mention of Periodic Table naming scheme to deprecation docs @ 2015-10-13 14:51:45 UTC
  - dd92b8a2e3 Merge pull request #27874 from rallytime/deprecation-docs
  - 8e506ba501 Add mention of Periodic Table naming scheme to deprecation docs

• PR #27883: (terminalmage) Work around --is-ancestor not being present in git-merge-base before git 1.8.0 @ 2015-10-13 14:51:27 UTC
  - 7f96ebd69e Merge pull request #27883 from terminalmage/git-merge-base-is_ancestor
  - 45c666e8dd Work around --is-ancestor not being present in git-merge-base before git 1.8.0
  - 38d715ec0a Remove redundant SaltInvocationError raises

• ISSUE #21411: (yermulnik) cli option '--summary' got broken after upgrade to 2015.5.1 (refs: #24732)

• PR #27877: (rallytime) Back-port #27774 to 2015.8 @ 2015-10-13 14:50:45 UTC
  - PR #27774: (plastikos) Summary is not correctly inspecting return data to identify not responding minions (refs: #27877)
  - PR #27099: (plastikos) Fix access to ret parameter of _print_returns_summary() (reverts 54b33dd35948 #24732) (refs: #27774)
  - PR #24732: (msteed) Fix stacktrace when --summary is used (refs: #27099)
  - 4fb20d9b4f Merge pull request #27877 from rallytime/bp-27774
Summary is not correctly inspecting return data to identify not responding connected minions.

**ISSUE #26284:** (storner) `apache_module.enable` fails on SUSE (SLES 11 SP3) (refs: #27878)

**PR #27878:** (rallytime) Use `apache2ctl` binary on SUSE in `apache` module @ 2015-10-13 14:45:56 UTC
- 97da0a87e3 Merge pull request #27878 from rallytime/fix-26284
- 87f0d987a3 Use `apache2ctl` binary on SUSE in `apache` module

**PR #27879:** (cro) Add docs for 2015.8.2+ changes to proxies @ 2015-10-13 14:45:30 UTC
- 067968c0e4 Merge pull request #27879 from cro/proxydoc
- 5b33df9d19 Add docs for 2015.8.2+ changes

**PR #27731:** (cro) Add `__proxy__` to replace `opts["proxymodule"]` @ 2015-10-12 20:41:22 UTC
- 922e2018ef Merge pull request #27731 from cro/dunder_proxy
- ba3e423b87 Missing object item throws an AttributeError not a NameError.
- 4cf2b56df5 Lint.
- dc07245df2 @rallytime is awesome. Moved proxy=None to end of def minion_mods
- 3152d8ee3f Minor loader fix
- b15083d719 Flip sense of test for grains load at end of regular minion startup
- 37c145bcd5 More places where `salt.state.State` needs a proxy param, `sysmod` had wrong `__proxyenabled__`, `core` grains were checking for `proxy` the wrong way.
- ed23f36279 One more check for presence of `__proxy__`
- 62d9f5092e what was I thinking?
- ccf366e1a5 Lint
- 8ae6e8aa9 Fix comment
- 48f9755103 Oops, forgot temp var.
- f0360ca00e More cleanup, found another spot where proxy needed to be passed to a `load_modules`.
- 81a4abfe5a `__proxy__` is getting nuked somewhere
- f9461ff298 Add config option so old-style proxymodules will keep loading
- 3d6ed5b7ff Remove debug statement.
- b5a19a9740 Enable syncing proxymodules from the master. Proxymodules can go in `/srv/salt/_proxy`
- f878011543 Lint, and some parameter fixes to add `proxy=` to some overridden `load_modules` fn.
- 22f035d8eb Remove debug statement
- 4432499b45 More progress toward `__proxy__`
- 1a229c17b2 Further work on `__proxy__`
- 85fd6a41c7 One more check for presence of `__proxy__`
- 15e1d3e3df Forgot `absolute_import`.
- c5d9d54f19 Fix py3 lint
- dd50c35543 This module was accidentally overwriting core grains during tests.
- 525256fa68 Some calls to `highstate` won't have `__proxy__` in scope
- a615e5a876 what was I thinking?
- fae3f3ca83 Lint
- b049377cbe Remove rest_sample_test, it wasn’t testing anything
- 42188480d4 Fix comment
- 4112c583e4 Oops, forgot temp var.
- e9b281041c More cleanup, found another spot where proxy needed to be passed to a load_modules.
- 64f967d731 __proxy__ is getting nuked somewhere
- bddf9f57b Add config option so old-style proxymodules will keep loading
- b79b6a39dd Remove debug statement.
- 02fc2d9323 Enable syncing proxymodules from the master. Proxymodules can go in /srv/salt/_proxy.
- 72032650b8 Add __proxy__ to the list of builtins.
- 1032ad28fc Remove debug statement
- c41e49d8e5 Make sure that the __proxy__ gets passed all the way into the state system.
- 4a20d48b35 More progress toward __proxy__
- d337f4329e Further work on __proxy__

- ISSUE #26904: (anlutro) pip install --upgrade with virtualenv.managed? (refs: #27745)
- PR #27745: (anlutro) Add pip_upgrade arg to virtualenv.managed state @ 2015-10-12 16:11:02 UTC
  - 64f003f8b2 Merge pull request #27745 from alprs/virtualenv_pip_upgrade
  - 4bd219f8d4 add pip_upgrade arg to virtualenv.managed state, clean up docstring
- PR #27809: (ticosax) [dockerng] Remove dockerng.ps caching @ 2015-10-12 16:07:48 UTC
  - 69bf477336 Merge pull request #27809 from ticosax/remove-dockerng.ps-caching
  - 0eb1145856 Remove caching to prevent returning stale data from dockerng.ps
- PR #27859: (ticosax) [dockerng] Clarify doc port bindings @ 2015-10-12 16:06:27 UTC
  - e96d6d71a Merge pull request #27859 from ticosax/clarify-doc-port-bindings
  - 75f7a3ec55 Must be a string

- ISSUE #8646: (micahhausler) Make the clean parameter in the file.directory state respect foreign require_in (refs: #27748)
- PR #27748: (multani) Fix #8646 @ 2015-10-12 15:55:57 UTC
  - ba2a39d4b7 Merge pull request #27748 from multani/fix-8646
  - 6d95c6998 Fix lint errors
  - 4ff9f4be2a Fix file.directory with clean=true and require_in with states ID
  - 0d391275de Test cases to demonstrate bug #8646
- ISSUE #27721: (ldobson) boto_cloudwatch_alarm.present returns diff on no change (refs: #27722)
- PR #27850: (rallytime) Back-port #27722 to 2015.8 @ 2015-10-12 15:31:58 UTC

- 33936605a0 Sorted compare for alarm actions

• PR #27851: (rallytime) Back-port #27771 to 2015.8 @ 2015-10-12 15:31:06 UTC
  - PR #27771: (srkunze) [VIRTUALENV_MOD] added docs strings to explain parameters (refs: #27851)
  - c95437a710 Merge pull request #27851 from rallytime/bp-27771
  - 144a743503 added docs strings to explain parameters

• ISSUE #27789: (eduheraiz) UnicodeDecodeError: ‘ascii’ codec can't decode byte in 2015.8.0 (refs: #28340, #27833)

• PR #27833: (jfindlay) decode path before string ops in fileclient @ 2015-10-12 15:26:39 UTC
  - a41b59bf6e Merge pull request #27833 from jfindlay/path_decode
  - 66c74e591e decode path before string ops in fileclient

• ISSUE #27804: (chrismcmacken) cmd.run/cmd.run_all documentation contradictory for python_shell argument (refs: #27837)

• PR #27837: (jfindlay) reverse truth in python_shell documentation @ 2015-10-12 15:25:13 UTC
  - e264db7702 Merge pull request #27837 from jfindlay/true_shell
  - 1c9708a457 reverse truth in python_shell documentation

• PR #27860: (flavio) Fix OS related grains on openSUSE and SUSE Linux Enterprise @ 2015-10-12 15:22:59 UTC
  - aec838744 Merge pull request #27860 from flavio/fix-os-grains-on-suse-and-opensuse
  - fc8d296d72 Fix OS related grains on openSUSE and SUSE Linux Enterprise

• PR #27768: (rallytime) Clean up bootstrap function to be slightly cleaner @ 2015-10-12 15:06:54 UTC
  - 4ac5344c31 Merge pull request #27768 from rallytime/cleanup_bootstrap
  - 9df6e106c3 Clean up bootstrap function to be slightly cleaner

• PR #27797: (ismb) Zypper module clusterfix @ 2015-10-12 15:06:02 UTC
  - e1bd91e392 Merge pull request #27797 from ismb/ismb-zypper-fixes
  - 36281f6b06 Bugfix: crash if no package specified on adding a lock
  - 29806a1a9 Bugfix: crash if no package specified on removing lock
  - 453a18ea15 Return an actual amount of removed locks.
  - eaa6af9898 Bugfix: sometimes error goes to the STDOUT instead of STDERR in the RPM
  - 350340dafa Bugfix: use boolean type instead of string "Yes" or "No" (NOTE: this was forgotten)
  - decb989eb4 Bugfix and refactor due to the crash on unknown package and incorrect return value
  - a6c285bd12 Initialization fix
  - 510dedd29f Bugfix: newer Zypper includes also a version of installed package
  - f9be516de Bugfix: broken "upgrade_available" and should always return dict.

• ISSUE #27821: (leodus) Deploy VM on Proxmox requires 'size' configuration setting? Not according the docs! (refs: #27849)

• PR #27849: (rallytime) Don't require a size parameter for proxmox profiles @ 2015-10-11 01:33:28 UTC
  - 286b08a0f5 Merge pull request #27849 from rallytime/fix-27821
- bf17c7d48 Don’t require a size parameter for proxmox profiles

- **PR #27827**: (techhat) Add additional error checking to SPM @ 2015-10-09 18:23:09 UTC
  - 4a69db217cd Merge pull request #27827 from techhat/spmfixes
  - f8c68f223b Add additional error checking to SPM

- **ISSUE #27825**: (martinhoefling) Salt-api is not adding cors headers if auth fails (refs: #27826)

- **PR #27826**: (martinhoefling) Fixes #27825 @ 2015-10-09 16:08:05 UTC
  - 9bc19ba7d2 Merge pull request #27826 from martinhoefling/fix-27825
  - 401e7de33d Fixes #27825

- **PR #27824**: (techhat) Update Azure errors @ 2015-10-09 15:25:14 UTC
  - 1e2dde12 Merge pull request #27824 from techhat/azureerrors
  - 5b2ac7099 Update Azure errors

- **PR #27795**: (eguven) better change reporting for postgres_user groups @ 2015-10-08 23:56:53 UTC
  - ec3566ef2 Merge pull request #27795 from eguven/2015.8-postgres_user-group-change
  - f4fed412 better change reporting for postgres_user groups

- **ISSUE #27703**: (ryan-lane) git.latest seems to ignore the user argument in 2015.8 (refs: #27799)

- **PR #27799**: (terminalmage) Fix usage of identity file in git.latest @ 2015-10-08 23:36:19 UTC
  - 5420006209 Merge pull request #27799 from terminalmage/issue27703
  - 75d2b07b0c Pass user in calls to git.rev_parse
  - 786786a245 Fix wrong argument name for _git_run()

- **PR #27717**: (pass-by-value) Proxy beacon example @ 2015-10-08 22:58:49 UTC
  - 0533a2b1dd Merge pull request #27717 from pass-by-value/proxy_beacon_example
  - cac3da1fa Fix pylint error
  - 7fef5ea08c Make a call to beacon end point
  - 497f965c33 Comment
  - 8ad0702913 Add example beacon that works with salt-proxy

- **PR #27793**: (anlutro) update code that changes log level of salt-ssh shim command @ 2015-10-08 19:20:12 UTC
  - dd9db8f59 Merge pull request #27793 from alprs/fixed-salt_ssh_b64_log
  - 2597d15c8 update code that changes log level of salt-ssh shim command

- **ISSUE #27714**: (The-Loeki) 2015.8 git_pillar merge inconsistency/bug (refs: #27761)

- **PR #27761**: (terminalmage) Merge git pillar data instead of using dict.update() @ 2015-10-08 15:00:18 UTC
  - bbc874f6c5 Merge pull request #27761 from terminalmage/issue27714
  - d149905bb0 Merge git pillar data instead of using dict.update()

- **PR #27741**: (ticosax) [dockerng] pass filters argument to dockerng.ps @ 2015-10-08 03:40:14 UTC
  - 2ae7ada3c9 Merge pull request #27741 from ticosax/docker.containers-filters
  - 821ed72f37 pass filters argument to dockerng.ps

- **PR #27760**: (basepi) [2015.8] Merge forward from 2015.5 to 2015.8 @ 2015-10-07 19:11:17 UTC
- 82a51cebde Merge pull request #27760 from basepi/merge-forward-2015.8
- 35425b14ad Merge remote-tracking branch 'upstream/2015.5' into merge-forward-2015.8
- b2937ba16 Merge pull request #27759 from basepi/merge-forward-2015.5
  * 792ee084bb Merge remote-tracking branch 'upstream/2014.7' into merge-forward-2015.5
  * d284eb165b Merge pull request #27390 from JaseFace/schedule-missing-enabled
  * 563db71bd Ensure we pass on the enable setting if present, or use the default of True if not in build_schedule_item() Prior to this, when schedule.present compares the existing schedule to the one crafted by this function, enabled will actually be removed at each run. schedule.present sees a modification needs to be made, and invokes schedule.modify, which does so with enabled: True, creating and endless loop of an 'enabled' removal and addition.
- 4b9128b491 Merge pull request #27732 from jacobhammons/26673
  * 75cc07cf10 noted that __virtual__ can return False and an error string
  * b928e1afa8 update docs for __virtual__ and __virtualname__ Refs #26673
- a130896d1c Merge pull request #27747 from Sacro/fix-chocolatey-version
  * 8f1fa9e78e Chocolatey doesn’t have a help command.
- 4e48651de0 Merge pull request #27733 from jacobhammons/bag-fixes
  * cbedc4f553 Updated saltstack2 theme to add SaltConf16 banner
  * 117e0c2bce Added hardening topic based on the information in Refs #27088
- c58da846bf Merge pull request #27706 from jacobhammons/bag-fixes
  * 76d6e8711b Assorted doc bugs Refs #9051 Refs #13407 Refs #21475 Refs #14876 Refs #27005
- 43fba89865 Merge pull request #27695 from rallytime/bp-27671
  * 2a8828595 Added skip test_ext_pillar_env_mapping if git module does not exist.
- cb3d92676e Merge pull request #27524 from jfindlay/pkgng_quiet
  * 5e9107b970 parse pkgng output in quiet mode for >= 1.6.0
- 5b88c55cc3 Merge pull request #27686 from rallytime/bp-27476
  * 3e08d3de8a fix for: https://github.com/saltstack/salt/issues/27373
- f9ddd4647f Merge pull request #27684 from rallytime/bp-27656
  * d3780ca00 Fix #27655: handling of success in postgres_local_cache
- 7ca6f854ff Merge pull request #27683 from rallytime/bp-27659

Chapter 28. Release Notes

- 579f2646ba .. versionadded:: 2015.5.6
- cbaf46e066 python <2.7 compatibility (pylint issue)
- ecede499478 s/bin/b to avoid confusion with bin()
- 4237c5db80 add a __virtual__ to check that daemontools is installed properly
- 623935a1bc fix doc
- 573de3abd6 fix pylint issue
- 5eb6a30d40 fix pep8 issues
- 298cf4f5c0 import missing logging module
- fe0ad36609 log was missing
- e457083465 s/systemd/FreeBSD
- 3512712e89 forgot service name..
- 8f193a7bcc fixes

- 7d7b97eab6 Merge pull request #27442 from JaseFace/fix-27391-for-2015.5
  - bbf636e1cc Ensure we pass on the enable setting if present, or use the default of True if not in build_schedule_item() Prior to this, when schedule.present compares the existing schedule to the one crafted by this function, enabled will actually be removed at each run. schedule.present sees a modification needs to be made, and invokes schedule.modify, which does so with enabled: True, creating and endless loop of an 'enabled' removal and addition.

- ccbba8656b Merge pull request #27641 from rallytime/gate-psutil-diskusage
  - da2d93a3dd Gate the psutil import and add depends doc for diskusage beacon

- 09183994f9 Merge pull request #27644 from rallytime/bp-27640
  - a9063a9745 fix typo in default pillar path

- 27fccc6cbe Merge pull request #27612 from rallytime/fix-27609
  - 8dc047dc18 If external_up is set to None, don’t stacktrace, just use the private ip.
  - 2ebf790f9f [salt-cloud] gce: don’t stacktrace if ephemeral is given instead of ephemeral

- c84a1edc1b Merge pull request #27568 from jacobhammons/man-pages-five
  - b59e03d20d regenerated man pages

- 304dc687f7 Merge pull request #27582 from jfindlay/2015.5
  - 4f0d55cda6 add 2015.5.6 release notes

- 7201ce71e4 Merge pull request #27557 from jfindlay/mine_doc
  - 3727d79bad edit mine doc for style and markup
  - 7e037a4666 add doc motivating mine vs grains

- 59c3d5f93e Merge pull request #27515 from jfindlay/suse_fire
  - 4460ad2785 save iptables rules on SuSE

- 9b26357b19 Merge pull request #27509 from jfindlay/gluster_reason
  - 1ccda538d2 tell the user why the gluster module does not work

- 989733ea86 Merge pull request #27379 from jfindlay/pip_vars
– aee51ffdef document and check dict type for pip env_vars

• ISSUE #27643: (blueyed) Please document extended return values of __virtual__ (refs: #27724)
• ISSUE #26755: (loriegordon) Associate package dependencies to modules/states? (refs: #27724)
• PR #27775: (jfindlay) fix virtual fcn return doc indentation @ 2015-10-07 17:50:18 UTC
  – PR #27724: (jfindlay) update __virtual__ return documentation (refs: #27757)
  – PR #27116: (jacobhammons) Update latest to 2015.8, 2015.5 is now previous (refs: #27724)
  – aced4229cb Merge pull request #27757 from jfindlay/virtret
  – 03400e45b fix virtual fcn return doc indentation
• ISSUE #27636: (brian-bk) Salt-ssh cannot do simple state 'test.nop': "'test.nop' is not available." (refs: #27754)
• PR #27754: (rallytime) Change test.nop version directive to 2015.8.1 @ 2015-10-07 15:59:55 UTC
  – 57b5b594bd Merge pull request #27754 from rallytime/fix-27636
  – 3189852d9a Change test.nop version directive to 2015.8.1
• PR #27734: (jacobhammons) Updated saltstack2 theme to add SaltConf16 banner @ 2015-10-07 01:43:53 UTC
  – 9a0171089d Merge pull request #27734 from jacobhammons/theme-updates
  – 3a52d3606b Updated saltstack2 theme to add SaltConf16 banner
• ISSUE #27595: (ralphvanetten) Debian package does not depend on python-m2crypto which is required by the x509 state/module (refs: #27719)
• PR #27727: (rallytime) Merge #27719 w/pylint fix @ 2015-10-06 21:13:37 UTC
  – PR #27719: (jfindlay) tell user when x509 exec/state module can't load (refs: #27727)
  – d3f2fde835 Merge pull request #27727 from rallytime/merge-27719
  – a7fd156162 Pylint
  – 6bf2ee2751 tell user when x509 exec/state module can't load
• ISSUE #27643: (blueyed) Please document extended return values of __virtual__ (refs: #27724)
• ISSUE #26755: (loriegordon) Associate package dependencies to modules/states? (refs: #27724)
• PR #27724: (jfindlay) update __virtual__ return documentation (refs: #27757) @ 2015-10-06 21:06:47 UTC
  – PR #27116: (jacobhammons) Update latest to 2015.8, 2015.5 is now previous (refs: #27724)
  – f26bcd2d21 Merge pull request #27724 from jfindlay/virtret
  – 6bdf80546 update __virtual__ return documentation
• ISSUE #27481: (basepi) Fix issues with cross-calling states (refs: #27725)
• PR #27725: (basepi) Fix global injection for state cross calls @ 2015-10-06 21:02:15 UTC
  – d67e8c5c2c Merge pull request #27725 from basepi/states.cross.call.27481
  – e12269d871 Remove unused import
  – 4e6505b2e7 Return the wrapper (whoops)
  – fadb954676 Use new method for injecting globals into state functions
  – 17b267470a Add decorator for injecting globals into functions in the loader
• PR #27628: (ticosax) [dockerng] Add support of labels parameter for dockerng @ 2015-10-06 13:58:40 UTC
- 06e67d25f8 Merge pull request #27628 from ticosax/dockerng-container-label
- edf625c8b4 Add support of labels parameter for dockerng

- **ISSUE #26604:** (ari) Poor compound matcher documentation (2015.8 docs) (refs: #27704)
  - **PR #27704:** (jacobhammons) Update compound matcher docs to clarify the usage of alternate delimiters @ 2015-10-06 05:36:55 UTC
    - e47d849af6 Merge pull request #27704 from jacobhammons/26604
    - 1c51ce28a9 Update compound matcher docs to clarify the usage of alternate delimiters Refs #26604

- **PR #27705:** (rallytime) Merge #27602 with final pylint fix @ 2015-10-05 23:36:50 UTC
  - **PR #27602:** (blueyed) dockerng: fix/enhance version warning in __virtual__ (refs: #27705)
    - 2491ce40f1 Merge pull request #27705 from rallytime/merge-27602
  - 81aad83386 Ignore import error
    - 561d4cf94 dockerng: fix/enhance version warning in __virtual__
  - **ISSUE #13850:** (ryan-lane) s3:// urls in file.managed (and likely elsewhere) require s3.key and s3.keyid to be in minion config (refs: #27691)
  - **PR #27691:** (notpeter) Fastertimeout(3svs2min) for instance metadata lookups. #13850. @ 2015-10-05 22:55:52 UTC
    - b76eb08c68 Merge pull request #27691 from notpeter/iam_fail_faster
    - 3d948b3e42 Faster timeout (3s vs 2min) for instance metadata lookups. #13850.
  - **PR #27696:** (blueyed) loader.proxy: call _modules_dirs only once @ 2015-10-05 22:42:32 UTC
    - fc78f49d5c Merge pull request #27696 from blueyed/load-proxy-call-_module_dirs-only-once
    - 55a76b6c1 loader.proxy: call _modules_dirs only once
  - **PR #27630:** (ticosax) Expose container_id in mine.get_docker @ 2015-10-05 21:56:53 UTC
    - 77516912fa Merge pull request #27630 from ticosax/include-container-id-docker-mine
    - 7293ded2f6 fixup! Expose container_id in mine.get_docker
    - 9e56a7e9db Expose container_id in mine.get_docker
  - **PR #27600:** (blueyed) dockerng: use docker.version=auto by default @ 2015-10-05 21:29:14 UTC
    - 8453cb3eb1 Merge pull request #27600 from blueyed/dockerng-auto-version
    - 53c6e3bd3e dockerng: use docker.version=auto by default
  - **PR #27689:** (rallytime) Merge #27448 with test fixes @ 2015-10-05 21:17:41 UTC
    - **PR #27448:** (JaseFace) Ensure we pass on the enable setting if present, or use the default of True if not in build_schedule_item() (refs: #27689)
    - 7a4291008e Merge pull request #27689 from rallytime/fix-tests-27448
    - 05a506ec9f Use correct comment in test
    - 8296feb31 Merge #27448 with test fixes
    - d95e5f9f2f Ensure we pass on the enable setting if present, or use the default of True if not in build_schedule_item() Prior to this, when schedule.present compares the existing schedule to the one crafted by this function, enabled will actually be removed at each run. schedule.present sees a modification needs to be made, and invokes schedule.modify, which does so with enabled: True, creating and endless loop of an 'enabled' removal and addition.

Security Fix

CVE-2015-8034 Saving state.sls cache data to disk with insecure permissions

This affects users of the state.sls function. The state run cache on the minion was being created with incorrect permissions. This file could potentially contain sensitive data that was inserted via jinja into the state SLS files. The permissions for this file are now being set correctly. Thanks to zmalone for bringing this issue to our attention.

Changelog for v2015.8.2..v2015.8.3

• **PR #29173**: (jfindlay) add 2015.8.3 release notes @ 2015-11-25 00:07:51 UTC
  - 345206b68e Merge pull request #29173 from jfindlay/2015.8
  - 212f7dd281 add 2015.8.3 release notes
  - calbb49c6b add note on 2015.8.2 release notes

• **PR #29172**: (basepi) [2015.8] Backport new philips_hue proxy features from develop @ 2015-11-24 23:52:55 UTC
  - 5e88e9e9c0 Merge pull request #29172 from basepi/philips_backport
  - 1df6c3083b Backport new philips_hue proxy features from develop

• **PR #29167**: (basepi) [2015.8] Merge forward from 2015.5 to 2015.8 @ 2015-11-24 21:40:34 UTC
  - 2fb1ca0eac Merge pull request #29167 from basepi/merge-forward-2015.8
  - 525f9fbbbc Merge remote-tracking branch 'upstream/2015.5' into merge-forward-2015.8
  - a26c10a811 Merge pull request #29164 from jfindlay/bp-29113
    * 50fab35188 kill unneeded import
  - 4f03196e7d Merge pull request #29138 from jfindlay/2015.5
    * be045f5cb1 add 2015.5.8 release notes

• **PR #29141**: (optix2000) Add test case for require: sls with only import statements @ 2015-11-24 16:17:57 UTC
  - 68d6c454b8 Merge pull request #29141 from optix2000/full_sls_import
- Add test case for sls with only import Tests https://github.com/saltstack/salt/issues/10852
- ISSUE #29015: (jakehilton) git_pillar not honoring git_pillar_base (refs: #29072)
- ISSUE #28311: (stroocknar) git_pillar conflicts (refs: #29072)
- ISSUE #27432: (mafrosis) Using specific tag as GitFS remote (refs: #29072)
- PR #29072: (terminalmage) Several gitfs/git_pillar fixes @ 2015-11-24 16:04:39 UTC
  - 732f5364a2 Merge pull request #29072 from terminalmage/issue28311
  - dae738fd3 Use common code to detect envs
  - a9c0cab77 Don’t add head ref if head red matches desired ref
  - e7540e956 pygit2: Don’t clean local heads along with stale remote refs
  - 166c46f554 pygit2: Properly resolve base saltenv from tag ref
  - 0c592ab52 Support string whitelist/blacklist
  - 744487864d Fix base branch detection for git_pillar
  - 1cd94d1b4 Add some debug logging for git_pillar
  - fa588c0b Add HEAD ref in git_pillar/winrepo checkout
- PR #29118: (ticosax) [dockerng] Add networking capabilities @ 2015-11-24 15:47:36 UTC
  - 95689ee1d Merge pull request #29118 from ticosax/dockerng-network
  - e9f818d41 Expose docker networking as state
  - 94135d913 cosmetic
  - 17f5c1ab5 Add expose networking to modules.dockerng
- ISSUE #29144: (anlutro) Error in fileclient with file.managed (refs: #29145)
- PR #29145: (anlutro) Remove duplicate import of salt.utils.s3 @ 2015-11-24 15:36:05 UTC
  - 4b4f212d2d Merge pull request #29145 from alprs/fix-duplicate_import
  - e1101ea19 Remove duplicate import of salt.utils.s3
- ISSUE #29147: (lomeroe) boto_route53 unexpected keyword arguments in create_zone() (refs: #29148)
- PR #29148: (lomeroe) correcting parameter calls to boto get_zone/create_zone functions in ... @ 2015-11-24 15:33:53 UTC
  - 6079569580 Merge pull request #29148 from lomeroe/boto_route53_create_zone_fix-backport
  - 75408ccf99 correcting parameter calls to boto get_zone/create_zone functions in create_zone parameter check on create_zone on private_zone=True add boto version requirement
- ISSUE #29107: (lorenegordon) Salt hangs when passing a string representation as the length parameter to random.get_str() (refs: #29108)
- PR #29108: (lorenegordon) Enforce length as an int, fixes #29107 @ 2015-11-23 19:06:52 UTC
  - 17638c734b Merge pull request #29108 from lorenegordon/type-enforce-length
  - c71825d3b0 Enforce length as an int, fixes #29107
- PR #29125: (basepi) [2015.8] Merge forward from 2015.5 to 2015.8 @ 2015-11-23 18:48:46 UTC
  - 233ab9474 Merge pull request #29125 from basepi/merge-forward-2015.8
• 219367a23d Merge pull request #29128 from cachedout/tweak_29122
  - b08858b040 Missed check
  - 584efe81ee Set a safer default value for ret in saltmod
  - 8d86bc3056 Merge remote-tracking branch ’upstream/2015.5’ into merge-forward-2015.8
• 2250a36647 Merge pull request #29122 from cachedout/issue_29110
  - 4b9302d794 Fix broken state orchestration
• 200e771efb Merge pull request #29096 from rallytime/bp-29093
  - f5734423a4 Compare gem versions as a string.
• d8a2018bc8 Merge pull request #29084 from rallytime/bp-29055
  - 52e650aed9 Add section to style guide
• b5cff1a351 Merge pull request #29083 from rallytime/bp-29053
  - f1884de0e7 Update rabbitmq_user.py
• b3e3bebef0 Merge pull request #28932 from twangboy/fix_28928
  - 0653a04887 Fixed user.present / user.absent in windows
• a2e4a227e0 Merge pull request #29011 from rallytime/bp-28630
  - 7baccc1b05 Lint - newline before def
  - 9e5c16d4da Reading S3 credentials from Pillar
  - a3216f813d Fixed requests HTTPError handler, it was still in urllib2 style
• 1a4cd6002f Merge pull request #28892 from basepi/merge-forward-2015.5
  - bfbb109fbd Merge remote-tracking branch ’upstream/2014.7’ into merge-forward-2015.5
  - 4b8bdd0af7 Merge pull request #28839 from cachedout/revert_28740
  - 215b26c06f Revert #28740

• ISSUE #29005: (fcrozat) non-standard umask breaks salt-call call in salt-ssh (refs: #29126)
• ISSUE #28830: (fcrozat) non-standard umask breaks salt-ssh deployment (refs: #29126)
• PR #29126: (fcrozat) Fix deployment when umask is non-standard @ 2015-11-23 17:53:46 UTC
  - dc0d47fa2e Merge pull request #29126 from fcrozat/2015.8
  - 4da11a5f3c Fix deployment when umask is non-standard. Fixes #29005
  - bbcb752f9 Fix deployment when umask is non-standard. Fixes #28830
• PR #29124: (rallytime) Back-port #28130 to 2015.8 @ 2015-11-23 17:31:00 UTC
  - PR #29120: (alexproca) Import keypair (refs: #29124)
  - PR #28130: (bogdam) Ec2 upload public key and updated instances size list (refs: #29124)
  - 994d8bd71a Merge pull request #29124 from rallytime/bp-28130
  - e290ea4a3f Pylint Fix
  - 9d8e5c8b4d Added missing comma
  - 4a7ee08a8 Documented import_keypair for the ec2 driver
  - 715c12014c Added a bunch of instance sizes and updated some outdated ones
- PR #29076: (RealKelsar) We can’t query installed use flags for a non installed pkg @ 2015-11-23 16:19:40 UTC
  - d9c32011b4 Merge pull request #29076 from RealKelsar/2015.8
  - f3d1ba1509 We can’t query installed use flags for a non installed pkg. Also one if is enough...
  - 96566d3060 We can’t query installed use flags for a non installed pkg
- ISSUE #29100: (quantonganh) boto_ec2.exists does not use region when checking? (refs: #29070)
- PR #29097: (rallytime) Back-port #29070 to 2015.8 @ 2015-11-22 17:03:04 UTC
  - PR #29070: (quantonganh) boto_ec2: missing region when checking existence of an EC2 instance (refs: #29097)
  - 1931870f26 Merge pull request #29097 from rallytime/bp-29070
  - 3b202efadc boto_ec2: missing region when checking existence of an EC2 instance
- PR #29090: (gtmanfred) clean up novaclient module @ 2015-11-21 15:43:58 UTC
  - bb28b9186b Merge pull request #29090 from gtmanfred/2015.8
  - 2aab45f9d2 clean up novaclient module
- PR #29095: (terminalmage) Add warning about pygit2 API instability @ 2015-11-21 15:38:59 UTC
  - 4ff54c6429 Merge pull request #29095 from terminalmage/pygit2-warning
  - 139f5ba4c3 Add warning about pygit2 API instability
- PR #28919: (cro) Update Philips Hue proxy minion to support __proxy__ instead of proxymodule stored in __opts__ @ 2015-11-21 15:31:36 UTC
  - 27160b0454 Merge pull request #28919 from cro/hue_proxy_backport
  - 8823225c81 Add 'versionadded'
  - 6bd9f8d2c6 Backport philips_hue_proxy module to 2015.8, use __proxy__ instead of opts['proxymodule']
  - 0945d3b5b2 Add the license
  - a8be2d7382 Fix the docstring
  - 13a8973f94 Validate if "requests" are around. NOTE: this will be changed soon!
  - 835e84181b Fix the documentation
  - 68ac6f6180 Allow view status from all lamps, if not specified
  - 96ade9ca9 Fix lint issues
  - cd00c5d99f Remove dead code
  - 6a08d2b6b5 Implement static grains for the Philips HUE
  - 5d3c3e09fc Bugfix: show all devices, if no specific IDs were passed
  - 76e86d2d7d Implement color temperature
  - a2d87a18cc Fix the documentation
  - adecb49d4 Implement brightness
  - a2b1a71e01 Fix crash if the controller is down
  - a7d5aafbe3 Update documentation for the color settings
  - 15f83e180d Add more preset colors

28.2. Previous Releases

5297
- 44339f3dc1 Implement color setter with transition
- 0f4d5b9eac Implement effects method
- f341910174 Implement alert function
- e0c95b4c7f Separate device (lamps) getter
- 37ed834a63 Implement lamp rename
- 66b155c3db Enhance _set method so it can set more than just lights status
- 8e94aad5c1 Enhance internal ping report on failures (device is not reachable)
- 3bf79e6920 Implement blink function
- 334371d660 Use blink on internal ping
- a8e4c2162c Fix bug: call in a proper order, if all devices
- a98d5187f8 Remove the debug
- a1244223bf Enhance switch method
- e902764e25 Switch all lamps if IDs are not passed
- 1e508e9155 Fix bug: crash, if only one lamp ID is passed
- c0e6706d9a Implement status
- 6d8e66e23 Fix lint
- db053fbd8b Add licence
- 2abdb19934 Implement proxy minion configuration
- 1a75be4f71 Cleanup code
- 1a46a180bc Implement light switch ON/OFF
- cc5ee382c5 Implement lights method.
- bfb4160b2 Add constants class-struct
- 7a8d72e3f Implement device state change
- d769bc85a Implement available device listing
- e9e7f4dc18 Cleanup code
- 5503b6f20e Implement Philips HUE wrapper caller for Minion Proxy
- 1b11d1ec74 Initial implementation of Philips HUE proxy

• ISSUE #28810: (syedaali) test.ping is not available (refs: #29065)
• ISSUE #28761: (syedaali) Numerous module import errors in /var/log/salt/minion (test,oracle,archive) (refs: #29065)
• ISSUE #25756: (nshalman) Esky builds on SmartOS broken in 2015.5 branch (refs: #25946, #25923)
• PR #29065: (cachedout) Handle failures inside python's inspect if a module is reloaded @ 2015-11-20 18:10:42 UTC
  - PR #25946: (sjorge) Fix for salt.utils.decorators under esky (refs: #29065)
  - PR #25923: (sjorge) Fix for salt.utils.decorators and module._name_ under esky (refs: #25946)
  - 88c0354c0c Merge pull request #29065 from cachedout/issue_28810
  - 4767503eb2 Remove trailing whitespace
- c5b667f048 Handle failures inside python's inspect if a module is reloaded

- **PR #29057**: (paulnivin) Add local file support for file.managed source list @ 2015-11-19 21:57:34 UTC
  - 714ef8ff27 Merge pull request #29057 from lyft/file-manage-local-source-list
  - 3d7aa19cd8 Support local files in list of sources
  - d175061c5d Add tests for file.source_list with local files
  - 4f8e2a30fe Update documentation to clarify URL support for lists of sources with file.managed

- **ISSUE #28981**: (mimianddaniel) 2015.8.2 import pagerduty error (refs: #29017)

- **PR #29017**: (jfindlay) pagerduty runner: add missing salt.utils import @ 2015-11-19 19:28:35 UTC
  - f4f43381fc Merge pull request #29017 from jfindlay/pager_util
  - 5cc06207fe pagerduty runner: add missing salt.utils import

- **PR #29039**: (anlutro) Allow passing list of pip packages to virtualenv.managed @ 2015-11-19 19:13:50 UTC
  - 1c61bce0a6 Merge pull request #29039 from alprs/feature-virtualenv_pip_pkgs
  - f9bf51382 allow passing list of pip packages to virtualenv.managed

- **PR #29047**: (schwing) Fix salt.modules.gpg.import_key exception: 'GPG_1_3_1 referenced before assignment' @ 2015-11-19 19:07:36 UTC
  - b692ab1cfb Merge pull request #29047 from schwing/fix-gpg-exception
  - 813666808 Fix 'GPG_1_3_1 referenced before assignment'

- **PR #29050**: (terminalmage) Make git_pillar global config option docs more prominent @ 2015-11-19 19:06:38 UTC
  - b4fc2f28a4 Merge pull request #29050 from terminalmage/issue29015
  - 20da057a94 Make git_pillar global config option docs more prominent

- **PR #29048**: (nmadhok) Fix incorrect debug log statement @ 2015-11-19 19:04:10 UTC
  - 4b3b2fe1e7 Merge pull request #29048 from nmadhok/patch-1
  - 9489d6c3b6 Update vmware.py

- **PR #29024**: (jfindlay) cache runner test: add new unit tests @ 2015-11-19 19:02:54 UTC
  - e52c117368 Merge pull request #29024 from jfindlay/run_test
  - 0c0be3e3a6 cache runner test: add new unit tests

- **PR #28967**: (cro) Fix some issues with password changes @ 2015-11-19 18:57:39 UTC
  - bcec8d8608 Merge pull request #28967 from cro/fx2_switch
  - 67b5b9b8d2 Add docs on automatic lockout on failed auth attempts.
  - 8a38e4d95 Lint.
  - 040955ce74 Prevent stacktrace if something goes wrong retrieving inventory
  - 97bce1a55 Don't need to get grains at ini time here now that we are confirming username and password differently.
  - e42100cf8a Switch from admin_password and fallback_admin_password to a list of passwords to try.
  - 4b382e977d Add 'versionadded''

- **ISSUE #8516**: (xoJiog) salt-ssh not working with nodegroups and lists (refs: #29020)
• **PR #29020**: (basepi) [2015.8] Add special list-only nodegroup support to salt-ssh @ 2015-11-18 21:15:50 UTC
  - 14b5d0ed0f Merge pull request #29020 from basepi/salt-ssh.nodegroups.8516
  - 6433aabf36f Rename ssh_nodegroups to ssh_list_nodegroups
  - bd8487b3b9 Properly save minion list in local_cache for ssh jobs
  - 4b1bf7d5e2 Add support for comma separated list matching in salt-ssh
  - 65c6528cbc Add "nodegroup" matching to salt-ssh
  - 688a78c08c Add new ssh_nodegroups config

• **ISSUE #28911**: (ccmills) GitFS numeric tags cause errors with environments (refs: #28970)

• **PR #28970**: (terminalmage) Properly handle non-string saltenvs @ 2015-11-18 20:38:41 UTC
  - 89801b172a Merge pull request #28970 from terminalmage/issue28911
  - ec64ec85d6 Force file_roots environments to be strings
  - bd8487b3b9 Rename ssh_nodegroups to ssh_list_nodegroups

• **ISSUE #28945**: (rallytime) Dell Chassis State Example Improvements (refs: #28959)

• **PR #28959**: (rallytime) Add blade password example and make note of timeout @ 2015-11-18 19:39:04 UTC
  - 83c54351c9 Merge pull request #28959 from rallytime/fix-28945
  - 2f326b57bf Clarify chassis password functionality
  - b2690140c7 Properly handle non-string saltenvs

• **PR #29000**: (kiorky) [Mergeable] Fix up LXC @ 2015-11-18 18:02:47 UTC
  - d8dc81bb2c Merge pull request #29000 from kiorky/2015.8_lxc
  - 43fb0eff02 lxc: remove useless and error prone uses_systemd knob
  - 7ec08cd41c Fix bootstrap delay kwarg exchange

• **ISSUE #28995**: (timcharper) systemd.get_all broken on non-bsd systems / salt-bootstrap failure (refs: #29014)

• **PR #29014**: (jfindlay) systemd module: remove unneeded col command @ 2015-11-18 17:58:59 UTC
  - eedd50e7c3 Merge pull request #29014 from jfindlay/sysctl_col
  - d75e4d5d21 systemd module: line wrap function comment
  - 960d2b936d systemd module: remove unneeded col command

• **PR #28983**: (basepi) [2015.8] Merge forward from 2015.5 to 2015.8 @ 2015-11-18 00:49:36 UTC
  - ac85cfdbd0 Merge pull request #28983 from basepi/merge-forward-2015.8
  - f1c80ab943 Merge remote-tracking branch 'upstream/2015.5' into merge-forward-2015.8
  - ed26d763a Merge pull request #28949 from whiteinge/sync-sdb
    - 0ed6daaeb2b Add sync_sdb execution function
  - 43da1bc4ce Merge pull request #28930 from twangboy/fix_28888
    - 5f489eaad Added missing import mmap required by file.py
  - 2488b873b8 Merge pull request #28908 from rallytime/doc-convention-spelling
    - 6e6eddb77 A couple of spelling fixes for doc conventions page.
827a1ae020 Merge pull request #28902 from whiteinge/json-keys
  * 9745903301 Fix missing JSON support for /keys endpoint
-d23bd49130 Merge pull request #28897 from rallytime/bp-28873
  * 077e67ead Fix salt-cloud help output typo
-a9dc8b6ca6 Merge pull request #28871 from basepi/mdadm.fix.28870
  * 323bc2d2ac Fix command generation for mdadm.assemble
-ec7fde539b Merge pull request #28864 from jfindlay/2015.5
  * 648b697951 add 2015.5.7 release notes
-bed4f4208 Merge pull request #28731 from garethgreenaway/27392_2015_5_scheduler_return_job_master
  * 771e9f7b6f Fixing the salt scheduler so that it only attempts to return the job data to the master if the scheduled job is running from a minion's scheduler.
-06f4932876 Merge pull request #28857 from rallytime/bp-28851
  * aa4b193f87 [states/schedule] docstring: args, kwargs -> job_args, job_kwargs
-093a52b34 Merge pull request #28856 from rallytime/bp-28853
  * 37eeab2683 Typo (→ which)
• PR #28969: (rallytime) Back-port #28825 to 2015.8 @ 2015-11-17 20:43:30 UTC
  - PR #28825: (s0undt3ch) Take into account a pygit2 bug (refs: #28969)
  - f172a0ee03 Merge pull request #28969 from rallytime/bp-28825
  - 40f4ac5b21 Add missing import
  - 2c43da1578 Take into account a pygit2 bug
• ISSUE #28784: (chrigl) iptables.get_saved_rules tests pretty much useless (refs: #28787)
• ISSUE #28783: (chrigl) iptables.get_saved_rules does not handle family=ipv6 (refs: #28787)
• PR #28787: (chrigl) closes #28784 @ 2015-11-17 15:54:04 UTC
  - 1e9214f4e4 Merge pull request #28787 from chrigl/fix-28784
  - 8639e3e9c3 closes #28784
• PR #28944: (rallytime) The ret result must contain 'name', not 'chassis_name' for the state compiler. @ 2015-11-17 15:34:21 UTC
  - d6334575a Merge pull request #28944 from rallytime/dellchassis-state-name-fix
  - f3ea01bbfa Make sure dellchassis.blade_idrac has a name arg and a ret['name']
  - fb718539e9 The ret result must contain 'name', not 'chassis_name' for the state compiler
• PR #28957: (terminalmage) Fix version number for new state option @ 2015-11-17 15:33:50 UTC
  - fcef9f8995 Merge pull request #28957 from terminalmage/fix-docstring
  - f159000d82 Fix version number for new state option
• PR #28950: (DmitryKuzmenko) PR 28812 which test fix @ 2015-11-17 15:32:16 UTC
  - PR #28812: (isbm) Enhance 'which' decorator reliability (refs: #28950)
  - 5b680c938a Merge pull request #28950 from DSRCompany/pr/28812_which
  - 18571000c5 Fix which test in PR #28812`
- **PR #28812**: (isbm) Enhance ‘which’ decorator reliability (refs: #28950) @ 2015-11-17 15:32:10 UTC
  - 73719928f9 Merge pull request #28812 from isbm/isbm-which-decorator-enhancement
  - 20033eeeb7 Save modified environment path
  - 2d43199d20 Preserve 'first found first win' ordering
  - 1c59eedec2 Enhance ‘which’ decorator reliability for peculiar environments
- **PR #28934**: (terminalmage) git.latest: Add update_head option to prevent local HEAD from being updated @ 2015-11-17 15:15:16 UTC
  - facc34efed Merge pull request #28934 from terminalmage/issue27883
  - 6a35a39ca5 Add update_head option to git.latest
  - 3787f7ed00 Change return output of git.fetch to a dict
  - 9ca0f8f4a0 Add redirect_stderr argument to cmd.run_all
- **PR #28937**: (rallytime) Update dellchassis state example to use correct jinja syntax @ 2015-11-17 15:12:28 UTC
  - 7da93aad5b Merge pull request #28937 from rallytime/chassis-doc-fix
  - d53713ddba We only need one fancy pillar example to match our state.
  - e2926b1996 Update dellchassis state example to use correct jinja syntax
- **ISSUE #27961**: (ahammond) aggregate: False should disable aggregation even when state_aggregate: True enabled (refs: #28889)
- **PR #28889**: (jfindlay) state compiler: relax aggregate conditional check @ 2015-11-16 17:39:24 UTC
  - 16edba999e Merge pull request #28889 from jfindlay/aggregate
  - eb9970019a state compiler: relax aggregate conditional check
- **ISSUE #24803**: (cachedout) Rewrite GPG renderer tests (refs: #25470)
  - 91a327bbce Merge pull request #28921 from rallytime/bp-25470
  - 6a5b6682e6 log error and return ciphered txt on decrypt error
  - bc9750b85e refactor gpg renderer; removing dependency on python-gnupg
- **PR #28922**: (rallytime) Change 2015.8.2 release note title to reflect proper version @ 2015-11-16 16:47:33 UTC
  - 3707eb1e7c Merge pull request #28922 from rallytime/release-notes-ver
  - 26b6f8b57 rewrite GPG unit tests
  - de5b6682e6 log error and return ciphered txt on decrypt error
  - 6af8344fe3 updated logic to properly detect GPG_KEYDIR path
- **ISSUE #23971**: (dumol) Problems disabling a service in SLES11 SP3. (refs: #28891)
- **PR #28891**: (jfindlay) rh_service module: fix logic in _chkconfig_is_enabled @ 2015-11-16 02:44:14 UTC
- 23eae0d9e0 Merge pull request #28891 from jfindlay/chkconfig_check
- e32a9aab85 rh_service_chkconfig_is_enabled unit tests
- 5a93b7e53c rh_service module: fix logic in _chkconfig_is_enabled

- **ISSUE #24019**: (dumol) SUSE Linux Enterprise Server 11 SP3 not detected as SLES. (refs: #28892)
- **PR #28892**: (jfindlay) grains.core: correctly identify SLES 11 distrib_id @ 2015-11-16 02:30:30 UTC
  - 8e6ac97ae Merge pull request #28892 from jfindlay/sles_grain
  - 1cfdb500c9 grains.core: correctly identify SLES 11 distrib_id

- **PR #28910**: (loregordon) Fix winrepo command in windows pkg mgmt doc @ 2015-11-16 02:29:12 UTC
  - cf929c3847 Merge pull request #28910 from loregordon/patch-1
  - 6465398b3 Fix winrepo command in windows pkg mgmt doc

- **PR #28896**: (rallytime) Back-port #28855 to 2015.8 @ 2015-11-15 00:43:15 UTC
  - **PR #28855**: (tampakrap) fix the os grain in sle11sp4 to be SUSE instead of SLES (refs: #28896)
  - 7af06b9a790 Merge pull request #28896 from rallytime/bp-28855
  - baf238f270 fix the os grain in sle11sp4 to be SUSE instead of SLES

- **PR #28895**: (rallytime) Back-port #28823 to 2015.8 @ 2015-11-15 00:43:07 UTC
  - **PR #28823**: (tampakrap) Add support for priority and humanname in pkrepo zypper backend (refs: #28895)
  - 64dc3c23e0 Merge pull request #28895 from rallytime/bp-28823
  - d167a6b83d Add support for priority and humanname in pkrepo zypper backend

- **ISSUE #28754**: (kt97679) service.enabled fails on xen server (refs: #28885)
- **PR #28885**: (kt97679) fix for: service.enabled fails on xen server #28754 @ 2015-11-14 04:55:38 UTC
  - a45e78e20 Merge pull request #28885 from kt97679/2015.8
  - 7df01f11cb fix for: service.enabled fails on xen server #28754

- **PR #28880**: (terminalmage) Add "profile" loglevel @ 2015-11-14 02:07:25 UTC
  - 58b57c777e Merge pull request #28880 from terminalmage/profile-loglevel
  - a62852d407 Add @wraps decorator
  - cac9f17307 Add profile logging for template rendering
  - c62572f70 Add decorator to do profile-level logging for a function
  - 5a2b94ce39 Add "profile" loglevel

- **ISSUE #28881**: (basepi) salt-ssh stacktraces on first run (refs: #28882)
- **PR #28882**: (basepi) [2015.8] salt-ssh: Check return type to make sure it's an error @ 2015-11-14 00:14:46 UTC
  - 5dc7fccc07 Merge pull request #28882 from basepi/salt-ssh.stacktrace.28881
  - f1ac6ad607 Check return type to make sure it's actually an error

- **PR #28867**: (rallytime) [fx2 grains] Grains functions should return dictionaries @ 2015-11-13 21:14:13 UTC
  - 430e9376f6 Merge pull request #28867 from rallytime/fx2-grains-patch
  - 02cf5d230 [fx2 grains] Grains functions should return dictionaries

28.2. Previous Releases
ISSUE #28859: (mhoogendoorn) ebuild.install runs refresh_db() when refresh=False is given. (refs: #28863)

PR #28863: (mhoogendoorn) Fix ebuild.install causing extra refresh_db calls. @ 2015-11-13 18:46:03 UTC
- 304072456e Merge pull request #28863 from mhoogendoorn/fix-issue-28859
- eca09b89a4 Fix ebuild.install causing extra refresh_db calls.

28.2.70 Salt 2015.8.4 Release Notes

Version 2015.8.4 is a bugfix release for 2015.8.0.

Known Issues

- *_in requisites (issue #30820)
  This issue affects all users targeting an explicit - name: <name> with a _in requisite (such as watch_in or require_in). If you are not using explicit - name: <name> arguments, are targeting with the state ID instead of the name, or are not using _in requisites, then you should be safe to upgrade to 2015.8.4.
  
  This issue is resolved in the 2015.8.5 release.

Security Fix

CVE-2016-1866 Improper handling of clear messages on the minion, which could result in executing commands not sent by the master.

This issue affects only the 2015.8.x releases of Salt. In order for an attacker to use this attack vector, they would have to execute a successful attack on an existing TCP connection between minion and master on the pub port. It does not allow an external attacker to obtain the shared secret or decrypt any encrypted traffic between minion and master. Thank you to Sebastian Krahmer <krahmer@suse.com> for bringing this issue to our attention.

We recommend everyone upgrade to 2015.8.4 as soon as possible.
Core Changes

- Support for IAM roles added to S3 module
- Added option `mock=True` for `state.sls` and `state.highstate`. This allows the state compiler to process sls data in a state run without actually calling the state functions, thus providing feedback on the validity of the arguments used for the functions beyond the preprocessing validation provided by `state.show_sls` (issue #30118 and issue #30189).

```
salt '*' state.sls core,edit.vim mock=True
salt '*' state.highstate mock=True
salt '*' state.apply edit.vim mock=True
```

Changelog for v2015.8.3..v2015.8.4

- PR #30615: (jfindlay) add 2015.8.4 release notes @ 2016-01-25 18:11:02 UTC
  - 1c6c394d0e Merge pull request #30615 from jfindlay/2015.8
  - e4043403e4 add 2015.8.4 release notes
- PR #30612: (rallytime) Back-port #29940 to 2015.8 @ 2016-01-25 17:52:43 UTC
  - PR #29940: (dr4Ke) file.line: better diff (refs: #30612)
  - ec50581aad Merge pull request #30612 from rallytime/bp-29940
  - 3ebb8249d7 file.line: better diff
- PR #30613: (basepi) Fix minion/syndic clearfuncs @ 2016-01-25 17:40:59 UTC
  - 48373e0a9 Merge pull request #30613 from basepi/minion_clearfuncs_2015.8
  - a3c3182f39 Correctly handle clearfuncs on the syndic
  - 098e4335d Correct handle clearfuncs on the minion
- ISSUE #29601: (seanjnkns) pillars not merging properly with 2015.8.3 (refs: #30062)
- PR #30609: (seanjnkns) Fix documentation for pillar_merge_lists which default is False, not ... @ 2016-01-25 17:15:45 UTC
  - PR #30602: (seanjnkns) Remove recurse_list from pillar_source_merging_strategy and add pilla... (refs: #30609, #30458)
  - 89b4f3de1b Merge pull request #30609 from seanjnkns/backport_30602
  - 9924adcd43 Fix documentation for pillar_merge_lists which default is False, not True. From PR #30602
- PR #30584: (julianbrost) file.line state: add missing colon in docstring @ 2016-01-25 16:37:38 UTC
  - 24ead62c41 Merge pull request #30584 from julianbrost/fixedoc-line-missing-colon
  - 2a6b3e7f95b file.line state: add missing colon in docstring
- PR #30589: (terminalmage) Merge 2015.5 into 2015.8 @ 2016-01-25 16:20:41 UTC
  - a7ba2df5e2 Merge pull request #30589 from terminalmage/2015.5-2015.8
  - d649551f1b Merge branch '2015.5' into 2015.5-2015.8
    * a823e21428 Merge pull request #30582 from terminalmage/dnf-repoquery-multiple-targets
Chapter 28. Release Notes

- 410da789f9 yumpkg.check_db: run separate repoquery commands when multiple names passed
- 8e56be7f4c Merge pull request #30548 from jacobhammons/doc-fixes
  - 03c51bb54d Added placeholder release notes for 2015.5.10 Changed old doc links from docs.saltstack.org to docs.saltstack.com
- 1aaf4e5b5 Merge pull request #30530 from terminalmage/yumpkg-dnf-cleanup
  - 2586711b6f 2015.5 tweaks from #30529

- PR #30599: (multani) Documentation formatting fixes @ 2016-01-25 15:37:46 UTC
  - 3a55d11916 Merge pull request #30599 from multani/fix/docs
  - 038ec44cd For doc formatting of salt.states.module
  - 4062e3b9f Fix doc formatting for yaml_idiosyncrasies
  - 6efb77bc04 Fix doc formatting of salt.modules.parted
  - a329adfb21 Add missing salt.queues.* documentation
  - 2465cf4ba5 Remove non-existing documentation
  - 814e64c304 Fix documentation markup in salt.modules.osquery
  - d2614de169 Fix documentation markup for salt.modules.ipmi
  - 276e3a843 Fix GCE documentation

- ISSUE #10157: (martinb3) salt-cloud actions don't have very useful error messages (refs: #30554)

- PR #30554: (rallytime) Make the salt-cloud actions output more verbose and helpful @ 2016-01-22 20:23:18 UTC
  - b1e604add3 Merge pull request #30554 from rallytime/fix-10157
  - 6fa952f16d Make the salt-cloud actions output more verbose and helpful

- PR #30549: (techhat) Salt Virt cleanup @ 2016-01-22 18:45:18 UTC
  - 2eb5a3803d Merge pull request #30549 from techhat/virtcleanup
  - 9bba73cd0 Fix copy pasta
  - 6413c11f29 Salt Virt cleanup

- PR #30553: (techhat) AWS: Support 17-character IDs @ 2016-01-22 18:41:46 UTC
  - f63b183e43 Merge pull request #30553 from techhat/awsid
  - a95fbb44 Support 17-character IDs

- PR #30532: (whiteinge) Add execution module for working in sls files @ 2016-01-22 17:25:16 UTC
  - 05d05263ab Merge pull request #30532 from whiteinge/sslutil-mod
  - a57d998e44 Add sslutil to doc index
  - 155966c9d2 Add execution module for working in sls files

- PR #30529: (terminalmage) Merge 2015.5 into 2015.8 (refs: #30530) @ 2016-01-22 17:19:39 UTC
  - 1da1bb94cf Merge pull request #30529 from terminalmage/2015.5-2015.8
  - e85ad690fb Lint fixes
  - 43829eece6 Docstring tweaks
  - 92d5a2a49c Fix spelling
- fd60fc04a Modify pkg.group_installed to reflect changes in yumpkg.py
- a118eb5d2e Merge branch '2015.5' into 2015.5-2015.8
- 7798d42272 Merge pull request #30484 from terminalmage/dnf-yumpkg-2015.5
  * 330e26d1da Hide get_locked_packages
  * 5a637420e8 Backport DNF support to 2015.5 branch
- PR #30526: (twangboy) Added FlushKey to make sure its changes are saved to disk @ 2016-01-22 02:33:13 UTC
  - e3666fa7fd Merge pull request #30526 from twangboy/reg_flushkey
  - 23085fbb9b Added FlushKey to make sure its changes are saved to disk
- PR #30521: (basepi) [2015.8] Merge forward from 2015.5 to 2015.8 @ 2016-01-21 23:05:03 UTC
  - cdc731b8c5 Merge pull request #30521 from basepi/merge-forward-2015.8
  - f225f8851 Fix lint
  - 117fb205de Merge remote-tracking branch 'upstream/2015.5' into merge-forward-2015.8
    * b348f04b1 Merge pull request #30512 from jfindlay/repo_test
      - 660f62bd3 disable pkgrepo test for ubuntu 15.10+
    * a9348def8 Merge pull request #30478 from jtant/pip_8_update
      - 6227368830 Convert version to int, instead of comparing strings to ints
      - 20384a4810 Added InstallationError to except block
      - baa274ca9 Updated pip_state to work with pip 8.0
    * a30147c64f Merge pull request #30482 from borgstrom/pyobjects_recursive
      - 2c55a7580b Fixup lint errors
      - b46df04b5 Allow recursive salt:// imports
      - 51bfa16173 Add test to prove that recursive imports are currently broken
    * 5c7cc51937 Merge pull request #30459 from jfindlay/pkgs Tests
      - fb9972f590 modules.pkg: disable repo int test for ubuntu 15.10
    * dd2ce4c07 Merge pull request #30443 from jtant/boto_vpc_5
      - 2f77152479 Boto uses False for is_default instead of None
    * 62d9ddc9ed Merge pull request #30420 from attiasr/patch-1
      - 4de343c5a1 Backport #26853
- PR #30485: (justinta) Updated pip_state to work with pip 8.0 on 2015.8 @ 2016-01-21 22:55:38 UTC
  - 019af349af Merge pull request #30485 from jtant/pip_8_update_2015.8
  - 9cb17332fa Updated pip_state to work with pip 8.0 on 2015.8
- PR #30494: (isbm) Zypper: info_installed — 'errors' flag change to type 'boolean' @ 2016-01-21 22:55:05 UTC
  - 3259fe362 Merge pull request #30494 from isbm/isbm-zypper-nfoinst-bool-fix
  - 4d7659270e Place the boolean check
  - 58db1c0b16 Fix typo
  - 43254aa993 Update docstring according to the boolean flag
• PR #30506: (jacksontj) Properly remove newlines after reading the file @ 2016-01-21 22:53:57 UTC
  - 596892326d Merge pull request #30506 from jacksontj/2015.8
  - e1dea6843 Properly remove newlines after reading the file

• ISSUE #30444: (dnd) Cloning linode server with salt-cloud fails trying to create disk config (refs: #30508)

• ISSUE #30432: (dnd) Cloning linode server with salt-cloud requires payment term (refs: #30508)

• PR #30508: (rallytime) Fix Linode driver cloning functionality @ 2016-01-21 22:53:36 UTC
  - 15c7aedd46 Merge pull request #30508 from rallytime/linode-clone-fixes
  - d26ed74bde Make sure the correct profile parameters are being checked when cloning
  - 1d7e229377 Fix Linode driver cloning functionality.

• PR #30522: (terminalmage) Update git.list_worktree tests to reflect new return data @ 2016-01-21 22:34:20 UTC
  - 79528c59c3 Merge pull request #30522 from terminalmage/fixed-worktree-tests
  - ea0ca70187 Add git.list_worktrees unit test
  - 393015edbb Remove git.list_worktrees tests

• ISSUE #30465: (alandrees) Nested imports with pyobjects (refs: #30483, #30482)

• PR #30483: (borgstrom) Pyobjects recursive import support (for 2015.8) @ 2016-01-21 15:55:27 UTC
  - 119f025073 Merge pull request #30483 from borgstrom/pyobjects_recursive-2015.8
  - 788b672e3a Fixup lint errors
  - e148ea2d52 Allow recursive salt:// imports
  - 6bbac64d3a Add test to prove that recursive imports are currently broken

• PR #30491: (jacksontj) Add multi-IP support to network state @ 2016-01-21 15:51:42 UTC
  - d8d19cf75d Merge pull request #30491 from jacksontj/2015.8
  - 8221355ca Normalize yaml spacing to 2 space
  - 3d1469b8d9 Add example of multiple addrs/ipv6addrs to docs
  - 91c8a1b4e4 Add support for multiple IP addresses per interface to rh_ip

• PR #30496: (anlutro) Fix KeyError when adding ignored pillars @ 2016-01-21 15:51:03 UTC
  - 56332ca504 Merge pull request #30496 from alprs/fix-ignored_pillars_keyerror
  - bbcb783621 fix KeyError when adding ignored pillars

• PR #30359: (kingsquirrel152) Removes suspected copy/paste error for zmq_filtering functionality @ 2016-01-20 18:42:42 UTC
  - e425cbd654 Merge pull request #30359 from distil/zmq_filtering_bug_fix
  - 44bbbf15b Remove suspected copy/paste error.

• PR #30448: (cournape) Fix osx scripts location @ 2016-01-20 17:59:29 UTC
  - 13add7d142 Merge pull request #30448 from cournape/fix-osx-scripts-location
  - 3c27ab5310 BUG: fix osx .pkg script locations to match the .plist files.
  - ed9ab68d3b BUG: fix missing sudo when linking certify cert.
• ISSUE #22820: (VynceMontgomery) some docs missing again (cf #22720) (refs: #30457)

• PR #30457: (rallytime) Remove fsutils references from modules list @ 2016-01-20 16:43:50 UTC
  - 2b7d20cee7 Merge pull request #30457 from rallytime/fix-22820
  - 3288f104d Remove fsutils references from modules list

• ISSUE #30442: (ssplatt) salt-cloud linode query only lists private or public IP, not both (refs: #30453)

• PR #30453: (rallytime) Make sure private AND public IPs are listed for Linode driver @ 2016-01-20 16:41:51 UTC
  - e706b71871 Merge pull request #30453 from rallytime/fix-30442
  - a1f82f4fe Make sure private AND public IPs are listed for Linode driver

• ISSUE #29601: (seanjnkns) pillars not merging properly with 2015.8.3 (refs: #30062)

• PR #30458: (rallytime) Back-port #30062 to 2015.8 @ 2016-01-20 16:40:23 UTC
  - PR #30062: (seanjnkns) Remove recurse_list from pillar_source_merging_strategy and add pillar_merge_list (bool) instead
  - 73f372dc98 Merge pull request #30458 from rallytime/bp-30062
  - 9665d9655f Set (pillar_merge_lists to default for PR #30062
  - ea4dfb478 Fix lint for PR30062
  - e44a30620b Remove recurse_list from pillar_source_merging_strategy and add pillar_merge_list (bool) instead

• PR #30468: (timcharper) make note of s3 role assumption in upcoming changelog @ 2016-01-20 16:28:04 UTC
  - c3fb40e6b0 Merge pull request #30468 from timcharper/2015.8
  - 7211c871b Make note of s3 role assumption in upcoming changelog

• PR #30470: (whiteinge) Add example of the match_dict format to accept_dict wheel function @ 2016-01-20 16:26:16 UTC
  - c611541916 Merge pull request #30470 from whiteinge/match_dict
  - 5034e13f5d Add example of the match_dict format to accept_dict wheel function

• ISSUE #28017: (ThomasZhou) Using salt-cloud nova driver, raise error: SaltNova' object has no attribute '_discover_extensions' (refs: #30450)

• PR #30450: (gtmanfred) fix extension loading in novaclient @ 2016-01-19 21:16:32 UTC
  - d706b312a Merge pull request #30450 from gtmanfred/2015.8
  - 4aa6faaf48 fix extension loading in novaclient

• ISSUE #30150: (raponne-s) file.line reset permissions to 600 (refs: #30212, #30168)

• PR #30212: (abednarik) Fix incorrect file permissions in file.line @ 2016-01-19 21:15:48 UTC
  - 0af5e16809 Merge pull request #30212 from abednarik/fix_file_line_permissions
  - dec15d13f7 Fix incorrect file permissions in file.line

• ISSUE #29918: (WangWenchao) UnicodeDecodeError when saltutil.sync_modules for Windows salt-minion 2015.8.3 (refs: #29947)

• PR #29947: (jfindlay) fileclient: decode file list from master @ 2016-01-19 20:36:32 UTC
  - 3c12b451fe Merge pull request #29947 from jfindlay/remote_decode

28.2. Previous Releases 5309
- b9241fb6b0 state: use simple string formatting for messages
- f6162f168c fileclient: decode file list from master

- **ISSUE #30203**: (terminalmage) Update salt.modules.git.list_worktrees() to use 'git worktree list' for Git >= 2.7.0 (refs: #30363)

- **PR #30363**: (terminalmage) Use native "list" subcommand to list git worktrees @ 2016-01-19 20:35:41 UTC
  - 6e8b1e89a5 Merge pull request #30363 from terminalmage/issue30203
  - ee40491166 Fix redefined variable
  - 5f95851987 Use native "list" subcommand to list git worktrees
  - 911105f27c Fix incorrect missing gitdir file detection

- **PR #30445**: (justinta) Boto uses False for is_default instead of None @ 2016-01-19 18:28:18 UTC
  - dfb9dec84f Merge pull request #30445 from jtand/boto_vpc_8
  - 00943ff1e6 Boto uses False for is_default instead of None

- **PR #30406**: (frioux) Add an example of how to use file.managed/check_cmd @ 2016-01-19 18:23:49 UTC
  - f9b3f3f038 Merge pull request #30406 from ZipRecruiter/check-cmd-example
  - 92e0d77a9a Add an example of how to use file.managed/check_cmd

- **PR #30424**: (isbm) Check if byte strings are properly encoded in UTF-8 @ 2016-01-19 17:52:25 UTC
  - 05ad3dce94 Merge pull request #30424 from isbm/isbm-zypper-utf-8-errors
  - a0f263f411 Clarify the error message
  - 12f8e93247 Update documentation accordingly.
  - 1d384b0ab8 Add error handling to the RPM broken strings
  - cf0dad3a6c Rename keywords arguments variable to a default name.
  - 26aa801342 Check if byte strings are properly encoded in UTF-8

- **ISSUE #30051**: (joejulian) glusterfs.status fails with glusterfs 3.7 (refs: #30075)

- **PR #30405**: (justinta) Updated glusterfs.py for python2.6 compatibility. @ 2016-01-15 22:50:06 UTC
  - PR #30075: (joejulian) Convert glusterfs module to use xml (refs: #30405)
  - 1bace55e4f Merge pull request #30075 from jtand/glusterfs_py26
  - a332e06c4a Fixed lint error
  - 522b4990ef Updated the rest of glusterfs.py for python2.6 compatibility
  - 971ce58cd6 updated list_peers to be python2.6 compatible

- **PR #30396**: (pass-by-value) Remove hardcoded val @ 2016-01-15 22:03:53 UTC
  - cb1c0958bd Merge pull request #30396 from pass-by-value/remove_hardcoded_val
  - dd90b325e7 Get vm info
  - 9430ad1465 Remove hardcoded value

- **PR #30391**: (justinta) Added else statements @ 2016-01-15 19:17:55 UTC
  - PR #30389: (justinta) Older versions of ipset don't support comments (refs: #30391)
  - 60737c970e Merge pull request #30391 from jtand/ipset
- 345b056406 Fixed lint error
- c20f9b6a87 Added else statements

- **ISSUE #30277**: (webtrekker) [salt-cloud] Error actioning machines: ‘ascii’ codec can’t encode character u’\xa0’ in position 20 (refs: #30374)

- **PR #30375**: (rallytime) Wrap formatted log statements with six.u() in cloud/__init__.py @ 2016-01-15 18:41:55 UTC
  - **PR #30374**: (rallytime) Wrap formatted log statements with six.u() in the VMware module (refs: #30375)
  - 6ac1f6cf54 Merge pull request #30375 from rallytime/fixed-cloud-log-formatting
  - 5e7b0c428 Wrap formatted log statements with six.u() in cloud/__init__.py

- **PR #30384**: (isbm) Bugfix: info_available does not work correctly on SLE 11 series @ 2016-01-15 18:31:57 UTC
  - c478148b60 Merge pull request #30384 from isbm/isbm-zypper-info-available-fix
  - c7bc20e865 Split information, that is compatible with the Zypper's output on SLE11.

- **PR #30376**: (pritambaral) Fix FLO_DIR path in 2015.8 @ 2016-01-15 18:25:49 UTC
  - 9fe2df82bd Merge pull request #30376 from pritambaral/fixed/flo-dir
  - 534879e79f Revert "Raq Salt broken when config moved to package directory"

- **PR #30389**: (justinta) Older versions of ipset don’t support comments (refs: #30391) @ 2016-01-15 17:41:02 UTC
  - 3ac3804ddc Merge pull request #30389 from jtan/ipset
  - fac6c3f6a8 Fixed some typos from testing
  - 67d4997316 Older versions of ipset don't support comments

- **PR #30373**: (basepi) [2015.8] Merge forward from 2015.5 to 2015.8 @ 2016-01-15 16:23:38 UTC
  - 4cc9422f8 Merge pull request #30373 from basepi/merge-forward-2015.8
  - 5b35bf2597 Merge remote-tracking branch 'upstream/2015.5' into merge-forward-2015.8
    - 5a923b3aa9 Merge pull request #30364 from rallytime/fix-30341
      - 79bcf151cb Add TLS version imports and add linode driver documentation notices
    - f037df9c27 Merge pull request #30184 from rallytime/bp-30166
      - fa6b1b3022 adding split_env call to cp.hash_file to pick up saltenv in file query parameter
    - 1d8413f6d2f Merge pull request #30291 from thegoodduke/fix__ipset
      - 62d5ccf561 ipset: fix test=true & add comment for every entry
    - 92889db638 Merge pull request #30248 from jtan/ipset
      - 741f7aba31 add 2015.5.9 release notes
    - 7a329d89d7 Merge pull request #30237 from jacobhammons/man-pages-prev
      - 2431c4c5c3 Updated man page and doc conf.py copyright year to 2016
      - fe3d41c174 Updated man pages and doc version for 2015.5.9
    - 2c0b725924 Merge pull request #30207 from rallytime/rabbitmq_states_doc_fix
      - 8d48c24182 Use correct spacing in rabbitmq state examples
    - b49cf910f4 Merge pull request #30191 from jacobhammons/banner-prev
      - c3390955b0 Updated doc site banners
PR #30372: (jacobhammons) Updated man pages for 2015.8.4, updated copyright to 2016 @ 2016-01-14 23:18:40 UTC
  
  - a9ed19b4a4 Merge pull request #30372 from jacobhammons/man-pages
  - 891da5e0c1 Updated man pages for 2015.8.4, updated copyright to 2016

PR #30370: (rallytime) Remove incomplete function @ 2016-01-14 22:49:45 UTC
  
  - e7785de17 Merge pull request #30370 from rallytime/remove-incomplete-func
  - e220fa5125 Remove incomplete function

ISSUE #23215: (lichtamberg) Rbenv: gem.installed not using correct ruby version if it's not default on 2015.02 (refs: #28702)

PR #30366: (rallytime) Back-port #28702 to 2015.8 @ 2016-01-14 21:10:03 UTC
  
  - PR #28702: (dnd) Pass RBENV_VERSION in env dict, and protect shlex.split (refs: #30366)
  - eb1ecd9732 Merge pull request #30366 from rallytime/bp-28702
  - 4f2274a275 Remove extra line
  - 048b13cf73 Pass RBENV_VERSION in env dict, and protect shlex.split

PR #30361: (cro) Flip the sense of the test for proxymodule imports, add more fns for esxi proxy @ 2016-01-14 20:54:08 UTC
  
  - 40594efc0b Merge pull request #30361 from cro/esxi-proxy2
  - 8f7490ca98 Missed return statement.
  - 389ede9e3e Lint
  - 9db34d0e5c Lint
  - b5c7a46f7a Lint
  - 1a3b1f2626 Don't use short variables
  - b80577182a Remove stub functions.
  - 58f7dc285 Don't use single character variables.
  - e712664bcf Better comment.
  - 9e9a37d0d4 Indentation.
  - 6c9bf76f19 Revert earlier vmware change for ssl cert checking.
  - db8a281ab8 Flip the sense of the test for items (modules, etc) loaded by the proxy. Now load everything a regular minion would load, and only check to make sure __proxyenabled__ is present for proxymodules and grains
  - 00c4f6ee2c Need a list
  - 0da7a66d6d1 Recreate the pr

PR #30267: (isbm) Fix RPM issues with the date/time and add package attributes filtering @ 2016-01-14 18:00:01 UTC
  
  - f4118be64e Merge pull request #30267 from isbm/isbm-zypper-isotimefix
  - 18281e7e0b Add ""time_t"" as a separate attributes
  - 410515cf7a Add *time_t to the docs
  - 78e16ab7b00 Construct RPM query dynamically
- 6992d74806 Update documentation for the valid package attributes
- 6710e4900d Use renamed variable (filter_attrs to attr)
- b68e1228e9 Remove unnecessary check for the "name" key
- e5b3e77186 Remove key transformations
- 9ac52c9123 Add zone to the ISO from unix time
- d352c08305 Fix lint: unused import
- d571381f76 Update the documentation for the Zypper module
- 5651a043e6 Update documentation for lowpkg
- 7edb0e8f3f Replace "*_date_iso" with "*_date" and use Unix time as "*_date_time_t"
- b2b21f877a Add epoch (note: this is empty on SUSE systems)
- 0eebe10d9a Clarify description
- a745d9ecdf Fix syntax for the documentation in zypper module
- c95c2d24db Fix the documentation syntax
- 1fb84538b1 Update documentation
- 43ebf4dd7 Return build date in Unix ticks
- bdaa1e46de Add package architecture attribute
- ba64df4def Update documentation
- 6e3743dce6 Incorporate lowpkg.info into info_installed
- b72b8d5323 Fix the documentation
- 181314b20e Add filtering per attributes feature
- 39e70ef762 Fix ISO and Unix time of the package for RPM systems on C locale.

• ISSUE #30330: (JensRantil) salt.state.file.absent doesn’t document recursiveness (refs: #30360)
• PR #30360: (jfindlay) file.remove, file.absent: mention recursive dir removal @ 2016-01-14 17:30:26 UTC
  - b61cb7a238 Merge pull request #30360 from jfindlay/remove_doc
  - a21cc2d700 file.remove, file.absent: mention recursive dir removal
• ISSUE #26845: (maio) Postgres module (user_exists) doesn’t work with PostgreSQL 9.5 (refs: #30221)
• PR #30221: (mbarrien) No rolcatupdate for user_exist in Postgres>=9.5 @ 2016-01-14 16:52:49 UTC
  - ba8d128025 Merge pull request #30221 from mbarrien/postgres-9.5
  - a8f2bc7998 No rolcatupdate for user_exist in Postgres>=9.5
• PR #30358: (terminalmage) Add libgit2 version to versions-report @ 2016-01-14 16:37:28 UTC
  - 4787c2c9ad Merge pull request #30358 from terminalmage/libgit2-version
  - 89fe571791 Add libgit2 version to versions-report
• PR #30346: (pass-by-value) Prevent orphaned volumes @ 2016-01-14 16:37:08 UTC
  - af2ddfd31e Merge pull request #30346 from pass-by-value/aws_vols_attach
  - 19fcee3ee2 Prevent orphaned volumes
• PR #30349: (rallytime) Back-port #30347 to 2015.8 @ 2016-01-14 16:26:37 UTC
- PR #30347: (rallytime) Merge #30231 with updates to dependency documentation (refs: #30349)
- PR #30231: (nmadhok) Fix issue where pyVmomi 6.0.0 raises SSL Error for systems using Python2.7+ (refs: #30347)
  - bccbf8b3b5 Merge pull request #30349 from rallytime/bp-30347
  - df0a6d6a Merge #30231 with updates to dependency documentation
  - a7c2ad5505 Fix issue where pyVmomi 6.0.0 raises SSL Error for systems using Python2.7+
- • PR #30354: (anlutro) Make sure all ignore_missing SLSes are caught @ 2016-01-14 16:24:19 UTC
  - PR #19429: (ryan-lane) Add new ignore_missing option to pillar top (refs: #30354)
  - 7ee61f0d62 Merge pull request #30354 from alprs/fix-pillar_ignore_missing
  - 2f662bb8d make sure all ignore_missing slses are caught
- • PR #30356: (nmadhok) Adding code author @ 2016-01-14 16:23:08 UTC
  - 4bdade6010 Merge pull request #30356 from nmadhok/patch-1
  - 581e4f5dc7 Adding code author
- • PR #30340: (justinta) Updated seed_test.py for changes made to seed module @ 2016-01-13 22:50:34 UTC
  - d5b877655 Merge pull request #30340 from jfindlay/seed_test_fix
  - ee764ee952 Updated seed_test.py for changes made to seed module
- • ISSUE #26478: (rasathus) nested upstart services are not supported (refs: #26511)
- • PR #30339: (jfindlay) Backport #26511 @ 2016-01-13 22:35:17 UTC
  - PR #26511: (rasathus) Adds support for nested upstart scripts in the form of subfolder/serv... (refs: #30339)
  - 3bbe62d07 Merge pull request #30339 from jfindlay/bp-26511
  - 89d9cd5038 Adds support for nested upstart scripts in the form of subfolder/service. This is implemented via an os.walk through the /etc/init folder, rather than the previous glob for *.conf method.
- • ISSUE #28339: (boboli) salt-call state.highstate fails with ZMQError when minion has no id set in /etc/salt/minion (refs: #28423, #28431)
- • PR #30343: (rallytime) Fix 2015.8 from incomplete back-port @ 2016-01-13 21:56:26 UTC
  - PR #30187: (rallytime) Back-port #27606 to 2015.8 (refs: #30343)
  - PR #28431: (plastikos) Use a broader test for unset “id” (refs: #30343)
  - PR #28432: (cachedout) Fix issue with empty str as default minion id (refs: #28431)
  - PR #28189: (plastikos) Always get default option settings from salt.config (refs: #30343, #28431)
  - PR #28131: (cachedout) Set a fallback HWM (refs: #30343)
  - PR #27606: (plastikos) RFC: Add additional ZMQ tuning parameters necessary for 1k+ minions per master [WIP] (refs: #30343, #30187)
  - 6079a96e66 Merge pull request #30343 from rallytime/fix-2015.8
  - 5eef9d5067 Use a broader test for unset “id”
  - 460a3c98cc Additional corrections to use option defaults directly from salt.config
  - 4e53ef0bf6 Always get default option settings from salt.config
  - 94ee6f88af Set a fallback HWM

5314 Chapter 28. Release Notes
• PR #30342: (eliasp) Correct whitespace placement in error message @ 2016-01-13 21:32:26 UTC
  - 7276d808ff Merge pull request #30342 from eliasp/2015.8-log-message-format
  - 8e37e36ac7 Correct whitespace placement in error message
• ISSUE #30250: (mbarrien) npm.bootstrap state runs even when test=True (refs: #30257)
• PR #30308: (rallytime) Back-port #30257 to 2015.8 @ 2016-01-13 19:20:13 UTC
  - PR #30257: (abednarik) Add test in npm state. (refs: #30308)
  - 10b5728f84 Merge pull request #30257 from rallytime/bp-30257
  - 0b0d73756e Fix typos in npm module.
  - deeeb71dda Add test in npm state.
• PR #30187: (rallytime) Back-port #27606 to 2015.8 (refs: #30343) @ 2016-01-13 19:03:11 UTC
  - PR #27606: (plastikos) RFC: Add additional ZMQ tuning parameters necessary for 1k+ minions per master [WIP] (refs: #30343, #30187)
  - afa61c03db Merge pull request #30187 from rallytime/bp-27606
  - 8ef6d6c6fd Add additional ZMQ tuning parameters necessary for 1,000+ minions per server. Start collecting tuning parameters together in the master config file.
• PR #30223: (serge-p) adding support for DragonFly BSD @ 2016-01-13 18:24:29 UTC
  - 7e89a460e4 Merge pull request #30223 from serge-p/patch-11
  - ec798abcd Update pkgng.py
  - 45206dfe3d adding support for DragonFly BSD
• ISSUE #28396: (ymote) salt-cloud parallel provisioning (-P option) failed on 2015.8.1 (refs: #30238)
• ISSUE #23824: (kiorky) salt.crypt broken in develop (refs: #23825)
• PR #30238: (rallytime) Reinit crypto before calling RSA.generate when generating keys. @ 2016-01-13 18:22:11 UTC
  - PR #23825: (kiorky) Fix crypto (refs: #30238)
  - 5a8da62008 Merge pull request #30238 from rallytime/fx-28396
  - 41d9df45bb Reinit crypto before calling RSA.generate when generating keys.
• ISSUE #24237: (Grokzen) Minion schedule return data missing some fields (refs: #30246)
• PR #30246: (dmacvicar) Add missing return data to scheduled jobs (#24237) @ 2016-01-13 17:51:49 UTC
  - 15707e0ac8 Merge pull request #30246 from dmacvicar/dmacvicar-2015.8-24237
  - c46213d9bb lint: E8713(test-for-membership-should-be-not-in)
  - 5a1b2ca486 include the 'success' field in scheduled jobs return data (part of #24237)
  - f72a4ca42d add retcode to scheduled jobs return data (part of #24237)
• PR #30292: (thegoodduke) ipset: fix test=true & add comment for every entry @ 2016-01-13 17:49:16 UTC
  - PR #30170: (thegoodduke) ipset: fix comment and test (refs: #30291, #30292)
  - 8706720148 Merge pull request #30292 from thegoodduke/fx_ipset
  - 49d70bff16 ipset: fix test=true & add comment for every entry
• ISSUE #30240: (snw1968) firewalld inconsistent permanent option used for services but not ports - other options required (refs: #30275)

• PR #30275: (abednarik) Add permanent argument in firewalld. @ 2016-01-13 17:44:43 UTC
  - ea607675f5 Merge pull request #30275 from abednarik/fix_firewalld_ports_permanent
  - e3d4bf51da Add permanent argument in firewalld.

• PR #30328: (cachedout) Fix file test @ 2016-01-13 17:42:22 UTC
  - f02db44757 Merge pull request #30328 from cachedout/fix_file_test
  - dcfba51556 Lint
  - b9921128af Kill pointless tests
  - 63c157d0a3 Fix test.managed

• PR #30310: (pass-by-value) Empty bucket fix @ 2016-01-13 17:30:45 UTC
  - edd94a2e Merge pull request #30310 from pass-by-value/empty_bucket_fix
  - aef5a889c Add fix for else code path
  - 9398e44945 Check and report empty S3 bucket

• PR #30211: (techhat) Execute choot on the correct path @ 2016-01-13 16:53:40 UTC
  - f23f0f30d4 Merge pull request #30211 from techhat/tmppath
  - 11ac2ff0bf Revert "We're putting the keys directly in place; -c isn't used"
  - e75b48f5ff We're putting the keys directly in place; -c isn't used
  - 5d7a0f6d81 Execute choot on the correct path

• ISSUE #30286: (tkunicki) salt-cloud ec2 spot requests fail with userdata_file in config or profile (refs: #30304)

• PR #30309: (rallytime) Back-port #30304 to 2015.8 @ 2016-01-13 16:41:53 UTC
  - PR #30304: (tkunicki) add spot_prefix to UserData param (refs: #30309)
  - 5154c71127 Merge pull request #30309 from rallytime/bp-30304
  - 4a8c87b47 add spot_prefix to UserData param

• PR #30278: (nmadhok) If datacenter is specified in the config, then look for managed objects under it @ 2016-01-13 15:29:36 UTC
  - 1624d6cebd Merge pull request #30278 from nmadhok/2015.8-samename-objects-fix
  - b0e86afa00 get_mor_by_property needs container_ref to be a positional parameter
  - 56dfc63f91 If datacenter is specified, start all searches under datacenter
  - fcf77b738e If datacenter is specified then look under it instead of looking under inventory root folder

• PR #30305: (jacobhammons) Changed examples to use the "example.com" domain instead of "mycompany... @ 2016-01-12 20:42:10 UTC
  - fc93047f8 Merge pull request #30305 from jacobhammons/example-domain
  - 53d17f1f85 Changed examples to use the "example.com" domain instead of "mycompany.com" or "company.com"

• PR #30249: (mpreziuso) Fixes performance and timeout issues on win_pkg.install @ 2016-01-12 20:14:54 UTC
  - 3bd02a898f Merge pull request #30249 from mpreziuso/patch-2
- d6e6e10534 Fixes lint issues
- 3251424838 Fixes performance and timeout issues on win_pkg.install

- **PR #30217**: (pass-by-value) Make sure cloud actions can be called via salt run @ 2016-01-12 20:11:13 UTC
  - 461a741e14 Merge pull request #30217 from pass-by-value/cloud_actions_dispatch
  - 1f68ce05bc Fix pylint error
  - d5b1b6b99 Add CLI Example
  - 526449dfdb Make sure cloud actions can be called via salt run

- **ISSUE #9569**: (clearclaw) How can a binary file, such as a license key, be distributed via Pillar? (refs: #30268)

- **PR #30268**: (terminalmage) Optimize file_tree ext_pillar and update file.managed to allow for binary contents @ 2016-01-12 20:09:19 UTC
  - 4a685f329 Merge pull request #30268 from terminalmage/issue9569
  - 724b2f36ce Add file_tree/file.managed/contents_pillar example to FAQ
  - 854c7d9978 Remove old FAQ item referencing gitfs bug in 0.16.x
  - e9a6d79f9 salt.states.file.managed: Allow for binary contents
  - 1ba4486b19 salt.pillar.file_tree: Optimizations, deprecate raw_data
  - 650cc0af5c salt.modules.file: Improve docstrings

- **ISSUE #29078**: (Reiner030) boto_secgroup didn’t work as expected in Debian Jessie (refs: #30155)

- **PR #30245**: (rallytime) Boto secgroup/iam_role: Add note stating us-east-1 is default region @ 2016-01-12 20:04:31 UTC
  - PR #30155: (rallytime) Update boto_secgroup and boto_iam_role docs to only use region OR profile (refs: #30245)
  - dbe7b89c9a Merge pull request #30245 from rallytime/botosecgroup-docs
  - 406a138f76 Boto secgroup/iam_role: Add note stating us-east-1 is default region

- **PR #30299**: (rallytime) ESXi Proxy minions states are located at salt.states.esxi, not vsphere. @ 2016-01-12 20:03:31 UTC
  - 6b18377bf1 Merge pull request #30299 from rallytime/esxi-proxy-doc-fix
  - db68fc48a8 Fix CLI Example syntax
  - 1cb9f297f8 ESXi Proxy minions states are located at salt.states.esxi, not vsphere.

- **PR #30202**: (opdude) Fixed the periodic call to beacons @ 2016-01-12 19:58:44 UTC
  - 903289d3fb Merge pull request #30202 from Unity-Technologies/hotfix/beacon_periodic
  - ea7a86a76d Fixed the periodic call to beacons

- **PR #30303**: (jacobhammons) Changed notes to indicate that functions are matched using regular ex... @ 2016-01-12 19:15:16 UTC
  - 48d2bd9e78 Merge pull request #30303 from jacobhammons/pcre-match
  - e5079ab4c9 Changed notes to indicate that functions are matched using regular expressions instead of minions

- **ISSUE #29684**: (snarfmonkey) Upgrade from 2015.8.1 to 2015.8.3 via apt for Ubuntu 14.04 causes Dulwich-backed gitfs to stop working (refs: #30284)
5318 Chapter 28. Release Notes

- **PR #30284**: (terminalmage) salt.utils.gitfs: Fix Dulwich env detection and submodule handling @ 2016-01-12 19:11:36 UTC
  - 675ac4b43f Merge pull request #30284 from terminalmage/issue29684
  - a746014f7e salt.utils.gitfs: Fix Dulwich env detection and submodule handling
- **PR #30280**: (jfindlay) add state mocking to release notes @ 2016-01-12 19:10:40 UTC
  - 8f65e822d7 Merge pull request #30280 from jfindlay/state_mock_doc
  - 22c1129f02 modules.state.sls,highstate: mock versionadded
  - 934de30d39 add state mock to 2015.8.4 release notes
- **ISSUE #30117**: (MadsRC) Service beacons fails with Stacktraces (refs: #30121)
- **PR #30273**: (rallytime) Back-port #30121 to 2015.8 @ 2016-01-12 19:10:16 UTC
  - PR #30121: (MadsRC) Patch for issue #30117 (refs: #30273)
  - 996e52b32c Merge pull request #30273 from rallytime.bp-30121
  - 8ec30f2105 I fail at linting... Fixed my uppercase/lowercase problem
  - 087b33026 Fixed some linting issues
  - 8ec30f2105 Added note about systemd and uncleanshutdown. Also fixed line length of comments to max 80 characters as per PEP0008
  - a50428d02c On an unclean shutdown, if uncleanshutdown is given a path, an key: value of shutdown:unclean is added to the returned data. The documentation states that the key should be 'uncleanshutdown' and that the value should either be True or False. This is fixed in the code
  - 51b57f1820 Fixed issue number #30117 - When no parameters are given to a service, the service object is of type None and thus isn't iterable. This is contrary to the documentation which states that there are default values. Default values added as False
- **PR #30301**: (cachedout) Accept whatever comes into hightstate mock for state tests @ 2016-01-12 18:33:14 UTC
  - 3a5a84a790 Merge pull request #30301 from cachedout/fix_state_tests
  - 2c62b464b1 Accept whatever comes into hightstate mock for state tests
- **ISSUE #28586**: (zmalone) file.append does not differentiate between tabs and spaces (refs: #30156)
- **PR #30282**: (cachedout) Fix file.append logic @ 2016-01-12 18:27:30 UTC
  - PR #30156: (abednarik) Add option in file.append to ignore_whitespace. (refs: #30282)
  - 8438d19815 Merge pull request #30282 from cachedout/fix_30156
  - 3f633ff15e Lint
  - 99dd11dec2 Remove debugging
  - 35ef585c54 Fix logic error in file.append
- **PR #30289**: (cro) Fix problems with targeting proxies by grains @ 2016-01-12 18:16:57 UTC
  - 530c9c66ec Merge pull request #30289 from cro/proxy_grains_fix
  - 8362d76440 Add comments.
  - 4e50962642 Merge branch 'proxy_grains_fix' of github.com:cro/salt into proxy_grains_fix
    - 61b06a9a14 Lint.
    - 7c3533509 Force a grains sync after we load the proxy's grains.
2855ba7da5 Disallow non-proxyenabled modules and grains
- 8fd8f3beb7 Lint.
- 144fea02e5 Force a grains sync after we load the proxy's grains.
- 5ecf85017b Disallow non-proxyenabled modules and grains

• **PR #30293:** (cro) Ensure we don't log stuff we shouldn't @ 2016-01-12 18:04:25 UTC
  - 75b83453cf Merge pull request #30293 from cro/proxy_log_cleanup
  - b358fe370c Merge remote-tracking branch 'origin/proxy_log_cleanup' into proxy_log_cleanup
    - c9a5680427 Add unused 'output_loglevel' kwarg. This is here for when we alias cmd.run_all directly to _run_all_quiet in certain chicken-and-egg situations where modules need to work both before and after the __salt__ dictionary is populated (cf dracr.py).
    - 8c46de12e4 Ensure we don't log stuff we shouldn't.
  - 3267d92216 Add unused 'output_loglevel' kwarg. This is here for when we alias cmd.run_all directly to _run_all_quiet in certain chicken-and-egg situations where modules need to work both before and after the __salt__ dictionary is populated (cf dracr.py).
  - 6a86bdc6da Ensure we don't log stuff we shouldn't.

• **PR #30279:** (cachedout) Allow modules to be packed into boto utils @ 2016-01-12 16:53:54 UTC
  - 46681658e0 Merge pull request #30279 from cachedout/boto_pack
  - 11d27ba694 Mock config module in utils test
  - 62a1818287 Lint
  - cf440036dd Remove unused import
  - 36d55ea0ad Allow modules to be packed into boto utils

• **ISSUE #29951:** (Reiner030) boto_ec2 params needed (refs: #30186)

• **PR #30186:** (rallytime) Update CLI Examples in boto_ec2 module to reflect correct arg/kwarg positioning @ 2016-01-08 19:00:45 UTC
  - 54b9641330 Merge pull request #30186 from rallytime/fix-29951
  - a943b505cc Update CLI Examples in boto_ec2 module to reflect correct arg/kwarg positioning

• **ISSUE #28586:** (zmalone) file.append does not differentiate between tabs and spaces (refs: #30156)

• **PR #30156:** (abednarik) Add option in file.append to ignore_whitespace. (refs: #30282) @ 2016-01-08 16:07:23 UTC
  - 1256fd11e1 Merge pull request #30156 from abednarik/ignore_whitespace_file_append
  - af68086e5c Add option in file.append to ignore_whitespace.

• **PR #30189:** (rallytime) Back-port #30185 to 2015.8 @ 2016-01-07 23:32:05 UTC
  - **PR #30185:** (cachedout) Fix #30118 (refs: #30189)
  - **PR #30118:** (thatch45) State mock (refs: #30185, #30189)
  - ad7522c98d Merge pull request #30189 from rallytime/bp-30185
  - 70681bf03b Fix for mock state PR #30118
  - f9480f6d8 change arg to mocked to try test suite collision fix
  - 2fbdcda703 fix some typos
- 6f757b8c81 Add Mock to state.sls
- fb0cbd185e fix issue where the name may be in 2 places
- 5f0326e521 Start on the state mock system

- **ISSUE #9319**: (gravyboat) Update Reactor docs with an example using salt-cloud from the commandline. (refs: #30215)
- **ISSUE #8146**: (basepi) Make implications of extra accepted keys on timeouts more obvious (refs: #30215)
- **ISSUE #6853**: (Psycojoker) Salt formulas should be way more visible in the documentation (refs: #30215)
- **ISSUE #4381**: (mlister2006) peer_run: glob, pcre matching. Better docs (refs: #30215)
- **ISSUE #2229**: (alekibango) how to debug zeromq problem with hanging salt communication? (refs: #30215)
- **ISSUE #15042**: (cvrebert) percent signs not escaped in cron commands (refs: #30215)
- **ISSUE #14946**: (ryan-lane) reload_modules not documented in global state arguments documentation (refs: #30215)
- **ISSUE #13777**: (gravyboat) Update top module docs with more concise examples (refs: #30215)
- **ISSUE #13036**: (tminn) salstack tomcat module (refs: #30215)
- **PR #30215**: (jacobhammons) Assorted doc bug fixes @ 2016-01-07 21:53:27 UTC
  - 8f30f7045a Merge pull request #30215 from jacobhammons/doc-issues
  - 44ce704206 Updated zmq_monitor docs
  - 0d2111d397 Assorted doc bug fixes
- **ISSUE #30204**: (anlutro) salt can’t find local cache return file (refs: #30206)
- **PR #30206**: (cachedout) Revert "Fix incorrect file permissions in file.line" @ 2016-01-07 17:55:48 UTC
  - 2000800915 Merge pull request #30206 from cachedout/revert_30168
  - ee786293e7 Revert "Fix incorrect file permissions in file.line"
- **PR #30190**: (jacobhammons) Updated doc site banners @ 2016-01-06 22:37:34 UTC
  - 5632cc8796 Merge pull request #30190 from jacobhammons/banners
  - 266023baf1 Updated doc site banners
- **ISSUE #30171**: (jamusj) Python 2.7 dependency in x509.py (refs: #30180)
- **PR #30180**: (jfindlay) modules.x509._dec2hex: add fmt index for 2.6 compat @ 2016-01-06 19:48:50 UTC
  - 9a83247992 Merge pull request #30180 from jfindlay/2.7x509
  - 907469d04a modules.x509._dec2hex: add fmt index for 2.6 compat
- **PR #30179**: (terminalmage) Backport #26962 to 2015.8 branch @ 2016-01-06 19:48:30 UTC
  - **PR #26962**: (ctlrlsf) Add --state-verbose command line option to salt cmd (refs: #30179)
  - 6516d5b5d0 Merge pull request #30179 from terminalmage/bp-26962
  - 08f2021f52 Fix pylint warnings: unnecessary parens after if keyword
  - a2e0721a61 Add --state-verbose command line option to salt cmd
- **ISSUE #29654**: (schaarsc) ssh_auth should report missing source (refs: #29693)
- **PR #29693**: (abednarik) Handle missing source file in ssh_auth. @ 2016-01-06 17:13:06 UTC
  - 27df7276bc Merge pull request #29693 from abednarik/handle_missing_source_in_ssh_auth
- fc02e3cf4 Handle missing source file in ssh_auth.

- **ISSUE #29078**: (Reiner030) boto_secgroup didn't work as expected in Debian Jessie (refs: #30155)

- **PR #30155**: (rallytime) Update boto_secgroup and boto_iam_role docs to only use region OR profile (refs: #30245) @ 2016-01-06 17:09:50 UTC
  - f9863dd9f Merge pull request #30155 from rallytime/boto-secgroup-docfix
  - f0381a95f Update boto_secgroup and boto_iam_role docs to only use region OR profile.

- **ISSUE #29905**: (Reiner030) pillar referencing for boto profiles seems not completely working right / docu missing (refs: #30158)

- **PR #30158**: (rallytime) Move_option(value) callsto __salt__['config.option'] in boto utils @ 2016-01-06 16:35:59 UTC
  - e368e2e73 Merge pull request #30158 from rallytime/fix-29905
  - 3321c5d408 Move _option(value) calls to __salt__['config.option'] in boto utils

- **ISSUE #29770**: (Ch3LL) disk.usage does not work on AIX (refs: #30160)

- **PR #30160**: (dmurphy18) Fix parsing disk usage for line with no number and AIX values in Kilos @ 2016-01-06 16:34:45 UTC
  - ec009a6812 Merge pull request #30160 from saltstack/aix_dskusage
  - 8450df0483 Fix parsing disk usage for line with no number and AIX values in Kilos

- **ISSUE #29919**: (abcfy2) State grains.append cannot append to a non-exist grain name. (refs: #30162)

- **PR #30162**: (rallytime) Update list_present and append grains state function docs to be more clear. @ 2016-01-06 16:33:25 UTC
  - f808fbbbd Merge pull request #30162 from rallytime/fix-29919
  - 9bbd129c60 Update list_present and append grains state function docs to be more clear

- **ISSUE #28923**: (aabognah) passing argument with ‘=no’ to file.line (refs: #30163)

- **PR #30163**: (rallytime) Add warning about using "=" in file.line function @ 2016-01-06 16:32:39 UTC
  - 83245930a6 Merge pull request #30163 from rallytime/fix-28923
  - 0e4f91fca2 Add warning about using "=" in file.line function

- **PR #30164**: (basepi) [2015.8] Merge forward from 2015.5 to 2015.8 @ 2016-01-06 16:28:59 UTC
  - 106efd258a Merge pull request #30164 from basepi/merge-forward-2015.8
  - d73a7d4c4d Merge remote-tracking branch 'upstream/2015.5' into merge-forward-2015.8
    - 9363d65b6 Merge pull request #30125 from abednarik/update_user_home
      - 56544a77f6 Update user home event when createhome is set to False
    - 1a5d585d91 Merge pull request #30127 from jsutton/clarify-documentation-for-random_master
      - 01db385ef Adding random_master to reference and updating master_shuffle. Adding master_shuffle to the minion example config file as it is needed for multi-master PKI.
    - 28b1bbbe77 Merge pull request #30110 from markbeckim/salt-verify_ssl-in-joyent-cloud
      - e1c08c269 Fixed flag sent to salt.utils.http in order for verify_ssl to work appropriately.
    - 040412b0b1 Merge pull request #30093 from zmalone/pillar-notes
Noting that file_roots and "state tree" should both be avoided, because in some environments, the actual states show up another level down. Adding notes about why this is undesirable.

- 25edefc93a Merge pull request #30097 from cachedout/note_on_password_process_list
- 58aec884ef Note concern about cleartext password in docs for shadow.gen_password
- 6b1c3a6bf2 Merge pull request #30089 from mpreziuso/patch-1
- 200d09385d Merge pull request #30086 from cachedout/issue_29921
- 8c29e2dd6a Document that gitfs needs recent libs
- 404414bf57 Merge pull request #30070 from cachedout/issue_27835
- 60431e342a Add documentation on debugging salt-ssh

**ISSUE** #30150: (rapenne-s) file.line reset permissions to 600 (refs: #30212, #30168)

**PR** #30168: (abednarik) Fix incorrect file permissions in file.line @ 2016-01-06 16:25:08 UTC
  - e5d87a02b9 Merge pull request #30168 from abednarik/2015.8
  - 79dda25a15 Fix incorrect file permissions in file.line

**PR** #30154: (Oro) Fix file serialize on windows @ 2016-01-05 18:08:40 UTC
  - bed38d1a65 Merge pull request #30154 from Oro/fixed-file-serialize-windows
  - 071a675f8a Fix file serialize on windows

**PR** #30144: (rallytime) Added generic ESXCLI command ability to ESXi Proxy Minion @ 2016-01-05 16:23:38 UTC
  - 7d51d8bb46 Merge pull request #30144 from rallytime/vsphere-esxcli-cmd
  - 2f9ec5db96 Added generic ESXCLI command ability to ESXi Proxy Minion

**ISSUE** #29994: (adithep) dockerng.push should not auto tag :latest (refs: #30142)

**ISSUE** #29993: (adithep) Dockerng as a whole is not compatible with v2 registries. (refs: #30142)

**PR** #30142: (terminalmage) Fix dockerng.push, and allow for multiple images @ 2016-01-04 22:53:50 UTC
  - 1a21b3d46b Merge pull request #30142 from terminalmage/issue29994
  - 66698986e4 Fix dockerng.push, and allow for multiple images

**ISSUE** #30051: (joejulian) glusterfs.status fails with glusterfs 3.7 (refs: #30075)

**PR** #30075: (joejulian) Convert glusterfs module to use xml (refs: #30405) @ 2016-01-04 20:33:58 UTC
  - 541969bd2 Merge pull request #30075 from iodatacenters/2015.8_gluster_usexml
  - 01a8e7ee10 Convert glusterfs module to use xml

**PR** #30129: (optix2000) Clean up _uptodate() in git state @ 2016-01-04 20:23:18 UTC
  - a6d94358ed Merge pull request #30129 from optix2000/2015.8
  - c68ea6332a No point to recast comments to a string. _uptodate() should only accept strings for comments.
  - 6c5bac4909 Properly fix concat list issue in git state.

**ISSUE** #28814: (peter-slovak) The "virtual" grain detection with virt-what on LXC incorrectly yields "physical" (refs: #29589)
• PR #30139: (rallytime) Back-port #29589 to 2015.8 @ 2016-01-04 20:22:47 UTC
  – PR #29589: (abednarik) Added lxc in virt-what list. (refs: #30139)
  – 68df0f5de Merge pull request #30139 from rallytime/bp-29589
  – 2c73990ff2 Added lxc in virt-what list.
• ISSUE #29833: (iMilnb) salt minion won't start: Non valid IP address match on BSD alias format (refs: #30124)
• PR #30124: (abednarik) Update regex to detect ip alias in OpenBSD. @ 2016-01-04 19:48:28 UTC
  – dd8d3e6f6b Merge pull request #30124 from abednarik/fix_openbsd_ip_alias
  – 595a12977d Update regex to detect ip alias in OpenBSD.
• PR #30133: (stanislavb) Fix typo in gpgkey URL @ 2016-01-04 19:22:39 UTC
  – c301be84b Merge pull request #30133 from stanislavb/fix-gpg-key-url-typo
  – d81f6f7206 Fix typo in gpgkey URL
• ISSUE #29912: (rterbush) s3 ext_pillar fails if key and keyid are not provided (refs: #30126)
• PR #30126: (stanislavb) Log S3 API error message @ 2016-01-04 19:22:39 UTC
  – c06671a259 Merge pull request #30126 from stanislavb/2015.8
  – 8c4a101c8f Log S3 API error message
• PR #30128: (oeuftete) Log retryable transport errors as warnings @ 2016-01-04 19:15:31 UTC
  – aecc21ea65 Merge pull request #30128 from oeuftete/fileclient-attempt-error-to-warning
  – a5d99b13e1 Log retryable transport errors as warnings
• ISSUE #28171: (srkunze) cron.rm cannot remove @special entries (refs: #30096)
• PR #30096: (cachedout) Add rm_special to crontab module @ 2016-01-01 00:56:08 UTC
  – 941bcaed07 Merge pull request #30096 from cachedout/issue_28171
  – 259a0582ac Log S3 API error message
  – ad942820e Add rm_special to crontab module
• PR #30106: (techhat) Ensure last dir @ 2016-01-01 00:52:54 UTC
  – cb0f80831f Merge pull request #30106 from techhat/seeddirs
  – 01d1a49937 Ensure last dir
• PR #30101: (gtmanfred) fix bug where nova driver exits with no adminPass @ 2015-12-31 13:45:16 UTC
  – 6bce96db9a Merge pull request #30101 from gtmanfred/2015.8
  – 1b98f7af38 fix bug where nova driver exits with no adminPass
• PR #30090: (techhat) Add argument to isdir() @ 2015-12-30 22:41:02 UTC
  – 3652dbae76 Merge pull request #30090 from techhat/seeddirs
  – f7c7d9c7c2 Add lstrip
  – c70257163b Add argument to isdir()
• PR #30094: (rallytime) Fix doc formatting for cloud.create example in module.py state @ 2015-12-30 22:40:24 UTC
  – a12bda4b30 Merge pull request #30094 from rallytime/module_state_doc_fix
- 8fbe322b9 Fix doc formatting for cloud.create example in module.py state
  - PR #30095: (rallytime) Add the list_nodes_select function to linode driver @ 2015-12-30 21:06:58 UTC
    - d7f46b5438 Merge pull request #30095 from rallytime/select_query_linode
    - 4731d9442e Add the list_nodes_select function to linode driver
  - ISSUE #28763: (cybacolt) grain saltversioninfo not returning values by index (refs: #30082)
  - PR #30082: (abednariik) Fixed saltversioninfo grain return @ 2015-12-30 18:23:17 UTC
    - dce64c0868 Merge pull request #30082 from abednariik/fix_grain_saltversion_index
    - 882e9ac9ed Fixed saltversioninfo grain return.
  - PR #30084: (rallytime) Back-port #29987 to 2015.8 @ 2015-12-30 18:19:09 UTC
    - PR #29987: (pass-by-value) Make sure output file works for salt cloud (refs: #30084)
      - 5602b8833e Merge pull request #30084 from rallytime/bp-29987
      - 16e1d90e9 Make sure output file works for salt cloud
  - PR #30071: (rallytime) Merge branch '2015.5' into '2015.8' @ 2015-12-29 23:18:00 UTC
    - 654cab0314 Merge pull request #30071 from rallytime/merge-forward-2015.8
    - 394d7548c5 Additional spelling fixes for boto_vpc module
    - f7e58a241c Merge branch '2015.5' into '2015.8'
      - 84db12212d Merge pull request #30059 from mpreziuso/patch-1
      - 1cb1c2da07 Fixes wrong function scope
      - 1c6c9b1a06 Merge pull request #30025 from jtdown/boto_tests
      - e706642152 Skipping some Boto tests until resolved moto issue
      - 0f91021c59 Merge pull request #29949 from aletourneau/2015.5
      - cf855fe262 Fixed trailing white spaces
      - 864801e002 fixed version
      - 041d9346c4 Enhanced netscaler docstring
      - 229d3eb60b Merge pull request #29941 from cachedout/boto_spelling
      - b11bf07b8 Fix spelling error in boto_vpc
      - 69c5ada636 Merge pull request #29908 from cachedout/issue_29880
      - 4cd77b4118 Allow kwargs to be passed to pacman provide for update func
      - ad0de4d563 Merge pull request #29909 from abednariik/freebsd_pkgng_non_interactive_fix
      - 8ac213001a FreeBSD pkgng fix for non-interactive install.
  - PR #30067: (ryan-lane) Pass in kwargs to boto_secgroup.convert_to_group_ids explicitly @ 2015-12-29 23:04:33 UTC
    - 1bf9853808 Merge pull request #30067 from lyft/boto-elb-stable-fix
    - ae22ed1b04 Pass in kwargs to boto_secgroup.convert_to_group_ids explicitly
  - PR #30069: (techhat) Ensure that pki_dir exists @ 2015-12-29 23:03:23 UTC
    - 0a37c4de1a Merge pull request #30069 from techhat/seeddirs
- 0f05d49bde Ensure that pki_dir exists

- **ISSUE #30045**: (AkhterAli) salt-cloud make syndic not possible. (refs: #30064)

- **PR #30064**: (rallytime) Add Syndic documentation to miscellaneous Salt Cloud config options @ 2015-12-29 20:15:45 UTC
  - 896655602e Merge pull request #30064 from rallytime/fix-30045
  - 6176f383e5 Spelling fixes
  - 83c05729d6 Add Syndic documentation to miscellaneous Salt Cloud config options

- **PR #30049**: (rallytime) Add some more unit tests for the vsphere execution module @ 2015-12-29 17:07:41 UTC
  - bad6daca93 Merge pull request #30049 from rallytime/esxi-unit-tests
  - 1a83147986 Remove unnecessary import block
  - 695107a6ee Add some more unit tests for the vsphere execution module

- **PR #30060**: (rallytime) Back-port #27104 to 2015.8 @ 2015-12-29 17:06:58 UTC
  - PR #27104: (hexedpackets) Remove only the file extension when checking missing cached nodes. (refs: #30060)
  - cedere72d7 Merge pull request #30060 from rallytime/bp-27104
  - f0566c4b8f Remove only the file extension on cached node files instead of replacing every ‘.p’ substring.

