The `winrepo.update_git_repos` runner will refuse to update repos here, as all three of these repos would be checked out to the same directory. To work around this, a per-remote parameter called `name` can be used to resolve these conflicts:

```yaml
winrepo_remotes:
- https://foo.com/bar/baz.git
- https://mydomain.tld/baz.git:
```

(continues on next page)
28.1.13 Legacy Minions

The Windows Package Manager was upgraded with breaking changes starting with Salt 2015.8.0. To maintain backwards compatibility Salt continues to support older minions.

The breaking change was to generate the winrepo database on the minion instead of the master. This allowed for the use of Jinja in the software definition files. It enabled the use of pillar, grains, execution modules, etc. during compile time. To support this new functionality, a next-generation (ng) repo was created.

See the Changes in Version 2015.8.0 for details.

On prior versions of Salt, or legacy minions, the winrepo database was generated on the master and pushed down to the minions. Any grains exposed at compile time would have been those of the master and not the minion.

The repository for legacy minions is named salt-winrepo and is located at:

- https://github.com/saltstack/salt-winrepo

Legacy Configuration

Winrepo settings were changed with the introduction of the Next Generation (ng) of winrepo.

Legacy Master Config Options

There were three options available for a legacy master to configure winrepo. Unless you're running a legacy master as well, you shouldn't need to configure any of these.

- win_gitrepos
- win_repo
- win_repo_mastercachefile

win_gitrepos: (list)
A list of URLs to github repos. Default is a list with a single URL:

- 'https://github.com/saltstack/salt-winrepo.git'

win_repo: (str)
The location on the master to store the winrepo. The default is /srv/salt/win/repo.

win_repo_mastercachefile: (str) The location on the master to generate the winrepo database file. The default is /srv/salt/win/repo/winrep.p
Legacy Minion Config Options

There is only one option available to configure a legacy minion for winrepo.

- **win_repo_cachefile**

  *win_repo_cachefile:* (str)

  The location on the Salt file server to obtain the winrepo database file. The default is `salt://win/repo/winrepo.p`

  **Note:** If the location of the `winrepo.p` file is not in the default location on the master, the `win_repo_cachefile` setting will need to be updated to reflect the proper location on each minion.

Legacy Quick Start

You can get up and running with winrepo pretty quickly just using the defaults. Assuming no changes to the default configuration (e.g., `file_roots`) run the following commands on the master:

```
salt-run winrepo.update_git_repos
salt-run winrepo.genrepo
salt * pkg.refresh_db
salt * pkg.install firefox
```

These commands clone the default winrepo from github, generate the metadata file, push the metadata file down to the legacy minion, and install the latest version of Firefox.

Legacy Initialization

Initializing the winrepo for a legacy minion is similar to that for a newer minion. There is an added step in that the metadata file needs to be generated on the master prior to refreshing the database on the minion.

Populate the Local Repository

The SLS files used to install Windows packages are not distributed by default with Salt. So, the first step is to clone the repo to the master. Use the `winrepo.update_git_repos` runner initialize the repository in the location specified by `winrepo_dir` in the master config. This will pull the software definition files down from the git repository.

```
salt-run winrepo.update_git_repos
```

Generate the Metadata File

The next step is to create the metadata file for the repo (`winrepo.p`). The metadata file is generated on the master using the `winrepo.genrepo` runner.

```
salt-run winrepo.genrepo
```

**Note:** You only need to do this if you need to support legacy minions.
Update the Minion Database

Run `pkg.refresh_db` on each of your Windows minions to copy the metadata file down to the minion.
```
# From the master
salt -G 'os:windows' pkg.refresh_db
```

Changes in Version 2015.8.0+

Git repository management for the Windows Software Repository changed in version 2015.8.0, and several master/minion config parameters were renamed for consistency.

For a complete list of the new `winrepo` config options, see here for master config options, and here for configuration options for masterless Windows minions.

**pygit2/GitPython Support**

On the master, the `winrepo.update_git_repos` runner was updated to use either `pygit2` or `GitPython` to checkout the git repositories containing repo data. If `pygit2` or `GitPython` is installed, existing winrepo git checkouts should be removed after upgrading to 2015.8.0. Then they should be cloned again by running `winrepo.update_git_repos`.

If neither `GitPython` nor `pygit2` are installed, Salt will fall back to pre-existing behavior for `winrepo.update_git_repos`, and a warning will be logged in the master log.

Note: Standalone Windows minions do not support the new `GitPython/pygit2` functionality, and will instead use the `git.latest` state to keep repositories up-to-date. More information on how to use the Windows Software Repo on a standalone minion can be found here.

**Config Parameters Renamed**

Many of the legacy `winrepo` configuration parameters changed in version 2015.8.0 to make them more consistent. Below are the parameters which changed for version 2015.8.0:

**Master Config**

<table>
<thead>
<tr>
<th>Old Name</th>
<th>New Name</th>
</tr>
</thead>
<tbody>
<tr>
<td><code>win_repo</code></td>
<td><code>winrepo_dir</code></td>
</tr>
<tr>
<td><code>win_repo_mastercachefile</code></td>
<td>No longer used on master</td>
</tr>
<tr>
<td><code>win_gitrepos</code></td>
<td><code>winrepo_remotes</code></td>
</tr>
</tbody>
</table>

Note: The `winrepo_dir_ng` and `winrepo_remotes_ng` settings were introduced in 2015.8.0 for working with the next generation repo.

See here for detailed information on all master config options for the Windows Repo.

**Minion Config**
<table>
<thead>
<tr>
<th>Old Name</th>
<th>New Name</th>
</tr>
</thead>
<tbody>
<tr>
<td>win_repo</td>
<td>winrepo_dir</td>
</tr>
<tr>
<td>win_repo_cachefile</td>
<td>winrepo_cachefile</td>
</tr>
<tr>
<td>win_gitrepos</td>
<td>winrepo_remotes</td>
</tr>
</tbody>
</table>

Note: The `winrepo_dir_ng` and `winrepo_remotes_ng` settings were introduced in 2015.8.0 for working with the next generation repo.

See [here](#) for detailed information on all minion config options for the Windows Repo.

### 28.2 Windows-specific Behaviour

Salt is capable of managing Windows systems, however due to various differences between the operating systems, there are some things you need to keep in mind.

This document will contain any quirks that apply across Salt or generally across multiple module functions. Any Windows-specific behavior for particular module functions will be documented in the module function documentation. Therefore this document should be read in conjunction with the module function documentation.

#### 28.2.1 Group parameter for files

Salt was originally written for managing Unix-based systems, and therefore the file module functions were designed around that security model. Rather than trying to shoehorn that model on to Windows, Salt ignores these parameters and makes non-applicable module functions unavailable instead.

One of the commonly ignored parameters is the `group` parameter for managing files. Under Windows, while files do have a 'primary group' property, this is rarely used. It generally has no bearing on permissions unless intentionally configured and is most commonly used to provide Unix compatibility (e.g. Services For Unix, NFS services).

Because of this, any file module functions that typically require a group, do not under Windows. Attempts to directly use file module functions that operate on the group (e.g. `file.chgrp`) will return a pseudo-value and cause a log message to appear. No group parameters will be acted on.

If you do want to access and change the 'primary group' property and understand the implications, use the `file.get_pgid` or `file.get_pgroup` functions or the `pgroup` parameter on the `file.chown` module function.

#### 28.2.2 Dealing with case-insensitive but case-preserving names

Windows is case-insensitive, but however preserves the case of names and it is this preserved form that is returned from system functions. This causes some issues with Salt because it assumes case-sensitive names. These issues generally occur in the state functions and can cause bizarre looking errors.

To avoid such issues, always pretend Windows is case-sensitive and use the right case for names, e.g. specify `user=Administrator` instead of `user=administrator`.

Follow [issue #11801](#) for any changes to this behavior.
28.2.3 Dealing with various username forms

Salt does not understand the various forms that Windows usernames can come in, e.g. username, mydomain\username, username@mydomain.tld can all refer to the same user. In fact, Salt generally only considers the raw username value, i.e. the username without the domain or host information.

Using these alternative forms will likely confuse Salt and cause odd errors to happen. Use only the raw username value in the correct case to avoid problems.

Follow issue #11801 for any changes to this behavior.

28.2.4 Specifying the None group

Each Windows system has built-in _None_ group. This is the default 'primary group' for files for users not on a domain environment.

Unfortunately, the word _None_ has special meaning in Python - it is a special value indicating 'nothing', similar to null or nil in other languages.

To specify the None group, it must be specified in quotes, e.g. ./salt '*' file.chgrp C:\path\to\file "'None'".

28.2.5 Symbolic link loops

Under Windows, if any symbolic link loops are detected or if there are too many levels of symlinks (defaults to 64), an error is always raised.

For some functions, this behavior is different to the behavior on Unix platforms. In general, avoid symlink loops on either platform.
29.1 Overview

In its most typical use, Salt is a software application in which clients, called "minions" can be commanded and controlled from a central command server called a "master".

Commands are normally issued to the minions (via the master) by calling a client script simply called, 'salt'.

Salt features a pluggable transport system to issue commands from a master to minions. The default transport is ZeroMQ.

29.2 Salt Client

29.2.1 Overview

The salt client is run on the same machine as the Salt Master and communicates with the salt-master to issue commands and to receive the results and display them to the user.

The primary abstraction for the salt client is called 'LocalClient'.

When LocalClient wants to publish a command to minions, it connects to the master by issuing a request to the master's ReqServer (TCP: 4506)

The LocalClient system listens to responses for its requests by listening to the master event bus publisher (master_event_pub.ipc).

29.3 Salt Master

29.3.1 Overview

The salt-master daemon runs on the designated Salt master and performs functions such as authenticating minions, sending, and receiving requests from connected minions and sending and receiving requests and replies to the 'salt' CLI.
29.3.2 Moving Pieces

When a Salt master starts up, a number of processes are started, all of which are called 'salt-master' in a process-list but have various role categories.

Among those categories are:

- Publisher
- EventPublisher
- MWorker

29.3.3 Publisher

The Publisher process is responsible for sending commands over the designated transport to connected minions. The Publisher is bound to the following:

- TCP: port 4505
- IPC: publish_pull.ipc

Each salt minion establishes a connection to the master Publisher.

29.3.4 EventPublisher

The EventPublisher publishes master events out to any event listeners. It is bound to the following:

- IPC: master_event_pull.ipc
- IPC: master_event_pub.ipc

29.3.5 MWorker

Worker processes manage the back-end operations for the Salt Master.

The number of workers is equivalent to the number of 'worker_threads' specified in the master configuration and is always at least one.

Workers are bound to the following:

- IPC: workers.ipc

29.3.6 ReqServer

The Salt request server takes requests and distributes them to available MWorker processes for processing. It also receives replies back from minions.

The ReqServer is bound to the following:

- TCP: 4506
- IPC: workers.ipc

Each salt minion establishes a connection to the master ReqServer.
29.3.7 Job Flow

The Salt master works by always publishing commands to all connected minions and the minions decide if the command is meant for them by checking themselves against the command target.

The typical lifecycle of a salt job from the perspective of the master might be as follows:

1) A command is issued on the CLI. For example, 'salt my_minion test.version'.

2) The 'salt' command uses LocalClient to generate a request to the salt master by connecting to the ReqServer on TCP:4506 and issuing the job.

3) The salt-master ReqServer sees the request and passes it to an available MWorker over workers.ipc.

4) A worker picks up the request and handles it. First, it checks to ensure that the requested user has permissions to issue the command. Then, it sends the publish command to all connected minions. For the curious, this happens in ClearFuncs.publish().

5) The worker announces on the master event bus that it is about to publish a job to connected minions. This happens by placing the event on the master event bus (master_event_pull.ipc) where the EventPublisher picks it up and distributes it to all connected event listeners on master_event_pub.ipc.

6) The message to the minions is encrypted and sent to the Publisher via IPC on publish_pull.ipc.

7) Connected minions have a TCP session established with the Publisher on TCP port 4505 where they await commands. When the Publisher receives the job over publish_pull, it sends the jobs across the wire to the minions for processing.

8) After the minions receive the request, they decrypt it and perform any requested work, if they determine that they are targeted to do so.

9) When the minion is ready to respond, it publishes the result of its job back to the master by sending the encrypted result back to the master on TCP 4506 where it is again picked up by the ReqServer and forwarded to an available MWorker for processing. (Again, this happens by passing this message across workers.ipc to an available worker.)

10) When the MWorker receives the job it decrypts it and fires an event onto the master event bus (master_event_pull.ipc). (Again for the curious, this happens in AESFuncs._return().

11) The EventPublisher sees this event and re-publishes it on the bus to all connected listeners of the master event bus (on master_event_pub.ipc). This is where the LocalClient has been waiting, listening to the event bus for minion replies. It gathers the job and stores the result.

12) When all targeted minions have replied or the timeout has been exceeded, the salt client displays the results of the job to the user on the CLI.

29.4 Salt Minion

29.4.1 Overview

The salt-minion is a single process that sits on machines to be managed by Salt. It can either operate as a stand-alone daemon which accepts commands locally via `salt-call` or it can connect back to a master and receive commands remotely.

When starting up, salt minions connect back to a master defined in the minion config file. They connect to two ports on the master:

- TCP: 4505 This is the connection to the master Publisher. It is on this port that the minion receives jobs from the master.
29.4.2 Event System

Similar to the master, a salt-minion has its own event system that operates over IPC by default. The minion event system operates on a push/pull system with IPC files at minion_event_<unique_id>_pub.ipc and minion_event_<unique_id>_pull.ipc.

The astute reader might ask why have an event bus at all with a single-process daemon. The answer is that the salt-minion may fork other processes as required to do the work without blocking the main salt-minion process and this necessitates a mechanism by which those processes can communicate with each other. Secondarily, this provides a bus by which any user with sufficient permissions can read or write to the bus as a common interface with the salt minion.

29.4.3 Minion Job Flow

When a salt minion starts up, it attempts to connect to the Publisher and the ReqServer on the salt master. It then attempts to authenticate and once the minion has successfully authenticated, it simply listens for jobs.

Jobs normally come either come from the 'salt-call' script run by a local user on the salt minion or they can come directly from a master.

The job flow on a minion, coming from the master via a 'salt' command is as follows:

1) A master publishes a job that is received by a minion as outlined by the master's job flow above. 2) The minion is polling its receive socket that's connected to the master Publisher (TCP 4505 on master). When it detects an incoming message, it picks it up from the socket and decrypts it. 3) A new minion process or thread is created and provided with the contents of the decrypted message. The _thread_return() method is provided with the contents of the received message. 4) The new minion thread is created. The _thread_return() function starts up and actually calls out to the requested function contained in the job. 5) The requested function runs and returns a result. [Still in thread.] 6) The result of the function that's run is encrypted and returned to the master's ReqServer (TCP 4506 on master). [Still in thread.] 7) Thread exits. Because the main thread was only blocked for the time that it took to initialize the worker thread, many other requests could have been received and processed during this time.

29.5 A Note on ClearFuncs vs. AESFuncs

A common source of confusion is determining when messages are passed in the clear and when they are passed using encryption. There are two rules governing this behaviour:

1) ClearFuncs is used for intra-master communication and during the initial authentication handshake between a minion and master during the key exchange. 2) AESFuncs is used everywhere else.
29.6 Changelog

With the addition of SEP 01 the keepachangelog format was introduced into our CHANGELOG.md file. The Salt project is using the towncrier tool to manage the CHANGELOG.md file. The reason this tool was added to manage the changelog was because we were previously managing the file manually and it would cause many merge conflicts. This tool allows us to add changelog entries into separate files and before a release we simply need to run towncrier --version=<version> for it to compile the changelog correctly.

29.6.1 How do I add a changelog entry

To add a changelog entry you will need to add a file in the changelog directory. The file name should follow the syntax <issue #>.<type>.

The types are in alignment with keepachangelog:

- **removed**: any features that have been removed
- **deprecated**: any features that will soon be removed
- **changed**: any changes in current existing features
- **fixed**: any bug fixes
- **added**: any new features added

For example if you are fixing a bug for issue number #1234 your filename would look like this: changelog/1234.fixed. The contents of the file should contain a summary of what you are fixing. If there is a legitimate reason to not include an issue number with a given contribution you can add the PR number as the file name (<PR #>.<type>).

If your PR does not align with any of the types, then you do not need to add a changelog entry.

29.6.2 How to generate the changelog

This step is only used when we need to generate the changelog right before releasing. You should NOT run towncrier on your PR, unless you are preparing the final PR to update the changelog before a release.

You can run the towncrier tool directly or you can use nox to help run the command and ensure towncrier is installed in a virtual environment. The instructions below will detail both approaches.

If you want to see what output towncrier will produce before generating the change log you can run towncrier in draft mode:

```bash
towncrier --draft --version=3001
```

```bash
nox -e 'changelog(draft=True)' -- 3000.1
```

Version will need to be set to whichever version we are about to release. Once you are confident the draft output looks correct you can now generate the changelog by running:

```bash
towncrier --version=3001
```

```bash
nox -e 'changelog(draft=False)' -- 3000.1
```

After this is run towncrier will automatically remove all the files in the changelog directory.
29.7 Contributing

So you want to contribute to the Salt project? Excellent! You can help in a number of ways:

- Using Salt and opening well-written bug reports.
- Joining a working group.
- Answering questions on irc, the community Slack, the salt-users mailing list, Server Fault, or r/saltstack on Reddit.
- Fixing bugs.
- Enhancing the documentation.
- Providing workarounds, patches, or other code without tests.
- Telling other people about problems you solved using Salt.

If you’d like to update docs or fix an issue, you’re going to need the Salt repo. The best way to contribute is using Git.

29.7.1 Environment Setup

To hack on Salt or the docs you’re going to need to set up your development environment. If you already have a workflow that you’re comfortable with, you can use that, but otherwise this is an opinionated guide for setting up your dev environment. Follow these steps and you’ll end out with a functioning dev environment and be able to submit your first PR.

This guide assumes at least a passing familiarity with Git, a common version control tool used across many open source projects, and is necessary for contributing to Salt. For an introduction to Git, watch Salt Docs Clinic - Git For the True Beginner. Because of its widespread use, there are many resources for learning more about Git. One popular resource is the free online book Learn Git in a Month of Lunches.

29.7.2 pyenv, Virtual Environments, and You

We recommend pyenv, since it allows installing multiple different Python versions, which is important for testing Salt across all the versions of Python that we support.

On Linux

Install pyenv:

```
git clone https://github.com/pyenv/pyenv.git ~/.pyenv
export PATH="$HOME/.pyenv/bin:$PATH"
git clone https://github.com/pyenv/pyenv-virtualenv.git $(pyenv root)/plugins/pyenv-
  virtualenv
```
On Mac

Install pyenv using brew:

```
brew update
brew install pyenv
brew install pyenv-virtualenv
```

Now add pyenv to your .bashrc:

```
export PATH=~/.pyenv/bin:$PATH
```

For other shells, see the pyenv instructions.

Go ahead and restart your shell. Now you should be able to install a new version of Python:

```
pyenv install 3.7.0
```

If that fails, don’t panic! You’re probably just missing some build dependencies. Check out pyenv common build problems.

Now that you’ve got your version of Python installed, you can create a new virtual environment with this command:

```
pyenv virtualenv 3.7.0 salt
```

Then activate it:

```
pyenv activate salt
```

Sweet! Now you’re ready to clone Salt so you can start hacking away! If you get stuck at any point, check out the resources at the beginning of this guide. IRC and Slack are particularly helpful places to go.

Get The Source!

Salt uses the fork and clone workflow for Git contributions. See Using the Fork-and-Branch Git Workflow for how to implement it. But if you just want to hurry and get started you can go ahead and follow these steps:

Clones are so shallow. Well, this one is anyway:

```
git clone --depth=1 --origin salt https://github.com/saltstack/salt.git
```

This creates a shallow clone of Salt, which should be fast. Most of the time that’s all you’ll need, and you can start building out other commits as you go. If you really want all 108,300+ commits you can just run `git fetch --unshallow`. Then go make a sandwich because it’s gonna be a while.

You’re also going to want to head over to GitHub and create your own fork of Salt. Once you’ve got that set up you can add it as a remote:

```
git remote add yourname <YOUR SALT REMOTE>
```

If you use your name to refer to your fork, and salt to refer to the official Salt repo you’ll never get upstream or origin confused.

Note: Each time you start work on a new issue you should fetch the most recent changes from salt/upstream.
**pre-commit and nox Setup**

Here at Salt we use pre-commit and nox to make it easier for contributors to get quick feedback, for quality control, and to increase the chance that your merge request will get reviewed and merged. Nox enables us to run multiple different test configurations, as well as other common tasks. You can think of it as Make with superpowers. Pre-commit does what it sounds like: it configures some Git pre-commit hooks to run black for formatting, isort for keeping our imports sorted, and pylint to catch issues like unused imports, among others. You can easily install them in your virtualenv with:

```
python -m pip install pre-commit nox
pre-commit install
```

**Warning:** Currently there is an issue with the pip-tools-compile pre-commit hook on Windows. The details around this issue are included here: https://github.com/saltstack/salt/issues/56642. Please ensure you export SKIP=pip-tools-compile to skip pip-tools-compile.

Now before each commit, it will ensure that your code at least looks right before you open a pull request. And with that step, it’s time to start hacking on Salt!

**imagemagick Setup**

One last prerequisite is to have imagemagick installed, as it is required by Sphinx for generating the HTML documentation.

```
# On Mac, via homebrew
brew install imagemagick
# Example Linux installation: Debian-based
sudo apt install imagemagick
```

**29.7.3 Salt Issues**

**Create Your Own**

Perhaps you’ve come to this guide because you found a problem in Salt, and you’ve diagnosed the cause. Maybe you need some help figuring out the problem. In any case, creating quality bug reports is a great way to contribute to Salt even if you lack the skills, time, or inclination to fix it yourself. If that’s the case, head on over to Salt’s issue tracker on GitHub.

Creating a good report can take a little bit of time - but every minute you invest in making it easier for others to reproduce and understand your issue is time well spent. The faster someone can understand your issue, the faster it will be able to get fixed correctly.

The thing that every issue needs goes by many names, but one at least as good as any other is MCVE - Minimum Complete Verifiable Example.

In a nutshell:

- **Minimum:** All of the extra information has been removed. Will 2 or 3 lines of master/minion config still exhibit the behavior?
• **Complete**: Minimum also means complete. If your example is missing information, then it’s not complete. Salt, Python, and OS versions are all bits of information that make your example complete. Have you provided the commands that you ran?

• **Verifiable**: Can someone take your report and reproduce it?

Slow is smooth, and smooth is fast - it may feel like you’re taking a long time to create your issue if you’re creating a proper MCVE, but a MCVE eliminates back and forth required to reproduce/verify the issue so someone can actually create a fix.

**Pick An Issue**

If you don’t already have an issue in mind, you can search for help wanted issues. If you also search for good first issue then you should be able to find some issues that are good for getting started contributing to Salt. Documentation issues are also good starter issues. When you find an issue that catches your eye (or one of your own), it’s a good idea to comment on the issue and mention that you’re working on it. Good communication is key to collaboration - so if you don’t have time to complete work on the issue, just leaving some information about when you expect to pick things up again is a great idea!

**29.7.4 Hacking Away**

**Salt, Tests, Documentation, and You**

Before approving code contributions, Salt requires:

- documentation
- meaningful passing tests
- correct code

Documentation fixes just require correct documentation.

**What If I Don’t Write Tests or Docs?**

If you aren’t into writing documentation or tests, we still welcome your contributions! But your PR will be labeled Needs Testcase and Help Wanted until someone can get to write the tests/documentation. Of course, if you have a desire but just lack the skill we are more than happy to collaborate and help out! There’s the documentation working group and the testing working group. We also regularly stream our test clinic live on Twitch every Tuesday afternoon and Thursday morning, Central Time. If you’d like specific help with tests, bring them to the clinic. If no community members need help, you can also just watch tests written in real time.

**Documentation**

Salt uses both docstrings, as well as normal reStructuredText files in the salt/doc folder for documentation. Sphinx is used to generate the documentation, and does require setting up imagemagick on your OS. Since we use nox, you can build your docs and view them in your browser with this one-liner:

```bash
python -m nox -e 'docs-html(compress=False, clean=False)'; cd doc/_build/html; python -m webbrowser http://localhost:8000/contents.html; python -m http.server
```

The first time this will take a while because there are a lot of modules. Maybe you should go grab some dessert if you already finished that sandwich. But once Sphinx is done building the docs, python should launch your default
Now you can navigate to your docs and ensure your changes exist. If you make changes, you can simply run this:

```
cd ~; python -m nox -e 'docs-html(compress=False, clean=False)'; cd doc/_build/html; python -m http.server
```

And then refresh your browser to get your updated docs. This one should be quite a bit faster since Sphinx won’t need to rebuild everything.

If your change is a docs-only change, you can go ahead and commit/push your code and open a PR. You can indicate that it’s a docs-only change by adding [Documentation] to the title of your PR. Otherwise you’ll want to write some tests and code.

**Running Development Salt**

Note: If you run into any issues in this section, check the Troubleshooting section.

If you’re going to hack on the Salt codebase you’re going to want to be able to run Salt locally. The first thing you need to do is install Salt as an editable pip install:

```
python -m pip install -e .
```

This will let you make changes to Salt without having to re-install it.

After all of the dependencies and Salt are installed, it’s time to set up the config for development. Typically Salt runs as root, but you can specify which user to run as. To configure that, just copy the master and minion configs. We have .gitignore setup to ignore the local/ directory, so we can put all of our personal files there.

```
mkdir -p local/etc/salt/
```

Create a master config file as local/etc/salt/master:

```
cat <<EOF >local/etc/salt/master
user: $(whoami)
root_dir: $PWD/local/
publish_port: 55505
ret_port: 55506
EOF
```

And a minion config as local/etc/salt/minion:

```
cat <<EOF >local/etc/salt/minion
user: $(whoami)
root_dir: $PWD/local/
master: localhost
id: saltdev
master_port: 55506
EOF
```

Now you can start your Salt master and minion, specifying the config dir.

```
salt-master --config-dir=local/etc/salt/ --log-level=debug --daemon
salt-minion --config-dir=local/etc/salt/ --log-level=debug --daemon
```

Now you should be able to accept the minion key:

```
salt-key -c local/etc/salt -Ay
```
And check that your master/minion are communicating:

```
salt -c local/etc/salt \* test.version
```

Rather than running `test.version` from your master, you can run it from the minion instead:

```
salt-call -c local/etc/salt test version
```

Note that you’re running `salt-call` instead of `salt`, and you’re not specifying the minion (`\*`), but if you’re running the dev version then you still will need to pass in the config dir. Now that you’ve got Salt running, you can hack away on the Salt codebase!

If you need to restart Salt for some reason, if you’ve made changes and they don’t appear to be reflected, this is one option:

```
kill -INT $(pgrep salt-master)
kil -INT $(pgrep salt-minion)
```

If you’d rather not use `kill`, you can have a couple of terminals open with your salt virtualenv activated and omit the `--daemon` argument. Salt will run in the foreground, so you can just use `ctrl+c` to quit.

**Test First? Test Last? Test Meaningfully!**

You can write tests first or tests last, as long as your tests are meaningful and complete! *Typically* the best tests for Salt are going to be unit tests. Testing is a whole topic on its own, but you may also want to write functional or integration tests. You’ll find those in the `salt/tests` directory.

When you’re thinking about tests to write, the most important thing to keep in mind is, “What, exactly, am I testing?” When a test fails, you should know:

- What, specifically, failed?
- Why did it fail?
- As much as possible, what do I need to do to fix this failure?

If you can’t answer those questions then you might need to refactor your tests.

When you’re running tests locally, you should make sure that if you remove your code changes your tests are failing. If your tests aren’t failing when you haven’t yet made changes, then it’s possible that you’re testing the wrong thing.

But whether you adhere to TDD/BDD, or you write your code first and your tests last, ensure that your tests are meaningful.

**Running Tests**

As previously mentioned, we use `nox`, and that’s how we run our tests. You should have it installed by this point but if not you can install it with this:

```
python -m pip install nox
```

Now you can run your tests:

```
python -m nox -e "pytest-3.7(coverage=False)" -- tests/unit/cli/test_batch.py
```

It’s a good idea to install `espeak` or use `say` on Mac if you’re running some long-running tests. You can do something like this:
That way you don’t have to keep monitoring the actual test run.

### Changelog and Commit!

When you write your commit message you should use imperative style. Do this:

- Add frobnosticate capability

Don’t do this:

- Added frobnosticate capability

But that advice is backwards for the changelog. We follow the keepachangelog approach for our changelog, and use towncrier to generate it for each release. As a contributor, all that means is that you need to add a file to the `salt/changelog` directory, using the `<issue #>.<type>` format. For instance, if you fixed issue 123, you would do:

    ```bash
    echo "Made sys.doc inform when no minions return" > changelog/123.fixed
    ```

And that’s all that would go into your file. When it comes to your commit message, it’s usually a good idea to add other information, such as

- What does a reviewer need to know about the change that you made?
- If someone isn’t an expert in this area, what will they need to know?

This will also help you out, because when you go to create the PR it will automatically insert the body of your commit messages.

### 29.7.5 PR Time!

Once you’ve done all your dev work and tested locally, you should check out our PR guidelines. After you read that page, it’s time to open a new PR. Fill out the PR template - you should have updated or created any necessary docs, and written tests if you’re providing a code change. When you submit your PR, we have a suite of tests that will run across different platforms to help ensure that no known bugs were introduced.

### Now What?

You’ve made your changes, added documentation, opened your PR, and have passing tests... now what? When can you expect your code to be merged?

When you open your PR, a reviewer will get automatically assigned. If your PR is submitted during the week you should be able to expect some kind of communication within that business day. If your tests are passing and we’re not in a code freeze, ideally your code will be merged that day. If you haven’t heard from your assigned reviewer, ping them on GitHub, irc, or Community Slack.

It’s likely that your reviewer will leave some comments that need addressing - it may be a style change, or you forgot a changelog entry, or need to update the docs. Maybe it’s something more fundamental - perhaps you encountered the rare case where your PR has a much larger scope than initially assumed.

Whatever the case, simply make the requested changes (or discuss why the requests are incorrect), and push up your new commits. If your PR is open for a significant period of time it may be worth rebasing your changes on the most recent changes to Salt. If you need help, the previously linked Git resources will be valuable.
But if, for whatever reason, you’re not interested in driving your PR to completion then just note that in your PR. Something like, “I’m not interested in writing docs/tests, I just wanted to provide this fix - someone else will need to complete this PR.” If you do that then we’ll add a “Help Wanted” label and someone will be able to pick up the PR, make the required changes, and it can eventually get merged in.

In any case, now that you have a PR open, congrats! You’re a Salt developer! You rock!

### 29.7.6 Troubleshooting

#### zmq.core.error.ZMQError

Once the minion starts, you may see an error like the following:

:::

```
zmq.core.error.ZMQError: ipc path "/path/to/your/virtualenv/var/run/salt/minion/minion_event_7824dcbcfdf7a8f6755939af70b9f9e_pub.ipc" is longer than 107 characters (sizeof(sockaddr_un.sun_path)).
```

This means that the path to the socket the minion is using is too long. This is a system limitation, so the only workaround is to reduce the length of this path. This can be done in a couple different ways:

1. Create your virtualenv in a path that is short enough.
2. Edit the `conf_minion:sock_dir` minion config variable and reduce its length. Remember that this path is relative to the value you set in `conf_minion:root_dir`.

   **NOTE:** The socket path is limited to 107 characters on Solaris and Linux, and 103 characters on BSD-based systems.

#### No permissions to access ...

If you forget to pass your config path to any of the `salt*` commands, you might see

```
No permissions to access "/var/log/salt/master", are you running as the correct user?
```

Just pass `-c local/etc/salt` (or whatever you named it)

#### File descriptor limit

You might need to raise your file descriptor limit. You can check it with:

```
ulimit -n
```

If the value is less than 3072, you should increase it with:

```
ulimit -n 3072
# For c-shell:
limit descriptors 3072
```
Pygit2 or other dependency install fails

You may see some failure messages when installing requirements. You can directly access your nox environment and possibly install pygit (or other dependency) that way. When you run nox, you’ll see a message like this:

```
nox > Re-using existing virtual environment at .nox/pytest-parametrized-3-crypto-none-transport-zeromq-coverage-false.
```

For this, you would be able to install with:

```
.pox/pytest-parametrized-3-crypto-none-transport-zeromq-coverage-false/bin/python -m pip install pygit2
```

### 29.8 Deprecating Code

Salt should remain backwards compatible, though sometimes, this backwards compatibility needs to be broken because a specific feature and/or solution is no longer necessary or required. At first one might think, let me change this code, it seems that it’s not used anywhere else so it should be safe to remove. Then, once there’s a new release, users complain about functionality which was removed and they where using it, etc. This should, at all costs, be avoided, and, in these cases, *that* specific code should be deprecated.

In order to give users enough time to migrate from the old code behavior to the new behavior, the deprecation time frame should be carefully determined based on the significance and complexity of the changes required by the user.

Salt feature releases are based on the Periodic Table. Any new features going into the `master` branch will be named after the next element in the Periodic Table. For example, Magnesium was the feature release name associated with the v3002 tag. At that point in time, any new features going into the `master` branch, after v3002 was tagged, were part of the Aluminium feature release.

A deprecation warning should be in place for at least two major releases before the deprecated code and its accompanying deprecation warning are removed. More time should be given for more complex changes. For example, if the current release under development is 3001, the deprecated code and associated warnings should remain in place and warn for at least Aluminium.

To help in this deprecation task, salt provides `salt.utils.versions.warn_until`. The idea behind this helper function is to show the deprecation warning to the user until salt reaches the provided version. Once that provided version is equaled `salt.utils.versions.warn_until` will raise a RuntimeError making salt stop its execution. This stoppage is unpleasant and will remind the developer that the deprecation limit has been reached and that the code can then be safely removed.

Consider the following example:

```python
def some_function(bar=False, foo=None):
    if foo is not None:
        salt.utils.versions.warn_until("Aluminium",
            "The 'foo' argument has been deprecated and its "
            "functionality removed, as such, its usage is no longer "
            "required.",
            )
```

Development begins on Aluminium, or v3003, after the v3002 tag is applied to the `master` branch. Once this occurs, all uses of the `warn_until` function targeting Aluminium, along with the code they are warning about should be removed from the code.
29.9 Python 2 Deprecation FAQ

FAQ

- **Python 2 Deprecation FAQ**
  - Why are we deprecating Python 2?
  - Was this announced/decided before making the change?
  - Can I contribute Python 2 code?
  - What if my OS does not include Python 3 packages? Or, how do I upgrade from Salt on Python 2 to Salt on Python 3?
    - On Modern Platforms
    - On Other Platforms
      - Build Your Own
      - **pop-build distributions**
        - Will you support a Python 3 master with an older Python 2 minion?
        - Will you support Python 2 master with a new Python 3 minion?
        - How does this impact Salt-SSH support?
        - What is your plan for removing Python 2 code?
        - Will Salt continue to package for Python 2?

29.9.1 Why are we deprecating Python 2?

Python 2.7.18 was the final release of Python2, released in April 2020. At this point, Python 2 will no longer receive any unpaid support. The Python core developers are focusing their efforts on improving and enhancing Python 3. Additionally, many libraries that Salt depends on have also dropped Python 2 support.

To take advantage of continued support and improvements, Salt is joining the ranks of projects that are dropping legacy Python support in favor of Python 3.

29.9.2 Was this announced/decided before making the change?

SEP 5 was approved in April, 2019.

29.9.3 Can I contribute Python 2 code?

For several years, Salt has been a Python 2/3 codebase, requiring Python 3 support for all contributions. The only changes contributors can expect to this process is that we will now accept Python 3-only code changes.

While there is a significant subset of Python that is compatible with both Python 3 and legacy Python, changes requiring six or otherwise removing Python 3-only code will not be accepted.
29.9.4 What if my OS does not include Python 3 packages? Or, how do I upgrade from Salt on Python 2 to Salt on Python 3?

There are several options to upgrade to Python 3.

On Modern Platforms

At this point, most modern Linux distributions have Python 3 packages. Ubuntu 20.04 LTS has moved to Python 3.8 as it’s default system Python.

On Other Platforms

Build Your Own

If your current distribution does not have Python 3 it’s pretty simple to use Salt to build and distribute Python 3 on your own. Installing Python 3 and pip installing Salt gives you the most control over your distribution.

pop-build distributions

Another approach is to use the pop-build distribution of Salt. With the Sodium release we will begin releasing packages for Salt using pop-build, in tandem with our normal build process. The pop-build distribution will contain Salt, Python, and any necessary dependencies, which will make it trivial to have a completely supported version of Salt.

29.9.5 Will you support a Python 3 master with an older Python 2 minion?

Yes! Our policy of keeping newer masters backwards compatible with at least the most recent minion version is not changing. You should be able to run modern Salt Masters on Python 3 with slightly older minions running on legacy Python. Of course, if you want your minions to be able to take advantage of the newest features in Salt, upgrading to Python 3 will be necessary.

29.9.6 Will you support Python 2 master with a new Python 3 minion?

In keeping with our existing policy, we make no guarantees about older masters with newer minions. It may work, but breakages are common and should be expected.

29.9.7 How does this impact Salt-SSH support?

Salt-SSH will need Python 3 on the target minions. We will be upgrading Salt-SSH to provide instructions or recommendations on adding Python3 if it is not detected.
29.9.8 What is your plan for removing Python 2 code?

Legacy Python code will be gradually removed from the Salt codebase.

While we could remove most of it at once, that introduces a high level of risk. Instead, beginning with the Sodium (v3001) release, Salt will simply drop support for Python 2. PRs will no longer be required to support Python 2 before merging.

Over time, as modules are changed, six and other legacy Python syntax will be removed. It may be at some point in the future it becomes necessary to remove the last vestiges of legacy Python from Salt, but currently the plan is to take a more measured approach.

29.9.9 Will Salt continue to package for Python 2?

No. Beginning with Sodium (v3001), Salt will no longer release packages for, or support Python 2.

29.10 Installing Salt for development

Clone the repository using:

```
git clone https://github.com/saltstack/salt
```

**Note:** tags

Just cloning the repository is enough to work with Salt and make contributions. However, fetching additional tags from git is required to have Salt report the correct version for itself. To do this, first add the git repository as an upstream source:

```
git remote add upstream https://github.com/saltstack/salt
```

Fetching tags is done with the git 'fetch' utility:

```
git fetch --tags upstream
```

Create a new virtualenv:

```
virtualenv /path/to/your/virtualenv
```

Avoid making your `virtualenv path too long`.

On Arch Linux, where Python 3 is the default installation of Python, use the `virtualenv2` command instead of `virtualenv`.

On Gentoo you must use `--system-site-packages` to enable pkg and portage_config functionality

**Note:** Using system Python modules in the virtualenv

To use already-installed python modules in virtualenv (instead of having pip download and compile new ones), run `virtualenv --system-site-packages` Using this method eliminates the requirement to install the salt dependencies again, although it does assume that the listed modules are all installed in the system PYTHONPATH at the time of virtualenv creation.
Note: Python development package

Be sure to install python-devel package in order to install required Python modules. In Debian/Ubuntu run `sudo apt-get install -y python-dev`. In RedHat based system install python-devel

Activate the virtualenv:

```bash
source /path/to/your/virtualenv/bin/activate
```

Install Salt (and dependencies) into the virtualenv:

```bash
pip install pyzmq PyYAML pycrypto msgpack jinja2 psutil futures tornado
pip install -e ./salt # the path to the salt git clone from above
```

Note: Installing psutil

Python header files are required to build this module, otherwise the pip install will fail. If your distribution separates binaries and headers into separate packages, make sure that you have the headers installed. In most Linux distributions which split the headers into their own package, this can be done by installing the python-dev or python-devel package. For other platforms, the package will likely be similarly named.

Note: Installing dependencies on macOS.

You can install needed dependencies on macOS using homebrew or macports. See macOS Installation

**Warning:** Installing on RedHat-based Distros

If installing from pip (or from source using `setup.py install`), be advised that the yum-utils package is needed for Salt to manage packages on RedHat-based systems.

### 29.10.1 Running a self-contained development version

During development it is easiest to be able to run the Salt master and minion that are installed in the virtualenv you created above, and also to have all the configuration, log, and cache files contained in the virtualenv as well.

The `/path/to/your/virtualenv` referenced multiple times below is also available in the variable `$VIRTUAL_ENV` once the virtual environment is activated.

Copy the master and minion config files into your virtualenv:

```bash
mkdir -p /path/to/your/virtualenv/etc/salt/pki/{master,minion}
cp ./salt/conf/master ./salt/conf/minion /path/to/your/virtualenv/etc/salt/
```

Edit the master config file:

1. Uncomment and change the `user`: root value to your own user.
2. Uncomment and change the `root_dir`: / value to point to `/path/to/your/virtualenv`.
3. Uncomment and change the `pki_dir`: /etc/salt/pki/master value to point to `/path/to/your/virtualenv/etc/salt/pki/master`
4. If you are running version 0.11.1 or older, uncomment, and change the pidfile: /var/run/salt-master.pid value to point to /path/to/your/virtualenv/salt-master.pid.

5. If you are also running a non-development version of Salt you will have to change the publish_port and ret_port values as well.

Edit the minion config file:

1. Repeat the edits you made in the master config for the user and root_dir values as well as any port changes.

2. Uncomment and change the pki_dir: /etc/salt/pki/minion value to point to /path/to/your/virtualenv/etc/salt/pki/minion.

3. If you are running version 0.11.1 or older, uncomment, and change the pidfile: /var/run/salt-minion.pid value to point to /path/to/your/virtualenv/salt-minion.pid.

4. Uncomment and change the master: salt value to point at localhost.

5. Uncomment and change the id: value to something descriptive like "saltdev". This isn't strictly necessary but it will serve as a reminder of which Salt installation you are working with.

6. If you changed the ret_port value in the master config because you are also running a non-development version of Salt, then you will have to change the master_port value in the minion config to match.

Note: Using salt-call with a Standalone Minion

If you plan to run salt-call with this self-contained development environment in a masterless setup, you should invoke salt-call with -c /path/to/your/virtualenv/etc/salt so that salt can find the minion config file. Without the -c option, Salt finds its config files in /etc/salt.

Start the master and minion, accept the minion's key, and verify your local Salt installation is working:

```
cd /path/to/your/virtualenv
salt-master -c ./etc/salt -d
salt-minion -c ./etc/salt -d
salt-key -c ./etc/salt -L
salt-key -c ./etc/salt -A
salt -c ./etc/salt 'test.version'
```

Running the master and minion in debug mode can be helpful when developing. To do this, add -l debug to the calls to salt-master and salt-minion. If you would like to log to the console instead of to the log file, remove the -d.

Note: Too long socket path?

Once the minion starts, you may see an error like the following:

```
ZMQError: ipc path "/path/to/your/virtualenv/var/run/salt/minion/minion_event_7824dcb8fd7a8f675599af78b96249f_pub.ipc" is longer than 107 characters (sizeof(sockaddr_un.sun_path)).
```

This means that the path to the socket the minion is using is too long. This is a system limitation, so the only workaround is to reduce the length of this path. This can be done in a couple different ways:

1. Create your virtualenv in a path that is short enough.

2. Edit the sock_dir minion config variable and reduce its length. Remember that this path is relative to the value you set in root_dir.
NOTE: The socket path is limited to 107 characters on Solaris and Linux, and 103 characters on BSD-based systems.

Note: File descriptor limits

Ensure that the system open file limit is raised to at least 2047:

```bash
# check your current limit
ulimit -n

# raise the limit. persists only until reboot
# use 'limit descriptors 2047' for c-shell
ulimit -n 2047
```

To set file descriptors on macOS, refer to the macOS Installation instructions.

Changing Default Paths

Instead of updating your configuration files to point to the new root directory and having to pass the new configuration directory path to all of Salt's CLI tools, you can explicitly tweak the default system paths that Salt expects:

```bash
GENERATE_SALT_SYSPATHS=1 pip install --global-option='--salt-root-dir=/path/to/your/virtualenv/' -e ./salt # the path to the salt git clone from above
```

You can now call all of Salt's CLI tools without explicitly passing the configuration directory.

Additional Options

If you want to distribute your virtualenv, you probably don't want to include Salt's clone .git/ directory, and, without it, Salt won't report the accurate version. You can tell setup.py to generate the hardcoded version information which is distributable:

```bash
GENERATE_SALT_SYSPATHS=1 WRITE_SALT_VERSION=1 pip install --global-option='--salt-root-dir=/path/to/your/virtualenv/' -e ./salt # the path to the salt git clone from above
```

Instead of passing those two environmental variables, you can just pass a single one which will trigger the other two:

```bash
MIMIC_SALT_INSTALL=1 pip install --global-option='--salt-root-dir=/path/to/your/virtualenv/' -e ./salt # the path to the salt git clone from above
```

This last one will grant you an editable salt installation with hardcoded system paths and version information.
29.10.2 Installing Salt from the Python Package Index

If you are installing using easy_install, you will need to define a USE_SETUPTOOLS environment variable, otherwise dependencies will not be installed:

```
USE_SETUPTOOLS=1 easy_install salt
```

29.10.3 Editing and previewing the documentation

You need sphinx-build command to build the docs. In Debian/Ubuntu this is provided in the python-sphinx package. Sphinx can also be installed to a virtualenv using pip:

```
pip install Sphinx==1.3.1
```

Change to salt documentation directory, then:

```
cd doc; make html
```

- This will build the HTML docs. Run make without any arguments to see the available make targets, which include html, man, and text.
- The docs then are built within the docs/_build/ folder. To update the docs after making changes, run make again.
- The docs use reStructuredText for markup. See a live demo at http://rst.ninjs.org/.
- The help information on each module or state is culled from the python code that runs for that piece. Find them in salt/modules/ or salt/states/.
- To build the docs on Arch Linux, the python2-sphinx package is required. Additionally, it is necessary to tell make where to find the proper sphinx-build binary, like so:

```
make SPHINXBUILD=sphinx-build2 html
```

- To build the docs on RHEL/CentOS 6, the python-sphinx10 package must be installed from EPEL, and the following make command must be used:

```
make SPHINXBUILD=sphinx-build html
```

Once you’ve updated the documentation, you can run the following command to launch a simple Python HTTP server to see your changes:

```
cd _build/html; python -m SimpleHTTPServer
```

29.10.4 Running unit and integration tests

Run the test suite with following command:

```
./setup.py test
```

See here for more information regarding the test suite.
29.10.5 Issue and Pull Request Labeling System

SaltStack uses several labeling schemes to help facilitate code contributions and bug resolution. See the *Labels and Milestones* documentation for more information.

29.11 GitHub Labels and Milestones

SaltStack uses several label categories, as well as milestones, to triage incoming issues and pull requests in the GitHub issue tracker. Labels are used to sort issues by type, priority, severity, status, functional area, functional group, and targeted release and pull requests by status, functional area, functional group, type of change, and test status. Milestones are used to indicate whether an issue is fully triaged or is scheduled to be fixed by SaltStack in an upcoming sprint.

29.11.1 Milestones

All issues are assigned to a milestone, whereas pull requests are almost never assigned to a milestone as the mean lifetime of pull requests is short enough that there is no need to track them temporally.

SaltStack uses milestones to indicate which issues are blocked on submitter or upstream actions, are approved, or are scheduled to be fixed or implemented in an upcoming sprint. If an issue is not attached to a sprint milestone, you are welcome to work on it at your own desire and convenience. If it is attached to a sprint milestone and you have already begun working on it or have a solution in mind or have other ideas related to the issue, you are encouraged to coordinate with the assignee via the GitHub issue tracker to create the best possible solution or implementation.

- Approved - The issue has been validated and has all necessary information.
- Blocked - The issue is waiting on actions by parties outside of SaltStack, such as receiving more information from the submitter or resolution of an upstream issue. This milestone is usually applied in conjunction with the labels *Info Needed, Question, Expected Behavior, Won't Fix For Now*, or *Upstream Bug*.

29.11.2 Labels

Labels are used to sort and describe issues and pull requests. Some labels are usually reserved for one or the other, though most labels may be applied to both.

New issues will receive at least one label and a milestone, and new pull requests will receive at least one label. Except for the *functional area* and *functional group* label categories, issues will generally receive only up to one label per category.

**Type**

Issues are categorized into one of several types. Type labels are almost never used for pull requests. GitHub treats pull requests like issues in many ways, so a pull request could be considered an issue with an implicit *Pull Request* type label applied.

- **Feature** - The issue is a request for new functionality including changes, enhancements, refactors, etc.
- **Bug** - The issue documents broken, incorrect, or confusing behavior. This label is always accompanied by a *severity label*.
- **Duplicate** - The issue is a duplicate of another feature request or bug report.
- **Upstream Bug** - The issue is a result of an upstream issue.
• **Question** - The issue is more of a question than a request for new features or a report of broken features, but can sometimes lead to further discussion or changes of confusing or incongruous behavior or documentation.

• **Expected Behavior** - The issue is a bug report of intended functionality.

**Priority**

An issue’s priority is relative to its *functional area*. If a bug report, for example, about *gitfs* indicates that all users of *gitfs* will encounter this bug, then a P1 label will be applied, even though users who are not using *gitfs* will not encounter the bug. If a feature is requested by many users, it may be given a high priority.

- **P1** - The issue will be seen by all users.
- **P2** - The issue will be seen by most users.
- **P3** - The issue will be seen by about half of users.
- **P4** - The issue will not be seen by most users. Usually the issue is a very specific use case or corner case.

**Severity**

Severity labels are almost always only applied to issues labeled *Bug*.

- **Blocker** - The issue is blocking an impending release.
- **Critical** - The issue causes data loss, crashes or hangs salt processes, makes the system unresponsive, etc.
- **High Severity** - The issue reports incorrect functionality, bad functionality, a confusing user experience, etc.
- **Medium Severity** - The issue reports cosmetic items, formatting, spelling, colors, etc.

**Functional Area**

Many major components of Salt have corresponding GitHub labels. These labels are applied to all issues and pull requests as is reasonably appropriate. They are useful in organizing issues and pull requests according to the source code relevant to issues or the source code changed by pull requests.

- **Execution Module**
- **File Servers**
- **Grains**
- **Multi-Master**
- **Packaging** Related to packaging of Salt, not Salt’s support for package management.
- **Pillar**
- **RAET**
- **Returners**
- **Runners**
- **SPM**
- **Salt-API**
- **Salt-Cloud**
- **Salt-SSH**
Functional Group

These labels sort issues and pull requests according to the internal SaltStack engineering teams.

- **Core** - The issue or pull request relates to code that is central or existential to Salt itself.
- **Platform** - The issue or pull request relates to support and integration with various platforms like traditional operating systems as well as containers, platform-based utilities like filesystems, command schedulers, etc., and system-based applications like webservers, databases, etc.
- **RIoT** - The issue or pull request relates to support and integration with various abstract systems like cloud providers, hypervisors, API-based services, etc.
- **Console** - The issue or pull request relates to the SaltStack enterprise console.
- **Documentation** - The issue or pull request relates to documentation.

Status

Status labels are used to define and track the state of issues and pull requests. Not all potential statuses correspond to a label, but some statuses are common enough that labels have been created for them. If an issue has not been moved beyond the Blocked milestone, it is very likely that it will only have a status label.

- **Cannot Reproduce** - The issue is a bug and has been reviewed by a SaltStack engineer, but it cannot be replicated with the provided information and context. Those involved with the bug will need to work through additional ideas until the bug can be isolated and verified.
- **Confirmed** - The issue is a bug and has been confirmed by a SaltStack engineer, who often documents a minimal working example that reproduces the bug.
- **Fixed Pending Verification** - The issue is a bug and has been fixed by one or more pull requests, which should link to the issue. Closure of the issue is contingent upon confirmation of resolution from the submitter. If the submitter reports a negative confirmation, this label is removed. If no response is given after a few weeks, then the issue will be assumed fixed and closed.
- **Info Needed** - The issue needs more information before it can be verified and resolved. For a feature request this may include a description of the use cases. Almost all bug reports need to include at least the versions of salt and its dependencies, the system type and version, commands used, debug logs, error messages, and relevant configs.
- **Pending Changes** - The pull request needs additional changes before it can be merged.
- **Pending Discussion** - The issue or pull request needs more discussion before it can be closed or merged. The status of the issue or pull request is not clear or apparent enough for definite action to be taken, or additional input from SaltStack, the submitter, or another party has been requested.

If the issue is not a pull request, once the discussion has arrived at a cogent conclusion, this label will be removed and the issue will be accepted. If it is a pull request, the results of the discussion may require additional changes and thus, a Pending Changes label.
• won't-fix - The issue is legitimate, but it is not something the Salt core team is currently able or willing to fix or implement. Issues having this label may be revisited in the future, or solved by a Salt community member.

Test Status

These labels relate to the status of the automated tests that run on pull requests.

• has-failing-test - The PR currently has one or more failing tests that prevent the PR from being merged.
• Needs Testcase - The PR has code changes, but lack any automated tests. These PRs need automated tests written before they may be merged.

Other

These labels indicate miscellaneous issue types or statuses that are common or important enough to be tracked and sorted with labels.

• Awesome - The pull request implements an especially well crafted solution, or a very difficult but necessary change.
• Help Wanted - The issue appears to have a simple solution. Issues having this label should be a good starting place for new contributors to Salt.
• Regression - The issue is a bug that breaks functionality known to work in previous releases.
• Story - The issue is used by a SaltStack engineer to track progress on multiple related issues in a single place.
• Stretch - The issue is an optional goal for the current sprint but may not be delivered.
• ZD - The issue is related to a Zendesk customer support ticket.
• <Release> - The issue is scheduled to be implemented by <Release>. See here for a discussion of Salt's release codenames.

29.12 Logging Internals

TODO

29.13 Package Providers

This page contains guidelines for writing package providers.

29.13.1 Package Functions

One of the most important features of Salt is package management. There is no shortage of package managers, so in the interest of providing a consistent experience in pkg states, there are certain functions that should be present in a package provider. Note that these are subject to change as new features are added or existing features are enhanced.
list_pkgs

This function should declare an empty dict, and then add packages to it by calling `pkg_resource.add_pkg`, like so:

```python
__salt__['pkg_resource.add_pkg'](ret, name, version)
```

The last thing that should be done before returning is to execute `pkg_resource.sort_pkglist`. This function does not presently do anything to the return dict, but will be used in future versions of Salt.

```python
__salt__['pkg_resource.sort_pkglist'](ret)
```

`list_pkgs` returns a dictionary of installed packages, with the keys being the package names and the values being the version installed. Example return data:

```python
{"foo": "1.2.3-4", "bar": "5.6.7-8"}
```

latest_version

Accepts an arbitrary number of arguments. Each argument is a package name. The return value for a package will be an empty string if the package is not found or if the package is up-to-date. The only case in which a non-empty string is returned is if the package is available for new installation (i.e. not already installed) or if there is an upgrade available.

If only one argument was passed, this function return a string, otherwise a dict of name/version pairs is returned.

This function must also accept `**kwargs`, in order to receive the `fromrepo` and `repo` keyword arguments from pkg states. Where supported, these arguments should be used to find the install/upgrade candidate in the specified repository. The `fromrepo` kwarg takes precedence over `repo`, so if both of those kwargs are present, the repository specified in `fromrepo` should be used. However, if `repo` is used instead of `fromrepo`, it should still work, to preserve backwards compatibility with older versions of Salt.

version

Like `latest_version`, accepts an arbitrary number of arguments and returns a string if a single package name was passed, or a dict of name/value pairs if more than one was passed. The only difference is that the return values are the currently-installed versions of whatever packages are passed. If the package is not installed, an empty string is returned for that package.

upgrade_available

Deprecated and destined to be removed. For now, should just do the following:

```python
def myfunc():
    return __salt__['pkg.latest_version'](name) != ""
```
1. **install**

   The following arguments are required and should default to `None`:
   1. `name` (for single-package pkg states)
   2. `pkgs` (for multiple-package pkg states)
   3. `sources` (for binary package file installation)

   The first thing that this function should do is call `pkg_resource.parse_targets` (see below). This function will convert the SLS input into a more easily parsed data structure. `pkg_resource.parse_targets` may need to be modified to support your new package provider, as it does things like parsing package metadata which cannot be done for every package management system.

   ```python
   pkg_params, pkg_type = __salt__[
       "pkg_resource.parse_targets"](name, pkgs, sources)
   ```

   Two values will be returned to the `install` function. The first of them will be a dictionary. The keys of this dictionary will be package names, though the values will differ depending on what kind of installation is being done:
   - If `name` was provided (and `pkgs` was not), then there will be a single key in the dictionary, and its value will be `None`. Once the data has been returned, if the `version` keyword argument was provided, then it should replace the `None` value in the dictionary.
   - If `pkgs` was provided, then `name` is ignored, and the dictionary will contain one entry for each package in the `pkgs` list. The values in the dictionary will be `None` if a version was not specified for the package, and the desired version if specified. See the Multiple Package Installation Options section of the `pkg.installed` state for more info.
   - If `sources` was provided, then `name` is ignored, and the dictionary values will be the path/URI for the package.

   The second return value will be a string with two possible values: `repository` or `file`. The `install` function can use this value (if necessary) to build the proper command to install the targeted package(s).

   Both before and after the installing the target(s), you should run `list_pkgs` to obtain a list of the installed packages. You should then return the output of `salt.utils.data.compare_dicts()`:

   ```python
   def myfunc():
       return salt.utils.data.compare_dicts(old, new)
   ```

2. **remove**

   Removes the passed package and return a list of the packages removed.

### 29.13.2 Package Repo Functions

There are some functions provided by `pkg` which are specific to package repositories, and not to packages themselves. When writing modules for new package managers, these functions should be made available as stated below, in order to provide compatibility with the `pkgrepo` state.

All repo functions should accept a `basedir` option, which defines which directory repository configuration should be found in. The default for this is dictated by the repo manager that is being used, and rarely needs to be changed.

```python
basedir = "/etc/yum.repos.d"
__salt__[
    "pkg.list_repos"](basedir)
```
list_repos

Lists the repositories that are currently configured on this system.

__salt__['pkg.list_repos']()

Returns a dictionary, in the following format:

```python
{'reponame': 'config_key_1': 'config value 1',
 'config_key_2': 'config value 2',
 'config_key_3': ['list item 1 (when appropriate)',
                  'list item 2 (when appropriate)']}
```

get_repo

Displays all local configuration for a specific repository.

__salt__['pkg.get_repo'](repo="myrepo")

The information is formatted in much the same way as list_repos, but is specific to only one repo.

```python
{'config_key_1': 'config value 1',
 'config_key_2': 'config value 2',
 'config_key_3': ['list item 1 (when appropriate)',
                  'list item 2 (when appropriate)']}
```

del_repo

Removes the local configuration for a specific repository. Requires a repo argument, which must match the locally configured name. This function returns a string, which informs the user as to whether or not the operation was a success.

__salt__['pkg.del_repo'](repo="myrepo")

mod_repo

Modify the local configuration for one or more option for a configured repo. This is also the way to create new repository configuration on the local system; if a repo is specified which does not yet exist, it will be created.

The options specified for this function are specific to the system; please refer to the documentation for your specific repo manager for specifics.

__salt__['pkg.mod_repo'](repo="myrepo", url="http://myurl.com/repo")
29.13.3 Low-Package Functions

In general, the standard package functions as describes above will meet your needs. These functions use the system's native repo manager (for instance, yum or the apt tools). In most cases, the repo manager is actually separate from the package manager. For instance, yum is usually a front-end for rpm, and apt is usually a front-end for dpkg. When possible, the package functions that use those package managers directly should do so through the low package functions.

It is normal and sane for pkg to make calls to lowpkg, but lowpkg must never make calls to pkg. This is affects functions which are required by both pkg and lowpkg, but the technique in pkg is more performant than what is available to lowpkg. When this is the case, the lowpkg function that requires that technique must still use the lowpkg version.

list_pkgs

Returns a dict of packages installed, including the package name and version. Can accept a list of packages; if none are specified, then all installed packages will be listed.

```python
installed = __salt__["lowpkg.list_pkgs"]("foo", "bar")
```

Example output:

```json
{"foo": "1.2.3-4", "bar": "5.6.7-8"}
```

verify

Many (but not all) package management systems provide a way to verify that the files installed by the package manager have or have not changed. This function accepts a list of packages; if none are specified, all packages will be included.

```python
installed = __salt__["lowpkg.verify"]("httpd")
```

Example output:

```json
{
    "/etc/httpd/conf/httpd.conf": {
        "mismatch": ["size", "md5sum", "mtime"],
        "type": "config",
    }
}
```

file_list

Lists all of the files installed by all packages specified. If not packages are specified, then all files for all known packages are returned.

```python
installed = __salt__["lowpkg.file_list"]("httpd", "apache")
```

This function does not return which files belong to which packages; all files are returned as one giant list (hence the file_list function name. However, This information is still returned inside of a dict, so that it can provide any errors to the user in a sane manner.
file_dict

Lists all of the files installed by all packages specified. If not packages are specified, then all files for all known packages are returned.

```
file_dict = __salt__['lowpkg.file_dict']('httpd', 'apache', 'kernel')
```

Unlike `file_list`, this function will break down which files belong to which packages. It will also return errors in the same manner as `file_list`.

```
{  
    "errors": ["package apache is not installed"],  
    "files": ["/etc/httpd", "/etc/httpd/conf", "/etc/httpd/conf.d", "...SNIP..."], 
}
```

### 29.14 Pull Requests

Salt is a large software project with many developers working together. We encourage all Salt users to contribute new features, bug fixes and documentation fixes. For those who haven't contributed to a large software project before we encourage you to consider the following questions when preparing a pull request.

This isn’t an exhaustive list and these aren’t necessarily hard and fast rules, but these are things we consider when reviewing a pull request.

- Does this change work on all platforms? In cases where it does not, is an appropriate and easy-to-understand reason presented to the user? Is it documented as-such? Have we thought about all the possible ways this code might be used and accounted as best we can for them?

- Will this code work on versions of all Python we support? Will it work on future versions?

- Are Python reserved keywords used? Are variables named in a way that will make it easy for the next person to understand what’s going on?

- Does this code present a security risk in any way? What is the worst possible thing that an attacker could do with this code? If dangerous cases are possible, is it appropriate to document them? If so, has this been done? Would this change pass muster with a professional security audit? Is it obvious to a person using this code what the risks are?

- Is it readable? Does it conform to our style guide? Is the code documented such that the next person who comes along will be able to read and understand it? Most especially, are edge-cases documented to avoid regressions? Will it be immediately evident to the next person who comes along why this change was made?
• If appropriate, has the person who wrote the code which is being modified been notified and included in the process?

• What are the performance implications of this change? Is there a more efficient way to structure the logic and if so, does making the change balance itself against readability in a sensible way? Do the performance characteristics of the code change based on the way it is being invoked (i.e., through an API or various command-line tools.) Will it be easy to profile this change if it might be a problem?

• Are caveats considered and documented in the change?

• Will the code scale? More critically, will it scale in both directions? Salt runs in data-centers and on Raspberry Pi installations in the Sahara. It needs to work on big servers and tiny devices.

• Is appropriate documentation written both in public-facing docs and in-line? How will the user know how to use this? What will they do if it doesn't work as expected? Is this something a new user will understand? Can a user know all they need to about this functionality by reading the public docs?

• Is this a change in behavior? If so, is it in the appropriate branch? Are deprecation warnings necessary? Have those changes been fully documented? Have we fully thought through what implications a change in behavior might have?

• How has the code been tested? If appropriate are there automated tests which cover this? Is it likely to regress? If so, how has the potential of that regression been mitigated? What is the plan for ensuring that this code works going forward?

• If it’s asynchronous code, what is the potential for a race condition?

• Is this code an original work? If it’s borrowed from another project or found online are the appropriate licensing/attribution considerations handled?

• Is the reason for the change fully explained in the PR? If not for review, this is necessary so that somebody in the future can go back and figure out why it was necessary.

• Is the intended behavior of the change clear? How will that behavior be known to future contributors and to users?

• Does this code handle errors in a reasonable way? Have we gone back through the stack as much as possible to make sure that an error cannot be raised that we do not account for? Are errors tested for as well as proper functionality?

• If the code relies on external libraries, do we properly handle old versions of them? Do we require a specific version and if so is this version check implemented? Is the library available on the same platforms that module in question claims to support? If the code was written and tested against a particular library, have we documented that fact?

• Can this code freeze/hang/crash a running daemon? Can it stall a state run? Are there infinite loops? Are appropriate timeouts implemented?

• Is the function interface well documented? If argument types can not be inferred by introspection, are they documented?

• Are resources such as file-handles cleaned-up after they are used?

• Is it possible that a reference-cycle exists between objects that will leak memory?

• Has the code been linted and does it pass all tests?

• Does the change fully address the problem or is it limited to a small surface area? By this, I mean that it should be clear that the submitter has looked for other cases in the function or module where the given case might also be addressed. If additional changes are necessary are they documented in the code as a FIXME or the PR and in Github as an issue to be tracked?

• Will the code throw errors/warnings/stacktraces to the console during normal operation?
• Has all the debugging been removed?
• Does the code log any sensitive data? Does it show sensitive data in process lists? Does it store sensitive data to disk and if so, does it do so in a secure manner? Are there potential race conditions in between writing the data to disk and setting the appropriate permissions?
• Is it clear from the solution that the problem is well-understood? How can somebody who has never seen the problem feel confident that this proposed change is the best one?
• What's hard-coded that might not need to be? Are we making sensible decisions for the user and allowing them to tune and change things where appropriate?
• Are utility functions used where appropriate? Does this change re-implement something we already have code for?
• Is the right thing being fixed? There are cases where it's appropriate to fix a test and cases where it's appropriate to fix the code that's under test. Which is best for the user? Is this change a shortcut or a solution that will be solid in the months and years to come?
• How will this code react to changes elsewhere in the code base? What is it coupled to and have we fully thought through how best to present a coherent interface to consumers of a given function or method?
• Does this PR try to fix too many bugs/problems at once?
• Should this be split into multiple PRs to make them easier to test and reason about?

29.15 Pull Request Requirements

The following outlines what is required before a pull request can be merged into the salt project. For each of these requirements, an exception can be made that requires 3 approvals before merge. The exceptions are detailed more below.

29.15.1 All PR requirements

• Approval Required: approval review from core team member OR 1 approval review from captain of working group
• Cannot merge your own PR until 1 reviewer approves from defined list above that is not the author.
• All Tests Pass

29.15.2 Bug Fix PR requirements

• Test Coverage: regression test written to cover bug fix. Contributors only need to write test coverage for their specific changes.
• Point to the issue the PR is resolving. If there is not an issue one will need to be created.
29.15.3 Feature PR requirements

- Test Coverage: tests written to cover new feature. Contributors only need to write test coverage for their specific changes.
- Add .. versionadded:: <release> to module’s documentation. If you are not certain which release your fix will be included in you can include TBD and the PR reviewer will let you know the correct name of the release you need to update to the versionadded.

29.15.4 Exceptions to all requirements

As previously stated, all of the above requirements can be bypassed with 3 approvals. PR’s that do not require tests include:

- documentation
- cosmetic changes (for example changing from log.debug to log.trace)
- fixing tests
- pylint
- changes outside of the salt directory

29.16 Reporting Bugs

Salt uses GitHub to track open issues and feature requests.

To file a bug, please navigate to the new issue page for the Salt project.

In an issue report, please include the following information:

- The output of salt --versions-report from the relevant machines. This can also be gathered remotely by using salt <my_tgt> test.versions_report.
- A description of the problem including steps taken to cause the issue to occur and the expected behaviour.
- Any steps taken to attempt to remediate the problem.
- Any configuration options set in a configuration file that may be relevant.
- A reproduceable test case. This may be as simple as an SLS file that illustrates a problem or it may be a link to a repository that contains a number of SLS files that can be used together to re-produce a problem. If the problem is transitory, any information that can be used to try and reproduce the problem is helpful.
- [Optional] The output of each salt component (master/minion/CLI) running with the -ldebug flag set.

Note: Please be certain to scrub any logs or SLS files for sensitive data!
29.17 Salt Topology

Salt is based on a powerful, asynchronous, network topology using ZeroMQ. Many ZeroMQ systems are in place to enable communication. The central idea is to have the fastest communication possible.

29.17.1 Servers

The Salt Master runs 2 network services. First is the ZeroMQ PUB system. This service by default runs on port 4505/tcp and can be configured via the publish_port option in the master configuration.

Second is the ZeroMQ REP system. This is a separate interface used for all bi-directional communication with minions. By default this system binds to port 4506/tcp and can be configured via the ret_port option in the master.

29.17.2 PUB/SUB

The commands sent out via the salt client are broadcast out to the minions via ZeroMQ PUB/SUB. This is done by allowing the minions to maintain a connection back to the Salt Master and then all connections are informed to download the command data at once. The command data is kept extremely small (usually less than 1K) so it is not a burden on the network.

29.17.3 Return

The PUB/SUB system is a one way communication, so once a publish is sent out the PUB interface on the master has no further communication with the minion. The minion, after running the command, then sends the command’s return data back to the master via the ret_port.

29.18 Developing Salt Tutorial

This tutorial assumes you have:

- a web browser
- a GitHub account (<my_account>)
- a command line (CLI)
- git
- a text editor

29.18.1 Fork

In your browser, navigate to the saltstack/salt GitHub repository. Click on Fork (https://github.com/saltstack/salt/#fork-destination-box).

Note: If you have more than one GitHub presence, for example if you are a member of a team, GitHub will ask you into which area to clone Salt. If you don’t know where, then select your personal GitHub account.
29.18.2 Clone

In your CLI, navigate to the directory into which you want clone the Salt codebase and submit the following command:

```
$ git clone https://github.com/<my_account>/salt.git
```

where `<my_account>` is the name of your GitHub account. After the clone has completed, add SaltStack as a second remote and fetch any changes from upstream.

```
$ cd salt
$ git remote add upstream https://github.com/saltstack/salt.git
$ git fetch upstream
```

For this tutorial, we will be working off from the `master` branch, which is the default branch for the SaltStack GitHub project. This branch needs to track `upstream/master` so that we will get all upstream changes when they happen.

```
$ git checkout master
$ git branch --set-upstream-to upstream/master
```

29.18.3 Fetch

Fetch any upstream changes on the `master` branch and sync them to your local copy of the branch with a single command:

```
$ git pull --rebase
```

**Note:** For an explanation on `pull` vs `pull --rebase` and other excellent points, see [this article](#) by Mislav Marohnić.

29.18.4 Branch

Now we are ready to get to work. Consult the sprint beginner bug list and select an execution module whose `__virtual__` function needs to be updated. I'll select the `alternatives` module.

Create a new branch off from `master`. Be sure to name it something short and descriptive.

```
$ git checkout -b virt_ret
```

29.18.5 Edit

Edit the file you have selected, and verify that the changes are correct.

```
$ vim salt/modules/alternatives.py
$ git diff
```

```
diff --git a/salt/modules/alternatives.py b/salt/modules/alternatives.py
index 1653e5f..30c0a59 100644
--- a/salt/modules/alternatives.py
+++ b/salt/modules/alternatives.py
```

(continues on next page)
+++ b/salt/modules/alternatives.py
@@ -30,7 +30,7 @@ def __virtual__():
     if os.path.isdir('/etc/alternatives'):
         return True
-    return False
+    return (False, 'Cannot load alternatives module: /etc/alternatives dir not found')

def _get_cmd():

29.18.6 Commit

Stage and commit the changes. Write a descriptive commit summary, but try to keep it less than 50 characters. Review your commit.

$ git add salt/modules/alternatives.py
$ git commit -m 'modules.alternatives: __virtual__ return err msg'
$ git show

Note: If you need more room to describe the changes in your commit, run git commit (without the -m, message, option) and you will be presented with an editor. The first line is the commit summary and should still be 50 characters or less. The following paragraphs you create are free form and will be preserved as part of the commit.

29.18.7 Push

Push your branch to your GitHub account. You will likely need to enter your GitHub username and password.

$ git push origin virt_ret
Username for 'https://github.com': <my_account>
Password for 'https://<my_account>@github.com':

Note: If authentication over https does not work, you can alternatively setup ssh keys. Once you have done this, you may need add the keys to your git repository configuration

$ git config ssh.key ~/.ssh/<key_name>

where <key_name> is the file name of the private key you created.
29.18.8 Merge

In your browser, navigate to the new pull request page on the saltstack/salt GitHub repository and click on compare across forks. Select <my_account> from the list of head forks and the branch you are wanting to merge into master (virt_ret in this case).

When you have finished reviewing the changes, click Create pull request.

If your pull request contains only a single commit, the title and comment will be taken from that commit’s summary and message, otherwise the branch name is used for the title. Edit these fields as necessary and click Create pull request.

Note: Although these instructions seem to be the official pull request procedure on github’s website, here are two alternative methods that are simpler.

- If you navigate to your clone of salt, https://github.com/<my_account>/salt, depending on how old your branch is or how recently you pushed updates on it, you may be presented with a button to create a pull request with your branch.
- I find it easiest to edit the following URL:

  https://github.com/saltstack/salt/compare/master...<my_account>:virt_ret

29.18.9 Resources

GitHub offers many great tutorials on various aspects of the git- and GitHub-centric development workflow:

https://help.github.com/

There are many topics covered by the Salt Developer documentation:

https://docs.saltproject.io/en/latest/topics/development/index.html

The contributing documentation presents more details on specific contributing topics:

https://docs.saltproject.io/en/latest/topics/development/contributing.html

29.19 Modular Systems

When first working with Salt, it is not always clear where all of the modular components are and what they do. Salt comes loaded with more modular systems than many users are aware of, making Salt very easy to extend in many places.

The most commonly used modular systems are execution modules and states. But the modular systems extend well beyond the more easily exposed components and are often added to Salt to make the complete system more flexible.
29.19.1 Developing New Modules

Interactive Debugging

Sometimes debugging with `print()` and extra logs sprinkled everywhere is not the best strategy.

IPython is a helpful debug tool that has an interactive python environment which can be embedded in python programs.

First the system will require IPython to be installed.

```
# Debian
apt-get install ipython

# Arch Linux
pacman -Syu ipython2

# RHEL/CentOS (via EPEL)
yum install python-ipython
```

Now, in the troubling python module, add the following line at a location where the debugger should be started:

```
test = "test123"
import IPython
IPython.embed_kernel()
```

After running a Salt command that hits that line, the following will show up in the log file:

```
[CRITICAL] To connect another client to this kernel, use:
[IPKernelApp] --existing kernel-31271.json
```

Now on the system that invoked `embed_kernel`, run the following command from a shell:

```
# NOTE: use ipython2 instead of ipython for Arch Linux
ipython console --existing
```

This provides a console that has access to all the vars and functions, and even supports tab-completion.

```
print(test)
test123
```

To exit IPython and continue running Salt, press Ctrl-d to logout.

The Salt Loader

Salt’s loader system is responsible for reading `Special Module Contents` and providing the context for the special `Dunder Dictionaries`. When modules developed for Salt’s loader are imported directly, the dunder attributes won’t be populated. You can use the `Loader Context` to work around this.
Loader Context

Given the following.

```python
# coolmod.py

def utils_func_getter(name):
    return __utils__[name]
```

You would not be able import coolmod and run `utils_func_getter` because `__utils__` would not be defined. You must run `coolmod.utils_func_getter` in the context of a loader.

```python
import coolmod
import salt.loader

opts = {}
utils = salt.loader.utils(opts)
with salt.loader.context(utils):
    func = coolmod.utils_func_getter("foo.bar")
```

Special Module Contents

These are things that may be defined by the module to influence various things.

```python
__virtual__
__virtual_aliases__
__virtualname__
__init__
```

Called before `__virtual__()`

```python
__proxyenabled__
```

grains and proxy modules

`__proxyenabled__` as a list containing the names of the proxy types that the module supports.
Dunder Dictionaries

Salt provides several special "dunder" dictionaries as a convenience for Salt development. These include __opts__, __context__, __salt__, and others. This document will describe each dictionary and detail where they exist and what information and/or functionality they provide.

The following dunder dictionaries are always defined, but may be empty

- __context__
- __grains__
- __pillar__
- __opts__

__opts__

Defined in: All modules

The __opts__ dictionary contains all of the options passed in the configuration file for the master or minion.

---

**Note:** In many places in salt, instead of pulling raw data from the __opts__ dict, configuration data should be pulled from the salt get functions such as config.get

__salt__["config.get"]("foo:bar")

The get functions also allow for dict traversal via the : delimiter. Consider using get functions whenever using __opts__ or __pillar__ and __grains__ (when using grains for configuration data)

---

The configuration file data made available in the __opts__ dictionary is the configuration data relative to the running daemon. If the modules are loaded and executed by the master, then the master configuration data is available, if the modules are executed by the minion, then the minion configuration is available. Any additional information passed into the respective configuration files is made available

__salt__

Defined in: Auth, Beacons, Engines, Execution, Executors, Outputters, Pillars, Proxies, Renderers, Returners, Runners, SDB, SSH Wrappers, State, Thorium

__salt__ contains the execution module functions. This allows for all functions to be called as they have been set up by the salt loader.

__salt__["cmd.run"]("fdisk -l")
__salt__["network.ip_addrs"]()}
Note: When used in runners or outputters, __salt__ references other runner/outputter modules, and not execution modules.

__grains__

Filled in for: Execution, Pillar, Renderer, Returner, SSH Wrapper, State.
The __grains__ dictionary contains the grains data generated by the minion that is currently being worked with. In execution modules, state modules and returners this is the grains of the minion running the calls, when generating the external pillar the __grains__ is the grains data from the minion that the pillar is being generated for. While __grains__ is defined for every module, it's only filled in for some.

__pillar__

Filled in for: Execution, Renderer, Returner, SSH Wrapper, State
The __pillar__ dictionary contains the pillar for the respective minion. While __pillar__ is defined for every module, it's only filled in for some.

__ext_pillar__

Filled in for: Pillar

The __ext_pillar__ dictionary contains the external pillar modules.

__context__

During a state run the __context__ dictionary persists across all states that are run and then is destroyed when the state ends.
When running an execution module __context__ persists across all module executions until the modules are refreshed; such as when saltutil.sync_all or state.apply are executed.

A great place to see how to use __context__ is in the cp.py module in salt/modules/cp.py. The fileclient authenticates with the master when it is instantiated and then is used to copy files to the minion. Rather than create a new fileclient for each file that is to be copied down, one instance of the fileclient is instantiated in the __context__ dictionary and is reused for each file. Here is an example from salt/modules/cp.py:

```python
if not "cp.fileclient" in __context__:
    __context__['"cp.fileclient"] = salt.fileclient.get_file_client(__opts__)
```

Note: Because __context__ may or may not have been destroyed, always be sure to check for the existence of the key in __context__ and generate the key before using it.
__utils__

Defined in: Cloud, Engine, Execution, File Server, Grain, Pillar, Proxy, Roster, Runner, SDB, State

__proxy__

Defined in: Beacon, Engine, Execution, Executor, Proxy, Renderer, Returner, State, Util

__runner__

Defined in: Engine, Roster, Thorium

---

Note: When used in engines, it should be called __runners__ (plural)

__executors__

Defined in: Executor

__ret__

Defined in: Proxy

__thorium__

Defined in: Thorium

__states__

Defined in: Renderers, State

__serializers__

Defined in: State

__sdb__

Defined in: SDB
29.19.2 Configuration Options

A number of configuration options can affect the load process. This is a quick list of them:

- `autoload_dynamic_modules` (*Minion*)
- `cython_enable` (*Minion*, *Master*)
- `disable_modules` (*Minion*)
- `disable_returners` (*Minion*)
- `enable_zip_modules` (*Minion*)
- `extension_modules` (*Master*)
- `extmod_whitelist` (*Minion*, *Master*)
- `extmod_blacklist` (*Minion*, *Master*)
- `whitelist_modules` (*Minion*)
- `grains_dirs` (*Minion*)
- `module_dirs` (*Minion*, *Master*)
- `outputter_dirs` (*Minion*, *Master*)
- `providers` (*Minion*)
- `render_dirs` (*Minion*)
- `returner_dirs` (*Minion*)
- `runner_dirs` (*Master*)
- `states_dirs` (*Minion*)
- `utils_dirs` (*Minion*)

29.19.3 Loading Modules

Modules come primarily from several sources:

- The Salt package itself
- The Salt File Server
- The extmods directory
- Secondary packages installed

Using one source to override another is not supported.
The Salt Package

Salt itself ships with a large number of modules. These are part of the Salt package itself and don't require the user to do anything to use them. (Although a number of them have additional dependencies and/or configuration.)

The Salt File Server

The user may add modules by simply placing them in special directories in their fileserver.

The name of the directory inside of the file server is the directory name prepended by underscore, such as:

- _grains
- _modules
- _states

Modules must be synced before they can be used. This can happen a few ways, discussed below.

Note: Using saltenvs besides base may not work in all contexts.

Sync Via States

The minion configuration contains an option autoload_dynamic_modules which defaults to True. This option makes the state system refresh all dynamic modules when states are run. To disable this behavior set autoload_dynamic_modules to False in the minion config.

When dynamic modules are autoloaded via states, only the modules defined in the same saltenvs as the states currently being run.

Sync Via the saltutil Module

The saltutil module has a number of functions that can be used to sync all or specific dynamic modules. The saltutil.sync_* execution functions and runner functions can be used to sync modules to minions and the master, respectively.

The extmods Directory

Any files places in the directory set by extension_modules settings (minion, master, default /var/cache/salt/*/extmods) can also be loaded as modules. Note that these directories are also used by the saltutil.sync_* functions (mentioned above) and files may be overwritten.
Secondary Packages

Third-party packages may also add modules to Salt if they are installed in the same system and Python environment as the Salt Minion or Master.

This is done via setuptools entry points:

```python
setup(
    # ...
    entry_points={"salt.loader": ["module_dirs=spirofs.loader:module"],
    # ...
)
```

Note that these are not synced from the Salt Master to the Minions. They must be installed independently on each Minion.

## 29.19.4 Module Types

The specific names used by each loading method above are as follows. See sections below for a short summary of each of these systems.

<table>
<thead>
<tr>

**Note:** While it is possible to import modules directly with the import statement, it is strongly recommended that the appropriate dunder dictionary is used to access them instead. This is because a number of factors affect module names, module selection, and module overloading.

#### Auth

The auth module system allows for external authentication routines to be easily added into Salt. The auth function needs to be implemented to satisfy the requirements of an auth module. Use the pam module as an example.

See *External Authentication System* for more about authentication in Salt.

#### Beacon

- **Writing Beacons**

Beacons are polled by the Salt event loop to monitor non-salt processes. See *Beacons* for more information about the beacon system.

#### Cache

The minion cache is used by the master to store various information about minions. See *Minion Data Cache* for more information.

#### Cloud

Cloud modules are backend implementations used by *Salt Cloud*.

---

1 These modules cannot be loaded from the Salt File Server.
**Engine**

Engines are open-ended services managed by the Salt daemon (both master and minion). They may interact with event loop, call other modules, or a variety of non-salt tasks. See *Salt Engines* for complete details.

**Execution**

Execution modules make up the core of the functionality used by Salt to interact with client systems. The execution modules create the core system management library used by all Salt systems, including states, which interact with minion systems.

Execution modules are completely open ended in their execution. They can be used to do anything required on a minion, from installing packages to detecting information about the system. The only restraint in execution modules is that the defined functions always return a JSON serializable object.