- **ISSUE #28540**: (whiteinge) The rest_cherrypy automodule docs are hard to digest (refs: #30048)

- **PR #30048**: (jacobhammons) Remove internal APIs from rest_cherrypy docs. @ 2015-12-28 23:24:13 UTC
  - 8766e2de6 Merge pull request #30048 from jacobhammons/28540
  - a04ceb4b8c Remove internal APIs from rest_cherrypy docs. Refs #28540

- **ISSUE #29960**: (anlutro) Circular import in salt.utils.jinja (refs: #30043)

- **PR #30043**: (rallytime) Be explicit about importing from salt.utils.jinja to avoid circular imports @ 2015-12-28 21:35:18 UTC
  - 3c63527313 Merge pull request #30043 from rallytime/fix-29960
  - a157c78bc8 Be explicit about importing from salt.utils.jinja to avoid circular imports

- **PR #30038**: (rallytime) Back-port #30017 to 2015.8 @ 2015-12-28 20:41:45 UTC
  - PR #30017: (anlutro) Change how alternatives states check for installed (refs: #30038)
  - 6cdca314c7 Merge pull request #30038 from rallytime/bp-30017
  - aab35b883e Add versionadded directive for new check_exists function.
  - ca290ec3e1 change how alternatives states check for installed

- **PR #30036**: (rallytime) Back-port #29995 to 2015.8 @ 2015-12-28 20:41:45 UTC
  - PR #29995: (ruxandraburtica) Location from profiles not correctly set (refs: #30036)
  - c846e7bc8e Merge pull request #30036 from rallytime/bp-29995
  - 129a6d7b9f Added vm_ to the get_location query.
  - af8d01a367 Updated ec2 file to correctly propagate location.

- **PR #30035**: (rallytime) Back-port #29895 to 2015.8 @ 2015-12-28 20:20:58 UTC
  - PR #29895: (pass-by-value) Do not SSH to the instance if deploy is False (refs: #30035)
• PR #30034: (rallytime) Back-port #29893 to 2015.8 @ 2015-12-28 20:20:51 UTC
  - PR #29893: (pass-by-value) Add info about VolumeType (refs: #30034)
  - 9e385369b7 Merge pull request #30034 from rallytime/bp-29893
  - 2fcf1590b8 Add info about VolumeType
• PR #30033: (rallytime) Back-port #29876 to 2015.8 @ 2015-12-28 20:20:42 UTC
  - PR #29876: (abednarik) Updated Cloud msic section. (refs: #30033)
  - 4d4df692a Merge pull request #30033 from rallytime/bp-29876
  - a257249789 Add versionadded to SSH Port docs
  - 0bb83e51aa Updated Cloud msic section.
• PR #30029: (terminalmage) git.latest: Fix handling of nonexistent branches @ 2015-12-28 19:39:29 UTC
  - a5f79c2f6 Merge pull request #30029 from terminalmage/git.latest-nonexistent-branch
  - 0b95894e9f git.latest: Fix handling of nonexistent branches
• PR #30016: (anlutro) Properly normalize locales in locale.gen.locale @ 2015-12-28 15:33:48 UTC
  - e7fe24dc64 Merge pull request #30016 from alprs/fix-gen_locale_normalize
  - 75eb4511d3 properly normalize locales in locale.gen.locale
• PR #30015: (anlutro) locale module: don’t escape the slash in \n @ 2015-12-28 15:31:20 UTC
  - 90611e95f4 Merge pull request #30015 from alprs/fix-gen_locale_escaped_newline
  - 5799729aee locale module: don’t escape the slash in n
• PR #30022: (gqgunhed) Two minor typos fixed @ 2015-12-28 15:22:24 UTC
  - b871ce5310 Merge pull request #30022 from gqgunhed/winrepo_ttypo
  - a052f016e fixed minor typos and a :ref: link
  - e47db1a076 Merge remote-tracking branch 'refs/remotes/saltstack/2015.8' into winrepo_ttypo
  - 0c4cb9b5c Merge remote-tracking branch 'refs/remotes/saltstack/2015.8' into 2015.8
• PR #30026: (anlutro) states.at: fix wrong variable being used @ 2015-12-28 15:21:23 UTC
  - 4b8ac20d45 Merge pull request #30026 from alprs/fix-at_without_tag_job
  - e0fe9c99bd states.at: fix wrong variable being used
• PR #29966: (multani) Fix bigip state/module documentation + serializers documentation @ 2015-12-23 15:06:46 UTC
  - e6e36372a4 doc: fix documentation link for salt.serializers
  - 23ef472a07 bigip: fix documentation formatting, remove warnings during doc building
• PR #29904: (twangboy) Improvements to osx packaging scripts @ 2015-12-22 21:40:23 UTC
  - PR #29858: (twangboy) Osx build (refs: #29904)
  - 8f8c8cedd0 Merge pull request #29904 from twangboy/osx_build
- 0be53953af Added function to download and check hashes, added hash files
- 7f0b87fbf3 Added pre/post flight scripts (not running)
- 9eeb6da7bd Improvements to osx packaging scripts

- **PR #29950:** (multani) boto_iam: fix deletion of IAM users when using delete_keys=true @ 2015-12-22 18:43:07 UTC
  - 9522bdf4a5 Merge pull request #29950 from multani/fix/states.boto_iam-delete-user
  - 516c8661f4 boto_iam: fix deletion of IAM users when using delete_keys=true

- **PR #29937:** (multani) Fix states.boto_iam group users @ 2015-12-22 17:33:02 UTC
  - be95d4d79a Merge pull request #29937 from multani/fix/states.boto_iam-group-users
  - 5c86a78d75 boto_iam: handle group's users empty list by removing all users of the group
  - f3461053df boto_iam: passes connection information down to callees

- **PR #29934:** (multani) Fix state.boto_iam virtual name @ 2015-12-22 17:16:25 UTC
  - af2cc5eba7 Merge pull request #29934 from multani/fix/boto_iam
  - 503ede4178 Fix state.boto_iam virtual name

- **ISSUE #29933:** (Reiner030) boto_rds.absent misses pillar variables for final backup (refs: #29943)

- **PR #29943:** (cachedout) Check args correctly in boto_rds @ 2015-12-22 17:15:48 UTC
  - b36302291d Merge pull request #29943 from cachedout/issue_29933
  - 8bab6e9122 Check args correctly in boto_rds

- **PR #29924:** (gqgunhed) fixed: uptime now working on non-US Windows @ 2015-12-22 15:03:17 UTC
  - 0ed5b8f1d1 Merge pull request #29924 from gqgunhed/gqgunhed-2015.8
  - b67c3b45e1 removed duplicate datetime line
  - ed8ee91df fixed: uptime now working on non-US Windows

- **PR #29883:** (serge-p) fix for nfs mounts in _active_mounts_openbsd() @ 2015-12-21 18:26:49 UTC
  - 5e44639334 Merge pull request #29883 from serge-p/patch-6
  - dd94332f24 Update mount.py
  - 9d059a1ea5 fix for nfs mounts in _active_mounts_openbsd()

- **ISSUE #29866:** (tony) spm(1) command should obey Saltfile (refs: #29894)

- **PR #29894:** (techhat) Support Saltfile in SPM @ 2015-12-21 18:03:07 UTC
  - 08fd81cc3d Merge pull request #29894 from techhat/spmsaltfile
  - 279ec61274 Support Saltfile in SPM

- **PR #29856:** (rallytime) Added some initial unit tests for the salt.modules.vsphere.py file @ 2015-12-21 17:12:20 UTC
  - 4f46255044 Merge pull request #29856 from rallytime/esxi-unit-tests
  - b908ebd123 Added some initial unit tests for the salt.modules.vsphere.py file

- **PR #29855:** (rallytime) Back-port #29740 to 2015.8 @ 2015-12-21 17:11:28 UTC
  - **PR #29740:** (kiorky) Type mess in git.latest (refs: #29855)
  - 096f6c6182 Merge pull request #29855 from rallytime/bp-29740
- 4c5e277367 Type mess in git.latest

- **PR #29890**: (multani) Various documentation fixes @ 2015-12-21 16:25:15 UTC
  - 02ab9b8858 Merge pull request #29890 from multani/fix/docs
  - 5aa0e9b1e0 Fix documentation typo for pillars
  - f2b41d04d7 Fix rendering issues for Cherrypy netapi documentation.
  - 6922da46dc doc: fix warnings + some rendering issues

- **PR #29850**: (basepi) [2015.8] Merge forward from 2015.5 to 2015.8 @ 2015-12-18 21:33:49 UTC
  - 50f48c4bf3 Merge pull request #29850 from basepi/merge-forward-2015.8
  - 7402599c62 Merge remote-tracking branch ‘upstream/2015.5’ into merge-forward-2015.8
  - f4f3d166c Merge pull request #29730 from rallytime/fix-24698
    - 120fd5fd0 Update docker-py version requirement to 0.6.0 for dockerio.py files
    - c393a4175a Merge pull request #29715 from rallytime/fix-23343
      - a0ed857c37 Install correct package version, if provided, for npm state.
      - 1310afbc2 Merge pull request #29721 from terminalmage/nested-output-multiline-fix
        - 761be9cb93 Fix display of multiline strings when iterating over a list
    - 52cc07ce49 Merge pull request #29646 from rallytime/fix-29488
      - c5fa9e9351 Don't stacktrace on kwargs.get if kwargs=None

- **PR #29811**: (anlutro) influxdb: add retention policy module functions @ 2015-12-18 17:19:02 UTC
  - 05d2aaaf2e Merge pull request #29811 from alprs/feature-influxdb_retention
  - 51088d908a add tests, rename a function to more closely mirror influxdb
  - 785da17a67 missing comma
  - 7e9e9a1030 influxdb: add retention policy module functions

- **ISSUE #29396**: (Ch3LL) Windows 2012 Multi-Master ZMQError (refs: #29814)

- **PR #29814**: (basepi) [2015.8][Windows] Fix multi-master on windows @ 2015-12-18 17:16:52 UTC
  - 7efaaac58a Merge pull request #29814 from basepi/multi-master.windows.29396
  - 2405501d75 Add documentation for tcp ipc_mode and multi-master
  - 307e867980 For tcp ipc_mode, give each minion different pub/pull ports
  - 5a21893e82 Fix ipc_mode check in windows

- **PR #29819**: (rallytime) Add esxi module and state to docs build @ 2015-12-18 16:20:27 UTC
  - fb4eb28645 Merge pull request #29819 from rallytime/esxi-docs
  - e7c5863468 Add esxi module and state to docs build

- **PR #29832**: (jleimbach) Fixed typo in order to use the keyboard module for RHEL without systemd @ 2015-12-18 16:04:57 UTC
  - e865c787a4 Merge pull request #29832 from jleimbach/fix-keyboard.py-for-rhel-without-systemd
  - 7b72b3c52c Fixed typo in order to use the keyboard module for RHEL without systemd

- **PR #29803**: (rallytime) Add vSphere module to doc ref module tree @ 2015-12-17 18:52:56 UTC
- 404f3bb93 Merge pull request #29803 from rallytime/vsphere-docs
- 3b7f5540ec Add vSphere module to doc ref module tree

• **ISSUE #29751**: (ether42) mod_hostname behavior is systemd dependant (refs: #29767)

• **PR #29767**: (abednarik) Hosts file update in mod_hostname. @ 2015-12-17 18:31:18 UTC
  - 9b4c2194f6 Merge pull request #29767 from abednarik/network_mod_hpstname_fix
  - eebd3e3e4a Hosts file update in mod_hostname.

• **ISSUE #29631**: (joshughes) pygit2: git submodules cause traceback in file_list (refs: #29772)

• **PR #29772**: (terminalmage) pygit2: skip submodules when traversing tree @ 2015-12-17 18:23:16 UTC
  - 0c65eeb82b Merge pull request #29772 from terminalmage/issue29631
  - 8c4ea64b0d pygit2: skip submodules when traversing tree

• **PR #29765**: (gtmanfred) allow nova driver to be boot from volume @ 2015-12-17 18:20:33 UTC
  - 1b430b251f Merge pull request #29765 from gtmanfred/2015.8
  - e95f7561c5 cloudnetworks should be making public_ips a list
  - ec7e45fbfb add documentation for boot from volume on nova driver
  - eafcc5e3ac Add boot from volume for openstack nova

• **PR #29773**: (l2ol33rt) Append missing wget in debian installation guide @ 2015-12-17 17:29:18 UTC
  - c4f226f31e Merge pull request #29773 from l2ol33rt/debian_install_docfix
  - 64cb0b540 Append missing wget in debian installation guide

• **PR #29800**: (rallytime) Back-port #29769 to 2015.8 @ 2015-12-17 17:28:52 UTC
  - PR #29769: (pass-by-value) Add documentation about scopes (GCE) (refs: #29800)
  - aca4da3abc Merge pull request #29800 from rallytime/bp-29769
  - 10bfc8cb0 Add documentation about scopes (GCE)

• **PR #29775**: (paulnivin) Change listen requisite resolution from name to ID declaration @ 2015-12-16 22:56:03 UTC
  - ab61f78295 Merge pull request #29775 from lyft/listen-id-declaration-resolution-stable
  - ff3a809c11 Change listen requisite resolution from name to ID declaration

• **PR #29754**: (rallytime) Back-port #29719 to 2015.8 @ 2015-12-16 17:25:51 UTC
  - PR #29719: (gqgunhed) fixed: include all items from kern.disks split (refs: #29754)
  - 5af64b64f2 Merge pull request #29754 from rallytime/bp-29719
  - ed275977e3 fixed: include all items from kern.disks split

• **PR #29713**: (The-Loeki) Pillar-based cloud providers still forcing use of deprecated 'provider' @ 2015-12-16 14:51:31 UTC
  - PR #29753: (The-Loeki) Fix CloudStack cloud for new 'driver' syntax (refs: #29713)
  - b3f17daa8 Merge pull request #29713 from The-Loeki/patch-1
  - 35fe2a5c18 lint fix
  - dfab68186 Update __init__.py
  - 65e2d9ac1e Pillar-based cloud providers still forcing use of deprecated 'provider'
ISSUE #14634: (Sacro) 'unless' documentation isn't logically plausible (refs: #29729)

PR #29729: (rallytime) Further clarifications on "unless" and "onlyif" requisites. @ 2015-12-16 14:45:06 UTC
- 1f4810be0f Merge pull request #29729 from rallytime/fix-14634
- 45b77f288 Add note about shell truthiness vs python truthiness
- 3bfb7c031 Spelling fixes
- 15c6e6cc12 Further clarifications on "unless" and "onlyif" requisites.

ISSUE #29736: (akissa) Pillar sqlite3 examples incorrect (refs: #29737)

PR #29737: (akissa) fix pillar sqlite3 documentation examples @ 2015-12-16 14:41:57 UTC
- 7084f79199 Merge pull request #29737 from akissa/fix-pillar-sqlite3-examples
- 1c98f8d609 fix pillar sqlite3 documentation examples

ISSUE #29741: (akissa) Pillar Sqlite3 does not honour database config option when using salt-call (refs: #29743)

PR #29743: (akissa) fix pillar sqlite not honouring config options @ 2015-12-16 14:40:27 UTC
- e977096409 Merge pull request #29743 from akissa/fix-pillar-sqlite3-does-not-honour-config
- 6184fb1ae1 fix pillar sqlite not honouring config options

ISSUE #29152: (guettli) docs for states.postgres_user.present: name and password twice? (refs: #29723)

PR #29723: (rallytime) Clarify db_user and db_password kwargs for postgres_user.present state function @ 2015-12-15 23:58:43 UTC
- 2cea0b0a2d Merge pull request #29723 from rallytime/fix-29152
- 8d8fdd0a27 Clarify db_user and db_password kwargs for postgres_user.present state function

ISSUE #29154: (guettli) [Docs] for cmd.run. Missing link to details for "stateful" (refs: #29722)

PR #29722: (rallytime) Link "stateful" kwargs to definition of what "stateful" means for cmd state. @ 2015-12-15 23:25:48 UTC
- 30eab23c43 Merge pull request #29722 from rallytime/fix-29154
- 5c045a86af Link "stateful" kwargs to definition of what "stateful" means for cmd state.

ISSUE #29091: (gravyboat) Salt pillar best practices should show 2 matchers in base (refs: #29724)

PR #29724: (rallytime) Add examples of using multiple matching levels to Pillar docs @ 2015-12-15 23:02:32 UTC
- c9ca1a371e Merge pull request #29724 from rallytime/fix-29091
- 45080f3629 Add examples of using multiple matching levels to Pillar docs

PR #29726: (cachedout) Disable some boto tests per resolution of moto issue @ 2015-12-15 22:15:35 UTC
- 4985cc57f1 Merge pull request #29726 from cachedout/disable_moto_2015_8
- d19827fd3a Disable some boto tests per resolution of moto issue

ISSUE #25723: (jamesog) file.directory fails in test mode when using recurse ignore_files (refs: #29708)

PR #29708: (lagesag) Fix test=True for file.directory with recurse ignore_files/ignore_dirs. @ 2015-12-15 19:15:14 UTC
- aba82abfd Merge pull request #29708 from lagesag/fix-file-directory-test-mode
- 872b5eeef PyLint fix #25723
- 3e46cb9213 Fix test=True for file.directory with recurse ignore_files/ignore_dirs.

- **ISSUE #29199**: (hubez) 2015.8.1 and 2015.5.6: salt-minion self-restart doesn't work in daemon mode. Works when not a daemon (refs: #29642)

- **PR #29642**: (cachedout) Correctly restart daemonized minions on failure @ 2015-12-15 19:02:40 UTC
  - 7c38dec0ad Merge pull request #29642 from cachedout/issue_29199
  - 8b2c6817cf Sleep before restart
  - 4105e2abfb Correctly restart daemonized minions on failure

- **PR #29599**: (cachedout) Clean up minion shutdown @ 2015-12-15 19:01:35 UTC
  - bd918394c3 Merge pull request #29599 from cachedout/clean_minion_shutdown
  - 0b917971fe Log at debug level instead
  - a04280cebf Re-raise error to preserve restart behavior
  - dc480e332a Clean up warning on failed master ping.
  - 049a3dbbfc Additional fixes.
  - 8a4969b730 Clean up minion shutdown

- **PR #29675**: (clinta) allow returning all refs @ 2015-12-15 18:55:36 UTC
  - 31eb291caf Merge pull request #29675 from clinta/git-ls-remote-noref
  - 8c34b0c76 version updated
  - 73b169e7dd lint, remove trailing whitespace
  - 8400e6a826 allow returning all refs

- **PR #29683**: (rallytime) Catch more specific error to pass the error message through elegantly. @ 2015-12-15 18:41:54 UTC
  - 7c505337df Merge pull request #29683 from rallytime/vsan_fixes
  - afc003079e Catch more specific error to pass the error message through elegantly.

- **PR #29687**: (basepi) [2015.8] Merge forward from 2015.5 to 2015.8 @ 2015-12-15 18:38:46 UTC
  - 30499e4896 Merge pull request #29687 from basepi/merge-forward-2015.8
  - b51cba59c0 Merge remote-tracking branch ‘upstream/2015.5’ into merge-forward-2015.8
    - f606c23ea8 Merge pull request #29673 from rallytime/fix-29661
      - e4af7a1157 Default value should be False and not 'False'
    - f77c8e7baf Merge pull request #29527 from jfindlay/2015.5
      - 1a8044f0c9 2015.5.7 notes: add note about not being released

- **ISSUE #27611**: (benburkert) PR #26818 broke git.latest with :mirror/:bare (refs: #29681)

- **PR #29681**: (clinta) fix bare/mirror in git.latest @ 2015-12-15 18:37:16 UTC
  - 3c427e82bf Merge pull request #29681 from clinta/git-mirror
  - b387072aaf fix bare/mirror in git.latest

- **PR #29644**: (rallytime) Fixed a couple more ESXi proxy minion bugs @ 2015-12-14 18:36:28 UTC
  - fe0778dad5 Merge pull request #29644 from rallytime/esxi-fixes
  - 577d5487a3 Fixed a couple more ESXi proxy minion bugs

### 28.2. Previous Releases
• PR #29645: (rallytime) Back-port #29558 to 2015.8 @ 2015-12-14 18:11:38 UTC
  – PR #29558: (ruxandraburtica) Returning security group when no VPC id is given (refs: #29645)
  – ef2c9e3f61 Merge pull request #29645 from rallytime/bp-29558
  – 2cf9374342 Replaced tabs with spaces.
  – 5e7e36e682 Returning security group when no VPC id is given, even if the group is not in EC2-classic.
• ISSUE #29630: (c4t3l) Fresh minion install (2015.8.3) returns service __virtual__ is False errors on salt-calls (refs: #29632)
• ISSUE #29581: (zmalone) Complaints about pyOpenSSL version on Saltstack 2015.8.3 (refs: #29632)
• PR #29632: (jfindlay) reduce severity of tls module __virtual__ logging @ 2015-12-11 20:11:32 UTC
  – a2a7f1527b Merge pull request #29632 from jfindlay/tls_virt
  – 36da052fd modules.tls.__virtual__: don’t spam everyone’s error log
  – 76a200e780 modules.tls.__virtual__: refactor cert path comment
  – 0a5332e598 modules.tls.__virtual__: remove redundant parens
• ISSUE #29598: (javicacheiro) Duplicated MTU entry added (refs: #29606)
• PR #29606: (abednarik) Fixed duplicate mtu entry in RedHat 7 network configuration. @ 2015-12-11 17:24:45 UTC
  – f6ffaa6613 Merge pull request #29606 from abednarik/remove_duplicate_mtu_entry_rh7_net_template
  – abf887ba Fixed duplicate mtu entry in RedHat 7 network configuration.
• PR #29613: (rallytime) Various ESXi Proxy Minion Bug Fixes @ 2015-12-11 17:18:58 UTC
  – c7e73bc4e8 Merge pull request #29613 from rallytime/esxi-fixes
  – aa5d88b6f Various ESXi Proxy Minion Bug Fixes
• ISSUE #26364: (cedwards) [freebsd] TCP transport not working in 2015.8.0rc3 (refs: #29628)
• PR #29628: (DmitryKuzmenko) Don’t create io_loop before fork @ 2015-12-11 17:15:11 UTC
  – a56c763423 Merge pull request #29628 from DSRCompany/bug/26364_freebsd_tcp
  – 729ffcae36 Don’t create io_loop before fork
• PR #29609: (basepi) [2015.8][salt-ssh] Add ability to set salt-ssh command umask in roster @ 2015-12-10 22:52:27 UTC
  – 4188172377 Merge pull request #29609 from basepi/salt-ssh.umask.29574
  – 0a5b0d5d Add cmd_umask to roster docs
  – 5c03892bc Allow setting the cmd_umask from within the roster
• ISSUE #29586: (basepi) Orchestrate doesn’t handle minion error properly (refs: #29603)
• ISSUE #29546: (jefferyharrell) Can’t seem to get orchestrate to recognize a failed state (refs: #29603)
• PR #29603: (basepi) Fix orchestration failure-checking @ 2015-12-10 21:23:57 UTC
  – 1e39f45ab1 Merge pull request #29603 from basepi/orchestrate.failures.29546
  – 2b2dcdaa27 Remove unnecessary and
  – 501f91a388 Fix error in failure checking for salt.state within orchestration
• ISSUE #29584: (kwilliams057) dockerng image-present fails when trying to pull from registry (refs: #29597)
- **PR #29597**: (terminalmage) dockerng: Prevent exception when API response contains empty dictionary @ 2015-12-10 19:57:42 UTC
  - b5b80b9324 Merge pull request #29597 from terminalmage/issue29584
  - d68067b5db dockerng: Prevent exception when API response contains empty dictionary
- **ISSUE #29585**: (job) cidr argument in salt.modules.network.ip_addrs6() is broken (refs: #29587)
- **PR #29596**: (rallytime) Back-port #29587 to 2015.8 @ 2015-12-10 19:57:18 UTC
  - PR #29597: (job) Fix the 'cidr' arg in salt.modules.network.ip_addrs6() (refs: #29596)
  - ff54ccedd7 Merge pull request #29596 from rallytime/bp-29587
  - bf75ce363 Fix the 'cidr' arg in salt.modules.network.ip_addrs6()
- **PR #29588**: (rallytime) Added ESXi Proxy Minion Tutorial @ 2015-12-10 16:17:51 UTC
  - 08dd663a27 Merge pull request #29588 from rallytime/esxi-proxy-tutorial
  - 5a2bb260d3 Added ESXi Proxy Minion Tutorial
- **ISSUE #29557**: (arthurlogilab) [modules/nova] AttributeError: 'module' object has no attribute 'discover_extensions' when using nova.image_list (refs: #29572)
- **PR #29572**: (gtmanfred) [nova] use old discover_extensions if available @ 2015-12-09 17:35:42 UTC
  - fe5db23863 Merge pull request #29572 from gtmanfred/2015.8
  - d0ff520f4 use old discover_extensions if available
- **ISSUE #29009**: (LoveIsGrief) git.latest doesn't checkout submodules (refs: #29545)
- **PR #29545**: (terminalmage) git.latest: init submodules if not yet initialized @ 2015-12-09 16:19:42 UTC
  - ec660ba05 Merge pull request #29545 from terminalmage/issue29009
  - 6619503aec git.latest: init submodules if not yet initialized
- **PR #29548**: (rallytime) Back-port #29449 to 2015.8 @ 2015-12-09 16:19:07 UTC
  - PR #29449: (AkhterAli) Adding message for null public IP (refs: #29548)
  - 3b2c93a2e5 Merge pull request #29548 from rallytime/bp-29449
  - 3715cd7d65 Adding message for null public IP
- **PR #29547**: (rallytime) Refactored ESXCLI-based functions to accept a list of esxi_hosts @ 2015-12-09 16:08:03 UTC
  - fd7903bf9 Merge pull request #29547 from rallytime/esxi-proxy
  - 469648dd07 Refactored ESXCLI-based functions to accept a list of esxi_hosts
- **PR #29563**: (anlutro) Fix a call to deprecated method in python-influxdb @ 2015-12-09 16:00:24 UTC
  - 21437f9235 Merge pull request #29563 from alprs/fix-influx_deprecated_method
  - 7c69c77ed update test
  - 46d7d92069 fix a call to deprecated method in python-influxdb
- **PR #29565**: (bdrung) Fix typos and missing release note @ 2015-12-09 15:59:21 UTC
  - f29e0a7021 Merge pull request #29565 from bdrung/2015.8
  - b96d8ff1d9 Minor update to release notes for missing fix
  - e72354a9a4 Fix typo specific -> specific
Salt Documentation, Release 3002.2

- 5708355762 Fix typo comparsion -> comparison

- **PR #29540**: (basepi) [2015.8] Merge forward from 2015.5 to 2015.8 @ 2015-12-08 21:27:01 UTC
  - 25d3a75d8c Merge pull request #29540 from basepi/merge-forward-2015.8
  - e59364ad1d Fix failing unit test
  - 9673fd0937 Merge remote-tracking branch `upstream/2015.5` into merge-forward-2015.8
    - 867d550271 Merge pull request #29539 from rallytime/fix-12072
      - 2c9c4ba430 Merge remote-tracking branch `upstream/2014.7` into merge-forward-2015.5
      - 85aa70a6cb Merge pull request #29392 from jacobhammons/2014.7
      - d7f0db1dd8 updated version number to not reference a specific build from the latest branch
    - de7f35a59 Merge pull request #29504 from rallytime/fix-12072
      - 8557c95dc2 Document userdata_file option for EC2 driver
    - 65deba8bb5 Merge pull request #29507 from rallytime/ec2-doc-fix
      - 90b482bc2 Switch volumes and del_*_on_destroy example ordering
    - 0918c994f Merge pull request #29469 from abednarik/doc_note_for_saltcloud_connection_timeout
      - 8673c366da Added Documentation note in salt cloud.
    - e43c7c5a6 Merge pull request #29461 from dmyerscough/fix-resource-limits
      - 85aa3b033 Fix resource limits, systemd sets the default number of open files to 4096 causing
        the master to complain about limits when you have a large number of keys
    - 730f02bdf Merge pull request #29439 from rallytime/bp-28656
      - 2f11b021f #28526 fixed yumpkg module
    - 19721052a Merge pull request #29418 from jacobhammons/dot8
      - 4f51a737f9 Added CVE 2015-8034 to 2015.5.8 release notes
    - b3452f2a1a Merge pull request #29389 from jacobhammons/2015.5
      - 824721ff36 updated version numbers
  - 6a7a95f28a Merge pull request #28501 from twangboy/jmoney_26898
    - c0cf3332c Fixed some Lint...
      - df17fc59d3 Merge pull request #6 from jfindlay/twang_test
      - bc7e0cfe64 add file.symlink unit tests
      - 9381dc7215 orthogonalize file.symlink unit tests
      - 8f462ba044 Merge pull request #5 from cachedout/fix_twangboy_test
      - 5293150d25 Fix tests
      - 7d39901e91 Fixed some more lint
      - 3dbd62af2c Fixed some tests... hopefully
      - f187db3288 Removed unnecessary logic
      - 89ebd268e6 Added file attributes restore on fail
      - 9ec72ca724 fix file state unit tests for win symlink feature

Chapter 28. Release Notes
- 69c32a663e Fixed some lint
- 638dec5027 Fixed some tests... let's see if they're really are
- 5ed7a99792 Replaced instances of shutil.rmtree in file state
- 2651ce509f Fix file.remove for windows
  * 760a521603 Merge pull request #29348 from jtand/file_search_fix
    - 04f82bd4fd Fixes an file.search on python2.6
  * 51ea88d489 Merge pull request #29336 from rallytime/bp-29276
    - 3a0e19debb Prevent adding port twice when adding entry in known hosts
  * 28255af52a Merge pull request #29333 from rallytime/bp-29280
    - 722d02f4a Lint
    - 4a0040c1b4 [Doc] Add note for SVN state

- PR #29499: (rallytime) Initial commit of ESXi Proxy Minion @ 2015-12-08 21:10:13 UTC
  - 3ae096b7ac Merge pull request #29499 from rallytime/esxi-proxy
  - d8b1ba3991 Make sure ESXCLI gating is correct in vsphere __virtual__
  - 55589f8021 Provide some more inline comments for longer functions
  - baf2f8ce7a Pylint fix
  - 763ae5d676 VMotion functions, gate ESXCLI requirement, allow protocol/port for ESXCLI function
  - d909df254e Bug fixes for esxi states
  - 7102677679 Bug fixes and move ntp and ssh service start/stop/restart to single funcs
  - 77b37add84 Added syslog_configured state, and some minor bug fixes
  - df49f533f6 More state functions and a couple of bug fixes
  - a50c74cfe2 Merge pull request #13 from cro/esxi-proxy3
    * 87fc980f33 Add syslog config and network firewall rules enable
  - 42be49f481 Merge pull request #11 from cro/esxi-proxy
    * d858642f05 Add documentation.
    * 43879d1dfe Functions for setting network coredumps
  - 7d7d2afa7f Initial commit of ESXi state and refactored vsan_add_disks to include a get function.
  - bc945a48db Add execution module functions to upload ssh key for root and retrieve ssh key for root.
  - 238b0f5bea Update error return policy and add service running/policy functions
  - 9ba9019419 Initial commit of ESXi proxy work.

- PR #29526: (jfindlay) 2015.8.2 notes: add note about not being released @ 2015-12-08 21:09:50 UTC
  - 873f6a9460 Merge pull request #29526 from jfindlay/2015.8
  - 3de61e3655 Merge pull request #29531 from jfindlay/suse_patch

- ISSUE #29484: (m7v8) patchlevel detection broken for openSuSE (refs: #29531)
- 1ad5a088fc grains.core: handle undefined variable

- **ISSUE #29486**: (m7v8) Pull request breaks our setup (umask) (refs: #29538)
- **ISSUE #29005**: (fcrozat) non-standard umask breaks salt-call call in salt-ssh (refs: #29126)
- **ISSUE #28830**: (fcrozat) non-standard umask breaks salt-ssh deployment (refs: #29126)
- **PR #29538**: (basepi) [2015.8] [salt-ssh] Remove umask around actual execution for salt-ssh @ 2015-12-08 20:45:58 UTC
  - **PR #29126**: (fcrozat) Fix deployment when umask is non-standard (refs: #29538)
  - 1d801441a Merge pull request #29538 from basepi/salt-ssh.umask.29486
  - 5edfa014f5 Remove umask around actual execution for salt-ssh
- **ISSUE #28715**: (mlalpho) Tagging Resources with boto_rds (refs: #29505)
- **PR #29505**: (rallytime) Update boto_rds state docs to include funky yaml syntax for "tags" option. @ 2015-12-08 17:05:02 UTC
  - fb02fc1ef1 Merge pull request #29505 from rallytime/fix-28715
  - f43f851a92 Update boto_rds state docs to include funky yaml syntax for "tags" option.
- **PR #29513**: (bdrung) Drop obsolete syslog.target from systemd services @ 2015-12-08 16:05:01 UTC
  - 3888add56e Merge pull request #29513 from bdrung/2015.8
  - b1a4ade618 Drop obsolete syslog.target from systemd services
- **PR #29500**: (rallytime) Back-port #29467 to 2015.8 @ 2015-12-07 23:24:00 UTC
  - **PR #29467**: (serge-p) Update module.py (refs: #29500)
  - 148dad6674 Merge pull request #29500 from rallytime/bp-29467
  - ca0be8b0f0 Update module.py
- **ISSUE #29001**: (olfway) debconf.set doesn’t support "prereq" in states (refs: #29463)
- **PR #29463**: (abednarik) Add "**kwargs to debconf.set. @ 2015-12-07 19:56:05 UTC
  - 9d11acc7db Merge pull request #29463 from abednarik/debconf_fix_prereq_support
  - b1f7f1fed43 Add "**kwargs to debconf.set.
- **ISSUE #29311**: (Reiner030) Feature Request: System uptime also in seconds (refs: #29399)
- **PR #29399**: (jfindlay) modules.status: add human_readable option to uptime @ 2015-12-07 19:53:52 UTC
  - 7fdd3dd140 Merge pull request #29399 from jfindlay/second_up
  - 1903124814 modules.win_status: add reason to virtual ret
  - 35ba7da470 modules.status: add reason to __virtual__ return
  - 48e7be0eb modules.status: add in_seconds option to uptime
- **PR #29433**: (cro) Files for building .pkg files for MacOS X @ 2015-12-07 19:47:23 UTC
  - 042daf91b8 Merge pull request #29433 from cro/mac_native_pkgs
  - 8e191ae264 Add web references
  - 5f1459d708 Update mac packaging
  - 092b7dd0a First crack at build files for Mac OS X Native package
• ISSUE #29445: (shawnbutts) salt.loaded.int.module.nova.__virtual__() is wrongly returning None. (refs: #29455)

• PR #29455: (jfindlay) modules.nova.__init__: do not return None @ 2015-12-07 19:44:00 UTC
  - 5ff3749108 Merge pull request #29455 from jfindlay/nova_none
  - 19da823e8 modules.nova.__init__: do not return None

• PR #29454: (jfindlay) rh_service module __virtual__ return error messages @ 2015-12-07 19:32:15 UTC
  - 289ee9d169e Merge pull request #29454 from jfindlay/rh_service
  - 997550bf86 modules.rh_service.__virtual__: handle SUSE osrelease as num
  - d7ab7bf51f modules.rh_service: __virtual__ error messages

• PR #29476: (tbaker57) Doc fix - route_table_present needs subnet_names (not subnets) as a key @ 2015-12-07 18:47:22 UTC
  - cb465927d6 Merge pull request #29476 from tbaker57/boto_vpc_docfix
  - 36946640b8 Fix - don't specify 'name' key inside the list - just the subnet names
  - 5c4ab7b775a Doc fix - route_table_present needs subnet_names (not subnets) as a key

• PR #29487: (rallytime) Back-port #29450 to 2015.8 @ 2015-12-07 17:25:23 UTC
  - PR #29450: (pass-by-value) Raise error if dracr password is above 20 chars (refs: #29487)
  - 6696c6eb5 Merge pull request #29487 from rallytime/bp-29450
  - 2c55c5f1f Raise error if dracr password is above 20 chars

• ISSUE #29133: (cedwards) FX2 proxy-minion dellchassis idrac state incomplete (refs: #29441)

• PR #29441: (rallytime) Make sure docs line up with blade_idrac function specs @ 2015-12-05 16:30:27 UTC
  - a1f5e5ac5 Merge pull request #29441 from rallytime/fix-doc-dellchassis
  - c62361830 Make sure docs line up with blade_idrac function specs

• PR #29440: (rallytime) Back-port #28925 to 2015.8 @ 2015-12-05 00:21:26 UTC
  - PR #28925: (pass-by-value) Fx2 firmware update (refs: #29440)
  - 6cc6f6eb5 Merge pull request #28940 from rallytime/bp-28925
  - 31555f1f Raise error if dracr password is above 20 chars
  - 1b5a57c48 Lint fixes
  - 7ce3af4b Support multiple hosts
  - 0b3620715 Set kwarg
  - b7324b5102 Add doc for new state
  - 613dd0b7a2 Make sure creds are set before racadm update
  - 929e679b25 Add firmware update state to dellchassis
  - 356af3b99 Raise error
  - 820ad7b3df Validate file existence
  - 94704304ec Add firmware update functions to module

• ISSUE #29425: (paclat) services for older OEL releases. (refs: #29435)

• PR #29435: (galet) Grains return wrong OS version and other OS related values for Oracle Linux @ 2015-12-05 00:19:11 UTC
• ISSUE saltstack/salt#29313: (rmatulat) state/host.present and alias-assignment to multiple IPs fails (refs: #29430)

• PR #29430: (rmatulat) Fix host.present state limitation @ 2015-12-04 23:08:20 UTC
  – e2b43a3f1e Merge pull request #29430 from rall0r/2015.8
  – d3dacff4a2 Fix host.present state limitation

• PR #29417: (jacobhammons) Repo install updates @ 2015-12-04 02:39:41 UTC
  – ab890b632a Merge pull request #29417 from jacobhammons/repo-install-updates
  – d58182c6fa updated repo path for RHEL installation
  – 5e54359869 Updated Debian, RHEL / Cent, Ubuntu installation instructions with new repo structure for 2015.8.3. Added CVE-2015-8034 to release notes.

• PR #29402: (techhat) Add rate limiting to linode @ 2015-12-03 20:27:10 UTC
  – cb1e2e6e73 Merge pull request #29402 from techhat/ratelimit
  – f0a4d93077 Add rate limiting to linode

• ISSUE #19332: (QuinnyPig) Nondeterminism in Pillar (refs: #29400)

• PR #29400: (twangboy) Fix #19332 @ 2015-12-03 20:25:16 UTC
  – 8fe39d0ef8 Merge pull request #29400 from twangboy/fix_19332
  – 7bdddaca53 Fixed grammor
  – d965d00a09 Fix #19332

• PR #29398: (cachedout) Lint 29288 @ 2015-12-03 18:03:53 UTC
  – d2c0fbc97 Merge pull request #29398 from cachedout/lint_29288
  – 3b0033e529 Lint #29288
  – 386459ca6d Merge pull request #1 from jfindlay/glustest
    – 4d6c71aa80 modules.glusterfs: fix start_volume unit test
    – f336c44630 Bootstrap failed, retrying
    – bd79cb3ea Set default GlusterFS version to 6
    – 443bc6a81 Fixed volume status for >= 3.7 in glusterfs.py

• ISSUE #29116: (johnsocp) Unresolvable masters in the minions masters list cause minion to raise an error (refs: #29331)

• PR #29331: (DmitryKuzmenko) Bugfix - #29116 raeq dns error @ 2015-12-03 17:10:40 UTC
  – 5b8e7820ac Merge pull request #29331 from DSRCcompany/bug/29116_raet_dns_error_2
  – 8c2b217af5 Make pylint happy
  – e5672ee616 Don't exit if no master found
  – 1c324f5467 Don't fail if can't connect to master

• PR #29390: (jacobhammons) updated version numbers in documentation @ 2015-12-03 17:02:05 UTC
- 7bc6b1210d Merge pull request #29390 from jacobhammons/2015.8
- 486935b233 updated version numbers

- **ISSUE #25446**: (DmitryKuzmenko) Stack overflow on LazyLoader deep copying (refs: #29381)
- **PR #29381**: (nmadhok) No need to deepcopy since six.iterkeys() creates a copy @ 2015-12-03 15:54:52 UTC
  - fd677e1d58 Merge pull request #29381 from nmadhok/2015.8-runtime-fix
  - f106989196 No need to deepcopy since six.iterkeys() creates a copy
- **PR #29349**: (cro) Fix mis-setting chassis names @ 2015-12-03 00:56:54 UTC
  - 2973025058 Merge pull request #29349 from cro/fx2_name_fix
  - 95d6d7a5d Fix mis-setting the name of the chassis.

- **ISSUE #29236**: (sjorge) network.mod_bufsize has wrong docstring (refs: #29237)
- **ISSUE #29235**: (sjorge) network.get_bufsize has wrong docstring (refs: #29237)
- **ISSUE #29234**: (sjorge) network.dig should only be available if we have the ‘dig’ binary (refs: #29237)
- **ISSUE #29233**: (sjorge) network.default_route does not seem to honor the family parameter (refs: #29237)
- **ISSUE #29232**: (sjorge) network.active_tcp seems linux specific (refs: #29237)
- **ISSUE #29231**: (sjorge) docstrings in salt/utils/network.py are incorrect (refs: #29237)

- **PR #29334**: (rallytime) Back-port #29237 to 2015.8 @ 2015-12-02 19:37:31 UTC
  - **PR #29237**: (sjorge) Module network fixes (refs: #29334)
  - 17d80c051a Merge pull request #29334 from rallytime/bp-29237
  - 598226def1 fix unit test (attempt 1)
  - a461d7bf12 changed from Boron to 2015.8.4, so this can be backported
  - 3892b12514 fix up a few remarks from jfindlay
  - 2f940e22aa also we should keep returning {} for other systems
  - 4953f58894 forgot to remove a debug line, how embarasing
  - e96f3c0e3b fix docs in salt/utils/network.py #29231 - looks like this got copied at some point
  - 3888bb403f fixup network.default_route with family set on SunOS #29233
  - c0e6ca98a6 fix network.active_tcp on SunOS (we fake it until we make it) #29232
  - 92f881284e add decorator to network.dig #29234
  - 77950eb55c fix docstring for get_bufsize #29235
  - 52fb80cd18 fix docstring for mod_bufsize #29236

- **ISSUE #28990**: (adithep) Dockerng volume (refs: #29300)

- **PR #29300**: (ticosax) [dockerng] Add support for volume management in dockerng @ 2015-12-02 17:48:53 UTC
  - 5ec7947b95e Merge pull request #29300 from ticosax/dockerng-volumes
  - 80d085ea92 fix typo
  - cb9cb463b0 Provide states for managing docker volumes
  - ddf6fa1fb2 Add execution module to manage docker volumes

- **PR #29218**: (clan) check service enable state in test mode @ 2015-12-02 15:31:00 UTC
PR #29315: (jfindlay) dev tutorial doc: fix markup errors @ 2015-12-01 21:42:17 UTC
- 08ced73b13 Merge pull request #29315 from jfindlay/docs
- e8e23d444 dev tutorial doc: fix markup errors

PR #29317: (basepi) [2015.8] Merge forward from 2015.5 to 2015.8 @ 2015-12-01 21:28:30 UTC
- a3a463ff8b Merge pull request #29317 from basepi/merge-forward-2015.8
- 0d90dd3a19 Merge remote-tracking branch 'upstream/2015.5' into merge-forward-2015.8
- 14e94b3593 Merge pull request #29316 from basepi/merge-forward-2015.5
  * 33f40b3c47 Merge remote-tracking branch 'upstream/2014.7' into merge-forward-2015.5
  * d2fb2109a3 Merge pull request #29296 from douardda/patch-3

28.2.71 Salt 2015.8.5 Release Notes

Version 2015.8.5 is a bugfix release for 2015.8.0.

Important: About this Release Salt 2015.8.5 is identical to the 2015.8.4 release with the addition of a fix for issue #30820, fixed by PR #30833. See here for the 2015.8.4 release notes.

Known Issue in boto_* execution modules

This release contains an issue that causes the boto_* execution modules to display a __salt__ not defined error (issue #30300). This issue will be fixed in an upcoming release, but can be manually resolved by completing the following:

1. Download the boto_* execution modules that you would like to update from the 2015.8 branch of Salt. A complete list of affected modules with the specific changes is available in `pull 30867`.

   A simple way to get the updated modules is to download a zip file of the 2015.8 branch from GitHub. The updated modules are in the salt\modules directory.

2. Place the boto_* modules into salt://_modules.

3. Run the following command to sync these modules to all Salt minions:

```bash
salt '*' saltutil.sync_modules
```
Changelog for v2015.8.4..v2015.8.5

- c7db4350d5 Fix regression in scanning for state with 'name' param

28.2.72 Salt 2015.8.7 Release Notes

Version 2015.8.7 is a bugfix release for 2015.8.0.

Note: Salt 2015.8.4, 2015.8.5, and 2015.8.7 were all released within a short period due to regressions found soon after the releases of 2015.8.4 and 2015.8.5. See here for the 2015.8.4 release notes, and here for the 2015.8.5 release notes.

Change to Epoch Support for YUM/DNF

For pkg.installed states, on Linux distributions which use yum/dnf, packages which have a non-zero epoch in the version number now require this epoch to be included when specifying an exact version for a package. For example:

```sh
vim-enhanced:
- pkg.installed:
  - version: 2:7.4.160-1.el7
```

The pkg.latest_version and pkg.list_repo_pkgs functions can be used to get the correct version string to use, as they will now contain the epoch when it is non-zero.

- 1ae022dbfe Pass in 'pack' variable to utils.boto.assign_funcs function from ALL boto modules.
- 1efaff107d Remove bad symlinks in osx pkg dirs

28.2.73 Salt 2015.8.8 Release Notes

Version 2015.8.8 is a bugfix release for 2015.8.0.

Important: Version 2015.8.8.2 was released shortly after 2015.8.8 to fix several known issues. If you installed 2015.8.8 before 03/30/2016, you likely have installed 2015.8.8 and can optionally upgrade (find out which version you have installed using salt --version).

Security Fix

CVE-2016-3176 Insecure configuration of PAM external authentication service

This issue affects all Salt versions prior to 2015.8.8/2015.5.10 when PAM external authentication is enabled. This issue involves passing an alternative PAM authentication service with a command that is sent to LocalClient, enabling the attacker to bypass the configured authentication service. Thank you to Dylan Frese <dmfrese@gmail.com> for bringing this issue to our attention.

This update defines the PAM eAuth service that users authenticate against in the Salt Master configuration.

Read Before Upgrading Debian 7 (Wheezy) from 2015.8.7 to 2015.8.8

Before you upgrade from 2015.8.7 on Debian 7, you must run the following commands to remove previous packages:

```bash
sudo apt-get remove python-pycrypto
sudo apt-get remove python-apache-libcloud
```

Note that python-pycrypto will likely remove python-apache-libcloud, so the second command might not be necessary. These have been replaced by python-crypto and python-libcloud with ~bpo70+1 moniker.

Read Before Upgrading Debian 8 (Jessie) from Salt Versions Earlier than 2015.8.4

Salt systemd service files are missing the following statement in these versions:

```ini
[Service]
KillMode=process
```

This statement must be added to successfully upgrade on these earlier versions of Salt.

- ce765ad2df Merge pull request #31924 from jfindlay/2015.8
- 64dd8aebb2 update 2015.8.8 release notes

- **ISSUE #31890**: (damon-atkins) salt/fileclient.py get_url should include the URL in any error message (refs: #31922)

- **PR #31922**: (cachedout) For 2015.8 head @ 2016-03-16 19:07:11 UTC
  - 390ef9fca7 Merge pull request #31922 from cachedout/issue_31890_1
  - da075d9341 For 2015.8 head

- **PR #31904**: (rallytime) [2015.8] Merge forward from 2015.5 to 2015.8 @ 2016-03-16 17:23:54 UTC
  - 03e8b72655 Merge pull request #31904 from rallytime/merge-2015.8
  - f8b4b1b211 last pylint!
  - 892591a39c More pylint fixes
  - 35b2076584 Pylint fixes
  - 1a1ce05186 Merge branch '2015.5' into '2015.8'
  - 440e0dcb0 Merge pull request #31825 from jfindlay/udpate_pylintrc
    - 9a14e02766 Updated beacons/sh.py to work with enumerate()
    - 0ecce691a0 Adjusted beacons to work with enumerate better
    - f509b4113e Fixed final lint error
    - 5945b3f11f Fix and disable pylint errors
    - 06ae6eaf55 Fixed pylint errors on jboss state and module
    - de96db97c8 Fixed more pylint errors, and disabled some more
    - c07b0a20b5 Merge branch 'lint_fixes' into udpate_pylintrc
    - 2e6a152308 Fixed lint error in lxc.py
    - 908ca1a439 Fixed lint error in ssh_py_shim
    - 404c1b50f7 Changed range(len()) to enumerate()
    - 1e13586546 Changed range(len()) to enumerate()
    - 9ccce7a9a5 Added more disables
    - 9c1ab3b4e Updated .testing.pylintrc to match newer versions of pylint
  - 471c9444a3 Merge pull request #31900 from rallytime/fix-psutil-warning
    - 22403d69ae Add "python module" clarification to ps __virtual__ warning.
  - c44c1b5e59 Merge pull request #31878 from rallytime/fix-psutil-warning
    - 44b29f72a1 Make sure __virtual__ error message is helpful when psutil is missing
  - 5c592b6768 Merge pull request #31852 from rallytime/merge-2015.5
    - 1470de17fa Merge branch '2014.7' into '2015.5'
    - 218c902091 Merge pull request #31834 from jfindlay/2014.7
    - 35ffdad0c8 add 2014.7.8 release notes
    - a423c6cd04 Merge pull request #31833 from jfindlay/2014.7
6910fcc584 add 2014.7.9 release notes
• c5e7c03953 Merge pull request #31826 from gtmanfred/2014.7
• d73f70eb2b Remove ability of authenticating user to specify pam service
  • 0cc1d5db03 Merge pull request #31827 from gtmanfred/2015.5
  • 979173db8a Remove ability of authenticating user to specify pam service
• 8cf0b9eb3d Merge pull request #31810 from whiteinge/saltenv-jinja-var
  • cb72b19240 Fix outdated Jinja 'env' variable reference

• PR #31906: (sbreidba) Win_dacl module: fix FULLCONTROL / FILE_ALL_ACCESS definition @ 2016-03-16 15:20:19 UTC
  - a4b3462346 Merge pull request #31906 from sbreidba/win_dacl_fixes
  - 54d81b9b42 Fix FULLCONTROL / FILE_ALL_ACCESS definition (bugfix and code simplification). Use consistent mechanism for obtaining user SID. Allow wildcarding (via optional parameters) for a variety of methods (get, rm_ace, check_ace).

• PR #31745: (isbm) Fix the always-false behavior on checking state @ 2016-03-15 23:02:20 UTC
  - b068ea963 Merge pull request #31745 from isbm/isbm-always-minion-errcode-2-fix
  - 1882e1c960 Adjust test
  - f968f9b5e Keep first level away from lists.
  - baed005b8 Fix PEP8 continuation
  - 1db61ea59a Fix the always-false behavior on checking state (there are always lists at some point!)

• PR #31911: (rallytime) Merge #31903 with pylint fix @ 2016-03-15 20:35:35 UTC
  - PR #31903: (terminalmage) Use remote_ref instead of local_ref to see if checkout is necessary (refs: #31911)
  - d05c3eeba9 Merge pull request #31911 from rallytime/merge-31903-with-pylint
  - 85e5ac1d1a Merge #31903 with pylint fix

• PR #31883: (paiou) Fix scaleway cloud provider and manage x86 servers @ 2016-03-15 20:31:18 UTC
  - 819a4a8b54 Merge pull request #31883 from.mvpstars/scaleway-x86
  - 1662a080e1 Update scaleway cloud provider to manage x86 servers

• PR #31903: (terminalmage) Use remote_ref instead of local_ref to see if checkout is necessary (refs: #31911) @ 2016-03-15 20:04:56 UTC
  - 142c47c50d Merge pull request #31903 from terminalmage/fix-git-pillar
  - af299401c Use remote_ref instead of local_ref to see if checkout is necessary

• PR #31845: (sakateka) Now a check_file_meta deletes temporary files when test=True @ 2016-03-15 19:55:21 UTC
  - ffd65c36e5 Merge pull request #31845 from sakateka/check_file_meta_clean_tmp
  - 5b30336b89 Now a check_file_meta deletes temporary files when test=True

• ISSUE #31791: (alexbleotu) Proxy minion starts spinning after running state.highstate (refs: #31846)
• ISSUE #31728: (bgridley) Custom grains syncing problem with proxy minion which causes high CPU utilization (refs: #31846)
- PR #31901: (rallytime) Back-port #31846 to 2015.8 @ 2016-03-15 19:12:43 UTC
  - PR #31846: (cro) Proxy infinite loop (refs: #31901)
  - 7428c73724 Merge pull request #31901 from rallytime/bp-31846
  - 1edd6ce302 Extra comment.
  - 6e2ef03b11 Fix event bus flood caused by unexpected recursive call.

- PR #31905: (terminalmage) Update versionadded directive @ 2016-03-15 18:43:06 UTC
  - 37f1ce9be2 Merge pull request #31905 from terminalmage/update-versionadded
  - dcc196c9e1 Update versionadded directive

- PR #31902: (rallytime) Update versionadded tag for new funcs @ 2016-03-15 18:41:08 UTC
  - PR #31857: (sjorge) gen_password and del_password missing from solaris_shadow (refs: #31902)
  - 35f6407d11 Merge pull request #31902 from rallytime/update-version-31857
  - 5cd09150cd Update versionadded tag for new funcs

- PR #31888: (terminalmage) Fix salt.utils.decorators.Depends @ 2016-03-15 17:09:54 UTC
  - 1be9c91761 Merge pull request #31888 from terminalmage/fix-depends-decorator
  - 394410e2b0 Add integration test for depends decorator
  - caa3cc1007 Fix salt.utils.decorators.Depends

- PR #31857: (sjorge) gen_password and del_password missing from solaris_shadow (refs: #31902) @ 2016-03-14 20:29:51 UTC
  - d357e4ea44 Merge pull request #31857 from sjorge/solarish_shadow
  - 38231303f3 .9 release as mentioned by rallytime
  - 3e2f70968 fix version added
  - d768ed25b4 develop, 2016.3 and 2015.8 has missing gen_password and del_password for shadow module

- PR #31879: (cro) Clarify some comments @ 2016-03-14 19:59:35 UTC
  - 1b0b2d5f1a Merge pull request #31879 from cro/idrac_fixes_0314
  - 42e3fa7970 Extra comment.

- ISSUE #8927: (brutasse) file state: unable to use contents_pillar with template: jinja (refs: #31815)

- ISSUE #26944: (boltronics) file.managed contents and contents_pillar should support a template rendering engine (refs: #31815)

- ISSUE #14664: (jacksontj) Unable to have a template with file.managed contents (or contents_pillar) (refs: #31815)

- PR #31815: (dr4Ke) Fix template on contents 2015.8 @ 2016-03-14 17:41:46 UTC
  - fb81b5ea23 Merge pull request #31815 from dr4Ke/fix_template_on_contents_2015.8
  - dcd6f5a5a9 test for file.apply_template_on_contents
  - 10d882296d file.managed: templating contents, not just files

- PR #31818: (anlutro) Prevent event logs from writing huge amounts of data @ 2016-03-14 17:27:47 UTC
  - aa120cb716 Merge pull request #31818 from alprs/fix-event_logging_spam
  - 83fa136da7 work on event logging
• ISSUE #31293: (deuscapturus) Git Pillars lose HEAD reference over time (refs: #31836)

• ISSUE #29239: (timwsuqld) Occasionally git_pillar pull fails causing incorrect results of highstate (when running highstate for multiple minions) (refs: #31836)

• PR #31836: (terminalmage) Fix git_pillar race condition @ 2016-03-14 15:48:28 UTC
  - f2445dbdc Merge pull request #31836 from terminalmage/issue31293
  - 5048fa857c Fix duplicate output
  - 155b84b88a salt.fileserver: Add ability to clear checkout locks
  - af4108dd1 Pass through the lock_type
  - 3d7796d5dd salt.runners.cache: Add ability to clear checkout locks
  - 8e086099f5 salt.utils.gitfs: rewrite locking code
  - 06b212519c Add GitLockError exception class
  - ad04ccfb93 Strip whitespace when splitting

• PR #31824: (rallytime) Back-port #31819 to 2015.8 @ 2016-03-13 19:59:32 UTC
  - PR #31819: (mchugh19) raise error on unsupported distro (refs: #31824)
  - 5464be07b1 Merge pull request #31824 from rallytime/bp-31819
  - 4d516adade raise error on unsupported distro

• ISSUE #24559: (iacopo-papalini) salt-cloud - Azure - should be possible to specify virtual network & subnet in profile (refs: #31856, #24569)

• PR #31856: (szeestraten) Adds missing docs for Virtual Network and Subnet options in salt-cloud Azure cloud profile @ 2016-03-13 19:06:52 UTC
  - PR #24569: (iacopo-papalini) Fix Issue #24559 - salt-cloud - Azure - should be possible to specify... (refs: #31856)
  - 7781b357e0 Merge pull request #31856 from szeestraten/add-missing-docs-for-azure-cloud-profile
  - a1a229405 Adds missing docs for Azure cloud profile

• PR #31839: (jfindlay) add 2015.8.8 release notes @ 2016-03-11 23:23:34 UTC
  - 3fb8f3a8cf Merge pull request #31839 from jfindlay/2015.8
  - 47ac41ba27 add 2015.8.8 release notes

• PR #31828: (gtmanfred) Remove ability of authenticating user to specify pam service @ 2016-03-11 20:40:37 UTC
  - 46bd10a56 Merge pull request #31828 from gtmanfred/2015.8
  - 7c3134a3d3 Remove ability of authenticating user to specify pam service

• ISSUE #30489: (chris-martin) influxdb_user.present fails: "InfluxDBClient' object has no attribute 'get_list_cluster_admins" (refs: #31787, #31770)

• PR #31787: (anlutro) Fix user_create and db_create for new versions of influxdb @ 2016-03-11 15:19:22 UTC
  - 3d370b471c Merge pull request #31787 from alprs/fixed-influxdb_user
  - 6a5211c8d8 don't swallow exceptions
  - a7e9c1381 fix db_create for influxdb 0.9+
  - 5a8a645d4b fix create_user for new versions of influxdb
• PR #31800: (rallytime) [2015.8] Merge forward from 2015.5 to 2015.8 @ 2016-03-10 20:49:53 UTC
  - 7fb2331ebc Merge pull request #31800 from rallytime/merge-2015.8
  - 44c15f0b16 Merge branch '2015.5' into '2015.8'
  - 970ef0e445 Merge pull request #31744 from brejoc/fix-attribute-error-with-older-libcloud/2015.5
    * bb29dc2283 Added version to libcloud depends statement
    * 87f9534fce Added log message with update suggestion for libcloud
    * 72eab406cd Fix for AttributeError with libcloud <0.15
  - df2d23ba5d Merge pull request #31740 from terminalmage/issue31666
    * aeaf58ed4c Fall back to False when pillar_opts not set
    * fe19d77eb4 Add default value for pillar_opts on minion
  - e225c0a26 Merge pull request #31750 from rallytime/bp-26170
    * 3c1123a05 Make sure variable is a dictionary before popping something from it.
  - 9162925dd0 Merge pull request #31689 from rallytime/bp-29467
    * 1f84cb99b Update module.py
• PR #31797: (Ch3LL) Change pkg name to less for suse pkg.info_installed test @ 2016-03-10 19:08:16 UTC
  - 75db2ed40 Merge pull request #31797 from Ch3LL/fix_pkginfo_test
  - 9100d9f0c change pkg name to less for suse
• ISSUE #31617: (tampakrap) service.running fails on sle11 sp3 and sp4 (refs: #31629, #31793)
• PR #31793: (xopher-mc) fixing init system detection on sles 11, refs #31617 @ 2016-03-10 18:42:27 UTC
  - 1386b72baf Merge pull request #31793 from xopher-mc/fix_sles_state_service_module
  - d242e19b4 fixing init system detection on sles 11, refs #31617
• PR #31786: (isbm) Bugfix: zypper doesn't detect base product on SLE11 series @ 2016-03-10 18:12:46 UTC
  - 2f28e166dd Merge pull request #31786 from isbm/isbm-zypper-list-products-sles11
  - ee1a002673 Update test case to cover SLE11 and SLE12
  - 4b134f2ab Add SLE11 product info snapshot, rename previous
  - 3c5fc857b2 Bugfix: on SLE11 series base product reported as additional
• ISSUE #31776: (gtmanfred) ProxyMinion does not close connections (at least with esxi proxy) (refs: #31780)
• PR #31780: (gtmanfred) use already created vsphere connection @ 2016-03-10 17:41:53 UTC
  - d6f69623c Merge pull request #31780 from gtmanfred/2015.8
  - 070af0f70 use already created vsphere connection
• ISSUE #31772: (sbreidba) win_dacl state causes state.apply output to be YAML, not highstate (refs: #31779)
• PR #31779: (sbreidba) win_dacl state & module: return comment field as strings, not lists. @ 2016-03-10 17:41:08 UTC
  - a067de3712 Merge pull request #31779 from sbreidba/win-dacl-highstate-output-2015.8
  - aeb2bfc46 win_dacl state & module: return comment field as strings, not lists.
• ISSUE #31563: (sjorge) regression in 2016.3 from today? (refs: #31723, #31707)
- PR #31723: (sjorge) file_ignore_regex is a list, not bool @ 2016-03-09 23:36:10 UTC
  - PR #31707: (sjorge) Fix incorrect default types for master_tops and file_ignore_regex (refs: #31723)
  - baeefac252 Merge pull request #31723 from sjorge/2015.8-file_ignore_regex
  - df1ba94cbb file_ignore_regex is a list, not bool
- ISSUE #27960: (The-Loeki) salt-cloud CLI 2015.8 borks out with SaltClientError: ‘timeout’ (refs: #31747)
- PR #31747: (techhat) Use get_local_client with MASTER opts, not MINION @ 2016-03-09 23:14:58 UTC
  - cd43cf919c Merge pull request #31747 from techhat/issue27960
  - 44c100d610 Use get_local_client with MASTER opts, not MINION
- PR #31688: (whiteinge) Various SMTP returner fixes @ 2016-03-09 22:40:37 UTC
  - 286ea1f61b Merge pull request #31688 from whiteinge/smtp-renderer
  - 76671b6a81 Check if we have a StringIO and grab the string instead
  - 17b8cd755f Add a default for the subject
  - 26479bee24 Clean up the SMTP returner docstring and show an actual config example
  - 74563f17ed Make sure the email subject and body are strings
  - fc69d08e8e Default to just 'jinja' for the SMTP renderer
  - 2a7cd2789 Add missing 'port' to smtp options
- PR #31752: (rallytime) Back-port #31686 to 2015.8 @ 2016-03-09 21:23:01 UTC
  - PR #31686: (myii) Fix typo in example for section winrepo_dir_ng (refs: #31752)
  - 1d6d982e5c Merge pull request #31686 from rallytime/bp-31686
  - 209c641a41 Made udpates as suggested by @rallytime
  - 26d4991cb3 moved previous intro to new quick start topic (topics/cloud/qs.rst) added new intro that explains the salt cloud configuration files added an inheritance and minion startup state example to topics/cloud/config.rst
- ISSUE #26498: (rallytime) [salt-cloud] Able to create multiple VMs with the same name across providers (refs: #31754, #31775)
- PR #31775: (techhat) Show correct provider/driver name @ 2016-03-09 20:53:10 UTC
  - 92ba7f3495 Merge pull request #31775 from techhat/correctmsg
  - c1433650b4 Show correct provider/driver name
- ISSUE #26498: (rallytime) [salt-cloud] Able to create multiple VMs with the same name across providers (refs: #31754, #31775)
- PR #31754: (techhat) Check all providers, not just the current one @ 2016-03-09 18:38:19 UTC
  - 249a3602eb Merge pull request #31754 from techhat/issue26498
  - 08c61446b7 Check all providers, not just the current one
- ISSUE #31639: (mshirley) salt-cloud digital ocean api v2 doesn't implement all available actions (refs: #31735)
- **PR #31735**: (rallytime) Add reboot, start, and stop actions to digital ocean driver @ 2016-03-09 17:57:58 UTC
  - 7ad521f7a5 Merge pull request #31735 from rallytime/fix-31639
  - 67d1aa6740 Remove experimental/incomplete function
  - b209623ca9 Add reboot, start, and stop actions to digital ocean driver
- **ISSUE #30489**: (chris-martin) influxdb_user.present fails: "InfluxDBClient’ object has no attribute 'get_list_cluster_admins" (refs: #31787, #31770)
- **PR #31770**: (anlutro) Fix influxdb user functionality for version 0.9+ @ 2016-03-09 17:09:26 UTC
  - fd3610c6a4 Merge pull request #31770 from alprs/fix-influxdb_user
  - 1349bdd2e8 fix influxdb user functionality for version 0.9+
- **PR #31743**: (Talkless) Fix parentheses mismatch in documentation @ 2016-03-08 18:01:23 UTC
  - c0868307df Merge pull request #31743 from Talkless/patch-1
  - 26ff46dbec Fix parenthesis mismatch in documentation
- **PR #31162**: (isbm) Remove MD5 digest from everywhere and default to SHA256 @ 2016-03-07 19:11:36 UTC
  - 826fe6a6582 Merge pull request #31162 from isbm/isbm-md5-to-sha1
  - 9d64abed0c Fix PyLint
  - 327ea11139 Add daemons unit test to verify hash_type settings
  - f3aceb922 Standardize logging
  - 51f56243d Verify if hash_type is using vulnerable algorithms
  - 95ec634f00 Report environment failure, if any
  - 63ee6e54 Use mixin for the daemon classes
  - 82dd385630 Create a mixin class that will be reused in the similar instances (daemons)
  - 36da8f5efa Use MD5 hash algorithm by default (until deprecated)
  - 584325797c Remove SHA1 in favor of SHA256
  - 373493c13f Remove SHA1 for SHA256
  - d5cb4dd424 Remove sha1 to sha265
  - 73b8d35e01 Add note to the Tomcat module for SHA256
  - ef78f1055 Remove SHA1 to SHA265 by default
  - 6198976ed9 Use SHA1 by default instead of MD5
  - 73f2dfc66c Use SHA1 hash by default in Tomcat module, refactor for support different algorithms
  - 0d4fe3f1d8 Use SHA1 hash by default
  - 785717703b Use configurable hash_type for general Key fingerprinting
  - f0d931f4d0 Use hash_type configuration for the Cloud
  - 95cb5edc7 Set default hash as SHA1 in config and explain why.
  - 8f9543c292 Set config hash_type to SHA1
  - 413eca124d Set default checksum for key fingerprint to SHA1
- **ISSUE #30528**: (UtahDave) Missing Minion notifications missing from job cache (refs: #31670)
• **PR #31670: (terminalmage)** Write lists of minions targeted by syndic masters to job cache @ 2016-03-07 18:51:53 UTC
  
  - a1f32b71bd Merge pull request #31670 from terminalmage/issue30528
  - 65e5a3c53e Pass syndic_id to save_minions()
  - c94c2597a Add argument to save_minions() to pass a syndic ID
  - cb92114377 Add syndic_id param for API compatibility
  - 1d39ee69b Skip events with minion lists but no jid
  - 651e3926f7 lint fixes
  
  - 0f175a4edf salt.returners.sqlite3_return: add no-op save_minions() func for API compatibility
  - f8664103b1 salt.returners.redis_return: add no-op save_minions() func for API compatibility
  - 0ea1b76c22 salt.returners.postgres_local_cache: add no-op save_minions() func for API compatibility
  - d6d794b484 salt.returners.postgres: add no-op save_minions() func for API compatibility
  - 82750ab699 salt.returners.pgjsonb: add no-op save_minions() func for API compatibility
  - d8f90f6578 salt.returners.odbc: add no-op save_minions() func for API compatibility
  - a1957c3706 salt.returners.mysql: add no-op save_minions() func for API compatibility
  - ef6aa5de1c salt.returners.multi_returner: add no-op save_minions() func for API compatibility
  - 5b4eb58d99 salt.returners.mongo_return: add no-op save_minions() func for API compatibility
  - da1aebbf82 salt.returners.mongo_future_return: add no-op save_minions() func for API compatibility
  - c13bb6549c salt.returners.memcache_return: add no-op save_minions() func for API compatibility
  - 4322ad9ef3 salt.returners.influxdb_return: add no-op save_minions() func for API compatibility
  - 1dd106183c salt.returners.etcd_return: add no-op save_minions() func for API compatibility
  - 8e80535516 salt.returners.couchdb_return: add no-op save_minions() func for API compatibility
  - 44538dfced salt.returners.cassandra_cql_return: add no-op save_minions() func for API compatibility
  - 084a78407a salt.returners.couchbase_return: move minion list updates to new save_minions() func
  - f731dc5d32 Update a job's minion list to include minion lists forwarded by syndic
  - 504f7df460 Add utils function to invoke a returner's save_minions() func
  - 0b4616a3eb Separate writing of serialized minion list into its own function
  - 214fecd3f6 Simplify jobs.get_jobs logic, generally improve jobs runner docs
  - 3f527be748 Add an exception class for errors encountered while locking files.
  - 1e6b43ef8 Add a contextmanager for file locking
  - 978b6cb32f Add missing RST file for slsutil module
  - 2ad8cecf2 Add salt.utils.split_input()

• **ISSUE #31595: (dverbeek84)** dockerng ports specified in Dockerfile must be in sls file otherwise salt gives an error (refs: #31711)

• **PR #31711: (ticosax) [dockerng]** Port and Volume comparison should consider Dockerfile @ 2016-03-07 18:25:19 UTC
  
  - 24568b1a5d Merge pull request #31711 from ticosax/fix-port-and-volume-discovery
Port and Volume comparison should consider Dockerfile

- **ISSUE #31579**: (bradthurber) salt-cloud delete with a map file fails when multiple providers defined (refs: #31719)
- **PR #31719**: (techhat) Don't worry about KeyErrors if the node is already removed @ 2016-03-07 18:16:40 UTC
  - b936e09fb3 Merge pull request #31719 from techhat/issue31579
  - 88905095c9 Don't worry about KeyErrors if the node is already removed
- **PR #31713**: (tycosax) [dockerng] Fix dockerng.network_present when container is given by name @ 2016-03-07 15:14:41 UTC
  - 604eb87e82 Merge pull request #31713 from ticosax/fixed-dockerng-networking-container_id
  - 3837cf44ca Fix network_present by dealing with containers ID's instead of names.
- **ISSUE #31704**: (peripatetic-sojourner) Foreman external pillar doesn't load (refs: #31705)
- **PR #31705**: (peripatetic-sojourner) Foreman pillar @ 2016-03-07 14:24:58 UTC
  - 8f28e4510d Merge pull request #31705 from peripatetic-sojourner/foreman_pillar
  - ba33d75949 passing lint test
  - 63c39a8999 refactored parameter population for foreman pillar
  - c3325bc15d add return of virtualname
- **PR #31702**: (rallytime) [2015.8] Merge forward from 2015.5 to 2015.8 @ 2016-03-06 19:24:47 UTC
  - aa5c13f0b8 Merge pull request #31702 from rallytime/merge-2015.8
  - 6559ea15b0 Merge branch '2015.5' into '2015.8'
  - d7914cdb14 Merge pull request #31687 from cachedout/rm_gpg_test
    - 8b00513ebb Removed useless tests
    - bd4d12a155 Merge pull request #31660 from terminalmage/issue31619
      - da954d7b92 Add integration test for packages with epoch in version
      - 4fa7e4defe Move epoch removal
      - 290192af56 Remove epoch from version string if present when installing with yum
    - e33c1f456a Merge pull request #31683 from rallytime/bp-31578
      - 8fe46789b7 allow queueing of state runs through saltmod
    - 27f443895d Merge pull request #31682 from cachedout/cache_meaning
      - a75e416125 Add definition of job cache to glossary
    - bd04c964d1 Merge pull request #31658 from rallytime/add-style-to-contrib
      - 8b526b5878 Add mentioned of Salt's Coding Style docs to the Contributing docs
    - 10658df6e6 Merge pull request #31655 from rallytime/pylint-docs
      - 6e0377d376 Make note of pylint dependencies in docs
    - 6075774a01 Merge pull request #31440 from cachedout/master_tops_type
      - 2f49cc75049 Set correct type for master_tops config value
- **PR #31700**: (s0undt3ch) It's a function! @ 2016-03-06 17:33:58 UTC
  - ace290629e Merge pull request #31700 from s0undt3ch/2015.8
- 1ca2beea3e It's a function!

- **PR #31679**: (cro) Fix bad link to the sample REST endpoint in salt-contrib. @ 2016-03-04 21:05:50 UTC
  - cf438a873 Merge pull request #31679 from cro/proxy_contrib_doc_fix
  - d638971b73 Correct url to salt-contrib

- **ISSUE #21932**: (clinta) Salt Coding Style docs should list requirements for salt pylintrc (refs: #31655)

- **PR #31668**: (rallytime) Some more testing documentation improvements @ 2016-03-04 20:48:57 UTC
  - **PR #31658**: (rallytime) Add mentioned of Salt's Coding Style docs to the Contributing docs (refs: #31668)
  - **PR #31655**: (rallytime) Make note of pylint dependencies in docs (refs: #31668)
  - **PR #31641**: (rallytime) Improve Salt Testing tutorial to be a more comprehensive intro (refs: #31668)
  - 97127a8b83 Merge pull request #31668 from rallytime/testing-docs
  - beb9d0fe84 Ensure all integration test classes and funcs are documented w/examples
  - 7f8ebf7c97 Found another spelling error
  - c8c18853f5 Spelling fix
  - f264c51762 Some more testing documentation improvements

- **ISSUE #29753**: (jakehilton) New minion fails to authenticate properly to multi-master setup (refs: #31653)

- **PR #31653**: (DmitryKuzmenko) Don't attempt to verify token if it wasn't sent to master. @ 2016-03-03 17:39:35 UTC
  - 2ed726af1 Merge pull request #31653 from DSRCompany/issues/29753_multimaster_auth_fail
  - 2557707cc7 Don't attempt to verify token if it wasn't sent to master.

- **ISSUE #31617**: (tampakrap) service.running fails on sle11 sp3 and sp4 (refs: #31629, #31793)

- **PR #31629**: (darix) Fix services on sles @ 2016-03-03 16:41:27 UTC
  - 118fced425 Merge pull request #31629 from darix/fix-services-on-sles
  - 9b8d6cbb72 make the suse check consistent with rh_service.py
  - c0c8a77242 Fix numerical check of osrelease

- **PR #31641**: (rallytime) Improve Salt Testing tutorial to be a more comprehensive intro (refs: #31668) @ 2016-03-03 16:08:47 UTC
  - 4d1701de60 Merge pull request #31641 from rallytime/testing-tutorial
  - 6ab3961748 Improve Salt Testing tutorial to be a more comprehensive intro

- **ISSUE #30651**: (sjorge) salt.states.grains.list_present should not show changes if none are made! (refs: #31651, #30689)

- **PR #31651**: (dr4Ke) test case: test_list_present_nested_already @ 2016-03-03 16:02:55 UTC
  - **PR #30689**: (sjorge) fix for #30651 grains.list_present and grains.list_absent (refs: #31651, #31271)
  - 58f8401b8 Merge pull request #31651 from dr4Ke/test_case_for_30689
  - fc9dd356e8 test case: test_list_present_nested_already

- **PR #31643**: (opdude) Make sure we are really updating the mercurial repository @ 2016-03-03 14:30:53 UTC
  - 5566f12a7 Merge pull request #31643 from Unity-Technologies/hotfix/hg-fix-repo-updated
  - ca41c4b8c1 Make sure we are really updating the mercurial repository

---

5358 Chapter 28. Release Notes
• ISSUE #30761: (sjmh) Cannot target subsets of minions when using pillar and external_auth (refs: #31598)
• PR #31598: (terminalmage) Remove limitations on validation types for eauth targets @ 2016-03-02 22:14:41 UTC
  - 36c790eede Merge pull request #31598 from terminalmage/issue30761
  - 5deda2d9d Remove limitations on validation types for eauth targets
• PR #31627: (jakehilton) Handling error from using gevent 1.1. @ 2016-03-02 22:01:22 UTC
  - cc4c31cf7f Merge pull request #31627 from jakehilton/2015.8
  - 02fb5ed616 Handling error from using gevent 1.1.
• PR #31630: (rallytime) [2015.8] Merge forward from 2015.5 to 2015.8 @ 2016-03-02 20:49:52 UTC
  - 191241e71a Merge pull request #31630 from rallytime/merge-2015.8
  - 75bb692990 Merge branch '2015.5' into '2015.8'
  - 6d31b8918f Merge pull request #31622 from jfindlay/query_doc
    - * 4e48fec806 doc/topics/tutorials/http: update query decoding docs
    - dbf6e0786c Merge pull request #31558 from cachedout/ensure_ssh_installed
      - * cec65eaa5f Don't stacktrace if ssh binary is not installed with salt-ssh
• PR #31594: (rallytime) Back-port #31589 to 2015.8 @ 2016-03-01 23:51:02 UTC
  - PR #31589: (techhat) Ensure that the latest node data is returned (refs: #31594)
    - 38ddd62aeaf Merge pull request #31594 from rallytime/bp-31589
    - 6cd89459c7 Ensure that the latest node data is returned
• ISSUE #31596: (joejulian) gluster --xml does not always produce xml with legacy versions (refs: #31604)
• PR #31604: (joejulian) Workaround for non-xml output from gluster cli when not tty @ 2016-03-02 15:53:44 UTC
  - 86a0fc46b4 Merge pull request #31604 from joejulian/2015.8_31596_workaround_no_xml_when_not_tty
  - c567a823a9 Workaround for non-xml output from gluster cli when not tty
• PR #31583: (vutny) Remove trailing white spaces @ 2016-03-02 15:38:01 UTC
  - 36ce240596 Merge pull request #31583 from vutny/remove-trailing-white-spaces
  - bbd3ad93a8d Fix trailing white spaces in Salt PRM spec file
  - 86433f2378 Revert changes in files used by roots_test.py integration test
  - e7a8dbf498 Remove trailing white spaces in tests files
  - 776b2ea9a6 Remove trailing white spaces in files under salt/ dir
  - fbfc3abc9f Remove trailing white spaces in files under pkg/ dir
  - aebc48163d Remove trailing white spaces in documentation files
  - 7efaf77695 Remove trailing white spaces in conf dir file
• PR #31592: (rallytime) Back-port #31546 to 2015.8 @ 2016-03-01 23:51:02 UTC
  - PR #31546: (techhat) Rework of PR #31529 (refs: #31592)
  - PR #31529: (llua) nspawn.py: Fix bad keyword assignment (refs: #31546)
    - c9fe88d7f3 Merge pull request #31592 from rallytime/bp-31546
• ISSUE #30866:  (kevinquinnyo) WheelClient cmd returns None but wheel functions called directly work (refs: #31570)

• ISSUE #26415:  (CaesarC) salt.wheel.WheelClient doesn’t work follow the python api(AttributeError: 'NoneType' object has no attribute 'get') (refs: #28087)

• PR #31593:  (rallytime) Back-port #31570 to 2015.8 @ 2016-03-01 23:50:05 UTC
  - PR #31570:  (cro) Need to return the value (refs: #31593)
  - PR #28087:  (DmitryKuzmenko) Revert "Update __init__.py" (refs: #31570)
  - c8dbc93ac6 Merge pull request #31593 from rallytime/bp-31570
  - b2294d0a28 Need to return the value

• ISSUE #28585:  (rothralls) FIPS compliance (2015.8.1-1) (refs: #31567)

• PR #31567:  (cachedout) Restore FIPS compliance when using master_finger @ 2016-03-01 19:50:03 UTC
  - 068807558a Merge pull request #31567 from cachedout/issue_28585
  - 7006a1eefc Fix failed unit test
  - 10cd328dda Lint
  - 174337d020 Restore FIPS compliance when using master_finger

• PR #31568:  (twangboy) Grant permissions using SID instead of name @ 2016-03-01 04:22:53 UTC
  - 77d9ae88bb Merge pull request #31568 from twangboy/fix_perms
  - 1f6a95694d Grant permissions using SID instead of name

• ISSUE #31516:  (justinta) beacons.enable_beacon does not write to beacons.conf on some OS's (refs: #31561)

• PR #31561:  (justinta) Skipped test @ 2016-03-01 04:11:22 UTC
  - ada5ab344d Merge pull request #31561 from jtdand/beacons_test_fix
  - 196ddd4db99 Skipped test

• ISSUE #31041:  (fredrikaverpil) Reading about win_service in 2015.8.5 docs, but it's not available in 2015.8.5 (refs: #31550, #31049)

• PR #31550:  (rallytime) Correct versionadded tag for win_service.config @ 2016-02-29 21:11:24 UTC
  - PR #31049:  (twangboy) Fix versionadded in win_service.config (refs: #31550)
  - 658c1865ab Merge pull request #31550 from rallytime/win_service-docs
  - 51aa26334c Correct versionadded tag for win_service.config

• PR #31549:  (rallytime) [2015.8] Merge forward from 2015.5 to 2015.8 @ 2016-02-29 18:46:35 UTC
  - 9bb9a54f8d Merge pull request #31549 from rallytime/merge-2015.8
  - b683df9b82 Pylint fix
  - 24505d2d8f Merge branch '2015.5' into '2015.8'
    - 060a60fd90 Merge pull request #31521 from terminalmage/issue24753
      - 0d352bce16 Add fileclient tests
      - d9370a8041 Update cp module salt-ssh wrapper to use new cachedir param
0320494b1d Update the SSH state module wrappers to pass an alternate cachedir
65bdeb3afa Accept and pass through the alternate cachedir when prepping the thin tar
c3f7a2f2e5 Add ability to specify an alternate base dir for file caching
92f8f89218 Merge pull request #31497 from rallytime/remove-timeout-dup
83e4680d20 Remove duplicate "timeout" definition in Roster docs
da001bcb49 Merge pull request #31472 from rallytime/update-contributing-docs
5871e4d1e0 Update contributing docs
f35e2dd1d3 Merge pull request #31461 from DSRCompany/issues/30183_fix_multimaster_failover_2015.5
3d09c3b7a3 Set auth retry count to 0 if multimaster mode is failover.

• ISSUE #29701: (tonyyang132) Running salt-call on salt master would crash the master node with code level 2015.8.3 (refs: #31544)

• ISSUE #27063: (lorencegordon) 2015.8.0: Error writing to /var/log/salt/minion? (refs: #31544)

• PR #31544: (DmitryKuzmenko) Protect getattr from recursion @ 2016-02-29 17:48:15 UTC
  - 5a6a0f1791 Merge pull request #31544 from DSRCompany/issues/29701_getattr_recursion_protection
  - b7a45b8fae Protect getattr from recursion

• ISSUE #30643: (Ch3LL) multi-master failover stack trace when minion fails over to other master (refs: #31512, #31525)

• ISSUE #30181: (jakehilton) Minion failover only works once (refs: #31512)

• ISSUE #29567: (freebsdly) multi master failover successful but execute command 'salt * test.ping' on second master return 'Minion did not return. [No response]' (refs: #31512)

• PR #31525: (DmitryKuzmenko) Issues/30643 merge forward fixes @ 2016-02-29 16:08:47 UTC
  - PR #31512: (DmitryKuzmenko) Don't fork in try with critical finally logic. (refs: #31525)
  - PR #30796: (skizunov) Fix minion failover after disconnect (refs: #31512, #31525)
  - d5a4daa17b Merge pull request #31525 from DSRCompany/issues/30643_merge_forward_fixes
  - a50b33d96a Don't fork in try with critical finally logic.
  - 877725381 Fix minion failover after disconnect

• ISSUE #24955: (damonnk) Minion fails to start after bootstrap on Raspberry Pi (refs: #31536)

• PR #31536: (virtualguy) Remove debian repo from raspbian installation @ 2016-02-29 15:32:52 UTC
  - 95af21325f Merge pull request #31536 from virtrud/remove-jessie-backports-from-raspbian-install
  - e48900ac55 Use python-tornado from jessie-backports for pure debian
  - 6e338e2601 Remove debian repo from raspbian installation

• ISSUE #31193: (gwaters) RHEL7 gpg key problem (refs: #31528)

• PR #31528: (vutny) Correct Salt Cloud documentation about updating Salt Bootstrap script @ 2016-02-29 15:30:59 UTC
  - 5965319600 Merge pull request #31528 from vutny/cloud-bootstrap-doc
  - 7fbee69f2 Correct Salt Cloud documentation about updating Salt Bootstrap script

• ISSUE #31365: (cwicklein) osrelease_info broken for CentOS 7 (refs: #31539)
• PR #31539: (DmitryKuzmenko) Added temporary workaround for CentOS 7 os-release id bug. @ 2016-02-29 15:30:34 UTC
  - 96c0926298 Merge pull request #31539 from DSRCOMPany/issue3/31365_centos7_osrelease_fix
  - a3b806d126 Added temporary workaround for CentOS 7 os-release id bug.
• PR #31508: (mcalmer) Zypper correct exit code checking @ 2016-02-26 15:21:23 UTC
  - 95db870325 Merge pull request #31508 from mcalmer/zypper-correct-exit-code-checking
  - 66e8f6aa37 restructure the code a bit
  - 5c125de19 remove new lines between zypper command and check result
  - 1425c6496c use specialized assert functions for tests
  - f266cfdaac test _zypper_check_result()
  - a06467782 adapt tests to new zypper_check_result() output
  - edad780cdf use _zypper_check_result()
  - 7c5d5a2b7a add _zypper_check_result() to raise and error or return stdout
  - a6785f7a9 check zypper exit code everywhere
  - 935b0510c9 add function to check zypper exit codes
• ISSUE saltstack/salt-bootstrap#695: (mtippett) Install Failures With Raspbian Jessie (refs: #31510, #31477, #31458)
• PR #31510: (vutny) Add installation guide for Raspbian (Debian on Raspberry Pi) @ 2016-02-26 15:06:57 UTC
  - e51126179c Merge pull request #31510 from vutny/debian-raspbian-install-guide
  - 50f3e072b1 Add instruction how to install salt-minion on Debian Jessie from Stretch
  - abcd505178 Update Debian installation guide with information about Raspbian
• PR #31498: (Ch3LL) rename methods in pkg states test @ 2016-02-25 23:29:51 UTC
  - 9d458bb420 Merge pull request #31498 from Ch3LL/rename_test
  - 29a53f4353 rename methods in pkg states test
• ISSUE #31427: (githubcdr) salt.states.grains.list_present adds duplicates names (refs: #31471)
• PR #31471: (cachedout) Correct issue where duplicate items in grains list during state run will result in duplicate grains @ 2016-02-25 20:15:20 UTC
  - 625da0d261 Merge pull request #31471 from cachedout/issue_31427
  - 74e3053c91 Remove debugging
  - 30eb5fcf7 Additional tests, but disable the test for distinct lists, because of a problem with context in test suite
  - 3d2ae05e5 Check for duplicate grains during list insertion
• ISSUE #29727: (oeuftete) dockerng.running does not pull image as documented (refs: #31352, #31455)
• PR #31455: (ticsax) [dockerng] Disable notset check @ 2016-02-25 19:15:09 UTC
  - e85ae2341a Merge pull request #31455 from ticsax/diable-NOTSET-check
  - e072937234 dockerd returns sometimes None or [] for ports.
  - 5630401889 _api_mismatch was a good idea
• **PR #31488**: (isbm) Unit Test for Zypper's "remove" and "purge" @ 2016-02-25 17:52:33 UTC
  - e68a0947b7 Merge pull request #31488 from isbm/isbm-zypper-ut-removelpurge
  - d30f2e4627 Implement unit test for remove and purge
  - 4ca201052 Refactor code (a bit)
  - df89da4d15 Fix the docstring

• **PR #31485**: (jacobhammons) Fixed transport description in minion / master config @ 2016-02-25 17:04:15 UTC
  - cd87760c87 Merge pull request #31485 from jacobhammons/2015.8
  - 748acab8b5 Fixed zeromq casing in transport settings
  - 765a226907 Fixed transport description in minion / master config

• **PR #31411**: (justinta) Added some beacons execution module integration tests @ 2016-02-25 16:16:26 UTC
  - fb1ef92e2b Merge pull request #31411 from jtand/beacons_tests
  - 7d32b5b015 Added some more checks to verify beacon changes were actually happening
  - 2da5285c03 Added codeauthor
  - fd1e2838ea Lint
  - 421a112914 Added config_dir to test minion config
  - bf6ac0983 Fixed lint error
  - 3566fbbcca More updates to beacons test
  - 37c4bf22d2 Updated beacons integration test
  - 6db628be1a Basic integration tests for beacons execution module
  - 3b238c2e68 Started adding beacons execution module tests

• **ISSUE #31216**: (oliver-dungey) pkg.installed documentation not consistent with implementation (refs: #31475)

• **ISSUE #30464**: (sjmh) pillar_env minion config option needs to be documented (refs: #31475)

• **ISSUE #30261**: (MadsRC) Add ability to define custom beacons (refs: #31475)

• **ISSUE #29636**: (ronnix) Documentation for the refresh_password arg in postgres_user.present is confusing (refs: #31475)

• **ISSUE #29528**: (apergos) nitpick for "Using Salt at scale" tutorial (refs: #31475)

• **ISSUE #29520**: (arthurlogilab) [doc] transport option not in default master configuration nor in the example file of the documentation (refs: #31475)

• **ISSUE #10330**: (jhenry82) exclude keyword not working (refs: #31475)

• **PR #31475**: (jacobhammons) Assorted doc issues @ 2016-02-25 16:03:54 UTC
  - 2ea705e75 Merge pull request #31475 from jacobhammons/2015.8
  - a72dc15720 Assorted doc issues Fixes #10330 Fixes #31216 Fixes #30464 Fixes #29520 Fixes #30261 Fixes #29636 Fixes #29528

• **ISSUE saltstack/salt-bootstrap#695**: (mtippett) Install Failures With Raspbian Jessie (refs: #31510, #31477, #31458)

• **PR #31477**: (vutny) Correct installation documentation for Ubuntu @ 2016-02-25 16:01:38 UTC
  - 3905dd81d3 Merge pull request #31477 from vutny/correct-doc-install-ubuntu
- 172f34a6ca Correct headers in Debian/Ubuntu/SUSE install instructions
- 4248f9ea0a Add common packages installation section to Debian install guide
- 8c6e179870 Add note about `amd64` packages to Ubuntu install guide
- afaa24723a Update Ubuntu install guide:

  • PR #31479: (isbm) Zyper unit tests & fixes @ 2016-02-25 15:58:15 UTC
    - f027dc0cf8 Merge pull request #31479 from isbm/isbm-zyper-unittest
    - 9f6434b9ad Do not use Zyper purge (reason: too dangerous)
    - bc05ac7f73 Fix PyLint
    - c0eb8b549 Add space before "assert" keyword
    - 6bc8b8a8f6 Implement list packages test
    - 78837d2926 Add mocking data
    - 0b64b8137f Implement test for version compare, where python fall-back algorithm is called
    - 18b30a3274 Implement test for version compare, where RPM algorithm is called
    - 59eca53441 Adjust test case for the third package in the test static data
    - 8034cf0b91 Add third test package static info
    - 90f209569a Implement test for the upgrade_available
    - ad87e719d6 Bugfix: when only one package, no dict is returned. Still upgrade_available should return boolean.
    - 7eb5f19cb4 Implement test for latest_available
    - c372c0b596 Implement test for the info_available
    - 447771e0f6c Add Zyper static data for the available packages
    - 6989871d27 Implement test for info_installed
    - 0cc6c8e4aa Use strings instead of unicode strings
    - 3342c03987 Implement list upgrades test
    - 8862d7af65 Add list upgrades Zyper static data
    - 4d83d318f4 Implement error handling test for listing upgrades
    - 08b4ee617 Do not strip the output
    - 53338402a5 Use renamed zypper products data file
    - c6135975b0 Rename Zyper products static test data file
    - ab3f53d89 Reimplement list_upgrades to use XML output from Zyper instead
    - e87864986d Add Zyper unit test: test_list_products and test_refresh_db
    - cd6419f9c9c Add Zyper Unit Test installed products sample data

  • ISSUE #31370: (Ch3LL) pkg.info_installed on ubuntu12 does not output info and stack trace (refs: #31439)
  • ISSUE #31366: (Ch3LL) pkg.info_installed on centos5 does not output info (refs: #31445)
  • PR #31445: (rallytime) Only use LONGSIZE in rpm.info if available. Otherwise, use SIZE. @ 2016-02-24 18:35:31 UTC
PR #31439: (rallytime) Fix lowpkg.info function for Ubuntu 12 - make sure we have a pkg name (refs: #31445)
- 987dd89979 Merge pull request #31445 from rallytime/fix-31366
- 42415a4a7b Make rpm_tags query more concise
- 9965fe188a Added to pkg.info_installed test for RedHat and Suse systems
- 47cc7c3466 Add error check when retcode is 0, but stderr is present
- 294371243d Only use LONGBSIZE in rpm.info if available. Otherwise, use SIZE.

PR #31464: (Ch3LL) integration test: ensure decorator only runs on one method and not class @ 2016-02-24 18:35:00 UTC
- 979c8b4f9a Merge pull request #31464 from Ch3LL/fix_int_test
- a387d175d8 integration test- ensure decorator only runs on one method and not entire class

ISSUE saltstack/salt-bootstrap#695: (mtippett) Install Failures With Raspbian Jessie (refs: #31510, #31477, #31458)

PR #31458: (vutny) Correct installation documentation for Debian @ 2016-02-24 17:01:09 UTC
- aa0a9a03dd Merge pull request #31458 from vutny/correct-doc-install-debian
- 42aa7eefa6d Add section about installation from the Debian Main Repository
- 07dece2f8f Remove duplicate post-installation section for Debian install guide
- 10c05f6943 Add install section for Debian Stretch (Testing) from community repository
- b2c78e08dc Add note about supported Debian architectures on SaltStack corp repo

PR #31457: (rallytime) [2015.8] Merge forward from 2015.5 to 2015.8 @ 2016-02-24 16:42:17 UTC
- 330c4d8b0f Merge pull request #31457 from rallytime/merge-2015.8
- 94b3cf08c7 Merge branch '2015.5' into '2015.8'
  * 26733ce988 Merge pull request #31442 from sastorsl/salt-modules-file.py-copy-check-src
    - 0a4132866d removed lint in the exception string
    - f8b5d498c3 Add os.path.exists(src) to file.py, def copy
  * e480727d27 Merge pull request #31441 from cachedout/issue_30739
    - fccfada1570 Include localhost minions in presence detection for runner
  * 91ff95f093 Merge pull request #31416 from carlwgeorge/selinux_doc_fix
    - 0e6846d72e selinux module documentation fix
  * 7d01979898 Merge pull request #31336 from terminalmage/config-validation-logging
    - 795008bad1 Improve config validation logging
  * fed096a29d Merge pull request #31374 from sjorge/solarish_hwaddr
    - bdf257edf8 missed a .format and messed up the join
    - bbd2fde96d fix for illumos/solaris hwaddr
  * 6ee1f7905b Merge pull request #31339 from jacobhammons/dot7prev
    - 071208a8d4 changed latest release to 2015.8.7

ISSUE #31370: (Ch3LL) pkg.info_installed on ubuntu12 does not output info and stack trace (refs: #31439)
• **PR #31439**: (rallytime) Fix lowpkg.info function for Ubuntu 12 - make sure we have a pkg name (refs: #31445) @ 2016-02-24 16:24:46 UTC
  - e553f18dc4 Merge pull request #31439 from rallytime/fix-31370
  - 1931c61563 Only run this pkg.info_installed test on distros that have that func
  - 0488668a00 Fix lowpkg.info function for Ubuntu 12 - make sure we have a pkg name

• **PR #31456**: (RabidCicada) Clarified the form of requisite targets/requisite-references @ 2016-02-24 16:24:00 UTC
  - fc12d6e96 Merge pull request #31456 from RabidCicada/clarify-requisites-doc
  - 87f4843490 Clarified the form of requisite targets/requisite-references

• **ISSUE #30431**: (nbow) cp.get_url with large files results in an Uncaught Exception (refs: #30704)

• **ISSUE #27093**: (TheBigBear) 2015.8.0 winrepo downloader corrupts some installers (refs: #30704)

• **PR #31453**: (DmitryKuzmenko) Backport cp_geturl fix for large files into 2015.8 @ 2016-02-24 15:38:24 UTC
  - PR #30704: (DmitryKuzmenko) Issues/30431 get url large file (refs: #31453)
  - 7dac1db55d Merge pull request #31453 from DSRCompany/issues/30431_get_url_large_file_2015.8_backbort
  - 664bdec283 Backport cp_geturl fix for large files into 2015.8

• **PR #31444**: (jacobhammons) Documentation updates - ddns state, file.line state/exe function, installation dependencies @ 2016-02-23 22:40:05 UTC
  - 8f6c4be618 Merge pull request #31444 from jacobhammons/ddns-docs
  - 0b8f0ce1de4 Fixes #31402 Added arguments to state file.line to fix issue where exe module uses line and state module uses name. Reformatted parameters in exe module file.line placeholder release notes for 2015.5.8
  - 0b16f7e2f1 Added note clarifying when dnspython is not required

• **PR #31341**: (twangboy) Clarification on Windows Package Manager docs @ 2016-02-23 16:09:18 UTC
  - 42027e0d72 Merge pull request #31341 from twangboy/package_manager_docs
  - c16cc6360 Fix typos
  - 8d9065ccce Fix some formatting issues
  - dfe24f13b Merge branch ‘2015.8’ of https://github.com/saltstack/salt into 2015.8
  - 807257b13b Added unit test for Windows Package Manager

• **PR #31380**: (kiorky) Bring up ext_pillar rendering errors as well @ 2016-02-23 16:08:39 UTC
  - 30d968c0a7 Merge pull request #31380 from kiorky/p
  - e3e97a43ce Bring up ext_pillar rendering errors as well

• **ISSUE #31410**: (terminalmage) Debian GNU/Linux grains broken in head of 2015.8 branch (refs: #31418)

• **PR #31418**: (terminalmage) Fix core grains when Debian OS detected as 'Debian GNU/Linux' @ 2016-02-23 15:49:49 UTC
  - 64ed99fcd01 Merge pull request #31418 from terminalmage/fixedeb-debian-grains
  - 5c833ef01 Support running grains tests
  - 0e0cd17160 Rename core.py to core_test.py
  - d3cd1b596d Add unit test for core grains
- e3d549d376 Fix debian grains setup

- **PR #31429**: (mcalmer) fix argument handling for pkg.download @ 2016-02-23 15:48:23 UTC
  - ec01b994bd Merge pull request #31429 from mcalmer/fix-refresh-arguments
  - 299c07a97e fix argument handling for pkg.download

- **PR #31432**: (ticosax) [dockerng] Hotfix docker 1.10.2 @ 2016-02-23 15:39:04 UTC
  - 05c12b9ba1 Merge pull request #31432 from ticosax/hotfix-docker-1.10.2
  - 1e966f324 handle inconsistencies in dockerd API
  - 8484815f84 pep8

- **PR #31420**: (twangboy) Handle Unversioned Packages @ 2016-02-22 23:46:24 UTC
  - fb81e905e4 Merge pull request #31420 from twangboy/unversioned_pkgs
  - 816e991e87 Fix version check
  - 85d8b938ad Match unversioned packages to winrepo

- **PR #31417**: (jacobhammons) ddns state docs updated with notes regarding the name, zone, and keyfile. @ 2016-02-22 23:16:48 UTC
  - 19d7810478 Merge pull request #31417 from jacobhammons/ddns-docs
  - 5c4cbb572 Added notes regarding the name, zone, and keyfile.

- **PR #31391**: (redmcg) Added sanity check: is 'pillar' in self.opts @ 2016-02-22 20:05:27 UTC
  - ac6af79abc Merge pull request #31391 from redmcg/master_schedule_fix
  - 91e74feaf3 Added sanity check: is 'pillar' in self.opts

- **PR #31376**: (cro) Some distros don't have a /lib/systemd @ 2016-02-22 18:11:39 UTC
  - c7bd13e9c9 Merge pull request #31376 from cro/suse_service2
  - f3fe5562e We need one more mocked return from listdir.
  - ab9de7008 Can't add a tuple and a string.
  - 8f12dbf1a0 Check to see if a path is a link, because it's likely that if it IS a link, one of the other paths points to it. Ignore so we don't get duplicates.
  - 80e866f1b Some distros do not seem to have a /lib/systemd, but do have a /usr/lib/systemd

- **ISSUE #29727**: (oeufete) dockerng.running does not pull image as documented (refs: #31352, #31455)

- **ISSUE #27976**: (syphernl) Module dockerng.inspect_image always returns 404 (refs: #31352)

- **PR #31352**: (ticosax) [dockerng] Pull missing images when calling dockerng.running @ 2016-02-22 16:54:10 UTC
  - 105821efc7 Merge pull request #31352 from ticosax/pull-image-on-running
  - 8c86e6b4dc Pull missing images when calling dockerng.running

- **PR #31378**: (mcalmer) Zypper refresh handling @ 2016-02-22 16:50:28 UTC
  - 83294e4f3a Merge pull request #31378 from mcalmer/zypper-refresh-handling
  - 274e6467be do not change kwargs in refresh while checking a value
  - 644b14c273 simplify checking the refresh paramater
  - db0e0de2fd add refresh option to more functions

---

28.2. Previous Releases 5367
 ISSUE #31229: (eykd) git.latest broken behavior in 2015.8.x on older Git (refs: #31373)

 PR #31373: (terminalmage) Use --set-upstream instead of --track to set upstream on older git @ 2016-02-22 16:46:00 UTC

 - e24685b89a Merge pull request #31373 from terminalmage/issue31229
 - 28f0a75cc1 Use --set-upstream instead of --track to set upstream on older git

 ISSUE #31137: (jeffreyctang) logrotate creates .bak files in /etc/logrotate.d which logrotate reads. (refs: #31390)

 PR #31390: (abednarik) Fix Logrotate module. @ 2016-02-22 16:09:15 UTC

 - c5790bc4d6 Merge pull request #31390 from abednarik/remove_deprecated_psed_in_lorgotate
 - c1e0ff7785 Fix Logrotate module.

 ISSUE #28004: (warden) dockerng.image_present should allow public repository pulling by default (refs: #31354)

 PR #31354: (ticosax) [dockerng] Dont require auth for all registries @ 2016-02-20 05:45:10 UTC

 - 174ee10fc2 Merge pull request #31354 from ticosax/dont-require-auth-for-all-registries
 - 4a9f661d66 It exists public registries where auth is not required.

 PR #31368: (whiteinge) Update list of netapi clients for autoclass @ 2016-02-19 20:57:28 UTC

 - 8d0498eff4 Merge pull request #31368 from whiteinge/netapi-client-list
 - 0cfe5d89a0 Update list of netapi clients for autoclass

 PR #31367: (techhat) Add docs on how to actually use SDB @ 2016-02-19 20:07:17 UTC

 - 9b0e29107b Merge pull request #31367 from techhat/sdbdocs
 - eea92a545 Add docs on how to actually use SDB

 PR #31357: (ticosax) [dockerng] Support docker inconsistencies @ 2016-02-19 20:02:08 UTC

 - 7e599f0e27 Merge pull request #31357 from ticosax/support-docker-inconsistencies
 - 3672b8e7b1 docker daemon returns sometimes empty list and sometimes None

 PR #31353: (ticosax) [dockerng] Fix when ports are integers @ 2016-02-19 19:55:30 UTC

 - PR #3126: (ticosax) [dockerng ] Detect settings removal (refs: #31353)
 - 18bd78260d Merge pull request #31353 from ticosax/fix-when-port-are-integers
 - 20fd43968 Follow up for #31326

 PR #31346: (ticosax) Backport #31130 to 2015.8 @ 2016-02-19 19:46:48 UTC

 - PR #31130: (ticosax) Saltndo: provide also get parameters to the context (refs: #31346)
 - dec254a7a2 Merge pull request #31346 from ticosax/backport-31130-to-2015.8
 - a8dc33a5e3 Saltndo provide also get parameters to the context

 PR #31332: (terminalmage) Clarify documentation for gitfs/hgfs/svnfs mountpoint and root options @ 2016-02-19 18:31:29 UTC

 - d639d65381 Merge pull request #31332 from terminalmage/issue31167
 - eebc325040 Clarify documentation for gitfs/hgfs/svnfs mountpoint and root options

 PR #31305: (mcalmer) call zypper with option --non-interactive everywhere @ 2016-02-19 18:14:57 UTC
- d067e77fee Merge pull request #31305 from mcalmer/zypper-non-interactive-everywhere
- 75e776761c write a zypper command builder function
- 3df302fcbb call zypper with option --non-interactive everywhere

**PR #31337:** (jacobhammons) Release notes and versioning for 2015.8.7 @ 2016-02-19 00:20:30 UTC
- 98a14f8090 Merge pull request #31337 from jacobhammons/dot7
- d4fb33939e Release notes and versioning for 2015.8.7

**PR #31326:** (ticosax) [dockerng ] Detect settings removal (refs: #31353) @ 2016-02-18 22:02:50 UTC
- f0ba9c1eca Merge pull request #31326 from ticosax/2015.8-dockerng-detect-settings-removal
- 7bedd86ebe Add detection of removed settings.

**PR #31292:** (twangboy) Fix dunder virtual to check for Remote Administration Tools @ 2016-02-18 18:57:26 UTC
- 130f515391 Merge pull request #31292 from twangboy/win_servermanager
- 89b47ab3c5 Update return documentation for install/remove
- a0be43120b Fix cmd_quote error
- 13cd57a890 Remove repeating Import ServerManager command
- 3270a2859f Add check for server manager module
- 4bd4e47a44 Added checks for Windows 2008 R2

**ISSUE #30932:** (johje349) Glusterfs peered fails on secondary host in 2015.8.4 (refs: #31287)

**PR #31287:** (joejulian) Rework tests and fix reverse peering with gluster 3.7 @ 2016-02-18 17:57:23 UTC
- 5d31714b44 Merge pull request #31287 from joejulian/2015.8_30932_peer_probe_by_ip
- 783e9b2e13 Rework tests and fix reverse peering with gluster 3.7

**PR #31196:** (sakateka) Here are a few fixes utils.network @ 2016-02-18 17:27:00 UTC
- a2f6447f8d Merge pull request #31196 from sakateka/utils-network-fix
- a7b11024dd fix typo
- 92fd48fcf7 Do not Fallback to use ls/of if proc available

**ISSUE #29795:** (vutny) Unable to override state-output setting in command line (refs: #31299)

**PR #31299:** (rallytime) Allow state-output and state-verbose default settings to be set from CLI @ 2016-02-18 17:25:23 UTC
- d20a30b8be Merge pull request #31299 from rallytime/fix-29795
- 483f31922b Allow state-output and state-verbose default settings to be set from CLI

**PR #31317:** (terminalmage) Fix versionadded directive @ 2016-02-18 16:56:32 UTC
- 25d8af21e9 Merge pull request #31317 from terminalmage/git-version-audit
- acc3b54621 Fix versionadded directive

**ISSUE #30999:** (orymate) git.latest rev=tag fails with old git(1) (refs: #31245, #31301)

**PR #31301:** (terminalmage) Corrected fix for #30999 @ 2016-02-18 15:59:40 UTC
- PR #31245: (jespada) fix git state for git version older than 1.9.2 (refs: #31301)
- f2b662371e Merge pull request #31301 from terminalmage/issue30999
- 625af70e08 Fix --unset-upstream handling
- 7940881797 fix git state github issue #30999

- **PR #31302:** (terminalmage) Audit CLI opts used in git states @ 2016-02-18 15:58:48 UTC
  - 408d89e174 Merge pull request #31302 from terminalmage/git-version-audit
  - ca410c0a94 Audit CLI opts used in git states

- **PR #31312:** (terminalmage) Merge 2015.5 into 2015.8 @ 2016-02-18 15:57:08 UTC
  - 098f05eb3c Merge pull request #31312 from terminalmage/merge-forward-2015.5-2015.8
  - 808d150fe4 Merge remote-tracking branch 'upstream/2015.5' into merge-forward-2015.5-2015.8
  - cd3400e67e Merge pull request #31288 from notpeter/ssh_known_hosts_docs
    * 3f573d89a2 Improve salt.states.ssh_known_hosts documentation.
  - 875d9925fa Merge pull request #31183 from heyfife/fix-gce-named-static-ip-reservation
    * 26774e2323 Fixed named external_ip reservation/re-use code.
  - e56c402c0c Merge pull request #31032 from terminalmage/issue31001
    * 42daea4509 yumpkg.py: Remove repoquery usage everywhere but check_db
    * 50befbc149 backport salt.utils.pkg.rpm to 2015.5
    * a1ad14994a Move salt.utils.iterlist() to salt.utils.iterutils.split()
    * 5b8646ce64 Ignore failure to install new enough dnf-plugins-core
    * defe0859fd Ensure that dnf-plugins-core 0.1.15 is installed
  - cce69b740c Merge pull request #31264 from sjorge/if_missing-155-fix
    * 545edbf5e1 fix if_missing gets appended to dirs list, take III

- **ISSUE #31223:** (pprince) file_tree pillar: fails when data files at root end in `\n` (refs: #31225)

- **PR #31225:** (pprince) Fix in file_tree pillar (Fixes #31223.) @ 2016-02-18 06:06:12 UTC
  - c58f654bc3 Merge pull request #31225 from pprince/PR/bugfix/file_tree
  - d592d8636b Fix regression in file_tree pillar (Fixes #31223.)

- **PR #31233:** (mcalmer) implement version_cmp for zypper @ 2016-02-17 20:20:19 UTC
  - fe9e5d27e6 Merge pull request #31233 from mcalmer/2015.8-zypperpy-add-version_cmp
  - 389a4b2548 Check if rpm-python can be imported
  - 6adoa90955 pylint changes
  - 7beaf26068 implement version_cmp for zypper

- **PR #31273:** (rallytime) [2015.8] Merge forward from 2015.5 to 2015.8 @ 2016-02-17 20:14:05 UTC
  - 93c03a400b Merge pull request #31273 from rallytime/merge-2015.5
  - 11c6b636f Pylint fix
  - 023ad4635c Merge branch '2015.5' into '2015.8'
    * fa3f474de9 Merge pull request #31110 from cachedout/fixup_30730
      * 5bf848e04 Fixup unit test
      * f55868e0a Fixes pylint warnings
- 56a975ec43 Attempt to fix pylint warnings
- 55d71be057 Make documentation and code examples consistent with code
- 1f04f6d6f8 Change parameter name from includes to skips
- ccf5e13e7d Adding support for skipHidden in SetInclude
- 4f2d4a2e7 Variable names standardization
- f5917ace8 Fix typo
- 26e5236073 Invert RebootRequired logic
- 8065a7af6 Add basic documentation and define how the skips parameter works.
- 389fe7508 Change parameter name from includes to skips
- 30e1fef906 Adding support for skipHidden in SetInclude
- 1244ea5be Variable names standardization, consistent if/else logic with states.win_update

- PR #31253: (gtmanfred) allow for nova servers to be built with premade volumes @ 2016-02-17 17:55:39 UTC
  - dc2e7c8956 Merge pull request #31253 from gtmanfred/2015.8
  - 36bf06539 fix doc for boot_volume
  - 9660c91b57 allow for nova servers to be built with premade volumes

- ISSUE #30651: (sjorge) salt.states.grains.list_present should not show changes if none are made! (refs: #31651, #30689)

- PR #31271: (rallytime) Back-port #30689 to 2015.8 @ 2016-02-17 16:52:36 UTC
  - PR #30689: (sjorge) fix for #30651 grains.list_present and grains.list_absent (refs: #31651, #31271)
  - 29e3dd091d Merge pull request #31271 from rallytime/bp-30689
  - 3dae79d516 fix nested grains always show update due to __grains__.get() not supporting the ":" seperator

- ISSUE #30461: (jfindlay) update documentation on bootstrap-supported platforms (refs: #31255)

- PR #31255: (jacobhammons) Fixes #30461 @ 2016-02-17 02:23:46 UTC
  - ffcf6f4f3d Merge pull request #31255 from jacobhammons/doc-fixes
  - 3c4f8215c3 Fixes #30461 Credited Sebastian Kramer for finding CVE 2016-1866 in release notes Added note about salt virt not working on KVM in a VM

- ISSUE #31106: (rvandegrift) Exception from scheduled runner (refs: #31189)

- PR #31189: (dmacvicar) Fix crash with scheduler and runners (#31106) @ 2016-02-16 18:49:36 UTC
  - 62d76902ce Merge pull request #31189 from dmacvicar/dmacvicar-2015.8-31106
  - 9ad8cb16e6b Fix crash with scheduler and runners (#31106)

- ISSUE #30962: (fantasy86) Targeting by matching ip address doesn't work (refs: #31201)

- ISSUE #30169: (colinlabs) Can't use Subnet/IP Address Matching (refs: #31201)

- ISSUE #29733: (roshan3133) salt -S <ipaddress> test.ping command output getting list of minions which did not not return. (refs: #31201)

- ISSUE #29188: (bergemalm) Unable to target minions via ipcidr in 2015.8 (refs: #31201)

- PR #31201: (The-Loeki) Utilize prepared grains var in master-side ipcidr matching @ 2016-02-16 18:36:10 UTC
  - dc78d0a504 Merge pull request #31201 from The-Loeki/patch-1
- 318689d728 Correct ordering of address/network matching, improve performance of master-side cidr matching
- 4e4e0926da Utilize prepared grains var in master-side ipcidr matching

- **PR #31239**: (terminalmage) Improve logging when master cannot decode a payload @ 2016-02-16 16:35:46 UTC
  - 60bba36fa Merge pull request #31239 from terminalmage/better-bad-load-logging
  - 1fbe3cbaf1 Improve logging when master cannot decode a payload

- **ISSUE #31185**: (twangboy) pkg.refresh_db leaves old sls files if the name changes (refs: #31190)

- **PR #31190**: (twangboy) Clear minion cache before caching from master @ 2016-02-16 16:11:26 UTC
  - 80f1c3553b Merge pull request #31190 from twangboy/refresh_db
  - 860437665d Fix some lint
  - 799d93d6a Clear minion cache before caching from master

- **PR #31226**: (pprince) Minor docs fix: file_tree pillar (Fixes #31124) @ 2016-02-16 15:25:33 UTC
  - **PR #31124**: (zygiss) Make load beacon cross-platform (refs: #31226)
  - 28a2b8e07b Merge pull request #31226 from pprince/PR/docfix/file_tree
  - c13852fbbf Minor docs fix: file_tree pillar (Fixes #31124)

- **PR #31234**: (mcalmer) improve doc for list_pkgs @ 2016-02-16 15:25:06 UTC
  - 9afad1330e Merge pull request #31234 from mcalmer/zypperpy-comment-list_pkgs
  - e3bb862a32 improve doc for list_pkgs

- **PR #31237**: (mcalmer) add handling for OEM products @ 2016-02-16 15:12:21 UTC
  - e8f3a707ae Merge pull request #31237 from mcalmer/zypper_py-add-OEM-product-handling
  - d773b7317b add handling for OEM products

- **PR #31182**: (rallytime) Back-port #31172 to 2015.8 @ 2016-02-13 21:36:07 UTC
  - **PR #31172**: (techhat) Use correct deploy directory (refs: #31182)
  - 415654ee9e Merge pull request #31172 from rallytime/bp-31172
  - a74377e98 Use correct deploy directory

- **ISSUE #27498**: (arthurlogilab) [runner] salt-run cache.clear_mine_func broken, can't take clear_mine_func (refs: #31191)

- **PR #31191**: (rallytime) Make sure doc example matches kwarg @ 2016-02-13 21:36:07 UTC
  - 434e05667a Merge pull request #31191 from rallytime/fix-27498
  - 0bdhaa49d1 Make sure doc example matches kwarg

- **PR #31171**: (Ch3LL) added logic to check for installed package @ 2016-02-12 22:10:21 UTC
  - c5e5a5b87c Merge pull request #31171 from Ch3LL/megan-20158
  - a12e2f566b fix lint error
  - a123ed4def added logic to check for installed package

- **ISSUE #30934**: (marnovdm) contents_pillar no longer works with lists in 2015.8.5 (refs: #31026, #31177)

- **PR #31177**: (Ch3LL) add integration test for issue #30934 @ 2016-02-12 22:09:31 UTC
  - a024d3536f Merge pull request #31177 from Ch3LL/test_content_pillars
- 9204e3f562 add integration test for issue 30934w

- **PR #31181**: (cachedout) Lint 2015.8 branch @ 2016-02-12 21:57:02 UTC
  - 1f22335e28 Merge pull request #31181 from cachedout/lint_20158
  - 4c0be11627 Lint 2015.8 branch

- **ISSUE #29423**: (l13t) iptables and match-set with two parameters (refs: #29718)

- **PR #31169**: (rallytime) Back-port #29718 to 2015.8 @ 2016-02-12 18:28:13 UTC
  - **PR #29718**: (thusoy) Support match-sets in iptables module (refs: #31169)
  - 4d1b49c1e7 Merge pull request #31169 from rallytime/bp-29718
  - ceae2a16f8 Support match-sets in iptables module

- **PR #31170**: (rallytime) Back-port #31157 to 2015.8 @ 2016-02-12 18:27:49 UTC
  - **PR #31157**: (captaininspiration) Fix locale generation on Ubuntu (refs: #31170)
  - f2ef3e6c1 Merge pull request #31170 from rallytime/bp-31157
  - 27776b5f4e Fix locale generation on Ubuntu

- **PR #31147**: (cro) Documentation clarifications. @ 2016-02-12 17:16:27 UTC
  - 7f49fb70d Merge pull request #31147 from cro/fx2_doc
  - a005e4af55 Documentation clarifications.

- **PR #31153**: (edencrane) Fixed invalid host causing 'reference to variable before assignment' @ 2016-02-12 16:30:19 UTC
  - 7986b9e033 Merge pull request #31153 from edencrane/fix-network-connect-invalid-hostname
  - a14c4b5f2 Fixed invalid host causing 'reference to variable before assignment'

- **ISSUE #30994**: (onorua) beacon enable from state is failing (refs: #31152)

- **PR #31152**: (garethgreenaway) fixes to beacon module, state module and friends @ 2016-02-12 16:27:40 UTC
  - 5ab76801b Merge pull request #31152 from garethgreenaway/30994_beacon_add_failing_and_other_fixes
  - 91b14dca40 fixing the beacon module and state module to handle passing enabled properly. Also reworking how what is returned from the validating functions is handled to ensure when beacon configurations aren't validate the results indicate exactly why.

- **PR #31149**: (jfindlay) add 2015.8.7 release notes @ 2016-02-12 00:06:15 UTC
  - c8047d979d Merge pull request #31149 from jfindlay/2015.8
  - b58783b895 add 2015.8.7 release notes

- **PR #31134**: (isbm) Fix types in the output data and return just a list of products @ 2016-02-11 20:19:22 UTC
  - 5c394ac49c Merge pull request #31134 from isbm/isbm-zypper-list-products
  - 670a326e3d Fix types in the output data and return just a list of products

- **ISSUE #31115**: (nfillot) 2015.8.5 salt-cloud nova valid ip address was not found (refs: #31120)

- **ISSUE #29758**: (zaide) 2015.8.3 salt-call runners.cloud : local variable 'access_ip' referenced before assignment (refs: #31120)

- **ISSUE #29666**: (tminn) Nova driver broken for 2015.8.[1-3] (refs: #31120)

- **PR #31120**: (gtmanfred) Clean up some bugs in the nova driver @ 2016-02-11 20:17:41 UTC
• ISSUE #31099: (Ch3LL) Cannot specify size in map file in 2015.8 (refs: #31132)

• PR #31132: (rallytime) Make sure required profile configurations passed in a map file work @ 2016-02-11 20:16:46 UTC
  - 2d592a398e Merge pull request #31132 from rallytime/fix-31099
  - 1da03da9df Pylint fix
  - 337592ec56 Make sure required profile configurations passed in a map file work

• ISSUE #31014: (gtmanfred) [2015.8] pkg breaks for yum pkgs.latest if the packages has an epoch (refs: #31131, #31015, #31031)

• PR #31131: (Ch3LL) integration test for issue #31014 @ 2016-02-11 17:33:23 UTC
  - b831e0a865 Merge pull request #31131 from Ch3LL/megan-20158
  - af82b1233a integration test for issue #31014

• PR #31133: (cachedout) Fixup 31121 @ 2016-02-11 17:32:24 UTC
  - e378afd891 Merge pull request #31133 from cachedout/fixup_31121
  - a4040da46d Fix bad unit test
  - 0e68af8b74 Fix alternative module and state.

• PR #31125: (isbm) Force-kill websocket’s child processes faster than default two minutes. @ 2016-02-11 16:50:57 UTC
  - a4a40262f8 Merge pull request #31125 from isbm/isbm-salt-api-service
  - f73f70375c Force-kill websocket’s child processes faster than default two minutes.

• PR #31119: (sakateka) fixes for ipv6-only multi-master failover @ 2016-02-11 16:21:45 UTC
  - 79c85859bc Merge pull request #31119 from sakateka/fix-for-ipv6only-failover
  - 2c45d151d1 fix unintentional breaking changes
  - 043a5e6fd7 fixes for ipv6-only multi-master failover

• PR #31107: (techhat) Don’t try to add a non-existent IP address @ 2016-02-10 21:52:42 UTC
  - 825b510030 Merge pull request #31107 from techhat/nebulaprivip
  - 1fa69982c4 Don’t try to add a non-existent IP address

• PR #31108: (justinta) Changed npm integration test to install request. @ 2016-02-10 21:52:02 UTC
  - c56a819fd8 Merge pull request #31108 from justinta/npm_test_fix
  - a5eac47b25 Changed npm integration test to install request.

• PR #31105: (cachedout) Lint 30975 @ 2016-02-10 21:11:21 UTC
  - de1aba9d1 Merge pull request #31105 from cachedout/lint_30975
  - 446b4c2aff Lint #30975
- b4fe9aaa11 fixes issue in which s3.role_arn was defaulting to "

- **ISSUE #31069**: (symphorien) Wrong filename in documentation for x509 state (refs: #31100)

- **PR #31100**: (jfindlay) states.x509: docs: peer.sls -> peer.conf @ 2016-02-10 20:47:45 UTC
  - 2e5495748a Merge pull request #31100 from jfindlay/x509_sls
  - 6c303b99c2 states.x509: docs: peer.sls -> peer.conf

- **PR #31103**: (twangboy) Point to reg.delete_key_recursive @ 2016-02-10 20:46:53 UTC
  - f2bede1c0a Merge pull request #31103 from twangboy/fix_reg_state
  - fe1ca906d2 Point to reg.delete_key_recursive

- **PR #31093**: (techhat) Ensure double directories don't get created @ 2016-02-10 18:53:47 UTC
  - 94fa76831f Merge pull request #31093 from techhat/spmfix
  - 4f4e8877ad Ensure double directories don't get created

- **ISSUE #31056**: (JensRantil) file.symlink documentation improvement (refs: #31095)

- **PR #31095**: (jfindlay) modules.file, states.file: explain symbolic links @ 2016-02-10 18:53:24 UTC
  - e015ca865c Merge pull request #31095 from jfindlay/link_doc
  - 7d9df6b26c modules.file, states.file: explain symbolic links

- **ISSUE #31059**: (inf-collinhyden) salt-cloud rename fails in 2015.8.5 (refs: #31061)

- **ISSUE #30950**: (tmaulik) Salt-cloud create_snapshot is not recognizing snapshot_name parameter in salt 2015.8.5 (refs: #31061)

- **PR #31061**: (rallytime) Revert #30217 - was causing salt-cloud -a breakage @ 2016-02-10 18:13:59 UTC
  - PR #30217: (pass-by-value) Make sure cloud actions can be called via salt run (refs: #31061, #30691)
  - 4d6706b3e7 Merge pull request #31061 from rallytime/revert-breakage
  - ced2d9f922 Revert #30217

- **ISSUE #31088**: (gladiatr72) request for color logging fix backport (refs: #31090)

- **PR #31090**: (rallytime) Back-port #30542 to 2015.8 @ 2016-02-10 18:06:38 UTC
  - PR #30542: (gladiatr72) address color log dict lookup exceptions w/ non-posix log level names (refs: #31090)
  - 482eea9883 Merge pull request #31090 from rallytime/bp-30542
  - 67a713f2fe Some 3rd-party modules (e.g. gnupg) define custom log levels that emit at INFO level and above. This patch sets the color data lookups to default to TextFormat('reset') rather than producing a stack trace every time a log message is generated from an affected module.

- **PR #31085**: (jacksontj) Correctly remove path we added after loader is completed @ 2016-02-10 17:47:22 UTC
  - 5dca8d387 Merge pull request #31085 from jacksontj/2015.8
  - dd5051e9e6 Correctly pop the path we added after loader is completed.

- **ISSUE #28142**: (zmalone) Deprecate or update the copr repo (refs: #31037)

- **PR #31037**: (vutny) Update RHEL installation guide to reflect latest repo changes @ 2016-02-10 17:36:04 UTC
  - 27bf83fa59 Merge pull request #31037 from vutny/correct-doc-install-on-rhel
  - 6370ddda9f Update RHEL installation guide
- afdaefbf3d Add systemctl examples for RHEL 7 to the installation guide
- 069a661ebf Correct ZeroMQ4 repo install guide for RHEL
- d2a9d67b5b Update installation instruction for community repos on RHEL
- bbdf2523c8 Add workaround for RHEL 7 systems mentioned in the issue #29094

- **PR #31050:** (basepi) [2015.8] Merge forward from 2015.5 to 2015.8 @ 2016-02-09 20:13:34 UTC
  - 8704750cf9 Merge pull request #31050 from basepi/merge-forward-2015.8
  - d86e014a39 Merge remote-tracking branch 'upstream/2015.5' into merge-forward-2015.8
    - 1c699a1664 Merge pull request #30974 from rallytime/bp-30949
      - ff6542f593 Replace cfdisk with sfdisk
    - c7f87cc371 Merge pull request #30942 from rallytime/bp-30897
      - 885e00ba54 Only remove the word linux from distroname when its not part of the name
    - 35b7f62669 Merge pull request #30922 from jacobhammons/prev-rel-notes
      - 57c1ec637a Rev latest version to 2015.8.5
    - 2488bb902e Merge pull request #30865 from abednarik/better_boto_elb_error
      - 3561e8c19f Better boto elb error message.
    - 4da04f82e8 Merge pull request #30831 from jacobhammons/readme-update
      - 01a92f5d98 Updated readme
    - 90c1ea9f6c Merge pull request #30829 from jacobhammons/release-2015.5
      - c95bb60148 Version to 2015.8.4
    - 80a36793cb Merge pull request #30784 from rallytime/bp-24952
      - a07908bdea Don’t split the string on a single line
    - e978f5392f Merge pull request #30764 from terminalmage/issue30560
      - 39736afcd7 Work around yum versionlock’s inability to remove holds by package name alone
    - 6f565c0d76 Merge pull request #30760 from toanju/2015.5
      - dc4256f7df Changed output format of arp_ip_target from list to comma delimited string
    - 1c205b4898 Merge pull request #30757 from yannis666/fix-for-mine-update-merge
      - 61bb23e256 Fix to mine update to merge configuration
    - f9fde8f6a7 Merge pull request #30749 from abednarik/fix_network_system_test
      - 1e9e97df59 Fix Netwotk hostname Module in Debian systems.

- **PR #31053:** (cachedout) Fix boto test failures @ 2016-02-09 20:02:16 UTC
  - f13fd4608 Merge pull request #31053 from cachedout/boto_test_fix
  - c73b5a4a66 Fix boto_secgrou
  - 25bce68357 Fix boto test failures

- **ISSUE #30938:** (lorendgordon) Windows: Upgrade overwrites minion config file (refs: #31029, #31028)
- **PR #31029:** (twangboy) Windows defaults to multiprocessing true @ 2016-02-09 18:20:36 UTC
- 87f2816ef5 Merge pull request #31029 from twangboy/win_defaults
- baffbbdb74 Comment multiprocessing line in minion config
- 933544b888 Set multiprocessing to true in config.py

- ISSUE #27796: (onsmribah) IOError: [Errno 13] Permission denied: '/var/cache/salt/master/.dfn' when using python salt.wheel module (refs: #30998)

- PR #30998: (dmacvicar) add_key/reject_key: do not crash w/Permission denied: '/var/cache/salt/master/.dfn' (#27796) @ 2016-02-09 17:57:36 UTC
  - 0dcd0a2a7 Merge pull request #30998 from dmacvicar/dmacvicar-2015.8-27796
  - 9602fe2aeb Do not crash on add_key/reject_key if the previous one set the drop file. (#27796)

- ISSUE #31041: (fredrikaverpil) Reading about win_service in 2015.8.5 docs, but it's not available in 2015.8.5 (refs: #31550, #31049)

- PR #31049: (twangboy) Fix versionadded in win_service.config (refs: #31550) @ 2016-02-09 17:55:07 UTC
  - e773fc82a Merge pull request #31049 from twangboy/win_svc_docs
  - 9800525d1 Fix versionadded in win_service.config

- PR #30987: (youngnick) Changed glusterfs.peer() module so state can handle localhost peering attempts. @ 2016-02-09 17:51:58 UTC
  - c3f115724a Merge pull request #30987 from youngnick/add-back-localhost-peer-handling
  - 730b5e3e2 Update tests to cover new peering return val.
  - b2407305e8 Changed glusterfs.peer() module call return val so state can handle localhost peering attempts.

- PR #31042: (moltob) Allow using Windows path in archive.extracted name attribute @ 2016-02-09 17:47:20 UTC
  - 8518655bfb Merge pull request #31042 from moltob/fix-archive-winpath
  - 9d66c17a53 Allow using Windows path in archive.extracted name attribute, including drive letter colon and backslashes.

- PR #31012: (terminalmage) Fix gitfs/git_pillar/winrepo provider to allow lowercase values @ 2016-02-09 17:24:25 UTC
  - 1950359580 Merge pull request #31012 from terminalmage/fix-gitfs-provider-lc
  - 763581798b Add unit tests to ensure a valid provider
  - 49e6c1d58b Fix gitfs/git_pillar/winrepo provider to allow lowercase values

- ISSUE #30983: (JensRantil) salt.modules.apt_pkg.upgrade does not necessarily do apt-get dist-upgrade (refs: #31024)

- PR #31024: (jfindlay) modules.apt_pkg.upgrade: clarify dist-upgrade usage @ 2016-02-09 17:20:57 UTC
  - 3d8681b63e Merge pull request #31024 from jfindlay/dist_upgrade
  - 3d1be808ad modules.apt_pkg.upgrade: clarify dist-upgrade usage

- ISSUE #30938: (lorengordon) Windows: Upgrade overwrites minion config file (refs: #31029, #31028)

- PR #31028: (twangboy) Fix config overwrite by windows installer @ 2016-02-09 17:20:24 UTC
  - a0454ff00 Merge pull request #31028 from twangboy/fix_installer
  - 8876893b5c Fix remove placeholder files
- 788855cc94 Remove placeholder files
- c834a9d5e5 Set overwrite to off

• ISSUE #31014: (gtmanfred) [2015.8] pkg breaks for yum pkgs.latest if the packages has an epoch (refs: #31131, #31015, #31031)

• PR #31031: (terminalmage) More complete fix for #31014 @ 2016-02-09 17:04:42 UTC
  - PR #31015: (gtmanfred) include possible epoch in version for rpm (refs: #31031)
  - 071b9d4904 Merge pull request #31031 from terminalmage/issue31014
  - 6d15a17d6b Fix yumpkg _get_branch_option()
  - 4b855a85ee Don't handle epoch specially for dnf
  - 5244de2fae More efficient way to add the epoch before version number
  - e121ed89f include possible epoch in version for rpm

• ISSUE #30934: (marnovdm) contents_pillar no longer works with lists in 2015.8.5 (refs: #31026, #31177)

• PR #31026: (terminalmage) Fix regression when contents_pillar/contents_grains is a list. @ 2016-02-09 00:03:15 UTC
  - 2b8f7a12e7 Merge pull request #31026 from terminalmage/issue30934
  - f43aaf4dfe Fix regression when contents_pillar/contents_grains is a list.

• ISSUE #30472: (sjorge) KeyError with schedule (refs: #30978)

• PR #30978: (garethgreenaway) fixes to state.py in 2015.8 @ 2016-02-08 18:49:05 UTC
  - de215bd0cd Merge pull request #30978 from garethgreenaway/30472_state_functions_no_default_retcode
  - e3b3b5140f6 removing extra spaces.
  - f668ccf1f7 removing duplicate code, just set the default in the _set_retcode function
  - 5f2f0f60c0 The functions in the state module that return a retcode when something goes wrong, eg. a
    1 or a 2, do not return a 0 when things go the way they're supposed to go. With the recent changes to
    the scheduler to ensure that the retcode is returned this is problematic and results in exceptions when
    a state function is run from the schedule. This simple fix ensures a default retcode of 0 exists, it is then
    override in the _set_retcode function if there is an issue with the run

• PR #30893: (bdrung) Make build reproducible @ 2016-02-08 18:44:35 UTC
  - 65fbf980cf Merge pull request #30893 from bdrung/reproducible
  - 089c869ec3 Make build reproducible

• PR #30945: (cachedout) Note that pillar cli args are sent via pub @ 2016-02-08 18:43:59 UTC
  - 5b0c7649c7 Merge pull request #30945 from cachedout/note_pillar_cli
  - 3ff7d49555 Note that pillar cli args are sent via pub

• ISSUE #31000: (rmtmckenzie) Salt-cloud profile state fails to create LXC minion (refs: #31002)

• PR #31002: (rmtmckenzie) Fix lxc cloud provided minion reporting present @ 2016-02-08 18:14:50 UTC
  - 3b7b6f2398 Merge pull request #31002 from rmtmckenzie/cloud-lxc-provide-fix
  - 9b17fde5e5 Fix lxc cloud provided minion reporting present

• PR #31007: (justinta) Fixed rabbitmq_vhost test failure. @ 2016-02-08 17:48:00 UTC
  - c48122ae9a Merge pull request #31007 from justinta/rabbitmq_vhost_test_fix
- 962e0deda5 Fixed rabbitmq_vhost test failure.

- **ISSUE #30993**: (fredrikaverpil) Overstate: "This documentation has been moved here" (dead end) (refs: #31004)

- **PR #31004**: (rallytime) Remove overstate docs and a few references. @ 2016-02-08 17:08:24 UTC
  - 811461e4b4 Merge pull request #31004 from rallytime/fix-30993
  - 33eb6ba125 Remove overstate docs and a few references.

- **PR #30965**: (anlutro) Fix rabbitmq_vhost.present result when test=True @ 2016-02-08 04:34:45 UTC
  - 64125de6c7 Merge pull request #30965 from alprs/fix-rabbitmq_vhost_present_test
  - 2313747958 return changes when test=True
  - 95c8e74b72 make the code a bit simpler
  - aba29a73c4 fix rabbitmq_vhost.present result when test=True

- **PR #30955**: (Ch3LL) docs: add clarification when source is not defined @ 2016-02-06 18:29:33 UTC
  - ef02779391 Merge pull request #30955 from Ch3LL/clarify_file_doc
  - 97b57ed2b1 docs: add clarification when source is not defined

- **PR #30941**: (rallytime) Back-port #30879 to 2015.8 @ 2016-02-05 21:15:20 UTC
  - **PR #30879**: (rhansen) Don’t delete a Docker volume if the volume’s driver differs (refs: #30941)
  - d9785451c0 Merge pull request #30941 from rallytime/bp-30879
  - eb6f289fc1 change default for volume_present()'s force parameter to False
  - 34f3057e04 add 'force' to replace (or not) volumes with driver mismatch
  - d6d3b15738 typo fixes

- **PR #30940**: (twangboy) Fix Build Process for OSX @ 2016-02-05 18:44:34 UTC
  - 21a83065aa Merge pull request #30940 from twangboy/mac_build_3
  - 3654a0e0c2 Change 2015 to 2016 in license file
  - aa7d0602a8 Update instructions in readme.md for shasum
  - 6f1a8f4146 Added code to add /opt/salt/bin to the path
  - 1e7468a08c Disable master, syndic, and api in postinstall
  - d49b3dfc1b Re-added start on load and keep alive
  - 3ff50a2254 Removed keepalive option
  - eb5d04bd1f Remove autostart for api, master, and syndic
  - 3c0ce34c9 Added minimum requirements for installation
  - 1dcc23c85b Fix error on kickstart command
  - 7a163c46d8 Change to new way of starting and stopping services
  - 23d47722b7 Fix preinstall and postinstall scripts
  - 7ef723d815 Upgrade to latest pip
  - 0f09ad517f Updated pip dependencies
  - d3d4c1d13f Removed GPL Licensed software from build

- **PR #30944**: (jacobhammons) 2015.8.5 release notes linking and clean up @ 2016-02-05 17:40:10 UTC
• ISSUE #30882: (hoonetorg) state lvm.vg_present broken with pv on devicemapper-dev (centos 7.2) (refs: #30905)
• ISSUE #26867: (joejulian) lvm pv's can show as not belonging to their vg if symlink is used (refs: #30905)
• PR #30905: (joejulian) Add realpath to lvm.pvdisplay and use it in vg_present @ 2016-02-05 17:05:32 UTC
  - 91806b03b9 Merge pull request #30905 from joejulian/2015.8_fix_lvm_pv_mapper
  - f96650f3c3 Add realpath to lvm.pvdisplay and use it in vg_present
• ISSUE #30923: (youngnick) Starting a glusterfs volume after creation fails with an exception in 2015.8 and after. (refs: #30924)
• PR #30924: (youngnick) Fix small bug with starting volumes after creation. @ 2016-02-05 16:58:22 UTC
  - af2832b69d Merge pull request #30924 from youngnick/glusterfs-start-volume-bug
  - be5295cf7b Fix small bug with starting volumes after creation.
• PR #30910: (cro) fix iDRAC state @ 2016-02-05 16:49:06 UTC
  - 3a6666ad25 Merge pull request #30910 from cro/fx2_idrac
  - 68af2ab185 Lint.
  - c274c7ef6c Lint.
  - 3e3b762bf Add generic command for executing racadm commands on individual blades in a chassis.
  - 0597901f5 Finish the idrac state, fix problem with grains not loading sometimes.
• PR #30919: (garethgreenaway) Fixes to ssh_auth state module @ 2016-02-05 16:15:28 UTC
  - 101fa12479 Merge pull request #30919 from garethgreenaway/ssh_auth_cp_get_url_needs_saltenv
  - c9ba038553 The call to cp.get_url needs the saltenv, if you're using environments other than base, it will fail.
• ISSUE #30300: (AkhterAli) boto_route53 __salt__ not defined. (refs: #30867, #30920)
• PR #30920: (jacobhammons) Versioned to 2015.8.5, added known issue #30300 to release notes @ 2016-02-05 01:12:17 UTC
  - 6d4fd11dd0 Merge pull request #30920 from jacobhammons/release-notes
  - 93d47f8615 Versioned to 2015.8.5, added known issue #30300 to release notes
• PR #30894: (terminalmage) git module/state: Handle identity files more gracefully @ 2016-02-04 23:55:01 UTC
  - 3d3321ab92 Merge pull request #30894 from terminalmage/issue30858
  - 08741eb969 Update versionadded/versionchanged
  - 8909d430e1 salt.states.git.latest(): Prevent tracebacks when git ssh auth fails
  - c961cf1c7d git: only use passphrase-protected key if invoked using salt-call
  - 0b286f1bc3 Add global ssh_config path to git ssh wrapper
  - f813ce4ad Add salt.modules.ssh.key_is_encrypted()
  - 1ae7c53e17 Add salt.utils.files.process_read_exception()
• ISSUE #30694: (pankajighadge) Tomcat war deployment version issue in new SALT version (refs: #30750)
• **PR #30750** (jfindlay) extract whole war version @ 2016-02-04 21:41:01 UTC
  - 2415b3e62e Merge pull request #30750 from jfindlay/war_version
  - 4b01c28f9 modules,states.tomcat: allow specifying war version
  - 6deedca0f states.tomcat: _extract_war_version parses path
  - 8dd3b6dfed9 modules.war._extract_war_version: allow non-semver

• **ISSUE #30817** (bogdan) If the private_key filespecified in the provider is missing then the driver will be disabled (refs: #30884)

• **PR #30884** (rallytime) Move checks for private_key file existence and permissions to create function @ 2016-02-04 21:03:23 UTC
  - 6a6456eaaa6 Merge pull request #30884 from rallytime/fix-30817
  - 086dadae476 We need to check for a key_filename before looking for the path
  - e79321b418 Move checks for private_key file existence and permissions to create function

• **PR #30888** (ticosax) Backport #30797 to 2015.8 @ 2016-02-04 21:02:25 UTC
  - **PR #30797**: (rhansen) don't delete existing Docker volume if driver unspecified (refs: #30888)
  - 4ae2d829f0 Merge pull request #30888 from ticosax/backport-30797
  - e79321b418 Merge pull request #30888 from ticosax/backport-30797
  - 68b51be869 add additional states.dockerng.volume_present() unit tests
  - 849b94ed73 document the behavior if the driver is unspecified

• **PR #30895** (bdrung) Fix various typos @ 2016-02-04 20:55:10 UTC
  - 4372851ad9 Merge pull request #30895 from bdrung/2015.8
  - 708f2ff8ea Fix typo reponse -> response
  - 72c4eab6d7 Fix typo propogate -> propagate
  - 4912e365cb Fix typo directores -> directories
  - 74c8aba03e Fix typo exeption -> exception
  - 4692d84b07 Fix typos of improvement
  - 213fc2d858 Fix typo occurring -> occurring
  - fe6124003b Fix typo nonexistent -> nonexistent
  - 56ce7479b1 Fix typo catched -> caught
  - 821e690e65 Fix typo development -> development
  - b51279e086 Fix typo override -> override
  - 4f2f04e47d Fix typo relevent -> relevant
  - fe8be562c5 Fix typo existeince -> existence
  - 4a2f4de1a8 Fix typo accross -> across
  - 9ae50c993e Fix typo Lenth -> Length
  - 20e79981e1 Fix typo preferrably -> preferably
  - f8d9f608dd Fix typo address -> address
  - a7f12a13ff0 Fix typo keywork -> keyword
- bf92c3663b Fix typo formatting -> formatting
- ca4450d881 Fix typo wont -> won’t
- cd72b12161 Fix typo thats -> that’s
- 6db9724ec7 Fix typo doesn't -> doesn’t
- 58d46a7e98 Fix typo certificate -> certificate

- **ISSUE #30887** (anlutro) salt-ssh fails on import msgpack - 2015.8 (refs: #30889)
- **PR #30889** (anlutro) Make msgpack an optional dependency in salt.utils.cache @ 2016-02-04 20:53:39 UTC
  - cdca33021a Merge pull request #30889 from alprs/fix-cache_msgpack_optional
  - ab7aae3221 make msgpack an optional dependency in salt.utils.cache

- **ISSUE #6602** (corywright) Add ability to match on nodegroups to the compound matcher (refs: #30896)

- **ISSUE #25292** (lichtamberg) Nodegroup matching in pillars via salt-SSH? (refs: #30896)

- **PR #30896** (vutny) Update nodegroups parameter examples in master config example and docs @ 2016-02-04 20:52:35 UTC
  - 0dff45b4ac Merge pull request #30896 from vutny/nodegroups-in-master-config-example
  - 936c1ff6c8 Add explanation about N@ classifier. Inspired by #25292
  - 8bc2426816 Update example in master config documentation reference
  - ca8c0bdc3f Update nodegroups section example in master config according to docs

- **ISSUE #30792** (bender-the-greatest) Specifying version in pkgs list returns failure even though it succeeds (on Ubuntu) (refs: #30898)

- **PR #30898** (abednarik) Fix pkg install with version. @ 2016-02-04 20:52:14 UTC
  - 33a400e943 Merge pull request #30898 from abednarik/fix_pkg_version_debian_family
  - b15c0d799 Fix pkg install with version.

- **ISSUE #30843** (HeathNaylor) SALT.STATES.BOTO_ELB register_instances error (refs: #30867)

- **ISSUE #30808** (Reiner030) Nice2have: better boto error handling when AWS service isn’t available (here: some authentication problems) (refs: #30867)

- **ISSUE #30300** (AkhterAli) boto_route53 __salt__ not defined. (refs: #30867, #30920)

- **PR #30867** (rallytime) Pass in ‘pack’ variable to utils.boto.assign_funcs function from ALL boto modules @ 2016-02-04 18:37:05 UTC
  - **PR #30279** (cachedout) Allow modules to be packed into boto utils (refs: #30867)
  - 89bac9076a Merge pull request #30867 from rallytime/boto-utils-fix
  - 6ad7642f6d Lint
  - 58778dfc88 Fix failing boto_vpc module unit tests
  - adb85892de Fix failing state module tests
  - b5ce0991b0 Pylint fix
  - 6146209c53 Pass in ‘pack’ variable to utils.boto.assign_funcs function from ALL boto modules.

- **ISSUE #30798** (tbaker57) salt/utils/aws.py has Python 2.7 dependency (refs: #30849)
• PR #30849: (jfindlay) utils.aws: use time lib to convert to epoch seconds @ 2016-02-03 22:47:31 UTC
  - 276cf626b0 Merge pull request #30849 from jfindlay/aws_seconds
  - 17ae74dad1 utils.aws: use time lib to convert to epoch seconds

• ISSUE #30869: (Ch3LL) git pillar: do not see all pillar data with multiple repos in 2015.8.4 (refs: #30874)

• PR #30874: (terminalmage) Fix regression in git_pillar when multiple remotes are configured @ 2016-02-03 22:24:02 UTC
  - 4cbeca8a2b50 Merge pull request #30874 from terminalmage/issue30869
  - 9cf0c812d6 Fix regression in git_pillar when multiple remotes are configured

• ISSUE #30814: (gpenin) [2015.8.7][Ubuntu 12.04 LTS][dpkg.py] Invalid "$[binary:Package]" field in dpkg-query (refs: #30850)

• PR #30850: (jfindlay) modules.gnu_get_pkg_info: allow for ubuntu 12.04 @ 2016-02-03 16:33:26 UTC
  - 841a84b0ae Merge pull request #30850 from jfindlay/dpkg_var
  - d53a87762e modules.gnu_get_pkg_info: handle older ubuntu
  - d3c6732539 modules.gnu_get_pkg_info: use pythonic initializers

• PR #30852: (replicant0wnz) Added more descriptive error message @ 2016-02-03 16:30:15 UTC
  - 9a3ec9d028 Merge pull request #30852 from replicant0wnz/error-message-libgit
  - c36a9023b5 Added more descriptive error message

• PR #30847: (terminalmage) Backport #30844 to 2015.8 branch @ 2016-02-03 16:26:46 UTC
  - PR #30844: (terminalmage) Perform initial gitfs/git_pillar fetch when init'ing remotes on masterless minion (refs: #30847)
  - PR #30703: (kraney) Fix for gitfs ext_pillar on standalone minion (refs: #30844)
  - 0338f445d9 Merge pull request #30847 from terminalmage/bp-30844
  - 58c4b07434 Add __role to master opts for gitfs integration tests
  - 17e6ec2d44 Only perform initial fetch when running on a minion
  - 53c4b4aaa4 gitfs: add initial fetch to pygit2 and dulwich
  - 7892e9ab22 Fix for gitfs ext_pillar on standalone minion

• PR #30860: (vutny) Correct installation documentation for RHEL-based distributions @ 2016-02-03 16:13:09 UTC
  - ef1182e95c Merge pull request #30860 from vutny/correct-doc-install-on-rhel
  - 6648d4c62 Correct links to Fedora COPR repositories
  - 083037fccc Remove duplicate post-installation tasks section

• PR #30841: (jacobhammons) Release notes for 2015.8.5 @ 2016-02-03 00:04:05 UTC
  - f1c60927308 Merge pull request #30841 from jacobhammons/release-notes
  - 6d0562ef86 Release notes for 2015.8.5

• ISSUE #30820: (Supermathie) State runs involving watch_in or extending break on 2015.8.4 (refs: #30837, #30835, #30833)

• PR #30835: (terminalmage) Integration test for #30820 @ 2016-02-02 23:51:53 UTC
  - 8ac6002d3 Merge pull request #30835 from terminalmage/issue30820
• ISSUE #30820: (Supermathie) State runs involving watch_in or extending break on 2015.8.4 (refs: #30837, #30835, #30833)

• PR #30837: (jacobhammons) Added known issue #30820 to release notes @ 2016-02-02 22:33:43 UTC
  - e9091854ce Merge pull request #30837 from jacobhammons/release-notes
  - 29e12a7f6f Added known issue #30820 to release notes

• ISSUE #28790: (jfindlay) add grains (and others?) to salt modindex (refs: #30832)

• PR #30832: (rallytime) Add grains modules to salt modindex @ 2016-02-02 21:47:46 UTC
  - b512c7757a Merge pull request #30832 from rallytime/fix-28790
  - ca44dd201 Add grains modules to salt modindex

• ISSUE #28971: (belt-ascendlearning) if the user exists, but has no permissions, rabbitmq_user.list_user_permissions() blows (refs: #30822)

• PR #30822: (rallytime) Make sure setting list_user_permissions to ["", ","] doesn't stacktrace @ 2016-02-02 21:42:26 UTC
  - 75db37a97d Merge pull request #30822 from rallytime/rabbitmq-user-state-fixes
  - 272cc653ca Make sure setting list_user_permissions to ["", ","] doesn't stacktrace
  - a7a7a368 Don't return a set() when checking for new tags in rabbitmq_user state

• ISSUE #30820: (Supermathie) State runs involving watch_in or extending break on 2015.8.4 (refs: #30837, #30835, #30833)

• PR #30833: (terminalmage) Fix regression in scanning for state with 'name' param @ 2016-02-02 21:25:09 UTC
  - 557766f20b Merge pull request #30833 from terminalmage/issue30820
  - be3b82e2b6 Fix regression in scanning for state with 'name' param

• ISSUE #30722: (yannis666) mine config is not merged from minion config and pillar (refs: #30757, #30823)

• PR #30823: (yannis666) Fix for mine to merge configuration on update. @ 2016-02-02 20:21:24 UTC
  - ec42bb9bb Merge pull request #30823 from yannis666/fixed-for-mine-update-merge2
  - 99c7c12aba Fix for mine to merge configuration on update. This fix was previously applied to 2015.5. It fixes #30722

• PR #30827: (jacobhammons) Version to 2015.8.4, added CVE 2016-1866 to release notes @ 2016-02-02 20:03:31 UTC
  - d2ab9f1ea1 Merge pull request #30827 from jacobhammons/release-2015.8
  - dfc1f7a57d Version to 2015.8.4, added CVE 2016-1866 to release notes

• ISSUE #30809: (anlutro) Master configuration "pillar_merge_lists" has no effect (refs: #30813)

• ISSUE #29601: (seanjnkns) pillars not merging properly with 2015.8.3 (refs: #30062)

• PR #30813: (anlutro) Properly set the default value for pillar_merge_lists @ 2016-02-02 19:53:52 UTC
  - PR #30458: (rallytime) Back-port #30062 to 2015.8 (refs: #30813)
  - PR #30062: (seanjnkns) Remove recurse_list from pillar_source_merging_strategy and add pilla... (refs: #30813, #30458)
  - f83845d7c3 Merge pull request #30813 from alprs/fixtures-pillar_merge_list_default
- ec34caba88 Properly set the default value for pillar_merge_lists

- **PR #30826:** (cachedout) Fix 30682 @ 2016-02-02 19:40:05 UTC
  - a3feba4a26 Merge pull request #30826 from cachedout/fix_30682
  - 3b246db0b0 Fix stupid test
  - 12dc677628 Changed list conversion to use correct method and return whole set
  - 97eb4bf0f7 Pop values from new_tags set before loading into dict value

- **PR #30818:** (rallytime) Back-port #30790 to 2015.8 @ 2016-02-02 18:57:55 UTC
  - **PR #30790:** (xmj) salt/modules/sysrc.py: Fix documentation for set_ (refs: #30818)
  - b25b45d05 Merge pull request #30818 from rallytime/bp-30790
  - c7c66afddc salt/modules/sysrc.py: Fix documentation for set_

  - ef6c4e8377 Merge pull request #30628 from rallytime/fix-25658
  - 1e8e86007c Refactor rabbitmq_policy states to use test=true functionality correctly

- **PR #30624**: (cro) Remove bad symlinks from osx pkg dir @ 2016-01-26 00:02:25 UTC
  - 80d0e428aa Merge pull request #30624 from cro/remove_bad_symlinks
  - f5fd38624e Remove bad symlinks in osx pkg dirs

- **ISSUE #30621**: (zer0def) Current latest (2015.8.3) list of builtin states docu doesn't list 'glance' (refs: #30622)
- **PR #30622**: (rallytime) Add glance state to list of state modules @ 2016-01-25 23:55:20 UTC
  - 330ea9a292 Merge pull request #30622 from rallytime/fix-30621
  - 57b7e6cc93 Add glance state to list of state modules

- **ISSUE #19288**: (oba11) AssociatePublicIpAddress doesnt work with salt-cloud 2014.7.0 (refs: #20972, #30591)
- **PR #30618**: (rallytime) Back-port #30591 to 2015.8 @ 2016-01-25 23:55:20 UTC
  - **PR #30591**: (mlalpho) salt-cloud-clouds-ec2 AssociatePublicIpAddress fix (refs: #30618)
  - **PR #20972**: (JohannesEbke) Fix interface cleanup when using AssociatePublicIpAddress in #19288 (refs: #30591)
    - f00d3f398a Merge pull request #30618 from rallytime/bp-30591
    - 2c9d59fa42 looks like a re-merge of PR #20972 which relates to #19288

- **ISSUE #30587**: (sjorge) [docs] docs confusing on client_acl and external_auth usage (refs: #30625)
- **PR #30625**: (jfindlay) doc.topics.eauth: clarify client_acl vs eauth @ 2016-01-25 23:03:24 UTC
  - 6b94d9655 Merge pull request #30625 from jfindlay/eaauth_acl
  - b5e2c0ff028 doc.topics.eauth: clarify client_acl vs eauth
28.2.74 Salt 2015.8.8.2 Release Notes

Version 2015.8.8.2 is a bugfix release for 2015.8.0.

Fixes to 2015.8.8

Salt 2015.8.8.2 includes fixes for the following known issues in 2015.8.8:

• Key master with value [...] has an invalid type of list Error (issue #32044)
• Failed to import module win_dacl Error (issue #32004)
• Wrong validation type for file_ignore_glob key (issue #32114)
• Fix file.managed for windows (issue #31969)

Important: issue #32183 prevents Salt Cloud from installing the Salt minion on new systems. To workaround this issue, call `salt-cloud -u` to update the bootstrap script to the latest version.

Changelog for v2015.8.8..v2015.8.8.2

Generated at: 2018-05-28 00:29:12 UTC

• 403563e441 Change type check errors to debug loglevel
• 8323005b3d Support multiple valid option types when performing type checks
• 2f95082a96 Fixed validation type for file_ignore_glob Fixes #32114
• 2685e61d9e Move constant declaration into member variable to avoid issues when modules can’t be loaded.
• bc10d7dede Add apply_template_on_contents for windows

28.2.75 Salt 2015.8.9 Release Notes

Version 2015.8.9 is a bugfix release for 2015.8.0.

Important Post-Upgrade Instructions for Linux Mint

As a result of some upstream changes, the \texttt{os} grain on Mint Linux is now being detected as \texttt{LinuxMint} (issue \#33295). Run the following command after you upgrade to 2015.8.9 to reset the \texttt{os} grain to \texttt{Mint} and the \texttt{os\_family} grain to \texttt{Debian}:

\begin{verbatim}
salt -G 'os:LinuxMint' grains.setvals "{'os': 'Mint', 'os\_family': 'Debian'}"
\end{verbatim}

Changelog for v2015.8.8.2..v2015.8.9

\textit{Generated at: 2018-05-28 00:36:04 UTC}

- \textbf{PR} \#33310: (jfindlay) update 2015.8.9 release notes
- \textbf{PR} \#33293: (twangboy) Fix minion start retry on Windows (2015.8) @ 2016-05-17 17:03:41 UTC
  - e3eff27c55 Merge pull request \#33293 from twangboy/fix_33277_2015_8
  - 652f0079db Fix minion start retry on Windows
- \textbf{ISSUE} \#31270: (4001982248998) acl.present: TypeError on subsequent runs (refs: \#33172)
  - \textbf{PR} \#33305: (rallytime) Back-port \#33172 to 2015.8
  - \textbf{PR} \#33172: (Kurocon) linux_acl: Allow '-' as a separation character in ACL permissions. Fix... (refs: \#33305)
- \textbf{ISSUE} \#33299: (jbonachera) salt-cloud: scp_file() and sftp_file() don't work with ipv4-only hosts (refs: \#33300)
- \textbf{ISSUE} \#33243: (jbonachera) salt-cloud: wait_for_port() doesn't work with ipv4-only hosts (refs: \#33246, \#33300)
  - \textbf{PR} \#33300: (jbonachera) Handle more ipv6 error as an exception \#33299
- \textbf{ISSUE} \#26062: (silenius) service.status is broken under FreeBSD (refs: \#33294)
- \textbf{ISSUE} \#23435: (JaseFace) service.status currently reports an error on FreeBSD if the service isn't running (refs: \#33294)
  - \textbf{PR} \#33294: (terminalmage) Ignore retcode when checking service's status
- \textbf{PR} \#33274: (rallytime) [2015.8] Merge forward from 2015.5 to 2015.8 @ 2016-05-16 16:41:32 UTC
  - 06edba448e Merge pull request \#33274 from rallytime/merge-2015.8
  - bf641d3a66 Merge branch '2015.5' into '2015.8'
  - 8fa72f6588 Clarify file.replace MULTILINE flag interaction with regex anchors (#33137)
  - 4b1f460256 update 2015.5.11 release notes (#33236)
- \textbf{ISSUE} \#30258: (rallytime) Changes dictionary return should be mentioned in test state docs (refs: \#33254)
  - \textbf{PR} \#33254: (rallytime) Add comment for test=true w/o changes ret and add changes dict example
- \textbf{ISSUE} \#30946: (rallytime) Update SaltStack Git Policy Documentation (refs: \#33252)
  - \textbf{PR} \#33252: (rallytime) Update Git Policy docs to match Contribution guide
- \textbf{ISSUE} \#33238: (clinta) x509 CSR fails if the csr does not contain any extensions (refs: \#33239)
  - \textbf{PR} \#33239: (clinta) Fix \#33238
  - \textbf{PR} \#33245: (terminalmage) Backport \#33244 to 2015.8
  - \textbf{PR} \#33244: (terminalmage) Properly report on invalid gitfs/git_pillar/winrepo repos (refs: \#33245)
- **PR #32238**: (ticosax) [gitfs] only 2 argument are passed to this template when render error message (refs: #33244, #33245)

- **ISSUE #30605**: (eyj) Update development/conventions/release.rst docs - they're out of date with the current process. (refs: #33253)

- **PR #33253**: (rallytime) Update the release process docs @ 2016-05-13 21:28:11 UTC
  - 94a53da92e Merge pull request #33253 from rallytime/fix-30605
  - a129d05b6d Update the release process docs
  - **PR #33251**: (jfindlay) update 2015.8.9 release notes

- **ISSUE #33243**: (jbonachera) salt-cloud: wait_for_port() doesn't work with ipv4-only hosts (refs: #33246, #33300)
  - **PR #33246**: (techhat) Handle ipv6 error as an exception

- **ISSUE #33073**: (robnagler) TypeError: unhashable type: 'dict' (refs: #33213)
  - **PR #33213**: (terminalmage) Check rendered YAML for invalid keys

- **ISSUE #21903**: (basepi) Document _file.conf pattern for master.d/ and minion.d/ (refs: #33224)
  - **PR #33224**: (rallytime) Make note of files that begin with `_` in master.d or minion.d dirs

- **ISSUE #31975**: (rajvidhimar) Docstrings not reflected in the salt documentation. (refs: #33150)
  - **PR #33150**: (rallytime) Gate jnpr imports in salt.proxy.junos.py

- **ISSUE #21315**: (ryan-lane) No example documentation for http.query state (refs: #33222)
  - **PR #33222**: (rallytime) Add docs for the http state

- **ISSUE #29796**: (vutny) Fail to use 'highstate' outputter explicitly (refs: #33215)
  - **PR #33215**: (rallytime) Don't stacktrace when using --out=highstate at CLI during state run.
  - **PR #33219**: (lalmeras) propagate opts to salt.util.http call
  - **PR #33154**: (lalmeras) propagate opts to salt.util.http call (refs: #33219)
  - **PR #33237**: (jfindlay) update 2015.8.9 release notes

- **PR #33217**: (rallytime) [2015.8] Merge forward from 2015.5 to 2015.8 @ 2016-05-12 22:45:39 UTC
  - 6dc5d605b1 Merge pull request #33217 from rallytime/merge-forward-2015.8
  - 4655607b58 Merge branch '2015.5' into '2015.8'
  - 698f1eb657 Merge pull request #33211 from cachedout/user_kill
    - df42e5baa7 Don't try to kill a parent proc if we can't
    - f86832911e Resolve issue with pkg module on Mint Linux (#33205)
    - a09e1b6335 Add pip installed and removed test (#33178)
    - 96e3586f12 update 2015.5.11 release notes (#33197)
    - 09b072a412 Fix file.managed for Windows (#33181)
  - **PR #33207**: (rallytime) [2015.8] Merge forward from 2015.5 to 2015.8

- **ISSUE #32917**: (bradthurber) standalone minion pygit2 pillar data doesn't refresh without manual git fetch (refs: #33204)
  - **PR #33204**: (terminalmage) Add a fetch when compiling git_pillar for masterless minions
• ISSUE #33162: (jfindlay) Key error with salt.utils.cloud.cache_node and EC2 (refs: #33164)
  - PR #33164: (jfindlay) cloud.clouds.ec2: cache each named node
• ISSUE #32385: (aronneagu) git.latest throws expected string or buffer (refs: #33203)
  - PR #33203: (terminalmage) Properly handle failed git commands when redirect_stderr=True
• ISSUE #32685: (gidantribal) git state does not take into account ssh config file (refs: #33152)
  - PR #33152: (terminalmage) Don't force use of global ssh_config when git identity file is specified
  - PR #33198: (jfindlay) update 2015.8.9 release notes
• PR #33188: (rallytime) [2015.8] Merge forward from 2015.5 to 2015.8 @ 2016-05-11 22:32:29 UTC
  - 6177a6a36f Merge pull request #33188 from rallytime/merge-2015.8
  - f12ba6e6bc Merge branch '2015.5' into '2015.8'
  - 30868ab06c [2015.5] Update to latest bootstrap script v2016.05.11 (#33185)
  - 264ad34b3b Pip fix (#33180)
  - 43288b268d add 2015.5.11 release notes (#33160)
  - e0da8fa7d7 [2015.5] Update to latest bootstrap script v2016.05.10 (#33155)
  - PR #33161: (jfindlay) add 2015.8.9 release notes
  - PR #33156: (rallytime) [2015.8] Update to latest bootstrap script v2016.05.10
• ISSUE #25040: (yi9) grains.get can't get minion's /etc/salt/grains value in multi-master set up (refs: #33142)
  - PR #33142: (cachedout) Hash fileclients by opts
• ISSUE #22142: (multani) State acl.present doesn't allow to set "default" ACLs (refs: #31769)
  - PR #33139: (rallytime) Back-port #31769 to 2015.8
  - PR #31769: (DylanFrese) Fix acl.present and acl.absent when adding default ACLs (refs: #33139)
• PR #33144: (rallytime) [2015.8] Merge forward from 2015.5 to 2015.8 @ 2016-05-10 19:40:31 UTC
  - 2800762b44 Merge pull request #33144 from rallytime/merge-2015.8
  - 449176f06e Merge branch '2015.5' into '2015.8'
  - 6cd1641840 Merge pull request #33141 from jtand/disable_local_pkg_install_test
    * 8b1e34fb17 Skipping salt-call --local test
• PR #33140: (rallytime) [2015.8] Merge forward from 2015.5 to 2015.8 @ 2016-05-10 16:57:55 UTC
  - 72d075e14 Merge pull request #33140 from rallytime/merge-2015.8
  - c732e8104b Merge branch '2015.5' into '2015.8'
  - 878d34a865 Doc mock decorators (#33132)
• ISSUE #32834: (beardedeagle) Masterless Minion - Unable to query job cache (refs: #33017, #33100)
  - PR #33100: (rallytime) If cache_jobs: True is set, populate the local job cache when running salt-call
  - PR #33135: (stk0vrfl0w) Fix broken parsing of usermgmt.conf on OpenBSD
  - PR #33129: (rallytime) Back-port #33101 to 2015.8
  - PR #33101: (thatch45) Add a check that the cmdline of the found proc matches (refs: #33129)
  - PR #33064: (terminalmage) salt.utils.gitfs: fix formatting for warning messages
• ISSUE #33058: (aclemetson) Unable to run "win_servermanager.list_available" on minion. (refs: #33099)
  - PR #33099: (twangboy) Fix 33058

• ISSUE #32999: (basepi) Stacktrace for master_finger mismatch on minion (refs: #33106)

• PR #33106: (abednarik) Moved _finger_fail method to parent class. @ 2016-05-09 16:31:09 UTC
  - 8acc3147d6 Merge pull request #33106 from abednarik/abednarik_master_Finger_stacktrace
  - 91a69ba54a Moved _finger_fail method to parent class.
  - PR #33102: (Ch3LL) clarify docs that map is designed to be run once. is not stateful
  - PR #33098: (rallytime) Back-port #33061 to 2015.8
  - PR #33061: (ahammond) cloud.query needs to define mapper.opts (refs: #33098)

• PR #33096: (rallytime) [2015.8] Merge forward from 2015.5 to 2015.8 @ 2016-05-06 19:27:57 UTC
  - c1f7aed8a5 Merge pull request #33096 from rallytime/merge-2015.8
  - 0fd5e9d157 Merge branch '2015.5' into '2015.8'
  - 30edeadafd Lower display of msgpack failure msg to debug (#33078)
  - d4928c5a22 Use saltstack repo in buildpackage.py on CentOS 5 (#33080)
  - 61d126cb98 add test for installing package while using salt-call --local (#33025)
  - 6d3e4e8935 File and User test fixes for 2015.5 on Fedora23 (#33055)
  - d48b28b52 test pillar.items output (#33060)
  - 398739bc0 Fix minor document error of test.assertion (#33067)
  - f875631b2 Saltfile with pillar tests (#33045)
  - 1d7892421e Backport #33021 manually to 2015.5 (#33044)
  - f00b5f91b3 Add run_on_start docs to schedule.rst (#32958)
  - PR #32865: (idonin) salt-cloud: fix ipv6-only virtual machines
  - PR #33084: (jfindlay) modules.npm: do not log npm --version at info level

• ISSUE #33068: (pythonwood) salt-ssh do not support centos5 because old-version-python ? (refs: #33081)

• PR #33081: (jfindlay) ssh docs: install py-2.6 for RHEL 5 @ 2016-05-06 15:18:39 UTC
  - 3808d05838 Merge pull request #33081 from jfindlay/ssh_doc
  - a2c927b173 ssh docs: install py-2.6 for RHEL 5

• PR #33088: (isbm) Bugfix: Restore boolean values from the repo configuration @ 2016-05-06 15:13:27 UTC
  - 6d604926d3 Merge pull request #33088 from isbm/isbm-zypper-fix-boolean
  - 3ca203eb8e Bugfix (follow-up): setting priority requires non-positive integer
  - 79a46e091c Add repo config test
  - 222b8369ca Add test data for repos
  - b746fa35f0 Bugfix: Restore boolean values from the repo configuration

• ISSUE #12422: (creaky) Bug: file.blockreplace inserts additional blank line on multi-line content (refs: #33049)
  - PR #33082: (Ch3LL) Fix tests for file.blockplace to remove newline
- PR #33049: (thatch45) Don’t append a newline when creating new content with blockreplace (refs: #33082)
- PR #32892: (isbm) Resolve Zypper locks on asynchronous calls @ 2016-05-05 14:34:59 UTC
  - fb89877cf2 Merge pull request #32892 from isbm/isbm-zypper-env-variables
  - 1601a7e07a Prevent the use of "refreshable" together with "nolock" option.
  - 52e1be2fa9 Remove unused variable in a constructor. Adjust the docstring accordingly.
  - 7e00f566ef Move log message down to the point where it actually sleeps. Rephrase the message.
  - 4b7dab83ff Fix PID file path for SLE11
  - 7f37961d4b Rename tags
  - c55b0fab58 Test DOM parsing
  - c54e928e4f Add exception handling test
  - 3d245bbe84 Parse DOM out of the box, when XML mode is called
  - 6a9f8523ac Add Zypper caller test suite
  - f189f90124 Bugfix: always trigger __getattr__ to reset and increment the configuration before the call.
  - 7e1712dd80 Fix tests according to the new calling model
  - 3a30b7fbc6 Remove an obsolete test case
  - 6e5877a2ee Add Zypper Call mock
  - bb5540cb4a Bugfix: inverted logic on raising (or not) exceptions
  - ce9262fe71 Make Zypper caller module-level reusable
  - 77dc8695af Update docstrings according to the bugfix
  - 46d86b21d5 Bugfix: accept refresh override param
  - cb40618262 Fire an event about released Zypper with its result
  - 0728fb0c00 Replace string values with the constants
  - 6af3f7141b Check if zypper lock exists and add more debug logging
  - 0167b30a75 Add Zypper lock constant
  - 370ff21d36 Fire an event to the Master about blocked Zypper.
  - 1727ca3de2 Use new Zypper call implementation
  - 485164a5e Remove blocking-prone Zypper call implementation
  - f161f0612c Implement block-proof Zypper call implementation
  - baf35ed708 Remove one-char variables
  - 2c94eb016f Remove an unused variable
  - 6869ebc557 Remove an empty line
  - 7e06489da9 Remove verbose wrapping
  - 2131ff04af Standardize zypper call to "run_all"
  - 046e44ca3 Bugfix: version_cmp crashes in CLI if there are versions, that looks like integer or float.
  - b869a92eea Change Zypper calls to a single point
• ISSUE #2437: (Grokzen) Minion schedule return data missing some fields (refs: #33039)
  - PR #33039: (The-Loeki) Add fun_args to scheduled return data (part of #2437)

• ISSUE #12422: (creaky) Bug: file.blockreplace inserts additional blank line on multi-line content (refs: #33049)
  - PR #33049: (thatch45) Don’t append a newline when creating new content with blockreplace (refs: #33082)

• ISSUE #24996: (danlsgiga) --failhard option not working as expected (refs: #33048)
  - PR #33048: (rallytime) Pass all data to batch.run() call when using --failhard

• ISSUE #32452: (nicholascapo) cmd.run_all with --batch and --failhard gives no output on failure (refs: #33050)
  - PR #33050: (rallytime) Display command output when command fails with batch + failhard options

• ISSUE #33041: (anitakrueger) boto_elb.present security_groups kwarg is a list - needs documentation (refs: #33053)
  - PR #33053: (rallytime) Allow security_groups kwarg for boto_elb.present to be string or list
  - PR #33054: (rallytime) [2015.8] Merge forward from 2015.5 to 2015.8
  - PR #33056: (justinta) File and User test fixes for 2015.8 on Fedora23

• ISSUE #33041: (anitakrueger) boto_elb.present security_groups kwarg is a list - needs documentation (refs: #33053)
  - PR #33053: (rallytime) Allow security_groups kwarg for boto_elb.present to be string or list
  - PR #33054: (rallytime) [2015.8] Merge forward from 2015.5 to 2015.8
  - PR #33056: (justinta) File and User test fixes for 2015.8 on Fedora23

• ISSUE #32472: (esn89) salt-minion is stuck in a restart loop with not much info: (refs: #33030)
  - PR #33040: (rallytime) Back-port #33030 to 2015.8
  - PR #33030: (thatch45) When we restart the minion we should show the error that caused it (refs: #33040)

• ISSUE #32834: (beardedeagle) Masterless Minion - Unable to query job cache (refs: #33017, #33100)
  - PR #33017: (rallytime) Update the docs for saltutil.find_job to be more clear/accurate
  - PR #33031: (rallytime) Back-port #33002 to 2015.8
  - PR #33002: (whiteinge) Add saltenv to the cmd.script state function (refs: #33031)
  - PR #33021: (UtahDave) Fix syndic regression (refs: #33044)

• ISSUE #11801: (slai) Salt does not match user names properly under Windows (refs: #32674)
  - PR #32674: (twangboy) Compare uid and gid instead of name and group

• ISSUE #32856: (DeanScothern) jjid not shown when running the salt command line with --batch-size using either --verbose or --show-jid with certain salt versions (refs: #32996)

• ISSUE #31738: (igorwidlinski) salt --show-jid does not show job id when run in batch mode (refs: #32450)
  - PR #32996: (rallytime) Allow batch mode to use verbose option, as well as show_jid.
  - PR #32450: (cachedout) Pass parser options into batch mode (refs: #32996)

• ISSUE #32954: (atengler) glusterfs.peered fails with 'NoneType' object is not iterable (refs: #32955)
  - PR #32955: (atengler) Fixed glusterfs.peered output

• ISSUE #26011: (rodriguezsergio) states.virtualenv != modules.virtualenv (refs: #32994)
  - PR #32994: (rallytime) Clarify some arg docs for virtualenv state
  - PR #32986: (justinta) Fix boto_secgroup_test

• ISSUE #32777: (sjorge) cron.present broken on Solarish systems if user specified (refs: #32970)
  - PR #32970: (sjorge) fix user cron on solarish operating systems
  - PR #32976: (jfindlay) salt.log.setup: process user args before format
- **ISSUE #32891**: (guettli) docs: Note "This document represents behavior exhibited by Salt requisites as of version 0.9.7 of Salt." (refs: #32934)
  - PR #32934: (jfindlay) doc.ref.states.ordering: clarify requisite change
- **ISSUE #32882**: (papertigers) carbon_return is missing a default value. (refs: #32883)
  - PR #32928: (rallytime) Back-port #32883 to 2015.8
  - PR #32883: (papertigers) mode should default to 'text' (refs: #32928)
- **ISSUE #32646**: (deamen) FileClient Class (client = salt.minion.FileClient(__opts__) ) does not exist (refs: #32925)
  - PR #32925: (rallytime) Remove FileClient class references from docs - it doesn’t exist.
- **ISSUE #23683**: (gravyboat) contents_grains should have an example (refs: #32922)
  - PR #32922: (rallytime) Update contents_grains option with relevant docs
- **PR #32926**: (rallytime) [2015.8] Merge forward from 2015.5 to 2015.8 @ 2016-04-28 19:47:52 UTC
  - e60c12640d Merge pull request #32926 from rallytime/merge-2015.8
  - 5a184881be Merge branch '2015.5' into '2015.8'
  - edce22a143 backport PR #32732 to 2015.5 fixes #32714 (#32848)
  - PR #32908: (Ch3LL) Specify EBS volume tags in profile configuration in aws
- **ISSUE #23952**: (neogenix) iptables state append doesn’t honor position -1 (refs: #32906)
  - PR #32906: (rallytime) Update docs to warn users that -1 isn’t valid for iptables insert state
- **ISSUE #32510**: (Ch3LL) Cannot specify image in provider file when using map file (refs: #32900)
  - PR #32900: (rallytime) Allow profile options to be specified in provider file when using maps
- **ISSUE #30855**: (guettli) Docs: does salt.states.service support systemd? (refs: #32880)
  - PR #32880: (rallytime) Clarify service state opening docs - uses 'service' virtualname
- **PR #32884**: (terminalmage) Fix incorrect deprecation notice @ 2016-04-27 15:47:35 UTC
  - e1b40b3b76 Merge pull request #32884 from terminalmage/fix-incorrect-deprecation-notice
  - b307c5452a Fix incorrect deprecation notice
- **PR #32878**: (jacobhammons) added note about updating the bootstrap script in salt-cloud using th... @ 2016-04-26 21:09:51 UTC
  - a2921b9da0 Merge pull request #32878 from jacobhammons/salt-cloud
  - 3887938727 added note about updating the bootstrap script in salt-cloud using the -u flag, removed the saltconf banner.
- **ISSUE #32861**: (bradthurber) Is it master_syndic or syndic_master? (refs: #32869)
- **PR #32869**: (rallytime) Use correct config setting in cloud syndic docs @ 2016-04-26 19:13:21 UTC
  - 71db10fd2c Merge pull request #32869 from rallytime/fix-32861
  - 0e73da126 Use correct config setting in cloud syndic docs
- **PR #32844**: (rallytime) [2015.8] Merge forward from 2015.5 to 2015.8 @ 2016-04-26 17:38:08 UTC
  - 02c681311f Merge pull request #32844 from rallytime/merge-2015.8
  - 1fc9de1d04 Add 'file.source_list' mock to archive state unit tests
- 9064d3bbfb Merge branch '2015.5' into '2015.8'
  - 9b5c14c37c salt-cloud -u downloads stable version from bootstrap.saltstack.com by default (#32837)
  - 9725804448 update bootstrap to 2016.04.18 release (#32667)
  - c842e1e437 Merge pull request #32776 from rallytime/merge-2015.5
    - 7ecbf9f885 Merge pull request #14 from whiteinge/runner-async-low
    - 211f7b4a1f Format low data correct for runner_async
    - 772c89667c Merge branch '2014.7' into '2015.5'
    - 2775edc176 Saltnado /run fix (#32590)
    - b19c5a5ce7 Verify auth in saltnado run (#32552)
  - 67d0c81184 Support remote sources in a source list (#32691)
  - bd5442d67b Merge pull request #32686 from cachedout/issue_32661
    - f704df90bc Fix stacktrace in batch with dup minion ids
  - 3ec9502a86 Update "Low Hanging Fruit" to "Help Wanted" (#32675)
  - 77bea56b68 Additional documentation on calling exec modules from templates (#32657)
  - c910b8dd51 Fixing critical bug to remove only the specified Host instead of the entire Host cluster (#32639)
  - 4568565d45 Add _syspaths.py to .gitignore (#32638)

- ISSUE #32799: (belt) ssh_auth.present creates ~/.ssh (refs: #32868)
  - PR #32868: (rallytime) Back-port #31139 to 2015.8
  - PR #31139: (exowaucka) Improve %h and %u handling in SSH module (refs: #32868)

- ISSUE #32714: (naemono) file.copy force ignored during highstate, but not with 'salt-call state.sls_id' (refs: #32732, #32847, #32848)
  - PR #32847: (lomeroe) backport PR #32732 for issue #23714
  - PR #32732: (lomeroe) correct use of force flag in file.copy #23714 (refs: #32847, #32848)

- ISSUE #32824: (bradhurber) salt-cloud vmware: wrong pyvmomi installed for RHEL/CentOS 6 (refs: #32845)
  - PR #32845: (rallytime) Add pyvmomi version warning to Getting Started with VMware docs

- ISSUE #25492: (hernanc) "docker-py mem_limit has been moved to host_config in API version 1.19" error (refs: #26518, #32818)
  - PR #32841: (rallytime) Back-port #32818 to 2015.8
  - PR #32818: (mitar) Pass None as memory limit (refs: #32841)
  - PR #26518: (krak3n) Fix for #25492 (refs: #32818)

- ISSUE #32605: (Talkless) pkgrepo.managed with apt does not add comments value later (refs: #32813)
  - PR #32839: (rallytime) Back-port #32813 to 2015.8
  - PR #32813: (abadnark) Add comments as an option for apt in pkgrepo.managed. (refs: #32839)
  - PR #32659: (anlutro) Various improvements on cloud deploy script docs
  - PR #32668: (jfindlay) [2015.8] update bootstrap to 2016.04.18 release
- PR #32785: (rallytime) Back-port #29322 to 2015.8
- PR #29322: (mrproper) add http proxy support for tornado (refs: #32785)

**ISSUE #32710:** (bradhurber) conf/master missing many gitfs and git_pillar parameters (refs: #32722)

- PR #32787: (rallytime) Back-port #32722 to 2015.8 @ 2016-04-25 15:19:21 UTC
  - PR #32722: (bradhurber) Catch up the conf/master file to include gitfs/git_pillar parms from ...
  (refs: #32787)
  - 96a3d4e556 Merge pull request #32787 from rallytime/bp-32722
  - 8d7148d41b Catch up the conf/master file to include gitfs/git_pillar parms from recent releases

- PR #32786: (rallytime) Back-port #32703 to 2015.8 @ 2016-04-25 15:19:13 UTC
  - PR #32703: (schancel) Make example top file match templated version (refs: #32786)
  - 36f70f5847 Merge pull request #32786 from rallytime/bp-32703
  - baa4df25c9 Make example top file match templated version
  - 227e4aabb Fix unnecessary capitalization
  - 73cd9f26c3 Merge branch 'gitfs_perremote_doc_updates' of https://github.com/l2ol33rt/salt into pr-32775
  - b69d406ada Including name per-remote config option in example
  - PR #32779: (terminalmage) Improve documentation on pygit2 versions

- ISSUE #32609: (anlutro) Tornado ioloop fails when master disconnects? (refs: #32749)
  - PR #32749: (DmitryKuzmenko) Properly handle minion failback failure.

  - 8dc1161c8a Don’t unsubscribe from open events on the CLI too early on long-running commands

• PR #32333: (rallytime) [2015.8] Merge forward from 2015.5 to 2015.8 @ 2016-04-04 20:06:02 UTC
  - 22b296d2fd Merge pull request #32333 from rallytime/merge-2015.8
  - d7b4b8b081 Merge branch '2015.5' into '2015.8'
  - fbdc47cc55 Merge pull request #32284 from rallytime/config-audit
    - 0491513204 Don't be so explicit. Just use string_types.
    - 083c477fd3 Use six.string_types in config default tuples
    - 7e642b8381 Audit config.py default types and values - first sweep
  - 0a6d44e57b Merge pull request #32302 from terminalmage/fix-missing-release
    - 413c371ccd Properly support packages with blank "Release" param in pkg.latest_version

• ISSUE #32246: (danlsgiga) IMPORTANT: Do not use md5 hashing algorithm! Please set "hash_type" to SHA256 in Salt Minion config! (refs: #32289)

• PR #32289: (rallytime) New salt-cloud instances should not use old hash_type default. @ 2016-04-04 17:52:09 UTC
  - PR #31162: (isbm) Remove MD5 digest from everywhere and default to SHA256 (refs: #32289)
  - 28cc054244 Merge pull request #32289 from rallytime/fix-32246
  - 66acc00c71 New salt-cloud instances should not use old hash_type default.

• ISSUE #14277: (Sacro) Chocolatey.version doesn't tell you anything informative. (refs: #32291)

• PR #32291: (twangboy) Fix bad output for chocolatey.version (fixes #14277) @ 2016-04-04 17:50:54 UTC
- Merge pull request #32291 from twangboy/fix_14277
- Fix problem with return on installed packages
- Fix chocolatey.version function

**ISSUE #32183** (llamallama) Salt Cloud 2015.8.8 not installing salt minions on new nodes (refs: #32295)

**PR #32295** (rallytime) Test the contents of `deploy_scripts_search_path` in salt.config.cloud_config @ 2016-04-04 17:38:47 UTC
- edbab9916 Merge pull request #32295 from rallytime/test-cloud-deploy-dir
- 4037476f40 Patch call to os.path.isdir so we know both search paths are in tuple
- 49a44eeec051 Test the contents of `deploy_scripts_search_path` in salt.config.cloud_config

**ISSUE #23617** (porterjamesj) file.managed with proxy broken in 2015.5 (refs: #32315)

**PR #32315** (ahu1) fixing file.managed with requests lib @ 2016-04-04 17:20:11 UTC
- 4389680bc5 Merge pull request #32315 from ahu1/fix_file_managed_http_requests
- a867d23383 ensure streaming mode (use for example by file.managed) will work for requests backend

**ISSUE saltstack/salt-bootstrap#782** (ninjada) Bootstrap and Links & Documentation still broken due to fedora-project redirect to fedorainfracloud.org (refs: #32316)

**ISSUE saltstack/salt-bootstrap#742** (dennisfoconnor) Non-Development Script Broken on Amazon Linux (refs: #32316)

**ISSUE saltstack/salt-bootstrap#695** (ntippett) Install Failures With Raspbian Jessie (refs: #32316)

**PR #32316** (vutny) Update Salt Bootstrap tutorial @ 2016-04-04 17:18:12 UTC
- 9065201761 Merge pull request #32316 from vutny/update-bootstrap-tutorial
- b9698f015d Update Salt Bootstrap tutorial

**PR #32325** (bdrung) Re-add shebang to ssh-id-wrapper shell script @ 2016-04-04 17:08:41 UTC
- 352f3c1d11 Merge pull request #32325 from bdrung/fix-shebang
- ffe585f078 Re-add shebang to ssh-id-wrapper shell script

**PR #32326** (bdrung) Fix typos @ 2016-04-04 16:41:41 UTC
- f16c332b3a Merge pull request #32326 from bdrung/fix-typos
- a7db152333 Fix typo dont -> don't
- d4c037301b Fix typo mismatch -> mismatch
- 70dba70ff0 Fix typo additional -> addition
- 68c60903aa Fix typo multiple -> multiple
- 0f2c779b90 Fix typo function -> function
- 0c9e4c8ec0 Fix typo available -> available
- 920abe2ec7 Fix typo formatted -> formatted
- e56dd4bb23 Fix typo ommitted -> ommitted
- f99e6f1f13 Fix typo output -> output
- d380409f22 Fix typo weather -> whether
- 538fb6fae2 Fix typo performed -> performed

### 28.2. Previous Releases

- 5fb90a1040 Merge pull request #32291 from twangboy/fix_14277
- 53f6a28297 Fix problem with return on installed packages
- f5bd004ab0 Fix chocolatey.version function
– db7af998ee Fix typo sanitized -> sanitized
– d7af01da2b Fix typo corresponding -> corresponding
– 301e78b5be Fix typo vaules -> values
– 8cada9573f Fix typos of retrieve
– b484d69e9 Fix typo directorys -> directories

• PR #32300: (twangboy) Add documentation to disable winrepo/winrepo_ng @ 2016-04-01 21:23:09 UTC
  – 664043d7e7 Merge pull request #32300 from twangboy/fi28767
  – c971a3b054 Add documentation for disabled the winrepos

• ISSUE #18429: (somenick) Pillars passed from command-line override pillar subtrees instead of merging (refs: #32288)

• PR #32288: (terminalmage) use dictupdate.merge instead of dict.update to merge CLI pillar overrides @ 2016-04-01 16:30:30 UTC
  – 42a25f6b9d Merge pull request #32288 from terminalmage/issue18429
  – db31732137 use dictupdate.merge instead of dict.update to merge CLI pillar overrides

• PR #32243: (isbm) Ensure latest pkg.info_installed ensure latest @ 2016-03-31 16:09:59 UTC
  – 3e374e7ec6 Merge pull request #32243 from isbm/isbm-zypper-list-installed-ensure-latest
  – fba3d509ac Fix the documentation
  – 73ad8a2bfc Fix lint
  – f07c7ea792 Add lowpkg tests for version comparison
  – afdf451d87 Remove tests from the zypper_test that belongs to rpm_test
  – 3706a21c29 Fix condition from returning None on 0
  – 0a68ebf16 Remove susredhat checks, refactor code.
  – 30c8f7216b Move "string to EVR" function to the utilities
  – fb014a40b0 Sort installed pkgs data by version_cmp
  – b57e439d57 Merge yumpkg's and zypper's version_cmp for a common use
  – ebd13a283c Remove version_cmp from Zypper module and use just lowpkg alias
  – b46d5b526a Remove version_cmp from the yumpkg and use just a lowpkg alias
  – f4d9881e61 Force-sort the RPM output to ensure latest version of the multi-package on top of the list.

• ISSUE #32261: (arthurlogilab) dockerng : AttributeError: 'module' object has no attribute 'version_info' (refs: #32262, #32268)

• PR #32268: (ticosax) [dockerng] Improve detection for older versions of docker-py @ 2016-03-31 14:51:46 UTC
  – PR #32262: (arthurlogilab) Catch Attribute Error when docker.version_info doesn't exist (refs: #32268)
  – 88fa3c5f71 Merge pull request #32268 from ticosax/handle-dockerpy-old
  – 05116aaa40 Improve detection for older versions of docker-py

• PR #32258: (jacobhammons) Replaces incorrect reference to master_alive_check @ 2016-03-31 14:41:09 UTC
  – a491897a3b Merge pull request #32258 from jacobhammons/alive-interval-docs
  – ff8ca5ac2e Replaces incorrect reference to master_alive_check with master_alive_interval in docs
• PR #32254: (twangboy) Fix Display Name with spaces in win_servermanager @ 2016-03-31 14:38:22 UTC
  - 8c68d8ac41 Merge pull request #32254 from twangboy/fix_31334
  - e5f02c52be Fix a pylint error
  - 5ca4ad6675 Fix unit tests for state
  - 12d530f8f0 Fix win_servermanager state
  - b26cb76abb Fix unit tests
  - 1d5bcee390 Fix 31344

• PR #32248: (rallytime) [2015.8] Merge forward from 2015.5 to 2015.8 @ 2016-03-30 21:10:01 UTC
  - 0f5e67de5d Merge pull request #32248 from rallytime/merge-2015.8
  - d743f8cc4e Merge branch '2015.5' into '2015.8'
    * 5d08db7c92 Merge pull request #32162 from terminalmage/issue31963
      - 5c1db812c Fix pkgrepo integration test
      - e7f3095ce Properly handle yum/zypper repositories in pkgrepo.managed
      - add2111fec Use six.iteritems instead of dict.items
      - 6c21881c38 Docstring tweaks
      - ecb878649 Remove useless function
      - 06d320952 Normalize variable naming to match other functions
      - 690537ca8b Look for apt-add-repository in PATH instead of assuming it's there
      - 709d80bb1b aptpkg: Accept **kwargs instead of a dict for pkg.expand_repo_def
    * 4fcdab428 Merge pull request #32223 from twangboy/fix_31976
      - b7fca97ce Create minion.d directory, fixes #31976
    * 3309ff6a29 Merge pull request #32218 from cachedout/issue_31501
      - 6795d6aef0 Only display error when tty is True in salt-ssh
    * 6e0cb22c96 Merge pull request #32196 from jtaand/cherrypy_pam_test_lint_fix
      - bd3942e0fd Fixed pylint error in app_pam_test.py

• ISSUE #32169: (sknutsonsf) CommandNotFoundError: update-rc.d during service.enabled on Centos 7 (refs: #32230)

• PR #32230: (terminalmage) systemd.py: Support both update-rc.d and chkconfig as managers of sysv services @ 2016-03-30 21:09:43 UTC
  - 6216c37885 Merge pull request #32230 from terminalmage/issue32169
  - 45a3e902a systemd.py: Support both update-rc.d and chkconfig as managers of sysv services

• PR #32249: (jacobhammons) Fixes windows download paths to account for patch @ 2016-03-30 20:26:53 UTC
  - bde21fc98 Merge pull request #32249 from jacobhammons/dot8
  - 50d1df2482 Fixes windows download paths to account for patch

• PR #32221: (dmurphy18) Fix version check, fix extracting Major and Minor versions from __ver... @ 2016-03-30 14:50:31 UTC
  - 1d9321d043 Merge pull request #32221 from dmurphy18/fixed_version_check
- 96cf024e63 Fix version check, fix extracting Major and Minor versions from __version__

- **ISSUE #32031**: (travispaul) Unable to manage Windows services that contain a space in the service name (refs: #32227)
- **PR #32227**: (twangboy) Remove list2cmdline usage from win_service.py @ 2016-03-30 14:43:17 UTC
  - 22bd1e0b29 Merge pull request #32227 from twangboy/fix_32031
  - 58772b036d Remove list2cmdline usage

- **ISSUE #32239**: (anlutro) Add state file name to warning log line @ 2016-03-30 14:37:54 UTC
  - 7fce438b67 Merge pull request #32239 from alprs/fix-file_log_warning
  - 72adae3702 add state file name to log line

- **PR #32215**: (DmitryKuzmenko) rhel oscodename @ 2016-03-29 19:14:50 UTC
  - 3c3028f347 Merge pull request #32215 from DSRCcompany/issues/rhel_oscodename
  - dc2a3b81ac Ignore lsb codename from os-release for newest RHEL

- **PR #32217**: (jacobhammons) 2015.8.8.2 release notes @ 2016-03-29 17:53:22 UTC
  - bf59f06733 Merge pull request #32217 from jacobhammons/dot8
  - 59644e2b4 2015.8.8.2 release notes Adds banner notifying user when they are viewing release notes for an old release

- **ISSUE #32193**: (gravyboat) Ordering States documentation should note top.sls adheres to this rule (refs: #32193)
  - **PR #32211**: (rallytime) Back-port #32210 to 2015.8 @ 2016-03-29 15:50:42 UTC
    - **PR #32210**: (rallytime) Merge #32193 with pylint fix (refs: #32211)
    - **PR #32193**: (twellspring) Documentation fix issue 31931 (refs: #32210, #32211)
      - 200d82cc3e Merge pull request #32210 from rallytime/bp-32210
      - 7b9c05487c Whitespace fix.
      - abd432746c documentation-fix-31931
      - 79086f8f04 service.py documentation update for 32084

- **ISSUE #32084**: (guettli) Docs: Please provide a link from "service.running" to "watch" (refs: #32192)
  - **PR #32209**: (rallytime) Back-port #32208 to 2015.8 @ 2016-03-29 15:50:27 UTC
    - **PR #32208**: (rallytime) Merge #32192 with pylint fix (refs: #32209)
    - **PR #32192**: (twellspring) service.py documentation update for 32084 (refs: #32208, #32209)
      - 32da8d4c57 Merge pull request #32209 from rallytime/bp-32208
      - 777a2c4e83 Whitespace fix.
- e3db0640ec service.py documentation update for 32084

- ISSUE #31595: (dverbeek84) dockerng ports specified in Dockerfile must be in sls file otherwise salt gives an error (refs: #32204)

- PR #32204: (ticosax) [dockerng] Consider labels carried by the image when comparing user defined labels. @ 2016-03-29 14:39:22 UTC
  - 7154104591 Merge pull request #32204 from ticosax/label-from-image
  - e989ae5a7e Merge user defined labels with one carried by the image

- PR #32186: (rallytime) Add some "best practices" information to test documentation @ 2016-03-29 00:22:48 UTC
  - 5877a19f59 Merge pull request #32186 from rallytime/testing-docs
  - 40d9c822e Add some "best practices" information to test documentation

- PR #32176: (rallytime) [2015.8] Merge forward from 2015.5 to 2015.8 @ 2016-03-28 23:16:09 UTC
  - b44adffc12 Merge pull request #32176 from rallytime/merge-2015.8
  - e8656897a6 Pylint fix for integration import
  - 527bc3e491 Pylint fix
  - e9abd2d420 Merge branch '2015.5' into '2015.8'
  - 6b88b851c0 Merge pull request #32154 from Ch3LL/ch3ll_pam_2015.5
    - ba605b0128 fix more pylint and add ability to close cherrypy engine
    - 2d4dc4da05 add teardown call
    - d115878714 fix pylint error
    - 4c1ab082b6 add pam salt-api tests
  - 230443be6c Merge pull request #32170 from gtmanfred/lxc_cloud_name
    - eb7d82e7be add name for lxc for use with cloud cache
  - 32b0421a34 Merge pull request #32164 from terminalmage/issue31731-2015.5
    - 18439c4f89 Make __virtual__ for rhservice.py more robust (2015.5 branch)
  - 6212e9aa56 Merge pull request #32141 from paclat/issue_32108
    - 72c5d12d43 fixes 32108

- ISSUE #27605: (jmcook1) nacl module documentation/possible bug (refs: #32163)

- PR #32163: (rallytime) Update nacl.config docs to use key value instead of 'None' @ 2016-03-28 14:46:40 UTC
  - 1ab048801 Merge pull request #32163 from rallytime/fix-27605
  - e2d90f57dc Update nacl.config docs to use key value instead of 'None'

- PR #32166: (vutny) salt.states.file: correct examples with multiline YAML string @ 2016-03-28 14:45:32 UTC
  - c08ba3f8a9 Merge pull request #32166 from vutny/fix-multilineline-yaml-string-example
  - 34aae93b4 Another indentation fix in salt.states.alternatives
  - 85d0576583 salt.states.file: correct examples with multiline YAML string

- PR #32168: (rallytime) Lint 2015.8 @ 2016-03-27 18:26:50 UTC
  - f2e986cf05 Merge pull request #32168 from rallytime/lint-2015.8

28.2. Previous Releases 5411
- ba6b19d72c Lint 2015.8

- **ISSUE #31731**: (sjorge) `rh_service` references `osrelease` before it is available, also does not return bool (refs: #32165)

- **PR #32165**: (terminalmage) Make `__virtual__` for `rhservice.py` more robust (refs: #32164) @ 2016-03-27 18:21:16 UTC
  - **PR #32164**: (terminalmage) Make `__virtual__` for `rhservice.py` more robust (2015.5 branch) (refs: #32165)
  - ae472617af Merge pull request #32165 from terminalmage/issue31731
  - 559eb7da52 Make `__virtual__` for `rhservice.py` more robust

- **ISSUE #31944**: (Inveracity) traceback in `_determine_beacon_config(...)` in `beacon/__init__.py` line 105 (refs: #32160)

- **PR #32160**: (cachedout) Fix beacon tutorial docs @ 2016-03-25 22:32:51 UTC
  - 63c8bf3542 Merge pull request #32160 from cachedout/issue_31944
  - 104ada5b6f Fix beacon tutorial docs

- **PR #32145**: (paclat) fixes 29817 (refs: #32332) @ 2016-03-25 16:55:47 UTC
  - 245249d347 Merge pull request #32145 from paclat/issue_29817
  - 41ba309839 Change the kwarg names to be more specific
  - 40f7e596d8 Pass eauth user/groups through salt-api to destination functions

- **PR #32133**: (basepi) Pass eauth user/groups through salt-api to destination functions @ 2016-03-25 16:49:46 UTC
  - 41ba309839 Change the kwarg names to be more specific
  - 40f7e596d8 Pass eauth user/groups through salt-api to destination functions

- **PR #32127**: (rallytime) Add runners to `__salt__` docs @ 2016-03-25 15:54:02 UTC
  - a09aa18036 Merge pull request #32127 from rallytime/dunder-docs
  - 482690ef33 Add note to docs about `__salt__` referencing runner modules
  - a11d2e413a Add runners to `__salt__` docs

- **ISSUE #30183**: (jakehilton) Minion startup extremely delayed when first master in failover multi master setup is down (refs: #31364, #31382, #32143)

- **PR #32143**: (DmitryKuzmenko) Set auth retry count to 0 if multimaster mode is failover. @ 2016-03-25 15:23:09 UTC
  - cc224db877a Merge pull request #32143 from DSRCompany/issues/30183_failover_fix
  - 93d34a2573 Set auth retry count to 0 if multimaster mode is failover.

- **PR #32134**: (rallytime) [2015.8] Merge forward from 2015.5 to 2015.8 @ 2016-03-25 15:22:08 UTC
  - 0679a61871 Merge pull request #32134 from rallytime/merge-2015.8
  - 6886681410 Fix test failures
  - 7554df0f42d Merge branch '2015.5' into '2015.8'
    - bdd7ea89d5 Merge pull request #32129 from terminalmage/issue32044
      - 34ca1ea12e Change type check errors to debug loglevel
• 5462081488 Support multiple valid option types when performing type checks
  • c42014eb54 Merge pull request #32056 from bstevenson/fix-list_absent
  • 1500aae027 set deleted value to list
  • 1dc8f5f289 unit test update
  • 39ad86fec Fixed negation logic
  • be9388173b Removed has_key in lieu of in
  • e48593ed81 Comments and Changes output fixes
  • b98f5517de Updated to conform to proper ret values
  • d18b4be80b remove whitespace end of line 186:q
  • d2b89c85ad fix formating
  • 103cee9e29 cleaned up formating
  • 7a4d7f0bff added whitespace
  • 8ea5b545b0 Loop through list values in list_absent
  • 848ce5647f Merge pull request #32096 from rallytime/bp-32065
  • 36a9d6a374 Fix an issue with the minion targeting example
  • 9b332d48b9 Merge pull request #32104 from jacobhammons/dot10
    • b9fc882a1e One additional known issue for 2015.5.10 release notes
  • ff51d548e1 Merge pull request #32100 from jacobhammons/dot10
    • 544a1661ce 2015.5.10 release docs
  • 72a20f9799 Merge pull request #32038 from terminalmage/issue32037
    • 8b2d983324 Add reference to state tutorial to state.apply docstring
    • 9b4fe8443e Move highstate usage details to top of state.apply docstring
    • 74ee8c54bc Clarify prior role of state.highstate in states tutorial
    • 1b97e4a3df Improve state module docs, replace references to state.highstate/state.sls with state.apply

• ISSUE #26129: (GreatSnoopy) salt yumpkg implementation painfully slow in some circumstances (refs: #32091)

• PR #32091: (clarkperkins) Fixed the regression in 410da78 @ 2016-03-25 14:53:08 UTC
  • ad924226ca Merge pull request #32091 from clarkperkins/bugfix/yumpkg-repoquery
  • d2119ea608 Added comment so this issue doesn’t regress again
  • 1455fab9e3 Fixed the regression in 410da78

• ISSUE #32044: (ScoreUnder) Multiple masters throwing warnings? "Key master with value [...] has an invalid type of list, a str is required for this value" (refs: #32129)

• PR #32135: (rallytime) [2015.8] Support multiple valid option types when performing type checks @ 2016-03-24 22:42:28 UTC
  • PR #32129: (terminalmage) Support multiple valid option types when performing type checks (refs: #32135, #32284)
  • b84908d51f Merge pull request #32135 from rallytime/32129-to-2915.8
- 7d43bdd721 Change type check errors to debug loglevel
- ed5abf4381 Support multiple valid option types when performing type checks

**PR #31760:** (sakateka) SMinion need wait future from eval_master @ 2016-03-24 22:08:56 UTC
- b23a0f3f3 Merge pull request #31760 from sakateka/fix_master_switch
- 3d7874029a Run self.eval_master in self.io_loop.run_sync
- 3b4425652b SMinion need wait future from eval_master

**PR #32106:** (jfindlay) update suse master service patch @ 2016-03-24 21:34:01 UTC
- 5efe37ddc8 Merge pull request #32106 from jfindlay/suse_patch
- 8de84b4251 update suse master service patch

**PR #32130:** (jacobhammons) Added known issues 32004 and 32044 to 2015.8.8 release notes @ 2016-03-24 19:59:41 UTC
- 939c1c17d5 Merge pull request #32130 from jacobhammons/dot8
- 21eee08842 Added known issues 32004 and 32044 to 2015.8.8 release notes

**PR #32105:** (clarkperkins) Fixed invalid deploy_scripts_search_path @ 2016-03-24 17:27:04 UTC
- 5a9f4e947e Fixed invalid deploy_scripts_search_path

**ISSUE #32114:** (tomlaredo) Wrong validation type for file_ignore_glob key (refs: #32117)

**PR #32117:** (tomlaredo) Fixed validation type for file_ignore_glob @ 2016-03-24 17:28:22 UTC
- fe4112d7f9 Merge pull request #32117 from rodacom/fix_32114
- c6f83ba00b Fixed validation type for file_ignore_glob Fixes #32114

**PR #32113:** (sakateka) Fix log message for AsyncAuth initialization @ 2016-03-24 17:27:04 UTC
- 7114b77ab Fix log message for AsyncAuth initialization

**ISSUE #32033:** (timcharper) SaltStack modules.dockerng _compare does not handle docker implicit Domain-name properly (issue when using network_mode: host) (refs: #32116, #32432)

**PR #32116:** (ticosax) Obtain default value of memory_swap from the container. @ 2016-03-24 15:56:54 UTC
- 294177f428 Merge pull request #32116 from ticosax/memory_swap-default-from-container
- fe439db4d3 Obtain default value of memory_swap from the container.

**PR #32098:** (rallytime) Back-port #32083 to 2015.8 @ 2016-03-23 21:49:01 UTC
- **PR #32083:** (guettli) "Fire Event Notifications" moved down (refs: #32098)
- d5bb86f372 Merge pull request #32083 from rallytime/bp-32083
- 4a3a6629ce "Fire Event Notifications" moved down

**PR #32099:** (jacobhammons) 2015.8.8 release docs @ 2016-03-23 20:02:40 UTC
- e45107ce96 Merge pull request #32099 from jacobhammons/dot8
- 8ec5d989ad 2015.8.8 release docs

**PR #32088:** (rallytime) [2015.8] Merge forward from 2015.5 to 2015.8 @ 2016-03-23 17:52:37 UTC
- 9e11f3aac5 Merge pull request #32088 from rallytime/merge-2015.8
- 59c3b7e82e Merge branch '2015.5' into '2015.8'
- 908a7bf5cd Merge pull request #32051 from terminalmage/fix-state-apply-output
  * 7d7cb45565 Fix outputer for state.apply
- 0e66f78d4 Merge pull request #32002 from abednarik/pkg_manjaron_issue31788
  * 1b052d0a66 Added Manajro Linux to virtual. List extended with ManajaroLinux in order su load pacman module.
- ba5bf62c1a Merge pull request #31957 from rallytime/merge-2015.5
  * 1b6ec5d445 Merge branch '2014.7' into '2015.5'
    - ba73dee4e6 Merge pull request #31929 from twangboy/fix_build_script
    - 2c5599d2bc Backport build script from 2015.8
    - ce74991dd0 Fix nsi script to work with new build process
- a52e3ad7a1 Merge pull request #31972 from terminalmage/zh-584
  * 1e5639e495 Make lack of python-ldap module more explicit when LDAP eauth is enabled
  - PR #32074: (Xiami2012) Fix code for proto args in modules.iptables @ 2016-03-23 16:37:58 UTC
    - bc9a899bc8 Merge pull request #32074 from Xiami2012/fixed_iptables
    - aae3af7e49 Fix code for proto args in modules.iptables
  - PR #32053: (basepi) [2015.8] Fix rabbitmq_user.present tag handling @ 2016-03-22 20:33:51 UTC
    - 3e08dd0a93 Merge pull request #32053 from basepifix_rabbitmq
    - 95c08f55e9 Tear out useless unit test
    - bed048e1e7 Remove leftover arg (lint)
    - 08868cb32a Fix tag handling code for rabbitmq_user.present
    - 3b6d25b4e9 Remove leading whitespace on tags
  - ISSUE #32004: (sjorge) win_dacl module stacktrace: NameError: name 'ntsecuritycon' is not defined (refs: #32023)
  - PR #32023: (sbreidba) Move constant declaration into member variable to avoid issues when m... @ 2016-03-21 20:18:23 UTC
    - 553ecaca25 Merge pull request #32023 from sbreidba/bugfix_32004
    - 711a0a9844 Move constant declaration into member variable to avoid issues when modules can't be loaded.
  - PR #32026: (techhat) Don't require the decode_out file to already exist @ 2016-03-21 20:17:05 UTC
    - 65c634d197 Merge pull request #32026 from techhat/decodeout
    - f27da41b71 Don't require the decode_out file to already exist
  - PR #32019: (rallytime) Back-port #32012 to 2015.8 @ 2016-03-21 15:54:31 UTC
    - PR #32012: (jfray) There were two identical blocks concerning Windows Deploy Timeouts. This (refs: #32019)
      - 1d4246fd7 Merge pull request #32019 from rallytime/bp-32012
      - 26ee1505f There were two identical blocks concerning Windows Deploy Timeouts. This pull request removes the extra block of text.
• ISSUE #32013: (timcharper) SaltStack dockerng.running state ports configuration responding to Docker's injection of UDP params (refs: #32015)

  – 9f9c694654 log.mixins: remove extemporaneous .record

### 28.2.76 Salt 2015.5.0 Release Notes - Codename Lithium

The 2015.5.0 feature release of Salt is focused on hardening Salt and mostly on improving existing systems. A few major additions are present, primarily the new Beacon system. Most enhancements have been focused around improving existing features and interfaces.

As usual the release notes are not exhaustive and primarily include the most notable additions and improvements. Hundreds of bugs have been fixed and many modules have been substantially updated and added.
Warning: In order to fix potential shell injection vulnerabilities in salt modules, a change has been made to the various `cmd` module functions. These functions now default to `python_shell=False`, which means that the commands will not be sent to an actual shell.

The largest side effect of this change is that "shellisms", such as pipes, will not work by default. The modules shipped with salt have been audited to fix any issues that might have arisen from this change. Additionally, the `cmd` state module has been unaffected, and use of `cmd.run` in jinja is also unaffected. `cmd.run` calls on the CLI will allow shellisms.

However, custom execution modules which use shellisms in `cmd` calls will break, unless you pass `python_shell=True` to these calls.

As a temporary workaround, you can set `cmd_safe: False` in your minion and master configs. This will revert the default, but is also less secure, as it will allow shell injection vulnerabilities to be written in custom code. We recommend you only set this setting for as long as it takes to resolve these issues in your custom code, then remove the override.

Note: Starting in this version of salt, `pillar_opts` defaults to `False` instead of `True`. This means that master opts will not be present in minion pillar, and as a result, `config.get` calls will not include master opts.

We recommend pillar is used for configuration options which need to make it to the minion.

Beacons

The beacon system allows the minion to hook into system processes and continually translate external events into the salt event bus. The primary example of this is the `inotify` beacon. This beacon uses inotify to watch configured files or directories on the minion for changes, creation, deletion etc.

This allows for the changes to be sent up to the master where the reactor can respond to changes.

Sudo Minion Settings

It is now possible to run the minion as a non-root user and for the minion to execute commands via sudo. Simply add `sudo_user: root` to the minion config, run the minion as a non-root user and grant that user sudo rights to execute `salt-call`.

Lazy Loader

The Lazy Loader is a significant overhaul of Salt’s module loader system. The Lazy Loader will lazily load modules on access instead of all on start. In addition to a major performance improvement, this "sandboxes" modules so a bad/broken import of a single module will only affect jobs that require accessing the broken module. (issue: 20274)
Enhanced Active Directory Support

The eauth system for LDAP has been extended to support Microsoft Active Directory out of the box. This includes Active Directory and LDAP group support for eauth.

Salt LXC Enhancements

The LXC systems have been overhauled to be more consistent and to fix many bugs.
This overhaul makes using LXC with Salt much easier and substantially improves the underlying capabilities of Salt’s LXC integration.

Salt SSH

- Additional configuration options and command line flags have been added to configure the scan roster on the fly
- Added support for `state.single` in `salt-ssh`
- Added support for `publish.publish`, `publish.full_data`, and `publish.runner` in `salt-ssh`
- Added support for `mine.get` in `salt-ssh`

New Windows Installer

The new Windows installer changes how Salt is installed on Windows. The old installer used bbfreeze to create an isolated python environment to execute in. This made adding modules and python libraries difficult. The new installer sets up a more flexible python environment making it easy to manage the python install and add python modules.

Instead of frozen packages, a full python implementation resides in the bin directory (`C:\salt\bin`). By executing `pip` or `easy_install` from within the Scripts directory (`C:\salt\bin\Scripts`) you can install any additional python modules you may need for your custom environment.

The .exe’s that once resided at the root of the salt directory (`C:\salt`) have been replaced by .bat files and should function the same way as the .exe’s in previous versions.

The new Windows Installer will not replace the minion config file and key if they already exist on the target system. Only the salt program files will be replaced. `C:\salt\conf` and `C:\salt\var` will remain unchanged.

Removed Requests Dependency

The hard dependency on the requests library has been removed. Requests is still required by a number of cloud modules but is no longer required for normal Salt operations.

This removal fixes issues that were introduced with requests and salt-ssh, as well as issues users experienced from the many different packaging methods used by requests package maintainers.
Python 3 Updates

While Salt does not YET run on Python 3 it has been updated to INSTALL on Python 3, taking us one step closer. What remains is getting the test suite to the point where it can run on Python 3 so that we can verify compatibility.

RAET Additions

The RAET support continues to improve. RAET now supports multi-master and many bugs and performance issues have been fixed. RAET is much closer to being a first class citizen.

Modified File Detection

A number of functions have been added to the RPM-based package managers to detect and diff files that are modified from the original package installs. This can be found in the new pkg.modified functions.

Reactor Update

Fix an infinite recursion problem for runner/wheel reactor jobs by passing a ”user” (Reactor) to all jobs that the reactor starts. The reactor skips all events created by that username -- thereby only reacting to events not caused by itself. Because of this, runner and wheel executions from the runner will have user ”Reactor” in the job cache.

Misc Fixes/Additions

- SDB driver for etcd. (:issue: 22043)
- Add only_upgrade argument to apt-based pkg.install to only install a package version if the package is already installed. (Great for security updates!)
- Joyent now requires a keyname to be specified in the provider configuration. This change was necessitated upstream by the 7.0+ API.
- Add args argument to cmd.script_retcode to match cmd.script in the cmd module. (:issue: 21122)
- Fixed bug where TCP keepalive was not being sent on the defined interval on the return port (4506) from minion to master. (:issue: 21465)
- LocalClient may now optionally raise SaltClientError exceptions. If using this class directly, checking for and handling this exception is recommended. (:issue: 21501)
- The SAuth object is now a singleton, meaning authentication state is global (per master) on each minion. This reduces sign-ins of minions from 3->1 per startup.
- Nested outputer has been optimized, it is now much faster.
- Extensive fileserver backend updates.
Deprecations

• Removed parameter keyword argument from `eselect.exec_action` execution module.
• Removed runas parameter from the following `pip` execution module functions: `install, uninstall, freeze, list_, list_upgrades, upgrade_available, upgrade`. Please migrate to `user`.
• Removed runas parameter from the following `pip` state module functions: `installed, removed, upgrade`. Please migrate to `user`.
• Removed quiet option from all functions in `cmdmod` execution module. Please use `output_loglevel=quiet` instead.
• Removed parameter argument from `eselect.set_state`. Please migrate to `module_parameter` or `action_parameter`.
• The `salt_events` table schema has changed to include an additional field called `master_id` to distinguish between events flowing into a database from multiple masters. If `event_return` is enabled in the master config, the database schema must first be updated to add the `master_id` field. This alteration can be accomplished as follows:

  ```sql
  ALTER TABLE salt_events ADD master_id VARCHAR(255) NOT NULL;
  ```

Known Issues

• In multi-master mode, a minion may become temporarily unresponsive if modules or pillars are refreshed at the same time that one or more masters are down. This can be worked around by setting 'auth_timeout' and 'auth_tries' down to shorter periods.

28.2.77 Salt 2015.5.1 Release Notes

release 2015-05-20

Version 2015.5.1 is a bugfix release for 2015.5.0.

Statistics

• Total Merges: 203
• Total Issue References: 30
• Total PR References: 177
• Contributors: 49 (Arabus, Lothiraldan, Snergster, TaiSHiNet, The-Loeki, UtahDave, aboe76, ahus1, basepi, bastiaanb, bradhurber, cachedout, cellscape, corywright, cro, dennisjac, dmyerscough, galet, garethgreenaway, gladiatr72, gtmanfred, iggy, ionutbalutoiu, jacobhammons, jayeshka, jfindlay, joejulian, jpic, justinta, kaidokert, kaithar, kiorky, lisa2lisa, msciciel, nleib, notpeter, optix2000, rahulhan, rallytime, rubic, ryan-lane, s0undt3ch, slimu3d, steverweber, techhat, terminalmage, ticosax, twangboy, whiteinge)
Cloud Runner Changes

The fun argument to the cloud.action runner has changed to func. Please update any calls to this runner.

  - PR #23897: (kiorky) Lxc seed and prof ports (refs: #23898)
  - PR #23808: (kiorky) Lxc seed and prof ports (refs: #23807, #23897)
  - PR #23807: (kiorky) Lxc profiles (refs: #23898)
• **ISSUE #23900**: (hashi825) salt ubuntu network building issue 2015.5.0 (refs: #23922)

• **PR #23922**: (garethgreenaway) Fixes to debian_ip.py @ 2015-05-19 18:50:53 UTC
  - b818f72dce Merge pull request #23922 from garethgreenaway/23900_2015_5_bonding_interface_fixes
  - db3a536d6d Fixing issue reported when using bonded interfaces on Ubuntu. Attributes should be bond-,
    but the code was attempting to split just on bond_. Fix accounts for both, but the debian_ip.py module
    will write out bond attributes with bond-

• **PR #23925**: (jpic) Fixed wrong path in LXC cloud documentation @ 2015-05-19 18:23:56 UTC
  - PR #23924: (jpic) Fixed wrong path in LXC cloud documentation (refs: #23925)
  - b1c98a38ed Merge pull request #23925 from jpic/fix/wrong_lxc_path
  - a4bcd75171 Fixed wrong path in LXC cloud documentation

• **PR #23894**: (whiteinge) Add __all__ attribute to Mock class for docs @ 2015-05-19 17:17:35 UTC
  - 7f6a716a8a Merge pull request #23894 from whiteinge/doc-mock__all__
  - 6ecca46158 Add __all__ attribute to Mock class for docs

• **ISSUE #23767**: (chrimi) Salt system.locale fails on non existent default locale (refs: #23884)

• **PR #23884**: (jfindlay) Fix locale.set_locale on debian @ 2015-05-19 15:51:22 UTC
  - 8108a9bd19 Merge pull request #23884 from jfindlay/fix_locale
  - 91c2d51400 use append_if_not_found in locale.set_locale
  - e63260391c (re)generate /etc/default/locale

• **PR #23866**: (jfindlay) backport #23834, change portage.dep.strip_empty to list comprehension @ 2015-05-19 15:50:43 UTC
  - PR #23834: (Arabus) Avoid deprecation warning from portage.dep.strip_empty() (refs: #23866)
  - 6bae12fa88 Merge pull request #23866 from jfindlay/flag_strip
  - aa032ccfaf replace portage.dep.strip_empty() with list comprehension
- 7576872280 Proper replacement for portage.dep.strip_empty() with list comprehension, pep8fix
- 2851a5cf13 Switch portage.dep.strip_empty(...) to filter(None,...) to avoid deprecation warning and do essentially the same

- **ISSUE #23904** (mbrgm) Network config bonding section cannot be parsed when attribute names use dashes (refs: #23917)

- **PR #23917**: (corywright) Split debian bonding options on dash instead of underscore @ 2015-05-19 15:44:35 UTC
  - a67a008913 Merge pull request #23917 from corywright/issue23904
  - c068cf831 Split debian bonding options on dash instead of underscore

- **PR #23909**: (jayeshka) 'str' object has no attribute 'capitalized' @ 2015-05-19 15:41:53 UTC
  - e8fcd0994d Merge pull request #23909 from jayeshka/file-exe-module
  - e422d9d200 'str' object has no attribute 'capitalized'

- **PR #23903**: (garethgreenaway) Adding docs for missing schedule state module parameters. @ 2015-05-19 06:29:34 UTC
  - c73bf38927 Merge pull request #23903 from garethgreenaway/missing_docs_schedule_state
  - acd8ab9e1d Adding docs for missing schedule state module parameters.
  - a56697bd6e Merge branch '2015.5' of https://github.com/saltstack/salt into 2015.5

  - 280abdec7c adding sysbench unit test case

• PR #23843: (The-Loeki) Fix erroneous virtual:physical core grain detection @ 2015-05-18 15:24:22 UTC
  - 060902fefa Merge pull request #23843 from The-Loeki/patch-1
  - 9e2cf606eb Fix erroneous virtual:physical core grain detection

• ISSUE #23815: (Snertgster) [beacons] inotify errors on subdir creation (refs: #23816)
• ISSUE #23685: (Snertgster) inotify beacon on file. 'change' event to reactor to reset file to known state will cause loop (refs: #23816)
• PR #23816: (Snertgster) Doc for #23685 Added prereq, caution, and additional mask information @ 2015-05-18 15:18:03 UTC
  - 3257a9bead Merge pull request #23816 from Snertgster/23685-doc-fix
  - 0fca49d52a Added prereq, caution, and additional mask information

• PR #23832: (ahu1) make saltify provider use standard boostrap procedure @ 2015-05-18 02:18:29 UTC
  - PR #23829: (ahu1) make saltify provider use standard bootstrap procedure (refs: #23832)
  - 3dfb85090 Merge pull request #23832 from ahu1/ahu1_saltify_bootstrap_2015.5
  - f5b17347f2 fixing problem in unit test
  - cba47f6856 make saltify to use standard bootstrap procedure, therefore providing all options like maste_2sign_pub_file

• PR #23791: (optix2000) Psutil compat @ 2015-05-16 04:05:54 UTC
  - 8ec4fb2a73 Merge pull request #23791 from optix2000/psutil_compat
  - 5470cf58db Fix pylint errors and sloppy inline comments
  - 64634b6349 Update psutil.pid_list to use psutil.pids
  - 5dd6d69192 Fix imports that aren’t in __all__
- 8a1da33ada Fix test cases by mocking psutil_compat
- 558798df1f Fix net_io_counters deprecation issue
- 8140f92ba8 Override unnecessary pylint errors
- 7d02ad4f06 Fix some of the mock names for the new API
- 9b3023e851 Fix overloaded getters/setters. Fix line lengths
- 180eb87a46 Fix whitespace
- f8ed72f98 Use new psutil API in ps module
- e48982ff9c Fix version checking in psutil_compat

- 93ee411fd5 Create compatibility psutil. psutil 3.0 drops 1.0 API, but we still support old psutil versions.