**Executor**

Executors control how execution modules get called. The default is to just call them, but this can be customized.

**File Server**

The file server module system is used to create file server backends used by the Salt Master. These modules need to implement the functions used in the filesrv subsystem. Use the `gitfs` module as an example. See *File Server Backends* for more information.

**Grains**

- **Writing Grains**

  Grain modules define extra routines to populate grains data. All defined public functions will be executed and MUST return a Python dict object. The dict keys will be added to the grains made available to the minion.

  See *Grains* for more.

**Log Handler**

Log handlers allows the logs from salt (master or minion) to be sent to log aggregation systems.

**Matcher**

Matcher modules are used to define the *minion targeting expressions*. For now, it is only possible to override the *existing matchers* (the required CLI plumbing for custom matchers is not implemented yet).
Metaproxy

Metaproxy is an abstraction layer above the existing proxy minion. It enables adding different types of proxy minions that can still load existing proxymodules.

Net API

Net API modules are the actual server implementation used by Salt API.

Output

The output modules supply the outputter system with routines to display data in the terminal. These modules are very simple and only require the `output` function to execute. The default system outputter is the `nested` module.

Pillar

External Pillars

Salt provides a mechanism for generating pillar data by calling external pillar interfaces. This document will describe an outline of an ext_pillar module.

Location

Salt expects to find your `ext_pillar` module in the same location where it looks for other python modules. If the `extension_modules` option in your Salt master configuration is set, Salt will look for a `pillar` directory under there and load all the modules it finds. Otherwise, it will look in your Python site-packages `salt/pillar` directory.

Configuration

The external pillars that are called when a minion refreshes its pillars is controlled by the `ext_pillar` option in the Salt master configuration. You can pass a single argument, a list of arguments or a dictionary of arguments to your pillar:

```
ext_pillar:
  - example_a: some argument
  - example_b:
    - argumentA
    - argumentB
  - example_c:
    keyA: valueA
    keyB: valueB
```
The Module

Imports and Logging

Import modules your external pillar module needs. You should first include generic modules that come with stock Python:

```python
import logging
```

And then start logging. This is an idiomatic way of setting up logging in Salt:

```python
log = logging.getLogger(__name__)
```

Finally, load modules that are specific to what you are doing. You should catch import errors and set a flag that the `__virtual__` function can use later.

```python
try:
    import weird_thing
    EXAMPLE_A_LOADED = True
except ImportError:
    EXAMPLE_A_LOADED = False
```

Options

If you define an `__opts__` dictionary, it will be merged into the `__opts__` dictionary handed to the `ext_pillar` function later. This is a good place to put default configuration items. The convention is to name things `modulename.option`.

```python
__opts__ = {
    "example_a.someconfig": 137
}
```

Initialization

If you define an `__init__` function, it will be called with the following signature:

```python
def __init__(__opts__):
    # Do init work here
    ...
```

Note: The `__init__` function is ran every time a particular minion causes the external pillar to be called, so don't put heavy initialization code here. The `__init__` functionality is a side-effect of the Salt loader, so it may not be as useful in pillars as it is in other Salt items.
__virtual__

If you define a __virtual__ function, you can control whether or not this module is visible. If it returns False then Salt ignores this module. If it returns a string, then that string will be how Salt identifies this external pillar in its ext_pillar configuration. If you're not renaming the module, simply return True in the __virtual__ function, which is the same as if this function did not exist, then, the name Salt's ext_pillar will use to identify this module is its conventional name in Python.

This is useful to write modules that can be installed on all Salt masters, but will only be visible if a particular piece of software your module requires is installed.

```python
# This external pillar will be known as `example_a`
def __virtual__():
    if EXAMPLE_A_LOADED:
        return True
    return False
```

```
# This external pillar will be known as `something_else`
__virtualname__ = "something_else"
def __virtual__():
    if EXAMPLE_A_LOADED:
        return __virtualname__
    return False
```

ext_pillar

This is where the real work of an external pillar is done. If this module is active and has a function called ext_pillar, whenever a minion updates its pillar this function is called.

How it is called depends on how it is configured in the Salt master configuration. The first argument is always the current pillar dictionary, this contains pillar items that have already been added, starting with the data from pillar_roots, and then from any already-ran external pillars.

Using our example above:

```python
ext_pillar(id, pillar, "some argument")  # example_a
ext_pillar(id, pillar, "argumentA", "argumentB")  # example_b
ext_pillar(id, pillar, keyA="valueA", keyB="valueB")  # example_c
```

In the example_a case, pillar will contain the items from the pillar_roots, in example_b pillar will contain that plus the items added by example_a, and in example_c pillar will contain that plus the items added by example_b. In all three cases, id will contain the ID of the minion making the pillar request.

This function should return a dictionary, the contents of which are merged in with all of the other pillars and returned to the minion. Note: this function is called once for each minion that fetches its pillar data.

```python
def ext_pillar(minion_id, pillar, *args, **kwargs):
    my_pillar = {"external_pillar": {}}
    my_pillar["external_pillar"] = get_external_pillar_dictionary()
    return my_pillar
```
You can call pillar with the dictionary’s top name to retrieve its data. From above example, ‘external_pillar’ is the top dictionary name. Therefore:

```
salt '*' pillar.get external_pillar
```

You shouldn’t just add items to pillar and return that, since that will cause Salt to merge data that already exists. Rather, just return the items you are adding or changing. You could, however, use pillar in your module to make some decision based on pillar data that already exists.

This function has access to some useful globals:

- `__opts__` A dictionary of mostly Salt configuration options. If you had an `__opts__` dictionary defined in your module, those values will be included.
- `__salt__` A dictionary of Salt module functions, useful so you don’t have to duplicate functions that already exist. E.g. `__salt__['cmd.run']('ls -l')`
- `__grains__` A dictionary of the grains of the minion making this pillar call.

**Example configuration**

As an example, if you wanted to add external pillar via the `cmd_json` external pillar, add something like this to your master config:

```
ext_pillar:
- cmd_json: 'echo \"arg\":\"value\"'
```

**Reminder**

Just as with traditional pillars, external pillars must be refreshed in order for minions to see any fresh data:

```
salt '*' saltutil.refresh_pillar
```

Used to define optional external pillar systems. The pillar generated via the filesystem pillar is passed into external pillars. This is commonly used as a bridge to database data for pillar, but is also the backend to the libvirt state used to generate and sign libvirt certificates on the fly.

**Proxy**

*Proxy Minions* are a way to manage devices that cannot run a full minion directly.

**Renderers**

Renderers are the system used to render sls files into salt highdata for the state compiler. They can be as simple as the py renderer and as complex as `stateconf` and `pydsl`.  

29.19. Modular Systems
Returners

Returners are used to send data from minions to external sources, commonly databases. A full returner will implement all routines to be supported as an external job cache. Use the redis returner as an example.

Roster

The Roster system is used by Salt SSH to enumerate devices.

Runners

Runners are purely master-side execution sequences.

SDB

- Writing SDB Modules

SDB is a way to store data that’s not associated with a minion. See Storing Data in Other Databases.

Serializer

Primarily used with file.serialize.

State

State modules are used to define the state interfaces used by Salt States. These modules are restrictive in that they must follow a number of rules to function properly.

Note: State modules define the available routines in sls files. If calling an execution module directly is desired, take a look at the module state.

SPM pkgdb

- SPM Development Guide: Package Database

pkgdb modules provides storage backends to the package database.

SPM pkgfiles

- SPM Development Guide: Package Database

pkgfiles modules handle the actual installation.
SSH Wrapper

SSH Wrapper

Salt-SSH Background

Salt-SSH works by creating a tar ball of salt, a bunch of python modules, and a generated short minion config. It then copies this onto the destination host over ssh, then uses that host’s local python install to run \texttt{salt-client --local} with any requested modules. It does not automatically copy over states or cache files and since it is uses a local file\_client, modules that rely on cp.cache* functionality do not work.

SSH Wrapper modules

To support cp modules or other functionality which might not otherwise work in the remote environment, a wrapper module can be created. These modules are run from the salt-master initiating the salt-ssh command and can include logic to support the needed functionality. SSH Wrapper modules are located in /salt/client/ssh/wrapper/ and are named the same as the execution module being extended. Any functions defined inside of the wrapper module are called from the \texttt{salt-ssh module.function} argument command rather than executing on the minion.

State Module example

Running salt states on an salt-ssh minion, obviously requires the state files themselves. To support this, a state module wrapper script exists at salt/client/ssh/wrapper/state.py, and includes standard state functions like apply, sls, and highstate. When executing \texttt{salt-ssh minion state.highstate}, these wrapper functions are used and include the logic to walk the low\_state output for that minion to determine files used, gather needed files, tar them together, transfer the tar file to the minion over ssh, and run a state on the ssh minion. This state then extracts the tar file, applies the needed states and data, and cleans up the transferred files.

Wrapper Handling

From the wrapper script any invocations of \texttt{\_\_salt\_\_ ['some.module']()} do not run on the master which is running the wrapper, but instead magically are invoked on the minion over ssh. Should the function being called exist in the wrapper, the wrapper function will be used instead.

One way of supporting this workflow may be to create a wrapper function which performs the needed file copy operations. Now that files are resident on the ssh minion, the next step is to run the original execution module function. But since that function name was already overridden by the wrapper, a function alias can be created in the original execution module, which can then be called from the wrapper.

Example

The saltcheck module needs sls and tst files on the minion to function. The invocation of \texttt{saltcheck.run_state_tests} is run from the wrapper module, and is responsible for performing the needed file copy. The \texttt{saltcheck} execution module includes an alias line of \texttt{run_state_tests_ssh = salt.utils.\_\_funcutil\_\_alias_function(run\_state\_tests, 'run\_state\_tests\_ssh')} which creates an alias of \texttt{run\_state\_tests} with the name \texttt{run\_state\_tests\_ssh}. At the end of \texttt{run\_state\_tests} function in the wrapper module, it then calls \texttt{\_\_salt\_\_ ['saltcheck.run\_state\_tests\_ssh']()} Since this function does not exist in the wrapper script, the call is made on the remote minion, which then having the needed files, runs as expected.
Replacement execution modules for *Salt SSH*.

**Thorium**

Modules for use in the *Thorium* event reactor.

**Tokens**

Token stores for *External Authentication*. See the `salt.tokens` docstring for details.

Note: The runner to load tokens modules is `saltutil.sync_eauth_tokens`.

**Tops**

Tops modules are used to convert external data sources into top file data for the state system.

**Util**

Just utility modules to use with other modules via `__utils__` (see *Dunder Dictionaries*).

**Wheel**

The wheel system is used to manage master side management routines. These routines are primarily intended for the API to enable master configuration.

### 29.20 Salt Extend

`salt-extend` is a templating tool for extending SaltStack. If you’re looking to add a module to SaltStack, then the `salt-extend` utility can guide you through the process.

You can use Salt Extend to quickly create templated modules for adding new behaviours to some of the module subsystems within Salt.

Salt Extend takes a template directory and merges it into a SaltStack source code directory.

#### 29.20.1 Command line usage

See `salt-extend`
29.20.2 Choosing a template

The following templates are available:

**module**

Creates a new execution module within `salt/modules/{{module_name}}.py`

**module_unit**

Creates a new execution module unit test suite within `tests/unit/modules/test_{{module_name}}.py`

**state**

Creates a new state module within `salt/states/{{module_name}}.py`

**state_unit**

Creates a new state module unit test suite within `tests/unit/states/test_{{module_name}}.py`

29.20.3 Adding templates

1. Create a directory under `<src>/templates`
2. Create a file `template.yml` containing properties for
   - `description` - a description of the template
   - `questions` - a collection of additional questions to ask the user, the name of the item will be used as the key in the context dictionary within the jinja template.
     - `question` - The question to ask the user, as a string
     - `default` - (optional) the default value, can contain Jinja2 template syntax and has access to the default context properties

**Example template.yml**

```yaml
description: "Execution module"
questions:
  depending_libraries:
    question: "What libraries does this module depend upon?"
  virtual_name:
    question: "What module virtual name to use?"
    default: "{{module_name}}"
```

3. Create the files within `<src>/templates/<your template>` to match the target

**Note:** File names can contain Jinja 2 template syntax, e.g. `"{{module_name}}.py"`
Example file in the template directory

```python
print("Hello {{module_name}}")
__virtual__ = "{{__virtual_name__}}"
```

Default context properties

The default context provides the following properties

- `description` - A description of the template
- `short_description` - A short description of the module as entered by the user
- `version` - The version name of the next release
- `module_name` - The module name as entered by the user
- `release_date` - The current date in the format `YYYY-MM-DD`
- `year` - The current year in the format `YYYY`

As well as any additional properties entered from the questions section of `template.yml`

29.20.4 API

`salt.utils.extend` module

SaltStack Extend

A templating tool for extending SaltStack.

Takes a template directory and merges it into a SaltStack source code directory. This tool uses Jinja2 for templating.

This tool is accessed using `salt-extend`

```python
salt.utils.extend.run(extension=None, name=None, description=None, salt_dir=None, merge=False, temp_dir=None)
```

A template factory for extending the salt ecosystem

**Parameters**

- `extension` (str) -- The extension type, e.g. 'module', 'state', if omitted, user will be prompted
- `name` (str) -- Python-friendly name for the module, if omitted, user will be prompted
- `description` (str) -- A description of the extension, if omitted, user will be prompted
- `salt_dir` (str) -- The targeted Salt source directory
- `merge` (bool) -- Merge with salt directory, `False` to keep separate, `True` to merge trees.
Salt comes with a powerful integration and unit test suite allowing for the fully automated run of integration and/or unit tests from a single interface. It uses the combination of pytest, nox and Kitchen Salt to run these tests. Nox is used to manage all of the test python dependencies. When you run the test runner with nox, you will be installing the same python dependencies that we use to run our test suite on PRs and branch tests. Kitchen Salt is used to spin up our virtual machines based off of golden images. These virtual machines use the salt-jenkins sls states to configure any system dependencies.

To learn the basics of how Salt's test suite works, be sure to check out the "Salt's Test Suite: An Introduction" tutorial.

### 29.21.1 Nox

Nox is used to manage all of the python dependencies used in the test suite and spins up the different nox sessions. You can look at the noxfile.py in the salt repo to view all of the current nox configurations. In that file you will notice various nox sessions. When creating each of these sessions, nox will create a virtualenv with the specified interpreter. Once the virtualenv is created it will also install all of the required python dependencies required for that session and run the tests.

For example if you want to run all of the tests using the zeromq transport on python3 you would need to specify the zeromq transport and python3.

```bash
nox -e 'pytest-zeromq-3(coverage=False)'
```

As a contrast, when using the deprecated runtests.py test runner, the command would be:

```bash
nox -e 'runtests-zeromq-3(coverage=False)'
```

To run all the tests but on the tcp transport, you would need to specify the tcp session.

```bash
nox -e 'pytest-tcp-3(coverage=False)'
```

As a contrast, when using the deprecated runtests.py test runner, the command would be:

```bash
nox -e 'runtests-tcp-3(coverage=False)'
```

You can view all available sessions by running:

```bash
nox --list-sessions
```

For the most part you will only need nox to run the test suite, as this tool will install the exact same python dependencies we use to run on our test runs. The exception to this is when a system dependency is required, for example mysql. These system dependencies are installed with sls states managed in the salt-jenkins repo or you can manually install the dependency yourself.
29.21.2 System Dependencies

The system dependencies are installed from the `salt-jenkins` repo. The `golden-images-provision` state is what is run to determine what dependencies to install on which platform. We run this state only when we want to update our current VM images with new dependencies.

29.21.3 Kitchen Salt

We also use Kitchen Salt to spin up the VM's used for testing. You can view the kitchen-salt getting started for instructions on how to install and set it up. Kitchen Salt uses Test Kitchen to spin up the VM or container in the configured provider. Once the VM is spun up, Kitchen Salt can install salt and run a particular set of states. In the case of our branch and PR tests we create "Golden Images" which run the `salt-jenkins` states and install salt system dependencies beforehand. We only update these "Golden Images" when we need to upgrade or install a system dependency. You can view the kitchen-salt jenkins setup docs for instructions on how to set up Kitchen Salt similar to the jenkins environment we use to run branch and PR tests.

29.21.4 Test Directory Structure

Salt's test suite is located in the `tests/` directory in the root of Salt's codebase.

With the migration to PyTest, Salt has created a separate directory for tests that are written taking advantage of the full potential of PyTest. These are located under `tests/pytests`.

As for the old test suite, it is divided into two main groups:

- **Integration Tests**
- **Unit Tests**

Within each of these groups, the directory structure roughly mirrors the structure of Salt's own codebase. Notice that there are directories for `states`, `modules`, `runners`, `output`, and more in each testing group.

The files that are housed in the `modules` directory of either the unit or the integration testing factions contain respective integration or unit test files for Salt execution modules.

The PyTest only tests under `tests/pytests` should, more or less, follow the same grouping as the old test suite.

Integration Tests

The Integration section of Salt's test suite start up a number of Salt daemons to test functionality in a live environment. These daemons include two Salt Masters, one Syndic, and two Minions. This allows the Syndic interface to be tested and Master/Minion communication to be verified. All of the integration tests are executed as live Salt commands sent through the started daemons.

Integration tests are particularly good at testing modules, states, and shell commands, among other segments of Salt's ecosystem. By utilizing the integration test daemons, integration tests are easy to write. They are also SaltStack's generally preferred method of adding new tests.

The discussion in the Integration vs. Unit section of the testing tutorial is beneficial in learning why you might want to write integration tests vs. unit tests. Both testing arenas add value to Salt's test suite and you should consider adding both types of tests if possible and appropriate when contributing to Salt.

- **Integration Test Documentation**
Unit Tests

Unit tests do not spin up any Salt daemons, but instead find their value in testing singular implementations of individual functions. Instead of testing against specific interactions, unit tests should be used to test a function’s logic as well as any return or raises statements. Unit tests also rely heavily on mocking external resources.

The discussion in the Integration vs. Unit section of the testing tutorial is useful in determining when you should consider writing unit tests instead of, or in addition to, integration tests when contributing to Salt.

- Unit Test Documentation

29.21.5 Running The Tests

There is only one requirement to install, to quickly get started running salt’s test suite: nox.

```
pip install nox
```

Once this requirement is installed, you can use the nox binary to run all of the tests included in Salt’s test suite:

```
nox -e 'pytest-zeromq-3(coverage=False)'
```

For more information about options you can pass the test runner, see the --help option:

```
nox -e 'pytest-zeromq-3(coverage=False)' -- --help
```

Running Test Subsections

Instead of running the entire test suite all at once, which can take a long time, there are several ways to run only specific groups of tests or individual tests:

- Run unit tests only: nox -e 'pytest-zeromq-3(coverage=False)' -- tests/unit/, using the deprecated runtests.py the command would be nox -e 'runtests-zeromq-3(coverage=False)' -- --unit-tests
- Run unit and integration tests for states: nox -e 'pytest-zeromq-3(coverage=False)' -- tests/unit/states/ tests/integration/states/, using the deprecated runtests.py the command would be nox -e 'runtests-zeromq-3(coverage=False)' -- --state-tests
- Run integration tests for an individual module: nox -e 'pytest-zeromq-3(coverage=False)' -- tests/integration/modules/test_virt.py, using the deprecated runtests.py the command would be nox -e 'runtests-zeromq-3(coverage=False)' -- -n integration.modules.test_virt
- Run unit tests for an individual module: nox -e 'pytest-zeromq-3(coverage=False)' -- tests/unit/modules/test_virt.py, using the deprecated runtests.py the command would be nox -e 'runtests-zeromq-3(coverage=False)' -- -n unit.modules.test_virt
- Run an individual test by using the class and test name (this example is for the test_default_kvm_profile test in the tests/integration/module/test_virt.py): nox -e 'pytest-zeromq-3(coverage=False)' -- tests/integration/modules/test_virt.py::VirtTest::test_default_kvm_profile, using the deprecated runtests.py the command would be nox -e 'runtests-zeromq-3(coverage=False)' -- -n integration.modules.test_virt.VirtTest.test_default_kvm_profile

For more specific examples of how to run various test subsections or individual tests, please see the pytest documentation on how to run specific tests or the Running Specific Tests section of the Salt’s Test Suite: An Introduction tutorial.
Running Unit Tests Without Integration Test Daemons

Since the unit tests do not require a master or minion to execute, it is often useful to be able to run unit tests individually, or as a whole group, without having to start up the integration testing daemons. Starting up the master, minion, and syndic daemons takes a lot of time before the tests can even start running and is unnecessary to run unit tests. To run unit tests without invoking the integration test daemons, simply add the unit directory as an argument:

```
nox -e 'pytest-zeromq-3(coverage=False)' -- tests/unit/
```

As a contrast, when using the deprecated `runtests.py` test runner, the command would be:

```
nox -e 'runtests-zeromq-3(coverage=False)' -- --unit-tests
```

All of the other options to run individual tests, entire classes of tests, or entire test modules still apply.

Running Destructive Integration Tests

Salt is used to change the settings and behavior of systems. In order to effectively test Salt’s functionality, some integration tests are written to make actual changes to the underlying system. These tests are referred to as “destructive tests”. Some examples of destructive tests are changes may be testing the addition of a user or installing packages. By default, destructive tests are disabled and will be skipped.

Generally, destructive tests should clean up after themselves by attempting to restore the system to its original state. For instance, if a new user is created during a test, the user should be deleted after the related test(s) have completed. However, no guarantees are made that test clean-up will complete successfully. Therefore, running destructive tests should be done with caution.

Note: Running destructive tests will change the underlying system. Use caution when running destructive tests.

To run tests marked as destructive, set the `--run-destructive` flag:

```
nox -e 'pytest-zeromq-3(coverage=False)' -- --run-destructive
```

As a contrast, when using the deprecated `runtests.py` test runner, the command would be:

```
nox -e 'runtests-zeromq-3(coverage=False)' -- --run-destructive
```

Running Cloud Provider Tests

Salt’s testing suite also includes integration tests to assess the successful creation and deletion of cloud instances using `Salt-Cloud` for providers supported by Salt-Cloud.

The cloud provider tests are off by default and run on sample configuration files provided in `tests/integration/files/conf/cloud.providers.d/`. In order to run the cloud provider tests, valid credentials, which differ per provider, must be supplied. Each credential item that must be supplied is indicated by an empty string value and should be edited by the user before running the tests. For example, DigitalOcean requires a client key and an api key to operate. Therefore, the default cloud provider configuration file for DigitalOcean looks like this:

```
digitalocean-config:
  driver: digitalocean
  client_key: ''
  api_key: ''
  location: New York 1
```
As indicated by the empty string values, the `client_key` and the `api_key` must be provided:

```
digitalocean-config:
  driver: digitalocean
  client_key: wFGEwgreeqw3435gDger
  api_key: GDE43t43REGTrkilg43934t34qT43t4dgegerGEGg
  location: New York 1
```

**Note:** When providing credential information in cloud provider configuration files, do not include the single quotes.

Once all of the valid credentials for the cloud provider have been supplied, the cloud provider tests can be run by setting the `--cloud-provider-tests` flag:

```
nox --e 'pytest-cloud-3(coverage=False)'
```

As a contrast, when using the deprecated `runtests.py` test runner, the command would be:

```
nox --e 'runtests-cloud-3(coverage=False)'
```

### 29.21.6 Automated Test Runs

SaltStack maintains a Jenkins server to allow for the execution of tests across supported platforms. The tests executed from Salt's Jenkins server create fresh virtual machines for each test run, then execute destructive tests on the new, clean virtual machine.

SaltStack's Jenkins server continuously runs the entire test suite, including destructive tests, on an array of various supported operating systems throughout the day. Each actively supported branch of Salt's repository runs the tests located in the respective branch's code. Each set of branch tests also includes a `pylint` run. These branch tests help ensure the viability of Salt code at any given point in time as pull requests are merged into branches throughout the day.

In addition to branch tests, SaltStack's Jenkins server also runs tests on pull requests. These pull request tests include a smaller set of virtual machines that run on the branch tests. The pull request tests, like the branch tests, include a `pylint` test as well.

When a pull request is submitted to Salt's repository on GitHub, the suite of pull request tests are started by Jenkins. These tests are used to gauge the pull request's viability to merge into Salt's codebase. If these initial tests pass, the pull request can then merged into the Salt branch by one of Salt's core developers, pending their discretion. If the initial tests fail, core developers may request changes to the pull request. If the failure is unrelated to the changes in question, core developers may merge the pull request despite the initial failure.

As soon as the pull request is merged, the changes will be added to the next branch test run on Jenkins.

For a full list of currently running test environments, go to [https://jenkins.saltproject.io](https://jenkins.saltproject.io).
Using Salt-Cloud on Jenkins

For testing Salt on Jenkins, SaltStack uses Salt-Cloud to spin up virtual machines. The script using Salt-Cloud to accomplish this is open source and can be found here: https://github.com/saltstack/salt/blob/master/tests/jenkins.py

29.21.7 Writing Tests

The salt testing infrastructure is divided into two classes of tests, integration tests and unit tests. These terms may be defined differently in other contexts, but for Salt they are defined this way:

- Unit Test: Tests which validate isolated code blocks and do not require external interfaces such as salt-call or any of the salt daemons.
- Integration Test: Tests which validate externally accessible features.

Salt testing uses unittest2 from the python standard library and MagicMock.

- Writing integration tests
- Writing unit tests

Naming Conventions

Any function in either integration test files or unit test files that is doing the actual testing, such as functions containing assertions, must start with test_:

```python
def test_user_present(self):
    ...
```

When functions in test files are not prepended with test_, the function acts as a normal, helper function and is not run as a test by the test suite.

Submitting New Tests

Which branch of the Salt codebase should new tests be written against? The location of where new tests should be submitted depends largely on the reason you're writing the tests.

Tests for New Features

If you are adding new functionality to Salt, please write the tests for this new feature in the same pull request as the new feature. New features should always be submitted to the master branch.

If you have already submitted the new feature, but did not write tests in the original pull request that has already been merged, please feel free to submit a new pull request containing tests. If the feature was recently added to Salt’s master branch, then the tests should be added there as well. However, if the feature was added to master some time ago and is already present in one or more release branches, please refer to the Tests for Entire Files or Functions section below for more details about where to submit tests for functions or files that do not already have tests.
Tests to Accompany a Bugfix

If you are writing tests for code that fixes a bug in Salt, tests will be required before merging the PR. A great option for most bugfixes is to adopt a TDD style approach:

- reproduce the issue
- write a test that exhibits the behavior
- write the bugfix

This helps ensure that known issues are not reintroduced into the codebase.

Tests for Entire Files or Functions

Sometimes entire files in Salt are completely untested. If you are writing tests for a file that doesn't have any tests written for it, write your test against the earliest supported release branch that contains the file or function you're testing.

Once your tests are submitted in a pull request and is merged into the branch in question, the tests you wrote will be merged-forward by SaltStack core engineers and the new tests will propagate to the newer release branches. That way the tests you wrote will apply to all current and relevant release branches, and not just the master branch, for example. This methodology will help protect against regressions on older files in Salt's codebase.

There may be times when the tests you write against an older branch fail in the merge-forward process because functionality has changed in newer release branches. In these cases, a Salt core developer may reach out to you for advice on the tests in question if the path forward is unclear.

Note: If tests are written against a file in an older release branch and then merged forward, there may be new functionality in the file that is present in the new release branch that is untested. It would be wise to see if new functionality could use additional testing once the test file has propagated to newer release branches.

Module/Global Level Variables

If you need access to module or global level variables, please use a pytest fixture. The use of module and global variables can introduce mutable global objects and increases processing time because all globals are evaluated when collecting tests. If there is a use case where you cannot use a fixture and you are using a type of string, integer, or tuple you can use global/module level variables. Any mutable types such as lists and dictionaries must use pytest fixtures. For an example, if all of your tests need access to a string variable:

```python
F00 = "bar"

def test_foo_bar():
    assert F00 == "bar"

def test_foo_not():
    assert not F00 == "foo"
```

We recommend using a pytest fixture:
import pytest

@pytest.fixture()
def foo():
    return "bar"

def test_foo_bar(foo):
    assert foo == "bar"

def test_foo_not(foo):
    assert not foo == "foo"

If you need a class to mock something, it can be defined at the global scope, but it should only be initialized on the fixture:

class Foo:
    def __init__(self):
        self.bar = True

@pytest.fixture
def foo():
    return Foo()

Test Helpers

Several Salt-specific helpers are available. A full list is available by inspecting functions exported in tests.support.helpers.

@expensiveTest -- Designates a test which typically requires a relatively costly external resource, like a cloud virtual machine. This decorator is not normally used by developers outside of the Salt core team.

@destructiveTest -- Marks a test as potentially destructive. It will not be run by the test runner unless the -run-destructive test is expressly passed.

@requires_network -- Requires a network connection for the test to operate successfully. If a network connection is not detected, the test will not run.

@requires_salt_modules -- Requires all the modules in a list of modules in order for the test to be executed. Otherwise, the test is skipped.

@requires_system_grains -- Loads and passes the grains on the system as an keyword argument to the test function with the name grains.

@skip_if_binaries_missing(["list", "of", "binaries"]) -- If called from inside a test, the test will be skipped if the binaries are not all present on the system.

@skip_if_not_root -- If the test is not executed as root, it will be skipped.

@with_system_user -- Creates and optionally destroys a system user within a test case. See implementation details in tests.support.helpers for details.

@with_system_group -- Creates and optionally destroys a system group within a test case. See implementation details in tests.support.helpers for details.
@with_system_user_and_group -- Creates and optionally destroys a system user and group within a test case. See implementation details in tests.support.helpers for details.

29.22 Integration Tests

The Salt integration tests come with a number of classes and methods which allow for components to be easily tested. These classes are generally inherited from and provide specific methods for hooking into the running integration test environment created by the integration tests.

It is noteworthy that since integration tests validate against a running environment that they are generally the preferred means to write tests.

The integration system is all located under tests/integration in the Salt source tree. Each directory within tests/integration corresponds to a directory in Salt's tree structure. For example, the integration tests for the test.py Salt module that is located in salt/modules should also be named test.py and reside in tests/integration/modules.

29.22.1 Preparing to Write Integration Tests

This guide assumes that your Salt development environment is already configured and that you have a basic understanding of contributing to the Salt codebase. If you're unfamiliar with either of these topics, please refer to the Installing Salt for Development and the Contributing pages, respectively.

This documentation also assumes that you have an understanding of how to run Salt's test suite, including running the test subsections, and running a single integration test file, class, or individual test.

29.22.2 Best Practices

Integration tests should be written to the following specifications.

What to Test?

Since integration tests are used to validate against a running Salt environment, integration tests should be written with the Salt components, and their various interactions, in mind.

- Isolate testing functionality. Don't rely on the pass or failure of other, separate tests.
- Individual tests should test against a single behavior.
- Since it occasionally takes some effort to "set up" an individual test, it may be necessary to call several functions within a single test. However, be sure that once the work has been done to set up a test, make sure you are clear about the functionality that is being tested.
Naming Conventions

Test names and docstrings should indicate what functionality is being tested. Test functions are named test_<fcn>_<test-name> where <fcn> is the function being tested and <test-name> describes the behavior being tested.

In order for integration tests to get picked up during a run of the test suite, each individual test must be prepended with the test_ naming syntax, as described above.

If a function does not start with test_, then the function acts as a "normal" function and is not considered a testing function. It will not be included in the test run or testing output.

The setUp and tearDown Functions

There are two special functions that can be utilized in the integration side of Salt’s test suite: setUp and tearDown. While these functions are not required in all test files, there are many examples in Salt’s integration test suite illustrating the broad usefulness of each function.

The setUp function is used to set up any repetitive or useful tasks that the tests in a test class need before running. For example, any of the mac_* integration tests should only run on macOS machines. The setUp function can be used to test for the presence of the Darwin kernel. If the Darwin kernel is not present, then the test should be skipped.

```python
def setUp(self):
    """
    Sets up test requirements
    """
    os_grain = self.run_function("grains.item", ["kernel"])
    if os_grain["kernel"] not in "Darwin":
        self.skipTest("Test not applicable to '{kernel}' kernel".format(**os_grain))
```

The setUp function can be used for many things. The above code snippet is only one example. Another example might be to ensure that a particular setting is present before running tests that would require the setting.

The tearDown function is used to clean up after any tests. This function is useful for restoring any settings that might have been changed during the test run.

Note: The setUp and tearDown functions run before and after each test in the test class that the setUp and tearDown functions are defined.

Be sure to read the Destructive vs Non-Destructive Tests section when using any kind of destructive functions that might alter the system running the test suite in either the setUp or tearDown function definitions.

Testing Order

The test functions within a test class do not run in the order they were defined, but instead run in lexicographical order.

Note that if any setUp or tearDown functions are defined in the class, those functions will run before (for setUp) or after (for tearDown) each test case.
29.22.3 Integration Classes

The integration classes are located in tests/integration/__init__.py and can be extended therein. There are four classes available to extend:

- ModuleCase
- ShellCase
- SSHCase
- SyndicCase

ModuleCase

Used to define executions run via the master to minions and to call single modules and states. The available testing functions are:

run_function

Run a single salt function and condition the return down to match the behavior of the raw function call. This will run the command and only return the results from a single minion to verify.

run_state

Run the state.single command and return the state return structure.

minion_run

Run a single salt function on the 'minion' target and condition the return down to match the behavior of the raw function call.

ShellCase

Shell out to the scripts which ship with Salt. The testing functions are:

run_cp

Execute salt-cp. Pass in the argument string as it would be passed on the command line.

run_call

Execute salt-call, pass in the argument string as it would be passed on the command line.
run_cloud

Execute the salt-cloud command. Pass in the argument string as it would be passed on the command line.

run_key

Execute the salt-key command. Pass in the argument string as it would be passed on the command line.

run_run

Execute the salt-run command. Pass in the argument string as it would be passed on the command line.

run_run_plus

Execute the runner function the and return the return data and output in a dict

run_salt

Execute the salt command. Pass in the argument string as it would be passed on the command line.

run_script

Execute a salt script with the given argument string.

run_ssh

Execute the salt-ssh. Pass in the argument string as it would be passed on the command line.

SSHCase

Used to execute remote commands via salt-ssh. The available methods are as follows:

run_function

Run a single salt function via salt-ssh and condition the return down to match the behavior of the raw function call. This will run the command and only return the results from a single minion to verify.
SyndicCase

Used to execute remote commands via a syndic and is only used to verify the capabilities of the Salt Syndic. The available methods are as follows:

run_function

Run a single salt function and condition the return down to match the behavior of the raw function call. This will run the command and only return the results from a single minion to verify.

29.22.4 Examples

The following sections define simple integration tests present in Salt's integration test suite for each type of testing class.

Module Example via ModuleCase Class

Import the integration module, this module is already added to the python path by the test execution. Inherit from the integration.ModuleCase class.

Now the workhorse method run_function can be used to test a module:

```python
import os
from tests.support.case import ModuleCase

class TestModuleTest(ModuleCase):
    
    Validate the test module
    
    def test_ping(self):
        test.ping
        self.assertTrue(self.run_function("test.ping"))

    def test_echo(self):
        test.echo
        self.assertEqual(self.run_function("test.echo", ["text"]), "text")
```

The first example illustrates the testing master issuing a test.ping call to a testing minion. The test asserts that the minion returned with a True value to the master from the test.ping call.

The second example similarly verifies that the minion executed the test.echo command with the text argument. The assertEqual call maintains that the minion ran the function and returned the data as expected to the master.
Shell Example via ShellCase

Validating the shell commands can be done via shell tests:

```python
import sys
import shutil
import tempfile

from tests.support.case import ShellCase

class KeyTest(ShellCase):
    """
    Test salt-key script
    """

    _call_binary_ = "salt-key"

    def test_list(self):
        """
        Test salt-key -L
        """

        data = self.run_key("-L")
        expect = ['Unaccepted Keys:',
                  'Accepted Keys:',
                  'minion',
                  'sub_minion',
                  'Rejected:',
                  ']

        self.assertEqual(data, expect)

This example verifies that the salt-key command executes and returns as expected by making use of the run_key method.

SSH Example via SSHCase

Testing salt-ssh functionality can be done using the SSHCase test class:

```python
from tests.support.case import SSHCase

class SSHGrainsTest(SSHCase):
    """
    Test salt-ssh grains functionality
    Depend on proper environment set by integration.SSHCase class
    """

    def test_grains_id(self):
        """
        Test salt-ssh grains id work for localhost.
        """

        cmd = self.run_function("grains.get", ["id"])  
        self.assertEqual(cmd, "localhost")
```
Testing Event System via SaltMinionEventAssertsMixin

The fundamentally asynchronous nature of Salt makes testing the event system a challenge. The SaltMinionEventAssertsMixin provides a facility for testing that events were received on a minion event bus.

```python
import salt.utils.event
from tests.support.mixins import SaltEventAssertsMixin

class TestEvent(SaltEventAssertsMixin):
    """
    Example test of firing an event and receiving it
    """
    def test_event(self):
        e = salt.utils.event.get_event(
            "minion", sock_dir=self.minion_opts["sock_dir"], opts=self.minion_opts
        )
        e.fire_event({"a": "b"}, "/test_event")
        self.assertMinionEventReceived({"a": "b"})
```

Syndic Example via SyndicCase

Testing Salt’s Syndic can be done via the SyndicCase test class:

```python
from tests.support.case import SyndicCase

class TestSyndic(SydnicCase):
    """
    Validate the syndic interface by testing the test module
    """
    def test_ping(self):
        """
        test.ping
        """
        self.assertTrue(self.run_function("test.ping"))
```

This example verifies that a test.ping command is issued from the testing master, is passed through to the testing syndic, down to the minion, and back up again by using the run_function located with in the SyndicCase test class.
29.22.5 Integration Test Files

Since using Salt largely involves configuring states, editing files, and changing system data, the integration test suite contains a directory named files to aid in testing functions that require files. Various Salt integration tests use these example files to test against instead of altering system files and data.

Each directory within tests/integration/files contain files that accomplish different tasks, based on the needs of the integration tests using those files. For example, tests/integration/files/ssh is used to boot-strap the test runner for salt-ssh testing, while tests/integration/files/pillar contains files storing data needed to test various pillar functions.

The tests/integration/files directory also includes an integration state tree. The integration state tree can be found at tests/integration/files/file/base.

The following example demonstrates how integration files can be used with ModuleCase to test states:

```python
# Import python libs
from __future__ import absolute_import
import os
import shutil

# Import Salt Testing libs
from tests.support.case import ModuleCase
from tests.support.paths import FILES, TMP
from tests.support.mixins import SaltReturnAssertsMixin

# Import salt libs
import salt.utils.files

HFILE = os.path.join(TMP, "hosts")

class HostTest(ModuleCase, SaltReturnAssertsMixin):
    
    Validate the host state
    
    def setUp(self):
        shutil.copyfile(os.path.join(FILES, "hosts"), HFILE)
        super(HostTest, self).setUp()

    def tearDown(self):
        if os.path.exists(HFILE):
            os.remove(HFILE)
        super(HostTest, self).tearDown()

    def test_present(self):
        
        host.present
        
        name = "spam.bacon"
        ip = "10.10.10.10"
        ret = self.run_state("host.present", name=name, ip=ip)
        self.assertSaltTrueReturn(ret)
        with salt.utils.files.fopen(HFILE) as fp_
            output = fp_.read()
        self.assertIn("[0]\t\t{1}".format(ip, name), output)
```

To access the integration files, a variable named FILES points to the tests/integration/files directory.
This is where the referenced `host.present` sls file resides.

In addition to the static files in the integration state tree, the location TMP can also be used to store temporary files that the test system will clean up when the execution finishes.

### 29.22.6 Destructive vs Non-Destructive Tests

Since Salt is used to change the settings and behavior of systems, one testing approach is to run tests that make actual changes to the underlying system. This is where the concept of destructive integration tests comes into play. Tests can be written to alter the system they are running on. This capability is what fills in the gap needed to properly test aspects of system management like package installation.

Any test that changes the underlying system in any way, such as creating or deleting users, installing packages, or changing permissions should include the `@destructive` decorator to signal system changes and should be written with care. System changes executed within a destructive test should also be restored once the related tests have completed. For example, if a new user is created to test a module, the same user should be removed after the test is completed to maintain system integrity.

To write a destructive test, import, and use the `destructiveTest` decorator for the test method:

```python
from tests.support.case import ModuleCase
from tests.support.helpers import destructiveTest, skip_if_not_root

class DestructiveExampleModuleTest(ModuleCase):
    
    """
    Demonstrate a destructive test
    """

    @destructiveTest
    @skip_if_not_root
    def test_user_not_present(self):
        
        """
        This is a DESTRUCTIVE TEST it creates a new user on the minion.
        And then destroys that user.
        """

        ret = self.run_state("user.present", name="salt_test")
        self.assertSaltTrueReturn(ret)
        ret = self.run_state("user.absent", name="salt_test")
        self.assertSaltTrueReturn(ret)
```

### 29.22.7 Cloud Provider Tests

Cloud provider integration tests are used to assess Salt-Cloud’s ability to create and destroy cloud instances for various supported cloud providers. Cloud provider tests inherit from the ShellCase Integration Class.

Any new cloud provider test files should be added to the `tests/integration/cloud/providers/` directory. Each cloud provider test file also requires a sample cloud profile and cloud provider configuration file in the integration test file directory located at `tests/integration/files/conf/cloud.*.d/`.

The following is an example of the default profile configuration file for Digital Ocean, located at: `tests/integration/files/conf/cloud.profiles.d/digitalocean.conf`:

```ini
digitalocean-test:
    provider: digitalocean-config
```

(continues on next page)
Each cloud provider requires different configuration credentials. Therefore, sensitive information such as API keys or passwords should be omitted from the cloud provider configuration file and replaced with an empty string. The necessary credentials can be provided by the user by editing the provider configuration file before running the tests.

The following is an example of the default provider configuration file for Digital Ocean, located at: tests/integration/files/conf/cloud.providers.d/digitalocean.conf:

```
digitalocean-config:
  driver: digitalocean
  client_key: ''
  api_key: ''
  location: New York 1
```

In addition to providing the necessary cloud profile and provider files in the integration test suite file structure, appropriate checks for if the configuration files exist and contain valid information are also required in the test class's `setUp` function:

```python
from tests.support.case import ShellCase
from tests.support.paths import FILES

class LinodeTest(ShellCase):
    
    Integration tests for the Linode cloud provider in Salt-Cloud
    
    def setUp(self):
        
        Sets up the test requirements
        
        super(LinodeTest, self).setUp()

        # check if appropriate cloud provider and profile files are present
        profile_str = "linode-config:"
        provider = "linode"
        providers = self.run_cloud("--list-providers")
        if profile_str not in providers:
            self.skipTest(
                "Configuration file for {0} was not found. Check {0}.conf files "
                "in tests/integration/files/conf/cloud.*.d/ to run these tests.".
                format(
                    provider
                )
            )

        # check if apikey and password are present
        path = os.path.join(FILES, "conf", "cloud.providers.d", provider + ".conf")
        config = cloud_providers_config(path)
        api = config["linode-config"]["linode"]["api_key"]
        password = config["linode-config"]["linode"]["password"]
        if api == "" or password == "":
            self.skipTest(
                "An api key and password must be provided to run these tests. Check "
            )
```

(continues on next page)
Repeatedly creating and destroying instances on cloud providers can be costly. Therefore, cloud provider tests are off by default and do not run automatically. To run the cloud provider tests, the `--cloud-provider-tests` flag must be provided:

```
./tests/runtests.py --cloud-provider-tests
```

Since cloud provider tests do not run automatically, all provider tests must be preceded with the `@expensiveTest` decorator. The expensive test decorator is necessary because it signals to the test suite that the `--cloud-provider-tests` flag is required to run the cloud provider tests.

To write a cloud provider test, import, and use the `expensiveTest` decorator for the test function:

```
from tests.support.helpers import expensiveTest

@expensiveTest
def test_instance(self):
    """
    Test creating an instance on Linode
    """
    name = "linode-testing"

    # create the instance
    instance = self.run_cloud("-p linode-test {0}".format(name))
    str = "{0}".format(name)

    # check if instance with salt installed returned as expected
    try:
        self.assertIn(str, instance)
    except AssertionError:
        self.run_cloud("-d {0} --assume-yes".format(name))
        raise

    # delete the instance
    delete = self.run_cloud("-d {0} --assume-yes".format(name))
    str = "True"
    try:
        self.assertIn(str, delete)
    except AssertionError:
        raise
```
29.22.8 Adding New Directories

If the corresponding Salt directory does not exist within tests/integration, the new directory must be created along with the appropriate test file to maintain Salt's testing directory structure.

In order for Salt's test suite to recognize tests within the newly created directory, options to run the new integration tests must be added to tests/runtests.py. Examples of the necessary options that must be added can be found here: https://github.com/saltstack/salt/blob/master/tests/runtests.py. The functions that need to be edited are setup_additional_options, validate_options, and run_integration_tests.

29.23 Writing Unit Tests

29.23.1 Introduction

Like many software projects, Salt has two broad-based testing approaches -- integration testing and unit testing. While integration testing focuses on the interaction between components in a sandboxed environment, unit testing focuses on the singular implementation of individual functions.

Unit tests should be used specifically to test a function's logic. Unit tests rely on mocking external resources.

While unit tests are good for ensuring consistent results, they are most useful when they do not require more than a few mocks. Effort should be made to mock as many external resources as possible. This effort is encouraged, but not required. Sometimes the isolation provided by completely mocking the external dependencies is not worth the effort of mocking those dependencies.

In these cases, requiring an external library to be installed on the system before running the test file is a useful way to strike this balance. For example, the unit tests for the MySQL execution module require the presence of the MySQL python bindings on the system running the test file before proceeding to run the tests.

Overly detailed mocking can also result in decreased test readability and brittleness as the tests are more likely to fail when the code or its dependencies legitimately change. In these cases, it is better to add dependencies to the test runner dependency state.

29.23.2 Preparing to Write a Unit Test

This guide assumes that your Salt development environment is already configured and that you have a basic understanding of contributing to the Salt codebase. If you're unfamiliar with either of these topics, please refer to the Installing Salt for Development and the Contributing pages, respectively.

This documentation also assumes that you have an understanding of how to run Salt's test suite, including running the unit test subsection, running the unit tests without testing daemons to speed up development wait times, and running a unit test file, class, or individual test.

29.23.3 Best Practices

Unit tests should be written to the following specifications.
What to Test?

Since unit testing focuses on the singular implementation of individual functions, unit tests should be used specifically to test a function's logic. The following guidelines should be followed when writing unit tests for Salt's test suite:

- Each `raise` and `return` statement needs to be independently tested.
- Isolate testing functionality. Don't rely on the pass or failure of other, separate tests.
- Test functions should contain only one assertion, at most, multiple assertions can be made, but against the same outcome.
- Many Salt execution modules are merely wrappers for distribution-specific functionality. If there isn't any logic present in a simple execution module, consider writing an integration test instead of heavily mocking a call to an external dependency.

Mocking Test Data

A reasonable effort needs to be made to mock external resources used in the code being tested, such as APIs, function calls, external data either globally available or passed in through function arguments, file data, etc.

- Test functions should contain only one assertion and all necessary mock code and data for that assertion.
- External resources should be mocked in order to "block all of the exits". If a test function fails because something in an external library wasn't mocked properly (or at all), this test is not addressing all of the "exits" a function may experience. We want the Salt code and logic to be tested, specifically.
- Consider the fragility and longevity of a test. If the test is so tightly coupled to the code being tested, this makes a test unnecessarily fragile.
- Make sure you are not mocking the function to be tested so vigorously that the test return merely tests the mocked output. The test should always be testing a function's logic.

Mocking Loader Modules

Salt loader modules use a series of globally available dunder variables, `__salt__`, `__opts__`, `__pillar__`, etc. To facilitate testing these modules `pytest-salt-factories` has a plugin which will prepare the module globals by patching and mocking the dunders prior to running each test, as long as the test module defines a fixture named `configure_loader_modules`. Check out the code for the `pytest-salt-factories` plugin to know how it's internals work.

The reason for the existence of this plugin is because historically one would add these dunder variables directly on the imported module. This, however, introduces unexpected behavior when running the full test suite since those attributes would not be removed once we were done testing the module and would therefore leak to other modules being tested with unpredictable results. This is the kind of work that should be deferred to mock, and that's exactly what this plugin provides.

As an example, if one needs to specify some options which should be available to the module being tested one should do:

```python
import pytest
import salt.modules.somemodule as somemodule

@pytest.fixture
def configure_loader_modules():
    (continues on next page)
```
return {somemodule: {
"__opts__": {
"test": True
}}}

Consider this more extensive example from tests/pytests/unit/beacons/test_sensehat.py:

```python
import pytest
import salt.beacons.sensehat as sensehat
from tests.support.mock import MagicMock

@pytest.fixture
def configure_loader_modules():
    return {
        sensehat: {
            "__salt__": {
                "sensehat.get_humidity": MagicMock(return_value=80),
                "sensehat.get_temperature": MagicMock(return_value=30),
                "sensehat.get_pressure": MagicMock(return_value=1500),
            }
        }
    }

def test_non_list_config():
    config = {}
    ret = sensehat.validate(config)
    assert ret == (False, "Configuration for sensehat beacon must be a list.")

def test_empty_config():
    config = [[]]
    ret = sensehat.validate(config)
    assert ret == (False, "Configuration for sensehat beacon requires sensors.")

def test_sensehat_humidity_match():
    config = [["sensors": {"humidity": "70\%"}]]
    ret = sensehat.validate(config)
    assert ret == (True, "Valid beacon configuration")
    ret = sensehat.beacon(config)
    assert ret == [["tag": "sensehat/humidity", "humidity": 80]]

def test_sensehat_temperature_match():
    config = [["sensors": {"temperature": 20}]]
```

(continues on next page)
What happens in the above example is we mock several calls of the `sensehat` module to return known expected values to assert against.

**Mocking Filehandles**

*Note: This documentation applies to the 2018.3 release cycle and newer. The extended functionality for `mock_open` described below does not exist in the 2017.7 and older release branches.*

Opening files in Salt is done using `salt.utils.files.fopen()`. When testing code that reads from files, the `mock_open` helper can be used to mock filehandles. Note that is not the same `mock_open` as `unittest.mock.mock_open()` from the Python standard library, but rather a separate implementation which has additional functionality.
```
from tests.support.mock import patch, mock_open

import salt.modules.mymod as mymod

def test_something():
    fopen_mock = mock_open(read_data="foo
bar
baz")
    with patch("salt.utils.files.fopen", fopen_mock):
        result = mymod.myfunc()
        assert result is True
```

This will force any filehandle opened to mimic a filehandle which, when read, produces the specified contents.

**Important: String Types**

When configuring your `read_data`, make sure that you are using byte strings (e.g. `b"foo\nbar\nbaz\n"`) when the code you are testing is opening a file for binary reading, otherwise the tests will fail. The mocked file handles produced by `mock_open` will raise a `TypeError` if you attempt to read a bytes string when opening for non-binary reading, and similarly will not let you read a string when opening a file for binary reading. They will also not permit byte strings to be "written" if the mocked file handle was opened for non-binary writing, and vice-versa when opened for non-binary writing. These enhancements force test writers to write more accurate tests.

**More Complex Scenarios**

**Multiple File Paths**

What happens when the code being tested reads from more than one file? For those cases, you can pass `read_data` as a dictionary:

```
import textwrap
from tests.support.mock import patch, mock_open

import salt.modules.mymod as mymod

def test_something():
    contents = {
        "/etc/foo.conf": textwrap.dedent(
            """""""""""
            foo
            bar
            baz
            """"
        ),
        "/etc/b*.conf": textwrap.dedent(
            """"
            one
            two
            three
            """"
        ),
        
    }
```

This would make `salt.utils.files.fopen()` produce filehandles with different contents depending on which file was being opened by the code being tested. `/etc/foo.conf` and any file matching the pattern `/etc/b*.conf` would work, while opening any other path would result in a `FileNotFoundError` being raised.

Since file patterns are supported, it is possible to use a pattern of `'*'` to define a fallback if no other patterns match the filename being opened. The below two `mock_open` calls would produce identical results:

```python
mock_open(read_data="foo\\n")
mock_open(read_data={"*: "foo\\n"})
```

**Note:** Take care when specifying the `read_data` as a dictionary, in cases where the patterns overlap (e.g. when both `/etc/b*.conf` and `/etc/bar.conf` are in the `read_data`). Dictionary iteration order will determine which pattern is attempted first, second, etc., with the exception of `'*'` which is used when no other pattern matches. If your test case calls for specifying overlapping patterns, and you are not running Python 3.6 or newer, then an `OrderedDict` can be used to ensure matching is handled in the desired way:

```python
contents = OrderedDict()
contents["/etc/bar.conf"] = "foo\nbar\nbaz\n"
contents["/etc/b*.conf"] = IOError(errno.EACCES, "Permission denied")
contents["*"‵] = 'This is a fallback for files not beginning with "/etc/b"\n'
fopen_mock = mock_open(read_data=contents)
```

### Raising Exceptions

Instead of a string, an exception can also be used as the `read_data`:

```python
import errno

from tests.support.mock import patch, mock_open

import salt.modules.mymod as mymod

def test_something():
    exc = IOError(errno.EACCES, "Permission denied")
fopen_mock = mock_open(read_data=exc)

    with patch("salt.utils.files.fopen", fopen_mock):
        mymod.myfunc()
```

The above example would raise the specified exception when any file is opened. The expectation would be that `mymod.myfunc()` would gracefully handle the IOError, so a failure to do that would result in it being raised and causing the test to fail.
Multiple File Contents

For cases in which a file is being read more than once, and it is necessary to test a function’s behavior based on what the file looks like the second (or third, etc.) time it is read, just specify the contents for that file as a list. Each time the file is opened, mock_open will cycle through the list and produce a mocked filehandle with the specified contents. For example:

```python
import errno
import textwrap

from tests.support.mock import patch, mock_open

import salt.modules.mymod as mymod

def test_something():
    contents = {
        "/etc/foo.conf": [
            textwrap.dedent(""
                foo
                bar
            ""),
            textwrap.dedent(""
                foo
                bar
                baz
            ""),
        ],
        "/etc/b*.conf": [
            IOError(errno.ENOENT, "No such file or directory"),
            textwrap.dedent(""
                one
                two
                three
            ""),
        ],
    }
    fopen_mock = mock_open(read_data=contents)
    with patch("salt.utils.files.fopen", fopen_mock):
        result = mymod.myfunc()
        assert result is True
```

Using this example, the first time /etc/foo.conf is opened, it will simulate a file with the first string in the list as its contents, while the second time it is opened, the simulated file’s contents will be the second string in the list.

If no more items remain in the list, then attempting to open the file will raise a RuntimeError. In the example above, if /etc/foo.conf were to be opened a third time, a RuntimeError would be raised.

Note that exceptions can also be mixed in with strings when using this technique. In the above example, if /etc/bar.conf were to be opened twice, the first time would simulate the file not existing, while the second time would simulate a file with string defined in the second element of the list.
Note: Notice that the second path in the contents dictionary above (/etc/b*.conf) contains an asterisk. The items in the list are cycled through for each match of a given pattern (not separately for each individual file path), so this means that only two files matching that pattern could be opened before the next one would raise a RuntimeError.

Accessing the Mocked Filehandles in a Test

Note: The code for the MockOpen, MockCall, and MockFH classes (referenced below) can be found in tests/support/mock.py. There are extensive unit tests for them located in tests/unit/test_mock.py.

The above examples simply show how to mock salt.utils.files.fopen() to simulate files with the contents you desire, but you can also access the mocked filehandles (and more), and use them to craft assertions in your tests. To do so, just add an as clause to the end of the patch statement:

```python
fopen_mock = mock_open(read_data=b"foo\nbar\nbaz\n")
with patch("salt.utils.files.fopen", fopen_mock) as m_open:
    # do testing here
```

When doing this, m_open will be a MockOpen instance. It will contain several useful attributes:

- **read_data** - A dictionary containing the read_data passed when mock_open was invoked. In the event that multiple file paths are not used, then this will be a dictionary mapping * to the read_data passed to mock_open.

- **call_count** - An integer representing how many times salt.utils.files.fopen() was called to open a file.

- **calls** - A list of MockCall objects. A MockCall object is a simple class which stores the arguments passed to it, making the positional arguments available via its args attribute, and the keyword arguments available via its kwargs attribute.

```python
from tests.support.mock import patch, mock_open, MockCall

import salt.modules.mymod as mymod

def test_something():
    with patch("salt.utils.files.fopen", mock_open(read_data=b"foo\n")) as m_open:
        mymod.myfunc()
        # Assert that only two opens attempted
        assert m_open.call_count == 2
        # Assert that only /etc/foo.conf was opened
        assert all(call.args[0] == "/etc/foo.conf" for call in m_open.calls)
        # Assert that the first open was for binary read, and the second was for binary write.
        assert m_open.calls == [
            MockCall("/etc/foo.conf", "rb"),
            MockCall("/etc/foo.conf", "wb"),
        ]
```
Note that MockCall is imported from tests.support.mock in the above example. Also, the second assert above is redundant since it is covered in the final assert, but both are included simply as an example.

- **filehandles** - A dictionary mapping the unique file paths opened, to lists of MockFH objects. Each open creates a unique MockFH object. Each MockFH object itself has a number of useful attributes:
  - **filename** - The path to the file which was opened using salt.utils.files.fopen()
  - **call** - A MockCall object representing the arguments passed to salt.utils.files.fopen(). Note that this MockCall is also available in the parent MockOpen instance's calls list.

- The following methods are mocked using unittest.mock.Mock objects, and Mock's built-in asserts (as well as the call data) can be used as you would with any other Mock object:
  - .read()
  - .readlines()
  - .readline()
  - .close()
  - .write()
  - .writelines()
  - .seek()

- The read functions (.read(), .readlines(), .readline()) all work as expected, as does iterating through the file line by line (i.e. for line in fh:).
- The .tell() method is also implemented in such a way that it updates after each time the mocked filehandle is read, and will report the correct position. The one caveat here is that .seek() doesn't actually work (it's simply mocked), and will not change the position. Additionally, neither .write() or .writelines() will modify the mocked filehandle's contents.
- The attributes .write_calls and .writelines_calls (no parenthesis) are available as shorthands and correspond to lists containing the contents passed for all calls to .write() and .writelines(), respectively.

**Examples**

```python
with patch("salt.utils.files.fopen", mock_open(read_data=contents)) as m_open:
    # Run the code you are unit testing
    mymod.myfunc()
    # Check that only the expected file was opened, and that it was opened
    # only once.
    assert m_open.call_count == 1
    assert list(m_open.filehandles) == ["/etc/foo.conf"]
    # "opens" will be a list of all the mocked filehandles opened
    opens = m_open.filehandles["/etc/foo.conf"]
    # Check that we wrote the expected lines ("expected" here is assumed to
    # be a list of strings)
    assert opens[0].write_calls == expected

with patch("salt.utils.files.fopen", mock_open(read_data=contents)) as m_open:
    # Run the code you are unit testing
    mymod.myfunc()
    # Check that .readlines() was called (remember, it's a Mock)
    m_open.filehandles["/etc/foo.conf"][0].readlines().assert_called()
```

4342 Chapter 29. Developing Salt
with patch("salt.utils.files.fopen", mock_open(read_data=contents)) as m_open:
    # Run the code you are unit testing
    mymod.myfunc()
    # Check that we read the file and also wrote to it
    m_open.filehandles["/etc/foo.conf"].read.assert_called_once()
    m_open.filehandles["/etc/foo.conf"].writelines.assert_called_once()

Naming Conventions

Test names and docstrings should indicate what functionality is being tested. Test functions are named `test_<fcn>_<test-name>` where `<fcn>` is the function being tested and `<test-name>` describes the raise or return being tested.

Unit tests for `salt/.../<module>.py` are contained in a file called `tests/pytests/unit/.../test_<module>.py`, e.g. the tests for `salt/modules/alternatives.py` are in `tests/pytests/unit/modules/test_alternatives.py`.

In order for unit tests to get picked up during a run of the unit test suite, each unit test file must be prefixed with `test_` and each individual test must also be prefixed with the `test_` naming syntax, as described above.

If a function does not start with `test_`, then the function acts as a "normal" function and is not considered a testing function. It will not be included in the test run or testing output. The same principle applies to unit test files that do not have the `test_*.py` naming syntax. This test file naming convention is how the test runner recognizes that a test file contains tests.

Imports

Most commonly, the following imports are necessary to create a unit test:

```python
import pytest
```

If you need mock support to your tests, please also import:

```python
from tests.support.mock import MagicMock, patch, call
```

29.23.4 Evaluating Truth

A longer discussion on the types of assertions one can make can be found by reading PyTest's documentation on assertions.

29.23.5 Tests Using Mock Objects

In many cases, the purpose of a Salt module is to interact with some external system, whether it be to control a database, manipulate files on a filesystem or something else. In these varied cases, it's necessary to design a unit test which can test the function whilst replacing functions which might actually call out to external systems. One might think of this as "blocking the exits" for code under tests and redirecting the calls to external systems with our own code which produces known results during the duration of the test.

To achieve this behavior, Salt makes heavy use of the MagicMock package.

To understand how one might integrate Mock into writing a unit test for Salt, let's imagine a scenario in which we're testing an execution module that's designed to operate on a database. Furthermore, let's imagine two separate methods, here presented in pseudo-code in an imaginary execution module called 'db.py'.

29.23. Writing Unit Tests
def create_user(username):
    qry = "CREATE USER {0}".format(username)
    execute_query(qry)

def execute_query(qry):
    # Connect to a database and actually do the query...
    ...

Here, let's imagine that we want to create a unit test for the create_user function. In doing so, we want to avoid any calls out to an external system and so while we are running our unit tests, we want to replace the actual interaction with a database with a function that can capture the parameters sent to it and return pre-defined values. Therefore, our task is clear -- to write a unit test which tests the functionality of create_user while also replacing 'execute_query' with a mocked function.

To begin, we set up the skeleton of our test much like we did before, but with additional imports for MagicMock:

```python
from salt.modules import db
from tests.support.mock import MagicMock, patch, call

def test_create_user():
    """
    Test creating a user
    """
    # First, we replace 'execute_query' with our own mock function
    with patch.object(db, "execute_query", MagicMock()) as db_exq:
        # Now that the exits are blocked, we can run the function under test.
        db.create_user("testuser")

        # We could now query our mock object to see which calls were made
        # to it.
        ## print db_exq.mock_calls

        # Construct a call object that simulates the way we expected
        # execute_query to have been called.
        expected_call = call("CREATE USER testuser")

        # Compare the expected call with the list of actual calls. The
        # test will succeed or fail depending on the output of this
        # assertion.
        db_exq.assert_has_calls(expected_call)
```

29.23.6 Modifying __salt__ In Place

At times, it becomes necessary to make modifications to a module's view of functions in its own __salt__ dictionary. Luckily, this process is quite easy.

Below is an example that uses MagicMock's patch functionality to insert a function into __salt__ that's actually a MagicMock instance.

```python
import pytest
import salt.modules.my_module as my_module
```

(continues on next page)
@pytest.fixture
def configure_loader_modules():
    ""
    This fixture should return a dictionary which is what's going to be used to
    patch and mock Salt's loader
    ""
    return {'my_module': {}}

def show_patch(self):
    with patch.dict(my_module.__salt__, {'function.to_replace': MagicMock()}):
        # From this scope, carry on with testing, with a modified __salt__!

29.23.7 A Simple Example

Let's assume that we're testing a very basic function in an imaginary Salt execution module. Given a module called
fib.py that has a function called calculate(num_of_results), which given a num_of_results, produces a list
of sequential Fibonacci numbers of that length.

A unit test to test this function might be commonly placed in a file called tests/pytests/unit/modules/
test_fib.py. The convention is to place unit tests for Salt execution modules in test/pytests/unit/
modules/ and to name the tests module prefixed with test_*_.py.

Tests are grouped around test cases, which are logically grouped sets of tests against a piece of functionality in the
tested software. To return to our example, here's how we might write the skeleton for testing fib.py:

```python
import salt.modules.fib as fib

def test_fib():
    ""
    To create a unit test, we should prefix the name with 'test_' so
    that it's recognized by the test runner.
    ""
    fib_five = (0, 1, 1, 2, 3)
    assert fib.calculate(5) == fib_five
```

At this point, the test can now be run, either individually or as a part of a full run of the test runner. To ease
development, a single test can be executed:

```
nox -e 'pytest-3(coverage=False)' -- -v tests/pytests/unit/modules/test_fib.py
```

This will report the status of the test: success, failure, or error. The -v flag increases output verbosity.
To review the results of a particular run, take a note of the log location given in the output for each test run:

```
...etc... --log-file=artifacts/logs/runtests-20210106103414.685791.log ...etc...
```
29.23.8 A More Complete Example

Consider the following function from salt/modules/linux_sysctl.py.

```python
def get(name):
    """
    Return a single sysctl parameter for this minion
    
    CLI Example:
    .. code-block:: bash
        salt '*' sysctl.get net.ipv4.ip_forward
    """
    cmd = "sysctl -n {0}".format(name)
    out = __salt__['cmd.run'](cmd, python_shell=False)
    return out
```

This function is very simple, comprising only four source lines of code and having only one return statement, so we know only one test is needed. There are also two inputs to the function, the name function argument and the call to __salt__['cmd.run'](), both of which need to be appropriately mocked.

Mocking a function parameter is straightforward, whereas mocking a function call will require, in this case, the use of MagicMock. For added isolation, we will also redefine the __salt__ dictionary such that it only contains 'cmd.run'.

```python
import pytest
import salt.modules.linux_sysctl as linux_sysctl
from tests.support.mock import MagicMock, patch

@pytest.fixture
def configure_loader_modules():
    return {linux_sysctl: {}}

def test_get():
    """
    Tests the return of get function
    """
    mock_cmd = MagicMock(return_value=1)
    with patch.dict(linux_sysctl.__salt__, {'cmd.run': mock_cmd}):
        assert linux_sysctl.get("net.ipv4.ip_forward") == 1
```

Since get() has only one raise or return statement and that statement is a success condition, the test function is simply named test_get(). As described, the single function call parameter, name is mocked with net.ipv4.ip_forward and __salt__['cmd.run'] is replaced by a MagicMock function object. We are only interested in the return value of __salt__['cmd.run'], which MagicMock allows us by specifying via return_value=1. Finally, the test itself tests for equality between the return value of get() and the expected return of 1. This assertion is expected to succeed because get() will determine its return value from __salt__['cmd.run'], which we have mocked to return 1.
29.23.9 A Complex Example

Now consider the `assign()` function from the same salt/modules/linux_sysctl.py source file.

```python
def assign(name, value):
    """
    Assign a single sysctl parameter for this minion
    
    CLI Example:
    .. code-block:: bash
        salt '*' sysctl.assign net.ipv4.ip_forward 1
    """
    value = str(value)
    tran_tab = name.translate(" ".maketrans("/ ", "/"))
    sysctl_file = "/proc/sys/{}".format(tran_tab)
    if not os.path.exists(sysctl_file):
        raise CommandExecutionError("sysctl {} does not exist".format(name))
    ret = {}
    cmd = '"sysctl -w {}="{}"'.format(name, value)
    data = __salt__['cmd.run_all'](cmd, python_shell=False)
    out = data['stdout']
    err = data['stderr']
    # Example:
    # # sysctl -w net.ipv4.tcp_rmem="4096 87380 16777216"
    # net.ipv4.tcp_rmem = 4096 87380 16777216
    # regex = re.compile(r"^{}(.*)$".format(re.escape(name), re.escape(value)))
    if not regex.match(out) or "Invalid argument" in str(err):
        if data["retcode"] != 0 and err:
            error = err
        else:
            error = out
        raise CommandExecutionError("sysctl -w failed: {}").format(error))
    new_name, new_value = out.split(" = ", 1)
    ret[new_name] = new_value
    return ret
```

This function contains two raise statements and one return statement, so we know that we will need (at least) three tests. It has two function arguments and many references to non-builtin functions. In the tests below you will see that MagicMock's `patch()` method may be used as a context manager or as a decorator. When patching the salt dunders however, please use the context manager approach.

There are three test functions, one for each raise and return statement in the source function. Each function is self-contained and contains all and only the mocks and data needed to test the raise or return statement it is concerned with.

```python
import pytest
import salt.modules.linux_sysctl as linux_sysctl
from salt.exceptions import CommandExecutionError
from tests.support.mock import MagicMock, patch
```

(continues on next page)
@pytest.fixture
def configure_loader_modules():
    return {linux_sysctl: {}}

def test_assign_proc_sys_failed():
    """
    Tests if /proc/sys/<kernel-subsystem> exists or not
    """
    with patch("os.path.exists", MagicMock(return_value=False)):
        cmd = {
            "pid": 1337,
            "retcode": 0,
            "stderr": "sysctl: setting key "net.ipv4.ip_forward": Invalid argument",
            "stdout": "net.ipv4.ip_forward = backward",
        }
        mock_cmd = MagicMock(return_value=cmd)
        with patch.dict(linux_sysctl.__salt__, {"cmd.run_all": mock_cmd}):
            with pytest.raises(CommandExecutionError):
                linux_sysctl.assign("net.ipv4.ip_forward", 1)

def test_assign_cmd_failed():
    """
    Tests if the assignment was successful or not
    """
    with patch("os.path.exists", MagicMock(return_value=True)):
        cmd = {
            "pid": 1337,
            "retcode": 0,
            "stderr": "sysctl: setting key "net.ipv4.ip_forward": Invalid argument",
            "stdout": "net.ipv4.ip_forward = backward",
        }
        mock_cmd = MagicMock(return_value=cmd)
        with patch.dict(linux_sysctl.__salt__, {"cmd.run_all": mock_cmd}):
            with pytest.raises(CommandExecutionError):
                linux_sysctl.assign("net.ipv4.ip_forward", "backward")

def test_assign_success():
    """
    Tests the return of successful assign function
    """
    with patch("os.path.exists", MagicMock(return_value=True)):
        cmd = {
            "pid": 1337,
            "retcode": 0,
            "stderr": "",
            "stdout": "net.ipv4.ip_forward = 1",
        }
        ret = {"net.ipv4.ip_forward": "1"}
        mock_cmd = MagicMock(return_value=cmd)
        with patch.dict(linux_sysctl.__salt__, {"cmd.run_all": mock_cmd}):
            assert linux_sysctl.assign("net.ipv4.ip_forward", 1) == ret
29.24 SaltStack Git Policy

The SaltStack team follows a git policy to maintain stability and consistency with the repository.

The git policy has been developed to encourage contributions and make contributing to Salt as easy as possible. Code contributors to SaltStack projects DO NOT NEED TO READ THIS DOCUMENT, because all contributions come into SaltStack via a single gateway to make it as easy as possible for contributors to give us code.

The primary rule of git management in SaltStack is to make life easy on contributors and developers to send in code. Simplicity is always a goal!

29.24.1 New Code Entry

All new SaltStack code should be submitted against master.

29.24.2 Release Branching

SaltStack maintains two types of releases, Feature Releases and Point Releases (also commonly referred to as Bugfix Releases). A feature release is managed by incrementing the first or second release point number, so 2015.5.5 -> 2015.8.0 signifies a feature release and 2015.8.0 -> 2015.8.1 signifies a point release.

Feature Release Branching

Each feature release is maintained in a dedicated git branch derived from the last applicable release commit on develop. All file changes relevant to the feature release will be completed in the master branch prior to the creation of the feature release branch. The feature release branch will be named after the relevant numbers to the feature release, which constitute the first two numbers. This means that the release branch for the 2015.8.0 series is named 2015.8.

A feature release branch is created with the following command:

```
# git checkout -b 2015.8 # From the master branch
# git push origin 2015.8
```

Point Releases

As documented in SEP 14, point releases should be rare.

29.25 Salt Conventions

29.25.1 Writing Salt Documentation

Salt’s documentation is built using the Sphinx documentation system. It can be built in a large variety of output formats including HTML, PDF, ePub, and manpage.

All the documentation is contained in the main Salt repository. Speaking broadly, most of the narrative documentation is contained within the https://github.com/saltstack/salt/blob/master/doc subdirectory and most of the reference and API documentation is written inline with Salt’s Python code and extracted using a Sphinx extension.
Style

The Salt project recommends the IEEE style guide as a general reference for writing guidelines. Those guidelines are not strictly enforced but rather serve as an excellent resource for technical writing questions. The NCBI style guide is another very approachable resource.

Point-of-view

Use third-person perspective and avoid "I", "we", "you" forms of address. Identify the addressee specifically e.g., "users should", "the compiler does", etc.

Active voice

Use active voice and present-tense. Avoid filler words.

Title capitalization

Document titles and section titles within a page should follow normal sentence capitalization rules. Words that are capitalized as part of a regular sentence should be capitalized in a title and otherwise left as lowercase. Punctuation can be omitted unless it aids the intent of the title (e.g., exclamation points or question marks).

For example:

This is a main heading
======================
Paragraph.

This is an exciting sub-heading!
--------------------------------
Paragraph.

Serial Commas

According to Wikipedia: In English punctuation, a serial comma or series comma (also called Oxford comma and Harvard comma) is a comma placed immediately before the coordinating conjunction (usually "and", "or", or "nor") in a series of three or more terms. For example, a list of three countries might be punctuated either as "France, Italy, and Spain" (with the serial comma), or as "France, Italy and Spain" (without the serial comma).

When writing a list that includes three or more items, the serial comma should always be used.
Documenting modules

Documentation for Salt’s various module types is inline in the code. During the documentation build process it is extracted and formatted into the final HTML, PDF, etc format.

Inline documentation

Python has special multi-line strings called docstrings as the first element in a function or class. These strings allow documentation to live alongside the code and can contain special formatting. For example:

```python
def my_function(value):
    ""
    Upper-case the given value
    Usage:
    .. code-block:: python
        val = 'a string'
        new_val = myfunction(val)
        print(new_val) # 'A STRING'

    :param value: a string
    :return: a copy of ``value`` that has been upper-cased
    ""
    return value.upper()
```

Specify a release for additions or changes

New functions or changes to existing functions should include a marker that denotes what Salt release will be affected. For example:

```python
def my_function(value):
    ""
    Upper-case the given value
    .. versionadded:: 2014.7.0
    <...snip...>
    ""
    return value.upper()
```

For changes to a function:

```python
def my_function(value, strip=False):
    ""
    Upper-case the given value
    .. versionchanged:: 2016.3.0
        Added a flag to also strip whitespace from the string.
    <...snip...>
    ""
    if strip:
```

(continues on next page)
Adding module documentation to the index

Each module type has an index listing all modules of that type. For example: execution modules, state modules, renderer modules. New modules must be added to the index manually.

1. Edit the file for the module type: execution modules, state modules, renderer modules, etc.
2. Add the new module to the alphabetized list.
3. Build the documentation which will generate an .rst file for the new module in the same directory as the index.rst.
4. Commit the changes to index.rst and the new .rst file and send a pull request.

Cross-references

The Sphinx documentation system contains a wide variety of cross-referencing capabilities.

Glossary entries

Link to glossary entries using the term role. A cross-reference should be added the first time a Salt-specific term is used in a document.

A common way to encapsulate master-side functionality is by writing a custom :term:`Runner Function`. Custom Runner Functions are easy to write.

Index entries

Sphinx automatically generates many kinds of index entries, but it is occasionally useful to manually add items to the index.

One method is to use the index directive above the document or section that should appear in the index.

```
.. index:: ! Event, event bus, event system
   see: Reactor; Event
```

Another method is to use the index role inline with the text that should appear in the index. The index entry is created and the target text is left otherwise intact.

```
Information about the :index:`Salt Reactor`
```

Paragraph.
Documents and sections

Each document should contain a unique top-level label of the form:

```plaintext
.. _my-page:

My page
=======

Paragraph.
```

Unique labels can be linked using the `ref role`. This allows cross-references to survive document renames or movement.

```plaintext
For more information see `my-page`.
```

Note, the `:doc:` role should *not* be used to link documents together.

Modules

Cross-references to Salt modules can be added using Sphinx's Python domain roles. For example, to create a link to the `test.ping` function:

```plaintext
A useful execution module to test active communication with a minion is the `test.ping <salt.modules.test.ping>` function.
```

Salt modules can be referenced as well:

```plaintext
The `test module <salt.modules.test>` contains many useful functions for inspecting an active Salt connection.
```

The same syntax works for all modules types:

```plaintext
One of the workhorse state module functions in Salt is the `file.managed <salt.states.file.managed>` function.
```

Settings

Individual settings in the Salt Master or Salt Minion configuration files are cross-referenced using two custom roles, `conf_master`, and `conf_minion`.

```plaintext
The `minion ID <id>` setting is a unique identifier for a single minion.
```
29.25.2 Salt Formulas

Formulas are pre-written Salt States. They are as open-ended as Salt States themselves and can be used for tasks such as installing a package, configuring, and starting a service, setting up users or permissions, and many other common tasks.

All official Salt Formulas are found as separate Git repositories in the "saltstack-formulas" organization on GitHub: https://github.com/saltstack-formulas

As a simple example, to install the popular Apache web server (using the normal defaults for the underlying distro) simply include the apache-formula from a top file:

```
base:
  'web*':
    - apache
```

Installation

Each Salt Formula is an individual Git repository designed as a drop-in addition to an existing Salt State tree. Formulas can be installed in the following ways.

Adding a Formula as a GitFS remote

One design goal of Salt's GitFS fileserver backend was to facilitate reusable States. GitFS is a quick and natural way to use Formulas.

1. Install any necessary dependencies and configure GitFS.
2. Add one or more Formula repository URLs as remotes in the gitfs_remotes list in the Salt Master configuration file:

   ```
gitfs_remotes:
    - https://github.com/saltstack-formulas/apache-formula
    - https://github.com/saltstack-formulas/memcached-formula
   ```

   We strongly recommend forking a formula repository into your own GitHub account to avoid unexpected changes to your infrastructure.

   Many Salt Formulas are highly active repositories so pull new changes with care. Plus any additions you make to your fork can be easily sent back upstream with a quick pull request!

3. Restart the Salt master.

Beginning with the 2018.3.0 release, using formulas with GitFS is now much more convenient for deployments which use many different fileserver environments (i.e. saltenvs). Using the all_saltenvs parameter, files from a single git branch/tag will appear in all environments. See here for more information on this feature.
Adding a Formula directory manually

Formulas are simply directories that can be copied onto the local file system by using Git to clone the repository or by downloading and expanding a tarball or zip file of the repository. The directory structure is designed to work with `file_roots` in the Salt master configuration.

1. Clone or download the repository into a directory:

   ```
   mkdir -p /srv/formulas
   cd /srv/formulas
   git clone https://github.com/saltstack-formulas/apache-formula.git
   
   # or
   mkdir -p /srv/formulas
   cd /srv/formulas
   wget -O apache-formula-master.tar.gz https://github.com/saltstack-formulas/apache-formula/archive/master.tar.gz
   tar xf apache-formula-master.tar.gz
   ```

2. Add the new directory to `file_roots`:

   ```
   file_roots:
   base:
   - /srv/salt
   - /srv/formulas/apache-formula
   ```

3. Restart the Salt Master.

Usage

Each Formula is intended to be immediately usable with sane defaults without any additional configuration. Many formulas are also configurable by including data in Pillar; see the pillar.example file in each Formula repository for available options.

Including a Formula in an existing State tree

Formula may be included in an existing sls file. This is often useful when a state you are writing needs to require or extend a state defined in the formula.

Here is an example of a state that uses the epel-formula in a require declaration which directs Salt to not install the python26 package until after the EPEL repository has also been installed:

```
include:
  - epel

python26:
  pkg.installed:
    - require:
      - pkg: epel
```
Including a Formula from a Top File

Some Formula perform completely standalone installations that are not referenced from other state files. It is usually cleanest to include these Formula directly from a Top File.

For example the easiest way to set up an OpenStack deployment on a single machine is to include the openstack-standalone-formula directly from a top.sls file:

```yaml
base:
  'myopenstackmaster':
    - openstack
```

Quickly deploying OpenStack across several dedicated machines could also be done directly from a Top File and may look something like this:

```yaml
base:
  'controller':
    - openstack.horizon
    - openstack.keystone
  'hyper-*':
    - openstack.nova
    - openstack.glance
  'storage-*':
    - openstack.swift
```

Configuring Formula using Pillar

Salt Formulas are designed to work out of the box with no additional configuration. However, many Formula support additional configuration and customization through Pillar. Examples of available options can be found in a file named pillar.example in the root directory of each Formula repository.

Using Formula with your own states

Remember that Formula are regular Salt States and can be used with all Salt’s normal state mechanisms. Formula can be required from other States with require declarations, they can be modified using extend, they can made to watch other states with The _in version of requisites.

The following example uses the stock apache-formula alongside a custom state to create a vhost on a Debian/Ubuntu system and to reload the Apache service whenever the vhost is changed.

```yaml
# Include the stock, upstream apache formula.
include:
  - apache

# Use the watch_in requisite to cause the apache service state to reload
# apache whenever the my-example-com-vhost state changes.
my-example-com-vhost:
  file:
    - managed
    - name: /etc/apache2/sites-available/my-example-com
      watch_in:
        - service: apache
```

Don't be shy to read through the source for each Formula!
Reporting problems & making additions

Each Formula is a separate repository on GitHub. If you encounter a bug with a Formula please file an issue in the respective repository! Send fixes and additions as a pull request. Add tips and tricks to the repository wiki.

Writing Formulas

Each Formula is a separate repository in the saltstack-formulas organization on GitHub.

Get involved creating new Formulas

The best way to create new Formula repositories for now is to create a repository in your own account on GitHub and notify a SaltStack employee when it is ready. We will add you to the Contributors team on the saltstack-formulas organization and help you transfer the repository over. Ping a SaltStack employee on IRC (#salt on LiberaChat), join the #formulas channel on the salt-slack (bridged to saltstack-formulas on LiberaChat) or send an email to the salt-users mailing list. Note that IRC logs are available at https://freenode.logbot.info/salt, https://freenode.logbot.info/saltstack-formulas, and http://ngxbot.nginx.org/logs/%23salt/.

There are a lot of repositories in that organization! Team members can manage which repositories they are subscribed to on GitHub’s watching page: https://github.com/watching.

Members of the Contributors team are welcome to participate in reviewing pull requests across the Organization. Some repositories will have regular contributors and some repositories will not. As you get involved in a repository be sure to communicate with any other contributors there on pull requests that are large or have breaking changes.

In general it is best to have another Contributor review and merge any pull requests that you open. Feel free to at-mention other regular contributors to a repository and request a review. However, there are a lot of formula repositories so if a repository does not yet have regular contributors or if your pull request has stayed open for more than a couple days feel free to “selfie-merge” your own pull request.

Style

Maintainability, readability, and reusability are all marks of a good Salt sls file. This section contains several suggestions and examples.

```python
# Deploy the stable master branch unless version overridden by passing
# Pillar at the CLI or via the Reactor.

deploy_myapp:
    git.latest:
        - name: git@github.com/myco/myapp.git
        - version: {{ salt.pillar.get('myapp:version', 'master') }}
```
Use a descriptive State ID

The ID of a state is used as a unique identifier that may be referenced via other states in requisites. It must be unique across the whole state tree (it is a key in a dictionary, after all).

In addition a state ID should be descriptive and serve as a high-level hint of what it will do, or manage, or change. For example, deploy_webapp, or apache, or reload_firewall.

Use module.function notation

So-called "short-declaration" notation is preferred for referencing state modules and state functions. It provides a consistent pattern of module.function shared between Salt States, the Reactor, Salt Mine, the Scheduler, as well as with the CLI.