- **PR #23782:** (terminalmage) Replace "command -v" with "which" and get rid of spurious log messages @ 2015-05-16 04:03:10 UTC
  - 405517be8b Merge pull request #23782 from terminalmage/issue23772
  - 0f6f239052 More ignore_retcode to suppress spurious log msgs
  - b4c48e62ea Ignore return code in lxc.attachable
  - 08658c0177 Replace "command -v" with "which"

- **PR #23783:** (basepi) [2015.5] Merge forward from 2014.7 to 2015.5 @ 2015-05-15 21:38:51 UTC
  - cb2eb401f3 Merge pull request #23783 from basepi/merge-forward-2015.5
  - 9df51caf28 __opts__.get
  - d9af0c3e82 Merge pull request #23488 from cellscape/lxc-cloud-fixes
    - 64250a67e5 Remove profile from opts after creating LXC container
    - c4047d2a71 Set destroy=True in opts when destroying cloud instance
    - 9e1311a7cd Store instance names in opts when performing cloud action
    - 934bc57c73 Correctly pass custom env to lxc-attach
    - 7fb85f7be1 Preserve test=True option in cloud states
    - 9771b9a313 Fix detection of absent LXC container in cloud state
    - fb24f0cf02 Report failure when failed to create/clone LXC container
    - d9aa2bb97 Avoid shadowing variables in lxc module
    - 792e1021f2 Allow to override profile options in lxc.cloud_init_interface
    - 42b64b9b3 Return changes on successful lxc.create from salt-cloud
    - 4409eab83 Return correct result when creating cloud LXC container
    - 377015c881 Issue #16424: List all providers when creating salt-cloud instance without profile
  - 808bbe1cb2 Merge pull request #23748 from basepi/salt-ssh.roster.host.check
    - 808bbe1cb2 Log entire exception for render errors in roster
    - 753de6a621 Log render errors in roster to error level
    - e01a7a90b3 Always let the real YAML error through
- 72cf360255 Merge pull request #23731 from twangboy/fix_22959
  - 88e5495b2d Fixes #22959: Trying to add a directory to an unmapped drive in windows
- 2610195262 Merge pull request #23730 from rallytime/bp-23729
  - 1877caeba adding support for nested grains to grains.item
- 3e9df883d6 Merge pull request #23688 from twangboy/fix_23415
  - 6a91169baf Fixed unused-import pylint error
  - 5e25b3f355 fixed pylint errors
  - 1a9676626f Added inet_pton to utils/validate/net.py for ip.set_static_ip in windows
- PR #23781: (jfindlay) fix unit test mock errors on arch @ 2015-05-15 19:40:07 UTC
  - 982f87316d Merge pull request #23781 from jfindlay/fixture_tests
  - 14c711eeb3 fix unit test mock errors on arch
- ISSUE #23566: (rks2286) Salt-cp corrupting the file after transfer to minion (refs: #23740)
- PR #23740: (jfindlay) Binary write @ 2015-05-15 18:10:44 UTC
  - 916b1c4f7c Merge pull request #23740 from jfindlay/binary_write
  - 6269304a4e5 update incorrect comment wording
  - a978f5c091 always use binary file write mode on windows
- ISSUE #23682: (chrish42) Pip module requires system pip, even when not used (with env_bin) (refs: #23736)
- PR #23736: (jfindlay) always load pip execution module @ 2015-05-15 18:10:16 UTC
  - 348645ec65 Merge pull request #23736 from jfindlay/pip
  - b8867a8c23 update pip tests
  - 040bbd42d2 only check pip version in one place
  - 6c453a52a2 check for executable status of bin_env
  - 3337257833 always load the pip module as pip could be anywhere
- PR #23770: (cellscape) Fix cloud LXC container destruction @ 2015-05-15 17:38:59 UTC

28.2.78 Salt 2015.5.10 Release Notes

release 2015-03-22
Version 2015.5.10 is a bugfix release for 2015.5.0.
Security Fix

CVE-2016-3176 Insecure configuration of PAM external authentication service

This issue affects all Salt versions prior to 2015.8.8/2015.5.10 when PAM external authentication is enabled. This issue involves passing an alternative PAM authentication service with a command that is sent to LocalClient, enabling the attacker to bypass the configured authentication service. Thank you to Dylan Frese <dmfrese@gmail.com> for bringing this issue to our attention.

This update defines the PAM eAuth service that users authenticate against in the Salt Master configuration.

No additional fixes are included in this release.

Read Before Upgrading Debian 8 (Jessie) from Salt Versions Earlier than 2015.5.9

Salt systemd service files are missing the following statement in these versions:

```
[Service]
KillMode=process
```

This statement must be added to successfully upgrade on these earlier versions of Salt.

Changelog for v2015.5.9..v2015.5.10

- 69ba1de71d Remove ability of authenticating user to specify pam service

28.2.79 Salt 2015.5.11 Release Notes

release 2015-07-22

Version 2015.5.11 is a bugfix release for 2015.5.0.

  - PR #32421: (terminalmage) Ignore Raspbian in service.py __virtual__

• ISSUE #1409: (twinshadow) module/network.py: Interfaces do not list multiple addresses

• ISSUE saltstack/salt#28262: (palica) FreeBSD pkgng provider raising error for minion (refs: #32376)

• ISSUE #28262: (palica) FreeBSD pkgng provider raising error for minion (refs: #32399, #32376)

• PR #32399: (amontalban) Backport to fix #28262 for 2015.5 as requested in PR #32376 @ 2016-04-06 22:48:23 UTC
  - PR #32376: (amontalban) Fixes saltstack/salt#28262 (refs: #32399)
  - a3686d7db Merge pull request #32399 from amontalban/2015.5
  - e1fbd615a Fixes saltstack/salt#28262 for 2015.5 branch

• ISSUE #32066: (guettli) Proxmox docs outdated (refs: #32374)

• PR #32374: (cachedout) Update proxmox documentation @ 2016-04-05 22:25:16 UTC
  - 3f03c5fc9 Merge pull request #32374 from cachedout/issue_32066
  - 62389d1d1a Update proxmox documentation

• PR #32339: (Ch3LL) remove reference to master_alive_check in 2015.5 @ 2016-04-04 20:39:24 UTC
  - 8578089beb Merge pull request #32339 from Ch3LL/fix_doc_multi-master
  - 2774a288d remove reference to master_alive_check

• ISSUE #32044: (ScoreUnder) Multiple masters throwing warnings? "Key master with value [...] has an invalid type of list, a str is required for this value" (refs: #32129)

• PR #32284: (rallytime) Audit config.py default types and values @ 2016-04-02 02:00:38 UTC
  - PR #32129: (terminalmage) Support multiple valid option types when performing type checks (refs: #32284)
  - fbdc47cc55 Merge pull request #32284 from rallytime/config-audit
Don't be so explicit. Just use string_types.

Use six.string_types in config default tuples

Audit config.py default types and values - first sweep

**ISSUE #32301:** (terminalmage) pkg.latest_version returns inaccurate version when blank "Release" param set in package metadata (refs: #32302)

**PR #32302:** (terminalmage) Properly support packages with blank "Release" param in pkg.latest_version @ 2016-04-01 22:13:27 UTC

- 0a6d44e57b Merge pull request #32302 from terminalmage/fix-missing-release
- 413c371ccd Properly support packages with blank "Release" param in pkg.latest_version

**ISSUE #31963:** (UtahDave) pkgrepo.managed state test=True doesn't actually test if changes need to be made. (refs: #32162)

**PR #32162:** (terminalmage) Properly handle yum/zypper repositories in pkgrepo.managed @ 2016-03-30 17:51:05 UTC

- 5d08db7c92 Merge pull request #32162 from terminalmage/issue31963
- 5c1b8d812c Fix pkgrepo integration test
- e7fd3095ce Properly handle yum/zypper repositories in pkgrepo.managed
- add2111fec Use six.iteritems instead of dict.items
- 6c21881c38 Docstring tweaks
- ecbb78b649 Remove useless function
- 690537ca8b Look for apt-add-repository in PATH instead of assuming it's there
- 709d60b11b aptpkg: Accept **kwargs instead of a dict for pkg.expand_repo_def

**ISSUE #31976:** (moltob) Schedules not persisted on Windows minion (Installer issue) (refs: #32223)

**PR #32223:** (twangboy) Create minion.d directory on install for Windows @ 2016-03-30 14:43:27 UTC

- 4fcdabb428 Merge pull request #32223 from twangboy/fix_31976
- b7fcde97ace Create minion.d directory, fixes #31976

**ISSUE #31501:** (grep4linux) Salt states fail with error 'Failed to return clean data' when using salt-ssh in Amazon EC2 (refs: #32218)

**PR #32218:** (cachedout) Only display error when tty is True in salt-ssh @ 2016-03-29 19:13:44 UTC

- 3309ff6a29 Merge pull request #32218 from cachedout/issue_31501
- 6795d6ae0 Only display error when tty is True in salt-ssh

**PR #32196:** (justinta) Fixed pylint error in app_pam_test.py @ 2016-03-28 23:59:42 UTC

- 6e0cb22c96 Merge pull request #32196 from jjustin/cherrypy_pam_test_lint_fix
- bd3942e0fd Fixed pylint error in app_pam_test.py

**PR #32154:** (Ch3LL) Add integration tests for salt-api using pam eauth @ 2016-03-28 16:06:36 UTC

- PR #31826: (gtmanfred) Remove ability of authenticating user to specify pam service (refs: #32154)
- 6b888b51c0 Merge pull request #32154 from Ch3LL/ch3ll_pam_2015.5
- ba605b0128 fix more pylint and add ability to close cherrypy engine
- 2d4dc4da05 add teardown call
- d115878714 fix pylint error
- 4c1ab082b6 add pam salt-api tests

• PR #32170: (gtmanfred) add name for lxc for use with cloud cache @ 2016-03-28 14:34:16 UTC
  - 230443be6c Merge pull request #32170 from gtmanfred/lxc_cloud_name
  - eb7d82e7be add name for lxc for use with cloud cache

• ISSUE #31731: (sjorge) rh_service references osrelease before it is available, also does not return bool (refs: #32165)
  - PR #32165: (terminalmage) Make __virtual__ for rhservice.py more robust (refs: #32164)

• PR #32164: (terminalmage) Make __virtual__ for rhservice.py more robust (2015.5 branch) (refs: #32165) @ 2016-03-27 18:21:52 UTC
  - 32b0421a34 Merge pull request #32164 from terminalmage/issue31731-2015.5
  - 18439caf89 Make __virtual__ for rhservice.py more robust (2015.5 branch)

• PR #32141: (paclat) fixes 32108 @ 2016-03-25 16:50:59 UTC
  - 6212e9aa56 Merge pull request #32141 from paclat/issue_32108
  - 72c5d12d43 fixes 32108

• ISSUE #32044: (ScoreUnder) Multiple masters throwing warnings? "Key master with value [...] has an invalid type of list, a str is required for this value" (refs: #32129)

• PR #32129: (terminalmage) Support multiple valid option types when performing type checks (refs: #32284) @ 2016-03-24 21:16:29 UTC
  - bdd7ea89d5 Merge pull request #32129 from terminalmage/issue32044
  - 34ca1ea12c Change type check errors to debug loglevel
  - 5462081488 Support multiple valid option types when performing type checks

• ISSUE #32052: (bstevenson) list_absent function doesn’t loop through list of values (refs: #32056)

• PR #32056: (bstevenson) Fix list absent @ 2016-03-24 17:35:00 UTC
  - c42014eb54 Merge pull request #32056 from bstevenson/fix-list_absent
  - 1500ae027 set deleted value to list
  - 1dc85f289 unit test update
  - 39adf86f6c Fixed negation logic
  - be9388173b Removed has_key in lieu of in
  - e4859ed81 Comments and Changes output fixes
  - b98f5517de Updated to conform to proper ret values
  - d18b4be80b remove whitespace end of line 186:q
  - d289c85ad fix formatting
  - 103cee9e29 cleaned up formatting
  - 7a4d7f0bff added whitespace
  - 8ea5b545b0 Loop through list values in list_absent
• PR #32096: (rallytime) Back-port #32065 to 2015.5 @ 2016-03-23 22:01:36 UTC
  - PR #32065: (TheNullByte) Fix an issue with the minion targeting example in docs (refs: #32096)
  - 848ce5647f Merge pull request #32096 from rallytime/bp-32065
  - 36a9d6a374 Fix an issue with the minion targeting example

• PR #32104: (jacobhammons) One additional known issue for 2015.5.10 release notes @ 2016-03-23 21:20:50 UTC
  - 9b332d48b9 Merge pull request #32104 from jacobhammons/dot10
  - b9fc882a1e One additional known issue for 2015.5.10 release notes

• PR #32100: (jacobhammons) 2015.5.10 release docs @ 2016-03-23 20:05:21 UTC
  - ff51d548e1 Merge pull request #32100 from jacobhammons/dot10
  - 544a1661ce 2015.5.10 release docs

• ISSUE #32037: (terminalmage) Increase the visibility of state.apply in Salt’s documentation (refs: #32038)

• PR #32038: (terminalmage) Improve state module docs, replace references to state.highstate/state.sls with state.apply @ 2016-03-23 17:08:02 UTC
  - 72a20f9799 Merge pull request #32038 from terminalmage/issue32037
  - 8b2d983324 Add reference to state tutorial to state.apply docstring
  - 9b4fe8443e Move highstate usage details to top of state.apply docstring
  - 74e8c54bc Clarify prior role of state.highstate in states tutorial
  - 1b97e4a3df Improve state module docs, replace references to state.highstate/state.sls with state.apply

• PR #32051: (terminalmage) Fix outputter for state.apply @ 2016-03-23 16:42:43 UTC
  - 908a7bf5cd Merge pull request #32051 from terminalmage/fix-state-apply-output
  - 7d7cb45565 Fix outputter for state.apply

• ISSUE #31788: (crocket) pkg.installed doesn’t work on Manjaro. (refs: #32002)

• PR #32002: (abednarik) Added Manajro Linux to virtual. @ 2016-03-21 17:55:16 UTC
  - 0e66f678d4 Merge pull request #32002 from abednarik/pkg_manjaron_issue31788
  - 1b052d0a66 Added Manajro Linux to virtual. List extended with ManajaroLinux in order su load pacman module.

• PR #31957: (rallytime) [2015.5] Merge forward from 2014.7 to 2015.5 @ 2016-03-18 15:12:22 UTC
  - ba5bf62c1a Merge pull request #31957 from rallytime/merge-2015.5
  - 1b6ec5d445 Merge branch '2014.7' into '2015.5'
    - ba73deee46 Merge pull request #31929 from twangboy/fix_build_script
      - 2c5599d2bc Backport build script from 2015.8
      - ce74991dd0 Fix nsi script to work with new build process

• PR #31972: (terminalmage) Make lack of python-ldap module more explicit when LDAP eauth is enabled @ 2016-03-18 15:11:59 UTC
  - a52e3ad7a1 Merge pull request #31972 from terminalmage/zh-584
  - 1e5639e495 Make lack of python-ldap module more explicit when LDAP eauth is enabled

• PR #31935: (twangboy) Back port nullsoft build script from 2015.8 @ 2016-03-17 14:54:50 UTC
- 2d1f2a0c2e Merge pull request #31935 from twangboy/fix_build_script2
- 4af8c9dbfc Back port nullsoft build script from 2015.8

**PR #31912:** (jfindlay) log.mixins: remove extemporaneous .record @ 2016-03-16 01:56:46 UTC
- 43240dc56e Merge pull request #31912 from jfindlay/log_mixins
- 9f9c694654 log.mixins: remove extemporaneous .record

**PR #31825:** (justinta) Updated .testing.pylintrc to match newer versions of pylint @ 2016-03-15 18:12:44 UTC
- 440e6dceb0 Merge pull request #31825 from jfindlay/update_pylintrc
- 9a14e02766 Updated beacons/sh.py to work with enumerate()
- 0ecec691a0 Adjusted beacons to work with enumerate better
- f509b4113e Fixed final lint error
- 5945b3f11f Fix and disable pylint errors
- 06a6e6af55 Fixed pylint errors on jboss state and module
- de96db97c8 Fixed more pylint errors, and disabled some more
- c07b0a20b5 Merge branch 'lint_fixes' into update_pylintrc
  * 2e6a152308 Fixed lint error in lxc.py
  * 908ca1a439 Fixed lint error in ssh_py_shim
  * 404c1b50f7 Changed range(len()) to enumerate()
  * 1e13586546 Changed range(len()) to enumerate()
- 9ccc7a9a5 Added more disables
- 9c1aab34e Updated .testing.pylintrc to match newer versions of pylint

**ISSUE #31867:** (damon-atkins) " __virtual__ returned False" is not a clear error message (refs: #31878, #31900)

**PR #31900:** (rallytime) Add "python module" clarification to ps __virtual__ warning. @ 2016-03-15 17:59:35 UTC
- 471c9444a3 Merge pull request #31900 from rallytime/fix-psutil-warning
- 22403d69ae Add "python module" clarification to ps __virtual__ warning.

**ISSUE #31867:** (damon-atkins) " __virtual__ returned False" is not a clear error message (refs: #31878, #31900)

**ISSUE #19659:** (wonderslug) state process.absent is failing on Ubuntu 14.04 because psutil is not installed (refs: #31878)

**PR #31878:** (rallytime) Make sure __virtual__ error message is helpful when psutil is missing @ 2016-03-14 21:31:42 UTC
- c44c1b5e59 Merge pull request #31878 from rallytime/fix-psutil-warning
- 44b29f72a1 Make sure __virtual__ error message is helpful when psutil is missing

**PR #31852:** (rallytime) [2015.5] Merge forward from 2014.7 to 2015.5 @ 2016-03-13 02:47:02 UTC
- 5c592b6768 Merge pull request #31852 from rallytime/merge-2015.5
- 1470de17fa Merge branch '2014.7' into '2015.5'
- 218c902091 Merge pull request #31834 from jfindlay/2014.7
  * 358fdad0c8 add 2014.7.8 release notes

---

28.2. Previous Releases
- a423c6cd04 Merge pull request #31833 from jfindlay/2014.7
  - 6910fcc584 add 2014.7.9 release notes
- c5e7c03953 Merge pull request #31826 from gtmanfred/2014.7
- d73f70ebb2 Remove ability of authenticating user to specify pam service

- **PR #31827:** (gtmanfred) Remove ability of authenticating user to specify pam service @ 2016-03-11 20:40:19 UTC
  - 0cc1d5db03 Merge pull request #31827 from gtmanfred/2015.5
  - 979173b78a Remove ability of authenticating user to specify pam service

- **PR #31810:** (whiteinge) Fix outdated Jinja 'env' variable reference @ 2016-03-11 03:52:21 UTC
  - 8cf0b9eb3d Merge pull request #31810 from whiteinge/saltenv-jinja-var
  - cb72b19240 Fix outdated Jinja 'env' variable reference

- **ISSU #31729:** (brejoc) Creating VM with salt-cloud fails for provider Exoscale (Cloudstack) (refs: #31744)

- **PR #31744:** (brejoc) Fix for AttributeError with libcloud <0.15 @ 2016-03-10 00:15:26 UTC
  - 970ef0e445 Merge pull request #31744 from brejoc/fix-attribute-error-with-older-libcloud/2015.5
  - bb29dc2283 Added version to libcloud depends statement
  - 87f9534fce Added log message with update suggestion for libcloud
  - 72eab406cd Fix for AttributeError with libcloud <0.15

- **ISSU #31666:** (sjorge) salt-call --local pillar.items is overly eager to give data (refs: #31740)

- **PR #31740:** (terminalmage) Assume pillar_opts is False when not specified in masterless mode @ 2016-03-09 22:57:57 UTC
  - df2d23ba5d Merge pull request #31740 from terminalmage/issue31666
  - aea5864cd Fall back to False when pillar_opts not set
  - fe19d77eb4 Add default value for pillar_opts on minion

- **ISSU #31749:** (milan-milo) salt-cloud spitting out error 'AttributeError: 'NoneType' object has no attribute 'pop'' (refs: #31750)

- **ISSU #26162:** (nmadhok) VMware cloud driver create function failing with traceback on latest develop (refs: #26170)

- **PR #31750:** (rallytime) Back-port #26170 to 2015.5 @ 2016-03-09 17:44:14 UTC
  - **PR #26170:** (nmadhok) [Backport] Make sure variable is a dictionary before popping something from it. (refs: #31750)
  - e22f5c0a26 Merge pull request #31750 from rallytime/bp-26170
  - 3c11234a05 Make sure variable is a dictionary before popping something from it.

- **ISSU #30559:** (kaidokert) module.wait does not fail when called state fails (refs: #31689)

- **PR #31689:** (rallytime) Back-port #29467 to 2015.5 @ 2016-03-06 19:26:11 UTC
  - **PR #29467:** (serge-p) Update module.py (refs: #31689)
  - 9162925dd0 Merge pull request #31689 from rallytime/bp-29467
  - 1f8f4cb99b Update module.py

- **PR #31687:** (cachedout) Removed useless GPG tests @ 2016-03-05 00:08:27 UTC
- d7914cdb14 Merge pull request #31687 from cachedout/rm_gpg_test
- 8b00513ebb Removed useless tests

**ISSUE #31619**: (alexxannar) 2015.8.7 pkg installed problem with version parameter (refs: #31660)

**PR #31660**: (terminalmage) Remove epoch from version string if present when installing with yum @ 2016-03-04 20:49:23 UTC
- bd4d12a155 Merge pull request #31660 from terminalmage/issue31619
- da954d7b92 Add integration test for packages with epoch in version
- 4fa7e4defe Move epoch removal
- 290192af56 Remove epoch from version string if present when installing with yum

**PR #31683**: (rallytime) Back-port #31578 to 2015.5 @ 2016-03-04 20:47:41 UTC
- PR #31578: (anlutro) Allow queueing of state runs through saltmod (refs: #31683)
- e33cf456a Merge pull request #31683 from rallytime/bp-31578
- 8fe4678fb7 allow queueing of state runs through saltmod

**ISSUE #31671**: (guettli) Word "Job Cache" does not match (refs: #31682)

**PR #31682**: (cachedout) Add definition of job cache to glossary @ 2016-03-04 20:07:19 UTC
- 27f443895d Merge pull request #31682 from cachedout/cache_meaning
- a75e146125 Add definition of job cache to glossary

**PR #31658**: (rallytime) Add mentioned of Salt’s Coding Style docs to the Contributing docs @ 2016-03-03 22:14:57 UTC
- bd04c964d1 Merge pull request #31658 from rallytime/add-style-to-contrib
- 6b526b8878 Add mentioned of Salt’s Coding Style docs to the Contributing docs

**ISSUE #21932**: (clinta) Salt Coding Style docs should list requirements for salt pylintrc (refs: #31655)

**PR #31655**: (rallytime) Make note of pylint dependencies in docs @ 2016-03-03 18:37:06 UTC
- 10658dffe6 Merge pull request #31655 from rallytime/pylint-docs
- 6e0377d376 Make note of pylint dependencies in docs

**PR #31440**: (cachedout) Set correct type for master_tops config value @ 2016-03-02 21:17:14 UTC
- 6075774a01 Merge pull request #31440 from cachedout/master_tops_type
- f49cc75049 Set correct type for master_tops config value

**ISSUE #31614**: (frizzby) salt.utils.http.query() implementation contradicts its documentation. decode arg (refs: #31622)

**PR #31622**: (jfindlay) doc/topics/tutorials/http: update query decoding docs @ 2016-03-02 18:23:44 UTC
- 6d31b9918f Merge pull request #31622 from jfindlay/query_doc
- 4e48f8c806 doc/topics/tutorials/http: update query decoding docs

**PR #31558**: (cachedout) Don’t stacktrace if ssh binary is not installed with salt-ssh @ 2016-02-29 22:15:44 UTC
- dbf6e0786c Merge pull request #31558 from cachedout/ensure_ssh_installed
- c0c6e0a5f Don’t stacktrace if ssh binary is not installed with salt-ssh
• PR #31521: (terminalmage) salt-ssh: Fix race condition when caching files to build the thin tarball @ 2016-02-29 15:32:22 UTC
  - 060a60fd90 Merge pull request #31521 from terminalmage/issue24753
  - 0d352bb1c6 Add fileclient tests
  - d9370a8041 Update cp module salt-ssh wrapper to use new cachedir param
  - 032049b1d Update the SSH state module wrappers to pass an alternate cachedir
  - 65bdcb3afa Accept and pass through the alternate cachedir when prepping the thin tar
  - c3f7a2f2e5 Add ability to specify an alternate base dir for file caching
• PR #31497: (rallytime) Remove duplicate "timeout" definition in Roster docs @ 2016-02-26 15:01:30 UTC
  - 92f8f89218 Merge pull request #31497 from rallytime/remove-timeout-dup
  - 83e6480d20 Remove duplicate "timeout" definition in Roster docs
• PR #31472: (rallytime) Update contributing docs @ 2016-02-25 16:05:59 UTC
  - da001bcb49 Merge pull request #31472 from rallytime/update-contributing-docs
  - 5871e4d1e0 Update contributing docs
• ISSUE #30183: (jakehilton) Minion startup extremely delayed when first master in failover multi master setup is down (refs: #31382)
• PR #31461: (DmitryKuzmenko) Set auth retry count to 0 if multimaster mode is failover. @ 2016-02-24 17:15:30 UTC
  - PR #31382: (DmitryKuzmenko) Set auth retry count to 0 if multimaster mode is failover (refs: #31461)
  - f35e2dd1d3 Merge pull request #31461 from DSRCCompany/issues/30183_fix_multimaster_failover_2015.5
  - 3d09c3b7a3 Set auth retry count to 0 if multimaster mode is failover.
• ISSUE #31356: (sastorsl) file.copy module with recurse=true and non-existing src dir does not fail and resets dst dir permissions (refs: #31442)
• PR #31442: (sastorsl) Add os.path.exists(src) to file.py, def copy @ 2016-02-23 23:40:03 UTC
  - 26733ce988 Merge pull request #31442 from sastorsl/salt-modules-file.py-copy-check-src
  - 0a4132866d removed lint in the exception string
  - f8b5d498b3 Add os.path.exists(src) to file.py, def copy
• ISSUE #30739: (paclat) manage.present does not work when minion is using localhost (refs: #31441)
• PR #31441: (cachedout) Include localhost minions in presence detection for runner @ 2016-02-23 23:36:59 UTC
  - e480727d27 Merge pull request #31441 from cachedout/issue_30739
  - fccfad1570 Include localhost minions in presence detection for runner
• PR #31416: (carlwgeorge) selinux module documentation fix @ 2016-02-22 21:49:28 UTC
  - 91ff95f093 Merge pull request #31416 from carlwgeorge/selinux_doc_fix
  - 0e6846d72e selinux module documentation fix
• PR #31336: (terminalmage) Improve config validation logging @ 2016-02-22 19:34:24 UTC
  - 7d01979898 Merge pull request #31336 from terminalmage/config-validation-logging
  - 795008bad1 Improve config validation logging
• ISSUE #31369: (sjorge) illumos/solaris/smartos display compacted hwaddrs (refs: #31374)

• PR #31374: (sjorge) fix for #31369 @ 2016-02-22 16:22:21 UTC
  - fed096a29d Merge pull request #31374 from sjorge/solarish_hwaddr
  - bdf2576db missed a .format and messed up the join
  - bbd2fdec96d fix for illumos/solaris hwaddr

• PR #31339: (jacobhammons) changed latest release to 2015.8.7 @ 2016-02-19 00:30:24 UTC
  - 6ee17f905b Merge pull request #31339 from jacobhammons/dot7prev
  - 07120a8d48 changed latest release to 2015.8.7

• PR #31288: (notpeter) Improve salt.states.ssh_known_hosts documentation. @ 2016-02-17 22:09:18 UTC
  - cd3400e67e Merge pull request #31288 from notpeter/ssh_known_hosts_docs
  - 3f573d89a2 Improve salt.states.ssh_known_hosts documentation.

• PR #31183: (heyfife) Fixed named external_ip reservation/re-use code in gce driver. @ 2016-02-17 19:02:27 UTC
  - 875d9925fa Merge pull request #31183 from heyfife/fix-gce-named-static-ip-reservation
  - 26774e2323 Fixed named external_ip reservation/re-use code.

• ISSUE #31001: (toanju) Fedora 23 check installed packages fails (refs: #31032)

• PR #31032: (terminalmage) (2015.5 branch) yumpkg: ensure that dnf-plugins-core >= 0.1.15 is installed @ 2016-02-17 19:02:03 UTC
  - e56c02c0c Merge pull request #31032 from terminalmage/issue31001
  - 42daea4509 yumpkg.py: Remove repoquery usage everywhere but check_db
  - 50b6b1c149 backport salt.utils.pkg.rpm to 2015.5
  - a1ad1499a Move salt.utils.itersplit() to salt.utils.iterargs.split()
  - 5b864b696c Ignore failure to install new enough dnf-plugins-core
  - defe085fd6 Ensure that dnf-plugins-core 0.1.15 is installed

• ISSUE #31174: (sjorge) salt.states.archive.extracted displays incorrect message: (refs: #31176)

• PR #31264: (sjorge) fix if_missing gets appended to dirs list, take III @ 2016-02-17 17:12:25 UTC
  - PR #31250: (sjorge) if_missing append to array as far back as 2014.1 (refs: #31264)
  - PR #31176: (sjorge) if_missing incorrectly appended to directories_created (refs: #31250, #31264)
  - ccc6b774f0 Merge pull request #31264 from sjorge/if_missing-155-fix
  - 545edbf5e1 fix if_missing gets appended to dirs list, take III

• PR #31110: (cachedout) Fixup 30730 @ 2016-02-10 21:37:55 UTC
  - fa3f474de9 Merge pull request #31110 from cachedout/fixup_30730
  - 5bf5848e04 Fixup unit test
  - 5558f68e0a Fixes pylint warnings
  - 56a975ec43 Attempt to fix pylint warnings
  - 55d71be057 Make documentation and code examples consistent with code
  - 1f04fed6f8 Change parameter name from includes to skips
- ccf5e13c7d Adding support for skipHidden in SetInclude
- 4f2d4af2e7 Variable names standardization
- f5917ac1e8 Fixes typo
- 26e5236073 Invert RebootRequired logic
- 8065a7abf6 Add basic documentation and define how the skips parameter works.
- 389fea7508 Change parameter name from includes to skips
- 30e1fe906 Adding support for skipHidden in SetInclude
- 1244ea5be Variable names standardization, consistent if/else logic with states.win_update

- **ISSUE #30900**: (mchugh19) modules/qemu_nbd.py assumes versions of utilities that don’t exist on ubuntu (refs: #30949)

- **PR #30974**: (rallytime) Back-port #30949 to 2015.5 @ 2016-02-08 16:38:46 UTC
  - PR #30949: (techhat) Replace cfdisk with sfdisk (refs: #30974)

28.2.80 Salt 2015.5.2 Release Notes

release 2015-06-10
Version 2015.5.2 is a bugfix release for 2015.5.0.

Statistics

- Total Merges: 112
- Total Issue References: 36
- Total PR References: 145
- Contributors: 49 (Sacro, The-Loeki, YanChii, aboe76, anlutro, awdrius, basepi, cdarwin, cedwards, clan, corywright, cro, djcrabhat, dmyerscough, dr4Ke, fayetted, galet, garethgreenaway, ghost, hazelesque, hvensweeting, jacksonji, jacobhammons, jayeshka, jhq, jfindlay, joesjulian, justinta, kartiksubbarao, kiorky, merll, msteded, neogenix, nicholascapo, nleib, pengyao, pruz, rallytime, randybias, ryan-lane, steverweber, swdream, techhat, terminalmage, thcipriani, thusoy, trevor-h, twangboy, whiteinge)
Changelog for v2015.5.1..v2015.5.2

- **PR #24372**: (rallytime) Add 2015.5.2 release notes @ 2015-06-03 19:30:46 UTC
  - d71d75e2ec Merge pull request #24372 from rallytime/release_notes
  - f5e1a1693 Add 2015.5.2 release notes

- **PR #24346**: (rallytime) Backport #24271 to 2015.5 @ 2015-06-03 18:44:31 UTC
  - PR #24271: (randybias) Fixed the setup instructions (refs: #24346)
  - 76927c9ea1 Merge pull request #24346 from rallytime/bp-24271
  - 04067b6833 Fixed the setup instructions

- **ISSUE #24012**: (jbq) Enabling a service does not create the appropriate rc.d symlinks on Ubuntu (refs: #24013)

- **PR #24345**: (rallytime) Backport #24013 to 2015.5 @ 2015-06-03 18:39:41 UTC
  - PR #24013: (jbq) Fix enabling a service on Ubuntu #24012 (refs: #24345)
  - 4afa03d8e3 Merge pull request #24345 from rallytime/bp-24013
  - 16e0732b50 Fix enabling a service on Ubuntu #24012

- **PR #24365**: (jacobhammons) Fixes for PDF build errors @ 2015-06-03 17:50:02 UTC
  - c3392c246a Merge pull request #24365 from jacobhammons/DocFixes
  - 0fc19026f7 Fixes for PDF build errors

- **ISSUE #22991**: (nicholascapo) npm.installed ignores test=True (refs: #24313)

- **PR #24313**: (nicholascapo) Fix #22991 Correctly set result when test=True @ 2015-06-03 14:49:18 UTC
  - ae681a4db1 Merge pull request #24313 from nicholascapo/fix-22991-npm.installed-test-true
  - ac964cb19 Fix #22991 npm.installed correctly set result on test=True

- **ISSUE #18966**: (bechtoldt) file.serialize ignores test=True (refs: #24312)

- **PR #24312**: (nicholascapo) Fix #18966: file.serialize supports test=True @ 2015-06-03 14:49:06 UTC
  - d57a9a267c Merge pull request #24312 from nicholascapo/fix-18966-file.serialize-test-true
  - e7328e7043 Fix #18966 file.serialize correctly set result on test=True

- **PR #24302**: (jfindlay) fix pkg hold/unhold integration test @ 2015-06-03 03:27:43 UTC
  - 6b694e3495 Merge pull request #24302 from jfindlay/pkg_tests
  - c2db0b1758 fix pkg hold/unhold integration test

- **ISSUE #14021**: (emostar) EC2 doc mentions mount_point, but unable to use properly (refs: #24349)

- **PR #24349**: (rallytime) Remove references to mount_points in ec2 docs @ 2015-06-03 01:54:09 UTC
  - aca8447ced Merge pull request #24349 from rallytime/fix-14021
  - a235b114d7 Remove references to mount_points in ec2 docs

- **PR #24328**: (dr4Ke) Fix state grains silently fails 2015.5 @ 2015-06-02 15:18:46 UTC
  - 88a9976ee6 Merge pull request #24328 from dr4Ke/fix_state_grains_silently_fails_2015.5
  - 8a63d1ebbe fix state grains silently fails #24319
  - ca1af20203 grains state: add some tests
• ISSUE #9772: (s0undt3ch) Delete VM's in a map does not delete them all (refs: #24310)
• ISSUE #24036: (arthurlogilab) [salt-cloud] Protect against passing command line arguments as names for the --destroy command in map files (refs: #24310)
• PR #24310: (techhat) Add warning about destroying maps @ 2015-06-02 03:01:28 UTC
  – 7dcd9bb5de Merge pull request #24310 from techhat/mapwarning
  – ca535a6ff4 Add warning about destroying maps
• PR #24281: (steverweber) Ipmi docfix @ 2015-06-01 17:45:36 UTC
  – 02bf254d6 Merge pull request #24281 from steverweber/ipmi_docfix
  – dd36f2c555 yaml formatting
  – f6dee3047 include api_kg kwarg in ipmi state
  – a7d4e97bb9 doc cleanup
  – 0ded2fdbe8 save more cleanup to doc
  – 08872f2da3 fix name api_key to api_kg
  – 165a387681 doc fix add api_kg kwargs
  – 1ce888784e cleanup docs
• PR #24287: (jfindlay) fix pkg test on ubuntu 12.04 for realz @ 2015-06-01 14:16:37 UTC
  – 73cd2b9ef7 Merge pull request #24287 from jfindlay/pkg_test
  – 98944d8c7f fix pkg test on ubuntu 12.04 for realz
• PR #24279: (rallytime) Backport #24263 to 2015.5 @ 2015-06-01 04:29:34 UTC
  – PR #24263: (cdarwin) Correct usage of import_yaml in formula documentation (refs: #24279)
  – 02017a074c Merge pull request #24279 from rallytime/bp-24263
  – 113eba34ec Correct usage of import_yaml in formula documentation
• ISSUE #24226: (c4urself) iptables state needs to keep ordering of flags (refs: #24277)
• PR #24277: (rallytime) Put a space between after_jump commands @ 2015-06-01 04:28:26 UTC
  – 2ba696d54a Merge pull request #24277 from rallytime/fix_iptables_jump
  – e2d1606b19 Move after_jump split out of loop
  – d14f1307b6 Remove extra loop
  – 42ed5320b6 Put a space between after_jump commands
• PR #24262: (basepi) More dictupdate after #24142 @ 2015-05-31 04:09:37 UTC
  – PR #24142: (basepi) Optimize dictupdate.update and add #24097 functionality (refs: #24262)
  – PR #24097: (kiorky) Optimize dictupdate (refs: #24142)
  – 123eba34cc Merge pull request #24262 from basepi/dictupdatefix
  – 0c4832c0d4 Raise a typeerror if non-dict types
  – be21aaa122 Pylint
  – bb8a6e6cc9 More optimization
  – c933249d1a py3 compat
- ff6b2a781f Further optimize dictupdate.update()
- c73f5ba37c Remove unused valtype

**PR #24269:** (kiorky) zfs: Fix spurious retcode hijacking in virtual @ 2015-05-30 17:47:49 UTC
- 785d9a1bf6 Merge pull request #24269 from makinacorpus/zfs
- 0bf23ce701 zfs: Fix spurious retcode hijacking in virtual

**PR #24257:** (jfindlay) fix pkg mod integration test on ubuntu 12.04 @ 2015-05-29 23:09:00 UTC
- 3d885c04f0 Merge pull request #24257 from jfindlay/pkg_tests
- 950892c02 fix pkg mod integration test on ubuntu 12.04

**ISSUE #23883:** (kaithar) max_event_size seems broken (refs: #24001, #24065)

**ISSUE #23657:** (arthurlogilab) [salt-cloud lxc] NameError: global name '__salt__' is not defined (refs: #23982, #24080)

**PR #24260:** (basepi) Fix some typos from #24080 @ 2015-05-29 22:54:58 UTC
- PR #24080: (kiorky) Lxc consistency2 (refs: #24066, #24260, #23982)
- PR #24066: (kiorky) Merge forward 2015.5 -> develop (refs: #23982)
- PR #24065: (kiorky) continue to fix #23883 (refs: #24066, #24080)
- PR #23982: (kiorky) lxc: path support (refs: #24080)
- 08a10755b3 Merge pull request #24260 from basepi/lxctypos24080
- 0fa1ad3977 Fix another lxc typo
- 669938f28d s/you ll/you'll/

**ISSUE #23883:** (kaithar) max_event_size seems broken (refs: #24001, #24065)

**ISSUE #23657:** (arthurlogilab) [salt-cloud lxc] NameError: global name '__salt__' is not defined (refs: #23982, #24080)

**PR #24080:** (kiorky) Lxc consistency2 (refs: #24066, #24260, #23982) @ 2015-05-29 22:51:54 UTC
- PR #24066: (kiorky) Merge forward 2015.5 -> develop (refs: #23982)
- PR #24065: (kiorky) continue to fix #23883 (refs: #24066, #24080)
- PR #23982: (kiorky) lxc: path support (refs: #24080)
- 75590cf490 Merge pull request #24260 from makinacorpus/lxc_consistency2
- 81f80674a2 lxc: fix old lxc test
- 458f50617b seed: lint
- 96b8d55f14 Fix seed.mkconfig yamlDump
- 76db6b83f4 lxc/applynet: conservative
- ce7096f5b7 variable collision
- 8a8b28d652 lxc: lint
- 458b18b7e6 more lxc docs
- ef1f95231a lxc docs: typos
- d67a43dc1f more lxc docs
- 608da5ef5d modules/lxc: merge resolution
- 27c4689a24 modules/lxc: more consistent comparison
- 07c365a23b lxc: merge conflict spotted
- 999391551c modules/lxc: rework settings for consistency
- ce11d8352e lxc: Global doc refresh
- 61ed2f5e76 clouds/lxc: profile key is conflicting

- ISSUE #24210: (damonnk) salt-cloud vsphere.py should allow key_filename param (refs: #24220)
- PR #24247: (rallytime) Backport #24220 to 2015.5 @ 2015-05-29 21:40:01 UTC
  - PR #24220: (djcrabhat) adding key_filename param to vsphere provider (refs: #24247)
  - da14f3b976 Merge pull request #24247 from rallytime/bp-24220
  - 0b1041dd72 adding key_filename param to vsphere provider
- PR #24254: (rallytime) Add deprecation warning to Digital Ocean v1 Driver @ 2015-05-29 21:39:25 UTC
  - PR #22731: (dmyerscough) Decommission DigitalOcean APIv1 and have users use the new DigitalOcean APIv2 (refs: #24254)
  - 21d6126c34 Merge pull request #24254 from rallytime/add_deprecation_warning_digitalocean
  - cafe37bd8f Add note to docs about deprecation
  - ea0f1e0921 Add deprecation warning to digital ocean driver to move to digital_ocean_v2
- PR #24252: (aboe76) Updated statue spec to 2015.5.1 @ 2015-05-29 21:38:45 UTC
  - dac055dd8b Merge pull request #24252 from aboe76/opensuse_package
  - 0ad617df21 Updated statue spec to 2015.5.1
- PR #24251: (garethgreenaway) Returners broken in 2015.5 @ 2015-05-29 21:37:52 UTC
  - 49e7f8e8a5e Merge pull request #24251 from garethgreenaway/2015_5_returner_brokenness
  - 5df6b52568 The code calling cfg as a function vs treating it as a dictionary and using get is currently backwards causing returners to fail when used from the CLI and in scheduled jobs.
- ISSUE #21498: (rallytime) Clarify Digital Ocean Documentation (refs: #24255)
- PR #24255: (rallytime) Clarify digital ocean documentation and mention v1 driver deprecation @ 2015-05-29 21:37:07 UTC
  - bfb946123e Merge pull request #24255 from rallytime/clarify_digital_ocean_driver_docs
  - 8d51f75aa5 Clarify digital ocean documentation and mention v1 driver deprecation
- PR #24232: (rallytime) Backport #23308 to 2015.5 @ 2015-05-29 21:36:46 UTC
  - PR #23308: (thusoy) Don’t merge: Add missing jump arguments to iptables module (refs: #24232)
  - 41f5756f36 Merge pull request #24232 from rallytime/bp-23308
  - 2733f66449 Import string
  - 9097cca099 Add missing jump arguments to iptables module
- PR #24245: (Sacro) Unset PYTHONHOME when starting the service @ 2015-05-29 20:00:31 UTC
  - a95982c722 Merge pull request #24245 from Sacro/patch-2
  - 6632d06e94 Unset PYTHONHOME when starting the service
- **PR #24121**: (hvnsweeit) deprecate setting user permission in rabbitmq_vhost.present @ 2015-05-29 15:55:40 UTC
  - 1504c76d3a Merge pull request #24121 from hvnsweeting/rabbitmq-host-deprecate-set-permission
  - 2223158e76 deprecate setting user permission in rabbitmq_host.present
- **PR #24179**: (merll) Changing user and group only possible for existing ids. @ 2015-05-29 15:52:43 UTC
  - **PR #24169**: (merll) Changing user and group only possible for existing ids. (refs: #24179)
  - ba02f6509e Merge pull request #24179 from Precis/fix-file-uid-gid-2015.0
  - ee4c9d59ab Use ids if user or group is not present.
- **ISSUE #24147**: (paclat) Syndication issues when using authentication on master of masters. (refs: #24229)
- **PR #24229**: (msteed) Fix auth failure on syndic with external_auth @ 2015-05-29 15:04:06 UTC
  - 9fb066c2c Merge pull request #24229 from msteed/issue-24147
  - 482d1cf64 Fix auth failure on syndic with external_auth
- **PR #24234**: (jayeshka) adding states/quota unit test case. @ 2015-05-29 14:14:27 UTC
  - 19fa43c290 Merge pull request #24234 from jayeshka/quota-states-unit-test
  - c2335600b adding states/quota unit test case.
- **PR #24217**: (jfindlay) disable intermittently failing tests @ 2015-05-29 03:08:39 UTC
  - **PR #23623**: (jfindlay) Fix /jobs endpoint’s return (refs: #24217)
  - **PR #22857**: (jacksont) Fix /jobs endpoint’s return (refs: #23623)
  - e15142c629 Merge pull request #24217 from jfindlay/disable_bad_tests
  - 6b628042c disable intermittently failing tests
- **PR #24199**: (rylan-lane) Various fixes for boto_route53 and boto_elb @ 2015-05-29 03:02:41 UTC
  - ce8e43b774 Merge pull request #24199 from lyft/route53-fix-elb
  - d8d9a7b5b Better unit tests for boto_elb state
  - 62fa214b355 Remove cnames_present test
  - 7b9ae82951 Lint fix
  - b74bd1d143 Various fixes for boto_route53 and boto_elb
- **PR #24142**: (basepi) Optimize dictupdate.update and add #24097 functionality (refs: #24262) @ 2015-05-29 03:00:56 UTC
  - **PR #24097**: (kiorky) Optimize dictupdate (refs: #24142)
  - a43465d235 Merge pull request #24142 from basepi/dictupdate24097
  - 5c6e210c8b Deepcopy on merge_recurse
  - a13c84ade8 Fix None check from #21968
  - 9ef2c64098 Add docstring
  - 8579429314 Add in recursive_update from #24097
  - 8599143200 if key not in dest, don’t recurse
  - d8a4b5017 Rename klass to valtype
- **PR #24208**: (jayeshka) adding states/ports unit test case. @ 2015-05-28 23:06:33 UTC
• ISSUE #20635: (dennisjac) 2015.2.0.rc1: zfs errors in log after update (refs: #24219)

• PR #24219: (jfindlay) find zfs without modinfo @ 2015-05-28 21:07:26 UTC
  - d00945fd40 Merge pull request #24219 from jfindlay/zfs_check
  - 15d401907c use the salt loader in the zfs mod
  - 5599b67a46 try to search for zfs if modinfo is unavailable

• PR #24190: (msteed) Fix issue 23815 @ 2015-05-28 20:10:34 UTC
  - 3dc4b85295 Merge pull request #24190 from msteed/issue-23815
  - 086a1a94e8 lint
  - 65de62f852 fix #23815
  - d04e9162de spelling
  - db9f6820b8 add inotify beacon unit tests

• PR #24211: (rallytime) Backport #24205 to 2015.5 @ 2015-05-28 18:28:15 UTC
  - PR #24205: (hazelesque) Docstring fix in salt.modules.yumpkg.hold (refs: #24211)
  - 436634b508 Merge pull request #24211 from rallytime/bp-24205
  - 23284b5d47 Docstring fix in salt.modules.yumpkg.hold

• PR #24212: (terminalmage) Clarify error in rendering template for top file @ 2015-05-28 18:26:20 UTC
  - cc5862ac7e Merge pull request #24212 from terminalmage/clarify-error-msg
  - ca807fb032 Clarify error in rendering template for top file

• ISSUE #23904: (mbrgm) Network config bonding section cannot be parsed when attribute names use dashes (refs: #23917)

• ISSUE #23900: (hashi825) salt ubuntu network building issue 2015.5.0 (refs: #23922)

• PR #24213: (The-Loeki) ShouldFix _- troubles in debian_ip @ 2015-05-28 18:24:39 UTC
  - PR #23922: (garethgreenaway) Fixes to debian_ip.py (refs: #24213)
  - PR #23917: (corywright) Split debian bonding options on dash instead of underscore (refs: #24213)
  - 9825160b1a Merge pull request #24213 from The-Loeki/patch-3
  - a68d515973 ShouldFix _- troubles in debian_ip

• PR #24214: (basepi) 2015.5.1.release @ 2015-05-28 16:23:57 UTC
  - 071751d13f Merge pull request #24214 from basepi/2015.5.1release
  - e5ba31b5b5 2015.5.1 release date
  - 768494c819 Update latest release in docs

• PR #24202: (rallytime) Backport #24186 to 2015.5 @ 2015-05-28 05:16:48 UTC
  - PR #24186: (thcipriani) Update salt vagrant provisioner info (refs: #24202)
  - c2f1f0b244 Merge pull request #24202 from rallytime/bp-24186
  - db793dd0de Update salt vagrant provisioner info
• **PR #24192**: (rallytime) Backport #20474 to 2015.5 @ 2015-05-28 05:16:18 UTC
  - **PR #20474**: (djcrabhat) add sudo, sudo_password params to vsphere deploy to allow for non-root deploys (refs: #24192)
  - 8a085a2592 Merge pull request #24192 from rallytime/bp-20474
  - fd3c783f3e add sudo, sudo_password params to deploy to allow for non-root deploys

• **PR #24184**: (rallytime) Backport #24129 to 2015.5 @ 2015-05-28 05:15:08 UTC
  - **PR #24129**: (pengyao) Wheel client doc (refs: #24184)
  - 7cc535bf4a Merge pull request #24184 from rallytime/bp-24129
  - 722a664797 fixed a typo
  - 565eb46f5 Add cmd doc for WheelClient

• **PR #24183**: (rallytime) Backport #19320 to 2015.5 @ 2015-05-28 05:14:36 UTC
  - **PR #19320**: (clan) add 'state_output_profile' option for profile output (refs: #24183)
  - eb0af70e6b Merge pull request #24183 from rallytime/bp-19320
  - 55db1bf8b5 sate_output_profile default to True
  - 99192703b fix type: statei -> state
  - 0549ca6266 add 'state_output_profile' option for profile output

• **PR #24201**: (whiteinge) Add list of client libraries for the rest_cherrypy module to the top-level documentation @ 2015-05-28 02:12:09 UTC
  - 1b5bf23187 Merge pull request #24201 from whiteinge/rest_cherrypy-client-libs
  - 5f718207ca Add list of client libraries for the rest_cherrypy module
  - 28fc77b6f6 Fix rest_cherrypy config example indentation

• **PR #24195**: (rallytime) Merge #24185 with a couple of fixes @ 2015-05-27 22:18:37 UTC
  - **PR #24185**: (jacobhammons) Fixes for doc build errors (refs: #24195)
  - 3307ec0d9 Merge pull request #24185 from rallytime/merge-24185
  - d8daad9cd7 Merge #24185 with a couple of fixes
  - 634d56ba0 Fixed pylon error
  - 068915d0e Fixes for doc build errors

• **PR #24166**: (jayeshka) adding states/pkgng unit test case. @ 2015-05-27 20:27:49 UTC
  - 7e400bc3d7 Merge pull request #24166 from jayeshka/pkgng-states-unit-test
  - 2234bb0b70 adding states/pkgng unit test case.

• **PR #24189**: (basepi) [2015.5] Merge forward from 2014.7 to 2015.5 @ 2015-05-27 20:26:31 UTC
  - 9fcd79cd4 Merge pull request #24189 from basepi/merge-forward-2015.5
  - 8839e9c22e Merge remote-tracking branch 'upstream/2014.7' into merge-forward-2015.5
  - 9d733187d Merge pull request #24178 from rallytime/bp-24118
    * e2217d0e8 removed deprecated pymongo usage as no longer functional with pymongo > 3.x
  - 3e8e5031b0 Merge pull request #24159 from rallytime/keystone_doc_examples
    * dadac8d076 Fill out modules/keystone.py CLI Examples
- fc10ee8ed5 Merge pull request #24158 from rallytime/fix_doc_error
  - 49a517e2ca Fix test_valid_docs test for tls module
- PR #24181: (justinta) Fixed error where file was evaluated as a symlink in test_absent @ 2015-05-27 18:26:28 UTC
  - 2303dec0e9 Merge pull request #24181 from jtdand/file_test
  - 5f0e601589 Fixed error where file was evaluated as a symlink in test_absent
- PR #24180: (terminalmage) Skip libvirt tests if not running as root @ 2015-05-27 18:18:47 UTC
  - a16276852b Merge pull request #24180 from terminalmage/fix-libvirt-test
  - 72e7416ad2 Skip libvirt tests if not running as root
- PR #24165: (jayeshka) adding states/portage_config unit test case. @ 2015-05-27 17:15:08 UTC
  - 1bcb5256e6 Merge pull request #24165 from jayeshka/portage_config-states-unit-test
  - 8cf1505392 adding states/portage_config unit test case.
- PR #24164: (jayeshka) adding states/pecl unit test case. @ 2015-05-27 17:14:26 UTC
  - 4747856411 Merge pull request #24164 from jayeshka/pecl-states-unit-test
  - 563a5b3c30 adding states/pecl unit test case.
- PR #24160: (The-Loeki) small enhancement to data module; pop() @ 2015-05-27 17:03:10 UTC
  - cd8aa19324 Merge pull request #24160 from The-Loeki/patch-1
  - 2175ff3c75 doc & merge fix
  - eba382cdda small enhancement to data module; pop()
- PR #24153: (techhat) Batch mode sometimes improperly builds lists of minions to process @ 2015-05-27 16:21:53 UTC
  - 4a8dbd7f13 Merge pull request #24153 from techhat/batchlist
  - 467ba4612 Make sure that minion IDs are strings
- PR #24167: (jayeshka) adding states/pagerduty unit test case. @ 2015-05-27 16:14:01 UTC
  - ed8ecf57a2 Merge pull request #24167 from jayeshka/pagerduty-states-unit-test
  - 1af88334d adding states/pagerduty unit test case.
- PR #24156: (basepi) [2015.5] Merge forward from 2014.7 to 2015.5 @ 2015-05-27 15:05:01 UTC
  - b9507d1567 Merge pull request #24156 from basepi/merge-forward-2015.5
  - e52b5ab2e2 Remove stray >>>>>
  - 7dfbd929ff Merge remote-tracking branch 'upstream/2014.7' into merge-forward-2015.5
    - c0d32eb05e Merge pull request #24125 from hvnsweating/fix-rabbitmq-test-mode
      - 71862c69b9 enhance log
      - 28e2594162 change according to new output of rabbitmq module functions
      - cd0212e8ed processes and returns better output for rabbitmq module
    - 39a8f30f06 Merge pull request #24093 from msteed/issue-23464
      - fd35903d75 Fix failing test
      - 41b344c7d3 Make LocalClient.cmd_iter_no_block() not block

28.2. Previous Releases
5bfdf3045e Merge pull request #24008 from davidjb/2014.7
  - 8b8d0293d4 Correct reST formatting for documentation
1aa0420040 Merge pull request #23933 from jacobhammons/2014.7
a3613e68e4 removed numbering from doc TOC
78b737c5e6 removed 2015.* release from release notes, updated index page to remove PDF/epub links
e867f7df77 Changed build settings to use saltstack2 theme and update release versions.

  - 7f08641800 Fixed typo in chown username (ending dot) that fails the command.
• PR #24137: (rallytime) Backport #24105 to 2015.5 @ 2015-05-26 18:23:40 UTC
  - PR #24105: (cedwards) Updated some beacon-specific documentation formatting (refs: #24137)
- e01536d098 Merge pull request #24137 from rallytime/bp-24105
- f0778a0a60 Updated some beacon-specific documentation formatting

**ISSUE #23364:** ([pruiz]) Unable to destroy host using proxmox cloud: There was an error destroying machines:
501 Server Error: Method 'DELETE /nodes/pmx1/openvz/openvz/100' not implemented (refs: #24104)

**PR #24136:** ([rallytime]) Backport #24104 to 2015.5 @ 2015-05-26 15:58:47 UTC
- **PR #24104:** ([pruiz]) Only try to stop a VM if it's not already stopped. (fixes #23364) (refs: #24136)
- 89cfd976e1 Merge pull request #24136 from rallytime/bp-24104
- c5888841f5 Only try to stop a VM if it's not already stopped. (fixes #23364)

**PR #24135:** ([rallytime]) Backport #24083 to 2015.5 @ 2015-05-26 15:58:27 UTC
- **PR #24083:** ([swdream]) fix code block syntax (refs: #24135)
- 67e4373577 Merge pull request #24135 from rallytime/bp-24083
- 1ed0697644 fix code block syntax

**PR #24131:** ([jayeshka]) adding states/mysql_user unit test case @ 2015-05-26 15:58:10 UTC
- a83371e0ed Merge pull request #24131 from jayeshka/mysql_user-states-unit-test
- ed1e69856d adding states/mysql_user unit test case

**PR #24130:** ([jayeshka]) adding states/ntp unit test case @ 2015-05-26 15:57:29 UTC
- 1dcd1d2a65 Merge pull request #24130 from jayeshka/ntp-states-unit-test
- ede44a92f1 adding states/ntp unit test case

**PR #24128:** ([jayeshka]) adding states/openstack_config unit test case @ 2015-05-26 15:56:08 UTC
- 39434179a8 Merge pull request #24128 from jayeshka/openstack_config-states-unit-test
- ca09e0f7c1 adding states/openstack_config unit test case

**PR #24127:** ([jayeshka]) adding states/npm unit test case @ 2015-05-26 15:55:18 UTC
- 23f25c4298 Merge pull request #24127 from jayeshka/npm-states-unit-test
- c3ecabbae0 adding states/npm unit test case

**ISSUE #24009:** ([hvnsweeting]) state_verbose False summary is wrong (refs: #24077)

**PR #24077:** ([anlutro]) Change how state_verbose output is filtered @ 2015-05-26 15:41:11 UTC
- 07488a4415 Merge pull request #24077 from alprs/fix-outputter_highstate_nonverbose_count
- 7790408c6c Change how state_verbose output is filtered

**PR #24119:** ([jfindlay]) Update contrib docs @ 2015-05-26 15:37:01 UTC
- 224820e6bf Merge pull request #24119 from jfindlay/update_contrib_docs
- fa2d411f53 update example release branch in contrib docs
- a0b76b57b3 clarify git rebase instructions
- 3517e0995f fix contribution docs link typos
- 651629c6a4 backport dev contrib doc updates to 2015.5

**PR #23928:** ([joejulian]) Add the ability to replace existing certificates @ 2015-05-25 19:47:26 UTC
- 5488c4aaa2 Merge pull request #23928 from joejulian/2015.5_tls_module_replace_existing
- 4a4cbdd266 Add the ability to replace existing certificates

- **ISSUE #23221**: (Reiner030) Debian Jessie: locale.present not working again (refs: #24078)

- **PR #24078**: (jfindlay) if a charmap is not supplied, set it to the codeset @ 2015-05-25 19:39:19 UTC
  - dd90e09b9 Merge pull request #24078 from jfindlay/locale_charmap
  - 5ebf90f73 if a charmap is not supplied, set it to the codeset

- **PR #24088**: (jfindlay) pkg module integration tests @ 2015-05-25 19:39:02 UTC
  - 9ce53d3ec9 Merge pull request #24088 from jfindlay/pkg_tests
  - f1bd5ec404 adding pkg module integration tests
  - 739b2ef3bd rework yumpkg refresh_db so args are not mandatory

- **ISSUE #24052**: (twangboy) v2015.5.1 Changes the way it interprets the minion_master.pub file (refs: #24144, #24089)

- **PR #24089**: (jfindlay) allow override of binary file mode on windows @ 2015-05-25 19:38:44 UTC
  - 517552ca6 Merge pull request #24089 from jfindlay/binary_write
  - b2259a6370 allow override of binary file mode on windows

- **ISSUE #23973**: (mschiff) state.file.managed: setting contents_pillar to a pillar which is a list throws exception instead giving descriptive error message (refs: #24092)

- **PR #24092**: (jfindlay) collect scattered contents edits, ensure it's a str @ 2015-05-25 19:38:10 UTC
  - 121ab9857 Merge pull request #24092 from jfindlay/file_state
  - cfa0f1358e collect scattered contents edits, ensure it's a str

- **PR #24112**: (The-Loeki) thin_gen breaks when thinver doesn't exist @ 2015-05-25 19:37:47 UTC
  - 84e65dece7 Merge pull request #24112 from The-Loeki/patch-1
  - 34646eae16 thin_gen breaks when thinver doesn't exist

- **PR #24108**: (jayeshka) adding states/mysql_query unit test case @ 2015-05-25 12:30:48 UTC
  - ec509ed27 Merge pull request #24108 from jayeshka/mysql_query-states-unit-test
  - ec50450460 adding states/mysql_query unit test case

- **PR #24110**: (jayeshka) adding varnish unit test case @ 2015-05-25 12:30:21 UTC
  - f2e5d6c2fd Merge pull request #24110 from jayeshka/varnish-unit-test
  - e11989969f adding varnish unit test case

- **PR #24109**: (jayeshka) adding states/mysql_grants unit test case @ 2015-05-25 12:29:53 UTC
  - 4fca2b49ec3 Merge pull request #24109 from jayeshka/mysql_grants-states-unit-test
  - 11a93cb80c adding states/mysql_grants unit test case

- **PR #24028**: (nleib) send a disable message to disable puppet @ 2015-05-25 04:02:11 UTC
  - 6b43c9a8cb Merge pull request #24028 from nleib/2015.5
  - 15f24b22b2 update format of string in disabled msg
  - 7690e5b008 remove trailing whitespaces
  - 56a972034f Update puppet.py
  - 9686391d81 Update puppet.py
- 33f3d68489 send a disable message to disable puppet

- **PR #24100**: (jfindlay) adding states/file unit test case @ 2015-05-24 05:17:54 UTC
  - **PR #23963**: (jayeshka) adding states/file unit test case (refs: #24100)
  - 52c9acafc2 Merge pull request #24100 from jfindlay/merge_23963
  - 7d59deb3d6 adding states/file unit test case

- **ISSUE #21446**: (dpheasant) check for systemd on Oracle Linux (refs: #24098)

- **PR #24098**: (galet) Systemd not recognized properly on Oracle Linux 7 @ 2015-05-24 04:07:31 UTC
  - 0eb9f15d20 Merge pull request #24098 from galet/2015.5
  - 4d6ab21c74 Systemd not recognized properly on Oracle Linux 7

- **PR #24090**: (jfindlay) adding states/mount unit test case @ 2015-05-22 23:02:57 UTC

- **PR #24062**: (jayeshka) adding states/mount unit test case (refs: #24090)
  - 8e04db76de Merge pull request #24090 from jfindlay/merge_24062
  - a81a9225b8 adding states/mount unit test case

- **ISSUE #22574**: (unicolet) error when which is not available (refs: #22806)

- **PR #24086**: (rallytime) Backport #22806 to 2015.5 @ 2015-05-22 21:18:20 UTC
  - **PR #22806**: (jfindlay) use cmd.run_all instead of cmd.run_stdout (refs: #24086)
  - c0079f5dc7 Merge pull request #22806 from rallytime/bp-22806
  - f728f5160 use cmd.run_all instead of cmd.run_stdout

- **PR #24024**: (jayeshka) adding states/mongodb_user unit test case @ 2015-05-22 20:53:19 UTC
  - 09de253373 Merge pull request #24024 from jayeshka/mongodb_user-states-unit-test
  - f31dc921f5 resolved errors
  - d038b1fddb adding states/mongodb_user unit test case

- **ISSUE #23883**: (kaithar) max_event_size seems broken (refs: #24001, #24065)

- **PR #24065**: (kiorky) continue to fix #23883 (refs: #24066, #24080) @ 2015-05-22 18:59:21 UTC
  - bf8d12c56b Merge pull request #24065 from makinacorpus/real23883
  - 028282e01d continue to fix #23883

- **ISSUE #24017**: (arthurlogilab) [salt-cloud openstack] TypeError: unhashable type: 'dict' on map creation (refs: #24029)

- **PR #24029**: (kiorky) Fix providers handling @ 2015-05-22 16:56:06 UTC
  - 429ade00a Merge pull request #24029 from makinacorpus/fixedProviders
  - -412b398b02 Fix providers handling

- **PR #23936**: (jfindlay) remove unreachable returns in file state @ 2015-05-22 16:26:49 UTC
  - a42cccd98 Merge pull request #23936 from jfindlay/file_state
  - ac29c0cdd0 also validate file.recurse source parameter
  - 57f73887fe remove unreachable returns in file state

- **PR #24063**: (jayeshka) removed tuple index error @ 2015-05-22 14:58:20 UTC
- 8b69b41a42 Merge pull request #24063 from jayeshka/mount-states-module
- b9745d5c4f removed tuple index error

**PR #24057:** (rallytime) Backport #22572 to 2015.5 @ 2015-05-22 05:36:25 UTC
- PR #22572: (The-Loeki) Small docfix for GitPillar (refs: #24057)
- 02ac4aa288 Merge pull request #24057 from rallytime/bp-22572
- 49aad8b17 Small docfix for GitPillar

**ISSUE #23088:** (ghost) Segfault when adding a Zypper repo on SLES 11.3 (refs: #24027)

**PR #24040:** (rallytime) Backport #24027 to 2015.5 @ 2015-05-21 23:43:54 UTC
- PR #24027: (ghost) Add baseurl to salt.modules.zypper.mod_repo (refs: #24040)
- 82de059891 Merge pull request #24040 from rallytime/bp-24027
- 37d25d8bc6 Added baseurl as alias for url and mirrorlist in salt.modules.zypper.mod_repo.

**PR #24039:** (rallytime) Backport #24015 to 2015.5 @ 2015-05-21 23:43:25 UTC
- PR #24015: (YanChii) minor improvement of solarisips docs & fix typos (refs: #24039)
- d909781d97 Merge pull request #24039 from rallytime/bp-24015
- 6bfaa94a8c minor improovement of solarisips docs & fix typos

**ISSUE #19598:** (fayetted) ssh_auth.present test=true incorrectly reports changes will be made (refs: #19599)

**PR #24038:** (rallytime) Backport #19599 to 2015.5 @ 2015-05-21 23:43:10 UTC
- PR #19599: (fayetted) Fix ssh_auth test mode, compare lines not just key (refs: #24038)
- 4a0f254d22 Merge pull request #24038 from rallytime/bp-19599
- ea00d3e786 Fix ssh_auth test mode, compare lines not just key

**PR #24046:** (rallytime) Remove key management test from digital ocean cloud tests @ 2015-05-21 22:32:04 UTC
- 42b87f1049 Merge pull request #24046 from rallytime/remove_key_test
- 1d031ca78 Remove key management test from digital ocean cloud tests

**PR #24044:** (cro) Remove spurious log message, fix typo in doc @ 2015-05-21 22:31:49 UTC
- eff54b1c5a Merge pull request #24044 from cro/pgjsonb
- de063314a Remove spurious log message, fix typo in doc

**ISSUE #23883:** (kaithar) max_event_size seems broken (refs: #24001, #24065)

**PR #24001:** (msteed) issue #23883 @ 2015-05-21 20:32:30 UTC
- ac32000b5d Merge pull request #24001 from msteed/issue-23883
- bea97a8b98 issue #23883

**PR #23995:** (kiorky) Lxc path pre @ 2015-05-21 17:26:03 UTC
- f7fae26059 Merge pull request #23995 from makinacorpus/lxc_path_pre
- 319282af5f lint
- 1dc67e5678 lxc: versionadded
- fcad7cb804 lxc: states improvements
- 644bd729f7 lxc: more consistence for profiles
- 139372c055 lxc: remove merge cruft
- 725b0462ca lxc: Repair merge

**Issue** #16383: (Interjection) salt.states.augeas.change example from docs fails with exception (refs: #24032)

**PR #24032: (kartiksubbarao) Update augeas_config.py @ 2015-05-21 17:03:42 UTC**
- 26d6851666 Merge pull request #24032 from kartiksubbarao/augeas_insert_16383
- 3686cd4c7 Update augeas_config.py

**PR #24025: (jayeshka) adding timezone unit test case @ 2015-05-21 16:50:53 UTC**
- 55c9245075 Merge pull request #24025 from jayeshka/timezone-unit-test
- 1ec33e22a7 removed assertion error
- 16ecb28950 adding timezone unit test case

**PR #24023: (jayeshka) adding states/mongodb_database unit test case @ 2015-05-21 16:49:17 UTC**
- e243617659 Merge pull request #24023 from jayeshka/mongodb_database-states-unit-test
- 5a9ac7e8b adding states/mongodb_database unit test case

**PR #24022: (jayeshka) adding states/modjk_worker unit test case @ 2015-05-21 16:48:29 UTC**
- b377bd93e6 Merge pull request #24022 from jayeshka/modjk_worker-states-unit-test
- 05c0a985db adding states/modjk_worker unit test case

**Issue** #23776: (enblde) Presence change events constantly reporting all minions as new in 2015.5 (refs: #24005)

**PR #24005: (msteed) Issue #23776 @ 2015-05-21 01:55:34 UTC**
- 701c51ba7a Merge pull request #24005 from msteed/issue-23776
- 62e67d8ca0 issue #23776

**Issue** #23950: (neogenix) iptables state generates a 0 position which is invalid in iptables cli (refs: #23996)

**PR #23996: (neogenix) iptables state generates a 0 position which is invalid in iptables cli #23950 @ 2015-05-20 22:44:27 UTC**
- 17b7c0b741 Merge pull request #23996 from neogenix/2015.5-23950
- ad417a57c2 fix for #23950

**PR #23994: (rallytime) Skip the gpodder pkgrepo test for Ubuntu 15 - they don't have vivid ppa up yet @ 2015-05-20 21:18:21 UTC**
- 4eb877307c Merge pull request #23994 from rallytime/skip_test_ubuntu_15
- 9e0ec07d85 Skip the gpodder pkgrepo test - they don't have vivid ppa up yet

## 28.2.81 Salt 2015.5.3 Release Notes

**Release** 2015-07-07

Version 2015.5.3 is a bugfix release for 2015.5.0.
Statistics

- Total Merges: 178
- Total Issue References: 69
- Total PR References: 207
-Contributors: 62 (CameronNemo, Lanzaa, Starblade42, The-Loeki, TheScriptSage, aboe76, ahus1, aneeshiba, anlurto, arthurlogilab, basepi, borutmrak, cachedout, cgtx, codertux, cro, dkiser, driskell, eliasp, garethgreenaway, grischa, gthb, heewa, infestdead, jacksontj, jacobhammons, jayeshka, jeanpralo, jfindlay, jodv, joeljliam, justinta, kartiksubbarao, kev009, kiorky, lorengordon, msciciel, msted, nmadhok, notpeter, obestwalter, pengyao, pille, porterjamesj, pruz, quixoten, rallytime, rhertzog, ruzarowski, ryan-lane, steverweber, tankywoo, tbaker57, techhat, terminalmage, thatch45, thenewwazoo, trevor-h, twangboy, varia, zefrog, zhujinhe)

Changelog for v2015.5.2..v2015.5.3

Generated at: 2018-05-27 21:20:01 UTC

- PR #25109: (jfindlay) add 2015.5.3 release notes @ 2015-07-01 19:45:56 UTC
  - f0f512a4da Merge pull request #25109 from jfindlay/2015.5
  - 3187d5d5aa add 2015.5.3 release notes
- PR #25096: (jfindlay) Postgres group test @ 2015-07-01 18:48:26 UTC
  - PR #24330: (jayeshka) adding states/postgres_group unit test case. (refs: #25096)
  - 21709aa483 Merge pull request #25096 from jfindlay/postgres_group_test
  - 3c379dc115 declobber postgres state unit test mocking
  - a162f8a3d8 adding states/postgres_group unit test case.
- ISSUE #25041: (wt) REGRESSION: pillar.get of integer fails to render in sls (refs: #25085)
- PR #25085: (jfindlay) accept all sources in the file state @ 2015-07-01 18:23:45 UTC
  - 0a846400c6 Merge pull request #25085 from jfindlay/fix_file
  - 937a252e16 remove unnecessary file state tests
  - 6f238e924c integration test file.managed sources
  - a5978d50c2 iterate an iterable source othwerise list+str it
- PR #25095: (jfindlay) Win groupadd unit tests @ 2015-07-01 18:18:53 UTC
  - PR #24207: (jayeshka) adding win_groupadd unit test case. (refs: #25095)
  - a98394210e Merge pull request #25095 from jfindlay/win_groupadd_test
  - 564df1d4a depend on win libs rather than mocking them
  - 9b9e6b8628 resolved all erors.
  - aaf89354c0 adding win_groupadd unit test case.
- ISSUE #21520: (jfindlay) sudo.salt_call is broken (refs: #25089)
- PR #25089: (jfindlay) fix minion sudo @ 2015-07-01 15:53:16 UTC
  - PR #20226: (thatch45) Allow sudo priv escalation (refs: #25089)
  - 7c8d2a8656 Merge pull request #25089 from jfindlay/fix_sudo
- d8f91d4a19 add some apprehension to the sudo exec module
- a9269c072a adding sudo exec module docs
- e440b7b8 comment whitespace in minion config
- 44cb167744 adding sudo_user minion config docs
- d461060efe adding sudo_user minion config to default

• ISSUE #24875: (ahammond) ValueError: list.remove(x): x not in list in File "/usr/lib/python2.6/site-packages/salt/cli/batch.py", line 179, in run active.remove(minion) (refs: #25099)

• PR #25099: (driskell) Fix broken batch results @ 2015-07-01 15:51:29 UTC
  - 4d60785d Merge pull request #25099 from driskell/patch-1
  - 59b23e5f6e Fix broken batch results

• PR #25083: (steverweber) ipmi: get_sensor_data would always fail @ 2015-06-30 20:57:21 UTC
  - 4635079b6 Merge pull request #25083 from steverweber/fix_ipmi_stat
  - 836f48c378 include _ in IpmiCommand
  - 817e434591 get_sensor_data would always fail

• PR #25067: (The-Loeki) Fix for maxdepth=0 in find @ 2015-06-30 20:54:06 UTC
  - 15f2a4077c Merge pull request #25067 from The-Loeki/patch-1
  - 61ed3a80 Fix for maxdepth=0 in find

• PR #25078: (terminalmage) Use smaller number for upper limit of mac_user's _first_avail_uid helper function @ 2015-06-30 20:53:24 UTC
  - 58d933cfa8 Merge pull request #25078 from terminalmage/fix-mac-uid
  - df2ab7ee2b Use smaller number for upper limit of mac_user's _first_avail_uid helper function

• ISSUE #24521: (multani) State network.managed fails on Debian (Jessie) (refs: #25045)

• PR #25045: (garethgreenaway) Fixes to debian_ip.py in 2015.5 @ 2015-06-30 17:36:43 UTC
  - ebd66cd412 Merge pull request #25045 from garethgreenaway/24521_debian_networking
  - 6f2a6c940b having proto default to static since it's needed to build the template.

• PR #25065: (loren0gordon) Add download links for 2015.5.1-3 and 2015.5.2 Windows installers @ 2015-06-30 15:29:31 UTC
  - ae31b279cc Merge pull request #25065 from l0ren0gordon/update-windows-installer-links
  - 40a0c132d4 Add download links for 2015.5.1-3 and 2015.5.2, Fixes #25057

• PR #25052: (basepi) [2015.5] Merge forward from 2014.7 to 2015.5 @ 2015-06-30 01:05:00 UTC
  - ddaeb0f8e Merge pull request #25052 from basepi/merge-forward-2015.5
  - 2c5e6f64a58 Merge remote-tracking branch 'upstream/2014.7' into merge-forward-2015.5
  - a7154e7471 Merge pull request #25011 from notpeter/s3_2014.7_backport
    - 8b8af640f6 Add s3 to protocols for remote source_hash

• PR #25038: (jfindlay) versionadded @ 2015-06-29 19:49:27 UTC
  - PR #24747: (msciciel) add get_route function to network module (refs: #25038)
  - c7003d4951 Merge pull request #25038 from jfindlay/versionadded
- d6dc6f97b5 versionadded

- **PR #24747**: (msciciel) add get_route function to network module (refs: #25038) @ 2015-06-29 16:51:43 UTC
  - 28c87cab17 Merge pull request #24747 from msciciel/2015.5
  - 79b4ec2da8 network module lint fix
  - 0b6ef784b2 network module: fix for ipv6
  - f3d184c478 add get_route function to network module

- **PR #24975**: (ryan-lane) Fix update of undefined env var in npm module @ 2015-06-29 16:45:05 UTC
  - 46a96773aa Merge pull request #24975 from lyft/npm-module-fix
  - 6fde58182f Try byte literals rather than unicode strings in the env
  - c8514de334 Fix update of undefined env var in npm module

- **PR #24986**: (heewa) Don’t modify empty change @ 2015-06-29 16:44:17 UTC
  - 9cf8550cd8 Merge pull request #24986 from heewa/fix-pkg-hold-when-errored
  - d47a44ba80 Don’t modify empty change

- **ISSUE #24969**: (bradthurber) salt-cloud 2015.5.0: missing azure dependency results in misleading error (refs: #24999)

- **PR #24999**: (rallytime) Provide a less confusing error when cloud provider is misconfigured @ 2015-06-29 16:43:31 UTC
  - ece897d8d6 Merge pull request #24999 from rallytime/cloud_error_help
  - 1e81a88625 Clean up
  - be19a6730e Provide a less confusing error when cloud provider is misconfigured

- **PR #24987**: (heewa) Don’t try to cache a template when it’s not a file @ 2015-06-29 14:02:59 UTC
  - 4af15cbf90 Merge pull request #24987 from heewa/fix-trying-to-cache-no-file
  - 9ae0e78ff6 Don’t try to cache a template when it’s not a file

- **PR #25022**: (jfindlay) revise label and milestone documentation @ 2015-06-29 13:51:24 UTC
  - 8aeaddbf4 Merge pull request #25022 from jfindlay/label_docs
  - 8575192cc4 revise label and milestone documentation

- **PR #25029**: (jayeshka) adding redismod unit test case. @ 2015-06-29 13:50:33 UTC
  - 89c2e01ac1 Merge pull request #25029 from jayeshka/redismod-unit-test
  - e3045be5a9 adding redismod unit test case.

- **PR #24995**: (rallytime) Fix deprecated pymongo usage causing errors in latest pymongo @ 2015-06-27 22:28:56 UTC
  - PR #24175: (trevor-h) fix deprecated pymongo usage causing errors in latest pymongo (refs: #24995)
  - 642525298c Merge pull request #24995 from rallytime/tops_mongo
  - a3c1063a37 fix deprecated pymongo usage causing errors in latest pymongo

- **ISSUE #24862**: (dkatsanikakis) gpg.import_key returns error after succesfully completed (refs: #24994, #24966)

- **PR #24994**: (garethgreenaway) Another Fix to gpg.py in 2015.5 @ 2015-06-27 22:28:15 UTC
  - e9aa11b68 Merge pull request #24994 from garethgreenaway/2015_5_24862_gpg_import_key
- d2f0d8fa96 variable was referenced before assignment. Just removing the variable and checking the return from distutils.version.LooseVersion directly.

- **PR #24988:** (jayeshka) adding states/supervisord unit test case. @ 2015-06-27 22:24:42 UTC
  - ebd666e5ee Merge pull request #24988 from jayeshka/supervisord-states-unit-test
  - bb0a6d5625 adding states/supervisord unit test case.

- **PR #25007:** (basepi) [2015.5] Merge forward from 2014.7 to 2015.5 @ 2015-06-26 21:28:57 UTC
  - 04873c35b9 Merge pull request #25007 from basepi/merge-forward-2015.5
  - 4980fd547b Merge remote-tracking branch 'upstream/2014.7' into merge-forward-2015.5
  - a11e4c6eaa Merge pull request #24944 from techhat/issue24915
    - 59c3081e49 Double-check main_cloud_config
    - d26a5447ba Merge pull request #24936 from jtand/psutil
      - bdb7a19c36 Fixed ps module to not use depreciated psutil commands

- **PR #25003:** (jacobhammons) Updated man pages @ 2015-06-26 19:13:41 UTC
  - 91a60e198e Merge pull request #25003 from jacobhammons/man-pages
  - cf97a4ab17 Updated man pages

- **PR #25002:** (jacobhammons) sphinx html theme updates @ 2015-06-26 18:39:14 UTC
  - a60a2c4222 Merge pull request #25002 from jacobhammons/doc-announcements
  - f88f344a28 sphinx html theme updates

- **PR #24977:** (rallytime) Only warn about digital ocean deprecation if digital ocean is configured @ 2015-06-25 23:54:46 UTC
  - a791b23ff9 Merge pull request #24977 from rallytime/do_move_warning
  - 6b544227ab Only warn about digital ocean deprecation if digital ocean is configured

- **ISSUE #24862:** (dkatsanikakis) gpg.import_key returns error after successfully completed (refs: #24994, #24966)

- **PR #24966:** (garethgreenaway) Fixes to gpg.py in 2015.5 @ 2015-06-25 19:58:49 UTC
  - a71c1b7c88 Merge pull request #24966 from garethgreenaway/2015_5_24862_gpg_import_key
  - 55eb73b0c9 fixing unit tests.
  - 80c24be4f8 Fixing an issue with the import_key method. Different results depending on which gnupg python module is installed.

- **ISSUE #24846:** (mavenAtHouzz) Memory leak issue in rest_tornado EventListener (refs: #24965)

- **PR #24965:** (jacksontj) Fix memory leak in saltnado @ 2015-06-25 18:48:03 UTC
  - 86221846ac Merge pull request #24965 from jacksontj/2015.5
  - 48b5e1653e pylint
  - 87adea46b0 Fix memory leak in saltnado

- **PR #24948:** (jfindlay) fix some malformed doc links and anchors @ 2015-06-25 15:51:38 UTC
  - 773c4cf8e4 Merge pull request #24948 from jfindlay/doc_links
  - 152a9b2a12 fix some malformed doc links and anchors
• ISSUE #24885: (anlutro) Master config - Directories starting with a dot have the dot stripped when root_dir is . (refs: #24886)

• PR #24886: (anlutro) Be more careful about stripping away root_dir from directory options @ 2015-06-25 15:50:11 UTC
  - 4ebc01e662 Merge pull request #24886 from alprs/fix-root_dir_bug
  - 52caffed3 os.sep is the correct directory separator constant
  - 0e7bf261ad Be more careful about stripping away root_dir from directory options

• PR #24930: (jacksontj) Don't refetch file templates 100% of the time-- Performance optimization for templated files @ 2015-06-24 21:22:47 UTC
  - f52f7e1d20 Merge pull request #24930 from jacksontj/2015.5
  - 5b75346ef Only parse the source if we have one
  - c03a6fa9d1 Add support for sources of managed files to be local
  - 4cf78a0a95 pylint
  - d70914e473 Don't refetch the template 100% of the time-- Performance optimization for templated files

• PR #24935: (basepi) [2015.5] Merge forward from 2014.7 to 2015.5 @ 2015-06-24 18:17:54 UTC
  - 925a4d91ba Merge pull request #24935 from basepi/merge-forward-2015.5
  - 8d8bf3476f Merge remote-tracking branch 'upstream/2014.7' into merge-forward-2015.5
  - eeb05a1b10 Merge pull request #24918 from BretFisher/minion-start-smartos-smf-fix
    - d7bf0c7f Smartos smf minion fix

• ISSUE #24826: (rakai93) rh_service.py: 'int' object has no attribute 'startswith' (refs: #24873)

• PR #24873: (jfindlay) convert osrelease grain to str before str op @ 2015-06-24 16:43:08 UTC
  - 4e8ed0d8ed Merge pull request #24873 from jfindlay/rh_service
  - febe6efab7 convert osrelease grain to str before str op

• PR #24923: (jayeshka) adding states/status unit test case. @ 2015-06-24 15:50:07 UTC
  - 90819f9c37 Merge pull request #24923 from jayeshka/status-states-unit-test
  - baec650674 adding states/status unit test case.

• PR #24902: (cro) Fix minion failover, document same @ 2015-06-24 15:20:43 UTC
  - 2dd24ce71 Merge pull request #24902 from cro/fixfo2
  - 90c73ff446 References to documentation.
  - f0e9204d8b Add references to failover parameters in conf
  - 9da96a8b95 Docs
  - e23140e49 Move comment.
  - b9a756f5 Fix master failover and add documentation for same. Factor in syndics. Syndics will not failover (yet).

• PR #24926: (rallytime) Back-port #22263 to 2015.5 @ 2015-06-24 15:09:40 UTC
  - PR #22263: (cachedout) Prevent a load from being written if one already exists (refs: #24926)
  - 087ee09f46 Merge pull request #24926 from rallytime/bp-22263
- 8c92d9c677 Prevent a load from being written if one already exists

- PR #24900: (rallytime) Back-port #24848 to 2015.5 @ 2015-06-24 15:09:18 UTC
  - PR #24848: (nmadhok) Correcting bash code blocks (refs: #24900)
  - b34a74fe89 Merge pull request #24900 from rallytime/bp-24848
  - d2b5456f5d Correcting bash code blocks

- PR #24899: (rallytime) Back-port #24847 to 2015.5 @ 2015-06-24 15:09:01 UTC
  - PR #24847: (borutmrak) unset size parameter for lxc.create when backing=zfs (refs: #24900)
  - a546e8e326 Merge pull request #24899 from rallytime/bp-24847
  - 1e4ec7a56b unset size parameter for lxc.create when backing=zfs

- PR #24898: (rallytime) Fix bug in docker.loaded (refs: #24899)
  - PR #24845: (porterjamesj) fix bug in docker.loaded (refs: #24898)
  - d4dd8d288d Merge pull request #24898 from rallytime/bp-24845
  - 071049ae7a fix bug in docker.loaded

- ISSUE #24799: (infestdead) Forced remount because options changed when no options changed (glusterfs) (refs: #24839)

- PR #24897: (rallytime) Back-port #24839 to 2015.5 @ 2015-06-24 15:05:35 UTC
  - PR #24839: (infestdead) fix for issue #24799 (refs: #24897)
  - 1650233be9 Merge pull request #24897 from rallytime/bp-24839
  - f3b20d5445 fix for issue #24799

- PR #24891: (jayeshka) adding states/ssh_known_hosts unit test case. @ 2015-06-23 16:46:58 UTC
  - 1650233be9 Merge pull request #24891 from jayeshka/ssh_known_hosts-states-unit-test
  - ef1347f2b3 adding states/ssh_known_hosts unit test case.

- ISSUE #24870: (dkiser) salt-cloud fails on sudo password prompt when using ssh key to auth (refs: #24874)

- PR #24874: (dkiser) Fix for salt-cloud when ssh key used to auth and using sudo. @ 2015-06-22 23:46:08 UTC
  - c32aae96aa Merge pull request #24874 from dkiser/salt-cloud-24870
  - 6c31143b22 Fix key error for the PR to fix #24870.
  - bdcf7d88c1 Fix pylint for #24874.
  - 8f66d193e0 Fix for salt-cloud when ssh key used to auth and using sudo.

- ISSUE #24871: (dkiser) salt-cloud fails to honor 'password' in cloud options before raising an exception (refs: #24880)

- PR #24880: (dkiser) Fix to allow password for salt-cloud to be set outside of a vm specific context. @ 2015-06-22 23:44:59 UTC
  - dda21c0ae Merge pull request #24880 from dkiser/salt-cloud-24871
  - 4f6c035673 Fix to allow password for salt-cloud to be set outside of a vm specific context.

- ISSUE #24852: (pruiz) Fix issue 24851: regular expression so it now matches packages with '.' or '-' at pkg name @ 2015-06-22 20:37:13 UTC
  - 3902b162a9 Merge pull request #24852 from pruiz/issue-24851
• 73adb1df50 Fix regular expression so it now matches packages with `.` or `-` at pkg name.

• PR #24861: (jayeshka) adding states/ssh_auth unit test case. @ 2015-06-22 16:20:01 UTC
  - 6c5b788afd Merge pull request #24861 from jayeshka/ssh_auth-states-unit-test
  - e5d7b0de80 adding states/ssh_auth unit test case.

• ISSUE #23478: (calvinhp) grains.get virtual reports "physical" on bhyve FreeBSD VM (refs: #24824)

• PR #24824: (kev009) Detect bhyve virtual type for FreeBSD guests @ 2015-06-22 15:24:35 UTC
  - 9e3321c18e Merge pull request #24824 from kev009/grains-bhyve-bsd
  - a226097a1 Detect bhyve virtual type for freebsd guests

• ISSUE #24746: (anlutro) state.apply doesn't seem to work (refs: #24795)

• PR #24795: (anlutro) Fix state.apply for salt-ssh @ 2015-06-22 15:23:57 UTC
  - 7b07ef9f44 Merge pull request #24795 from alprs/fix-salt_ssh_state_apply
  - 905840b1fa Fix state.apply for salt-ssh

• PR #24832: (jacksontj) Don't incur a "_load_all" of the lazy_loader while looking for mod_init. @ 2015-06-22 15:17:10 UTC
  - PR #20540: (jacksontj) Loader nomerge: Don't allow modules to "merge" (refs: #24832)
  - PR #20481: (jacksontj) Add submodule support to LazyLoader (refs: #20540)
  - PR #20473: (jacksontj) Add "disabled" support (refs: #20481)
  - PR #20274: (jacksontj) Loader overhaul to LazyLoader (refs: #20473)
  - PR #12327: (jacksontj) Add a LazyLoader class which will lazily load modules (with the given lo... (refs: #20274)
  - 31d4c131e9 Merge pull request #24832 from jacksontj/2015.5
  - cfa7c0a699 pylint
  - be18439736 Don't incur a "_load_all" of the lazy_loader while looking for mod_init.

• ISSUE #14666: (luciddr34m3r) salt-cloud GoGrid exception when using map file (refs: #24811)

• PR #24834: (rallytime) Back-port #24811 to 2015.5 @ 2015-06-19 18:43:49 UTC
  - PR #24811: (rallytime) Add notes to map and gogrid docs -- don't use -P with map files (refs: #24834)
  - 2d8148fb4d Merge pull request #24834 from rallytime/bp-24811
  - e2684ecf0b Add notes to map and gogrid docs -- don't use -P with map files

• PR #24790: (rallytime) Back-port #24741 to 2015.5 @ 2015-06-19 17:25:58 UTC
  - PR #24741: (CameronNemo) Improve Upstart enable/disable handling (refs: #24790)
  - d2ebdb63cf Merge pull request #24790 from rallytime/bp-24741
  - a54245f080 Add missing import
  - 4ce6370d6e salt.modules.upstart: fix lint errors
  - aec53ec32a Improve Upstart enable/disable handling

• PR #24789: (rallytime) Back-port #24717 to 2015.5 @ 2015-06-19 17:17:00 UTC
  - PR #24717: (gthb) virtualenv.managed: document user and no_chown (refs: #24789)
  - 6456e62a43c Merge pull request #24789 from rallytime/bp-24717
• PR #24823: (jayeshka) adding states/splunk_search unit test case. @ 2015-06-19 17:14:12 UTC
  – 0a6c70f062 Merge pull request #24823 from jayeshka/splunk_search-states-unit-test
  – 9831a8cb0 adding states/splunk_search unit test case.
• PR #24809: (jodv) Correctly create single item list for failover master type with string value for master opt @ 2015-06-19 15:22:20 UTC
  – 4c5a708599 Merge pull request #24809 from jodv/single_item_master_list
  – 18cebe77f single item list vs. list of characters
• PR #24802: (basepi) [2015.5] Merge forward from 2014.7 to 2015.5 @ 2015-06-18 20:11:58 UTC
  – ae05e70e94 Merge pull request #24802 from basepi/merge-forward-2015.5
  – 5b7a65d6d9 Merge pull request #19 from twangboy/merge-forward-fixer
  * 98e7e90929 Fixed test failures for Colton
  – b949856ae6 Merge remote-tracking branch 'upstream/2014.7' into merge-forward-2015.5
    * 4281df0f0b Merge pull request #24780 from nmadhow/backport-2014.7-24777
      - c53b0d9a22 Backporting PR #24777 to 2014.7 branch
    * f3c5f2d41 Merge pull request #24769 from msteei/issue-21318
      - f4a09d5cc0 Fix stacktrace in get_cli_returns()
    * 59db24602f Merge pull request #24690 from twangboy/fix_17041
      - 7a015389af Added additional reporting
      - d84ad5d519 Fixed capitalization... Failed and Already
      - e9552455c4 Merge branch '2014.7' of https://github.com/saltstack/salt into fix_17041
      - 144bf2f67 Report powershell output instead of error
  – PR saltstack/salt#24329: (jayeshka) adding states/postgres_database unit test case. (refs: #24798)
• PR #24798: (justinta) Revert "adding states/postgres_database unit test case." @ 2015-06-18 17:56:17 UTC
  – daa76c34e4 Merge pull request #24798 from saltstack/revert-24329-postgres_database-states-unit-test
  – 179e03d93 Revert "adding states/postgres_database unit test case."
• PR #24791: (rallytime) Back-port #24749 to 2015.5 @ 2015-06-18 17:43:15 UTC
  – PR #24749: (obestwalter) add windows specific default for multiprocessing (refs: #24791)
  – 7073a9f850 Merge pull request #24791 from rallytime/bp-24749
  – be4b2b2394 add windows specific default for multiprocessing
• PR #24792: (rallytime) Back-port #24757 to 2015.5 @ 2015-06-18 15:58:35 UTC
  – PR #24757: (cachedout) Fix loader call in pyobjects (refs: #24792)
  – PR #24668: (grischa) enable virtual package names in pyobjects renderer (refs: #24721, #24757)
  – 8c88a8a3b Merge pull request #24792 from rallytime/bp-24757
  – 6c80f0789 Fix loader call in pyobjects
• PR #24768: (jfindlay) fix yum versionlock on RHEL/CentOS 5, disable corresponding test @ 2015-06-18 15:13:12 UTC
- 0f9298263b Merge pull request #24768 from jfindlay/pkg_mod
- 7a26c2b5b9 disable pkg.hold test for RHEL/CentOS 5
- 4c9d39c22 use correct yum versionlock pkg name on centos 5

**ISSUE #24776**: (nmadhok) --static option in salt raises ValueError and has been broken for a very long time (refs: #24777)

**PR #24779**: (nmadhok) Backporting Changes to 2014.7 branch (refs: #24777)

**PR #24778**: (nmadhok) Backporting PR #24777 to 2015.2 branch (refs: #24777) @ 2015-06-18 14:53:04 UTC

**PR #24777**: (nmadhok) Fixing issue where --static option fails with ValueError Fixes #24776 (refs: #24778, #24780)

- 39f088a74c Merge pull request #24778 from nmadhok/backport-2015.2-24777
- ae370163a9 Backporting PR #24777 to 2015.2 branch

**PR #24774**: (zefrog) Fix lxc lvname parameter command @ 2015-06-18 14:49:06 UTC

- 2a4f653f7 Merge pull request #24774 from zefrog/fix-lxc-lvname-param
- 21e0cd4a5e Fixed typo in lxc module: lvname parameter typo
- 283d86ec12 Fixed bug in lxc module: lvname using wrong parameter in cmd

**PR #24782**: (jayeshka) adding states/slack unit test case. @ 2015-06-18 14:33:55 UTC

- fd7339014b Merge pull request #24782 from jayeshka/slack-states-unit-test
- e2b62764a4 adding states/slack unit test case.

**ISSUE #24770**: (jacksontj) Requisite and Requisite_in don't play nice together (refs: #24771)

**PR #24771**: (jacksontj) Always extend requisites, instead of replacing them @ 2015-06-18 14:29:09 UTC

- c9e90af512 Merge pull request #24771 from jacksontj/2015.5
- b1211e5422 Re-enable tests for complex prereq and prereq_in
- 378f68fc36 Only merge when the merge is of requisites

**PR #24766**: (msteed) Remove doc references to obsolete minion opt @ 2015-06-17 21:36:55 UTC

- 5f4ed86f62 Merge pull request #24766 from msteed/undoc-dns_check
- f2a769d35 Remove doc references to obsolete minion opt

**PR #24329**: (jayeshka) adding states/postgres_database unit test case. @ 2015-06-17 19:11:02 UTC

- a407ab7c51 Merge pull request #24329 from jayeshka/postgres_database-states-unit-test
- ee06f1ad57 adding states/postgres_database unit test case.

**ISSUE #24560**: (hydrosine) Documentation missing on parameter (refs: #24632)

**ISSUE #24547**: (dragonpaw) Artifactory docs say module is 'jboss7'. (refs: #24632)

**ISSUE #24375**: (companykitchen-dev) Custom grain won’t sync under any circumstances (refs: #24632)

**ISSUE #24275**: (kartiksubbarao) augeas issue with apache and recognizing changes that have been already made (refs: #24632)

**ISSUE #24163**: (tbaker57) enable_gpu_grains default value confusion (refs: #24632)

**PR #24632**: (jacobhammons) Doc bug fixes @ 2015-06-17 18:40:02 UTC

- 3ff6e5f546 Merge pull request #24632 from jacobhammons/bug-fixes
- 7c52012e31 Fixed typos
- c7cdd416a2 Doc bug fixes
  Refs #24547 Refs #24275 Refs #24375 Refs #24560 Refs #24163
• ISSUE #24198: (ahammond) salt-call event.send doesn't send events from minion (refs: #24607)
• PR #24607: (garethgreenaway) fixes to minion.py @ 2015-06-17 18:16:42 UTC
  - 9995f64428 Merge pull request #24607 from garethgreenaway/2015_5_sending_events_multi_master
  - 8abd3f0ee1 A fix if you have multiple masters configured and try to fire events to the minion. Currently
    they fail silently. Might be the cause of #24198.
• PR #24755: (rallytime) Remove SALT_CLOUD_REQS from setup.py @ 2015-06-17 17:42:25 UTC

  - 68fb5af970 fixing other test
  - ba4f262b9c fixing text for virtual support in pyobjects
  - b349d91a5f enable virtual package names in pyobjects renderer
• ISSUE #21923: (Fluro) Salt cloud not running provisioning script as root (refs: #24718)
• ISSUE #17241: (hasues) Salt-Cloud for vSphere needs additional documentation (refs: #24718)
• PR #24718: (rallytime) Added some missing config documentation to the vsphere driver @ 2015-06-17 03:19:35 UTC
  - 1b9d6895c7 Merge pull request #24718 from rallytime/update_vsphere_docs
  - bfdeb6e18 Added some missing config documentation to the vsphere driver
• PR #24714: (rallytime) Remove cloud-requirements.txt @ 2015-06-17 03:17:04 UTC
  - 64857c706d Merge pull request #24714 from rallytime/remove_cloud_reqs_15
  - 67b796d01e Remove cloud-requirements.txt
• ISSUE #24439: (bechtoldt) Add tornado version to versions report (refs: #24733)
• PR #24733: (msteed) Include Tornado in versions report @ 2015-06-17 03:13:53 UTC
  - 96b1d68cd Merge pull request #24733 from msteed/issue-24439
  - 76cfef05ec Include Tornado in versions report
• PR #24737: (jacksontj) Move AES command logging to trace @ 2015-06-17 01:48:11 UTC
  - a861fe0f4f Merge pull request #24737 from jacksontj/2015.5
  - a4ed41ae82 Move AES command logging to trace
• PR #24724: (basepi) [2015.5] Merge forward from 2014.7 to 2015.5 @ 2015-06-16 22:46:27 UTC
  - 0d2dc6648 Merge pull request #24724 from basepi/merge-forward-2015.5
  - 4641028464 Merge remote-tracking branch 'upstream/2014.7' into merge-forward-2015.5
  - a18dadad71 Merge pull request #24646 from twangboy/fix_24196
    - a208e1d60f Fixed user.present on existing user
• PR #24701: (jayeshka) adding states/selinux unit test case. @ 2015-06-16 15:27:29 UTC
  - 3d33fe7676 Merge pull request #24701 from jayeshka/selinux-states-unit-test
  - 0c136fd9c2 adding states/selinux unit test case.
• PR #24687: (cachedout) Note about minimum worker_threads @ 2015-06-15 20:46:23 UTC
  - 2e287a9e33 Merge pull request #24687 from cachedout/min_worker_threads
  - b7bb7eab2 Note about minimum worker_threads
• PR #24688: (cachedout) Update AUTHORS @ 2015-06-15 20:46:03 UTC
  - 432478cccb7 Merge pull request #24688 from cachedout/update_authors
  - 3f6880e291 Better email
- 6c7b773eae Update AUTHORS

- **ISSUE #22385**: (cachedout) States which require unavailable modules should display the reason (refs: #24649)

- **PR #24649**: (cachedout) Improved error reporting for failed states @ 2015-06-15 16:04:20 UTC
  - 9a2b50d59f Merge pull request #24649 from cachedout/issue_22385
  - b9fe792534 States will now return the reason behind failure if a module could not be loaded

- **PR #24673**: (jayeshka) adding states/schedule unit test case. @ 2015-06-15 15:24:52 UTC
  - 66e9e16753 Merge pull request #24673 from jayeshka/schedule-states-unit-test
  - 54aaaa5f12 adding states/schedule unit test case.

- **ISSUE #24661**: (kartiksubbarao) augeas.change doesn’t support setting empty values (refs: #24663)

- **PR #24663**: (kartiksubbarao) Update augeas_cfg.py @ 2015-06-15 15:18:48 UTC
  - 5eb19c4e4d Merge pull request #24663 from kartiksubbarao/patch-2
  - e18db50e0c Update augeas_cfg.py

- **ISSUE #24583**: (dkiser) salt-cloud keyring password referenced before assignment (refs: #24667)

- **PR #24583**: (dkiser) Fix for #24583 clouds/openstack.py kerying first time succeeds @ 2015-06-14 21:58:58 UTC
  - 4450432161 Merge pull request #24583 from dkiser/fix-cloud-keyring
  - c92c05fac0 fix for #24583 clouds/openstack.py kerying first time succeeds

- **ISSUE #24537**: (kartiksubbarao) alias.present doesn’t update alias values that are substrings of the existing value (refs: #24537)

- **PR #24537**: (kartiksubbarao) Update aliases.py @ 2015-06-13 17:31:42 UTC
  - 4c64ee9d94 Merge pull request #24537 from kartiksubbarao/patch-1
  - d6834749e2 Update aliases.py

- **PR #24659**: (kartiksubbarao) Update aliases.py @ 2015-06-13 17:31:42 UTC
  - 4c64ee9d94 Merge pull request #24659 from kartiksubbarao/patch-1
  - d6834749e2 Update aliases.py

- **PR #24644**: (cro) Merge forward 2014.7->2015.5 @ 2015-06-12 21:31:41 UTC
  - 89eb616c29 Merge pull request #24644 from cro/2014.7-2015.5-20150612
  - 4136dc3160 Merge pull request #24644 from cro/2014.7 to 2015.5
  - b99484fde2 Merge pull request #24643 from cro/saltannounce
    - eb0623d7f Add salt-announce mailing list.
    - d7a9999be1 Fixed comment and uncomment functions in file.py
  - 01092c2337 Merge pull request #24620 from twangboy/fix_24215
    - d7a9999be1 Fixed comment and uncomment functions in file.py

- **PR saltstack/salt#24595**: (tankywoo) fix target rule, remove unneeded quotation mark (refs: #24595)

- **PR #24642**: (basepi) Revert "fix target rule, remove unneeded quotation mark" @ 2015-06-12 20:14:26 UTC
  - b896a0d0e9 Merge pull request #24642 from saltstack/revert-24595-fix-iptables-target
  - 5ff3224ae1 Revert "fix target rule, remove unneeded quotation mark"

- **PR #24628**: (jayeshka) adding states/reg unit test case. @ 2015-06-12 17:29:11 UTC
  - 01092c2337 Merge pull request #24628 from jayeshka/reg_states-unit-test
  - af1bd89ff adding states/reg unit test case.

- **ISSUE #24494**: (arount) Computed comments in jinja states (refs: #24591)
• ISSUE #23359: (BalintSzigeti) init.sls parsing issue (refs: #24591)
• ISSUE #21217: (Colstuwjx) Maybe a bug for jinja render? (refs: #24591)
• PR #24631: (rallytime) Back-port #24591 to 2015.5 @ 2015-06-12 16:54:32 UTC
  – PR #24591: (tbaker57) Add some documentation surrounding Jinja vs yaml comments - (refs: #24631)
  – 5f491f911d Merge pull request #24631 from rallytime/bp-24591
  – f13cd418bc Add extra clarification why jinja comments are needed.
    – 23749718bb Fix typo
    – 6a917471d4 Add some documentation surrounding Jinja comments - refs #24492, #21217, #23359
• PR #24616: (garethgreenaway) additional logging in state.py module @ 2015-06-12 16:25:39 UTC
  – f23f99ec35 Merge pull request #24616 from garethgreenaway/2015_5_logging_disabled_states
  – 4dbf0ef160 Adding some logging statement to give feedback when states, including highstate, are disabled. Useful when running from scheduler.
• PR #24595: (tankywoo) fix target rule, remove unneeded quotation mark @ 2015-06-12 16:23:22 UTC
  – 6dccb04a1 Merge pull request #24595 from tankywoo/fix-iptables-target
  – 10a5160d7c fix target rule, remove unneeded quotation mark
• PR #24604: (jfindlay) fix pkg module integration tests @ 2015-06-12 16:04:26 UTC
  – 8ac3d94785 Merge pull request #24604 from jfindlay/pkg_tests
  – d88822f9d8 fix pkg module integration tests on CentOS 5
  – fb91b40ba0 fix pkg module integration tests on ubuntu 12
• PR #24600: (basepi) [2015.5] Remove __kwarg__ from salt-ssh keyword args @ 2015-06-11 21:35:07 UTC
  – 0ff545c549 Merge pull request #24600 from basepi/salt-ssh.orchestrate.20615
  – 9b55683f6a Remove __kwarg__ from salt-ssh keyword args
• ISSUE #22843: (Xiol) salt-ssh roster doesn’t support integers as host keys (refs: #24608)
• PR #24608: (basepi) [2015.5] Normalize salt-ssh flat roster minion IDs to strings @ 2015-06-11 21:35:07 UTC
  – 832916f49f Merge pull request #24608 from basepi/salt-ssh.flat.roster.integers.22843
  – 381820f051 Normalize salt-ssh flat roster minion IDs to strings
• PR #24605: (basepi) [2015.5] Merge forward from 2014.7 to 2015.5 @ 2015-06-11 19:15:21 UTC
  – 4eb5bb253b Merge pull request #24605 from basepi/merge-forward-2015.5
  – f96c5029bb Merge remote-tracking branch ’upstream/2014.7’ into merge-forward-2015.5
  – d83928af19 Merge pull request #24589 from BretFisher/patch-1
    • 65a11336dc Fixed Mine example for jinja code block
• ISSUE #24457: (ryan-lane) When selecting the version of docs on the docs site, it brings you to the homepage (refs: #24598)
• ISSUE #24250: (jfindlay) have version links on docs page link to that version of the current page (refs: #24598)
• PR #24598: (jacobhammons) 2015.5.2 release changes @ 2015-06-11 17:24:11 UTC
  – e0bb177823 Merge pull request #24598 from jacobhammons/doc-fixes
  – f3f34d6f6 2015.5.2 release changes Refs #24250 Refs #24457
- **ISSUE #20615:** (aurynn) 2014.7.1: salt/states/saltmod using incorrect return dict for orchestrate (refs: #24588)
- **PR #24588:** (basepi) Fixes for saltmod.function for salt-ssh @ 2015-06-11 16:15:21 UTC
  - 26930b45bd Merge pull request #24588 from basepi/salt-ssh.orchestrate.20615
  - 826936ce57 Move documentation into docstring instead of comments
  - de052e7135 Assign 'return' to 'ret' if necessary in saltmod.function
  - 349f89d66 Convert keyword args to key=value strings in salt-ssh
- **PR #24593:** (jayeshka) adding states/redismod unit test case. @ 2015-06-11 15:55:27 UTC
  - 5a21ad152e Merge pull request #24593 from jayeshka/redismod_states-unit-test
  - 3b95744840 adding states/redismod unit test case.

  - bb2fd6a970 Merge pull request #24574 from jacobhammons/19901
  - e2a2946dc7 Refs #19901
- **PR #24577:** (basepi) [2015.5] Merge forward from 2014.7 to 2015.5 @ 2015-06-10 19:46:22 UTC
  - b03166cde3 Merge pull request #24577 from basepi/merge-forward-2015.5
  - e1d45ccf3b Merge remote-tracking branch 'upstream/2014.7' into merge-forward-2015.5
  - d376390f76 Merge pull request #24530 from twangboy/fix_24427
  - 673e1d809e Added missing panel.bmp for installer
- cc50218b01 Start Minion Service on Silent Install

- **ISSUE #24235**: (tomasfejfar) Difference between running from minion and from master (refs: #24571, #24468)

- **PR #24571**: (jacobhammons) Refs #24235 @ 2015-06-10 17:02:18 UTC
  - 3ec457beef Merge pull request #24571 from jacobhammons/24235
  - 8df5d53bb8 Refs #24235

- **PR #24565**: (pille) fix backtrace, when listing plugins @ 2015-06-10 16:33:11 UTC
  - fe07eb5653 Merge pull request #24565 from pille/munin-ignore-broken-symlinks
  - 8511a6c0a6 fix backtrace, when listing plugins

- **PR #24554**: (ryan-lane) Fix yes usage for pecl defaults @ 2015-06-09 23:59:49 UTC
  - 251c8f9f5f Merge pull request #24554 from lyft/pecl-module-fix
  - 56a9cfaf24 Fix yes usage for pecl defaults

- **PR #24535**: (rallytime) Back-port #24518 to 2015.5 @ 2015-06-09 20:06:18 UTC
  - PR #24518: (rallytime) Merge #24448 with Pylint Fixes (refs: #24535)
  - PR #24448: (codertux) Update modules path for operating systems using systemd (refs: #24518)
    - dbd49b4acb Merge pull request #24535 from rallytime/bp-24518
    - fc7519761e Pylint fix
    - 3e08840988 Update modules path for operating systems using systemd

- **PR #24538**: (basepi) [2015.5] Merge forward from 2014.7 to 2015.5 @ 2015-06-09 17:27:20 UTC
  - 485ed3c9f9 Merge pull request #24538 from basepi/merge-forward-2015.5
  - 6a8039d468 Merge remote-tracking branch ‘upstream/2014.7’ into merge-forward-2015.5
  - 6ebc476bb3 Merge pull request #24513 from jquast/2014.7-bugfix-iteritem
    - 2be0180e5e bugfix use of ‘iteritem’ in 2014.7 branch

- **PR #24495**: (jayeshka) adding states/rabbitmq_vhost unit test case. @ 2015-06-09 15:33:23 UTC
  - 73e6388acd Merge pull request #24495 from jayeshka/rabbitmq_vhost_states-unit-test
  - 31889e38eb cosmetic change.
  - cf501cf60d resolved error.
  - 4bb6087722 Merge branch '2015.5' of https://github.com/saltstack/salt into rabbitmq_vhost_states-unit-test
  - 3ad77143a8 adding states/rabbitmq_vhost unit test case.

- **PR #24445**: (jayeshka) adding states/pyrax_queues unit test case. @ 2015-06-09 15:28:45 UTC
  - bf1abccebe Merge pull request #24445 from jayeshka/pyrax_queues_states-unit-test
  - ea27cefb10 adding states/pyrax_queues unit test case.

- **PR #24490**: (aneeshusa) Fix pacman.list_upgrades for new python_shell default. @ 2015-06-09 15:13:16 UTC
  - 0247ed8d10d Merge pull request #24490 from aneeshusa/fix-pacman-list-upgrades
  - 980e1cbe4de Lint fix.
  - dca33f1112 Fix pacman.list_upgrades for new python_shell default.
• PR #24517: (steverweber) small fixes to the ipmi docs @ 2015-06-09 15:10:14 UTC
  - 6268ddb43a Merge pull request #24517 from steverweber/ipmi_doc
  - 6413712844 lint
  - e78eaa9b01 more small fixes to the ipmi docs

• PR #24524: (jayeshka) any() takes list oy tuple. @ 2015-06-09 13:49:42 UTC
  - 3728b3f327 Merge pull request #24524 from jayeshka/rabbitmq_vhost_states-module
  - 01c99ad767 any() takes list oy tuple.

• PR #24482: (eliasp) 'docker.running' needs now the 'image' param. @ 2015-06-09 04:43:04 UTC
  - dd23de885b Merge pull request #24482 from eliasp/2015.5-states.dockerio-docker.running-doc
  - 5de741d626 'docker.running' needs now the 'image' param.