```yaml
# Do
apache:
  pkg.installed:
    - name: httpd

# Don't
apache:
  pkg:
    - installed
    - name: httpd
```

Salt's state compiler will transform "short-decs" into the longer format when compiling the human-friendly highstate structure into the machine-friendly lowstate structure.

Specify the name parameter

Use a unique and permanent identifier for the state ID and reserve name for data with variability.

The name declaration is a required parameter for all state functions. The state ID will implicitly be used as name if it is not explicitly set in the state.

In many state functions the name parameter is used for data that varies such as OS-specific package names, OS-specific file system paths, repository addresses, etc. Any time the ID of a state changes all references to that ID must also be changed. Use a permanent ID when writing a state the first time to future-proof that state and allow for easier refactors down the road.

Comment state files

YAML allows comments at varying indentation levels. It is a good practice to comment state files. Use vertical whitespace to visually separate different concepts or actions.

```
# Start with a high-level description of the current sls file.
# Explain the scope of what it will do or manage.

# Comment individual states as necessary.
update_a_config_file:
  # Provide details on why an unusual choice was made. For example:
  #
  # This template is fetched from a third-party and does not fit our
```

(continues on next page)
Be careful to use Jinja comments for commenting Jinja code and YAML comments for commenting YAML code.

```yaml
# BAD EXAMPLE
# The Jinja in this YAML comment is still executed!
# {% set apache_is_installed = 'apache' in salt.pkg.list_pkgs() %}

# GOOD EXAMPLE
# The Jinja in this Jinja comment will not be executed.
#{% set apache_is_installed = 'apache' in salt.pkg.list_pkgs() %} #}
```

Easy on the Jinja!

Jinja templating provides vast flexibility and power when building Salt sls files. It can also create an unmaintainable tangle of logic and data. Speaking broadly, Jinja is best used when kept apart from the states (as much as is possible). Below are guidelines and examples of how Jinja can be used effectively.

**Know the evaluation and execution order**

High-level knowledge of how Salt states are compiled and run is useful when writing states.

The default `renderer` setting in Salt is Jinja piped to YAML. Each is a separate step. Each step is not aware of the previous or following step. Jinja is not YAML aware, YAML is not Jinja aware; they cannot share variables or interact.

- Whatever the Jinja step produces must be valid YAML.
- Whatever the YAML step produces must be a valid `highstate data structure`. (This is also true of the final step for any of the alternate renderers in Salt.)
- Highstate can be thought of as a human-friendly data structure; easy to write and easy to read.
- Salt's state compiler validates the `highstate` and compiles it to low state.
• Low state can be thought of as a machine-friendly data structure. It is a list of dictionaries that each map directly to a function call.
• Salt’s state system finally starts and executes on each “chunk” in the low state. Remember that requisites are evaluated at runtime.
• The return for each function call is added to the “running” dictionary which is the final output at the end of the state run.

The full evaluation and execution order:

| Jinja | YAML | Highstate | low state | execution |

Avoid changing the underlying system with Jinja

Avoid calling commands from Jinja that change the underlying system. Commands run via Jinja do not respect Salt’s dry-run mode (test=True)! This is usually in conflict with the idempotent nature of Salt states unless the command being run is also idempotent.

Inspect the local system

A common use for Jinja in Salt states is to gather information about the underlying system. The grains dictionary available in the Jinja context is a great example of common data points that Salt itself has already gathered. Less common values are often found by running commands. For example:

```jinja
{% set is_selinux_enabled = salt.cmd.run('sestatus') == '1' %}
```

This is usually best done with a variable assignment in order to separate the data from the state that will make use of the data.

Gather external data

One of the most common uses for Jinja is to pull external data into the state file. External data can come from anywhere like API calls or database queries, but it most commonly comes from flat files on the file system or Pillar data from the Salt Master. For example:

```jinja
{% set some_data = salt.pillar.get('some_data', {'sane default': True}) %}
[# or #]
{% import_yaml 'path/to/file.yaml' as some_data %}
[# or #]
{% import_json 'path/to/file.json' as some_data %}
[# or #]
{% import_text 'path/to/ssh_key.pub' as ssh_pub_key %}
[# or #]
{% from 'path/to/other_file.jinja' import some_data with context %}
```
This is usually best done with a variable assignment in order to separate the data from the state that will make use of the data.

Light conditionals and looping

Jinja is extremely powerful for programmatically generating Salt states. It is also easy to overuse. As a rule of thumb, if it is hard to read it will be hard to maintain!

Separate Jinja control-flow statements from the states as much as is possible to create readable states. Limit Jinja within states to simple variable lookups.

Below is a simple example of a readable loop:

```jinja
{% for user in salt.pillar.get('list_of_users', []) %}
    {{ user.name }}-
    {{ loop.index }}:
    - name: {{ user.name }}
    - shell: {{ user.shell }}
{% endfor %}
```

Avoid putting a Jinja conditionals within Salt states where possible. Readability suffers and the correct YAML indentation is difficult to see in the surrounding visual noise. Parametrization (discussed below) and variables are both useful techniques to avoid this. For example:

```
# ---- Bad example ---- #

apache:
    pkg.installed:
    {% if grains.os_family == 'RedHat' %}
        - name: httpd
    {% elif grains.os_family == 'Debian' %}
        - name: apache2
    {% endif %}

# ---- Better example ---- #

apache:
    pkg.installed:
        {% set name = 'httpd' %}
        {% elif grains.os_family == 'Debian' %}
        - name: apache2
        {% endif %}

# ---- Good example ---- #

apache:
    pkg.installed:
        - name: {{ name }}
```

(continues on next page)
Dictionaries are useful to effectively "namespace" a collection of variables. This is useful with parametrization (discussed below). Dictionaries are also easily combined and merged. And they can be directly serialized into YAML which is often easier than trying to create valid YAML through templating. For example:

```
# ---- Bad example ---- #

haproxy_conf:
  file.managed:
    - name: /etc/haproxy/haproxy.cfg
    - template: jinja
      {% if 'external_loadbalancer' in grains.roles %}
        - source: salt://haproxy/external_haproxy.cfg
      {% elseif 'internal_loadbalancer' in grains.roles %}
        - source: salt://haproxy/internal_haproxy.cfg
      {% endif %}
    - context:
      {% if 'external_loadbalancer' in grains.roles %}
        ssl_termination: True
      {% elseif 'internal_loadbalancer' in grains.roles %}
        ssl_termination: False
      {% endif %}

# ---- Better example ---- #

{% load yaml as haproxy_defaults %}

common_settings:
  bind_port: 80

internal_loadbalancer:
  source: salt://haproxy/internal_haproxy.cfg
  settings:
    bind_port: 8080
    ssl_termination: False

external_loadbalancer:
  source: salt://haproxy/external_haproxy.cfg
  settings:
    ssl_termination: True

{% endload %}

{% if 'external_loadbalancer' in grains.roles %}
{% set haproxy = haproxy_defaults['external_loadbalancer'] %}
{% elseif 'internal_loadbalancer' in grains.roles %}
{% set haproxy = haproxy_defaults['internal_loadbalancer'] %}
{% endif %}

{% do haproxy.settings.update(haproxy_defaults.common_settings) %}

haproxy_conf:
  file.managed:
    - name: /etc/haproxy/haproxy.cfg
    - template: jinja
    - source: {{ haproxy.source }}
    - context: {{ haproxy.settings | yaml() }}</pre>
There is still room for improvement in the above example. For example, extracting into an external file or replacing the if-elif conditional with a function call to filter the correct data more succinctly. However, the state itself is simple and legible, the data is separate and also simple and legible. And those suggested improvements can be made at some future date without altering the state at all!

**Avoid heavy logic and programming**

Jinja is not Python. It was made by Python programmers and shares many semantics and some syntax but it does not allow for arbitrary Python function calls or Python imports. Jinja is a fast and efficient templating language but the syntax can be verbose and visually noisy.

Once Jinja use within an sls file becomes slightly complicated -- long chains of if-elif-elif-else statements, nested conditionals, complicated dictionary merges, wanting to use sets -- instead consider using a different Salt renderer, such as the Python renderer. As a rule of thumb, if it is hard to read it will be hard to maintain -- switch to a format that is easier to read.

Using alternate renderers is very simple to do using Salt's "she-bang" syntax at the top of the file. The Python renderer must simply return the correct highstate data structure. The following example is a state tree of two sls files, one simple and one complicated.

```
/srv/salt/top.sls:

base:
  '*':
    - common_configuration
    - roles_configuration

/srv/salt/common_configuration.sls:

common_users:
  user.present:
    - names:
      - larry
      - curly
      - moe

/srv/salt/roles_configuration:

  #!py
  def run():
    list_of_roles = set()

    # This example has the minion id in the form 'web-03-dev'.
    # Easily access the grains dictionary:
    try:
      app, instance_number, environment = __grains__['id'].split("-n")
      instance_number = int(instance_number)
    except ValueError:
      app, instance_number, environment = ['Unknown', 0, 'dev']

    list_of_roles.add(app)

    if app == "web" and environment == "dev":
      list_of_roles.add("primary")
      list_of_roles.add("secondary")
    elif app == "web" and environment == "staging":
      if instance_number == 0:
```

(continues on next page)
list_of_roles.add("primary")
else:
    list_of_roles.add("secondary")

# Easily cross-call Salt execution modules:
if __salt__["myutils.query_valid_ec2_instance"]():
    list_of_roles.add("is_ec2_instance")

return {
    "set_roles_grains": {
        "grains.present": [{"name": "roles"}, {"value": list(list_of_roles)}],
    }
}

Jinja Macros

In Salt sls files Jinja macros are useful for one thing and one thing only: creating mini templates that can be reused and rendered on demand. Do not fall into the trap of thinking of macros as functions; Jinja is not Python (see above).

Macros are useful for creating reusable, parameterized states. For example:

```jinja
def user(state_id, user_name, shell='/bin/bash', groups=[]):
    user.present:
        - name: {{ user_name }}
        - shell: {{ shell }}
        - groups: {{ groups | json() }}
```

Macros are also useful for creating one-off "serializers" that can accept a data structure and write that out as a domain-specific configuration file. For example, the following macro could be used to write a php.ini config file:

/srv/salt/php.sls:

```yaml
class php_ini:
    file.managed:
        - name: /etc/php.ini
        - source: salt://php.ini.tmpl
        - template: jinja
        context:
            php_ini_settings: {{ salt.pillar.get('php_ini', {}) | json() }}
```

/srv/pillar/php.sls:

```yaml
class php_ini:
    PHP:
        engine: 'On'
        short_open_tag: 'Off'
        error_reporting: 'E_ALL & ~E_DEPRECATED & ~E_STRICT'
```

/srv/salt/php.ini.tmpl:

```yaml
{{ salt.pillar.get('php_ini', {}) | json() }}
```
Abstracting static defaults into a lookup table

Separate data that a state uses from the state itself to increases the flexibility and reusability of a state.

An obvious and common example of this is platform-specific package names and file system paths. Another example is sane defaults for an application, or common settings within a company or organization. Organizing such data as a dictionary (aka hash map, lookup table, associative array) often provides a lightweight namespace and allows for quick and easy lookups. In addition, using a dictionary allows for easily merging and overriding static values within a lookup table with dynamic values fetched from Pillar.

A strong convention in Salt Formulas is to place platform-specific data, such as package names and file system paths, into a file named `map.jinja` that is placed alongside the state files.

The following is an example from the MySQL Formula. The `grains.filter_by` function performs a lookup on that table using the `os_family` grain (by default).

The result is that the `mysql` variable is assigned to a subset of the lookup table for the current platform. This allows states to reference, for example, the name of a package without worrying about the underlying OS. The syntax for referencing a value is a normal dictionary lookup in Jinja, such as `{{ mysql['service'] }}` or the shorthand `{{ mysql.service }}`.

`map.jinja`:

```jinja
{% set mysql = salt['grains.filter_by']({
    'Debian': {
        'server': 'mysql-server',
        'client': 'mysql-client',
        'service': 'mysql',
        'config': '/etc/mysql/my.cnf',
        'python': 'python-mysqldb',
    },
    'RedHat': {
        'server': 'mysql-server',
        'client': 'mysql',
        'service': 'mysqld',
        'config': '/etc/my.cnf',
        'python': 'MySQL-python',
    },
    'Gentoo': {
        'server': 'dev-db/mysql',
        'client': 'dev-db/mysql',
        'service': 'mysql',
    },
})
%
```

(continues on next page)
Values defined in the map file can be fetched for the current platform in any state file using the following syntax:

```jinja
{% from "mysql/map.jinja" import mysql with context %}

mysql-server:
    pkg.installed:
        - name: {{ mysql.server }}
    service.running:
        - name: {{ mysql.service }}
```

Organizing Pillar data

It is considered a best practice to make formulas expect all formula-related parameters to be placed under second-level lookup key, within a main namespace designated for holding data for particular service/software/etc, managed by the formula:

```python
mysql:
    lookup:
        version: 5.7.11
```

Collecting common values

Common values can be collected into a base dictionary. This minimizes repetition of identical values in each of the lookup_dict sub-dictionaries. Now only the values that are different from the base must be specified by the alternates:

```python
map.jinja:

{% set mysql = salt['grains.filter_by']({
    'default': {
        'server': 'mysql-server',
        'client': 'mysql-client',
        'service': 'mysql',
        'config': '/etc/mysql/my.cnf',
        'python': 'python-mysqldb',
    },
    'Debian': {
    },
    'RedHat': {
        'client': 'mysql',
        'service': 'mysqld',
        'config': '/etc/my.cnf',
        'python': 'MySQL-python',
    },
    'Gentoo': {
        'server': 'dev-db/mysql',
        'client': 'dev-db/mysql',
        'python': 'dev-python/mysql-python',
    },
}, merge=salt['pillar.get']('mysql:lookup')) %
```
Overriding values in the lookup table

Allow static values within lookup tables to be overridden. This is a simple pattern which once again increases flexibility and reusability for state files.

The `merge` argument in `filter_by` specifies the location of a dictionary in Pillar that can be used to override values returned from the lookup table. If the value exists in Pillar it will take precedence.

This is useful when software or configuration files is installed to non-standard locations or on unsupported platforms. For example, the following Pillar would replace the `config` value from the call above.

```
mysql:
    lookup:
        config: /usr/local/etc/mysql/my.cnf
```

**Note:** Protecting Expansion of Content with Special Characters

When templating keep in mind that YAML does have special characters for quoting, flows, and other special structure and content. When a Jinja substitution may have special characters that will be incorrectly parsed by YAML care must be taken. It is a good policy to use the `yaml_encode` or the `yaml_dquote` Jinja filters:

```
{% set foo = 7.7 %}
{% set bar = 'none' %}
{% set baz = true %}
{% set zap = 'The word of the day is "salty".' %}
{% set zip = "The quick brown fox . . ." %}

foo: {{ foo|yaml_encode }}
bar: {{ bar|yaml_encode }}
baz: {{ baz|yaml_encode }}
zap: {{ zap|yaml_encode }}
zip: {{ zip|yaml_dquote }}
```

The above will be rendered as below:

```
foo: 7.7
bar: null
baz: true
zap: "The word of the day is "salty"."
zip: "The quick brown fox . . ."
```

The `filter_by` function performs a simple dictionary lookup but also allows for fetching data from Pillar and overriding data stored in the lookup table. That same workflow can be easily performed without using `filter_by`; other dictionaries besides data from Pillar can also be used.

```
{% set lookup_table = {...} %}
{% do lookup_table.update(salt.pillar.get('my:custom:data')) %}
```
When to use lookup tables

The `map.jinja` file is only a convention within Salt Formulas. This greater pattern is useful for a wide variety of data in a wide variety of workflows. This pattern is not limited to pulling data from a single file or data source. This pattern is useful in States, Pillar and the Reactor, for example.

Working with a data structure instead of, say, a config file allows the data to be cobbled together from multiple sources (local files, remote Pillar, database queries, etc), combined, overridden, and searched.

Below are a few examples of what lookup tables may be useful for and how they may be used and represented.

Platform-specific information

An obvious pattern and one used heavily in Salt Formulas is extracting platform-specific information such as package names and file system paths in a file named `map.jinja`. The pattern is explained in detail above.

Sane defaults

Application settings can be a good fit for this pattern. Store default settings along with the states themselves and keep overrides and sensitive settings in Pillar. Combine both into a single dictionary and then write the application config or settings file.

The example below stores most of the Apache Tomcat `server.xml` file alongside the Tomcat states and then allows values to be updated or augmented via Pillar. (This example uses the BadgerFish format for transforming JSON to XML.)

```
/srv/salt/tomcat/defaults.yaml:

Server:
  '@port': '8005'
  '@shutdown': SHUTDOWN

GlobalNamingResources:
  Resource:
    '@auth': Container
    '@description': User database that can be updated and saved
    '@factory': org.apache.catalina.users.MemoryUserDatabaseFactory
    '@name': UserDatabase
    '@pathname': conf/tomcat-users.xml
    '@type': org.apache.catalina.UserDatabase

# <...snip...>
```

```
/srv/pillar/tomcat.sls:

appX:
  server_xml_overrides:
    Server:
      Service:
        '@name': Catalina
        Connector:
          '@port': '8009'
          '@protocol': AJP/1.3
          '@redirectPort': '8443'

# <...snip...>
```

```
/srv/salt/tomcat/server_xml.sls:

```
The `file.serialize` state can provide a shorthand for creating some files from data structures. There are also many examples within Salt Formulas of creating one-off "serializers" (often as Jinja macros) that reformat a data structure to a specific config file format. For example, look at the `Nginx vhosts` states or the `php.ini` file template.

**Environment specific information**

A single state can be reused when it is parameterized as described in the section below, by separating the data the state will use from the state that performs the work. This can be the difference between deploying Application X and Application Y, or the difference between production and development. For example:

/srv/salt/app/deploy.sls:

```yaml
### Load the map file. ###
{% import_yamll 'app/defaults.yaml' as app_defaults %}

### Extract the relevant subset for the app configured on the current machine (configured via a grain in this example). ###
{% app = app_defaults.get(salt.grains.get('role')) %}

### Allow values from Pillar to (optionally) update values from the lookup table. ###
{% do app_defaults.update(salt.pillar.get('myapp', {})) %}

deploy_application:
  git.latest:
    - name: {{ app.repo_url }}
    - version: {{ app.version }}
    - target: {{ app.deploy_dir }}

myco/myapp/deployed:
  event.send:
    - data:
      - version: {{ app.version }}
      - onchanges:
        - git: deploy_application

/srv/salt/app/defaults.yaml:

```

```
appX:
  repo_url: git@github.com/myco/appX.git
  target: /var/www/appX
  version: master
appY:
```

(continues on next page)
Single-purpose SLS files

Each sls file in a Formula should strive to do a single thing. This increases the reusability of this file by keeping unrelated tasks from getting coupled together.

As an example, the base Apache formula should only install the Apache httpd server and start the httpd service. This is the basic, expected behavior when installing Apache. It should not perform additional changes such as set the Apache configuration file or create vhosts.

If a formula is single-purpose as in the example above, other formulas, and also other states can include and use that formula with Requisites and Other Global State Arguments without also including undesirable or unintended side-effects.

The following is a best-practice example for a reusable Apache formula. (This skips platform-specific options for brevity. See the full apache-formula for more.)

```
# apache/init.sls
apache:
    pkg.installed:
        [...]  
    service.running:
        [...] 

# apache/mod_wsgi.sls
include:
    - apache

mod_wsgi:
    pkg.installed:
        [...]  
        - require:
            - pkg: apache

# apache/conf.sls
include:
    - apache

apache_conf:
    file.managed:
        [...] 
        - watch_in:
            - service: apache
```

To illustrate a bad example, say the above Apache formula installed Apache and also created a default vhost. The mod_wsgi state would not be able to include the Apache formula to create that dependency tree without also installing the unneeded default vhost.

Formulas should be reusable. Avoid coupling unrelated actions together.
Parameterization

Parameterization is a key feature of Salt Formulas and also for Salt States. Parameterization allows a single Formula to be reused across many operating systems; to be reused across production, development, or staging environments; and to be reused by many people all with varying goals.

Writing states, specifying ordering and dependencies is the part that takes the longest to write and to test. Filling those states out with data such as users or package names or file locations is the easy part. How many users, what those users are named, or where the files live are all implementation details that should be parameterized. This separation between a state and the data that populates a state creates a reusable formula.

In the example below the data that populates the state can come from anywhere -- it can be hard-coded at the top of the state, it can come from an external file, it can come from Pillar, it can come from an execution function call, or it can come from a database query. The state itself doesn't change regardless of where the data comes from. Production data will vary from development data will vary from data from one company to another, however the state itself stays the same.

```jinja
{% set user_list = [
    {'name': 'larry', 'shell': 'bash'},
    {'name': 'curly', 'shell': 'bash'},
    {'name': 'moe', 'shell': 'zsh'},
] %}

{% # or #

{% set user_list = salt['pillar.get']('user_list') %}

{% # or #

{% load_json "default_users.json" as user_list %}

{% # or #

{% set user_list = salt['acme_utils.get_user_list']() %}

{% # or #

{% for user in list_list %}
    {{ user.name }}:
    - name: {{ user.name }}
    - shell: {{ user.shell }}
{% endfor %}
```

Configuration

Formulas should strive to use the defaults of the underlying platform, followed by defaults from the upstream project, followed by sane defaults for the formula itself.

As an example, a formula to install Apache should not change the default Apache configuration file installed by the OS package. However, the Apache formula should include a state to change or override the default configuration file.
Pillar overrides

Pillar lookups must use the safe `get()` and must provide a default value. Create local variables using the Jinja `set` construct to increase readability and to avoid potentially hundreds or thousands of function calls across a large state tree.

```jinja
{% from "apache/map.jinja" import apache with context %}
{% set settings = salt['pillar.get']('apache', {}) %}

mod_status:
  file.managed:
    - name: {{ apache.conf_dir }}
    - source: {{ settings.get('mod_status_conf', 'salt://apache/mod_status.conf') }}
    - template: {{ settings.get('template_engine', 'jinja') }}
```

Any default values used in the Formula must also be documented in the `pillar.example` file in the root of the repository. Comments should be used liberally to explain the intent of each configuration value. In addition, users should be able copy-and-paste the contents of this file into their own Pillar to make any desired changes.

Scripting

Remember that both State files and Pillar files can easily call out to Salt execution modules and have access to all the system grains as well.

```jinja
{% if '/storage' in salt['mount.active']() %}
/usr/local/etc/myfile.conf:
  file:
    - symlink
    - target: /storage/myfile.conf
{% endif %}
```

Jinja macros to encapsulate logic or conditionals are discouraged in favor of writing custom execution modules in Python.

Repository structure

A basic Formula repository should have the following layout:

```
foo-formula
|-- foo/
 | -- map.jinja
 | `-- init.sls
 | `-- bar.sls
|-- CHANGELOG.rst
|-- LICENSE
|-- pillar.example
|-- README.rst
|-- VERSION
```

See also:

`template-formula`

The `template-formula` repository has a pre-built layout that serves as the basic structure for a new formula repository. Just copy the files from there and edit them.
**README.rst**

The README should detail each available `.sls` file by explaining what it does, whether it has any dependencies on other formulas, whether it has a target platform, and any other installation or usage instructions or tips.

A sample skeleton for the README.rst file:

```bash
===
foo
===

Install and configure the FOO service.

**NOTE**

See the full `Salt Formulas installation and usage instructions <https://docs.saltproject.io/en/latest/topics/development/conventions/formulas.html>`_.

**Available states**

```bash
.. contents::
   :local:
```

```
`foo`
------

Install the `foo` package and enable the service.

```
`foo.bar`
----------

Install the `bar` package.
```

**CHANGELOG.rst**

The CHANGELOG.rst file should detail the individual versions, their release date and a set of bullet points for each version highlighting the overall changes in a given version of the formula.

A sample skeleton for the CHANGELOG.rst file:

```
CHANGELOG.rst:

foo formula
============

0.0.2 (2013-01-01)

- Re-organized formula file layout
- Fixed filename used for upstart logger template
- Allow for pillar message to have default if none specified
```
Versioning

Formula are versioned according to Semantic Versioning, [https://semver.org/](https://semver.org/).

**Note:** Given a version number MAJOR.MINOR.PATCH, increment the:

1. MAJOR version when you make incompatible API changes,
2. MINOR version when you add functionality in a backwards-compatible manner, and
3. PATCH version when you make backwards-compatible bug fixes.

Additional labels for pre-release and build metadata are available as extensions to the MAJOR.MINOR.PATCH format.

Formula versions are tracked using Git tags as well as the VERSION file in the formula repository. The VERSION file should contain the currently released version of the particular formula.

Testing Formulas

A smoke-test for invalid Jinja, invalid YAML, or an invalid Salt state structure can be performed by with the `state.show_sls` function:

```
salt '*' state.show_sls apache
```

Salt Formulas can then be tested by running each `.sls` file via `state.apply` and checking the output for the success or failure of each state in the Formula. This should be done for each supported platform.

29.25.3 SaltStack Packaging Guide

Since Salt provides a powerful toolkit for system management and automation, the package can be split into a number of sub-tools. While packaging Salt as a single package containing all components is perfectly acceptable, the split packages should follow this convention.

Patching Salt For Distributions

The occasion may arise where Salt source and default configurations may need to be patched. It is preferable if Salt is only patched to include platform specific additions or to fix release time bugs. It is preferable that configuration settings and operations remain in the default state, as changes here lowers the user experience for users moving across distributions.

In the event where a packager finds a need to change the default configuration it is advised to add the files to the master.d or minion.d directories.
Source Files

Release packages should always be built from the source tarball distributed via pypi. Release packages should *NEVER* use a git checkout as the source for distribution.

Single Package

Shipping Salt as a single package, where the minion, master, and all tools are together is perfectly acceptable and practiced by distributions such as FreeBSD.

Split Package

Salt should always be split in a standard way, with standard dependencies, this lowers cross distribution confusion about what components are going to be shipped with specific packages. These packages can be defined from the Salt Source as of Salt 2014.1.0:

Salt Common

The `salt-common` or `salt` package should contain the files provided by the salt python package, or all files distributed from the `salt/` directory in the source distribution packages. The documentation contained under the `doc/` directory can be a part of this package but splitting out a doc package is preferred. Since salt-call is the entry point to utilize the libs and is useful for all salt packages it is included in the salt-common package.

Name

- `salt` OR `salt-common`

Files

- `salt/*`
- `man/salt.7`
- `scripts/salt-call`
- `tests/*`
- `man/salt-call.1`

Depends

- Python 2.6-2.7
- PyYAML
- Jinja2
Salt Master

The salt-master package contains the applicable scripts, related man pages and init information for the given platform.

Name

- salt-master

Files

- scripts/salt-master
- scripts/salt
- scripts/salt-run
- scripts/salt-key
- scripts/salt-cp
- pkg/<master init data>
- man/salt.1
- man/salt-master.1
- man/salt-run.1
- man/salt-key.1
- man/salt-cp.1
- conf/master

Depends

- Salt Common
- ZeroMQ >= 3.2
- PyZMQ >= 2.10
- PyCrypto
- M2Crypto
- Python MessagePack (Messagepack C lib, or msgpack-pure)

Salt Syndic

The Salt Syndic package can be rolled completely into the Salt Master package. Platforms which start services as part of the package deployment need to maintain a separate salt-syndic package (primarily Debian based platforms).

The Syndic may optionally not depend on the anything more than the Salt Master since the master will bring in all needed dependencies, but fall back to the platform specific packaging guidelines.
Name

- salt-syndic

Files

- scripts/salt-syndic
- pkg/<syndic init data>
- man/salt-syndic.1

Depends

- Salt Common
- Salt Master
- ZeroMQ >= 3.2
- PyZMQ >= 2.10
- PyCrypto
- M2Crypto
- Python MessagePack (Messagepack C lib, or msgpack-pure)

Salt Minion

The Minion is a standalone package and should not be split beyond the salt-minion and salt-common packages.

Name

- salt-minion

Files

- scripts/salt-minion
- pkg/<minion init data>
- man/salt-minion.1
- conf/minion
Depends

- *Salt Common*
- *ZeroMQ >= 3.2*
- *PyZMQ >= 2.10*
- *PyCrypto*
- *M2Crypto*
- *Python MessagePack (Messagepack C lib, or msgpack-pure)*

Salt SSH

Since Salt SSH does not require the same dependencies as the minion and master, it should be split out.

Name

- *salt-ssh*

Files

- *scripts/salt-ssh*
- *man/salt-ssh.1*
- *conf/cloud*

Depends

- *Salt Common*
- *Python MessagePack (Messagepack C lib, or msgpack-pure)*

Salt Cloud

As of Salt 2014.1.0 Salt Cloud is included in the same repo as Salt. This can be split out into a separate package or it can be included in the salt-master package.

Name

- *salt-cloud*
Files

- scripts/salt-cloud
- man/salt-cloud.1

Depends

- Salt Common
  - apache libcloud >= 0.14.0

Salt Doc

The documentation package is very distribution optional. A completely split package will split out the documentation, but some platform conventions do not prefer this. If the documentation is not split out, it should be included with the Salt Common package.

Name

- salt-doc

Files

- doc/*

Optional Depends

- Salt Common
- Python Sphinx
- Make

29.25.4 Salt Release Process

The goal for Salt projects is to cut a new feature release every three to four months. This document outlines the process for these releases, and the subsequent bug fix releases which follow.

Feature Release Process

When a new release is ready to be cut, the person responsible for cutting the release will follow the following steps (written using the 3000 release as an example):

1. Create first public draft of release notes with major features.
2. Remove any deprecations for the upcoming release.
3. Ensure all required features are merged.
4. Create issue to start the process of deprecating for the next feature release.
5. Run through a manual test run based off of the head of the feature branch.

6. Update all name references to version number in the docs. For example all neon references in the docs needs to be moved to v3000

7. Review the release notes with major features.

8. Generate the new man pages for the release.

9. Create internal RC tag for testing from the head of the master branch.

10. Build latest windows, mac, ubuntu, debian and redhat packages.

11. Run manual and package tests against new RC packages.

12. Push the internal tag live to salt’s repo.

13. Publish release archive to pypi based off tag.

15. Announce new RC to salt-users and salt-announce google groups.

17. Fix RC issues once they are categorized as a release blocker.

18. Depending on the issues found during the RC process make a decesion on whether to release based off the RC or go through another RC process

19. If a RC is categorized as stable, build all required packages.

20. Test all release packages.

21. Test links from repo.saltproject.io.

22. Update installation instructions with new release number at repo.saltproject.io.

23. Review and update all impacted Installation documentation.

24. Update and build docs to include new version (3000) as the latest.

25. Pre-announce on salt-users google group that we are about to update our repo.

26. Publish release (v3000) archive to pypi based off tag.

27. Publish all packages live to repo.

28. Publish the docs.

29. Create release at github

30. Update win-repo-ng with new salt versions.

31. Announce release is live to irc, salt-users, salt-announce and release slack community channel.

**Bugfix Releases**

Once a feature release branch has been cut from the master branch, if serious bugs or a CVE is found for the most recent release a bugfix release will need to be cut. A temporary branch will be created based off of the previous release tag. For example, if it is determined that a 3000.1 release needs to occur a 3000.1 branch will be created based off of the v3000 tag. The fixes that need to go into 3000.1 will be added and merged into this branch. Here are the steps for a bugfix release.

1. Ensure all required bug fixes are merged.

2. Create release branch with the version of the release. (ex. 3000.1)
3. Create jenkins jobs that test the new release branch.
4. Run through a manual test run based off of the head of the branch.
5. Generate the new man pages for the release.
6. Create internal tag for testing (ex v3000.1)
7. Build all release packages.
8. Run manual and package tests against new packages.
9. Update installation instructions with new release number at repo.saltproject.io.
10. Update and build docs to include new version. (ex. 3000.1)
11. Pre-announce on salt-users google groups that we are about to update our repo.
12. Push the internal tag live to salt's repo.
13. Publish release archive to pypi based off tag.
14. Push the packages live.
15. Publish release (v3000) archive to pypi based off tag.
16. Publish all packages live to repo.
17. Publish the docs.
18. Create release at github
20. Announce release is live to irc, salt-users, salt-announce and release slack channel.

29.25.5 Salt Coding Style

To make it easier to contribute and read Salt code, SaltStack has adopted Black as its code formatter. There are a few places where Black is silent, and this guide should be used in those cases.

Coding style is NEVER grounds to reject code contributions, and is never grounds to talk down to another member of the community (There are no grounds to treat others without respect, especially people working to improve Salt)!

Linting

Most Salt style conventions are codified in Salt’s .pylintrc file. Salt's linting has two major dependencies: pylint and saltpylint, the full lint requirements can be found under requirements/static/ci/lint.in and the pinned requirements at requirements/static/ci/py3.<minor-version>/lint.txt, however, linting should be done using nox, which is how pull requests are checked.

```bash
nox -e lint
```

One can target either salt's source code or the test suite (different pylint rules apply):

```bash
nox -e lint-salt
nox -e lint-tests
```
Variables

Variables should be a minimum of three characters and should provide an easy-to-understand name of the object being represented. When keys and values are iterated over, descriptive names should be used to represent the temporary variables. Multi-word variables should be separated by an underscore. Variables which are two-letter words should have an underscore appended to them to pad them to three characters.

Formatting Strings

All strings which require formatting should use the .format string method:
Please do NOT use printf formatting, unless it’s a log message.

Good:

```python
data = "some text"
more = "{} and then some".format(data)
log.debug("%s and then some", data)
```

Bad:

```python
data = "some text"
log.debug("{} and then some".format(data))
```

Docstring Conventions

When adding a new function or state, where possible try to use a versionadded directive to denote when the function, state, or parameter was added.

```python
def new_func(msg=""):
    """
    .. versionadded:: 0.16.0
    Prints what was passed to the function.
    
    msg : None
    """
    The string to be printed.
    
    print(msg)
```

If you are uncertain what version should be used, either consult a core developer in IRC or bring this up when opening your pull request and a core developer will let you know what version to add. Typically this will be the next element in the periodic table.

Similar to the above, when an existing function or state is modified (for example, when an argument is added), then under the explanation of that new argument a versionadded directive should be used to note the version in which the new argument was added. If an argument’s function changes significantly, the versionchanged directive can be used to clarify this:

```python
def new_func(msg="", signature=""):
    """
    .. versionadded:: 0.16.0
```

(continues on next page)
Prints what was passed to the function.

msg : None
    The string to be printed. Will be prepended with 'Greetings! '.
.. versionchanged:: 0.17.1
signature : None
    An optional signature.
.. versionadded:: 0.17.0

print("Greetings! {0}\n\n{1}".format(msg, signature))

Dictionaries

Dictionaries should be initialized using {} instead of dict().
See here for an in-depth discussion of this topic.

Imports

Salt code prefers importing modules and not explicit functions. This is both a style and functional preference. The functional preference originates around the fact that the module import system used by pluggable modules will include callable objects (functions) that exist in the direct module namespace. This is not only messy, but may unintentionally expose code python libs to the Salt interface and pose a security problem.

To say this more directly with an example, this is GOOD:

```python
import os
def minion_path():
    path = os.path.join(self.opts['cachedir'], "minions")
    return path
```

This on the other hand is DISCOURAGED:

```python
from os.path import join
def minion_path():
    path = join(self.opts['cachedir'], "minions")
    return path
```

The time when this is changed is for importing exceptions, generally directly importing exceptions is preferred:

This is a good way to import exceptions:

```python
from salt.exceptions import CommandExecutionError
```
Absolute Imports

Although absolute imports seems like an awesome idea, please do not use it. Extra care would be necessary all over salt’s code in order for absolute imports to work as supposed. Believe it, it has been tried before and, as a tried example, by renaming `salt.modules.sysmod` to `salt.modules.sys`, all other salt modules which needed to import `sys` would have to also import `absolute_import`, which should be avoided.

Note: An exception to this rule is the `absolute_import` from `__future__` at the top of each file within the Salt project. This import is necessary for Py3 compatibility. This particular import looks like this:

```python
from __future__ import absolute_import
```

This import is required for all new Salt files and is a good idea to add to any custom states or modules. However, the practice of avoiding absolute imports still applies to all other cases as to avoid a name conflict.

Code Churn

Many pull requests have been submitted that only churn code in the name of PEP 8. Code churn is a leading source of bugs and is strongly discouraged. While style fixes are encouraged they should be isolated to a single file per commit, and the changes should be legitimate, if there are any questions about whether a style change is legitimate please reference this document and the official PEP 8 (https://legacy.python.org/dev/peps/pep-0008/) document before changing code. Many claims that a change is PEP 8 have been invalid, please double check before committing fixes.

29.26 Salt code and internals

Reference documentation on Salt’s internal code.

29.26.1 Contents

salt.aggregation

salt.utils.aggregation

This library makes it possible to introspect dataset and aggregate nodes when it is instructed.

Note: The following examples with be expressed in YAML for convenience’s sake:

- `!aggr-scalar` will refer to Scalar python function
- `!aggr-map` will refer to Map python object
- `!aggr-seq` will refer for Sequence python object
How to instructs merging

This yaml document has duplicate keys:

```yaml
foo: !aggr-scalar first
foo: !aggr-scalar second
bar: !aggr-map {first: foo}
bar: !aggr-map {second: bar}
baz: !aggr-scalar 42
```

but tagged values instruct Salt that overlapping values they can be merged together:

```yaml
foo: !aggr-seq [first, second]
bar: !aggr-map {first: foo, second: bar}
baz: !aggr-seq [42]
```

Default merge strategy is keep untouched

For example, this yaml document still has duplicate keys, but does not instruct aggregation:

```yaml
foo: first
foo: second
bar: {first: foo}
bar: {second: bar}
baz: 42
```

So the late found values prevail:

```yaml
foo: second
bar: {second: bar}
baz: 42
```

Limitations

Aggregation is permitted between tagged objects that share the same type. If not, the default merge strategy prevails.

For example, these examples:

```yaml
foo: {first: value}
foo: !aggr-map {second: value}
bar: !aggr-map {first: value}
bar: 42
baz: !aggr-seq [42]
baz: [fail]
qux: 42
qux: !aggr-scalar fail
```

are interpreted like this:
foo: `aggr-map{second: value}`
bar: 42
baz: [fail]
qux: `aggr-seq [fail]`

Introspection

TODO: write this part

class salt.utils.aggregation.Aggregate
   Aggregation base.

class salt.utils.aggregation.Map
   Map aggregation.

class salt.utils.aggregation.OrderedDict

salt.utils.aggregation.Scalar(obj)
   Shortcut for Sequence creation

>>> Scalar('foo') == Sequence(['foo'])
True

class salt.utils.aggregation.Sequence(iterable=(), /)
   Sequence aggregation.

salt.utils.aggregation.aggregate(obj_a, obj_b, level=False, map_class=<class 'salt.utils.aggregation.Map'>, sequence_class=<class 'salt.utils.aggregation.Sequence'>)
   Merge obj_b into obj_a.

>>> aggregate('first', 'second', True) == ['first', 'second']
True

salt.utils.aggregation.levelise(level)
   Describe which levels are allowed to do deep merging.

   level can be:
   True  all levels are True
   False all levels are False
   an int only the first levels are True, the others are False
   a sequence it describes which levels are True, it can be:
      • a list of bool and int values
      • a string of 0 and 1 characters

salt.utils.aggregation.mark(obj, map_class=<class 'salt.utils.aggregation.Map'>, sequence_class=<class 'salt.utils.aggregation.Sequence'>)
   Convert obj into an Aggregate instance
Exceptions

Salt-specific exceptions should be thrown as often as possible so the various interfaces to Salt (CLI, API, etc) can handle those errors appropriately and display error messages appropriately.

```
salt.exceptions
```
This module is a central location for all salt exceptions

---

salt.exceptions

This module is a central location for all salt exceptions

**Exception** `salt.exceptions.ArgumentValueError`

Used when an invalid argument was passed to a command execution

**Exception** `salt.exceptions.AuthenticationError`

If sha256 signature fails during decryption

**Exception** `salt.exceptions.AuthorizationError`

Thrown when runner or wheel execution fails due to permissions

**Exception** `salt.exceptions.CheckError`

Used when a check fails

**Exception** `salt.exceptions.CodePageError`

Raised when an error occurs while getting or setting the windows code page

**Exception** `salt.exceptions.CommandExecutionError`

Used when a module runs a command which returns an error and wants to show the user the output gracefully instead of dying

**Exception** `salt.exceptions.CommandNotFoundError`

Used in modules or grains when a required binary is not available

**Exception** `salt.exceptions.EauthAuthenticationError`

Thrown when eauth authentication fails

**Exception** `salt.exceptions.FileLockError`

Used when an error occurs obtaining a file lock

**Exception** `salt.exceptions.FileserverConfigError`

Used when invalid fileserver settings are detected

**Exception** `salt.exceptions.GitLockError`

Raised when an uncaught error occurs in the midst of obtaining an update/checkout lock in salt.utils.gitfs.

NOTE: While this uses the errno param similar to an OSError, this exception class is *not* as subclass of OSError. This is done intentionally, so that this exception class can be caught in a try/except without being caught as an OSError.

**Exception** `salt.exceptions.GitRemoteError`

Used by GitFS to denote a problem with the existence of the "origin" remote or part of its configuration

**Exception** `salt.exceptions.InvalidConfigError`

Used when the config is invalid

**Exception** `salt.exceptions.InvalidEntityError`

Used when an entity fails validation

**Exception** `salt.exceptions.InvalidKeyError`

Raised when we encounter an invalid RSA key.
exception salt.exceptions.LoaderError(message='')
    Problems loading the right renderer

exception salt.exceptions.LoggingRuntimeError
    Raised when we encounter an error while logging

exception salt.exceptions.MasterExit
    Rise when the master exits

exception salt.exceptions.MinionError(message='')
    Minion problems reading uris such as salt:// or http://

exception salt.exceptions.MissingSmb(message='')
    Raised when no smb library is found.

exception salt.exceptions.NotImplemented(message='')
    Used when a module runs a command which returns an error and wants to show the user the output gracefully instead of dying

exception salt.exceptions.NxosCliError(message='')
    NX-OS Cli Error raised when Cli command rejected by the NX-OS device

exception salt.exceptions.NxosClientError(message='')
    NX-OS Client Error raised for problems connecting to the NX-OS device

exception salt.exceptions.NxosError(message='')
    NX-OS Base Exception class

exception salt.exceptions.NxosRequestNotSupported(message='')
    Raised for unsupported client requests

exception salt.exceptions.PkgParseError(message='')
    Used when of the pkg modules cannot correctly parse the output from the CLI tool (pacman, yum, apt, aptitude, etc)

exception salt.exceptions.PublishError(message='')
    Problems encountered when trying to publish a command

exception salt.exceptions.SaltCacheError(message='')
    Thrown when a problem was encountered trying to read or write from the salt cache

exception salt.exceptions.SaltClientError(message='')
    Problem reading the master root key

exception salt.exceptions.SaltClientTimeout(message, jid=None, *args, **kwargs)
    Thrown when a job sent through one of the Client interfaces times out
    Takes the jid as a parameter

exception salt.exceptions.SaltCloudConfigError(message='')
    Raised when a configuration setting is not found and should exist.

exception salt.exceptions.SaltCloudException(message='')
    Generic Salt Cloud Exception

exception salt.exceptions.SaltCloudExecutionFailure(message='')
    Raised when too much failures have occurred while querying/waiting for data.

exception salt.exceptions.SaltCloudExecutionTimeout(message='')
    Raised when too much time has passed while querying/waiting for data.

exception salt.exceptions.SaltCloudNotFound(message='')
    Raised when some cloud provider function cannot find what's being searched.
exception `salt.exceptions.SaltCloudPasswordError(message='')`
    Raise when virtual terminal password input failed

exception `salt.exceptions.SaltCloudSystemExit(message, exit_code=1)`
    This exception is raised when the execution should be stopped.

exception `salt.exceptions.SaltConfigurationError(message='')`
    Configuration error

exception `salt.exceptions.SaltDaemonNotRunning(message='')`
    Throw when a running master/minion/syndic is not running but is needed to perform the requested operation (e.g., cauth).

exception `salt.exceptions.SaltDeserializationError(message='')`
    Thrown when salt cannot deserialize data.

exception `salt.exceptions.SaltException(message='')`
    Base exception class; all Salt-specific exceptions should subclass this

    `pack()`
    Pack this exception into a serializable dictionary that is safe for transport via msgpack

exception `salt.exceptions.SaltInvocationError(message='')`
    Used when the wrong number of arguments are sent to modules or invalid arguments are specified on the command line

exception `salt.exceptions.SaltMasterError(message='')`
    Problem reading the master root key

exception `salt.exceptions.SaltMasterUnresolvableError(message='')`
    Problem resolving the name of the Salt master

exception `salt.exceptions.SaltNoMinionsFound(message='')`
    An attempt to retrieve a list of minions failed

exception `salt.exceptions.SaltRenderError(message, line_num=None, buf='', marker='<======================', trace=None)`
    Used when a renderer needs to raise an explicit error. If a line number and buffer string are passed, get_context will be invoked to get the location of the error.

exception `salt.exceptions.SaltReqTimeoutError(message='')`
    Thrown when a salt master request call fails to return within the timeout

exception `salt.exceptions.SaltRunnerError(message='')`
    Problem in runner

exception `salt.exceptions.SaltSyndicMasterError(message='')`
    Problem while proxying a request in the syndication master

exception `salt.exceptions.SaltSystemExit(code=0, msg=None)`
    This exception is raised when an unsolvable problem is found. There's nothing else to do, salt should just exit.

exception `salt.exceptions.SaltWheelError(message='')`
    Problem in wheel

exception `salt.exceptions.TemplateError(message='')`
    Used when a custom error is triggered in a template

exception `salt.exceptions.TimedProcTimeoutError(message='')`
    Thrown when a timed subprocess does not terminate within the timeout, or if the specified timeout is not an int or a float

exception `salt.exceptions.TimeoutError(message='')`
    Thrown when an operation cannot be completed within a given time limit.
exception salt.exceptions.TokenAuthenticationError(message='')
    Thrown when token authentication fails

exception salt.exceptions.VMwareApiError(message='', info=None)
    Used when representing a generic VMware API error

exception salt.exceptions.VMwareConnectionError(message='', info=None)
    Used when the client fails to connect to a either a VMware vCenter server or to a ESXi host

exception salt.exceptions.VMwareFileNotFoundException(message='', info=None)
    Used when representing a generic VMware error if a file not found

exception salt.exceptions.VMwareMultipleObjectsError(message='', info=None)
    Used when multiple objects were retrieved (and one was expected)

exception salt.exceptions.VMwareNotFoundError(message='', info=None)
    Used when a VMware object was not found

exception salt.exceptions.VMwareObjectExistsError(message='', info=None)
    Used when a VMware object already exists

exception salt.exceptions.VMwareObjectNotFoundError(message='', info=None)
    Used when a VMware object not found

exception salt.exceptions.VMwareObjectRetrievalError(message='', info=None)
    Used when a VMware object cannot be retrieved

exception salt.exceptions.VMwarePowerOnError(message='', info=None)
    Used when error occurred during power on

exception salt.exceptions.VMwareRuntimeError(message='', info=None)
    Used when a runtime error is encountered when communicating with the vCenter

exception salt.exceptions.VMwareSaltError(message='', info=None)
    Used when a VMware object cannot be retrieved

exception salt.exceptions.VMwareSystemError(message='', info=None)
    Used when representing a generic VMware system error

exception salt.exceptions.VMwareVmCreationError(message='', info=None)
    Used when a configuration parameter is incorrect

exception salt.exceptions.VMwareVmRegisterError(message='', info=None)
    Used when a configuration parameter is incorrect

salt.exceptions.get_error_message(error)
    Get human readable message from Python Exception

The Salt Fileserver and Client

Introduction

Salt has a modular fileserver, and multiple client classes which are used to interact with it. This page serves as a developer's reference, to help explain how the fileserver and clients both work.
Fileserver

The fileserver is not a daemon, so the fileserver and client are not a true server and client in the traditional sense. Instead, the fileserver is simply a class (salt.fileserver.Fileserver), located in salt/fileserver/__init__.py. This class has access to the configured fileserver backends via a loader instance, referenced as self.servers. When a request comes in from the fileclient, it will ultimately result in a Fileserver class function being run.

The functions in this class will run corresponding functions in the configured fileserver backends to perform the requested action. So, in summary:

1. A fileclient class makes a request...
2. which triggers the fileserver to run a function...
3. which runs a named function in each of the configured backends.

Not all of the functions will always execute on every configured backend. For instance, the find_file function in the fileserver will stop when it finds a match, so if it finds a match for the desired path in the first configured backend, it won't proceed and try to find the file in the next backend in the list.

Additionally, not all backends implement all functions in the salt.fileserver.Fileserver class. For instance, there is a function called update, which exists to update remote fileservers such as the git, hg, and svn backends. This action has no use however in the roots backend, so it is simply not implemented there, and thus the roots backend will be skipped if the update function is run on the fileserver.

Backends for the fileserver are located in salt/fileserver/ (the files not named __init__.py).

Fileclient

There are three fileclient classes:

salt.fileclient.RemoteClient

This client is used when file_client is set to remote. This is how minions request files from the master.

Functions in this client will craft a payload and send it to the master via the transport channel. This is the same way that the minion asks the minion to do other things, such as updating and requesting data from the mine. The payload will be a dictionary with a key called cmd, and other values as needed.

Payloads sent via the transport channel are processed my an MWorker instance on the master, and the MWorker’s _handle_aes() function will execute the command. The command will be a function attribute of the salt.master.AESFuncs class. The AESFuncs class’ __setup_fileserver() function instantiates a salt.fileserver.Fileserver instance and maps its member functions to AESFuncs attributes. This is what makes the fileserver functions available remotely. The result of the function is returned back through the transport channel to the minion.

Transporting files is done in chunks, the size of which is decided by the file_buffer_size config option. If you look at the serve_file() function in any of the fileserver backends, you can see how the loc value in the payload determines the offset so that an intermediate chunk of the file can be served. The RemoteClient’s get_file() function will loop until the end of the file is reached, retrieving one chunk at a time.
salt.fileclient.FSClient

This client is used when file_client is set to local. This is how masterless minions request files.

This class inherits from the RemoteClient, but instead of using a transport channel (zmq, tcp, etc.), it uses a "fake" transport channel (salt.fileserver.FSChan), which implements its own send() function. Thus, when a function that the FSClient inherits from the RemoteClient runs self.channel.send(), it’s actually calling salt.fileserver.FSChan.send(), which calls corresponding functions in the salt.fileserver.Fileserver() class. The result is that local file requests use the same code as remote file requests, they just bypass sending them through an actual transport channel and instead call them on the FSChan’s Fileserver instance.

salt.fileclient.LocalClient

This client is now used exclusively by Pillar. This used to be used when file_client was set to local, but the FSChan class was written to allow minions with file_client: local to access the full set of backends. This class will probably be renamed at some point as it is often confused with salt.client.LocalClient.

The cp Module

Most of the user-facing interaction with the fileclient happens via the cp module. The functions in this module instantiate a fileclient instance (if one is not already saved to the __context__ dunder) and run fileclient functions.

Updating the Fileserver

The master daemon spawns a process dedicated to routine maintenance tasks upon startup. This process runs an instance of salt.master.Maintenance, which loops forever, running a series of functions and then sleeping for a length of time determined by the loop_interval config option. One of the maintenance tasks is to update the fileserver, and it essentially runs salt.fileserver.Fileserver.update(), which as we know from above will run all configured backends’ update() functions, if present. This is now remote fileserver like git, hg, and svn stay up-to-date.

For the local file_client (FSClient), since it does not interact with the master, upon spawning of its FSChan it will update the fileserver.

Salt opts dictionary

It is very common in the Salt codebase to see opts referred to in a number of contexts.

For example, it can be seen as __opts__ in certain cases, or simply as opts as an argument to a function in others.

Simply put, this data structure is a dictionary of Salt’s runtime configuration information that’s passed around in order for functions to know how Salt is configured.

When writing Python code to use specific parts of Salt, it may become necessary to initialize a copy of opts from scratch in order to have it available for a given function.

To do so, use the utility functions available in salt.config.

As an example, here is how one might generate and print an options dictionary for a minion instance:

```python
import salt.config

opts = salt.config.minion_config("/etc/salt/minion")
print(opts)
```
To generate and display `opts` for a master, the process is similar:

```python
import salt.config

opts = salt.config.master_config("/etc/salt/master")
print(opts)
```

Unicode in Salt

Though Unicode handling in large projects can often be complex, Salt adheres to several basic rules to help developers handle Unicode correctly.

(For a basic introduction to this problem, see Ned Batchelder's excellent introduction to the topic [http://nedbatchelder.com/text/unipain/unipain.html](http://nedbatchelder.com/text/unipain/unipain.html).

Salt's basic workflow for Unicode handling is as follows:

1) Salt should convert whatever data is passed on CLI/API to Unicode. Internally, everything that Salt does should be Unicode unless it is printing to the screen or writing to storage.

2) Modules and various Salt pluggable systems use incoming data assuming Unicode.
   2.1) For Salt modules that query an API; the module should convert the data received from the API into Unicode.
   2.2) For Salt modules that shell out to get output; the module should convert data received into Unicode. (This does not apply if using the `cmd` execution module, which should handle this for you.
   2.3) For Salt modules which print directly to the console (not via an outputter) or which write directly to disk, a string should be encoded when appropriate. To handle this conversion, the global variable `__salt_system_encoding__` is available, which declares the locale of the system that Salt is running on.

3) When a function in a Salt module returns a string, it should return a `unicode` type in Python 2.

4) When Salt delivers the data to an outputter or a returner, it is the job of the outputter or returner to encode the Unicode before displaying it on the console or writing it to storage.

29.27 Salt Community Projects

This page contains links to Salt-related projects created by community members. If you come across a useful project please add it to the list!

29.27.1 Hubblestack

Hubble is a modular, open-source security compliance framework built on top of SaltStack. The project provides on-demand profile-based auditing, real-time security event notifications, automated remediation, alerting and reporting.

[https://hubblestack.io/](https://hubblestack.io/)
29.27.2 alkali

alkali is a collection of SaltStack states and pillar data that provide just the basics for provisioning Linux instances that may be built upon. alkali is a starter kit of sorts, to help new users to SaltStack get up-and-running quickly with the most commonly used, core packages.

https://github.com/zulily/alkali

29.27.3 buoyant

buoyant leverages docker to provide an alternative to VM-centric SaltStack development environments. buoyant containers may be spun up nearly instantly, once an initial docker image has been built.

https://github.com/zulily/buoyant

29.27.4 Salt Sandbox

Salt Sandbox is a multi-VM Vagrant-based Salt development environment used for creating and testing new Salt state modules outside of your production environment. It’s also a great way to learn firsthand about Salt and its remote execution capabilities.

https://github.com/elasticdog/salt-sandbox

29.27.5 Salt Vagrant Demo

A Salt Demo using Vagrant.

https://github.com/UtahDave/salt-vagrant-demo
RELEASE NOTES

See the version numbers page for more information about the version numbering scheme.

30.1 Latest Branch Release

Release Candidate

30.2 Previous Releases

30.2.1 Salt 3003 Release Notes - Codename Aluminium

New Features

SCRAM-SHA-256 support for PostgreSQL passwords

Support for SCRAM-SHA-256 password hashes has been added to the `postgres_user.present` and `postgres_group.present` states. This allows migration away from the insecure and deprecated previous storage methods.

Added

- Added "fips_mode" config option to master and minion configs. (#59427)
- Firewall groups support to Vultr Salt Cloud provider
- Adding the ability to clear and show the pillar cache enabled when pillar_cache is True. (#37080)
- SCRAM-SHA-256 support for PostgreSQL passwords. Pass encrypted=scram-sha-256 to the `postgres_user.present` (or `postgres_group.present`) state. (#51271)
- The yumpkg module has been updated to support VMWare's Photon OS, which uses tdnf (a C implementation of dnf). "VMware Photon OS" has been added to the "RedHat" `os_family` map as part of this change. (#51912)
- The pkgrepo state now supports VMware Photon OS. (#52550)
- Added firewallgroups to Vultr Salt Cloud provider (#53677)
- Added arbitrary kwarg support for tojson filter. (#56012)
- Add salt monitor beacon to execute salt execution module functions. (#56461)
- Allow the nameservers to be populated from systemd-resolve. (#57618)
- Adding reactor_niceness to the default minion configuration. (#57701)
- CPU model, topology and NUMA node tuning (#57880)
- Added `pkg.services_need_restart` which lists system services that should be restarted after package management operations. (#58261)
- Allow handling special first boot definition on virtual machine (#58589)
- Added vgcreate custom parameters to module call: addtag, alloc, autobackup, metadatatype, zero (#58747)
- Enhance console and serial support in virt module (#58844)
- Salt's versions report `salt --versions-report` now includes all installed salt extensions into its versions report. (#58938)
- Support loading entrypoints by passing a module instead of a function. (#58939)
- Added shadow.gen_password for BSD operating systems. (#59140)
- Add more network and PCI/USB host devices passthrough support to virt module and states (#59143)
- Add interface channels management support to rh_ip module. (#59147)
- Add new minion option return_retry_tries for dynamic return retry tries (#59236)
- Added salt-cloud support for Hetzner Cloud via the hcloud library of the provider. (#59301)
- “AlmaLinux” has been added to the “RedHat” os_family map (#59404)
- Added blocks and attachments params to the slack_notify.post_message function (#59428)
- Added tcp_reconnect_backoff minion config option for specifying reconnection backoff time for TCP transport (#59431)
- Added swapusage beacon to complement the existing memusage beacon. (#59460)
- The salt-run CLI now accepts --jid (#59527)
- Add bytes option for FreeBSD pkg-stats(8) module. (#59540)
- Adding mod_beacon function to pkg, service, and file state modules. This function will act similar to the mod_watch function. This will allow supported functions in those state modules to automatically add associated beacons to monitor for changes to the respective resources in the state file and fire events to the event bus when changes occur. (#59559)
- Add -B flag to FreeBSD pkgng.check() to regenerate the library dependency metadata for a package by extracting library requirement information from the binary ELF files in the package. (#59569)

**Changed**

- The `pkg` module now supports tdnf used by VMWare Photon OS. As part of this change, VMWare Photon OS's os_family grain will now resolve as RedHat. This may require changes to existing uses of grains. filter_by
- The salt-run CLI now accepts --jid which allows scripting against it.
- Change brew cask --list to brew list --cask (#58381)
- Store git sha in salt/_version.py when installing from a tag so it can be found if needed later. (#59137)
- Changed package manager detection in yumpkg module (#59201)
• Updating the pkg beacon to fire the events when there are upgrades to packages, but also when watched packages are installed or removed. Breaking out the logic for listing pkgs from context into a separate function to aid in testing. Updating tests to ensure context is not used when use_context option to list_pkgs is False. (#59463)

**Removed**

• Removed the deprecated glance state and execution module in favor of the glance_image state module and the glanceng execution module. (#59079)
• Removing the _ext_nodes deprecation warning and alias to the master_tops function. This change will break compatibility with a Salt master running versions 2017.7.8 and older and Salt minions running versions 3003 and newer. (#59804)
• removed the arg managed_private_key from 'salt.states.x509.certificate_managed' (#59247)
• Drop support for python 3.5 on Windows (#59479)
• Removed support for Ubuntu 16.04 (#59913)

**Deprecated**

• Added deprecation warning for grains.get_or_set_hash (#59425)

**Fixed**

• When instantiating the loader grab values of grains and pillars if they are NamedLoaderContext instances. (#59773)
• Fixed installation on Apple Silicon Macs by checking $HOMEBREW_PREFIX for libcrypto instead of assuming /usr/local. (#59808)
• The Google Cloud Engine salt-cloud provider now requires apache-libcloud>=2.5.0. Service account authentication is broken on older versions.
• Fix incorrect documentation for pillar_source_merging_strategy (#26396)
• Don’t iterate through cloud map errors (#34033)
• Supress noisy warnings when very old pyzmq is used. (#50327)
• Fixed glusterfs version parsing for pre-4.0 (#50707)
• Prevent traceback when trying to list reactors when none are configured. (#53334)
• Fixed zabbix_host.present to accept all Zabbix host properties (#53838)
• Binaries for the salt installer package for OSX are now signed and the installer package is notarized (#54513)
• Guard boto3_elasticsearch loading properly (#55848)
• Use a capitalized string version of the value of NodeState instead (#56589)
• Adding missing error case to the validation for service beacon. (#56623)
• The GCE cloud driver only works with apache-libcloud>=2.5.0, prior versions have authentication issues (#56862)
• zypperpkg add_lock and remove_lock examples do not work (#56922)
• Compare bytes to bytes so we don’t overwrite a correct value (#57212)
• Fixing `expand_repo_def` in `aptpkg` module to include the architecture in the line attribute when it is passed in. (#57600)

• When passing arguments pass them as keyword arguments so that we can be sure the right value is going where. (#58006, #58579, #59075)

• Improve module whitelist logic for file backends (#58041)

• Fix behavior for "onlyif/unless" state conditionals when multiple declarations (#58085)

• Ensure data is a valid keyword argument for the event.wait function. (#58182)

• Do not raise "StreamClosedError" traceback on the master logs but only log it (#58301)

• Fixed issue with `win_timezone` when dst is turned off. This was causing the minion not to start Use default timezone offset in scheduler when correct timezone cannot be determined (#58379)

• Pop!_OS 20.04 and 20.10 now support using pkg.* / aptpkg.* (#58395)

• Restoring functionality of the textfsm module when using textfsm_path argument (#58499)

• Invalidate file list cache when cache file has a future last modified time (#58529)

• Fix issue with setting permissions in combination with the win_perms_reset option (#58541)

• Adds support for Powershell 7. It is specified by passing `shell="pwsh"`. Only valid if Powershell 7 is installed on the system. (#58598)

• Fixed the zabbix.host_create call on zabbix_host.present to include the optional parameter visible_name. Now working as documented. (#58602)

• Fixed some bugs to allow zabbix_host.present to update a host already existent on Zabbix server:
  - Added checks before "pop" the elements "bulk" and "details" from hostinterfaces_get's response. Without that, the interface comparison didn’t works with Zabbix >= 5.0
  - Fixed the "inventory" comparison. It failed when both current and new inventory were missing.
  - Rewrite of the update_interfaces routine to really "update" the interfaces and not trying to delete and recreate all interfaces, which almost always gives errors as interfaces with linked items can’t be deleted. (#58603)

• Added the "details" mandatory object with the properly default values when creating a SNMP hostinterface in Zabbix 5.0 (#58620)

• Fixing an issue preventing running pillar.get against pillar values with integers as pillar keys. (#58714)

• Adding a new option to pass client_flags to MySQL connections, for example passing the option to support multiple statements in queries. (#58718)

• Fixed two performance bugs in the `sysctl.present` state. Their impact is especially great on FreeBSD machines with large amounts of RAM. (#58732)

• Fixed an issue when pillar files are included in the `top.sls` and then later included in another pillar file. (#58736)

• Left over py2 code was causing windows encoding to misbehave (#58749)

• Return result=None from `module.run` state to indicate that changes would be made Return result=False from module.run state when called with no functions (#58752)

• Fix duplicate IP addresses in `fqdn_ip4` and `fqdn_ip6` grains (#58799)

• Rename `salt.renderers.toml` to `salt.renderers.tomlmod` which fixes the import error issues as described in #58822
  Do note that, the renderer is still called `toml`. (#58822)

• Fixing unhold in yumpkg. Removing unnecessary code and relying on the code that handles dicts later. Adding tests when pkg.installed is called with hold=False. (#58883)
• Converts the given "grant" to upper case before compare to "ALL". This fixes a problem granting "all privileges" to a MySQL user. (#58933)

• Strip trailing "/" from repo.uri when comparing repos in "apkpkg.mod_repo" (#58962)

• When we are checking requisites, run reconcile_procs just on those requisite states not all running states. (#58976)

• Allow the gpg module to use export_key, delete_key and create_key without a passphrase in GnuPG >= 2.1 (#58980)

• Updated the documentation, handling and error messages for what size units are allowed by "size" parameter in lvm.lv_present (#58985)

• Fixing the two failing tests when running on Photon OS. Python 3 installed on Photon OS does not support MD4 hashing, so don't load pdbedit module and skip the test_generate_nt_hash test. Default un-mask for files and directories results in them having only user and group permissions so update the test_directory_max_depth test. (#58991)

• Fixes to netmiko module and proxy module to handle situations where the device is unreachable during the initial connection phase. (#59011)

• Correct comment when updating postgres users and groups. Errors reported when removing postgres groups. Partial group membership changes in postgres groups. (#59034)

• Fixed an error when running svn.latest in test mode and using the trust_failures option. (#59069)

• Fixes to storing schedule items in pillar, when refreshing pillar only update the schedule items if something has changed. (#59104)

• Fixed timezone module to work in Slackware Linux (#59130)

• Enforces pywinrm to be version 0.3.0 or higher and upgrade to latest (#59138)

• Fix a race condition in the ldx module which sometimes caused devices not to be created during container creation. (#59145)

• Fix issue where passed smb port was being passed to the smb connection when deploying Windows with salt-cloud (#59153)

• Fixed an error when running on CentOS Stream 8. (#59161)

• Fix event publish retry when using TCP transport (#59162)

• Fix docs for auth_timeout (#59175)

• virt.update doesn't update the definition if cfi=True and a loader is already set (#59188)

• Fixed salt.modules.solaris_shadow failing on bytes-like object is require, not 'str'. (#59191)

• Added support for io2 volumes in ec2 cloud (#59218)

• When checking if the mode had changed in the file state module, only do so if the passed mode is not None. (#59276)

• Fixing _sanitize_comments to use sqlparse instead of re.sub. (#59336)

• Allow use of query parameters in cmd.script source url (#59362)

• Access user from global group if local group fails to find user. (#59412)

• Detect and fix grub.xen path (#59484)

• Stop raising StopIteration on generators (#59512)

• Fix minion race conditions handling SIGTERM signal when loading modules (#59524)
• Support new output of systemd systemctl list-unit-files in the following modules systemd_service.get_enabled, systemd_service.get_disabled and systemd_service.get_static (#59526)

• Fix pkg.upgrade with -U arg on FreeBSD. -L flag was deprecated long time. (#59565)

• Fixing the virtual function for the netimiko module to allow it to run outside of a proxy minion. Adding additional tests. (#59635)

• Allow "extra_filerefs" as sanitized kwargs for SSH client. Fix regression on "cmd.run" when passing tuples as cmd. (#59664)

30.2.2 Salt 3003.1 Release Notes

Version 3003.1 is a bug fix release for 3003.

Fixed

• Fixed race condition in batch logic. Added listen option to LocalClient to prevent event subscriber from purging cached events during batch iteration. (#56273)

• Fixed dependencies for Amazon Linux 2 on https://repo.saltproject.io since Amazon Linux 2 now provides some of the python libraries in their repos. (#59982)

• IPCMessageSubscriber objects expose their connect method as a coroutine so they can be wrapped by SyncWrapper. (#60049)

• Import salt.utils.azurearm instead of using __utils__ from loader in azure cloud. This fixes an issue where __utils__ would become unavailable when we are using the ThreadPool in azurearm. (#59744)

• Use contextvars library from site-packages if it is installed. Fixes salt ssh for targets with python <=3.6 (#59942)

• Add back support to load old entrypoints by iterating instead of type checking (#59961)

• Pass the value of the __grains__ NamedContext to salt.pillar.get_pillar, instead of the NamedContext object itself. (#59975)

• Fix pillar serialization in jinja templates (#60083)

30.2.3 Salt 3002 Release Notes - Codename Magnesium

New Features

Network Teaming Support Added (RHEL/CentOS)

Support for two new interface types (team and teamport) has been added to the network.managed state. See the documentation for example usage.
Execution Module Changes

The `ip.get_bond` and `ip.build_bond` functions have been removed from the `ip` module for RHEL/CentOS. Configuring bonding opts in modprobe configurations has not been necessary since RHEL 4, and Salt was in fact redundantly both creating modprobe configurations and using the BONDING_OPTS interface configuration parameter.

Removed

- removed boto_vpc.describe_route_table please use boto_vpc.describe_route_tables (#58636)
- removed show_ipv4 arg from all functions in from salt.runners.manage (#58638)
- removed kwargs from mandrill.send if you use "async" please use "asynchronous" (#58640)
- removed salt/modules/mac_brew_pkg.__fix_cask_namespace (#58641)
- zfs.mount Passing '-a' as name is deprecated please just pass 'None' (#58642)
- Remove include_localhost kwarg for connected_ids method in salt/utils/minions.py (#58224)
- deprecated opts default argument of none and removed deprecation warnings (#58635)

Deprecated

- The `ssh` parameter of `virt.migrate` has been deprecated. Use a libvirt URI `target` value instead. Both `virt.migrate_non_shared` and `virt.migrate_non_shared_inc` have been deprecated. Use the `copy_storage` parameter with `virt.migrate` instead. (#57947)

Changed

- Allow to specify a custom port for Proxmox connection (#50620)
- Changed the lvm.lv_present state to accept a resizefs switch. So, when the logical volume is resized, the filesystem will be resized too. (#55265)
- Change the `enable_fqdns_grains` setting to default to `False` on proxy minions as it is generally not needed and just slows down start up time.. (#57676)
- Adds network teaming support to `network.managed` state for RHEL-based distros. Removes `ip.get_bond` and `ip.build_bond` for the same, as is redundant and not needed for any current RHEL/CentOS/Fedora/etc. release. (#57775)
- The `serializer` argument has been added to the `file.serialize` state, as an alternative to `formatter`. This brings it more in line with the `serializer_opts` and `deserializer_opts` arguments. `formatter` is still supported, but using both `serializer` and `formatter` will cause the state to fail. (#57858)
Fixed

- `file.read` exec module function no longer fails on binary data. (#58033)
- Remove py2 support from winrepo execution module and runner (#58596)
- Create ini file if does not exist when using ini.options_present state module. (#34236)
- Added an bool "strict" argument to sdb.get module to force module to fail if the sdb uri is not correct. (#39163)
- Fixed issue with postgres.has_privilege breaking on ALL. (#48465)
- check for azurearm username in config before adding username and password to the virtual machine properties (#49063)
- Fixes service.status to return True/False instead of empty strings or PIDs of the service. This brings macOS into parity with the other service modules. (#49237)
- fix frequent rest_tornado non-fatal tracebacks (#49572)
- Do not use reverse DNS of the target used in salt-ssh. Use the target the user provides. (#49840)
- Fixes startup issue where it tried to load the kernalparams grain on Windows (#49901)
- Fixed error in nilrt_ip.get_interfaces_details when loading config. (#50416)
- Doesn’t remove underscore when sanitizing hostname in network salt util (#50527)
- **permit the use of int/float type for the version in:**
  - the state postgres_cluster.present
  - the state postgres_cluster.absent
  - the module postgres.cluster_create
  - the module postgres.cluster_remove (#50899)
- Cleaned up a traceback in lvm.pv_present when the disk doesn’t exist. (#52363)
- Fixed UnboundLocalError when using win_network.connect (#53371)
- Add accept_ra 2 option to modules.debian_ip (#54067)
- salt.runner test mode support (#54382)
- Fixed mkpart to allow the creation of a partition without filesystem (#54456)
- Fixes bogus warning message when an empty list is used for an environment in a topfile. This allows [] to be used as a placeholder in a topfile without needing to comment everything out as a workaround. (#54882)
- win_certutil state will no longer fail on non-English systems upon successful additions and deletions of a certificate. (#55024)
- Fixed file.directory state always showing mode change for symlinks. (#55878)
- check for a docker error that the swarm already exists when calling swarm.swarm_init on an existing docker swarm (#55949)
- Fixing stalekey engine so it deletes the keys when they are a list. (#55977)
- An invalid _schedule.conf configuration file is renamed to _schedule.confYAMLError. This avoids disabling the minion and busy polling the CPU on Windows. (#56216, #58177)
- Proper calculation of tpldir and related context parameters (#56410)
- Make gpg.encrypt examples work (#56646)
- Artifactory encoding of headers fixed for py3 (#56660)
• Fixed handling of extents extended attribute in file.managed state. (#57189)
• Remove buggy start parameter from virt.pool_running docstring (#57275)
• Fixed saltcheck rendering of map.jinja files from saltenv (#57327)
• Fix for virt.get_profiles resolves an error that appears due to new parameters introduced with _disk_profile() (#57431)
• Accept nested namespaces in spacewalk.api runner function. (#57442)
• virt.init fix the disk target names (#57477)
• Fix volume name for disk-typed pools in virt_defined (#57497)
• Fixes an issue with filesystems options ordering which kept already applied NFS fstab entries being updated. (#57520)
• Do not allow python2 to be added to salt-ssh tar since Salt deprecated Python 2. (#57647)
• Fixed exception on loading custom zipped modules. (#57674)
• corrected support for app_id or local vault configurations (#57705)
• Fix the registration of libvirt pool and nodedev events (#57746)
• Pass cmd.run state arguments to unless and onlyif when they exist (#57760)
• The 2004 release of Windows 10 introduced a bug in the InstallationBehavior COM object where you can no longer get properties from that object. Calls to this object are now wrapped in a try/except block with sane defaults when it fails to read attributes.
  Additionally, some pre-flight checks have been added to the win_wua module to make sure Windows Update can actually run. (#57762)
• Changed get_repo in yumpkg.py to use “repo” as first parameter. This fixes #57778, a bug were every run of pkgrepo.managed state were marked as changed because the get_repo did fail to detect a previously applied run. (#57778)
• Raise SaltClientError in parse_host_port insted of ValueError so it is caught and handled properly when the minion is connecting to the master. (#57789)
• Fixed issue with the return dictionary from the workgroup() function in the salt.states.win_system module. This resulted in a windows-based minion logging an error and could also interfere with a highstate being applied. (#57790)
• Fixes broken block_device_mapping and block_device_mapping_v2 type checks in the OpenStack cloud driver. Salt was looking for a dict and the shade library was looking for a list of dicts. This made it impossible to use those params. (#57802)
• Fixed incorrect parsing of Set-Cookie response headers. (#57829)
• When using yumpkg, report stdout when stderr is redirected to stdout. (#57862)
• Fixes an issue on macOS where if you try and restart the macOS using servive.restart salt-minion it would fail because the service names are different on macOS. (#57878)
• Fixes an issue on macOS where salt would take extra time to run on a service.dead call and the service is missing. (#57907)
• Fixes an issue where a disabled macOS and Windows service would fail to start with service.running. (#57908)
• Use “use_bin_type” to differentiate between bytes and str when writing cache for pillar and grains. (#57918)
• Set the comment to "No minions responded" if salt.function fails to find any minions (#57920)
• Fix issue with __utils__ usage in the __virtual__ functions on a few of the execution modules. (#57948)
• remove encoding kwarg for both pack(b)/unpack(b) in msgpack for versions >=1.0.0 https://github.com/msgpack/msgpack-python/blob/master/ChangeLog.rst#100 (#57965)
• Replace deprecated cgi.escape() with html.escape() after it was removed from Python 3.8. (#57983)
• Fix btrfs state decorator, that produces exceptions when creating subvolumes. (#58012)
• Fix kubeadm token_list when the list of tokens is empty (#58116)
• Add a fix for the mac_service modules where it would fail to load in some new services and crash on Big Sur. (#58143)
• Fix blank tplfile context parameter when loading top level sls files (#58249)
• Do not include init directory in sls context parameters if explicitly specified (#58250)
• Fixing pillar caching when pillar environments are involved. (#58274)
• Make proxy_config read in the proxy specific configuration which is typically found in /etc/salt/proxy.d/minionid/. (#58307)
• Add timeout kwarg docs for service.running and service.dead (#58311)
• Return empty dict on win_pdh.get_counters rather than raising exception when no data are available (#58327)
• Leave boot parameters untouched if boot parameter is set to None in virt.update (#58331)
• Convert disks of volume type to file or block disks on Xen (#58333)
• Apparently Apple is using both "10.16" and "11" for versioning Big Sur, depending on where you look. The mac_softwareupdate module uses a different regex depending on OS version, and the determination was based on the osrelease_info grain. This results in a Big Sur machine not using the correct regex; osrelease_info[1] is 0 for Big Sur. This change simply adds an additional clause to the if statement to handle osmajorrelease > 10. (#58340)
• Fixed zmq salt-call hang!
  Some objects from the 3rd party module zmq fail to deconstruct if left to the GC when Python exits. This is because the objects get destroyed out of order. This only happens on some platforms like ubuntu 20.04 and some versions of FreeBSD. We fixed this hang by deconstructing all zmq objects in the right order before we exit salt-call. (#58364)
• Reactor runner functions will now ensure reactor system is available before attempting to run and error out if it is not available. (#58384)
• Fix enpoint typos (#58416)
• Make sure we repopulate __utils__ on Windows when a job is run from the scheduler. (#58437)
• Adding a check when a source is an HTTP or FTP URL to do a query to ensure the URL is valid before returning, then we know if we need to move onto the next source in the list or not. (#58441)
• Improved documentation for the LGPO state module (#58521)
• Remove old documented pending reboot key (#58530)
• On macOS, skip GUI dialog for Developer Command Line Tools when importing gitfs util. (#58575)
• Fixing a use case when multiple inotify beacons are defined but when notifications are fired the configuration from the first beacon are used. (#58655)
Added

- salt-api will now work on Windows platforms with limited support. You will be able to configure the rest_cherrypy module, without pam external authentication and without ssl support. (#49949)
- Added execution_timeout support to chocolatey:installed state (#50449)
- Add new verify_ssl option to file modules. This allows a user to not validate the server certificate for HTTPS source and source hash's. (#52663)
- Added list target type support to the scan salt-ssh roster. (#52675)
- Added pvresize and lvextend to linux_lvm (#56089)
- Added COPR option to states.pkgrepo (#57258)
- Add "get_return" key for onlyif and unless requisites to parse deep module results (#57470)
- Allow setting VM boot devices order in virt.running and virt.defined states (#57544)
- Added grains to show the LVM Volume Groups and their Logical Volumes. (#57629)
- Memory Tuning Support which allows much greater control of memory allocation (#57639)
- Add output filter to saltcheck to only display test failures (#57788)
- Added an execution module for running idem exec modules
- Added a state module for running idem states (#57969)
- Added the ability for states to return sub_state_run's results from external state engines (#57993)
- Added salt-cloud support for Linode APIv4 via the api_version provider configuration parameter. (#58093)
- Added support to manage services in Slackware Linux. (#58206)
- Added list_sources to chocolatey module to have an overview of the repositories present on the minions. Added source_added to chocolatey state in order to add repositories to chocolatey. (#58588)
- Adding tests for changes to virtual function for netmiko module. Adding tests for netmiko proxy minion module. (#58609)
- Added features config option for feature flags. Added a feature flag enable_slsvars_fixes to enable fixes to tpldir, tplfile and sls_path. This flag will be deprecation in the Phosphorus release when this functionality becomes the default. (#58652)

30.2.4 Salt 3002.1 Release Notes

Version 3002.1 is a CVE fix release for 3002.

Fixed

- Prevent shell injections in netapi ssh client (cve-2020-16846)
- Prevent creating world readable private keys with the tls execution module. (cve-2020-17490)
- Properly validate eauth credentials and tokens along with their ACLs. Prior to this change eauth was not properly validated when calling Salt ssh via the salt-api. Any value for 'eauth' or 'token' would allow a user to bypass authentication and make calls to Salt ssh. (CVE-2020-25592)
30.2.5 Salt 3002.2 Release Notes

Version 3002.2 is a bugfix release for 3002.

Fixed

- Change dict check to isinstance instead of type() for key_values in file.keyvalue. (#57758)
- Fail when func_ret is False when using the new module.run syntax. (#57768)
- Fix comparison of certificate values (#58296)
- When using ssh_pre_flight if there is a failure, fail on retcode not stderr. (#58439)
- Fix use of unauthd cached vmware service instance (#58691)
- Removing use of undefined variable in utils/slack.py. (#58753)
- Restored the ability to specify the amount of extents for a Logical Volume as a percentage. (#58759)
- Ensuring that the version check function is run a second time in all the user related functions incase the user being managed is the connection user and the password has been updated. (#58773)
- Allow bytes in gpg renderer (#58794)
- Fix issue where win_wua module fails to load when BITS is set to Manual (#58848)
- Ensure that elasticsearch.index_exists is available before loading the elasticsearch returner. (#58851)
- Log a different object when debugging if we're using disk cache vs memory cache. The disk cache pillar class has the dict object but the cache pillar object which is used with the memory cache does not include a _dict object because it is a dict already. (#58861)
- Do not generate grains for every job run on Windows minions. This makes Windows conform more to the way posix OSes work today. (#58904)
- Fixes salt-ssh authentication when using tty (#58922)
- Revert LazyLoader finalizer. Removed the weakref.finalizer code. On some occasions, the finalized would run when trying to load a new module, firing a race condition. (#58947)

30.2.6 Salt 3002.3 Release Notes

Version 3002.3 is a CVE fix release for 3002.

Fixed

- CVE-2020-28243 - Fix local privilege escalation in the restartcheck module.
- CVE-2020-28972 - Ensure authentication to vcenter, vsphere, and esxi server validates the SSL/TLS certificate by default. If you want to skip SSL verification you can use verify_ssl: False.
- CVE-2020-35662 - Ensure the asam runner, qingcloud, splunk returner, panos proxy, cimc proxy, zenoss module, esxi module, vsphere module, glassfish module, bigip module, and keystone module validate SSL by default. If you want to skip SSL verification you can use verify_ssl: False.
- CVE-2021-3148 - Fix a command injection in the Salt-API when using the Salt-SSH client.
- CVE-2021-3144 - Fix eauth tokens can be used once after expiration
- CVE-2021-25281 - Fix salt-api so it honors eauth credentials for the wheel_async client.
• CVE-2021-25282 - Fix the salt.wheel.pillar_roots.write method so it is not vulnerable to directory traversal.
• CVE-2021-25283 - Fix the jinja render to protect against server side template injection attacks.
• CVE-2021-25284 - Fix cmdmod so it will not log credentials to log levels info and error.
• CVE-2021-3197 - Fix ssh client to remove ProxyCommand from arguments provided by cli and netapi.

30.2.7 Salt 3002.4 Release Notes

Version 3002.4 is a bug fix release for 3002.

Fixed

• Fix runners that broke when patching for CVE-2021-25281
• Fix issue with runners in SSE

Known Issue

When using the Salt-API with the SSH client some of the SSH options are not working currently and will be fixed in an upcoming bug fix release. We are currently testing and fixing which options still need to be fixed, but have confirmed the following ones do not work in this release: extra-filerefs, pre-flight. This does not impact normal Salt-SSH usage on the cli.

30.2.8 Salt 3002.5 Release Notes

Version 3002.5 is a cve fix release for 3002.

Fixed

• Tests and fix for CVE-2021-25283

Known Issue

When using the Salt-API with the SSH client some of the SSH options are not working currently and will be fixed in an upcoming bug fix release. We are currently testing and fixing which options still need to be fixed, but have confirmed the following ones do not work in this release: extra-filerefs, pre-flight. This does not impact normal Salt-SSH usage on the cli.