• ISSUE #23503: (jfindlay) salt-ssh fails on CentOS 7 when python-zmq is not installed (refs: #24515)

• PR #24515: (basepi) [2015.5] Add xml library to the salt-thin @ 2015-06-09 04:10:06 UTC
  - 2a727c3f55 Merge pull request #24515 from basepi/susexml23503
  - 078b33eaa6 Add xml library to the thin

• PR #24497: (jayeshka) adding states/rbenv unit test case. @ 2015-06-09 03:56:10 UTC
  - fce998a58b Merge pull request #24497 from jayeshka/rbenv_states-unit-test
  - 79d33a62b adding states/rbenv unit test case.

• PR #24496: (jayeshka) adding states/rabbitmq_user unit test case. @ 2015-06-09 03:55:23 UTC
  - 2bc4b1e6ed Merge pull request #24496 from jayeshka/rabbitmq_user_states-unit-test
  - 7d96f27f91 adding states/rabbitmq_user unit test case.

• PR #24481: (eliasp) Fix typo (licnese → license). @ 2015-06-09 03:30:25 UTC
  - 02a50e6f49 Merge pull request #24481 from eliasp/2015.5-salt.states.powerpath-license_typo
  - 128054bce Fix typo (licnese → license).

• PR #24467: (thenewwazoo) Fix dockerio bound volumes @ 2015-06-09 01:40:23 UTC
  - 5ad3db5fbb Merge pull request #24467 from thenewwazoo/fix-dockerio-bound-volumes
  - db4e3c69b Let's raise an exception if create fails
  - d1d85d6d85 Add logging
  - ddc63f0f30 Fix volume handling when creating containers

• PR #24504: (rallytime) Move vsphere deprecation to 2015.5 @ 2015-06-08 22:43:05 UTC
  - PR #24487: (nmadhok) Deprecating vsphere cloud driver in favor of vmware cloud driver (refs: #24504)
  - d36fd3b38f Merge pull request #24504 from rallytime/move_vsphere_deprecation_2015.5
  - d876555d71 Add Getting Started with VSphere doc to 2015.5
  - b685ebc104 Add vSphere deprecation warnings to 2015.5

• PR #24506: (rallytime) Backport #24450 to 2015.5 @ 2015-06-08 22:42:14 UTC
  - PR #24450: (ruzarowski) Fix salt cli runs with batch-size set (refs: #24506)
  - cb5546085c Merge pull request #24506 from rallytime/bp-24450
PR #24498: (rallytime) Added "CLI Example" to make failing test happy on 2015.5 @ 2015-06-08 15:48:40 UTC
   - 3173fd17ad Merge pull request #24498 from rallytime/fix_doc_failure_fifteen
   - d992ef4777 Added "CLI Example" to make failing test happy on 2015.5

PR #24471: (anlutro) Set up salt-ssh file logging @ 2015-06-08 15:26:49 UTC
   - 3639e411bd Merge pull request #24471 from alprs/fix_salt_ssh_logging
   - 6a11ec87b8 set up salt-ssh file logging

ISSUE #24231: (tarwich) npm.bootstrap (refs: #24469)

PR #24469: (jfindlay) correctly handle user environment info for npm @ 2015-06-08 15:26:02 UTC
   - 551e70f3f8 Merge pull request #24469 from jfindlay/npm_env
   - 8140c96949 update npm's user info envs
   - cb5728c41 add env parameter to npm.uninstall

ISSUE #24268: (tkent-xetus) Ability to specify revision for win_gitrepos undocumented (refs: #24468)

ISSUE #24235: (tomasfejfar) Difference between running from minion and from master (refs: #24571, #24468)

ISSUE #24193: (abng88) Update ext_pillar docs to mention that this feature is supported masterless as well (refs: #24468)

ISSUE #24172: (zhujinhe) Can lists be passed in the pillar on the command line on version 2015.5.0? (refs: #24468)

ISSUE #23211: (lloesche) Document that salt://| escapes special characters in filenames (refs: #24468)

ISSUE #19901: (clinta) State cache is not documented (refs: #24574, #24468)

ISSUE #19801: (ksalman) How are grains static? (refs: #24468)

PR #24468: (jacobhammons) Bug fixes and build errors @ 2015-06-08 15:25:40 UTC
   - 0d9e0c2b8c Merge pull request #24468 from jacobhammons/doc-fixes
   - 1035959549 Appended .0 to version added
   - d45c4ed11f Bug fixes and build errors Refs #23211 Refs #24268 Refs #2435 Refs #24193 Refs #24172 Refs #19901

ISSUE #24318: (favadi) uncaught exception for pkgrepo.absent for invalid PPA (refs: #24465)

PR #24465: (jfindlay) catch exception from softwarerepositories @ 2015-06-08 15:25:19 UTC
   - be6905a45 Merge pull request #24465 from jfindlay/unknown_ppa
   - 19c912866d catch exception from softwarerepositories

ISSUE #24296: (objectx) mount.mount calls file.mkdir with incorrect named argument (refs: #24464)

PR #24464: (jfindlay) fix typo in modules/mount.py @ 2015-06-08 15:25:07 UTC
   - 58d1ea8fe Merge pull request #24464 from jfindlay/file_mkdir
   - 6e8cd44500 fix typo in modules/mount.py

ISSUE #24434: (dkiser) multimaster failover fails due to logic from issue #23611 (refs: #24461)

PR #24461: (dkiser) fix for #24434 @ 2015-06-08 15:24:53 UTC
   - 4f332a71c6 Merge pull request #24461 from dkiser/multimaster_minion_fix
- 1944a743d7 fix for #24434

- **PR #24479**: (ahus1) change "path" to "name" for "file" operations @ 2015-06-07 17:56:11 UTC
  - 8917416d39 Merge pull request #24479 from ahus1/patch-1
  - 7d6b60c79d change "path" to "name" for "file" operations

- **PR #24475**: (rallytime) Back-port #24454 to 2015.5 @ 2015-06-07 01:29:32 UTC
  - **PR #24454**: (rhertzog) Strip extraneous newline character added in last environment variable (refs: #24475)
  - 86185b6ea Merge pull request #24475 from rallytime/bp-24454
  - a793c192a6 Avoid extraneous newline character added in last environment variable

- **ISSUE #24407**: (aboe76) Please expand salt module random (refs: #24420)

- **PR #24474**: (rallytime) Back-port #24420 to 2015.5 @ 2015-06-07 01:29:11 UTC
  - **PR #24420**: (aboe76) added random integer module to mod_random.py (refs: #24474)
  - 61658b6e6a Merge pull request #24474 from rallytime/bp-24420
  - 42194b04ad Fix lint error and update versionadded to 2015.5.3
  - 3613c9659 added random integer module to mod_random.py

- **ISSUE #24233**: (variia) yumpkg.group_install keeps returning state change

- **PR #24472**: (variia) ensure {} output is not treated as change in module.py state, fixes #... @ 2015-06-06 14:45:44 UTC
  - 508d7dd9b91 Merge pull request #24472 from variia/Fix-yumpkg_group_install-return-change-#24233
  - 37e8827ce8 ensure {} output is not treated as change in module.py state, fixes #24233

- **ISSUE #8585**: (UtahDave) '#' in single quoted option on cli not making it into the execution module (refs: #24466)

- **ISSUE #18045**: (dstokes) Pillar kwargs parse error with # (refs: #24466)

- **PR #24466**: (basepi) [2015.5] Fix for # in inner strings in yaml arguments @ 2015-06-06 14:35:56 UTC
  - 0292e67c8a Merge pull request #24466 from basepi/fixedhashinargs18045
  - 2e6069f09e Fix for # in inner strings in yaml arguments

- **PR #24456**: (rallytime) Back-port #24441 to 2015.5 @ 2015-06-05 22:32:25 UTC
  - **PR #24441**: (arthurlogilab) [doc] Alignment fix on external_auth documentation (refs: #24456)
  - ced58a66 Merge pull request #24456 from rallytime/bp-24441
  - 7002853c1 yaml indentations should be 2 spaces
  - 21b51abf25 [doc] Alignment fix on external_auth documentation

- **ISSUE #24397**: (kiorky) on debian: states.apt should use virtualname as it shadows system apt module (refs: #24398, #24400, #24399)
  - **PR #24399**: (kiorky) Versionvirtual (refs: #24398)

- **PR #24398**: (kiorky) VirtualName for states.apt (refs: #24399) @ 2015-06-05 17:40:04 UTC
  - c0ff4110ab Merge pull request #24398 from makinacorpus/aptv
  - 785d27707f VirtualName for states.apt
• **PR #24447**: (jayeshka) adding states/rabbitmq_policy unit test case. @ 2015-06-05 15:26:11 UTC
  - 36263405be Merge pull request #24447 from jayeshka/rabbitmq_policy_states-unit-test
  - 9b038abd63 adding states/rabbitmq_policy unit test case.
• **PR #24446**: (jayeshka) adding states/rabbitmq_plugin unit test case. @ 2015-06-05 15:25:33 UTC
  - 8445a3f28d Merge pull request #24446 from jayeshka/rabbitmq_plugin_states-unit-test
  - cb0c99a012 adding states/rabbitmq_plugin unit test case.
• **PR #24426**: (basepi) [2015.5] Merge forward from 2014.7 to 2015.5 @ 2015-06-05 03:59:11 UTC
  - 9cc3808758 Merge pull request #24426 from basepi/merge-forward-2015.5
  - eafa20c6db Merge remote-tracking branch 'upstream/2014.7' into merge-forward-2015.5
  - 83f853b6ea Merge pull request #24405 from jacksontj/2014.7
    - 2c7afaeebf Fix for #24276
  - cef919c602 Merge pull request #24395 from hvnsweeting/handle-exception-get-file
    - bb798a0224 handle exceptions when received data is not in good shape
  - efa1a94b4 Merge pull request #24305 from twangboy/win_path_docs
    - 36804253e6 Fixed pylint error caused by P... added r
    - bc42a4bb11 triple double quotes to triple single quotes
    - 77cd930bba Added documentation, fixed formatting
• **ISSUE #24309**: (steverweber) missing docs (refs: #24429)
• **PR #24429**: (jacobhammons) Salt cloud doc updates, build errors and bug fixes @ 2015-06-05 00:27:38 UTC
  - 5d738b88da Merge pull request #24429 from jacobhammons/cloud-doc-updates
  - 1f7a13d6f9 Salt cloud doc updates, build errors and bug fixes Refs #24309
• **PR #24408**: (rallytime) Backport #24392 to 2015.5 @ 2015-06-04 20:22:09 UTC
  - PR #24392: (quixoten) Fix "No such file or directory" in grains/core.py (refs: #24408)
  - cdffc02cfe Merge pull request #24408 from rallytime/bp-24392
  - f7461b3cd3 Use path found by salt.utils.which
• **PR #24380**: (rallytime) Backport #24357 to 2015.5 @ 2015-06-04 20:13:51 UTC
  - PR #24357: (zhujinhe) fix invoke issues of Jinja Macros example (refs: #24380)
  - a6a1f87cd9 Merge pull request #24380 from rallytime/bp-24357
  - f08c875015 fix invoke issues of Jinja Macros example
• **ISSUE #24358**: (pengyao) Netapi SSH client don’t support ssh_user and ssh_passwd arguments (refs: #24388)
• **PR #24388**: (pengyao) fixes #24358 @ 2015-06-04 20:07:40 UTC
  - 86ce9dbbdf Merge pull request #24388 from pengyao/sshclient-kwarg
  - 5c08c48b4 fixes #24358
• **ISSUE #22958**: (highlyunavailable) Weird error when typoing a command (refs: #24367)
• **PR #24367**: (terminalmage) Improve error message when module does not exist @ 2015-06-04 20:07:12 UTC
  - 72d2eada9 Merge pull request #24367 from terminalmage/issue22958
• **ISSUE #23101**: (gravyboat) Create a docs page for labels (refs: #23387)

• **PR #24412**: (jfindlay) backport #23387 @ 2015-06-04 20:06:03 UTC
  
  • **PR #23387**: (rallytime) Add some "What are all these labels for?" documentation (refs: #24412)
  
  • a628778e3c Merge pull request #24412 from jfindlay/bp-23387
  
  • bf85772042 Make sure the parameters are in the correct order
  
  • 9f53809cde Add "* Change" label parameters
  
  • b27a15e774 Remove "workaround" wording
  
  • 9ff35a959 Some small fixes
  
  • 54a7089fd6 Link the new labels doc in contributing and hacking docs
  
  • 375695e696 Add pull request label definitions
  
  • de945638d3 Add Feature Request label definition
  
  • 684f291bd4 Add issue definition and augment functional areas section
  
  • 2da13dd525 Start a "what are all of these labels for?" doc

• **ISSUE #24154**: (ssgward) Exception when running cp.get_url (refs: #24336)

• **PR #24336**: (twangboy) Added line to give more descriptive error @ 2015-06-04 19:56:00 UTC
  
  • 485116c2cc Merge pull request #24336 from twangboy/fix_cp_get_url
  
  • 37b11f931c Added line to give more descriptive error

• **PR #24413**: (techhat) Add more namespaced functions to GoGrid driver @ 2015-06-04 19:51:22 UTC
  
  • b3d39cc0e8 Merge pull request #24413 from techhat/gogridnamespace
  
  • 1b397cb6fe Adding blank line
  
  • da08c99ac Add more namespaced functions to GoGrid driver

• **ISSUE #24397**: (kiorky) on debian: states.apt should use virtualname as it shadows system apt module (refs: #24398, #24400, #24399)

• **PR #24399**: (kiorky) Versionvirtual (refs: #24398) @ 2015-06-04 18:02:22 UTC
  
  • 27f109bd76 Merge pull request #24399 from makinacorpus/versionvirtual
  
  • 235c78ddf8 Use apt_pkg.version_compare if available
  
  • 1c0cd459f8 reindent block to isolate conflict on merge forward
  
  • 699eceab64 use var to isolate conflict on merge forward

• **PR #24371**: (joejulian) 2015.5 tls module tests @ 2015-06-04 15:20:16 UTC
  
  • deae68b89 Merge pull request #24371 from joejulian/2015.5_tls_module_tests
  
  • 4c5dee1e25 Add @destructiveTest decorator to destructive tests
  
  • 274bbd4d43 Accept results from older pyOpenSSL
  
  • 161f913522 All cert info should be in UTC always
  
  • 9affca766 See the whole diff if dict compare fails
- 94f620857c Ignore extensions for now. Resolve this as part of fixing issue 24338.
- 84904d31f1 Mask lint warning for unused imported module
- 5675b78459 Do not test if PyOpenSSL is not installed
- 563cc63111 Add tls tests

- **PR #24403**: (jayeshka) adding states/process unit test case. @ 2015-06-04 15:19:01 UTC
  - 8468ee695 Merge pull request #24403 from jayeshka/process_states-unit-test
  - fcb71fh35e adding states/process unit test case.

- **PR #24402**: (jayeshka) adding states/pyenv unit test case. @ 2015-06-04 15:18:11 UTC
  - 35de8d27db Merge pull request #24402 from jayeshka/pyenv_states-unit-test
  - 5fd263ab48b adding states/pyenv unit test case.

- **PR #24401**: (jayeshka) adding states/powerpath unit test case. @ 2015-06-04 15:17:46 UTC
  - 632f838838 Merge pull request #24401 from jayeshka/powerpath-states-unit-test
  - 49ff9272ce adding states/powerpath unit test case.

- **ISSUE #24397**: (kiorky) on debian: states.apt should use virtualname as it shadows system apt module (refs: #24398, #24400, #24399)

- **PR #24400**: (kiorky) Aptversion @ 2015-06-04 15:17:19 UTC
  - 0a6e5e0d96 Merge pull request #24400 from makinacorpus/aptversion
  - e15cb936b5 Use apt_pkg.version_compare if available
  - 953725a563 Fix too much quoting in apt.version_cmp

- **PR #24385**: (jeanpralo) Fix salt.modules.dockerio.start method @ 2015-06-04 15:00:22 UTC
  - a90405d28 Merge pull request #24385 from jeanpralo/Fix-binds-dockerio.start
  - a0fed313fa binds dict if not specified should remain to none otherwise docker-py will try to create a new host config and all volume and ports binds are lost. config should be done at the creation of the container not when we start it

- **PR #24381**: (justinta) Disabled flaky test to review later @ 2015-06-04 14:57:43 UTC
  - 9890bc4e43 Merge pull request #24381 from jtnad/seed_test
  - 7570ae9132 Disabled flaky test to review later

- **ISSUE #23342**: (philipsd6) salt-ssh 2015.2.0rc2 fails when target doesn’t have lspci available (refs: #24382)

- **PR #24382**: (basepi) [2015.5] Handle CommandExecutionError in grains commands, Fixes #23342 @ 2015-06-04 12:44:04 UTC
  - b3fa8f9fcb Merge pull request #24382 from basepi/grainscommandnotfound23342
  - 85b91d64cc Handle CommandExecutionError in grains commands

- **PR #24379**: (Starblade42) Fixes an issue where Pagerduty states/modules couldn’t find their profile in the Pillar @ 2015-06-04 12:41:13 UTC
  - 52587a4fc1 Merge pull request #24379 from Starblade42/2015.5
  - b93de5ef6c linting!
  - 2dd5904119 Fixes an issue where Pagerduty states/modules couldn’t find its profile in the Pillar

- **PR #24366**: (terminalmage) Use yes $’n’ instead of printf ‘\n’ for pecl commands @ 2015-06-03 21:28:58 UTC
Salt Documentation, Release 3002.2

- 3ca35d1ec3 Merge pull request #24366 from terminalmage/pecl-yes
- dcd9ad8b6e Use yes $'n' instead of printf 'n' for pecl commands

- ISSUE #24284: (kiorky) systemd lxc containers need use_vt=True at lxc-start stage (refs: #24348)
- PR #548: (Lanzaa) Salt is now platform dependent. Use get_python_lib(1) (refs: #24348)
- PR #24348: (kiorky) Try to close input pipes before calling lxc-start @ 2015-06-03 19:38:07 UTC

28.2.82 Salt 2015.5.4 Release Notes

release 2015-08-13

Version 2015.5.4 is a bugfix release for 2015.5.0.

Statistics

- Total Merges: 247
- Total Issue References: 138
- Total PR References: 312
- Contributors: 92 (0xf10e, AkhterAli, BretFisher, DmitryKuzmenko, EvaSDK, GideonRed-zz, JohannesEbke, Oro, TheBigBear, TronPaul, UtahDave, ahus1, alekti, alexandrsushko, amontalban, andre-luiz-dos-santos, aneesusaha, anlutro, asyncscr, attiasr, babelin, basepi, binet, bclermont, bechtoldt, blackduckx, bobrik, cachedout, colekowalski, cro, d--j, davidjb, denmat, derBroBro, dkiser, driskell, egarbi, fleaflicker, garethgreenaway, gmcwhistler, gtmanfred, hasues, isbm, jacksontj, jacobhammons, jahann, jarp, jasonkeene, jayeshka, jfindlay, jleroy, jmdcal, jodv, joejulian, jquast, justinta, kev009, klyr, l2ol33rt, loa, lomeroe, martinhoefling, mgwilliams, nicholascapo, niqu00, nmadhok, nyushi, oeufete, opdude, pcdummy, pcn, peterdemin, puneefk, rallytime, rmatulat, s0undt3ch, silenus, sjorge, stanislavb, steverweber, supertom, t0rrant, tankywoo, techhat, terminalmage, thatch45, tony-cocco, twangboy, uvsntid, vr-jack, yanatan16, zyio)

Bug Fixes

- The cron.present state now correctly defaults to state ID as identifier.

Salt-Cloud Changes

- When querying for VMs in the digital_ocean_v2 cloud driver, the number of VMs to include in a page was changed from 20 (default) to 200 to reduce the number of API calls to Digital Ocean.
- The vmware salt-cloud driver was back-ported from the develop branch in order for installations of Salt that are older than 2015.8.0 to be able to use the vmware driver without stack-tracing on various deprecation paths that were implemented in the 2015.8.0 release.
Changelog for v2015.5.3..v2015.5.4

- **PR #26292**: (jquast) Rabbitmq 3.2.4 on Ubuntu has "...done.", not "...done" @ 2015-08-13 19:53:29 UTC
  - 0a5d1307c4 Merge pull request #26292 from jquast/backport-ubuntu-rabbitmq-fix
  - 39ef653bc2 Rabbitmq 3.2.4 on Ubuntu has ...done. not ...done, change the if to be more portable

- **PR #26296**: (jquast) bugfix missing 'runas=None' for rabbitmqctl cmds (backport to 2015.5) @ 2015-08-13 19:52:40 UTC
  - 21cc3c3bf6 Merge pull request #26296 from jquast/bugfix-runas-rabbitmqctl-2015.5
  - eb77320786 bugfix missing 'runas=None' for rabbitmqctl cmds

- **ISSUE #25618**: (twangboy) Fix reg.py to work with the registry properly (refs: #26268)

- **PR #26293**: (jfindlay) Fix #26268 @ 2015-08-13 19:48:06 UTC
  - **PR #26288**: (bbinet) allow to delete grains which value is False @ 2015-08-13 18:24:36 UTC
  - 5dd5ac1198 Merge pull request #26288 from bbinet/grains-absent-fix
  - f46722aaeb allow to delete grains which value is False

- **ISSUE #25192**: (deuscapturus) 2015.5.2 boto_cloudwatch_alarm.present not working. (refs: #26290)

- **PR #26290**: (rallytime) Only call convert_to_arn when action name is provided @ 2015-08-13 18:48:58 UTC
  - 5dd5ac1198 Merge pull request #26290 from rallytime/fixed
  - a1f90fa070 Only call convert_to_arn when action name is provided

- **PR #26265**: (rallytime) Don't make changes when test=True for openstack present/absent funcs @ 2015-08-13 16:30:31 UTC
  - 65ab5aa495 Merge pull request #26265 from rallytime/fixed
  - 298685bbb2 Don't make changes when test=True for openstack present/absent funcs

- **ISSUE #24882**: (nmadhok) salt.states.openstack_config.present and salt.states.openstack_config.absent make changes when test=True (refs: #26263)

- **PR #26263**: (rallytime) Don't make changes when test=True for openstack present/absent funcs @ 2015-08-13 16:28:48 UTC
  - 86b8161d22 Mock test key in __opts__ dict
  - 298685bbb2 Don't make changes when test=True for openstack present/absent funcs

- **ISSUE #24484**: (bailsman) clouds/ec2.py: create_snapshot throws exception (refs: #26265)

- **PR #26265**: (rallytime) Don't stacktrace on query return in ec2.create_snapshot @ 2015-08-13 16:28:48 UTC
  - 3daa9cfedd Merge pull request #26265 from rallytime/fixed
  - 4975300591 Don't stacktrace on query return in ec2.create_snapshot
• PR #26285: (stanislavb) Remove explicit version from instance identity URL @ 2015-08-13 16:25:32 UTC
   - 5778cb3f01 Merge pull request #26285 from stanislavb/2015.5
   - f1f8f49f1e Remove explicit version from instance identity URL
• PR #26275: (cachedout) Re-init modules on multi-master reconnect @ 2015-08-13 15:52:50 UTC
   - 679dc089c0 Merge pull request #26275 from cachedout/mm_reinit
   - 1e0473c04a Re-init modules on multi-master reconnect
• PR #26273: (garethgreenaway) Fixes to schedule module in 2015.5 @ 2015-08-13 15:34:43 UTC
   - 75ff28779 Merge pull request #26273 from garethgreenaway/2015.5_schedule_list_show_jobs_enabled
   - 1aad4b1b4f Jobs are enabled by default but schedule.list does not show an enabled jobs as being enabled by default. This change fixes that.
• ISSUE #24483: (bailsman) clouds/ec2.py: del_root_vol_on_destroy and del_all_vols_on_destroy not working (refs: #26271)
• PR #26271: (rallytime) Fix del_root_vol_on_destroy and del_all_vols_on_destroy functionality on ec2 @ 2015-08-12 23:22:47 UTC
   - 10af22775a Merge pull request #26271 from rallytime/fix-24483
   - 139fbb93bc Fix del_root_vol_on_destroy and del_all_vols_on_destroy functionality on ec2
• ISSUE #25958: (anlutro) Cron identifier does not default to state ID as documented (refs: #26219)
• PR #26219: (anlutro) cron: make identifier default to state ID @ 2015-08-12 18:42:33 UTC
   - 8e1b5da2e0 Merge pull request #26219 from alprs/fix-cron_identifier_default
   - 1f02e1671b cron: fix a typo in the tests
   - a86b1b7f94 add release note about cron state changes
   - 9511e392ce cron: read full length of multi-line comments
   - 9b18cd9050 cron: more descriptive tests, updated to reflect new behavior
   - f2ad837e3 cron: change identifier default value to False
   - ad444b6e7b cron identifier: default to state id
• ISSUE #26207: (fullermd) group members setting fails with obscure error message on FreeBSD (refs: #26237)
• PR #26257: (rallytime) Back-port #26237 to 2015.5 @ 2015-08-12 18:40:35 UTC
   - PR #26237: (silenius) fix issue #26207 (refs: #26257)
   - eebe9af533 Merge pull request #26257 from rallytime/bp-26237
   - d57f6c6a0 Add versionadded to new members function
   - dad1920626 fix issue #26207
• PR #26258: (nmadhok) Fix permission on tests/runtests.py on 2015.5 branch @ 2015-08-12 18:40:04 UTC
   - d7e169d0 Merge pull request #26258 from nmadhok/fix-permission
   - d94485d336 Fix permission on tests/runtests.py on 2015.5 branch
• PR #26261: (nmadhok) Correct spelling of integration in docs @ 2015-08-12 18:14:48 UTC
   - 74b9c7b7 Merge pull request #26261 from nmadhok/doc-fix-2015.5
   - 714f9766e7 Correct spelling of integration in docs
PR #26247: (nmadhok) Initial commit of unit tests for vmware cloud driver @ 2015-08-12 16:58:24 UTC
  - de00c181f8 Merge pull request #26247 from nmadhok/vmware-cloud-test-2015.5
  - 6cc5f97e92 Lint Fix
  - a8bf65ec1f Initial commit of unit tests for vmware cloud driver

PR #26246: (nmadhok) Backport additions to VMware cloud driver from develop to 2015.5 branch @ 2015-08-12 15:11:26 UTC
  - d14d7b2c0e Merge pull request #26246 from nmadhok/vmware-cloud-driver-additions-2015.5
  - 5227aa94bc Backport additions to VMware cloud driver from develop to 2015.5 branch

PR #26239: (opduke) Fixed documentation to match function name @ 2015-08-12 14:48:52 UTC
  - 87b300d7b3 Merge pull request #26239 from Unity-Technologies/2015.5
  - fc18751710 Fixed documentation to match function name

PR #26232: (garethgreenaway) Fix to trust_key in gpg module for 2015.5. @ 2015-08-12 04:48:27 UTC
  - a93b96c9ba Merge pull request #26232 from garethgreenaway/2015_5_gpg_trust_key_fix
  - e174c41887 Fix to trust_key in gpg module for 2015.5.

ISSUE #25802: (jefftucker) Running module "npm.list" fails on Windows for masterless minion (refs: #26084)

PR #26084: (twangboy) Added python_shell=True, quoted user input @ 2015-08-10 21:29:35 UTC
  - b57da552ff Merge pull request #26084 from twangboy/fx_25802
  - 4503ed5b34 Fixed but with multiple packages, was causing tests to fail
  - f05e3e72a3 Merge branch '2015.5' of https://github.com/saltstack/salt into fix_25802

PR #26183: (cro) Fix LDAP configuration issue. @ 2015-08-10 19:09:41 UTC
  - c3814137a3 Merge pull request #26183 from cro/anonldap2
  - a5e9c80b5 Lint roller
  - 79833e3f8a Cherry pick index.rst change.
  - 99f2c27399 Documentation update for anonymous bind issue.
  - 793ed7b96 Cherry pick master.py groups check

PR #26186: (jacobhammons) regenerated man pages @ 2015-08-10 19:07:44 UTC
  - 3233ed4675 Merge pull request #26186 from jacobhammons/man-page-updates
  - bf2dad913f regenerated man pages

PR #26182: (basepi) [2015.5] Merge forward from 2014.7 to 2015.5 @ 2015-08-10 19:00:10 UTC
  - d48bce7598 Merge pull request #26182 from basepi/merge-forward-2015.5
  - 32f35345d7d Merge remote-tracking branch 'upstream/2014.7' into merge-forward-2015.5
    - abdf2935c4 Merge pull request #26116 from corux/fix-escape-content
      - fd913dc36 Append/prepend: search for full line with escaped content
    - 106356d98d Merge pull request #26088 from jacobhammons/master-finger
      - 133df7885 some small changes
      - d220c83f77 master_finger configuration docs switch a script to use https:// instead of http://

Refs #25751

5498 Chapter 28. Release Notes
* 4bd4bc41f2 Merge pull request #26047 from jacobhammons/win-downloads
  - 7c162d181c Updated windows download links in the docs to https://repo.saltstack.com Refs #25961

- ISSUE #25998: (driskell) Event subsystem discarding required events during --batch breaking it for slow running commands (refs: #26000)

- PR #26000: (driskell) Implement full event caching for subscribed tags @ 2015-08-10 18:57:17 UTC
  - f39780f8ce Merge pull request #26000 from driskell/fix_discarded_events
  - 65acf975dd Implement full event caching for subscribed tags Require all multitasking contexts to subscribe to their events so one call to get_event for one tag does not discard events that should be saved for a subsequent call to get_event with another tag. Use blocking get_event in batching with very small timeout. Fixes #25998

- PR #26175: (rallytime) Back-port #26153 to 2015.5 @ 2015-08-10 18:22:32 UTC
  - PR #26153: (loa) Fix dockerio state documentation typo (refs: #26175)
  - c01b4cf150 Merge pull request #26175 from rallytime/bp-26153
  - 9a263067e9 Fix dockerio state documentation typo

- ISSUE #26024: (jpic) lxc_conf_unset in cloud.profile is ignored (refs: #26147)

- PR #26177: (rallytime) Back-port #26147 to 2015.5 @ 2015-08-10 18:22:01 UTC
  - PR #26147: (martinhoefling) Fixes #26024 (refs: #26177)
  - ca80f33bfd Merge pull request #26177 from rallytime/bp-26147
  - 323c3ab53c Fixes #26024

- ISSUE #21082: (clinta) master_type failover does not failover on DNS errors (refs: #25404)

- PR #26179: (rallytime) Back-port #25404 to 2015.5 @ 2015-08-10 18:21:50 UTC
  - PR #25404: (DmitryKuzmenko) Fixed minion failover to next master on DNS errors. (refs: #26179)
  - 1213b8d706 Merge pull request #26179 from rallytime/bp-25404
  - 52ab9fc1fb Fixed minion failover to next master on DNS errors.

- ISSUE #26112: (wt) state.template fails with unclear error with template with only an include (refs: #26180)

- PR #26180: (jfindlay) fix processing of state.template @ 2015-08-10 18:21:38 UTC
  - b319c5ec04 Merge pull request #26180 from jfindlay/templ_env
  - 5e46ea4441 check type of matches in render_state before iterating
  - c80299b918 insert saltenv to render_state args in state.template

- ISSUE #26162: (nmadhok) VMware cloud driver create function failing with traceback on latest develop (refs: #26172)

- PR #26172: (nmadhok) [Backport] Make sure variable is a dictionary before popping something from it. @ 2015-08-10 16:42:50 UTC
  - ef5a4a47f6 Merge pull request #26172 from nmadhok/backport-cloud-fix-26163-2015.5
  - 0f2b5f8ac8 Make sure variable is a dictionary before popping something from it.

- ISSUE #26098: (rdinoff) SALT.STATES.SLACK Doc update (refs: #26168)

- PR #26168: (cachedout) Fix slack docs @ 2015-08-10 14:57:18 UTC
• ISSUE #24106: (nvx) fileclient.py#get_url ignores HTTP Auth again (2015.5 regression) (refs: #26127)
• PR #26127: (garethgreenaway) Fixes to salt.utils.http related to cp.get_file_str bug. @ 2015-08-10 14:38:25 UTC
  - 9e6b0d6165 Merge pull request #26127 from garethgreenaway/2015_5_24106
  - 66f64086a one more lint error
  - 317a8ec75c Disabling pylint for W0633, auth should only ever be a sequence at this location.
  - 08eaca4fe4 lint fixes.
  - 7046b84ac8 Fixing a bug where cp.get_file_str would not work if using http(s) URLs with authentication. The salt.utils.http library in 2015.5 defaults to using urllib instead of requests and there was no authentication support added. This PR adds authentication support. #24106
• ISSUE #26141: (nmadhok) salt-cloud VMware driver fails with error in parsing configuration file (refs: #26140)
• ISSUE #25809: (o-sleep) vmware cloud module error message (refs: #26140)
• ISSUE #25625: (steverweber) cloud vmware driver does not provide mac_address unless vmware tools is running (refs: #26137, #26140)
• PR #26140: (nmadhok) VMware cloud driver fixes @ 2015-08-10 13:15:58 UTC
  - 3b65e1d91 Merge pull request #26140 from nmadhok/vmware-cloud-fixes
  - a1899b436c Correct provider name in profile example
  - 1f21876d21 Lint fixes
  - 0bd4f8e9c1 Additional fixes to format_instance functions to display more information available
  - 4ee1b777e9 Change double quotes to single quotes in add_host config example
  - e132f06a5c Change double quotes to single quotes in provider configuration example
  - ad9895de07 Display error in else condition if connection is unsuccessful and does not have msg attribute. Fixes #25809
• ISSUE #25625: (steverweber) cloud vmware driver does not provide mac_address unless vmware tools is running (refs: #26137, #26140)
• PR #26137: (steverweber) use device mac address if vmtools not active @ 2015-08-09 03:05:36 UTC
  - 474a250414 Merge pull request #26137 from steverweber/vmware_macaddress_fix
  - 2589e389f0 use device mac address if vmtools not active
• PR #26119: (jodv) Backport eauth bugfix to 2015.5 @ 2015-08-09 02:19:52 UTC
  - 8a33797737 Merge pull request #26119 from jodv/backport_eauth_bugfix
  - 5b5b4d8fe9 Fix issue with mixed user and group eauth perms
• PR #26135: (cro) Fix proxy minions in 2015.5 and significantly update documentation. @ 2015-08-09 02:19:21 UTC
  - 2b8dce0ca Merge pull request #26135 from cro/pm20155_2
  - 28329fff55 These tests make no sense now that the proxy interface is module based and not object based.
- b17b65d4de Fix lint.
- f4263c8f17 Fix lint.
- 6927251c09 Fix lint.
- 08f1a43ff0 Fix lint.
- 8261158b5a Fix lint.
- b5e643b9cd Whoops…Don’t log the entire proxy dictionary—might have sensitive stuff in it.
- 2acf3c5a3 Remove some debugging statements, change some others to ‘info’ level.
- 37de6a686 More proxy minion updates
- e79a182108 More proxy minion updates
- 3b746ac2f6 Update to reflect refactor to LazyLoader
- 5d390d3a5f Updates post meeting with Rick
- d1213ce4a0 Updates post meeting with Rick
- ddb0b76937 Fix proxyobject confusion, now called proxymodule
- 9b1599d436 Update to reflect refactor to LazyLoader

- **PR #26132:** (TheBigBear) minor edit @ 2015-08-08 21:05:34 UTC
  - 2705b4a36a Merge pull request #26132 from TheBigBear/patch-5
  - 1d624d77bc minor edit

- **ISSUE #25915:** (ari) FreeBSD pkg install fails (refs: #26133)

- **PR #26133:** (amontalban) Fixed #25915 in salt/modules/pkgng.py and salt/states/pkg.py @ 2015-08-08 21:05:05 UTC
  - 3eac28f0f9 Merge pull request #26133 from amontalban/fix-bug-25915
  - 6b0f4fca05 Fixed #25915 in salt/modules/pkgng.py and salt/states/pkg.py

- **PR #26111:** (anlutro) Better error messages when virtualenv creation fails @ 2015-08-07 21:42:09 UTC
  - 19c42b4a6a Merge pull request #26111 from alprs/fix-virtualenv_fail_message
  - 2913acc48 virtualenv: better error messages when creation fails

- **ISSUE #26093:** (freedba) archive.tar bug (refs: #26110)

- **PR #26110:** (jfindlay) check for sources before adding them to cmd str @ 2015-08-07 21:33:23 UTC
  - 6d2835b464 Merge pull request #26110 from jfindlay/tar_sources
  - 1bd2f8905e check for sources before adding them to cmd str

- **PR #26106:** (vr-jack) Update __init__.py @ 2015-08-07 21:15:55 UTC
  - 2d7271b3612 Merge pull request #26106 from vr-jack/2015.5
  - 56646e6610 Update __init__.py

- **ISSUE #25983:** (jmdcal) Trying to get md5 of local zip (refs: #25984)

- **PR #26101:** (rallytime) Back-port #25984 to 2015.5 @ 2015-08-07 18:56:26 UTC
  - **PR #25984:** (jmdcal) Support local files without md5sum (refs: #26101)
  - 40d41741c1 Merge pull request #26101 from rallytime/bp-25984
PR #26080: (techhat) Fix string checking in s3fs @ 2015-08-06 23:36:09 UTC
- 0d3c2d549e Merge pull request #26080 from techhat/fixlower
- 8717a36963 Fix string checking in s3fs

ISSUE #26039: (basepi) Update scheduler docs to use orchestrate instead of overstate (refs: #26079)

PR #26079: (cachedout) Update docs to remove state.over @ 2015-08-06 23:35:26 UTC
- dc9eb5a34 Merge pull request #26079 from cachedout/issue_26039
- f03f460af2 Update docs to remove state.over
  * 89d8faeb1 Added python_shell=True, quoted user input

PR #26058: (opdude) Fix choco version on chocolatey versions below 0.9.9 @ 2015-08-06 18:50:10 UTC
- beddb696b2 Fix choco version on chocolatey versions below 0.9.9

PR #26068: (jfindlay) fix autoruns.list looking in wrong directory @ 2015-08-06 18:49:48 UTC
- fbe2584abe Merge pull request #26068 from jfindlay/auto_fix
- 1e9a850ec2 fix autoruns.list looking in wrong directory

ISSUE saltstack/salt-bootstrap#640: (Deshke) salt-minion install bug on ubuntu 14.04 tornado>=4.0 (refs: #26065)

ISSUE saltstack/salt-bootstrap#633: (neilmb) Bootstrap install fails on python-requests dependency (refs: #26065)

  - d55e6e5fe9 Merge pull request #26021 from alprs/docs-git_present_shared_versionadded
  - 8fa678aaa7 specify versionadded for git.present shared argument
- ISSUE #25701: (alekti) Issue #23764 regression (refs: #25750)
- ISSUE #23764: (es1o) source_hash from local file is not supported. (refs: #26031, #25750)
- PR #26020: (alekti) Correctly resolve conflict merging pull 25750 to 2015.5 @ 2015-08-05 14:16:58 UTC
  - PR #25750: (alekti) Add file as supported protocol for file source_hash. Fixes #25701. (refs: #26020)
  - 5e17c5d230 Merge pull request #26020 from alekti/merge-pull-25750-to-2015.5
- 4b9d7426cc Add file as supported protocol for file source_hash. Fixes #23764.

- **ISSUE #22241: (masterkorp) Salt master not properly generating the map (refs: #25358)**

- **PR #26016: (basepi) Revert "Deep merge of pillar lists" @ 2015-08-05 04:59:52 UTC**
  - PR #25358: (dkiser) Deep merge of pillar lists (refs: #26016)
  - 53f7aadcd7 Merge pull request #26016 from basepi/revert.25358
  - 8a0e8e0460 Revert "Deep merge of pillar lists"

- **ISSUE #12255: (eliasp) 'system.set_computer_desc' fails with non-ASCII chars (refs: #25992)**

- **PR #25992: (twangboy) Refactor win_system.py @ 2015-08-05 04:54:18 UTC**
  - 200bff7538 Merge pull request #25992 from twangboy/fix_12255
  - 0502897635 Fixed the lint... again
  - 6f85d6b9af Fixed some lint
  - 4195803e56 Merge pull request #3 from jfindlay/win_sys
    * 9156bd33e update win_system exec mod unit tests
  - c92add95b5 Gated ctypes import, fixed some lint
  - d7670fda0a Refactor win_service.py

- **ISSUE #25948: (twangboy) Fix uncomment function to handle spaces (refs: #26002)**

- **PR #26002: (twangboy) Fixed regex to account for comment character followed by whitespace @ 2015-08-04 22:28:11 UTC**
  - c168159750 Merge pull request #26002 from twangboy/fix_25948
  - ba1a57e582 Fixed regex to account for comment character followed by whitespace

- **ISSUE #25949: (godlike64) layman.add does not work with unofficial overlays (refs: #25970)**

- **PR #25970: (jfindlay) accept addition of layman overlay @ 2015-08-04 15:42:28 UTC**
  - 4ad2422da1 Merge pull request #25970 from jfindlay/layman
  - 237a9e18b3 accept addition of layman overlay

- **PR #25971: (basepi) [2015.5] salt.modules.reg Add spaces for strings split across multiple lines @ 2015-08-04 15:39:48 UTC**
  - f136c6c1c0 Merge pull request #25971 from basepi/reg.typos
  - bb001a6c0e Add spaces for strings split across multiple lines

- **PR #25990: (rallytime) Back-port #25976 to 2015.5 @ 2015-08-04 14:36:53 UTC**
  - PR #25976: (fleaflicker) Typo in help output (refs: #25990)
  - 6383d8a7da Merge pull request #25990 from rallytime/bp-25976
  - 5f6dc2c885 Typo in help output

- **PR #25996: (attiasr) fix msiexec package remove @ 2015-08-04 14:36:31 UTC**
  - 9f8bbf75dc0 Merge pull request #25996 from attiasr/patch-1
  - 5fbc5fcd94 fix msiexec package remove

- **ISSUE #25863: (peterdemin) pkg.installed fails on already installed package if it is in versionlock.list (refs: #25864)**
• PR #25966: (rallytime) Back-port #25864 to 2015.5 @ 2015-08-03 18:48:26 UTC

- **PR #25807**: (rallytime) Provide helpful error when using actions with a mapfile @ 2015-07-29 15:30:15 UTC
  - 72b3633338 Merge pull request #25807 from rallytime/fix-22699
- 3f3005c746 Use handle_exception function in cloud cli.py
- f91ed3a33 Provide helpful error when using actions with a mapfile

- **PR #25818**: (jfindlay) fix autoruns list @ 2015-07-29 15:29:20 UTC
  - 71497ad0d Merge pull request #25818 from jfindlay/autoruns_users
  - c2dbb65982 fix autoruns list for modern windowsen

- **PR #25826**: (anlutro) Check that "onchanges" is a list @ 2015-07-29 15:00:28 UTC
  - 98b324c5f8 Merge pull request #25826 from alprs/fix-onchanges_type_check
  - 7992a3f0f4 state.py: check that "onchanges" is a list

- **ISSUE #25258**: (nickw8) windows minion repo not updating (refs: #25798)

- **PR #25798**: (twangboy) Fixed stacktrace on package name not found @ 2015-07-28 22:40:14 UTC
  - ad07dc1e27 Merge pull request #25798 from twangboy/fix_25258
  - aa19c2bf8f Fixed stacktrace on package name not found

- **ISSUE #25437**: (lorenegordon) Stacktrace on Windows when running pkg.list_pkgs (refs: #25598, #25763)

- **PR #25797**: (twangboy) Changed repocache back to cached_repo @ 2015-07-28 22:39:32 UTC
  - **PR #25763**: (twangboy) Fix 25437 (refs: #25797)
  - 4a3844a606 Merge pull request #25797 from twangboy/fix_revert_in_25763
  - 81d5b5ee55 Changed repocache back to cached_repo

- **PR #25793**: (rallytime) Back-port #25730 to 2015.5 @ 2015-07-28 19:37:34 UTC
  - **PR #25730**: (sjorge) patchelf lives in pkgsrc (refs: #25793)
  - 823f0ce350 Merge pull request #25793 from rallytime/bp-25730
  - 937779eb51 patchelf lives in pkgsrc

- **PR #25792**: (rallytime) Back-port #25688 to 2015.5 @ 2015-07-28 19:37:17 UTC
  - **PR #25688**: (bclermont) Don’t acquire lock if there is no formatter (refs: #25792)
  - 4109ae55f9 Merge pull request #25792 from rallytime/bp-25688
  - 0aa1416b6b Don’t acquire lock if there is no formatter

- **PR #25796**: (cachedout) Remove debug from docs @ 2015-07-28 17:35:59 UTC
  - 737fb1410c Merge pull request #25796 from cachedout/debug_doc
  - 33bfdf3b0b Remove debug from docs

- **ISSUE #24920**: (voileux) module.zpool.create on character device is not possible by salt (refs: #25749)

- **PR #25749**: (jahamn) Allow zpool.create on character devices @ 2015-07-28 16:01:40 UTC
  - a658753eff Merge pull request #25749 from jahamn/fix-zpool-special-char-device-support
  - 361f6cc23f Allow zpool.create on character devices

- **PR #25685**: (twangboy) Fixed regex issues with comment and uncomment @ 2015-07-28 15:29:49 UTC
  - 1fae766d53c Merge pull request #25685 from twangboy/fix_25594
  - a904e8329b Fixed another test failure...
  - aa077d3a86 Fixed more tests... justin findlay helped me...
• ISSUE #25437: (lorenzgordon) Stacktrace on Windows when running pkg.list_pkgs (refs: #25598, #25763)
• PR #25763: (twangboy) Fix 25437 (refs: #25797) @ 2015-07-28 15:29:27 UTC
   - 0db2940a Merge pull request #25763 from twangboy/fix_25437
   - 9e70e800b9 The real fix for 25437 that doesn't break other crap
   - d7347e01e5 Revert "Fixed problem trying to load file with name of boolean type"
   - cf57712eb Merge branch '2015.5' of https://github.com/saltstack/salt into fix_25437
• PR #25752: (thatch45) State top saltenv @ 2015-07-28 01:02:10 UTC
   - 12326595f9 Merge pull request #25752 from thatch45/state_top_saltenv
   - 65d6ec0659 don't override the minion config unless requested
   - 26c858361c Add state_top_saltenv to the config chain
   - 36a3b674a7 Add raet support for state_top_saltenv
   - 6f6fa025b13 Add saltenv top file support to salt master_opts
   - 4a1c53309b Add state_top_saltenv support
• ISSUE #25717: (twangboy) Problem with chocolatey module not loading (refs: #25755)
• PR #25755: (twangboy) Fixed problem with dunder functions not being passed @ 2015-07-27 19:31:22 UTC

  - c53e11d42c Fixed problem trying to load file with name of boolean type

- ISSUE #25323: (terminalmage) unit.modules.tls_test fails with older mock (refs: #25604)
- PR #25604: (terminalmage) Move patching of mock_open to within test @ 2015-07-22 16:53:55 UTC
  - f4a38a8ae Merge pull request #25604 from terminalmage/fix-mock_open
  - 123b8ee1c8 Fix mock_open patch
  - af8235f42 Move patching of mock_open to within test

- ISSUE saltstack/salt-bootstrap#630: (ji) Ubuntu 12.04 (and maybe 12.x?): apt-get installing python-requests causes digital_ocean_v2 to fail with ”[ERROR ] Failed to get the output of 'digital_ocean.avail_sizes()': 'Response' object has no attribute 'text” (refs: #25609)
  - PR saltstack/salt-bootstrap#627: (nyushi) Fix tornado installation on ubuntu (refs: #25609)

- ISSUE #25609: (s0undt3ch) [2015.5] Update the bootstrap script to latest release v2015.07.22 @ 2015-07-22 16:28:52 UTC
  - 224484df7c Merge pull request #25609 from s0undt3ch/fixbootstrap
  - 96a8568336 Update the bootstrap script to latest release v2015.07.22

- ISSUE #21912: (rvora) pkg.latest not updating the package on CentOS though yum reports an update available (refs: #25603)
- PR #25603: (terminalmage) Add version_cmp function to yumpkg.py @ 2015-07-22 15:42:29 UTC
  - 07eb78c79f Merge pull request #25603 from terminalmage/issue21912
  - 99e532ba7a Add versionadded directive
  - 8a1765fc6f Add version_cmp function to yumpkg.py
  - 457e72e273 Fix references to __salt__['version_cmp']
  - a19fa2296a Avoid using single-letter variable

- ISSUE #25560: (dennisjac) scheduled highstate runs don't return results to the job cache (refs: #25590)
• **PR #25590**: (garethgreenaway) 2015.5 scheduled jobs return data @ 2015-07-21 21:57:42 UTC
  - 69ef81caba Merge pull request #25590 from garethgreenaway/25560_2015_5_schedule_return_data
  - 19ca0c0b40 Switching default in 2015.5 for whether job data in returned to the mater job_cache.

• **PR #25584**: (rallytime) Back-port #24054 and #25576 to 2015.5 @ 2015-07-21 21:16:38 UTC
  - **PR #25576**: (pcn) s3fs breaks when fetching files from s3 (refs: #25584)
  - **PR #24054**: (mgwilliams) s3.head: return useful data (refs: #25584)
  - 9f8e867e Merge pull request #25584 from rallytime/bp-24054-and-25576
  - aa95983a5 s3fs breaks when fetching files from s3
  - 1667d67c6e s3.head: return useful data

• **ISSUE #23626**: (mirko) salt state 'ssh_known_hosts' doesn't take 'port' into account (refs: #25589)

• **PR #25589**: (jahamn) Fixes ssh_known_host not taking port into account @ 2015-07-21 21:15:06 UTC
  - a966e439d1 Merge pull request #25589 from jahamn/Fix-ssh_known_host-not-taking-port-into-account
  - 8db7ada82d Fixed pylint e8303 errors
  - 6abad29f66 Fixed pylint errors
  - 8ae6ba1290 Merge branch '2015.5' of https://github.com/saltstack/salt into Fix-ssh_known_host-not-taking-port-into-account

• **PR #25573**: (EvaSDK) Do not execute bootstrap script twice @ 2015-07-21 18:20:04 UTC
  - **PR #25465**: (EvaSDK) 2015.5.3 LXC module fixes (refs: #25573)
  - df74f2c3ad Merge pull request #25573 from EvaSDK/2015.5.3-lxc-fixes
  - 49ec99fca1 Use a more persistent tmp directory
  - 96a672f8e0 Do not execute bootstrap script twice

• **ISSUE #25532**: (attiasr) salt/modules/win_pkg.py list_pkgs is broken (encoding issues) (refs: #25580, #25556)

• **PR #25580**: (attiasr) use explicit utf-8 decoding (#25532) @ 2015-07-21 15:40:49 UTC
  - 79aa89d779 Merge pull request #25580 from attiasr/patch-1
  - 4b7dc9f8e0 use explicit utf-8 decoding (#25532)

• **ISSUE #25206**: (jfindlay) fullname issues with user.add state on windows (refs: #25568)

• **PR #25568**: (twangboy) Fixed win_useradd module to add fullname @ 2015-07-21 14:30:25 UTC
  - 6edf196533 Merge pull request #25568 from twangboy/fix_25206
  - fbbe445c6d Commented out a pylint error
  - 4b56dc3893 Fixed win_useradd module to add fullname

• **ISSUE #21041**: (deuscapturus) state module gem.installed not working on Windows. (refs: #25430, #25561, #25428)

• **PR #25561**: (twangboy) Fixed the gem module to work on windows... without injection @ 2015-07-20 21:12:15 UTC
  - **PR #25428**: (twangboy) Fixed the gem module to work on windows (refs: #25561)
  - 3c3206b669 Merge pull request #25561 from twangboy/fix_21041_again
  - aaf3b3dcd0 Fixed some line and style issues
- e6d0e5cda7 Merge branch '2015.5' of https://github.com/saltstack/salt into fix_21041_again

- **PR #25521** (cachedout) Fix outputter for state.orch @ 2015-07-20 19:30:14 UTC
  - 9e19142c35 Merge pull request #25521 from cachedout/orch_outputter
  - ea40816621 Try/except
  - dd609eb440 Fix outputter for state.orch

- **PR #25563** (basepi) [2015.5] Merge forward from 2014.7 to 2015.5 @ 2015-07-20 19:27:36 UTC
  - 2117ac8022 Merge pull request #25563 from basepi/merge-forward-2015.5
  - 3bf2f1a722 Merge remote-tracking branch 'upstream/2014.7' into merge-forward-2015.5
  - 09ebaceca8 Merge pull request #25416 from cachedout/str_2014_7
    * cc514938a8 Fix broken keyword
      - d67491bb80 Removed the logger as it's not used anymore
      - 5008bfee96 Merge branch '2015.5' of https://github.com/saltstack/salt into fix_21041_again

- **PR #25559** (cachedout) Lint win_pkg @ 2015-07-20 17:46:29 UTC
  - 50c257b1d5 Merge pull request #25559 from cachedout/lint_win_pkg
  - 53a0add99 Lint win_pkg

- **ISSUE #25532** (attiasr) salt/modules/win_pkg.py list_pkgs is broken (encoding issues) (refs: #25580, #25556)

- **PR #25556** (attiasr) fix for #25532 @ 2015-07-20 17:45:11 UTC
  - 7c7015ccda Merge pull request #25556 from attiasr/patch-1
  - 9b224e8d4e fix for #25532

- **ISSUE #25538** (stanislavb) S3 ext_pillar configuration requires verify_ssl (refs: #25554)

- **PR #25554** (jfindlay) verify_ssl=True for s3 ext pillar @ 2015-07-20 17:43:38 UTC
  - 3c73dab2ce Merge pull request #25554 from jfindlay/verify_ssl
  - ca3ab4e737 verify_ssl=True for s3 ext pillar

- **PR #25551** (rallytime) Backport #25530 to 2015.5 @ 2015-07-20 17:43:00 UTC
  - **PR #25530** (andre-luiz-dos-santos) The variable name must be last (refs: #25551)
  - e3e2e6718e Merge pull request #25551 from rallytime/bp-25530
  - df5003d7f9 The variable name must be last

- **PR #25533** (attiasr) port 445 for windows bootstraping @ 2015-07-20 15:13:06 UTC
  - 3e3441937f Merge pull request #25533 from attiasr/patch-2
  - c7bf68597 fix windows bootstrapping

- **ISSUE #25432** (gtmanfred) [2015.5.3][raet] raet error with SaltRaetRoadStackJoiner (refs: #25525)

- **PR #25525** (gtmanfred) add make _prepare an alias for postinitio @ 2015-07-20 15:12:38 UTC
  - 7fc051f56d Merge pull request #25525 from gtmanfred/2015.5
  - 43950a5bc5 add make _prepare an alias for postinitio

- **ISSUE #25511** (rallytime) Make provider --> driver change backward compatible (refs: #25519)
• ISSUE #23574: (CedNantes) Failed to Deploy Salt-Minion on a Win 2012 R2 using vmware Cloud Driver from Develop branch (refs: #25519)

• PR #25519: (rallytime) Backport vmware driver to 2015.5 branch @ 2015-07-20 15:11:26 UTC
  - 725d1a40d0 Merge pull request #25519 from rallytime/backport_vmware
  - 35e13eeff1d Don't reference driver in older salt versions
  - f011890217 Add vmware back-port change to release notes
  - 0f4f60b38 Backport vmware driver to 2015.5 branch

• PR #25542: (Oro) Fix hipchat.send_message when using API v2 @ 2015-07-20 15:09:13 UTC
  - 2f0d695bc0 Merge pull request #25542 from Oro/fix-hipchat-v2-sendmessage
  - 3a9f5b037f Fix hipchat.send_message when using API v2

• PR #25531: (rallytime) Back-port #25529 to 2015.5 @ 2015-07-18 19:16:10 UTC
  - PR #25529: (davidjb) Fix minor typo in best practice example (refs: #25531)
  - 390aa7d28f Merge pull request #25531 from rallytime/bp-25529
  - 3e24381439 Fix minor typo in best practice example

• PR #25528: (davidjb) Fix typo in extend declaration doco @ 2015-07-18 14:22:06 UTC
  - 6e811bfdd2 Merge pull request #25528 from davidjb/patch-7
  - bfc4f6d85 Fix typo in extend declaration doco

• ISSUE #25486: (whiteinge) Highstate outputter not used for state.apply (refs: #25517)

• PR #25517: (rallytime) Back-port #25486 to 2015.5 @ 2015-07-17 21:49:26 UTC
  - PR #25485: (attiasr) fix file downloads on windows
  - b9abd723a7 Merge pull request #25517 from rallytime/bp-25485
  - 6c2f3180c2 fix file downloads on windows

• ISSUE #25493: (blackduckx) Issue with job_args on schedule.add command (refs: #25513)

• PR #25513: (garethgreenaway) fixes to schedule.add documentation in 2015.5 @ 2015-07-17 17:03:24 UTC
  - daf03efb7c Merge pull request #25513 from garethgreenaway/25493_2015_5_schedule_add_documentation
  - bc2414bc4d Fixing documentation for schedule.add when using the job_args parameter, value needs to be be in quotes for the value to be passed in as an array.

• PR #25465: (EvaSDK) 2015.5.3 LXC module fixes (refs: #25573) @ 2015-07-17 15:57:54 UTC
  - 48050cd287 Merge pull request #25465 from EvaSDK/2015.5.3-lxc-fixes
  - 170eb52cc4 Fix use of undefined cmd when install of bootstrap script fails
  - 86118f4a7b Install bootstrap script like dns and systemd check scripts in container
  - 9786d56e2 Error out if configdir could not be created when preparing LXC container
- 41b6c3c2bf Fix typo in redirecting shell output to /dev/null
- 456393d4db Fix DNS script cleanup

- **ISSUE** saltstack/salt-bootstrap#611: (BretFisher) SmartOS doesn’t detect missing git, fails install (refs: #25506)
- **ISSUE** saltstack/salt-bootstrap#607: (bechtoldt) (git install) change source of init scripts for debian based systems (refs: #25506)
- **ISSUE** saltstack/salt-bootstrap#602: (rallytime) Ubuntu 14.10 Won’t Bootstrap with Latest Stable (refs: #25506)
- **ISSUE** saltstack/salt-bootstrap#598: (babilen) Installation fails on Debian 7 due to missing easy_install (refs: #25506)
- **ISSUE** saltstack/salt#25456: (julienlavergne) [2015.8.0rc1] salt-bootstrap fails to install salt master (refs: #25506)
- **ISSUE** saltstack/salt#25270: (iggy) [2015.8.0rc1] salt-bootstrap fails to properly install a minion (refs: #25506)
- **ISSUE** #619: (syphernl) Only send over changed files during state.highstate (refs: `saltstack/salt-bootstrap#621`)

  - **PR** saltstack/salt-bootstrap#625: (hasues) Modify bootstrap-salt.sh unbound error with CON-FIG_PROTECT_MASK for Gentoo (refs: #25506)
  - **PR** saltstack/salt-bootstrap#624: (BretFisher) fix config and etc path on SmartOS (refs: #25506)
  - **PR** saltstack/salt-bootstrap#621: (lomeroe) python-jinja2 has been moved to rhui-…server-releases-optional repo… (refs: #25506)
  - **PR** saltstack/salt-bootstrap#606: (babilen) Switch to httpredir.debian.org as default Debian mirror (refs: #25506)
  - **PR** saltstack/salt-bootstrap#455: (denmat) PR: Issue 394 (refs: #25506)

- **PR** #25506: (s0undt3ch) [2015.5] Update bootstrap script to latest stable release, v2015.07.17 @ 2015-07-17 15:40:38 UTC

  - f85f2b49fd Merge pull request #25506 from s0undt3ch/hotfix/bootstrap-script
  - ab6aaa6e60 Update bootstrap script to latest stable release, v2015.07.17

- **ISSUE** #25454: (mschiff) Regression: salt 2015.5 not working in secure chroot anymore. (refs: #25498)
- **PR** #25498: (jfindlay) only read /proc/1/cmdline if it exists @ 2015-07-17 15:35:33 UTC

  - c8caf406b2 Merge pull request #25498 from jfindlay/jail_init
  - c63a6c206f only read /proc/1/cmdline if it exists

- **PR** #25487: (rallytime) Back-port #25464 to 2015.5 @ 2015-07-16 16:58:36 UTC

  - **PR** #25464: (iquast) docfix: "cache_jobs: False" => grains_cache: False" (refs: #25487)
  - 3f695a17cf Merge pull request #25487 from rallytime/bp-25464
  - e947d8ec5a docfix: "cache_jobs: False" => grains_cache: False"

- **PR** #25482: (oeuftete) Fix docker.running detection of running container @ 2015-07-16 16:58:29 UTC

  - 331808eb7d Merge pull request #25482 from oeuftete/docker-running-is-running-fix-2015-5
  - b69379ba50 Fix docker.running detection of running container

- **ISSUE** #25384: (rickh563) pyopenssl 0.14 requirement in 2015.5.3 does not work in RHEL6 : ZD-364 (refs: #25468)
- **PR** #25468: (joejulian) Add support for pyOpenSSL > 0.10 @ 2015-07-16 15:10:30 UTC
7a20ebbf46 Merge pull request #25468 from joejulian/use_pyopenssl_0_10
1b7a56aa38 Add support for pyOpenSSL > 0.10

**PR #25467:** (rallytime) Add lxml dependency to opennebula docs @ 2015-07-16 15:09:57 UTC
- d169905170 Merge pull request #25467 from rallytime/lxml_dep
- d326f4f86 Add lxml dependency to opennebula docs

**ISSUE #25250:** (wipfs) 'force' option in copy state deletes target file (refs: #25461, #25710)

**ISSUE #24647:** (nmadhok) salt.states.file.copy does not copy the file if it already exists with force=True (refs: #25461)

**PR #25461:** (jahamn) Update file, if force option and content not same @ 2015-07-15 20:15:07 UTC
- 89649456e0 Merge pull request #25461 from jahamn/fixed-file.copy-force-option-deleting-files-without-updating-them
- 32c1ebbb5 Update file, if force option and content not same

**ISSUE #25431:** (namcois) Digital Ocean v2 reducing API calls by adding per_page (refs: #25438)

**PR #25438:** (rallytime) Reduce digital_ocean_v2 API call frequency @ 2015-07-15 19:40:18 UTC
- 146a81b7c3 Merge pull request #25438 from rallytime/do_v2
- faf4ea2a3 Add page number change release notes
- da6ab82837 Reduce digital_ocean_v2 API call frequency

**PR #25457:** (jacksontj) Saltnado @ 2015-07-15 17:50:12 UTC
- PR #25427: (tony-cocco) Saltnado runner client results in blocking call despite being set-up as Runner.async (refs: #25457)
- cb98d79cdd Merge pull request #25457 from jacksontj/saltnado
- bc32f66b98 Add runner_async endpoint to saltnado
- b043fa9b05 Better name of method process manager is starting

**PR #25459:** (jahamn) Fixed 'defulats' typo in verify.py @ 2015-07-15 16:53:06 UTC
- 3f72eb5486 Merge pull request #25459 from jahamn/fix-defulats-typo-in-verify.py
- 9bafdf19f6 Fixed 'defulats' typo in verify.py

**PR #25426:** (jquast) bugfix: trailing "...done" in rabbitmq output (backport from 'develop' to 2015.5) @ 2015-07-15 14:48:05 UTC
- 73566188cf Merge pull request #25426 from jquast/2015.5
- 005a7ca2a3 bugfix: trailing "...done" in rabbitmq output

**PR #25433:** (jleroy) Support for IPv6 addresses scopes in network.interfaces (ifconfig) @ 2015-07-15 14:44:09 UTC
- PR #25151: (jleroy) Support for IPv6 addresses scopes in network.interfaces (refs: #25274, #25433)
- cfec990062 Merge pull request #25433 from jleroy/ipv6-scope-support-ifconfig
- bc36d05c0c Support for IPv6 addresses scopes in network.interfaces (ifconfig)

**ISSUE #21041:** (deuscapturus) state module gem.installed not working on Windows. (refs: #25430, #25561, #25428)

**PR #25430:** (twangboy) Disabled rbenv execution module for Windows @ 2015-07-15 14:41:18 UTC
Salt Documentation, Release 3002.2

- a425230c19 Merge pull request #25430 from twangboy/fix_21041_2
- 242fc21765 Disabled rbenv execution module for Windows
  - 8b2dc681f9 Fixed the gem module to work on windows... without injection
  - c7466e7894 Fixes ssh_known_host to take port into account

- **ISSUE #1846**: (seanchannel) development dependencies
- **PR #25420**: (techhat) Move S3 to use AWS Signature Version 4 @ 2015-07-14 22:03:09 UTC
  - 9313804e27 Merge pull request #25420 from techhat/s3sig4
  - 3edf3a14e2 linting
  - c63c2356be Move S3 to use AWS Signature Version 4

- **ISSUE #20441**: (deuscapturus) State module file.managed returns an error on Windows and test=Test (refs: #25418)
- **PR #25418**: (twangboy) Fixed problem with file.managed test=True @ 2015-07-14 21:26:59 UTC
  - 30a41d5f51 Merge pull request #25418 from twangboy/fix_20441
  - d8957856cd Fixed problem with file.managed test=True

- **PR #25417**: (ahus1) extended documentation about dependencies for dig module @ 2015-07-14 20:49:51 UTC
  - 3805677e93 Merge pull request #25417 from ahus1/patch-1
  - 3cd194ebaf Update dig.py
  - 287f8f76e3 extended documentation about dependencies

- **PR #25411**: (basepi) [2015.5] Merge forward from 2014.7 to 2015.5 @ 2015-07-14 17:55:26 UTC
  - 4d929071e1 Merge pull request #25411 from basepi/merge-forward-2015.5
  - 33d2451fef Merge remote-tracking branch 'upstream/2014.7' into merge-forward-2015.5
  - 2a1dd1113f Merge pull request #25375 from cachedout/config_fix_2014_7
    - c041f2905f Fix error in config.py for master_type
  - 2590e23d48 Merge pull request #25324 from jacobhammons/doc-theme-updates
    - 88f5fcf58d Latest help theme updates

- **PR #25406**: (anlutro) Force arguments to aptpkg.version_cmp into strings @ 2015-07-14 16:15:41 UTC
  - 81bed62d16 Merge pull request #25406 from alprs/fix-apt_version_cmp_types
  - d56e61d341 force arguments to apt_pkg.version_compare into strings

- **PR #25408**: (rallytime) Back-port #25399 to 2015.5 @ 2015-07-14 16:09:06 UTC
  - **PR #25399**: (jarpy) Demonstrate per-minion client_acl. (refs: #25408)
    - cd9ea63ff2 Merge pull request #25408 from rallytime/bp-25399
    - da9c0eb673 Typo in client_acl ref doc.
    - 50e0bafe270 Demonstrate per-minion client_acl.

- **PR #25240**: (tankywoo) file make os.walk only be called one @ 2015-07-14 16:04:49 UTC
  - ef9f6b00ce0 Merge pull request #25240 from tankywoo/fix-files-os-walk-multiple-times
  - 8044def1c0 file make os.walk only be called one
- **PR #25395**: (rallytime) Back-port #25389 to 2015.5 @ 2015-07-14 03:26:34 UTC
  - **PR #25389**: (l2ol33rt) Adding entropy note for gpg renderer (refs: #25395)
  - d02f388b08 Merge pull request #25395 from rallytime/bp-25389
  - a086e5ad35 Adding entropy note
- **PR #25392**: (rallytime) Back-port #25256 to 2015.5 @ 2015-07-14 03:25:13 UTC
  - **PR #25256**: (yanatan16) Don't assume source_hash exists (refs: #25392)
  - 008e3295c6 Merge pull request #25392 from rallytime/bp-25256
  - 6b2da4d582 Don't assume source_hash exists
- **PR #25398**: (twangboy) Fix date @ 2015-07-14 03:21:17 UTC
  - 3f278963ae Merge pull request #25398 from twangboy/fix_date
  - 52824f9602 Added /V1 /Z to remove scheduled task after run
  - a055cca79f Changed date of scheduled task to work in other locales
- **PR #25397**: (GideonRed-zz) Introduce standard error output when cli exits with non-zero status @ 2015-07-14 03:20:24 UTC
  - 978df9f117 Merge pull request #25397 from GideonRed/2015.5
  - ea7ab27f31 Introduce standard error output when cli exits with non-zero status
- **ISSUE #24444**: (michaelkrupp) file.managed does not handle dead symlinks (refs: #25383)
- **PR #25386**: (cachedout) Lint #25383 @ 2015-07-13 21:01:10 UTC
  - **PR #25383**: (jahamn) Fix manage_file function in salt/modules/file.py to handle broken sym... (refs: #25386)
  - 09442abbde Merge pull request #25386 from cachedout/lint_25383
  - 7694299170 Lint #25383
- **ISSUE #24444**: (michaelkrupp) file.managed does not handle dead symlinks (refs: #25383)
- **PR #25383**: (jahamn) Fix manage_file function in salt/modules/file.py to handle broken sym... (refs: #25386) @ 2015-07-13 20:58:23 UTC
  - 47bce61f5 Merge pull request #25383 from jahamn/Fix-file.managed_not_handling_dead_symlinks
  - ab17aa160e Fix manage_file function in salt/modules/file.py to handle broken symlinks
- **PR #25369**: (anlutro) Fix aptpkg.version_cmp @ 2015-07-13 20:18:45 UTC
  - c9e10e7aa Merge pull request #25369 from alprs/fix-apt_version_cmp
  - 6391b15b3e fix aptpkg.version_cmp
- **ISSUE #25337**: (eliasp) salt-call from non-existend cwd backtraces (refs: #25379)
- **PR #25379**: (jfindlay) check for cwd before getting it @ 2015-07-13 19:50:27 UTC
  - beb0238392 Merge pull request #25379 from jfindlay/check_cwd
  - 4e5447ff38 check for cwd before getting it
- **ISSUE #25320**: (podloucky-init) zypper module list_upgrades broken (2015.5.2) (refs: #25334)
- **PR #25334**: (jfindlay) return all cmd info back to zypper fcn @ 2015-07-13 17:05:29 UTC
  - 274622ad9b Merge pull request #25334 from jfindlay/fix_zyp
Salmondocumentation, Release 3002.2

- c1e633903e return all cmd info back to zypper fcn

- PR #25339: (jfindlay) update orchestration docs @ 2015-07-13 16:04:26 UTC
  - 71859c6593 Merge pull request #25339 from jfindlay/orch_doc
  - 0447808d95 clarify, motivate orchestration docs

- ISSUE #22241: (masterkorp) Salt master not properly generating the map (refs: #25358)

- PR #25358: (dkiser) Deep merge of pillar lists (refs: #26016) @ 2015-07-13 15:51:01 UTC
  - 90a1ca02a3 Merge pull request #25358 from dkiser/22241_pillar_merge_lists
  - d030e289b3 Deep merge of pillar lists

- ISSUE #25281: (shinshenjs) Unless usage in Official Doc syntax error? (refs: #25346)

- PR #25346: (bechtoldt) set correct indention in states/requisites.rst (docs), fixes #25281 @ 2015-07-13 15:34:45 UTC
  - 66c619fd71 Merge pull request #25346 from bechtoldt/issue25281
  - 8eb2ac1dbe set correct indention in states/requisites.rst (docs), fixes #25281

- PR #25336: (terminalmage) Don’t try to read init binary if it wasn’t found @ 2015-07-13 09:45:30 UTC
  - b122ed931d Merge pull request #25336 from terminalmage/fix-init-grain
  - f473918a53 Don’t try to read init binary if it wasn’t found

- PR #25350: (davidjb) Fix documentation for file.blockreplace @ 2015-07-13 03:41:20 UTC
  - 1805bafc89 Merge pull request #25350 from davidjb/patch-4
  - e13a9fd74e Fix documentation for file.blockreplace

- ISSUE #19288: (oba11) AssociatePublicIpAddress doesn’t work with salt-cloud 2014.7.0 (refs: #25326, #20972)

- PR #25326: (rallytime) Back-port #20972 to 2015.5 @ 2015-07-10 18:49:44 UTC
  - PR #20972: (JohannesEbke) Fix interface cleanup when using AssociatePublicIpAddress in #19288 (refs: #25326)
  - b0196fccb7 Merge pull request #25326 from rallytime/bp-20972
  - 51c941593d Also fix cleanup of interfaces when using AssociatePublicIpAddress in #19288

- ISSUE #24433: (chrimi) Salt locale state fails, if locale has not been generated (refs: #25290)

- PR #25327: (rallytime) Back-port #25290 to 2015.5 @ 2015-07-10 18:49:37 UTC
  - PR #25290: (pcdummy) Simple fix for locale.present on Ubuntu. (refs: #25327)
  - 28450d124e Merge pull request #25327 from rallytime/bp-25290
  - 20032c55f3 Simple fix for locale.present on Ubuntu.

- ISSUE #24827: (yermulnik) locale.present doesn’t generate locales (refs: #25309)

- PR #25328: (rallytime) Back-port #25309 to 2015.5 @ 2015-07-10 17:22:59 UTC
  - PR #25309: (davidjb) Format /etc/locale.gen correctly in salt.modules.localemod.gen_locale (refs: #25328)
  - 8f666a24f3 Merge pull request #25328 from rallytime/bp-25309
  - 44d44ec574 Format /etc/locale.gen correctly on gen.locale

- PR #25322: (jacobhammons) version change to 2015.5.3 @ 2015-07-10 16:11:24 UTC
- 0a33a1d8bb Merge pull request #25322 from jacobhammons/release-2015.5.3
- 19f88920fa version change to 2015.5.3

- **PR #25308**: (jacksontj) Make clear commands trace level logging @ 2015-07-10 14:20:06 UTC
  - **PR #24737**: (jacksontj) Move AES command logging to trace (refs: #25308)
  - 2f0f59b6cb Merge pull request #25308 from jacksontj/2015.5
  - 60fc770ba2 Make clear commands trace level logging

- **ISSUE #24520**: (nvx) Tomcat module fails to extract version number from snapshot builds (2015.5 regression) (refs: #24927)

- **PR #25269**: (jfindlay) Extract tomcat war version @ 2015-07-10 01:28:21 UTC
  - **PR #24927**: (egarbi) Tomcat module fails to extract version number from snapshot builds #2... (refs: #25269)
  - 9b6646d578 Merge pull request #25269 from jfindlay/tomcat
  - fd4ca172d consolidate tomcat exec and state version extract
  - 59dc833567 update tomcat war_deployed state tests
  - edca458b6c Fixed 2 blank lines around import re
  - 7e528d1050 Tomcat module fails to extract version number from snapshot builds #24520

- **ISSUE #18808**: (amendlik) Add command line argument to select pillar environment (refs: #25238)

- **PR #25238**: (DmitryKuzmenko) Pillarenv backport 2015.5 @ 2015-07-10 01:25:07 UTC
  - 0f82ac3e30 Merge pull request #25238 from DSRCompany/pillarenv_backport_2015.5
  - 98792eb179 Pillarenv support in minion config, cp and cmdmod modules.
  - 88ff576f39 Support pillarenv cmdline in state.sls. Backport of PR #23719

- **ISSUE #13943**: (Supermathie) Powershell commands that expect input hang forever (refs: #25299)

- **PR #25299**: (twangboy) Added -NonInteractive so powershell doesn't hang waiting for input @ 2015-07-09 21:00:16 UTC
  - 219d4cad9c Merge pull request #25299 from twangboy/fix_13943
  - c05889031f Added -NonInteractive so powershell doesn't hang waiting for input

- **PR #25301**: (jacobhammons) bug fix for module function display in help @ 2015-07-09 20:46:34 UTC
  - 1c43892a80 Merge pull request #25301 from jacobhammons/doc-bugs
  - f6561289af bug fix for module function display in help

- **ISSUE #25277**: (jacobhammons) CherryPy recommended versions (refs: #25279)

- **PR #25279**: (jacobhammons) Additional docs on external and master job cache, assorted doc fixes @ 2015-07-09 16:46:26 UTC
  - 68149bc686 Merge pull request #25279 from jacobhammons/job-cache-docs
  - 57dfa92d5a Fixed typos
  - 2f9e5b9125 Additional docs on external and master job cache, assorted doc fixes Refs #25277

- **ISSUE #25268**: (lichtamberg) Salt not working anymore in 2015.8/develop: ValueError: ‘scope’ is not in list (refs: #25274)

- **PR #25274**: (jleroy) Fix for issue #25268 @ 2015-07-09 13:36:26 UTC
Salt Documentation, Release 3002.2

- **PR #25151**: (jleroy) Support for IPv6 addresses scopes in network.interfaces (refs: #25274, #25433)
  - 972fa2fb54 Merge pull request #25274 from jleroy/25268-fix
  - 2ce69d204b Fix for issue #25268

- **PR #25272**: (twangboy) Fixed problem with service not starting @ 2015-07-08 23:29:48 UTC
  - 8ebb73df2d Merge pull request #25272 from twangboy/service
  - e61eeba48b Fixed problem with service not starting

- **ISSUE #25223**: (nmadhok) Runner occasionally fails with a RuntimeError when fired by a reactor (refs: #25225)

- **PR #25225**: (nmadhok) Backporting fix for issue #25223 on 2015.5 branch @ 2015-07-08 15:16:18 UTC
  - c6fd2356c Merge pull request #25225 from nmadhok/client-runtime-fix-backport-2015-2
  - 391b7d6730 Backporting fix for issue #25223 on 2015.2 branch

- **PR #25214**: (rallytime) A couple of doc fixes for the http tutorial @ 2015-07-07 22:23:07 UTC
  - 207fbac9c4 Merge pull request #25214 from rallytime/http_doc
  - d0b61f3fc Architectural improvements for the http tutorial

- **ISSUE #24272**: (rallytime) Fix boto_vpc_test moto version check (refs: #25194)

- **PR #25194**: (rallytime) Update moto version check in boto_vpc_test and update min version @ 2015-07-07 18:27:32 UTC
  - 9d5d9a8e Merge pull request #25194 from rallytime/fx-24272
  - f959e165a1 Clean up imports
  - fbc9d6b Fix PyLint
  - fe25614 Update moto version check in boto_vpc_test and update min version

- **PR #25205**: (basepi) Update releasecandidate docs @ 2015-07-07 15:25:24 UTC
  - a3e94b5c28 Merge pull request #25205 from basepi/releasecandidatedocs
  - 452884fda4 Update releasecandidate docs

- **PR #25187**: (UtahDave) Doc fixes: Fix misspelling and remove extraneous double spaces @ 2015-07-07 01:07:04 UTC
  - fbaf39a46 Merge pull request #25187 from UtahDave/fix_misspelling
  - 65abb63003 remove some extraneous double spaces
  - c43b2a5 fix misspelling

- **PR #25182**: (cachedout) Try to re-pack long floats as strs @ 2015-07-07 01:06:43 UTC
  - ddee90ce23 Merge pull request #25182 from cachedout/pack_long_floats
  - a192eef7e Try to re-pack long ints as strs

- **ISSUE #23822**: (sidcarter) Zip file extracted permissions are incorrect (refs: #25128)

- **PR #25185**: (rallytime) Back-port #25128 to 2015.5 @ 2015-07-07 00:58:00 UTC
  - PR #25128: (stiski) Use cmd_unzip to preserve permissions (refs: #25185)
  - df998b36 Merge pull request #2518 from rallytime/bp-25128
  - 1726057c8a Use cmd_unzip to preserve permissions

- **PR #25181**: (rallytime) Back-port #25102 to 2015.5 @ 2015-07-07 00:57:13 UTC
- **PR #25102**: (derBroBro) Update win_network.py (refs: #25181)
- df0bb8c831 Merge pull request #25181 from rallytime/bp-25102
- 64df14417 Update win_network.py
- 67895b8e88 Update win_network.py

- **ISSUE #24301**: (iggy) influxdb_user and influxdb_database states need virtual functions (refs: #25059)
- **PR #25179**: (rallytime) Back-port #25059 to 2015.5 @ 2015-07-07 00:56:44 UTC
- PR #25059: (babilen) Add virtual functions to influxdb state modules (refs: #25179)
- 04fdd7b0ee Merge pull request #25179 from rallytime/bp-25059
- 1eeefbd2ab Add virtual functions to influxdb state modules

- **ISSUE #18919**: (giner) Windows: pkg.refresh_db returns false-positive success (refs: #25196)
- **PR #25196**: (twangboy) Fixed #18919 false-positive on pkg.refresh @ 2015-07-07 00:24:13 UTC
- 58b7d0e653 Merge pull request #25196 from twangboy/pkg_refresh
- 12fcd1062 Fixed #18919 false-positive on pkg.refresh

- **PR #25180**: (rallytime) Back-port #25088 to 2015.5 @ 2015-07-06 20:33:45 UTC
- PR #25088: (supertom) Update (refs: #25180)
- 4a406aca45 Merge pull request #25180 from rallytime/bp-25088
- 4078c8d2b5 added message recommending JSON file be used if the libcloud version is >= 0.17.0

- **PR #25191**: (basepi) Add extrndest back to fileclient.is_cached in 2015.5 @ 2015-07-06 19:35:24 UTC
- PR #25117: (basepi) Fix fileclient.is_cached (refs: #25191)
- 01ed062ca7 Merge pull request #25191 from basepi/fix/fileclient.is_cached
- 5afa74f4408 Add back in the extrndest stuff (which is now in develop)

- **ISSUE #25016**: (martinhoefling) salt-run doc.execution fails with AttributeError (refs: #25020)
- **PR #25175**: (rallytime) Back-port #25020 to 2015.5 @ 2015-07-06 18:53:19 UTC
- PR #25020: (martinhoefling) Fix for issue #25016 (refs: #25175)
- a9404eaa5c Merge pull request #25175 from rallytime/bp-25020
- da2e1704ea Fix for issue #25016

- **ISSUE #21879**: (bechtoldt) Reference pages in documentation are outdated again (refs: #25019, #21880)
- **ISSUE #19262**: (bechtoldt) salt.pillar.file_tree doesn't appear in the documentation (refs: #25019)
- **PR #25173**: (rallytime) Partial back-port of #25019 @ 2015-07-06 18:52:59 UTC
- PR #25019: (bechtoldt) add missing module documentation to references (refs: #25173)
- PR #24421: (bechtoldt) Add missing module documentation (refs: #25019)
- PR #21880: (bechtoldt) update references, fixes #21879 (refs: #25019)
- PR #20039: (bechtoldt) completing some doc references (refs: #25019)
- c70f6c65b8 Merge pull request #25173 from rallytime/partial-bp-25019
- c602436b64 Partial backport of #25019

- **PR #25171**: (rallytime) Back-port #25001 to 2015.5 @ 2015-07-06 18:51:53 UTC
- **PR #25001**: (jasonkeene) Add docs for key arg in ssh_known_hosts.present (refs: #25171)
- c5ba9a90ba Merge pull request #25171 from rallytime/bp-25001
- a891108793 Add docs for key arg in ssh_known_hosts.present

- **PR #25170**: (rallytime) Back-port #24982 to 2015.5 @ 2015-07-06 16:34:43 UTC
  - PR #24982: (asyncsrc) ec2 network_interfaces fix (refs: #25170)
  - 3e06602545 Merge pull request #25170 from rallytime/bp-24982
  - 3e6ab3ae9 ec2 network_interfaces fix

- **PR #25161**: (aneeshusa) Allow checking for non-normalized systemd units. @ 2015-07-06 15:15:31 UTC
  - 09602808a0 Merge pull request #25161 from aneeshusa/allow-checking-non-normalized-systemd-service-availability
  - 4b4d544fe70 Allow checking for non-normalized systemd units.

- **PR #25151**: (jleroy) Support for IPv6 addresses scopes in network.interfaces (refs: #25274, #25433) @ 2015-07-06 14:43:03 UTC
  - 3599b8abab Merge pull request #25151 from jleroy/ipv6-scope-support
  - edce034e6c Support for IPv6 addresses scopes in network.interfaces

- **ISSUE #24979**: (mavenAtHouzz) [Discussion] Support for more than 1 netapi.rest_tornado server process (refs: #25149)

- **PR #25166**: (cachedout) Lint #25149 @ 2015-07-06 14:40:29 UTC
  - PR #25149: (jacksontj) Saltnado multiprocess support (refs: #25166)
  - 66d6365a9f Merge pull request #25166 from cachedout/lint_saltnado
  - 2fe167edf8 Lint #25149

- **ISSUE #24979**: (mavenAtHouzz) [Discussion] Support for more than 1 netapi.rest_tornado server process (refs: #25149)

- **PR #25149**: (jacksontj) Saltnado multiprocess support (refs: #25166) @ 2015-07-06 14:38:43 UTC
  - 2f1bad1c01 Merge pull request #25149 from jacksontj/saltnado
  - 6aa5548e2d Enable multiprocess support in saltnado
  - 9a1351eada Change print to logger, so we can set a level and log exc_info

- **PR #25120**: (d--j) add missing continue for exception case @ 2015-07-02 19:38:45 UTC
  - a723af0f10 Merge pull request #25120 from d--j/patch-2
  - 81d5d1dce add missing continue for error case

- **PR #25117**: (basepi) Fix fileclient.is_cached (refs: #25191) @ 2015-07-02 19:38:26 UTC
  - 6a62222241a Merge pull request #25117 from basepi/fix.fileclient.is_cached
  - 38e243fd8 Add fix from merge forward
  - 52f35761a Add import
  - 23c32a7518 Backport develop version of salt.fileclient.is_cached

- **PR #25087**: (0xf10e) Fix execution module for glance - now based on 2015.5! @ 2015-07-02 19:36:27 UTC
  - c80990ba4f Merge pull request #25087 from 0xf10e/fix_glance_2015.5
- 7749cc081c PEP8 W601...
- bbda079fa5 fix pylint E302, E502, E713, E1305
- 3baacc72b4 use Glance API v1 for image_create
- c3d6134da1 making pylint marginally happier
- 19a20bf228 get valid properties for image_show() from the schema for "image"
- 0c6a61173a add some debugging, fix a few AttributeError
- aceca0e20d fix return of glance.image_show()
- a47309e7dd fix return of image_list
- 6f923edfab Change confusing "nt_ks" to "g_client"
- fa2bd1a79c bit of docs/comments in image_create()
- 5c34d0c494 merge 439b1e42053239b into 2015.5
- 7a3cf27948 update attributes for image_show output
- b1bec01f1a fix retry w/ user/pass if token fails
- 2f4ef6683c update attributes for image_list output
- eef3bc7048 use _auth() from neutron plus keystoneclient,

**PR #25129:** (basepi) [2015.5] Merge forward from 2014.7 to 2015.5 @ 2015-07-02 17:37:40 UTC
- 549ee47420 Merge pull request #25129 from basepi/merge-forward-2015.5
- 187268d879 Merge remote-tracking branch 'upstream/2014.7' into merge-forward-2015.5
- 36d53ef59e Merge pull request #25093 from jaybocc2/2014.7
  * 6a501ebda quick fix for issue #18447
- 38903a94a1 Merge pull request #25069 from puneek/patch-1
- f0b4e60e6b Update Documentation to clarify version added
- f8dc6030e7 Pylint updates, removing whitespace
- 532d315dd1 [Code Review update] renamed function to is_enabled from list_enabled
- 20b0462289 Update schedule.py
- 4b1171d7fb Add a helper module function called list_enabled

**PR saltstack/salt#24798:** (justinta) Revert "adding states/postgres_database unit test case." (refs: #25114)
- **PR saltstack/salt#24329:** (jayeshka) adding states/postgres_database unit test case. (refs: '#saltstack/salt#24798')

**PR #25114:** (jfindlay) Revert "Revert "adding states/postgres_database unit test case."" @ 2015-07-02 01:01:29 UTC
- 86f2791f2d Merge pull request #25114 from saltstack/revert-24798-revert-24329-postgres_database-states-unit-test
- 071ee44d41 Revert "Revert "adding states/postgres_database unit test case.""

**PR #24362:** (jayeshka) adding states/postgres_user unit test case. @ 2015-07-01 21:45:31 UTC
- bf8c7e7a9d Merge pull request #24362 from jayeshka/postgres_user-states-unit-test
- fd1d834688 adding states/postgres_user unit test case.

28.2. Previous Releases 5527
28.2.83 Salt 2015.5.5 Release Notes

release 2015-08-20

Version 2015.5.5 is a bugfix release for 2015.5.0.

Statistics

- Total Merges: 33
- Total Issue References: 28
- Total PR References: 39

Changelog for v2015.5.4..v2015.5.5

- ISSUE #26484: (thusoy) Git state leaks HTTPS user/pw to log (refs: #26486)
- ISSUE #26482: (thusoy) Git states doesn’t allow user-only auth (refs: #26483)
- PR #26486: (thusoy) Git: Don’t leak https user/pw to log @ 2015-08-20 16:04:52 UTC
  - PR #26483: (thusoy) Handle user-only http auth in git module (refs: #26486)
  - 28aa9b1058 Merge pull request #26486 from thusoy/git-confidential-auth
  - 5289165487 Git: Don’t leak https user/pw to log
- ISSUE #26432: (centromere) Documentation incorrectly references salt-key on the minion (refs: #26476)
- ISSUE #26403: (adelcast) Grains documentation incorrectly states they are static (refs: #26476)
- ISSUE #26329: (cro) Add note to eauth docs indicating default PAM service. (refs: #26476)
- ISSUE #26264: (grep4linux) state trees cannot have ‘dots’ in the name (refs: #26476)
- ISSUE #26233: (dove-young) pip install salt, then start master failed on Fedora 22 (refs: #26476)
- PR #26476: (jacobhammons) Minor doc bug fixes @ 2015-08-19 22:52:35 UTC
  - 679ba5ee0a Merge pull request #26476 from jacobhammons/doc-bugs
  - 499bd6378 Minor doc bug fixes Refs #26403 Refs #26432 Refs #26233 Refs #26264 Refs #26329
- ISSUE #26366: (GreatSnoopy) The development tree produces hanging, 100%cpu salt-master processes (refs: #26443)
• ISSUE #26301: (waynew) CPU pegged out running salt-master (after running command) (refs: #26443)

• ISSUE #25998: (driskell) Event subsystem discarding required events during --batch breaking it for slow running commands (refs: #26000)

• PR #26443: (cachedout) Fix connect issue in event init @ 2015-08-19 22:50:22 UTC
  – PR #26000: (driskell) Implement full event caching for subscribed tags (refs: #26443)
  – 42b8c1b3f4 Merge pull request #26443 from cachedout/fix_event_sub
  – 560977bc7e Fix connect issue in event init

• ISSUE #26434: (jfindlay) batch error when no minions match target (refs: #26445)

• PR #26445: (cachedout) Raise clean error when no minions targeted in batch mode @ 2015-08-19 22:50:07 UTC
  – d2df1a86ad Merge pull request #26445 from cachedout/issue_26343
  – 1600f3ecd7 Raise clean error when no minions targeted in batch mode

• ISSUE #26482: (thusoy) Git states doesn't allow user-only auth (refs: #26483)

• PR #26483: (thusoy) Handle user-only http auth in git module (refs: #26486) @ 2015-08-19 22:47:41 UTC
  – a9b28e9577 Merge pull request #26483 from thusoy/git-user-only-auth
  – 09fc934acc Handle user-only http auth in git module

• PR #26496: (jfindlay) add dateutil dependency reporting @ 2015-08-19 22:46:31 UTC
  – edc04930ae Merge pull request #26496 from jfindlay/dateutil
  – cbe330e78b add dateutil dependency reporting

• PR #26494: (cachedout) Remove unecessary debug statements @ 2015-08-19 20:46:00 UTC
  – 4ff53b842 Merge pull request #26494 from cachedout/remove_debug_statements
  – d717a43dce Remove unecessary debug statements

• PR #26465: (rallytime) Back-port #26457 to 2015.5 @ 2015-08-19 16:08:16 UTC
  – PR #26457: (arthurlogilab) docstring improvement for network.ping module execution (refs: #26465)
  – f46a0dab5d Merge pull request #26465 from rallytime/bp-26457
  – b3f638ff0f docstring improvement for network.ping module execution

• PR #26434: (s0undt3ch) Fix missed typo @ 2015-08-18 18:14:29 UTC
  – c1458980f3 Merge pull request #26434 from s0undt3ch/2015.5
  – 06dcaefca8 Fix missed typo

  – 7e94989403 mock pwd calls in pw_user exec mod test
  – 26f5b466f5 check for pwd on linux and BSD user exec mods
• ISSUE #24334: (afletch) autosign_timeout not honoured (refs: #26386)
• PR #26386: (jahamn) Fixes autosign_timeout usage in check_autosign_dir @ 2015-08-17 18:34:40 UTC
  – 709499438b Merge pull request #26386 from jahamn/fix-autosign_timeout
  – b2fa2ac9d3 Fixes autosign_timeout usage in check_autosign_dir
• ISSUE #25801: (themalkolm) Update docs that salt.states.winrepo requires roles:salt-master in grains. (refs: #26328)
• ISSUE #25562: (jefftucker) winrepo state does not run on masterless minion (refs: #26328)
• PR #26328: (twangboy)Removed salt-master role requirement (refs: #26402) @ 2015-08-17 18:30:17 UTC
  – 8d901d7b15 Merge pull request #26328 from twangboy/fix_25562
  – d4ca1dcbf Removed salt-master role requirement
• ISSUE #26327: (bradthurber)mount.mountedoptsincorrect"forcedunmountandmountbecauseoptions(tcp) changed" (refs: #26362)
• PR #26362: (garethgreenaway) Fixes to mount state. @ 2015-08-17 17:44:55 UTC
  – 74558f5743 Merge pull request #26362 from garethgreenaway/2015_5_26327_more_invisible_mount_options
  – cf532d46dd Some mount options are translated to different options once a share has been mounted, eg. when specifying a protocol for NFS as either tcp or udp this option is translated into either proto=tcp or proto=udp. Change adds a lookup dictionary for these options so that a re-mount isn’t forced each time.
• PR #26379: (s0undt3ch) [2015.5] Backport #26353 @ 2015-08-17 17:19:29 UTC
  – PR #26353: (sixninetynine) fixed a typo in setup.py (refs: #26379)
    – 7dbbd90c98 Merge pull request #26353 from s0undt3ch/issues/backport-26353
    – 33ed315c85 fixed Packaing -> Packaging typo and added a couple comments on the setuptools/distutils abstract methods
• ISSUE #26240: (0xf10e) keystone.user_get raises exception when user is not found (refs: #26277)
• PR #26277: (rallytime) Handle exception when user is not found in keystone.user_get @ 2015-08-14 19:41:59 UTC
  – bcca1b4c5a Merge pull request #26277 from rallytime/fixed-26240
  – 0b6977335e Clean it up
  – 5edabfd271 It’s a dict - git problems...
  – 39d3eb66f0 Log error and return error - make returns consistent.
  – 496474d862 Handle exception when user is not found in keystone.get_user
• ISSUE #24484: (bailsman) clouds/ec2.py: create_snapshot throws exception (refs: #26326)
• PR #26326: (rallytime) Make ec2.create_snapshot return less unwieldy and more relevant @ 2015-08-14 19:40:47 UTC
- 78be3a826f Merge pull request #26326 from rallytime/create_snapshot_return
- c5395db851 Make ec2.create_snapshot return less unwieldly and more relevant

- ISSUE #16179: (UtahDave) Salt Cloud -l debug includes the entire bootstrap script twice in its output (refs: #26306)
- PR #26306: (rallytime) Move VM creation details dict to log.trace @ 2015-08-14 17:39:52 UTC
  - 44e9d3063b Merge pull request #26306 from rallytime/fix-16179
  - 670464258f Move VM creation details dict to log.trace

28.2.84 Salt 2015.5.6 Release Notes

release 2015-10-13

Version 2015.5.6 is a bugfix release for 2015.5.0.

Statistics

- Total Merges: 145
- Total Issue References: 71
- Total PR References: 178
- Contributors: 53 (Arabus, JensRantil, PierreR, SaltyCharles, TheBigBear, abh, aboe76, anlutro, arthurlogilab, asyatkin, basepi, benhosmer, bersace, cachedout, carlpett, damonzheng, derphilipp, dmyerscough, dsumsky, efficks, eguven, garethgreenaway, hexedpackets, jacksontj, jacobhammons, jfindlay, jocjulian, johank, juliabrost, kev009, lorengordon, madprog, marccardinal, netroby, nmadhok, plastikos, rallytime, serge-p, spudfkc, stanislawb, styro, systembell, tankywoo, techhat, terminalmage, thatch45, tjstansell, twangboy, vakulich, vtek21, whiteinge, zmalone, zyio)

Security Fixes

CVE-2015-6941 The Windows user module and salt-cloud display passwords in log when log level is set to debug or more verbose.

For the Windows user module, the password is now replaced with the string XXX-REDACTED-XXX.

For salt-cloud, debug logging no longer displays win_password and sudo_password authentication credentials.

CVE-2015-6918 Git state/execution modules log HTTPS auth credentials when log level is set to debug or more verbose.

These credentials are now replaced with REDACTED in the debug output. Thanks to Andreas Stieger <asteiger@suse.com> for bringing this to our attention.
Changelog for v2015.5.5..v2015.5.6

Generated at: 2018-05-27 22:13:00 UTC

- **PR #27582**: (jfindlay) add 2015.5.6 release notes @ 2015-09-30 22:33:48 UTC
  - 304dc68f7f Merge pull request #27582 from jfindlay/2015.5
  - 4f0d55ca6a add 2015.5.6 release notes
- **ISSUE #27518**: (srkunze) [Docs] Relationship between Mine and Grains (refs: #27557)
- **PR #27557**: (jfindlay) add doc motivating mine vs grains @ 2015-09-30 17:49:46 UTC
  - 7201ce71e4 Merge pull request #27557 from jfindlay/minedoc
  - 3727d79bad edit mine doc for style and markup
  - 7e037a4666 add doc motivating mine vs grains
- **ISSUE #27478**: (rominf) iptables state fails to save rules (refs: #27515)
- **PR #27515**: (jfindlay) save iptables rules on SuSE @ 2015-09-30 16:09:42 UTC
  - 59c3d5f93e Merge pull request #27515 from jfindlay/suse_fire
  - 4460ad2785 save iptables rules on SuSE
- **ISSUE #27460**: (llevar) Orchestrate runner not resolving reference to a built in state (refs: #27509)
- **PR #27509**: (jfindlay) tell the user why the gluster module does not work @ 2015-09-30 15:49:16 UTC
  - 9b26357b19 Merge pull request #27509 from jfindlay/gluster_reason
  - 1cda538d21 tell the user why the gluster module does not work
- **ISSUE #27372**: (GregMeno) pip.installed state fails when env_vars is not a dict (refs: #27379)
- **PR #27379**: (jfindlay) document and check dict type for pip env_vars @ 2015-09-30 02:56:52 UTC
  - 989733eaa8 Merge pull request #27379 from jfindlay/pip_vars
  - aee51ffdef document and check dict type for pip env_vars
- **PR #27516**: (basepi) [2015.5] Merge forward from 2014.7 to 2015.5 @ 2015-09-29 17:53:33 UTC
  - 6d773f66c3 Merge pull request #27516 from basepi/merge-forward-2015.5
  - a08951f0fa Merge remote-tracking branch 'upstream/2014.7' into merge-forward-2015.5
  - 5262f01325 Merge pull request #27335 from rallytime/cloud-logging-7
    - adeb1dcad4 Pylint Fix
    - 588c13783c Salt-cloud logging clean up for windows functions
    - 9b6000135c [2014.7] Fixup salt-cloud logging
- **ISSUE #27447**: (junster1) Fix mysql table size for salt_events (refs: #27472)
- **PR #27472**: (cachedout) Change recommended schema for data field in mysql event table @ 2015-09-29 15:49:37 UTC
  - 68d784c3dd Merge pull request #27472 from cachedout/fix_27447
  - 5e745ad6da Change recommended schema for data field in mysql event table
- **PR #27468**: (cachedout) Fix 27351 @ 2015-09-29 15:35:29 UTC
  - **PR #27351**: (SaltyCharles) fix sysctl truncating newline on os x (refs: #27468)
- ee6e0ed057 Merge pull request #27468 from cachedout/fix_27351
- 0bc37c0d41 Fix test
- f9a19720de fix syscall truncating newline on os x
- **ISSUE #27438**: (aboe76) can't set system locale on OpenSuse SUSE (refs: #27479)
- **PR #27479**: (aboe76) fix locale on opensuse and suse #27438 @ 2015-09-29 15:34:48 UTC
  - a214c7f84e Merge pull request #27479 from aboe76/fix_locale_suse
  - a8f2dad1be fix locale on opensuse and suse #27438
- **ISSUE #17103**: (arthurlogilab) salt is looking for outputters in /var/cache/salt/minion/extmods/output not /var/cache/salt/minion/extmods/outputters (refs: #27483)
- **PR #27483**: (rallytime) Outputters should sync to output, not outputters, on the minion. @ 2015-09-29 15:33:08 UTC
  - 931f593b51 Merge pull request #27483 from rallytime/fix-17103
  - 441241eb90 Change sync_outputters to sync_output for consistency, but alias sync_outputters
  - 105528720b Outputters should sync to output, not outputters, on the minion.
- **PR #27484**: (rallytime) Back-port #27434 and #27470 to 2015.5 @ 2015-09-29 15:32:03 UTC
  - PR #27470: (cachedout) Minor doc fixup. (refs: #27484)
  - PR #27434: (netroby) Doc: copy key to server via ssh-copy-id (refs: #27484, #27470)
  - 9c2c028953 Merge pull request #27484 from rallytime/bp-27434-and-27470
  - 5de2e35ab Minor doc fixup.
  - af656c7e87 Doc: copy key to server via ssh-copy-id
- **ISSUE #27433**: (TheBigBear) winrepo - drops "trailing zeroes" from version numbers on un-install? (refs: #27469)
- **PR #27469**: (twangboy) Added quotes to version numbers example @ 2015-09-28 21:54:43 UTC
  - 927874d316 Merge pull request #27469 from twangboy/fix_27433
  - a996ea46e2 Added quotes to version numbers example
- **ISSUE #27342**: (johtso) Duplicate selector in top file gives unhelpful traceback (refs: #27426)
- **PR #27426**: (cachedout) file.managed: check contents_{pillar|grain} result @ 2015-09-28 20:22:16 UTC
  - PR #27375: (jfindlay) file.managed: check contents_{pillar|grain} result (refs: #27467)
  - 382a53403f Merge pull request #27467 from cachedout/lint_27375
  - 4e5a98f5c Lint #27375
  - 278ade52d2 file.managed: check contents_{pillar|grain} result
- **ISSUE #9856**: (jeremyBass) for grant in grants: TypeError: 'bool' object is not iterable (refs: #27419)
- **PR #27419**: (rallytime) Amend error log to include multiple tips for troubleshooting. @ 2015-09-28 17:53:19 UTC
  - ed6207a438 Merge pull request #27419 from rallytime/fix-9856
  - 551396564a Amend error log to include multiple tips for troubleshooting.
- **ISSUE #16753**: (johtso) Duplicate selector in top file gives unhelpful traceback (refs: #27426)
• PR #27426: (rallytime) Don't stacktrace if there are conflicting id errors in highstate @ 2015-09-28 14:52:51 UTC
  - 73fa89edf7 Merge pull request #27426 from rallytime/fix-16753
  - f6cbd81ee6 Don't stacktrace if there are conflicting id errors in highstate

• ISSUE #27406: (s-iraheta) salt-cloud error with Softlayer (Bare Metal Instance): TypeError: 'bool' object is not iterable and with --list-locations: Failed to get the output of 'softlayer_hw.avail_locations()': 142776 (refs: #27408)

• PR #27408: (rallytime) Fix avail_locations function for the softlayer_hw driver in 2015.5 @ 2015-09-25 23:34:50 UTC
  - 5dd1b70475 Merge pull request #27408 from rallytime/fix-27406-for-2015.5
  - 39a4ae5a6c Remove hdd: 19 refs from SL docs - no longer available from SoftLayer.
  - de2f9234d3 Use correct default for bandwith
  - 42d8127f79 Don't set the optional_products default to a boolean, and then try to loop.
  - 9d8a3d8303 Fix avail_locations function for the softlayer_hw driver in 2015.5

• ISSUE #27389: (ryan-lane) Docs layout issue (refs: #27410)

• PR #27410: (jacobhammons) Fix css layout Refs #27389 @ 2015-09-25 22:38:48 UTC
  - 8f9a3c99af Merge pull request #27410 from jacobhammons/doc-updates
  - a95ceda1 Fix css layout Refs #27389 sample typo fix in linux_acl additional module folders listed in dynamic-modules

• PR #27336: (rallytime) [2015.5] Fixup salt-cloud logging @ 2015-09-24 15:02:52 UTC
  - 3746085587 Merge pull request #27336 from rallytime/cloud-logging-five
  - 7956b36076 [2015.5] Fixup salt-cloud logging

• ISSUE #27356: (lorenngordon) file.replace fails if repl contains special regex characters and append_if_not_found=True (refs: #27358)

• PR #27358: (lorenngordon) Escape search replacement text, fixes #27356 @ 2015-09-24 13:52:46 UTC
  - 5a3be10a3e Merge pull request #27358 from lorenngordon/escape-search-replacement-text
  - 88bb1bff Escape search replacement text, fixes #27356

• ISSUE #19236: (bramhg) salt-cloud : Unable to add SSD disk and unable to auto-delete disk on instance termination on GCE (refs: #27345)

• PR #27345: (rallytime) Allow use of rst header links by separating options out from yaml example @ 2015-09-23 19:48:56 UTC
  - 6759f79d6d Merge pull request #27345 from rallytime/docs-for-19236
  - 1d3925bfbf Added version tag for ex_disk_type option
  - f23369300c Allow use of rst header links by separating options out from yaml example

• PR #26903: (bersace) Review defaults.get @ 2015-09-23 14:52:20 UTC
  - c2efb291e2 Merge pull request #26903 from bersace/fix-defaults-modules
  - 474d7af95 fixup! Review defaults loading
  - 3614d226e fixup! Review defaults loading
  - 62b6495358 fixup! Review defaults loading

- 82c5b1d8fd Review defaults loading

- **ISSUE #27316**: (efficks) Extracted state with zip format failed on Windows (refs: #27317)
- **PR #27317**: (efficks) State unzip should use unzip command instead of unzip_cmd. @ 2015-09-23 14:41:36 UTC
  - a372466922 Merge pull request #27317 from efficks/fix27316
  - bf21c101e State unzip should use unzip command instead of unzip_cmd. Issue #27316

- **ISSUE #15514**: (flyaruu) Calling a boto_route53.present state fails if the record is already there (refs: #27309)
- **PR #27309**: (rallytime) Change a value list to a comma-separated string in boto_route53.present @ 2015-09-23 14:30:50 UTC
  - bd3771e80f Merge pull request #27309 from rallytime/fix-15514
  - 9383d91ff8 Change a value list to a comma-separated string in boto_route53.present

- **ISSUE #27297**: (JensRantil) file.replace documentation improvement (refs: #27311)
- **PR #27311**: (jfindlay) discuss replacement occurrences in file doc @ 2015-09-22 22:23:10 UTC
  - b5fe944875 Merge pull request #27311 from jfindlay/maxoc
  - 8ec2e921bd discuss replacement occurrences in file doc

- **PR #27310**: (basepi) [2015.5] Merge forward from 2014.7 to 2015.5 @ 2015-09-22 21:08:41 UTC
  - ca4597b93a Merge pull request #27310 from basepi/merge-forward-2015.5
  - 7b75e4aed1 Merge remote-tracking branch 'upstream/2014.7' into merge-forward-2015.5
  - e90412d3b8 Merge pull request #27252 from jfindlay/version.2014.7
  - 3d28307a00 2014.7 -> 2014.7.0

- **ISSUE #27307**: (terminalmage) Regression in yumpkg's refresh_db function (refs: #27308)
- **PR #27308**: (terminalmage) Fix refresh_db regression in yumpkg.py @ 2015-09-22 21:07:28 UTC
  - 982c21c79f Merge pull request #27308 from terminalmage/fix-refresh_db-regression
  - 77686fb7ce Fix refresh_db regression in yumpkg.py

- **PR #27286**: (terminalmage) Add a configurable timer for minion return retries @ 2015-09-22 16:35:07 UTC
  - 775a4f9ad0 Merge pull request #27286 from terminalmage/return_retry_timer
  - 540a7dfcf1 Add default values for new minion config options
  - 453b883820 Add a configurable timer for minion return retries

- **PR #27278**: (rallytime) Back-port #27256 to 2015.5 @ 2015-09-21 19:27:51 UTC
  - **PR #27256**: (julianbrost) Fix error handling in salt.modules.file.statvfs (refs: #27278)
  - 02482c0572 Merge pull request #27256 from rallytime/bp-27256
  - 77686fb7ce Fix refresh_db regression in yumpkg.py

- **PR #27277**: (rallytime) Back-port #27230 to 2015.5 @ 2015-09-21 19:06:14 UTC
  - **PR #27230**: (benhosmer) Fix typo in AWS doc config (refs: #27277)
  - e36c019c37 Merge pull request #27277 from rallytime/bp-27230
- 3ce77db1bc Fix typo in AWS doc config

- **PR #27253**: (jfindlay) 2015.5 -> 2015.5.0 @ 2015-09-18 23:44:43 UTC
  - b22286476e Merge pull request #27253 from jfindlay/version.2015.5
  - 967e3bb72a 2015.5 -> 2015.5.0

- **PR #27244**: (garethgreenaway) Exception in cloud.ec2.create_snapshot @ 2015-09-18 21:41:11 UTC
  - 51a0193b54 Merge pull request #27244 from garethgreenaway/ec2_create_snapshot_no_return_data_exception
  - 820f6d576b9 Fixing the cause when the r_data from aws.query is empty and an exception happens when looking for the snapshotID

- **ISSUE #27215**: (wfhu) cron.file override the crontab file even if there's no change (refs: #27231)

- **PR #27231**: (jfindlay) only write cron file if it is changed @ 2015-09-18 18:23:10 UTC
  - 26504f15bc Merge pull request #27231 from jfindlay/cronchange
  - 1e335927e2 only write cron file if it is changed

- **PR #27233**: (basepi) [2015.5] Add stub release notes for 2015.5.6 @ 2015-09-18 16:55:40 UTC
  - 579f375f74 Merge pull request #27233 from basepi/release.notes.stubs
  - f45639a9b7 Add stub release notes for 2015.5.6

- **ISSUE #25423**: (tweenk) Impossible to define a file.managed for use only as a template in "use" requisites (refs: #27208)

- **PR #27208**: (basepi) [2015.5] Add test.nop state @ 2015-09-18 16:50:17 UTC
  - f5a32d3f2 Merge pull request #27208 from basepi/nop.state.25423
  - 9414b05b2c Add test.nop example
  - a84c6e7b8f Add test.nop state

- **ISSUE #27187**: (SeverinLeonhardt) ssh_known_hosts.present hashes other entries even with hash_hostname: false (refs: #27201)

- **PR #27201**: (jfindlay) rename hash_hostname to hash_known_hosts @ 2015-09-18 15:45:03 UTC
  - 59a07cae68 Merge pull request #27201 from jfindlay/sshhash
  - 1b626b77cd rename hash_host arg to hash_known_hosts
  - 12f14a3e37c update hash_known_hosts docs in ssh module

- **PR #27214**: (jacksontj) Correctly support https, port 443 is not a requirement @ 2015-09-18 15:43:05 UTC
  - 560545c4c5 Merge pull request #27214 from jacksontj/2015.5
  - e7526dbc44 Correctly support https, port 443 is not a requirement

- **ISSUE #18582**: (mainframe) Allow merging file_roots and pillar_roots from different config files included from master.d (refs: #27150)

- **PR #27172**: (rallytime) Back-port #27150 to 2015.5 @ 2015-09-17 17:25:51 UTC
  - PR #27150: (cachedout) Merge config values from master.d/minion.d conf files (refs: #27172)
  - 7a34e774d2 Merge pull request #27172 from rallytime/bp-27150
  - 0d7ee4b209 Merge config values from master.d/minion.d conf files

- **PR #27194**: (rallytime) Back-port #27180 to 2015.5 @ 2015-09-17 16:17:24 UTC
- **PR #27180**: (tankywoo) file copy ret result True if no change in test mode (refs: #27194)
  - e956d88f5f Merge pull request #27194 from rallytime/bp-27180
  - 327d3435ef file copy ret result True if no change in test mode

- **PR #27176**: (basepi) [2015.5] Merge forward from 2014.7 to 2015.5 @ 2015-09-17 15:00:40 UTC
  - a02d043309 Merge pull request #27176 from basepi/merge-forward-2015.5
  - 66f4641be3 Merge remote-tracking branch 'upstream/2014.7' into merge-forward-2015.5
  - c186e51764 Merge pull request #27117 from jacobhammons/release-docs-2014.7
    - b69e11e0a4 made 2014.7 an archived release minor doc site updates
  - 69d758ee2b Merge pull request #27114 from cachedout/warn_on_insecure_log
    - 507fb04683 Issue warning that some log levels may contain sensitive data
  - aa71bae8aa Merge pull request #27075 from twangboy/fix_password_2014.7
    - c0689e3215 Replaced password with redacted when displayed

- **PR #27170**: (rallytime) Update Getting Started with GCE docs to use cloud.profiles or cloud.profiles.d examples @ 2015-09-16 22:23:51 UTC
  - de2027426e Merge pull request #27170 from rallytime/gce-docs
  - a07db909bd Update Getting Started with GCE docs to use cloud.profiles or cloud.profiles.d examples

- **PR #27167**: (rallytime) Back-port #27148 to 2015.5 @ 2015-09-16 19:56:01 UTC
  - PR #27148: (hexedpackets) Pass file pointers to the serialize load functions. (refs: #27167)
  - 28cfdfd067 Merge pull request #27147 from rallytime/bp-27148
  - d12be52355 Pass filepointers to the serialize load functions.

- **ISSUE #27157**: (alxbse) salt.util.smb loads even when impacket library is missing (refs: #27168)

- **PR #27168**: (techhat) Add further gating of impacket library @ 2015-09-16 18:55:56 UTC
  - 4495f4f4d0 Merge pull request #27168 from techhat/gateimpacket
  - c44b0a0a Add further gating of impacket library

- **ISSUE #27100**: (hexedpackets) salt-cloud --full-query does nothing when no VM profiles are configured (refs: #27166)

- **PR #27166**: (rallytime) Allow a full-query for EC2, even if there are no profiles defined @ 2015-09-16 17:41:40 UTC
  - 3e5ef0dc30 Merge pull request #27166 from rallytime/fix-27100
  - 50fb3a489a Allow a full-query for EC2, even if there are no profiles defined

- **PR #27162**: (rallytime) Be explicit in using "SoftLayer" for service queries in SoftLayer drivers @ 2015-09-16 16:43:26 UTC
  - f1c9de7ed9 Merge pull request #27162 from rallytime/softlayer-service
  - d281068c70 Be explicit in using "SoftLayer" for service queries in SoftLayer drivers

- **ISSUE #27133**: (deniswal) win_path.add causes the value data to be set as the value and vice versa (refs: #27149)

- **PR #27149**: (twangboy) Fixed problem with add/remove path @ 2015-09-16 15:01:48 UTC
  - 59e9df88de Merge pull request #27149 from twangboy/fix_27133
• ISSUE #11669: (jcockhren) salt.cloud is out of date for new google compute engine dashboard and API (refs: #27147)

• PR #27147: (rallytime) Enforce bounds in the GCE Regex @ 2015-09-15 21:51:55 UTC
  - 097fcd1017 Merge pull request #27147 from rallytime/fix-11669
  - 55312ea03f Provide a more friendly error message.
  - 36555856c7 Enforce bounds in the GCE Regex

• PR #27128: (eguven) don’t show diff for test run if show_diff=False @ 2015-09-15 14:11:55 UTC
  - 5ce6f157dd Merge pull request #27128 from eguven/2015.5-fix-test-diff
  - 4ec2d68a4a don’t show diff for test run if show_diff=False

• PR #27116: (jacobhammons) Update latest to 2015.8, 2015.5 is now previous @ 2015-09-15 07:34:28 UTC
  - 088b1dbb3e Merge pull request #27116 from jacobhammons/release-docs-2015.5
  - 6e323b6dd3 Update latest to 2015.8, 2015.5 is now previous Assorted style and minor updates

• ISSUE #25352: (m03) reg.absent reporting incorrect results (refs: #27019)

• PR #27033: (jfindlay) Merge #27019 @ 2015-09-15 07:32:17 UTC
  - PR #27019: (twangboy) Fixed reg state module for None, 0, and " values (refs: #27033)
  - 440855b182 Merge pull request #27033 from jfindlay/n0ne
  - 3334b9d548 fix comment and unit test for reg state
  - 391a09d5ac update reg state unit tests
  - ebbf2b05ca Fixed reg state module for None, 0, and " values

• ISSUE #17088: (umireon) state.dockerio.run: docked_onlyif and docked_unless do not work (refs: #26942)

• PR #26942: (Arabus) Fix docker.run @ 2015-09-14 18:10:54 UTC
  - 35fc74132a Merge pull request #26942 from Arabus/fix-docker.run
  - e61e1de1f5 Fixes value typo for dockerio.loaded state
  - 39f11b696 further linting
  - 4aee37397c Further Linting to quiet the linter
  - 7ef7f9a07a Code Linting and cmd call fix
  - a51676e0eb Fixes #17088 olyif and unless should run on the host
  - d0c6128b8f Fixes #17088 retcode now returns True or False based on return status
  - 8b2e7cc4f5 Syntax clarification

• PR #26977: (abh) Add support for PEERNTP network interface configuration @ 2015-09-14 17:59:00 UTC
  - 59f2a0c7ae Merge pull request #26977 from abh/2015.5-ntppeer
  - df36e817f Add support for PEERNTP network interface configuration on RH derived systems

• ISSUE #27021: (SEJeff) webutil.user_exists state does not respect test=true (refs: #27023)

• ISSUE #21533: (aspyatkin) Add option specifying user to run htpasswd module functions (refs: #21649)
- PR #27023: (jfindlay) add test support for htpasswd state mod @ 2015-09-14 17:48:00 UTC
  - PR #21649: (aspyatkin) Make enhancements to htpasswd modules (refs: #27023)
  - e05bf3951 Merge pull request #27023 from jfindlay/htwebutilpass
  - 9f3d7890a6 add test support for htpasswd state mod
- PR #27074: (twangboy) Replaced password with redacted when displayed @ 2015-09-14 16:27:26 UTC
  - 9f999c0027 Merge pull request #27074 from twangboy/fix_password_2015.5
  - 0be393be22 Removed check for no package name
- PR #27054: (rallytime) Back-port #27029 to 2015.5 @ 2015-09-11 22:29:45 UTC
  - PR #27029: (spudfkc) Removed check for no package name (refs: #27054)
  - caab21d99c Merge pull request #27054 from rallytime/bp-27029
- PR #27049: (johanek) Run repoquery less @ 2015-09-11 22:26:12 UTC
  - b72a0ef86d Merge pull request #27049 from johanek/repoquery-dedupe
  - c113916a23 When running repoquery to check for available versions of packages, run once for all packages rather than once per package
- PR #27070: (stanislavb) Deprecate salt.utils.iam in Carbon @ 2015-09-11 22:01:57 UTC
  - PR #26561: (stanislavb) Leave salt.utils.s3 location fallback to salt.utils.aws (refs: #27070)
  - PR #26446: (stanislavb) Fetch AWS region from EC2 instance metadata (refs: #26561)
  - PR #26378: (stanislavb) Fix EC2 credentials from IAM roles for s3fs and s3 ext_pillar in 2015.5 (refs: #26446)
  - cc2cbf9869 Merge pull request #27070 from stanislavb/2015.5
  - 1e6e5d4e9c Deprecate salt.utils.iam in Carbon
- PR #27030: (jfindlay) Backport #26938 @ 2015-09-11 15:10:46 UTC
  - PR #27004: (vtek21) Fix 'dict' object has no attribute split (refs: #27024, #27030)
- PR #26938: (derphilipp) Fixes win_path module, migrates from reg.(set|get)_key to reg.(set|get)_value (refs: #27030)
- e23ca88cf Merge pull request #27030 from jfindlay/winreg
- 120fbe78e0 remove trailing line in win_path exec module
- b36a7107b2 update win_path exec module unit tests
- a2dc6f2dd7 Fixes win_path module, migrates from reg.(set|get)_key to reg.(set|get)_value

- ISSUE #25581: (b18) Salt 2015.5.2 - Could not deserialize msgpack message error. (refs: #27025)

- PR #27025: (cachedout) Better try and error handling for prep_jid @ 2015-09-11 07:40:10 UTC
  - 843c28b435 Merge pull request #27025 from cachedout/issue_25581
  - e09d9b93 Lint
  - bfcaab9e4 Better try and error handling for prep_jid

- PR #27035: (terminalmage) useradd.py: Use contextmanager to prevent leaked filehandles @ 2015-09-11 07:39:41 UTC
  - b9baa0b39a Merge pull request #27035 from terminalmage/useradd-contextmanager
  - e30e97f6c Update user states to reflect changes to login class handling
  - 54d6fbc7c useradd.py: Use contextmanager to prevent leaked filehandles

- PR #27034: (rallytime) Update softlayer docs for where to find apikey @ 2015-09-10 22:29:56 UTC
  - 1c9df7a92 Merge pull request #27034 from rallytime/softlayer-doc-fix
  - cb46f8145 Update softlayer docs for where to find apikey

- PR #27024: (rallytime) Back-port #27004 to 2015.5 @ 2015-09-10 21:14:21 UTC
  - PR #27004: (vtok21) Fix 'dict' object has no attribute split (refs: #27024, #27030)
  - 9e06d3f01a Merge pull request #27024 from rallytime/bp-27004
  - 54d6fbc7c Fix 'dict' object has no attribute split
  - bb29d73c71 Fix 'dict' object has no attribute split
  - 5f1a9c46aa Fix 'dict' object has no attribute split
  - 2bfdd9724e Fix 'dict' object has no attribute split

- PR #27027: (rallytime) Back-port #27013 to 2015.5 @ 2015-09-10 21:13:52 UTC
  - PR #27013: (nmadho) Remove unwanted debug statement (refs: #27027)
  - 9ab2cae1e4 Merge pull request #27027 from rallytime/bp-27013
  - 19a6e9e1c Remove unwanted debug statement.

- PR #27026: (rallytime) Back-port #27011 to 2015.5 @ 2015-09-10 21:13:45 UTC
  - PR #27011: (whiteinge) Move giant eventlisten.sh example out of the state.event docstring (refs: #27026)
  - 2c8be238f Merge pull request #27026 from rallytime/bp-27011
  - 8f518d54f Move giant eventlisten.sh example out of the state.event docstring

- ISSUE #20522: (eliasp) modules.win_pkg.install() blindly trusts fileclient.get_url()/unhandled exceptions (refs: #26972)

- PR #26972: (twangboy) Catch the 404 error from fileclient @ 2015-09-10 20:53:12 UTC
- e8cdcc62f7 Merge pull request #26972 from twangboy/fix_20522
- 0110786fa9 Catch the 404 error from fileclient

- **PR #26951**: (terminalmage) Fix timezone module for CentOS @ 2015-09-10 20:46:07 UTC
  - fbc95f4685 Merge pull request #26951 from terminalmage/fix-timezone
  - 30a4915762 Update tests to reflect changes to timezone module
  - b6f92691f9 Fix timezone module for CentOS

- **PR #26875**: (marccardinal) LXC gateway provisioned only when IP is provided @ 2015-09-10 19:31:32 UTC
  - f2ad3c333c Merge pull request #26875 from marccardinal/patch-2
  - 36d5a62262 LXC gateway provisioned only when IP is provided

- **ISSUE #26730**: (styro) __opts__['user'] on Windows minion incorrect (eg for file.symlink) (refs: #26997, #salt-stack/salt#26899)

- **PR #26997**: (twangboy) Fixed symlinks for windows (don’t use user root) @ 2015-09-10 18:54:50 UTC
  - **PR #26899**: (twangboy) file.symlink gets windows account instead of root (refs: #26997)
  - 7b2e7b1b37 Merge pull request #26997 from twangboy/fix_symlink_windows
  - 89cc02d4e0 Added versionadded
  - 835177b0c8 Fixed symlinks for windows (don’t use user root)

- **PR #27001**: (twangboy) Added CLI Example for reg.delete_key_recursive @ 2015-09-10 17:19:43 UTC
  - 5389a85894 Merge pull request #27001 from twangboy/fix_reg_docs
  - 2980bbda17 Minor clarification
  - 4684b2dd11 Added CLI example for reg.delete_key_recursive

- **PR #26996**: (jacobhammons) Beacon doc updates @ 2015-09-10 16:47:49 UTC
  - 37814f5dff Merge pull request #26996 from jacobhammons/beacon-doc
  - e475e688e Fixed typo
  - 2401533d9e New content added to beacon docs.

- **ISSUE #26867**: (joejulian) lvm pv’s can show as not belonging to their vg if symlink is used (refs: #26868)

- **PR #26868**: (joejulian) Use the actual device name when checking vgdisplay @ 2015-09-10 16:08:16 UTC
  - 4ba7eed711 Merge pull request #26868 from joejulian/2015.5_lvm_vg_symlink_fix
  - 3dfb33849a Use the actual device name when checking vgdisplay

- **PR #26955**: (dsumsky) S3 ext_pillar module has broken caching mechanism (backport to 2015.5) @ 2015-09-10 14:54:01 UTC
  - 1537e945be Merge pull request #26955 from dsumsky/s3-pillar-module-cache-fix-2015.5
  - 8219acfe7 - fixed pylint warnings
  - a3b10e8ab1 - fixed broken caching in S3 ext_pillar module (file_md5 was a list) - added debugging messages - static parameters are available as module parameters now

- **PR #26987**: (rallytime) Back-port #26966 to 2015.5 @ 2015-09-09 18:42:51 UTC
  - **PR #26966**: (TheBigBear) URL has changed (refs: #26987)
  - 3e902e86b1 Merge pull request #26987 from rallytime/bp-26966
- 6a29eac003 URL has changed

- **PR #26915**: (rallytime) Update Joyent Cloud Tests @ 2015-09-09 15:04:50 UTC
  - eddb532713 Merge pull request #26915 from rallytime/joyent-tests
  - d4ad42d697 Update Joyent Cloud Tests

- **PR #26971**: (rallytime) Fix a couple of typos in reactor docs @ 2015-09-09 15:03:54 UTC
  - f86814b2ad Merge pull request #26971 from rallytime/reactor-doc-fix
  - 0214aad19 Fix a couple of typos in reactor docs

- **ISSUE #26730**: (styro) __opts__['user'] on Windows minion incorrect (eg for file.symlink) (refs: #26997, #saltstack/salt#26899, #26899)
  - PR saltstack/salt#26899: (twangboy) file.symlink gets windows account instead of root (refs: #26976)
  - PR #26976: (thatch45) Revert "file.symlink gets windows account instead of root" @ 2015-09-08 22:44:19 UTC
    - 57b1080f94 Merge pull request #26976 from saltstack/revert-26899-fix_26730
    - 6dd54e6bec Revert "file.symlink gets windows account instead of root"

- **PR #26975**: (whiteinge) Remove mocks from rest_cherrypy integration tests; fix groups check bug @ 2015-09-08 22:34:08 UTC
  - 67be01f5fe Merge pull request #26975 from whiteinge/rest_cherrypy-integration
  - 9a0989585b Add additional 'groups' check to rest_cherrypy if groups are not used
  - d68aefcfd7 Remove mocks from rest_cherrypy integration tests
  - 2aa3da8911 Rename the rest_cherrypy tests to conform to our convention

- **ISSUE #26730**: (styro) __opts__['user'] on Windows minion incorrect (eg for file.symlink) (refs: #26997, #saltstack/salt#26899, #26899)
  - PR saltstack/salt#26899: (twangboy) file.symlink gets windows account instead of root (refs: #26976)

- **PR #26899**: (twangboy) file.symlink gets windows account instead of root (refs: #26997) @ 2015-09-08 21:14:30 UTC
  - 20a487f7f2e Merge pull request #26899 from twangboy/fix_26730
  - 9d9b3bb47a file.symlink gets windows account instead of root

- **PR #26960**: (rallytime) Fix bash code block formatting in CherryPy netapi docs @ 2015-09-08 18:14:11 UTC
  - db6b862f4 Merge pull request #26960 from rallytime/cherrypy-docs
  - c1420711db Fix bash code block formatting

- **PR #26940**: (rallytime) Fix minor doc typo in client api @ 2015-09-08 04:15:00 UTC
  - f733eb048ec9 Merge pull request #26940 from rallytime/api-doc-fix
  - 00fe6a225c Fix minor doc typo in client api

- **ISSUE #26850**: (jfindlay) salt-ssh error on 2015.8 (refs: #26852)

- **PR #26871**: (rallytime) Back-port #26852 to 2015.5 @ 2015-09-08 03:43:08 UTC
  - **PR #26852**: (basepi) [2015.8] Only reference msgpack if it imported successfully (refs: #26871)
  - de9350466e Merge pull request #26871 from rallytime/bp-26852
  - 5a4c8d2ff5 Only reference msgpack if it imported successfully

- **ISSUE #26644**: (gravyboat) pkgrepo should note that for ubuntu/debian all options should not be used (refs: #26800, #26851)
• ISSUE #26680: (WackyOne) Suse install documentation (refs: #26638, #26851)
  • PR #26851: (jacobhammons) states/pkrepo examples, suse installation updates @ 2015-09-02 18:29:09 UTC
    - a563af29d3 Merge pull request #26851 from jacobhammons/doc-bugs
    - ac3b474440 states/pkrepo examples, suse installation updates Refs #26644 Refs #26638

• ISSUE #26804: (lrhazi) gpasswd error on RHEL 5 (refs: #26817)

• ISSUE #26805: (joejulian) cur_param referenced before assignment (refs: #26823, #26820)
  • PR #26823: (joejulian) use dbus instead of localectl @ 2015-09-02 00:25:25 UTC
    - 4af6951a4c Merge pull request #26823 from joejulian/ctlfix
    - a9928cb143 pep8 fixes
    - 6108ec4280 Gated dbus for os families that use it
    - e154c7b16f remove trailing spaces
    - c1c1266cc3 fix indent change
    - 0a35320aa7 Use dbus directly
  • ISSU #26805: (joejulian) cur_param referenced before assignment (refs: #26823, #26820)
    • PR #26820: (jfindlay) add default param in _parse_localectl in locale mod @ 2015-09-01 22:02:17 UTC
      - a1749b76b8 Merge pull request #26820 from jfindlay/ctlfix
      - 3a2c0d5fbb add default param in _parse_localectl in locale mod

• ISSUE #26788: (ssgward) Windows minion user.rename gives exception (refs: #26821)

• ISSUE #26754: (jefftucker) MySQLdb-python package should be included with windows minion installer (refs: #26803)

• ISSUE #26798: (jfindlay) stack trace from linode driver (refs: #26815)
• **PR #26815**: (jfindlay) stringify linode id before performing str actions @ 2015-09-01 17:56:29 UTC
  - 6edfa36083 Merge pull request #26815 from jfindlay/linstr
  - 2ff5823944 stringify linode id before performing str actions

• **ISSUE #26644**: (gravyboat) pkgrepo should note that for ubuntu/debian all options should not be used (refs: #26800, #26851)

• **ISSUE #26192**: (jefftucker) Logging documentation does not exist (refs: #26800)

• **ISSUE #26108**: (ahammond) documentation around scheduling and orchestration is unclear (refs: #26800)

• **ISSUE #24510**: (ahammond) lack of documentation around Denied Keys (refs: #26800)

• **PR #26800**: (jacobhammons) Doc bug fixes @ 2015-09-01 05:40:09 UTC
  - 135a8a64af Merge pull request #26800 from jacobhammons/doc-fixes
  - 5cca52a3c1 Fixed windows installer paths Refs #25567
  - 0ec036350d Updates to salt-ssh and salt-key #24510
  - 992edc3bb8 Doc bug fixes Refs #26192 Refs #26638 Refs #26644 Refs #26108

• **ISSUE #24021**: (arthurlogilab) [salt-cloud saltify] AttributeError: 'str' object has no attribute 'setdefault' (refs: #26793)

• **PR #26793**: (rallytime) Don't stacktrace if "name" is specified as a minion id in a map file @ 2015-08-31 19:24:25 UTC
  - da161b9516 Merge pull request #26793 from rallytime/fix-name-stacktrace
  - 8601e4b341 Don't stacktrace if "name" is specified as a minion id in a map file

• **ISSUE #24020**: (arthurlogilab) [salt-cloud saltify] cannot use --profile saltify machine{1..3} without a map (refs: #26790)

• **PR #26790**: (rallytime) Update Saltify docs to be more accurate and helpful @ 2015-08-31 18:17:31 UTC
  - 7c80da09f6 Merge pull request #26790 from rallytime/saltify_docs
  - d53754f2b7 Update Saltify docs to be more accurate and helpful

• **ISSUE #26773**: (styro) salt-call minor breakage on Windows (refs: #26775)

• **PR #26787**: (jfindlay) merge #26775 @ 2015-08-31 17:52:45 UTC
  - PR #26775: (styro) Fix some leftover non portable exitcodes. (refs: #26787)
  - 70d0268c83 Merge pull request #26787 from jfindlay/imp
  - e5bbf59ec7 disable import lint in run.py
  - 8ae725243 Restore blank lines again.
  - 1710070f61 Restore blank line.
  - 59d61a8dea os module no longer required.
  - f1b8d0d509 Add missing imports.
  - 7bd8890e23 Fix some non portable exitcodes. Fixes #26773

• **PR #26759**: (terminalmage) Backport PR #26726 to 2015.5 branch @ 2015-08-31 14:39:20 UTC
  - PR #26726: (terminalmage) Redact HTTPS Basic Auth in states/funcs which deal with git remotes (refs: #26759)
- 645998dbd3 Merge pull request #26759 from terminalmage/bp-26726
- d7f7fca7e5 More cleanup from moving auth redaction to salt.utils.url
- 07db5a7038 fix redaction
- 399871e6dd Add auth redaction flags to git exec module and use them in git state
- 776dc38d73 check for ValueError when adding http basic auth
- d2eb1f4340 Rename arguments in salt.utils.url.add_http_basic_auth
- b45f37a467 Add http basic auth tests
- 1ed42ea4fd Remove git unit tests, moving them to salt.utils.url tests
- 96a55cdb59 Remove unused imports
- 1f25a859bd Redact HTTPS Basic Auth data from remote URLs in comments and changes dict
- eafeb6c7bf Automatically redact HTTPS basic auth
- 6be3f8f9e1 Add support for callbacks to influence what information about commands is logged
- c36f240a87 Add HTTPS Basic Auth funcs to salt.utils.url

• ISSUE #26628: (MadsRC) state.ipset tries to parse wrong data (refs: #26768)

• PR #26768: (garethgreenaway) Fixes to ipset in 2015.5 for #26628 @ 2015-08-29 03:24:07 UTC
  - 46a4bbd0e7 Merge pull request #26768 from garethgreenaway/26628_2015_5_ipset_fixes
  - f0c6090c7e Fixing issue when information returned from ipset isn't in the format we expect and it causes an exception.

• ISSUE #26732: (saltstack-bot) SmartOS pkgsrc dependency (refs: #26753)

• PR #26753: (jfindlay) import elementree from _compat in ilo exec mod @ 2015-08-28 20:56:45 UTC
  - 7a58878e8a8 Merge pull request #26753 from jfindlay/iloet
  - 211a02754f import elementree from _compat in ilo exec mod

• ISSUE #21256: (dhs-rec) win.exe package for RH 6 (refs: #26736)

• PR #26736: (twangboy) Changed import from smbconnection to smb3 @ 2015-08-28 17:23:42 UTC
  - 22dbce8d61 Merge pull request #26736 from twangboy/fix_21256
  - 86f425c669 Changed import from smbconnection to smb3

• ISSUE #26705: (Galser) Salt-Master 2015.5.5-1 on Scientific Linux 6 fails loading some primitive pillars from YAML (refs: #26714)

• PR #26714: (jfindlay) add exception placeholder for older msgpacks @ 2015-08-28 16:02:35 UTC
  - 16d4e0350d Merge pull request #26714 from jfindlay/pack_except
  - ebcafa9050 add exception placeholder for older msgpacks

• PR #26710: (rallytime) Update GCE driver to return True, False or a new name in __virtual__() @ 2015-08-27 20:08:17 UTC
  - 47faa8cc16 Merge pull request #26710 from rallytime/gce_virtual_return
  - e6b74879d7 Remove unused import
  - 78e31585cf Update GCE driver to return True, False or a new name in __virtual__()
• **PR #26709**: (rallytime) Ensure VM name is valid before trying to create Linode VM @ 2015-08-27 20:07:49 UTC
  - cf487cf0f5 Merge pull request #26709 from rallytime/fix-14612
  - bc21094ea0 versionadded and more efficient checks
  - a3ac8e7008 Whitespace fix
  - 9a4228d906 Added unit tests for new _validate_name function and adjusted regex
  - 388815112c Ensure VM name is valid before trying to create Linode VM

• **ISSUE #9592**: (otrempe) pip module fails on Windows because of quoting (refs: #26617)

• **PR #26617**: (terminalmage) Fix Windows failures in pip module due to raw string formatting @ 2015-08-27 19:24:53 UTC
  - c3a6280f8c Merge pull request #26617 from terminalmage/issue9592
  - 96c3df1ed5 Don’t accept non-list input for pkgs arg
  - 419221535b Lint fix
  - ede057eebc Fix tests to reflect args being passed as lists instead of strings
  - 03250bdb9f Pass command to cmd.run_all as list instead of joining
  - 1c90c6b07e salt/modules/pip.py: Remove raw string format flags
  - cd35df5ff8 Catch TypeErrors in timed_subprocess

• **PR #26700**: (kev009) Ignore the first element of kern.disks split, which is the sysctl name @ 2015-08-27 17:48:02 UTC
  - 24a45f4f39 Merge pull request #26700 from kev009/fbsd-disks-fix-2015.5
  - 3ac97f9de4 Ignore the first element of kern.disks split, which is the sysctl name

• **PR #26695**: (terminalmage) Better HTTPS basic auth redaction for 2015.5 branch @ 2015-08-27 15:10:38 UTC
  - 58945131b5 Merge pull request #26695 from terminalmage/better-https-auth-redaction-2015.5
  - 752d260209 Use versioninfo tuple for comparison
  - b1d253483e Better HTTPS basic auth redaction for 2015.5 branch

• **PR #26694**: (terminalmage) Backport #26693 to 2015.5 @ 2015-08-27 08:16:30 UTC
  - **PR #26693**: (serge-p) Update openbsdpkg.py (refs: #26694)
  - 4040a312f9 Merge pull request #26694 from terminalmage/bp-26693
  - 4aec926476 Update openbsdpkg.py

• **PR #26681**: (basepi) [2015.5] Merge forward from 2014.7 to 2015.5 @ 2015-08-26 22:03:07 UTC
  - 0b1f80fe9 Merge pull request #26681 from basepi/merge-forward-2015.5
  - 64cad371f0 Remove overmocked test
  - 40718af1d5 Merge remote-tracking branch ‘upstream/2014.7’ into merge-forward-2015.5
  - c2c7fe06c8 Merge pull request #26667 from nmadhok/doc-fix-2014.7
    - 26be189f69 Doc fix. Fixes #26656
  - 6bd3dcaae8 Merge pull request #26663 from jacobhammons/2014.7-version
    - b6af538070 version change for latest branch
  - 071a6b11e5 Merge pull request #26636 from rallytime/cloud-test-fixes
c0d83d558d Don't use id as variable
2b4bc1679d Keep ec2 instance creation test the same - it works better for the ec2 output
b5b58eb31f Skip digital ocean tests since we can't use API v1 with v2 tests
9ae1539c62 Update cloud tests to be more efficient and accurate
304542b4c6 Merge pull request #26640 from efficks/fixws2014
ebe5d9d85c Fix function spacing

• PR #26676: (rallytime) Back-port #26648 to 2015.5 @ 2015-08-26 19:46:01 UTC
  • PR #26648: (whiteinge) Free 'fun' from the function signature namespace (refs: #26676)
  • 75675a6ba9 Merge pull request #26676 from rallytime/bp-26648
  • 1af42eed36 Free 'fun' from the function signature namespace

  • 8a9a076a4d Merge pull request #26651 from jfindlay/2015.5
  • dc5ce5f8f add 2015.5.4 notes to 2015.5.5 notes

• ISSUE #26497: (JensRantil) Feature request: Make salt.states.managed support local file source (refs: #26525)

• PR #26525: (jfindlay) document check_file_meta args, remove unused arg @ 2015-08-25 21:43:46 UTC
  • 5bdefdc234 Merge pull request #26525 from jfindlay/sum
  • 0297d49aa0 remove unused check_file_meta arg
  • 6a3cb1c0aa document args to file.check_file_meta exec fcn

• PR #26561: (stanislavb) Leave salt.utils.s3 location fallback to salt.utils.aws (refs: #27070) @ 2015-08-25 21:40:30 UTC
- **PR #26446**: (stanislavb) Fetch AWS region from EC2 instance metadata (refs: #26561)

- **PR #26378**: (stanislavb) Fix EC2 credentials from IAM roles for s3fs and s3 ext_pillar in 2015.5 (refs: #26446)

- 84e96458b3 Merge pull request #26561 from stanislavb/2015.5
- 50332895a1 Leave salt.utils.s3 location fallback to salt.utils.aws

- **ISSUE #22550**: (amendlik) Error deleting SSH keys using salt-cloud --destroy (refs: #26573)

- **PR #26573**: (rallytime) Don't stacktrace if using private_ips and delete_sshkeys together @ 2015-08-25 20:00:23 UTC

- 1d729734cc Merge pull request #26573 from rallytime/destroy_ssh_keys_private_ips
- 4267509c25 Don't stacktrace if using private_ips and delete_sshkeys

- **ISSUE #20169**: (flavianh) [salt-cloud] Add a meaningful error when /etc/salt/cloud is missing the master's address (refs: #26563)

- **PR #26563**: (rallytime) Fix error detection when salt-cloud config is missing a master's address @ 2015-08-25 20:00:11 UTC

- 000e5a2ac5 Merge pull request #26563 from rallytime/fix-20169
- 65b285d02d Only warn if master IP is unset - must be compatible with masterless minions
- a4c87fcf57 Simplify logic
- 593ead08cf Fix error detection when salt-cloud config is missing a master's address

- **PR #26641**: (basepi) [2015.5] Merge forward from 2014.7 to 2015.5 @ 2015-08-25 18:17:46 UTC

- 19c7a6d575 Merge pull request #26641 from basepi/merge-forward-2015.5
- a5dafa436c Already fixed on 2015.5
- 71e089b5b5 Merge remote-tracking branch 'upstream/2014.7' into merge-forward-2015.5
- 4532f98a76 Merge pull request #26515 from versace/salt-env-local-sls
- 0727af9e3d Defaults to current saltenv in state.sls

- **PR #26620**: (rallytime) Also add -Z to script args for cloud tests @ 2015-08-24 22:03:24 UTC

- 2927859c8a Merge pull request #26620 from rallytime/more_script_args
- 9ae27193d8 Also add -Z to script args for cloud tests

- **PR #26618**: (rallytime) Add script_args: `-P` to Ubuntu 14 profiles for nightly cloud tests @ 2015-08-24 21:15:24 UTC

- ed166ebd4f Merge pull request #26618 from rallytime/pip-undate-cloud-tests
- 5a2c8825ba Extra lines
- d28672b69e Add script_args: `-P` to Ubuntu 14 profiles for nightly cloud tests

- **PR #26612**: (rallytime) Use an available image to test against @ 2015-08-24 19:09:18 UTC

- 6d3927bed5 Merge pull request #26612 from rallytime/fix-do-list-images-test
- 1401255287 Use an available image to test against

- **ISSUE #15590**: (jtratner) salt-cloud gce configuration check incorrect (refs: #26576)

- **PR #26576**: (rallytime) Ensure GCE and EC2 configuration checks are correct @ 2015-08-23 18:59:46 UTC

- 991bbf63fe Merge pull request #26576 from rallytime/fix-14604
- ac67a1d238 Ensure GCE configuration check is correct
- 421f1fde1e Ensure EC2 configuration check is correct

**ISSUE #12225** (arthurlogilab) [salt-cloud] Attribution of floating IPs works partially in parallel mode (refs: #26580)

**PR #26580** (rallytime) Avoid race condition when assigning floating IPs to new VMs @ 2015-08-23 18:58:48 UTC
- 746c0008a9 Merge pull request #26580 from rallytime/fix-12225
- e3f7db17cc Avoid race condition when assigning floating IPs to new VMs
- afda31be74 Create _assign_floating_ips function for DRY

**PR #26581** (terminalmage) Skip tests that don’t work with older mock @ 2015-08-22 23:06:27 UTC
- 965a4ba7cf Merge pull request #26581 from terminalmage/fix-tests
- 49d8bd1dbe Remove unused import
- 81a0d4c915 Skip tests that don’t work with older mock

**ISSUE #25478** (zyio) salt-ssh - Unable to locate current thin version (refs: #25862)

**ISSUE #25026** (sylvia-wang) salt-ssh "Failure deploying thin" when using salt module functions (refs: #25862)

**PR #26591** (rallytime) Back-port #26554 to 2015.5 @ 2015-08-22 21:19:02 UTC
- PR #26554: (tjstansell) /bin/sh is more portable than /bin/bash (refs: #26591)
- PR #25862: (zyio) Adding SCP_NOT_FOUND exit code (refs: #26554)
- 19992c1450 Merge pull request #26591 from rallytime/bp-26554
- 68bed88cb /bin/sh is more portable than /bin/bash

**PR #26565** (cachedout) Fix many errors with __virtual__ in tests @ 2015-08-21 21:37:54 UTC
- 2cd36c7ed4 Merge pull request #26565 from cachedout/fix_virtual_warnings
- 41541e4e2b Fix many errors with __virtual__ in tests

**ISSUE #19249** (ahetmanski) Cannot create cache_dir salt master exception. (refs: #26548)

**PR #26553** (rallytime) Back-port #26548 to 2015.5 @ 2015-08-21 17:40:21 UTC
- PR #26548: (vakulich) Catch OSError during cache directories creation, fixes #19249 (refs: #26553)

- 097b1e23b [doc] reactor documentation fix : returners

**PR #26551** (rallytime) Back-port #26539 to 2015.5 @ 2015-08-21 17:39:22 UTC
- PR #26539: (carlpett) Doc-fix: Escape backslash in domain\username (refs: #26551)
- bcd462545d Merge pull request #26551 from rallytime/bp-26539
- 94ff4c8f40 Doc-fix: Escape backslash in domain\username

**PR #26549** (rallytime) Back-port #26524 to 2015.5 @ 2015-08-21 17:38:50 UTC
- PR #26524: (JensRantil) Gracefully handle package comparison not in (-1, 0, 1) (refs: #26549)
- PR #25369: (anlutro) Fix aptpkg.version_cmp (refs: #26524)
- 4dbf61c5af Merge pull request #26549 from rallytime/bp-26524
- 4763f28725 logging(cmp_version): output assertion
- 673b6c683d utilis(version_cmp): handle comparison not in (0, 1, -1)

- ISSUE #26502: (ryan-lane) Adding a listener with None as ports doesn’t result in an invocation error in boto_elb (refs: #26527)
- PR #26527: (jfindlay) check exists and values in boto_elb listeners @ 2015-08-21 15:27:52 UTC
  - 1ac8287588 Merge pull request #26527 from jfindlay/elb
  - 343e47f00c check exists and values in boto_elb listeners

- PR #26446: (stanislavb) Fetch AWS region from EC2 instance metadata (refs: #26561) @ 2015-08-21 15:11:08 UTC
  - PR #26378: (stanislavb) Fix EC2 credentials from IAM roles for s3fs and s3_ext_pillar in 2015.5 (refs: #26446)
  - e4b2534aa8 Merge pull request #26446 from stanislavb/2015.5-ec2-metadata-region
  - 57943ff4f7 Fetch AWS region from EC2 instance metadata

- PR #26546: (nmadhok) Do not raise KeyError when calling avail_images if VM/template is in disconnected state @ 2015-08-21 14:17:49 UTC
  - d721b7b2be Merge pull request #26546 from nmadhok/vmware-key-error-patch-2015.5
  - 1dcf157256 Do not raise KeyError when calling avail_images if VM/template is in disconnected state

- ISSUE #25360: (BretFisher) file.replace removes line feed if using YAML’s multiline string syntax (refs: #26481)
- PR #26537: (jfindlay) Merge #26481 @ 2015-08-21 05:37:24 UTC
  - PR #26481: (TheBigBear) minor note: added (refs: #26537)
  - 7da87fabf1 Merge pull request #26537 from jfindlay/note
  - 662e723ae0 fixup note lint in file.replace state mod
  - 332535f2e6 Update file.py
  - 59850034f Update file.py
  - 6c7c7d738d minor note: added

- PR #26528: (zmalone) Fixing encrypt to instructions in the 2015.5 branch @ 2015-08-20 21:49:06 UTC
  - c6d8e34730 Merge pull request #26528 from zmalone/2015.5
  - 39b111c465 Fixing encrypt to instructions in the 2015.5 branch, --homedir is not necessary here.
28.2.85 Salt 2015.5.7 Release Notes

release 2015-10-13

Version 2015.5.7 is a bugfix release for 2015.5.0.

Statistics

- Total Merges: 103
- Total Issue References: 66
- Total PR References: 135
- Contributors: 46 (0xf10e, JaseFace, MasterNayru, MrCitron, Sacro, ajacoutot, arthurlogilab, basepi, belvedere-trading, beverlcl, blast-hardcheese, blueeyed, bogdanr, cachedout, chuechler, chrlg, dmyerscough, eguven, eliasp, erchn, eyj, garethgreenaway, gashev, gnubyexample, gracinet, gravyboat, gwaters, hedinfao, iggy, jacksontj, jacobhammons, jfindlay, lorengordon, mbologna, msciciel, nnadhok, pass-by-value, plastikos, rallytime, romanf, s0undt3ch, silenius, sjmh, stephen144, terminalmage, twangboy)

Important: A significant orchestrate issue (issue #29110) was discovered during the release process of 2015.5.7, so it has not been officially released. Please use 2015.5.8 instead.

Changelog for v2015.5.6..v2015.5.7

Generated at: 2018-05-27 22:16:54 UTC

- PR #28864: (jfindlay) add 2015.5.7 release notes @ 2015-11-13 17:15:00 UTC
  - ec76dc539b Merge pull request #28864 from jfindlay/2015.5
  - 648b697951 add 2015.5.7 release notes

- ISSUE #27392: (ahammond) schedule running state.orchestrate fails (refs: #28731)

- PR #28731: (garethgreenaway) Fixes to salt scheduler in 2015.5, ensuring that return_job is only used on minion scheduler @ 2015-11-13 16:58:06 UTC
  - bed45f4208 Merge pull request #28731 from garethgreenaway/27392_2015_5_scheduler_return_job_master
  - 771e9f7b6f Fixing the salt scheduler so that it only attempts to return the job data to the master if the scheduled job is running from a minion's scheduler.

- PR #28857: (rallytime) Back-port #28851 to 2015.5 @ 2015-11-13 13:56:53 UTC
  - PR #28851: (rominf) [states/schedule] docstring: args, kwargs -> job_args, job_kwargs (refs: #28857)
  - 06f4932876 Merge pull request #28857 from rallytime/bp-28851
  - aa419f87 [states/schedule] docstring: args, kwargs -> job_args, job_kwargs

- PR #28856: (rallytime) Back-port #28853 to 2015.5 @ 2015-11-13 13:46:10 UTC
  - PR #28853: (eliasp) Typo (with → which) (refs: #28856)
  - 0934a52b34 Merge pull request #28856 from rallytime/bp-28853
  - 37eeab2683 Typo (with → which)

- ISSUE #28828: (basepi) salt-ssh doesn't package tornado's new deps in the thin (refs: #28826)
• PR #28832: (basepi) [2015.5] Backport #28826 @ 2015-11-12 19:32:03 UTC
  - PR #28826: (basepi) [2015.8] Add new tornado deps to salt-ssh thin (refs: #28832)
  - eb904665dc Merge pull request #28832 from basepi/backport.28826
  - 57be72eb91 Add backports_abc and singledispatch_helpers to thin as well
  - 897cad627b Add singledispatch to the thin

• ISSUE #8647: (Mrten) salt '*' highstate returns 'minion did not return', salt [minion] highstate works (refs: #28833)

• PR #28833: (basepi) [2015.5] Increase the default gather_job_timeout @ 2015-11-12 19:31:58 UTC
  - eff811a0ad Merge pull request #28833 from basepi/increase.gather_job_timeout.8647
  - c09243dd01 Increase the default gather_job_timeout

• PR #28829: (basepi) [2015.5] Merge forward from 2014.7 to 2015.5 @ 2015-11-12 18:50:51 UTC
  - e4a036365d Merge pull request #28829 from basepi/merge-forward-2015.5
  - f8b8441485 Merge remote-tracking branch 'upstream/2014.7' into merge-forward-2015.5
  - 76e69b4bff Merge pull request #28777 from rallytime/bp-28740-2014.7
    * da5fac2b36 Back-port #28740 to 2014.7
  - 45c73ebf2f Merge pull request #28716 from rallytime/bp-28705
    * 32e7bd3ea0 Account for new headers class in tornado 4.3
  - f4fe921965 Merge pull request #28717 from cachedout/umask_note
    * 1874300e08 Add note about recommended umask

• ISSUE #25775: (trimbleagvendoraccounta) blockdev.formatted formats but fails. Second highstate shows success. (refs: #28756)

• ISSUE #20235: (joejulian) blockdev.format state can fail even if it succeeds (refs: #28756)

• PR #28756: (MrCitron) Fix #25775 @ 2015-11-12 17:47:51 UTC
  - 93562631aa Merge pull request #28756 from MrCitron/fix-25775
  - 82075c809c Add logs and correct pylint error
  - e31e22d96a Fix 25775

• ISSUE #28783: (chrigl) iptables.get_saved_rules does not handle family=ipv6 (refs: #28786)

• PR #28786: (chrigl) closes #28783 @ 2015-11-11 21:01:19 UTC
  - 30cc48e37f Merge pull request #28786 from chrigl/fix-28783
  - ba6d814553 closes #28783

• PR #28776: (rallytime) Back-port #28740 to 2015.5 @ 2015-11-11 18:02:03 UTC
  - PR #28740: (MasterNayru) Add missing S3 module import (refs: #28776, #28777)
  - 8f1d0b636e Merge pull request #28776 from rallytime/bp-28740-2015.5
  - 49256b7d90 Back-port #28740 to 2015.5

• ISSUE #28732: (dmyerscough) cherrypy API endpoint (refs: #28760)

• ISSUE #22452: (whiteinge) rest_cherrypy /keys URL returns empty keys for minion IDs that already exist (refs: #28760)
• ISSUE #22451: (whiteinge) rest_cherrypy /keys URL throws a 500 on the first request (refs: #28760)

• ISSUE #22442: (allanliu) rest_cherrypy /keys URL does not handle JSON requests (refs: #28760)

• PR #28760: (dmyerscough) Fixing CherryPy key bug @ 2015-11-11 15:11:18 UTC
  - 77d4b980f1 Merge pull request #28760 from dmyerscough/28732-Fix-cherrypi-api-keys-endpoint
  - 206d16b4b2 Fixing CherryPy key bug

• ISSUE #28714: (gravyboat) Salt-api doesn’t work with post unless data is included. (refs: #28718)

• PR #28746: (rallytime) Back-port #28718 to 2015.5 @ 2015-11-10 18:16:40 UTC
  - PR #28718: (sjmh) Account for no POST data (refs: #28746)
  - 6fbf04975f Merge pull request #28746 from rallytime/bp-28718
  - 092f441cad Account for no POST data

• PR #28705: (cachedout) Account for new headers class in tornado 4.3 (refs: #28716) @ 2015-11-09 19:24:34 UTC
  - f40c617bad Merge pull request #28705 from cachedout/tornado_http_headers
  - 7ac6cede1e Account for new headers class in tornado 4.3

• PR #28699: (rallytime) Back-port #28670 to 2015.5 @ 2015-11-09 18:10:58 UTC
  - PR #28670: (plastikos) psutil can fail to look-up a uid and raise a KeyError (refs: #28699)
  - 604a7b4199 Merge pull request #28699 from rallytime/bp-28670
  - e436b2396e psutil can fail to look-up a uid and raise a KeyError

• PR #28703: (rallytime) Back-port #28690 to 2015.5 @ 2015-11-09 18:01:57 UTC
  - PR #28690: (MrCitron) Fix 28689 : Check s3 ext pillar cache file before calculating expiration (refs: #28703)
  - 7bd3eb8370 Merge pull request #28703 from rallytime/bp-28690
  - a0988dac58 Fix 28689 : Check s3 ext pillar cache file before calculating expiration
  - PR saltstack/salt-bootstrap#868: (cachedout) Always refresh the Arch Linux keyring if needed (refs: #28694)

• PR #28694: (s0undt3ch) [2015.5] Update to latest bootstrap script v2015.11.09 @ 2015-11-09 17:49:53 UTC
  - 2a40f57b93 Merge pull request #28694 from s0undt3ch/2015.5
  - 0910c66fe4 Update to latest bootstrap script v2015.11.09

• ISSUE #26592: (centromere) rabbitmq.list_vhosts removes final line from rabbitmqctl output (refs: #28669)

• PR #28669: (rallytime) Use the -q argument to strip extraneous messages from rabbitmq @ 2015-11-08 01:07:25 UTC
  - 3249b32de8 Merge pull request #28669 from rallytime/fix-26592
  - 098f8b905a Use the -q argument to strip extraneous messages from rabbitmq

• ISSUE #28577: (jacksontj) Increase in master CPU usage after upgrading to 2015.8 (refs: #28645)

• PR #28645: (jacksontj) Rework minion return_retry_timer @ 2015-11-07 03:40:28 UTC
  - PR #27286: (terminalmage) Add a configurable timer for minion return retries (refs: #28645)
  - 29e82b0d0c Merge pull request #28645 from jacksontj/2015.5
  - f63c2d70a7 Rework minion return_retry_timer

28.2. Previous Releases
• **ISSUE #15177**: (baskinomics) `system.join_domain()` does not join domain on Windows Server 2012 R2 (refs: #28668)

• **PR #28668**: (twangboy) Fixed `join_domain` and `unjoin_domain` for Windows @ 2015-11-07 03:40:04 UTC
  - 1bbaea8aad Merge pull request #28668 from twangboy/fix_15177
  - 745b8f75f6 Fixed some lint
  - a43eb53f28 Added version added notes in docs
  - 6b537c8640 Fixed `join_domain` and `unjoin_domain` for Windows

• **ISSUE #8051**: (regilero) Problems with `fileinput.input inplace editing` in Salt.States.File.Replace (refs: #28174)

• **ISSUE #7999**: (regilero) MULTILINE pattern cannot work in `file.replace`, `fileinput` always reads line by line. (refs: #28174)

• **PR #28666**: (jfindlay) define `r_data` before using it in file module @ 2015-11-07 00:46:27 UTC
  - PR #28174: (lorenogordon) Add support for multiline regex in `file.replace` (refs: #28666)
  - 4ad5056066 Merge pull request #28666 from jfindlay/r_data
  - 29228f445f define `r_data` before using it in file module

• **ISSUE #24758**: (zerthimon) Salt-Minion uses 100% CPU for periodic status.master task on a server with a lot of TCP connections (a LB). (refs: #28662)

• **PR #28662**: (cachedout) Add note about disabling master_alive_interval @ 2015-11-07 00:38:12 UTC
  - e129e889ad Merge pull request #28662 from cachedout/issue_24758
  - 78f4894333 Add note about disabling master_alive_interval

• **PR #28627**: (twangboy) Backport `win_useradd` @ 2015-11-06 16:57:49 UTC
  - df121d0c6 Merge pull request #28627 from twangboy/backport_win_useradd
  - 8728b6354 Backport `win_useradd`

• **ISSUE #28398**: (L4rS6) Permissions `/var/cache/salt/minion/extmods` (refs: #28617)

• **PR #28617**: (cachedout) Set restrictive umask on module sync @ 2015-11-05 23:43:28 UTC
  - 64a20228c6 Merge pull request #28617 from cachedout/umask_module_sync
  - 227792e158 Set restrictive umask on module sync

• **ISSUE #28621**: (gravyboat) Puppet module documentation should be less insulting (refs: #28622)

• **PR #28622**: (gravyboat) Update puppet module wording @ 2015-11-05 20:34:07 UTC
  - 065f8c7fb3 Merge pull request #28622 from gravyboat/update_puppet_module_docs
  - 4ea28bed30 Update puppet module wording

• **ISSUE #655**: (thatch45) Add general command management to service (refs: #saltstack/salt-bootstrap#656)
  - PR saltstack/salt-bootstrap#674: (jfindlay) add support for repo.saltstack.com (refs: #28563)
  - PR saltstack/salt-bootstrap#665: (mbologna) Change to ‘dnf’ as package manager for Fedora 22-> (refs: #28563)
  - PR saltstack/salt-bootstrap#656: (eyj) Add bootstrap -b flag (don’t install dependencies) (refs: #28563)
  - PR saltstack/salt-bootstrap#654: (hedinfakok) Fixes error finding python-jinja2 in RHEL 7 (refs: #28563)
  - PR saltstack/salt-bootstrap#653: (cbuechler) Make bootstrap work with FreeBSD 11-CURRENT. (refs: #28563)
• **PR #28563: (s0undt3ch) [2015.5]** Update to latest bootstrap script v2015.11.04 @ 2015-11-04 15:16:31 UTC
  - 08295de5a5 Merge pull request #28563 from s0undt3ch/2015.5
  - 16f4db79a0 Update to latest bootstrap script v2015.11.04

• **ISSUE #28173: (twangboy)** system.computer_name does not work in windows (refs: #28541)

• **PR #28541: (twangboy)** Fixed problem with system.set_computer_name @ 2015-11-04 14:48:54 UTC
  - 1e09f186ce Merge pull request #28541 from twangboy/fix_28173
  - 7ed5ce370 Fixed problem with system.set_computer_name

• **ISSUE #28524: (bmcorser)** UnicodeDecodeError in states.file (refs: #28538, #28537)
  - **PR #28538: (jfindlay)** decode path and url to utf-8 in url.create (refs: #28537)

• **PR #28537: (jfindlay)** decode filename to utf-8 in file.recurse state @ 2015-11-04 14:48:18 UTC
  - f44ed780b5 Merge pull request #28537 from jfindlay/decode_state_2015.5
  - 06e514940c decode filename to utf-8 in file.recurse state

• **ISSUE #28272: (gravyboat)** Update documentation contributing docs to explain how to PR against different releases (refs: #28529)

• **PR #28529: (rallytime)** Update contributing and documentation pages to recommend submitting against branches @ 2015-11-04 14:47:21 UTC
  - 6acf87593f Merge pull request #28529 from rallytime/fix-28272
  - a959681858 Add link to Sending a GH PR to documentation docs
  - 1c612e2772 Update contributing and documentation pages to recommend submitting against branches

• **ISSUE #28511: (nghgd)** vmware clone task fails instead of waiting to completion (refs: #28546)

• **PR #28548: (nmadhok) [Backport] [2015.5]** Tasks can be in queued state instead of running @ 2015-11-04 04:14:25 UTC
  - **PR #28546: (nmadhok)** Tasks can be in queued state instead of running. (refs: #28548)
  - 025bff2bf0 Merge pull request #28548 from nmadhok/2015.5-task-error
  - 804a0a6537 Tasks can be in queued state instead of running. Fixes #28511

• **ISSUE #24585: (utahcon)** No version data for SALT.STATES.VIRTUALENV in wiki (refs: #28531)

• **PR #28531: (rallytime)** Add versionadded directives to virtualenv_mod state/module @ 2015-11-03 21:34:49 UTC
  - 63bd3e52b3 Merge pull request #28531 from rallytime/fix-24585
  - bc577b2531 Add versionadded directives to virtualenv_mod state/module

• **PR #28508: (twangboy)** Fixed windows tests @ 2015-11-03 19:31:12 UTC
  - ea3bf972c4 Merge pull request #28508 from twangboy/fix_unit_tests_windows
  - 0da6ff7c50 Fixed some logic
  - cfe059be55 Fixed windows tests

• **PR #28525: (rallytime)** Fix spacing in doc examples for boto_route53 state and module @ 2015-11-03 19:30:24 UTC
  - 73c5735fc1 Merge pull request #28525 from rallytime/route53_spacing
  - 6ab2ce615c Fix spacing in doc examples for boto_route53 state and module
• ISSUE #28243: (guettli) Docs: default value of state_auto_order? (refs: #28517)

• PR #28517: (rallytime) Add state_auto_order defaults to True note to ordering docs @ 2015-11-03 14:04:40 UTC
  - 2d7f934f67 Merge pull request #28517 from rallytime/fix-28243
  - be8f650901 Punctuation.
  - fd846822c1 Add state_auto_order defaults to True note to ordering docs

• PR #28512: (basepi) [2015.5] Merge forward from 2014.7 to 2015.5 @ 2015-11-03 00:38:08 UTC
  - 63ce8f78d5 Merge pull request #28512 from basepi/merge-forward-2015.5
  - 61c382133a Merge remote-tracking branch 'upstream/2014.7' into merge-forward-2015.5
  - 4bf56cad3f Merge pull request #28461 from cachedout/issue_28455
    * 097838ec0c Wrap all cache calls in state.sls in correct umask
    - f3e61db045 Merge pull request #28407 from DSRCompany/issues/24910_token_auth_fix_2014
      * b7b5bec309 Don't request creds if auth with key.

• PR #28448: (gwaters) added a note to the tutorial for redhat derivatives @ 2015-10-30 18:49:53 UTC
  - 37ceae1e88 Merge pull request #28448 from gwaters/add-redhat-notes
  - e70990704a added a note to the tutorial for those that redhat so they can use the state file too.

• PR #28406: (rallytime) Back-port #28381 to 2015.5 @ 2015-10-29 19:10:37 UTC
  - PR #28381: (JaseFace) Add FreeBSD detection for VirtualBox (refs: #28406)
  - 5e50d60cd Merge pull request #28406 from rallytime/bp-28381
  - e5322d2c44 Add FreeBSD detection for VirtualBox

• PR #28413: (rallytime) Back-port #28400 to 2015.5 @ 2015-10-29 18:06:46 UTC
  - PR #28400: (msciel) State pkg.installed: do not execute _preflight_check if not_installed list is empty in _find_install_targets (refs: #28413)
  - 30d5f7bbae Merge pull request #28413 from rallytime/bp-28400
  - ae1921b922 Do not execute _preflight_check if not_installed list is empty in _find_install_targets. Calling with empty list on rhel/centos cause execution of repoquery --whatprovides without pkg list which is memory consumptive task for host and also for red hat satellite server.

• PR #28366: (erchn) mark repo not enabled when pkgrepo state passes in disable: True @ 2015-10-29 15:55:54 UTC
  - 045d540aff Merge pull request #28366 from erchn/fix_yumpkg_mod_repo_disabled
  - 8187a4ce20 re-arrange things a bit to have less overall changes
  - f1d570ff18 move todelete above disabled check, add comment
  - 64feec413f also remove disabled key from repo_opts
  - 2f2ebb7bb6 mark repo not enabled when pkgrepo state passes in disable: True

• ISSUE #28372: (beverlcl) use_carrier option for bonding network interfaces are setting invalid values (refs: #28373)

• PR #28373: (beverlcl) Fixing bug #28372 for use_carrier option on bonding network interfaces. @ 2015-10-29 14:45:57 UTC
  - 3923f4a569 Merge pull request #28373 from beverlcl/fix-use_carrier-28372
- 32cffeceb6 Fixing bug #28372 for use_carrier option on bonding network interfaces.

- **PR #28359**: (rallytime) Back-port #28358 to 2015.5 @ 2015-10-28 20:43:05 UTC
  - **PR #28358**: (arthurlogilab) docstring typo fix - list returners not runners (refs: #28359)
  - e07e3f257b Merge pull request #28359 from rallytime/bp-28358
  - 9cabc582b docstring typo fix - list returners not runners

- **ISSUE #28000**: (hrumph) No option to stop windows minion installer from starting service in silent mode. (refs: #28346)

- **ISSUE #27923**: (twangboy) Salt Windows Installer fails to grab existing config (refs: #28346)

- **PR #28346**: (twangboy) Fix installer @ 2015-10-28 14:21:34 UTC
  - 282be7ba5a Merge pull request #28346 from twangboy/fix Installer
  - 65e3e5275 Updated documentation to reflect the new parameter
  - a05223554 Fixes #27923 and #28000

- **PR #28315**: (gwaters) Adding a working example of setting pillar data on the cli @ 2015-10-27 15:27:49 UTC
  - 78585a46b Merge pull request #28315 from gwaters/update-pillar-doc
  - b15285b04 adding a working example of setting pillar data on the cli

- **ISSUE #28209**: (basepi) Legacy git_pillar configs cause duplicate ext_pillar calls (refs: #28210)

- **PR #28211**: (terminalmage) Fix for ext_pillar being compiled twice in legacy git_pillar code (2015.5 branch) @ 2015-10-26 14:14:02 UTC
  - **PR #28210**: (terminalmage) Fix for ext_pillar being compiled twice in legacy git_pillar code (refs: #28211)
  - 065305ccf29 Merge pull request #28211 from terminalmage/legacy git_pillar-2015.5
  - 06d0a44a111 Remove non-functional test
  - ab991d61d9 Fix for ext_pillar being compiled twice in legacy git_pillar code (2015.5 branch)

- **ISSUE #26411**: (whiteinge) salt-call cannot send custom events without Minion daemon running (refs: #28263)

- **PR #28263**: (cachedout) New channel for event.send @ 2015-10-26 14:07:06 UTC
  - 66c984e407 Merge pull request #28263 from cachedout/issue_26411-1
  - 3b880a5f07 New channel for event.fire_master
  - 29e9533ab Stand up a new channel if using salt-call

- **PR #28293**: (cachedout) Minor grammar changes @ 2015-10-26 12:15:42 UTC
  - **PR #28271**: (gwaters) Update tutorial documentation (refs: #28293)
  - 798e1463d8 Merge pull request #28293 from cachedout/fix_28271
  - 499ed5819b Minor grammar changes to #28271

- **PR #28271**: (gwaters) Update tutorial documentation (refs: #28293) @ 2015-10-26 12:12:37 UTC
  - 06c984e407 Merge pull request #28271 from gwaters/update-tutorial-documentation
  - f6d39483d updated the tutorial with gravyboat’s suggestions
  - b1f4a2bdf4 i think i changed the wrong header, updated to fix
  - 846b3aace1 I found you can not run the cp.push commands until after enabling the feature in the conf, so I wanted to update the docs so others who try these commands wont bump into the same issue I had.
• ISSUE #28248: (0xf10e) conventions/formula.rst: "Gather external data" suggests unavailable jinja functionality (refs: #28280)

• PR #28280: (0xf10e) Correct Jinja function load_" to import_* @ 2015-10-25 04:11:10 UTC
  - e3eff9b909 Merge pull request #28280 from 0xf10e/patch-1
  - 6d43160ac Correct Jinja function load_" to import_*

• PR #28255: (cachedout) Add __cli opt @ 2015-10-23 18:44:30 UTC
  - 909fa3dc97 Merge pull request #28255 from cachedout/cli_opt
  - a2408157de Add __cli opt

• ISSUE #27374: (mool) boto_route53 state doesn't create a record (refs: #28213)

• PR #28213: (rallytime) If record returned None, don't continue with the state. Something went wrong @ 2015-10-23 13:54:50 UTC
  - 0fa094ae11 Merge pull request #28213 from rallytime/boto_route53_state
  - 237d4f1f11 If record returned None, don't continue with the state. Something went wrong.

• ISSUE #28217: (Ch3LL) Scheduler.present tries to add the scheduler each time (refs: #28238)

• PR #28238: (basepi) [2015.5] Fix schedule.present always differ @ 2015-10-23 13:54:50 UTC
  - 1768014705 Merge pull request #28238 from basepi/schedule.present.28217
  - 087a8dc3c2 Only insert enabled if it's a dict
  - 5b49f41fah Fix schedule comparison to adjust for 'enabled' being added in schedule.list
  - 2dc1226ab8 Build new item with 'enabled' if available

• ISSUE #8051: (regilero) Problems with fileinput.input inplace editing in salt.states.file.replace (refs: #28174)

• ISSUE #7999: (regilero) MULTILINE pattern cannot work in file.replace, fileinput always reads line by line. (refs: #28174)

• PR #28174: (lorengordon) Add support for multiline regex in file.replace (refs: #28666) @ 2015-10-22 14:02:43 UTC
  - bdd4c92de Merge pull request #28174 from lorengordon/file-replace-multiline
  - acdef2da60 Update docstrings with new guidance
  - 0835b005b7 Use a test that makes the extra file read unnecessary
  - 6d6121a6e5 Use flags when checking whether content was added previously
  - b25e609e9e Set flags=8 since now the file is read as a MULTILINE string by default
  - 89e8dcdf7f Use finally block to ensure mmap object is closed
  - 5ae6647c9 Add support for multiline regex in file.replace

• ISSUE #19673: (holyzhou) partition.mkpart in parted modules doesn't work (refs: #28175)

• PR #28175: (twangboy) Fixes #19673 @ 2015-10-21 20:48:24 UTC
  - 2225925fb5 Merge pull request #28175 from twangboy/fix_19673
  - ae8fbb208f Fixes #19673

• PR #28140: (rallytime) Add OpenBSD installation documentation to 2015.5 branch @ 2015-10-20 16:31:34 UTC
  - PR #28103: (ajacoutot) OpenBSD salt package: update list of dependencies. (refs: #28140)
- ab18df637 Merge pull request #28140 from rallytime/bsd-installation-doc
- 458a544d83 Add OpenBSD installation documentation to 2015.5 branch

**ISSUE #28101**: (bogdamm) salt-cloud ec2 list-sizes doesn’t show all available sizes (refs: #28138)

**PR #28138**: (rallytime) Back-port #28130 EC2 Sizes Only portion to 2015.5 @ 2015-10-20 16:29:09 UTC
- PR #28130: (bogdamm) Ec2 upload public key and updated instances size list (refs: #28138)
- fad38eb3c3 Merge pull request #28138 from rallytime/bp-28130-sizes-only
- 6ab31e1886 Pylint
- 37e4ed58a9 Added missing comma
- 667f5e669f Added a bunch of instance sizes and updated some outdated ones

**ISSUE #26844**: (double-yaya) The function “state.sls” is running as PID XXXX and was started at .... with jid XXXX always shows the current jid (refs: #28097)

**PR #28097**: (jacksontj) For all multi-part messages, check the headers. If the header is not ... @ 2015-10-20 15:00:18 UTC
- ce8f858536 Merge pull request #28097 from jacksontj/2015.5
- 75e04bc8c6 For all multi-part messages, check the headers. If the header is not your minion_id, skip the message

**ISSUE #23655**: (arthurlogilab) salt-cloud with lxc should not traceback when minion is unreacheable (refs: #28117)

**PR #28117**: (rallytime) Clean up stacktrace when master can’t be reached in lxc cloud driver @ 2015-10-20 12:41:12 UTC
- 9cdeb90289 Merge pull request #28117 from rallytime/fix-23655
- dbf908e405 Clean up stacktrace when master can’t be reached in lxc cloud driver

**PR #28110**: (terminalmage) Add explanation of file_client: local setting masterless mode @ 2015-10-20 12:28:05 UTC
- bf7ed0a397 Merge pull request #28110 from terminalmage/masterless-mode
- ed90103124 Add explanation of file_client: local setting masterless mode

**ISSUE #27940**: (multani) salt-cloud creating lxc containers doesn’t fire "salt/cloud/*/created" event (refs: #28109)

**PR #28109**: (rallytime) Add created reactor event to lxc cloud driver @ 2015-10-19 20:32:41 UTC
- a569ef4980 Merge pull request #28109 from rallytime/fix-27940
- 18b2245611 Add created reactor event to lxc cloud driver

**ISSUE #21845**: (kitsemets) pip.install: fails in v2015.2.0rc1 when the package is already installed (pip v1.0) (refs: #27996)

**PR #27996**: (rallytime) Don’t fail if pip package is already present and pip1 is installed @ 2015-10-19 12:59:17 UTC
- d4604fdb26 Merge pull request #27996 from rallytime/fix-21845
- f8380d751e Provide empty string as default stdout instead of None
- f9406b5828 Don’t fail if pip package is already present and pip1 is installed

**PR #28056**: (rallytime) Back-port #28033 to 2015.5 @ 2015-10-19 12:55:10 UTC
- PR #28033: (twangboy) Fixed win_useradd.py (refs: #28056)
- 28b97c514f Merge pull request #28056 from rallytime/bp-28033
- af2c5ab759 Fixed win_useradd.py
- PR #28059: (rallytime) Back-port #28040 to 2015.5 @ 2015-10-18 16:17:29 UTC
  - PR #28040: (erchn) Swift rackspace fixes (refs: #28059)
  - dfc3aacc74 Merge pull request #28059 from rallytime/bp-28040
  - 76a0d4937b Revert "Allow passing in auth_version, defaulting to 2."
  - 63d5675d34 default auth_version = 2
  - 807216888 remove extra spaces
  - 9770f56f04 cleanup whitespace, default to None to be consistent with profile
  - f4adfe98c0 Allow passing in auth_version, defaulting to 2.
  - fab1ad39af Rackspace support for switft module.
- ISSUE #27534: (llevar) file.managed can't retrieve file via ftp (refs: #28047)
- PR #28047: (cachedout) Restore FTP functionality to file client @ 2015-10-18 16:16:46 UTC
  - d1fa036b55 Merge pull request #28047 from cachedout/issue_27534
  - 6ea37ddc3a Context manager
  - 4d6f6bb371 Lint
  - 59018289dc Restore FTP functionality to file client
- PR #28032: (twangboy) Fixed win_path.py @ 2015-10-17 15:16:15 UTC
  - fd2ca2df1b Merge pull request #28032 from twangboy/fix_win_path
  - 2bcac93314 Fixed win_path.py
- ISSUE #26336: (jfindlay) windows user.present broken (refs: #28037)
- PR #28037: (rallytime) Back-port #28003 to 2015.5 @ 2015-10-16 20:59:52 UTC
  - PR #28003: (twangboy) Fix #26336 (refs: #28037)
  - 88c1770be4 Merge pull request #28037 from rallytime/bp-28003
  - 4fcb71db3e Fix PR #26336
- PR #28031: (jacobhammons) Updated release notes with additional CVE information @ 2015-10-16 16:19:37 UTC
  - de727d8bd2 Merge pull request #28031 from jacobhammons/relnotes6
  - 05927bb6f0 Updated release notes with additional CVE information
- ISSUE #27897: (Inveracity) request to add \r escape character for salt.states.host for windows (refs: #28008)
- PR #28008: (jfindlay) platform independent line endings in hosts mod @ 2015-10-16 13:20:28 UTC
  - 9f7047dd3c platform independent line endings in hosts mod
- ISSUE #2810: (vakulich) Error "KeyError: ‘ret’" appeared during salt.state run in orchestrate module if minion had an exception (refs: #28010)
• **PR #28012**: (rallytime) Clean up stack trace when something goes wrong with minion output @ 2015-10-16 12:40:59 UTC
  - d41018f8a8 Merge pull request #28012 from rallytime/fix-28010
  - 0d7059e0c2 Clean up stack trace when something goes wrong with minion output
• **PR #27995**: (jacobhammons) added link to grains security FAQ to targeting and pillar topics. @ 2015-10-15 21:15:31 UTC
  - f728307001 Merge pull request #27995 from jacobhammons/pillar-doc
  - 2870af2ba3 added link to grains security FAQ to targeting and pillar topics.
• **PR #27986**: (jacobhammons) Changed current release to 5.6 and added CVE to release notes @ 2015-10-15 17:25:41 UTC
  - efede904a7 Merge pull request #27986 from jacobhammons/dot6
  - bb61c68c11 Changed current release to 5.6 and added CVE to release notes
• **PR #27913**: (pass-by-value) Set default @ 2015-10-14 14:03:36 UTC
  - 831ec68d9 Merge pull request #27913 from pass-by-value/proxmox_verify_ssl
  - 0b721efe37 Set default
• **PR #27876**: (terminalmage) 2015.5 branch: Fix traceback when 2015.8 git ext_pillar config schema used @ 2015-10-13 14:58:45 UTC
  - 41cccb3a30 Merge pull request #27876 from terminalmage/git_pillar-AttributeError-2015.5
  - 07794c837a 2015.5 branch: Fix traceback when 2015.8 git ext_pillar config schema used
• **ISSUE #27610**: (benburkert) PR #27201 broke ssh_known_hosts with :port (refs: #27726)
• **ISSUE #27187**: (SeverinLeonhardt) ssh_known_hosts.present hashes other entries even with hash_hostname: false (refs: #27201)
• **PR #27726**: (jfindlay) deprecate hash_hostname in favor of hash_known_hosts @ 2015-10-12 16:19:09 UTC
  - PR #27201: (jfindlay) rename hash_hostname to hash_known_hosts (refs: #27726)
  - c9cb3b760e Merge pull request #27726 from jfindlay/hashhosts
  - ebe47c7e7c add docs to ssh.recv_known_host exec module fcn
  - b6ee16b1e5 deprecate hash_hostname in favor of hash_known_hosts
• **ISSUE #27735**: (go8ose) saltutils.find_cached_job doesn’t work (refs: #27776)
• **PR #27776**: (jfindlay) return message when local jobs_cache not found @ 2015-10-12 16:11:41 UTC
  - 18e31584b0 Merge pull request #27776 from jfindlay/local_msg
  - 03afa3c7fa return message when local jobs_cache not found
• **ISSUE #27665**: (ahammond) user.absent should not "fail" if /var/spool/mail/<user> already does not exist. (refs: #27766)
• **PR #27766**: (jfindlay) better check for debian userdel error @ 2015-10-12 15:14:33 UTC
  - 86cc7b5537 Merge pull request #27766 from jfindlay/debmail
  - ee78a2c27 better check for debian userdel error
• **ISSUE #27756**: (iggy) syslog returner formats line incorrectly (refs: #27758)
• **PR #27758**: (iggy) Remove redundant text from syslog returner @ 2015-10-12 15:09:49 UTC
Salt Documentation, Release 3002.2

- c22438c9a Merge pull request #27758 from iggy/patch-1
- 0994fb6a8c Remove redundant text from syslog returner

- **ISSUE #27832**: (viking60) Salt fails to recognize Manjaro (as an Arch derivate) (refs: #27841)
- **PR #27841**: (terminalmage) Detect Manjaro Linux as Arch derivative @ 2015-10-12 14:53:46 UTC
  - 34a005041f Merge pull request #27841 from terminalmage/issue27832
  - 8e09fb6da3 Detect Manjaro Linux as Arch derivative

- **ISSUE #26538**: (seanjknns) salt.states.file.managed generates warning when used in place of salt.states.file.touch (refs: #27806)
- **PR #27852**: (rallytime) Back-port #27806 to 2015.5 @ 2015-10-12 14:53:17 UTC
  - **PR #27806**: (blast-hardcheese) Empty string is falsy (refs: #27852)
  - 394da49b8c Merge pull request #27806 from rallytime/bp-27806
  - a84bf18b3e Empty string is falsy

- **ISSUE #27831**: (basepi) v2015.5.5 highstate outputter stacktracing for jobs.lookup_jid (refs: #27838)
- **PR #27838**: (basepi) [2015.5] Fix highstate outputter for jobs.lookup_jid @ 2015-10-09 22:26:28 UTC
  - **PR #25521**: (cachedout) Fix outputter for state.orch (refs: #27838)
  - 75081c474 Merge pull request #27838 from basepi/fixed.runner.highstate.outputter.27831
  - 8ae96669f D0n't pop 'outputter', we expect it further down

- **PR #27791**: (eguven) 2015.5 postgres_user groups backport @ 2015-10-08 23:59:08 UTC
  - d178315f93 Merge pull request #27791 from eguven/2015.5-postgres-user-groups-backport
  - 2caf1d216 fix test
  - b90ec30b6fe improve change reporting for postgres_user groups
  - 8712bce91a backport postgres_user groups

- **PR #27759**: (basepi) [2015.5] Merge forward from 2014.7 to 2015.5 @ 2015-10-07 18:01:54 UTC
  - b2937ba16a Merge pull request #27759 from basepi/merge-forward-2015.5
  - 792ee084bb Merge remote-tracking branch 'upstream/2014.7' into merge-forward-2015.5
  - d284eb16b5 Merge pull request #27390 from JaseFace/schedule-missing-enabled
  - 563db71f6b Ensure we pass on the enable setting if present, or use the default of True if not in build_schedule_item() Prior to this, when schedule.present compares the existing schedule to the one crafted by this function, enabled will actually be removed at each run. schedule.present sees a modification needs to be made, and invokes schedule.modify, which does so with enabled: True, creating and endless loop of an 'enabled' removal and addition.

- **ISSUE #26673**: (robkinyon) __virtual__() doesn't work without __virtualname__ (refs: #27732)
- **PR #27732**: (jacobhammons) update docs for __virtual__ and __virtualname__ @ 2015-10-07 17:29:31 UTC
  - 4b9128b491 Merge pull request #27732 from jacobhammons/26673
  - 75cc07cf10 noted that __virtual__ can return False and an error string
  - b928e1afa8 update docs for __virtual__ and __virtualname__ Refs #26673

- **PR #27747**: (Sacro) Chocolatey doesn't have a help command. @ 2015-10-07 16:06:53 UTC
  - a130896d1c Merge pull request #27747 from Sacro/fix-chocolatey-version
8f1fa9e78e Chocolatey doesn't have a help command.

• **PR #27733**: (jacobhammons) hardening topic - updates to docs.saltstack.com theme @ 2015-10-07 01:44:00 UTC
  - 4e48651de0 Merge pull request #27733 from jacobhammons/bug-fixes
  - cbecd4f553 Updated saltstack2 theme to add SaltConf16 banner
  - 117e0c2bce Added hardening topic based on the information inRefs #27088

• **ISSUE #9051**: (olenz) Add bash completion to the docs (refs: #27706)

• **ISSUE #27005**: (johanek) grains precedence (refs: #27706)

• **ISSUE #21475**: (quantonganh) Targeting with pillar should be added in to the main targeting page (refs: #27706)

• **ISSUE #14876**: (whiteinge) Create a pre-Salted tutorial VM (refs: #27706)

• **ISSUE #13407**: (gravyboat) Create page explaining how to pass variables on the command line (refs: #27706)

• **PR #27706**: (jacobhammons) Assorted doc bugs @ 2015-10-06 05:35:29 UTC
  - c58da846bf Merge pull request #27706 from jacobhammons/bug-fixes
  - 76dc8de71b Assorted doc bugs Refs #9051 Refs #13407 Refs #21475 Refs #14876 Refs #27005

• **PR #27695**: (rallytime) Back-port #27671 to 2015.5 @ 2015-10-05 21:57:36 UTC
  - PR #27671: (gashev) Added skip test_ext_pillar_env_mapping if git module does not exist. (refs: #27695)
  - 43fba89865 Merge pull request #27695 from rallytime/bp-27671
  - 2a8802595 Added skip test_ext_pillar_env_mapping if git module does not exist.

• **ISSUE #27501**: (yermulnik) [FreeBSD] "pkg search" behavior changed since 1.5 series (refs: #27524)

• **PR #27524**: (jfindlay) parse pkgng output in quiet mode for => 1.6.1 @ 2015-10-05 21:22:40 UTC
  - cb3d92676e Merge pull request #27524 from jfindlay/pkgng_quiet
  - 5e9107b970 parse pkgng output in quiet mode for => 1.6.0

• **PR #27686**: (rallytime) Back-port #27476 to 2015.5 @ 2015-10-05 21:17:59 UTC
  - PR #27476: (belvedere-trading) fix for: https://github.com/saltstack/salt/issues/27373 (refs: #27686)
  - 5b88c55cc3 Merge pull request #27476 from rallytime/bp-27476
  - 3e08d3de8a fix for: https://github.com/saltstack/salt/issues/27373

• **ISSUE #27655**: (gracinet) postgres_local_cache handling of success (refs: #27656)

• **PR #27684**: (rallytime) Back-port #27656 to 2015.5 @ 2015-10-05 21:17:55 UTC
  - PR #27656: (gracinet) Fix #27655: handling of success in postgres_local_cache (refs: #27684)
  - f9dd4647f Merge pull request #27684 from rallytime/bp-27656
  - d3780ca00 Fix #27655: handling of success in postgres_local_cache

• **PR #27683**: (rallytime) Back-port #27659 to 2015.5 @ 2015-10-05 21:17:30 UTC
  - PR #27659: (gnubyexample) .pub as public key is what we should send to remote (refs: #27683)
  - 7ca6f854ff Merge pull request #27683 from rallytime/bp-27659
  - 84b6e0c58 .pub as public key is what we should send to remote

• **PR #27682**: (rallytime) Back-port #27566 to 2015.5 @ 2015-10-05 21:17:26 UTC
  - PR #27566: (blueeyed) returners.local_cache: fix endless loop on OSErr (refs: #27682)

28.2.86   Salt 2015.5.8 Release Notes

release 2015-12-01

Version 2015.5.8 is a bugfix release for 2015.5.0.

Statistics

- Total Merges: 17
- Total Issue References: 12
- Total PR References: 27
- Contributors: 12 (MasterNayru, TronPaul, basepi, cachedout, cxmcc, jfindlay, kevinlondon, messa, rallytime, tehmaspc, twangboy, whiteinge)

Security Fix

CVE-2015-8034 Saving state.sls cache data to disk with insecure permissions

This affects users of the state.sls function. The state run cache on the minion was being created with incorrect permissions. This file could potentially contain sensitive data that was inserted via jinja into the state SLS files. The permissions for this file are now being set correctly. Thanks to zmalone for bringing this issue to our attention.

Changelog for v2015.5.7..v2015.5.8

ISSUE #28883: (ldelossa) Issues running select states - local variable 'salt' referenced before assignment (refs: #29113)

PR #29164: (jfindlay) Backport #29113 @ 2015-11-24 21:26:17 UTC
  - PR #29113: (TronPaul) Kill unneeded import (refs: #29164)
  - PR #28740: (MasterNayru) Add missing S3 module import (refs: #28839, #29113)
- a26c10a811 Merge pull request #29164 from jfindlay/bp-29113
- 50fab35188 kill unneeded import

**PR #29138:** (jfindlay) add 2015.5.8 release notes @ 2015-11-23 23:22:48 UTC
- 4f03196e7d Merge pull request #29138 from jfindlay/2015.5
- be045f5cb1 add 2015.5.8 release notes

**ISSUE #29110:** (mohshami) 2015.8.2 broke orchestration (refs: #29122)

**ISSUE #28010:** (vakulich) Error "KeyError: 'ret'" appeared during salt.state run in orchestrate module if minion had an exception (refs: #28012)

**PR #29128:** (cachedout) Set a safer default value for ret in saltmod @ 2015-11-23 17:07:40 UTC
- **PR #29122:** (cachedout) Fix broken state orchestration (refs: #29128)
- **PR #28012:** (rallytime) Clean up stack trace when something goes wrong with minion output (refs: #29122)
  - 219367a23d Merge pull request #29128 from cachedout/tweak_29122
  - b0885b0b40 Missed check
  - 584efe81ee Set a safer default value for ret in saltmod

**ISSUE #29110:** (mohshami) 2015.8.2 broke orchestration (refs: #29122)

**PR #28010:** (vakulich) Error "KeyError: 'ret'" appeared during salt.state run in orchestrate module if minion had an exception (refs: #28012)

**PR #29122:** (cachedout) Fix broken state orchestration (refs: #29128) @ 2015-11-23 16:24:18 UTC
- **PR #28012:** (rallytime) Clean up stack trace when something goes wrong with minion output (refs: #29122)
  - 2250a36647 Merge pull request #29122 from cachedout/issue_29110
  - 4b9302d794 Fix broken state orchestration

**PR #29096:** (rallytime) Back-port #29093 to 2015.5 @ 2015-11-22 17:02:51 UTC
- **PR #29093:** (cmxnc) Compare gem versions as a string. (refs: #29096)
  - 200e771efb Merge pull request #29096 from rallytime/bp-29093
  - f5734423a4 Compare gem versions as a string.

**PR #29084:** (rallytime) Back-port #29055 to 2015.5 @ 2015-11-20 20:57:54 UTC
- **PR #29055:** (cachedout) Add section to style guide (refs: #29084)
  - d8a2018bc8 Merge pull request #29084 from rallytime/bp-29055
  - 52e650aed9 Add section to style guide

**PR #29083:** (rallytime) Back-port #29053 to 2015.5 @ 2015-11-20 20:57:38 UTC
- **PR #29053:** (kevinlondon) Update rabbitmq_user.py (refs: #29083)
  - b5cfff1a351 Merge pull request #29083 from rallytime/bp-29053
  - f1884de0e7 Update rabbitmq_user.py

**ISSUE #28928:** (twangboy) Fix user.present 2015.5 (refs: #28932)

**PR #28932:** (twangboy) Fixed user.present / user.absent in windows @ 2015-11-18 21:45:53 UTC
– PR #28627: (twangboy) Backport win_useradd (refs: #28932)
– b3e3bebef0 Merge pull request #28932 from twangboy/fix_28928
– 0653a04887 Fixed user.present / user.absent in windows

• ISSUE #26911: (dsumsky) file.manage state does not work with Amazon S3 URLs on Windows (refs: #28630)
• ISSUE #13850: (ryan-lane) s3:// urls in file.managed (and likely elsewhere) require s3.key and s3.keyid to be in minion config (refs: #28630)

• PR #29011: (rallytime) Back-port #28630 to 2015.5 @ 2015-11-18 17:50:05 UTC
  – PR #28630: (messa) Use S3 credentials from Pillar (refs: #29011)
  – a2e4a227e0 Merge pull request #29011 from rallytime/bp-28630
  – 7baccc1b05 Lint - newline before def
  – 9e5c16d4da Reading S3 credentials from Pillar
  – a3216f813d Fixed requests HTTPError handler, it was still in urllib2 style

• PR #28982: (basepi) [2015.5] Merge forward from 2014.7 to 2015.5 @ 2015-11-18 00:49:32 UTC
  – 1a4cd602f Merge pull request #28982 from basepi/merge-forward-2015.5
  – bfbb109fbd Merge remote-tracking branch ‘upstream/2014.7’ into merge-forward-2015.5
  – 4b8bdd0af8 Merge pull request #28839 from cachedout/revert_28740
  – 215b26c06f Revert #28740

• ISSUE #28947: (dmyerscough) sdb modules are not synced out (refs: #28949)
• PR #28949: (whiteinge) Add sync_sdb execution function @ 2015-11-17 15:35:38 UTC
  – edd26d763a Merge pull request #28949 from whiteinge/sync-sdb
  – b0ec9ab25b Add sync_sdb execution function

• ISSUE #28888: (twangboy) Fix file.comment (refs: #28930)
• PR #28930: (twangboy) Added missing import mmap required by file.py @ 2015-11-16 23:17:23 UTC
  – 43da1b4ce Merge pull request #28930 from twangboy/fix_28888
  – f5c489eaad Added missing import mmap required by file.py

• PR #28908: (rallytime) A couple of spelling fixes for doc conventions page. @ 2015-11-16 02:29:35 UTC
  – 2488b873b8 Merge pull request #28908 from rallytime/doc-convention-spelling
  – 60e6edd777 A couple of spelling fixes for doc conventions page.

• ISSUE #22442: (allanliu) rest_cherrypy /keys URL does not handle JSON requests (refs: #28902)
• PR #28902: (whiteinge) Fix missing JSON support for /keys endpoint @ 2015-11-15 15:36:05 UTC
  – 827a1ae020 Merge pull request #28902 from whiteinge/json-keys
  – 9745903301 Fix missing JSON support for /keys endpoint

• PR #28897: (rallytime) Back-port #28873 to 2015.5 @ 2015-11-15 00:43:35 UTC
  – PR #28873: (tehmaspc) Fix salt-cloud help output typo (refs: #28897)
  – d23bd49130 Merge pull request #28873 from rallytime/bp-28873
  – 077e671ead Fix salt-cloud help output typo
• ISSUE #28870: (basepi) mdadm commands failing (refs: #28871)
• PR #28871: (basepi) [2015.5] Fix command generation for mdadm.assemble @ 2015-11-13 21:54:33 UTC
  – a9dc8b6ca6 Merge pull request #28871 from basepi/mdadm.fix.28870
  – 323bc2d2ac Fix command generation for mdadm.assemble

28.2.87 Salt 2015.5.9 Release Notes

release 2016-01-11

Version 2015.5.9 is a bugfix release for 2015.5.0.

Statistics

• Total Merges: 45
• Total Issue References: 21
• Total PR References: 48
• Contributors: 21 (abednarik, aletourneau, attiasr, basepi, cachedout, clan, clarkperkins, cro, dmyerscough, jacobhammons, jfindlay, jsutton, justinta, lorengordon, markckimball, mpreziuso, rallytime, terminalmage, titilambert, twangboy, zmalone)

Changelog for v2015.5.8..v2015.5.9

• PR #30248: (jfindlay) add 2015.5.9 release notes @ 2016-01-08 23:13:10 UTC
  – 92889db638 Merge pull request #30248 from jfindlay/2015.5
  – 741f7aba31 add 2015.5.9 release notes
• PR #30237: (jacobhammons) Updated man pages and doc version for 2015.5.9 @ 2016-01-08 18:10:05 UTC
  – 7a329d89d7 Merge pull request #30237 from jacobhammons/man-pages-prev
  – 2431c45c3 Updated man page and doc conf.py copyright year to 2016
  – fe3da1c174 Updated man pages and doc version for 2015.5.9
• PR #30207: (rallytime) Use correct spacing in rabbitmq state examples @ 2016-01-07 18:37:35 UTC
  – 2c0b725924 Merge pull request #30207 from rallytime/rabbitmq_states_doc_fix
  – 8d48c24182 Use correct spacing in rabbitmq state examples
• PR #30191: (jacobhammons) Updated doc site banners @ 2016-01-06 22:37:40 UTC
  – b49cf910f4 Merge pull request #30191 from jacobhammons/banner-prev
  – c3390955b0 Updated doc site banners
• ISSUE #29633: (twellspring) user.present does not modify home directory (refs: #30125)
• PR #30125: (abednarik) Update user home event when createhome is set to False @ 2016-01-05 18:15:38 UTC
  – 9363d6f5b6 Merge pull request #30125 from abednarik/update_user_home
  – 56544a77f6 Update user home event when createhome is set to False
• ISSUE #10155: (jhenry82) Option to select a random master in multi-master mode (refs: #30127)

• PR #30127: (jsutton) Updating documentation and example minion config for random_master/master_shuffle.
  @ 2016-01-04 19:30:50 UTC
  - 1a5d585d91 Merge pull request #30127 from jsutton/clarify-documentation-for-random_master
  - 01db3f85ef Adding random_master to reference and updating master_shuffle. Adding master_shuffle to
    the minion example config file as it is needed for multi-master PKI.

• PR #30110: (markckimball) Fixed flag sent to salt.utils.http in order for verify_ssl to work correctly @
  2015-12-31 21:17:53 UTC
  - 28b1bbe77 Merge pull request #30110 from markckimball/fix-verify_ssl-in-joyent-cloud
  - e1c08cb269 Fixed flag sent to salt.utils.http in order for verify_ssl to work appropriately.

• PR #30093: (zmalone) Noting that file_roots and "state tree" should both be avoided @
  2015-12-30 22:40:05 UTC
  - 040412b0b1 Merge pull request #30093 from zmalone/pillar-notes
  - cbfd58afe Noting that file_roots and "state tree" should both be avoided, because in some environments,
    the actual states show up another level down. Adding notes about why this is undesirable.

• ISSUE #28120: (jtylers) Clear text passwords (refs: #30097)

• PR #30097: (cachedout) Note concern about cleartext password in docs for shadow.gen_password @
  2015-12-30 22:37:33 UTC
  - 25edefc93a Merge pull request #30097 from cachedout/note_on_password_process_list
  - 58aec884ef Note concern about cleartext password in docs for shadow.gen_password

• PR #30089: (mpreziuso) Fixes terminology and adds more accurate details about the algorithms @
  2015-12-30 20:02:18 UTC
  - 6b1c3a6bf2 Merge pull request #30089 from mpreziuso/patch-1
  - 50533add40 Fixes terminology and adds more accurate details about the algorithms

• ISSUE #29921: (anlutro) pygit 0.21 not fully supported? (refs: #30086)

• PR #30086: (cachedout) Document that gitfs needs recent libs @
  2015-12-30 19:26:05 UTC
  - 200d09385d Merge pull request #30086 from cachedout/issue_29921
  - 8c29e2d6da Document that gitfs needs recent libs

• ISSUE #27835: (bertjwregeer) [FreeBSD] salt-ssh hangs forever (refs: #30070)

• PR #30070: (cachedout) Add documentation on debugging salt-ssh @
  2015-12-29 23:00:06 UTC
  - 404414bf57 Merge pull request #30070 from cachedout/issue_27835
  - 60431e342a Add documentation on debugging salt-ssh

• PR #30059: (mpreziuso) Fixes wrong function scope @
  2015-12-29 16:12:06 UTC
  - 84db12212d Merge pull request #30059 from mpreziuso/patch-1
  - 1cb1c2da07 Fixes wrong function scope

• PR #30025: (justinta) Skipping some Boto tests until resolved moto issue @
  2015-12-28 15:21:45 UTC
  - PR #29725: (cachedout) Disable some boto tests per resolution of moto issue (refs: #30025)
  - 1c6cb1a06 Merge pull request #30025 from jand/boto_tests
  - e706642152 Skipping some Boto tests until resolved moto issue
- **ISSUE #28956**: (racooper) Netscaler module doc enhancements (refs: #29949)
- **PR #29949**: (aletourneau) Enhanced netscaler docstring @ 2015-12-22 20:26:52 UTC
  - 0f91021c59 Merge pull request #29949 from aletourneau/2015.5
  - cf855fe262 Fixed trailing white spaces
  - 864801e002 fixed version
  - 041d9346c4 Enhanced netscaler docstring
- **PR #29941**: (cachedout) Fix spelling error in boto_vpc @ 2015-12-22 15:49:54 UTC
  - 229d3eb60b Merge pull request #29941 from cachedout/boto_spelling
  - b11bfd07b8 Fix spelling error in boto_vpc
- **ISSUE #29880**: (githubcdr) Salt pkg.uptodate fails on Arch linux (refs: #29908)
- **PR #29908**: (cachedout) Allow kwargs to be passed to pacman provide for update func @ 2015-12-22 15:04:18 UTC
  - 69c5ada636 Merge pull request #29908 from cachedout/issue_29880
  - 4cd77b4118 Allow kwargs to be passed to pacman provide for update func
- **ISSUE #27056**: (oogali) pkgng provider on FreeBSD does not do BATCH=yes (refs: #29909)
- **PR #29909**: (abednarik) FreeBSD pkgng fix for non-interactive install. @ 2015-12-22 15:03:50 UTC
  - ad0de4d563 Merge pull request #29909 from abednarik/freebsd_pkgng_non_interactive_fix
  - 8ac213001a FreeBSD pkgng fix for non-interactive install.
- **ISSUE #24698**: (cmhe) docker.installed not working (salt 2015.5.0, docker 1.6.2, dockerpy 0.5.3) (refs: #29730)
- **PR #29730**: (rallytime) Update docker-py version requirement to 0.6.0 for dockerio.py files @ 2015-12-15 14:44:40 UTC
  - f43f8d166c Merge pull request #29730 from rallytime/fix-24698
  - 120fd5f0 Update docker-py version requirement to 0.6.0 for dockerio.py files
- **ISSUE #23343**: (micaelbergeron) npm state ignore the requested version (refs: #29715)
- **ISSUE #18647**: (hundt) Version number in npm state name does not result in correct version being installed (refs: #29715)
- **PR #29715**: (rallytime) Install correct package version, if provided, for npm state. @ 2015-12-15 23:19:45 UTC
  - c393a4175a Merge pull request #29715 from rallytime/fix-23343
  - a0ed857c37 Install correct package version, if provided, for npm state.
- **PR #29721**: (terminalmage) Fix display of multiline strings when iterating over a list @ 2015-12-15 22:16:10 UTC
  - 1310afbbc2 Merge pull request #29721 from terminalmage/nested-output-multiline-fix
  - 761be9eb93 Fix display of multiline strings when iterating over a list
- **ISSUE #29488**: (Shad0w1nk) salt.cloud.clouds.vmware.revert_to_snapshot crash when using the default value (refs: #29646)
- **PR #29646**: (rallytime) Don’t stacktrace on kwargs.get if kwargs=None @ 2015-12-15 19:02:58 UTC
  - 52cc07cec9 Merge pull request #29646 from rallytime/fix-29488
  - c5fa9e9351 Don’t stacktrace on kwargs.get if kwargs=None
- **ISSUE #29661**: (mosuowhq) bug report when creating VM in /salt/cloud/clouds/nova.py (refs: #29673)
- **PR #29673**: (rallytime) Default value should be False and not 'False' @ 2015-12-14 18:08:44 UTC
  - f606c23e8 Merge pull request #29673 from rallytime/fix-29661
  - e4a7a1157 Default value should be False and not 'False'
- **PR #29527**: (jfindlay) 2015.5.7 notes: add note about not being released @ 2015-12-08 19:14:51 UTC
  - 867d550271 Merge pull request #29539 from basepi/merge-forward-2015.5
  - 2c94ba430 Merge remote-tracking branch 'upstream/2014.7' into merge-forward-2015.5
  - 85aa70a6cb Merge pull request #29392 from jacobhammons/2014.7
    * d7f0db1dd8 updated version number to not reference a specific build from the latest branch
- **ISSUE #12072**: (vk00226) Passing user-data when provisioning ec2 instances (refs: #29504)
- **PR #29504**: (rallytime) Document userdata_file option for EC2 driver @ 2015-12-08 16:54:33 UTC
  - de7f3d5a59 Merge pull request #29504 from rallytime/fix-12072
  - 8357c95dc2 Document userdata_file option for EC2 driver
- **ISSUE #29101**: (jessbreckenridge) Salt-cloud 2015.8.0 - del_*_vols_on_destroy does not work according to docs (refs: #29507)

  - b1dace5e6fe Use os.path.join to return full path to ca bundle

---

### 28.2.88 Salt 2014.7.0 Release Notes - Codename Helium

This release is the largest Salt release ever, with more features and commits then any previous release of Salt. Everything from the new RAET transport to major updates in Salt Cloud and the merging of Salt API into the main project.

**Important:** The Fedora/RHEL/CentOS salt-master package has been modified for this release. The following components of Salt have been broken out and placed into their own packages:

- salt-syndic
- salt-cloud
- salt-ssh
When the `salt-master` package is upgraded, these components will be removed, and they will need to be manually installed.

**Important:** Compound/pillar matching have been temporarily disabled for the `mine` and `publish` modules for this release due to the possibility of inferring pillar data using pillar glob matching. A proper fix is now in the 2014.7 branch and scheduled for the 2014.7.1 release, and compound matching and non-globbing pillar matching will be re-enabled at that point.

Compound and pillar matching for normal salt commands are unaffected.

**New Transport!**

**RAET Transport Option**

This has been a HUGE amount of work, but the beta release of Salt with RAET is ready to go. RAET is a reliable queuing transport system that has been developed in partnership with a number of large enterprises to give Salt an alternative to ZeroMQ and a way to get Salt to scale well beyond tens of thousands of servers. Unlike ZeroMQ, RAET is completely asynchronous in every aspect of its operation and has been developed using the flow programming paradigm. This allows for many new capabilities to be added to Salt in the upcoming releases.

Please keep in mind that this is a beta release of RAET and we hope for bugs to be worked out, performance to be better realized and more in the 2015.5.0 release.

Simply stated, users running Salt with RAET should expect some hiccups as we hammer out the update. This is a BETA release of Salt RAET.

**Salt SSH Enhancements**

Salt SSH has just entered a new league, with substantial updates and improvements to make salt-ssh more reliable and easier than ever! From new features like the ansible roster and fileserver backends to the new pypi salt-ssh installer to lowered deps and a swath of bugfixes, salt-ssh is basically reborn!

**Install salt-ssh Using pip**

Salt-ssh is now pip-installable!

https://pypi.org/project/salt-ssh/

Pip will bring in all of the required deps, and while some deps are compiled, they all include pure python implementations, meaning that any compile errors which may be seen can be safely ignored.

```
pip install salt-ssh
```
Fileserver Backends

Salt-ssh can now use the salt fileserver backend system. This allows for the gitfs, hgfs, s3, and many more ways to centrally store states to be easily used with salt-ssh. This also allows for a distributed team to easily use a centralized source.

Saltfile Support

The new saltfile system makes it easy to have a user specific custom extended configuration.

Ext Pillar

Salt-ssh can now use the external pillar system. Making it easier then ever to use salt-ssh with teams.

No More sshpass

Thanks to the enhancements in the salt vt system, salt-ssh no longer requires sshpass to send passwords to ssh. This also makes the manipulation of ssh calls substantially more flexible, allowing for intercepting ssh calls in a much more fluid way.

Pure Python Shim

The salt-ssh call originally used a shell script to discover what version of python to execute with and determine the state of the ssh code deployment. This shell script has been replaced with a pure python version making it easy to increase the capability of the code deployment without causing platform inconsistency issues with different shell interpreters.

Custom Module Delivery

Custom modules are now seamlessly delivered. This makes the deployment of custom grains, states, execution modules and returners a seamless process.

CP Module Support

Salt-ssh now makes simple file transfers easier then ever! The cp module allows for files to be conveniently sent from the salt fileserver system down to systems.

More Thin Directory Options

Salt ssh functions by copying a subset of the salt code, or salt thin down to the target system. In the past this was always transferred to /tmp/salt and cached there for subsequent commands.

Now, salt thin can be sent to a random directory and removed when the call is complete with the -W option. The new -W option still uses a static location but will clean up that location when finished.

The default salt thin location is now user defined, allowing multiple users to cleanly access the same systems.
State System Enhancements

New Imperative State Keyword "Listen"

The new `listen` and `listen_in` keywords allow for completely imperative states by calling the `mod_watch()` routine after all states have run instead of re-ordering the states.

Mod Aggregate Runtime Manipulator

The new `mod_aggregate` system allows for the state system to rewrite the state data during execution. This allows for state definitions to be aggregated dynamically at runtime.

The best example is found in the `pkg` state. If `mod_aggregate` is turned on, then when the first `pkg` state is reached, the state system will scan all of the other running states for `pkg` states and take all other packages set for install and install them all at once in the first `pkg` state.

These runtime modifications make it easy to run groups of states together. In future versions, we hope to fill out the `mod_aggregate` system to build in more and more optimizations.

For more documentation on `mod_aggregate`, see the documentation.

New Requisites: onchanges and onfail

The new `onchanges` and `onchanges_in` requisites make a state apply only if there are changes in the required state. This is useful to execute post hooks after changes occur on a system.

The other new requisites, `onfail` and `onfail_in`, allow for a state to run in reaction to the failure of another state.

For more information about these new requisites, see the `requisites documentation`.

Global onlyif and unless

The `onlyif` and `unless` options can now be used for any state declaration.

Use `names` to expand and override values

The `names declaration` in Salt’s state system can now override or add values to the expanded data structure. For example:

```yaml
my_users:
    user.present:
        - names:
            - larry
            - curly
            - moe:
                - shell: /bin/zsh
                - groups:
                    - wheel
                - shell: /bin/bash
```
Major Features

Scheduler Additions

The Salt scheduler system has received MAJOR enhancements, allowing for cron-like scheduling and much more granular timing routines. See here for more info.

Red Hat 7 Family Support

All the needed additions have been made to run Salt on RHEL 7 and derived OSes like CentOS and Scientific.

Fileserver Backends in salt-call

Fileserver backends like gitfs can now be used without a salt master! Just add the fileserver backend configuration to the minion config and execute salt-call. This has been a much-requested feature and we are happy to finally bring it to our users.

Amazon Execution Modules

An entire family of execution modules further enhancing Salt’s Amazon Cloud support. They include the following:

- Autoscale Groups (includes state support) -- related: Launch Control states
- Cloud Watch (includes state support)
- Elastic Cache (includes state support)
- Elastic Load Balancer (includes state support)
- IAM Identity and Access Management (includes state support)
- Route53 DNS (includes state support)
- Security Groups (includes state support)
- Simple Queue Service (includes state support)

LXC Runner Enhancements

BETA The Salt LXC management system has received a number of enhancements which make running an LXC cloud entirely from Salt an easy proposition.

Next Gen Docker Management

The Docker support in Salt has been increased at least ten fold. The Docker API is now completely exposed and Salt ships with Docker data tracking systems which make automating Docker deployments very easy.
Peer System Performance Improvements

The peer system communication routines have been refined to make the peer system substantially faster.

SDB

Encryption at rest for configs

GPG Renderer

Encrypted pillar at rest

OpenStack Expansion

Lots of new OpenStack stuff

Queues System

Ran change external queue systems into Salt events

Multi Master Failover Additions

Connecting to multiple masters is more dynamic then ever

Chef Execution Module

Managing Chef with Salt just got even easier!

salt-api Project Merge

The salt-api project has been merged into Salt core and is now available as part of the regular salt-master package install. No API changes were made, the salt-api script and init scripts remain intact.
salt-api has always provided Yet Another Pluggable Interface to Salt (TM) in the form of "netapi" modules. These are modules that bind to a port and start a service. Like many of Salt’s other module types, netapi modules often have library and configuration dependencies. See the documentation for each module for instructions.

See also:

The full list of netapi modules.
Synchronous and Asynchronous Execution of Runner and Wheel Modules

`salt.runner.RunnerClient` and `salt.wheel.WheelClient` have both gained complimentary `cmd_sync` and `cmd_async` methods allowing for synchronous and asynchronous execution of any Runner or Wheel module function, all protected using Salt's external authentication system. `salt-api` benefits from this addition as well.

**rest_cherrypy** Additions

The rest_cherrypy netapi module provides the main REST API for Salt.

**Web Hooks**

This release of course includes the Web Hook additions from the most recent salt-api release, which allows external services to signal actions within a Salt infrastructure. External services such as Amazon SNS, Travis-CI, or GitHub, as well as internal services that cannot or should not run a Salt minion daemon can be used as first-class components in Salt’s rich orchestration capabilities.

The raw HTTP request body is now available in the event data. This is sometimes required information for checking an HMAC signature in order to verify a HTTP request. As an example, Amazon or GitHub requests are signed this way.

**Generating and Accepting Minion Keys**

The `/key` convenience URL generates a public and private key for a minion, automatically pre-accepts the public key on the Salt Master, and returns both keys as a tarball for download.

This allows for easily bootstrapping the key on a new minion with a single HTTP call, such as with a Kickstart script, all using regular shell tools.

```
    curl -sS http://salt-api.example.com:8000/keys \
        -d mid=jerry \n        -d username=kickstart \n        -d password=kickstart \n        -d eauth=pam \n        -o jerry-salt-keys.tar
```

**Fileserver Backend Enhancements**

All of the fileserver backends have been overhauled to be faster, lighter, and more reliable. The VCS backends (`gitfs`, `hgfs`, and `svnfs`) have also received a lot of new features.

Additionally, most config parameters for the VCS backends can now be configured on a per-remote basis, allowing for global config parameters to be overridden for a specific gitfs/hgfs/svnfs remote.
New **gitfs** Features

**Pygit2 and Dulwich**

In addition to supporting GitPython, support for pygit2 (0.20.3 and newer) and dulwich have been added. Provided a compatible version of pygit2 is installed, it will now be the default provider. The config parameter `gitfs_provider` has been added to allow one to choose a specific provider for gitfs.

**Mountpoints**

Prior to this release, to serve a file from gitfs at a salt fileserver URL of `salt://foo/bar/baz.txt`, it was necessary to ensure that the parent directories existed in the repository. A new config parameter `gitfs_mountpoint` allows gitfs remotes to be exposed starting at a user-defined `salt://` URL.

**Environment Whitelisting/Blacklisting**

By default, gitfs will expose all branches and tags as Salt fileserver environments. Two new config parameters, `gitfs_env_whitelist` and `gitfs_env_blacklist`, allow more control over which branches and tags are exposed. More detailed information on how these two options work can be found in the **Gitfs Walkthrough**.

**Expanded Authentication Support**

As of pygit2 0.20.3, both http(s) and SSH key authentication are supported, and Salt now also supports both authentication methods when using pygit2. Keep in mind that pygit2 0.20.3 is not yet available on many platforms, so those who had been using authenticated git repositories with a passphraseless key should stick to GitPython if a new enough pygit2 is not yet available for the platform on which the master is running.

A full explanation of how to use authentication can be found in the **Gitfs Walkthrough**.

**New **hgfs** Features**

**Mountpoints**

This feature works exactly like its gitfs counterpart. The new config parameter is called `hgfs_mountpoint`.

**Environment Whitelisting/Blacklisting**

This feature works exactly like its gitfs counterpart. The new config parameters are called `hgfs_env_whitelist` and `hgfs_env_blacklist`. 
New **svnfs** Features

**Mountpoints**

This feature works exactly like its **gitfs counterpart**. The new config parameter is called `svnfs_mountpoint`.

**Environment Whitelisting/Blacklisting**

This feature works exactly like its **gitfs counterpart**. The new config parameters are called `svnfs_env_whitelist` and `svnfs_env_blacklist`.

**Configurable Trunk/Branches/Tags Paths**

Prior to this release, the paths where trunk, branches, and tags were located could only be in directories named "trunk", "branches", and "tags" directly under the root of the repository. Three new config parameters (`svnfs_trunk`, `svnfs_branches`, and `svnfs_tags`) allow SVN repositories which are laid out differently to be used with svnfs.

New **minionfs** Features

**Mountpoint**

This feature works exactly like its **gitfs counterpart**. The new config parameter is called `minionfs_mountpoint`. The one major difference is that, as minionfs doesn’t use multiple remotes (it just serves up files pushed to the master using `cp.push`) there is no such thing as a per-remote configuration for `minionfs_mountpoint`.

**Changing the Saltenv from Which Files are Served**

A new config parameter (`minionfs_env`) allows minionfs files to be served from a Salt fileserver environment other than `base`.

**Minion Whitelisting/Blacklisting**

By default, minionfs will expose the pushed files from all minions. Two new config parameters, `minionfs_whitelist` and `minionfs_blacklist`, allow minionfs to be restricted to serve files from only the desired minions.

**Pyobjects Renderer**

Salt now ships with with the **Pyobjects Renderer** that allows for construction of States using pure Python with an idiomatic object interface.
New Modules

In addition to the Amazon modules mentioned above, there are also several other new execution modules:

- **Oracle**
- **Random**
- **Redis**
- **Amazon Simple Queue Service**
- **Block Device Management**
- **CoreOS etcd**
- **Genesis**
- **InfluxDB**
- **Server Density**
- **Twilio Notifications**
- **Varnish**
- **ZNC IRC Bouncer**
- **SMTP**

New Runners

- **Map/Reduce Style**
- **Queue**

New External Pillars

- **CoreOS etcd**

New Salt-Cloud Providers

- **Aliyun ECS Cloud**
- **LXC Containers**
- **Proxmox (OpenVZ containers & KVM)**

Salt Call Change

When used with a returner, salt-call now contacts a master if `--local` is not specified.
Deprecations

salt.modules.virtualenv_mod

- Removed deprecated memoize function from salt/utils/__init__.py (deprecated)
- Removed deprecated no_site_packages argument from create function (deprecated)
- Removed deprecated check_dns argument from minion_config and apply_minion_config functions (deprecated)
- Removed deprecated OutputOptionsWithTextMixIn class from salt/utils/parsers.py (deprecated)
- Removed the following deprecated functions from salt/modules/ps.py: -physical_memory_usage (deprecated) - virtual_memory_usage (deprecated) -cached_physical_memory (deprecated) -physical_memory_buffers (deprecated)
- Removed deprecated cloud arguments from cloud_config function in salt/config.py: -vm_config (deprecated) -vm_config_path (deprecated)
- Removed deprecated libcloud_version function from salt/cloud/libcloudfuncs.py (deprecated)
- Removed deprecated CloudConfigMixIn class from salt/utils/parsers.py (deprecated)

28.2.89 Salt 2014.7.1 Release Notes

release 2015-01-12

Version 2014.7.1 is a bugfix release for 2014.7.0.

The changes include:

- Fixed gitfs serving symlinks in file.recurse states (issue #17700)
- Fixed holding of multiple packages (YUM) when combined with version pinning (issue #18468)
- Fixed use of Jinja templates in masterless mode with non-roots fileserver backend (issue #17963)
- Re-enabled pillar and compound matching for mine and publish calls. Note that pillar globbing is still disabled for those modes, for security reasons. (issue #17194)
- Fix for tty: True in salt-ssh (issue #16847)
- Fix for supervisord states when supervisor not installed to system python (issue #18044)
- Fix for logging when log_level='quiet' for cmd.run (issue #19479)

28.2.90 Salt 2014.7.2 Release Notes

release 2015-02-09

Version 2014.7.2 is a bugfix release for 2014.7.0.

The changes include:

- Fix erroneous warnings for systemd service enabled check (issue #19606)
- Fix FreeBSD kernel module loading, listing, and persistence kmod (issue #197151, issue #19682)
• Allow case-sensitive npm package names in the `npm state`. This may break behavior for people expecting the state to lowercase their npm package names for them. The `npm module` was never affected by mandatory lowercasing. (issue #20329)

• Deprecate the `activate` parameter for pip.install for both the `module` and the `state`. If `bin_env` is given and points to a virtualenv, there is no need to activate that virtualenv in a shell for pip to install to the virtualenv.

• Fix a file-locking bug in gitfs (issue #18839)

• Deprecated `archive_user` in favor of standardized `user` parameter in `state` and added `group` parameter.

### 28.2.91 Salt 2014.7.3 Release Notes

**release** 2015-03-25

Version 2014.7.3 is a bugfix release for 2014.7.0.

**Changes:**

• Multi-master minions mode no longer route fileclient operations asymetrically. This fixes the source of many multi-master bugs where the minion would become unresponsive from one or more masters.

• Fix bug wherein network.iface could produce stack traces.