30.2.9 Salt 3002.6 Release Notes

Version 3002.6 is a bug fix release for 3002.
Changed

- Store git sha in salt/_version.py when installing from a tag so it can be found if needed later. (#59137)

Fixed

- Fix argument injection bug in restartcheck.restartcheck. This change hardens the fix for CVE-2020-28243. (#200)
- Allow "extra_filerefs" as sanitized kwargs for SSH client. Fix regression on "cmd.run" when passing tuples as cmd. (#59664)
- Allow all ssh kwargs as sanitized kwargs for SSH client. (#59748)

30.2.10 Salt 3001 Release Notes - Codename Sodium

Python 2 Dropped

Python 2 support has been dropped in Salt 3001. See https://community.saltstack.com/blog/sunsetting-python-2-support/ for more info.

Salt mine updates

Syntax update

The syntax for defining salt functions in config or pillar files has changed to also support the syntax used in module.run. The old syntax for the mine_function - as a dict, or as a list with dicts that contain more than exactly one key - is still supported but discouraged in favor of the more uniform syntax of module.run.

State updates

The creates state requisite has been migrated from the docker_container and cmd states to become a global option. This acts similar to an equivalent unless: test -f filename but can also accept a list of filenames. This allows all states to take advantage of the enhanced functionality released in Neon, of allowing salt execution modules for requisite checks.

When using salt functions onlyif or unless requisites, a get_return key can now be used to specify a key to evaluate for truthiness. This can be used for execution modules which return status in a nested key.

```yaml
test:
    test.nop:
        - name: foo
        - onlyif:
            - fun: consul.get
              consul_url: http://127.0.0.1:8500
              key: not-existing
              get_return: res
```
State Execution Module

The `state.test` function can be used to test a state on a minion. This works by executing the `state.apply` function while forcing the `test` kwarg to `True` so that the `state.apply` function is not required to be called by the user directly. This also allows you to add the `state.test` function to a minion's `minion_blackout_whitelist` pillar if you wish to be able to test a state while a minion is in blackout.

New Grains

`systempath`

This grain provides the same information as the `path` grain, only formatted as a list of directories.

Salt-SSH updates

`ssh_pre_flight`

A new Salt-SSH roster option `ssh_pre_flight` has been added. This enables you to run a script before Salt-SSH tries to run any commands. You can set this option in the roster for a specific minion or use the `roster_defaults` to set it for all minions.

Example for setting `ssh_pre_flight` for specific host in roster file

```yaml
minion1:
  host: localhost
  user: root
  passwd: P@ssword
  ssh_pre_flight: /srv/salt/pre_flight.sh
```

Example for setting `ssh_pre_flight` using `roster_defaults`, so all minions run this script.

```yaml
roster_defaults:
  ssh_pre_flight: /srv/salt/pre_flight.sh
```

The `ssh_pre_flight` script will only run if the thin dir is not currently on the minion. If you want to force the script to run you have the following options:

- Wipe the thin dir on the targeted minion using the `-w` arg.
- Set `ssh_run_pre_flight` to `True` in the config.
- Run salt-ssh with the `--pre-flight` arg.

`set_path`

A new salt-ssh roster option `set_path` has been added. This allows you to set the path environment variable used to run the salt-ssh command on the target minion. You can set this setting in your roster file like so:

```yaml
minion1:
  host: localhost
  user: root
  passwd: P@ssword
  set_path: '$PATH:/usr/local/bin/
```
auto_detect

You can now auto detect the dependencies to be packed into the salt thin when using the ssh_ext_alternatives feature.

```yaml
ssh_ext_alternatives:
    2019.2:
        # Namespace, can be anything.
        py-version: [2, 7]  # Constraint to specific interpreter version
        path: /opt/2019.2/salt  # Main Salt installation directory.
        auto_detect: True  # Auto detect dependencies
        py_bin: /usr/bin/python2.7  # Python binary path used to auto detect dependencies
```

This new auto_detect option needs to be set to True in your ssh_ext_alternatives configuration. Salt-ssh will attempt to auto detect the file paths required for the default dependencies to include in the thin. If you have a dependency already set in your configuration, it will not attempt to auto detect for that dependency.

You can also set the py_bin option to set the python binary to be used to auto detect the dependencies. If py_bin is not set, it will attempt to use the major Python version set in py-version. For example, if you set py-version to be [2, 7] it will attempt to find and use the python2 binary.

**State Changes**

- Adding a new option for the State compiler, disabled_requisites will allow requisites to be disabled during State runs.

**Salt Renderer updates**

A new renderer for toml files has been added.

```jinja
toml
{% set myvar = "sometext" %}
[
    
    name = "{{ myvar }}"
    
]["some id"."test.nop"]
txt = "hello"
"somekey" = "somevalue"
```

**Execution Module updates**

**Vault Module**

The vault module has been updated with the ability to cache generated tokens. By specifying uses and optionally ttl, the token generated on behalf of the minion will be allowed to persist and function for the defined time period or number of uses. Setting uses: 0 creates an unlimited use token, that is only constrained by the ttl.

```yaml
vault:
    auth:
        uses: 25
```
This functionality is configured by default on the master and is thus shared behavior for all minion token generation. To delegate use count to individual minions, specify allow_minion_override: True in the master config, and define uses and ttl in the minion config as directed above.

```yaml
vault:
  auth:
    method: token
    allow_minion_override: True
```

Additionally, the vault module now supports Vault secrets backend version 2. The appropriate secrets backend will be automatically detected, and cached in the same credentials file as long lived vault tokens mentioned above. For any configurations that worked around KV v2 handling by adding a manual data key to the end of vault lookups, `salt['vault'].read_secret('secret/my/secret')['data']`, these are automatically detected and will continue to function, but will generate a debug log message and can be removed.

The long lived token and secret metadata cache file can be cleared with the new `vault.clear_token_cache` execution function.

### 30.2.11 Salt 3001.1 Release Notes

Version 3001.1 is a bugfix release for 3001.

**Changed**

- Change the `enable_fqdns_grains` setting to default to False on Windows to address some issues with slowness. (#56296, #57529)
- Handle the UCRT libraries the same way they are handled in the Python 3 installer (#57594)
- Changes the 'SSDs' grain name to 'ssds' as all grains needs to be resolved in lowered case. (#57612)

**Fixed**

- When running scheduled jobs from a proxy minion with multiprocessing turned off (default) a recursive error occurs as `_pub_fun_args` is repeated over and over again in the `kwargs` element in the data dictionary. Now we make a copy of `data['kwargs']` instead of using a reference. (#57941)
- The `x509.certificate_managed` state no longer triggers a change because of sorting issues if the certificate being evaluated was previously generated under Python 2. (#56556)
- Added support to lo ip alias in `network.managed` state by checking if lo inet data from `network.interfaces` contains label with the name of managed interface. Return status True if match found. (#56901)
- Redact passwords in the return when setting credentials using `win_iis.container_setting` (#57285)
- Fixes issue with cmd.powershell. Some powershell commands do not return anything in stdout. This causes the JSON parser to fail because an empty string is not valid JSON. This changes an empty string to `{}` which is valid JSON and will not cause the JSON loader to stacktrace. (#57493)
- Improves performance. Profiling `test.ping` on Windows shows that 13 of 17 seconds are wasted when the esxi grain loads vsphere before noting that the OS is not a esxi host. (#57529)
- Fixed permissions issue with certain pip/virtualenv states/modules when configured for non-root user. (#57550)
- Allow running nox sessions either using our `nox-py2` fork or upstream nox. (#57583)
- Fixes issue with `lgpo.get` when there are unicode characters in the hostname (#57591)
• Fixes issue with virtual block devices, like loopbacks and LVMs, wrongly populating the “disks” or “ssds” grains. (#57612)

• Due to some optimization the virtual grain was never updated on illumos. Move the fallback in prtdiag output parsing outside the loop that now gets skipped due to the command exiting non-zero. (#57714)

• Grains module delkey and delval methods now support the force option. This is needed for deleting grains with complex (nested) values. (#57718)

• Moving import salt.modules.vsphere into __virtual__ so we have access to test proxytype in opts, previously this was causing a traceback when run on proxy minion as __opts__ does not exist outside of any functions. Introducing a new utils function, is_proxytype, to check that the device is a proxy minion and also that the proxy type matches. (#57743)

• Fixed fail_with_changes in the test state to use the comment argument when passed. (#57766)

• Adds a fix so salt can run on the latest macOS version Big Sur. (#57787)

• Fixes UnpackValueError when using GPG cache by using atomic open. (#57798)

• The gid_from_name argument was removed from the user.present state in version 3001, with no deprecation path. It has been restored and put on a proper deprecation path. (#57843)

• Fixes dictionary being changed during iteration. (#57845)

Added

• Added docs demonstrating how to apply an MSI patch with winrepo (#32780)

30.2.12 Salt 3001.2 Release Notes

Version 3001.2 is a CVE fix release for 3001.

Fixed

• Prevent shell injections in netapi ssh client (cve-2020-16846)

• Prevent creating world readable private keys with the tls execution module. (cve-2020-17490)

30.2.13 Salt 3001.3 Release Notes

Version 3001.3 is a CVE fix release for 3001.

Fixed

• Properly validate eauth credentials and tokens along with their ACLs. Prior to this change eauth was not properly validated when calling Salt ssh via the salt-api. Any value for 'eauth' or 'token' would allow a user to bypass authentication and make calls to Salt ssh. (CVE-2020-25592)
30.2.14 Salt 3001.4 Release Notes

Version 3001.4 is a bugfix release for 3001.

Fixed

- Fixes salt-ssh authentication when using tty (#58922)

30.2.15 Salt 3001.5 Release Notes

Version 3001.5 is a CVE fix release for 3001.

Fixed

- CVE-2020-28243 - Fix local privilege escalation in the restartcheck module.
- CVE-2020-28972 - Ensure authentication to vcenter, vsphere, and esxi server validates the SSL/TLS certificate by default. If you want to skip SSL verification you can use `verify_ssl: False`.
- CVE-2020-35662 - Ensure the asam runner, qingcloud, splunk returner, panos proxy, cimc proxy, zenoss module, esxi module, vsphere module, glassfish module, bigip module, and keystone module validate SSL by default. If you want to skip SSL verification you can use `verify_ssl: False`.
- CVE-2021-3148 - Fix a command injection in the Salt-API when using the Salt-SSH client.
- CVE-2021-3144 - Fix eauth tokens can be used once after expiration
- CVE-2021-25281 - Fix salt-api so it honors eauth credentials for the wheel_async client.
- CVE-2021-25282 - Fix the salt.wheel.pillar_roots.write method so it is not vulnerable to directory traversal.
- CVE-2021-25283 - Fix the jinja render to protect against server side template injection attacks.
- CVE-2021-25284 - Fix cmdmod so it will not log credentials to log levels info and error.
- CVE-2021-3197 - Fix ssh client to remove ProxyCommand from arguments provided by cli and netapi.

30.2.16 Salt 3001.6 Release Notes

Version 3001.6 is a bug fix release for 3001.

Fixed

- Fix runners that broke when patching for CVE-2021-25281
- Fix issue with runners in SSE
Known Issue

When using the Salt-API with the SSH client some of the SSH options are not working currently and will be fixed in an upcoming bug fix release. We are currently testing and fixing which options still need to be fixed, but have confirmed the following ones do not work in this release: extra-filerefs, pre-flight. This does not impact normal Salt-SSH usage on the cli.

30.2.17 Salt 3001.7 Release Notes

Version 3001.7 is a bug fix release for 3001.

Fixed

- Allow "extra_filerefs" as sanitized kwargs for SSH client. Fix regression on "cmd.run" when passing tuples as cmd. (#59664)
- Allow all ssh kwargs as sanitized kwargs for SSH client. (#59748)
- Fix argument injection bug in restartcheck.restartcheck. This change hardens the fix for CVE-2020-28243.

30.2.18 Salt 3000 Release Notes - Codename Neon

Security Advisory

For historical reasons, Salt requires PyCrypto as a "lowest common denominator". However, PyCrypto is unmaintained and best practice is to manually upgrade to use a more maintained library such as PyCryptodome. See Issue #52674 and Issue #54115 for more info

New Versioning

The neon release has removed the date versioning. Going forward we will use a non-date based version schema beginning at 3000. The version will be MAJOR.PATCH. For a planned release containing features and/or bug fixes the MAJOR version will be incremented. Please review the approved SEP for further details.

The new versioning scheme is PEP 440 compliant, but distutils.StrictVersion will result in an error invalid version number. If using StrictVersion to compare Salt's versions, please use LooseVersion. There is also the packaging library you can use to compare versions. Another alternative is using the salt version module

Python 3.8 Not Supported

Please note that running Salt with Python 3.8 is currently not supported. It is recommended to not use a version higher than 3.7.
Vendored Tornado Code Base

The Tornado code base has been included as `salt.ext.tornado`. This was done to provide a consistent version of Tornado across all operating systems while we continue to work on upgrading Tornado to a recent version. New code that uses Tornado should import the module from `salt.ext.tornado` instead of importing the system version of Tornado.

Msgpack 1.0.0rc1 Incompatibility

Salt is currently incompatible with msgpack 1.0.0rc1. We recommend using versions < 1.0.0. This impacts the Salt Master's ability to run commands against minions. Please see Issue 56007 for more details and updates.

Pip Installing Salt On Windows

This release will not install correctly on windows when using pip to install salt. This issue is addressed in PR 56099. The workaround for this issue is:

```
pip install "pywin32==224" "WMI==1.4.9"
```

Those using the Salt Windows Installer are not affected by this issue.

Saltcheck Updates

Available since 2018.3, the `saltcheck` module has been enhanced to:

- Support saltenv environments
- Associate tests with states by naming convention
- Adds `report_highstate_tests` function
- Adds empty and notempty assertions
- Adds skip keyword
- Adds `print_result` keyword
- Adds `assertion_section` keyword
- Use `saltcheck.state_apply` to run `state.apply` for test setup or teardown
- Changes output to display test time
- Works with `salt-ssh`

Saltcheck provides unittest like functionality requiring only the knowledge of salt module execution and yaml. Saltcheck uses salt modules to return data, then runs an assertion against that return. This allows for testing with all the features included in salt modules.

In order to run state and highstate saltcheck tests, a sub-folder in the state directory must be created and named `saltcheck-tests`. Tests for a state should be created in files ending in `*.tst` and placed in the `saltcheck-tests` folder. `tst` files are run through the salt rendering system, enabling tests to be written in yaml (or renderer of choice), and include jinja, as well as the usual grain and pillar information. Like states, multiple tests can be specified in a `tst` file. Multiple `tst` files can be created in the `saltcheck-tests` folder, and should be named the same as the associated state. The `id` of a test works in the same manner as in salt state files and should be unique and descriptive.
Usage

Example file system layout:

```
/srv/salt/apache/
  init.sls
  config.sls
  saltcheck-tests/
    init.tst
    config.tst
    deployment_validation.tst
```

Tests can be run for each state by name, for all apache/saltcheck/*.tst files, or for all states assigned to the minion in top.sls. Tests may also be created with no associated state. These tests will be run through the use of saltcheck.run_state_tests, but will not be automatically run by saltcheck.run_highstate_tests.

```
salt '*' saltcheck.run_state_tests apache,apache.config
salt '*' saltcheck.run_state_tests apache check_all=True
salt '*' saltcheck.run_highstate_tests
salt '*' saltcheck.run_state_tests apache.deployment_validation
```

Example Tests

```python
{% for package in ["apache2", "openssh"] %}
{# or another example #}
{# for package in salt['pillar.get']("packages") #}
jinja_test_{{ package }}_latest:
  module_and_function: pkg.upgrade_available
  args:
    - {{ package }}
  assertion: assertFalse
{% endfor %}

validate_user_present_and_shell:
  module_and_function: user.info
  args:
    - root
  assertion: assertEqual
  expected-return: /bin/bash
  assertion_section: shell
  print_result: False

skip_test:
  module_and_function: pkg.upgrade_available
  args:
    - apache2
```

(continues on next page)
assertion: assertFalse
skip: True

Output Format Changes

Saltcheck output has been enhanced to display the time taken per test. This results in a change to the output format.

Previous Output:

```
local:
 |-  ----------
 |   ntp:  ----------
 |     ntp-client-installed:
 |       Pass
 |     ntp-service-status:
 |       Pass

|-
 |
 |

TEST RESULTS:  ----------
   Failed:  0
   Missing Tests:  0
   Passed:  2
```

New output:

```
local:
 |-  ----------
 |   ntp:  ----------
 |     ntp-client-installed:  ----------
 |       duration:  1.0408
 |       status:  Pass
 |     ntp-service-status:  ----------
 |       duration:  1.464
 |       status:  Pass

|-
 |
 |

TEST RESULTS:  ----------
   Execution Time:  2.5048
   Failed:  
```
Unless and onlyif Enhancements

The unless and onlyif requisites can now be operated with salt modules. The dictionary must contain an argument fun which is the module that is being run, and everything else must be passed in under the args key or will be passed as individual kwargs to the module function.

Note: Certain states have an unless/onlyif implementation that predates this feature, and may not work as expected:

- states.git
- states.cmd
- states.macpackage
- states.file
- states.docker_container

Examples:

```python
check external ip address:
http.query:
  - name: https://icanhazip.com
  - status: 200
  - onlyif:
    - fun: file.file_exists
      path: /usr/local/bin/whatever
```

is equivalent to

```python
check another ip address:
http.query:
  - name: https://icanhazip.com
  - status: 200
  - onlyif:
    - test -f /tmp/fnord.txt
```

Another example:

```python
set mysql root password:
debconf.set:
  - name: mysql-server-5.7
  - data:
    'mysql-server/root_password': {'type': 'password', 'value': {{pillar['mysql.' + pass']}}}
  - unless:
```
Keystore State and Module

A new *state* and *execution module* for managing Java Keystore files is now included. It allows for adding/removing/listing as well as managing keystore files.

```
# salt-call keystore.list /path/to/keystore.jks changeit
local:
  |-
  --
  alias: hostname1
  expired: True
  type: TrustedCertEntry
valid_start: August 22 2012
valid_until: August 21 2017
```

define_keystore:
  keystore.managed:
    - name: /tmp/statestore.jks
    - passphrase: changeit
    - force_remove: True
    - entries:
      - alias: hostname1
        certificate: /tmp/testcert.crt
      - alias: remotehost
        certificate: /tmp/512.cert
        private_key: /tmp/512.key
      - alias: stringhost
        certificate:
        ------BEGIN CERTIFICATE-----
        MIICEjCCAX
        Hn+GmxZA
        ------END CERTIFICATE-----
        ```
XML Module

A new state and execution module for editing XML files is now included. Currently it allows for editing values from an xpath query, or editing XML IDs.

```bash
# salt-call xml.set_attribute /tmp/test.xml ".//actor[@id='3']" editedby "Jane Doe"
local: True
# salt-call xml.get_attribute /tmp/test.xml ".//actor[@id='3']"
local: 
  editedby:
    Jane Doe
  id:
    3
# salt-call xml.get_value /tmp/test.xml ".//actor[@id='2']"
local: Liam Neeson
# salt-call xml.set_value /tmp/test.xml ".//actor[@id='2']" "Patrick Stewart"
local: True
# salt-call xml.get_value /tmp/test.xml ".//actor[@id='2']"
local: Patrick Stewart
```

```yaml
ensure_value_true:
  xml.value_present:
    - name: /tmp/test.xml
    - xpath: .//actor[@id='1']
    - value: William Shatner
```

LGPO Execution Module

Multiple fixes were made to the `win_lgpo` to expand support for additional policies and improve performance. Issues with encoding and unsupported characters (smart-quotes, em-dash, etc) found in the ADML files as well as whitespace in some policies have been addressed.

Speed enhancements include:

- Caching the compiled xml from ADMX/ADML files in `__context__`
- Lowercasing all keys before compiling XML to remove an expensive XPath lookup

Additional functionality:

- Adds the `lgpo.get_policy` function that allows you to get the current settings for a single policy.
- Changes some policy names that were overly long
LGPO State Module

Multiple changes were made to the `win_lgpo` state to improve performance. It now uses the `lgpo.get_policy` function instead of the `lgpo.get` to avoid reloading all settings on the machine at the beginning and end of each state run. Supports the new shorter policy names but also attempts to resolve the older, longer policy names.

Win_network Salt Util

Now uses .NET libraries to obtain Interface information on Windows systems that support it. Unsupported systems fall back to the more expensive WMI calls. This is important as this data is gathered for grains and occurs each time a process is forked.

Jinja enhancements

Troubleshooting Jinja map files

A new `execution module` for `map.jinja` troubleshooting has been added. Assuming the map is loaded in your formula SLS as follows:

```tex
{% from "myformula/map.jinja" import myformula with context %}
```

The following command can be used to load the map and check the results:

```bash
salt myminion jinja.load_map myformula/map.jinja myformula
```

The module can be also used to test json and yaml maps:

```bash
salt myminion jinja.import_yaml myformula/defaults.yaml
salt myminion jinja.import_json myformula/defaults.json
```

json_query filter

A port of Ansible `json_query` Jinja filter has been added. It allows making queries against JSON data using JMESPath language. Could be used to filter pillar data, yaml maps, and also useful with `http_query`. Depends on the `jmespath` Python module.

Slot Syntax Updates

The slot syntax has been updated to support parsing dictionary responses and to append text.

```yaml
demo dict parsing and append:
  test.configurable_test_state:
    - name: slot example
    - changes: False
    - comment: __slot__:salt:test.arg(shell="/bin/bash").kwargs.shell ~ /appended
```
Also, slot parsing is now supported inside of nested state data structures (dicts, lists, unless/onlyif args):

```
demo slot parsing for nested elements:

def file.managed:
    - name: /tmp/slot.txt
    - source: salt://slot.j2
    - template: jinja
    - context:
        variable: __slot__:salt:test.echo(a_value)
    - unless:
        fun: file.search
        args:
            # Slot as unless argument
            - __slot__:salt:test.echo(/tmp/slot.txt)
            - "DO NOT OVERRIDE"
    ignore_if_missing: True
```

State Changes

- The `file.symlink` state was fixed to remove existing file system entries other than files, directories and symbolic links properly.
- The `onchanges` and `prereq` requisites now behave properly in test mode, due to removing `pchanges`.
- Added new `ssh_auth.manage` state to ensure only the specified ssh keys are present for the specified user.
- Added new `saltutil` state to use instead of `module.run` to more easily handle change.

Module Changes

- Added new `boto_ssm` module to set and query secrets in AWS SSM parameters.
- Added new `flatpak` module to work with flatpak packages.
- The `file.remove` module was fixed to remove file system entries other than files, directories and symbolic links properly.
- The `debian_ip` module used by the `network.managed` state has been heavily refactored. The order that options appear in inet/inet6 blocks may produce cosmetic changes. Many options without an 'ipvX' prefix will now be shared between inet and inet6 blocks. The options `enable_ipv4` and `enabled_ipv6` will now fully remove relevant inet/inet6 blocks. Overriding options by prefixing them with 'ipvX' will now work with most options (i.e. `dns` can be overridden by `ipv4dns` or `ipv6dns`). The `proto` option is now required.
**Enhancements to Engines**

Multiple copies of a particular Salt engine can be configured by including the `engine_module` parameter in the engine configuration.

```yaml
engines:
  - production_logstash:
    host: production_log.my_network.com
    port: 5959
    proto: tcp
    engine_module: logstash
  - develop_logstash:
    host: develop_log.my_network.com
    port: 5959
    proto: tcp
    engine_module: logstash
```

- A new fluent engine has been added to export Salt events to fluentd.

```yaml
engines:
  - fluent
    host: localhost
    port: 24224

<source>
  @type forward
  port 24224
</source>
<match saltstack.**>
  @type file
  path /var/log/td-agent/saltstack
</match>
```

**Enhancements to Beacons**

Multiple copies of a particular Salt beacon can be configured by including the `beacon_module` parameter in the beacon configuration.

```yaml
beacons:
  watch_importand_file:
    files:
      /etc/important_file: {}
    - beacon_module: inotify
  watch_another_file:
    files:
      /etc/another_file: {}
    - beacon_module: inotify
```
Enhancements to chroot

- New functions added to chroot `apply.sls` and `highstate` that allow executing states in sls files or running `apply/highstate` inside of a chroot.

Minion-side ACL

Salt has had master-side ACL for the salt mine for some time, where the master configuration contained `mine_get` that specified which minions could request which functions. However, now you can specify which minions can access a function in the salt mine function definition itself (or when calling `mine.send`). This targeting works the same as the generic minion targeting as specified [here](#). The parameters used are `allow_tgt` and `allow_tgt_type`. See also the documentation of the Salt Mine. Please note that if you want to use this new feature both your minion and masters will need to be on at least version 3000.

Deprecations

Raet Deprecated

- The Raet transport has been deprecated. Please use the supported transport protocols tcp or zeromq.

Module Deprecations

- The hipchat module has been removed due to the service being retired. Google Chat, MS Teams, or Slack may be suitable replacements.
- The `dockermod` module has been changed as follows:
  - Support for the `tags` kwarg has been removed from the `dockermod.resolve_tag` function.
  - Support for the `network_id` kwarg has been removed from the `dockermod.connect_container_to_network` function. Please use `net_id` instead.
  - Support for the `name` kwarg has been removed from the `dockermod.sls_build` function. Please use `repository` and `tag` instead.
  - Support for the `image` kwarg has been removed from the following functions. In all cases, please use both the `repository` and `tag` options instead:
    - `dockermod.build`
    - `dockermod.commit`
    - `dockermod.import`
    - `dockermod.load`
    - `dockermod.tag`
- The heat module has removed the `enviroment` kwarg from the `heat.create_stack` and `heat.update_stack` functions due to a spelling error. Please use `environment` instead.
- The `ssh` execution module has been changed as follows:
  - Support for the `ssh.get_known_host` function has been removed. Please use the `ssh.get_known_host_entries` function instead.
  - Support for the `ssh.recv_known_host` function has been removed. Please use the `ssh.recv_known_host_entries` function instead.
• The `py:mod` `firewalld <salt.modules.firewalld>` module has been changed as follows:
  - The default setting for the `force_masquerade` option in the `firewalld.add_port <salt.module.firewalld.add_port()>` function has changed from `True` to `False`.
  - Support for the `force_masquerade` option in the `firewalld.add_port_fwd <salt.module.firewalld.add_port_fwd()>` function has been changed from `True` to `False`.

**State Deprecations**

- The hipchat state has been removed due to the service being retired. *MS Teams or Slack* may be suitable replacements.
- The cmd state module has removed the `quiet` kwarg from the `cmd.run` function. Please set `output_loglevel` to `quiet` instead.
- The heat state module has removed the `enviroment` kwarg from the `heat.deployed` function due to a spelling error. Please use `environment` instead.
- The `py:mod ` `firewalld <salt.states.firewalld>` state has been changed as follows:
  - The default setting for the `prune_services` option in the `firewalld.present` function has changed from `True` to `False`.

**Fileserver Deprecations**

- The hgfs fileserver had the following config options removed:
  - The `hgfs_env_whitelist` config option has been removed in favor of `hgfs_saltenv_whitelist`.
  - The `hgfs_env_blacklist` config option has been removed in favor of `hgfs_saltenv_blacklist`.
- The svnfs fileserver had the following config options removed:
  - The `svnfs_env_whitelist` config option has been removed in favor of `svnfs_saltenv_whitelist`.
  - The `svnfs_env_blacklist` config option has been removed in favor of `svnfs_saltenv_blacklist`.
- The gitfs fileserver had the following config options removed:
  - The `gitfs_env_whitelist` config option has been removed in favor of `gitfs_saltenv_whitelist`.
  - The `gitfs_env_blacklist` config option has been removed in favor of `gitfs_saltenv_blacklist`.
Engine Removal

- The hipchat engine has been removed due to the service being retired. For users migrating to Slack, the `slack` engine may be a suitable replacement.

Returner Removal

- The hipchat returner has been removed due to the service being retired. For users migrating to Slack, the `slack` returner may be a suitable replacement.

Grain Deprecations

For `smartos` some grains have been deprecated. These grains have been removed.

- The `hypervisor_uuid` has been replaced with `mdata:sdc:server_uuid` grain.
- The `datacenter` has been replaced with `mdata:sdc:datacenter_name` grain.

Cloud Deprecations

- The nova cloud driver has been removed in favor of the openstack cloud driver.

Jinja Filter Deprecations

- The following jinja filters are set to be removed in the 3003 release:
  - `json_decode_dict` in favor of `tojson`
  - `json_decode_list` in favor of `tojson`

Utils Deprecations

- All of the functions in `salt.utils.__init__.py` have been removed. These include:
  - `salt.utils.option`
  - `salt.utils.required_module_list`
  - `salt.utils.required_modules_error`
  - `salt.utils.get_accumulator_dir`. Please use `salt.state.get_accumulator_dir()` instead.
  - `salt.utils.fnmatch_multiple`. Please use `salt.utils.itertools.fnmatch_multiple()` instead.
  - `salt.utils.appendproctitle`. Please use `salt.utils.process.appendproctitle()` instead.
  - `salt.utils.daemonize`. Please use `salt.utils.process.daemonize()` instead.
  - `salt.utils.daemonize_if`. Please use `salt.utils.process.daemonize_if()` instead.
  - `salt.utils.reinit_crypto`. Please use `salt.utils.crypt.reinit_crypto()` instead.
  - `salt.utils.pem_finger`. Please use `salt.utils.crypt.pem_finger()` instead.
  - `salt.utils.to_bytes`. Please use `salt.utils.stringutils.to_bytes()` instead.
- `salt.utils.to_str`. Please use `salt.utils.stringutils.to_str()` instead.
- `salt.utils.to_unicode`. Please use `salt.utils.stringutils.to_unicode()` instead.
- `salt.utils.str_to_num`. Please use `salt.utils.stringutils.to_num()` instead.
- `salt.utils.is_quoted`. Please use `salt.utils.stringutils.is_quoted()` instead.
- `salt.utils.dequote`. Please use `salt.utils.stringutils.dequote()` instead.
- `salt.utils.is_hex`. Please use `salt.utils.stringutils.is_hex()` instead.
- `salt.utils.is_bin_str`. Please use `salt.utils.stringutils.is_binary()` instead.
- `salt.utils.rand_string`. Please use `salt.utils.stringutils.random()` instead.
- `salt.utils.contains_whitespace`. Please use `salt.utils.stringutils.contains_whitespace()` instead.
- `salt.utils.build_whitespace_split_regex`. Please use `salt.utils.stringutils.build_whitespace_split_regex()` instead.
- `salt.utils.expr_match`. Please use `salt.utils.stringutils.expr_match()` instead.
- `salt.utils.check_whitelist_blacklist`. Please use `salt.utils.stringutils.check_whitelist_blacklist()` instead.
- `salt.utils.check_include_exclude`. Please use `salt.utils.stringutils.check_include_exclude()` instead.
- `salt.utils.print_cli`. Please use `salt.utils.stringutils.print_cli()` instead.
- `salt.utils.clean_kwars`. Please use `salt.utils.args.clean_kwars()` instead.
- `salt.utils.invalid_kwars`. Please use `salt.utils.args.invalid_kwars()` instead.
- `salt.utils.shlex_split`. Please use `salt.utils.args.shlex_split()` instead.
- `salt.utils.arg_lookup`. Please use `salt.utils.args.arg_lookup()` instead.
- `salt.utils.split_input`. Please use `salt.utils.args.split_input()` instead.
- `salt.utils.test_mode`. Please use `salt.utils.args.test_mode()` instead.
- `salt.utils.format_call`. Please use `salt.utils.args.format_call()` instead.
- `salt.utils.which`. Please use `salt.utils.path.which()` instead.
- `salt.utils.which_bin`. Please use `salt.utils.path.which_bin()` instead.
- `salt.utils.path_join`. Please use `salt.utils.path.join()` instead.
- `salt.utils.check_or_die`. Please use `salt.utils.path.check_or_die()` instead.
- `salt.utils.sanitize_win_path_string`. Please use `salt.utils.path.sanitize_win_path()` instead.
- `salt.utils.rand_str`. Please use `salt.utils.hashutils.random_hash()` instead.
- `salt.utils.get_hash`. Please use `salt.utils.hashutils.get_hash()` instead.
- `salt.utils.is_windows`. Please use `salt.utils.platform.is_windows()` instead.
- `salt.utils.is_proxy`. Please use `salt.utils.platform.is_proxy()` instead.
- `salt.utils.is_linux`. Please use `salt.utils.platform.is_linux()` instead.
- `salt.utils.is_darwin`. Please use `salt.utils.platform.is_darwin()` instead.
- `salt.utils.is_sunos`. Please use `salt.utils.platform.is_sunos()` instead.
- `salt.utils.is_smartos`. Please use `salt.utils.platform.is_smartos()` instead.
- `salt.utils.is_smartos_globalzone`. Please use `salt.utils.platform.is_smartos_globalzone()` instead.
- `salt.utils.is_smartos_zone`. Please use `salt.utils.platform.is_smartos_zone()` instead.
- `salt.utils.is_freebsd`. Please use `salt.utils.platform.is_freebsd()` instead.
- `salt.utils.is_netbsd`. Please use `salt.utils.platform.is_netbsd()` instead.
- `salt.utils.is_openbsd`. Please use `salt.utils.platform.is_openbsd()` instead.
- `salt.utils.is_aix`. Please use `salt.utils.platform.is_aix()` instead.
- `salt.utils.safe_rm`. Please use `salt.utils.files.safe_rm()` instead.
- `salt.utils.is_empty`. Please use `salt.utils.files.is_empty()` instead.
- `salt.utils.fopen`. Please use `salt.utils.files.fopen()` instead.
- `salt.utils.flopen`. Please use `salt.utils.files.flopen()` instead.
- `salt.utils.rm_rf`. Please use `salt.utils.files.rm_rf()` instead.
- `salt.utils.mkstemp`. Please use `salt.utils.files.mkstemp()` instead.
- `salt.utils.istextfile`. Please use `salt.utils.files.is_text_file()` instead.
- `salt.utils.is_bin_file`. Please use `salt.utils.files.is_binary()` instead.
- `salt.utils.list_files`. Please use `salt.utils.files.list_files()` instead.
- `salt.utils.safe_walk`. Please use `salt.utils.files.safe_walk()` instead.
- `salt.utils.st_mode_to_octal`. Please use `salt.utils.files.st_mode_to_octal()` instead.
- `salt.utils.normalize_mode`. Please use `salt.utils.files.normalize_mode()` instead.
- `salt.utils.human_size_to_bytes`. Please use `salt.utils.files.human_size_to_bytes()` instead.
- `salt.utils.backup_minion`. Please use `salt.utils.files.backup_minion()` instead.
- `salt.utils.str_version_to_evr`. Please use `salt.utils.pkg.rpm.version_to_evr()` instead.
- `salt.utils.parse_docstring`. Please use `salt.utils.doc.parse_docstring()` instead.
- `salt.utils.compare_versions`. Please use `salt.utils.versions.compare()` instead.
- `salt.utils.version_cmp`. Please use `salt.utils.versions.version_cmp()` instead.
- `salt.utils.warn_until`. Please use `salt.utils.versions.warn_until()` instead.
- `salt.utils.kwargs_warn_until`. Please use `salt.utils.versions.kwargs_warn_until()` instead.
- `salt.utils.get_color_theme`. Please use `salt.utils.color.get_color_theme()` instead.
- `salt.utils.get_colors`. Please use `salt.utils.color.get_colors()` instead.
- `salt.utils.gen_state_tag`. Please use `salt.utils.state.gen_tag()` instead.
- `salt.utils.search_onfail_requisites`. Please use `salt.utils.state.search_onfail_requisites()` instead.
- `salt.utils.check_onfail_requisites`. Please use `salt.utils.state.check_onfail_requisites()` instead.
- `salt.utils.check_state_result`. Please use `salt.utils.state.check_result()` instead.
- `salt.utils.get_user`. Please use `salt.utils.user.get_user()` instead.
- `salt.utils.get_uid`. Please use `salt.utils.user.get_uid()` instead.
- `salt.utils.get_specific_user`. Please use `salt.utils.user.get_specific_user()` instead.
- `salt.utils.chugid`. Please use `salt.utils.user.chugid()` instead.
- `salt.utils.chugid_and_umask`. Please use `salt.utils.user.chugid_and_umask()` instead.
- `salt.utils.get_default_group`. Please use `salt.utils.user.get_default_group()` instead.
- `salt.utils.get_group_list`. Please use `salt.utils.user.get_group_list()` instead.
- `salt.utils.get_group_dict`. Please use `salt.utils.user.get_group_dict()` instead.
- `salt.utils.get_gid_list`. Please use `salt.utils.user.get_gid_list()` instead.
- `salt.utils.get_gid`. Please use `salt.utils.user.get_gid()` instead.
- `salt.utils.enable_ctrl_logoff_handler`. Please use `salt.utils.win_functions.enable_ctrl_logoff_handler()` instead.
- `salt.utils.traverse_dict`. Please use `salt.utils.data.traverse_dict()` instead.
- `salt.utils.traverse_dict_and_list`. Please use `salt.utils.data.traverse_dict_and_list()` instead.
- `salt.utils.filter_by`. Please use `salt.utils.data.filter_by()` instead.
- `salt.utils.subdict_match`. Please use `salt.utils.data.subdict_match()` instead.
- `salt.utils.substr_in_list`. Please use `salt.utils.data.substr_in_list()` instead.
- `salt.utils.is_dictlist`. Please use `salt.utils.data.is_dictlist()` instead.
- `salt.utils.repack_dictlist`. Please use `salt.utils.data.repack_dictlist()` instead.
- `salt.utils.compare_dicts`. Please use `salt.utils.data.compare_dicts()` instead.
- `salt.utils.compare_lists`. Please use `salt.utils.data.compare_lists()` instead.
- `salt.utils.decode_dict`. Please use `salt.utils.data.decode_dict()` instead.
- `salt.utils.decode_list`. Please use `salt.utils.data.decode_list()` instead.
- `salt.utils.exactly_n`. Please use `salt.utils.data.exactly_n()` instead.
- `salt.utils.is_sorted`. Please use `salt.utils.data.is_sorted()` instead.
- `salt.utils.simple_types_filter`. Please use `salt.utils.data.simple_types_filter()` instead.
- `salt.utils.is_true`. Please use `salt.utils.data.is_true()` instead.
- `salt.utils.is_iter`. Please use `salt.utils.data.is_iter()` instead.
- `salt.utils.is_sorted`. Please use `salt.utils.data.is_sorted()` instead.
- `salt.utils.is_true`. Please use `salt.utils.data.is_true()` instead.
- `salt.utils.mysql_to_dict`. Please use `salt.utils.data.mysql_to_dict()` instead.
- `salt.utils.simple_types_filter`. Please use `salt.utils.data.simple_types_filter()` instead.
- `salt.utils.ip_bracket`. Please use `salt.utils.zeromq.ip_bracket()` instead.
- `salt.utils.gen_mac`. Please use `salt.utils.network.gen_mac()` instead.
- `salt.utils.mac_str_to_bytes`. Please use `salt.utils.network.mac_str_to_bytes()` instead.
- `salt.utils.refresh_dns`. Please use `salt.utils.network.refresh_dns()` instead.
- `salt.utils.dns_check`. Please use `salt.utils.network.dns_check()` instead.
- `salt.utils.get_context`. Please use `salt.utils.stringutils.get_context()` instead.
- `salt.utils.get_master_key`. Please use `salt.utils.master.get_master_key()` instead.
- `salt.utils.date_cast`. Please use `salt.utils.dateutils.date_cast()` instead.
- `salt.utils.date_format`. Please use `salt.utils.dateutils.strftime()` instead.
- `salt.utils.total_seconds`. Please use `salt.utils.dateutils.total_seconds()` instead.
- `salt.utils.find_json`. Please use `salt.utils.json.find_json()` instead.
- `salt.utils.import_json`. Please use `salt.utils.json.import_json()` instead.
- `salt.utils.namespaced_function`. Please use `salt.utils.functools.namespaced_function()` instead.
- `salt.utils.alias_function`. Please use `salt.utils.functools.alias_function()` instead.
- `salt.utils.profile_func`. Please use `salt.utils.profile.profile_func()` instead.
- `salt.utils.activate_profile`. Please use `salt.utils.profile.activate_profile()` instead.
- `salt.utils.output_profile`. Please use `salt.utils.profile.output_profile()` instead.

**salt.auth.Authorize Class Removal**

- The `salt.auth.Authorize` Class inside of the `salt/auth/__init__.py` file has been removed and the `any_auth` method inside of the file `salt/utils/minions.py`. These method and classes were not being used inside of the salt code base.

### 30.2.19 Salt 3000.1 Release Notes

Version 3000.1 is a bugfix release for **3000**.

#### Statistics

- **Total Merges**: 53
- **Total Issue References**: 15
- **Total PR References**: 54
- **Contributors**: 16 (Ch3LL, UtahDave, bryceml, cmcmarrow, dwoz, frogunder, garethgreenaway, lorengordon, mchugh19, oeufete, raddessi, s0undt3ch, sjorge, terminalmage, twangboy, waynew)
Changelog for v3000..v3000.1

Generated at: 2020-03-27 16:48:41 UTC

- **PR #56455:** (s0undt3ch) Fix gitpython windows requirement @ 2020-03-27 16:31:57 UTC
  - c5a700e01e Merge pull request #56455 from s0undt3ch/hotfix/gitpython
  - d9791c393f Revert and fix windows requirements
  - 4b573c1c94 Revert "Fix win deps"

- **PR #56446:** (frogunder) 3000.1 releasenotes updates @ 2020-03-24 20:28:23 UTC
  - 7ba36325d9 Merge pull request #56446 from frogunder/releasenotes_3000.1_updates
  - 6b47f474af 3000.1 releasenotes updates

- **PR #56435:** (twangboy) Update mac build scripts @ 2020-03-24 19:47:40 UTC
  - 4d2bc7004d Merge pull request #56435 from twangboy/update_mac_build_scripts
  - 5d24f0aa6 Merge branch 'master' into update_mac_build_scripts
  - 8fd52a243 Update gitpython to 2.1.15
  - afcedc5232 Remove --ignore-installed
  - e6cc2a6192 Separate pyobjc requirements
  - 262ad2e98a Compile static requirements
  - 224f72d0f2 Update noxfile and .precommit
  - 68a36f2e37 Add req_ext.txt
  - 5851a5c2cd Roll back changes, fix dependencies

- **ISSUE #56433:** (Ch3LL) integration.states.test_pip_state.PipStateTest.test_pip_installed_specific_env failing on MAC (refs: #56436)

- **PR #56436:** (Ch3LL) Fix #56433 - test_pip_installed_specific_env @ 2020-03-24 19:47:20 UTC
  - 8a8ae8ebe4 Merge pull request #56436 from Ch3LL/pip_custom_pypip
  - 5565ff96c Merge branch 'master' into pip_custom_pypip

- **PR #56423:** (Ch3LL) Update changelog with package fixes @ 2020-03-24 16:42:17 UTC
  - 3a993d73a9 Merge pull request #56423 from Ch3LL/changelog_again
  - 963c16e1a7 update pr number for mac build changes in changelog
  - 83e22b77c7 Update changelog with package fixes

- **PR #56417:** (twangboy) Update mac build scripts @ 2020-03-23 18:45:34 UTC
  - d2a5bd8add Merge pull request #56417 from twangboy/update_mac_build_scripts
  - 3bd8dd82 Update noxfile and pre-commit
  - de8c52d66 Merge branch 'update_mac_build_scripts' of https://github.com/twangboy/salt into update_mac_build_scripts
    - e7f08d5349 Update static requirements
    - a53977de5b Merge branch 'update_mac_build_scripts' of github.com:twangboy/salt into update_mac_build_scripts
    - 04e5de9dd pkg/osx/req_ext.txt no longer exists
- be4a272d07 Update static requirements
  - 02df4119c Add pyobjc in its own requirements file
  - 6b2ac2be64 Remove pyobjc, enforce pip install location
  - 30ca5d04ec Remove cryptography, it gets installed by pyopenssl
  - fda8abf4a8 Update static requirements
  - 732ecc83c1 Update pre-commit config
  - 1fa9864e3d Don’t set a version for pyopenssl
  - 461b198978 Update dependencies, remove req_ext.txt

- **PR #56418**: (Ch3LL) Ensure version.py included before we install @ 2020-03-23 18:27:46 UTC
  - 74575a6993 Merge pull request #56418 from Ch3LL/egg_version
  - 85d7c784ef Fix integration setup egg test
  - a8a22a4040 Ensure version.py included before we install
  - 86fe450c82 Fix #56433 - test_pip_installed_specific_env

- **PR #56403**: (frogunder) update 3000.1 releasenotes @ 2020-03-17 23:50:21 UTC
  - 249367b462 Merge pull request #56403 from frogunder/update_releasenotes_3000.1
  - 9d97c96e8 update 3000.1 releasenotes

- **PR #56398**: (Ch3LL) Add additional PRs to 3000.1 changelog @ 2020-03-17 18:08:15 UTC
  - 0de5c1e136 Merge pull request #56398 from Ch3LL/change_3000.1
  - 79c337b3db Add additional PRs to 3000.1 changelog

- **PR #56376**: (twangboy) Fix win deps @ 2020-03-17 17:02:46 UTC
  - 5ac09dec9b9 Merge pull request #56376 from twangboy/fm_win_deps
  - 6c83beeb9e Fix win deps

- **PR #56378**: (Ch3LL) Include _version.py if building wheel @ 2020-03-17 17:01:33 UTC
  - e72a8d2cbc Merge pull request #56378 from Ch3LL/wheel_version
  - 22cccd2107 Use virtualenv test helper that already exists and fix setup.py
  - 293b1fdd2 cleanup code
  - ddfb065bfb add bdist_wheel test
  - fceff0287c ensure name is included in new version
  - 0cbf6d3246 Ensure SaltStackVersion attributes in _version.py correct
  - 39cf5382d Include _version.py if building wheel

- **PR #56387**: (bryceml) update gpg key expiration date @ 2020-03-17 16:59:30 UTC
  - 6a9326fb70 Merge pull request #56387 from bryceml/update_gpg_key
  - b74b26ccf3 update gpg key expiration date

- **PR #55822**: (cmcmarrow) fix Indefinitely_code @ 2020-03-16 17:34:11 UTC
  - fce692c4a Merge pull request #55822 from cmcmarrow/win_task_repeat
  - e257fb2804 Merge branch ‘master’ into win_task_repeat
- 07cad0f8f Merge branch 'master' into win_task_repeat
- 4b80301338 Merge branch 'master' into win_task_repeat
- 9df94569c4 Merge branch 'master' into win_task_repeat
- 2a2d0b9ec Merge branch 'master' into win_task_repeat
- dee9c134e7 Merge branch 'master' into win_task_repeat
- bea05d514 Update test_win_task.py
- 6e923f75fc Merge branch 'master' into win_task_repeat
- 5839da81ee add test
- 2aa6338ed0 fix Indefinitely code

- **PR #56373**: (frogunder) update 3000.1 releasenotes @ 2020-03-13 18:58:43 UTC
  - c11ef89200 Merge pull request #56373 from frogunder/releasenotes_3000.1
  - a5ca8b5277 Fix doc test errors
  - 47e483187e update 3000.1 releasenotes

- **PR #56365**: (Ch3LL) Update 3000.1 changelog @ 2020-03-13 17:21:02 UTC
  - 62857a9f0e Merge pull request #56365 from Ch3LL/changelog_3000.1
  - 851d7d8fc7 Update 3000.1 changelog

- **PR #56360**: (Ch3LL) Use virtualenv 20.0.10 for macosx tests @ 2020-03-13 16:39:57 UTC
  - a660e96fb2 Merge pull request #56360 from Ch3LL/mac_virtual
  - abda125086 Update static requirements files
  - dca3390c0c skip zcbuildout state test when virtualenv 20.0.0
  - fdeae1f0e1 Use virtualenv 20.0.10 for macosx tests

- **ISSUE #56324**: (kiemlicz) Cannot use Saltcheck module (refs: #56327)

- **PR #56327**: (mchugh19) keep cache_copied_files variable a list @ 2020-03-13 16:39:32 UTC
  - d8fc07274c Merge pull request #56327 from mchugh19/56324
  - e1e2d2b1d Merge branch 'master' into 56324
  - 6d7572706d use includes for saltcheck integration test
  - 5b7073001d keep cache_copied_files variable a list

- **PR #56023**: (cmcmarrow) add fix for bin_env @ 2020-03-13 16:39:09 UTC
  - 2d31d61ab9 Merge pull request #56023 from cmcmarrow/binary_fix_pip_bin_env
  - f780fd013e Merge branch 'master' into binary_fix_pip_bin_env
  - d642c7c270 Merge branch 'master' into binary_fix_pip_bin_env
  - 82b39d26f8 Merge branch 'binary_fix_pip_bin_env' of https://github.com/cmcmarrow/salt into binary_fix_pip_bin_env
    - a5fa22528a Merge branch 'master' into binary_fix_pip_bin_env
  - 10ca0fa5d6 fix space
  - 22fff6c180 fix _pip_bin_env
- d5425e6630 Merge branch ‘master’ into binary_fix_pip_bin_env
- ceda3fde00 add full support for when missing kwargs or args
- cf4ab215b5 add fix for bin_env

**PR #56310**: (twangboy) Only process ADMX files when loading policies @ 2020-03-11 23:47:50 UTC
- 19bb6aae0c Merge pull request #56310 from twangboy/fix_lgpo_admx
- 4bc5b05586 Fix some lint
- ce282f9754 Mark destructive test
- 8af09c31ca Add test case
- 547d35cf4c Only process ADMX files when loading policies

**PR #56272**: (twangboy) Properly resolve the policy name @ 2020-03-11 22:11:02 UTC
- 2d78931eaf Merge pull request #56272 from twangboy/fix_lgpo_names
- 233ed12472 Add comments to helper function
- a7369e41d7 Remove redundant code... some more
- 1db052b94 Consolidate duplicate code
- b25b56299d Fix failing PY2 tests
- 36a24ac28f Only load adml data once
- bc13be6850 Add some tests
- 2e9be6e461 Properly resolve the policy name

**PR #56358**: (s0undt3ch) Fix version instantiation when minor is an empty string @ 2020-03-11 22:10:04 UTC
- c6c6e2e3d9 Merge pull request #56358 from s0undt3ch/hotfix/version-parsing
- cb22e78502 Fix version instantiation when minor is an empty string

**PR #56160**: (twangboy) Fix issue with existing reg_dword entries @ 2020-03-11 22:09:21 UTC
- b33047c574 Merge pull request #56160 from twangboy/fix_reg_dword
- 80650c2a8c Make test more explicit
- 67dd1c18c7 Fix issue with existing reg_dword entries

**PR #56337**: (twangboy) Handle Adapter Type 53 and Undefined Types @ 2020-03-11 22:08:19 UTC
- 8f23706871 Merge pull request #56337 from twangboy/fix_win_network_type
- 18a31a0b22 Merge branch ‘master’ into fix_win_network_type
- d92914ad91 Merge branch ‘master’ into fix_win_network_type
- 224629bdeb Handle Adapter Type 53 and Undefined Types

**PR #56060**: (twangboy) Fix regex string for "**Del and **DelVals @ 2020-03-11 22:05:43 UTC
- e551ff6a31 Merge pull request #56060 from twangboy/fix_lgpo_regex
- ca260ef582 Use byte-strings in the test
- 7c81874a5b Add some tests
- 944b022f33 Fix regex string for "**Del and **DelVals

**ISSUE #56131**: (thusoy) Salt v3000 crashes with unless clause if pip is missing (refs: #56215)
• PR #56215: (dwoz) Fix for unless requisite when pip is not installed @ 2020-03-11 22:04:30 UTC
  - c9bc9431c1 Merge pull request #56215 from dwoz/issue-56131
  - 5dd8f8eabe Fix linter
  - 7492c2f7c7 Remove crufty prints from test
  - 8ceaa66f3 Only remove pip related modules
  - 69b21e5e68 Add regression test for issue 56131
  - 9d23f55adc Fix for unless requisite when pip is not installed

• PR #56339: (twangboy) Fix win_dns_client when used with scheduler @ 2020-03-11 22:01:32 UTC
  - 74b67ea741 Merge pull request #56339 from twangboy/fix_win_dns_client
  - d6a4fbeb85d Fix bad test (lint)
  - 47bd67373f Add some tests
  - 995975649a Add missing import, improve docs

• ISSUE #56288: (lorenzogordon) win_lgpo: lgpo.set with secedit policy always generates KeyError: u'lgpo.secedit_data' (refs: #56290)

• PR #56290: (lorenzogordon) Ensures popping lgpo.secedit_data does not throw KeyError @ 2020-03-11 17:27:04 UTC
  - 7701e8762d Merge pull request #56290 from lorenzogordon/pop-secdata
  - 62453bb6ce Merge branch 'master' into pop-secdata
  - 95d5eca9ff Merge branch 'master' into pop-secdata
  - 2979158a8b Tests the if _secedits: logic path in lgpo.set_
  - d1f776178c Ensures popping lgpo.secedit_data does not throw KeyError

• ISSUE #56119: (finalduty) Release notes for v3000 do not mention changes to slspath variable (refs: #56341)

• PR #56341: (dwoz) Revert "Don't remove one directory level from slspath" @ 2020-03-11 17:03:33 UTC
  - 84c60708cd Merge pull request #56341 from dwoz/issue-56119
  - afe6e84c36 Clarify slspath documentation
  - 6dfc098fd1 Add debug for test asserts
  - 9fa9dab8b2 Fix linter warts
  - fd702bdd44 Add regression test for #56119
  - 3d3b673ec Revert "Don't remove one directory level from slspath"

• PR #56185: (terminalmage) Fix regression in service states with reload argument @ 2020-03-11 16:45:58 UTC
  - 4f9813a94c Merge pull request #56185 from terminalmage/issue56167
  - 65b3f4c9a0 Merge branch 'master' into issue56167
  - 7b41a00b4f Merge branch 'master' into issue56167
  - 8f7034d964 Merge branch 'master' into issue56167
  - e9fb634e1 Skip on OSX for now
  - 5996280241 Add _opts__ and _grains__ just in case
  - af3e841d08 Fix failing test

30.2. Previous Releases 4435
- 586f21aedc Add functional test
- 1af9c10f0 Fix regression in service states with reload argument

- **PR #56068**: (s0undt3ch) Update the bootstrap script to latest version, v2020.02.24 @ 2020-03-11 16:44:23 UTC
  - 74f8b2a926 Merge pull request #56068 from s0undt3ch/hotfix/update-bootstrap
  - ce83b190ed Merge branch 'master' into hotfix/update-bootstrap
  - ccd231d82d Merge branch 'master' into hotfix/update-bootstrap
  - 88a52f88ff Update the bootstrap script to latest version, v2020.02.24
  - 012fb5bc4b Update the bootstrap script to latest version, v2020.02.04

- **PR #56321**: (oeuftete) Tidy up formatting in boto_secgroup docs @ 2020-03-11 08:14:48 UTC
  - 154257e2e9 Merge pull request #56321 from oeuftete/tidy-boto-secgroup-docs
  - 616f11b33e Merge branch 'master' into tidy-boto-secgroup-docs
  - 412bb4d62d Tidy up formatting in boto_secgroup docs

- **PR #56336**: (Ch3LL) Fix test_issue_2594_non_invalidated_cache test (update zope.interface) @ 2020-03-11 00:08:43 UTC
  - 11d33e3d90 Merge pull request #56336 from Ch3LL/fix_56330
  - bbf37e090b Fix test_issue_2594_non_invalidated_cache test (update zope.interface)

- **PR #56346**: (frogunder) Update man pages to 3000.1 @ 2020-03-11 00:07:31 UTC
  - a640fd30fc Merge pull request #56346 from frogunder/man_pages_3000_1
  - 6d7c1b6482 Update man pages to 3000.1

- **PR #56099**: (s0undt3ch) Fix Windows and macOS requirements handling in setup.py @ 2020-03-11 00:04:37 UTC
  - 2f783d247e Merge pull request #56099 from s0undt3ch/hotfix/requirements
  - c19f4a3fae Merge branch 'master' into hotfix/requirements
  - 1e7be8f8e8f Also take into account macOS requirements
  - 7ee1f1952f Also include req_win.txt

- **PR #56218**: (raddessi) Changed StrictVersion checking of setuptools to LooseVersion @ 2020-03-10 23:59:54 UTC
  - 7c4d879073 Merge pull request #56218 from raddessi/master.v3000-conda
  - 44556f6d57 Merge branch 'master' into master.v3000-conda
  - 566c3ba786 Merge branch 'master' into master.v3000-conda
  - 82773a9799 Removed now-unused StrictVersion import from setup.py
  - 31bb507cd1 Changed StrictVersion checking of setuptools to LooseVersion

- **PR #56128**: (waynew) Update CHANGELOG with release date and unreleased. @ 2020-03-10 23:58:15 UTC
  - acbd3556e5 Merge pull request #56128 from waynew/master
  - e3216db3e5 Update CHANGELOG with release date and unreleased.

- **PR #55937**: (twangboy) Update windows build scripts @ 2020-03-10 23:55:55 UTC
  - 12140545ab Merge pull request #55937 from twangboy/update_deps
- f00a504a48 Add back the pylauncher
- 30b9c32356 Revert changes to req and req_win
- 98dce970c Fix some warts in the build_env scripts
- 8404141f65 Update dependencies

- **PR #55906**: (sjorge) smartos.vm_present could not handle nics with vrrp_vrid property @ 2020-03-10 23:54:44 UTC
  - 485a47cdf1 Merge pull request #55906 from sjorge/smartos_vrrp
  - 5bd7dd009a Merge branch 'master' into smartos_vrrp
  - f77719c179 smartos state should handle vrrp config

- **ISSUE #55185**: (sjorge) salt.modules.pdbedit doesn't work on samba older than 4.8 (refs: #55894)

- **PR #55894**: (sjorge) #55185 pdbedit module should check for version 4.8.x or newer @ 2020-03-10 23:54:21 UTC
  - 1fa855360 Merge pull request #55894 from sjorge/pdbedit_55185
  - 5bd7dd009a Merge branch 'master' into pdbedit_55185

- **ISSUE #56195**: (loren gordon) Windows: Using inline powershell in args with cmd.script and shell: powershell (refs: #56197)

- **PR #56197**: (loren gordon) Allows use of inline powershell for cmd.script args @ 2020-03-10 23:52:47 UTC
  - 3e57d58db2 Merge pull request #56197 from loren gordon/file-or-no-file
  - fcd1699f5e Allows use of inline powershell for cmd.script args
  - be2e67c0a0 Tests that powershell processes inline powershell in args

- **ISSUE #53152**: (jbeaird) daily highstate fails after 2019.2 upgrade (refs: #56149)

- **PR #56149**: (gareth greenaway) [master] Fix to scheduler for use of when and splay @ 2020-03-10 23:52:16 UTC
  - 547c73e4cc Merge pull request #56149 from garethgreenaway/53152_fix_schedule_when_splay
  - 8f068f6f9b Fix for when using a combination of when and splay. Previously comparing the wrong value when determining if the job should be run and next_fire_time updated. This resulted in multiple job runs when when and splay were used together. Code updated and test updated to ensure only one run at the specific time. Skip eval tests is dateutil.parser is unavailable.

- **PR #56345**: (s0undt3ch) Bump Windows Py3 builds timeout to 10 hours @ 2020-03-10 20:43:41 UTC
  - 192ce76a95 Merge pull request #56345 from s0undt3ch/hotfix/win-py3-timeouts
  - 11bd358a3 Bump Windows 2019 Py3 builds timeout to 10 hours

- **PR #55888**: (s0undt3ch) Disable codecov PR comments and status checks @ 2020-03-10 15:45:52 UTC
  - a204906c80 Merge pull request #55888 from s0undt3ch/hotfix/coverage-reporting
  - 4b8dc8a586 Disable codecov PR comments and status checks
  - cb0f4df8f7 Apply the suggestion given by the codecov team

- **ISSUE #56177**: (jodok) mysql states fail because conv is `'' instead of None (refs: #56174)

- **ISSUE #56170**: (jeffdyke) mariadb socket access must be enabled before highstate - salt 3K still tries empty password (refs: #56174)

- **ISSUE #56124**: (ymasson) MySQL state and module broken after upgrade to 3000 (refs: #56174)

- **PR #56174**: (gareth greenaway) [master] MySQL module fixes @ 2020-03-10 04:03:23 UTC
- 3e913631bb Merge pull request #56174 from garethgreenaway/56124_mysql_module_state_fixes
- fcc061368b Removing quotes from the plugin_status query. Updating tests to reflect changes.
- 3dc66393b2 Adding better error reporting around plugins. Updating tests. Only attempt to delete a user if they exist.
- 1337da1e4e Ensure _mysql_user_exists is using auth_socket. Updating mysql and mariadb chpass functions to ensure that the respective plugins are enabled before attempting to use them.
- 34995ba4e8 Reworking the unix_socket code to support the differences between MySQL and MariaDB. Adding some functions to install, remove, and check the status of plugins which we can then use when adding users which will use the unix_socket & auth_socket plugins. Adding additional tests for these new functions as well as test to ensure the correct SQL is being generated when using passwordless and unix_socket options.
- 5bfd67c13e Minor tweak to mysql module. Fixing failing tests.
- e871a3fd1 Various fixes to the mysql module to break out the handling of user management into different functions based on MySQL variant.

- **ISSUE #56063**: (terminalmage) [master] Traceback in esxi grain module on import (refs: #56094)
- **PR #56094**: (dwoz) Fix type error in TornadoImporter @ 2020-03-10 01:39:08 UTC
  - 211c88bfbc Merge pull request #56094 from dwoz/fix_56063
  - 7b1632e8e3 Fix type error in TornadoImporter
- **PR #56172**: (Ch3LL) Only change mine data if using new allow_tgt feature @ 2020-03-10 01:34:27 UTC
  - fb5252fc53 Merge pull request #56172 from Ch3LL/mine_g
  - f4c9c2a5cf Fix docs
  - 6c914ae8c8 Use different targeting for windows/linux
  - f6348127dc Only change mine data if using new allow_tgt feature

- **ISSUE #56121**: (githubcdr) salt-minion broken after upgrade to 3000 (refs: #56143)
- **ISSUE #51854**: (Oloremo) Fluorine: minion_pillar_cache: True leads to exception (refs: #56143, #52195)
- **PR #56143**: (waynew) Use encoding when caching pillar data @ 2020-03-10 01:33:37 UTC
  - PR #52195: (waynew) Use encoding when caching pillar data (refs: #56143)
  - 8a8e9c9c5f Merge pull request #56143 from waynew/51854-minion-pillar-cache-exception
  - 58c9a488a3 Merge branch 'master' into 51854-minion-pillar-cache-exception
- **PR #56082**: (Ch3LL) Fix saltversioninfo grain for new version @ 2020-03-10 01:32:11 UTC
  - 9f27caad70 Merge pull request #56082 from Ch3LL/ver_grains
  - e6abed631b ensure_full_info/noc_info work with new versioning
  - bcc520cc4 Add saltversioninfo grains test
  - 510ec1b87 Fix saltversioninfo grain for new version
- **PR #56285**: (UtahDave) Add missing colon. @ 2020-03-09 22:22:17 UTC
  - 602ff3b9f1 Merge pull request #56285 from UtahDave/fix_f5_doc
  - 1034013831 Add missing colon.
- **PR #56333**: (Ch3LL) add pylint ignore in django returner @ 2020-03-09 20:42:42 UTC
Version 3000.2 is a CVE-fix release for 3000.

Security Fix

CVE-2020-11651

An issue was discovered in SaltStack Salt before 2019.2.4 and 3000 before 3000.2. The salt-master process ClearFuncs class does not properly validate method calls. This allows a remote user to access some methods without authentication. These methods can be used to retrieve user tokens from the salt master and/or run arbitrary commands on salt minions.

CVE-2020-11652

An issue was discovered in SaltStack Salt before 2019.2.4 and 3000 before 3000.2. The salt-master process ClearFuncs class allows access to some methods that improperly sanitize paths. These methods allow arbitrary directory access to authenticated users.
Known Issue

Part of the fix for CVE-2020-11651 added better validation of the methods allowed to be called by remote clients. Both AESFuncs and ClearFuncs now have an explicit list of methods that can be called. The name of one of these whitelisted methods on AESFuncs had a typo. The _minion_runner method should be minion_runner (without the underscore prefix). This typo breaks the publish module’s runner method. Calling runners, for example:

```
salt minion publish.runner manage.down
```

Will not work, and you will receive an empty reply from the salt master.

This will be addressed in the 3001 release of Salt set for mid-June 2020.

30.2.21 Salt 3000.3 Release Notes

Version 3000.3 is a bug-fix release for 3000.

30.2.22 Salt 3000.4 Release Notes

Version 3000.4 is a CVE fix release for 3000.

Fixed

- Prevent shell injections in netapi ssh client (cve-2020-16846)
- Prevent creating world readable private keys with the tls execution module. (cve-2020-17490)
30.2.23 Salt 3000.5 Release Notes

Version 3000.5 is a CVE fix release for 3000.

Fixed

• Properly validate eauth credentials and tokens along with their ACLs. Prior to this change eauth was not properly validated when calling Salt ssh via the salt-api. Any value for 'eauth' or 'token' would allow a user to bypass authentication and make calls to Salt ssh. (CVE-2020-25592)

30.2.24 Salt 3000.6 Release Notes

Version 3000.6 is a bugfix release for 3000.

Fixed

• Fixes salt-ssh authentication when using tty (#58922)

30.2.25 Salt 3000.7 Release Notes

Version 3000.7 is a CVE fix release for 3000.

Fixed

• CVE-2020-28243 - Fix local privilege escalation in the restartcheck module.
• CVE-2020-28972 - Ensure authentication to vcenter, vsphere, and esxi server validates the SSL/TLS certificate by default. If you want to skip SSL verification you can use verify_ssl: False.
• CVE-2020-35662 - Ensure the asam runner, qingcloud, splunk returner, panos proxy, cimc proxy, zenoss module, esxi module, vsphere module, glassfish module, bigip module, and keystone module validate SSL by default. If you want to skip SSL verification you can use verify_ssl: False.
• CVE-2021-3148 - Fix a command injection in the Salt-API when using the Salt-SSH client.
• CVE-2021-3144 - Fix eauth tokens can be used once after expiration
• CVE-2021-25281 - Fix salt-api so it honors eauth credentials for the wheel_async client.
• CVE-2021-25282 - Fix the salt.wheel.pillar_roots.write method so it is not vulnerable to directory traversal.
• CVE-2021-25283 - Fix the jinja render to protect against server side template injection attacks.
• CVE-2021-25284 - Fix cmdmod so it will not log credentials to log levels info and error.
• CVE-2021-3197 - Fix ssh client to remove ProxyCommand from arguments provided by cli and netapi.
30.2.26 Salt 3000.8 Release Notes

Version 3000.8 is a bug fix release for 3000.

Fixed

- Fix runners that broke when patching for CVE-2021-25281
- Fix issue with runners in SSE

Known Issue

When using the Salt-API with the SSH client some of the SSH options are not working currently and will be fixed in an upcoming bug fix release. We are currently testing and fixing which options still need to be fixed, but have confirmed the following ones do not work in this release: extra-filerefs, pre-flight. This does not impact normal Salt-SSH usage on the cli.

30.2.27 Salt 3000.9 Release Notes

Version 3000.9 is a bug fix release for 3000.

Fixed

- Allow "extra_filerefs" as sanitized kwargs for SSH client. Fix regression on "cmd.run" when passing tuples as cmd. (#59664)
- Allow all ssh kwargs as sanitized kwargs for SSH client. (#59748)
- Fix argument injection bug in restartcheck.restartcheck. This change hardens the fix for CVE-2020-28243.

30.2.28 Salt 2019.2.0 Release Notes - Codename Fluorine

Python 2.7 Deprecation

In light of Python 2.7 reaching its End of Life (EOL) on Jan 1st 2020, Python 2 will be deprecated from SaltStack no earlier than the 3001 release, that is either the 3001 release or a later release. This decision is pending further community discussion.

Known Issues

The following are known issues for the 2019.2.0 release and will be fixed for 2019.2.1:

- #51699
Non-Backward-Compatible Change to YAML Renderer

In earlier releases, this was considered valid usage in Python 2, assuming that `data` was a list or dictionary containing keys/values which are `unicode` types:

```
/etc/foo.conf:
  file.managed:
    - source: salt://foo.conf.jinja
    - template: jinja
    - context:
      data: {{ data }}
```

One common use case for this is when using one of Salt's `custom Jinja filters` which return lists or dictionaries, such as the `ipv4` filter.

In Python 2, Jinja will render the `unicode` string types within the list/dictionary with the "u" prefix (e.g. `{u'foo': u'bar'}`). While not valid YAML, earlier releases would successfully load these values.

As of this release, the above SLS would result in an error message. To allow for a data structure to be dumped directly into your SLS file, use the `tojson` Jinja filter:

```
/etc/foo.conf:
  file.managed:
    - source: salt://foo.conf.jinja
    - template: jinja
    - context:
      data: {{ data|tojson }}
```

Another example where the new filter needs to be used is the following state example:

```
grafana_packages:
  pkg.installed:
    - names: {{ server.pkgs }}
```

This will fail when `pkgs` is a list or dictionary. You will need to update the state:

```
grafana_packages:
  pkg.installed:
    - names: {{ server.pkgs|tojson }}
```

This test case has also been tested with the `yaml` and `json` filters successfully.

**Note:** This filter was added in Jinja 2.9. However, fear not! The 2018.3.3 release added a `tojson` filter which will be used if this filter is not already present, making it available on platforms like RHEL 7 and Ubuntu 14.04 which provide older versions of Jinja.

**Important:** The `json_encode_dict` and `json_encode_list` filters do not actually dump the results to JSON. Since `tojson` accomplishes what those filters were designed to do, they are now deprecated and will be removed in the 3000 release. The `tojson` filter should be used in all cases where `json_encode_dict` and `json_encode_list` would have been used.
Ansible Playbook State and Execution Modules

Along with the including the `ansible` modules in the Oxygen release, running playbooks has been added in 2019.2.0 with the `playbooks` function. This also includes an `ansible playbooks state module` which can be used on a targeted host to run ansible playbooks, or used in an orchestration state runner.

```yaml
install nginx:
  ansible.playbooks:
    - name: install.yml
    - git_repo: git://github.com/gtmanfred/playbook.git
    - git_kwargs:
      rev: master
```

The playbooks modules also includes the ability to specify a git repo to clone and use, or a specific directory can to used when running the playbook.

Network Automation

Beginning with this release, Salt provides much broader support for a variety of network operating systems, and features for configuration manipulation or operational command execution.

NetBox

Added in the previous release, 2018.3.0, the capabilities of the `netbox` Execution Module have been extended, with a much longer list of available features:

- `netbox.create_circuit`
- `netbox.create_circuit_provider`
- `netbox.create_circuit_termination`
- `netbox.create_circuit_type`
- `netbox.create_device`
- `netbox.create_device_role`
- `netbox.create_device_type`
- `netbox.create_interface`
- `netbox.create_interface_connection`
- `netbox.create_inventory_item`
- `netbox.create_ipaddress`
- `netbox.create_manufacturer`
- `netbox.create_platform`
- `netbox.create_site`
- `netbox.delete_interface`
- `netbox.delete_inventory_item`
- `netbox.delete_ipaddress`
- `netbox.get_circuit_provider`
- `netbox.get_interfaces`
- `netbox.get_ipaddresses`
- `netbox.make_interface_child`
- `netbox.make_interface_lag`
- `netbox.openconfig_interfaces`
- `netbox.openconfig_lacp`
- `netbox.update_device`
- `netbox.update_interface`

Besides this Execution Module, Salt users can load data directly from NetBox into the device Pillar, via the `netbox` External Pillar module.

**Netmiko**

*Netmiko*, the multi-vendor library to simplify Paramiko SSH connections to network devices, is now officially integrated into Salt. The network community can use it via the `netmiko` Proxy Module or directly from any Salt Minions, passing the connection credentials - see the documentation for the `netmiko` Execution Module.

**Arista**

Arista switches can now be managed running under the `pyeapi` Proxy Module, and execute RPC requests via the `pyeapi` Execution Module.

**Cisco Nexus**

While support for SSH-based operations has been added in the release codename Carbon (2016.11), the new `nxos_api` Proxy Module and `nxos_api` allow management of Cisco Nexus switches via the NX-API.

It is important to note that these modules don’t have third party dependencies, therefore they can be used straight away from any Salt Minion. This also means that the user may be able to install the regular Salt Minion on the Nexus switch directly and manage the network devices like a regular server.

**General-purpose Modules**

The new `ciscoconfparse` Execution Module can be used for basic configuration parsing, audit or validation for a variety of network platforms having Cisco IOS style configuration (one space indentation), as well as brace-delimited configuration style.

The `iosconfig` can be used for various configuration manipulation for Cisco IOS style configuration, such as: `configuration cleanup`, `tree representation of the config`, etc.
NAPALM

Commit At and Commit Confirmed

Beginning with this release, NAPALM users are able to execute scheduled commits (broadly known as "commit at") and "commit confirmed" (revert the configuration change unless the user confirms by running another command). These features are available via the commit_in, commit_at, revert_in, or revert_at arguments for the net.load_config and net.load_template execution functions, or netconfig.managed.

The counterpart execution functions net.confirm_commit, or net.cancel_commit, as well as the State functions netconfig.commit_cancelled, or netconfig.commit_confirmed can be used to confirm or cancel a commit.

Please note that the commit confirmed and commit cancelled functionalities are available for any platform whether the network devices supports the features natively or not. However, be cautious and make sure you read and understand the caveats before using them in production.

Multiple Templates Rendered Simultaneously

The template_name argument of the net.load_template Execution and netconfig.managed State function now supports a list of templates. This is particularly useful when a very large Jinja template is split into multiple smaller and easier to read templates that can eventually be reused in other States. For example, the following syntax is not correct to manage the configuration of NTP and BGP simultaneously, using two different templates and changing the device configuration through one single commit:

```
manage_bgp_and_ntp:
  netconfig.managed:
    - template_name:
      - salt://templates/bgp.jinja
      - salt://templates/ntp.jinja
    - context:
      bpg: {{ pillar.bgp }}
      ntp: {{ pillar.ntp }}
```

Connection Re-establishment on Demand

Beginning with this release, any NAPALM command executed when running under a NAPALM Proxy Minion supports the force_reconnect magic argument.

Proxy Minions generally establish a connection with the remote network device at the time of the Minion startup and that connection is going to be used forever.

If one would need to execute a command on the device but is connecting using different parameters (due to various causes, e.g., unable to authenticate the user specified in the Pillar as the authentication system - say TACACS+ is not available, or the DNS resolver is currently down and would like to temporarily use the IP address instead, etc.), it implies updating the Pillar data and restarting the Proxy Minion process restart. In particular cases like that, you can pass the force_reconnect=True keyword argument, together with the alternative connection details, to enforce the command to be executed over a separate connection.

For example, if the usual command is `salt '*' net.arp`, you can use the following to connect using a different username instead:

```
salt '*' net.arp username=my-alt-usr force_reconnect=True
```
The same goes with any of the other configuration arguments required for the NAPALM connection - see NAPALM proxy documentation.

**Configuration Replace Features**

To replace various configuration chunks, you can use the new `net.replace_pattern` execution function, or the `netconfig.replace_pattern` State function. For example, if you want to update your configuration and rename a BGP policy referenced in many places, you can do so by running:

```
salt '*' net.replace_pattern OLD-POLICY-CONFIG new-policy-config
```

Similarly, you can also replace entire configuration blocks using the `net.blockreplace` function.

**Configuration Save Features**

The `net.save_config` function can be used to save the configuration of the managed device into a file. For the State subsystem, the `netconfig.saved` function has been added which provides a complete list of facilities when managing the target file where the configuration of the network device can be saved.

For example, backup the running configuration of each device under its own directory tree:

```
/var/backups/{{ opts.id }}/running.cfg:
  netconfig.saved:
    - source: running
    - makedirs: true
```

All the new network automation modules mentioned above are directly exposed to the NAPALM users, without requiring any architectural changes, just eventually install some requirements:

**Junos**

The features from the existing junos Execution Module are available via the following functions:

- `napalm.junos_cli`: Execute a CLI command and return the output as text or Python dictionary.
- `napalm.junos_rpc`: Execute an RPC request on the remote Junos device, and return the result as a Python dictionary, easy to digest and manipulate.
- `napalm.junos_install_os`: Install the given image on the device.
- `napalm.junos_facts`: The complete list of Junos facts collected by the junos-eznc underlying library.

**Note**: To be able to use these features, you must ensure that you meet the requirements for the junos module. As junos-eznc is already a dependency of NAPALM, you will only have to install jxmlease.

Usage examples:

```
salt '*' napalm.junos_cli 'show arp' format=xml
salt '*' napalm.junos_rpc get-interface-information
```
Netmiko

The features from the newly added `netmiko` Execution Module are available as:

- `napalm.netmiko_commands`: Execute one or more commands to be execute on the remote device, via Netmiko, and return the output as a text.

- `napalm.netmiko_config`: Load a list of configuration command on the remote device, via Netmiko. The commands can equally be loaded from a local or remote path, and passed through Salt's template rendering pipeline (by default using Jinja as the template rendering engine).

Usage examples:

```bash
salt '*' napalm.netmiko_commands 'show version' 'show interfaces'
```

Arista pyeapi

For various operations and various extension modules, the following features have been added to gate functionality from the `pyeapi` module:

- `napalm.pyeapi_run_commands`: Execute a list of commands on the Arista switch, via the `pyeapi` library.

- `napalm.pyeapi_config`: Configure the Arista switch with the specified commands, via the `pyeapi` Python library. Similarly to `napalm.netmiko_config`, you can use both local and remote files, with or without templating.

Usage examples:

```bash
salt '*' napalm.pyeapi_run_commands 'show version' 'show interfaces'
salt '*' napalm.pyeapi_config config_file=salt://path/to/template.jinja
```

Cisco NX-API

In the exact same way as above, the user has absolute control by using the following primitives to manage Cisco Nexus switches via the NX-API:

- `napalm.nxos_api_show`: Execute one or more show (non-configuration) commands, and return the output as plain text or Python dictionary.

- `napalm.nxos_api.rpc`: Execute arbitrary RPC requests via the Nexus API.

- `napalm.nxos_api_config`: Configures the Nexus switch with the specified commands, via the NX-API. The commands can be loaded from the command line, or a local or remote file, eventually rendered using the templating engine of choice (default: Jinja).

Usage examples:

```bash
salt '*' napalm.nxos_api_show 'show bgp sessions' 'show processes' raw_text=False
```
Ciscoconfparse

The following list of function may be handy when manipulating Cisco IOS or Junos style configurations:

- `napalm.config_filter_lines`: Return a list of detailed matches, for the configuration blocks (parent-child relationship) whose parent and children respect the regular expressions provided.

- `napalm.config_find_lines`: Return the configuration lines that match the regular expression provided.

- `napalm.config_lines_w_child`: Return the configuration lines that match a regular expression, having child lines matching the child regular expression.

- `napalm.config_lines_wo_child`: Return the configuration lines that match a regular expression, that don't have child lines matching the child regular expression.

Note: These functions require the `ciscoconfparse` Python library to be installed.

Usage example (find interfaces that are administratively shut down):

```
salt '*' napalm.config_lines_w_child 'interface' 'shutdown'
```

IOSConfig

For Cisco IOS style configuration, the following features have been added to the `napalm` Execution Module:

- `napalm.config_tree`: Transform Cisco IOS style configuration to structured Python dictionary, using the configuration of the interrogated network device.

- `napalm.config_merge_tree`: Return the merge tree of the configuration of the managed network device with a different configuration to be merged with (without actually loading any changes on the device).

- `napalm.config_merge_text`: Return the merge result (as text) of the configuration of the managed network device with a different configuration to be merged with.

- `napalm.config_merge_diff`: Return the merge diff after merging the configuration of the managed network device with a different configuration (without actually loading any changes on the device).

SCP

Reusing the already available connection credentials provided for NAPALM, the following features are now available:

- `napalm.scp_put`: Transfer files and directories to remote network device.

- `napalm.scp_get`: Transfer files and directories from remote network device to the localhost of the Minion.
PeeringDB

The `peeringdb` Execution Module is useful to gather information about other networks you can potentially peer with, and automatically establish BGP sessions, e.g., given just a specific AS number, the rest of the data (i.e., IP addresses, locations where the remote network is available, etc.) is retrieved from PeeringDB, and the session configuration is automated with minimal to no effort (typing the IP addresses manually can be both tedious and error prone).

New Docker Proxy Minion

Docker containers can now be treated as actual minions without installing salt in the container, using the new `docker proxy minion`.

This proxy minion uses the `docker executor` to pass commands to the docker container using `docker.call`. Any state module calls are passed through the corresponding function from the `docker` module.

```yaml
proxy:
  proxytype: docker
  name: keen_proskuriakova
```

Terraform Salt-SSH Roster

You can now dynamically generate a Salt-SSH roster from the terraform resources defined with `terraform-provider-salt`.

This allows you to combine both terraform and Salt-SSH to provision and configure your hosts. See the `terraform roster` for an example on how to setup and use.

Grains Dictionary Passed into Custom Grains

Starting in this release, if a custom grains function accepts a variable named `grains`, the Grains dictionary of the already compiled grains will be passed in. Because of the non-deterministic order that grains are rendered in, the only grains that can be relied upon to be passed in are `core.py` grains, since those are compiled first.

More Precise virtual Grain

This release improves the accuracy of the `virtual` grain when running Salt in a nested virtualization environment (e.g. `systemd-nspawn` container inside a VM) and having `virt-what` installed.

Until now, the `virtual` grain was determined by matching against all output lines of `virt-what` instead of individual items which could lead to not quite precise results (e.g. reporting HyperV inside a `systemd-nspawn` container running within a Hyper-V-based VM).
Configurable Module Environment

Salt modules (states, execution modules, returners, etc.) now can have custom environment variables applied when running shell commands. This can be configured by setting a `system-environment` key either in Grains or Pillar. The syntax is as follows:

```
system-environment:
  <type>
  <module>:
    # Namespace for all functions in the module
    _:
      <key>: <value>
    # Namespace only for particular function in the module
    <function>:
      <key>: <value>
```

- `<type>` would be the type of module (i.e. states, modules, etc.).
- `<module>` would be the module's name.

**Note:** The module name can be either the virtual name (e.g. pkg), or the physical name (e.g. yumpkg).

- `<function>` would be the function name within that module. To apply environment variables to all functions in a given module, use an underscore (i.e. `_`) as the function name. For example, to set the same environment variable for all package management functions, the following could be used:

```
system-environment:
  modules:
    pkg:
      _:
        SOMETHING: for_all
```

To set an environment variable in `pkg.install` only:

```
system-environment:
  modules:
    pkg:
      install:
        LC_ALL: en_GB.UTF-8
```

To set the same variable but only for SUSE minions (which use zypper for package management):

```
system-environment:
  modules:
    zypper:
      install:
        LC_ALL: en_GB.UTF-8
```

**Note:** This is not supported throughout Salt; the module must explicitly support this feature (though this may change in the future). As of this release, the only modules which support this are the following `pkg` virtual modules:

- aptpkg
- yumpkg
- zypper
"Virtual Package" Support Dropped for APT

In APT, some packages have an associated list of packages which they provide. This allows one to do things like run `apt-get install foo` when the real package name is `foo1.0`, and get the right package installed.

Salt has traditionally designated as "virtual packages" those which are provided by an installed package, but for which there is no real package by that name installed. Given the above example, if one were to run a `pkg.installed` state for a package named `foo`, then `pkg.list_pkgs` would show a package version of simply 1 for package `foo`, denoting that it is a virtual package.