• net.arp will no longer be made available unless arp is installed on the system.

• Major performance improvements to SaltNado

• Allow KVM module to operate under KVM itself or VMware Fusion

• Various fixes to the Windows installation scripts

• Fix issue where the syndic would not correctly propagate loads to the master job cache.

• Improve error handling on invalid /etc/network/interfaces file in salt networking modules

• Fix bug where a response status was not checked for in fileclient.get_url

• Enable eauth when running salt in batch mode

• Increase timeout in Boto Route53 module

• Fix bugs with Salt’s 'tar' module option parsing

• Fix parsing of NTP servers on Windows

• Fix issue with blockdev tuning not reporting changes correctly

• Update to the latest Salt bootstrap script

• Update Linode salt-cloud driver to use either linode-python or apache-libcloud

• Fix for s3.query function to return correct headers

• Fix for s3.head returning None for files that exist

• Fix the disable function in win_service module so that the service is disabled correctly

• Fix race condition between master and minion when making a directory when both daemons are on the same host

• Fix an issue where file.recurse would fail at the root of an svn repo when the repo has a mountpoint

• Fix an issue where file.recurse would fail at the root of an hgfs repo when the repo has a mountpoint
• Fix an issue where file.recurse would fail at the root of an gitfs repo when the repo has a mountpoint
• Add status.master capability for Windows.
• Various fixes to ssh_known_hosts
• Various fixes to states.network bonding for Debian
• The debian_ip.get_interfaces module no longer removes nameservers.
• Better integration between grains.virtual and systemd-detect-virt and virt-what
• Fix traceback in sysctl.present state output
• Fix for issue where mount.mounted would fail when superopts were not a part of mount.active (extended=True). Also mount.mounted various fixes for Solaris and FreeBSD.
• Fix error where datetimes were not correctly safeguarded before being passed into msgpack.
• Fix file.replace regressions. If the pattern is not found, and if dry run is False, and if backup is False, and if a pre-existing file exists with extension .bak, then that backup file will be overwritten. This backup behavior is a result of how fileinput works. Fixing it requires either passing through the file twice (the first time only to search for content and set a flag), or rewriting file.replace so it doesn’t use fileinput
• VCS filereserver fixes/optimizations
• Catch filesriver configuration errors on master start
• Raise errors on invalid gitfs configurations
• setlocale when locale file does not exist (Redhat family)
• Fix to correctly count active devices when created mdadm array with spares
• Fix to correctly target minions in batch mode
• Support ssh:// urls using the gitfs dulwhich backend
• New filesriver runner
• Fix various bugs with argument parsing to the publish module.
• Fix disk.usage for Synology OS
• Fix issue with tags occurring twice with docker.pulled
• Fix incorrect key error in SMTP returner
• Fix condition which would remount loopback filesystems on every state run
• Remove requisites from listens after they are called in the state system
• Make system implementation of service.running aware of legacy service calls
• Fix issue where publish.publish would not handle duplicate responses gracefully.
• Accept Kali Linux for aptpkg salt execution module
• Fix bug where cmd.which could not handle a dirname as an argument
• Fix issue in ps.pgrep where exceptions were thrown on Windows.

Known issues:
• In multimaster mode, a minion may become temporarily unresponsive if modules or pillars are refreshed at the same time that one or more masters are down. This can be worked around by setting ‘auth_timeout’ and ‘auth_tries’ down to shorter periods.
28.2.92 Salt 2014.7.4 Release Notes

release 2015-03-30

Version 2014.7.4 is a bugfix release for 2014.7.0.

This is a security release. The security issues fixed have only been present since 2014.7.0, and only users of the two listed modules are vulnerable. The following CVEs have been resolved:

- CVE-2015-1838 SaltStack: insecure /tmp file handling in salt/modules/serverdensity_device.py
- CVE-2015-1839 SaltStack: insecure /tmp file handling in salt/modules/chef.py

Changes:

- Multi-master minions mode no longer route fileclient operations asymmetrically. This fixes the source of many multi-master bugs where the minion would become unresponsive from one or more masters.
- Fix bug wherein network.iface could produce stack traces.
- net.arp will no longer be made available unless arp is installed on the system.
- Major performance improvements to Saltnado
- Allow KVM module to operate under KVM itself or VMware Fusion
- Various fixes to the Windows installation scripts
- Fix issue where the syndic would not correctly propagate loads to the master job cache.
- Improve error handling on invalid /etc/network/interfaces file in salt networking modules
- Fix bug where a response status was not checked for in fileclient.get_url
- Enable eauth when running salt in batch mode
- Increase timeout in Boto Route53 module
- Fix bugs with Salt's `tar` module option parsing
- Fix parsing of NTP servers on Windows
- Fix issue with blockdev tuning not reporting changes correctly
- Update to the latest Salt bootstrap script
- Update Linode salt-cloud driver to use either linode-python or apache-libcloud
- Fix for s3.query function to return correct headers
- Fix for s3.head returning None for files that exist
- Fix the disable function in win_service module so that the service is disabled correctly
- Fix race condition between master and minion when making a directory when both daemons are on the same host
- Fix an issue where file.recurse would fail at the root of an svn repo when the repo has a mountpoint
- Fix an issue where file.recurse would fail at the root of an hgfs repo when the repo has a mountpoint
- Fix an issue where file.recurse would fail at the root of an gitfs repo when the repo has a mountpoint
- Add status.master capability for Windows.
- Various fixes to ssh_known_hosts
- Various fixes to states.network bonding for Debian
- The debian_ip.get_interfaces module no longer removes nameservers.
• Better integration between grains.virtual and systemd-detect-virt and virt-what
• Fix traceback in sysctl.present state output
• Fix for issue where mount.mounted would fail when superopts were not a part of mount.active (extended=True). Also mount.mounted various fixes for Solaris and FreeBSD.
• Fix error where datetimes were not correctly safeguarded before being passed into msgpack.
• Fix file.replace regressions. If the pattern is not found, and if dry run is False, and if backup is False, and if a pre-existing file exists with extension .bak, then that backup file will be overwritten. This backup behavior is a result of how fileinput works. Fixing it requires either passing through the file twice (the first time only to search for content and set a flag), or rewriting file.replace so it doesn’t use fileinput
• VCS filreserver fixes/optimizations
• Catch fileserver configuration errors on master start
• Raise errors on invalid gitfs configurations
• set_locale when locale file does not exist (Redhat family)
• Fix to correctly count active devices when created mdadm array with spares
• Fix to correctly target minions in batch mode
• Support ssh:// urls using the gitfs dulwhich backend
• New fileserver runner
• Fix various bugs with argument parsing to the publish module.
• Fix disk.usage for Synology OS
• Fix issue with tags occurring twice with docker.pulled
• Fix incorrect key error in SMTP returner
• Fix condition which would remount loopback filesystems on every state run
• Remove requisites from listens after they are called in the state system
• Make system implementation of service.running aware of legacy service calls
• Fix issue where publish.publish would not handle duplicate responses gracefully.
• Accept Kali Linux for aptpkg salt execution module
• Fix bug where cmd.which could not handle a dirname as an argument
• Fix issue in ps.pgrep where exceptions were thrown on Windows.

Known issues:

• In multimaster mode, a minion may become temporarily unresponsive if modules or pillars are refreshed at the same time that one or more masters are down. This can be worked around by setting 'auth_timeout' and 'auth_tries' down to shorter periods.
• There are known issues with batch mode operating on the incorrect number of minions. This bug can be patched with the change in Pull Request #22464.
• The fun, state, and unless keywords are missing from the state internals, which can cause problems running some states. This bug can be patched with the change in Pull Request #22365.
28.2.93 Salt 2014.7.5 Release Notes

release 2015-04-16

Version 2014.7.5 is a bugfix release for 2014.7.0.

Changes:

- Fixed a key error bug in salt-cloud
- Updated man pages to better match documentation
- Fixed bug concerning high CPU usage with salt-ssh
- Fixed bugs with remounting cvfs and fuse filesystems
- Fixed bug with allowing requisite tracking of entire sls files
- Fixed bug with aptpkg.mod_repo returning OK even if apt-add-repository fails
- Increased frequency of ssh terminal output checking
- Fixed malformed locale string in localmod module
- Fixed checking of available version of package when accept_keywords were changed
- Fixed bug to make git.latest work with empty repositories
- Added **kwargs to service.mod_watch which removes warnings about enable and __reqs__ not being supported by the function
- Improved state comments to not grow so quickly on failed requisites
- Added force argument to service to trigger force_reload
- Fixed bug to handle pkgrepo keyids that have been converted to int
- Fixed module.portage_config bug with appending accept_keywords
- Fixed bug to correctly report disk usage on windows minion
- Added the ability to specify key prefix for S3 ext_pillar
- Fixed issues with batch mode operating on the incorrect number of minions
- Fixed a bug with the proxmox cloud provider stacktracing on disk definition
- Fixed a bug with the changes dictionary in the file state
- Fixed the TCP keep alive settings to work better with SREQ caching
- Fixed many bugs within the iptables state and module
- Fixed bug with states by adding fun, state, and unless to the state runtime internal keywords listing
- Added ability to eAuth against Active Directory
- Fixed some salt-ssh issues when running on Fedora 21
- Fixed grains.get_or_set_hash to work with multiple entries under same key
- Added better explanations and more examples of how the Reactor calls functions to docs
- Fixed bug to not pass ex_config_drive to libcloud unless it’s explicitly enabled
- Fixed bug with pip.install on windows
- Fixed bug where puppet.run always returns a 0 retcode
- Fixed race condition bug with minion scheduling via pillar
• Made efficiency improvements and bug fixes to the windows installer
• Updated environment variables to fix bug with pygit2 when running salt as non-root user
• Fixed cas behavior on data module -- data.cas was not saving changes
• Fixed GPG rendering error
• Fixed strace error in virt.query
• Fixed stacktrace when running chef-solo command
• Fixed possible bug wherein uncaught exceptions seem to make zmq3 tip over when threading is involved
• Fixed argument passing to the reactor
• Fixed glibc caching to prevent bug where salt-minion getaddrinfo in dns_check() never got updated name-servers

Known issues:
• In multimaster mode, a minion may become temporarily unresponsive if modules or pillars are refreshed at the same time that one or more masters are down. This can be worked around by setting 'auth_timeout' and 'auth_tries' down to shorter periods.

28.2.94 Salt 2014.7.6 Release Notes

release 2015-05-18

Version 2014.7.6 is a bugfix release for 2014.7.0.

Statistics

Security Fix

CVE-2015-4017 Certificates are not verified when connecting to server in the Aliyun and Proxmox modules

Only users of the Aliyun or Proxmox cloud modules are at risk. The vulnerability does not exist in the latest 2015.5.0 release of Salt.
Changelog for v2014.7.5..v2014.7.6

• PR #23810: (rallytime) Backport #23757 to 2014.7 @ 2015-05-18 15:30:21 UTC
  – PR #23757: (clan) use abspath, do not eliminating symlinks (refs: #23810)
  – aee0c83df Merge pull request #23810 from rallytime/bp-23757
  – fb32c32065 use abspath, do not eliminating symlinks

• ISSUE #20198: (jcftang) virt.get_graphics, virt.get_nics are broken, in turn breaking other things (refs: #23809, #21469)

• PR #23809: (rallytime) Fix virtualport section of virt.get_nics loop @ 2015-05-18 15:30:09 UTC
  – PR #21487: (rallytime) Backport #21469 to 2014.7 (refs: #23809)
  – PR #21469: (vdesjardins) fixes #20198: virt.get_graphics and virt.get_nics calls in module virt (refs: #21487)
  – 6b3352bb1a Merge pull request #23809 from rallytime/virt_get_nics_fix
  – 0616fb7884 Fix virtualport section of virt.get_nics loop

• PR #23823: (gtmanfred) add link local for ipv6 @ 2015-05-17 12:48:25 UTC
  – 188f03f567 Merge pull request #23823 from gtmanfred/2014.7
  – 5ef06d59d add link local for ipv6

• PR #23802: (gtmanfred) if it is ipv6 ip_to_int will fail @ 2015-05-16 04:06:59 UTC
  – PR #23573: (techhat) Scan all available networks for public and private IPs (refs: #23802)
  – f3ca682f92 Merge pull request #23802 from gtmanfred/2014.7
  – 2da98b58c8 if it is ipv6 ip_to_int will fail

• PR #23488: (cellscape) LXC cloud fixes @ 2015-05-15 18:09:35 UTC
  – d9a0c3e82 Merge pull request #23488 from cellscape/lxc-cloud-fixes
  – 64250a67e5 Remove profile from opts after creating LXC container
  – c4047d2a71 Set destroy=True in opts when destroying cloud instance
  – 9e1311a7cd Store instance names in opts when performing cloud action
  – 934bc57c73 Correctly pass custom env to lxc-attach
  – 7fb85f7be1 Preserve test=True option in cloud states
  – 9771b5a313 Fix detection of absent LXC container in cloud state
  – fb240cf02 Report failure when failed to create/clone LXC container
  – 2d9a2bb97 Avoid shadowing variables in lxc module
  – 792e1021f2 Allow to override profile options in lxc.cloud_init_interface
  – 42bd64b9f3 Return changes on successful lxc.create from salt-cloud
  – 4409eabb83 Return correct result when creating cloud LXC container
  – 377015c881 Issue #16424: List all providers when creating salt-cloud instance without profile

• ISSUE #22332: (rallytime) [salt-ssh] Add a check for host in /etc/salt/roster (refs: #23748)
• **PR #23748**: (basepi) [2014.7] Log salt-ssh roster render errors more assertively and verbosely @ 2015-05-14 22:38:10 UTC
  - 808bbe1cb2 Merge pull request #23748 from basepi/salt-ssh.roster.host.check
  - bc53e049e0 Log entire exception for render errors in roster
  - 753de6a621 Log render errors in roster to error level
  - e01a7a90b3 Always let the real YAML error through

• **ISSUE #22959**: (highlyunavailable) Windows Salt hangs if file.directory is trying to write to a drive that doesn't exist (refs: #23731)

• **PR #23731**: (twangboy) Fixes #22959: Trying to add a directory to an unmapped drive in windows @ 2015-05-14 21:59:14 UTC
  - 72cf360255 Merge pull request #23731 from twangboy/fix_22959
  - 88e5495b2d Fixes #22959: Trying to add a directory to an unmapped drive in windows

• **PR #23730**: (rallytime) Backport #23729 to 2014.7 @ 2015-05-14 21:58:34 UTC
  - **PR #23729**: (rallytime) Partially merge #23437 (grains fix) (refs: #23730)
  - **PR #23437**: (cedwards) Grains item patch (refs: #23729)
  - 2610195262 Merge pull request #23730 from rallytime/bp-23729
  - 1877cae6ca adding support for nested grains to grains.item

• **PR #23688**: (twangboy) Added inet_pton to utils/validate/net.py for ip.set_static_ip in windows @ 2015-05-14 16:15:56 UTC
  - 3e9df83d6 Merge pull request #23688 from twangboy/fix_23415
  - 6a91169bae Fixed unused-import pylint error
  - 5e25b3f355 fixed pylint errors
  - 1a9676626f Added inet_pton to utils/validate/net.py for ip.set_static_ip in windows

• **ISSUE #23403**: (iamfil) salt.runners.cloud.action fun parameter is replaced (refs: #23680)

• **PR #23680**: (cachedout) Rename kwarg in cloud runner @ 2015-05-13 19:44:02 UTC
  - 1b8646d73 Merge pull request #23680 from cachedout/issue_23403
  - d5986c21b4 Rename kwarg in cloud runner

• **ISSUE #23548**: (kkaig) grains.list_present produces incorrect (?) output (refs: #23674)

• **PR #23674**: (cachedout) Handle lists correctly in grains.list_prsesent @ 2015-05-13 18:34:58 UTC
  - cd64af0cde4 Merge pull request #23674 from cachedout/issue_23548
  - da8a2f5cbb Handle lists correctly in grains.list_present

• **PR #23672**: (twangboy) Fix user present @ 2015-05-13 18:30:09 UTC
  - d322a19213 Merge pull request #23672 from twangboy/fix_user_present
  - 731e7a3f3d Merge branch '2014.7' of https://github.com/saltstack/salt into fix_user_present
  - d6f704545 Fixed user.present to create password in windows

• **ISSUE #23604**: (Azidburn) service.dead on systemd Minion create an Error Message (refs: #23607)

• **PR #23670**: (rallytime) Backport #23607 to 2014.7 @ 2015-05-13 18:27:17 UTC
- PR #23607: (Azidburn) Fix for #23604. No error reporting. Exitcode !=0 are ok (refs: #23670)
- 43f7025000 Merge pull request #23670 from rallytime/bp-23607
- ed30dce462 Fix for #23604. No error reporting. Exitcode !=0 are ok

• ISSUE #22141: (Deshke) grains.get_or_set_hash render error if hash begins with "%" (refs: #23640)

• PR #23661: (rallytime) Merge #23640 with whitespace fix @ 2015-05-13 15:47:30 UTC
  - PR #23640: (cachedout) Add warning to get_or_set_hash about reserved chars (refs: #23661)
  - 0f06ac1d88 Merge pull request #23661 from rallytime/merge-23640
  - 4427f4bb65d Whitespace fix
  - dd9115466e Add warning to get_or_set_hash about reserved chars

• ISSUE #23452: (landergate) minion crashed with empty grain (refs: #23639)

• PR #23639: (cachedout) Handle exceptions raised by __virtual__ @ 2015-05-13 15:11:12 UTC
  - 84e2e886c1c Merge pull request #23639 from cachedout/issue_23452
  - d418b4a774d Syntax error!
  - 45b401d7d9e Handle exceptions raised by __virtual__

• ISSUE #23611: (lubez) master_type set to 'failover' but 'master' is not of type list but of type <type 'str'> (refs: #23637)

• PR #23637: (cachedout) Convert str master to list @ 2015-05-13 15:08:19 UTC
  - 1acaf86da7 Merge pull request #23637 from cachedout/issue_23611
  - 56cb1f52e3 Fix typo
  - f06f19a77f Convert str master to list

• PR #23595: (rallytime) Backport #23549 to 2014.7 @ 2015-05-12 21:19:40 UTC
  - PR #23549: (vr-jack) Update __init__.py (refs: #23595)
  - f20ce422ce Merge pull request #23595 from rallytime/bp-23549
  - 6efcacf990d Update __init__.py

• ISSUE #23110: (martinhoefling) Copying files from gitfs in file.recurse state fails (refs: #23496)

• PR #23594: (rallytime) Backport #23496 to 2014.7 @ 2015-05-12 21:19:34 UTC
  - PR #23496: (martinhoefling) Fix for issue #23110 (refs: #23594)
  - 1acaf86da7 Merge pull request #23594 from rallytime/bp-23496
  - 56cb1f52e3 Fix typo
  - 2c221c7332 Merge pull request #23593 from rallytime/bp-23442
  - 39869a15bd check w/ low['name'] only
  - 304cc499e9 another fix for file defined w/ id, but require name

• PR #23606: (twangboy) Fixed checkbox for starting service and actually starting it @ 2015-05-12 21:18:50 UTC
- fadd1ef63c Merge pull request #23606 from twangboy/fix_installer
- 038331edab Fixed checkbox for starting service and actually starting it

- **ISSUE #22908**: (karanjad) Add failhard option to salt orchestration (refs: #23389)

- **PR #23592**: (rallytime) Backport #23389 to 2014.7 @ 2015-05-12 16:44:42 UTC
  - **PR #23389**: (cachedout) Correct fail_hard typo (refs: #23592)
  - 10b3f0f643 Merge pull request #23592 from rallytime/bp-23389
  - 734c43801 Correct fail_hard typo

- **PR #23573**: (techhat) Scan all available networks for public and private IPs (refs: #23802) @ 2015-05-12 15:22:22 UTC
  - cd34b9b6c4 Merge pull request #23573 from techhat/novaquery
  - f92db5e92f Linting
  - 26e00d3ccc Scan all available networks for public and private IPs

- **ISSUE #23479**: (danielmorlock) Typo in pkg.removed for Gentoo? (refs: #23558)

- **PR #23558**: (jfindlay) reorder emerge command line @ 2015-05-12 15:17:46 UTC
  - 2a72cd71c2 Merge pull request #23558 from jfindlay/fix_ebuild
  - 4540fb2a6 reorder emerge command line

- **ISSUE #23355**: (dr4Ke) salt-ssh: 'sources: salt://' files from 'pkg' state are not included in salt_state.tgz (refs: #23530)

- **PR #23530**: (dr4Ke) salt-ssh state: fix including all salt:// references @ 2015-05-12 15:13:43 UTC
  - a664a3c6fd Merge pull request #23530 from dr4Ke/fix_salt-ssh_to_include_pkg_sources
  - 5df6a8008c fix pylint warning
  - d0549e56ba salt-ssh state: fix including all salt:// references

- **ISSUE #23004**: (b18) 2014.7.5 - Windows - pkg.list_pkgs - "nxlog" never shows up in output. (refs: #23433)

- **PR #23433**: (twangboy) Obtain all software from the registry @ 2015-05-11 22:47:52 UTC
  - 55c3869861 Merge pull request #23433 from twangboy/list_pkgs_fix
  - 8ab5b1b86f Fix pylint error
  - 2d11d6545e Obtain all software from the registry

- **PR #23554**: (jeroy) Debian: Hostname always updated @ 2015-05-11 21:57:00 UTC
  - 755bed0abd Merge pull request #23554 from jeroy/debian-hostname-fix
  - 5f749e487 Debian: Hostname always updated

- **ISSUE #23411**: (dr4Ke) grains.append should work at any level of a grain (refs: #23440, #23474)

- **PR #23551**: (dr4Ke) grains.append unit tests, related to #23474 @ 2015-05-11 21:54:25 UTC
  - **PR #23474**: (dr4Ke) Fix grains.append in nested dictionnary grains #23411 (refs: #23551)
  - **PR #23440**: (dr4Ke) fix grains.append in nested dictionnary grains #23411 (refs: #23474)
  - 6ec87ce9f5 Merge pull request #23551 from dr4Ke/grains.append_unit_tests
  - ebf9d5b2 fix pylint errors
  - c4954046ad unit tests for grains.append module function
- 0c9a32326c use MagickMock
- c838a22377 unit tests for grains.append module function

- **ISSUE #23411**: (dr4Ke) grains.append should work at any level of a grain (refs: #23440, #23474)
- **PR #23474**: (dr4Ke) Fix grains.append in nested dictionary grains #23411 (refs: #23551) @ 2015-05-11 18:00:21 UTC
  - PR #23440: (dr4Ke) fix grains.append in nested dictionary grains #23411 (refs: #23474)
  - e96c5e5bf3 Merge pull request #23474 from dr4Ke/fix_grains.append_nested
  - a01a5bb51e grains.get, parameter delimiter, versionadded: 2014.7.6
  - b39f50475d remove debugging output
  - b6e15e295c fix grains.append in nested dictionary grains #23411
- **PR #23537**: (t0rrant) Update changelog @ 2015-05-11 17:02:16 UTC
  - ab7e1aed8e Merge pull request #23537 from t0rrant/patch-1
  - 8e03cc99d3 Update changelog
- **PR #23538**: (cro) Update date in LICENSE file @ 2015-05-11 15:19:25 UTC
  - b79fed3a92 Merge pull request #23538 from cro/licupdate
  - 345efe25c9 Update date in LICENSE file
- **ISSUE #23159**: (aneeshusa) Unused validator (refs: #23505)
- **PR #23505**: (aneeshusa) Remove unused ssh config validator. Fixes #23159. @ 2015-05-09 13:24:15 UTC
  - a123a36f05 Merge pull request #23505 from aneeshusa/remove-unused-ssh-config-validator
  - 90af67ca Remove unused ssh config validator. Fixes #23159.
- **ISSUE #20518**: (ekle) module s3.get does not support eu-central-1 (refs: #23467)
- **PR #23467**: (slinu3d) Added AWS v4 signature support @ 2015-05-08 14:36:19 UTC
  - ca2c21a63c Merge pull request #23467 from slinu3d/2014.7
  - 0b4081d8f4 Fixed pylint error at line 363
  - 5be5eb5b14 Fixed pylint errors
  - e64f374f9a Fixed lint errors
  - b9d1ac4f1f Added AWS v4 signature support
- **PR #23444**: (techhat) Add create_attach_volume to nova driver @ 2015-05-07 19:51:32 UTC
  - e6f9e02e Merge pull request #23444 from techhat/novacreateattach
  - ebdb7ae2d Add create_attach_volume to nova driver
- **ISSUE #529**: (rubic) run salt in user space (refs: #543)
  - PR saltstack/salt-bootstrap#563: (notpeter) Ubuntu alternate ppas (refs: #23460)
  - PR #543: (rubic) updated documentation for user, fixed configuration template links (refs: #saltstack/salt-bootstrap#563)
- **PR #23460**: (s0undt3ch) [2014.7] Update to latest stable bootstrap script v2015.05.07 @ 2015-05-07 19:10:54 UTC
  - e331463319 Merge pull request #23460 from s0undt3ch/hotfix/bootstrap-script-2014.7
  - edcd0c41f2 Update to latest stable bootstrap script v2015.05.07
• PR #23439: (techhat) Add wait_for_passwd_maxtries variable @ 2015-05-07 07:28:56 UTC
  - 7a8ce1a954 Merge pull request #23439 from techhat/maxtries
  - 0ad3f2c88 Add wait_for_passwd_maxtries variable

• PR #23422: (cro) $HOME should not be used, some shells don't set it. @ 2015-05-06 21:02:36 UTC
  - 644eb75f62 Merge pull request #23422 from cro/gce_sh_home
  - 4e99e6b0a6 Don't use $HOME to find user's directory, some shells don't set it

• PR #23425: (basepi) [2014.7] Fix typo in FunctionWrapper @ 2015-05-06 20:38:03 UTC
  - ef17a4b2a Merge pull request #23425 from basepi/functionwrapper_typo
  - c390737f3e Fix typo in FunctionWrapper

• PR #23385: (rallytime) Backport #23346 to 2014.7 @ 2015-05-06 20:12:29 UTC
  - PR #23346: (ericfode) Allow file_map in salt-cloud to handle folders. (refs: #23385)
  - 1b13ec09c2 Merge pull request #23385 from rallytime/bp-23346
  - 9efc13c810 more linting fixes
  - cf131c9a5a cleaned up some pylint errors
  - f981699c75 added logic to sftp_file and file_map to allow folder uploads using file_map

• PR #23414: (jfindlay) 2015.2 -> 2015.5 @ 2015-05-06 20:04:02 UTC
  - f8c7a62089 Merge pull request #23414 from jfindlay/update_branch
  - 8074d16d52 2015.2 -> 2015.5

• PR #23404: (hvnsweeting) saltapi cherrypy: initialize var when POST body is empty @ 2015-05-06 17:35:56 UTC
  - 54b3bd43e4 Merge pull request #23404 from hvnsweeting/cherrypy-post-emptybody-fix
  - f85f8f954c initialize var when POST body is empty

• PR #23409: (terminalmage) Update Lithium docstrings in 2014.7 branch @ 2015-05-06 16:20:46 UTC
  - 160ff3029e Merge pull request #23409 from terminalmage/update-lithium-docstrings-2014.7
  - bc97d011ba Fix sphinx typo
  - 20006b06f6 Update Lithium docstrings in 2014.7 branch

• ISSUE #17245: (tomashavlas) localemod does not generate locale for Arch (refs: #23397, #23307)

• PR #23397: (jfindlay) add more flexible whitespace to locale_gen search @ 2015-05-06 03:44:11 UTC
  - aa5b0a4a46 Merge pull request #23397 from jfindlay/fixed_locale_gen
  - 09f4e6f2d2 add more flexible whitespace to locale_gen search

• PR #23368: (kaithar) Backport #23367 to 2014.7 @ 2015-05-05 21:42:26 UTC
  - PR #23367: (kaithar) Put the sed insert statement back in to the output. (refs: #23368)
  - PR #18368: (basepi) Merge forward from 2014.7 to develop (refs: #23368, #23367)
  - 0c76d4d8a Merge pull request #23368 from kaithar/bp-23367
  - 577fa1972e Pylint fix
  - 8d9acd1f89 Put the sed insert statement back in to the output.
• ISSUE #23294: (varia) file.replace fails to append if repl string partially available (refs: #23350)

• PR #23350: (lorenegordon) Append/prepend: search for full line @ 2015-05-05 21:42:11 UTC
  - 3493c1fca Merge pull request #23350 from lorenegordon/file.replace_assume_line
  - b60e224beb Append/prepend: search for full line

• ISSUE #23026: (adelcast) Incorrect salt-syndic logfile and pidfile locations (refs: #23341)

• PR #23341: (cachedout) Fix syndic pid and logfile path @ 2015-05-05 21:29:10 UTC
  - 7be5c4bad5 Merge pull request #23341 from cachedout/issue_23026
  - e98e65e787 Fix tests
  - 6011b437ca Fix syndic pid and logfile path

• ISSUE #19114: (pykler) salt-ssh and gpg pillar renderer (refs: #23347, #23272, #23188)

• PR #23272: (basepi) [2014.7] Allow salt-ssh minion config overrides via master config and roster (refs: #23347) @ 2015-05-05 21:28:47 UTC
  - PR #23188: (basepi) [2014.7] Work around bug in salt-ssh in config.get for gpg renderer (refs: #23272)
  - ea61abfa68 Merge pull request #23272 from basepi/salt-ssh.minion.config.19114
  - c22330bb7 Add versionadded
  - be7407feae Lint
  - c2c337567e Missing comma
  - 8e3e8e073a Pass the minion_opts through the FunctionWrapper
  - cb69cd07de Match the master config template in the master config reference
  - 87fc3161f9 Add Salt-SSH section to master config template
  - 91dd9de6dc Add ssh_minion_opts to master config ref
  - c273ea14c6 Add minion config to salt-ssh doc
  - a0b6b760c3 Add minion_opts to roster docs
  - 5212c35260 Accept minion_opts from the target information
  - e2099b6e1b Process ssh_minion_opts from master config
  - 3b64214377 Revert "Work around bug in salt-ssh in config.get for gpg renderer"
  - 494953a208 Remove the strip (embracing multi-line YAML dump)
  - fe87f0e39 Dump multi-line yaml into the SHIM
  - b751a7281c Inject local minion config into shim if available

• ISSUE #19114: (pykler) salt-ssh and gpg pillar renderer (refs: #23347, #23272, #23188)

• PR #23347: (basepi) [2014.7] Salt-SSH Backport FunctionWrapper.__contains__ @ 2015-05-05 14:13:21 UTC
  - PR #23272: (basepi) [2014.7] Allow salt-ssh minion config overrides via master config and roster (refs: #23347)
  - PR #23188: (basepi) [2014.7] Work around bug in salt-ssh in config.get for gpg renderer (refs: #23272)
  - 4f760dd9eb Merge pull request #23347 from basepi/salt-ssh.functionwrapper.contains.19114
  - 30595e3ff7 Backport FunctionWrapper.__contains__
• **ISSUE #22742**: (hvnsweeting) salt-master says: "This master address: 'salt' was previously resolvable but now fails to resolve!" (refs: #23344)

• **PR #23344**: (cachedout) Explicitely set file_client on master @ 2015-05-04 23:21:48 UTC
  - 02658b1e60 Merge pull request #23344 from cachedout/issue_22742
  - 5adcb9c7e7f Explicitely set file_client on master

• **PR #23318**: (cellscape) Honor seed argument in LXC container initialization @ 2015-05-04 20:58:12 UTC
  - **PR #23311**: (cellscape) Fix new container initialization in LXC runner (refs: #23318)
  - ba7605d1cb Merge pull request #23318 from cellscape/honor-seed-argument
  - 228b1be299 Honor seed argument in LXC container initialization

• **ISSUE #17245**: (tomashavlas) localemod does not generate locale for Arch (refs: #23397, #23307)

• **PR #23307**: (jfindlay) check for /etc/locale.gen @ 2015-05-04 20:56:32 UTC
  - 4ac4509c57 Merge pull request #23307 from jfindlay/fix_locale_gen
  - 101199ac14 check for /etc/locale.gen

• **ISSUE** [saltstack/salt-bootstrap#580](https://github.com/saltstack/salt-bootstrap/issues/580): (bradthuber) git develop broken in centos6/rhel6/others? due to missing python tornado dep (refs: #23324)

• **ISSUE** [saltstack/salt-bootstrap#560](https://github.com/saltstack/salt-bootstrap/issues/560): (bradthuber) param to avoid git install on CentOS/RHEL? (refs: #23324)

• **ISSUE #552**: (jhutchins) Support require and watch under the same state dec (refs: #23324)
  - **PR** saltstack/salt-bootstrap#589: (panticz) Fix Debian Squeeze backports mirror (refs: #23324)
  - **PR** saltstack/salt-bootstrap#504: (romint) opensuse 13.2: fix installation (refs: #23324)
  - **PR #567**: (bastichelaar) Added upstart module (refs: #23324)

• **PR #23324**: (s0undt3ch) [2014.7] Update to the latest stable release of the bootstrap script v2015.05.04 @ 2015-05-04 16:28:30 UTC
  - f790f42ed6 Merge pull request #23324 from s0undt3ch/hotfix/bootstrap-script-2014.7
  - 6643e47ce5 Update to the latest stable release of the bootstrap script v2015.04

• **PR #23329**: (cro) Require requests to verify cert when talking to aliyun and proxmox cloud providers @ 2015-05-04 16:18:17 UTC
  - 5487367baa Merge pull request #23329 from cro/cloud_verify_cert
  - 860db7338 Turn on ssl verify for requests.

• **PR #23311**: (cellscape) Fix new container initialization in LXC runner (refs: #23318) @ 2015-05-04 09:55:29 UTC
  - ea2017672d Merge pull request #23311 from cellscape/fixed-salt-cloud-lxc-init
  - 76fbb34e7d Fix new container initialization in LXC runner

• **ISSUE #18880**: (johtso) npm installed breaks when a module is missing (refs: #23298)

• **PR #23298**: (chris-prince) Fixed issue #18880 in 2014.7 branch @ 2015-05-03 15:49:41 UTC
  - c399b8f568 Merge pull request #23298 from chris-prince/2014.7
  - 0fa25db5b8 Fixed issue #18880 in 2014.7 branch

• **ISSUE #23148**: (cr1st1p) virt - error handling bogus if machine image location is wrong (refs: #23151)

• **PR #23292**: (rallytime) Merge #23151 with pylint fixes @ 2015-05-02 03:54:12 UTC
- PR #23151: (cr1st1p) Fixes #23148 (refs: #23292)
  - 16ecefd466 Merge pull request #23292 from rallytime/merge-23151
  - 8ff852a23a Merge #23151 with pylint fixes
  - 8fa12e82d Fixes #23148
- PR #23274: (basepi) [2014.7] Reduce salt-ssh debug log verbosity @ 2015-05-01 20:19:23 UTC
  - ce24315a4b Merge pull request #23274 from basepi/salt-ssh.debug.verbosity
  - eceee68f4 Log stdout and stderr to trace
  - 08f54d79c6 Log stdout and stderr to trace as well
  - 9bc9f305ad Reduce salt-ssh debug log verbosity
- ISSUE #22605: (mavenAtHouzz) Tornado websockets event Handlers registration are incorrect (refs: #23261)
- PR #23261: (rallytime) Fix tornado websocket event handler registration @ 2015-05-01 18:20:31 UTC
  - 7b55e4310f Merge pull request #23261 from rallytime/fix-22605
  - 4950bfb23 Fix tornado websocket event handler registration
- PR #23258: (teizz) TCP keepalives on the ret side, Revisited. @ 2015-05-01 16:13:49 UTC
  - 83ef7cb114 Merge pull request #23258 from teizz/ret_keepalive_2014_7_5
  - 0b9bf699be The fixes by cachedout which were backported into 2015_2 were missing a single parameter thus not setting up the TCP keepalive for the ZeroMQ Channel by default.
- ISSUE #23224: (twellspring) iptables.append --log parameters must be after --jump LOG (refs: #23241)
- PR #23241: (techhat) Move iptables log options after the jump @ 2015-05-01 01:31:59 UTC
  - 8de3e83956 Merge pull request #23241 from techhat/issue23224
  - 87f7948c99 Move iptables log options after the jump
- PR #23228: (rallytime) Backport #23171 to 2014.7 @ 2015-04-30 21:09:45 UTC
  - PR #23171: (skizunov) Bugfix: 'clean_proc_dir' is broken (refs: #23228)
  - f20210e499 Merge pull request #23171 from rallytime/bp-23171
  - e670e99506 Bugfix: 'clean_proc_dir' is broken
- ISSUE #22703: (Xiol) salt-ssh does not work with list matcher (refs: #22808)
- PR #22823: (hvnsweeting) 22822 file directory clean @ 2015-04-30 15:25:51 UTC
  - PR #22808: (basepi) [2015.2] Add list targeting to salt-ssh flat roster (refs: #23227)
  - 721cc285ee Merge pull request #22823 from hvnsweeting/22822-file-directory-clean
  - d208a00b2a Dict, not list
  - a3f529e003 It's already been converted to a list
  - dd57f2d1c1 Add list targeting to salt-ssh flat roster
- PR #22823: (hvnsweeting) 22822 file directory clean @ 2015-04-30 15:25:51 UTC
  - 82c22afacc Merge pull request #22823 from hvnsweeting/22822-file-directory-clean
  - c749c276b4 fix lint - remove unnecessary parenthesis
  - cb3dfee969 refactor
- 8924b5a911 refactor: use relpath instead of do it manually
- d3060a51a3 refactor
- 5759a0e8f0 bugfix: fix file.directory clean=True when it require parent dir

**ISSUE** saltstack/salt#22941: (bersace) _pillar func breaks fileserver globals (refs: #22942)

**ISSUE** #22941: (bersace) _pillar func breaks fileserver globals (refs: #22977)

**PR** #22977: (bersace) Fix fileserver backends __opts__ overwritten by _pillar @ 2015-04-30 15:24:56 UTC
- **PR** #22942: (bersace) Fix fileserver backends global overwritten by _pillar (refs: #22977)
- f6c0728bfb Merge pull request #22977 from bersace/fix-fileserver-backends-pillar-side-effect
- 5f451f63cf Fix fileserver backends __opts__ overwritten by _pillar

**ISSUE** #23166: (claudiupopescu) "Error in function _minion_event" resulting in modules not loaded (refs: #23180)

**PR** #23180: (jfindlay) fix typos from 36841bddd in masterapi.py @ 2015-04-30 15:22:41 UTC
- 34206f7ae3 Merge pull request #23180 from jfindlay/remote_event
- 7206e1073 fix typos from 36841bddd in masterapi.py

**ISSUE** #23153: (cr1st1p) cmdmod : run_chroot - broken in 2014.7.5 - missing kwargs (refs: #23176)

**PR** #23176: (jfindlay) copy standard cmd.run* kwargs into cmd.run_chroot @ 2015-04-30 15:22:12 UTC
- b6b82165c8 Merge pull request #23176 from jfindlay/run_chroot
- 7dc3417b44 copy standard cmd.run* kwargs into cmd.run_chroot

**ISSUE** #23192: (joejulian) supervisord mod_watch does not accept sfun (refs: #23193)

**PR** #23193: (joejulian) supervisord.mod_watch should accept sfun @ 2015-04-30 04:34:21 UTC
- eff8c294 Merge pull request #23193 from joejulian/2014.7_supervisord_accept_sfun
- efb99f9d9d supervisord.mod_watch should accept sfun

**ISSUE** #19114: (pykler) salt-ssh and gpg pillar renderer (refs: #23347, #23272, #23188)

**PR** #23188: (basepi) [2014.7] Work around bug in salt-ssh in config.get for gpg renderer (refs: #23272) @ 2015-04-30 04:34:11 UTC
- 7206e1073 Merge pull request #23188 from basepi/salt-ssh.function.wrapper.gpg.19114
- d73979ee12 Work around bug in salt-ssh in config.get for gpg renderer

**ISSUE** #21480: (mcsiciel) TypeError: string indices must be integers, not str (refs: #23154)

**PR** #23154: (cachedout) Re-establish channel on interruption in fileclient @ 2015-04-29 16:18:59 UTC
- 168508ec2a Merge pull request #23154 from cachedout/refresh_channel
- 9f88d80c38 Re-establish channel on interruption in fileclient

**ISSUE** #20647: (ryan-lane) file.serialize fails to serialize due to ordered dicts (refs: #20779)

**PR** #23146: (rallytime) Backport #20779 to 2014.7 @ 2015-04-28 20:45:06 UTC
- **PR** #20779: (cachedout) Use declared yaml options (refs: #23146)
- 3b53e04534 Merge pull request #23146 from rallytime/bp-20779
- ffd18493e8 compare OrderedDicts in serializer unit test
- a22170627c Just change serialize

### 28.2. Previous Releases
- a111798e8e Use declared yaml options

- **PR #23145**: (rallytime) Backport #23089 to 2014.7 @ 2015-04-28 20:44:56 UTC
  - PR #23089: (cachedout) Stringify version number before lstrip (refs: #23145)
  - 8bb4664bf9 Merge pull request #23145 from rallytime/bp-23089
  - 93c4af623 Stringify version number before lstrip

- **ISSUE #16188**: (drawks) salt.modules.parted has various functions with bogus input validation. (refs: #23124)

- **PR #23144**: (rallytime) Backport #23124 to 2014.7 @ 2015-04-28 20:44:46 UTC
  - PR #23124: (ether42) fix parsing the output of parted in parted.list_() (refs: #23144)
  - c85d36fd29 Merge pull request #23124 from rallytime/bp-23124-2014-7
  - 6b64da706c fix parsing the output of parted

- **PR #23120**: (terminalmage) Don't run os.path.relpath() if repo doesn't have a "root" param set @ 2015-04-28 15:46:54 UTC
  - a27b158153 Merge pull request #23120 from terminalmage/fix-gitfs-relpath
  - 1860fffd68 Don't run os.path.relpath() if repo doesn't have a "root" param set

- **PR #23132**: (clinta) Backport b27c176 @ 2015-04-28 15:00:30 UTC
  - fcba607978 Merge pull request #23132 from clinta/patch-2
  - a824d727d1 Backport b27c176

- **ISSUE #23085**: (xenophonf) Use "s3fs" (not "s3") in fileserver_roots (refs: #23097)

- **PR #23108**: (rallytime) Backport #23097 to 2014.7 @ 2015-04-28 03:58:05 UTC
  - PR #23097: (rallytime) Change s3 to s3fs in fileserver_roots docs example (refs: #23108)
  - 399857f20b Merge pull request #23108 from rallytime/bp-23097
  - fa889845df Change s3 to s3fs in fileserver_roots docs example

- **ISSUE #22171**: (basepi) We should only call returner.save_load once per jid (refs: #22199)

- **PR #23112**: (basepi) [2014.7] Backport #22199 to 2014.7 @ 2015-04-28 03:55:44 UTC
  - PR #22199: (basepi) [2015.2] Put a bandaid on the save_load duplicate issue (mysql returner) (refs: #23112)
  - 5541537c32 Merge pull request #23112 from basepi/mysql_returner_save_load
  - 0127012ed3 Put a bandaid on the save_load duplicate issue

- **ISSUE #23085**: (xenophonf) Use "s3fs" (not "s3") in fileserver_roots (refs: #23097)

- **PR #23132**: (clinta) Backport b27c176 @ 2015-04-28 15:00:30 UTC
  - fcba607978 Merge pull request #23132 from clinta/patch-2
  - a824d727d1 Backport b27c176

- **ISSUE #22171**: (basepi) We should only call returner.save_load once per jid (refs: #22199)

- **PR #23112**: (basepi) [2014.7] Backport #22199 to 2014.7 @ 2015-04-28 03:55:44 UTC
  - PR #22199: (basepi) [2015.2] Put a bandaid on the save_load duplicate issue (mysql returner) (refs: #23112)
  - 5541537c32 Merge pull request #23112 from basepi/mysql_returner_save_load
  - 0127012ed3 Put a bandaid on the save_load duplicate issue

- **PR saltstack/salt#22925**: (rallytime) Backport #22895 to 2014.7 (refs: #23113)
- PR #22895: (aletourneau) pam_tally counter was not reset to 0 after a successful login (refs: #23113, #22925, saltstack/salt#22925)
- dfe206b25 Merge pull request #23113 from saltstack/revert-22925-bp-22895
- b957ea8977 Revert "Backport #22895 to 2014.7"

- ISSUE #23013: (ghost) gitfs regression with authenticated repos (refs: #23094)

- PR #23094: (terminalmage) pygit2: disable cleaning of stale refs for authenticated remotes @ 2015-04-27 20:51:28 UTC
  - 21515f3c23 Merge pull request #23094 from terminalmage/issue23013
  - aa7b04f79 pygit2: disable cleaning of stale refs for authenticated remotes

- PR #23048: (jfindlay) py-2.6 compat for utils/boto.py ElementTree exception @ 2015-04-25 16:56:45 UTC
  - d45aa21dca Merge pull request #23048 from jfindlay/ET_error
  - 64c42cbb5f py-2.6 compat for utils/boto.py ElementTree exception

- ISSUE #22981: (syphernl) Locale state throwing traceback when generating not (yet) existing locale (refs: #23025)

- PR #23025: (jfindlay) catch exceptions on bad system locales/encodings @ 2015-04-25 16:56:30 UTC
  - d25a5c102f Merge pull request #23025 from jfindlay/fix_sys_locale
  - 9c4db2b00 catch exceptions on bad system locales/encodings

- PR #22932: (hvnsweeting) bugfix: also manipulate dir_mode when source not defined @ 2015-04-25 16:54:58 UTC
  - 5e44b59a14 Merge pull request #22932 from hvnsweeting/file-append-bugfix
  - 3f36d1e4a do not use assert in execution module
  - 9d4fd4a8c8 bugfix: also manipulate dir_mode when source not defined

  - 2e09789156 Merge pull request #23000 from jfindlay/systemd_kill
  - 3d575e29c4 set systemd service killMode to process for minion
• ISSUE #22707: (arthurlogilab) retry_dns of master configuration is missing from the documentation (refs: #22999)

• PR #22999: (justinta) Added retry_dns to minion doc. @ 2015-04-24 03:30:24 UTC
  - b5c059ab26 Merge pull request #22999 from jtand/fix_22707
  - 8486e17ab3 Added retry_dns to minion doc.

• PR #22990: (techhat) Use the proper cloud conf variable @ 2015-04-23 17:48:07 UTC
  - 27dc877bfd Merge pull request #22990 from techhat/2014.7
  - d33bc8c2c1 Use the proper cloud conf variable

• PR #22976: (multani) Improve state_output documentation @ 2015-04-23 12:24:22 UTC
  - 13df652c6 Merge pull request #22976 from multani/fix/state-output-doc
  - 19ef419b5 Improve state_output documentation

• PR #22955: (terminalmage) Fix regression introduced yesterday in dockerio module @ 2015-04-22 18:56:39 UTC
  - 89fa18500c Merge pull request #22955 from terminalmage/dockerio-run-fix
  - b4472ad1b2 Fix regression introduced yesterday in dockerio module

• PR #22954: (rallytime) Backport #22909 to 2014.7 @ 2015-04-22 18:56:20 UTC
  - PR #22909: (mguegan) Fix compatibility with pkgin > 0.7 (refs: #22954)
  - 46ef227911 Merge pull request #22954 from rallytime/bp-22909
  - 70c1c3969 Fix compatibility with pkgin > 0.7

• ISSUE #18720: (Reiner030) timeouts when setting Route53 records (refs: #22856)

• PR #22856: (jfindlay) increase timeout and decrease tries for route53 records @ 2015-04-22 16:47:01 UTC
  - c9ae593461 Merge pull request #22856 from jfindlay/route53_timeout
  - ba4a786984 add route53 record sync wait, default=False
  - ea2fd50660 increase timeout and tries for route53 records

• PR #22946: (s0undt3ch) Test with a more recent pip version to avoid a traceback @ 2015-04-22 16:25:17 UTC
  - a178d444b8 Merge pull request #22946 from s0undt3ch/2014.7
  - bc87749e2c Test with a more recent pip version to avoid a traceback

• ISSUE #22571: (BoomerB) same error message as on issue #18504 (refs: #22945)

• PR #22945: (garethgreenaway) Fixes to scheduler @ 2015-04-22 16:25:00 UTC
  - de339bef0a Merge pull request #22945 from garethgreenaway/22571_2014_7_schedule_pillar_refresh_seconds_exceptions
  - bfa6d25ed8 Fixing a reported issue when using a scheduled job from pillar with splay. _seconds element that acted as a backup of the actual seconds was being removed when pillar was refreshed and causing exceptions. This fix moves some splay related code out of the if else condition so it’s checked whether the job is in the job queue or not.

• ISSUE #18843: (calvinhp) State user.present will fail to create home if user exists and homedir doesn’t (refs: #22933, #22887)

• PR #22887: (hvnsweeting) fix #18843 @ 2015-04-22 15:47:05 UTC
  - 12d2b91d85 Merge pull request #22887 from hvnsweeting/18843-fix-user-present-home
  - 7fe7b089fd run user.chhome once to avoid any side-effect when run it twice
- 19de9954ee clarify the usage of home arg
- d6dc09af64 enhance doc, as usermod on ubuntu 12.04 will not CREATE home
- 0ce4dfeb6 refactor: force to use boolean
- 849d19edd7 log debug the creating dir process
- c4e95b9f48 fix #18843: usermod won’t create a dir if old home does not exist

- **ISSUE #2417**: (ffa) Module standards (refs: #22829)

- **ISSUE #21140**: (holms) locale.present state executed successfully, although originally fails (refs: #22930, #22829)

- **PR #22930**: (jfindlay) localemod.gen_locale now always returns a boolean @ 2015-04-22 15:37:39 UTC
  - **PR #22829**: (F30) Always return a boolean in gen_locale() (refs: #22930)
  - b7de7bdf47 Merge pull request #22930 from jfindlay/localegen_bool
  - 399399f89e localemod.gen_locale now always returns a boolean

- **ISSUE #18843**: (calvinhp) State user.present will fail to create home if user exists and homedir doesn’t (refs: #22933, #22887)

• ISSUE #22825: (paolodina) Issue using file.replace in state file (refs: #22897)

• PR #22897: (rallytime) Add param documentation for file.replace state @ 2015-04-21 17:31:04 UTC
  - e2ec4ecc55 Merge pull request #22897 from rallytime/fix-22825
  - 9c516300b0 Add param documentation for file.replace state

• ISSUE saltstack/salt#22844: (bersace) LocalClient file cache confuse pillar and state files (refs: #22850)

• PR #22850: (bersace) Fix pillar and salt fileserver mixed @ 2015-04-21 17:04:33 UTC
  - fd53889f0e Merge pull request #22850 from bersace/fix-pillar-salt-mixed
  - 31b98e72eb Initialize state file client after pillar loading
  - f6beb7a31 Use saltenv

• PR #22818: (twangboy) Added documentation regarding pip in windows @ 2015-04-21 03:58:59 UTC
  - 1380fec1b9 Merge pull request #22818 from twangboy/upd_pip_docs
  - cb999c7d70 Update pip.py
  - 3cc5c970ad Added documentation regarding pip in windows

• PR #22872: (rallytime) Prevent stacktrace on os.path.exists in hosts module @ 2015-04-21 02:54:40 UTC
  - b2bf17f5d5 Merge pull request #22872 from rallytime/fix_hosts_stacktrace
  - c88a1ea243 Prevent stacktrace on os.path.exists in hosts module

• PR #22853: (s0undt3ch) Don’t assume package installation order. @ 2015-04-21 02:42:41 UTC
  - 03af523de9 Merge pull request #22853 from s0undt3ch/2014.7
  - b62df62151 Don’t assume package installation order.

• PR #22877: (s0undt3ch) Don’t fail on make clean just because the directory does not exist @ 2015-04-21 02:40:47 UTC
  - 9211e36564 Merge pull request #22877 from s0undt3ch/hotfix/clean-docs-fix
  - 95d6887949 Don’t fail on make clean just because the directory does not exist
• PR #22873: (thatch45) Type check the version since it will often be numeric @ 2015-04-21 02:38:11 UTC
  - 5bd08bbd Merge pull request #22873 from thatch45/type_check
  - 53b3876626 Type check the version since it will often be numeric
• PR #22870: (twangboy) Added ability to send a version with a space in it @ 2015-04-20 23:18:28 UTC
  - c965b0a035 Merge pull request #22870 from twangboy/fix_installer_again
  - 3f180cfaae Added ability to send a version with a space in it
• PR #22863: (rallytime) Backport #20974 to 2014.7 @ 2015-04-20 19:29:37 UTC
  - PR #20974: (JohannesEbke) Fix expr_match usage in salt.utils.check_whitelist_blacklist (refs: #22863)
  - 2973eb18bc Merge pull request #22863 from rallytime/bp-20974
  - 14913a4cb4 Fix expr_match usage in salt.utils.check_whitelist_blacklist
• PR #22578: (hvnsweeting) gracefully handle when salt-minion cannot decrypt key @ 2015-04-20 15:24:45 UTC
  - c45b92bba4 Merge pull request #22578 from hvnsweeting/2014-7-fix-compile-pillar
  - f75b24ad68 gracefully handle when salt-minion cannot decrypt key
• ISSUE #21979: (yrdevops) gitfs: error message not descriptive enough when libgit2 was compiled without libssh2 (refs: #22800)
• PR #22800: (terminalmage) Improve error logging for pygit2 SSH-based remotes @ 2015-04-18 17:18:55 UTC
  - 900c7a510f Merge pull request #22800 from terminalmage/issue21979
  - 8f10e004cd Clarify that for pygit2, receiving 0 objects means repo is up-to-date
  - 9b88f571d6 Add information about libssh2 requirement for pygit2 ssh auth
  - 09468d2607 Fix incorrect log message
  - 2093bf896d Adjust loglevels for gitfs errors
  - 9d394dfe46 Improve error logging for pygit2 SSH-based remotes
• PR #22813: (twangboy) Updated instructions for building salt @ 2015-04-18 04:10:07 UTC
  - e99f2fd28 Merge pull request #22813 from twangboy/win_doc_fix
  - ade421acdd Fixed some formatting issues
  - 8901b35a6 Updated instructions for building salt
• ISSUE #22708: (Bilge) salt-ssh file.accumulated error: NameError: global name 'msgpack' is not defined (refs: #22810)
• PR #22810: (basepi) [2014.7] More msgpack gating for salt-ssh @ 2015-04-17 22:28:24 UTC
  - fe1de89ad7 Merge pull request #22810 from basepi/salt-ssh.more.msgpack.gating
  - d4da86e6a4 Gate msgpack in salt/modules/saltutil.py
  - 02303b2ce Gate msgpack in salt/modules/data.py
  - d7e874f02e Gate salt.states.file.py msgpack
• ISSUE #17144: (xpender) salt-cloud -m fails with softlayer (refs: #22803)
• PR #22803: (rallytime) Allow map file to work with softlayer @ 2015-04-17 20:34:42 UTC
  - 11df71e16d Merge pull request #22803 from rallytime/fix-17144
  - ce88b6ad41 Allow map file to work with softlayer
• PR #22807: (rallytime) Add 2014.7.5 links to windows installation docs @ 2015-04-17 20:32:13 UTC
  - cd43a95212 Merge pull request #22807 from rallytime/windows_docs_update
  - 5931a58d1 Replace all 4s with 5s
  - eadaead755 Add 2014.7.5 links to windows installation docs
• PR #22795: (rallytime) Added release note for 2014.7.5 release @ 2015-04-17 18:05:36 UTC
  - 0b29fe2c87 Merge pull request #22795 from rallytime/release_notes
  - fde1feed46 Remove extra line
  - b19b95d992 Added release note for 2014.7.5 release
• ISSUE #22740: (lorengordon) New Windows installer assumes salt is installed to the current directory (refs: #22759)
• PR #22759: (twangboy) Final edits to the batch files for running salt @ 2015-04-17 04:31:15 UTC
  - PR #22754: (twangboy) Removed redundant \ and " (refs: #22759)
  - 3c91459de2 Merge pull request #22759 from twangboy/fix_bat_one_last_time
  - 075f8e046 Final edits to the batch files for running salt
• PR #22760: (thatch45) Fix issues with the syndic @ 2015-04-17 04:30:48 UTC
  - 20d3f2bb83 Merge pull request #22760 from thatch45/syndic_fix
  - e2db624b37 Fix issues with the syndic not resolving the master when the interface is set
• PR #22762: (twangboy) Fixed version not showing in Add/Remove Programs @ 2015-04-17 04:29:46 UTC
  - 54c45845ab Merge pull request #22762 from twangboy/fix_installer
  - 4d25af8acf Fixed version not showing in Add/Remove Programs

28.2.95 Salt 2014.7.7 Release Notes

release 2015-10-13
Version 2014.7.7 is a bugfix release for 2014.7.0.

Statistics

• Total Merges: 54
• Total Issue References: 20
• Total PR References: 60
• Contributors: 28 (AkhterAli, BretFisher, MrCitron, alekti, basepi, bersace, cachedout, corux, cro, davidjb, dumol, efficks, garethgreenaway, hvnsweeting, jacksontj, jacobhammons, jaybocc2, jfindlay, jquast, justinta, msteed, mmadhok, notpeter, puneet, rallytime, techhat, trevor-h, twangboy)
Changelog for v2014.7.6..v2014.7.7

Generated at: 2018-05-27 20:45:04 UTC

- **PR #27335**: (rallytime) [2014.7] Fixup salt-cloud logging @ 2015-09-24 20:33:53 UTC
  - 5262f01325 Merge pull request #27335 from rallytime/cloud-logging-7
  - adeb1dacd4 Pylint Fix
  - 588c13783c Salt-cloud logging clean up for windows functions
  - 9b6000135c [2014.7] Fixup salt-cloud logging

- **PR #27252**: (jfindlay) 2014.7 -> 2014.7.0 @ 2015-09-18 23:44:39 UTC
  - e90412d3b8 Merge pull request #27252 from jfindlay/version.2014.7
  - 3d28307a00 2014.7 -> 2014.7.0

- **PR #27117**: (jacobhammons) made 2014.7 an archived release @ 2015-09-15 07:35:12 UTC
  - c186e51764 Merge pull request #27117 from jacobhammons/release-docs-2014.7
  - b69e11e0a4 made 2014.7 an archived release minor doc site updates

- **PR #27114**: (cachedout) Issue warning that some log levels may contain sensitive data @ 2015-09-15 07:30:43 UTC
  - 69d758ee2b Merge pull request #27114 from cachedout/warn_on_insecure_log
  - 507fb046b8 Issue warning that some log levels may contain sensitive data

- **PR #27075**: (twangboy) Replaced password with redacted when displayed @ 2015-09-14 18:36:10 UTC
  - aa71bae8aa Merge pull request #27075 from twangboy/fixed_password_2014.7
  - c0689e3215 Replaced password with redacted when displayed

- **ISSUE #26656**: (ari) [documentation] error in example for salt.runner.pillar (refs: #26667)

- **PR #26667**: (nmadhok) [doc-fix] Removing special character from salt.runners.pillar and other changes @ 2015-08-26 18:24:37 UTC
  - c2c7fe06c8 Merge pull request #26667 from nmadhok/doc-fix-2014.7
  - 26be1896b8 Doc fix. Fixes #26656

- **PR #26663**: (jacobhammons) version change for latest branch @ 2015-08-26 14:03:35 UTC
  - 6bd3ddcae8 Merge pull request #26663 from jacobhammons/2014.7-version
  - b6af538070 version change for latest branch

- **PR #26636**: (rallytime) Refactor cloud provider tests to be more accurate @ 2015-08-25 21:28:34 UTC
  - 071a6112e5 Merge pull request #26636 from rallytime/cloud-test-fixes
  - c0d8d558d Don’t use id as variable
  - 2b4bc1679d Keep ec2 instance creation test the same - it works better for the ec2 output
  - b5588b31f Skip digital ocean tests since we can’t use API v1 with v2 tests
  - 9ae1539c62 Update cloud tests to be more efficient and accurate

- **ISSUE #26630**: (efficks) win_service: Function has_powershell does not works on Windows XP (refs: #26640)

- **PR #26640**: (efficks) Fix function spacing @ 2015-08-25 20:01:39 UTC
- 304542b4c6 Merge pull request #26640 from efficks/fixws2014
- ebe5d9d85c Fix function spacing

**PR #26515: (bersace) Defaults to current saltenv in state.sls @ 2015-08-25 16:35:50 UTC**
- 4532f98a76 Merge pull request #26515 from bersace/salt-env-local-sls
- 0727a9e3d Defaults to current saltenv in state.sls

**PR #26242: (cro) Remove dead code @ 2015-08-12 15:14:20 UTC**
- da8bca09aa Merge pull request #26242 from cro/anonldap4
- a0d2ab1eed Remove dead code

**PR #26216: (cro) Fix LDAP configuration issue. @ 2015-08-11 18:33:43 UTC**
- 1ecf23773e Merge pull request #26216 from cro/anonldap3
- af132d7b89 Documentation update for anonymous bind issue.
- 2ef54b6b13 Documentation update for anonymous bind issue.
- 5b1836bb00 Fix issue with LDAP anonymous binds.

**PR #26116: (corux) file.replace fails if repl string is an invalid regex and append/prepend is used @ 2015-08-10 16:44:12 UTC**
- abdf2935c4 Merge pull request #26116 from corux/fix-escape-content
- fd913ddc36 Append/prepend: search for full line with escaped content

**ISSUE #25751: (basepi) Document master_finger more prominently (refs: #26088)**

**PR #26088: (jacobhammons) Master finger @ 2015-08-07 14:31:33 UTC**
- 106356d98d Merge pull request #26088 from jacobhammons/master-finger
- 133d5f7885 some small changes
- d220c83f77 master_finger configuration docs switch a script to use https:// instead of http:// Refs #25751

**ISSUE #25961: [getabc] [2015.5.3-2] salt-winrepo.git/salt-minion.sls fails certificate '*.wpengine.com' or 'wpengine.com' (refs: #26047)**

**PR #26047: (jacobhammons) Updated windows download links in the docs to https://repo.saltstack.com @ 2015-08-05 22:59:44 UTC**
- 4bd4bc41f2 Merge pull request #26047 from jacobhammons/win-downloads
- 7c162d181c Updated windows download links in the docs to https://repo.saltstack.com Refs #25961

**ISSUE #25701: (alekti) Issue #23764 regression (refs: #25750)**

**ISSUE #23764: (es1o) source_hash from local file is not supported. (refs: #25750)**

**PR #25750: (alekti) Add file as supported protocol for file source_hash. Fixes #25701. @ 2015-07-29 02:31:27 UTC**
- d93eb87c16 Merge pull request #25750 from alekti/2014.7
- 9e3c3ae96d4 Add file as supported protocol for file source_hash. Fixes #23764.

  - 358fad0c8 add 2014.7.8 release notes
• PR #31833: (jfindlay) add 2014.7.9 release notes @ 2016-03-11 21:19:55 UTC
  - a423c6cd04 Merge pull request #31833 from jfindlay/2014.7
  - 6910fccc584 add 2014.7.9 release notes
• PR #31826: (gtmanfred) Remove ability of authenticating user to specify pam service @ 2016-03-11 20:41:01 UTC
  - c5e7c03953 Merge pull request #31826 from gtmanfred/2014.7
- d73f70ebb2 Remove ability of authenticating user to specify pam service

- **PR #29392**: (jacobhammons) updated version number to not reference a specific build from the latest branch @ 2015-12-03 15:54:31 UTC
  - 85aa70a6cb Merge pull request #29392 from jacobhammons/2014.7
  - d7f0db1dd8 updated version number to not reference a specific build from the latest branch

- **ISSUE #29295**: (douardda) systemd's service file should use the 'process' KillMode option on Debian also (refs: #29296)

- **PR #29296**: (douardda) Use process KillMode on Debian systems also @ 2015-12-01 16:00:16 UTC
  - d2fb2109a3 Merge pull request #29296 from douardda/patch-3
  - d2885390f4 Use process KillMode on Debian systems also

### 28.2.98 Salt 2014.1.0 Release Notes - Codename Hydrogen

**Note**: Due to a change in master to minion communication, 2014.1.0 minions are not compatible with older-version masters. Please upgrade masters first. More info on backwards-compatibility policy [here](#), under the "Upgrading Salt" subheading.

**Note**: A change in the grammar in the state compiler makes `module.run` in requisites illegal syntax. Its use is replaced simply with the word `module`. In other words you will need to change requisites like this:

```python
require:
  module.run: some_module_name
```

to:

```python
require:
  module: some_module_name
```

This is a breaking change. We apologize for the inconvenience, we needed to do this to remove some ambiguity in parsing requisites.

**release** 2014-02-24

The 2014.1.0 release of Salt is a major release which not only increases stability but also brings new capabilities in virtualization, cloud integration, and more. This release brings a great focus on the expansion of testing making roughly double the coverage in the Salt tests, and comes with many new features.

2014.1.0 is the first release to follow the new date-based release naming system. See the version numbers page for more details.
Major Features

Salt Cloud Merged into Salt

Salt Cloud is a tool for provisioning salted minions across various cloud providers. Prior to this release, Salt Cloud was a separate project but this marks its full integration with the Salt distribution. A Getting Started guide and additional documentation for Salt Cloud can be found [here](#).

Google Compute Engine

Alongside Salt Cloud comes new support for the Google Compute Engine. Salt Stack can now deploy and control GCE virtual machines and the application stacks that they run.

For more information on Salt Stack and GCE, please see [this blog post](#).

Documentation for Salt and GCE can be found [here](#).

Salt Virt

Salt Virt is a cloud controller that supports virtual machine deployment, inspection, migration, and integration with many aspects of Salt.

Salt Virt has undergone a major overhaul with this release and now supports many more features and includes a number of critical improvements.

Docker Integration

Salt now ships with states and an execution module to manage Docker containers.

Substantial Testing Expansion

Salt continues to increase its unit/regression test coverage. This release includes over 300 new tests.

BSD Package Management

BSD package management has been entirely rewritten. FreeBSD 9 and older now default to using pkg_add, while FreeBSD 10 and newer will use pkgng. FreeBSD 9 can be forced to use pkgng, however, by specifying the following option in the minion config file:

```
providers:
  pkg: pkgng
```

In addition, support for installing software from the ports tree has been added. See the documentation for the ports state and execution module for more information.
Network Management for Debian/Ubuntu

Initial support for management of network interfaces on Debian-based distros has been added. See the documentation for the `network state` and the `debian_ip` for more information.

IPv6 Support for iptables State/Module

The `iptables state` and `module` now have IPv6 support. A new parameter `family` has been added to the states and execution functions, to distinguish between IPv4 and IPv6. The default value for this parameter is `ipv4`, specifying `ipv6` will use `ip6tables` to manage firewall rules.

GitFS Improvements

Several performance improvements have been made to the `Git fileserver backend`. Additionally, file states can now use any SHA1 commit hash as a fileserver environment:

```
/etc/httpd/httpd.conf:
  file.managed:
    - source: salt://webserver/files/httpd.conf
    - saltenv: 45af879
```

This applies to the functions in the `cp module` as well:

```
salt '*' cp.get_file salt://readme.txt /tmp/readme.txt saltenv=45af879
```

MinionFS

This new fileserver backend allows files which have been pushed from the minion to the master (using `cp.push`) to be served up from the salt fileserver. The path for these files takes the following format:

```
salt://minion-id/path/to/file
```

`minion-id` is the id of the "source" minion, the one from which the files were pushed to the master. `/path/to/file` is the full path of the file.

The `MinionFS Walkthrough` contains a more thorough example of how to use this backend.

```
saltenv
```

To distinguish between fileserver environments and execution functions which deal with environment variables, fileserver environments are now specified using the `saltenv` parameter. `env` will continue to work, but is deprecated and will be removed in a future release.
Grains Caching

A caching layer has been added to the Grains system, which can help speed up minion startup. Disabled by default, it can be enabled by setting the minion config option `grains_cache`:

```yaml
grains_cache: True
# Seconds before grains cache is considered to be stale.
grains_cache_expiration: 300
```

If set to `True`, the grains loader will read from/write to a msgpack-serialized file containing the grains data.

Additional command-line parameters have been added to salt-call, mainly for testing purposes:

- `--skip-grains` will completely bypass the grains loader when salt-call is invoked.
- `--refresh-grains-cache` will force the grains loader to bypass the grains cache and refresh the grains, writing a new grains cache file.

Improved Command Logging Control

When using the `cmd module`, either on the CLI or when developing Salt execution modules, a new keyword argument `output_loglevel` allows for greater control over how (or even if) the command and its output are logged. For example:

```
salt '*' cmd.run 'tail /var/log/messages' output_loglevel=debug
```

The package management modules (apt, yumpkg, etc.) have been updated to log the copious output generated from these commands at loglevel `debug`.

Note: To keep a command from being logged, `output_loglevel=quiet` can be used.

Prior to this release, this could be done using `quiet=True`. This argument is still supported, but will be removed in a future Salt release.

PagerDuty Support

Initial support for firing events via PagerDuty has been added. See the documentation for the `pagerduty` module.

Virtual Terminal

Sometimes the subprocess module is not good enough, and, in fact, not even askpass is. This virtual terminal is still in its infant childhood, needs quite some love, and was originally created to replace askpass, but, while developing it, it immediately proved that it could do so much more. It's currently used by salt-cloud when bootstrapping salt on clouds which require the use of a password.
Proxy Minions

Initial basic support for Proxy Minions is in this release. Documentation can be found here.

Proxy minions are a developing feature in Salt that enables control of devices that cannot run a minion. Examples include network gear like switches and routers that run a proprietary OS but offer an API, or “dumb” devices that just don’t have the horsepower or ability to handle a Python VM.

Proxy minions can be difficult to write, so a simple REST-based example proxy is included. A Python bottle-based webserver can be found at https://github.com/cro/salt-proxy-rest as an endpoint for this proxy.

This is an ALPHA-quality feature. There are a number of issues with it currently, mostly centering around process control, logging, and inability to work in a masterless configuration.

Additional Bugfixes (Release Candidate Period)

Below are many of the fixes that were implemented in salt during the release candidate phase.

- Fix mount.mounted leaving conflicting entries in fstab (issue #7079)
- Fix mysql returner serialization to use json (issue #9590)
- Fix ZMQError: Operation cannot be accomplished in current state errors (issue #6306)
- Rbenv and ruby improvements
- Fix quoting issues with mysql port (issue #9568)
- Update mount module/state to support multiple swap partitions (issue #9520)
- Fix archive state to work with bsd.tar
- Clarify logs for minion ID caching
- Add numeric revision support to git state (issue #9718)
- Update master_uri with master_ip (issue #9694)
- Add comment to Debian mod_repo (issue #9923)
- Fix potential undefined loop variable in rabbitmq state (issue #8703)
- Fix for salt-virt runner to delete key on VM deletion
- Fix for salt-run -d to limit results to specific runner or function (issue #9975)
- Add backtraces to jinja renderer when applicable (issue #10010)
- Fix parsing in monit module (issue #10041)
- Fix highstate output from syndic minions (issue #9732)
- Quiet logging when dealing with passwords/ hashes (issue #10000)
- Fix for multiple remotes in git_pillar (issue #9932)
- Fix npm installed command (issue #10109)
- Add safeguards for utf8 errors in zcbuildout module
- Fix compound commands (issue #9746)
- Add systemd notification when master is started
- Many doc improvements
28.2.99 Salt 2014.1.1 Release Notes

release 2014-03-18

Version 2014.1.1 is a bugfix release for 2014.1.0. The changes include:

- Various doc fixes, including up-to-date Salt Cloud installation documentation.
- Renamed state.sls runner to state.orchestrate, to reduce confusion with the state.sls execution function
- Fix various bugs in the dig module (issue #10367)
- Add retry for query on certain EC2 status codes (issue #10154)
- Fix various bugs in mongodb_user state module (issue #10430)
- Fix permissions on ~/.salt_token (issue #10422)
- Add PyObjects support
- Fix launchctl module crash with missing files
- Fix saltutil.find_job for Windows (issue #10581)
- Fix OS detection for OpenSolaris (issue #10601)
- Fix broken salt-ssh key_deploy
- Add support for multiline cron comments (issue #10721)
- Fix timezone module for Arch (issue #10789)
- Fix symlink support for file.recurse (issue #10809)
- Fix multi-master bugs (issue #10732 and issue #10969)
- Fix file.patch to error when source file is unavailable (issue #10380)
- Fix pkg to handle packages set as purge in pkg.installed (issue #10719)
- Add zmqversion grain
- Fix highstate summary for masterless minions (issue #10945)
- Fix saltutil.find_job for 2014.1 masters talking to 0.17 minions (issue #11020)
- Fix file.recurse states with trailing slashes in source (issue #11002)
- Fix pkg states to allow pkgname.x86_64 (issue #7306)
- Make iptables states set a default table for flush (issue #11037)
- Added iptables --reject-with after final iptables call in iptables states (issue:10757)
- Fix improper passing of “family” in iptables states (issue #10774)
- Fix traceback in iptables.insert states (issue #10988)
- Fix zombie processes (issue #10867 and others)
- Fix batch mode to obey --return settings (issue #9146)
- Fix localclient issue that was causing batch mode breakage (issue #11094, issue #10470, and others)
- Multiple salt-ssh fixes
- FreeBSD: look in /usr/local/etc/salt for configuration by default, if installed using pip --editable.
- Add a skip_suggestions parameter to pkg.installed states which allows pre-flight check to be skipped (issue #11106)
• Fixed tag-based gitfs fileserver environments regression ([issue #10956])
• Yum: fix cache of available pkgs not cleared when repos are changed ([issue #11001])
• Yum: fix for plugin-provided repositories (i.e. RHN/Spacewalk) ([issue #11145])
• Fix regression in `chocolatey.bootstrap` ([issue #10541])
• Fix fail on unknown target in `jobs runner` ([issue #11151])
• Don’t log errors for commands which are expected to sometimes exit with non-zero exit status ([issue #11154, issue #11090])
• Fix `test=True` CLI override of config option ([issue #10877])
• Log sysctl key listing at loglevel TRACE ([issue #10931])

28.2.100 Salt 2014.1.10 Release Notes

    release 2014-08-01

Note: Version 2014.1.9 contained a regression which caused inaccurate Salt version detection, and thus was never packaged for general release. This version contains the version detection fix, but is otherwise identical to 2014.1.9.

Version 2014.1.10 is another bugfix release for 2014.1.0. Changes include:
• Ensure salt-ssh will not continue if permissions on a temporary directory are not correct.
• Use the bootstrap script distributed with Salt instead of relying on an external resource
• Remove unused testing code
• Ensure salt states are placed into the `.salt` directory in salt-ssh
• Use a randomized path for temporary files in a salt-cloud deployment
• Clean any stale directories to ensure a fresh copy of salt-ssh during a deployment

Salt 2014.1.10 fixes security issues documented by CVE-2014-3563: "Insecure tmp-file creation in seed.py, salt-ssh, and salt-cloud." Upgrading is recommended.

28.2.101 Salt 2014.1.11 Release Notes

    release 2014-08-29

Version 2014.1.11 is another bugfix release for 2014.1.0. Changes include:
• Fix for minion_id with byte-order mark (BOM) ([issue #12296])
• Fix `runas` deprecation in `at` module
• Fix trailing slash behvior for `file.makedirs_` ([issue #14019])
• Fix chocolatey path ([issue #13870])
• Fix git_pillar infinite loop issues ([issue #14671])
• Fix json outputter `null` case
• Fix for minion error if one of multiple masters are down ([issue #14099])
28.2.102 Salt 2014.1.12 Release Notes

release 2014-10-08

Version 2014.1.12 is another bugfix release for 2014.1.0. Changes include:

- Fix `scp_file` always failing (which broke salt-cloud) (issue #16437)
- Fix regression in pillar in masterless (issue #16210, issue #16416, issue #16428)

28.2.103 Salt 2014.1.13 Release Notes

release 2014-10-14

Version 2014.1.13 is another bugfix release for 2014.1.0. Changes include:

- Fix `sftp_file` by checking the exit status code of scp (which broke salt-cloud) (issue #16599)

28.2.104 Salt 2014.1.2 Release Notes

release 2014-04-15

Version 2014.1.2 is another bugfix release for 2014.1.0. The changes include:

- Fix username detection when su'ed to root on FreeBSD (issue #11628)
- Fix minionfs backend for file.recurse states
- Fix 32-bit packages of different arches than the CPU arch, on 32-bit RHEL/CentOS (issue #11822)
- Fix bug with specifying alternate home dir on user creation (FreeBSD) (issue #11790)
- Don’t reload site module on module refresh for MacOS
- Fix regression with running execution functions in Pillar SLS (issue #11453)
- Fix some modules missing from Windows installer
- Don’t log an error for yum commands that return nonzero exit status on non-failure (issue #11645)
- Fix bug in rabbitmq state (issue #8703)
- Fix missing ssh config options (issue #10604)
- Fix top.sls ordering (issue #10810 and issue #11691)
- Fix `salt-key --list all` (issue #10982)
- Fix `win_servermanager install/remove function` (issue #11038)
- Fix interaction with tokens when running commands as root (issue #11223)
- Fix overstate bug with `find_job` and `**kwargs` (issue #10503)
- Fix `saltenv` for `aptpkg.mod_repo` from `pkgrepo state`
- Fix environment issue causing file caching problems (issue #11189)
- Fix bug in `__parse_key` in registry state (issue #11408)
- Add minion auth retry on rejection (issue #10763)
- Fix `publish_session` updating the encryption key (issue #11493)
- Fix for bad `AssertionError` raised by GitPython (issue #11473)
- Fix debian_ip to allow disabling and enabling networking on Ubuntu (issue #11164)
- Fix potential memory leak caused by saved (and unused) events (issue #11582)
- Fix exception handling in the MySQL module (issue #11616)
- Fix environment-related error (issue #11534)
- Include psutil on Windows
- Add file.replace and file.search to Windows (issue #11471)
- Add additional file module helpers to Windows (issue #11235)
- Add pid to netstat output on Windows (issue #10782)
- Fix Windows not caching new versions of installers in winrepo (issue #10597)
- Fix hardcoded md5 hashing
- Fix kwargs in salt-ssh (issue #11609)
- Fix file backup timestamps (issue #11745)
- Fix stacktrace on sys.doc with invalid eauth (issue #11293)
- Fix git.latest with test=True (issue #11595)
- Fix file.check_perms hardcoded follow_symlinks (issue #11387)
- Fix certain pkg states for RHEL5/Cent5 machines (issue #11719)

28.2.105 Salt 2014.1.3 Release Notes

release 2014-04-15

Version 2014.1.3 is another bugfix release for 2014.1.0. It was created as a hotfix for a regression found in 2014.1.2, which was not distributed. The only change made was as follows:

- Fix regression that caused saltutil.find_job to fail, causing premature terminations of salt CLI commands.

Changes in the not-distributed 2014.1.2, also included in 2014.1.3:

- Fix username detection when su'ed to root on FreeBSD (issue #11628)
- Fix minionfs backend for file.recurse states
- Fix 32-bit packages of different arches than the CPU arch, on 32-bit RHEL/CentOS (issue #11822)
- Fix bug with specifying alternate home dir on user creation (FreeBSD) (issue #11790)
- Don’t reload site module on module refresh for MacOS
- Fix regression with running execution functions in Pillar SLS (issue #11453)
- Fix some modules missing from Windows installer
- Don’t log an error for yum commands that return nonzero exit status on non-failure (issue #11645)
- Fix bug in rabbitmq state (issue #8703)
- Fix missing ssh config options (issue #10604)
- Fix top.sls ordering (issue #10810 and issue #11691)
- Fix salt-key --list all (issue #10982)
- Fix win_servermanager install/remove function (issue #11038)
• Fix interaction with tokens when running commands as root (issue #11223)
• Fix overstate bug with find_job and **kwargs (issue #10503)
• Fix saltenv for aptpkg.mod_repo from pkgrepo state
• Fix environment issue causing file caching problems (issue #11189)
• Fix bug in __parse_key in registry state (issue #11408)
• Add minion auth retry on rejection (issue #10763)
• Fix publish_session updating the encryption key (issue #11493)
• Fix for bad AssertionError raised by GitPython (issue #11473)
• Fix debian_ip to allow disabling and enabling networking on Ubuntu (issue #11164)
• Fix potential memory leak caused by saved (and unused) events (issue #11582)
• Fix exception handling in the MySQL module (issue #11616)
• Fix environment-related error (issue #11534)
• Include psutil on Windows
• Add file.replace and file.search to Windows (issue #11471)
• Add additional file module helpers to Windows (issue #11235)
• Add pid to netstat output on Windows (issue #10782)
• Fix Windows not caching new versions of installers in winrepo (issue #10597)
• Fix hardcoded md5 hashing
• Fix kwargs in salt-ssh (issue #11609)
• Fix file backup timestamps (issue #11745)
• Fix stacktrace on sys.doc with invalid eauth (issue #11293)
• Fix git.latest with test=True (issue #11595)
• Fix file.check_perms hardcoded follow_symlinks (issue #11387)
• Fix certain pkg states for RHEL5/Cent5 machines (issue #11719)

28.2.106 Salt 2014.1.4 Release Notes

release 2014-05-05

Version 2014.1.4 is another bugfix release for 2014.1.0. Changes include:
• Fix setup.py dependency issue (issue #12031)
• Fix handling for IOErrors under certain circumstances (issue #11783 and issue #11853)
• Fix fatal exception when /proc/1/cgroup is not readable (issue #11619)
• Fix os grains for OpenSolaris (issue #11907)
• Fix lvs.zero module argument pass-through (issue #9001)
• Fix bug in debian_ip interaction with network.system state (issue #11164)
• Remove bad binary package verification code (issue #12177)
• Fix traceback in solaris package installation (issue #12237)
• Fix `file.directory` state symlink handling (issue #12209)
• Remove `external_ip` grain
• Fix `file.managed` makedirs issues (issue #10446)
• Fix hang on non-existent Windows drive letter for `file` module (issue #9880)
• Fix salt minion caching all users on the server (issue #9743)
• Add strftime formatting for `ps.boot_time` (issue #12428)

28.2.107 Salt 2014.1.5 Release Notes

release 2014-06-11

Version 2014.1.5 is another bugfix release for 2014.1.0. Changes include:

• Add function for finding cached job on the minion
• Fix iptables save file location for Debian (issue #11730)
• Fix for minion caching jobs when master is down
• Bump default `syndic_wait` to 5 to fix syndic-related problems (issue #12262)
• Add OpenBSD, FreeBSD, and NetBSD support for `network.netstat` (issue #12121)
• Fix false positive error in logs for `makeconf` state (issue #9762)
• Fix for yum `fromrepo` package installs when repo is disabled by default (issue #12466)
• Fix for extra blank lines in `file.blockreplace` (issue #12422)
• Fix grain detection for OpenVZ guests (issue #11877)
• Fix `get_dns_servers` function for Windows `win_dns_client`
• Use system locale for ports package installations
• Use correct stop/restart procedure for Debian networking in `debian_ip` (issue #12614)
• Fix for `cmd_iter/cmd_iter_no_block` blocking issues (issue #12617)
• Fix traceback when syncing custom types (issue #12883)
• Fix cleaning directory symlinks in `file.directory`
• Add performance optimizations for `saltutil.sync_all` and `state.highstate`
• Fix possible error in `saltutil.running`
• Fix for kmod modules with dashes (issue #13239)
• Fix possible race condition for Windows minions in state module reloading (issue #12370)
• Fix bug with roster for `passwd` option that is loaded as a non-string object (issue #13249)
• Keep duplicate version numbers from showing up in `pkg.list_pkgs` output
• Fixes for Jinja renderer, timezone `module/state` (issue #12724)
• Fix `timedatectl` parsing for systemd>=210 (issue #12728)
• Fix `saltenv` being written to YUM repo config files (issue #12887)
• Removed the deprecated external nodes classifier (originally accessible by setting a value for `external_nodes` in the master configuration file). Note that this functionality has been marked deprecated for some time and was replaced by the more general `master tops` system.

28.2. Previous Releases
More robust escaping of ldap filter strings.

Fix trailing slash in `gitfs_root` causing files not to be available (issue #13185)

### 28.2.108 Salt 2014.1.6 Release Notes

**release** 2014-07-08

Version 2014.1.6 is another bugfix release for 2014.1.0. Changes include:

- Fix extra `iptables --help` output (Sorry!) (issue #13648, issue #13507, issue #13527, issue #13607)
- Fix `mount.active` for Solaris
- Fix support for `allow-hotplug` statement in `debian_ip` network module
- Add `sqlite3` to esky builds
- Fix `jobs.active` output (issue #9526)
- Fix the `virtual` grain for Xen (issue #13534)
- Fix `_ext_nodes` unavailable on master (issue #13535)
- Fix eauth for batch mode (issue #9605)
- Fix force-related issues with `tomcat` support (issue #12889)
- Fix `KeyError` when cloud mapping
- Fix `salt-minion` restart loop in Windows (issue #12086)
- Fix detection of `service` virtual module on Fedora minions
- Fix traceback with missing ipv4 grain (issue #13838)
- Fix issue in `roots` backend with invalid data in `mtime_map` (issue #13836)
- Fix traceback in `jobs.active` (issue #11151)
- Fix `master_tops` and `_ext_nodes` issue (issue #13535, issue #13673)

### 28.2.109 Salt 2014.1.7 Release Notes

**release** 2014-07-09

Version 2014.1.7 is another bugfix release for 2014.1.0. Changes include:

- Fix batch mode regression (issue #14046)

This release was a hotfix release for the regression listed above which was present in the 2014.1.6 release. The changes included in 2014.1.6 are listed below:

- Fix extra `iptables --help` output (Sorry!) (issue #13648, issue #13507, issue #13527, issue #13607)
- Fix `mount.active` for Solaris
- Fix support for `allow-hotplug` statement in `debian_ip` network module
- Add `sqlite3` to esky builds
- Fix `jobs.active` output (issue #9526)
- Fix the `virtual` grain for Xen (issue #13534)
- Fix eauth for batch mode (issue #9605)
• Fix force-related issues with **tomcat** support (issue #12889)
• Fix KeyError when cloud mapping
• Fix salt-minion restart loop in Windows (issue #12086)
• Fix detection of *service* virtual module on Fedora minions
• Fix traceback with missing ipv4 grain (issue #13838)
• Fix issue in roots backend with invalid data in mtime_map (issue #13836)
• Fix traceback in *jobs.active* (issue #11151)
• Fix *master_tops* and *_ext_nodes* issue (issue #13535, issue #13673)

### 28.2.110 Salt 2014.1.8 Release Notes

**release** 2014-07-30

**Note:** This release contained a regression which caused inaccurate Salt version detection, and thus was never packaged for general release. Please use version 2014.1.10 instead.

Version 2014.1.8 is another bugfix release for 2014.1.0. Changes include:

• Ensure salt-ssh will not continue if permissions on a temporary directory are not correct.
• Use the bootstrap script distributed with Salt instead of relying on an external resource
• Remove unused testing code
• Ensure salt states are placed into the `.salt` directory in salt-ssh
• Use a randomized path for temporary files in a salt-cloud deployment
• Clean any stale directories to ensure a fresh copy of salt-ssh during a deployment

### 28.2.111 Salt 2014.1.9 Release Notes

**release** 2014-07-31

**Note:** This release contained a regression which caused inaccurate Salt version detection, and thus was never packaged for general release. Please use version 2014.1.10 instead.

**Note:** Version 2014.1.8 contained a regression which caused inaccurate Salt version detection, and thus was never packaged for general release. This version contains the version detection fix, but is otherwise identical to 2014.1.8.

Version 2014.1.9 is another bugfix release for 2014.1.0. Changes include:

• Ensure salt-ssh will not continue if permissions on a temporary directory are not correct.
• Use the bootstrap script distributed with Salt instead of relying on an external resource
• Remove unused testing code
• Ensure salt states are placed into the `.salt` directory in salt-ssh
• Use a randomized path for temporary files in a salt-cloud deployment

28.2. Previous Releases
- Clean any stale directories to ensure a fresh copy of salt-ssh during a deployment

28.2.112 Salt 0.10.0 Release Notes

**release** 2012-06-16

0.10.0 has arrived! This release comes with MANY bug fixes, and new capabilities which greatly enhance performance and reliability. This release is primarily a bug fix release with many new tests and many repaired bugs. This release also introduces a few new key features which were brought in primarily to repair bugs and some limitations found in some of the components of the original architecture.

**Major Features**

**Event System**

The Salt Master now comes equipped with a new event system. This event system has replaced some of the back end of the Salt client and offers the beginning of a system which will make plugging external applications into Salt. The event system relies on a local ZeroMQ publish socket and other processes can connect to this socket and listen for events. The new events can be easily managed via Salt’s event library.

**Unprivileged User Updates**

Some enhancements have been added to Salt for running as a user other than root. These new additions should make switching the user that the Salt Master is running as very painless, simply change the `user` option in the master configuration and restart the master, Salt will take care of all of the particulars for you.

**Peer Runner Execution**

Salt has long had the peer communication system used to allow minions to send commands via the salt master. 0.10.0 adds a new capability here, now the master can be configured to allow for minions to execute Salt runners via the `peer_run` option in the salt master configuration.

**YAML Parsing Updates**

In the past the YAML parser for sls files would return the incorrect numbers when the file mode was set with a preceding 0. The YAML parser used in Salt has been modified to no longer convert these number into octal but to keep them as the correct value so that sls files can be a little cleaner to write.

**State Call Data Files**

It was requested that the minion keep a local cache of the most recent executed state run. This has been added and now with state runs the data is stored in a msgpack file in the minion’s cachedir.
Turning Off the Job Cache

A new option has been added to the master configuration file. In previous releases the Salt client would look over the Salt job cache to read in the minion return data. With the addition of the event system the Salt client can now watch for events directly from the master worker processes.

This means that the job cache is no longer a hard requirement. Keep in mind though, that turning off the job cache means that historic job execution data cannot be retrieved.

Test Updates

Minion Swarms Are Faster

To continue our efforts with testing Salt’s ability to scale the minionswarm script has been updated. The minionswarm can now start up minions much faster than it could before and comes with a new feature allowing modules to be disabled, thus lowering the minion’s footprint when making a swarm. These new updates have allows us to test

```bash
# python minionswarm.py -m 20 --master salt-master
```

Many Fixes

To get a good idea for the number of bugfixes this release offers take a look at the closed tickets for 0.10.0, this is a very substantial update:

https://github.com/saltstack/salt/issues?milestone=12&state=closed

Master and Minion Stability Fixes

As Salt deployments grow new ways to break Salt are discovered. 0.10.0 comes with a number of fixes for the minions and master greatly improving Salt stability.

28.2.113 Salt 0.10.1 Release Notes

release 2012-06-19

28.2.114 Salt 0.10.2 Release Notes

release 2012-07-30

0.10.2 is out! This release comes with enhancements to the pillar interface, cleaner ways to access the salt-call capabilities in the API, minion data caching and the event system has been added to salt minions.

There have also been updates to the ZeroMQ functions, many more tests (thanks to sponsors, the code sprint and many contributors) and a swath of bug fixes.
Major Features

Ext Pillar Modules

The ranks of available Salt modules directories sees a new member in 0.10.2. With the popularity of pillar a higher demand has arisen for ext_pillar interfaces to be more like regular Salt module additions. Now ext_pillar interfaces can be added in the same way as other modules, just drop it into the pillar directory in the salt source.

Minion Events

In 0.10.0 an event system was added to the Salt master. 0.10.2 adds the event system to the minions as well. Now event can be published on a local minion as well.

The minions can also send events back up to the master. This means that Salt is able to communicate individual events from the minions back up to the Master which are not associated with command.

Minion Data Caching

When pillar was introduced the landscape for available data was greatly enhanced. The minion's began sending grain data back to the master on a regular basis.

The new config option on the master called minion_data_cache instructs the Salt master to maintain a cache of the minion's grains and pillar data in the cachedir. This option is turned off by default to avoid hitting the disk more, but when enabled the cache is used to make grain matching from the salt command more powerful, since the minions that will match can be predetermined.

Backup Files

By default all files replaced by the file.managed and file.recurse states we simply deleted. 0.10.2 adds a new option. By setting the backup option to minion the files are backed up before they are replaced.

The backed up files are located in the cachedir under the file_backup directory. On a default system this will be at: /var/cache/salt/file_backup

Configuration files

salt-master and salt-minion automatically load additional configuration files from master.d/*.conf respective minion.d/*.conf where master.d/minion.d is a directory in the same directory as the main configuration file.

Salt Key Verification

A number of users complained that they had inadvertently deleted the wrong salt authentication keys. 0.10.2 now displays what keys are going to be deleted and verifies that they are the keys that are intended for deletion.
Key auto-signing

If `autosign_file` is specified in the configuration file incoming keys will be compared to the list of keynames in `autosign_file`. Regular expressions as well as globbing is supported.

The file must only be writable by the user otherwise the file will be ignored. To relax the permission and allow group write access set the `permissive_pki_access` option.

Module changes

**Improved OpenBSD support**

New modules for managing services and packages were provided by Joshua Elsasser to further improve the support for OpenBSD.

Existing modules like the `disk` module were also improved to support OpenBSD.

**SQL Modules**

The MySQL and PostgreSQL modules have both received a number of additions thanks to the work of Avi Marcus and Roman Imankulov.

**ZFS Support on FreeBSD**

A new ZFS module has been added by Kurtis Velarde for FreeBSD supporting various ZFS operations like creating, extending or removing zpools.

**Augeas**

A new Augeas module by Ulrich Dangel for editing and verifying config files.

**Native Debian Service module**

The support for the Debian was further improved with an new service module for Debian by Ahmad Khayyat supporting `disable` and `enable`.

**Cassandra**

Cassandra support has been added by Adam Garside. Currently only status and diagnostic information are supported.
Networking

The networking support for RHEL has been improved and supports bonding support as well as zeroconf configuration.

Monit

Basic monit support by Kurtis Velarde to control services via monit.

nzbget

Basic support for controlling nzbget by Joseph Hall

Bluetooth

Basic bluez support for managing and controlling Bluetooth devices. Supports scanning as well as pairing/unpairing by Joseph Hall.

Test Updates

Consistency Testing

Another testing script has been added. A bug was found in pillar when many minions generated pillar data at the same time. The new consist.py script is the tests directory was created to reproduce bugs where data should always be consistent.

Many Fixes

To get a good idea for the number of bugfixes this release offers take a look at the closed tickets for 0.10.2, this is a very substantial update:

https://github.com/saltstack/salt/issues?milestone=24&page=1&state=closed

Master and Minion Stability Fixes

As Salt deployments grow new ways to break Salt are discovered. 0.10.2 comes with a number of fixes for the minions and master greatly improving Salt stability.

28.2.115 Salt 0.10.3 Release Notes

release 2012-09-30

The latest taste of Salt has come, this release has many fixes and feature additions. Modifications have been made to make ZeroMQ connections more reliable, the beginning of the ACL system is in place, a new command line parsing system has been added, dynamic module distribution has become more environment aware, the new master_finger option and many more!
Major Features

ACL System

The new ACL system has been introduced. The ACL system allows for system users other than root to execute salt commands. Users can be allowed to execute specific commands in the same way that minions are opened up to the peer system.

The configuration value to open up the ACL system is called `client_acl` and is configured like so:

```yaml
client_acl:
    fred:
        - test.*
        - pkg.list_pkgs
```

Where `fred` is allowed access to functions in the test module and to the `pkg.list_pkgs` function.

Master Finger Option

The `master_finger` option has been added to improve the security of minion provisioning. The `master_finger` option allows for the fingerprint of the master public key to be set in the configuration file to double verify that the master is valid. This option was added in response to a motivation to pre-authenticate the master when provisioning new minions to help prevent man in the middle attacks in some situations.

Salt Key Fingerprint Generation

The ability to generate fingerprints of keys used by Salt has been added to `salt-key`. The new option `finger` accepts the name of the key to generate and display a fingerprint for.

```
salt-key -F master
```

Will display the fingerprints for the master public and private keys.

Parsing System

Pedro Algavio, aka s0undt3ch, has added a substantial update to the command line parsing system that makes the help message output much cleaner and easier to search through. Salt parsers now have `--versions-report` besides usual `--version` info which you can provide when reporting any issues found.

Key Generation

We have reduced the requirements needed for `salt-key` to generate minion keys. You’re no longer required to have salt configured and its common directories created just to generate keys. This might prove useful if you’re batch creating keys to pre-load on minions.
Startup States

A few configuration options have been added which allow for states to be run when the minion daemon starts. This can be a great advantage when deploying with Salt because the minion can apply states right when it first runs. To use startup states set the `startup_states` configuration option on the minion to `highstate`.

New Exclude Declaration

Some users have asked about adding the ability to ensure that other sls files or ids are excluded from a state run. The `exclude` statement will delete all of the data loaded from the specified sls file or will delete the specified id:

```
exclude:
  - sls: http
  - id: /etc/vimrc
```

Max Open Files

While we're currently unable to properly handle ZeroMQ's abort signals when the max open files is reached, due to the way that's handled on ZeroMQ's, we have minimized the chances of this happening without at least warning the user.

More State Output Options

Some major changes have been made to the state output system. In the past state return data was printed in a very verbose fashion and only states that failed or made changes were printed by default. Now two options can be passed to the master and minion configuration files to change the behavior of the state output. State output can be set to verbose (default) or non-verbose with the `state_verbose` option:

```
state_verbose: False
```

It is noteworthy that the `state_verbose` option used to be set to `False` by default but has been changed to `True` by default in 0.10.3 due to many requests for the change.

The next option to be aware of new and called `state_output`. This option allows for the state output to be set to `full` (default) or `terse`.

The `full` output is the standard state output, but the new `terse` output will print only one line per state making the output much easier to follow when executing a large state system.

```
state_output: terse
```

`state.append` Improvements

The salt `state.append()` tries not to append existing text. Previously the matching check was being made line by line. While this kind of check might be enough for most cases, if the text being appended was multi-line, the check would not work properly. This issue is now properly handled, the match is done as a whole ignoring any white space addition or removal except inside commas. For those thinking that, in order to properly match over multiple lines, salt will load the whole file into memory, that's not true. For most cases this is not important but an erroneous order to read a 4GB file, if not properly handled, like salt does, could make salt chew that amount of memory. Salt has a buffered file reader which will keep in memory a maximum of 256KB and iterates over the file in chunks of 32KB to test for the match, more than enough, if not, explain your usage on a ticket. With this change, also
salt.modules.file.contains(), salt.modules.file.contains_regex(), salt.modules.file.contains_glob() and salt.utils.find now do the searching and/or matching using the buffered chunks approach explained above.

Two new keyword arguments were also added, makedirs, and source. The first, makedirs will create the necessary directories in order to append to the specified file, of course, it only applies if we're trying to append to a non-existing file on a non-existing directory:

```
/tmp/salttest/file-append-makedirs:
  file.append:
    text: foo
    makedirs: True
```

The second, source, allows one to append the contents of a file instead of specifying the text.

```
/tmp/salttest/file-append-source:
  file.append:
    - source: salt://testfile
```

Security Fix

A timing vulnerability was uncovered in the code which decrypts the AES messages sent over the network. This has been fixed and upgrading is strongly recommended.

28.2.116 Salt 0.10.4 Release Notes

release 2012-10-23

Salt 0.10.4 is a monumental release for the Salt team, with two new module systems, many additions to allow granular access to Salt, improved platform support and much more.

This release is also exciting because we have been able to shorten the release cycle back to under a month. We are working hard to keep up the aggressive pace and look forward to having releases happen more frequently!

This release also includes a serious security fix and all users are very strongly recommended to upgrade. As usual, upgrade the master first, and then the minion to ensure that the process is smooth.

Major Features

External Authentication System

The new external authentication system allows for Salt to pass through authentication to any authentication system to determine if a user has permission to execute a Salt command. The Unix PAM system is the first supported system with more to come!

The external authentication system allows for specific users to be granted access to execute specific functions on specific minions. Access is configured in the master configuration file, and uses the new access control system:

```
external_auth:
  pam:
    thatch:
      - "web*:"
      - test.*
      - network.*
```
The configuration above allows the user *thatch* to execute functions in the test and network modules on minions that match the `web*` target.

**Access Control System**

All Salt systems can now be configured to grant access to non-administrative users in a granular way. The old configuration continues to work. Specific functions can be opened up to specific minions from specific users in the case of external auth and client ACLs, and for specific minions in the case of the peer system.

Access controls are configured like this:

```
client_acl:
  fred:
    - web\*:
      - pkg.list_pkgs
      - test.*
      - apache.*
```

**Target by Network**

A new matcher has been added to the system which allows for minions to be targeted by network. This new matcher can be called with the `-S` flag on the command line and is available in all places that the matcher system is available. Using it is simple:

```
$ salt -S '192.168.1.0/24' test.ping
$ salt -S '192.168.1.100' test.ping
```

**Nodegroup Nesting**

Previously a nodegroup was limited by not being able to include another nodegroup, this restraint has been lifted and now nodegroups will be expanded within other nodegroups with the `N@` classifier.

**Salt Key Delete by Glob**

The ability to delete minion keys by glob has been added to `salt-key`. To delete all minion keys whose minion name starts with `web`:

```
$ salt-key -d 'web*'
```

**Master Tops System**

The `external_nodes` system has been upgraded to allow for modular subsystems to be used to generate the top file data for a highstate run.

The `external_nodes` option still works but will be deprecated in the future in favor of the new `master_tops` option.

Example of using `master_tops`:

```
master_tops:
  ext_nodes: cobbler-external-nodes
```
Next Level Solaris Support

A lot of work has been put into improved Solaris support by Romeo Theriault. Packaging modules (pkgadd/pkgrm and pkgutil) and states, cron support and user and group management have all been added and improved upon. These additions along with SMF (Service Management Facility) service support and improved Solaris grain detection in 0.10.3 add up to Salt becoming a great tool to manage Solaris servers with.

Security

A vulnerability in the security handshake was found and has been repaired, old minions should be able to connect to a new master, so as usual, the master should be updated first and then the minions.

Pillar Updates

The pillar communication has been updated to add some extra levels of verification so that the intended minion is the only one allowed to gather the data. Once all minions and the master are updated to salt 0.10.4 please activate pillar 2 by changing the pillar_version in the master config to 2. This will be set to 2 by default in a future release.

28.2.117 Salt 0.10.5 Release Notes

   release 2012-11-15

Salt 0.10.5 is ready, and comes with some great new features. A few more interfaces have been modularized, like the outputter system. The job cache system has been made more powerful and can now store and retrieve jobs archived in external databases. The returner system has been extended to allow minions to easily retrieve data from a returner interface.

As usual, this is an exciting release, with many noteworthy additions!

Major Features

External Job Cache

The external job cache is a system which allows for a returner interface to also act as a job cache. This system is intended to allow users to store job information in a central location for longer periods of time and to make the act of looking up information from jobs executed on other minions easier.

Currently the external job cache is supported via the mongo and redis returners:

```
ext_job_cache: redis
redis.host: salt
```

Once the external job cache is turned on the new ret module can be used on the minions to retrieve return information from the job cache. This can be a great way for minions to respond and react to other minions.
OpenStack Additions

OpenStack integration with Salt has been moving forward at a blistering pace. The new nova, glance, and keystone modules represent the beginning of ongoing OpenStack integration.

The Salt team has had many conversations with core OpenStack developers and is working on linking to OpenStack in powerful new ways.

Wheel System

A new API was added to the Salt Master which allows the master to be managed via an external API. This new system allows Salt API to easily hook into the Salt Master and manage configs, modify the state tree, manage the pillar and more. The main motivation for the wheel system is to enable features needed in the upcoming web UI so users can manage the master just as easily as they manage minions.

The wheel system has also been hooked into the external auth system. This allows specific users to have granular access to manage components of the Salt Master.

Render Pipes

Jack Kuan has added a substantial new feature. The render pipes system allows Salt to treat the render system like unix pipes. This new system enables sls files to be passed through specific render engines. While the default renderer is still recommended, different engines can now be more easily merged. So to pipe the output of Mako used in YAML use this shebang line:

```
#!/mako|yaml
```

Salt Key Overhaul

The Salt Key system was originally developed as only a CLI interface, but as time went on it was pressed into becoming a clumsy API. This release marks a complete overhaul of Salt Key. Salt Key has been rewritten to function purely from an API and to use the outputter system. The benefit here is that the outputter system works much more cleanly with Salt Key now, and the internals of Salt Key can be used much more cleanly.

Modular Outputters

The outputter system is now loaded in a modular way. This means that output systems can be more easily added by dropping a python file down on the master that contains the function `output`.

Gzip from Fileserver

Gzip compression has been added as an option to the cp.get_file and cp.get_dir commands. This will make file transfers more efficient and faster, especially over slower network links.
Unified Module Configuration

In past releases of Salt, the minions needed to be configured for certain modules to function. This was difficult because it required pre-configuring the minions. 0.10.5 changes this by making all module configs on minions search the master config file for values.

Now if a single database server is needed, then it can be defined in the master config and all minions will become aware of the configuration value.

Salt Call Enhancements

The `salt-call` command has been updated in a few ways. Now, `salt-call` can take the `--return` option to send the data to a returner. Also, `salt-call` now reports executions in the minion proc system, this allows the master to be aware of the operation salt-call is running.

Death to `pub_refresh` and `sub_timeout`

The old configuration values `pub_refresh` and `sub_timeout` have been removed. These options were in place to alleviate problems found in earlier versions of ZeroMQ which have since been fixed. The continued use of these options has proven to cause problems with message passing and have been completely removed.

Git Revision Versions

When running Salt directly from git (for testing or development, of course) it has been difficult to know exactly what code is being executed. The new versioning system will detect the git revision when building and how many commits have been made since the last release. A release from git will look like this:

0.10.4-736-gec74d69

Svn Module Addition

Anthony Cornehl (twinshadow) contributed a module that adds Subversion support to Salt. This great addition helps round out Salt’s VCS support.

Noteworthy Changes

Arch Linux Defaults to Systemd

Arch Linux recently changed to use systemd by default and discontinued support for init scripts. Salt has followed suit and defaults to systemd now for managing services in Arch.
Salt, Salt Cloud and Openstack

With the releases of Salt 0.10.5 and Salt Cloud 0.8.2, OpenStack becomes the first (non-OS) piece of software to include support both on the user level (with Salt Cloud) and the admin level (with Salt). We are excited to continue to extend support of other platforms at this level.

28.2.118 Salt 0.11.0 Release Notes

release 2012-12-14

Salt 0.11.0 is here, with some highly sought after and exciting features. These features include the new overstate system, the reactor system, a new state run scope component called __context__, the beginning of the search system (still needs a great deal of work), multiple package states, the MySQL returner and a better system to arbitrarily reference outputters.

It is also noteworthy that we are changing how we mark release numbers. For the life of the project we have been pushing every release with features and fixes as point releases. We will now be releasing point releases for only bug fixes on a more regular basis and major feature releases on a slightly less regular basis. This means that the next release will be a bugfix only release with a version number of 0.11.1. The next feature release will be named 0.12.0 and will mark the end of life for the 0.11 series.

Major Features

OverState

The overstate system is a simple way to manage rolling state executions across many minions. The overstate allows for a state to depend on the successful completion of another state.

Reactor System

The new reactor system allows for a reactive logic engine to be created which can respond to events within a salted environment. The reactor system uses sls files to match events fired on the master with actions, enabling Salt to react to problems in an infrastructure.

Your load-balanced group of webservers is under extra load? Spin up a new VM and add it to the group. Your fileserver is filling up? Send a notification to your sysadmin on call. The possibilities are endless!

Module Context

A new component has been added to the module loader system. The module context is a data structure that can hold objects for a given scope within the module.

This allows for components that are initialized to be stored in a persistent context which can greatly speed up ongoing connections. Right now the best example can be found in the cp execution module.
Multiple Package Management

A long desired feature has been added to package management. By definition Salt States have always installed packages one at a time. On most platforms this is not the fastest way to install packages. Erik Johnson, aka terminalmage, has modified the package modules for many providers and added new capabilities to install groups of packages. These package groups can be defined as a list of packages available in repository servers:

```plaintext
python_pkgs:
    pkg.installed:
      - pkgs:
        - python-mako
        - whoosh
        - python-git
```

or specify based on the location of specific packages:

```plaintext
python_pkgs:
    pkg.installed:
      - sources:
        - python-mako: http://some-rpms.org/python-mako.rpm
        - whoosh: salt://whoosh/whoosh.rpm
        - python-git: ftp://companyserver.net/python-git.rpm
```

Search System

The bones to the search system have been added. This is a very basic interface that allows for search backends to be added as search modules. The first supported search module is the whoosh search backend. Right now only the basic paths for the search system are in place, making this very experimental. Further development will involve improving the search routines and index routines for whoosh and other search backends.

The search system has been made to allow for searching through all of the state and pillar files, configuration files and all return data from minion executions.

Notable Changes

All previous versions of Salt have shared many directories between the master and minion. The default locations for keys, cached data and sockets has been shared by master and minion. This has created serious problems with running a master and a minion on the same systems. 0.11.0 changes the defaults to be separate directories. Salt will also attempt to migrate all of the old key data into the correct new directories, but if it is not successful it may need to be done manually. If your keys exhibit issues after updating make sure that they have been moved from `/etc/salt/pki` to `/etc/salt/pki/{master,minion}`.

The old setup will look like this:

```
/etc/salt/pki
|-- master.pem
|-- master.pub
|-- minions
| `-- ragnarok.saltstack.net
|-- minions_pre
|-- minion.pem
|-- minion.pub
|-- minion_master.pub
|-- minions_pre
|-- minions_rejected
```
With the accepted minion keys in `/etc/salt/pki/minions`, the new setup places the accepted minion keys in
`/etc/salt/pki/master/minions`.

```
/etc/salt/pki
  |-- master
  |   |-- master.pem
  |   |-- master.pub
  |   |-- minions
  |     |-- ragnarok.saltstack.net
  |     |-- minions_pre
  |     |-- minions_rejected
  |-- minion
  |   |-- minion.pem
  |   |-- minion.pub
  |   |-- minion_master.pub
```

### 28.2.119 Salt 0.11.1 Release Notes

#### release 2012-12-19

### 28.2.120 Salt 0.12.0 Release Notes

#### release 2013-01-15

Another feature release of Salt is here! Some exciting additions are included with more ways to make salt modular
and even easier management of the salt file server.

**Major Features**

**Modular Fileserver Backend**

The new modular fileserver backend allows for any external system to be used as a salt file server. The main benefit
here is that it is now possible to tell the master to directly use a git remote location, or many git remote locations,
automatically mapping git branches and tags to salt environments.

**Windows is First Class!**

A new Salt Windows installer is now available! Much work has been put in to improve Windows support. With this
much easier method of getting Salt on your Windows machines, we hope even more development and progress will
occur. Please file bug reports on the Salt GitHub repo issue tracker so we can continue improving.

One thing that is missing on Windows that Salt uses extensively is a software package manager and a software
package repository. The Salt pkg state allows sys admins to install software across their infrastructure and across
operating systems. Software on Windows can now be managed in the same way. The SaltStack team built a package
manager that interfaces with the standard Salt pkg module to allow for installing and removing software on Windows.
In addition, a software package repository has been built on top of the Salt fileserver. A small YAML file provides
the information necessary for the package manager to install and remove software.