However, while this makes certain aspects of package management convenient, there are issues with this approach that make relying on "virtual packages" problematic. For instance, Ubuntu has four different mutually-conflicting packages for `nginx`:

- `nginx-core`
- `nginx-full`
- `nginx-light`
- `nginx-extras`

All four of these provide `nginx`. Yet there is an `nginx` package as well, which has no actual content and merely has dependencies on any one of the above four packages. If one used `nginx` in a `pkg.installed` state, and none of the above four packages were installed, then the `nginx` metapackage would be installed, which would pull in `nginx-core`. Later, if `nginx` were used in a `pkg.removed` state, the `nginx` metapackage would be removed, leaving `nginx-core` installed. The result would be that, since `nginx-core` provides `nginx`, Salt would now see `nginx` as an installed virtual package, and the `pkg.removed` state would fail. Moreover, `nginx` would not actually have been removed, since `nginx-core` would remain installed.

Starting with this release, Salt will no longer support using "virtual package" names in `pkg` states, and package names will need to be specified using the proper package name. The `pkg.list_repo_pkgs` function can be used to find matching package names in the repositories, given a package name (or glob):

```bash
# salt myminion pkg.list_repo_pkgs 'nginx*'
myminion:
    ----------
    nginx:
        - 1.10.3-0ubuntu0.16.04.2
        - 1.9.15-0ubuntu1
    nginx-common:
        - 1.10.3-0ubuntu0.16.04.2
        - 1.9.15-0ubuntu1
    nginx-core:
        - 1.10.3-0ubuntu0.16.04.2
        - 1.9.15-0ubuntu1
    nginx-core-dbg:
        - 1.10.3-0ubuntu0.16.04.2
        - 1.9.15-0ubuntu1
    nginx-doc:
        - 1.10.3-0ubuntu0.16.04.2
        - 1.9.15-0ubuntu1
    nginx-extras:
        - 1.10.3-0ubuntu0.16.04.2
        - 1.9.15-0ubuntu1
    nginx-extras-dbg:
```

(continues on next page)
Alternatively, the newly-added `pkg.show` function can be used to get more detailed information about a given package and help determine what package name is correct:

```bash
# salt myminion pkg.show 'nginx*' filter=description,provides

myminion:

------------------
1.10.3-0ubuntu0.16.04.2:

Description:
nginx web/proxy server (standard version)
Provides:
httpd, httpd-cgi, nginx

1.9.15-0ubuntu1:

Description:
nginx web/proxy server (standard version)
Provides:
Minion Startup Events

When a minion starts up it sends a notification on the event bus with a tag that looks like this: `salt/minion/<minion_id>/start`. For historical reasons the minion also sends a similar event with an event tag like this: `minion_start`. This duplication can cause a lot of clutter on the event bus when there are many minions. Set `enable_legacy_startup_events: False` in the minion config to ensure only the `salt/minion/<minion_id>/start` events are sent.

The new `enable_legacy_startup_events` minion config option defaults to `True`, but will be set to default to `False` beginning with the 3001 release of Salt.

The Salt Syndic currently sends an old style `syndic_start` event as well. The syndic respects `enable_legacy_startup_events` as well.
Failhard changes

It is now possible to override a global failhard setting with a state-level failhard setting. This is most useful in case where global failhard is set to True and you want the execution not to stop for a specific state that could fail, by setting the state level failhard to False. This also allows for the use of onfail*-requisites, which would previously be ignored when a global failhard was set to True. This is a deviation from previous behavior, where the global failhard setting always resulted in an immediate stop whenever any state failed (regardless of whether the failing state had a failhard setting of its own, or whether any onfail*-requisites were used).

Pass Through Options to file.serialize State

This allows for more granular control over the way in which the dataset is serialized. See the documentation for the new serializer_opts and deserializer_opts options in the file.serialize state for more information.

file.patch State Rewritten

The file.patch state has been rewritten with several new features:

- Patch sources can now be remote files instead of only salt:// URLs
- Multi-file patches are now supported
- Patch files can be templated

In addition, it is no longer necessary to specify what the hash of the patched file should be.

New no_proxy Minion Configuration

Pass a list of hosts using the no_proxy minion config option to bypass an HTTP proxy.

**Note:** This key does nothing unless proxy_host is configured and it does not support any kind of wildcards.

```
no_proxy: ['127.0.0.1', 'foo.tld']
```

Changes to slack Engine

The output returned to Slack from functions run using this engine is now formatted using that function's proper outputter. Earlier releases would format the output in YAML for all functions except for when states were run.

Enhancements to wtmp Beacon

A new key, action, has been added to the events fired by this beacon, which will contain either the string login or logout. This will simplify reactors which use this beacon's data, as it will no longer be necessary to check the integer value of the type key to know whether the event is a login or logout.

Additionally, in the event that your platform has a non-standard utmp.h, you can now configure which type numbers indicate a login and logout.

See the wtmp beacon documentation for more information.
Deprecated and Removed Options

API Removed Arguments

Support for LocalClient's expr_form argument has been removed. Please use tgt_type instead. This change was made due to numerous reports of confusion among community members, since the targeting method is published to minions as tgt_type, and appears as tgt_type in the job cache as well.

Those who are using the LocalClient (either directly, or implicitly via a netapi module) need to update their code to use tgt_type.

```python
>>> import salt.client
>>> local = salt.client.LocalClient()
>>> local.cmd("*", "cmd.run", ["whoami"], tgt_type="glob")
{'jerry': 'root'}
```

Minion Configuration Deprecated Option

The master_shuffle configuration option is deprecated as of the 2019.2.0 release. Please use the random_master option instead.

Module Removed Options

- The napalm_network module has been changed as follows:
  - Support for the template_path has been removed from net.load_template function. This is because support for NAPALM native templates has been dropped.

- The pip module has been changed as follows:
  - Support for the no_chown option has been removed from pip.install function.

- The trafficserver module has been changed as follows:
  - The trafficserver.match_var function was removed. Please use trafficserver.match_metric instead.
  - The trafficserver.read_var function was removed. Please use trafficserver.read_config instead.
  - The trafficserver.set_var function was removed. Please use trafficserver.set_config instead.

- The win_update module has been removed. It has been replaced by win_wua.

- The win_wua module has been changed as follows:
  - The win_wua.download_update and win_wua.download_updates functions have been removed. Please use win_wua.download instead.
  - The win_wua.install_update and win_wua.install_updates functions have been removed. Please use win_wua.install instead.
  - The win_wua.list_update function has been removed. Please use functions have been removed. Please use win_wua.get instead.
  - The win_wua.list_updates function has been removed. Please use functions have been removed. Please use win_wua.list instead.
Pillar Removed Option

• The `vault` external pillar has been changed as follows:
  – Support for the `profile` argument was removed. Any options passed up until and following the first `path=` are discarded.

Roster Removed Option

• The `cache` roster has been changed as follows:
  – Support for `roster_order` as a list or tuple has been removed. As of the 2019.2.0 release, `roster_order` must be a dictionary.
  – The `roster_order` option now includes IPv6 in addition to IPv4 for the `private`, `public`, `global` or `local` settings. The syntax for these settings has changed to `ipv4-*` or `ipv6-*`, respectively.

State Removed Modules and Options

• The `docker` state module has been removed
  – In 2017.7.0, the states from this module were split into four separate state modules:
    * `docker_container`
    * `docker_image`
    * `docker_volume`
    * `docker_network`
  – The `docker` module remained, for backward-compatibility, but it has now been removed. Please update SLS files to use the new state names:
    * `docker.running` => `docker_container.running`
    * `docker.stopped` => `docker_container.stopped`
    * `docker.absent` => `docker_container.absent`
    * `docker.network_present` => `docker_network.present`
    * `docker.network_absent` => `docker_network.absent`
    * `docker.image_present` => `docker_image.present`
    * `docker.image_absent` => `docker_image.absent`
    * `docker.volume_present` => `docker_volume.present`
    * `docker.volume_absent` => `docker_volume.absent`

• The `docker_network` state module has been changed as follows:
  – The `driver` option has been removed from `docker_network.absent`. It had no functionality, as the state simply deletes the specified network name if it exists.

• The deprecated `ref` option has been removed from the `git.detached` state. Please use `rev` instead.

• The `k8s` state module has been removed in favor of the `kubernetes` state module. Please update SLS files as follows:
  – In place of `k8s.label_present`, use `kubernetes.node_label_present`
- In place of `k8s.label_absent`, use `kubernetes.node_label_absent`
- In place of `k8s.label_folder_absent`, use `kubernetes.node_label_folder_absent`

- Support for the `template_path` option in the `netconfig.managed <salt.states.netconfig.managed()>` state has been removed. This is because support for NAPALM native templates has been dropped.
- Support for the `no_chown` option in the `pip.installed` state has been removed.
- The `trafficserver.set_var` state has been removed. Please use `trafficserver.config` instead.
- Support for the `no_chown` option in the `virtualenv.managed <salt.states.virtualenv.managed>` function has been removed.
- The `win_update` state module has been removed. It has been replaced by `win_wua`.
- Support for virtual packages has been removed from the `py:mod:pkg state <salt.states.pkg>`.

**Utils Removed Options**

The `cloud` utils module had the following changes:

- Support for the `cache_nodes_ip` function in `salt.utils` module has been removed. The function was incomplete and non-functional.

The `vault` utils module had the following changes:

- Support for specifying Vault connection data within a 'profile' has been removed. Please see the `vault` execution module documentation for details on the new configuration schema.

**Dependency Deprecations**

Salt-Cloud has been updated to use the `pypsexec` Python library instead of the `winexe` executable. Both `winexe` and `pypsexec` run remote commands against Windows OSes. Since `winexe` is not packaged for every system, it has been deprecated in favor of `pypsexec`.

Salt-Cloud has deprecated the use of `impacket` in favor of `smbprotocol`. This changes was made because `impacket` is not compatible with Python 3.

**SaltSSH Major Updates**

SaltSSH now works across different major Python versions. Python 2.7 - Python 3.x are now supported transparently. Requirement is, however, that the SaltMaster should have installed Salt, including all related dependencies for Python 2 and Python 3. Everything needs to be importable from the respective Python environment.

SaltSSH can bundle up an arbitrary version of Salt. If there would be an old box for example, running an outdated and unsupported Python 2.6, it is still possible from a SaltMaster with Python 3.5 or newer to access it. This feature requires an additional configuration in `/etc/salt/master` as follows:

```
ssh_ext_alternatives:
  2016.3:  # Namespace, can be actually anything.
    py-version: [2, 6]  # Constraint to specific interpreter version
    path: /opt/2016.3/salt  # Main Salt installation
    dependencies:
      jinja2: /opt/jinja2
      yaml: /opt/yaml
      tornado: /opt/tornado
```

(continues on next page)
It is also possible to use several alternative versions of Salt. You can for instance generate a minimal tarball using runners and include that. But this is only possible, when such specific Salt version is also available on the Master machine, although does not need to be directly installed together with the older Python interpreter.

SaltSSH now support private key’s passphrase. You can configure it by:

- `--priv-passwd` for salt-ssh cli
- `salt_priv_passwd` for salt master configure file
- `priv_passwd` for salt roster file

**State Module Changes**

**salt State Module (used in orchestration)**

The `test` option now defaults to None. A value of `True` or `False` set here is passed to the state being run and can be used to override a `test: True` option set in the minion's config file. In previous releases the minion’s config option would take precedence and it would be impossible to run an orchestration on a minion with test mode set to True in the config file.

If a minion is not in permanent test mode due to the config file and the 'test' argument here is left as None then a value of `test=True` on the command-line is passed correctly to the minion to run an orchestration in test mode. At present it is not possible to pass `test=False` on the command-line to override a minion in permanent test mode and so the `test: False` option must still be set in the orchestration file.

**event.send State**

The `event.send` state does not know the results of the sent event, so returns changed every state run. It can now be set to return changed or unchanged.

**influxdb_user.present Influxdb User Module State**

The `password` parameter has been changed to `passwd` to remove the name collusion with the influxdb client configuration (`client_kwargs`) allowing management of users when authentication is enabled on the influxdb instance.

Old behavior:

```
influxdb_user.present:
- name: exampleuser
- password: exampleuserpassword
- user: admin
- password: adminpassword
```

New behavior:
```yaml
influxdb_user.present:
  - name: exampleuser
  - passwd: exampleuserpassword
  - user: admin
  - password: adminpassword
```

**winrepo_cache_expire_min** Windows Package Definitions Caching

The `winrepo_cache_expire_min` has been changed from 0 to 1800 (30 minutes) For example if you run highstate the package definitions are normally updated, however now if the package definitions are younger than `winrepo_cache_expire_min` (30 minutes) the package definitions will not be refreshed, reducing the amount of time taken to run a 2nd highstate. To get the old behaviour change the value back to 0 in the minion configuration file. This also effects the behaviour of other functions which default to refresh. The `pkg.refresh_db` will always refresh the package definitions.

**LDAP External Authentication**

**freeipa** `groupattribute` support

Previously, if Salt was using external authentication against a freeipa LDAP system it could only search for users via the `accountattributename` field. This release add an additional search using the `groupattribute` field as well. The original `accountattributename` search is done first then the `groupattribute` allowing for backward compatibility with previous Salt releases.

**Jinja Include Relative Paths**

When a jinja include template name begins with `. /` or `../` then the import will be relative to the importing file.

Prior practices required the following construct:

```jinja
{% from tpldir ~ '/foo' import bar %}
```

A more "natural" construct is now supported:

```jinja
{% from './foo' import bar %}
```

Comparatively when importing from a parent directory - prior practice:

```jinja
{% from tpldir ~ '/../foo' import bar %}
```

New style for including from a parent directory:

```jinja
{% from '../foo' import bar %}
```
salt-api

salt-api Windows support

Previously, salt-api was not supported on the Microsoft Windows platforms. Now it is! salt-api provides a RESTful interface to a running Salt system. It allows for viewing minions, runners, and jobs as well as running execution modules and runners of a running Salt system through a REST API that returns JSON. See Salt-API documentation.

.. _Salt-API: https://docs.saltproject.io/en/latest/topics/netapi/index.html

Logging Changes

Include Job ID (JID) in Minion and Master Logs

The Job ID (JID) can now be optionally included in both the minion and master logs by including jid in either the `log_fmt_console` or `log_fmt_logfile` configuration option:

```
log_fmt_console: "[%(levelname)-8s] %jid %message"
```

This will cause the JID to be included in any log entries that are related to a particular Salt job. The JID will be included using the default format, [JID: %(jid)s] but can be overridden with the `log_fmt_jid` configuration item.

```
log_fmt_jid: "[JID: %(jid)s]"
```

Security

Windows runas changes

A password is no longer required with runas under normal circumstances. The password option is only needed if the minion process is run under a restricted (non-administrator) account. In the aforementioned case, a password is only required when using the runas argument to run command as a different user.

New Modules

Execution Modules

- salt.modules.ciscoconfparse_mod
- salt.modules.jira
- salt.modules.google_chat
- salt.modules.iosconfig
- salt.modules.netmiko
- salt.modules.nxos_api
- salt.modules.peeringdb
- salt.modules.purefb
- salt.modules.pyeapi
Pillar Modules

- netbox

Proxy Modules

- salt.proxy.netmiko
- salt.proxy.nxos_api
- salt.proxy.pyeapi

30.2.29 Salt 2019.2.1 Release Notes

Version 2019.2.1 is a bugfix release for 2019.2.0.

Known Issues

- **ISSUE #54751**: Proxy minion fails to start. Fix planned in 2019.2.2 release.
- **ISSUE #54762**: URIs with IPv6 addresses are broken, preventing master-minion communication in IPv6-only environments. Fix planned in 2019.2.2 release.
- **ISSUE #54776**: Minion fails to start when it contains `ping_interval` in minion configuration file. Fix planned in 2019.2.2 release.
- **ISSUE #54731**: Returners (except for default salt master returner) not loading properly in Py3. Fix planned in 2019.2.2 release.
- **ISSUE #54758**: salt-call state.show_states gives "Passed invalid arguments" error when a sls defined in top.sls file is missing. Fix planned in 2019.2.2 release.
- **ISSUE #54765**: Jinja from import is broken. Fix planned in 2019.2.2 release.
- **ISSUE #54771**: Affects only Debian 10. pkgrepo.managed does not work if used with proxy (configured at salt-minion). No fix date available yet.
- **ISSUE #54759**: Deprecation warnings for pyzmq. No fix date available yet.

Change to YAML Renderer

```yaml
/etc/foo.conf:
  file.managed:
    - source: salt://foo.conf.jinja
    - template: jinja
    - context:
      data: {{ data }}
```

In 2019.2.0, the above SLS will result in an error message following changes to the YAML renderer that now require the new Jinja filter `tojson`.

```yaml
/etc/foo.conf:
  file.managed:
    - source: salt://foo.conf.jinja
    - template: jinja
```

(continues on next page)
In 2019.2.1, we introduce a new configuration option for both the Salt master and Salt minion configurations to be able to support the older YAML renderer. Using the option `use_yamlloader_old` will allow the YAML renderer to function as before.

  - 04e28cf Merge pull request #54409 from dwoz/mm_log
  - e207de6 Point salt-call to correct multi-master configs

- **PR #54396**: (dwoz) Use different logging port for multimaster tests @ 2019-09-03 23:20:23 UTC
  - 2c281e0 Merge pull request #54396 from dwoz/multimasterLogging
  - 104e0a0 Use different logging port for multimaster tests

- **ISSUE #54256**: (sleminov-tc) Empty salt api token file breaks maintenance process. (refs: #54325, #54324, #54388, #54376)

- **ISSUE #37945**: (gstachowiak) Missing exception handling in salt.master.Maintenance. Process never completes. (refs: #54325, #54324, #54388, #54376)

- **PR #54388**: (dwoz) 54256 re fix empty api token 2019.2.1 @ 2019-09-03 23:19:20 UTC
  - **PR #54325**: (waynew) Delete bad API token files (refs: #54388)
  - **PR #54324**: (waynew) Delete bad API token files (refs: #54325, #54388)
  - 730a007 Merge pull request #54388 from dwoz/54256-re-fix-empty-api-token-2019.2.1
  - 80651d3 Fix linter
  - 982ed3d Delete bad API token files

- **ISSUE #54256**: (sleminov-tc) Empty salt api token file breaks maintenance process. (refs: #54325, #54324, #54388, #54376)

- **ISSUE #37945**: (gstachowiak) Missing exception handling in salt.master.Maintenance. Process never completes. (refs: #54325, #54324, #54388, #54376)

- **PR #54376**: (dwoz) Move tokens in place with an atomic operation @ 2019-09-03 20:40:50 UTC
  - 11016ce Merge pull request #54376 from dwoz/tmp_token
  - 0b28c60 Fix linter complaints
  - 8e33343 Move tokens in place with an atomic operation

- **PR #54386**: (twangboy) Fix unit.utils.test_win_dacl (2019.2.1) @ 2019-09-03 16:57:25 UTC
  - 5161203 Merge pull request #54386 from twangboy/fix_test_win_dacl_2019.2.1
  - b8fa7d3 Sort the perms

- **PR #54355**: (s0undt3ch) [2019.2.1] [GitPillar Tests] Have the started processes log instead of just writing to stdout/stderr @ 2019-08-29 23:26:50 UTC
  - b4caaad Merge pull request #54355 from s0undt3ch/hotfix/test-daemons-2019.2.1
  - 561c0a2 Have the started processes log instead of just writing to stdout/stderr

30.2. Previous Releases 4465
- c2a3115 Don't overwritethe stderr logger

- **PR #54353**: (cmcmarrow) adds @skipIf not windows @ 2019-08-29 19:33:11 UTC
  - cc5b109 Merge pull request #54353 from cmcmarrow/2019_win_system_skip
  - 8e28074 adds @skipIf not windows

- **PR #54338**: (dwoz) Log server closes completely during shutdown @ 2019-08-29 17:14:05 UTC
  - 94c03e5 Merge pull request #54338 from dwoz/logging_fixup
  - a3e227e Log server closes completely durring shutdown

- **PR #54327**: (garethgreenaway) [2019.2.1] Catch the AccessDenied exception and continue when running under Py3. @ 2019-08-29 16:59:34 UTC
  - 490ee69 Merge pull request #54327 from garethgreenaway/more_test_program_fixes
  - 97b4d86 Catch the AccessDenied exception and continue when running under Py3.

- **PR #54316**: (Akm0d) Azure cleanup @ 2019-08-27 16:14:09 UTC
  - bb911c3 Merge pull request #54316 from Akm0d/azure-cleanup
  - 2072773 pass longer timeout to msazure destroyinstance
  - 34eb477 Merge branch '2019.2.1' of https://github.com/saltstack/salt into azure-cleanup
  - 7ae48b1 Allow azure tests enough time to clean up interfaces
  - b45ae74 Clean up azure instances properly

- **PR #54314**: (garethgreenaway) [2019.2.1] Do not raise the exception in testprogram.py @ 2019-08-26 23:59:37 UTC
  - 9334e4e Merge pull request #54314 from garethgreenaway/testprogram_access_denied_do_not_raise
  - a53bacb Do not raise the exception if a process can not be access, just continue

- **PR #54305**: (dwoz) Fix wart in test_process tests on windows @ 2019-08-26 17:59:12 UTC
  - 71fb051 Merge pull request #54305 from dwoz/winfix
  - 4e68860 Fix wart in test_process tests on windows

- **PR #54303**: (dwoz) Fix wart in periodic callback interval @ 2019-08-24 20:04:35 UTC
  - 4d80f0a Merge pull request #54303 from dwoz/periodic_cb
  - bf57de Fix wart in periodic callback interval

- **ISSUE #54219**: (KChandrashekhar) integration.shell.test_call.py and tests/integration/shell/test_proxy.py (refs: #54259)

- **ISSUE #54153**: (KChandrashekhar) Ubuntu 16.04 Proxy failures (refs: #54259)

- **PR #54259**: (dwoz) Call os.fork less to avoid race conditions @ 2019-08-24 02:12:42 UTC
  - 5838851 Merge pull request #54259 from dwoz/less_forking
  - bf4d0dd Fix process list tests on windows py3
  - 316ec78 Allow more time for slow test
  - 9ba86f Do not remove attributes from process class
  - e7b6aa8 Clean up cruft
  - ed7103a Attempt to fix integration.shell.test_call test
659c805 Change noise log to debug
0660b1a Clean up typos
9f1fe42 Call os.fork less to avoid race conditions

- ISSUE #50814: (doesitblend) Minion continues trying down master (refs: #54239, #53417)
- ISSUE #49680: (doesitblend) Beacon events handled differently than event.send (refs: #53344, #54239)
- ISSUE #49663: (doesitblend) Beacon only fires to single random master in HA mode (refs: #53344, #54239)
- PR #54247: (DmitryKuzmenko) 2019.2.1 with multimaster bb fixes @ 2019-08-23 20:19:19 UTC
  - PR #54239: (DmitryKuzmenko) Multimaster tests with bb fixes (refs: #54247)
  - PR #53848: (DmitryKuzmenko) Features/multimaster tests (refs: #54239)
  - PR #53417: (DmitryKuzmenko) Multimaster minion hang on fire_master (refs: #54239, #53848)
  - PR #53344: (DmitryKuzmenko) Run beacons on the only one minion instance. Return to all masters. (refs: #54239, #53848)
  - 531f3aa Merge pull request #54247 from DSRCorporation/2019.2.1_with_multimaster_bb_fixes
  - 62cd8cd Merge branch '2019.2.1' into 2019.2.1_with_multimaster_bb_fixes
- PR #54235: (github-abcde) Fix 46034 2019.2.1 @ 2019-08-22 22:32:09 UTC
  - 993c341 Merge pull request #54235 from ogd-software/fix_46034-2019.2.1
  - 93bd30d Add alternative fix for "!" stomping Apparently (after watching Jenkins tests fail), what yaml.safe_load returns depends not on the version of salt, but on some other external dependency. Because of this, fix both possible return values.
  - c95dd4d Add test for this specific bugfix
  - ef29d8 Prevent yamlify_arg from stomping "!"
- PR #54282: (Akm0d) clean up renamed instances in the teardown @ 2019-08-22 22:13:51 UTC
  - 5d1a4d0 Merge pull request #54282 from Akm0d/clean-up-renamed
  - 11c1117 Removed redundant parenthesis
  - 802235d don’t delete shutting down ec2 instances
  - 3602942 reversed the order in which an instance was renamed
  - 5500ede renamed _alt_name function
  - 23beab4 clean up renamed instances in the teardown
- PR #54252: (s0undt3ch) [2019.2.1] More control on spun test daemons on git pillar tests @ 2019-08-22 22:13:08 UTC
  - c181f5a Merge pull request #54252 from s0undt3ch/hotfix/git-pillar-2019.2.1
  - 4eb85fa Skip tests on RHEL family < 7
  - 64a1be8 Don't even go through the transport to get the system grains
  - d0f8efa Don't keep recreating the git repos. Restore from backup.
  - 6114e9d All prep work is done in setUpClass.
  - 5b030dd Daemons are now started/stopped on tests, not by salt
  - ed60f0d We don't actually need grains

30.2. Previous Releases
- 911446d Lock uwsgi requirement.
  - 805f0ac Merge branch '2019.2.1' into 2019.2.1_with_multimaster_bb_fixes
- PR #54214: (Ch3LL) Remove unnecessary logging from minion.py @ 2019-08-22 18:08:26 UTC
  - b40cb8f Merge pull request #54214 from Ch3LL/fix_logging
  - 8fd24cf Remove unnecessary logging from minion.py
  - 9d28098 Merge branch '2019.2.1' into 2019.2.1_with_multimaster_bb_fixes
- PR #54277: (dwoz) Win runs plus @ 2019-08-21 23:59:16 UTC
  - de77762 Merge pull request #54277 from dwoz/win_runs_plus
  - f719591 Update tests
  - d8749d9 Do not remove attributes from process class
  - ac5a2a4 Only close handle if it got created
- PR #54278: (Akm0d) Correctly detect when an ms_azure instance is deleted @ 2019-08-21 23:14:01 UTC
  - 93cf40a Merge pull request #54278 from Akm0d/cloud-test-logging
  - 2dc1520 Merge branch '2019.2.1' into cloud-test-logging
  - 3867448 Fixed incorrect arguments
  - bdce5f4 Fix detecting msazure deletion with multiple tries
- PR #54263: (s0undt3ch) [2019.2.1] Exit test suite if test daemons fail to start @ 2019-08-21 22:06:52 UTC
  - 94f77a0 Merge pull request #54263 from s0undt3ch/hotfix/test-daemons-2019.2.1
  - 655efd6 Rearrange logging termination
  - 28fa5d2 Prevent traceback on python interpreter shutdown
  - 9035731 Write to stderr a message with the exit code
  - 566ec60 Exit the test suite if one of the test daemons fails to start
- PR #54270: (s0undt3ch) [2019.2.1] Speedup testing helpers decorators @ 2019-08-21 20:33:25 UTC
  - 3b9fd44 Merge pull request #54270 from s0undt3ch/hotfix/requires-system-grains-2019.2.1
  - 9fb9bfe Speedup testing helpers decorators
- ISSUE #53931: (KChandrashekhar) integration.states.test_pip_state.PipStateTest.test_issue_6912_wrong_owner_requirements_file (refs: #54274)

  - 2c4afa0 Merge pull request #54274 from felippeb/2019.2.1
  - 9c0b216 #53931 never fail on codecov curls
- PR #54264: (dwoz) Fix unit utils jinja when run on their own @ 2019-08-21 17:22:10 UTC
  - b3c70c3 Merge pull request #54264 from dwoz/jinja_units
  - 10a6d53 Fix unit utils jinja when run on thier own
- PR #54266: (Akm0d) Fix incorrect types on failing cloud tests @ 2019-08-21 17:14:40 UTC
  - 308ba55 Merge pull request #54266 from Akm0d/cloud_test_ultimate_fix
  - ff2125a Invert assertion to test for instance gone
- 82136a8 test for ec2 instance shutting down
- 283f631 run cloud --query if delete string is not available
- 33e6b6d changed deprecated assertEquals
- 41e6bc8 Cloud tests run correctly everywhere
- 03a8b2c reverted literal_eval

- **PR #54251**: (Akm0d) reduced query calls to salt-cloud @ 2019-08-20 20:10:59 UTC
  - 25d0b52 Merge pull request #54251 from Akm0d/cloud_test_optimization
  - 5fe6bf6c Optimized salt-cloud queries
  - 43418a4 Merge pull request #7 from Ch3LL/cloud_provider_files
    - b93944b Remove joyent config cloud test files
    - bd37849 Rename provider azure-config to azurearm-config
  - e7c06cb Added longer delays for ec2 tests
  - 5ceb47e Correctly check for GCE and EC2 deletion
  - 52c178c Added pretty yaml formatting to cloud-test logs
  - 4fc5e9e re-fixed simultaneous GCE tests
  - 326e9f2 Merge pull request #6 from Ch3LL/cloud_provider_files
    - adb1464 fix pylint
    - 51ce819 Move provider config setup into Setup/Teardown class
  - e58b40a Merge pull request #5 from Ch3LL/cloud_provider_files
    - ab8adcc Only use the provider conf.d file we are testing
  - 76609ad Merge branch '2019.2.1' into cloud_test_optimization
  - 7f64bc0 Clean up expensive queries
  - b3d02df reduced query calls to salt-cloud

- **PR #54240**: (Ch3LL) Fix TypeError python3 in get_image_id ec2 cloud @ 2019-08-20 20:10:01 UTC
  - ba81ca3 Merge pull request #54240 from Ch3LL/get_image_ec2
  - a3a9f3 Use ami variable instead in test
  - dc1ae52 Fix TypeError python3 in get_image_id
    - d6ad475 Merge branch '2019.2.1' into 2019.2.1_with_multimaster_bb_fixes

- **PR #54246**: (dwoz) Cut down on log noise @ 2019-08-19 17:20:03 UTC
  - 8404ec2 Merge pull request #54246 from dwoz/log_noise
  - e572711 Cut down on log noise

- **PR #54245**: (dwoz) Fix the sshd pid file @ 2019-08-19 17:19:32 UTC
  - 5b3e925 Merge pull request #54245 from dwoz/sshd_pid_file
  - df95347 Fix the sshd pid file

- **PR #54237**: (dwoz) Do not dup2 things without fileno @ 2019-08-18 17:13:29 UTC
  - 268803b Merge pull request #54237 from dwoz/dup2
- 2ebd22b Fix linter
- 63c616a Do not dup2 things without fileno
  * 0b33498 Workaround for beacons.list_available slowness.
  * b7a1058 Minor: Better support of named multimaster tests.
  * a5ccdf Minor: remove unneded logging
  * 314bb3 Support tcp transport in multimaster tests. Minor beacon update.
  * fcb8ff0 Properly set HAS_IPTABLES from __virtual__ return.
  * a75db01 Multimaster related fixup: don’t run test engine on minions
  * 8a88542 Multimaster beacons fix: put list into a dict to fire on the bus
  * 790fb41 Inotify beacons test logging and cleanup update
  * d84c8851 Inotify beacon test fixes and improvements.
  * 472fcc0 Give minion more time to handle beacon creation.
  * 17ceee0 Fixed Lint errors
  * 0bcf53c Fixed the unicode and timing inotify test issues.
  * f17bcf3 Improved assertion error diagnostic for master down test.
  * db0bae8 Run multimaster as well tests when no specific group is set
  * 723f63 Ignore the multimaster minion subgroup test in module names test.
  * 612191c Fixed lint failures
  * c1efa6 Multimaster test for events handling on master disconnect
  * 1654fe8 Multimaster inotify beacons test
  * 65dc47c Multimaster tests environment and test module test.
  * 2c17b0 Moved annoying message to trace log level.
  * 3e497c1 Handle minion events asynchronously.
  * 909323a Tests fixes
  * 6ad18f Cleanup event object
  * 2bf55be Run beacons on the only one minion instance. Return to all masters.

- PR #54121: (Akm0d) Refactored cloud tests @ 2019-08-16 17:24:14 UTC
  - 27d89bd Merge pull request #54121 from Akm0d/gce_cloud_test
  - 48c57b3 Try multiple times to detect deletion of an instance
  - 74300eb return a valid set
  - 2d63b87 Wait for an instance to be fully created if necessary
  - 83ad8b3 Merge branch '2019.2.1' of github.com:SaltStack/salt into gce_cloud_test

- ISSUE #54174: (dwoz) SignalHandlingMultiprocessingProcess bugs (refs: #54204)

- PR #54204: (dwoz) Fix signal handling in subprocesses @ 2019-08-16 00:46:40 UTC
  - c5ee91c Merge pull request #54204 from dwoz/signal Proc
  - 09e5e49 Merge branch '2019.2.1' into signal_proc
• ISSUE #7745: (mgwilliams) yaml 'module' has no attribute 'Dumper' (refs: #54223)
• PR #54223: (dwoz) Test verify logs without a whole minion @ 2019-08-16 00:46:09 UTC
  - 99a8fc5 Merge pull request #54223 from dwoz/7754_test_removal
  - 4be711e Fix up linter warts
  - 7573826 Remove crufty un-needed tests
  - effa77d Test verify logs without a whole minion
    * b40f41f Revert fallback to default signals change
    * 1d83b10 Fix signal handling in subprocesses
      * f90fe66 Reverted foo/bar creds per #46265
      * 3f56bad Reduced the amount of infromation in debuggings tatemnts
      * de53bf0 Merge branch '2019.2.1' of github.com:SaltStack/salt into gce_cloud_test
• PR #54203: (dwoz) Run transport test loops in single thread @ 2019-08-15 20:10:20 UTC
  - 8d440e0 Merge pull request #54203 from dwoz/transport_tests
  - 22b9d38 Run transsport test loops in single thread
    * f6180a6 Even better logging of errors
    * a15dc4b better formatting and error reporting
    * 51fbc2a better logging on instance create failure
    * 1f7dd52 removed hack fixes from gce
    * 31cd7c WAR ROOM SKIP GCE TESTS
    * 7d603be hasattr cannot find parent properties starting with __
    * 686cab9 Separated assertInstanceDestroy and _destry_instance
    * 158a38c Revert "Removed subclass from cloud name"
    * b7cf43d Removed subclass from cloud name
    * 8c5eb18 fixed pylint error on format string
    * 59e20bc Merge branch '2019.2.1' of https://github.com/saltstack/salt into gce_cloud_test
• PR #54191: (garethgreenaway) [2019.2.1] Addition logging in testprogram used by integration.shell.test_minion.MinionTest.test_exit_status_correct_usage @ 2019-08-13 21:44:41 UTC
  - a05018e Merge pull request #54191 from garethgreenaway/test_program_test_mininion
  - 8463f84 Adding some additional logging when the call to "proc_cmdline = proc.cmdline()" reults in a AccessDenied exception, so we can see what the process is and who the process is running as.
• PR #54202: (waynew) Only run one filter test @ 2019-08-13 21:33:32 UTC
  - e5e9299 Merge pull request #54202 from waynew/shorter-jinja-ssh-tests
  - c333ac8 Only run one filter test
    * 5912f24 Switched to Azurearm over msazure
• PR #54172: (Ch3LL) Migrate from azure to azurearm tests @ 2019-08-13 20:07:34 UTC
  - a13cb3e Merge pull request #54172 from Ch3LL/azurearm_tests
  - 465523f Migrate from azure to azurearm tests
• **ISSUE #50535**: (wyardley) salt errors with current azure-storage because of no version set (refs: #50567)
• **PR #54173**: (Ch3LL) Cherry Pick #50567 and #53238 into 2019.2.1 @ 2019-08-13 20:07:09 UTC
  - **PR #53238**: (nicholasmhughes) Azure: Fixed ability to pass SSH key to Linux VMs (refs: #54173)
  - **PR #50567**: (rombert) azurefs: gracefully handle AttributeError (refs: #54173)
  - 39d0c59 Merge pull request #54173 from Ch3LL/azure_fixes
  - 9052eaf reverting log string handling
  - a1a61ee fixed ability to pass ssh key to Linux VMs
  - 4a141a1 azurefs: gracefully handle AttributeError
    - 6fa28de fixed underscore
      - c35379a Moved finding installer into class
    - 9548f8 Moved finding installer into class
    - a86ae34 moved installer finder to SetUp method
    - 933964a removed default user/pass from profitbricks test file
    - 2a2437d fixed dictionary access
    - b9ee411 Fixed broken tests
    - 80efd26 fixed misspelled provider information
    - 511779b removed unused imports
    - 1cd1c13 setUp all cloud tests the same way
    - d322408 Got rid of unnecessary delay
    - 98ba18c fixed pylint error
    - c34c17e Merge branch '2019.2.1' of https://github.com/saltstack/salt into gce_cloud_test

• **PR #54178**: (dwoz) Fix flaky set_computer_name in mac_system module @ 2019-08-12 18:26:40 UTC
  - 19f4d5e Merge pull request #54178 from dwoz/mac_computer_name
  - e51100e Fix skip on non macos platforms
  - a3a9d92 Fix linter
  - c499d44 Revert unwanted flaky from non computer name tests
  - 941fcc8 Fix flaky set_computer_name in mac_system module
    - 90e8350 Merge branch '2019.2.1' of https://github.com/saltstack/salt into gce_cloud_test

• **PR #54180**: (dwoz) Point test-kitchen to my keepalive_maxcount branch @ 2019-08-12 18:18:26 UTC
  - 6fe6799 Merge pull request #54180 from dwoz/keepalive_maxcount
  - dc9ee21 Add reminder about kitchen version
  - 19a1f1b Point test-kitchen to my keepalive_maxcount branch
    - 60f8351 Fixed failing Ec2 Tests
    - e2f085c removed py3-only function call
    - 4406c57 fixed lint errors, more descriptive fails
    - 6840d5f assert instances exist in unified way
• 03da233 skip EOL joyent tests, secure delete instances
• 3123bb1 Merge branch ‘2019.2.1’ of https://github.com/saltstack/salt into gce_cloud_test

• ISSUE #53306: (doesitblend) Fully Qualify CMD on Windows Minions (refs: #53311, #54033)
  • PR #54033: (twangboy) Backport #53311 to 2019.2.1 @ 2019-08-09 16:46:36 UTC
    – PR #53311: (doesitblend) Add fully qualified cmd call (refs: #54033)
    – 9f5302d Merge pull request #54033 from twangboy/fix_win_service_2019.2.1
    – 2850fab Merge branch ‘2019.2.1’ into fix_win_service_2019.2.1
    – 0e2a2b8 Merge branch ‘2019.2.1’ into fix_win_service_2019.2.1
    – 16c704e Backport #53311 to 2019.2.1

• PR #53900: (twangboy) Fix inconsistent full names in LGPO @ 2019-08-09 09:15:41 UTC
  – c0e49d9 Merge pull request #53900 from twangboy/fix_lgpo
  – e05abdf Merge branch ‘2019.2.1’ into fix_lgpo
  – e4e71cd Remove duplicate test
  – 68c632b Add some tests
  – 3c34075 Fall back to slower method if new method not available
  – 0108bcd Avoid using the lowercase method in XPath
  – fcc0405 Fix telemetry issue, add some timing logs

• PR #52818: (twangboy) Add watchdog as a bundled dependency on Windows @ 2019-08-09 04:26:54 UTC
  – 9eb2938 Merge pull request #52818 from twangboy/add_watchdog
  – 2658634 pre-commit
  – 3569f2 Add watchdog to Linux and OSX .in files
  – 5e5969 Rmove openseuse 42 static files
  – ec285d0 Remove watchdog from the rest of the .in files
  – 86e64ae Remove unused import, remove Windows reference
  – b934d53 Remove watchdog from windows.in
  – cfaee96 Fix and unify watchdog beacon tests for all OS's
  – cc73204 Put Windows tests in their own class
  – 6fbf1a3 Remove unused import... lint
  – 832a1db Fix windowsisms
  – 4f47d50 Update static requirements
  – 762fe3b Remove some fluff
  – 94607ec Add watchdog for tests
  – 02248dc Fix modified test to account for OS variances
  – 15ee479 Compile static requirements
  – 78a5723 Add watchdog to Linux and OSX .in files
  – 9a0f08a Update static requirements
- 5cad13b Remove opensuse 42 static files
- 1f05fce Remove watchdog from the rest of the .in files
- 121595a Remove unused import, remove Windows reference
- c410a4b Remove watchdog from windows.in
- 05a0845 Fix and unify watchdog beacon tests for all OS's
- 200e230 Put Windows tests in their own class
- 6cc8d96 Remove unused import... lint
- a4abb72 Fix windowssims
- 005bed9 Update static requirements
- c1bc627 Remove some fluff
- 92c8d4f Add watchdog for tests
- 9544624 Add watchdog as a bundled dependency on Windows

- PR #54143: (Akm0d) Don’t call potentially missing shade library (#53734) @ 2019-08-09 01:05:26 UTC
  - PR #53734: (Akm0d) Don’t call potentially missing shade library (refs: #54143)

• PR #54108: (dwoz) More robust azure instance deletion @ 2019-08-03 03:58:20 UTC
  - 46f5e2e Merge pull request #54108 from dwoz/azure_test
  - 754b719 Fix linter
  - 773235d Fix missing time import

30.2. Previous Releases
Salt Documentation, Release 3003.3

- 5a8f2ec More robust azure instance deletion

**PR #54017: (dmurphy18)** Allow for main thread having terminated pid, before ThreadPoolExecutor threads @ 2019-08-02 18:11:48 UTC
  - 2cb5a0b Merge pull request #54017 from dmurphy18/fix_deb9_build90_tests
  - 2866520 Skip process kill tests on Windows
  - 5577f14 Clean up lint errors
  - 4ca709e Merge branch '2019.2.1' into fix_deb9_build90_tests
  - 264c767 Merge pull request #1 from dwoz/fix_deb9_build90_tests
    - 9bb9466 Add unit tests for weird pid does not exist cases
    - 64d9752 Add warning messages to help determine why pids do not exist
  - 406d382 Adjusted for review comments
  - 2d20fbe Adjusted try/except statements on process checking
  - e189177 Removed typos
  - 2e3ca43 Updated for review comments
  - 68c29af Allow for main thread having terminated pid, before ThreadPoolExecutor threads
    - e3158c8 refactored all cloud tests
    - 194e0c7 Refactored GCE cloud test

**PR #54080: (dmurphy18)** Disabling random website tests till allow for quota usage @ 2019-07-31 21:16:54 UTC
  - 4e2efcd Merge pull request #54080 from dmurphy18/u1804_py3_random_skip
  - 0660e6e Disabling random website tests till allow for quota usage

**PR #54063: (twangboy)** Make the skip apply to any system missing crypt @ 2019-07-30 19:22:07 UTC
  - ddbbcc9 Merge pull request #54063 from twangboy/fix_test_pycrypto_2019.2.1
  - 6fcf035 Make the skip apply to any system missing crypt

**PR #54050: (cmcmarrow)** fixs integration terminate error @ 2019-07-30 13:38:55 UTC
  - 4df6271 Merge pull request #54050 from cmcmarrow/integration_termiante_fix
  - eb07f4 Merge branch '2019.2.1' into integration_termiante_fix

**PR #54057: (dmurphy18)** Added support for is_fedora and skip Minion test test_issue_7754 on Fedora @ 2019-07-29 22:41:25 UTC
  - 9d1bd63 Merge pull request #54057 from dmurphy18/fix_fedora30_test
  - 30f3bda Added support for is_fedora and skip Minion test test_issue_7754
  - b3293a9 Merge branch '2019.2.1' into integration_termiante_fix

**ISSUE #53948:** (KChandrashekhar) integration.shell.test_call.CallTest.test_issue_2731_masterless (refs: #54040)

**ISSUE #2731:** (cwood) Masterless Broken in 0.10.5 (refs: #54040)

**PR #54040: (waynew)** Remove dead test @ 2019-07-29 17:23:45 UTC
  - 5d3bcd7 Merge pull request #54040 from waynew/remove-dead-test
  - e9a5a57 Remove dead test
• PR #54051: (twangboy) Skip get time test @ 2019-07-29 16:54:50 UTC
  - 70ffcecc Merge pull request #54051 from twangboy/fix_test_system
  - ceaba05 Skip get time test
• PR #54038: (Ch3LL) Pyton3 digital ocean test fix: to_str on key @ 2019-07-29 16:54:19 UTC
  - 4aed833 Merge pull request #54038 from Ch3LL/do_py3_fix
  - f7346db Pyton3 digital ocean test fix: to_str on key
    - 05cd93f fixs integration terminate error
    - 69c3106 fixs integration terminate error
• PR #53735: (twangboy) Fix Windows tests in test_system @ 2019-07-26 22:38:28 UTC
  - 3cedacd Merge pull request #53735 from twangboy/fix_test_system
  - a9e9e97 Add timeouts and account for those in assert
  - d3a160e Merge branch '2019.2.1' into fix_test_system
  - f95f0e7 Merge branch '2019.2.1' into fix_test_system
  - 87e92b8 Use setUpClass
  - 6a685bd Fix some tests in the Windows Class
• PR #53953: (Ch3LL) Send SIGTERM to webserver in teardown of gitfs tests @ 2019-07-25 21:12:42 UTC
  - cc1cda1 Merge pull request #53953 from Ch3LL/improve_git_test
  - 347ea1e Use Sigkill and add time.sleep before check
  - 637bf95 Merge branch '2019.2.1' into improve_git_test
  - c0be147 Send SIGTERM webserver during teardown of gitfs tests
  - b776e0c Check if gitfs server fails to setup for tests
• PR #53999: (Ch3LL) Generate new key each time for digital ocean key test @ 2019-07-25 21:07:45 UTC
  - 2324167 Merge pull request #53999 from Ch3LL/fx_digital_ocean
  - b06e3b Generate new key each time for digital ocean key test
• PR #53970: (garethgreenaway) [2019.2.1] Adding a WAR ROOM Skip for test_directory_clean_require_with_name @ 2019-07-25 21:03:49 UTC
  - 32fec66 Merge pull request #53970 from garethgreenaway/osx_skip_test_directory_clean_require_with_name
  - 362b84a Adding a WAR ROOM Skip for test_directory_clean_require_with_name
• PR #54003: (dwoz) War room skip for tcp build @ 2019-07-24 22:52:18 UTC
  - 213dff Merge pull request #54003 from dwoz/skip_test
  - 6cd8f89a War room skip for tcp build
• PR #53897: (cmcmarrow) patches salt grains locale_info decode error @ 2019-07-23 13:19:00 UTC
  - 048c097 Merge pull request #53897 from cmcmarrow/timezone_fix
  - d9e402d Merge branch '2019.2.1' into timezone_fix
• PR #53920: (st0undt3ch) [2019.2.1] Update CI pipelines. Remove old jenkins cruft. @ 2019-07-20 12:33:01 UTC

30.2. Previous Releases
- 9a846b4 Merge pull request #53920 from s0undt3ch/hotfix/ci-pipelines-2019.2.1
- b09963b Update CI pipelines. Remove old jenkins cruft.

- **PR #53728**: (garethgreenaway) [2019.2.1] Disabling test_get_set_computer_name on OS X and Py3 @ 2019-07-19 17:18:33 UTC
  - 15accecf Merge pull request #53728 from garethgreenaway/2019_2_1_mac_system_disable_test_get_set_computer_name
  - a6d853c Merge branch '2019.2.1' into 2019_2_1_mac_system_disable_test_get_set_computer_name
  - 5d537ed Missing six import. Updating skip message.
  - ac6dcd Disabling test_get_set_computer_name on OS X and Py3.

- **PR #53913**: (garethgreenaway) [2019.2.1] skip test_issue_2594_non_invalidated_cache on MacOS @ 2019-07-19 17:17:36 UTC
  - a54ec89 Merge pull request #53913 from garethgreenaway/disable_test_issue_2594_non_invalidated_cache_macos
  - c65c5d5 Skip the test test_issue_2594_non_invalidated_cache on MacOS where it is flakey.

- **PR #53902**: (twangboy) Skip tests that modify date or time @ 2019-07-18 17:53:31 UTC
  - b091eb7 Merge pull request #53902 from twangboy/skip_dt
  - 76cf936 Skip tests that modify date or time

- **PR #53901**: (s0undt3ch) [2019.2.1] Don't fail when combining coverage files @ 2019-07-18 17:46:32 UTC
  - 22b7b1a Merge pull request #53901 from s0undt3ch/hotfix/wrap-coverage-combine
  - b459a48 Don't fail when combining coverage files

- **PR #53542**: (dwoz) Fix leak of SaltMessageClient instances when using tcp transport @ 2019-07-18 17:44:44 UTC
  - 84e798a Merge pull request #53542 from dwoz/tcp_leak
  - 3daeb4f Update TCP pipelines
  - 52f9556 Merge branch '2019.2.1' into tcp_leak
  - f5313fd Fix tcp message client test
  - 3419bf5 Merge branch '2019.2.1' into tcp_leak
  - 3125cd3 Merge branch '2019.2.1' into tcp_leak
  - 9a33582 Merge branch '2019.2.1' into tcp_leak
  - 7eb5d41 Merge branch '2019.2.1' into tcp_leak
  - 481372b Fix torando loop thread issue
  - aff15d4 Fix linter wart
  - 9606db7 Comment the tcp message client test better
  - dcf576f Add unit test for tcp message client close method
  - 4420556 Download artifacts for tcp jobs
  - e6a09dd Merge remote-tracking branch 'origin/tcp_leak' into tcp_leak
    * f484f3f Merge branch '2019.2.1' into tcp_leak
  - 4a37234 Add tcp suffix to github notifications
  - 4a2848b Add transport PR tests
- 9a4b407 Fix leak of SaltMessageClient instances when using tcp transport
  - 592f3fe undo test
  - bc550ad wip pytest test david
  - 75571e4 fixes timezone decode error
  - d041660 fixes timezone decode error
  - 1ddd1a9 fixes timezone decode error
  - e75dafa patches timezone grain
  - eaca473 patches salt grains locale_info decode error
- PR #53873: (bryceml) increase sleep time between kitchen create failures to account for api limits @ 2019-07-16 23:46:09 UTC
  - 61e9efd Merge pull request #53873 from bryceml/2019.2.1-increase-sleep
  - aae0bf6 increase sleep time between kitchen create failures to account for api limits
- PR #53750: (twangboy) Fix memory error when the test suite cleans up (2019.2.1) @ 2019-07-16 23:00:07 UTC
  - 317d9af Merge pull request #53750 from twangboy/fix_helpers
  - fa0e9c3 Merge branch '2019.2.1' into fix_helpers
- PR #53851: (dwoz) Master stats revert @ 2019-07-16 16:05:38 UTC
  - 6c2b3a5 Merge pull request #53851 from dwoz/master_stats_revert
  - 0bc72e4 Revert "Merge pull request #53822 from dwoz/master_stats_test"
  - 4553ba7 Revert "Merge pull request #53829 from saltstack/fix_stats_2019.2.1"
- PR #53829: (dwoz) Fix stats on windows @ 2019-07-12 01:03:47 UTC
  - 5064027 Merge pull request #53829 from saltstack/fixed_stats_2019.2.1
  - 9f2d20d Fix stats on windows
- PR #53826: (dmurphy18) WAR ROOM test skip till rewritten to allow for dnf on RHEL 8 and F30 @ 2019-07-12 00:39:11 UTC
  - 971eda3 Merge pull request #53826 from dmurphy18/fedora30_fixes
  - 34b261d WAR ROOM test skip till rewritten to allow for dnf on RHEL 8 and Fedora 30
- PR #53822: (dwoz) Enable master stats for tests @ 2019-07-11 23:37:55 UTC
  - ba33d76 Merge pull request #53822 from dwoz/master_stats_test
  - d2b8315 Enable master stats for tests
  - 3471422 Fix memory error when the test suite cleans up
- PR #53591: (twangboy) Fix whitelist errors in test_boto_* state tests on Windows @ 2019-07-07 05:45:21 UTC
  - 1756156 Merge pull request #53591 from twangboy/fix_boto_tests
  - ba8ba26 Merge branch '2019.2.1' into fix_boto_tests
- ISSUE #53532: (dafyddj) win_lgpo.py: crash caused by empty presentation text element (refs: #53662)
- PR #53688: (twangboy) Merge Forward #53662 (2019.2.1) @ 2019-07-07 05:44:25 UTC
  - PR #53662: (lomeroe) Update win_lgpo (refs: #53688)
  - 4644464 Merge pull request #53688 from twangboy/mf_53662

      * ba37276 Use string_types instead of text_types
      * f6d0084 Add some unit tests, raise error on non-string types
35ed8be Create function for encoding string values
  c4c1082 Return encoded null when string value is None

**PR #53627:** (dmurphy18) Cherry pick pr 53370 from 2018.3 into 2019.2.1 @ 2019-06-28 19:54:13 UTC
  - 164aaeb Merge pull request #53627 from dmurphy18/cherry-pick-pr-53370
  - 450d23d Merge branch '2019.2.1' into cherry-pick-pr-53370

**ISSUE #53411:** (cro) Events can grow stale when event_listen_queue is set. (refs: #53587, #53412)

**PR #53587:** (cro) Forward port from 2018.3 Add event_listen_queue_max_seconds to fix #53411 @ 2019-06-28 16:49:46 UTC
  - **PR #53412:** (cro) Stale events 53411 (refs: #53587)
  - 6559e4c Merge pull request #53587 from cro/53412-2019.2.1
  - 9e69bd4 Merge branch '2019.2.1' into 53412-2019.2.1
  - 949a026 Merge branch '2019.2.1' into 53412-2019.2.1
  - f5d81c9 Merge branch '2019.2.1' into 53412-2019.2.1
  - d74c313 Merge branch '2019.2.1' into 53412-2019.2.1
  - b3c3f52 Make doc build test pass.
  - 8001130 Add event_listen_queue_max_seconds to fix #53411
    - 34e38d7 Merge branch '2019.2.1' into cherry-pick-pr-53370

**ISSUE #53283:** (Ch3LL) integration.states.test_file.FileTest.test_directory_broken_symlink (refs: #53295)

**PR #53295:** (DmitryKuzmenko) Recurse kwarg of state.directory state shall be a list or None @ 2019-06-27 23:20:10 UTC
  - 14efced Merge pull request #53295 from DSRCorporation/bugs/test_file_recurse_set
  - 2927b78 Merge branch '2019.2.1' into bugs/test_file_recurse_set
  - 9e01670 Merge branch '2019.2.1' into bugs/test_file_recurse_set
  - 571d82a Merge branch '2019.2.1' into bugs/test_file_recurse_set
  - ee8f0e3 Merge branch '2019.2.1' into bugs/test_file_recurse_set
  - 013e04c Recurse kwarg of state.directory state shall be a list of None

**ISSUE #52926:** (waynew) integration.states.test_beacon.BeaconStateTestCase.test_present_absent - Beacon "diskusage" is not available (refs: #53493, #53466)

**ISSUE #52245:** (twangboy) integration.states.test_beacon.BeaconStateTestCase.test_present_absent (refs: #53493, #53466)

**PR #53466:** (dwoz) More robust beacon state test @ 2019-06-27 23:17:01 UTC
  - 75175bb Merge pull request #53466 from dwoz/test_pres_abs
  - f24bf06 Use new pipeline format
  - a74580b Clean up cruft
  - 68958f5 Do not create duplicate minion ids
  - c47eeb4 Add amazon 2 to PR tests
  - dc90b47 More robust beacon state test
- 95b1819 Initial working tests for gpg fixes and import keys, signing
- b2c9ae2 Update access to str/bytes with to_unicode/to_bytes for Python 3

- **PR #53609**: (s0undt3ch) CI Pipelines. Timeout after getting a node. Report exit code. @ 2019-06-27 16:09:54 UTC
  - 582ac5f Merge pull request #53609 from s0undt3ch/hotfix/fix-nox-bypass-2019.2.1
  - 024be84 CI Pipelines. Timeout after getting a node. Report exit code.

- **PR #53574**: (s0undt3ch) [2019.2.1] Minor fixes/adjustments to the new CI pipelines @ 2019-06-25 18:48:25 UTC
  - f568796 Merge pull request #53574 from s0undt3ch/hotfix/fix-nox-bypass-2019.2.1
  - e85e2f4 Minor fixes/adjustments to the new CI pipelines

- **PR #53584**: (dwoz) Add unit tests for recent SaltCacheLoader changes @ 2019-06-24 23:40:43 UTC
  - **PR #53563**: (twangboy) SaltCacheLoader does not create multiple FileClients (refs: #53584)
  - 77b7fc4 Merge pull request #53584 from dwoz/client_cache
  - e9b61dc Add unit tests for recent SaltCacheLoader changes
  - 5558a0a Add reg to the whitelist

- **PR #53563**: (twangboy) SaltCacheLoader does not create multiple FileClients (refs: #53584) @ 2019-06-22 23:23:03 UTC
  - 6ed6c31 Merge pull request #53563 from twangboy/py3_windows_hang
  - 369720e Allow the file_client to be overridden
  - f6c592c Don’t instantiate the file_client every time

- **PR #53432**: (garethgreenaway) [2019.2.1] Various fixes for 2019.2.1 to ensure tests pass on Mac OS X @ 2019-06-21 13:47:41 UTC
  - c606952 Merge pull request #53432 from garethgreenaway/2019_2_1_mac_fixes
  - 1974f11 Disabling a couple more tests in integration.modules.test_cp that hang on OS X and Py2.
  - 7721151 Fixing lint.
  - 1d4e228 Updating various skips for tests to only skip if OS is OS X and Python is Python2.
  - 01dafdc Skipping integration.modules.test_cp.CPModuleTest.test_get_file_str_https on OS X
  - c02db20 Disabling integration.modules.test_state.StateModuleTest.test_parallel_state_with_long_tag
  - 8788877 Skip integration.states.test_file.FileTest.test_issue_11003_immutable_lazy_proxy_sum and integration.states.test_pip_state.PipStateTest.test_22359_pip_installed_unless_does_not_trigger_warnings when running on OS X.
  - cf76027 Removing wrong import of skipIf
  - b10e1e7 Moving the skipIf for OS X from the beacon state tests to the renderer state tests.
  - d2fe9a Disabling beacon state tests on OS X for the time being.
  - 1741bb0 Adding some timeouts to see if it helps the tests pass on OS X.
  - f0db0a0 Ensure the user and group used by @with_system_user_and_group are consistent.
  - e03ab81 Using salt.utils.path.which to find false, on OSX it lives under /usr/bin/
  - 353f9d4 Fixing the beacons.reset function. Once the reset has taken place in beacons/__init__.py we need to fire an event back to complete the loop and ensure that everything worked as expected.
- ee3cbc7 fix to how the depends decorator works. Only run the dependency commands for the module we're checking.
- 8440176 Fixing a log issue that pops up after test_gen_thin_compression_fallback_py3 on "OS X, need to ensure that salt.utils.thin.os.close is mocked.
- 9767ddd Format for the sqlite3 database used for the assistive information changed in Mojave, additional columns added.
- 9c8a7e6 Fixing a bug when the roots files servers and the location is a symlink to another location. This fix ensures that when fsroot is referenced we are using the real path and not the symlink path.

- **PR #53526**: (s0undt3ch) [2019.2.1] Update pipelines to work on old and new jenkins @ 2019-06-20 15:29:13 UTC
  - 59e2a1f Merge pull request #53526 from s0undt3ch/hotfix/nox-bypass-2019.2.1
  - 24d6d09 Update pipelines to work on old and new jenkins

- **PR #53210**: (Ch3LL) Cherry-Pick #52787 into 2019.2.1 @ 2019-06-20 13:33:13 UTC
  - PR #52787: (garethgreenaway) [2018.3] Fixes to test_pip state sls files (refs: #53210)
  - f5f80af Merge pull request #53210 from Ch3LL/cp-52787
  - f27c434 Merge branch '2019.2.1' into cp-52787

- **PR #53467**: (twangboy) Check valid username first (fixes failing symlink test) @ 2019-06-19 17:04:30 UTC
  - fd6cb35 Merge pull request #53467 from twangboy/fix_test_win_file
  - 92950c5 Merge branch '2019.2.1' into fix_test_win_file
  - 6a21edc Merge branch '2019.2.1' into fix_test_win_file
  - 31c11f Fix some lint, skip some tests
  - 6de4db6 Monkeypatch in the class instead of globally
  - d663a1f Fix the failing BlockReplace test cases on Windows
  - 299f88f Update test_managed_contents
  - 81110e5 Fix test_file_copy_make_dirs that was failing on Linux
  - 8d0529d Fix some lint
  - 4a9c020 Fix issues with win_runs
  - bceff1 Remove privs message
  - 54be0a6 Verify username early in win_runs

- **PR #53475**: (Ch3LL) Add pypsexec requirement for cloud tests @ 2019-06-19 13:30:25 UTC
  - 3230078 Merge pull request #53475 from Ch3LL/add_pypsexec
  - ab59a55 Merge branch '2019.2.1' into add_pypsexec
  - f954363 Merge branch '2019.2.1' into add_pypsexec
  - 8f7cbfc Merge branch '2019.2.1' into add_pypsexec
  - fa22b39 Add pypsexec requirement for cloud tests

- **PR #53491**: (Ch3LL) Update test_gen_hash for macosx @ 2019-06-19 13:16:04 UTC
  - bdd7c2c Merge pull request #53491 from Ch3LL/crypt_test_mac
  - 85e96bd Merge branch '2019.2.1' into crypt_test_mac
- 700338e Merge branch '2019.2.1' into crypt_test_mac
- 4ce7fb1 Merge branch '2019.2.1' into crypt_test_mac
- 832ded6 Merge branch '2019.2.1' into crypt_test_mac
- 775b8c2 Merge branch '2019.2.1' into crypt_test_mac
- 0832b49 Update test_gen_hash for macosx

- **PR #53494**: (Ch3LL) Always delete digital ocean key for test_key_management test @ 2019-06-19 13:14:51 UTC
  - 8c2e952 Merge pull request #53494 from Ch3LL/do_cloud_test
  - 5053eab Merge branch '2019.2.1' into do_cloud_test
  - 64a3e8d Merge branch '2019.2.1' into do_cloud_test
  - 45c0e43 Merge branch '2019.2.1' into do_cloud_test
  - 3826c56 Allows delete digital ocean key for test_key_management test
    - 6b6dc66 Merge branch '2019.2.1' into cp-52787

- **PR #53434**: (weswhet) Update documentation for newer mac_service module. @ 2019-06-19 01:15:19 UTC
  - 2e3778b Merge pull request #53434 from weswhet/patch-2
  - 89398a9 Update salt.modules.service.rst
  - 99c1baa Update salt.modules.service.rst
  - a962a64 Merge branch '2019.2.1' into patch-2

- **PR #53498**: (amendlik) Fix broken documentation links @ 2019-06-18 23:44:05 UTC
  - f72ebba Merge pull request #53498 from amendlik/links
  - e360a70 Fix broken documentation links for service virtual module
  - 56f65ec Fix broken documentation links for pkg virtual module
    - 010a2c5 Merge branch '2019.2.1' into cp-52787
      - 1bbdc7f Merge branch '2019.2.1' into cp-52787

- **PR #53514**: (Ch3LL) Revert logging changes from #53492 @ 2019-06-18 20:49:04 UTC
  - **PR #53492**: (dwoz) Fix syndic connection when using tcp transport (refs: #53514)
  - 0793272 Merge pull request #53514 from Ch3LL/disable_py3_logging
  - 8c8f0ac import six runtests log handler
  - f442b33 Revert "Enable logging for test runs on py3"
    - b62be16 Merge branch '2019.2.1' into cp-52787

- **PR #53485**: (s0undt3ch) [2019.2.1] Workaround nox's install only flag @ 2019-06-18 09:35:34 UTC
  - 98285f9 Merge pull request #53485 from s0undt3ch/hotfix/fixnox-bypass-2019.2.1
  - 69e1d84 Workaround nox's install only flag
    - 8622bba Merge branch '2019.2.1' into cp-52787

- **PR #53369**: (Akm0d) Added refs to AIX module documentation @ 2019-06-17 20:29:01 UTC
  - ff7370e Merge pull request #53369 from Akm0d/aix_docs
  - 2e253 Merge branch '2019.2.1' into aix_docs

    • 5542fa8 Add the missing, and required, top pillar file.
    • 0ae2ef0 Under Py2 we still want raw to be set to True
    • 714d663 Re-submit #52934 fixed after being reverted in #52755
    • 243b512 Update msgpack calls for newer msgpack
      • 0f9077b Merge branch '2019.2.1' into cp-52787
• PR #53264: (s0undt3ch) [2019.2.1] Minion blackout tests - Add the missing, and required, top pillar file @ 2019-05-29 07:30:45 UTC
  - 50e31ec Merge pull request #53264 from s0undt3ch/2019.2.1
- acabb70 Merge branch '2019.2.1' into 2019.2.1

- **PR #52966**: (s0undt3ch) Always run the full test suite on the 2019.2.1 release branch @ 2019-05-28 15:43:12 UTC
  - 749ce26 Merge pull request #52966 from s0undt3ch/hotfix/full-test-run
  - 247c461 Always run the full test suite on the 2019.2.1 release branch

- **PR #53138**: (frogunder) vultr cloudest fix @ 2019-05-28 14:34:22 UTC
  - a7af31 Merge pull request #53138 from frogunder/fix_vultr_cloudtest
  - 9f4550c vultr cloudest fix
    - 912b9b3 Add the missing, and required, top pillar file.
    - 9d21b75 Merge branch '2019.2.1' into cp-52787

- **PR #53258**: (s0undt3ch) [2019.2.1] Fix multiprocessing logging queue dict changing during iteration errors @ 2019-05-27 19:26:27 UTC
  - d011be Merge pull request #53258 from s0undt3ch/2019.2.1
  - ad01dd2 More robust minion blackout tests
  - a0346d1 Try harder to get the minion grains
  - 36717bd Try and address the test flakyness
  - ce07d8c Add more information when the assertion fails
  - b99e914 Attempt to fix mine tests
  - fca981c One more known to return None
  - 951df48 One more known to return None
  - eb5d3e Fix integration.modules.test_mine.MineTest.test_get for sub_minion
  - 26314f5 Fix multiprocessing logging queue dict changing during iteration errors

- **PR #53153**: (s0undt3ch) [2019.2.1] Update to salt-bootstrap v2019.05.20 @ 2019-05-24 07:45:57 UTC
  - b69e080 Merge pull request #53153 from s0undt3ch/2019.2.1
  - 166067c Use currentBuild.resultIsBetterOrEqualTo instead
  - cefdd90 Stop error messages about missing roster file on syndic master
  - 6b8f46 Don't complain when attempting to close sockets at this stage
  - e3f3cc9 Add Amazon Linux 2018.3 and 2 static requirements
  - 872acc0 Switch the ubuntu-14.04 exception with amzn-1
  - PR saltstack/salt#52934: (twangboy) Update msgpack calls for newer msgpack (refs: #53235)

- **PR #53235**: (s0undt3ch) Revert "Update msgpack calls for newer msgpack" @ 2019-05-24 13:35:20 UTC
  - 14aeedaa Merge pull request #53235 from saltstack/revert-52934-fix_msgpack
  - 3295aea Revert "Update msgpack calls for newer msgpack"

- **PR #53131**: (s0undt3ch) [2019.2.1] Update to salt-bootstrap v2019.05.20 @ 2019-05-24 07:45:57 UTC
  - 6923427 Merge pull request #53131 from s0undt3ch/hotfix/update-bootstrap-2019.2.1
  - 4cce4f4 Merge branch '2019.2.1' into hotfix/update-bootstrap-2019.2.1
  - 6751ee1 Merge branch '2019.2.1' into hotfix/update-bootstrap-2019.2.1
- 6988e07 Update to salt-bootstrap v2019.05.20

**PR #52934:** (twangboy) Update msgpack calls for newer msgpack (refs: #53242) @ 2019-05-23 23:18:23 UTC

- a61db20 Merge pull request #52934 from twangboy/fix_msgpack
- f02a12e Merge branch '2019.2.1' into fix_msgpack
- 7e2cd34 Merge branch '2019.2.1' into fix_msgpack
- bc9ce8e Merge branch '2019.2.1' into fix_msgpack
- 0abd1ec Update msgpack calls for newer msgpack
  - 3366d59 update pylint exceptoin
  - 6c452b3 removing unwanted commits from this branch
  - e0b0ba8 Handling in flaky when maximum number of attempts raised and the exception should be raised. Different approaches depending on Py2 vs Py3.
  - 434dcda Disabling two tests when using Python 3 and OS X
  - 5784e80 Disabling integration.shell.test_minion.MinionTest.test_issue_7754 test on OS X because it hangs the test suite.
  - 78ae6b1 Dropping the version check for InstallationError down to anything 1.0 or greater. Removing the test that simulates versions of pip below 1.0.
  - 4ec90c2 Adding an jinja if statement to only the python parameter if the result from get_python_executable is a valid value. Maintaining backwards compatibility to run tests without Nox.

**PR #53192:** (twangboy) Skip test_gen_hash test on Windows @ 2019-05-23 05:33:13 UTC

- 8a57270 Merge pull request #53192 from twangboy/skip_test_gen_hash
- 758d020 Skip test on Windows

**PR #53157:** (twangboy) Fix unit.modules.test_win_file.WinFileTestCase.test_issue_52002_check_file_remove_symlink @ 2019-05-22 22:32:26 UTC

- 446e70c Merge pull request #53157 from twangboy/fix_test_win_file_symlink
- 5672076 Merge branch '2019.2.1' into fix_test_win_file_symlink

**PR #53141:** (Ch3LL) Check for all non-word characters when calling secure_password @ 2019-05-22 17:24:54 UTC

- 6fbe9aa Merge pull request #53141 from Ch3LL/shadow_fed_fix
- a3c4066 Merge branch '2019.2.1' into shadow_fed_fix

**PR #53161:** (Ch3LL) Add HAS_REQUIRED_CRYPTO var for m2crypto in joyent @ 2019-05-22 13:36:07 UTC

- fb29512 Merge pull request #53161 from Ch3LL/joyent_m2crypto
- 08d03e0 Add HAS_REQUIRED_CRYPTO var for m2crypto in joyent
- 16ef3d2 Merge branch '2019.2.1' into shadow_fed_fix
- 09ff867 Check for all non-word when calling secure_password
  - 334c93b Elevate token before creating symlink

**PR #53073:** (Ch3LL) salt-ssh: python binary exists before version check @ 2019-05-20 22:36:34 UTC

- 85e9b2f Merge pull request #53073 from Ch3LL/ssh_py3_log
- 383e781 Improve logging in salt-ssh gen_thin
- 4371434 salt-ssh: python binary exists before version check

**PR #52957:** (Ch3LL) Set default_flow_style=None in yaml.dump calls @ 2019-05-16 19:42:35 UTC
- bd02ea6 Merge pull request #52957 from Ch3LL/yaml_flow_style
- 5f6581a Merge branch '2019.2.1' into yaml_flow_style

**PR #53072:** (Ch3LL) Backport #52754 into 2019.2.1 @ 2019-05-16 19:29-22 UTC
- PR #52754: (garethgreenaway) [2018.3] Fixes to multiprocessing queue when using MacOS (refs: #53072)
- f410346 Merge pull request #53072 from Ch3LL/bp-52754-2019.2.1
- 13e5e55 The maximum for the multiprocessing queue on MacOS is 32767, so if we running on MacOS then we use that maximum.

**ISSUE #52817:** (waynew) unit.modules.test_telegram.TelegramModuleTest.test_post_message (refs: #52972)

**PR #52972:** (garethgreenaway) [2019.2.1] Fix to unit.modules.test_telegram @ 2019-05-15 07:50:13 UTC
- 06fa91b Merge pull request #52972 from garethgreenaway/52817_unit_modules_test_telegram_telegrammoduletest_test_post_message
- cea7131 Removing global declaration.
- 5bf9a95 Fixing lint.
- 4d3c46d fixing broken unit.modules.test_telegram test.

**PR #53025:** (Ch3LL) Change package name for suse pkg tests @ 2019-05-15 07:41:44 UTC
- d340ebc Merge pull request #53025 from Ch3LL/suse15_pkg_test
- 0a213ee Change package name for suse pkg tests

**PR #53020:** (Ch3LL) Change ssh tops log message to debug @ 2019-05-14 16:56:42 UTC
- c56bb0 Merge pull request #53020 from Ch3LL/ssh_tops
- cbbc764 Merge branch '2019.2.1' into ssh_tops

**PR #52973:** (twangboy) Fix integration.states.test_pip_state.PipStateTest.test_issue_2028_pip_installed_state on Windows @ 2019-05-13 20:56:28 UTC
- cee09aa Merge pull request #52973 from twangboy/fix_test_pip_state
- 21838a1 Merge branch '2019.2.1' into fix_test_pip_state

**PR #52986:** (Ch3LL) Revert "Make sure --run-expensive runtests.py arg works" @ 2019-05-13 19:38:17 UTC
- 05d374 Merge pull request #52986 from Ch3LL/expensive_revert
- 368c012 Revert "Make sure --run-expensive runtests.py arg works"
- cce263e Merge branch '2019.2.1' into fix_test_pip_state
- 351d415 Return path to Python instead of None
  - c0538d2 Change ssh tops log message to debug
  - e317186 Merge branch '2019.2.1' into yaml_flow_style

**PR #52968:** (s0undt3ch) [2019.2.1] Salt >= 2018.3.x supports Py3.7 @ 2019-05-12 21:44:57 UTC
- ee05da5 Merge pull request #52968 from s0undt3ch/2019.2.1
- 73c3726 Salt >= 2018.3.x supports Py3.7

**ISSUE #50310:** (xuhcc) acme.cert falsely reports changes (refs: #50400)
• PR #52796: (Ch3LL) Backport #50400 and #50402 into 2019.2.1 @ 2019-05-10 19:30:12 UTC
  - PR #50402: (xuhcc) Fix typo in salt.modules.acme (refs: #52796)
  - PR #50400: (xuhcc) Fix incorrect change reporting in acme.cert (refs: #50402, #52796)
  - cae51c2 Merge pull request #52796 from Ch3LL/bp-50400
  - 0c2e3e7 Merge branch '2019.2.1' into bp-50400
  - 1268e3e Merge branch '2019.2.1' into bp-50400
  - 09fa9e3 Fix typo
  - 9be5c0c Fix incorrect change reporting in acme.cert
    * 9a27fb3 Merge branch '2019.2.1' into yaml_flow_style

• PR #52770: (twangboy) Fix test_file_managed_should_fall_back_to_binary on Windows @ 2019-05-09 20:35:02 UTC
  - 20cccd8 Merge pull request #52770 from twangboy/fix_test_file
  - ac27e69 Merge branch '2019.2.1' into fix_test_file
  - 30a5093 Merge branch '2019.2.1' into fix_test_file
  - c08b10d Merge branch '2019.2.1' into fix_test_file
  - 340ee23 Pass encoding to _validate_str_list
    * 0d0e354 Fix yamldumper test for both py2/py3
    * 20bc954 Update docs for yamldumper test
    * bf648e5 Update tests/unit/utils/test_yamldumper.py
    * 70d578a Set default_flow_style=None in yaml.dump calls

• PR #52943: (Ch3LL) Fix elasticsearch state module: allow user to define empty aliases @ 2019-05-09 15:46:38 UTC
  - 4437764 Merge pull request #52943 from Ch3LL/fix_elasticsearch
  - 451fb7e Merge branch '2019.2.1' into fix_elasticsearch
  - ebff9b9 Fix elasticsearch state module: allow user to define empty aliases

• PR #52952: (s0undt3ch) [2019.2.1] More nox changes and test fixes @ 2019-05-09 15:03:07 UTC
  - 9b290b6 Merge pull request #52952 from s0undt3ch/merge-forward/2018.3-to-2019.2.1-cherry
  - a06d7ce We need to call the decorator
  - 77185af Partial revert since this is a class method
  - f5c5771 Lint fixes
  - 3e43c87 Revert "fix compare_versions method"
  - 0e139bf Fix GOLDEN_IMAGES_CL_BRANCH value
  - 12a9408 Add Py3.7 static requirements
  - 8e505fb Move tests to existing test modules
  - 4681609 tests/unit/config/__init__.py -> tests/unit/config/test_config.py
  - b1dc7f6 Pin to moto<=1.3.7 because of https://github.com/spulec/moto/pull/1952
  - 0ffe7ca We no longer test againt Ubuntu 14.04 which reached EOL
- 33743fc Don't traceback when trying to close a closed socket
- da2e147 Always cleanup the changed environ
- 087c74d No globals in tests, specially dictionaries!
- a814fc0 Fix underscore wart (and linter)
- 74b8f5f Fix deprecation warning in msgpack >= 0.5.2
- 962b116 Try to address dict changing during iteration
- c58af57 Tweak codeclimate settings for less noise
- 5bb7869 fix linter
- 0b81841 Cherry-pick test fix
- 99f9e1c fix compare_versions method

- **PR #52853: (s0undt3ch) [2019.2.1] Bring nox into 2019.2.1 @ 2019-05-09 09:52:42 UTC**
  - a510edf Merge pull request #52853 from s0undt3ch/merge-forward/2018.3-to-2019.2.1-cherry
  - a8f7b46 Test is not destructive.
  - 63663cf We no longer test againt Ubuntu 14.04 which reached EOL
  - 62574ee Typo
  - e3e3761 Proper english in requirements comments
  - e96a12 identical_signature_wrapper adds __wrapped__ to function globals
  - 10283b4 Upload coverage reports on full test runs
  - 6e0b61b Less flaky mine tests
  - 3709ed7 msgpack returns string_types
  - a36b15e Add regression test
  - ce782ff Fix non raw msg pack msg decoding
  - f193f0f Update Issue Template: questions removed
  - 4417095 Fix underscore wart (and linter)
  - e6c2ae4 Fix deprecation warning in msgpack >= 0.5.2
  - 6375944 Add ubuntu1804 to pr tests
  - 8fdb04d SIGKILL is not alwasy available use a local variable
  - 4d6b8da Fix linter
  - 759bccc Fix test_doc on windows by using grep yay!
  - 0ce086d Fix remaining failures on ubuntu 1404 and add to PR tests
  - fdf80fd Change py3 windows timeout from 6 to 8 hours
  - b0aa287 Fix missing class wart
  - 21ecb74 fix linter
  - 62c0f9f Skip tests when no libcloud
  - 1d92290 Fix unused import
  - 72cd0c91 Fix linter
- 238fd0f Fix broken pip state
- 89533ba Fix NOX_ENV_NAME
- 7cfc9e8 Fix NOX_ENV_NAME
- 2087c91 Fix NOX_ENV_NAME
- 2f1aff5 Rename kitchen-centos6-py3 to kitchen-centos6-py2
- 1eea990 Fix linter
- 52ca668 Skip tests when no libcloud
- 2cf4b98 Add centos-6-py2 and debain 8,9 py2 and 3 to PR tests
- 522599d Don't fail just because some random process died
- 34ce8f6 Ignore super not called
- b7ace9c Fix linter
- aceb6d3 Skip libcloud unit tests when no libcloud
- 7f3420b Install mock on Python < 3.6
- 28f9c10 Add moto to the windows dependencies
- 8cbec1c Pin kubernetes to <4.0
- 2acbf03 Make sure --run-expensive runtests.py arg works
- 22c9e20 Remove ref restricticon from kitche-salt
- 67095df Add 'runFull' build parameter for PR tests
- 12d8d35 Stop w32time before and start after testing
- 7f1c22c Skip tests that fail on Windows
- f4ae97f Upgrade etcd to > 0.4.2
- 381f5fe Limit and reduce the amount of log records sent over the wire
- 0c94b5d More entries to ignore
- c3a21f5 As a script, not as a module
- 8948b69 Include COVERAGE_FILE as an env variable.
- 0af561e Each generated script is now prepared for code coverage
- 294d6f4 Use the system's path separator
- e52ab87 Always combine and generate the XML coverage report
- 666ca9f Fix proxy minion startup issue on the test suite
- 7838ace impacket does not support Py3
- ba8d0fe Allow --install-only to gather the required information
- eed7d68 Create nox lint virtualenvs before running them
- e9e57cf Syndic roster not in 2017.7.9
- 111c63a4d Create the roster even when not running ssh
- 11c02a0 Fix unit.test_loader.LoaderGlobalsTest.test_states
- 8694db1 Fix windows tests
- 82e9ac5 Avoid race condition in even assertions
- 9443451 Revert part of 927219c since it is not a fix
- 5fee762 Fix timeout logic
- 517650f check timeout when queue empty
- 7c0a9af fix linter
- 961dc40 Ignore missing variable in six module
- 0f5a7f0 Fix typo
- 6c8c418 Do not limit event assert to first event
- 3042292 Wait longer for ping reaction
- 8c10f5f Fix xml block causing docs to fail
- 6e578ca Add a nox session for the Jenkins tornado jobs
- 43321e8 Add a cloud nox session for both runtests and pytest
- b6b4e95 Lint cleanup
- 0670614 Add tests for wraps
- 1670b5d Use functools.wraps with decorators
- 5ae263c Update static requirements for 2018.3 branch
- 3482c4d Disable code coverage uploads.
- 0e5bc67 Lint fixes
- 337c737 Update CI jobs to point to 2018.3
- 72e8603 Skip test if required crypto libs are not available
- e6bc9f8 Default to Cryptodome, fallback to PyCrypto
- b2b0764 Be aware of the different path separators
- 7e79b18 We need to make sure the virtualenv path entry is removed when searching
- ff6d3c6 We don't need to be root to run these tests
- 5965ab4 Disable progress bars on pip installs
- f86a44e Use the real python executable path when running within a virtualenv
- 3d407e8 Add a helper to return the path to the real python executable
- ea9d246 We must also provide \texttt{venv\_bin} when running within a virtualenv
- 31e91b0 Fix pip tests, in particular under windows
- 493f493 Don't fail if pkg\_resources is not importable
- a1eb400 Specify the SHA we need
- 0b01f21 Let's fully unload pip
- 0b6f848 Fix docker entries
- 870b899 Remove unused argument
- 1656cb4 Disable re-running failed tests for now
- 6db4141 Also ignore multiprocessing coverage files
- Actually write the lint reports.
- Try to make sure some pip internal functions are always present in sys.modules after reloads.
- Try and address the fact that some python packages are only provided by the distro.
- These tests aren’t destructive.
- Don’t fail the build if the issue was sending a slack notification.
- Don’t try to change ownership on non-existing paths.
- More insight(context) on failure reports.
- Lock supervisor to 3.3.5, last known working(passing tests) version.
- Watch out for too long shebang’s.
- The output is important to know why it failed.
- Strings and integers are not comparable under Python 3.
- Be verbose in a CI context.
- Fix failed tests re-run logic.
- Blacklist enum34 on Py>=3.4. Update requirements.
- Update PR CI jobs for nox.
- Blacklist pycrypto and install pycryptodome instead.
- Ignore the generated docs archive.
- Update compiled requirements.
- Add TCP transport nox sessions.
- Compile requirements for the TCP transport.
- Throw error when running either on Py<2.7 or Py>=3.7.
- Don’t repeat failed tests on missing/empty failed test files.
- We currently only support running lint under Py2.7.
- Remove dead code.
- Don’t require six.
- Add nox env to build docs.
- Lock docs python requirements.
- Fix lint issues under tests.
- Fix lint issues on salt.
- Add nox session/env/target to run lint against Salt and its test suite.
- Lock lint requirements.
- Back to +apache-libcloud==1.0.0 and skip windows for now.
- Bump apache-libcloud requirement because 1.0.0 fails to install on windows.
- Remove requirements for platforms which aren’t tested under Py3.
- Recompile requirements.
- Remove pycryptodome from compiled requirements files.
– 75693e5 Use pycryptodomex on windows and PyCrypto on the rest
– 4a9c19c Update(fix) requirements
– 33a3467 We don't test OSX nor Windows under Py3.4
– fd44fce We want a more verbose pip-compile output
– c2ae2d5 We now compile requirements for each of the supported minor version
– 6ee1260 Static requirements are now placed on py<major>-.<minor> subdirectories
– 3504804 The required crypto library is pulled in from zeromq.txt or raet.txt
– 7c2fe16 Instead of quoting session parameters, proxy nox sessions
– d3ae77b Add separate crypto sessions
– 0399620 Parametrize the transport
– d33fd03 Update/Generate static requirements to new layout
– 52ac533 Add pre-commit config to generate static requirements
– 3cfcb13 Be aware of the new static requirements layout
– dc7e16a Don't lock the docker requirement. It's not locked on the other platforms
– 5476ba2 Kubernetes 3.0.0 does include the requirements files. pip-compile chokes on that
– 79a8261 Previously generated requirements were py2 only
– 1e29666 IOFLO is pulled in from the raet requirements
– 4945e35 Fix pylint on 2017.7.9
– 036bf68 Rerun failed tests
– 03a9601 Ignore .nox directory
– 50cb630 We have long files
– db2392f Update CodeClimate settings
– 399c80e Fix integration.client.test_kwarg test timeouts

• ISSUE #52836: (Ch3LL) unit.utils.test_args.ArgsTestCase.test_argspec_report failing (refs: #52852)
• PR #52852: (garethgreenaway) [2019.2.1] Fixes to unit.utils.test_args.test_argspec_report @ 2019-05-07 19:25:48 UTC
  – 77355e2 Merge pull request #52852 from garethgreenaway/52836_test_argspec_report_failing
  – eee5a38 Merge branch '2019.2.1' into 52836_test_argspec_report_failing
• PR #52845: (Ch3LL) Backport #52780 into 2019.2.1 @ 2019-05-07 16:27:21 UTC
  – PR #52780: (sbrennan4) Handle ipv6 in _netlink_tool_remote_on (refs: #52845)
  – dcc5fde Merge pull request #52845 from Ch3LL/bp-52780
  – dff09b Merge branch '2019.2.1' into bp-52780
• PR #52851: (Ch3LL) Reload matcher loader when ext_pillar_first set @ 2019-05-07 13:12:07 UTC
  – 2e4f296 Merge pull request #52851 from Ch3LL/matcher_ext_pillar
  – bdca5d Add docs for new reload kwarg
- fc70884 Reload matcher loader when ext_pillar_first set
- 8ac74e2 Merge branch '2019.2.1' into bp-52780
- 226c7ce Merge branch '2019.2.1' into bp-52780
- c1ea84 Add test
- 69fe65b Use rsplit
  * 8fdc48c Removing create_autospec and having salt.utils.args.argspec_report run against the _test_spec function directly. Depending on the python version, create_autospec gives different results and cause the test to fail. The test is now more accurate at testing the arguments for the function.

- PR #52842: (s0undt3ch) libcrypto.OpenSSL_version_num might be a callable @ 2019-05-06 17:00:37 UTC
  - cc7a0d1 Merge pull request #52842 from s0undt3ch/2019.2.1
  - a944017 libcrypto.OpenSSL_version_num might be a callable

- PR #52839: (twangboy) Add support for EC2 @ 2019-05-04 17:28:54 UTC
  - b625a6a Merge pull request #52839 from twangboy/fix_test_grain
  - 1cb9372 Add support for EC2

- ISSUE #51982: (arsiesys) topic (minion_id) need to be encoded before being hash and sent using zeroMQ (refs: #51983)

- PR #52767: (Ch3LL) [2019.2.1] Add tests to PR #51983 @ 2019-05-03 08:35:27 UTC
  - PR #51983: (arsiesys) encode topic before using hashlib (refs: #52767)
  - 6002939 Merge pull request #52767 from Ch3LL/zmq_filter_test
  - 1ee8f37 Merge branch '2019.2.1' into zmq_filter_test
  - d74b6ee Merge branch '2019.2.1' into zmq_filter_test
  - 3210274 Fix linter warnings
  - e7c9d6e increase timeout when gathering results
  - 784786d Add zmq_filter unit tests
  - 805c5ee encode topic before using hashlib

- PR #52827: (twangboy) Add pymssql dependency for Windows builds @ 2019-05-03 08:21:40 UTC
  - 5996932 Merge pull request #52827 from twangboy/add_pymssql
  - 6f0b8e2 Add pymssql dependency for Windows builds

- ISSUE #52717: (Ch3LL) debian9 tests segmentation fault (refs: #52797)

- PR #52797: (garethgreenaway) [2019.2.1] Only run the libcrypto init if less than OpenSSL 1.1.0 @ 2019-05-03 05:12:31 UTC
  - e3918c5 Merge pull request #52797 from garethgreenaway/52717_debian_tests_segmentation_fault
  - 7ab0961 Merge branch '52717_debian_tests_segmentation_fault' of github.com:garethgreenaway/salt into 52717_debian_tests_segmentation_fault
    - f8d816e Merge branch '2019.2.1' into 52717_debian_tests_segmentation_fault

- PR #52771: (twangboy) Fix test_gpg tests on Windows @ 2019-05-02 13:30:18 UTC
  - b68544f Merge pull request #52771 from twangboy/fix_test_gpg
- c7f45c2 Pass encoding to stringutils.to_unicode

- **PR #52783**: (Ch3LL) Fix boto_apigateway tests for PyYAML 5.1 @ 2019-05-02 13:26:34 UTC
  - 316d05b Merge pull request #52783 from Ch3LL/fix_boto_yaml
  - cde29cb Fix boto_apigateway tests for PyYAML 5.1
  - 6ffba5 Fixing lint.
  - e24f2f8 Only run the libcrypto init if less than OpenSSL 1.1.0.

- **PR #52769**: (twangboy) Remove domain grain from tests for Windows @ 2019-04-30 21:14:26 UTC
  - 3509465 Merge pull request #52769 from twangboy/fix_test_core
  - 0049f85 Remove domain grain from tests

- **PR #52768**: (twangboy) Remove pchanges... again... @ 2019-04-30 20:24:27 UTC
  - 30dc14b Merge pull request #52768 from twangboy/fix_test_win_dacl
  - 123607 Remove pchanges... again...

- **PR #52753**: (twangboy) Skip test_gen_thin_compression_fallback_py3 @ 2019-04-30 03:36:27 UTC
  - 3e46f51 Merge pull request #52753 from twangboy/skip_test_gen_thin
  - 811b381 Skip test_gen_thin_compression_fallback_py3

- **ISSUE #52721**: (Ch3LL) unit.cloud.clouds.test_ec2 test failing (refs: #52736)

- **PR #52736**: (dwoz) Skip password decryption test when no libraries available @ 2019-04-29 17:07:56 UTC
  - 6bca94 Merge pull request #52736 from dwoz/ec2test
  - 04ad027 Merge branch '2019.2.1' into ec2test

- **PR #52624**: (tanlingyun2005) fix TypeError: argument of type int is not iterable @ 2019-04-29 13:15:42 UTC
  - 9a1ed78 Merge pull request #52624 from tanlingyun2005/2019.2.1
  - 2c68e7e add test case to tests/unit/cli/test_batch.py
  - cb7742e Merge branch '2019.2.1' into 2019.2.1
  - c94300 Merge branch '2019.2.1' into 2019.2.1
  - d4abddd fix TypeError: argument of type int is not iterable
  - ed908b3 Merge branch '2019.2.1' into 2019.2.1
  - 463b60e Merge branch '2019.2.1' into 2019.2.1
  - 65ee219 Merge branch '2019.2.1' of https://github.com/tanlingyun2005/salt into 2019.2.1
    * f71168d Merge branch '2019.2.1' into 2019.2.1
  - 509c797 bug fix salt/cli/batch.py
  - 211915c fix salt/cli/batch.py TypeError: argument of type int is not iterable
  - 070ae84 fix TypeError: argument of type int is not iterable
    * b770f96 Skip test requiring crypto when none available
    * e52b390 Warn when password decrypton requested but not possible

- **PR #52696**: (Ch3LL) Backport #50087 into 2019.2.1 @ 2019-04-25 20:33:13 UTC
  - PR #50087: (rbthomp) Fix applying of attributes for returner rawfile_json (refs: #52696)
- 806307a Merge pull request #52696 from Ch3LL/bp-50087
- 66e97e7 Fix applying of attributes for returner rawfile_json

- **PR #52659:** (twangboy) Fix issues with the win_file tests @ 2019-04-22 23:34:36 UTC
  - 174f558 Merge pull request #52659 from twangboy/fix_test_win_file
  - 915c780 Fix issues with the win_file tests

- **PR #52655:** (dwoz) Parse chattr version and fix test case @ 2019-04-22 01:46:29 UTC
  - d1a61a6 Merge pull request #52655 from dwoz/cron_test_fix
  - e69fca5 Fix typo
  - 859d088 Merge remote-tracking branch 'origin/cron_test_fix' into cron_test_fix
    - 727bb90 Merge branch '2019.2.1' into cron_test_fix

- **PR #52601:** (Ch3LL) Cherry-Pick #52415 into 2019.2.1 @ 2019-04-21 19:33:03 UTC
  - **PR #52415:** (Ch3LL) Backport #52415 into 2018.3 (refs: #52601)
  - **PR #49832:** (terminalmage) Replace pchanges with changes to make onchanges/prereq work in test mode (refs: #52415)
    - f7d823c Merge pull request #52601 from Ch3LL/cp-52415
    - ecd6802 Merge branch '2019.2.1' into cp-52415
    - 538d56c Remove pchanges from win_dacl
    - 81b865f use same newfile message on linux for windows file state
    - 93ba0d88 Update dict correctly in file state
    - f3c7127 remove pchanges for windows file modules
    - fb3b75d Fix tests for pchanges backport into 2018.3
    - 0f296bb Update kernelpkg test to reflect pchanges removal
    - 885d66f Update file.touch unit tests to reflect addition of changes in test mode
    - 4bc5f20 Add integration tests for test mode onchanges/prereq
    - ed214c4 Make it possible to use prereq with test and saltmod state mods
    - ceb3f3d Add repack_state_returns to TestCase
    - 982e693 Add exception logging in flaky decorator
    - 0ba0ddf Add test mode changes to file.touch state
    - 6db2beb Replace "pchanges" with "changes" to fix onchanges/prereq requisites
      - 169c2d5 Chattr version py3 fix
      - cf88c27 Fix linter issues
      - 0fa007d Parse chattr version and fix test case

- **ISSUE #52508:** (Ch3LL) integration.modules.test_publish test failures (refs: #52645)

- **PR #52645:** (dwoz) Fix salt.modules.publish and salt.states.x509 tests @ 2019-04-20 08:17:19 UTC
  - af4f204 Merge pull request #52645 from dwoz/test_fixes
  - 9b6f9f9 Clean up cruf
- c3971a5 Fix salt.modules.publish and salt.states.x509 tests

- **PR #52629** (dwoz) Fix event assertion race condition @ 2019-04-19 19:03:20 UTC
  - **PR #52540** (dwoz) Fix race condition in event assertion (refs: #52629)
  - 0a4d2d9 Merge pull request #52629 from dwoz/ping_wait_2019.2.1
  - c001022 Fix linter
  - 4236f9 Fix vent assertion race condition

- **PR #52619** (dwoz) Remove unused method from pytest engine @ 2019-04-18 23:45:35 UTC
  - 4859e6c Merge pull request #52619 from dwoz/pytest_engine_2019.2.1
  - 105784a Remove unused method from pytest engine

- **PR #52614** (Ch3LL) [2019.2.1] Update integration.modules.test_network.NetworkTest.test_network_ping... @ 2019-04-18 21:54:28 UTC
  - 77943e5 Merge pull request #52614 from Ch3LL/cp-test_network-2019.2.1
  - 27c79d2 Update integration.modules.test_network.NetworkTest/test_network_ping test address

- **ISSUE #32245** (tkwilliams) git_pillar should permit automatic mapping of environment to branch a-la gitfs (refs: #50768)

- **PR #52615** (twangboy) Bring 51661 into 2019.2.1 @ 2019-04-18 21:53:35 UTC
  - **PR #51661** (sathieu) git_pillar: Fix all_saltenvs on base env (refs: #52615)
  - **PR #51597** (sathieu) git_pillar: Fix all_saltenvs on base env (refs: #51661)
  - **PR #50768** (sathieu) git_pillar: Add support for all_saltenvs parameter (refs: #51597, #51661)
  - c6b498e Merge pull request #52615 from twangboy/gitfs_2019.2.1
  - d952674 Merge branch '2019.2.1' into gitfs_2019.2.1

- **ISSUE #52547** (cbosdo) virt.purge throws a libvirt exception on Xen hypervisor (refs: #52548)

- **PR #52548** (cbosdo) Virt purge fix @ 2019-04-18 20:07:36 UTC
  - 8ee15a9 Merge pull request #52548 from cbosdo/virt-purge-fix
  - 6ca8f4b Try/except undefineFlags() as this operation is not supported on bhyve
    - 5a0464b Bring 51661 into 2019.2.1

- **PR #52591** (Ch3LL) [2019.2.1] Update test_schema to mirror the new ValidationErrors in 3.0.0 @ 2019-04-18 16:34:22 UTC
  - e03aed5 Merge pull request #52591 from Ch3LL/fix_jsonschema_2019.2
  - e09be842 Update test_schema to mirror the new ValidationErrors in 3.0.0

- **ISSUE #52525** (lomeroe) deserializer_opts are not passed the serializer in file.serialize (refs: #52526)

- **PR #52526** (lomeroe) Fix use of deserializer_opts in file.serialize @ 2019-04-17 14:08:52 UTC
  - 21d6365 Merge pull request #52526 from lomeroe/deserializer_opts_fix
  - ea0520c update test for serialization opts
  - 84ff03a Correct attempting to use the serializer_name to pull deserializer_opts when deserializer_name is used as the key in the deserializer_options dict.

- **ISSUE #49147** (furgerf) Log filled with "Exception occurred while Subscriber handling stream: Already reading" (refs: #51963)
**PR #52570: (DmitryKuzmenko) Simplify IPCClient and prevent corrupt messages (Turn 2) 2019.2 @ 2019-04-17 14:03:02 UTC**

- **PR #52564: (DmitryKuzmenko) Simplify IPCClient and prevent corrupt messages (Turn 2) (refs: #52570)**
- **PR #52445: (dwoz) Simplify IPCClient and prevent corrupt messages (refs: #52564)**
- **PR #51963: (DmitryKuzmenko) Allow multiple instances of IPCMessageSubscriber in one process (refs: #52564)**

- e522ffe Merge pull request #52570 from DSRCorporation/bugs/revert_51963_2019.2
- fabbcac A couple of race conditions fixes and a test update.
- 9c85734 Drop singleton from IPCClient
- 7cf6d54 Revert "Support parallel work of multiple IPCMessageSubscribers in one process"
- 7f26e76 Revert "Update doc conf with the new import tornado.queues"
- 69e9416 Revert "Minor: Fix typo in docstring"

**ISSUE #52449: (Ch3LL) integration.cloud.clouds.test_gce.GCETest.test_instance_extra failure (refs: #52551)**

**PR #52551: (garethgreenaway) [2019.2] Marking the two tests in test_gce as flaky @ 2019-04-17 14:00:39 UTC**

- b173406 Merge pull request #52551 from garethgreenaway/52449_test_gce_random_failures
- 28af717 Marking the two tests in test_gce as flaky.

**ISSUE #51842: (mattLLVW) salt.auth.django docs use wrong model name (refs: #52553)**

**PR #52553: (mattLLVW) fix: #51842 @ 2019-04-17 13:59:45 UTC**

- 8352362 Merge pull request #52553 from mattLLVW/fix_django_auth_docs
- 3baedf fix: #51842

**ISSUE #52134: (sploenix) Regression: Include list of pillar files under different keys in 2019.2 (refs: #52490)**

**ISSUE #22063: (jeanpralo) Wildcard inside top.sls file for pillar (refs: #52490)**

**PR #52490: (dwoz) Fix pillar include regression @ 2019-04-17 13:54:39 UTC**

- 9faa49c Merge pull request #52490 from dwoz/issue_52134
- 876dd18 Fix merge wart
- 2ed650b Merge remote-tracking branch 'saltstack/2019.2' into issue_52134
- b0af11f Run include tests when pillar source changes
- 307cc6 Fix pillar tests
- 1a33bde import __future__.absolute_import
- 5dc5de9 Use file encoding and add docstring
- e84cd41 Fix pillar include wart
- c7ff9496 Add pillar include tests
- 7745242 Revert "Fix #22063: pillar wildcard support include"

**PR #52552: (twangboy) Bring 52170 into 2019.2 @ 2019-04-17 13:54:17 UTC**

- **PR #52170: (twangboy) Fix issue when task doesn't have delay_random defined (refs: #52552)**
- b0c0237 Merge pull request #52552 from twangboy/fix_win_task_2019.2
- fd19cca Remove some warts in the docs
- `deb0b10` Fix some lint
- `a279d45` Final doc fixes
- `58f0cd2` Fix docs... attempt 6
- `a66716e` Fix docs... attempt 5
- `f6f3381` Fix docs... attempt 4
- `18cfc15` Fix docs... attempt 3
- `c691e0d` More doc fixes
- `e01077b` Fix docs issue... maybe...
- `b649495` Honor 80 character line limit
- `eba4507` Bring 52170 into 2019.2

- **PR #52528**: (Ch3LL) [2019.2] Merge forward from 2018.3 to 2019.2 @ 2019-04-17 13:53:46 UTC
  - `cc0cd5d` Merge pull request #52528 from Ch3LL/merge-2019.2
  - `87cf385` increase timeout on test_state for windows
  - `3442202` Increase timeout for test_kwarg tests
  - `2c3ff2f` Merge branch '2019.2' into merge-2019.2

- **PR #52534**: (twangboy) Add TLS support up to TLS 1.2 @ 2019-04-13 22:56:41 UTC
  - `e91240b` Merge pull request #52534 from twangboy/tls_support_2019.2
  - `9ec54c4` Add TLS support up to TLS 1.2
    - `474efa1` Fix pylint and state test failure
    - `048a82e` Merge branch '2019.2' into merge-2019.2

- **PR #52536**: (twangboy) Bring #52191 into 2019.2 branch @ 2019-04-12 21:31:23 UTC
  - **PR #52191**: (twangboy) Fix issue where version doesn’t detect when check_remote=True (refs: #52536)
  - `2c42e4d` Merge pull request #52536 from twangboy/fix_choco_2019.2
  - `b394ad5` Bring #52191 into 2019.2 branch
  - `795a7f6` Fix windows tests - increase timeout
  - `c70772c` Fix linux state tests- add new comment
  - `2941567` Merge branch '2018.3' into '2019.2'
  - `262516c` Merge pull request #52191 from twangboy/fix_choco_retcode
    - `7aef2d3` Merge branch '2018.3' into fix_choco_retcode
    - `b434b74` Handle new enhanced retcode

- **PR #52046**: (twangboy) Bring #52046 from twangboy/use_reg_timezone
  - `6c8e970` Merge branch '2018.3' into use_reg_timezone
  - `d0987e6` Merge branch '2018.3' into use_reg_timezone
  - `1b0bcf2` Merge branch '2018.3' into use_reg_timezone
  - `b466f8a` Merge branch '2018.3' into use_reg_timezone
  - `34bdae5` Merge branch '2018.3' into use_reg_timezone
Salt Documentation, Release 3003.3

- 9a8afa6 Fix tests, add null byte test
- 59b1d4f Revert back to using reg to get timezone
  - 0d09608 Merge pull request #52396 from dmurphy18/fix_aix_ssh
    - 8bfa340 Correct typo
    - 6d98577 Altered code to support salt-ssh on AIX
  - 576478e Merge pull request #52473 from Ch3LL/bp-49437
    - 781385f Merge branch '2018.3' into bp-49437
    - 3a3114d Fix merge conflict wart
    - bbfd412 Merge branch '2018.3' into bp-49437
    - 48ee82d Merge branch '2018.3' into bp-49437
    - f66d474 Add support to avoid calling refresh_db in opkg.del_repo
  - d830bc6 Merge pull request #52493 from dwoz/ping_reaction_test
    - 8b05e77 Merge branch '2018.3' into ping_reaction_test
    - 7083d21 Merge branch '2018.3' into ping_reaction_test
    - 7c963c1 Merge branch '2018.3' into ping_reaction_test
    - 75ddeb3 fix linter
    - e31d2e fix reactor ping test
  - 9b7a0d1 Merge pull request #52505 from bloomberg/2018_zmq_uri
    - b682ec5 transport.zmq: fix bug introduced by b7dfe75cf2
  - 452bbbe Merge pull request #52512 from dwoz/supervisord_2018.3
    - cd5cd7d The exit code matters.
  - 53228ae Merge pull request #52475 from Ch3LL/bp-49464
    - a891fd3 Make opkg.del_repo be compatible with pkrepo state module
  - 6e79e24 Merge pull request #52500 from terminalimage/invalid-archive-source
    - e9d175b Fix traceback when invalid source passed to archive.extracted
  - 2df74ca Merge pull request #52476 from bloomberg/win_cmd_2018
    - 0e0c42e 2018 backport: modules.cmdmod: handle windows environ better
  - 4dfb2f8 Merge pull request #52474 from Ch3LL/bp-49984
    - c8d547e Use prune option in Pygit2 provider when fetching
  - d699485 Merge pull request #52393 from waynew/52087-mine-delete-test-enhancements
    - e3f5be3 Use uncommon item in mine delete test
  - 89bd258 Merge pull request #52445 from dwoz/ipc Fixes_2018.3
    - 1bdaf29 Ensure exceptions in service future are handled
    - c7ad732 Use six.reraise for py3 compatatability
    - 29999b0 Close message service on subscriber close
    - 47203f7 Fix ipc unittests
• 2b35437 Fix linter issues
• 503edd2 Remove IPCClient singleton
• b374034 Re-raise queued exceptions with traceback

• ISSUE #51879: (whytwolf) 2019.2.0 binary pillar unicode error returns. (refs: #52334)
• PR #52334: (waynew) 51879 fix binary pillar return error @ 2019-04-12 03:45:17 UTC
  – 6eb2bce Merge pull request #52334 from waynew/51879-fix-binary-pillar-return-error
  – ead56e Merge branch ‘2019.2’ into 51879-fix-binary-pillar-return-error
  – 2a971d lint cleanup
  – 28c2945 keep_pillar not needed
  – fb010c0 Add binary pillar to the docs
  – f2aef9 Assume file contents are binary
  – 2b8c782 Test gpg render with replace newlines
  – c4b385b Allow binary pillar data
  – 604b671 Return binary data from gpg renderer
  – 32aefab Ignore vscode and fix swap ignore

• ISSUE #52041: (arsiesys) 2019.2 influxdb_retention_policy.present broken when used extra arguments (refs: #52043)
• PR #52043: (arsiesys) fix missing client_args in influxdb module @ 2019-04-12 03:43:03 UTC
  – 2d59705 Merge pull request #52043 from arsiesys/fix_influxdb_state_rp
  – e617c5b Merge branch ‘2019.2’ into fix_influxdb_state_rp
  – 761680 fix missing client_args in influxdb module

• PR #52146: (twangboy) Add missing symlink test @ 2019-04-12 00:51:16 UTC
  – 1b969c3 Merge pull request #52146 from twangboy/fix_test_symlink_2019.2
  – 8e1c882 Merge branch ‘2019.2’ into fix_test_symlink_2019.2
  – a492542 Merge branch ‘2019.2’ into fix_test_symlink_2019.2
  – 401c253 Merge branch ‘2019.2’ into fix_test_symlink_2019.2
  – cce6200 Fixing lint
  – c7c009 Merge branch ‘2019.2’ into fix_test_symlink_2019.2
  – 3ea05a Merge branch ‘2019.2’ into fix_test_symlink_2019.2
  – 83bed46 Add missing symlink test

• PR #52341: (cbosdo) virt.pool_running: fix pool start @ 2019-04-12 00:14:52 UTC
  – 7a1b8ca Merge pull request #52341 from cbosdo/virt-state-fixes
  – 89f0bd8 Merge branch ‘2019.2’ into virt-state-fixes
  – 25b9681 virt.pool_running: fix pool start
  – 30981d2 Remove unneeded kwargs in virt states
  – 0871c02 virt: allow defining the VM type and arch when creating it
- 1c65d25 Updating running domains in virt.running
- 13d7819 Add missing virt states unit tests
- 0681d86 virt.running support for all virt.init options
- c6a444b Add test case for virt.running
- 2db7a98 Let virt running state provide errors

- **ISSUE #52350** (Ch3LL) Re-Add Python 2 unicode string literals in YAML renderer (refs: #52427)
- **PR #52427** (garethgreenaway) [2019.2] Support for old yaml render @ 2019-04-12 00:06:37 UTC
  - 6040282 Merge pull request #52427 from garethgreenaway/52350_readd_and_gate_unicode_string_literal_support
  - 82f010a Merge branch '2019.2' into 52350_readd_and_gate_unicode_string_literal_support
  - ae81fee Merge branch '2019.2' into 52350_readd_and_gate_unicode_string_literal_support
  - b618d44 Merge branch '2019.2' into 52350_readd_and_gate_unicode_string_literal_support
  - b191bc0 Merge branch '2019.2' into 52350_readd_and_gate_unicode_string_literal_support
  - 38a9818 Merge branch '2019.2' into 52350_readd_and_gate_unicode_string_literal_support
  - 2767984 Removing logging entry
  - 71cd303 Adding missing yamlloader_old.py
  - f84aa4 Adding support back in with, a gated configuration option, for the old YAML Loader.

- **ISSUE #51865** (magenbrot) salt.match.search_by resulting in 'None' since 2019.2 (refs: #52234)
- **PR #52234** (garethgreenaway) [2019.2] Fixes to matchers when used in pillar @ 2019-04-12 00:05:48 UTC
  - 05ba7c5 Merge pull request #52234 from garethgreenaway/51865_match_search_by_master
  - 1760245 Merge branch '2019.2' into 51865_match_search_by_master
  - d50f011 Merge branch '2019.2' into 51865_match_search_by_master
  - b6cbb60 Merge branch '2019.2' into 51865_match_search_by_master
  - 799a08b Merge branch '2019.2' into 51865_match_search_by_master
  - 21891d6 Merge branch '2019.2' into 51865_match_search_by_master
  - a2173d7 Fixing a typo where attempting to get a list from __opts__ instead of an individual item
  - 6a5b5b2 swapping out if...else approach for __opts__.get approach.
  - aa2c626 With the change/addition of the matcher subsystem in 2019.2, the match.search_by when used in pillar broke when targetting the minion that was also the salt master. This was caused by the id in __opts__ being used in all cases. This change updates the glob_match function to use the preserved minion_id of the master if it is available so that targeting works as expected.

- **PR #52160** (cbosdo) Virt whitespace fix @ 2019-04-12 00:04:25 UTC
  - 80d7aee Merge pull request #52160 from cbosdo/virt-whitespace-fix
  - fd1f539 Merge branch '2019.2' into virt-whitespace-fix
  - b297e7d virt: handle whitespaces in VM names

- **ISSUE #51832** (nocturo) pillar include stopped working (refs: #52008)
- **PR #52008** (waynew) Allow / in pillar includes @ 2019-04-12 00:02:40 UTC
  - b551bbd Merge pull request #52008 from waynew/51832-re-allow-slash-includes
- ee3115f Allow leading dots and / as pillar separators
- 29c676d Ensure _closing exists
- eb517e1 Swap '/' for '.' when matching

**ISSUE #51821:** (OrangeDog) 'comment' is an invalid keyword argument for 'test.fail_without_changes' (refs: #51937)

**PR #51937:** (garethgreenaway) [2019.2] Fix to test state functions to allow arguments that mod_watch uses @ 2019-04-11 23:57:44 UTC

- d3159cb Merge pull request #51937 from garethgreenaway/51821 Ensure_result_comment_changes_valid_arguments
- 86c63b5 Merge branch '2019.2' into 51821_ensure_result_comment_changes_valid_arguments
- 0966d61 Merge branch '2019.2' into 51821_ensure_result_comment_changes_valid_arguments
- 5527dff Ensure the comment, changes, and result are valid arguments for various test state functions as they are valid arguments for mod_watch.

**ISSUE #51818:** (syphernl) salt.nacl.dec: expected str, bytearray, or unicode (refs: #51913)

**PR #51913:** (garethgreenaway) [2019.2] Fixes to utils/nacl.py @ 2019-04-11 23:56:57 UTC

- 7be0428 Merge pull request #51913 from garethgreenaway/51818 Fix_when_sk_is_empty
- 55d7488 Merge branch '2019.2' into 51818_fix_when_sk_is_empty
- b2128e8 Merge branch '2019.2' into 51818_fix_when_sk_is_empty
- cb01a1b Merge branch '2019.2' into 51818_fix_when_sk_is_empty
- 1a1e333 Merge branch '51818_fix_when_sk_is_empty' of github.com:garethgreenaway/salt into 51818_fix_when_sk_is_empty

- 102f0a3 Merge branch '2019.2' into 51818_fix_when_sk_is_empty
- 7fd04ec Merge branch '2019.2' into 51818_fix_when_sk_is_empty
- dd23069 Adding tests for NACL changes.
- c31f51 Correctly handle the situation when with the secret key or public key values are empty.

**ISSUE #52116:** (lordcirth) host.present always returns None when in test=True (refs: #52399)

**PR #52399:** (waynew) Bring host.present in line with Salt's test conventions @ 2019-04-11 23:32:28 UTC

- d6f0971 Merge pull request #52399 from waynew/52116-fix-host-present-fail
- 8440ae1 Merge branch '2019.2' into 52116-fix-host-present-fail
- dd002fd Fix linter
- 9d1b2a0 Only return None on host.present changes when test

**PR #52477:** (mattp-) 2019.2 backport #52472 modules.cmdmod: handle windows environ better @ 2019-04-11 23:13:34 UTC

- PR #52472: (mattp-) modules.cmdmod: handle windows environ better (refs: #52476, #52477)
- 7c709cf Merge pull request #52477 from bloomberg/win_cmd_2019
- 736a437 2019.2 backport: modules.cmdmod: handle windows environ better

**ISSUE #49661:** (ephreal) Issues starting salt-master or salt-minion with openssl-1.1.1-1 (refs: #51655)

**PR #52423:** (bbinet) Remove unused salt.crypt import @ 2019-04-11 21:44:41 UTC

- PR #51655: (garethgreenaway) [2017.7] Removing unused salt.crypt imports (refs: #52423)
– b0d3c76 Merge pull request #52423 from bbinet_unused-salt-crypt
– dc330e7 Merge branch '2019.2' into unused-salt-crypt
– 4b26ea Merge branch '2019.2' into unused-salt-crypt
– 9607c38 Also remove unused salt.crypt import in pillar/_init_.py
– 49f2631 Remove unused salt.crypt import

• PR #52506: (mattpp) 2019.2: transport.zmq: fix bug introduced by b7df7e75cf2 @ 2019-04-11 21:12:51 UTC
  – 4bb9185 Merge pull request #52506 from bloomberg/2019_zmq_uri
  – 1e9dd7f transport.zmq: fix bug introduced by b7df7e75cf2

  - 057d415 Merge branch '2018.3' into win_disks
  - d419e3 Fix some lint
  - aa61dab Add tests
  - 9f6ec53 Add all attached drives to the disks grain
* 48d298c Merge pull request #51918 from Ch3LL/bp-52004
  - b4e3183 Fixed comparison of None with constants
* aa82fcc Merge pull request #52029 from Ch3LL/bp-52003
  - fcac9f3 Skip Test on Non-Windows systems
  - f42d17d Derive from LoaderModuleMockMixin
  - 5052017 Define __opts__ dict
  - b7b571e Define __opts__ dict
  - ee3ad08 Define __opts__ dict
  - 64d8451 Use default file module
  - 886ef19 Fix name of makedirs__ method
  - 4cc5f77 Check for path to be a symlink
* 5ff1725 Merge pull request #52028 from Ch3LL/bp-50384
  - 6493eb0 Fix issue #50381
  - f2b4ec8 Don't log debug messages during close
* 7ab1281 Merge pull request #51936 from gtmanfred/2018.3
30.2. Previous Releases

- faa3471 Merge branch '2018.3' into 2018.3
- 2ebfa22 Merge pull request #51967 from twangboy/add_compat_tests
  - 2056578 Merge branch '2018.3' into add_compat_tests
  - e85f004 Merge branch '2018.3' into add_compat_tests
  - ea69062 Fix lint
  - eb984f5 Add unit tests for _compat.py
- c8e2971 Merge pull request #51980 from Ch3LL/merge-2018.3
  - 9adc19e Merge branch '2017.7' into '2018.3'
  - bfaa6a9 Merge pull request #51895 from twangboy/win_update_2017.7
  - b2cb1eb Merge branch '2017.7' into win_update_2017.7
  - 7d6280d Merge pull request #51875 from dwoz/avoid_ssl_race
  - e99654d Merge branch '2017.7' into avoid_ssl_race
  - c0bb1f7 Merge pull request #51850 from waynew/cherry-pick-ping-fix
  - 6da495f Fix linter
  - f78b360 fix reactor ping test
  - ad7a9ec Merge pull request #51893 from twangboy/gate_zfs_2017.7
  - e0d58eb Gate zfs module on Windows
  - f758a10 Avoid race condition when initializing OpenSSL
  - 0f125db Add __virtual__ to win_update
  - 864d4be Merge pull request #51770 from Ch3LL/doc_conf_2017
  - 25d9ca2 Update release versions for the 2017.7 branch
  - 3cf3099 Merge pull request #51774 from terminal-labs/py3-server-docs-update
  - 1f00c89 Added in python 3 server according to the consensus from #51748
  - bfb9d87 added the python3 command for startign the python http server.
  - b4153d3 Merge pull request #51757 from twangboy/fix_case_2017.7
  - 6b0b5d2 Fix failing py3 tests
  - feb29f3 Make recurse and directory case sensitive
- 2c4dff6 Merge pull request #51905 from aplanas/fix_mount
  - ac688df mount: fix extra -t parameter
- 4b2c8cc Merge pull request #51815 from garethgreenaway/51673_multiple_file_sections_with_excludes
  - 58ef51d Merge branch '2018.3' into 51673_multiple_file_sections_with_excludes
  - 8c4485d Merge branch '2018.3' into 51673_multiple_file_sections_with_excludes
  - b55a894 Fixing some code that was not working correctly with Python 3.
  - 63da8be Fixing a bug that caused excludes to not work as expected when multiple file options were in place, the excludes of the last file section were being used over any previous ones. Including a test to ensure excludes work as expected when multiple file sections are in place.
Salt Documentation, Release 3003.3

- 1bf3fc8 Merge pull request #51867 from Oloremo/mysql-module-fix-for-python3
  - dfcfebd Merge branch '2018.3' into mysql-module-fix-for-python3
  - b6d217c Merge branch '2018.3' into mysql-module-fix-for-python3
  - 9745b0a Fixed typo
  - 8149e9e Merge branch '2018.3' into mysql-module-fix-for-python3
  - 58d8a2e Merge branch '2018.3' into mysql-module-fix-for-python3
  - f964962 Added handling of empty server_version
  - 58791e9 Decode mysql_version for python3 compatibility

- 7f05abf Merge pull request #51908 from garethgreenaway/51862_icinga_fixes
  - 233dbaf Adding __salt__ to utils/icinga so cmd.run_all is available.
  - 1e7490c update kubernetesmod in index.rst
  - 1f3be1c fix import in test
  - 8572c17 rename kubernetes module to kubernetesmod

- **PR #52032**: (Ch3LL) Add azure state and execution modules to doc index @ 2019-03-11 15:46:49 UTC
  - 7d6b53c Merge pull request #52032 from Ch3LL/fix_azure_docs
  - 8a8a5fa Add azure module ref pages and fix doc errors
  - 6a1d06a fix additional azure state module doc errors
  - 65d8f27 Update doc failures in azure modules
  - 92db6ea Merge branch '2019.2' into fix_azure_docs

- **PR #52037**: (Ch3LL) Backport #51201 into 2019.2 @ 2019-03-07 19:45:18 UTC
  - **PR #51201**: (terminalmage) Lint: Fix str-format-in-logging, len-as-condition, etc. (2) (refs: #52037)
  - 96935c9 Merge pull request #52037 from Ch3LL/bp-51201
  - 1fb069 Remove develop modules not needed in 2019.2
  - e3ade2f Lint: Fix str-format-in-logging, len-as-condition, etc. (2)

- **PR #52034**: (terminalmage) fileclient: Fix traceback when template file cannot be cached @ 2019-03-07 19:41:24 UTC
  - 75398e4 Merge pull request #52034 from terminalmage/fix-get-template
  - 744dfd9 fileclient: Fix traceback when template file cannot be cached

- **PR #51984**: (Ch3LL) [2019.2] Merge forward from 2018.3 to 2019.2 @ 2019-03-07 17:58:42 UTC
  - 7af4f5c Merge pull request #51984 from Ch3LL/merge-2019.2
  - 54ea40a Merge branch '2019.2' into merge-2019.2
  - 227d9b7 Fix linter
  - a168913 Merge branch '2018.3' into '2019.2'
    - c68744a Merge pull request #51975 from s0undt3ch/features/nox-2018.3
      - af4ae91 Lint fixes
      - 33955c9 Windows needs special treatment
· d4f899f Requirements fixes
· e550c60 We need a fixed winrm-fs so that dotfiles are also included
· ada1ef3 use kitchen-salt from my fork for now
* a689177 Merge pull request #51807 from Ch3LL/2018.3.5_rn
  · 2c0b85c Add 2018.3.5 release notes
* 6ae2c4 Merge pull request #51806 from twangboy/fix_beacon
  · 2bf6179 Fix some lint
  · 0f38eea Add lowercase test
  · 1fcb0ff Fix edge case when minion ID is a 16-character string
* da815ba Merge pull request #51966 from twangboy/use_winapi_com
  · a38300b Use winapi.com instead of coinitialize
* 76f3c69 Merge pull request #51920 from twangboy/add_zabbix
  · e2d496c Add zabbix to the Windows builds
* 77c2796 Merge pull request #51802 from garethgreenaway/merge-2018.3.4
  · 2e20939 Merge branch '2018.3' into merge-2018.3.4

  · f2c6631 Merge branch '2018.3.4' into gemstestagain_2018.3.4
  · 1c82d24 Fix ruby gems tests, again
* 496525d Merge pull request #51930 from Ch3LL/release_docs
  · 9a68136 Update release documentation
* a027c97 Merge pull request #51931 from Ch3LL/bp_51298
  · 873cabd Roll back some changes to _compat.py
  · 1fcb0ff Fix edge case when minion ID is a 16-character string
* 1fa2072 Merge pull request #51892 from twangboy/gate_zfs
  · fbc2c0c Gate zfs grain on Windows
* 89b0991 Merge pull request #51836 from stratusjerry/backport_49039_2018.3
  · 35f06c4c Update win_pkg.py
* c1ab63d Merge pull request #51771 from Ch3LL/doc_conf_2018
  · 904beb3 [2018.3] change build_type and release in doc/conf.py
  · 3efce05 Update release versions for the 2018.3 branch
* 98f1b03 Merge pull request #51775 from garethgreenaway/merge-2017.7
  · 92fe03 fixing lint
  · 73b601d Merge branch '2017.7' into merge-2017.7
- e04f735 Merge pull request #51502 from ogd-software/51501-states-boto3_route53.py-fails-to-validate-ALIAS-A-records
- e69ce9d Merge branch '2017.7' into 51501-states-boto3_route53.py-fails-to-validate-ALIAS-A-records
- 5093406 Implement PEP8 E711 styling fix
- 7640e90 Ensure boto3_route53 correctly validates existing ALIAS records
- ff63b0 Ensure boto3_route53 survives attempts to validate ALIAS records
- 9c128aa Merge pull request #51732 from s0undt3ch/features/nox-2017.7
- 328989d Add initial nox configuration. Tell tox'ers to use nox'.
- 99ce48d Merge pull request #51712 from dwoz/gemstestagain
- 0d3b227 Fix ruby gems tests, again
- 18452c4 Merge pull request #51528 from twangboy/backport_51471
- 8c79f02 Merge branch '2017.7' into backport_51471
- 20a7ee5 Backport 51471
- eee80ce3 Merge pull request #51655 from garethgreen-away/49661_starting_salt_master_openssl
- f647b95 Merge branch '2017.7' into 49661_starting_salt_master_openssl
- 1831e64 Removing options from libcrypto.OPENSSL_init_crypto so it will simply use the defaults.
- 8d0f801 removing salt.crypt from payload.py which is not used and causing salt-key to break.
- a5a54c4 Removing unused import which is causing salt-master to not start when using openssl 1.1.1-1.
- c9c082c Fix azurearm field list doc error
- af0537f Add azure state and execution modules to doc index

• PR #52004: (chdamianos) Fixed comparison of None with constants (refs: #52030) @ 2019-03-06 17:41:52 UTC
  - 01bcf0 Merge pull request #52004 from chdamianos/fix-constants-comparison
  - 6fd60af Fixed comparison of None with constants

• PR #51981: (bryceml) Fix typo in 2019.2.0 release notes @ 2019-03-05 23:59:33 UTC
  - 8d6bb5d Merge pull request #51981 from bryceml/2019.2
  - ecf0ef0 Fix typo in 2019.2.0 release notes
    - a65e621 Adding an additional note warning that the file will not be changed because test=True,
      but could be changed by other states.
    - 6c0dfc2 Swapping pchanges for changes in file state.

• ISSUE #51825: (OrangeDog) schedule.disable doesn't work in 2019.2.0 (refs: #51855)

• PR #51855: (garethgreenaway) [2019.2] Global enable/disable was being ignored @ 2019-03-05 19:40:34 UTC
  - c3105df Merge pull request #51855 from garethgreenaway/51825ScheduledGlobalEnabled
  - 301e773 Merge branch '51825ScheduledGlobalEnabled' of github.com:garethgreenaway/salt into 51825ScheduledGlobalEnabled

4522 Chapter 30. Release Notes
• ae7ab06 Merge branch '2019.2' into 51825_scheduled_global_enabled
• ff13833 Merge branch '2019.2' into 51825_scheduled_global_enabled
  – 9e7e4ed Fixing broken add_job test.
  – 7246a55 Global enable/disable was being ignored
• ISSUE #51745: (fayak) Systemd update 241 on archlinux breaks systemd.py version() function (refs: #51946)
• PR #51946: (Ethyling) Fix retrieve systemd version using regex @ 2019-03-05 19:20:19 UTC
  – be28623 Merge pull request #51946 from Ethyling/fix-systemd-version
  – b557707 Add test for systemd version from git describe
  – 94809d0 Fix retrieve systemd version using regex
• ISSUE #51816: (jkrauz) pillar_ldap broken in 2019.2.0 (refs: #51964)
• PR #51964: (dwoz) [2019.2] Make sure ldap attrs are string types on python 2 @ 2019-03-05 19:18:30 UTC
  – c310022 Merge pull request #51964 from dwoz/issue_51816
  – a879140 Merge branch '2019.2' into issue_51816
  – 0e61cf3 Fix linter errors/warnings
  – 171217a Revert debug logging
  – 8c641c6 make LDAP attr defaults string types on py2
• PR #51976: (s0undt3ch) [2019.2] Nox fixes @ 2019-03-05 18:56:49 UTC
  – cb817f1 Merge pull request #51976 from s0undt3ch/features/nox-2019.2
  – 0b4e68c Lint fixes
  – 257b3fc Windows needs special treatment
  – b298da0 Requirements fixes
  – 4f45a7e We need a fixed winrm-fs so that dotfiles are also included
  – fa70af2 use kitchen-salt from my fork for now
• PR #51761: (sdodsley) Add new module to release notes for 2019.2.0 @ 2019-03-05 09:44:56 UTC
  – PR #51681: (sdodsley) Add new module to release notes for 2019.2.0 (refs: #51761)
  – f867e6e Merge pull request #51761 from sdodsley/cheery_pick_fb_releasenotes
  – 80192c8 Add new module to release notes for 2019.2.0
• PR #51799: (s0undt3ch) Catch attribute error @ 2019-03-05 09:38:08 UTC
  – 08e3956 Merge pull request #51799 from s0undt3ch/2019.2
  – 342244a Merge branch '2019.2' into 2019.2
  – 3e8a17e Catch attribute error
• PR #51810: (Ch3LL) Add 2019.2.1 release notes @ 2019-03-05 09:26:47 UTC
  – ff5d7d6 Merge pull request #51810 from Ch3LL/2019.2.1_rn
  – aae95fa Add 2019.2.1 release notes
• ISSUE #51824: (OrangeDog) schedule.present state not idempotent in 2019.2.0 (refs: #51849)
PR #51849: (garethgreenaway) [2019.2] Fix to schedule.list function to filter out attributes that are None @ 2019-03-01 19:56:17 UTC
  - PR #51647: (dwoz) [develop] increase batch test timeout on windows (refs: #51849)
  - 3732004 Merge pull request #51849 from garethgreenaway/51824_splay_breaking_schedule_present
  - a0af441 Merge branch '2019.2' into 51824_splay_breaking_schedule_present
PR #51878: (Ch3LL) Add new terraform salt-ssh roster feature to release notes @ 2019-02-27 19:18:49 UTC
  - 3f8d564 Merge pull request #51878 from Ch3LL/terraform_rn
  - 502d197 fix spelling error in release notes
  - 4d53b41 Add new terraform salt-ssh roster feature to release notes
PR #51837: (stratusjerry) Update win_pkg.py @ 2019-02-26 16:51:35 UTC
  - PR #49039: (stratusjerry) Update win_pkg.py (refs: #51836, #51837)
  - e63c872 Merge pull request #51837 from stratusjerry/backport_49039_2019.2
  - 531b23d Update win_pkg.py
  - 39b564 Splay defaulting to None internally, broke schedule.present causing it to always report differences when a state is run. Updating the schedule.list function to check if an attribute is None and remove it.
PR #51772: (Ch3LL) Update release versions for the 2019.2 branch @ 2019-02-25 14:16:40 UTC
  - 27dd9fb Merge pull request #51772 from Ch3LL/doc_conf_2019
  - f82d79b [2019.2] change build_type and release in doc/conf.py
  - 4ec2b40 Update release versions for the 2019.2 branch
PR #51776: (garethgreenaway) [2019.2] Merge forward from 2018.3 to 2019.2 @ 2019-02-24 22:08:58 UTC
  - 45425a4 Merge pull request #51776 from garethgreenaway/merge-2018.3
  - 186306a reverting change in release notes, adding change to doc/ref/modules/all/index.rst.
  - 1ef140a Fixing lint.
  - 6173578 Fixing lint errors
  - 38dca99 fixing lint
  - e37fc20 Merge branch '2018.3' into merge-2018.3
  - 7e3e71c Merge pull request #51756 from twangboy/fix_case_sensitive
    * 4e55040 Fix failing py3 tests
    * 64f45f8 Make recurse and directory case sensitive
  - e75fc1c Merge pull request #51747 from ymasson/fix_mysql_grants
    * f614dd7 Fix escaping for special characters
  - 1f7e85 Merge pull request #51387 from chrillux/make-binarydata-output-possible
    * 010393e Make binary data output possible
  - 3475813 Merge pull request #51694 from assafShapira/2018.3
    * 895b97a Merge branch '2018.3' into 2018.3
- bc2d27a fix minion bootstrapping issue "/usr/lib/python2.7/site-packages/salt/utils/cloud.py", line 472 Configuration value u'provider' needs to be set
- c7136cb Merge pull request #51738 from garethgreenaway/nftables_cleanup
  - 8201d1e Fixing lint.
  - d681064 Merge branch '2018.3' into nftables_cleanup
  - e37458e Fixing a couple tests.
  - ed1b743 Additional cleanup. Adding additional documentation for state module.
  - dc4afbb More updates to nftables module, state modules, and unit tests.
  - 3ec96e3 initial work to cleanup the nftables module, state module, and the unit tests.
- 2121049 Merge pull request #51733 from s0undt3ch/features/nox-2018.3
  - 97532c2 Add initial nox configuration. Tell tox'ers to use nox'.
- f4adf33 Merge pull request #51728 from gtmanfred/virtualnames
  - 61b4390 fix modulenames from virtualnames tests
- d681fb9 Merge pull request #51721 from dw0z/solarisipstests
  - 3263d31 Merge remote-tracking branch 'saltstack/2018.3' into solarisipstests
- fb0a538 Merge pull request #51676 from Ch3LL/merge-2018.3.4
  - 8111479 Merge branch '2018.3' into merge-2018.3.4
- e08f08d Merge pull request #50812 from gtmanfred/virtualnames
  - d59952f Merge branch '2018.3' into virtualnames
  - 33bb5bf fix use of virtualname
    - 2ca1253 Merge branch 'merge-2018.3.4' of github.com:Ch3LL/salt into merge-2018.3.4
    - 6d6910a Merge branch '2018.3' into merge-2018.3.4
    - 5b5a265 Fix ruby gems tests, again
    - 05f279f Merge branch '2018.3' into merge-2018.3.4
    - 9f0999f Merge branch '2018.3' into merge-2018.3.4
    - 139daa8 Merge branch '2018.3.4' into 2018.3
    - 9741289 Merge pull request #51646 from dw0z/batch_exit_2018.3.4
    - a8f25bb increase batch test timeout on windows
    - 9caafec Skip solarisips when not on solaris
- 31c6785 Merge pull request #51714 from dw0z/gemstestagain_2018.3
  - fab74bb Fix ruby gems tests, again
- 39aadfb Merge pull request #51689 from gtmanfred/2018.3
  - 8c35d51 fix import
  - 6a55cfdf specify minimum version of shade module
- a475b70 Merge pull request #51469 from s0undt3ch/hotfix/fixed-suse-locale-docker
  - 14f49b5 Don't prevent get.locale from working when running under docker
Salt Documentation, Release 3003.3

- a59585d Merge pull request #51671 from Ch3LL/merge-2018.3
  - 64322db Fix is_windows utils call
  - a5c8df0 Fix pylint
- 547889b Merge branch '2017.7' into '2018.3'
  - bcc13db Merge pull request #51562 from gilbrechbuhler/fix_rabbitmq_policy_change_check
  - ed2b1e1 Fix RabbitMQ policy definition update check
  - cafaa98 Merge pull request #51648 from dwoz/increase_wait
  - e2377a9 Merge branch '2017.7' into increase_wait
  - e3d28d9 Merge pull request #51643 from dwoz/batch_exit
  - 42d1d02 increase batch test timeout on windows
  - 7c2d7a4 Increase minion wait for slow boxes
  - b5ae53a Merge pull request #51631 from Ch3LL/lint-2017
  - c0aa4dc Fix linter by ignoring async await check.
- 396622c Merge branch '2017.7' into lint-2017
- ba8d0ea Merge pull request #51547 from s0undt3ch/2017.7
- 8e009e0 Allow NOT to install pip dependencies
- 30ce509 Merge pull request #51182 from lmf-mx/darwin-plist-update
- 4297c0d Merge branch '2017.7' into darwin-plist-update
- 68ac07f Merge pull request #51442 from dwoz/multi_master
- 40cb4db Merge branch '2017.7' into multi_master
- 2dc5171 Hanlde multi_master failover when daemonized
- 8df083c Merge pull request #51608 from dwoz/wait_minions_2017.7
- c55359f fix linter
- 4702e22 Wait for minions to be pingable before starting tests
- 5afa0a1 Merge branch '2017.7' into darwin-plist-update
- f46e8be Fix service name in minion plist
- 1da9cd9 Fix pylint on 2017.7
- 39122ca Merge pull request #51589 from dwoz/script_fix_2017.7
- 8697ce7 Disable pylint checks, only for 2017.7
- e5972f5 Use the code directory instead of cwd for python path
- b8764fd Merge pull request #51680 from Ch3LL/bp-50336
  - 3502dbb states.gpg: fix missing existing keys; modules.gpg: fix set trust level command
- PR #51734: (s0undt3ch) [2019.2] Add initial nox configuration. Tell tox'ers to use nox'. @ 2019-02-21 17:39:29 UTC
  - 1894082 Merge pull request #51734 from s0undt3ch/features/nox-2019.2
  - 01b74c0 Add initial nox configuration. Tell tox'ers to use nox'.
• **PR #51707**: (isbm) Bugfix: pillar refresh @ 2019-02-21 15:12:49 UTC
  - 74db589 Merge pull request #51707 from isbm/isbm-pillar-refresh-fix
  - 269ac76 Refresh matchers and beacons on pillar refresh

• **PR #51674**: (Ch3LL) [2019.2] Merge forward from 2018.3 to 2019.2 @ 2019-02-20 17:35:07 UTC
  - 82cbd98 Merge pull request #51674 from Ch3LL/merge-2019.2
  - 4171271 Fix pylint, remove unused import
  - 3f14619 Remove skipif and change expected return for solarisips test
  - d3660d5 Merge branch '2019.2' into merge-2019.2

• **PR #51715**: (dwoz) [2019.2] Fix ruby gems tests, again @ 2019-02-19 21:44:21 UTC
  - 7a82c65 Merge pull request #51715 from dwoz/gemstestagain_2019.2
  - 95ce288 Fix ruby gems tests, again
  - 043ef0a Skip solarisips when not on solaris
  - 7ed0d7f Fix ruby gems tests, again
  - b46ea3c Merge branch '2019.2' into merge-2019.2

• **PR #51561**: (isbm) SaltSSH: fix delay when creating thin TAR @ 2019-02-19 10:15:47 UTC
  - 0bd2d0e Merge pull request #51561 from isbm/isbm-saltssh-thintar-delay-fix
  - 2b02975 Give up on sync for Py3 because of the way tests for py2 are written here
  - f79c81a Update UT mocking, adjusting for temporary file
  - 2f90054 Use temporary filename instead of output directly to the "thin.tgz"
  - d841164 Copy over the result, cleanup afterwards
  - c6792ee Add a function that reserves temporary filename for further tarball generation

• **PR #51678**: (Ch3LL) [2019.2] Merge forward from 2019.2.0.rc1 to 2019.2 @ 2019-02-17 19:02:33 UTC
  - 5f9764a Merge pull request #51678 from Ch3LL/merge-2019.2.0.rc
  - f8372ca Merge branch '2019.2' into merge-2019.2.0.rc

• **ISSUE #51503**: (garethhowell) smartos.image_present fails with "does not exist" (refs: #51383)

• **ISSUE #51351**: (garethhowell) Exception using smartos.vm_present to create docker zone (refs: #51383)

• **PR #51679**: (Ch3LL) Backport #51383 into 2019.2 @ 2019-02-16 00:31:06 UTC
  - **PR #51383**: (sjorge) imgadm module should deal with invalid images better (refs: #51679)
  - 2036ca8 Merge pull request #51679 from Ch3LL/bp-51383
  - e4971fc imgadm module should deal with invalid images better
  - 58f2407 Merge branch '2019.2.0.rc1' into 2019.2
    - 6292f86 Revert "Remove custom grains module from 2018.3 branch"
    - 92bd6b9 Fix salt.utils.is_windows call
    - ffa2f5f Merge branch '2018.3' into '2019.2'
    - a889f86 Merge pull request #51635 from lomeroe/lgpo_boolean_element_fix
      - b97c2b2 Merge branch '2018.3' into lgpo_boolean_element_fix
4528 Chapter 30. Release Notes

c4b8e1a Merge pull request #51177 from nullify005/51069-ri-and-rdoc-removed
  6b1a201 Merge branch '2018.3' into 51069-ri-and-rdoc-removed
  f339608 Merge branch '2018.3' into 51069-ri-and-rdoc-removed
  e586370 Merge branch '2018.3' into 51069-ri-and-rdoc-removed
  13d3288 Fix lint issues
  5de5e64 Update tests
  22eda16 Fix lint violations
  2e6252c Support rubygems 3 cli param changes
  9e3a01b Use existing file instead of tzutil
  30c1832 Use tempfile to get temp dir
  e3d3c5a Add tests for issue 51309
  1168141 Add test for explicit lists
- 84f5d63 Merge branch '2018.3' into fix_51566
- 7376cb9 Handle explicit lists properly
- 28fc070 Merge branch '2018.3' into 51266_schedule_enable_disable_break_save
- 0760133 adding integration.scheduler.test_helpers to various files to by pass the test_module_name_source_match check.
- 1552fba lint cleanup
- 086066b Adding a test to ensure _get_schedule which is used by the save functionality works when there is an enabled attribute.
- 1c6d4fb When looping through the schedule to remove hidden attributes, we should only do that if the item in question is a dictionary. It could be the attribute that determines if the entire schedule is enabled or disable.
- 5ed8eb6 Properly create the value for a “True” boolean element item

* f1e29c8 Merge pull request #51548 from s0undt3ch/2018.3
  - 611065e Merge branch '2018.3' into 2018.3

* 00a6246 Merge pull request #51622 from brejoc/2018.3-empty-job-workaround
  - d263410 Prevents crash when there is no job entry
  - 5342305 Allow NOT to install pip dependencies

* fdb13a3 Merge pull request #51523 from lomeroe/solarisips_fixes
  - e8e91e3 Merge branch '2018.3' into solarisips_fixes
  - b7bfe17 lint fixes
  - cdaccf4 add tests to validate command being sent to cmd.run_all
  - eaa229d add unit test
  - 432428d Don’t assume that each item in "pkgs" is a dict (as packed by pkg.installed state).

* e3d5fbc Merge pull request #51577 from garethgreenaway/merge-2017.7
  - e060b97 Merge branch '2018.3' into merge-2017.7
  - 3eee038 Fixing a couple issues that did not merge properly.
  - 25b2ca6 Merge branch '2018.3' into merge-2017.7
  - c337fca Merge branch '2018.3' into merge-2017.7
  - f9de828 Fixing missed merge.
  - a041775 Merge branch '2017.7' into merge-2017.7
  - 61889ba Merge pull request #51452 from terminalmage/bp-50963
  - 54d2e02 Merge branch '2017.7' into bp-50963
  - 0c989f0 Merge pull request #51437 from twangboy/fix_raise_2017.7
  - ecd1637 Merge branch '2017.7' into fix_raise_2017.7
  - f5c9cd4 Add missing raise statement
  - d06526c Allow for kwargs to be used in object initialization
  - 0e760b5 pip states: Use case-insensitive dictionaries for pip.list return
- Add a CaseInsensitiveDict implementation
- pip.installed: Fix traceback when _find_key doesn't return a match
- Merge pull request #51370 from dwoz/setup_py_req_fix
- Fix python 3 path for shell test cases
- Merge branch '2017.7' into setup_py_req_fix
- Handle pipenv like version restrictions
- Merge pull request #51367 from dwoz/cloud_config_2017
- Merge branch 'cloud_config_2017' of github.com:dwoz/salt into cloud_config_2017
- Merge branch '2017.7' into cloud_config_2017
- Fix python 3 path for shell test cases
- Fix linter issues
- Cloud provider and profile configs are merged
- Coverage on windows chokes with the tox env var