An interesting feature of the new Salt Windows software package repository is that one or more remote git reposi-
tories can supplement the master’s local repository. The repository can point to software on the master’s fileserver
or on an HTTP, HTTPS, or ftp server.
New Default Outputter

Salt displays data to the terminal via the outputter system. For a long time the default outputter for Salt has been the python pretty print library. While this has been a generally reasonable outputter, it did have many failings. The new default outputter is called "nested", it recursively scans return data structures and prints them out cleanly.

If the result of the new nested outputter is not desired any other outputter can be used via the --out option, or the output option can be set in the master and minion configs to change the default outputter.

Internal Scheduler

The internal Salt scheduler is a new capability which allows for functions to be executed at given intervals on the minion, and for runners to be executed at given intervals on the master. The scheduler allows for sequences such as executing state runs (locally on the minion or remotely via an overstate) or continually gathering system data to be run at given intervals.

The configuration is simple, add the schedule option to the master or minion config and specify jobs to run, this in the master config will execute the state.over runner every 60 minutes:

```
schedule:
  overstate:
    function: state.over
    minutes: 60
```

This example for the minion configuration will execute a highstate every 30 minutes:

```
schedule:
  highstate:
    function: state.highstate
    minutes: 30
```

Optional DSL for SLS Formulas

Jack Kuan, our renderer expert, has created something that is astonishing. Salt, now comes with an optional Python based DSL, this is a very powerful interface that makes writing SLS files in pure python easier than it was with the raw py renderer. As usual this can be used with the renderer shebang line, so a single sls can be written with the DSL if pure python power is needed while keeping other sls files simple with YAML.

Set Grains Remotely

A new execution function and state module have been added that allows for grains to be set on the minion. Now grains can be set via a remote execution or via states. Use the grains.present state or the grains.setval execution functions.
Gentoo Additions

Major additions to Gentoo specific components have been made. The encompasses executions modules and states ranging from supporting the make.conf file to tools like layman.

28.2.121 Salt 0.12.1 Release Notes

release 2013-01-21

28.2.122 Salt 0.13.0 Release Notes

release 2013-02-12

The lucky number 13 has turned the corner! From CLI notifications when quitting a salt command, to substantial improvements on Windows, Salt 0.13.0 has arrived!

Major Features

Improved file.recurse Performance

The file.recurse system has been deployed and used in a vast array of situations. Fixes to the file state and module have led towards opening up new ways of running file.recurse to make it faster. Now the file.recurse state will download fewer files and will run substantially faster.

Windows Improvements

Minion stability on Windows has improved. Many file operations, including file.recurse, have been fixed and improved. The network module works better, to include network.interfaces. Both 32bit and 64bit installers are now available.

Nodegroup Targeting in Peer System

In the past, nodegroups were not available for targeting via the peer system. This has been fixed, allowing the new nodegroup expr_form argument for the publish.publish function:

salt-call publish.publish group1 test.ping expr_form=nodegroup

Blacklist Additions

Additions allowing more granular blacklisting are available in 0.13.0. The ability to blacklist users and functions in client_acl have been added, as well as the ability to exclude state formulas from the command line.
Salt Documentation, Release 3002.2

Command Line Pillar Embedding
Pillar data can now be embedded on the command line when calling state.sls and state.highstate. This
allows for on the fly changes or settings to pillar and makes parameterizing state formulas even easier. This is done
via the keyword argument:
salt '*' state.highstate pillar='{"cheese": "spam"}'

The above example will extend the existing pillar to hold the cheese key with a value of spam. If the cheese key
is already specified in the minion's pillar then it will be overwritten.
CLI Notifications
In the past hitting ctrl-C and quitting from the salt command would just drop to a shell prompt, this caused
confusion with users who expected the remote executions to also quit. Now a message is displayed showing what
command can be used to track the execution and what the job id is for the execution.
Version Specification in Multiple-Package States
Versions can now be specified within multiple-package pkg.installed states. An example can be found below:
mypkgs:
pkg.installed:
- pkgs:
- foo
- bar: 1.2.3-4
- baz

Noteworthy Changes
The configuration subsystem in Salt has been overhauled to make the opts dict used by Salt applications more
portable, the problem is that this is an incompatible change with salt-cloud, and salt-cloud will need to be updated
to the latest git to work with Salt 0.13.0. Salt Cloud 0.8.5 will also require Salt 0.13.0 or later to function.
The SaltStack team is sorry for the inconvenience here, we work hard to make sure these sorts of things do not
happen, but sometimes hard changes get in.

28.2.123 Salt 0.13.1 Release Notes
release 2013-02-15

28.2. Previous Releases

5647


Salt 0.14.0 is here! This release was held up primarily by PyCon, Scale, and illness, but has arrived! 0.14.0 comes with many new features and is breaking ground for Salt in the area of cloud management with the introduction of Salt providing basic cloud controller functionality.

**Major Features**

**Salt - As a Cloud Controller**

This is the first primitive inroad to using Salt as a cloud controller is available in 0.14.0. Be advised that this is alpha, only tested in a few very small environments.

The cloud controller is built using kvm and libvirt for the hypervisors. Hypervisors are autodetected as minions and only need to have libvirt running and kvm installed to function. The features of the Salt cloud controller are as follows:

- Basic vm discovery and reporting
- Creation of new virtual machines
- Seeding virtual machines with Salt via qemu-nbd or libguestfs
- Live migration (shared and non shared storage)
- Delete existing VMs

It is noteworthy that this feature is still Alpha, meaning that all rights are reserved to change the interface if needs be in future releases!

**Libvirt State**

One of the problems with libvirt is management of certificates needed for live migration and cross communication between hypervisors. The new libvirt state makes the Salt Master hold a CA and manage the signing and distribution of keys onto hypervisors, just add a call to the libvirt state in the sls formulas used to set up a hypervisor:

```
libvirt_keys:
  libvirt.keys
```
New get Functions

An easier way to manage data has been introduced. The pillar, grains, and config execution modules have been extended with the new `get` function. This function works much in the same way as the get method in a python dict, but with an enhancement, nested dict components can be extracted using a : delimiter.

If a structure like this is in pillar:

```yaml
foo:
  bar:
    baz: quo
```

Extracting it from the raw pillar in an sls formula or file template is done this way:

```python
{{ pillar['foo']['bar']['baz'] }}
```

Now with the new get function the data can be safely gathered and a default can be set allowing the template to fall back if the value is not available:

```python
{{ salt['pillar.get']('foo:bar:baz', 'qux') }}
```

This makes handling nested structures much easier, and defaults can be cleanly set. This new function is being used extensively in the new formulae repository of salt sls formulas.

28.2.127 Salt 0.14.1 Release Notes

release 2013-04-13

28.2.128 Salt 0.15.0 Release Notes

release 2013-05-03

The many new features of Salt 0.15.0 have arrived! Salt 0.15.0 comes with many smaller features and a few larger ones.

These features range from better debugging tools to the new Salt Mine system.

Major Features

The Salt Mine

First there was the peer system, allowing for commands to be executed from a minion to other minions to gather data live. Then there was the external job cache for storing and accessing long term data. Now the middle ground is being filled in with the Salt Mine. The Salt Mine is a system used to execute functions on a regular basis on minions and then store only the most recent data from the functions on the master, then the data is looked up via targets.

The mine caches data that is public to all minions, so when a minion posts data to the mine all other minions can see it.
IPV6 Support

0.13.0 saw the addition of initial IPV6 support but errors were encountered and it needed to be stripped out. This time the code covers more cases and must be explicitly enabled. But the support is much more extensive than before.

Copy Files From Minions to the Master

Minions have long been able to copy files down from the master file server, but until now files could not be easily copied from the minion up to the master.

A new function called `cp.push` can push files from the minions up to the master server. The uploaded files are then cached on the master in the master cachedir for each minion.

Better Template Debugging

Template errors have long been a burden when writing states and pillar. 0.15.0 will now send the compiled template data to the debug log, this makes tracking down the intermittent stage templates much easier. So running `state.sls` or `state.highstate` with `-l debug` will now print out the rendered templates in the debug information.

State Event Firing

The state system is now more closely tied to the master's event bus. Now when a state fails the failure will be fired on the master event bus so that the reactor can respond to it.

Major Syndic Updates

The Syndic system has been basically re-written. Now it runs in a completely asynchronous way and functions primarily as an event broker. This means that the events fired on the syndic are now pushed up to the higher level master instead of the old method used which waited for the client libraries to return.

This makes the syndic much more accurate and powerful, it also means that all events fired on the syndic master make it up the pipe as well making a reactor on the higher level master able to react to minions further downstream.

Peer System Updates

The Peer System has been updated to run using the client libraries instead of firing directly over the publish bus. This makes the peer system much more consistent and reliable.

Minion Key Revocation

In the past when a minion was decommissioned the key needed to be manually deleted on the master, but now a function on the minion can be used to revoke the calling minion's key:

```
$ salt-call saltutil.revoke_auth
```
Function Return Codes

Functions can now be assigned numeric return codes to determine if the function executed successfully. While not all functions have been given return codes, many have and it is an ongoing effort to fill out all functions that might return a non-zero return code.

Functions in Overstate

The overstate system was originally created to just manage the execution of states, but with the addition of return codes to functions, requisite logic can now be used with respect to the overstate. This means that an overstate stage can now run single functions instead of just state executions.

Pillar Error Reporting

Previously if errors surfaced in pillar, then the pillar would consist of only an empty dict. Now all data that was successfully rendered stays in pillar and the render error is also made available. If errors are found in the pillar, states will refuse to run.

Using Cached State Data

Sometimes states are executed purely to maintain a specific state rather than to update states with new configs. This is grounds for the new cached state system. By adding `cache=True` to a state call the state will not be generated fresh from the master but the last state data to be generated will be used. If no previous state data is available then fresh data will be generated.

Monitoring States

The new monitoring states system has been started. This is very young but allows for states to be used to configure monitoring routines. So far only one monitoring state is available, the `disk.status` state. As more capabilities are added to Salt UI the monitoring capabilities of Salt will continue to be expanded.

28.2.129 Salt 0.15.1 Release Notes

The 0.15.1 release has been posted, this release includes fixes to a number of bugs in 0.15.1 and a three security patches.

Security Updates

A number of security issues have been resolved via the 0.15.1 release.
Path Injection in Minion IDs

Salt masters did not properly validate the id of a connecting minion. This can lead to an attacker uploading files to the master in arbitrary locations. In particular this can be used to bypass the manual validation of new unknown minions. Exploiting this vulnerability does not require authentication.

This issue affects all known versions of Salt.

This issue was reported by Ronald Volgers.

Patch

The issue is fixed in Salt 0.15.1. Updated packages are available in the usual locations.

Specific commits:
https://github.com/saltstack/salt/commit/5427b9438e452a5a8910d9128c6aa6b45d8fd5d3
https://github.com/saltstack/salt/commit/7560908ee62351769c3c4d03d74c1ca772cc52
https://github.com/saltstack/salt/commit/e200b8a7ff53780124e08d2bdefde7587e52bfc

RSA Key Generation Fault

RSA key generation was done incorrectly, leading to very insecure keys. It is recommended to regenerate all RSA keys.

This issue can be used to impersonate Salt masters or minions, or decrypt any transferred data.

This issue can only be exploited by attackers who are able to observe or modify traffic between Salt minions and the legitimate Salt master.

A tool was included in 0.15.1 to assist in mass key regeneration, the manage.regen_keys runner.

This issue affects all known versions of Salt.

This issue was reported by Ronald Volgers.

Patch

The issue is fixed in Salt 0.15.1. Updated packages are available in the usual locations.

Specific commits:
https://github.com/saltstack/salt/commit/5dd304276ba5745ec21fc1e6686a0b28da29e6fc

Command Injection Via ext_pillar

Arbitrary shell commands could be executed on the master by an authenticated minion through options passed when requesting a pillar.

Ext pillar options have been restricted to only allow safe external pillars to be called when prompted by the minion.

This issue affects Salt versions from 0.14.0 to 0.15.0.

This issue was reported by Ronald Volgers.
**Patch**

The issue is fixed in Salt 0.15.1. Updated packages are available in the usual locations.

Specific commits:

https://github.com/saltstack/salt/commit/43d8c16bd26159d827d1a945c83ac28159ec5865

### 28.2.130 Salt 0.15.2 Release Notes

**release** 2013-05-29

### 28.2.131 Salt 0.15.3 Release Notes

**release** 2013-06-01

### 28.2.132 Salt 0.16.0 Release Notes

**release** 2013-07-01

The 0.16.0 release is an exciting one, with new features in master redundancy, and a new, powerful requisite.

**Major Features**

**Multi-Master**

This new capability allows for a minion to be actively connected to multiple salt masters at the same time. This allows for multiple masters to send out commands to minions and for minions to automatically reconnect to masters that have gone down. A tutorial is available to help get started here:

*Multi Master Tutorial*

**Prreq, the New Requisite**

The new *prreq* requisite is very powerful! It allows for states to execute based on a state that is expected to make changes in the future. This allows for a change on the system to be preempted by another execution. A good example is needing to shut down a service before modifying files associated with it, allowing, for instance, a webserver to be shut down allowing a load balancer to stop sending requests while server side code is updated. In this case, the prereq will only run if changes are expected to happen in the prerequired state, and the prerequired state will always run after the prereq state and only if the prereq state succeeds.
Peer System Improvements

The peer system has been revamped to make it more reliable, faster, and like the rest of Salt, async. The peer calls when an updated minion and master are used together will be much faster!

Relative Includes

The ability to include an sls relative to the defined sls has been added, the new syntax is documented here:

Includes

More State Output Options

The state_output option in the past only supported full and terse, 0.16.0 add the mixed and changes modes further refining how states are sent to users' eyes.

Improved Windows Support

Support for Salt on Windows continues to improve. Software management on Windows has become more seamless with Linux/UNIX/BSD software management. Installed software is now recognized by the short names defined in the repository SLS. This makes it possible to run salt '*' pkg.version firefox and get back results from Windows and non-Windows minions alike.

When templating files on Windows, Salt will now correctly use Windows appropriate line endings. This makes it much easier to edit and consume files on Windows.

When using the cmd state the shell option now allows for specifying Windows Powershell as an alternate shell to execute cmd.run and cmd.script. This opens up Salt to all the power of Windows Powershell and its advanced Windows management capabilities.

Several fixes and optimizations were added for the Windows networking modules, especially when working with IPv6.

A system module was added that makes it easy to restart and shutdown Windows minions.

The Salt Minion will now look for its config file in c:\salt\conf by default. This means that it's no longer necessary to specify the -c option to specify the location of the config file when starting the Salt Minion on Windows in a terminal.

Multiple Targets for pkg.removed, pkg.purged States

Both pkg.removed and pkg.purged now support the pkgs argument, which allow for multiple packages to be targeted in a single state. This, as in pkg.installed, helps speed up these states by reducing the number of times that the package management tools (apt, yum, etc.) need to be run.
Random Times in Cron States

The temporal parameters in `cron.present` states (minute, hour, etc.) can now be randomized by using `random` instead of a specific value. For example, by using the `random` keyword in the `minute` parameter of a cron state, the same cron job can be pushed to hundreds or thousands of hosts, and they would each use a randomly-generated minute. This can be helpful when the cron job accesses a network resource, and it is not desirable for all hosts to run the job concurrently.

```
/path/to/cron/script:
  cron.present:
    - user: root
    - minute: random
    - hour: 2
```

Since Salt assumes a value of `*` for unspecified temporal parameters, adding a parameter to the state and setting it to `random` will change that value from `*` to a randomized numeric value. However, if that field in the cron entry on the minion already contains a numeric value, then using the `random` keyword will not modify it.

Confirmation Prompt on Key Acceptance

When accepting new keys with `salt-key -a minion-id` or `salt-key -A`, there is now a prompt that will show the affected keys and ask for confirmation before proceeding. This prompt can be bypassed using the `-y` or `--yes` command line argument, as with other `salt-key` commands.

Support for Setting Password Hashes on BSD Minions

FreeBSD, NetBSD, and OpenBSD all now support setting passwords in `user.present` states.

28.2.133 Salt 0.16.1 Release Notes

`release` 2013-07-29

28.2.134 Salt 0.16.2 Release Notes

`release` 2013-08-01

Version 0.16.2 is a bugfix release for 0.16.0, and contains a number of fixes.

Windows

- Only allow Administrator’s group and SYSTEM user access to C:salt. This eliminates a race condition where a non-admin user could modify a template or managed file before it is executed by the minion (which is running as an elevated user), thus avoiding a potential escalation of privileges. (issue #6361)
Grains

- Fixed detection of virtual grain on OpenVZ hardware nodes
- Gracefully handle lsb_release data when it is enclosed in quotes
- LSB grains are now prefixed with `lsb_distrib_` instead of simply `lsb_`. The old naming is not preserved, so SLS may be affected.
- Improved grains detection on MacOS

Pillar

- Don’t try to load `git_pillar` if not enabled in master config (issue #6052)
- Functions `pillar.item` and `pillar.items` added for parity with `grains.item/grains.items`. The old function `pillar.data` is preserved for backwards compatibility.
- Fixed minion traceback when Pillar SLS is malformed (issue #5910)

Peer Publishing

- More gracefully handle improperly quoted publish commands (issue #5958)
- Fixed traceback when timeout specified via the CLI for `publish.publish, publish.full_data` (issue #5959)
- Fixed unintended change in output of `publish.publish` (issue #5928)

Minion

- Fixed salt-key usage in minionswarm script
- Quieted warning about `SALT_MINION_CONFIG` environment variable on minion startup and for CLI commands run via `salt-call` (issue #5956)
- Added minion config parameter `random_reauth_delay` to stagger re-auth attempts when the minion is waiting for the master to approve its public key. This helps prevent SYN flooding in larger environments.

User/Group Management

- Implement previously-ignored `unique` option for `user.present` states in FreeBSD
- Report in state output when a `group.present` state attempts to use a gid in use by another group
- Fixed regression that prevents a `user.present` state to set the password hash to the system default (i.e. an unset password)
- Fixed multiple `group.present` states with the same group (issue #6439)
**File Management**

- Fixed file.mkdir setting incorrect permissions ([issue #6033](#))
- Fixed cleanup of source files for templates when `/tmp` is in file_roots ([issue #6118](#))
- Fixed caching of zero-byte files when a non-empty file was previously cached at the same path
- Added HTTP authentication support to the cp module ([issue #5641](#))
- Diffs are now suppressed when binary files are changed

**Package/Repository Management**

- Fixed traceback when there is only one target for `pkg.latest` states
- Fixed regression in detection of virtual packages (apt)
- Limit number of pkg database refreshes to once per `state.sls/state.highstate`
- YUM: Allow 32-bit packages with arches other than i686 to be managed on 64-bit systems ([issue #6299](#))
- Fixed incorrect reporting in pkgrepo.managed states ([issue #5517](#))
- Fixed 32-bit binary package installs on 64-bit RHEL-based distros, and added proper support for 32-bit packages on 64-bit Debian-based distros ([issue #6303](#))
- Fixed issue where requisites were inadvertently being put into YUM repo files ([issue #6471](#))

**Service Management**

- Fixed inaccurate reporting of results in `service.running` states when the service fails to start ([issue #5894](#))
- Fixed handling of custom initscripts in RHEL-based distros so that they are immediately available, negating the need for a second state run to manage the service that the initscript controls

**Networking**

- Function `network.hwaddr` renamed to `network.hw_addr` to match `network.ip_addrs` and `network.ip_addrs6`. All three functions also now work without the underscore in the name, as well.
- Fixed traceback in `bridge.show` when interface is not present ([issue #6326](#))

**SSH**

- Fixed incorrect result reporting for some `ssh_known_hosts.present` states
- Fixed inaccurate reporting when `ssh_auth.present` states are run with `test=True`, when rsa/dss is used for the `enc` param instead of ssh-rsa/ssh-dss ([issue #5374](#))
pip

- Properly handle -f lines in pip freeze output
- Fixed regression in pip.installed states with specifying a requirements file (issue #6003)
- Fixed use of editable argument in pip.installed states (issue #6025)
- Deprecated runas parameter in execution function calls, in favor of user

MySQL

- Allow specification of MySQL connection arguments via the CLI, overriding/bypassing minion config params
- Allow mysql_user.present states to set a passwordless login (issue #5550)
- Fixed endless loop when mysql.processlist is run (issue #6297)

PostgreSQL

- Fixed traceback in postgres.user_list (issue #6352)

Miscellaneous

- Don’t allow npm states to be used if npm module is not available
- Fixed alternatives.install states for which the target is a symlink (issue #6162)
- Fixed traceback in sysbench module (issue #6175)
- Fixed traceback in job cache
- Fixed tempfile cleanup for windows
- Fixed issue where SLS files using the pydsl renderer were not being run
- Fixed issue where returners were being passed incorrect information (issue #5518)
- Fixed traceback when numeric args are passed to cmd.script states
- Fixed bug causing cp.get_dir to return more directories than expected (issue #6048)
- Fixed traceback when supervisord.running states are run with test=True (issue #6053)
- Fixed tracebacks when Salt encounters problems running rbenv (issue #5888)
- Only make the monit module available if monit binary is present (issue #5871)
- Fixed incorrect behavior of img.mount_image
- Fixed traceback in tomcat.deploy_war in Windows
- Don’t re-write /etc/fstab if mount fails
- Fixed tracebacks when Salt encounters problems running gem (issue #5886)
- Fixed incorrect behavior of selinux boolean states (issue #5912)
- RabbitMQ: Quote passwords to avoid symbols being interpolated by the shell (issue #6338)
- Fixed tracebacks in extfs.mkfs and extfs.tune (issue #6462)
- Fixed a regression with the module.run state where the m_name and m_fun arguments were being ignored (issue #6464)
28.2.135 Salt 0.16.3 Release Notes

release 2013-08-09

Version 0.16.3 is another bugfix release for 0.16.0. The changes include:

- Various documentation fixes
- Fix proc directory regression (issue #6502)
- Properly detect Linaro Linux (issue #6496)
- Fix regressions in `mount.mounted` (issue #6522, issue #6545)
- Skip malformed state requisites (issue #6521)
- Fix regression in gitfs from bad import
- Fix for watching prereq states (including recursive requisite error) (issue #6057)
- Fix mod_watch not overriding prereq (issue #6520)
- Don't allow functions which compile states to be called within states (issue #5623)
- Return error for malformed top.sls (issue #6544)
- Fix traceback in `mysql.query`
- Fix regression in binary package installation for 64-bit packages on Debian-based Linux distros (issue #6563)
- Fix traceback caused by running `cp.push` without having set `file_recv` in the master config file
- Fix scheduler configuration in pillar (issue #6201)

28.2.136 Salt 0.16.4 Release Notes

release 2013-09-07

Version 0.16.4 is another bugfix release for 0.16.0, likely to be the last before 0.17.0 is released. The changes include:

- Multiple documentation improvements/additions
- Added the `osfinger` and `osarch` grains
- Properly handle 32-bit packages for `debian32` on `x86_64` (issue #6607)
- Fix regression in yum package installation in CentOS 5 (issue #6677)
- Fix bug in `hg.latest` state that would erroneously delete directories (issue #6661)
- Fix bug related to pid not existing for `ps.top` (issue #6679)
- Fix regression in MySQL returner (issue #6695)
- Fix IP addresses grains (`ipv4` and `ipv6`) to include all addresses (issue #6656)
- Fix regression preventing authenticated FTP (issue #6733)
- Fix setting password for windows users (issue #6824)
- Fix `file.contains` on values YAML parses as non-string (issue #6817)
- Fix `file.get_gid`, `file.get_uid`, and `file.chown` for broken symlinks (issue #6826)
- Fix comment for service reloads in service state (issue #6851)

28.2. Previous Releases
The 0.17.0 release is a very exciting release of Salt, this brings to Salt some very powerful new features and advances. The advances range from the state system to the test suite, covering new transport capabilities and making states easier and more powerful, to extending Salt Virt and much more!

The 0.17.0 release will also be the last release of Salt to follow the old 0.XX.X numbering system, the next release of Salt will change the numbering to be date based following this format:

<Year>.<Month>.<Minor>

So if the release happens in November of 2013 the number will be 13.11.0, the first bugfix release will be 13.11.1 and so forth.

### Major Features

#### Halite

The new Halite web GUI is now available on PyPI. A great deal of work has been put into Halite to make it fully event driven and amazingly fast. The Halite UI can be started from within the Salt Master (after being installed from PyPI), or standalone, and does not require an external database to run. It is very lightweight!

This initial release of Halite is primarily the framework for the UI and the communication systems, making it easy to extend and build the UI up. It presently supports watching the event bus and firing commands over Salt.

At this time, Halite is not available as a package, but installation documentation is available at: [http://docs.saltstack.com/topics/tutorials/halite.html](http://docs.saltstack.com/topics/tutorials/halite.html)

Halite is, like the rest of Salt, Open Source!

Much more will be coming in the future of Halite!

#### Salt SSH

The new `salt-ssh` command has been added to Salt. This system allows for remote execution and states to be run over ssh. The benefit here being, that salt can run relying only on the ssh agent, rather than requiring a minion to be deployed.

The `salt-ssh` system runs states in a compatible way as Salt and states created and run with salt-ssh can be moved over to a standard salt deployment without modification.

Since this is the initial release of salt-ssh, there is plenty of room for improvement, but it is fully operational, not just a bootstrap tool.

#### Rosters

Salt is designed to have the minions be aware of the master and the master does not need to be aware of the location of the minions. The new salt roster system was created and designed to facilitate listing the targets for salt-ssh.

The roster system, like most of Salt, is a plugin system, allowing for the list of systems to target to be derived from any pluggable backend. The rosters shipping with 0.17.0 are flat and scan. Flat is a file which is read in via the salt render system and the scan roster does simple network scanning to discover ssh servers.
State Auto Order

This is a major change in how states are evaluated in Salt. State Auto Order is a new feature that makes states get evaluated and executed in the order in which they are defined in the sls file. This feature makes it very easy to see the finite order in which things will be executed, making Salt now, fully imperative AND fully declarative.

The requisite system still takes precedence over the order in which states are defined, so no existing states should break with this change. But this new feature can be turned off by setting `state_auto_order: False` in the master config, thus reverting to the old lexicographical order.

state.sls Runner

The `state.sls` runner has been created to allow for a more powerful system for orchestrating state runs and function calls across the salt minions. This new system uses the state system for organizing executions.

This allows for states to be defined that are executed on the master to call states on minions via `salt-run state.sls`.

Salt Thin

Salt Thin is an exciting new component of Salt, this is the ability to execute Salt routines without any transport mechanisms installed, it is a pure python subset of Salt.

Salt Thin does not have any networking capability, but can be dropped into any system with Python installed and then `salt-call` can be called directly. The Salt Thin system, is used by the `salt-ssh` command, but can still be used to just drop salt somewhere for easy use.

Event Namespacing

Events have been updated to be much more flexible. The tags in events have all been namespaced allowing easier tracking of event names.

Mercurial Fileserver Backend

The popular git fileserver backend has been joined by the mercurial fileserver backend, allowing the state tree to be managed entirely via mercurial.

External Logging Handlers

The external logging handler system allows for Salt to directly hook into any external logging system. Currently supported are sentry and logstash.
Jenkins Testing

The testing systems in Salt have been greatly enhanced, tests for salt are now executed, via jenkins.saltstack.com, across many supported platforms. Jenkins calls out to salt-cloud to create virtual machines on Rackspace, then the minion on the virtual machine checks into the master running on Jenkins where a state run is executed that sets up the minion to run tests and executes the test suite.

This now automates the sequence of running platform tests and allows for continuous destructive tests to be run.

Salt Testing Project

The testing libraries for salt have been moved out of the main salt code base and into a standalone codebase. This has been done to ease the use of the testing systems being used in salt based projects other than Salt itself.

StormPath External Authentication

The external auth system now supports the fantastic Stormpath cloud based authentication system.

LXC Support

Extensive additions have been added to Salt for LXC support. This included the backend libs for managing LXC containers. Addition into the salt-virt system is still in the works.

macOS User/Group Support

Salt is now able to manage users and groups on Minions running macOS. However, at this time user passwords cannot be managed.

Django ORM External Pillar

Pillar data can now be derived from Django managed databases.

Fixes from RC to release

- Multiple documentation fixes
- Add multiple source files + templating for file.append (issue #6905)
- Support sysctl configuration files in systemd>=207 (issue #7351)
- Add file.search and file.replace
- Fix cross-calling execution functions in provider overrides
- Fix locale override for postgres (issue #4543)
- Fix Raspbian identification for service/pkg support (issue #7371)
- Fix cp.push file corruption (issue #6495)
- Fix ALT Linux password hash specification (issue #3474)
- Multiple salt-ssh-related fixes and improvements
The 0.17.1 release comes with a number of improvements to salt-ssh, many bugfixes, and a number of security updates.

Salt SSH has been improved to be faster, more featureful and more secure. Since the original release of Salt SSH was primarily a proof of concept, it has been very exciting to see its rapid adoption. We appreciate the willingness of security experts to review Salt SSH and help discover oversights and ensure that security issues only exist for such a tiny window of time.

**SSH Enhancements**

**Shell Improvements**

Improvements to Salt SSH’s communication have been added that improve routine execution regardless of the target system’s login shell.

**Performance**

Deployment of routines is now faster and takes fewer commands to execute.

**Security Updates**

Be advised that these security issues all apply to a small subset of Salt users and mostly apply to Salt SSH.

**Insufficient Argument Validation**

This issue allowed for a user with limited privileges to embed executions inside of routines to execute routines that should be restricted. This applies to users using external auth or client ACL and opening up specific routines.

Be advised that these patches address the direct issue. Additional commits have been applied to help mitigate this issue from resurfacing.

**CVE**

CVE-2013-4435
Affected Versions

0.15.0 - 0.17.0

MITM SSH attack in salt-ssh

SSH host keys were being accepted by default and not enforced on future SSH connections. These patches set SSH host key checking by default and can be overridden by passing the -i flag to salt-ssh.

CVE

CVE-2013-4436

Affected Versions

0.17.0

Insecure Usage of /tmp in salt-ssh

The initial release of salt-ssh used the /tmp directory in an insecure way. These patches not only secure usage of files under /tmp in salt-ssh, but also add checksum validation for all packages sent into the now secure locations on target systems.

YAML Calling Unsafe Loading Routine

It has been argued that this is not a valid security issue, as the YAML loading that was happening was only being called after an initial gateway filter in Salt has already safely loaded the YAML and would fail if non-safe routines were embedded. Nonetheless, the CVE was filed and patches applied.

**Failure to Drop Supplementary Group on Salt Master**

If a salt master was started as a non-root user by the root user, root’s groups would still be applied to the running process. This fix changes the process to have only the groups of the running user.

**CVE**

CVE not considered necessary by submitter.

**Affected Versions**

0.11.0 - 0.17.0

Fix Reference

Version 0.17.1 is the first bugfix release for 0.17.0. The changes include:

- Fix symbolic links in thin.tgz (issue #7482)
- Pass env through to file.patch state (issue #7452)
- Service provider fixes and reporting improvements (issue #7361)
- Add --pr iv option for specifying salt-ssh private key
- Fix salt-thin’s salt-call on setuptools installations (issue #7516)
- Fix salt-ssh to support passwords with spaces (issue #7480)
- Fix regression in wildcard includes (issue #7455)
- Fix salt-call outputter regression (issue #7456)
- Fix custom returner support for startup states (issue #7540)
- Fix value handling in augeas (issue #7605)
- Fix regression in apt (issue #7624)
- Fix minion ID guessing to use socket.getfqdn() first (issue #7558)
- Add minion ID caching (issue #7558)
- Fix salt-key race condition (issue #7304)
- Add --include-all flag to salt-key (issue #7399)
- Fix custom grains in pillar (part of issue #5716, issue #6083)
- Fix race condition in salt-key (issue #7304)
- Fix regression in minion ID guessing, prioritize socket.getfqdn() (issue #7558)
- Cache minion ID on first guess (issue #7558)
- Allow trailing slash in file.directory state
- Fix reporting of file_roots in pillar return (issue #5449 and issue #5951)
- Remove pillar matching for mine.get (issue #7197)
- Sanitize args for multiple execution modules
- Fix yumpkg mod_repo functions to filter hidden args (issue #7656)
- Fix conflicting IDs in state includes (issue #7526)
- Fix mysql_grants.absent string formatting issue (issue #7827)
- Fix postgres.version so it won’t return None (issue #7695)
- Fix for trailing slashes in mount.mounted state
- Fix rogue AttributErrors in the outputter system (issue #7845)
- Fix for incorrect ssh key encodings resulting in incorrect key added (issue #7718)
• Fix for pillar/grains naming regression in python renderer (issue #7693)
• Fix args/kwvars handling in the scheduler (issue #7422)
• Fix logfile handling for file://, tcp://, and udp:// (issue #7754)
• Fix error handling in config file parsing (issue #6714)
• Fix RVM using sudo when running as non-root user (issue #2193)
• Fix client ACL and underlying logging bugs (issue #7706)
• Fix scheduler bug with returner (issue #7367)
• Fix user management bug related to default groups (issue #7690)
• Fix various salt-ssh bugs (issue #7528)
• Many various documentation fixes

28.2.139 Salt 0.17.2 Release Notes

release 2013-11-14

Version 0.17.2 is another bugfix release for 0.17.0. The changes include:
• Add ability to delete key with grains.delval (issue #7872)
• Fix possible state compiler stack trace (issue #5767)
• Fix architecture regression in yumpkg (issue #7813)
• Use correct ps on Debian to prevent truncating (issue #5646)
• Fix grains targeting for new grains (issue #5737)
• Fix bug with merging in git_pillar (issue #6992)
• Fix print_jobs duplicate results
• Fix apt version specification for pkg.install
• Fix possible KeyError from ext_job_cache missing option
• Fix auto_order for - names states (issue #7649)
• Fix regression in new gitfs installs (directory not found error)
• Fix escape pipe issue on Windows for file.recurse (issue #7967)
• Fix fileclient in case of master restart (issue #7987)
• Try to output warning if CLI command malformed (issue #6538)
• Fix --out=quiet to actually be quiet (issue #8000)
• Fix for state.sls in salt-ssh (issue #7991)
• Fix for MySQL grants ordering issue (issue #5817)
• Fix traceback for certain missing CLI args (issue #8016)
• Add ability to disable lspci queries on master (issue #4906)
• Fail if sls defined in topfile does not exist (issue #5998)
• Add ability to downgrade MySQL grants (issue #6606)
• Fix ssh_auth.absent traceback (issue #8043)
- Add upstart detection for Debian/Raspbian (issue #8039)
- Fix ID-related issues (issue #8052, issue #8050, and others)
- Fix for jinja rendering issues (issue #8066 and issue #8079)
- Fix argument parsing in salt-ssh (issue #7928)
- Fix some GPU detection instances (issue #6945)
- Fix bug preventing includes from other environments in SLS files
- Fix for kwargs with dashes (issue #8102)
- Fix salt.utils.which for windows '.exe' (issue #7904)
- Fix apache.adduser without apachectl (issue #8123)
- Fix issue with evaluating test kwarg in states (issue #7788)
- Fix regression in salt.client.Caller() (issue #8078)
- Fix apt-key silent failure
- Fix bug where cmd.script would try to run even if caching failed (issue #7601)
- Fix apt pkg.latest regression (issue #8067)
- Fix for mine data not being updated (issue #8144)
- Fix for noarch packages in yum
- Fix a Xen detection edge case (issue #7839)
- Fix windows __opts__ dictionary persistence (issue #7714)
- Fix version generation for when it's part of another git repo (issue #8090)
- Fix _handle_iorder stacktrace so that the real syntax error is shown (issue #8114 and issue #7905)
- Fix git.latest state when a commit SHA is used (issue #8163)
- Fix various small bugs in yumpkg.py (issue #8201)
- Fix for specifying identify file in git.latest (issue #8094)
- Fix for --output-file CLI arg (issue #8205)
- Add ability to specify shutdown time for system.shutdown (issue #7833)
- Fix for salt version using non-salt git repo info (issue #8266)
- Add additional hints at impact of pkgrepo states when test=True (issue #8247)
- Fix for salt-ssh files not being owned by root (issue #8216)
- Fix retry logic and error handling in fileserver (related to issue #7755)
- Fix file.replace with test=True (issue #8279)
- Add flag for limiting file traversal in fileserver (issue #6928)
- Fix for extra mine processes (issue #5729)
- Fix for unloading custom modules (issue #7691)
- Fix for salt-ssh opts (issue #8005 and issue #8271)
- Fix compound matcher for grains (issue #7944)
- Improve error reporting in ebuild module (related to issue #5393)
Salt Documentation, Release 3002.2

- Add `dir_mode` to `file.managed` ([issue #7860](#7860))
- Improve traceroute support for FreeBSD and macOS ([issue #4927](#4927))
- Fix for matching minions under syndics ([issue #7671](#7671))
- Improve exception handling for missing ID ([issue #8259](#8259))
- Fix grain mismatch for ScientificLinux ([issue #8338](#8338))
- Add configuration option for `minion_id_caching`
- Fix open mode auth errors ([issue #8402](#8402))

### 28.2.140 Salt 0.17.3 Release Notes

**release** 2013-12-08

**Note:** 0.17.3 had some regressions which were promptly fixed in the 0.17.4 release. Please use 0.17.4 instead.

Version 0.17.3 is another bugfix release for 0.17.0. The changes include:

- Fix some jinja render errors ([issue #8418](#8418))
- Fix `file.replace` state changing file ownership ([issue #8399](#8399))
- Fix state ordering with the PyDSL renderer ([issue #8446](#8446))
- Fix for new npm version ([issue #8517](#8517))
- Fix for pip state requiring `name` even with requirements file ([issue #8519](#8519))
- Fix yum logging to open terminals ([issue #3855](#3855))
- Add sane maxrunning defaults for scheduler ([issue #8563](#8563))
- Fix states duplicate key detection ([issue #8053](#8053))
- Fix SUSE patch level reporting ([issue #8428](#8428))
- Fix managed file creation umask ([issue #8590](#8590))
- Fix logstash exception ([issue #8635](#8635))
- Improve argument exception handling for salt command ([issue #8016](#8016))
- Fix pecl success reporting ([issue #8750](#8750))
- Fix launchctl module exceptions ([issue #8759](#8759))
- Fix argument order in `pw_user` module
- Add warnings for failing grains ([issue #8690](#8690))
- Fix hgfs problems caused by connections left open ([issue #8811](#8811) and [issue #8810](#8810))
- Add Debian iptables default for `iptables-persistent` package ([issue #8889](#8889))
- Fix installation of packages with dots in pkg name ([issue #8614](#8614))
- Fix noarch package installation on CentOS 6 ([issue #8945](#8945))
- Fix `portage_config.enforce_nice_config` ([issue #8252](#8252))
- Fix `salt.util.copyfile` umask usage ([issue #8590](#8590))
- Fix rescheduling of failed jobs ([issue #8941](#8941))
- Fix pkg on Amazon Linux (uses yumpkg5 now) (issue #8226)
- Fix conflicting options in postgres module (issue #8717)
- Fix ps modules for psutil >= 0.3.0 (issue #7432)
- Fix postgres module to return False on failure (issue #8778)
- Fix argument passing for args with pound signs (issue #8585)
- Fix pid of salt CLI command showing in status.pid output (issue #8720)
- Fix rvm to run gem as the correct user (issue #8951)
- Fix namespace issue in win_file module (issue #9060)
- Fix masterless state paths on windows (issue #9021)
- Fix timeout option in master config (issue #9040)

28.2.141 Salt 0.17.4 Release Notes
release 2013-12-10

Version 0.17.4 is another bugfix release for 0.17.0. The changes include:
- Fix file.replace bug when replacement str is numeric (issue #9101)
- Fix regression in file.managed (issue #9131)
- Prevent traceback when job is None. (issue #9145)

28.2.142 Salt 0.17.5 Release Notes
release 2014-01-27

Version 0.17.5 is another bugfix release for 0.17.0. The changes include:
- Fix user.present states with non-string fullname (issue #9085)
- Fix virt.init return value on failure (issue #6870)
- Fix reporting of file.blockreplace state when test=True
- Fix network.interfaces when used in cron (issue #7990)
- Fix bug in pkgrepo when switching to/from mirrorlist-based repo def (issue #9121)
- Fix infinite recursion when cache file is corrupted
- Add checking for rev and mirror/bare args in git.latest (issue #9107)
- Add cmd.watch alias (points to cmd.wait) (issue #8612)
- Fix stacktrace when prereq is not formed as a list (issue #8235)
- Fix stdin issue with lvdisplay command (issue #9128)
- Add pre-check function for range matcher (issue #9236)
- Add exception handling for psutil for processes that go missing (issue #9274)
- Allow _ in requisites to match both on ID and name (issue #9061)
- Fix multiple client timeout issues (issue #7157 and issue #9302, probably others)
• Fix ZMQError: Operation cannot be accomplished in current state errors (issue #6306)
• Multiple optimization in minion auth routines
• Clarify logs for minion ID caching

28.2.143 Salt 0.6.0 release notes

The Salt remote execution manager has reached initial functionality! Salt is a management application which can be used to execute commands on remote sets of servers.

The whole idea behind Salt is to create a system where a group of servers can be remotely controlled from a single master, not only can commands be executed on remote systems, but salt can also be used to gather information about your server environment.

Unlike similar systems, like Func and MCollective, Salt is extremely simple to setup and use, the entire application is contained in a single package, and the master and minion daemons require no running dependencies in the way that Func requires Certmaster and MCollective requires activeMQ.

Salt also manages authentication and encryption. Rather than using SSL for encryption, salt manages encryption on a payload level, so the data sent across the network is encrypted with fast AES encryption, and authentication uses RSA keys. This means that Salt is fast, secure, and very efficient.

Messaging in Salt is executed with ZeroMQ, so the message passing interface is built into salt and does not require an external ZeroMQ server. This also adds speed to Salt since there is no additional bloat on the networking layer, and ZeroMQ has already proven itself as a very fast networking system.

The remote execution in Salt is "Lazy Execution", in that once the command is sent the requesting network connection is closed. This makes it easier to detach the execution from the calling process on the master, it also means that replies are cached, so that information gathered from historic commands can be queried in the future.

Salt also allows users to make execution modules in Python. Writers of these modules should also be pleased to know that they have access to the impressive information gathered from PuppetLabs' Facter application, making Salt module more flexible. In the future I hope to also allow Salt to group servers based on Facter information as well.

All in all Salt is fast, efficient, and clean, can be used from a simple command line client or through an API, uses message queue technology to make network execution extremely fast, and encryption is handled in a very fast and efficient manner. Salt is also VERY easy to use and VERY easy to extend.

You can find the source code for Salt on my GitHub page, I have also set up a few wiki pages explaining how to use and set up Salt. If you are using Arch Linux there is a package available in the Arch Linux AUR.

GitHub page: https://github.com/saltstack/salt
Wiki: https://github.com/saltstack/salt/wiki
Arch Linux Package: https://aur.archlinux.org/packages/salt-git/

I am very open to contributions, for instance I need packages for more Linux distributions as well as BSD packages and testers.

Give Salt a try, this is the initial release and is not a 1.0 quality release, but it has been working well for me! I am eager to get your feedback!
28.2.144 Salt 0.7.0 release notes

I am pleased to announce the release of Salt 0.7.0!

This release marks what is the first stable release of salt, 0.7.0 should be suitable for general use.

0.7.0 Brings the following new features to Salt:

- Integration with Facter data from puppet labs
- Allow for matching minions from the salt client via Facter information
- Minion job threading, many jobs can be executed from the master at once
- Preview of master clustering support - Still experimental
- Introduce new minion modules for stats, virtualization, service management and more
- Add extensive logging to the master and minion daemons
- Add sys.reload_functions for dynamic function reloading
- Greatly improve authentication
- Introduce the saltkey command for managing public keys
- Begin backend development preparatory to introducing butter
- Addition of man pages for the core commands
- Extended and cleaned configuration

0.7.0 Fixes the following major bugs:

- Fix crash in minions when matching failed
- Fix configuration file lookups for the local client
- Repair communication bugs in encryption
- Numerous fixes in the minion modules

The next release of Salt should see the following features:

- Stabilize the cluster support
- Introduce a remote client for salt command tiers
- salt-ftp system for distributed file copies
- Initial support for “butter”

Coming up next is a higher level management framework for salt called Butter. I want salt to stay as a simple and effective communication framework, and allow for more complicated executions to be managed via Butter.

Right now Butter is being developed to act as a cloud controller using salt as the communication layer, but features like system monitoring and advanced configuration control (a puppet manager) are also in the pipe.

Special thanks to Joseph Hall for the status and network modules, and thanks to Matthias Teege for tracking down some configuration bugs!

Salt can be downloaded from the following locations:

Arch Linux Package:
https://aur.archlinux.org/packages/salt-git/

Please enjoy the latest Salt release!
28.2.145 Salt 0.8.0 release notes

Salt 0.8.0 is ready for general consumption! The source tarball is available on GitHub for download:

A lot of work has gone into salt since the last release just 2 weeks ago, and salt has improved a great deal. A swath
of new features are here along with performance and threading improvements!

The main new features of salt 0.8.0 are:

Salt-cp
Cython minion modules
Dynamic returners
Faster return handling
Lowered required Python version to 2.6
Advanced minion threading
Configurable minion modules

Salt-cp

The salt-cp command introduces the ability to copy simple files via salt to targeted servers. Using salt-cp is very simple, just call salt-cp with a target specification, the source file(s) and where to copy the files on the minions. For instance:

# salt-cp '*' /etc/hosts /etc/hosts

Will copy the local /etc/hosts file to all of the minions.

Salt-cp is very young, in the future more advanced features will be added, and the functionality will much more closely resemble the cp command.

Cython minion modules

Cython is an amazing tool used to compile Python modules down to c. This is arguably the fastest way to run Python code, and since pyzmq requires cython, adding support to salt for cython adds no new dependencies.

Cython minion modules allow minion modules to be written in cython and therefore executed in compiled c. Simply write the salt module in cython and use the file extension ".pyx" and the minion module will be compiled when the minion is started. An example cython module is included in the main distribution called cytest.pyx:

https://github.com/saltstack/salt/blob/master/salt/modules/cytest.pyx

Dynamic Returners

By default salt returns command data back to the salt master, but now salt can return command data to any system.
This is enabled via the new returners modules feature for salt. The returners modules take the return data and sends it to a specific module. The returner modules work like minion modules, so any returner can be added to the minions.

This means that a custom data returner can be added to communicate the return data so anything from MySQL, Redis, MongoDB, and more!

There are 2 simple stock returners in the returners directory:

https://github.com/saltstack/salt/blob/master/salt/returners
The documentation on writing returners will be added to the wiki shortly, and returners can be written in pure Python, or in cython.

**Configurable Minion Modules**

Minion modules may need to be configured, now the options passed to the minion configuration file can be accessed inside of the minion modules via the `__opt__` dict.

Information on how to use this simple addition has been added to the wiki: [Writing modules](https://github.com/saltstack/salt/blob/master/salt/modules/test.py)

The test module has an example of using the `__opts__` dict, and how to set default options:

https://github.com/saltstack/salt/blob/master/salt/modules/test.py

**Advanced Minion Threading**

In 0.7.0 the minion would block after receiving a command from the master, now the minion will spawn a thread or multiprocess. By default Python threads are used because for general use they have proved to be faster, but the minion can now be configured to use the Python multiprocessing module instead. Using multiprocessing will cause executions that are CPU bound or would otherwise exploit the negative aspects of the Python GIL to run faster and more reliably, but simple calls will still be faster with Python threading. The configuration option can be found in the minion configuration file:

https://github.com/saltstack/salt/blob/master/conf/minion

**Lowered Supported Python to 2.6**

The requirement for Python 2.7 has been removed to support Python 2.6. I have received requests to take the minimum Python version back to 2.4, but unfortunately this will not be possible, since the ZeroMQ Python bindings do not support Python 2.4.

Salt 0.8.0 is a very major update, it also changes the network protocol slightly which makes communication with older salt daemons impossible, your master and minions need to be upgraded together!

I could use some help bringing salt to the people! Right now I only have packages for Arch Linux, Fedora 14 and Gentoo. We need packages for Debian and people willing to help test on more platforms. We also need help writing more minion modules and returner modules. If you want to contribute to salt please hop on the mailing list and send in patches, make a fork on GitHub and send in pull requests! If you want to help but are not sure where you can, please email me directly or post to the mailing list!

I hope you enjoy salt, while it is not yet 1.0 salt is completely viable and usable!

- Thomas S. Hatch

### 28.2.146 Salt 0.8.7 release notes

It has been a month since salt 0.8.0, and it has been a long month! But Salt is still coming along strong. 0.8.7 has a lot of changes and a lot of updates. This update makes Salt’s ZeroMQ back end better, strips Facter from the dependencies, and introduces interfaces to handle more capabilities.

Many of the major updates are in the background, but the changes should shine through to the surface. A number of the new features are still a little thin, but the back end to support expansion is in place.

I also recently gave a presentation to the Utah Python users group in Salt Lake City, the slides from this presentation are available here:
The video from this presentation will be available shortly.

The major new features and changes in Salt 0.8.7 are:

- Revamp ZeroMQ topology on the master for better scalability
- State enforcement
- Dynamic state enforcement managers
- Extract the module loader into salt.loader
- Make Job ids more granular
- Replace Facter functionality with the new salt grains interface
- Support for “virtual” salt modules
- Introduce the salt-call command
- Better debugging for minion modules

The new ZeroMQ topology allows for better scalability, this will be required by the need to execute massive file transfers to multiple machines in parallel and state management. The new ZeroMQ topology is available in the aforementioned presentation.

0.8.7 introduces the capability to declare states, this is similar to the capabilities of Puppet. States in salt are declared via state data structures. This system is very young, but the core feature set is available. Salt states work around rendering files which represent Salt high data. More on the Salt state system will be documented in the near future.

The system for loading salt modules has been pulled out of the minion class to be a standalone module, this has enabled more dynamic loading of Salt modules and enables many of the updates in 0.8.7 –

https://github.com/saltstack/salt/blob/master/salt/loader.py

Salt Job ids are now microsecond precise, this was needed to repair a race condition unveiled by the speed improvements in the new ZeroMQ topology.

The new grains interface replaces the functionality of Facter, the idea behind grains differs from Facter in that the grains are only used for static system data, dynamic data needs to be derived from a call to a salt module. This makes grains much faster to use, since the grains data is generated when the minion starts.

Virtual salt modules allows for a salt module to be presented as something other than its module name. The idea here is that based on information from the minion decisions about which module should be presented can be made. The best example is the pacman module. The pacman module will only load on Arch Linux minions, and will be called pkg. Similarly the yum module will be presented as pkg when the minion starts on a Fedora/RedHat system.

The new salt-call command allows for minion modules to be executed from the minion. This means that on the minion a salt module can be executed, this is a great tool for testing Salt modules. The salt-call command can also be used to view the grains data.

In previous releases when a minion module threw an exception very little data was returned to the master. Now the stack trace from the failure is returned making debugging of minion modules MUCH easier.

Salt is nearing the goal of 1.0, where the core feature set and capability is complete!

-Thomas S Hatch
28.2.147 Salt 0.8.8 release notes

Salt 0.8.8 is here! This release adds a great deal of code and some serious new features.

Improved Documentation has been set up for salt using sphinx thanks to the efforts of Seth House. This new documentation system will act as the back end to the salt website which is still under heavy development. The new sphinx documentation system has also been used to greatly clean up the salt manpages. The salt 7 manpage in particular now contains extensive information which was previously only in the wiki. The new documentation can be found at: http://docs.saltstack.com/ We still have a lot to add, and when the domain is set up I will post another announcement.

More additions have been made to the ZeroMQ setup, particularly in the realm of file transfers. Salt 0.8.8 introduces a built in, stateless, encrypted file server which allows salt minions to download files from the salt master using the same encryption system used for all other salt communications. The main motivation for the salt file server has been to facilitate the new salt state system.

Much of the salt code has been cleaned up and a new cleaner logging system has been introduced thanks to the efforts of Pedro Algarvio. These additions will allow for much more flexible logging to be executed by salt, and fixed a great deal of my poor spelling in the salt docstrings! Pedro Algarvio has also cleaned up the API, making it easier to embed salt into another application.

The biggest addition to salt found in 0.8.8 is the new state system. The salt module system has received a new front end which allows salt to be used as a configuration management system. The configuration management system allows for system configuration to be defined in data structures. The configuration management system, or as it is called in salt, the “salt state system” supports many of the features found in other configuration managers, but allows for system states to be written in a far simpler format, executes at blazing speeds, and operates via the salt minion matching system. The state system also operates within the normal scope of salt, and requires no additional configuration to use.

The salt state system can enforce the following states with many more to come: Packages Files Services Executing commands Hosts

The system used to define the salt states is based on a data structure, the data structure used to define the salt states has been made to be as easy to use as possible. The data structure is defined by default using a YAML file rendered via a Jinja template. This means that the state definition language supports all of the data structures that YAML supports, and all of the programming constructs and logic that Jinja supports. If the user does not like YAML or Jinja the states can be defined in yaml-mako, json-jinja, or json-mako. The system used to render the states is completely dynamic, and any rendering system can be added to the capabilities of Salt, this means that a rendering system that renders XML data in a cheetah template, or whatever you can imagine, can be easily added to the capabilities of salt.

The salt state system also supports isolated environments, as well as matching code from several environments to a single salt minion.

The feature base for Salt has grown quite a bit since my last serious documentation push. As we approach 0.9.0 the goals are becoming very clear, and the documentation needs a lot of work. The main goals for 0.9.0 are to further refine the state system, fix any bugs we find, get Salt running on as many platforms as we can, and get the documentation filled out. There is a lot more to come as Salt moves forward to encapsulate a much larger scope, while maintaining supreme usability and simplicity.

If you would like a more complete overview of Salt please watch the Salt presentation: Slides:

- Thomas S Hatch
28.2.148 Salt 0.8.9 Release Notes

Salt 0.8.9 has finally arrived! Unfortunately this is much later than I had hoped to release 0.8.9, life has been very crazy over the last month. But despite challenges, Salt has moved forward!

This release, as expected, adds few new features and many refinements. One of the most exciting aspect of this release is that the development community for salt has grown a great deal and much of the code is from contributors.

Also, I have filled out the documentation a great deal. So information on States is properly documented, and much of the documentation that was out of date has been filled in.

Download!

The Salt source can be downloaded from PyPI:
https://pypi.python.org/packages/source/s/salt/salt-0.8.9.tar.gz

Here’s the md5sum:
7d5aca4633bc22f59045f59e82f43b56

For instructions on how to set up Salt please see the Installation instructions.

New Features

Salt Run

A big feature is the addition of Salt run, the `salt-run` command allows for master side execution modules to be made that gather specific information or execute custom routines from the master.

Documentation for salt-run can be found here

Refined Outputters

One problem often complained about in salt was the fact that the output was so messy. Thanks to help from Jeff Schroeder a cleaner interface for the command output for the Salt CLI has been made. This new interface makes adding new printout formats easy and additions to the capabilities of minion modules makes it possible to set the printout mode or outputter for functions in minion modules.

Cross Calling Salt Modules

Salt modules can now call each other, the `__salt__` dict has been added to the predefined references in minion modules. This new feature is documented in the modules documentation.
Watch Option Added to Salt State System

Now in Salt states you can set the watch option, this will allow watch enabled states to change based on a change in the other defined states. This is similar to subscribe and notify statements in puppet.

Root Dir Option

Travis Cline has added the ability to define the option `root_dir` which allows the salt minion to operate in a subdir. This is a strong move in supporting the minion running as an unprivileged user.

Config Files Defined in Variables

Thanks again to Travis Cline, the master and minion configuration file locations can be defined in environment variables now.

New Modules

Quite a few new modules, states, returners, and runners have been made.

New Minion Modules

`apt`

Support for apt-get has been added, this adds greatly improved Debian and Ubuntu support to Salt!

`useradd` and `groupadd`

Support for manipulating users and groups on Unix-like systems.

`moosefs`

Initial support for reporting on aspects of the distributed file system, MooseFS. For more information on MooseFS please see: [http://www.moosefs.org](http://www.moosefs.org)

Thanks to Joseph Hall for his work on MooseFS support.

`mount`

Manage mounts and the fstab.
puppet

Execute puppet on remote systems.

shadow

Manipulate and manage the user password file.

ssh

Interact with ssh keys.

New States

user and group

Support for managing users and groups in Salt States.

mount

Enforce mounts and the fstab.

New Returners

mongo_return

Send the return information to a MongoDB server.

New Runners

manage

Display minions that are up or down.

28.2.149 Salt 0.9.0 Release Notes

release 2011-08-27

Salt 0.9.0 is here. This is an exciting release, 0.9.0 includes the new network topology features allowing peer salt commands and masters of masters via the syndic interface.

0.9.0 also introduces many more modules, improvements to the API and improvements to the ZeroMQ systems.
Download!

The Salt source can be downloaded from PyPI:
https://pypi.python.org/packages/source/s/salt/salt-0.9.0.tar.gz

Here is the md5sum:
9a925da04981e65a0f237f2e77ddab37

For instructions on how to set up Salt please see the *Installation* instructions.

**New Features**

**Salt Syndic**

The new *Syndic interface* allows a master to be commanded via another higher level salt master. This is a powerful solution allowing a master control structure to exist, allowing salt to scale to much larger levels then before.

**Peer Communication**

0.9.0 introduces the capability for a minion to call a publication on the master and receive the return from another set of minions. This allows salt to act as a communication channel between minions and as a general infrastructure message bus.

Peer communication is turned off by default but can be enabled via the *peer* option in the master configuration file. Documentation on the new *Peer interface*.

**Easily Extensible API**

The minion and master classes have been redesigned to allow for specialized minion and master servers to be easily created. An example on how this is done for the master can be found in the *master.py* salt module:
https://github.com/saltstack/salt/blob/master/salt/master.py

The *Master* class extends the *SMaster* class and set up the main master server.

The minion functions can now also be easily added to another application via the *SMinion* class, this class can be found in the *minion.py* module:
https://github.com/saltstack/salt/blob/master/salt/minion.py

**Cleaner Key Management**

This release changes some of the key naming to allow for multiple master keys to be held based on the type of minion gathering the master key.

The --d option has also been added to the salt-key command allowing for easy removal of accepted public keys.

The --gen-keys option is now available as well for salt-key, this allows for a salt specific RSA key pair to be easily generated from the command line.
Improved 0MQ Master Workers

The 0MQ worker system has been further refined to be faster and more robust. This new system has been able to handle a much larger load than the previous setup. The new system uses the IPC protocol in 0MQ instead of TCP.

New Modules

Quite a few new modules have been made.

New Minion Modules

apache

Work directly with apache servers, great for managing balanced web servers

cron

Read out the contents of a systems crontabs

mdadm

Module to manage raid devices in Linux, appears as the raid module

mysql

Gather simple data from MySQL databases

ps

Extensive utilities for managing processes

publish

Used by the peer interface to allow minions to make publications

28.2.150 Salt 0.9.1 Release Notes

release 2011-08-29
28.2.151 Salt 0.9.2 Release Notes

release 2011-09-17

Salt 0.9.2 has arrived! 0.9.2 is primarily a bugfix release, the exciting component in 0.9.2 is greatly improved support for salt states. All of the salt states interfaces have been more thoroughly tested and the new salt-states git repo is growing with example of how to use states.

This release introduces salt states for early developers and testers to start helping us clean up the states interface and make it ready for the world!

0.9.2 also fixes a number of bugs found on Python 2.6.

Download!

The Salt source can be downloaded from PyPI:
https://pypi.python.org/packages/source/s/salt/salt-0.9.2.tar.gz

For instructions on how to set up Salt please see the Installation instructions.

New Features

Salt-Call Additions

The salt-call command has received an overhaul, it now hooks into the outputter system so command output looks clean, and the logging system has been hooked into salt-call, so the -l option allows the logging output from salt minion functions to be displayed.

The end result is that the salt-call command can execute the state system and return clean output:

```
# salt-call state.highstate
```

State System Fixes

The state system has been tested and better refined. As of this release the state system is ready for early testers to start playing with. If you are interested in working with the state system please check out the (still very small) salt-states GitHub repo:

https://github.com/SS-archive/salt-states

This git repo is the active development branch for determining how a clean salt-state database should look and act. Since the salt state system is still very young a lot of help is still needed here. Please fork the salt-states repo and help us develop a truly large and scalable system for configuration management!
Notable Bug Fixes

Python 2.6 String Formatting

Python 2.6 does not support format strings without an index identifier, all of them have been repaired.

Cython Loading Disabled by Default

Cython loading requires a development tool chain to be installed on the minion, requiring this by default can cause problems for most Salt deployments. If Cython auto loading is desired it will need to be turned on in the minion config.

28.2.152 Salt 0.9.3 Release Notes

release 2011-11-05

Salt 0.9.3 is finally arrived. This is another big step forward for Salt, new features range from proper FreeBSD support to fixing issues seen when attaching a minion to a master over the Internet.

The biggest improvements in 0.9.3 though can be found in the state system, it has progressed from something ready for early testers to a system ready to compete with platforms such as Puppet and Chef. The backbone of the state system has been greatly refined and many new features are available.

Download!

The Salt source can be downloaded from PyPI:
https://pypi.python.org/packages/source/s/salt/salt-0.9.3.tar.gz

For instructions on how to set up Salt please see the Installation instructions.

New Features

WAN Support

Recently more people have been testing Salt minions connecting to Salt Masters over the Internet. It was found that Minions would commonly loose their connection to the master when working over the internet. The minions can now detect if the connection has been lost and reconnect to the master, making WAN connections much more reliable.

State System Fixes

Substantial testing has gone into the state system and it is ready for real world usage. A great deal has been added to the documentation for states and the modules and functions available to states have been cleanly documented.

A number of State System bugs have also been founds and repaired, the output from the state system has also been refined to be extremely clear and concise.

Error reporting has also been introduced, issues found in sls files will now be clearly reported when executing Salt States.
Extend Declaration

The Salt States have also gained the `extend` declaration. This declaration allows for states to be cleanly modified in a post environment. Simply said, if there is an apache.sls file that declares the apache service, then another sls can include apache and then extend it:

```yaml
include:
  - apache
extend:
  apache:
    service:
      - require:
        - pkg: mod_python
  mod_python:
    pkg:
      - installed
```

The notable behavior with the extend functionality is that it literally extends or overwrites a declaration set up in another sls module. This means that Salt will behave as though the modifications were made directly to the apache sls. This ensures that the apache service in this example is directly tied to all requirements.

Highstate Structure Specification

This release comes with a clear specification of the Highstate data structure that is used to declare Salt States. This specification explains everything that can be declared in the Salt SLS modules.

The specification is extremely simple, and illustrates how Salt has been able to fulfill the requirements of a central configuration manager within a simple and easy to understand format and specification.

SheBang Renderer Switch

It came to our attention that having many renderers means that there may be a situation where more than one State Renderer should be available within a single State Tree.

The method chosen to accomplish this was something already familiar to developers and systems administrators, a SheBang. The Python State Renderer displays this new capability.

Python State Renderer

Until now Salt States could only be declared in yaml or json using Jinja or Mako. A new, very powerful, renderer has been added, making it possible to write Salt States in pure Python:

```python
#!py
def run():
    """
    Install the python-mako package
    """
    return {"include": ["python"], "python-mako": {"pkg": ["installed"]}}
```
This renderer is used by making a run function that returns the Highstate data structure. Any capabilities of Python can be used in pure Python sls modules.

This example of a pure Python sls module is the same as this example in yaml:

```yaml
include:
  - python
python-mako:
  pkg:
    - installed
```

**FreeBSD Support**

Additional support has been added for FreeBSD, this is Salt’s first branch out of the Linux world and proves the viability of Salt on non-Linux platforms.

Salt remote execution already worked on FreeBSD, and should work without issue on any Unix-like platform. But this support comes in the form of package management and user support, so Salt States also work on FreeBSD now.

The new freebsd/pkg module provides package management support for FreeBSD and the new `pw_user` and `pw_group` provide user and group management.

**Module and State Additions**

**Cron Support**

Support for managing the system crontab has been added, declaring a cron state can be done easily:

```bash
date > /tmp/datestamp:
  cron:
    - present
    - user: fred
    - minute: 5
    - hour: 3
```

**File State Additions**

The file state has been given a number of new features, primarily the directory, recurse, symlink, and absent functions.

`file.directory` Make sure that a directory exists and has the right permissions.

```bash
/srv/foo:
  file:
    - directory
    - user: root
    - group: root
    - mode: 1755
```

`file.symlink` Make a symlink.

```bash
/var/lib/www:
  file:
    - symlink
```

(continues on next page)
- **target**: /srv/www
- **force**: True

**file.recurse** The recurse state function will recursively download a directory on the master file server and place it on the minion. Any change in the files on the master will be pushed to the minion. The recurse function is very powerful and has been tested by pushing out the full Linux kernel source.

```
[opt/code]:
  file:
    - recurse
    - source: salt://linux
```

**file.absent** Make sure that the file is not on the system, recursively deletes directories, files, and symlinks.

```
/etc/httpd/conf.d/somebogusfile.conf:
  file:
    - absent
```

**Sysctl Module and State**

The sysctl module and state allows for sysctl components in the kernel to be managed easily. The sysctl module contains the following functions:

- **sysctl.show** Return a list of sysctl parameters for this minion
- **sysctl.get** Return a single sysctl parameter for this minion
- **sysctl.assign** Assign a single sysctl parameter for this minion
- **sysctl.persist** Assign and persist a simple sysctl parameter for this minion

The sysctl state allows for sysctl parameters to be assigned:

```
vm.swappiness:
  sysctl:
    - present
    - value: 20
```

**Kernel Module Management**

A module for managing Linux kernel modules has been added. The new functions are as follows:

- **kmod.available** Return a list of all available kernel modules
- **kmod.check_available** Check to see if the specified kernel module is available
- **kmod.lsmod** Return a dict containing information about currently loaded modules
- **kmod.load** Load the specified kernel module
- **kmod.remove** Unload the specified kernel module

The kmod state can enforce modules be either present or absent:

```
kvm_intel:
  kmod:
    - present
```
Ssh Authorized Keys

The ssh_auth state can distribute ssh authorized keys out to minions. Ssh authorized keys can be present or absent.

```
AAAAB3NzaC1kc3MAAACBAL0sQ9fJ5bYTEyYv1RBs3Dd0o49CNfhLWHXQRql6rwL4KIuPrhY7hBw8tV7UNC7J91ZRNO4iGod9C+OQ/xw6NtnQVZMcmZIre5Elrw30KgxCDNomjYFNHu0YaQLBBM0sy0++te1KTAr3A2zGj2xbW09Jhezu8xvSdF8jRu0N5SRXPzSyUc
-75wolBDbVzeTlxWxgxhafj7PSNcdw25Wz9wvc6ko/puwvb3rcLnqK+XCNJlsM/
-7LB8Q26iK5mRZzNsGeGwG7yzyzNMBekGYSRdIcPv5dBJP/1M6fQDEsA==
```

```
ssh_auth:
  - present
  - user: frank
  - enc: dsa
  - comment: 'Frank's key'
```

28.2.153 Salt 0.9.4 Release Notes

```
release 2011-11-27
Salt 0.9.4 has arrived. This is a critical update that repairs a number of key bugs found in 0.9.3. But this update is not without feature additions as well! 0.9.4 adds support for Gentoo portage to the pkg module and state system. Also there are 2 major new state additions, the failhard option and the ability to set up finite state ordering with the order option.
This release also sees our largest increase in community contributions. These contributors have and continue to be the life blood of the Salt project, and the team continues to grow. I want to put out a big thanks to our new and existing contributors.
```

Download!

The Salt source can be downloaded from PyPI:

https://pypi.python.org/packages/source/s/salt/salt-0.9.4.tar.gz

For instructions on how to set up Salt please see the Installation instructions.

New Features

Failhard State Option

Normally, when a state fails Salt continues to execute the remainder of the defined states and will only refuse to execute states that require the failed state.
But the situation may exist, where you would want all state execution to stop if a single state execution fails. The capability to do this is called failing hard.
State Level Failhard

A single state can have a failhard set, this means that if this individual state fails that all state execution will immediately stop. This is a great thing to do if there is a state that sets up a critical config file and setting a require for each state that reads the config would be cumbersome. A good example of this would be setting up a package manager early on:

```
/etc/yum.repos.d/company.repo:
  file:
    - managed
    - source: salt://company/yumrepo.conf
    - user: root
    - group: root
    - mode: 644
    - order: 1
    - failhard: True
```

In this situation, the yum repo is going to be configured before other states, and if it fails to lay down the config file, than no other states will be executed.

Global Failhard

It may be desired to have failhard be applied to every state that is executed, if this is the case, then failhard can be set in the master configuration file. Setting failhard in the master configuration file will result in failing hard when any minion gathering states from the master have a state fail.

This is NOT the default behavior, normally Salt will only fail states that require a failed state.

Using the global failhard is generally not recommended, since it can result in states not being executed or even checked. It can also be confusing to see states failhard if an admin is not actively aware that the failhard has been set.

To use the global failhard set failhard: True in the master configuration

Finite Ordering of State Execution

When creating salt sls files, it is often important to ensure that they run in a specific order. While states will always execute in the same order, that order is not necessarily defined the way you want it.

A few tools exist in Salt to set up the correct state ordering, these tools consist of requisite declarations and order options.

The Order Option

Before using the order option, remember that the majority of state ordering should be done with requisite statements, and that a requisite statement will override an order option.

The order option is used by adding an order number to a state declaration with the option order:

```
vim:
  pkg:
    - installed
    - order: 1
```
By adding the order option to 1 this ensures that the vim package will be installed in tandem with any other state declaration set to the order 1.

Any state declared without an order option will be executed after all states with order options are executed.

But this construct can only handle ordering states from the beginning. Sometimes you may want to send a state to the end of the line, to do this set the order to last:

```
vim:
  pkg:
    - installed
    - order: last
```

Substantial testing has gone into the state system and it is ready for real world usage. A great deal has been added to the documentation for states and the modules and functions available to states have been cleanly documented.

A number of State System bugs have also been founds and repaired, the output from the state system has also been refined to be extremely clear and concise.

Error reporting has also been introduced, issues found in sls files will now be clearly reported when executing Salt States.

**Gentoo Support**

Additional experimental support has been added for Gentoo. This is found in the contribution from Doug Renn, aka nestegg.

**28.2.154 Salt 0.9.5 Release Notes**

release 2012-01-15

Salt 0.9.5 is one of the largest steps forward in the development of Salt.

0.9.5 comes with many milestones, this release has seen the community of developers grow out to an international team of 46 code contributors and has many feature additions, feature enhancements, bug fixes and speed improvements.

**Warning:** Be sure to read the upgrade instructions about the switch to msgpack before upgrading!

**Community**

Nothing has proven to have more value to the development of Salt that the outstanding community that has been growing at such a great pace around Salt. This has proven not only that Salt has great value, but also the expandability of Salt is as exponential as I originally intended.

0.9.5 has received over 600 additional commits since 0.9.4 with a swath of new committers. The following individuals have contributed to the development of 0.9.5:

- Aaron Bull Schaefer
- Antti Kaihola
- Bas Tichelaar
- Brad Barden
This makes 21 new developers since 0.9.4 was released!

To keep up with the growing community follow Salt on Black Duck Open Hub (https://www.openhub.net/p/salt), to join the Salt development community, fork Salt on GitHub, and get coding (https://github.com/saltstack/salt)!

**Major Features**

**SPEED! Pickle to msgpack**

For a few months now we have been talking about moving away from Python pickles for network serialization, but a preferred serialization format had not yet been found. After an extensive performance testing period involving everything from JSON to protocol buffers, a clear winner emerged. Message Pack (https://msgpack.org/) proved to not only be the fastest and most compact, but also the most "salt like". Message Pack is simple, and the code involved is very small. The msgpack library for Python has been added directly to Salt.
This move introduces a few changes to Salt. First off, Salt is no longer a "noarch" package, since the msgpack lib is written in C. Salt 0.9.5 will also have compatibility issues with 0.9.4 with the default configuration.

We have gone through great lengths to avoid backwards compatibility issues with Salt, but changing the serialization medium was going to create issues regardless. Salt 0.9.5 is somewhat backwards compatible with earlier minions. A 0.9.5 master can command older minions, but only if the `serial` config value in the master is set to `pickle`. This will tell the master to publish messages in pickle format and will allow the master to receive messages in both msgpack and pickle formats.

Therefore the suggested methods for upgrading are either to just upgrade everything at once, or:

1. Upgrade the master to 0.9.5
2. Set `serial` to `pickle` in the master config
3. Upgrade the minions
4. Remove the `serial` option from the master config

Since pickles can be used as a security exploit the ability for a master to accept pickles from minions at all will be removed in a future release.

**C Bindings for YAML**

All of the YAML rendering is now done with the YAML C bindings. This speeds up all of the sls files when running states.

**Experimental Windows Support**

David Boucha has worked tirelessly to bring initial support to Salt for Microsoft Windows operating systems. Right now the Salt Minion can run as a native Windows service and accept commands.

In the weeks and months to come Windows will receive the full treatment and will have support for Salt States and more robust support for managing Windows systems. This is a big step forward for Salt to move entirely outside of the Unix world, and proves Salt is a viable cross platform solution. Big Thanks to Dave for his contribution here!

**Dynamic Module Distribution**

Many Salt users have expressed the desire to have Salt distribute in-house modules, states, renderers, returners, and grains. This support has been added in a number of ways:

**Modules via States**

Now when salt modules are deployed to a minion via the state system as a file, then the modules will be automatically loaded into the active running minion - no restart required - and into the active running state. So custom state modules can be deployed and used in the same state run.
Modules via Module Environment Directories

Under the file_roots each environment can now have directories that are used to deploy large groups of modules. These directories sync modules at the beginning of a state run on the minion, or can be manually synced via the Salt module `salt.modules.saltutil.sync_all`.

The directories are named:

- _modules
- _states
- _grains
- _renderers
- _returners

The modules are pushed to their respective scopes on the minions.

Module Reloading

Modules can now be reloaded without restarting the minion, this is done by calling the `salt.modules.sys.reload_modules` function.

But wait, there's more! Now when a salt module of any type is added via states the modules will be automatically reloaded, allowing for modules to be laid down with states and then immediately used.

Finally, all modules are reloaded when modules are dynamically distributed from the salt master.

Enable / Disable Added to Service

A great deal of demand has existed for adding the capability to set services to be started at boot in the service module. This feature also comes with an overhaul of the service modules and initial systemd support.

This means that the `service state` can now accept - `enable: True` to make sure a service is enabled at boot, and - `enable: False` to make sure it is disabled.

Compound Target

A new target type has been added to the lineup, the compound target. In previous versions the desired minions could only be targeted via a single specific target type, but now many target specifications can be declared.

These targets can also be separated by and/or operators, so certain properties can be used to omit a node:

```
salt -C 'webserv* and G@os:Debian or E@db.*' test.ping
```

will match all minions with ids starting with webseriv via a glob and minions matching the `os:Debian` grain. Or minions that match the `db.*` regular expression.
Node Groups

Often the convenience of having a predefined group of minions to execute targets on is desired. This can be accomplished with the new nodegroups feature. Nodegroups allow for predefined compound targets to be declared in the master configuration file:

```
nodegroups:
  group1: 'L@foo.domain.com,bar.domain.com,baz.domain.com and bl*.domain.com'
  group2: 'G@os:Debian and foo.domain.com'
```

And then used via the \(-N\) option:

```
salt -N group1 test.ping
```

Minion Side Data Store

The data module introduces the initial approach into storing persistent data on the minions, specific to the minions. This allows for data to be stored on minions that can be accessed from the master or from the minion. The Minion datastore is young, and will eventually provide an interface similar to a more mature key/value pair server.

Major Grains Improvement

The Salt grains have been overhauled to include a massive amount of extra data. this includes hardware data, os data and salt specific data.

Salt \(-Q\) is Useful Now

In the past the salt query system, which would display the data from recent executions would be displayed in pure Python, and it was unreadable.

0.9.5 has added the outputter system to the \(-Q\) option, thus enabling the salt query system to return readable output.

Packaging Updates

Huge strides have been made in packaging Salt for distributions. These additions are thanks to our wonderful community where the work to set up packages has proceeded tirelessly.

FreeBSD

Salt on FreeBSD? There a port for that:

`https://svnweb.freebsd.org/ports/head/sysutils/py-salt/`

This port was developed and added by Christer Edwards. This also marks the first time Salt has been included in an upstream packaging system!
Fedora and Red Hat Enterprise

Salt packages have been prepared for inclusion in the Fedora Project and in EPEL for Red Hat Enterprise 5 and 6. These packages are the result of the efforts made by Clint Savage (herlo).

 Debian/Ubuntu

A team of many contributors have assisted in developing packages for Debian and Ubuntu. Salt is still actively seeking inclusion in upstream Debian and Ubuntu and the package data that has been prepared is being pushed through the needed channels for inclusion.

These packages have been prepared with the help of:

- Corey
- Aaron Toponce
- and`

More to Come

We are actively seeking inclusion in more distributions. Primarily getting Salt into Gentoo, SUSE, OpenBSD, and preparing Solaris support are all turning into higher priorities.

Refinement

Salt continues to be refined into a faster, more stable and more usable application. 0.9.5 comes with more debug logging, more bug fixes and more complete support.

More Testing, More BugFixes

0.9.5 comes with more bugfixes due to more testing than any previous release. The growing community and the introduction a dedicated QA environment have unearthed many issues that were hiding under the covers. This has further refined and cleaned the state interface, taking care of things from minor visual issues to repairing misleading data.

Custom Exceptions

A custom exception module has been added to throw salt specific exceptions. This allows Salt to give much more granular error information.
New Modules

**data**

The new data module manages a persistent datastore on the minion. Big thanks to bastichelaar for his help refining this module.

**freebsdkmod**

FreeBSD kernel modules can now be managed in the same way Salt handles Linux kernel modules. This module was contributed thanks to the efforts of Christer Edwards.

**gentoo_service**

Support has been added for managing services in Gentoo. Now Gentoo services can be started, stopped, restarted, enabled, disabled, and viewed.

**pip**

The pip module introduces management for pip installed applications. Thanks goes to whitinge for the addition of the pip module.

**rh_service**

The rh_service module enables Red Hat and Fedora specific service management. Now Red Hat like systems come with extensive management of the classic init system used by Red Hat.

**saltutil**

The saltutil module has been added as a place to hold functions used in the maintenance and management of salt itself. Saltutil is used to salt the salt minion. The saltutil module is presently used only to sync extension modules from the master server.

**systemd**

Systemd support has been added to Salt, now systems using this next generation init system are supported on systems running systemd.
**virtualenv**

The virtualenv module has been added to allow salt to create virtual Python environments. Thanks goes to whitinge for the addition of the virtualenv module

**win_disk**

Support for gathering disk information on Microsoft Windows minions. The windows modules come courtesy of Utah_Dave

**win_service**

The win_service module adds service support to Salt for Microsoft Windows services

**win_useradd**

Salt can now manage local users on Microsoft Windows Systems

**yumpkg5**

The yumpkg module introduces in 0.9.4 uses the yum API to interact with the yum package manager. Unfortunately, on Red Hat 5 systems salt does not have access to the yum API because the yum API is running under Python 2.4 and Salt needs to run under Python 2.6.

The yumpkg5 module bypasses this issue by shelling out to yum on systems where the yum API is not available.

**New States**

**mysql_database**

The new mysql_database state adds the ability to systems running a mysql server to manage the existence of mysql databases.

The mysql states are thanks to syphernl

**mysql_user**

The mysql_user state enables mysql user management.
virtualenv

The virtualenv state can manage the state of Python virtual environments. Thanks to Whitinge for the virtualenv state.

New Returners
cassandra_returner

A returner allowing Salt to send data to a cassandra server. Thanks to Byron Clark for contributing this returner.

28.2.155 Salt 0.9.6 Release Notes

release 2012-01-21

Salt 0.9.6 is a release targeting a few bugs and changes. This is primarily targeting an issue found in the names declaration in the state system. But a few other bugs were also repaired, like missing support for grains in extmods. Due to a conflict in distribution packaging msgpack will no longer be bundled with Salt, and is required as a dependency.

New Features

HTTP and ftp support in files.managed

Now under the source option in the file.managed state a HTTP or ftp address can be used instead of a file located on the salt master.

Allow Multiple Returners

Now the returner interface can define multiple returners, and will also return data back to the master, making the process less ambiguous.

Minion Memory Improvements

A number of modules have been taken out of the minion if the underlying systems required by said modules are not present on the minion system. A number of other modules need to be stripped out in this same way which should continue to make the minion more efficient.

Minions Can Locally Cache Return Data

A new option, cache_jobs, has been added to the minion to allow for all of the historically run jobs to cache on the minion, allowing for looking up historic returns. By default cache_jobs is set to False.
Pure Python Template Support For file.managed

Templates in the file.managed state can now be defined in a Python script. This script needs to have a run function that returns the string that needs to be in the named file.

28.2.156 Salt 0.9.7 Release Notes

release 2012-02-15

Salt 0.9.7 is here! The latest iteration of Salt brings more features and many fixes. This release is a great refinement over 0.9.6, adding many conveniences under the hood, as well as some features that make working with Salt much better.

A few highlights include the new Job system, refinements to the requisite system in states, the mod_init interface for states, external node classification, search path to managed files in the file state, and refinements and additions to dynamic module loading.

0.9.7 also introduces the long developed (and oft changed) unit test framework and the initial unit tests.

Major Features

Salt Jobs Interface

The new jobs interface makes the management of running executions much cleaner and more transparent. Building on the existing execution framework the jobs system allows clear introspection into the active running state of the running Salt interface.

The Jobs interface is centered in the new minion side proc system. The minions now store msgpack serialized files under /var/cache/salt/proc. These files keep track of the active state of processes on the minion.

Functions in the saltutil Module

A number of functions have been added to the saltutil module to manage and view the jobs:

- running: Returns the data of all running jobs that are found in the proc directory.
- find_job: Returns specific data about a certain job based on job id.
- signal_job: Allows for a given jid to be sent a signal.
- term_job: Sends a termination signal (SIGTERM, 15) to the process controlling the specified job.
- kill_job: Sends a kill signal (SIGKILL, 9) to the process controlling the specified job.

The jobs Runner

A convenience runner front end and reporting system has been added as well. The jobs runner contains functions to make viewing data easier and cleaner.

The jobs runner contains a number of functions...
active

The active function runs `saltutil.running` on all minions and formats the return data about all running jobs in a much more usable and compact format. The active function will also compare jobs that have returned and jobs that are still running, making it easier to see what systems have completed a job and what systems are still being waited on.

lookup_jid

When jobs are executed the return data is sent back to the master and cached. By default is cached for 24 hours, but this can be configured via the `keep_jobs` option in the master configuration.

Using the `lookup_jid` runner will display the same return data that the initial job invocation with the salt command would display.

list_jobs

Before finding a historic job, it may be required to find the job id. `list_jobs` will parse the cached execution data and display all of the job data for jobs that have already, or partially returned.

External Node Classification

Salt can now use external node classifiers like Cobbler's `cobbler-ext-nodes`.

Salt uses specific data from the external node classifier. In particular the `classes` value denotes which sls modules to run, and the environment value sets to another environment.

An external node classification can be set in the master configuration file via the `external_nodes` option: https://salt.readthedocs.io/en/latest/ref/configuration/master.html#external-nodes

External nodes are loaded in addition to the top files. If it is intended to only use external nodes, do not deploy any top files.

State Mod Init System

An issue arose with the pkg state. Every time a package was run Salt would need to refresh the package database. This made systems with slower package metadata refresh speeds much slower to work with. To alleviate this issue the `mod_init` interface has been added to salt states.

The `mod_init` interface is a function that can be added to a state file. This function is called with the first state called. In the case of the pkg state, the `mod_init` function sets up a tag which makes the package database only refresh on the first attempt to install a package.

In a nutshell, the `mod_init` interface allows a state to run any command that only needs to be run once, or can be used to set up an environment for working with the state.
Source File Search Path

The file state continues to be refined, adding speed and capabilities. This release adds the ability to pass a list to the source option. This list is then iterated over until the source file is found, and the first found file is used.

The new syntax looks like this:

```
/etc/httpd/conf/httpd.conf:
  file:
  - managed
  - source:
    - salt://httpd/httpd.conf
    - http://myserver/httpd.conf: md5=8c1fe119e6f1fd96bc06614473509bf1
```

The source option can take sources in the list from the salt file server as well as an arbitrary web source. If using an arbitrary web source the checksum needs to be passed as well for file verification.

Refinements to the Requisite System

A few discrepancies were still lingering in the requisite system, in particular, it was not possible to have a `require` and a `watch` requisite declared in the same state declaration.

This issue has been alleviated, as well as making the requisite system run more quickly.

Initial Unit Testing Framework

Because of the module system, and the need to test real scenarios, the development of a viable unit testing system has been difficult, but unit testing has finally arrived. Only a small amount of unit testing coverage has been developed, much more coverage will be in place soon.

A huge thanks goes out to those who have helped with unit testing, and the contributions that have been made to get us where we are. Without these contributions unit tests would still be in the dark.

Compound Targets Expanded

Originally only support for `and` and `or` were available in the compound target. 0.9.7 adds the capability to negate compound targets with `not`.

Nodegroups in the Top File

Previously the nodegroups defined in the master configuration file could not be used to match nodes for states. The nodegroups support has been expanded and the nodegroups defined in the master configuration can now be used to match minions in the top file.
28.2.157  Salt 0.9.8 Release Notes

release  2012-03-21

Salt 0.9.8 is a big step forward, with many additions and enhancements, as well as a number of precursors to advanced future developments.

This version of Salt adds much more power to the command line, making the old hard timeout issues a thing of the past and adds keyword argument support. These additions are also available in the salt client API, making the available API tools much more powerful.

The new pillar system allows for data to be stored on the master and assigned to minions in a granular way similar to the state system. It also allows flexibility for users who want to keep data out of their state tree similar to 'external lookup' functionality in other tools.

A new way to extend requisites was added, the "requisite in" statement. This makes adding requires or watch statements to external state decs much easier.

Additions to requisites making them much more powerful have been added as well as improved error checking for sls files in the state system. A new provider system has been added to allow for redirecting what modules run in the background for individual states.

Support for openSUSE has been added and support for Solaris has begun serious development. Windows support has been significantly enhanced as well.

The matcher and target systems have received a great deal of attention. The default behavior of grain matching has changed slightly to reflect the rest of salt and the compound matcher system has been refined.

A number of impressive features with keyword arguments have been added to both the CLI and to the state system. This makes states much more powerful and flexible while maintaining the simple configuration everyone loves.

The new batch size capability allows for executions to be rolled through a group of targeted minions a percentage or specific number at a time. This was added to prevent the "thundering herd" problem when targeting large numbers of minions for things like service restarts or file downloads.

Upgrade Considerations

Upgrade Issues

There was a previously missed oversight which could cause a newer minion to crash an older master. That oversight has been resolved so the version incompatibility issue will no longer occur. When upgrading to 0.9.8 make sure to upgrade the master first, followed by the minions.

Debian/Ubuntu Packages

The original Debian/Ubuntu packages were called salt and included all salt applications. New packages in the ppa are split by function. If an old salt package is installed then it should be manually removed and the new split packages need to be freshly installed.

On the master:

```
# apt-get purge salt
# apt-get install salt-{master,minion}
```

On the minions:
# apt-get purge salt
# apt-get install salt-minion

And on any Syndics:

# apt-get install salt-syndic

The official Salt PPA for Ubuntu is located at: https://launchpad.net/~saltstack/+archive/ubuntu/salt

Major Features

Pillar

Pillar offers an interface to declare variable data on the master that is then assigned to the minions. The pillar data is made available to all modules, states, sls files etc. It is compiled on the master and is declared using the existing renderer system. This means that learning pillar should be fairly trivial to those already familiar with salt states.

CLI Additions

The salt command has received a serious overhaul and is more powerful than ever. Data is returned to the terminal as it is received, and the salt command will now wait for all running minions to return data before stopping. This makes adding very large --timeout arguments completely unnecessary and gets rid of long running operations returning empty {} when the timeout is exceeded.

When calling salt via sudo, the user originally running salt is saved to the log for auditing purposes. This makes it easy to see who ran what by just looking through the minion logs.

The salt-key command gained the -D and --delete-all arguments for removing all keys. Be careful with this one!

Running States Without a Master

The addition of running states without a salt-master has been added to 0.9.8. This feature allows for the unmodified salt state tree to be read locally from a minion. The result is that the UNMODIFIED state tree has just become portable, allowing minions to have a local copy of states or to manage states without a master entirely.

This is accomplished via the new file client interface in Salt that allows for the salt:// URI to be redirected to custom interfaces. This means that there are now two interfaces for the salt file server, calling the master or looking in a local, minion defined file_roots.

This new feature can be used by modifying the minion config to point to a local file_roots and setting the file_client option to local.

Keyword Arguments and States

State modules now accept the **kwargs argument. This results in all data in a sls file assigned to a state being made available to the state function.

This passes data in a transparent way back to the modules executing the logic. In particular, this allows adding arguments to the pkg.install module that enable more advanced and granular controls with respect to what the state is capable of.

An example of this along with the new debconf module for installing ldap client packages on Debian:
**ldap-client-packages:**

- **pkg:**
  - `debbconf`: salt://debconf/ldap-client.ans
  - installed
- **names:**
  - nslcd
  - libpam-ldapd
  - libnss-ldapd

### Keyword Arguments and the CLI

In the past it was required that all arguments be passed in the proper order to the `salt` and `salt-call` commands. As of 0.9.8, keyword arguments can be passed in the form of `k=argument`.

```
# salt -G 'type:dev' git.clone 
  repository=https://github.com/saltstack/salt.git cwd=/tmp/salt user=jeff
```

### Matcher Refinements and Changes

A number of fixes and changes have been applied to the Matcher system. The most noteworthy is the change in the grain matcher. The grain matcher used to use a regular expression to match the passed data to a grain, but now defaults to a shell glob like the majority of match interfaces in Salt. A new option is available that still uses the old style regex matching to grain data called `grain-pcre`. To use regex matching in compound matches use the letter `P`.

For example, this would match any ArchLinux or Fedora minions:

```
# salt --grain-pcre 'os:(Arch:Fed).*' test.ping
```

And the associated compound matcher suitable for `top.sls` is `P`:

```
P@os:(Arch|Fed).*
```

**NOTE:** Changing the grains matcher from pcre to glob is backwards incompatible.

Support has been added for matching minions with Yahoo's range library. This is handled by passing range syntax with `-R` or `--range` arguments to salt.

More information at: [https://github.com/ytoolshed/range/wiki/%22yamlfile%22-module-file-spec](https://github.com/ytoolshed/range/wiki/%22yamlfile%22-module-file-spec)

### Requisite "in"

A new means to updating requisite statements has been added to make adding watchers and requires to external states easier. Before 0.9.8 the only way to extend the states that were watched by a state outside of the sls was to use an extend statement:

```
include:
  - http
extend:
  apache:
    service:
      - watch:
```

(continues on next page)
But the new `Requisite in` statement allows for easier extends for requisites:

```
include:
  - http
tomcat:
    pkg:
      - installed
      - watch_in:
        - service: apache
```

Requisite in is part of the extend system, so still remember to always include the sls that is being extended!

**Providers**

Salt predetermines what modules should be mapped to what uses based on the properties of a system. These determinations are generally made for modules that provide things like package and service management. The **apt** module maps to **pkg** on Debian and the **yum** module maps to **pkg** on Fedora for instance.

Sometimes in states, it may be necessary for a non-default module to be used for the desired functionality. For instance, an Arch Linux system may have been set up with **systemd** support. Instead of using the default service module detected for Arch Linux, the **systemd** module can be used:

```
http:
  service:
    - running
    - enable: True
    - provider: systemd
```

Default providers can also be defined in the minion config file:

```
providers:
  service: systemd
```

When default providers are passed in the minion config, then those providers will be applied to all functionality in Salt, this means that the functions called by the minion will use these modules, as well as states.

**Requisite Glob Matching**

Requisites can now be defined with glob expansion. This means that if there are many requisites, they can be defined on a single line.

To watch all files in a directory:

```
http:
  service:
    - running
    - enable: True
```

(continues on next page)
This example will watch all defined files that match the glob /etc/http/conf.d/*

Batch Size

The new batch size option allows commands to be executed while maintaining that only so many hosts are executing the command at one time. This option can take a percentage or a finite number:

```
salt 'salt'* -b 10 test.ping
salt -G 'os:RedHat' --batch-size 25% apache.signal restart
```

This will only run test.ping on 10 of the targeted minions at a time and then restart apache on 25% of the minions matching os:RedHat at a time and work through them all until the task is complete. This makes jobs like rolling web server restarts behind a load balancer or doing maintenance on BSD firewalls using carp much easier with salt.

Module Updates

This is a list of notable, but non-exhaustive updates with new and existing modules.

Windows support has seen a flurry of support this release cycle. We've gained all new file, network, and shadow modules. Please note that these are still a work in progress.

For our ruby users, new rvm and gem modules have been added along with the associated states

The virt module gained basic Xen support.

The yum module gained Scientific Linux support.

The pkg module on Debian, Ubuntu, and derivatives force apt to run in a non-interactive mode. This prevents issues when package installation waits for confirmation.

A pkg module for OpenSUSE's zypper was added.

The service module on Ubuntu natively supports upstart.

A new debconf module was contributed by our community for more advanced control over deb package deployments on Debian based distributions.

The mysql.user state and mysql module gained a password_hash argument.

The cmd module and state gained a shell keyword argument for specifying a shell other than /bin/sh on Linux / Unix systems.

New git and mercurial modules have been added for fans of distributed version control.
In Progress Development

Master Side State Compiling

While we feel strongly that the advantages gained with minion side state compiling are very critical, it does prevent certain features that may be desired. 0.9.8 has support for initial master side state compiling, but many more components still need to be developed, it is hoped that these can be finished for 0.9.9.

The goal is that states can be compiled on both the master and the minion allowing for compilation to be split between master and minion. Why will this be great? It will allow storing sensitive data on the master and sending it to some minions without all minions having access to it. This will be good for handling ssl certificates on front-end web servers for instance.

Solaris Support

Salt 0.9.8 sees the introduction of basic Solaris support. The daemon runs well, but grains and more of the modules need updating and testing.

Windows Support

Salt states on windows are now much more viable thanks to contributions from our community! States for file, service, local user, and local group management are more fully fleshed out along with network and disk modules. Windows users can also now manage registry entries using the new "reg" module.

28.2.158 Salt 0.9.9 Release Notes

release 2012-04-27

0.9.9 is out and comes with some serious bug fixes and even more serious features. This release is the last major feature release before 1.0.0 and could be considered the 1.0.0 release candidate.

A few updates include more advanced kwargs support, the ability for salt states to more safely configure a running salt minion, better job directory management and the new state test interface.

Many new tests have been added as well, including the new minion swarm test that allows for easier testing of Salt working with large groups of minions. This means that if you have experienced stability issues with Salt before, particularly in larger deployments, that these bugs have been tested for, found, and killed.

Major Features

State Test Interface

Until 0.9.9 the only option when running states to see what was going to be changed was to print out the highstate with state.show_highstate and manually look it over. But now states can be run to discover what is going to be changed.

Passing the option test=True to many of the state functions will now cause the salt state system to only check for what is going to be changed and report on those changes.

salt '*' state.highstate test=True

Now states that would have made changes report them back in yellow.
State Syntax Update

A shorthand syntax has been added to sls files, and it will be the default syntax in documentation going forward. The old syntax is still fully supported and will not be deprecated, but it is recommended to move to the new syntax in the future. This change moves the state function up into the state name using a dot notation. This is in-line with how state functions are generally referred to as well:

The new way:

```
/etc/sudoers:
    file.present:
        - source: salt://sudo/sudoers
        - user: root
        - mode: 400
```

Use and Use_in Requisites

Two new requisite statements are available in 0.9.9. The use and use_in requisite and requisite-in allow for the transparent duplication of data between states. When a state "uses" another state it copies the other state's arguments as defaults. This was created in direct response to the new network state, and allows for many network interfaces to be configured in the same way easily. A simple example:

```
root_file:
    file.absent:
        - name: /tmp/nothing
        - user: root
        - mode: 644
        - group: root
        - use_in:
            - file: /etc/vimrc

fred_file:
    file.absent:
        - name: /tmp/nothing
        - user: fred
        - group: marketing
        - mode: 660

/files/marketing/district7.rst:
    file.present:
        - source: salt://marketing/district7.rst
        - template: jinja
        - use:
            - file: fred_file

/etc/vimrc:
    file.present:
        - source: salt://edit/vimrc
```

This makes the 2 lower state decs inherit the options from their respectively "used" state decs.
Network State

The new network state allows for the configuration of network devices via salt states and the ip salt module. This addition has been given to the project by Jeff Hutchins and Bret Palsson from Jive Communications.

Currently the only network configuration backend available is for Red Hat based systems, like Red Hat Enterprise, CentOS, and Fedora.

Exponential Jobs

Originally the jobs executed were stored on the master in the format: `<cachedir>/jobs/jid/{minion ids}`

But this format restricted the number of jobs in the cache to the number of subdirectories allowed on the filesystem. Ext3 for instance limits subdirectories to 32000. To combat this the new format for 0.9.9 is: `<cachedir>/jobs/jid_hash[:2]/jid_hash[2:]/{minion ids}` So that now the number of maximum jobs that can be run before the cleanup cycle hits the job directory is substantially higher.

ssh_auth Additions

The original ssh_auth state was limited to accepting only arguments to apply to a public key, and the key itself. This was restrictive due to the way the we learned that many people were using the state, so the key section has been expanded to accept options and arguments to the key that over ride arguments passed in the state. This gives substantial power to using ssh_auth with names:

```bash
sshkeys:
  ssh_auth:
    - present
    - user: backup
    - enc: ssh-dss
    - options:
      - option1="value1"
      - option2="value2 flag2"
    - comment: backup
    - names:
      - ssh-rsa
```

(continues on next page)
LocalClient Additions

To follow up the recent additions in 0.9.8 of additional kwargs support, 0.9.9 also adds the capability to send kwargs into commands via a dict. This addition to the LocalClient api can be used like so:

```python
import salt.client

client = salt.client.LocalClient("/etc/salt/master")
ret = client.cmd("*", "cmd.run", ["ls -l"], kwarg={"cwd": "/etc"})
```

This update has been added to all cmd methods in the LocalClient class.

Better Self Salting

One problem faced with running Salt states, is that it has been difficult to manage the Salt minion via states, this is due to the fact that if the minion is called to restart while a state run is happening then the state run would be killed. 0.9.9 slightly changes the process scope of the state runs, so now when salt is executing states it can safely restart the salt-minion daemon.

In addition to daemonizing the state run, the apt module also daemonizes. This update makes it possible to cleanly update the salt-minion package on Debian/Ubuntu systems without leaving apt in an inconsistent state or killing the active minion process mid-execution.

Wildcards for SLS Modules

Now, when including sls modules in include statements or in the top file, shell globs can be used. This can greatly simplify listing matched sls modules in the top file and include statements:

```yaml
base:
  "*/":
    - files*
    - core*

include:
  - users.dev.*
  - apache.ser*
```
External Pillar

Since the pillar data is just, data, it does not need to come expressly from the pillar interface. The external pillar system allows for hooks to be added making it possible to extract pillar data from any arbitrary external interface. The external pillar interface is configured via the `ext_pillar` option. Currently interfaces exist to gather external pillar data via hiera or via a shell command that sends yaml data to the terminal:

```
ext_pillar:
  - cmd_yaml: cat /etc/salt/ext.yaml
  - hiera: /etc/hirea.yaml
```

The initial external pillar interfaces and extra interfaces can be added to the file salt/pillar.py, it is planned to add more external pillar interfaces. If the need arises a new module loader interface will be created in the future to manage external pillar interfaces.

Single State Executions

The new `state.single` function allows for single states to be cleanly executed. This is a great tool for setting up a small group of states on a system or for testing out the behavior of single states:

```
salt '*' state.single user.present name=wade uid=2000
```

The test interface functions here as well, so changes can also be tested against as:

```
salt '*' state.single user.present name=wade uid=2000 test=True
```

New Tests

A few exciting new test interfaces have been added, the minion swarm allows not only testing of larger loads, but also allows users to see how Salt behaves with large groups of minions without having to create a large deployment.

Minion Swarm

The minion swarm test system allows for large groups of minions to be tested against easily without requiring large numbers of servers or virtual machines. The minion swarm creates as many minions as a system can handle and roots them in the /tmp directory and connects them to a master.

The benefit here is that we were able to replicate issues that happen only when there are large numbers of minions. A number of elusive bugs which were causing stability issues in masters and minions have since been hunted down. Bugs that used to take careful watch by users over several days can now be reliably replicated in minutes, and fixed in minutes.

Using the swarm is easy, make sure a master is up for the swarm to connect to, and then use the minionswarm.py script in the tests directory to spin up as many minions as you want. Remember, this is a fork bomb, don't spin up more than your hardware can handle!

```
python minionswarm.py -m 20 --master salt-master
```
Shell Tests

The new Shell testing system allows us to test the behavior of commands executed from a high level. This allows for the high level testing of salt runners and commands like salt-key.

Client Tests

Tests have been added to test the aspects of the client APIs and ensure that the client calls work, and that they manage passed data, in a desirable way.

28.3 Upcoming Release

28.3.1 Salt 3003 Release Notes - Codename Aluminium

Salt 3003 is an unreleased upcoming feature release.

See also:

Legacy salt-cloud release docs

See also:

Legacy salt-api release docs
29.1 Introduction

First, you need to configure the master file. This is because all module functions require either a configured api_key (for Cloud) or a ttp_user with a tpp_password and a base_url (for Trust Platform).

For Venafi Cloud:

```yaml
venafi:
  api_key: abcdef01-2345-6789-abcd-ef0123456789
  base_url: "https://cloud.venafi.example.com/" (optional)
```

If you don't have a Venafi Cloud account, you can sign up for one on the [enrollment page](#).

For Venafi Platform:

```yaml
venafi:
  base_url: "https://tpp.example.com/"
  tpp_user: admin
  tpp_password: "Str0ngPa$$w0rd"
  trust_bundle: "/opt/venafi/bundle.pem"
```

*It is not common for the Venafi Platform's REST API (WebSDK) to be secured using a certificate issued by a publicly trusted CA, therefore establishing trust for that server certificate is a critical part of your configuration. Ideally this is done by obtaining the root CA certificate in the issuing chain in PEM format and copying that file to your Salt Master (e.g. /opt/venafi/bundle.pem). You then reference that file using the 'trust_bundle' parameter as shown above.*

For the Venafi module to create keys and certificates it is necessary to enable external pillars. This is done by adding the following to the /etc/salt/master file:

```yaml
ext_pillar:
  - venafi: True
```

29.2 Runner Functions

29.2.1 request

This command is used to enroll a certificate from Venafi Cloud or Venafi Platform.

- **minion_id** ID of the minion for which the certificate is being issued. Required.
- **dns_name** DNS subject name for the certificate. Required if csr_path is not specified.
**csr_path** Full path name of certificate signing request file to enroll. Required if **dns_name** is not specified.

**zone** Venafi Cloud zone ID or Venafi Platform folder that specify key and certificate policy. Defaults to "Default".

For Venafi Cloud, the Zone ID can be found in the Zone page for your Venafi Cloud project.

**org_unit** Business Unit, Department, etc. Do not specify if it does not apply.

**org** Exact legal name of your organization. Do not abbreviate.

**loc** City/locality where your organization is legally located.

**state** State or province where your organization is legally located. Must not be abbreviated.

**country** Country where your organization is legally located; two-letter ISO code.

**key_password** Password for encrypting the private key.

The syntax for requesting a new certificate with private key generation looks like this:

```
salt-run venafi.request minion.example.com dns_name=www.example.com \
country=US state=California loc=Sacramento org="Company Name" org_unit=DevOps \
zone=Internet key_password=SecretSauce
```

And the syntax for requesting a new certificate using a previously generated CSR looks like this:

```
salt-run venafi.request minion.example.com csr_path=/tmp/minion.req zone=Internet
```

### 29.2.2 show_cert

This command is used to show last issued certificate for domain.

**dns_name** DNS subject name of the certificate to look up.

```
salt-run venafi.show_cert www.example.com
```

### 29.2.3 list_domain_cache

This command lists domains that have been cached on this Salt Master.

```
salt-run venafi.list_domain_cache
```

### 29.2.4 delCached_domain

This command deletes a domain from the Salt Master's cache.

**domains** A domain name, or a comma-separated list of domain names, to delete from this master's cache.

```
salt-run venafi.delCached_domain www.example.com
```
29.3 Transfer certificate to a minion

To transfer a cached certificate to a minion, you can use Venafi pillar.

Example state (SLS) file:

```yaml
/etc/ssl/cert/www.example.com.crt:
  file.managed:
    - contents_pillar: venafi:www.example.com:cert
    - replace: True

/etc/ssl/cert/www.example.com.key:
  file.managed:
    - contents_pillar: venafi:www.example.com:pkey
    - replace: True

/etc/ssl/cert/www.example.com-chain.pem:
  file.managed:
    - contents_pillar: venafi:www.example.com:chain
    - replace: True
```
**Auto-Order**  The evaluation of states in the order that they are defined in a SLS file. *See also: ordering.*

**Bootstrap**  A stand-alone Salt project which can download and install a Salt master and/or a Salt minion onto a host. *See also: salt-bootstrap.*

**Compound Matcher**  A combination of many target definitions that can be combined with boolean operators. *See also: targeting.*

**EAuth**  Shorthand for ‘external authentication’. A system for calling to a system outside of Salt in order to authenticate users and determine if they are allowed to issue particular commands to Salt. *See also: external auth.*

**Environment**  A directory tree containing state files which can be applied to minions. *See also: top file.*

**Execution Function**  A Python function inside an Execution Module that may take arguments and performs specific system-management tasks. *See also: the list of execution modules.*

**External Job Cache**  An external data-store that can archive information about jobs that have been run. A default returner. *See also: ext_job_cache, the list of returners.*

**Execution Module**  A Python module that contains execution functions which directly perform various system-management tasks on a server. Salt ships with a number of execution modules but users can also write their own execution modules to perform specialized tasks. *See also: the list of execution modules.*

**External Pillar**  A module that accepts arbitrary arguments and returns a dictionary. The dictionary is automatically added to a pillar for a minion.

**Event**  A notice emitted onto an event bus. Events are often driven by requests for actions to occur on a minion or master and the results of those actions. *See also: Salt Reactor.*

**File Server**  A local or remote location for storing both Salt-specific files such as top files or SLS files as well as files that can be distributed to minions, such as system configuration files. *See also: Salt's file server.*

**Grain**  A key-value pair which contains a fact about a system, such as its hostname, network addresses. *See also: targeting with grains.*

**Highdata**  The data structure in a SLS file the represents a set of state declarations. *See also: state layers.*

**Highstate**  The collection of states to be applied to a system. *See also: state layers.*

**Idempotent**  An action that ensures the system is in a well-known state regardless of the system’s state before the action is applied. A corollary to this is that applying the action multiple times results in no changes to the system. State module functions should be idempotent. Some state module functions, such as `cmd.run` are not idempotent by default but can be made idempotent with the proper use of requisites such as `unless` and `onlyif`. For more information, see wikipedia.

**Jinja**  A templating language which allows variables and simple logic to be dynamically inserted into static text files when they are rendered. *See also: Salt’s Jinja documentation.*
Job  The complete set of tasks to be performed by the execution of a Salt command are a single job. See also: jobs runner.

Job Cache A storage location for job results, which may then be queried by a salt runner or an external system. May be local to a salt master or stored externally.

Job ID A unique identifier to represent a given job. This is often shortened to JID.

Low State The collection of processed states after requisites and order are evaluated. See also: state layers.

Master A central Salt daemon from which commands can be issued to listening minions.

Masterless A minion which does not require a Salt master to operate. All configuration is local. See also: file_client.

Master Tops A system for the master that allows hooks into external systems to generate top file data.

Mine A facility to collect arbitrary data from minions and store that data on the master. This data is then available to all other minions. (Sometimes referred to as Salt Mine.) See also: Salt Mine.

Minion A server running a Salt minion daemon which can listen to commands from a master and perform the requested tasks. Generally, minions are servers which are to be controlled using Salt.

Minion ID A globally unique identifier for a minion. See also: id.

Multi-Master The ability for a minion to be actively connected to multiple Salt masters at the same time in high-availability environments.

Node Group A pre-defined group of minions declared in the master configuration file. See also: targeting.

Outputter A format for defining the characteristics of output data from a Salt command. See also: list of outputters.

Peer Communication The ability for minions to communicate directly with other minions instead of brokering commands through the Salt master. See also: peer communication.

Pillar A simple key-value store for user-defined data to be made available to a minion. Often used to store and distribute sensitive data to minions. See also: Pillar, list of Pillar modules.

Proxy Minion A minion which can control devices that are unable to run a Salt minion locally, such as routers and switches.

PyDSL A Pythonic domain-specific-language used as a Salt renderer. PyDSL can be used in cases where adding pure Python into SLS files is beneficial. See also: PyDSL.

Reactor An interface for listening to events and defining actions that Salt should taken upon receipt of given events. See also: Reactor.

Render Pipe Allows SLS files to be rendered by multiple renderers, with each renderer receiving the output of the previous. See also: composing renderers.

Renderers Responsible for translating a given data serialization format such as YAML or JSON into a Python data structure that can be consumed by Salt. See also: list of renderers.

Returner Allows for the results of a Salt command to be sent to a given data-store such as a database or log file for archival. See also: list of returners.

Roster A flat-file list of target hosts. (Currently only used by salt-ssh.)

Runner Module A module containing a set of runner functions. See also: list of runner modules.

Runner Function A function which is called by the salt-run command and executes on the master instead of on a minion. See also: Runner Module.

Salt Cloud A suite of tools used to create and deploy systems on many hosted cloud providers. See also: salt-cloud.
Salt SSH  A configuration management and remote orchestration system that does not require that any software besides SSH be installed on systems to be controlled.

Salt Thin  A subset of the normal Salt distribution that does not include any transport routines. A Salt Thin bundle can be dropped onto a host and used directly without any requirement that the host be connected to a network. Used by Salt SSH. See also: thin runner.

Salt Virt  Used to manage the creation and deployment of virtual machines onto a set of host machines. Often used to create and deploy private clouds. See also: virt runner.

SLS Module  Contains a set of state declarations.

State Compiler  Translates highdata into lowdata.

State Declaration  A data structure which contains a unique ID and describes one or more states of a system such as ensuring that a package is installed or a user is defined. See also: highstate structure.

State Function  A function contained inside a state module which can manages the application of a particular state to a system. State functions frequently call out to one or more execution modules to perform a given task.

State Module  A module which contains a set of state functions. See also: list of state modules.

State Run  The application of a set of states on a set of systems.

Syndic  A forwarder which can relay messages between tiered masters. See also: Syndic.

Target  Minion(s) to which a given salt command will apply. See also: targeting.

Top File  Determines which SLS files should be applied to various systems and organizes those groups of systems into environments. See also: top file, list of master top modules.

__virtual__  A function in a module that is called on module load to determine whether or not the module should be available to a minion. This function commonly contains logic to determine if all requirements for a module are available, such as external libraries.

Worker  A master process which can send notices and receive replies from minions. See also: worker_threads.