```
COVERAGE_PROCESS_START
```

- Switch required PyTest dependency
- Merge pull request #51402 from dwoz/win_test_fix
- Merge branch '2017.7' into win_test_fix
- Merge branch '2017.7' into cloud_config_2017
- Fix python 3 path for shell test cases
- Merge branch 'cloud_config_2017' of github.com:dwoz/salt into cloud_config_2017
- Merge branch '2017.7' into cloud_config_2017
- Fix python 3 path for shell test cases
- Merge branch '2017.7' into cloud_config_2017
- Fix linter issues
- Cloud provider and profile configs are merged
- Coverage on windows chokes with the tox env var

```
COVERAGE_PROCESS_END
```

- Use gems.github.com no longer exists, use gemcutter.org
- Add testing path to run_script commands
- Merge pull request #51227 from astronouth7303/doc-modules-additional-globals
- Merge branch '2017.7' into doc-modules-additional-globals
- Merge pull request #51312 from s0undt3ch/features/tox-runtests
- "Tell" coverage to track subprocesses.
- Remove unused imports
- Show objects on assertion failure
- Don't fail the test because of order
- Don't call .keys() on dictionaries
- Add pytest-salt-from- filenames to pytest requirements
- Remove duplicate dependency
- Add .coveragerc
- Run tests from tox, wether runtests or pytest
- Update TODO
- Document the client-defined dunders
- Merge pull request #51393 from garethgreenaway/various_documentation_fixes
- Merge branch '2018.3' into various_documentation_fixes
- Merge branch '2018.3' into various_documentation_fixes
- 33bb4e4 Merge branch '2018.3' into various_documentation_fixes
- 3582f6e Fixing the underline.
- a8f42a0 Various documentation fixes.

    * 550e9ab Don't log shell warning if output_loglevel is quiet
    * 7678c28 Do not load zyppnotify file on module import
  * c6dfede Merge pull request #51598 from dwoz/script_fix_2018.3
    * cbac390 Use the code directory instead of cwd for python path

• PR #51658: (dwoz) [2019.2] Let memcopy make the null bytes, better py3 support @ 2019-02-15 05:42:37 UTC
  - PR #51586: (garethgreenaway) [2019.2] Merge forward from 2018.3 to 2019.2 (refs: #51658)
  - 1ea6f4ab Merge pull request #51658 from dwoz/pip_test_fix
  - c811a70 Let memcopy make the null bytes, better py3 support
• PR #51650: (dwoz) [2019.2] Increase minion wait for slow boxes @ 2019-02-14 16:31:59 UTC
  - 22a04c1 Merge pull request #51650 from dwoz/increase_wait_2019.2
  - ad294f3 Merge branch '2019.2' into increase_wait_2019.2
• PR #51645: (dwoz) [2019.2] Increase batch test timeout on windows @ 2019-02-14 16:29:26 UTC
  - a0982f7 Merge pull request #51645 from dwoz/batch_exit_2019.2
  - 1a882d7 Merge branch '2019.2' into batch_exit_2019.2
• PR #51586: (garethgreenaway) [2019.2] Merge forward from 2018.3 to 2019.2 (refs: #51658) @ 2019-02-14 16:25:29 UTC

30.2. Previous Releases
705a62d Merge pull request #51586 from garethgreenaway/merge-2018.3
09fb3e7 Merge branch '2019.2' into merge-2018.3
95c505a Merge branch '2019.2' into merge-2018.3
4abd9d0 Merge branch '2019.2' into merge-2018.3
6c99cb1 Merge branch '2018.3' into merge-2018.3
   41e25a6 Merge pull request #51580 from garethgreenaway/merge-2018.3.4
       84e15ce Fixing lint
       e891b3f Merge branch '2018.3.4' into merge-2018.3.4
       d0cad3e Merge pull request #51553 from twangboy/update_libsodium
       4177f64 Update url to libsodium for mac builds
       564a65a Merge pull request #51544 from twangboy/fix_test_ssh_2018.3.4
       7771632 Fix ssh on Windows
   b4299a3 Merge pull request #51532 from frogunder/new_releasenotes
   09fa0b Merge branch '2018.3.4' into new_releasenotes
   c6be53 2018.3.4 releasenotes
   c37dbd7 Merge pull request #51534 from twangboy/fix_51309
   3ad95bc Convert data to string using salt util
   5b41af3 Merge pull request #51530 from garethgreenaway/48204_mysql_module_handle_mariadb_versions
       cdf5298 Later versions of MariaDB still support "ALL PRIVILEGES"
       d31c902 Updating the mysql module to handle MariDB versions.
       f3f345c Merge pull request #51529 from frogunder/releasenotes
       fb678ee fix escaped asterisks
   6a4f0da 2018.3.4 releasenotes
   a37fb7d Merge pull request #51525 from twangboy/backport_51095_2018.3.4
   b6acc92 Backport 51095
   602ddc8 Merge pull request #51520 from frogunder/man_pages
   0cbe3f8 Update man pages for 2018.3.4
   1f981c6 Merge pull request #51429 from yosnoop/replace-noclass-with-nocl-for-dig
   5231e73 Merge branch '2018.3.4' into replace-noclass-with-nocl-for-dig
   14e6fb7 In case the test machine can't resolve
   95e8a2f The +nocl is supported much wider than +noclass
   a00d708 Test dig options for salt.utils.dns.lookup
   209ef32 Merge pull request #51441 from Ch3LL/bp-51366
   5bc466e Fix python 3 path for shell test cases
   5351e5c Add testing path to run_script commands
- 2d8a364 Fix linter issues
- 9b8718a Cloud provider and profile configs are merged
- 90a8682 Merge pull request #51458 from twangboy/add_py2_warning
- 05522c0 Merge branch '2018.3.4' into add_py2_warning
- b492021 Merge pull request #51460 from twangboy/update_installer_mac_2018.3.4
- 3c92688 Merge branch '2018.3.4' into update_installer_mac_2018.3.4
- 892d98c Merge pull request #51471 from twangboy/fix_test_win_dns_client
- c9f6b01 Merge branch '2018.3.4' into fix_test_win_dns_client
- a05305d Merge pull request #51462 from ShantonRU/fix-insecure-sql-queries-in-mysql-module-1
- d3ef2cb Merge branch '2018.3.4' into fix-insecure-sql-queries-in-mysql-module-1
- f47dd6a Fix improper use of socket authentication in mysql.user_chpass
- ed62a2f Fix insecure SQL queries in mysql.user_chpass
- 33922c9 Fix the failing dns test on Windows
- 48936c2 Merge pull request #51445 from terminalmage/fixed-custom-grains-traceback
- 191235d Remove custom grains module from 2018.3 branch
- 72fd1a2 Roll back icon change
- 7dd1704 Add welcome_py2.rtf
- c93e9e3 Add Py2 Warning to installer package
- b658900 Add Py2 Warning for Py2 Installer
- a880e42 Merge pull request #51438 from twangboy/fix_raise_2018.3.4
- 5830fad Add missing raise statement
- 28b898c Merge pull request #51432 from Ch3LL/bp-51324
- bd41f0 Fixing various bits in x509 module and unit test to ensure tests are passing on python2 & python3
- 01717d2 Merge pull request #51377 from twangboy/fix_auditpol_2018.3.4
- 19e5181 Fix issue when directory doesn't exist
- 43a9d2f Merge pull request #51338 from Ch3LL/bp-51207
- 345ae67 Backport PR# 50771 to 2018.3 branch
- 3dcd11d Merge pull request #51337 from Ch3LL/bp-51170
- 4e85505 Merge branch '2018.3.4' into bp-51170
- 7656aa5 Merge pull request #51340 from Ch3LL/bp-51252
- e74a6c6 Fix py3 managed.file test failure
- 6f2c7cf Remove un-needed log statement
- 824950c Fix 50221 regression test on Windows
- 1840af9 preserve newlines from pillar data for file.managed
- e90ca1d Merge pull request #51290 from s0undt3ch/hotfix/fix-network
- da3aace Merge branch '2018.3.4' into hotfix/fix-network
- 04f16b8 Fix tests. We no longer get ipaddress instances back.
- c3fa82a Fix minion start issue
- c893dc4 Fix saltmod roster test
- b61854f Roster defines the roster system not a file
- 484bab4 Fix linter
- 5e2db2f Honor roster file for ssh orchestrations
- c8db7e3 Merge pull request #51317 from terminalmage/fix-pr-50417
- 4be2891 Merge branch '2018.3.4' into fix-pr-50417
- e246f8d Merge pull request #51311 from twangboy/fix_test_file.test_managed
- f4177e0 Remove mode parameter on Windows
- 4c4ded3 Fix regression in dynamic pillarenv
- 40b20126 Merge pull request #51292 from Ch3LL/bp-51226
- aba114e Merge branch '2018.3.4' into bp-51226
- fc90bec5 Merge pull request #51295 from Ch3LL/bp-51279
- 5c4a7a4 Merge branch '2018.3.4' into bp-51279
- dacd1ea Merge pull request #51293 from Ch3LL/bp-51233-2
- a155fd7 Accounting for when permissions are not returned from file.check_perms, eg. windows systems.
- 53ba068 When test=True and there are permissions changes, report it.
- d2eba77 Remove network.py patch
- d431c71 Add __context__ support
- de6c13d Handle spaces in fstab opts, similar fix to #39593
- 1abff2b Merge pull request #51278 from dwoz/issue51248
- c614198 Use pillar roots validation method
- 0d2b0c6 Fix linter warnings
- 5b98895 Fix wart in pillar_roots validation
- f7d50b1 Merge pull request #50784 from sathieu/dynamic_file_roots
  7ca2aa4 Allow dynamic file_roots
- 5e840a5 Merge pull request #51527 from garethgreenaway/bp-51475
  801abf2 Fix Elasticsearch retuner
- 1f6da6a Merge pull request #50921 from terminalmage/issue49894
  a35c023 Don't use a decorator that assumes /etc/apt/sources.list.d exists
  6a62e79 Add integration test for architecture support
  67ae5a5 Add support for architectures for APT pkgrepo.managed states
- 3f17776 Actually, remove python-ldap. It needs system deps. Have salt-jenkins do it.
* afcb6bd Fix the ldap package name in requirements/tests.txt
* 588cb87 Merge pull request #51454 from terminalmage/fix-deprecation-warning
  * 529cc0 Fix deprecation warning in nested outputter
* 13de0b8 Merge pull request #50963 from terminalmage/issue50942
  * c84be3f Allow for kwargs to be used in object initialization
  * 2bf93fd pip states: Use case-insensitive dictionaries for pip.list return
  * 792f054 Add a CaseInsensitiveDict implementation
  * 1410164 pip.installed: Fix traceback when _find_key doesn’t return a match
* 60953b7 Merge pull request #51366 from dwoz/cloud_config_merge
  * ae351eb Fix python 3 path for shell test cases
  * 4806c8 Merge branch '2018.3' into cloud_config_merge
  * eeeea29 Add testing path to run_script commands
  * 542d857 Fix linter issues
  * a8a3ba Cloud provider and profile configs are merged
* 9ab2ec6 Coverage on windows chokes with the tox env var COVERAGE_PROCESS_START
* 4994c38 Switch required PyTest dependency
* 89710a7 Merge pull request #51401 from dwoz/run_script_win
  * 77fd35 Add testing path to run_script commands
* 1438a62 Merge pull request #51389 from terminalmage/proxy-fixes
  * 3cc85e Normalize results if test proxy is enabled
* 8acd9e5 Merge pull request #51368 from s0undt3ch/hotfix/tests
  * f4e1692 Fix test
* ab60782 Merge pull request #51319 from terminalmage/issue51255
  * 04eb66b Merge branch '2018.3' into issue51255
* fd2cf4 Merge pull request #51250 from yosnoop/fixed-salt-utils-dns-lookup
  * 0ddf1d Merge branch '2018.3' into fixed-salt-utils-dns-lookup
  * 9b4abe Merge branch '2018.3' into fixed-salt-utils-dns-lookup
  * 67e4131 Merge branch '2018.3' into fixed-salt-utils-dns-lookup
  * 9a34bcd Unit test for lookup with servers option
  * 9498fdc Fix _lookup_host to make it work when server specified
  * af86e1 Remove excessive whitespaces
  * 0d074a4 Fix a comment
  * 1363d2b Proper way to specify _server_ to query with _host_
  * 7b2facb Fixed broken lookup in salt/utils/dns.py
* 73528a5 Merge pull request #51339 from dwoz/aws_role_backport
  * 156f532 Backport aws role support

30.2. Previous Releases 4535
- 7908875 Merge pull request #51341 from Ch3LL/bp-51299
  - e3080f1 Add sleep before sending stop over UDP
- 326425c Merge pull request #51352 from garethgreenaway/fixing_service_beacon_documentation
  - 021fe85 Fixing the documentation for the service beacon. If no options are provided for the service then there needs to be an empty dictionary.
- 14a84e8 Merge pull request #51333 from Ch3LL/merge-2018.3
  - 27d7a89 Merge branch '2018.3' into merge-2018.3
- 31b921f Merge pull request #51304 from terminalmage/issue51270
  - 36673fb Merge branch '2018.3' into issue51270
- 2c3ae7 Merge pull request #51313 from s0undt3ch/features/tox-runtests-2018.3
  - 2eafc5c "Tell" coverage to track subprocesses.
  - f6babe Remove unused imports
  - ff6824c Don’t fail the test because of order
  - 4d12cccb Show objects on assertion failure
  - ee2f10a Add pyltest-salt-from-filenames to pytest requirements
  - 4f4d019 Remove duplicate dependency
  - 1d4b9f5 Add .coveragerc
  - 78c6d68 Run tests from tox, wether runtests or pytest
  - c02757d gif5: Fix use of deprecated pygit2 function
  - ae62ebc Merge branch '2017.7' into '2018.3'
  - 9309639 Merge pull request #51305 from s0undt3ch/2017.7
  - 09b20df Add 2017.7 codecov config
  - 4fa2a02 Merge pull request #51267 from ethframe/fix-file-directory
  - c108825 Fix missing file error in file.directory.
  - ad17ac5 Fix mocks to reflect changes to git.latest state
  - c817213 Don’t try to run git.config_get_regexp from nonexistant cwd
  - f8c3e44 git.latest: add auth to merge/reset calls when LFS used with SSH auth
  - 4b11d6b increase batch test timeout on windows
  - a5af9c5 Increase minion wait for slow boxes

- **PR #51549: (s0undt3ch) [2019.2] Allow NOT to install pip dependencies @ 2019-02-13 18:16:52 UTC**
  - e7ee04e Merge pull request #51549 from s0undt3ch/2019.2
  - d2125aa Allow NOT to install pip dependencies
- **PR #51595: (mirceaulinic) Fix ipaddress imports @ 2019-02-13 17:33:08 UTC**
  - c96464b Merge pull request #51595 from mirceaulinic/mircea/port-824e0e5
  - 91bcb4f Merge branch '2019.2' into mircea/port-824e0e5
  - 84fc76d Fix ipaddress imports
• PR #51517: (damianosSemmle) Fixed string format index out of range error @ 2019-02-13 08:18:38 UTC
  - e3c9a3e Merge pull request #51517 from damianosSemmle/fix-string-format-index
  - c0959e2 Merge branch '2019.2' into fix-string-format-index

• PR #51581: (garethgreenaway) [2019.2] Merge forward from 2019.2.0rc1 to 2019.2 @ 2019-02-13 04:11:15 UTC
  - 82500bb Merge pull request #51581 from garethgreenaway/merge-2019.2.0rc1
  - b00e7e8 Merge branch '2019.2' into merge-2019.2.0rc1

• PR #51607: (dwoz) [2019.2] Wait for minions to be pingable before starting tests @ 2019-02-13 00:48:47 UTC
  - edb5e94 Merge pull request #51607 from dwoz/wait_minions_2019.2
  - ab0a6a3 fix linter
  - f2e4a30 Wait for minions to be pingable before starting tests

• PR #51584: (dwoz) [2019.2] Use the code directory instead of cwd for python path @ 2019-02-12 18:43:46 UTC
  - 1e0275e Merge pull request #51584 from dwoz/script_fixes
  - dbf4356 Use the code directory instead of cwd for python path
  - cd2400e Merge branch '2019.2' into merge-2019.2.0rc1
  - 6e55164 Merge branch '2019.2.0.rc1' into merge-2019.2.0rc1
  * ac73745 Merge branch '2019.2' into fix-string-format-index

• PR #51583: (dwoz) Add testing path to run_script commands @ 2019-02-11 21:38:51 UTC
  - f446c52 Merge pull request #51583 from dwoz/scriptfix
  - e49ba86 Add testing path to run_script commands
  - 788f7e0 Fixed string format index out of range error

• PR #51405: (aplanas) Documentation: fix typo in "equivalent" @ 2019-02-01 21:11:12 UTC
  - c3e27be Merge pull request #51405 from aplanas/backport_49669
  - 58279b4 Documentation: fix typo in "equivalent"

• PR #51406: (aplanas) states_pt3: fix rST link format @ 2019-02-01 21:10:43 UTC
  - 5c26652 Merge pull request #51406 from aplanas/backport_49670
  - 204432d Merge branch '2019.2' into backport_49670

• PR #51426: (aplanas) mount: cache blkid information @ 2019-02-01 21:09:51 UTC
  - fb70bd3 Merge pull request #51426 from aplanas/backport_51135
  - ac790a6 Merge branch '2019.2' into backport_51135
  - 66743da mount: cache blkid information

• PR #51425: (aplanas) cmdmod: add sysfs into the chroot @ 2019-02-01 21:09:00 UTC
  - 2e8bf05 Merge pull request #51425 from aplanas/backport_51094
  - 9193106 cmdmod: add sysfs into the chroot

• PR #51419: (aplanas) file: update attributes for lsattr and chattr @ 2019-02-01 21:04:54 UTC
  - d7a47f0 Merge pull request #51419 from aplanas/backport_50607
  - ab8a8b8 file: update attributes for lsattr and chattr

30.2. Previous Releases
• PR #51414: (aplanas) service: SUSE is not based on sysvinit anymore @ 2019-02-01 21:02:33 UTC
  - 7e020dd Merge pull request #51414 from aplanas/backport_50396
  - b5cfd7 Merge pull request #51414 from aplanas/backport_50396
  - service: SUSE is not based on sysvinit anymore

• PR #51408: (aplanas) parted: fix the ordering of list command @ 2019-02-01 21:00:19 UTC
  - PR #50473: (aplanas) parted: support variable length output for print (refs: #51408)
  - PR #49804: (aplanas) parted: fix the ordering of list command (refs: #51408)
  - 9fb77da Merge pull request #51408 from aplanas/backport_49804
  - 467daf2 parted: support variable length output for print
  - da2e632 parted: fix the ordering of list command

• ISSUE #50097: (aplanas) lowpkg.diff refers to a package name, but a package file is required (refs: #51410)

• PR #51410: (aplanas) Fix lowpkg.diff documentation and parameter name @ 2019-02-01 20:57:50 UTC
  - 7e14499 Merge pull request #51410 from aplanas/backport_50126
  - d38622e Fix lowpkg.diff documentation and parameter name
  - e61a077 states_pt3: fix rST link format

• PR #51404: (aplanas) blockdev: fix url from comment @ 2019-01-30 20:05:54 UTC
  - a16461b Merge pull request #51404 from aplanas/backport_49668
  - da2e632 blockdev: fix url from comment

• PR #51407: (aplanas) parted: fix _validate_partition_boundary @ 2019-01-30 20:05:02 UTC
  - 756c367 Merge pull request #51407 from aplanas/backport_49803
  - b004b33 parted: fix _validate_partition_boundary

• PR #51435: (damianosSemmle) Fixed not raised exceptions @ 2019-01-30 18:32:57 UTC
  - d45664 Merge pull request #51435 from damianosSemmle/fixed-raise-exception
  - 7a9ff59 Fixed not raised exceptions

• PR #51336: (Ch3LL) [2019.2] Merge Forward from 2019.2.0.rc1 to 2019.2 @ 2019-01-27 23:55:08 UTC
  - d4b9093 Merge pull request #51336 from Ch3LL/merge-2019.2.0rc1
  - 62a20b1 Remove unused import
  - 2284ea5 Merge branch '2019.2' into merge-2019.2.0rc1
  - 18bf236 Merge branch '2019.2.0.rc1' into 2019.2

• PR #51334: (Ch3LL) [2019.2] Merge forward from 2018.3 to 2019.2 @ 2019-01-27 23:49:32 UTC
  - 02b43a0 Merge pull request #51334 from Ch3LL/merge-2019.2
  - 25ec653 Merge branch '2018.3' into '2019.2'
    - f62cc11 Merge pull request #51324 from garethgreenaway/1257_something_something_bytes_argh_python2
    - bd7072f Merge branch '2018.3' into 1257_something_something_bytes_argh_python2
    - b44cd84 Merge pull request #51323 from garethgreenaway/network_dns_check_test
    - 055eadc Merge branch '2018.3' into network_dns_check_test
    - be57a0f Merge pull request #51321 from terminalmage/issue51256
- d9c4462 Fix 500 error when using wheel_async
- c847f54 Swap passed addr for string rather than ipaddress object.
- 87f3972 removing another debugging log.
- ad64efb Use MagicMock
- 172ad2e removing debugging
- 5812eae Adding a test to ensure dns_check works as expected.
- 0e542c5 Fixing various bits in x509 module and unit test to ensure tests are passing on python2 & python3
- 85e7ac6 Merge pull request #51306 from s0undt3ch/2018.3
  - 5f0f296 Add 2018.3 codecov config
- 5a398a3 Merge pull request #51207 from twangboy/fix_test_pkg
  - d4ab6d8 Merge branch '2018.3' into fix_test_pkg
- 7a97cb4 Merge pull request #51252 from dwoz/issue-50221
  - f96828a Merge branch '2018.3' into issue-50221
- 253f5e4 Merge pull request #51264 from gtmanfred/2018.3
  - f3ebd32 Merge branch '2018.3' into 2018.3
- aacc047 Merge pull request #51274 from twangboy/fix_network
  - 344bf65 Fix tests. We no longer get ipaddress instances back.
  - 345aa5b Fix minion start issue
  - f553be7 tuples don't have pop
  - 55ea80e don't shadow builtin
  - 6148c50 an argument is not always needed to be passed to open a file
- 8a89cb2 Merge pull request #51279 from twangboy/backport_lgpo
  - 06b1545 Remove network.py patch
  - 2356f25 Add __context__ support
  - a5255f0 Merge remote-tracking branch 'saltstack/2018.3' into issue-50221
- 6796665 Merge pull request #51276 from garethgreenaway/merge-2018.3
  - 44ddc43 Merge branch '2018.3' into merge-2018.3
- 0adde9b Merge pull request #51220 from sathieu/artifactory-classifier-2018.3
  - a85f146 fixes #31179 by applying the same logic as used in the nexus module
- f6a7cad Merge pull request #51225 from astronouth7303/loader-docs-2018.3
  - 6e7da95 Add the tokens system.
  - 7e2838c Add reference to the execution module docs
  - f30f9e8 Remove search system
  - f0cc183 Fileserver modules can be loaded from the fileserver.
- 1a2f680 Merge pull request #51239 from garethgreenaway/51208_file_manage_escaped_double_quotes
• 4251c0c Merge branch '2018.3' into 51208_file_manage_escaped_double_quotes
• 6a9daa7 Merge branch '2018.3' into 51208_file_manage_escaped_double_quotes
• 0bf468c Fixing lint. Using a constant instead of looking for the condition in the string.
• a233dbc Ensuring we can handle a string that contains single quote + an escaped double quote.
  * d614127 Merge pull request #51261 from OrangeDog/patch-2
  • d809b9b Avoid double-counting errors and ignore test runs
  • 6ca7deb Remove unused host parameter and average/disaster keys
  • 2d44527 Just let zabbix_sender use the config file
  • 6404e2c Fix fallback command so it's actually run
  • b79a55a Fix KeyError in Zabbix returner
  • 0971035 Merge branch '2018.3' into merge-2018.3
  • 243dc06 Merge branch '2017.7' into merge-2018.3
  • acfb7d8 Update pytest requirements
  • c19479b Move all of PyTest requirements to its own requirements file
  • 39e633f Merge pull request #51246 from garethgreenaway/bp-50358
  • c33c558 Backport #50358 to 2017.7
  • c1ea10f Fix py3 managed.file test failure
  • 537114c Remoe un-needed log statement
  • ac978f0 Fix 50221 regression test on Windows
  • 65f38b5 preserve newlines from pillar data for file.managed
  • 464d813 Merge branch '2018.3' into fix_test_pkg
  * 276d621 Merge pull request #51197 from Ch3LL/tag_manager
    • b9a0705 Merge branch '2018.3' into tag_manager
    • 210238b Merge branch '2018.3' into tag_manager
    • 827d6c3 Merge branch '2018.3' into tag_manager
    • fcdfe69 Add Google Tag Manager to Docs
  * c8e70a9 Merge pull request #51206 from terminalmage/fix-reload
    • 8e23ae6 Add missing import
    • 31ca7c6 Fix usage of reload for PY3 compatibility
  * 41ae390 Merge pull request #51231 from terminalmage/issue51056
    • 4a61477 Clarify documentation for the the gitfs "all_saltenvs" config param
    • 0574476 Merge branch '2018.3' into fix_test_pkg
    • b91b2c6 Backport PR# 50771 to 2018.3 branch
  • PR #51314: (s0undt3ch) [2019.2] Allow running runtests.py using tox @ 2019-01-25 18:56:01 UTC
    • 95607d1 Merge pull request #51314 from s0undt3ch/features/tox-runtests-2019.2
- 39fb981 "Tell" coverage to track subprocesses.
- f27589a Remove unused imports
- 3000d20 Fix tests. We no longer get `ipaddress` instances back.
- 8fcf235 Fix minion start issue
- a26ba7f Don't fail the test because of order
- 138ca2e Show objects on assertion failure
- 840b3d2 Add `pytest-salt-from-filenames` to pytest requirements
- 716bda4 Remove duplicate dependency
- 6d62156 Add `.coveragerc`
- 6bb56ce Run tests from tox, wether runtests or pytest

- **PR #51307**: (s0undt3ch) Add 2019.2 codecov config @ 2019-01-24 13:34:25 UTC
  - b348034 Merge pull request #51307 from s0undt3ch/2019.2
  - 495aa5c Add 2019.2 codecov config

- **PR #51280**: (garethgreenaway) [2019.2] Merge forward from 2019.2.0.rc1 to 2019.2 @ 2019-01-23 07:08:32 UTC
  - d224096 Merge pull request #51280 from garethgreenaway/merge-2019.2-rc
  - e78ede2 Merge branch '2019.2' into merge-2019.2-rc
  - a425de6 Merge branch '2019.2.0.rc1' into merge-2019.2-rc

- **PR #51277**: (garethgreenaway) [2019.2] Merge forward from 2018.3 to 2019.2 @ 2019-01-23 07:01:29 UTC
  - 8596ee4 Merge pull request #51277 from garethgreenaway/merge-2019.2
  - f05e754 Merge branch '2019.2' into merge-2019.2

- **ISSUE #51273**: (isbm) How to properly fix API? (refs: #51285)

- **PR #51285**: (garethgreenaway) [2019.2] Add metadata to accepted keyword arguments @ 2019-01-22 23:07:44 UTC
  - 8cca51b Merge pull request #51285 from garethgreenaway/51273_metadata_auth_keyword_argument
  - bd82d80 Ensure metadata is an accepted keyword argument for authentication functions.
  - d0d5726 Merge branch '2018.3' into merge-2019.2
  - a6a9040 Merge pull request #51179 from terminalmage/fix-regex-chars
    - 9951b8d Fix possible oversight in nodegroup modifications
  - d5acd5b Merge pull request #51170 from dwoz/issue51158
    - b69c002 Fix saltmod roster test
    - 2594f24 Roster defines the roster system not a file
    - 05836b3 Merge branch '2018.3' into issue51158
    - bf47f6f Fix linter
    - 6223596 Honor roster file for ssh orchestrations
  - 5543a53 Update pytest requirements
  - f958df5 Move all of PyTest requirements to its own requiremnts file
- 8f8ebbc Merge pull request #51226 from garethgreenaway/51195_handle_spaces_in_fstab_opts
  - 1902ce8 Merge branch '2018.3' into 51195_handle_spaces_in_fstab_opts
- e3a9e99 Merge pull request #51233 from Ch3LL/bp-51105
  - eef49e8 Merge branch '2018.3' into bp-51105
- e53e9b1 Merge pull request #51230 from Ch3LL/merge-2018.3
  - 0ef7675 Merge branch '2017.7' into '2018.3'
  - 4a12c5f Merge pull request #50852 from mirceaulinic/fix-capirca
    - fa91267 Merge branch '2017.7' into fix-capirca
    - 71913ff Merge branch '2017.7' into fix-capirca
    - 6fc3484 Lint?
    - 3d56750 Extra newline for lint
    - 5176cd8 Improve the Capirca and related modules for ACL config generation
  - 3f4759b Merge pull request #50923 from astronouth7303/patch-2
    - 4f631a6 Document [% include %]
- 210e817 Merge pull request #51111 from s0undt3ch/2017.7
  - 08e0ae7 Update to salt-bootstrap v2019.01.08
  - c3520aa Accounting for when permissions are not returned from file.check_perms, eg. windows systems.
  - cd80548 When test=True and there are permissions changes, report it.
  - 89345eb Handle spaces in fstab opts, similar fix to #39593

- **ISSUE #50538**: (sjorge) salt.modules.pdbedit broken on Samba 4.9.x (refs: #50540, #51221)
- **PR #51221**: (Ch3LL) Backport #50538 into 2019.2 @ 2019-01-18 22:42:36 UTC
  - **PR #50540**: (sjorge) Fix pdbedit module on samba 4.9 (Fixes #50538)
    - 0cc5c3 Merge pull request #51221 from Ch3LL/bp-50540
    - 223e7c0 Merge branch '2019.2' into bp-50540
- **PR #51232**: (Ch3LL) [2019.2] Merge forward from 2018.3 to 2019.2 @ 2019-01-18 20:51:37 UTC
  - 3eda18 Merge pull request #51232 from Ch3LL/merge-2019.2
  - 3b966f3 Merge branch '2019.2' into merge-2019.2
  - ffe23fa Merge branch '2018.3' into '2019.2'
    - 26008ef Merge pull request #51212 from sathieu/file_roots_slash
      - b769f18 Allow slash in file_roots envs
      - f9437e2 Test for file_roots envs with slash leads to "No such file or directory"
    - 5916282 Merge pull request #51209 from garethgreenaway/bp-51124
      - 82acce4 Handle encoding when opening file for both py2/py3
    - 094bd33 Merge pull request #51184 from twangboy/fix_auditpol
      - 2e68d35 directly call cmd.run_all
* ac71922 Merge pull request #51191 from Ch3LL/bp-50918
  · 7300d84 Skip debian tests on Windows
  · 4622433 Fix test_debian_ip on Windows
* e7f53a3 Merge pull request #51144 from jgleissner/2018.3-azurearm-py3
  · 3178f1a msazure.py: remove unused imports
  · 99a4b9d azurearm: fix list_locations

**PR #51100**: (dwoz) Fix typo in method name (2019.2) @ 2019-01-08 18:12:23 UTC
- 4c2d7ed Merge pull request #51100 from dwoz/cloud_typo
- 60f53d0 Fix typo in method name

**PR #51099**: (terminalmage) Fix improper exception raises (2019.2) @ 2019-01-08 17:55:53 UTC
- 39b28f4 Merge pull request #51099 from terminalmage/fix-exception-raise
- 2a25530 Fix improper exception raise

**PR #51084**: (s0undt3ch) [fluorine] Cleanup the singleton instances map. @ 2019-01-07 22:03:29 UTC
- 8827193 Merge pull request #51084 from s0undt3ch/merge-singleton-last-ref-close-fluorine
- 979fbac Merge branch '2019.2' into merge-singleton-last-ref-close-fluorine
- 63f051a Merge branch '2019.2' into merge-singleton-last-ref-close-fluorine
- bd6c46d Cleanup the singleton instances map.

### 30.2.30 Salt 2019.2.2 Release Notes

Version 2019.2.2 is a bugfix release for 2019.2.0.

#### Statistics

- Total Merges: 26
- Total Issue References: 12
- Total PR References: 26
- Contributors: 13 (Akm0d, Ch3LL, Oloremo, OrlandoArcapix, bryceml, dhiltonp, dwoz, frogunder, gareth-greenaway, javierbertoli, pizzapanther, s0undt3ch, twangboy)

#### Changelog for v2019.2.1..v2019.2.2

*Generated at: 2019-10-11 20:54:15 UTC*

**PR #54919**: (twangboy) Add missing docs for win_wusa state and module (2019.2.1) @ 2019-10-11 18:28:11 UTC
- 7d253bc Merge pull request #54919 from twangboy/update_docs
- 57f199 Add docs for win_wusa

**ISSUE #54941**: (UtahDave) Pillar data is refreshed for EVERY salt command in 2019.2.1 and 2019.2.2 (refs: #54942)

**PR #54942**: (dwoz) Fix for 54941 pillar_refresh regression @ 2019-10-11 18:27:31 UTC
- 2f817bc Merge pull request #54942 from dwoz/fix-54941
- cb5d326 Add a test for 54941 using test.ping
- 348d1c4 Add regression tests for issue 54941
- 766f3ca Initial commit of a potential fix for 54941

### 30.2. Previous Releases 4547
- **PR #54897**: (bryceml) update version numbers to be correct @ 2019-10-05 01:59:14 UTC
  - f783108 Merge pull request #54897 from bryceml/2019.2.1_fix_docs
  - e9a2a70 update version numbers to be correct

- **PR #54894**: (bryceml) 2019.2.1 fix docs @ 2019-10-04 22:31:26 UTC
  - 3233663 Merge pull request #54894 from bryceml/2019.2.1_fix_docs
  - 2456aaa Porting PR #52948 to 2019.2.1
  - 94a1e3b Porting PR #52752 to 2019.2.1
  - c7b7474 modifying saltconf ads
  - d48057b add new saltconf ads

- **PR #54858**: (frogunder) remove in progress from releasenotes 2019.2.2 @ 2019-10-02 20:42:59 UTC
  - 4b06eca Merge pull request #54858 from frogunder/releasenotes_remove2019.2.2
  - a697abd remove in progress from releasenotes 2019.2.2

  - 168a6c1 switch to ruby 2.6.3

### 30.2.31 Salt 2019.2.3 Release Notes

Version 2019.2.3 is a CVE-fix release for 2019.2.0.

**Security Fix**

**CVE-2019-17361**

With the Salt NetAPI enabled in addition to having a SSH roster defined, unauthenticated access is possible when specifying the client as SSH. Additionally, when the raw_shell option is specified any arbitrary command may be run on the Salt master when specifying SSH options.

### 30.2.32 Salt 2019.2.4 Release Notes

Version 2019.2.4 is a CVE-fix release for 2019.2.0.
Security Fix

CVE-2020-11651
An issue was discovered in SaltStack Salt before 2019.2.4 and 3000 before 3000.2. The salt-master process ClearFuncs class does not properly validate method calls. This allows a remote user to access some methods without authentication. These methods can be used to retrieve user tokens from the salt master and/or run arbitrary commands on salt minions.

CVE-2020-11652
An issue was discovered in SaltStack Salt before 2019.2.4 and 3000 before 3000.2. The salt-master process ClearFuncs class allows access to some methods that improperly sanitize paths. These methods allow arbitrary directory access to authenticated users.

Known Issue

Part of the fix for CVE-2020-11651 added better validation of the methods allowed to be called by remote clients. Both AESFuncs and ClearFuncs now have an explicit list of methods that can be called. The name of one of these whitelisted methods on AESFuncs had a typo. The _minion_runner method should be minion_runner (without the underscore prefix). This typo breaks the publish module’s runner method. Calling runners, for example:

```
salt minion publish.runner manage.down
```

Will not work, and you will receive and empty reply from the salt master.

This will be addressed in the 3001 release of Salt set for mid-June 2020.

30.2.33 Salt 2019.2.5 Release Notes

Version 2019.2.5 is a bug-fix release for 2019.2.0.

Statistics

- Total Merges: 2
- Total Issue References: 2
- Total PR References: 2

Changelog for v2019.2.4..v2019.2.5

Generated at: 2020-05-05 22:43:12 UTC

- PR #57096: (frogunder) Update man_pages 2019.2.5 @ 2020-05-05 22:10:46 UTC
  - 6877b7259a Merge pull request #57096 from frogunder/man_pages_2019.2.5
  - 58ea351a59 Update man_pages 2019.2.5
- ISSUE #57027: (ecarson) [BUG] Master running 2019.2.4 or 3000.2 unable to synchronize files using saltutil.sync_all to 2017.7.1 minion due to CVE fix (refs: #57090)
- ISSUE #57016: (idontwanttosignin) [BUG] Requested method not exposed: minion_runner (refs: #57090)
- PR #57090: (dwoz) Address Issues in CVE Release @ 2020-05-05 22:09:25 UTC
30.2.34 Salt 2019.2.6 Release Notes

Version 2019.2.6 is a CVE fix release for 2019.2.0.

Fixed

- Prevent shell injections in netapi ssh client (cve-2020-16846)
- Prevent creating world readable private keys with the tls execution module. (cve-2020-17490)

30.2.35 Salt 2019.2.7 Release Notes

Version 2019.2.7 is a CVE fix release for 2019.2.0.

Fixed

- Properly validate eauth credentials and tokens along with their ACLs. Prior to this change eauth was not properly validated when calling Salt ssh via the salt-api. Any value for 'eauth' or 'token' would allow a user to bypass authentication and make calls to Salt ssh. (CVE-2020-25592)

30.2.36 Salt 2019.2.8 Release Notes

Version 2019.2.8 is a bugfix release for 2019.2.0.

Fixed

- Fixes salt-ssh authentication when using tty (#58922)

30.2.37 Salt 2018.3.0 Release Notes - Codename Oxygen

Warning: If you are using Jinja to dump lists or dictionaries in your SLS files, this will now cause errors in Python 2 since Jinja does not produce YAML-compatible output when strings in the data structures contain unicode types. The dictionary must be passed through a Jinja filter to produce YAML-compatible strings.

The below is an example of invalid SLS:

```
/etc/foo.conf:
  file.manged:
    - source: salt://foo.conf
    - template: jinja
    - defaults: {{ mydict }}
```
To make it valid, use either one of Salt's own `json` or `yaml` filters:

```
/etc/foo.conf:
file.managed:
  source: salt://foo.conf
  template: jinja
  defaults: {{ mydict | json }}
```

Unicode/Python 3 Compatibility Improvements

This release fixes a number of nagging issues with Unicode strings in Salt under Python 2 (ex. 'ascii' codec can't decode byte 0xd0). For best results, use a UTF-8 locale (such as by setting the LANG environment variable to one which supports UTF-8. For example `en_US.UTF-8`, `de_DE.UTF-8`, `ru_RU.UTF-8`, `C.UTF-8`).

Additionally, a number of Python 3 compatibility fixes have been made, many of them having to do with file I/O and str/bytes mismatches.

We continue to work toward improving both Unicode and Python 3 compatibility and welcome any feedback.

Lots of Docker Improvements

Much Improved Support for Docker Networking

The `docker_network.present` state has undergone a full rewrite, which includes the following improvements:

Full API Support for Network Management

The improvements made to input handling in the `docker_container.running` state for 2017.7.0 have now been expanded to `docker_network.present`. This brings with it full support for all tunable configuration arguments.

Custom Subnets

Custom subnets can now be configured. Both IPv4 and mixed IPv4/IPv6 networks are supported. See [here](#) for more information.

Network Configuration in `docker_container.running` States

A long-requested feature has finally been added! It is now possible to configure static IPv4/IPv6 addresses, as well as links and labels. See [here](#) for more information.

Note: While the `containers` argument to `docker_network.present` will continue to be supported, it will no longer be the recommended way of ensuring that a container is attached to a network.
Improved Handling of Images from Custom Registries

Rather than attempting to parse the tag from the passed image name, Salt will now resolve that tag down to an image ID and use that ID instead.

**Important:** Due to this change, there are some backward-incompatible changes to image management. See below for a full list of these changes.

Backward-incompatible Changes to Docker Image Management

Passing image names to the following functions must now be done using separate repository and tag arguments:

- `docker.build`
- `docker.commit`
- `docker.import`
- `docker.load`
- `docker.tag`
- `docker.sls_build`

Additionally, the `tag` argument must now be explicitly passed to the `docker_image.present` state, unless the image is being pulled from a docker registry.

State and Execution Module Support for `docker run` Functionality

The `docker_container.running` state is good for containers which run services, but it is not as useful for cases in which the container only needs to run once. The `start` argument to `docker_container.running` can be set to `False` to prevent the container from being started again on a subsequent run, but for many use cases this is not sufficient. Therefore, the `docker.run_container` remote-execution function was added. When used on the Salt CLI, it will return information about the container, such as its name, ID, exit code, and any output it produces.

State support has also been added via the `docker_container.run` state. This state is modeled after the `cmd.run` state, and includes arguments like `onlyif`, `unless`, and `creates` to control whether or not the container is run.

Full API Support for `docker.logs`

This function now supports all of the functions that its Docker API counterpart does, allowing you to do things like include timestamps, and also suppress stdout/stderr, etc. in the return.
**Start Argument Added to docker.create Function**

This removes the need to run `docker.start` separately when creating containers on the Salt CLI.

```
salt myminion docker.create image=foo/bar:baz command=/path/to/command start=True
```

**Use SaltSSH Minions like regular Master-Minions**

The Master process can now also call SSH minions as if they were connected to the master using ZeroMQ. By setting `enable_ssh_minions: True` in the master config file, the master will create a Salt SSH client process which connects to the minion and returns the output for the `salt` CLI to use like a regular minion. This can be used anywhere the LocalClient is used.

**Exceptions Raised for Authentication/Authorization Errors**

When sending publish commands via `master.py` and `masterapi.py` and an authorization or authentication problem is encountered, Salt will now raise the appropriate exceptions instead of returning an empty string: ''.

The reasoning behind this change is to make it easier to debug various scenarios surrounding authentication and authorization issues more effectively.

**Comparison Operators in Package Installation**

Salt now supports using comparison operators (e.g. `>=1.2.3`) when installing packages on minions which use `yum/dnf` or `apt`. This is supported both in the `pkg.installed` state and in the `pkg.install` remote execution function.

**Master Tops Changes**

When both `Master Tops` and a `Top File` produce SLS matches for a given minion, the matches were being merged in an unpredictable manner which did not preserve ordering. This has been changed. The top file matches now execute in the expected order, followed by any master tops matches that are not matched via a top file.

To make master tops matches execute first, followed by top file matches, set the new `master_tops_first` minion config option to True.

**Several Jinja Filters Renamed**

The following Jinja filters (originally added in 2017.7.0) have been renamed due to the fact that they were inaccurately named when initially added. The original names will be supported until the 3000 release of Salt.

- `rand_str` renamed to `random_hash`
- `jinja_decode_dict` renamed to `jinja_encode_dict`
- `jinja_decode_list` renamed to `jinja_encode_list`
Return Codes for Runner/Wheel Functions

When using orchestration, runner and wheel functions used to report a True result if the function ran to completion without raising an exception. It is now possible to set a return code in the __context__ dictionary, allowing runner and wheel functions to report that they failed. Here's some example pseudocode:

```python
def myrunner():
    ... # do stuff
    ...  
    if some_error_condition:
        __context__['retcode'] = 1
    return result
```

Variable Update Intervals for Fileserver Backends

Prior to this release, fileservers would be updated as part of a dedicated “maintenance” process, in which various routine maintenance tasks were performed. This tied the update interval to the loop_interval config option, and also forced all fileservers to update at the same interval.

2018.3.0 adds the following configuration options for the various fileserver backends:

- roots_update_interval
- azurefs_update_interval
- gitfs_update_interval
- hgfs_update_interval
- minionfs_update_interval
- s3fs_update_interval
- svnfs_update_interval

These allow for update intervals to be set for each individual backend. The default value for each of these is 60 seconds.

In addition, for GitFS it is also possible to apply intervals to individual remotes. See here for examples.

Note: git_pillar does not yet support variable update intervals, this is targeted for the next feature release (2019.2.0).

LDAP via External Authentication Changes

In this release of Salt, if LDAP Bind Credentials are supplied, then these credentials will be used for all LDAP access except the first authentication when a job is submitted. The first authentication will use the user's credentials as passed on the CLI. This behavior is to accommodate certain two-factor authentication schemes where the authentication token can only be used once.

In previous releases the bind credentials would only be used to determine the LDAP user’s existence and group membership. The user’s LDAP credentials were used from then on.
Stormpath External Authentication Removed

Per Stormpath’s announcement, their API will be shutting down on 8/17/2017 at noon PST so the Stormpath external authentication module has been removed.

https://stormpath.com/oktaplusstormpath

New (Proxy) Minion Configuration Options

To be able to connect the Minion to the Master using a certain source IP address or port, the following options have been added:

- source_interface_name
- source_address
- source_ret_port
- source_publish_port

environment config option renamed to saltenv

The environment config option predates referring to a salt fileserver environment as a saltenv. To pin a minion to a single environment for running states, one would use environment, but overriding that environment would be done with the saltenv argument. For consistency, environment is now simply referred to as saltenv. There are no plans to deprecate or remove environment, if used it will log a warning and its value will be used as saltenv.

lock_saltenv config option added

If set to True, this option will prevent a minion from allowing the saltenv argument to override the value set in saltenv when running states.

Failed Minions for State/Function Orchestration Jobs Added to Changes Dictionary

For orchestration jobs which run states (or run remote execution functions and also use a fail function to indicate success or failure), minions which have False results were previously included as a formatted string in the comment field of the return for that orchestration job. This made the failed returns difficult to parse programatically. The failed returns in these cases are now included in the changes dictionary, making for much easier parsing.

Grains

- fc_wnn - Show all fibre channel world wide port names for a host, must be enabled with fibre_channel_grains
- iscsi_iqn - Show the iSCSI IQN name for a host
- swap_total - Show the configured swap_total for Linux, *BSD, OS X and Solaris/SunOS
- virtual:
  - identifies reports KVM and VMM hypervisors when running an OpenBSD guest
  - for detecting Solaris Logical Domains (LDOMs) running on T-Series SPARC hardware. The virtual_subtype grain is populated as a list of domain roles.
Salt Minion Auto-discovery

Using auto-discovery, the Salt Minion now no longer needs to be configured against a specific DNS name or IP address of a Master.

For this feature Salt Master now requires port 4520 for UDP broadcast packets to be opened and the Salt Minion be able to send UDP packets to the same port.

Configuration

By default, automatic discovery is disabled.

**Warning:** Due to the current limitations that will be changing in a future release, before you turn on auto-discovery, make sure your network is secured and trusted.

Auto-discovery is configured on Master and Minion. Both of them are configured via the `discovery` option as follows:

**Master configuration**

To use the default configuration, which accepts any minion, simply set `discovery` to True:

```
discovery: true
```

A sub-option called `mapping` allows auto-discovery to help find the proper Master. The mapping contains an arbitrary set of key/value pairs, which the Minion configuration can target. By default, no mappings are set.

Example:

```
discovery:
  mapping:
    description: SES 5.0
    node: 1
```

It is also possible to change the port used from the default of 4520, by setting a `port` option under the Master's `discovery` configuration:

```
discovery:
  port: 4567
```

**Note:** When using a port number other than the default, the Minion's `discovery` configuration must also have a port specified, otherwise the Minion will still attempt to contact the Master on port 4520.

**Minion configuration**

In addition to the `mapping` and `port` options, the following additional options are available to Minions:

- **attempts** - This option specifies how many broadcast requests should be sent to the network, waiting for any Master response. Each attempt takes a couple of seconds, so raising this value may result in a slower Minion startup. Note that, on a properly-configured network, autodiscovery should succeed on the first attempt. By default, this value is set to 3.

- **match** - This option can be set to either `all` or `any`, and it determines how the values configured in `mapping` are matched. If set to `all`, then all of the key/value pairs in the Minion's `mapping` must match a given Master. If set to `any` (the default), then any match to a key/value mapping will constitute a match.
- `pause` - The interval in seconds between attempts (default: 5).
- `fibre_channel_grains` - Enables the `fc_wwn` grain. (Default: False)
- `iscsi_grains` - Enables the `iscsi_iqn` grain. (Default: False)

**Connection to a type instead of DNS**

By now each Minion was connecting to a Master by DNS or IP address. From now on it is possible also to connect to a _type_ of a Master. For example, in a network there are three different Masters, each corresponds for a particular niche or environment or specific role etc. The Minion is supposed to connect only to one of those Masters that is described appropriately.

To achieve such an effect, each `/etc/salt/master` configuration should have a `discovery` option, which should have a `mapping` element with arbitrary key/value pairs. The same configuration should be on the Minion, so then when mapping matches, Minion recognises Master as its connection target.

Example for Master configuration `/etc/salt/master`:

```yaml
discovery:
  mapping:
    description: SES 5.0
    node: 1
```

The example above describes a system that is running a particular product, where `description` is an arbitrary key and `SES 5.0` is just a string. In order to match exactly this Master, the following configuration at Minion should be present:

```yaml
discovery:
  match: all  # Can be "all" or "any"
  mapping:
    description: SES 5.0
    node: 1
```

Notice `match` criteria is set to `all`. This would mean that from all found Masters select only that, which `description` is set to `SES 5.0` and `node` is set to 1. All other Masters will be ignored.

**Limitations**

This feature has a couple of _temporary_ limitations that are subject to change in the future:

- Only one Master on the network is supported. Currently the Minion cannot select which Master out of few the same to choose. This will change to choosing the Master that is least loaded.

- Minions will accept _any_ master that matches connection criteria without any particular security applied (priv/pub key check, signature, fingerprint etc). That implies that administrator is expected to know his network and make sure it is clean.
New Modules

- `salt.modules.purefa`

New NaCl Renderer

A new renderer has been added for encrypted data.

New support for Cisco UCS Chassis

The salt proxy minion now allows for control of Cisco USC chassis. See the `cimc` modules for details.

New support for Cassandra v3

The `cassandra_cql` module now supports Cassandra v3 which has changed its internal schema to define keyspaces and columns.

New salt-ssh roster

A new roster has been added that allows users to pull in a list of hosts for salt-ssh targeting from a `~/.ssh` configuration. For full details, please see the `sshconfig` roster.

New GitFS Features

Two new features which affect how GitFS maps branches/tags to fileserver environments (i.e. `saltenvs`) have been added:

1. It is now possible to completely turn off Salt’s default mapping logic (aside from the mapping of the `base saltenv`). This can be triggered using the new `gitfs_disable_saltenv_mapping` config option.

   **Note:** When this is disabled, only the `base` saltenv and any configured using `per-saltenv configuration parameters` will be available.

2. The types of refs which Salt will use as saltenvs can now be controlled. In previous releases, branches and tags were both mapped as environments, and individual commit SHAs could be specified as saltenvs in states (and when caching files using `cp.cache_file`). Using the new `gitfs_ref_types` config option, the types of refs which are used as saltenvs can be restricted. This makes it possible to ignore all tags and use branches only, and also to keep SHAs from being made available as saltenvs.

Additional output modes

The `state_output` parameter now supports `full_id`, `changes_id` and `terse_id`. Just like `mixed_id`, these use the state ID as name in the highstate output. For more information on these output modes, see the docs for the `Highstate Outputter`. 
Windows

Python Version

Python 2 Windows API was designed when Windows did not support Unicode. Windows now supports Unicode, however, to keep backwards compatibility Python 2 Windows API has not been changed. Python 3 Windows API supports Unicode. Salt Python 3 installer is the recommended choice for users who need characters other than Non-ASCII (7bit) characters.

pkg Execution module changes

Significant changes have been made to the `win_pkg` execution module. Users should test this release against their existing package sls definition files. These changes are also in 2016.11.9 & 2017.7.3.

- `pkg.list_available` no longer defaults to refreshing the winrepo meta database.
- `pkg.install` without a `version` parameter no longer upgrades software if the software is already installed. Use `pkg.install version=latest` or in a state use `pkg.latest` to get the old behavior.
- `pkg.list_pkgs` now returns multiple versions if software installed more than once.
- `pkg.list_pkgs` now returns ‘Not Found’ when the version is not found instead of ‘(value not set)’ which matches the contents of the sls definitions.
- `pkg.remove()` will wait up to 3 seconds (normally about a second) to detect changes in the registry after removing software, improving reporting of version changes.
- `pkg.remove()` can remove `latest` software, if `latest` is defined in sls definition.
- Documentation was updated for the execution module to match the style in new versions, some corrections as well.
- All install/remove commands are prefix with cmd.exe shell and cmdmod is called with a command line string instead of a list. Some sls files in saltstack/salt-winrepo-ng expected the commands to be prefixed with cmd.exe (i.e. the use of &).
- Some execution module functions results, now behave more like their Unix/Linux versions.

Installer

Changes to config handling

Behavior with existing configuration has changed. With previous windows installers the existing config was used and the master and minion id could be modified via the installer. It was problematic in that it didn’t account for configuration that may be defined in the minion.d directory. This change gives you the option via a drop-down list to use one of the following:

- Default Config: Use the config that comes with the installer
- Existing Config: Use the current config without changes
- Custom Config: Select a custom config using the file picker

The existing config option will only be available if the installer detects an existing config. If there is an existing config, and you choose Default or Custom, the existing config will be deleted, including the minion.d directory, and replaced by your selection.
The Default Config and Custom Config options will allow you to modify the Master and the Minion ID. Existing Config will leave the existing configuration unchanged.

These settings can be defined on the command line using the following switches:

- /default-config
- /custom-config=C:\Path\To\Custom\Config\minion

If neither option is passed and there is an existing config, the default is to use the existing config. If there is no existing config (new install) the default config will be used.

**Multi-master configuration**

The installer now has the ability to apply a multi-master configuration either from the GUI or the command line. The master field in the GUI can accept either a single master or a comma-separated list of masters. The command-line switch (/master=) can accept the same.

**Command-line help**

The Windows installer will now display command-line help when a help switch (/?) is passed.

**New utils module salt.utils.pkg.win**

A new utils module has been added, which gathers information about windows installed software. This is currently not used by any salt execution module or state at this time. Users are encouraged to run this and report any issues. Running the command with the detail option will be useful for anyone developing windows package definitions. With salt installed in the default location the following command will print the help message.

```bash
chcp 65001
c:\salt\bin\python.exe c:\salt\bin\lib\site-packages\salt\utils\pkg\win.py
c:\salt\bin\python.exe c:\salt\bin\lib\site-packages\salt\utils\pkg\win.py detail
```

**Salt Cloud Features**

**OpenStack Revamp**

The OpenStack Driver has been rewritten mostly from scratch. Salt is now using the shade driver <https://docs.openstack.org/shade/latest/>.

With this, the nova driver is being deprecated.

**openstack driver**

There have also been several new modules and states added for managing OpenStack setups using shade as well.

```
keystone keystone role grant  keystone group  keystone role  keystone service
keystone user  keystone domain  keystone project  keystone endpoint  glance
glance_image  neutron neutron subnet  neutron secgroup  neutron secgroup rule
neutron network
```
Pre-Flight Commands

Support has been added for specified "preflight commands" to run on a VM before the deploy script is run. These must be defined as a list in a cloud configuration file. For example:

```
my-cloud-profile:
  provider: linode-config
  image: Ubuntu 16.04 LTS
  size: Linode 2048
  preflight_cmds:
    - whoami
    - echo 'hello world!'
```

These commands will run in sequence before the bootstrap script is executed.

New salt-cloud Grains

When salt-cloud creates a new minion, it will now add grain information to the minion configuration file, identifying the resources originally used to create it.

The generated grain information will appear similar to:

```
grains:
  salt-cloud:
    driver: ec2
    provider: my_ec2:ec2
    profile: ec2-web
```

The generation of salt-cloud grains can be suppressed by the option `enable_cloud_grains: 'False'` in the cloud configuration file.

Upgraded Saltify Driver

The salt-cloud Saltify driver is used to provision machines which are not controlled by a dedicated cloud supervisor (such as typical hardware machines) by pushing a salt-bootstrap command to them and accepting them on the salt master. Creation of a node has been its only function and no other salt-cloud commands were implemented.

With this upgrade, it can use the salt-api to provide advanced control, such as rebooting a machine, querying it along with conventional cloud minions, and, ultimately, disconnecting it from its master.

After disconnection from ("destroying" on) one master, a machine can be re-purposed by connecting to ("creating" on) a subsequent master.

New Vagrant Driver

The salt-cloud Vagrant driver brings virtual machines running in a limited environment, such as a programmer's workstation, under salt-cloud control. This can be useful for experimentation, instruction, or testing salt configurations.

Using salt-api on the master, and a salt-minion running on the host computer, the Vagrant driver can create (vagrant up), restart (vagrant reload), and destroy (vagrant destroy) VMs, as controlled by salt-cloud profiles which designate a Vagrantfile on the host machine.

The master can be a very limited machine, such as a Raspberry Pi, or a small VagrantBox VM.
Python PyWinRM Module

Versions of \texttt{pywinrm} $\geq 0.2.1$ are finally able to disable validation of self signed certificates. \texttt{Here} for more information.

DigitalOcean

The DigitalOcean driver has been renamed to conform to the company name. The new driver name is \texttt{digitalocean}. The old name \texttt{digital_ocean} and a short one \texttt{do} will still be supported through virtual aliases, this is mostly cosmetic.

Azure Cloud

The azure sdk used for the \texttt{azurearm} cloud driver now depends on \texttt{azure-cli}$\geq 2.0.12$

New \texttt{saltclass} pillar/master\_tops modules

This module clones the behaviour of \texttt{reclass} (\url{http://reclass.pantsfullofunix.net/}), without the need of an external app, and add several features to improve flexibility. Saltclass lets you define your nodes from simple \texttt{yaml} files (.\texttt{yml}) through hierarchical class inheritance with the possibility to override pillars down the tree.

Features

- Define your nodes through hierarchical class inheritance
- Reuse your reclass data with minimal modifications
  - applications $\Rightarrow$ states
  - parameters $\Rightarrow$ pillars
- Use Jinja templating in your yaml definitions
- Access to the following Salt objects in Jinja
  - \texttt{__opts__}
  - \texttt{__salt__}
  - \texttt{__grains__}
  - \texttt{__pillars__}
  - \texttt{minion_id}
- Chose how to merge or override your lists using ^ character (see examples)
- Expand variables $\{\}$ with possibility to escape them if needed $\{\}$ (see examples)
- Ignores missing node/class and will simply return empty without breaking the pillar module completely - will be logged

An example subset of data is available here: \url{https://git.mauras.ch/salt/saltclass/src/branch/master/examples}

<table>
<thead>
<tr>
<th>Terms usable in yaml files</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>classes</td>
<td>A list of classes that will be processed in order</td>
</tr>
<tr>
<td>states</td>
<td>A list of states that will be returned by master_tops function</td>
</tr>
<tr>
<td>pillars</td>
<td>A yaml dictionary that will be returned by the ext_pillar function</td>
</tr>
<tr>
<td>environment</td>
<td>Node saltenv that will be used by master_tops</td>
</tr>
</tbody>
</table>
A class consists of:

- zero or more parent classes
- zero or more states
- any number of pillars

A child class can override pillars from a parent class. A node definition is a class in itself with an added environment parameter for `saltenv` definition.

**Class Names**

Class names mimic salt way of defining states and pillar files. This means that `default.users` class name will correspond to one of these:

- `<saltclass_path>/classes/default/users.yml`
- `<saltclass_path>/classes/default/users/init.yml`

**Saltnode Tree**

A saltnode tree would look like this:

```
<saltclass_path>
  ├── classes
  │   ├── app
  │   │   ├── borgbackup.yml
  │   │   └── ssh
  │   │       └── server.yml
  │   └── default
  │       ├── init.yml
  │       ├── motd.yml
  │       └── users.yml
  │   └── roles
  │       ├── app.yml
  │       │   └── nginx
  │       │       └── server.yml
  │       └── roles
  │           └── subsidiaries
  │               └── gnv.yml
  │                   └── qls.yml
  │                       └── zrh.yml
  └── nodes
      ├── geneva
      │   └── gnv.node1.yml
      └── lausanne
          ├── qls.node1.yml
          └── qls.node2.yml
              └── node127.yml
                  └── zurich
                      └── zrh.node1.yml
                          └── zrh.node2.yml
                              └── zrh.node3.yml
```

**Examples**

- `<saltclass_path>/nodes/lausanne/qls.node1.yml`
environment: base

classes:
{% for class in ['default'] %}
- {{ class }}
{% endfor %}
- subsidiaries.{{ __grains__['id'].split('.')[0] }}

<saltclass_path>/classes/default/init.yml

classes:
- default.users
- default.motd

states:
- openssh

pillars:
  default:
    network:
      dns:
        srv1: 192.168.0.1
        srv2: 192.168.0.2
        domain: example.com
      ntp:
        srv1: 192.168.10.10
        srv2: 192.168.10.20

<saltclass_path>/classes/subsidiaries/gnv.yml

pillars:
  default:
    network:
      sub: Geneva
      dns:
        srv1: 10.20.0.1
        srv2: 10.20.0.2
        srv3: 192.168.1.1
        domain: gnv.example.com
    users:
      adm1:
        uid: 1210
        gid: 1210
        gecos: 'Super user admin1'
        homedir: /srv/app/adm1
      adm3:
        uid: 1203
        gid: 1203
        gecos: 'Super user adm'

Variable expansions:

Escaped variables are rendered as is - ${test}

Missing variables are rendered as is - ${net:dns:srv2}

pillars:
  app:

(continues on next page)
```yaml
config:
dns:
  srv1: ${default:network:dns:srv1}
  srv2: ${net:dns:srv2}
uri: https://application.domain/call?\${test}
prod_parameters:
  - p1
  - p2
  - p3
pkg:
  - app-core
  - app-backend
```

List override:

Not using `^` as the first entry will simply merge the lists

```yaml
pillars:
app:
  pkg:
    - ^
    - app-frontend
```

Known limitation

Currently you can't have both a variable and an escaped variable in the same string as the escaped one will not be correctly rendered - '${xx}' will stay as is instead of being rendered as '${xx}'

Lists of comments in state returns

State functions can now return a list of strings for the `comment` field, as opposed to only a single string. This is meant to ease writing states with multiple or multi-part comments.

Beacon configuration changes

In order to remain consistent and to align with other Salt components such as states, support for configuring beacons using dictionary based configuration has been deprecated in favor of list based configuration. All beacons have a validation function which will check the configuration for the correct format and only load if the validation passes.

**avahi_announce**

Old behavior:

```yaml
beacons:
  avahi_announce:
    run_once: True
    servicetype: _demo._tcp
    port: 1234
    txt:
      ProdName: grains.productname
      SerialNo: grains.serialnumber
      Comments: 'this is a test'
```

New behavior:
**beacons:**

```yaml
avahi_announce:
  - run_once: True
  - servicetype: _demo._tcp
  - port: 1234
  - txt:
    - ProdName: grains.productname
    - SerialNo: grains.serialnumber
    - Comments: 'this is a test'
```

**Bonjour announce**

Old behavior:

```yaml
beacons:
  bonjour_announce:
    run_once: True
    servicetype: _demo._tcp
    port: 1234
    txt:
      - ProdName: grains.productname
      - SerialNo: grains.serialnumber
      - Comments: 'this is a test'
```

New behavior:

```yaml
beacons:
  bonjour_announce:
    - run_once: True
    - servicetype: _demo._tcp
    - port: 1234
    - txt:
      - ProdName: grains.productname
      - SerialNo: grains.serialnumber
      - Comments: 'this is a test'
```

**btmp**

Old behavior:

```yaml
beacons:
  btmp: {}
```

New behavior:

```yaml
beacons:
  btmp: []
```
glxinfo

Old behavior:

```
beacons:
  glxinfo:
    user: frank
    screen_event: True
```

New behavior:

```
beacons:
  glxinfo:
    user: frank
    screen_event: True
```

haproxy

Old behavior:

```
beacons:
  haproxy:
    www-backend:
      threshold: 45
      servers:
        - web1
        - web2
      interval: 120
```

New behavior:

```
beacons:
  haproxy:
    backends:
      www-backend:
        threshold: 45
        servers:
          - web1
          - web2
        interval: 120
```

inotify

Old behavior:

```
beacons:
  inotify:
    /path/to/file/or/dir:
      mask:
        - open
        - create
        - close_write
      recurse: True
      auto_add: True
```

(continues on next page)
New behavior:

```yaml
beacons:
  inotify:
    - files:
        /path/to/file/or/dir:
          mask:
            - open
            - create
            - close_write
          recurse: True
          auto_add: True
          exclude:
            - /path/to/file/or/dir/exclude1
            - /path/to/file/or/dir/exclude2
            - /path/to/file/or/dir/regex[a-m]*$:
              regex: True
              coalesce: True
```

journald

Old behavior:

```yaml
beacons:
  journald:
    sshd:
      SYSLOG_IDENTIFIER: sshd
      PRIORITY: 6
```

New behavior:

```yaml
beacons:
  journald:
    - services:
        sshd:
          SYSLOG_IDENTIFIER: sshd
          PRIORITY: 6
```
load

Old behavior:

```yaml
beacons:
  load:
    1m:
      - 0.0
      - 2.0
    5m:
      - 0.0
      - 1.5
    15m:
      - 0.1
      - 1.0
  emitatstartup: True
  onchangeonly: False
```

New behavior:

```yaml
beacons:
  load:
    - averages:
      1m:
        - 0.0
        - 2.0
      5m:
        - 0.0
        - 1.5
      15m:
        - 0.1
        - 1.0
      emitatstartup: True
      onchangeonly: False
```

log

Old behavior:

```yaml
beacons:
  log:
    file: <path>
    <tag>:
      regex: <pattern>
```

New behavior:

```yaml
beacons:
  log:
    - file: <path>
    - tags:
      <tag>:
        regex: <pattern>
```
network_info

Old behavior:

```yaml
beacons:
  network_info:
    - eth0:
        type: equal
        bytes_sent: 100000
        bytes_recv: 100000
        packets_sent: 100000
        packets_recv: 100000
        errin: 100
        errout: 100
        dropin: 100
        dropout: 100
```

New behavior:

```yaml
beacons:
  network_info:
    - interfaces:
        eth0:
            type: equal
            bytes_sent: 100000
            bytes_recv: 100000
            packets_sent: 100000
            packets_recv: 100000
            errin: 100
            errout: 100
            dropin: 100
            dropout: 100
```

network_settings

Old behavior:

```yaml
beacons:
  network_settings:
    eth0:
        ipaddr:
            promiscuity:
                onvalue: 1
    eth1:
        linkmode:
```

New behavior:

```yaml
beacons:
  network_settings:
    - interfaces:
        - eth0:
            ipaddr:
                promiscuity:
                    onvalue: 1
```

(continues on next page)
proxy_example

Old behavior:

```
beacons:
    proxy_example:
        endpoint: beacon
```

New behavior:

```
beacons:
    proxy_example:
        - endpoint: beacon
```

ps

Old behavior:

```
beacons:
    ps:
        - salt-master: running
        - mysql: stopped
```

New behavior:

```
beacons:
    ps:
        - processes:
            salt-master: running
            mysql: stopped
```

salt_proxy

Old behavior:

```
beacons:
    salt_proxy:
        - p8000: {}
        - p8001: {}
```

New behavior:

```
beacons:
    salt_proxy:
        - proxies:
            p8000: {}
            p8001: {}
```
sensehat

Old behavior:

```yaml
beacons:
  sensehat:
    sensors:
      humidity: 70%
      temperature: [20, 40]
      temperature_from_pressure: 40
      pressure: 1500
```

New behavior:

```yaml
beacons:
  sensehat:
    sensors:
      humidity: 70%
      temperature: [20, 40]
      temperature_from_pressure: 40
      pressure: 1500
```

service

Old behavior:

```yaml
beacons:
  service:
    salt-master:
    mysql:
```

New behavior:

```yaml
beacons:
  service:
    services:
      nginx:
        onchangeonly: True
        delay: 30
        uncleanshutdown: /run/nginx.pid
```

sh

Old behavior:

```yaml
beacons:
  sh: {}
```

New behavior:

```yaml
beacons:
  sh: []
```
status

Old behavior:

```python
beacons:
    status: {}
```

New behavior:

```python
beacons:
    status: []
```

telegram_bot_msg

Old behavior:

```python
beacons:
    telegram_bot_msg:
        token: "<bot access token>
        accept_from:
            - "<valid username>
        interval: 10
```

New behavior:

```python
beacons:
    telegram_bot_msg:
        - token: "<bot access token>
        - accept_from:
            - "<valid username>
        - interval: 10
```

twilio_txt_msg

Old behavior:

```python
beacons:
    twilio_txt_msg:
        account_sid: "<account sid>
        auth_token: "<auth token>
        twilio_number: "+15555555555
        interval: 10
```

New behavior:

```python
beacons:
    twilio_txt_msg:
        - account_sid: "<account sid>
        - auth_token: "<auth token>
        - twilio_number: "+15555555555
        - interval: 10
```
wtmp

Old behavior:

```python
beacons:
    wtmp: {}
```

New behavior:

```python
beacons:
    wtmp: []
```

New requisites available in state compiler

**require_any**

The use of `require_any` demands that one of the required states executes before the dependent state. The state containing the `require_any` requisite is defined as the dependent state. The states specified in the `require_any` statement are defined as the required states. If at least one of the required state's execution succeeds, the dependent state will then execute. If all of the executions by the required states fail, the dependent state will not execute.

**watch_any**

The state containing the `watch_any` requisite is defined as the watching state. The states specified in the `watch_any` statement are defined as the watched states. When the watched states execute, they will return a dictionary containing a key named "changes".

If the "result" of any of the watched states is `True`, the watching state will execute normally, and if all of them are `False`, the watching state will never run. This part of watch mirrors the functionality of the `require` requisite.

If the "result" of any of the watched states is `True` and the "changes" key contains a populated dictionary (changes occurred in the watched state), then the `watch` requisite can add additional behavior. This additional behavior is defined by the `mod_watch` function within the watching state module. If the `mod_watch` function exists in the watching state module, it will be called in addition to the normal watching state. The return data from the `mod_watch` function is what will be returned to the master in this case; the return data from the main watching function is discarded.

If the "changes" key contains an empty dictionary, the `watch` requisite acts exactly like the `require` requisite (the watching state will execute if "result" is `True`, and fail if "result" is `False` in the watched state).

**onchanges_any**

The `onchanges_any` requisite makes a state only apply one of the required states generates changes, and if one of the watched state's "result" is `True`. This can be a useful way to execute a post hook after changing aspects of a system.
**onfail_any**

The `onfail_any` requisite allows for reactions to happen strictly as a response to the failure of at least one other state. This can be used in a number of ways, such as executing a second attempt to set up a service or begin to execute a separate thread of states because of a failure.

The `onfail_any` requisite is applied in the same way as `require_any` and `watch_any`.

**Basic Slots support in state compiler**

Slots extend the state syntax and allows you to do things right before the state function is executed. So you can make a decision in the last moment right before a state is executed.

Slot syntax looks close to the simple python function call. Here is a simple example:

```python
copy-some-file:
  file.copy:
    - name: __slot__:salt:test.echo(text=/tmp/some_file)
    - source: __slot__:salt:test.echo(/etc/hosts)
```

Read more [here](#).

**Cryptographic layer changes**

M2Crypto is coming back. We are making the crypto backend modular but in this release M2Crypto is enabled if it's importable by Python. If not Cryptodome or PyCrypto is used as it was in the previous releases. M2Crypto is used in the same way as PyCrypto so there would be no compatibility issues, different nodes could use different backends.

**NaCL Module and Runner changes**

In addition to argument changes in both the NaCL module and runner for future removal in the 3000 release, the default "box_type" has changed from `secretbox` to `sealedbox`. SecretBox is data encrypted using private key `sk` and Sealedbox is encrypted using public key `pk`.

**utils functions reorganized into separate modules**

The Salt utility functions from `salt.utils` (typically used by those developing extension modules for Salt) have been moved into different modules, grouped logically based on their functionality. The old function names will continue to work until the 3000 release of Salt (due around Q1 2019).

The renamed functions are:

- `salt.utils.appendproctitle`: use `salt.utils.process.appendproctitle` instead.
- `salt.utils.daemonize`: use `salt.utils.process.daemonize` instead.
- `salt.utils.daemonize_if`: use `salt.utils.process.daemonize_if` instead.
- `salt.utils.reinit_crypto`: use `salt.utils.crypt.reinit_crypto` instead.
- `salt.utils.to_bytes`: use `salt.utils.stringutils.to_bytes` instead.
- `salt.utils.to_str`: use `salt.utils.stringutils.to_str` instead.
- `salt.utils.to_unicode`: use `salt.utils.stringutils.to_unicode` instead.
• salt.utils.str_to_num: use salt.utils.stringutils.to_num instead.
• salt.utils.is_quoted: use salt.utils.stringutils.is_quoted instead.
• salt.utils.dequote: use salt.utils.stringutils.dequote instead.
• salt.utils.is_hex: use salt.utils.stringutils.is_hex instead.
• salt.utils.is_bin_str: use salt.utils.stringutils.is_bin_str instead.
• salt.utils.rand_string: use salt.utils.stringutils.random instead.
• salt.utils.contains_whitespace: use salt.utils.stringutils.contains_whitespace instead.
• salt.utils.build_whitespace_split_regex: use salt.utils.stringutils.build_whitespace_split_regex instead.
• salt.utils.expr_match: use salt.utils.stringutils.expr_match instead.
• salt.utils.check_whitelist_blacklist: use salt.utils.stringutils.check_whitelist_blacklist instead.
• salt.utils.check_include_exclude: use salt.utils.stringutils.check_include_exclude instead.
• salt.utils.print_cli: use salt.utils.stringutils.print_cli instead.
• salt.utils.clean_kwargs: use salt.utils.args.clean_kwargs instead.
• salt.utils.invalid_kwargs: use salt.utils.args.invalid_kwargs instead.
• salt.utils.shlex_split: use salt.utils.args.shlex_split instead.
• salt.utils.arg_lookup: use salt.utils.args.arg_lookup instead.
• salt.utils.argspec_report: use salt.utils.args.argspec_report instead.
• salt.utils.split_input: use salt.utils.args.split_input instead.
• salt.utils.test_mode: use salt.utils.args.test_mode instead.
• salt.utils.format_call: use salt.utils.args.format_call instead.
• salt.utils.which: use salt.utils.path.which instead.
• salt.utils.which_bin: use salt.utils.path.which_bin instead.
• salt.utils.path_join: use salt.utils.path.join instead.
• salt.utils.check_or_die: use salt.utils.path.check_or_die instead.
• salt.utils.sanitize_win_path_string: use salt.utils.path.sanitize_win_path_string instead.
• salt.utils.rand_str: use salt.utils.hashutils.random_hash instead.
• salt.utils.get_hash: use salt.utils.hashutils.get_hash instead.
• salt.utils.is_windows: use salt.utils.platform.is_windows instead.
• salt.utils.is_proxy: use salt.utils.platform.is_proxy instead.
• salt.utils.is_linux: use salt.utils.platform.is_linux instead.
• salt.utils.is_darwin: use salt.utils.platform.is_darwin instead.
• salt.utils.is_sunos: use salt.utils.platform.is_sunos instead.
• salt.utils.is_smartos: use salt.utils.platform.is_smartos instead.
- salt.utils.is_smartos_globalzone: use salt.utils.platform.is_smartos_globalzone instead.
- salt.utils.is_smartos_zone: use salt.utils.platform.is_smartos_zone instead.
- salt.utils.is_freebsd: use salt.utils.platform.is_freebsd instead.
- salt.utils.is_netbsd: use salt.utils.platform.is_netbsd instead.
- salt.utils.is_openbsd: use salt.utils.platform.is_openbsd instead.
- salt.utils.is_aix: use salt.utils.platform.is_aix instead.
- salt.utils.safe_rm: use salt.utils.files.safe_rm instead.
- salt.utils.is_empty: use salt.utils.files.is_empty instead.
- salt.utils.fopen: use salt.utils.files.fopen instead.
- salt.utils.flopen: use salt.utils.files.flopen instead.
- salt.utils.fpopen: use salt.utils.files.fpopen instead.
- salt.utils.rm_rf: use salt.utils.files.rm_rf instead.
- salt.utils.mkstemp: use salt.utils.files.mkstemp instead.
- salt.utils.istextfile: use salt.utils.files.is_text_file instead.
- salt.utils.is_bin_file: use salt.utils.files.is_binary instead.
- salt.utils.list_files: use salt.utils.files.list_files instead.
- salt.utils.safe_walk: use salt.utils.files.safe_walk instead.
- salt.utils.st_mode_to_octal: use salt.utils.files.st_mode_to_octal instead.
- salt.utils.normalize_mode: use salt.utils.files.normalize_mode instead.
- salt.utils.human_size_to_bytes: use salt.utils.files.human_size_to_bytes instead.
- salt.utils.backup_minion: use salt.utils.files.backup_minion instead.
- salt.utils.str_version_to_evr: use salt.utils.pkg.rpm.version_to_evr instead.
- salt.utils.parse_docstring: use salt.utils.doc.parse_docstring instead.
- salt.utils.compare_versions: use salt.utils.versions.compare instead.
- salt.utils.warn_until: use salt.utils.versions.warn_until instead.
- salt.utils.kwargs_warn_until: use salt.utils.versions.kwargs_warn_until instead.
- salt.utils.get_color_theme: use salt.utils.color.get_color_theme instead.
- salt.utils.get_colors: use salt.utils.color.get_colors instead.
- salt.utils.gen_state_tag: use salt.utils.state.gen_tag instead.
- salt.utils.search_onfail_requisites: use salt.utils.state.search_onfail_requisites instead.
- salt.utils.check_state_result: use salt.utils.state.check_result instead.
- salt.utils.get_user: use salt.utils.user.get_user instead.
- salt.utils.get_uid: use salt.utils.user.get_uid instead.
• `salt.utils.get_specific_user`: use `salt.utils.user.get_specific_user` instead.
• `salt.utils.chugid`: use `salt.utils.user.chugid` instead.
• `salt.utils.chugid_and_umask`: use `salt.utils.user.chugid_and_umask` instead.
• `salt.utils.get_default_group`: use `salt.utils.user.get_default_group` instead.
• `salt.utils.get_group_list`: use `salt.utils.user.get_group_list` instead.
• `salt.utils.get_group_dict`: use `salt.utils.user.get_group_dict` instead.
• `salt.utils.get_gid_list`: use `salt.utils.user.get_gid_list` instead.
• `salt.utils.get_gid`: use `salt.utils.user.get_gid` instead.
• `salt.utils.enable_ctrl_logoff_handler`: use `salt.utils.win_functions.enable_ctrl_logoff_handler` instead.
• `salt.utils.traverse_dict`: use `salt.utils.data.traverse_dict` instead.
• `salt.utils.traverse_dict_and_list`: use `salt.utils.data.traverse_dict_and_list` instead.
• `salt.utils.filter_by`: use `salt.utils.data.filter_by` instead.
• `salt.utils.subdict_match`: use `salt.utils.data.subdict_match` instead.
• `salt.utils.substr_in_list`: use `salt.utils.data.substr_in_list` instead.
• `salt.utils.is_dictlist`: use `salt.utils.data.is_dictlist` instead.
• `salt.utils.repack_dictlist`: use `salt.utils.data.repack_dictlist` instead.
• `salt.utils.compare_dicts`: use `salt.utils.data.compare_dicts` instead.
• `salt.utils.compare_lists`: use `salt.utils.data.compare_lists` instead.
• `salt.utils.decode_dict`: use `salt.utils.data.decode_dict` instead.
• `salt.utils.decode_list`: use `salt.utils.data.decode_list` instead.
• `salt.utils.exactly_n`: use `salt.utils.data.exactly_n` instead.
• `salt.utils.exactly_one`: use `salt.utils.data.exactly_one` instead.
• `salt.utils.is_list`: use `salt.utils.data.is_list` instead.
• `salt.utils.is_iter`: use `salt.utils.data.is_iter` instead.
• `salt.utils.issorted`: use `salt.utils.data.issorted` instead.
• `salt.utils.is_true`: use `salt.utils.data.is_true` instead.
• `salt.utils.mysql_to_dict`: use `salt.utils.data.mysql_to_dict` instead.
• `salt.utils.simple_types_filter`: use `salt.utils.data.simple_types_filter` instead.
• `salt.utils.ip_bracket`: use `salt.utils.zeromq.ip_bracket` instead.
• `salt.utils.gen_mac`: use `salt.utils.network.gen_mac` instead.
• `salt.utils.mac_str_to_bytes`: use `salt.utils.network.mac_str_to_bytes` instead.
• `salt.utils.refresh_dns`: use `salt.utils.network.refresh_dns` instead.
• `salt.utils.dns_check`: use `salt.utils.network.dns_check` instead.
• `salt.utils.get_context`: use `salt.utils.stringutils.get_context` instead.
• `salt.utils.get_master_key`: use `salt.utils.master.get_master_key` instead.
Salt Documentation, Release 3003.3

• **salt.utils.get_values_of_matching_keys**: use `salt.utils.master.get_values_of_matching_keys` instead.
• **salt.utils.date_cast**: use `salt.utils.dateutils.date_cast` instead.
• **salt.utils.date_format**: use `salt.utils.dateutils.strftime` instead.
• **salt.utils.total_seconds**: use `salt.utils.dateutils.total_seconds` instead.
• **salt.utils.find_json**: use `salt.utils.json.find_json` instead.
• **salt.utils.import_json**: use `salt.utils.json.import_json` instead.
• **salt.utils.namespaced_function**: use `salt.utils.functools.namespaced_function` instead.
• **salt.utils.alias_function**: use `salt.utils.functools.alias_function` instead.
• **salt.utils.profile_func**: use `salt.utils.profile.profile_func` instead.
• **salt.utils.activate_profile**: use `salt.utils.profile.activate_profile` instead.
• **salt.utils.output_profile**: use `salt.utils.profile.output_profile` instead.

**Deprecations**

**Configuration Option Deprecations**

• The `requests_lib` configuration option has been removed. Please use `backend` instead.

**Profitbricks Cloud Updated Dependency**

The minimum version of the `profitbrick` python package for the `profitbricks` cloud driver has changed from 3.0.0 to 3.1.0.

**Execution Module Deprecations**

• The `blockdev` execution module has been removed. Its functions were merged with the `disk` module.
• The `lxc` execution module has been changed as follows:
  - The `dnsservers` option to `lxc.cloud_init_interface` no longer defaults to 4.4.4.4 and 8.8.8.8.
  - The `dns_via_dhcp` option to `lxc.cloud_init_interface` now defaults to `True` instead of `False`.
• The `win_psget` module has been changed as follows:
  - The `psget.psversion` function was removed. Please use `cmd.shell_info` instead.
• The `win_service` module (which provides the `service` module on Windows platforms) has been changed as follows:
  - The `config` function was removed. Please use `service.modify` instead.
  - The following arguments to the `service.create` function have been renamed:
    * `binpath` has been renamed to `bin_path`
    * `depend` has been renamed to `dependencies`
Display Name has been renamed to display_name
error has been renamed to error_control
group has been renamed to load_order_group
obj has been renamed to account_name
password has been renamed to account_password
start has been renamed to start_type
type has been renamed to service_type

The nacl module has been changed as follows:
- The following arguments have been renamed in the nacl.keygen, nacl.enc, and nacl.dec:
  - key_file has been renamed to sk_file
  - key has been renamed to sk

Runner Deprecations

- The manage runner has been changed as follows:
  - root_user argument was removed from the manage.bootstrap function. Please use salt-ssh roster entries for the host instead.
- The nacl runner has been changed as follows:
  - The following arguments have been renamed in the nacl.keygen, nacl.enc, and nacl.dec:
    - key_file has been renamed to sk_file
    - key has been renamed to sk

State Deprecations

- In the archive state, the tar_options and zip_options options were removed. Please use options instead.
- The cmd state had the following changes:
  - The user and group options were removed from the following functions (please use runas instead):
    - cmd.run
    - cmd.script
    - cmd.wait
    - cmd.wait_script
- In the file states, the show_diff option was removed in all states where it was previously supported. Please use show_changes instead.
Grain Deprecations

- For smartos, some grains have been deprecated. These grains will be removed in 3000:
  - The hypervisor_uuid grain has been replaced with mdata:sdc:server_uuid
  - The datacenter grain has been replaced with mdata:sdc:datatcenter_name

Pillar Deprecations

The legacy configuration for git_pillar has been removed. Please use the new configuration for git_pillar which was added in 2015.8.0, which is documented here.

Utils Deprecations

- In salt.utils.cloud, the fire_event function now requires a sock_dir argument. It was previously optional.

Other Miscellaneous Deprecations

- In version.py, the rc_info function was removed. Please use pre_info instead.
- Warnings for moving away from the env option were removed. saltenv should be used instead. The removal of these warnings does not have a behavior change. Only the warning text was removed.

Minion Blackout

During a blackout, minions will not execute any remote execution commands, except for saltutil.refresh_pillar. Previously, support was added so that blackouts are enabled using a special pillar key, minion_blackout set to True and an optional pillar key minion_blackout_whitelist to specify additional functions that are permitted during blackout. This release adds support for using this feature in the grains as well, by using special grains keys minion_blackout and minion_blackout_whitelist.

Sentry Log Handler

Configuring sentry raven python client via project, servers, public_key and `secret_key is deprecated and won't work with sentry clients > 3.0. Instead, the dsn config param must be used.

RAET transport

We haven't been doing development on RAET for quite some time and decided that 2018.3.0 is the time to announce the deprecation. RAET support will be removed in 3000. Please consider to move to zeromq or tcp transport instead of raet.
30.2.38 Salt 2018.3.1 Release Notes

Version 2018.3.1 is a bugfix release for 2018.3.0.

Statistics

- Total Merges: 525
- Total Issue References: 74
- Total PR References: 255
- Contributors: 55 (Ch3LL, DmitryKuzmenko, Giandom, Kimol, L4rS6, LukeCarrier, OrlandoArcaPix, TamCore, The-Loeki, UtahDave, aesposito91, bbinet, bdrung, boltronics, bosatsu, clan, corywright, damon-atkins, dincamihai, dnmurphy18, dnABic, douglasreymonds, dwoz, edgan, ejparker12, esell, ezh, femnad, folti, gareth-greenaway, gtmanfred, isbm, jasperla, johnj, mateiw, mcalmer, mirceaulinic, morganwillcock, opdude, pcn, pruiiz, psagers, psyer, rallytime, robinro, s0undt3ch, samodid, shengis, skjaro, tankywoo, terminalmage, twangboy, vutny, yannj-fr, zmedico)

Warning: If you are using Jinja to dump lists or dictionaries in your SLS files, this will now cause errors in Python 2 since Jinja does not produce YAML-compatible output when strings in the data structures contain unicode types. The dictionary must be passed through a Jinja filter to produce YAML-compatible strings.

The below is an example of invalid SLS:

```
/etc/foo.conf:
  file.mangaged:
    - source: salt://foo.conf
    - template: jinja
    - defaults: {{ mydict }}
```

To make it valid, use either one of Salt's own json or yaml filters:

```
/etc/foo.conf:
  file.mangaged:
    - source: salt://foo.conf
    - template: jinja
    - defaults: {{ mydict | json }}
```

Tornado 5.0 Support for Python 2 Only

Tornado 5.0 moves to using asyncio for all python3 versions. Because of this and changes in asyncio between python 3.4 and 3.5 to only be able to use one ioloop, which requires some rearchitecting, support for tornado 5.0 and python3 versions of salt has been delayed to a later release.

For now, to use tornado 5.0, the python 2 version of salt must be used.

---

30.2. Previous Releases 4585
Changes to Slack Engine pillars

When using groups_pillar_name for the slack engine, the engine should be used as part of a salt-minion process running on the master. This will allow the minion to have pillars assigned to it, and will still allow the engine to create a LocalClient connection to the master ipc sockets to control environments.

Changes to Automatically Updating the Roster File

In 2018.3.0 salt-ssh was configured to automatically update the flat roster file if a minion was not found for salt-ssh. This was decided to be undesireable as a default. The --skip-roster flag has been removed and replaced with --update-roster, which will enable salt-ssh to add minions to the flat roster file. This behavior can also be enabled by setting ssh_update_roster: True in the master config file.

Changes to file.blockreplace State

The append_newline argument was added to this state. Additionally, to improve idempotence, if the string represented by marker_end is found in the middle of the line, the content preceding the marker will be removed when the block is replaced. This allows one to remove append_newline: False from the SLS and have the block properly replaced if the end of the content block is immediately followed by the marker_end (i.e. no newline before the marker).

Note: This will require changes to your SLS if your marker_end does not include the very beginning of the content you want to keep.

See the file.blockreplace state documentation for further information.

Changelog for v2018.3.0..v2018.3.1

Generated at: 2018-06-06 17:43:01 UTC

- ISSUE #47955: (frogunder) 2018.3.1 Creating Windows machine in Amazon using salt-cloud fails. (refs: #47989)
- PR #47998: (rallytime) Back-port #47989 to 2018.3.1 @ 2018-06-06 17:08:04 UTC
  - PR #47989: (dwoz) Properly decode password from aws using m2crypto (refs: #47998)
  - 605463ca0d Merge pull request #47998 from rallytime/bp-47989
  - 1b7e9ac2d3 Lint fixes
  - 0545152ddd Properly decode password from aws using m2crypto
- PR #47965: (Ch3LL) Add PR 47924 from 2018.3 branch @ 2018-06-06 13:54:09 UTC
  - dbc798ac68 Merge pull request #47965 from Ch3LL/gitpy_mac_3.1
  - bf608ad44 Catch all exceptions in git import for salt.utils.gitfs
- PR #47973: (terminalmage) salt.modules.testinframod: fix TypeError invoking types.FunctionType @ 2018-06-06 13:53:46 UTC
  - 864d640633 Merge pull request #47973 from terminalmage/fix-testinfra
  - 4518c89484 Lint: Remove unused six import
  - c6816b2149 salt.modules.testinframod: fix TypeError invoking types.FunctionType
- ISSUE #47236: (MorphBonehunter) x509.private_key_managed broken after upgrade to 2018.3.0 (refs: #47957)
• PR #47967: (rallytime) Back-port #47957 to 2018.3.1 @ 2018-06-06 13:53:28 UTC
  - PR #47957: (garethgreenaway) [2018.8] Ensure x509 passphrase is a string (refs: #47967)
  - 5ddcfff420 Merge pull request #47967 from rallytime/bp-47957
  - 9a55579a1 removing unnecessary change
  - 329b2e5956 Ensuring that when a passphrase is passed in, it is returned as a string from the passphrase
    callback.

• PR #47902: (Ch3LL) Remove In Progress for 2018.3.1 Release Notes @ 2018-05-30 18:26:49 UTC
  - 9c964fbdbe Merge pull request #47902 from Ch3LL/rn_in_progress
  - f560a151cd Remove In Progress for 2018.3.1 Release Notes

• PR #47897: (Ch3LL) Add changelog to 2018.3.1 release notes @ 2018-05-30 15:04:42 UTC
  - ea7b4fde8 Merge pull request #47897 from Ch3LL/rn_2018
  - e27e273a7 Add == line to changelog line for release notes
  - 61e56d275d Add changelog to 2018.3.1 release notes

• ISSUE #47784: (jpsv) win_lgpo.py line 5368; AttributeError: 'OrderedDict' object has no attribute 'lower' (refs:
  #47848)

• PR #47848: (twangboy) Fix some major issues with the LGPO module @ 2018-05-30 13:37:32 UTC
  - f15e636d5e Merge pull request #47848 from twangboy/fix_47784
  - 98fac8dc8 Remove log.debug statement in __virtual__
  - f037fa4064 Fix some major issues with the LGPO module

• PR #47881: (gtmanfred) quote python_version in requirements.txt @ 2018-05-29 21:12:05 UTC
  - 92b8e4c08e Merge pull request #47881 from gtmanfred/2018.3.1
  - 3d874b5529 quote python_version in requirements.txt

• PR #47874: (gtmanfred) Tornado 5.0 is only supported on python 2 for now @ 2018-05-29 19:45:44 UTC
  - 705bf8172d Merge pull request #47874 from gtmanfred/2018.3.1
  - 13f920415a add tornado5 note to 2018.3.1
  - aeacd2b749 allow tornado 5.0 to be installed only for python2

• PR #47820: (Ch3LL) Remove output_loglevel in mac_system module @ 2018-05-25 13:10:36 UTC
  - 09e8c50cd Merge pull request #47820 from Ch3LL/mac_system
  - 362414e53b Remove output_loglevel in mac_system module

• PR #47798: (rallytime) Back-port #47776 to 2018.3.1 @ 2018-05-23 15:10:43 UTC
  - PR #47776: (garethgreenaway) [2018.3] Fixes to failing _before_connect tests (refs: #47798)
  - 7e314c26a Merge pull request #47798 from rallytime/bp-47776
  - ae881547d2 Fixing unit.test_minion.MinionTestCase.test_beacons_before_connect and
    unit.test_minion.MinionTestCase.test_scheduler_before_connect.

• PR #47782: (rallytime) Back-port #47775 to 2018.3.1 @ 2018-05-22 20:56:37 UTC
  - PR #47775: (gtmanfred) catch UnsupportedOperation with AssertionError (refs: #47782)
  - 9c610da0bc Merge pull request #47782 from rallytime/bp-47775
- bab9c966c5 catch UnsupportedOperation with AssertionError

**PR #47770**: (rallytime) Back-port #47769 to 2018.3.1 @ 2018-05-22 17:27:20 UTC
- PR #47769: (gtmanfred) skip test that breaks test suite (refs: #47770)
- 4adf10b20b Merge pull request #47770 from rallytime/bp-47769
- 3cfb957bc8 skip test that breaks test suite

**PR #47724**: (terminalmage) 2 master_tops/ext_nodes fixes @ 2018-05-21 15:59:04 UTC
- bbe8e62a98 Merge pull request #47724 from terminalmage/master_tops_fixes
- 48b8c5acd1 Merge branch '2018.3.1' into master_tops_fixes
- 89b3070d4c Change deprecation warning to debug logging
- ceb6e10f87 Fix spurious "Malformed request" error

**ISSUE #47484**: (whytewolf) Windows: pkg.latest state not updating packages. (refs: #47702)

**PR #47739**: (rallytime) Back-port #47702 to 2018.3.1 @ 2018-05-21 15:37:03 UTC
- PR #47702: (damon-atkins) State pkg.latest called win pkg.install with list of pkgs and the required versions (refs: #47739)
- 97d0ef4e743e Merge pull request #47739 from rallytime/bp-47702
- f79d9c46bb0 Update is_windows path to use platform
- f04b19b5b6 Ensure targeted_pkgs always contains value for non-windows.
- 14659f9cad Adjusted based on feed back.
- 9f18f7cd5f Whitespace lint issues
- 2a29b2ee66 pkg.install execution module on windows ensures the software package is installed when no version is specified, it does not upgrade the software to the latest. This is per the design. pkg.latest must provide the versions to install to pkg.install

**PR #47730**: (rallytime) Back-port #47700 to 2018.3.1 @ 2018-05-21 15:36:16 UTC
- PR #47700: (yannj-fr) fix roots modification time check (refs: #47730)
- cbeb0ba73e Merge pull request #47730 from rallytime/bp-47700
- 9bc35b88ea fix roots modification time check

**PR #47727**: (Ch3LL) Fix salt.utils.versions.warn_until spelling @ 2018-05-21 13:41:00 UTC
- 3614dd383a Merge pull request #47727 from Ch3LL/spelling
- 47a8de5b73 Fix salt.utils.versions.warn_until spelling

**PR #47736**: (Ch3LL) mac_utils test: patch __salt__['cmd.run*'] @ 2018-05-21 13:38:59 UTC
- bb45cdaefc Merge pull request #47736 from Ch3LL/fix_util_mac_test
- ee90779a84 mac_utils test: patch __salt__['cmd.run*']

**PR #47641**: (gtmanfred) fix _create_stream and tornado 5.0 @ 2018-05-18 14:25:36 UTC
- 43930f8bac Merge pull request #47641 from gtmanfred/2018.3.1
- 037fd92f59 fix pylint
- 75d42d8963 Fix last test for tornado
- a046512287 allow using tornado 5.0
- 05e651f038 fix _create_stream and tornado 5.0

- **ISSUE #47532**: (edgan) roster auto-add feature in salt-ssh-2018.3.0 (refs: #47541)

- **PR #47541**: (gtmanfred) switch skip-roster to update-roster @ 2018-05-18 13:29:50 UTC
  - 9f926bed1a Merge pull request #47541 from gtmanfred/2018.3
  - 8c5c780292 switch skip-roster to update-roster

- **PR #47719**: (rallytime) Back-port #47692 to 2018.3.1 @ 2018-05-18 13:22:02 UTC
  - PR #47692: (dwoz) Default windows to m1.small for ec2-classic (refs: #47719)
  - a963f1b558 Merge pull request #47719 from rallytime/bp-47692
  - 1df247fb7 Default windows to m1.small for ec2-classic

- **PR #47706**: (Ch3LL) Add cmd._run_all_quiet to mac_utils and __utils__ in mac_service @ 2018-05-18 01:11:46 UTC
  - c9108893ab Merge pull request #47706 from Ch3LL/mac_service_util
  - 3611af699f remove added space
  - 9921ca1a43 fix pylint
  - 317e41d3c0 use cmd._run_quiet and cmd._run_all_quiet instead of importing minion_mods in __salt__
  - a78652515a Add __salt__ to mac_utils and __utils__ in mac_service

- **PR #47664**: (rallytime) Back-port #47645 to 2018.3.1 @ 2018-05-15 18:25:27 UTC
  - PR #47645: (Ch3LL) query the pip path for test issue_2087_missing_pip (refs: #47664)
  - fb3bf1ff3e Merge pull request #47645 from rallytime/bp-47645
  - 0a732d8e66 query the pip path for test issue_2087_missing_pip

- **PR #47647**: (rallytime) Back-port #47601 and #47643 to 2018.3.1 @ 2018-05-15 14:07:54 UTC
  - PR #47643: (dwoz) Remove unwanted file (refs: #47647)
  - PR #47601: (dwoz) Skip tests when we can not use runas (refs: #47647)
  - 9039fee104 Merge pull request #47647 from rallytime/bp-47601-and-47643-2018.3.1
  - 7214fe17c8 Fix typo
  - 506dceed17 Remove unwanted file
  - 6ba21dfda3 use ignore-undefined-variable
  - 2429f9fe8a Ignore pylint WindowsError
  - 2d63682f8a Better doc string
  - ec2adff699 Skip tests when we can not use runas

- **PR #47596**: (rallytime) Back-port #47568 to 2018.3.1 @ 2018-05-10 22:09:09 UTC
  - PR #47568: (terminalmage) salt.serializers.yaml/yamlex: remove invalid multi_constructor (refs: #47596)
  - 17b5265d95 Merge pull request #47596 from rallytime/bp-47568
  - ecf5dc8b9f Add exception logging on serialize/deserialize exceptions
  - 9659b19819 salt.serializers.yaml/yamlex: remove invalid multi_constructor

- **PR #47595**: (rallytime) Back-port #47569 to 2018.3.1 @ 2018-05-10 22:08:53 UTC
- PR #47569: (Ch3LL) Update salt.utils.path mock in virtual core test (refs: #47595)
- c4c400f3e9 Merge pull request #47595 from rallytime/bp-47569
- 0763f96458 update salt.utils.platform path for virt core test
- 71825c1ef1 Update salt.utils.path mock in virtual core test

- PR #47599: (rallytime) Back-port #47570 to 2018.3.1 @ 2018-05-10 22:06:44 UTC
  - PR #47570: (gtmanfred) Update dependency to msgpack (refs: #47599)
  - ec7de14be0 Merge pull request #47599 from rallytime/bp-47570
  - 9334c03da9 Update dependency to msgpack

- PR #47571: (rallytime) [2018.3.1] Update man pages @ 2018-05-10 16:21:57 UTC
  - 2a10d92669 Merge pull request #47571 from rallytime/man-pages
  - ade5e9f664 [2018.3.1] Update man pages

- PR #47550: (pcn) Fixes a bad deletion I did that only surfaced in 2018.3 @ 2018-05-09 13:36:33 UTC
  - 85284caaf9 Merge pull request #47550 from pcn/fx-disable-term-protect-in-2018.3
  - d58a56877c Fixes a bad deletion I did that only surfaced in 2018.3

- ISSUE #47553: (douglasjreynolds) Unicode version error in lxc (refs: #47554)

- PR #47554: (douglasjreynolds) Converted unicode str version to a LooseVersion; matching line 2080. @ 2018-05-09 13:34:13 UTC
  - f9083ff77e Merge pull request #47554 from douglasjreynolds/lxc_unicode_fix
  - e6bce581c6 Converted unicode str version to _LooseVersion to match line 2080.

- PR #47518: (Ch3LL) Fix 47364: ensure we are not caching zfs.is_supported @ 2018-05-09 13:29:07 UTC
  - fe4e79f1de Merge pull request #47518 from Ch3LL/zfs_support
  - d19fe9063e remove unnecessary patch in zfs.is_supported test
  - 58c4f2f96 Fix 47364: ensure we are not caching zfs.is_supported

- PR #47159: (terminalmage) Fix for whitelist/blacklist checking for non-list iterables @ 2018-05-08 20:43:51 UTC
  - 33e9f13a6 Merge pull request #47159 from terminalmage/whitelist_blacklist-iter-fix
  - ca936de372 Treat empty whitelist/blacklist as no whitelist/blacklist
  - bccaf2621 Raise a TypeError when invalid input passed to check_whitelist_blacklist
  - 2ae510ff2b Fix comment in test
  - 17398e9f47 Fix for whitelist/blacklist checking for non-list iterables

- PR #47514: (rallytime) [2018.3] Merge forward from 2017.7 to 2018.3 @ 2018-05-08 18:36:54 UTC
  - 21809ddc02 Merge pull request #47514 from rallytime/merge-2018.3
  - e261b605f Update the pip tests to use the parsing syntax generated in PR #47196
  - b13b597f9f Remove double instance of adding --format=json in pip module
  - 2ad60e8e81 Lint: remove duplicate function in helpers.py
  - 7548015b83 Lint: cur_version should just be pip_version
  - 5565d5e9b1 Update old utils paths with new utils paths
- 786076ac03 Merge branch '2017.7' into '2018.3'
  - 611ca1fc03 Merge pull request #47476 from gtmanfred/2017.7
    - 1f91a85587 specify cache dir for pip install
    - 99e150e09c check for kitchen-vagrant gem before loading windows tests
  - 7e3f2c56da Merge pull request #47412 from twangboy/fix_47125
    - c9bab0b8e3 Merge branch '2017.7' into fix_47125
    - 2600e04d5 Fix overly long line
    - 5c8db05769 Fix issue where the cwd was being removed
  - 4846e957c4 Merge pull request #47467 from twangboy/cleanup_settings
    - 9d498293b1 Remove unused settings, update NSIS
  - da9871d36b Merge pull request #47196 from twangboy/fix_47024
    - 14ee5537b9 Add @with_tempdir helper
    - 6c3b5fa6fa Fix typo
    - f031710af2 Merge branch '2017.7' into fix_47024
    - 7c46d9d0d4 Fix integration.modules.test_pip
    - 22ac81df63 Fix integration.modules.test_pip
    - 57d98224d4 Merge pull request #9 from terminalmage/twangboy/fix_47024
    - 37a13d8004 Update pip unit tests to reflect changes
    - 7f86779be0 Lint fix
    - c48d8f4f61 DRY and other fixes in pip module
    - b1117896a0 Change from global variable to __context__``
    - 3e6e524eca Fix some tests``
    - c9fe0f20e4 Fix lint error
    - fd47be1530 Fix merge conflict
  - e8c4524bae Merge pull request #47455 from Ch3LL/unreleased_rn
    - b6d0cc2ab7 Add In Progress Warning for 2017.7.6 Release Notes
  - 2c7a4b6179 Merge pull request #47459 from gtmanfred/2017.7
    - d228e72477 update ubuntu-rolling to 18.04
  - 64a64c0ed7 Merge pull request #47462 from terminalmage/docs
    - 6d7803ec0e Fix docs build on Sphinx 1.7+
  - 6cd0d31c03 Merge pull request #47438 from lomeroe/double_admx_test
    - 4902f1e2ba check if a policy has either an enabled value or enabled list entry or a disabled value or disabled list entry when determining the state of the policy
  - ed69821d19 Merge pull request #47433 from s0undt3ch/2017.7
    - 5ababf25d6 Add missing requirements files not committed in #47106

- ISSUE #47443: (skylerberg) Input validation does not raise SaltInvocationError in win_dsc.py (refs: #47505)
• PR #47516: (rallytime) Back-port #47505 to 2018.3 @ 2018-05-08 13:32:33 UTC
  - PR #47505: (dwoz) Raise proper invocation errors (refs: #47516)
  - 9559ac7679 Merge pull request #47516 from rallytime/bp-47505
  - 7c60e4071e Raise proper invocation errors
• ISSUE #47502: (psagers) service.enable (and .disable) destroys /etc/rc.conf on FreeBSD (refs: #47503)
• PR #47515: (rallytime) Back-port #47505 to 2018.3 @ 2018-05-08 13:32:03 UTC
  - PR #47505: (psagers) Fix #47502: Remove an extraneous (accidentally introduced?) call to rstrip() (refs: #47515)
  - bf79acfb68 Merge pull request #47515 from rallytime/bp-47505
  - 82db48b88a0 Fix #47502: Remove an extraneous (accidentally introduced?) call to rstrip.
• ISSUE #47511: (joesusecom) sshconfig salt-ssh roster is missing in the documentation (refs: #47531)
• PR #47531: (gtmanfred) add ssh config doc for rosters @ 2018-05-07 22:26:30 UTC
  - 779b36d056 Merge pull request #47531 from gtmanfred/2018.3
  - 926fd7162c add ssh config doc for rosters
• PR #47520: (rallytime) Cleanup weird spaces @ 2018-05-07 19:50:58 UTC
  - 95b2f9db30 Merge pull request #47520 from rallytime/cleanup-spaces
  - e9cb08a00 Cleanup weird spaces
• PR #47495: (dwoz) Fix crufty nssm.exe reference @ 2018-05-07 19:12:49 UTC
  - 05fc52f124 Merge pull request #47495 from dwoz/uninstall_wart
  - c6a36e906c Merge branch '2018.3' into uninstall_wart
• ISSUE #47322: (masau) lxc clone not working (refs: #47494)
• PR #47494: (ejparker12) Fixed lxc.clone unhandled exception in salt/modules/lxc.py @ 2018-05-07 19:03:58 UTC
  - 3cc73d3ae7c Merge pull request #47494 from ejparker12/fixed-lxc-clone
  - e02cc672b2 Fixed lxc.clone unhandled exception in salt/modules/lxc.py
• ISSUE #47496: (mateiw) salt-ssh --extra-filerefs doesn't include any files if no refs in state files (refs: #47497)
• PR #47497: (mateiw) Fix salt-ssh --extra-filerefs to include files even if no refs in states to apply @ 2018-05-07 19:02:50 UTC
  - d6729aae7 --extra-filerefs include files even if no refs in states to apply
• ISSUE #47404: (shengis) Localized version of yum breaks pkg.install (refs: #47441)
• PR #47441: (shengis) Fix _run to reset LANGUAGE env variable @ 2018-05-07 18:29:25 UTC
  - 34b1be1e53 Merge pull request #47441 from shengis/fixed-env-reset
  - 62fc16b721 Merge branch '2018.3' into fix-run-env-reset
  - 3b02b0bdc1 Merge branch '2018.3' into fix-run-env-reset
  - ee2ab38c8c Fix _run to reset LANGUAGE env variable
• ISSUE #47479: (whytwolf) win_task.info on py3 throwing error, but works in py2 (refs: #47507)
• PR #47507: (gtmanfred) fix win_task for py3 @ 2018-05-07 17:41:21 UTC
- 17cf4f7cf Merge pull request #47507 from gtmanfred/2018.3
- 19db3f9402 fix win_task for py3

- **PR #47472**: (terminalmage) salt.utils.hashutils: Fix UnicodeEncodeError in several funcs @ 2018-05-07 13:31:07 UTC
  - 4ac2df8fb2 Merge pull request #47472 from terminalmage/hashutils
  - 7266e9984d salt.utils.hashutils: Fix UnicodeEncodeError in several funcs

- **PR #47485**: (gtmanfred) add openstack modules to doc index.rst @ 2018-05-07 13:11:42 UTC
  - 8b0a370189 Merge pull request #47485 from gtmanfred/2018.3
  - c86163d79f add openstack modules to doc index.rst
    - 3557fc5fa6 Fix crufty nssm.exe reference

- **PR #47482**: (gtmanfred) add all autodoc for new salt openstack modules @ 2018-05-04 21:03:38 UTC
  - 8df37f734a Merge pull request #47482 from gtmanfred/2018.3
  - 1f65d5cb73 add all autodoc for new salt openstack modules

- **PR #47447**: (dwoz) Fix failing test due to windows console encoding @ 2018-05-04 16:41:29 UTC
  - d20ca15c5d Merge pull request #47447 from dwoz/dev
  - 8c01773833 Use the same non decodable bytes for all tests
  - 983881a2a1 Add bytes that will not decode using cp1252

- **PR #47466**: (dwoz) bytes file that decodes the same utf-8 and cp1252 @ 2018-05-04 15:54:24 UTC
  - 8c5b30b541 Merge pull request #47466 from dwoz/randbytes
  - fd9bc06aab bytes file that decodes the same utf-8 and cp1252

- **ISSUE #46660**: (mruepp) top file merging same does produce conflicting ids with gitfs (refs: #47354, #46751)

- **PR #47465**: (rallytime) Back-port #47354 to 2018.3 @ 2018-05-04 13:06:04 UTC
  - PR #47354: (folti) fix forward port of #46751 (refs: #47465)
  - PR #46751: (folti) top file merging strategy 'same' works again (refs: #47354)
  - 3658604c43 Merge pull request #47465 from rallytime/bp-47354
  - 3df6fa7990 fix forward port of #46751

- **PR #47435**: (rallytime) [2018.3] Merge forward from 2017.7 to 2018.3 @ 2018-05-04 13:05:35 UTC
  - fa29f8fac Merge pull request #47435 from rallytime/merge-2018.3
  - be073da5f Add skipIfs back in for rest_tornado tests
  - fd98ee3df1 Lint: Add missing blank line
  - 561718b20b Update old is_windows utils path to new utils path
  - a94cd8a0d Merge branch '2017.7' into '2018.3'
    - 7ae3497b0c Merge pull request #47429 from gtmanfred/2017.7
      - 8ae32033cc server_list_min should use state, not status
    - 2f5fc4ec5 Merge pull request #47399 from isbm/isbm-zeromq17-deprecationwarning-2017.7.2-v2
      - a36e49fd27 fix pylint

30.2. Previous Releases 4593
- 98b5629b36 Fix imports
- d94c0f0152 Remove unnecessary variable
- 8e377b5653 Lintfix: E0203 and attribute access
- 2aab70b1b8 Install ZMQ handler if <15 version
- 296c589f4b Use ZMQ switch utility in the integration tests
- ab5fa34d7c Use ZMQ_VERSION_INFO constant everywhere
- 43b5558b82 Add trace logging on ZMQ sockets communication
- 164204a9fe Remove duplicate code for ZMQ monitor handling
- 834b1e4ff0 Remove obsolete ZMQIOLoop direct instance
- 1c90cbdb3c Remove an empty line
- ef2e0acad66 Add logging on ZMQ socket exception
- 38ceed371d Lintfix: ident
- 1ece6a5f52 Lintfix: line too long
- 4e650c0b44 Remove code duplicate by reusing utilities functions
- 57da54b676 Fix imports
- 948368e9a1 Add libzmq version info builder
- 0b4a17b859 Update log exception message
- 116e1809fc Put a message alongside the exception to the logs
- 4bc3124ab7 Remove unnecessary ZMQ import and check for its presence
- 05fd40269f Use utility for ZMQ import handling in SSH client
- 457ef7d9a5 Use utility for ZMQ import handling in flo/zero
- 08dee6f5bd Use utility for ZMQ import handling
- e2a353cb0 Remove unnecessary ZMQ extra-check for cache utils
- c8f2cc271d Remove unnecessary ZMQ extra-check for master utils
- 3940667bb9 Remove old ZMQ import handling
- f34a53e029 Use ZMQ utility for version check
- cbb26cb28 Use ZMQ installer for master
- 453e83210a Add ZMQ version build
- af9601e21d Use ZMQ importer utility in async
- d50b2b2023 Incorporate tornado-5 fixes
- 1fd9af0655 Add ZMQ backward-compatibility tornado installer for older versions
- ad4b40415c Add one place for handling various ZMQ versions and IOLoop classes
  * b14e974b5f Merge pull request #47343 from Ch3LL/win_srv_test
  * 2173be6f549 ensure we are enabling/disabling before test
  * d58be06751 Add additional service module integration tests and enable for windows
  * b0f3fbb77f Merge pull request #47375 from terminalmage/issue47310
• fa2bea52bb Remove extra blank line to appease linter
• f8ab2be81c Add debug logging if we fail to detect virtual packages
• 67c4fc56ac Warn on use of virtual packages in pkg.installed state

• 56235032f4 Merge pull request #47415 from kstreee/fix-local-client-tgt-bug
  • b8d37e0a1e To add a test case for the syndic environment, copies the test case which was
    written by @mattt-any that was already merged into develop branch, related pr is #46692.
  • 4627bad1fd Realizes 'tgt' field into actual minions using ckmnions to subscribe results of
    the minions before publishing a payload.

• d65eaeef03 Merge pull request #47286 from baniobloom/vpc_peering_connection_name_fix
  • a968965087 Merge branch '2017.7' into vpc_peering_connection_name_fix

• 8a5d4437bb Merge pull request #47270 from meaksh/2017.7-fix-retcode-on-schedule-utils

  • 51d21af4f Merge pull request #47464 from dwoz/skip_syslog_tests
salt documentation, release 3003.3

- ca9393b7fb skip tests not applicable to windows
- pr #47456: (dwoz) sysname returns text type @ 2018-05-04 02:57:50 utc
  - 3219430dcc merge pull request #47456 from dwoz/sysname
  - 559ee1961f sysname returns text type
- pr #47458: (ch3ll) add in progress warning for 2018.3.1 release notes @ 2018-05-03 20:40:46 utc
  - f3918514a7 merge pull request #47458 from ch3ll/unreleased_rn_2018
  - 6a261e5e3a add in progress warning for 2018.3.1 release notes
- pr #47448: (dwoz) fix missing import in test suite @ 2018-05-03 14:30:23 utc
  - 9fbdcebe994 merge pull request #47448 from dwoz/transport_import
  - 7e04eb82e1 fix missing import in test suite
- issue #47260: (mew1033) disable_saltenv_mapping not working as expected (refs: #47410)
- pr #47410: (terminalmage) gitfs: fix identification of base env when saltenv mapping is disabled @ 2018-05-03 14:12:27 utc
  - 1573a32a7f merge pull request #47410 from terminalmage/issue47260
  - 3ab332ad0e update tests to reflect bugfix
  - 7b8127f336 gitfs: fix identification of base env when saltenv mapping is disabled
- pr #47413: (dmurphy18) repobuild improvements for ubuntu 18.04 lack of gpg2 and better error checking @ 2018-05-02 16:21:31 utc
  - 0914ecf9a6 merge pull request #47413 from saltstack/repobuild_improv
  - c064032110 remove extra spaces for pylint
  - 20c50b3331 minor cleanup due to review comments
  - c143b399e9 update for ubuntu 18.04 lack of gpg2 and enhanced error checking
- pr #47216: (twangboy) reg docs @ 2018-05-02 13:33:27 utc
  - 5e5774fd37 merge pull request #47216 from twangboy/reg_docs
  - 0bee58b16 fix lint, add bytes
  - bad441f8dc fix some lint'
  - af5139c2ff add additional examples
  - 24df6ec1b7 additional docs formatting
  - ff46b27a60 update reg docs, fix formatting issues
- pr #47417: (gtmanfred) revert instantiating a caller client in the engine @ 2018-05-01 18:58:06 utc
  - 63ba4fc4f8 merge pull request #47417 from gtmanfred/slack
  - 5c8ea7f506 update slack.py
  - ee8a5eeb10 revert instantiating a caller client in the engine
- issue #45790: (bdarnell) test with tornado 5.0b1 (refs: #46006, #47106, #47433)
- pr #47368: (rallytime) [2018.3] merge forward from 2017.7 to 2018.3 @ 2018-05-01 18:56:20 utc
  - pr #47106: (dmitrykuzmenko) tornado50 compatibility fixes (refs: #47374, #47368, #47433)
  - pr #46002: (isbm) pyzmq 17.0.0 proper handling (refs: #47374, #47368)
- 0bdffaa5ffe Merge pull request #47368 from rallytime/merge-2018.3
- 46806e595b Update test assertion comment for pip pkgs
- d9d24de49e Lint: Add missing import
- c7b73d132e Merge branch ‘2017.7’ into ‘2018.3’
  * 31db8ca7ad Merge pull request #47347 from dwoz/test_mysql_fix_again
    - add78fb618 Fix linter warnings
    - 2644cc7553 Fix linter nits
    - 799c601184 Proper fix for mysql tests
- fefc0cc5ca Update old utils paths to use new utils paths
- 13e8124031 Merge branch ‘2017.7’ into ‘2018.3’
  * e573236848 Merge pull request #47359 from gtmanfred/2017.7
    - 6214ed8133 add mention of the formulas channel to the formulas docs
  * 629503b2a8 Merge pull request #47317 from dwoz/threadshutdown
    - 6db2a0e4d3 Log exceptions at exception level
    - d4ae787595 Do not join a thread that is stopped
  * aacd5cef3e Merge pull request #47304 from cachedout/test_cli_timeout_arg
    - 85025af83c Pass timeout to salt CLI for tests
  * 55534fb659 Merge pull request #47311 from Ch3LL/firewall_windows
    - 4e16c18c16 Add firewall module windows tests to whitelist
    - 4b2c4ec66 Add windows firewall execution modules integration tests
  * 1667375a80 Merge pull request #47348 from dwoz/no_symlinks
    - 94a70e847a Ignore gitfs tests when symlinks not enabled
  * dac04261b5 Merge pull request #47342 from dwoz/test_mysql_fix
    - 7496f4c5a8 Fix mysql test cases
  * 34e78ef564 Merge pull request #47341 from dwoz/inet_pton_fix
    - 85451f48d4 Fix python 3 support for inet_pton function
  * e4779f3246 Merge pull request #47339 from dwoz/ssh_key_test_fix
    - e37a93a1ca Remove redundant close call
    - b2ae5889b7 Close the temporary file handle
    - 9f7f83a975 Use salt.utils.fopen for line ending consistency
  * b221860151 Merge pull request #47335 from dwoz/pip_test_fix
    - dcb6a2c00 Remove un-needed string-escape
  * 1c527bdf3a Merge pull request #47331 from dwoz/py3_wingroup_fix
    - cc154ef857 Do not encode usernames
  * 708078b152 Merge pull request #47329 from cachedout/frank_credit
    - 33c0644ac4 Credit Frank Spierings
Salt Documentation, Release 3003.3

- a545e55543 Merge pull request #47281 from Ch3LL/system_test
  - c9181a75a6 Add destructivetest decorator on tests
  - 0d0c8987fc Add win_system integration module tests
- b64d930df0 Merge pull request #47283 from Ch3LL/ntp_test
  - ced7f86546 Add windows ntp integration module tests
- 910aff910f Merge pull request #47314 from Ch3LL/net_mac_test
  - 67beb1451c Skip netstat test on macosx as its not supported
- 0549ef7c16 Merge pull request #47307 from rallytime/bp-47257
  - 6c5b2f92bc Role is not a list but a dictionary
- d6ff4689f6 Merge pull request #47312 from rallytime/update-bootstrap-release
  - 765ce06a2 Update bootstrap script to latest release: 2018.04.25
- e0765f5719 Merge pull request #47279 from dwoz/py3_build_fix
  - 21dc1bab91 Pep-8 line endings
  - 717abeda7 Fix comman wart
  - 4100dcd64c Close might get called more than once
  - dbe67f943 Stop socket before queue on delete
  - 9587f569e Silence pylint import-error for six.moves
  - 4b0c7d3b34 Fix typo
  - 05af7c2b1 Use six.moves for queue import
  - fe340778fa Gracefully shutdown worker threads
- 44f19b2f94 Merge pull request #47113 from jfindlay/iptables_state
  - 8d80012ee modules,states.iptables support proto for policy ext
- b7a206330 Merge pull request #47302 from Ch3LL/dead_code
  - d48b4a877 Add virtual grains test for core grains
  - a59dd879ed Remove dead code in core grains file for virt-what
- e29362acfc Merge pull request #47303 from baniobloom/bug_fix_doc
  - b97c9df5f3 added clarity on how to figure out what is the oldest supported main release branch
- 0d9a55e013 Merge pull request #47106 from DSRCorporation/bugs/tornado50
  - 39e403b18d Merge branch '2017.7' into bugs/tornado50
  - 6706b3a2d1 Run off of a temporary config
  - d6873800d5 Allow running pytest>=3.5.0
  - 2da3983740 Tornado 5.0 compatibility fixes
- 2e014f4746 Merge pull request #47271 from gtmanfred/amazon
  - 8a53908908 Do not load rh_service module when booted with systemd
  - e4d1d5bf11 Revert "support amazon linux 2 for service module"
• 59b0ed1e9 Merge pull request #47246 from cloudflare/fix-44847-2017.7
  • ad80028104 This way, we can pass flags such as debug into the state, but also test.
• 4e2e1f0719 Merge pull request #47220 from benediktwerner/fix-pip-2017.7
  • 0197c3e973 Fix pip test
  • 3bf66c09f Fix pip.installed with pip>=10.0.0
• 92e606251f Merge pull request #47272 from rallytime/reg-windows-codeowners
  • 9445af0185 Add windows tests and reg module/state to CODEOWNERS file for team-windows
• 9dca5c0221 Merge pull request #47252 from rallytime/codeowners-fixes

• 56933eb0b2 Merge pull request #47227 from pruiz/pruiz/zfs-dataset-present-slow-2017.7
  • fded61f19b Fix issue #47225: avoid zfs.filesystem_present slowdown when dataset has lots of snapshots
• 9825065048 Merge pull request #47167 from smitty42/vbox-skd-fix
  • 5de53139ed Merge branch '2017.7' into vbox-skd-fix
• 976f031170 Merge pull request #47213 from dwoz/py3win
  • ad9c7f63f0 Fix coverate on py3 windows builds
  • 91252ac95 Adding updates for python3 compatibility and new virtualbox SDK version support.
• cebc6d069 Merge pull request #47197 from dwoz/testfix
  • 25803c9176 Move process target to top level module namespace
• d4269c2b70 Merge pull request #47193 from Ch3LL/network_test
  • bbf9987c19 Add network module integration tests
• c777248a78 Merge pull request #47189 from Ch3LL/autoruns
  • 6a88bedb7a Add autoruns to windows whitelist
  • e9e4d4af70 Add autoruns.list integration test for Windows

• PR #47403: (rallytime) Back-port #47356 to 2018.3 @ 2018-05-01 15:19:06 UTC
  • PR #47356: (robinro) Fix sysctl translate (refs: #47403)
  • 4e6870305c Merge pull request #47403 from rallytime/bp-47356
  • 9b682bc48e Fix sysctl translate
• PR #47407: (terminalmage) Reduce severity of missing X_update_interval key @ 2018-05-01 15:18:46 UTC
- 7e0cdd6145 Merge pull request #47407 from terminalmage/update-interval-log
- abc592bff Reduce severity of missing X_update_interval key

**ISSUE #47042**: (valentin2105) [ERROR] Unable to manage file: 'utf8' codec can't decode byte (refs: #47061)

**PR #47405**: (terminalmage) Fix file.get_diff regression in 2018.3 branch @ 2018-05-01 15:16:46 UTC
- PR #47061: (terminalmage) Fix differing binary files in file.get_diff (refs: #47405)
- 1377942bcc Merge pull request #47405 from terminalmage/binary-diff
- 89ddb08026 Use a lambda instead of defining a one-line function
- b79f04fda Remove no-longer-used enumerate
- e03b865359 Add unit test for file.get_diff
- 5bdc9e9bd5 Fix UnboundLocalError in file.get_diff

**ISSUE #47325**: (robertodocampo) docker_container.running creates containers using the image ID as the image name (refs: #47367)

**PR #47367**: (terminalmage) Start docker containers with image name instead of ID @ 2018-04-30 18:46:13 UTC
- c267e6083e Merge pull request #47367 from terminalmage/issue47325
- 798134aca3 Add regression test for creating images with image name instead of ID
- 4ed4e839c Start docker containers with image name instead of ID

**ISSUE #47006**: (cedwards) marathon & fx2 grain modules cause master and minion failure (refs: #47401)

**PR #47401**: (gtmanfred) fix proxy virtual checks for marathon and fx2 @ 2018-04-30 18:44:46 UTC
- 3bb00cb55 Merge pull request #47401 from gtmanfred/proxy
- 99f9231759 fix proxy virtual checks for marathon and fx2

**PR #47397**: (rallytime) Add 2018.3.1 Release Notes @ 2018-04-30 14:44:38 UTC
- c160fe366e Merge pull request #47397 from rallytime/2018.3.1-release-notes
- 3b40cdad2a Add 2018.3.1 Release Notes

**ISSUE #45790**: (bdarnell) Test with Tornado 5.0b1 (refs: #46066, #47106, #47433)

**PR #47374**: (DmitryKuzmenko) tornado50 merge forward for 2018.3 @ 2018-04-29 16:29:12 UTC
- PR #47106: (DmitryKuzmenko) Tornado50 compatibility fixes (refs: #47374, #47368, #47433)
- PR #46002: (isbm) Pyzmq 17.0.0 proper handling (refs: #47374, #47368)
- 3400f829c4 Merge pull request #47374 from DSRCorporation/bugs/tornado50-2018.3
- 34058c181c Fix pyzmq
- 47b6d409d1 add io_loop handling to runtests engine
- fd074d7b7d use salt.utils.zeromq
- 4ae33c5d9a Run off of a temporary config
- 7938b4906e Allow running pytest>=3.5.0
- 34058c181c Tornado 5.0 compatibility fixes

**ISSUE #47124**: (mchugh19) Vault module problem in 2018.3.0 (refs: #47379)

**PR #47379**: (dwoz) Properly encode messages when creating/validating signatures with m2crypto @ 2018-04-28 08:38:23 UTC
- 2afe4bee95 Merge pull request #47379 from dwoz/m2crypto_regression
- 068f2d430d Always sign and verify bytes
- 7810ebaba9 Add sign regression tests
- f4441c3a1c Adding regression test for 47124

**PR #47277:** (morganwillcock) Fix minion crash on NetBSD @ 2018-04-27 15:02:21 UTC
- 7390b72808 Merge pull request #47277 from morganwillcock/netbsdswap
- 0bcb1a079a Merge branch '2018.3' into netbsdswap
- 30478e8c9c Use swapctl for NetBSD

**PR #47320:** (twangboy) Change from NSSM to SSM @ 2018-04-27 14:37:50 UTC
- 2b7c7ef704 Merge pull request #47320 from twangboy/win_ssm
- 5549d83aae Use ssm instead of nssm

**PR #47308:** (rallytime) Back-port #47287 to 2018.3 @ 2018-04-27 13:50:49 UTC
- PR #47287: (esell) convert unicode ssh pass to str for azure (refs: #47308)
- b6df5facce Merge pull request #47308 from rallytime/bp-47287
- 5f392a23fe convert unicode ssh pass to str for azure

**ISSUE #47324:** (rlschilperoort) archive.extracted keep and/or keep_source not working (refs: #47332)

**PR #47332:** (garethgreenaway) [2018.3] Removing duplicate code from state/archive.py @ 2018-04-27 13:12:51 UTC
- efa3aabh800 Merge pull request #47332 from garethgreenaway/47324_archive_extracted_keep_keep_source
- cc10bfe6c6 Removing redundant code which is preventing keep & keep_source from being set.

**PR #47326:** (The-Loeki) Some Redis fixes @ 2018-04-26 17:12:47 UTC
- 245d62ca16 Merge pull request #47326 from The-Loeki/redis-cache-sockets
- d86f5e5d8d redis_return: add unix_socket_path to docs
- ee9f533765 redis_cache: document UNIX socket access
- 533755a5a redis_return: Let redis handle pool creation, add UNIX socket support
- c90f83b0f9 redis_return: cluster_mode default to False in __virtual__ to prevent KeyError stacktraces
- 71e32b829 redis_return: Fix code blocks in docs
- e660f5c78 redis_cache fix code block in docs
- 40e67747ee redis_cache: add socket to options

**PR #47319:** (dwoz) Skip unix group tests on windows. @ 2018-04-26 15:59:35 UTC
- 27a43880ff Merge pull request #47319 from dwoz/skip_tests
- d9442d043e Skip tests not applicable to windows

**PR #47293:** (dwoz) The grp module is not available on windows @ 2018-04-25 20:22:34 UTC
- 057f668788 Merge pull request #47293 from dwoz/win_build_fix
- 082b8d0b3d Fix sneaky indentation
• ISSUE #46862: (kivoli) Setting locale.system fails in 2018.3 (refs: #47280, #46869)
• PR #47280: (gtmanfred) make sure not to send invalid information @ 2018-04-25 17:46:45 UTC
  – fff4f8c1a5 Merge pull request #47280 from gtmanfred/localectl
  – 7c212cbb2d fix pylint
  – 675478768e update localedmod tests
  – 9075070573 make sure not to send invalid information

• ISSUE #46977: (gtmanfred) [2018.3.0] Backwards compatibilty breaking change in 2018.3.0 (refs: #47038)
• PR #47038: (garethgreenaway) [2018.3] fix to fileclient.py @ 2018-04-25 14:57:04 UTC
  – 205701dc0b Merge pull request #47038 from garethgreenaway/46977_fixing_fileclient_forward_compatibility
  – ba01d2133a Updating version.py to include Magnesium.
  – 10c823dd79 The _ext_nodes master function has been renamed to _master_tops. To ensure compatibility
    when using older Salt masters we continue to pass the function as _ext_nodes until the Magnesium
    release.

• ISSUE #47059: (OrlandoArcapix) Some states incorrectly return None instead of an empty dict when there are
  no changes (refs: #47060)

  – fcc042aa5f Fix beacon documentation for the new behavior mentioned in issue #47267
• **PR #47291**: (bosatsu) Fix proxy minion beacon doc @ 2018-04-25 13:42:36 UTC
  - 3ef4fe6ed2 Merge pull request #47291 from bosatsu/fix-proxy-minion-beacon-doc
  - 01980b4e43 Fix topics/releases/2018.3.0.rst to include correct example of proxy_example beacon yaml configuration.
  - 9682e26eeefix topics/proxyminion/beacon.rst to include correct example of salt_proxy beacon yaml configuration.

• **ISSUE #47239**: (bosatsu) Unable to load salt_proxy beacon on minion in 2018.3.0 (refs: 
  #47255)

• **PR #47255**: (garthgreenaway) [2018.3] Fixes to salt_proxy beacon and beacon tests @ 2018-04-25 13:41:51 UTC
  - ea2d68b865 Merge pull request #47255 from garthgreenaway/47239 Fixes to salt_proxy beacon
  - a2a8d78cb0 Fixing status beacon tests.
  - c87d6cae23 Ensure the salt_proxy is returning the correct tuple when the configuration is valid. Update
    various beacon unit tests to ensure they are testing the results of the validate function for a True result.

• **PR #47292**: (dwoz) Fix decorator wart @ 2018-04-25 04:25:23 UTC
  - PR #47290: (dwoz) Run cache_master test in tmp dir (refs: #47292)
  - 19f9e8258f Merge pull request #47292 from dwoz/cp_fix_again
  - 7d045eb235 Fix decorator wart

• **PR #47285**: (dwoz) Fix reg grains test @ 2018-04-25 00:16:56 UTC
  - da532aa1ac Merge pull request #47285 from dwoz/core_test_fix
  - 884f4c1829 Fix extra space
  - 8a9027cc09 Fix reg grains test

• **PR #47290**: (dwoz) Run cache_master test in tmp dir (refs: #47292) @ 2018-04-24 23:37:21 UTC
  - f591c6f643 Merge pull request #47290 from dwoz/test_cp_fix
  - 5f51affbd Run cache_master test in tmp dir

• **ISSUE #47092**: (syphernl) [2018.3.0] pkg.installed breaks with virtual packages (refs: 
  #47250)

• **ISSUE #38838**: (Zorlin) Failing to remove nginx (refs: 
  #44455)

• **PR #47250**: (terminalmage) Fix virtual package detection @ 2018-04-24 19:22:24 UTC
  - PR #44455: (samodid) Fix for #38838 (refs: #47250)
  - 6d323aa8f0 Merge pull request #47250 from terminalmage/issue47092
  - b8630a70be Fix virtual package detection

• **ISSUE #47225**: (pruiz) zfs.filesystem_present takes forever on a dataset with lots (10k+) of snapshots (refs: 
  #47228, #47227, #47226)

• **PR #47228**: (pruiz) Fix issue #47225: avoid zfs.filesystem_present slowdown when dataset has lots of snapshots 
  (2018.3 branch) @ 2018-04-24 13:35:21 UTC
  - PR #47226: (pruiz) Fix issue #47225: avoid zfs.filesystem_present slowdown when dataset has lots of
    snapshots (refs: #47228, #47227)
  - 428e915d6a Merge pull request #47228 from pruiz/pruiz/zfs-dataset-present-slow-2018.3
  - cb8f136a25 Fix issue #47225: avoid zfs.filesystem_present slowdown when dataset has lots of snapshots

• **ISSUE #46943**: (Auha) Slack.Engine could not start (refs: 
  #47262, #47109)
- **PR #47262**: (garethgreenaway) [2018.3] Fixes to targeting in Slack engine @ 2018-04-24 13:18:36 UTC
  - 0b836106b9 Merge pull request #47262 from garethgreenaway/slack_engine_target_fix
  - bcdf64e8 Removing target and tgt_type from the cmdline that is passed along to Salt, the target is used elsewhere and including it in the cmdline causes problem when it is passed along. Adding an additional test to ensure we are getting the right target.

- **ISSUE #47047**: (Giandom) Pillars aren’t evaluated when alias is passed in Slack Engine (refs: #47142)

- **PR #47142**: (garethgreenaway) [2018.3] pillar and output formatting fixes to Slack engine @ 2018-04-23 19:55:07 UTC
  - 2ed4b38b02 Merge pull request #47142 from garethgreenaway/47047_passing_pillar_to_slack_aliases
  - 6f183e1d80 Initial commit for unit/engines/test_slack_engine
  - a2840fc230 Only include the rest of the cmdline if the cmd is an alias.
  - e846df7409 Fixing a bug when passing pillar values to aliases for the Slack engine. Cleaned up the formatting of the results, color codes don’t translate well into Slack output. For any state runs, e.g. highstate. apply, sls, we run the output through the highstate formatter. For anything else run it though the yaml outputer. Running it though highstate causes errors when the output does match what the highstate output is expecting.

- **PR #47245**: (terminalmage) Ensure we pass hexid as bytes when zmq_filtering enabled @ 2018-04-23 16:54:57 UTC
  - 42a0655dc Merge pull request #47245 from terminalmage/zeromq-bytes
  - a7acc0548 Ensure we pass hexid as bytes when zmq_filtering enabled

- **PR #47242**: (aesposito91) PY3 fix for zeromq setsockopt @ 2018-04-23 16:38:09 UTC
  - 73525d1460 Merge pull request #47242 from aesposito91/2018.3
  - b2253516d Update napalm_syslog.py

- **ISSUE #47117**: (prashanthtuttu) Napalm / Capirca Issue (refs: #47241)

- **PR #47241**: (mirceaulinic) Fix the imports into the netacl execution and state modules @ 2018-04-23 14:56:32 UTC
  - b78295ae9 Merge pull request #47241 from cloudflare/fixed-47117
  - 6c5583264 #47117: fix the napalm imports in the netacl state module
  - 48396467c1 #47117: fix the napalm imports in the netacl execution module

- **PR #47219**: (garethgreenaway) [2018.3] Fixing a backward compatibility issue with vault module & runner @ 2018-04-23 14:10:19 UTC
  - 88557ea991 Merge pull request #47219 from garethgreenaway/vault_backward_compatibility
  - 1758081ffe When using the vault module on a 2018.3 minion against a 2017.7 master, the 2018.3 minion is expecting a verify element in the results from the Salt runner on the master. The runner in 2017.7 did not include a verify element, which results in an error. This change accounts for this by using the default in 2018.3 which is not to verify if not configured.

- **PR #47186**: (dmurphy18) backport of issue 46933, updated ZFS handling to Salt 2018.3.x @ 2018-04-23 14:07:06 UTC
  - 370feadb2 Merge pull request #47186 from dmurphy18/zfs_backport_46933
  - 283359d315 Corrected typo in comma-separated and 2018.3.0 -> 2018.3.1
  - b7f8d5a22f Replace use of Fluorine with 2018.3.0 for comma-separated warnings
- PR #47217: (twangboy) Remove installation of pywin32 from setup.py @ 2018-04-23 13:32:54 UTC
  - bf3a67d11b Merge pull request #47217 from twangboy/fix_setup
  - eb3d45bb08 Remove installation of pywin32 from setup.py
- PR #47195: (rallytime) [2018.3] Merge forward from 2017.7 to 2018.3 @ 2018-04-20 19:25:30 UTC
  - 8e21703f13 Merge pull request #47195 from rallytime/merge-2018.3
  - f90fd8c663 Test fix: file strings must be unicode in master config
  - bee4948df1 Lint: use full path for event utils function
  - 120c5446b7 Update old utils paths to new utils paths
  - 4718d31e53 Merge branch '2017.7' into '2018.3'
    * 65f344e371 Merge pull request #47184 from Ch3LL/status_test
      - 25a84428b8 Add status module integration modules tests for Windows
    * 965600ad6c Merge pull request #47163 from rallytime/jenkins-autodoc
      - 0039f95017 Update jenkins module autodocs to use jenkinsmod name instead
    * 0a43dde5fc Merge pull request #47185 from twangboy/add_tests
      - 345daa0423 Add additional integration tests to whitelist
    * 1a600bb9a4 Merge pull request #47172 from dwoz/cover_without_admin
      - cadd759727 Use warnings to warn user
      - 144c68e214 Allow non admin name based runs on windows
    * d5997d2301 Merge pull request #47110 from kstreee/fix-misusing-of-timeout
      - 0624aee0ed Fixes misusing of the timeout option.
    * 87ca2b4003 Merge pull request #40961 from terminalmage/issue40948
      - 6ba66cca41 Fix incorrect logic in exception check
      - fed5041c5f Make error more specific to aid in troubleshooting
      - 8c67a5b3b4 Fix path in log message
      - 3198ca8b19 Make error more explicit when PKI dir not present for salt-call
    * f5e63584d4 Merge pull request #47134 from Ch3LL/user_win_test
      - e7c9bc4038 Add user integration tests for windows OS
    * da2f6a3fac Merge pull request #47131 from gtmanfred/cli
      - 1b1c29bf62 add __cli for master processes
    * 9b8e6ff8b8c Merge pull request #47129 from rallytime/bp-47121
      - 11da526b21 add ImportError
      - bd0c23396c fix pip.req import error in pip 10.0.0
    * eb5ac51a48 Merge pull request #47102 from gtmanfred/2017.7
      - 3dc93b310b fix tests
      - 8497e08f8e fix pip module for 10.0.0
4c07a3d1e9 fix other tests
b71e3d8a04 dont allow using no_use_wheel for pip 10.0.0 or newer
c1dc42e67e Merge pull request #47037 from twangboy/fix_dev_scripts
990a24d7ed Fix build_env scripts

- **ISSUE #46906**: (whytwewolf) Windows failure with PR 46541 (refs: #47168)
- **PR #47168**: (gtmanfred) fix metadata grain for py3 and windows @ 2018-04-20 19:07:50 UTC
  - a56eb7e05d Merge pull request #47168 from gtmanfred/metadata
  - 396f7906e3 fix metadata grain for py3 and windows
- **ISSUE #46918**: (AmbicaY) napalm/capirca issue (refs: #47202)
- **PR #47202**: (mirceaulinic) Fix #46918: add the TTL field @ 2018-04-20 14:34:09 UTC
  - 6135b76e2c Merge pull request #47202 from cloudflare/fix-46918
  - 1e74141cc0 Fix #46918
- **ISSUE #47150**: (srkunze) [Regression] ip_to_host and SSH._expand_target require missing reverse-lookup (refs: #47191)
- **PR #47191**: (terminalmage) salt-ssh: Do not attempt to match host/ip to minion ID if reverse lookup fails @ 2018-04-20 14:20:05 UTC
  - 7f1115e611 Merge pull request #47191 from terminalmage/issue47150
  - 95a6f075cb Add debug logging when ip_to_host fails
  - 4569e622b salt-ssh: Do not attempt to match host/ip to minion ID if reverse lookup fails
- **PR #47122**: (rallytime) [2018.3] Merge forward from 2017.7 to 2018.3 @ 2018-04-19 20:44:18 UTC
  - 1947ffdf56 Merge pull request #47122 from rallytime/merge-2018.3
  - 878fa06134 Test fix: remove tornado testing lib from class
  - a40f007962 lint: get_context is in stringutils.py now
  - 3416e398c6 Update old utils paths references to use new paths
  - 94c2a12b60 Merge branch '2017.7' into '2018.3'
    - 6a4c0b8a1a Merge pull request #47108 from dwoz/async_test_fix
      - 3d85e30ce5 AsyncTestCase is required for AsyncEventPublisher
    - 03892eaf0b Merge pull request #47068 from cachedout/catch_value_error_socket_test
      - 7db5625632 Catch an operation on a closed socket in a test
    - 1ea2885ec2 Merge pull request #47065 from dwoz/jinja_test_fix
      - 673cd31e65 Merge branch '2017.7' into jinja_test_fix
    - 5293b5b5ca Merge pull request #47077 from dwoz/test_state_fix
      - 444da3f893 Fix py3 wart (chr vs bytestring)
      - e8acc01c2 Fix failing state test by normalizing line endings
    - ca967de5da Merge pull request #47067 from gtmanfred/2017.7
      - f913a7859c use the recommended opennebula lookup method
    - 7fddd6cd9 Merge pull request #47064 from dwoz/roots_tests_fix
- 25fd7c0694 fix py3 wart, encode os.linesep
- d79f1a1961 Fix fileserver roots tests
  - 977c6939c4 Merge pull request #47069 from cachedout/match_timeout_arg
    - b8990f5258 Pass the timeout variable to the CLI when calling salt in tests
  - 2c4c19c622 Merge pull request #47074 from dwoz/ignore_artifacts
    - c3941efad0 Kitchn should ignore artifacts directory
  - c484c0bd71 Merge pull request #47055 from bloomberg/GH-47000
    - 8af3f5b874 GH-47000: add proper handling of full_return in cmd_subset
  - f3496030cc Merge pull request #47039 from twangboy/win_fix_winrm_script
    - 6635b9003f Fix winrm powershell script
    - 46fa2c04de Fix py3 os.linesep wart
    - 3c565d7e54 Use salt.utils.fopen
    - aa965310f1 Clean up cruft
    - efc9866580 Jinja test fixes
  - PR #47162: (terminalmage) Partial backport of #47161 to 2018.3 branch @ 2018-04-19 19:28:47 UTC
    - PR #47161: (terminalmage) Fix failing pillar unit test (refs: #47162)
    - 291cca7ed8 Merge pull request #47162 from terminalmage/bp-47161
    - d18597a47 Mocked file_roots and pillar_roots should be dicts
  - ISSUE #47081: (sjorge) file.directory with recursion fails if there are non-ascii characters in the path (refs: #47165)
  - PR #47165: (terminalmage) Make sure a str type is passed to os.walk @ 2018-04-19 14:59:16 UTC
    - 2ee8006da3 Merge pull request #47165 from terminalmage/issue47081
    - 9e29ac8477 Make sure a str type is passed to os.walk
  - PR #47070: (terminalmage) Use decorators for temp files/dirs in test suite @ 2018-04-19 14:01:48 UTC
    - 6257862bbb Merge pull request #47070 from terminalmage/with_tempdir
    - 87f6cda477 Remove unused imports
    - 879c557264 Use decorators for temp files/dirs in test suite
  - PR #47155: (mcalmer) Fix patchinstall for yumpkg @ 2018-04-18 19:24:17 UTC
    - b46365614b Merge pull request #47155 from mcalmer/fix-patchinstall
    - 382a9ba457 Fix invalid string compare
    - 8c19368938 provide kwargs to pkg_resource.parse_targets required to detect advisory type
  - ISSUE #47042: (valentin2105) [ERROR] Unable to manage file: 'utf8' codec can’t decode byte (refs: #47061)
  - PR #47061: (terminalmage) Fix diffing binary files in file.get_diff (refs: #47405) @ 2018-04-18 18:52:10 UTC
    - 13ae1a2413 Merge pull request #47061 from terminalmage/issue47042
    - 87f6cda477 Rewrite flaky utf8 state to make it easier to troubleshoot
    - df6e535f0f Fix diffing binary files in file.get_diff

30.2. Previous Releases
• PR #47058: (terminalmage) Fix calls to file.lsattr when lsattr is not installed @ 2018-04-18 16:30:12 UTC
  – cba0f13cd9 Merge pull request #47058 from terminalmage/lsattr
  – eeb067e910 Fix calls to file.lsattr when lsattr is not installed
• ISSUE #46929: (noelmcloughlin) 2018.3 regression file.managed.context parsing (refs: #47104)
• PR #47104: (terminalmage) yamlloader: Properly handle colons in inline dicts @ 2018-04-18 16:22:47 UTC
  – b96ce23b3f Merge pull request #47104 from terminalmage/issue46929
  – 33bf643cd Add additional test for plain scalars
  – 508659b682 yamlloader: Properly handle colons in inline dicts
• ISSUE #46887: (julientravelaer) ldap.managed broken with 2018.3.0 (refs: #47029)
• ISSUE #46859: (cheribral) pillar_ldap causing TypeError exceptions in python-ldap with unicode objects (refs: #47029)
• PR #47076: (terminalmage) pillar_ldap: Load config options as str types @ 2018-04-18 16:16:22 UTC
  – PR #47029: (terminalmage) ldapmod.py/ldap3.py: Force modlist for search/modify/etc. to be str types (refs: #47076)
  – c12697b173 Merge pull request #47076 from terminalmage/issue46859
  – c06c859caf pillar_ldap: Load config options as str types
• PR #47107: (twangboy) Fix issues with reg state, add tests @ 2018-04-18 15:53:02 UTC
  – 50bd885ec7 Merge pull request #47107 from twangboy/fix_46932
  – ae8ab2ab1a Fix tests for py3, enable tearDown
  – 3cf4ac1475 Add integration tests for reg state
  – cc259b146f Cast vdata to appropriate type in reg state
• ISSUE #46909: (epelc) Binary contents_pillar with file.managed raises UnicodeDecodeError (refs: #47041)
• PR #47041: (terminalmage) Force null bytes to be str types @ 2018-04-18 14:08:25 UTC
  – d6c59696be Merge pull request #47041 from terminalmage/issue46909
  – e4182715be Special check specifically for bytes types
  – ee90dd5d95 Merge branch '2018.3' into issue46909
  – 0e99343a7f Use the same way of defining contents in both file.managed states
  – 5741d287b5 Move back to using null byte check for contents
  – 8e214c9fa9 file.managed: Add test to ensure binary contents work
  – 7b7dc94610 Use salt.utils.stringutils.is_binary to check if contents are binary
  – 5d98a8bedd Make salt.utils.stringutils.to_binary work for bytestrings
  – 1024000369 Force null bytes to be str types
• PR #47007: (twangboy) Fix some issues with the win_servermanager module @ 2018-04-17 20:57:04 UTC
  – 9a9f6524f8 Merge pull request #47007 from twangboy/fix_46968
  – 432db7c6ec Lint: Remove unused import
  – 10341e8f8b Remove erroneous pop statement
- 56582f293a Remove redundant try/except block from state
- 6ad2427279 Remove unnecessary try/except blocks
- 92eeaa51bd Put some error checking in the shell command

**ISSUE #46943:** (Auha) Slack.Engine could not start (refs: #47262, #47109)

**PR #47109:** (garethgreenaway) [2018.3] fixes to Slack engine @ 2018-04-17 13:56:27 UTC

- a52137ee36 Merge pull request #47109 from garethgreenaway/46943_slack_engine_fixes
- 02baa76595 Fixing a bug that occurred when a comment was added to a message sent to Slack by Salt. Also making slack_engine:groups_pillar optional.

**PR #47045:** (tankywoo) Fix ba7d00f5 for gentoo pkg.installed method @ 2018-04-17 13:55:45 UTC

- 6c16a34c44 Merge pull request #47045 from tankywoo-fix-gentoo-pkg-installed
- 551f4e10cf Fix ba7d00f5 for gentoo pkg.installed

**PR #47053:** (clan) handle jinja error in <module> level @ 2018-04-16 22:47:54 UTC

- 86c7cfef56 Merge pull request #47053 from clan/jinja-error
- a847466946 handle jinja error in <module> level

**PR #47062:** (rallytime) [2018.3] Merge forward from 2017.7 to 2018.3 @ 2018-04-16 19:58:32 UTC

- 7bfa608e9f Merge pull request #47062 from rallytime/merge-2018.3
- 59f5800e72 lint fix
- 1ddf8c584b Update old utils files to new new utils files path
- 28a79ebba4 Merge branch '2017.7' into '2018.3'

  * 1700a10ebe Merge pull request #46326 from kstreee-fix-client-local
    - 0f358a9c9e Fixes a timing bug of saltnado's client local.
  * c3c00316c5 Merge pull request #46913 from lomeroe/2017_7-fix46877
    - 369a0645ed move exception for clarity
    - 32ce5bfda5 Use configparser serializer object to read psscript.ini and script.ini startup/shutdown script files.
  * 9e37cfc9d6 Merge pull request #47025 from terminalmage-fix-server_id-windows
    - cb0cf89ed3 Fix server_id grain in PY3 on Windows
  * 2e193c4f45 Merge pull request #47027 from rallytime/bp-44508
    - 8e72f362f4 Add priority field to support the latest capirca.
    - 11df92bbaab Add priority field to support the latest capirca.
  * 385fe2bc1e Merge pull request #47020 from rallytime/bp-46970
    - 9373df52b Update test_pkgrepo.py
    - 13cf9eb5b1 Removing debugging.
    - a61a8593e5 Removing suse from pkgrepo comments tests. the pkgrepo functions in SUSE pkg module do not support comments.

**PR #47066:** (terminalmage) Fix regression in handling of environment/saltenv @ 2018-04-16 19:57:12 UTC

- fa27e64a33 Merge pull request #47066 from terminalmage/issue46979
- 5c4c0468ad Fix regression in handling of environment/saltenv

- **PR #47051**: (rallytime) Simplify LooseVersion check in __virtual__ check in mac_assistive module @ 2018-04-13 19:43:33 UTC
  - 8761b81a69 Merge pull request #47051 from rallytime/fix-lint
  - d52b3689d9 Simplify LooseVersion check in __virtual__ check in mac_assistive module

- **PR #47057**: (corywright) Fix copy/paste typo in minionfs tutorial @ 2018-04-13 19:43:01 UTC
  - bbb8018b55 Merge pull request #47057 from corywright/fix-minionfs-whitelist-docs
  - 9b7ee97d12 Fix copy/paste typo in minionfs tutorial

- **ISSUE #46931**: (anlutro) file.managed diff is switched when using template in salt-ssh 2018.3 (refs: #47046)

- **PR #47046**: (clan) switch order of file to be diffed @ 2018-04-13 13:40:13 UTC
  - d5afa4a2c5 Merge pull request #47046 from clan/file_diff
  - bb58605c54 switch order of file to be diffed

- **ISSUE #46985**: (OrlandoArcapix) grafana4_user.present and grafana4_org.present states not working in 2018.3.0 (refs: #47048)

- **PR #47048**: (OrlandoArcapix) Issue46985 fix grafana4 state (refs: #47060) @ 2018-04-13 13:34:29 UTC
  - ec9251ecd3 Merge pull request #47048 from OrlandoArcapix/Issue46985-fix-grafana4-state
  - 6c8c3da74d Return an empty dict instead of 'None' from grafana4 states

- **PR #47017**: (rallytime) Back-port #46919 to 2018.3 @ 2018-04-12 19:43:01 UTC
  - 5b7544eaa0 Merge pull request #47017 from rallytime/bp-46919
  - 683760f626 Don’t encode a unicode string

- **ISSUE #46987**: (julientravelaer) ldap.managed broken with 2018.3.0 (refs: #47029)

- **ISSUE #46859**: (cheribral) pillar_ldap causing TypeError exceptions in python-ldap with unicode objects (refs: #47029)

- **PR #47029**: (terminalmage) ldapmod.py/ldap3.py: Force modlist for search/modify/etc. to be str types (refs: #47076) @ 2018-04-12 19:41:29 UTC
  - ac2d54d78a Merge pull request #47029 from terminalmage/issue46859
  - ab6314247b ldapmod.py/ldap3.py: Force modlist for search/modify/etc. to be str types
  - 7691dee4ed Add to_str option to decode funcs

- **ISSUE #46868**: (tiyang) 2017.7.4 to 2018.3.0 upgrade issue: Salt request timed out. The master is not responding (refs: #46930)

- **PR #46930**: (dwoz) Clean up bad public key headers @ 2018-04-12 18:57:37 UTC
  - e6e07720fa Merge pull request #46930 from dwoz/cryptodomekeyfix

---

4610 Chapter 30. Release Notes
- f2e484ed54 Merge branch '2018.3' into cryptodomekeyfix
- e1995a92ee Fix verify signature test
- 0ba32118d9 Add test for bad public key without m2crypto
- a44c356233 Clean up bad public key headers

- **ISSUE #46951**: (Giandom) Slack engine error using aliases: TypeError unhashable type (refs: #47008)
- **PR #47008**: (garethgreenaway) [2018.3] Fixing aliases in slack engine @ 2018-04-12 15:24:40 UTC
  - 0e43becc12 Merge pull request #47008 from garethgreenaway/46951_fixing_slack_engine_aliases
  - dc2a72d44f Fixing aliases in slack engine

- **ISSUE #46947**: (Giandom) Slack engine groups error (refs: #47009)
- **PR #47009**: (garethgreenaway) [2018.3] fixes to slack engine documentation @ 2018-04-12 15:20:54 UTC
  - e1995a92ee Fix verify signature test
  - 0ba32118d9 Add test for bad public key without m2crypto
  - a44c356233 Clean up bad public key headers
  - c33de7c82d Merge pull request #47009 from garethgreenaway/46947_slack_documentation_update_catch_non_dicts
  - f0fadbb4ce Fixing indentation for slack documentation. Updating try..except to ensure we catch when groups aren’t dicts.

- **PR #47023**: (rallytime) Back-port #46997 to 2018.3 @ 2018-04-12 15:05:24 UTC
  - #46997: (LukeCarrier) Fix respository (=> repository) typo in sls_build (refs: #47023)
  - #44638: (terminalmage) Many improvements to docker network and container states (refs: #46997)
  - 68d17c71f1 Merge pull request #47023 from rallytime/bp-46997
  - 0e43becc12 Merge pull request #47008 from garethgreenaway/46951_fixing_slack_engine_aliases
  - dc2a72d44f Fixing aliases in slack engine

- **PR #47026**: (rallytime) [2018.3] Merge forward from 2017.7 to 2018.3 @ 2018-04-12 14:39:41 UTC
  - 9cf3c6406a Merge pull request #47026 from rallytime/merge-2018.3
  - ba70df9d62 Use msgpack utils for loads call, import msgpack for UnpackValueError
  - 34a478dfe5 Update old fopen path with new utils files path
  - 590c7fc13f Merge branch '2017.7' into '2018.3'
    - 8f994e7cf9 Merge pull request #46539 from jfoboss/patch-1
      - 6890122e41 Merge pull request #1 from twangboy/pull_46539
      - 19c3fadb5f Fix unit test for win_ntp
      - 826a8d3099 Fixing #46504
    - 7ad70e95a5 Merge pull request #46999 from gtmanfred/2017.7
      - 791a88f6ce switch pip test package
    - 8adaf7f526 Merge pull request #46023 from bloomberg/parallel-orch
      - 0ac0b3ca29 Merge branch '2017.7' into parallel-orch
    - 39d65a39cf Merge pull request #46613 from myinitialsarepm/fixed_puppet_fact_and_puppet_facts
      - 44edc13abc Update tests to use cmd.run_all
      - 7d7d405f41 Merge branch '2017.7' into fix_puppet_fact_and_puppet_facts
      - 0ce1520bd0 Merge branch '2017.7' into fix_puppet_fact_and_puppet_facts
      - 69e1f6f681 Fix puppet_fact and puppet_facts to use stdout.
- 3d5e69600b address lint issues raised by @isbm
- a9866c7a03 fix parallel mode py3 compatibility
- 6d7730864a removing prereq from test orch
- 6c8a25778f add integration test to runners/test_state to exercise parallel
- 2c86f16b39 cherry-pick cdata KeyError prevention from #39832
- 26a96e8933 record start/stop duration for parallel processes separately
- e4844bf2b revisit previous join() behavior in check_requisites
- f00a359cdf join() parallel process instead of a recursive sleep
- 6e7007a4dc add parallel support for orchestrations

• **PR #47021**: (garethgreenaway) [2018.3] Fixing integration.modules.test_state_jinja_filters.StateModuleJinjaFiltersTest.test_path_which @ 2018-04-12 13:12:39 UTC
  - d3be828696 Merge pull request #47021 from garethgreenaway/920_state_module_jinja_filters_test_test_path_which
  - 2ccf2c5fe0 Fixing test_path_which to check that the filter is available rather than results.

• **PR #47022**: (corywright) Add auth.file module to auth documentation page @ 2018-04-11 21:11:10 UTC
  - 66e8445b82 Merge pull request #47022 from corywright/add-auth-file-module-to-docs
  - bd0918fc40 Add auth.file module to auth documentation page

• **PR #45774**: (twangboy) Fix __virtual__ issue in mac_system.py @ 2018-04-11 14:26:13 UTC
  - 12ecfdee93 Merge pull request #45774 from twangboy/mac_add_service_util
  - 5796696617 Fix tests for Py3
  - 7b40218790 Fix lint, remove sentence from docstring
  - 781880f0fc Add _available_services function for testing
  - 608063613 Add assert_called_with
  - 1bf70b2033 Add more tests for available_services
  - b429fc3e74 Add tests for mac_utils
  - b5f67130cc Used "args and **kwargs
  - ed061617a2 Fix unicode_literal issue in mac_assistive
  - 82e17e5fc8 Fix args/kwargs
  - 455146500a Move some functions into mac_utils
  - 125586264b Add utils/mac_service.py

• **ISSUE #46953**: (cskowronnek) salt-cloud azurearm [ERROR ] There was a profile error: Parameter `subscription_id` must be str. (refs: #47012)

• **PR #47012**: (terminalmage) Azure: ensure subscription_id is a str type @ 2018-04-11 13:57:08 UTC
  - 79347f108a Merge pull request #47012 from terminalmage/issue46953
  - 519262a32 Azure: ensure subscription_id is a str type

• **PR #46526**: (Ch3LL) Add tests for new source_* minion options @ 2018-04-10 19:56:45 UTC
  - 6503bf8dfe Merge pull request #46526 from Ch3LL/ip_conf
  - c01180ff47 Patch ZMQ versions for master_uri test
- da38f332a5 Change comment and salt.utils.network import
- e972ebdf1a Add for new source_* minion options

**PR #46993**: (L4rS6) Fix: tuple instead of string @ 2018-04-10 17:07:59 UTC
- 03907d3f3 Merge pull request #46993 from L4rS6/fix-broken-keystone-auth/2018.3
- e33ba1b3d5 Fix: tuple instead of string

**PR #46990**: (rallytime) [2018.3] Merge forward from 2017.7 to 2018.3 @ 2018-04-10 17:07:33 UTC
- ffaee26540 Merge pull request #46990 from rallytime/merge-2018.3
- ccc5bad2df Merge branch '2017.7' into merge-2018.3
  - ba5421d988 Merge pull request #46991 from gtmanfred/windows
    - 98588c1dc5 use saltstack salt-jenkins
  - 2f1cf3e511 Merge branch '2017.7' into '2018.3'
    - 00c4067585 Merge pull request #46975 from gtmanfred/windows
      - 1f69c0d7f8 make sure windows outputs xml junit files
      - 4a2ec1bb8 support new versions of winrm-fs
      - b9efec8526 remove libnacl on windows
      - 2edd5eaf9e fix path
      - b03e272e44 windows work
    - 3cf2353e41 Merge pull request #46945 from vutny/doc-faq-fix-jinja
      - b6df54e61d [DOC] Fix Jinja block in FAQ page
    - fc2f728665 Merge pull request #46925 from terminalimage/fix-file.patch-docstring
      - 97695657f0 Remove reference to directory support in file.patch state
    - eef6c518e1 Merge pull request #46900 from rallytime/bp-46801
      - 6a41e8b457 rename jenkins to jenkinsmod
    - 71839b0303 Merge pull request #46899 from rallytime/bp-45116
      - b2f908da4 fix adding parameters to http.query from sbd.yaml

**PR #46339**: (DmitryKuzmenko) SSH State test failures @ 2018-04-10 17:06:51 UTC
- a34b92ae82 Merge pull request #46339 from DSRCorporation/bugs/ssh_state_testFailures
- bd98c49dc7 Merge branch '2018.3' into bugs/ssh_state_test_failures
- 6fd4c58b7f Increase timeout for run_run in ShellCase
- 8e60ccddfe Give background task more chance to start.
- e0b6878f4a One more useful assert for better test results.
- 92a6c43c73 More logging and assertion fixes. Extended ssh ops timeout.
- 6ebdd17ac4 Advanced logging in the failing SSH State tests.

**PR #46989**: (Ch3LL) Fix redis cache log debug line @ 2018-04-10 16:35:12 UTC
- 9924100c44 Merge pull request #46989 from Ch3LL/redis_log
- 6160bc06c6 Fix redis cache log debug line

### 30.2. Previous Releases 4613
ISSUE #46834: (oeuftpete) strftime filter not found in 2018.3.0 (refs: #46848)

ISSUE #46668: (anlutro) Jinja2 filter strftime stopped working in salt-ssh 2018.3 (refs: #46848, #46744)

PR #46848: (garethgreenaway) [2018.8] salt-ssh jinja filters tests @ 2018-04-10 16:19:51 UTC
- c643193cb Merge pull request #46848 from garethgreenaway/testing_jinja_filters_available_via_salt_ssh
- 5fcd3eff8 Merge branch '2018.3' into testing_jinja_filters_available_via_salt_ssh
- 0adfee9b11 Updating a couple tests. Fixing check_whitelist_blacklist to work with PY3 when non-iterables are passed. Adding warning about lst_avg results being wrong and future updates in Neon.
- f3f42146ca Removing expected from strftime and hashsum tests since the results are always different and we are only concerned about the filter being available.
- 860234c045 Fixing lint.
- 0891c6b580 fixing docstring
- c8945e4b2e cleaning up some imports.
- 0599759e5b cleaning up some test doc strings.
- dceda5eb88 Moving all jinja filter tests into support/jinja_filters.py. Updating integration/ssh/test_jinja_filters.py to use those tests. Adding integration/modules/test_state_jinja_filters.py to also use the common jinja filter tests.
- 07d7e3ca01 Adding a new integration test and corresponding state files to test availability of jinja filters when using salt-ssh.

ISSUE #46880: (liquidgecka) rabbitmq_policy broken in 2018.3.0 (refs: #46973)

PR #46973: (rallytime) New "apply_to" kwarg in rabbitmq module should be added at the end @ 2018-04-10 14:42:32 UTC
- PR #41233: (dnABic) added parameter apply_to for rabbitmq policy (refs: #46973)
- fbbcb7584c Merge pull request #46973 from rallytime/fix-46880
- 8ce21f982c New "apply_to" kwarg in rabbitmq module should be added at the end

ISSUE #46934: (d601) GPG encrypted binary data in pillars breaks in 2018.3.0 (refs: #46966)

PR #46966: (terminalmage) Fix traceback when attempting to decode binary data to unicode @ 2018-04-10 14:08:35 UTC
- 58f59cfb8 Merge pull request #46966 from terminalmage/issue46934
- df43ffdb8f salt.payload.Serial: fix traceback when unpacking binary blob
- 40a49358c9 gpg renderer: fix traceback when decrypted ciphertext contains binary data
- 17a88f6a71 Include exc_info in pillar render errors to aid in troubleshooting

ISSUE #46881: (SynPrime) Cron.file - source file not found (refs: #46944)

PR #46944: (garethgreenaway) [2018.3] cron.file with salt source URL @ 2018-04-10 13:34:03 UTC
- e33e792e2a Merge pull request #46944 from garethgreenaway/46881_Cron_file_source_file_not_found
- 438aafcb03 Adding kwargs to calls into file module functions
- 14d12b1d6b Remove unused imports. Gating tests so they do not run on Windows
- 623d96f21a Adding dummy cron file for integration/states/test_cron
- 8c8e01871d6 Adding an integration test to test cron.file.
- ddc55d8f9b Fixing bug that made cron.file unable to use a file via a Salt URL.
- **PR #46937**: (gtmanfred) enable_ssh_minions does not work with subset yet @ 2018-04-07 02:54:56 UTC
  - 08e8782f76 Merge pull request #46937 from gtmanfred/2018.3
  - 3fb75e903c enable_ssh_minions does not work with subset yet
- **PR #46936**: (gtmanfred) don't copy __pycache__ or .pyc files for kitchen @ 2018-04-06 19:15:46 UTC
  - ac4e7cd73f Merge pull request #46936 from gtmanfred/2018.3
  - 91474878fa don't copy __pycache__ or .pyc files for kitchen
- **ISSUE #46659**: (stamak) [salt-cloud] [new oxygen openstack driver ] no public_ips and floating_ips in salt-cloud output (refs: #46912)
- **PR #46912**: (gtmanfred) pull latest vm data after building for openstack shade driver @ 2018-04-06 13:46:42 UTC
  - 8105fd9715 Merge pull request #46912 from gtmanfred/openstack
  - 5ef538f8ad pull latest vm data after building for openstack shade driver
- **PR #46908**: (rallytime) [2018.3] Merge forward from 2017.7 to 2018.3 @ 2018-04-05 21:27:03 UTC
  - 735e12960 Merge pull request #46908 from rallytime/merge-2018.3
  - 102e966512 Remove redundant section in log setup
  - 177c686b52 Update old utils paths to new utils paths
  - 0a297e3739 Merge branch '2017.7' into '2018.3'
    * d05b43753 Merge pull request #44926 from frogunder/whitelisted_acl
      - 18e460fc30 Merge branch '2017.7' into whitelisted_acl
      - 1ad4d7d988 fix assert errors
      - e6a56016df update test
      - 19a224eb7 whitelist_acl_test
    * 7d822f99ec Merge pull request #46464 from gtmanfred/orchestration
      - 637dc6b7b fix pylint
      - 0151013ddb document cli option for cmd_subset
      - 4a3ed607d add test for subset in orchestration
      - 3112359dd6 fix salt subset in orchestrator
    * 805ed1c964 Merge pull request #46879 from dwoz/cloudtestfix
      - dc54fc53c3 Fix multiple typos causing tests to fail
    * f70fde282 Merge pull request #46647 from twangboy/win_fix_test_grains
      - c179388b0e Fix the tear down function in integration.modules.test_grains.GrainsAppendTestCase
    * 91c078ce12 Merge pull request #46756 from nages13/bugfix-grain-virtual_subtype
      - 781f503a4 Merge branch 'bugfix-grain-virtual_subtype' of https://github.com/nages13/salt into bugfix-grain-virtual_subtype
      - cd1ac4b7f9 Merge branch '2017.7' into bugfix-grain-virtual_subtype
Moved down container check code below hypervisors to validate containers type running in virtual environment. Fixes #46754 & #43405

710f74c4a6 fix grains['virtual_subtype'] to show Docker on xen kernels

058bbed221 Merge pull request #46799 from garethgreenaway/46762_prereq_shenanigans_tests
- 13875e78cf Fixing documentation string for test.
- 3d288c44d4 Fixing test documentation
- 6cff02e6a Adding tests for #46788

d9770bf3f8 Merge pull request #46867 from terminalmage/unicode-logging-normalization
- 7652688e83 Backport string arg normalization to 2017.7 branch

9eb98b1f6e Merge pull request #46770 from twangboy/fix_46433
- 89af0a6222 Merge branch '2017.7' into fix_46433
- 67b4697578 Remove unused import (ling)
- 9302fa5ab0 Clean up code comments
- b383b9b330 Change the order of SID Lookup

9c776c0f7b Merge pull request #46839 from gtmanfred/tupletarget
- 3b7208ce27 match tuple for targets as well

7db251dc11 Merge pull request #46845 from rallytime/bp-46817
- 36a0f6d8ca address filehandle/event leak in async run_job invocations

36a0f6d8ca address filehandle/event leak in async run_job invocations

e3d17ab7bc Merge pull request #46847 from dwoz/missing-strdup
- 55845f4846 strdup from libc is not available on windows

f2dd79f9c4 Merge pull request #46776 from gtmanfred/2017.7
- edc1059e0 fix shrinking list in for loop bug

PR #46853: (terminalmage) Add back date_format filter @ 2018-04-05 23:33:50 UTC
- 9a47afcf33b Merge pull request #46853 from terminalmage/date_format_filter
- 266d13a665 Add back date_format filter

PR #46882: (jasperla) Backport #46280 #46849 #46852 to 2018.3 @ 2018-04-05 14:29:12 UTC
- PR #46852: (jasperla) fix creating a nic tag on a link with double 0 in the MAC (refs: #46882)
- PR #46849: (jasperla) Unbreak creating etherstubs on SmartOS (refs: #46882)
- PR #46280: (jasperla) Remove unneeded checks for binaries in SmartOS modules (refs: #46882)
- a064a3e695 Merge pull request #46882 from jasperla/smartos/backports
- 47a6975ff fix creating a nic tag on a link with double 0 in the MAC
- a3c0e5fe76e Unbreak creating etherstubs on SmartOS
- e703254990 Remove unneeded checks for binaries in SmartOS modules

- **PR #46873**: (terminalmage) Attempt UTF-8 first when decoding/encoding @ 2018-04-05 14:16:28 UTC
  - 4e5e291ce99 Merge pull request #46873 from terminalmage/utf8-first
  - cf28eb744a Don't log command when output_loglevel == 'quiet'
  - 59eece8adb Remove hacky workarounds to get encode/decode tests to pass on Windows
  - 76e5d81bb4 Remove hacky workaround to get Windows to decode deserialized data properly
  - 0b572e58a Remove hacky workaround to get git state/exec module to work properly on Windows
  - 2df4d518f Attempt UTF-8 first when decoding/encoding

- **ISSUE #43499**: (tyeapple) zmq setsockopt need to adapt python3 (refs: #46874)

- **PR #46878**: (terminalmage) Backport #46874 to 2018.3 @ 2018-04-05 13:26:04 UTC
  - **PR #46874**: (johnj) Use bytestrings for PY3 compatibility when running setsockopt for zmq.SUBSCRIBE (refs: #46878)
  - 1518762465 Merge pull request #46878 from terminalmage/bp-46874
  - d9511d0d4 #43499, zmq setsockopt need to adapt python3

- **ISSUE #46862**: (kivoli) Setting locale.system fails in 2018.3 (refs: #47280, #46869)

- **PR #46869**: (gtmanfred) Always return dictionary for _localectl_status @ 2018-04-05 13:25:14 UTC
  - 67894e3ee9 Merge pull request #46869 from gtmanfred/2018.3
  - 199e985f7 fix pylint
  - 754254d20 fix tests for localemod
  - 2d7c0b5e33 Always return dictionary for _localectl_status

- **PR #46870**: (mirceaulinic) Correct the documentation for two new proxy modules @ 2018-04-04 21:48:41 UTC
  - 58c8ff18c2 Merge pull request #46870 from cloudflare/proxy-doc
  - f4b618e476 Corect and add the cimc proxy module to autodoc
  - a99be20cb9 Correct & add Panos to autodoc

- **PR #46729**: (terminalmage) Performance improvement/error catching in expr_match @ 2018-04-04 20:25:57 UTC
  - d7e4bd755 Merge pull request #46729 from terminalmage/expr_match
  - 7bcafe299 Add test case
  - 250039b11f Restore original variable name
  - af0f112a49 Log an exception when non-string val/expr passed to expr_match
  - dac42a672b Performance improvement/error catching in expr_match

- **PR #46872**: (terminalmage) Backport #46863 to 2018.3 @ 2018-04-04 19:04:40 UTC
  - **PR #46863**: (TamCore) fixed top function which was broken since commit 002aa88a97e (refs: #46872)
  - e0b383ab5 Merge pull request #46872 from terminalmage/bp-46863
  - be28be599 Add skipIf when older mock present

---

**30.2. Previous Releases**

---

4617
- db8faaee56 Add unit tests for ext_nodes master_tops module
- ee43f7c7bf fixed top function which was broken since commit 002aa88a97e

- **PR #46850**: (rallytime) [2018.3] Merge forward from 2017.7 to 2018.3 @ 2018-04-04 18:07:44 UTC
  - 5c76d98d1a Merge pull request #46850 from rallytime/merge-2018.3
  - a0fcd5c053 Fix test_cp failure: forgot to add tgt to test when @with_tempfile is present
  - d0202cab72 Resolve bad merge: there should only be one test_get_file_from_env_in_url test
  - e28f71b418 Lint: use full salt utils path
  - 4ad50bbdee Update old utils paths to new paths
  - 893196d3e6 Merge branch '2017.7' into '2018.3'
    - 1941426218 Merge pull request #4638 from gtmanfred/npm
      - bff61dd291 use http registry for npm
    - e544254e7b Merge pull request #46823 from rallytime/fix-42312
      - dafa820f93 Improve __virtual__ checks in sensehat module
    - 37f6d2de35 Merge pull request #4641 from skizunov/develop3
      - c624aa4827 Make LazyLoader thread safe
    - 989508b100 Merge pull request #4637 from rallytime/merge-2017.7
      - 8522c1d634 Merge branch '2016.11' into '2017.7'
      - 3e844ed1df Merge pull request #46739 from rallytime/2016.11_update_version_doc
      - 4d9fc5cc0f Update release versions for the 2016.11 branch
    - 307ef35f9 Merge pull request #46740 from rallytime/2017.7_update_version_doc
      - 7edf98d224 Update 2018.3.0 information and move branch from "latest" to "previous"
      - 5336e866ac Update release versions for the 2017.7 branch
    - ebf5dd276f Merge pull request #46783 from twangboy/fix_46680
      - da5ce25ef3 Fix unit tests on Linux
      - b7f4f377cd Add space I removed
      - f1c68a09b5 Fix network.managed test=True on Windows
    - f652f25cc1 Merge pull request #46821 from rallytime/fix-mantest-failures
      - 209a8029c3 Fix the new test failures from the mantest changes
    - c460f62081 Merge pull request #46800 from lomeroe/2017_7-46627
      - 2bee383e9d correct create list item value names if the valuePrefix attribute does not exist on the list item, the value is the value name, other wise, the valuename a number with the valuePrefix prepended to it
    - df26f2641e Merge pull request #46675 from dwoz/inspectlib-tests
      - d39f4852d8 Handle non-zero status exception
      - 83c005802b Handle cases where git can not be found
      - 628b87d5c4 Skip test when git symlinks are not configured
    - 4083e7c460 Merge pull request #46815 from terminalmage/bp-46809
* 71d5601507 Fix sharedsecret authentication
* 3bac9717f4 Merge pull request #46769 from dwoz/wincloudtest
  * 0e2c9234e5d Fix config override name
  * 5c22a0f88d Use absolute imports
  * 810042710d Set default cloud test timeout back to 500 seconds
  * 5ac89ad307 Use winrm_verify_ssl option causing tests to pass
  * 71858a709c allow not verifying ssl winrm saltcloud
  * ba5f11476c Adding windows minion tests for salt cloud
* f1be939763 Merge pull request #46786 from twangboy/fix_46757
  * b0053250ff Remove int(), just return -1
  * 7d56126d74 Fixes some lint
  * 49b3e937da Return int(-1) when pidfile contains invalid data
* 89bf24b15c Merge pull request #46814 from terminalmage/bp-46772
  * a9f26f2aba8 avoid breaking if AutoRemove is not found
  * 97779c965dfix container removal if auto_remove was enabled
* 5ea4ffbd6 Merge pull request #46813 from terminalmage/event-debug-log
  * 5d6de3a2eb Get rid of confusing debug logging
* e533b7182d Merge pull request #46766 from twangboy/win_fix_test_git
  * 5acf66452c Remove unused/redundant imports
  * 88fd72c52c Use with tempfile decorator where possible
* 69d450db84 Merge pull request #46778 from terminalmage/salt-jenkins-906
  * bbf35d3ea Replace flaky SPM man test
* c935ffb740 Merge pull request #46788 from garethgreenaway/46762_prereq_shenanigans
  * fa7aed6424 Ensure failed tags are added to self.pre.
* 395bf86f8c Merge pull request #46655 from dwoz/pyobjects-46350
  * 5a4bd442f2 Fix up import and docstring syntax
  * 62d64c9230 Fix missing import
  * 18b1730320 Skip test that requires pywin32 on *nix platforms
  * 45dce1a485 Add reg module to globals
  * 09f9322981 Fix pep8 wart
  * 73d06f664b Fix linter error
  * 009a8f56ea Fix up environ state tests for Windows
  * b4be16b8fc Fixing cleanUp method to restore environment
* af45e49c42 Merge pull request #4632 from dwoz/file-recure-36802
  * 44db77ae79 Fix lint errors and typo
  * cb5619537f Only change what is essential for test fix
Salt Documentation, Release 3003.3

- eb822f5a12 Fix file.recurse w/ clean=True #36802
- 6e9f504ed1 Merge pull request #46751 from folti/2017.7
  - 7058f10381 same top merging strategy works again
- d3623e0815 Merge pull request #46691 from Ch3LL/win_group_test
  - 7cda825e90 Add groupadd module integration tests for Windows
- 14ab50d3f4 Merge pull request #46696 from dwoz/win_test_client
  - ec4634fc06 Better explanation in doc strings
  - d9ae2abb34 Fix spilling in docstring
  - b40fc5db8 Windows test client fixes

- PR #46851: (rallytime) Back-port #46844 to 2018.3 @ 2018-04-04 18:04:59 UTC
  - PR #46844: (UtahDave) Fix warning format in 2018.3.0 release notes (refs: #46851)
  - b808ba7049 Merge pull request #46851 from rallytime/bp-46844
  - ab2cc6a1af Quick grammar fix in 2018.3.0 release notes
  - af7bad3c7f Fix warning format in 2018.3.0 release notes

- ISSUE #46864: (femnad) Attribute Error When Invoking Vault Module Method (refs: #46865)

- PR #46865: (femnad) Fix Log Line for Vault Token Generation Debug Line @ 2018-04-04 14:52:00 UTC
  - ea56778e03 Merge pull request #46865 from femnad/fx-log-in-vault-runner
  - 01a5b8876b Fix Log Line for Vault Token Generation Debug Line

- PR #46836: (rallytime) [2018.3] Merge forward from 2018.3.0rc1 to 2018.3 @ 2018-04-03 16:54:53 UTC
  - a0e168ccce Merge pull request #46836 from rallytime/merge-2018.3
  - e75ba1f502 Merge branch '2018.3.0rc1' into '2018.3'
    - 93923575e6 Merge pull request #46792 from damon-atkins/patch-1
    - db5b9464e6 provided an example
    - 41e3e1e253 Update windows information in release notes
    - 99447bf4f9 Added more windows information
    - d4241006f2 Update 2018.3.0.rst Windows Items, Group topics

- ISSUE #46808: (ezh) Sharedsecret authentication is broken (refs: #46809)

- PR #46809: (ezh) Fix sharedsecret authentication (refs: #46815) @ 2018-04-03 16:53:24 UTC
  - 4a358217a0 Merge pull request #46809 from ezh/2018.3-sharedsecret
  - 20db8f03f7 Merge branch '2018.3' into '2018.3-sharedsecret
  - 9df6d18ec7 Fix sharedsecret authentication

- PR #46820: (rallytime) [2018.3] Update the latest release information for docs @ 2018-04-03 14:36:31 UTC
  - 1519d7d8f5 Merge pull request #46820 from rallytime/2018.3_update_version_doc
  - 2743bee0dd [2018.3] Update the latest release information for docs

- PR #46731: (rallytime) Back-port #46024 to 2018.3 @ 2018-04-02 19:00:42 UTC
  - PR #46024: (zmedico) Trivial bug fixes for tagify and fire_args functions (refs: #46731)
- 07f1141722 Merge pull request #46731 from rallytime/bp-46024
- ee4e5b619 fire_args: fix UnboundLocalError: local variable 'tag'
- 4ce2c1824 tagify: handle integer suffix list

- **ISSUE #46779**: (anlutro) salt-ssh 2018.3 states with "runas" fail with "Environment could not be retrieved for User" (refs: #46796)

- **PR #46796**: (terminalmage) Fix regression introduced in merge-forward @ 2018-04-02 18:10:22 UTC
  - PR #46503: (psyer) Fixes stdout user environment corruption (refs: #46796)
  - 4f31c1062d Merge pull request #46796 from terminalmage/issue46779
  - f8f9d045ac Add regression test
  - e0e4e19ba3 Include extra troubleshooting information
  - dcb0c67309 Fix regression introduced in merge-forward

- **PR #46690**: (dincamihai) Fix unicode handling in pkg.info_installed @ 2018-03-29 14:10:48 UTC
  - 4609a7dd85 Merge pull request #46690 from dincamihai/2018.3
  - 98ad8f253 Fix unicode handling in pkg.info_installed

- **PR #46746**: (rallytime) [2018.3] Merge forward from 2017.7 to 2018.3 @ 2018-03-28 21:13:07 UTC
  - e5b3c8fa91 Merge pull request #46746 from rallytime/merge-2018.3
  - e884db7b0b Merge branch '2017.7' into '2018.3'
    - 1222bd6c00 Merge pull request #46732 from rallytime/bp-46032
      - b0b962d0 Workaroung python bug in traceback.format_exc()
    - 50fe1e9480 Merge pull request #46749 from vutny/doc-deprecate-copr
      - a1cc55da3d [DOC] Remove mentions of COPR repo from RHEL installation page
    - bd1e8bcb7d Merge pull request #46734 from terminalmage/busybox
      - 6502b6b4ff Make busybox image builder work with newer busybox releases
    - c09c6f819c Merge pull request #46742 from gtmanfred/2017.7
      - fd0e649d1e only use npm test work around on newer versions
    - 3b6d5eca88 Merge pull request #46743 from Ch3LL/mac_auth
      - 4f1c42c0e3 Workaround getpwnam in auth test for MacOSX
  - d0278345fc Update old utils paths to new utils paths
  - e312efb5e7 Merge branch '2017.7' into '2018.3'
    - b548a3e742 Merge pull request #46171 from amaclean199/fix_mysql_grants_comparison
      - 97db3d9766 Merge branch '2017.7' into fix_mysql_grants_comparison
      - 0565b3980e Merge branch '2017.7' into fix_mysql_grants_comparison
      - 8af07173d Merge branch '2017.7' into fix_mysql_grants_comparison
      - 00d13f05c4 Fix mysql grant comparisons by stripping both of escape characters and quotes. Fixes #26920
    - 554400e067 Merge pull request #46709 from vutny/doc-faq-minion-master-restart
      - d0929280fc [DOC] Update FAQ about Salt self-restarting
• 3f21e9cc65 Merge pull request #46503 from psyer/fix-cmd-run-env-corrupt
  • e8582e80f2 Python 3-compatibility fix to unit test
  • 27f651906d Merge pull request #1 from terminalmage/fix-cmd-run-env-corrupt
  • 172d3b2e04 Allow cases where no marker was found to proceed without raising exception
  • 35ad828ab8 Simplify the marker parsing logic
  • a09f20ab45 fix repr for the linter

164314a859 Merge branch '2017.7' into fix-add-saltenv-pillarenv-to-pillar-item
267ae9f633 Fix missing saltenv and pillarenv in pillar.item

f776040e25 Merge pull request #46679 from vutny/doc-state-pkg
  4a730383bf [DOC] Correct examples in pkg state module

47409ea4ae Merge pull request #46646 from twangboy/win_fix_test_local_cache
  8d93156604 Fix unit.returners.test_local_cache for Windows

0c2dce0416 Merge pull request #46649 from terminalmage/issue46595
  e82a1aa1ec Make server_id consistent on Python 3

4e7466a21c Merge pull request #46588 from UtahDave/no_crash_winshell
  b7842a1777 Update error message.
  95dfdb91ca Don't stacktrace when salt-ssh w/o saltwinshell

33af3fc7c Merge pull request #46631 from rallytime/update-pillar-unit-tests
  0f728186aa Fix pillar unit test failures: file_roots and pillar_roots environments should be lists

d329e7a7f8 Merge pull request #46640 from terminalmage/file.copy-docs
  480c5f8f9a Clarify the docs for the file.copy state

ff40590c06 Merge pull request #46642 from vutny/doc-cloud-index
  51e6aa54a1 [DOC] Unify cloud modules index header

83ed40e06a Merge pull request #46619 from rallytime/merge-2017.7
  bcbddf5d07 Merge branch '2017.7.5' into '2017.7'
  19bb725698 Merge pull request #46612 from Ch3LL/7.5_rn
  6076bfa26e Add changelog to 2017.7.5 release
  31c78ae11f1 Merge pull request #46572 from dmurphy18/update_xxxbuild
  c87511570d Merge branch '2017.7.5' into update_xxxbuild
  cdd768f4d4 Merge pull request #46577 from gtmanfred/2017.7.5
  78cb7f7b5cd Fix npm issue
  c76f7eb028 enable debug logging on the minionlog
  e6682c660c Merge pull request #46551 from terminalmage/salt-jenkins-885
  703b5e7e65 Change versionadded to show that 2018.3.0 will not have this function
  010d260d06 Rewrite failing Suse pkg integration test
  f3f5dec239 zypper.py: fix version argument being ignored
  214f2d6ad3 Add pkg_list_repo_pkgs to zypper.py
  0a541613f2 Additon of -sa flag to allow for revision numbers other than -0 or -1
  bd62699ccb Merge pull request #46563 from gtmanfred/2017.7.5
- 8d5ab72983 virtualenv version too old for python3.6
- 2916708124 Merge pull request #46561 from gtmanfred/2017.7.5
- 2c39ac6dfb disable verbose
- ee3bf6e532 Merge pull request #46537 from rallytime/bp-46529
- 289c7a228f retry if there is a segfault
- 1271536a89 Merge pull request #46519 from rallytime/man-pages-2017.7.5
- 782a5584f5 Update man pages for 2017.7.5

* df12135439 Merge pull request #46584 from twangboy/lgpo-46568
  - 661017104b Detect disabled reg_multi_sz elements properly
* 2fd3aa487c Merge pull request #46624 from twangboy/win_fix_installer
  - fa0b0efe46 Fix some installer script inconsistencies
* f038e3e452 Merge pull request #46571 from garethgreenaway/46552_onfail_and_require
  - 152c43c843 Accounting for a case when multiple onfails are used along with requires. Previously if you have multiple states using 'onfail' and two of those states using a 'require' against the first one state, the last two will run even if the 'onfail' isn't met because the 'require' is met because the first state returns true even though it didn't execute. This change adds an additional hidden variable that is used when checking requisities to determine if the state actually ran.
* 2677330e19 Merge pull request #46520 from gtmanfred/2017.7
  - cae6edc095 make sure utils is empty for pickling for windows
  - 2883548e6b pass utils to the scheduler for reloading in modules
* 7bc3c2e588 Merge pull request #46531 from terminalmage/issue44299
  - b70c3389da Fix case where no comments specified
  - ce391c53f4 Add regression test for #44299
  - c3e36a6c94 Fix regression in yumpkg._parse_repo_file()
  - f0c79e3da3 Slight modification to salt.utils.pkg.rpm.combine_comments()
* b80ed5d26 Merge pull request #46567 from dwoz/runtest-n-wart
  - 3b6901e19d Honor named tests when running integration suites
* 1dcd2e767 Merge pull request #46580 from twangboy/win_update_docs_dism
  - d52b99d7a3 Clarify some issues with msu files in win_dism.py
* 0a68c22332 Merge pull request #46541 from gtmanfred/metadata
  - 19bd4d9b5 handle user-data for metadata grains

- ISSUE #46668: (anlutro) Jinja2 filter strftime stopped working in salt-ssh 2018.3 (refs: #46848, #46744)
- PR #46744: (garethgreenaway) [2018.3] Ensure salt.utils.dateutils is available for templates via salt-ssh @ 2018-03-28 21:09:46 UTC
  - ef68df7f3a Merge pull request #46744 from garethgreenaway/46668_jinja2_filter_strftime_unavailable
  - 0b30955c00 Including salt.utils.dateutils so various jinja filters are available when using salt-ssh.
- ISSUE #46334: (sjorge) [2018.3.0rc1] Stacktrace on call to nacl.dec (refs: #46426)
• **PR #46720**: (rallytime) Bump deprecation notices in nacl module & runner to Neon @ 2018-03-27 21:15:46 UTC
  - **PR #46426**: (garethgreenaway) [2018.3.0rc1] fixes to nacl module & runner (refs: #46639, #46720)
  - 65bb37effd Merge pull request #46720 from rallytime/bump-nacl-deprecation
  - 5102c0310c Bump deprecation notices in nacl module & runner to Neon

• **PR #46733**: (rallytime) [2018.3] Merge forward from 2018.3.0rc1 to 2018.3 @ 2018-03-27 18:46:43 UTC
  - c83d9e66fe Merge pull request #46733 from rallytime/merge-2018.3
  - 0d4eb26f3 Merge branch '2018.3.0rc1' into '2018.3'

• **PR #46565**: (twangboy) Create reg salt util (2018.3) @ 2018-03-26 22:03:33 UTC
  - 0faced1d54 Merge pull request #46565 from twangboy/win_fix_cmd_powershell_2018.3
  - 5ee64e9b0e Fix lint (spelling error)
  - 0de54ed953 Additional tests
  - fc9ecd75e2 Skip unit.state.test_reg unless on Windows
  - aa98dbf250 Fix some lint
  - e0d201a96f Make sure the docs are correct for the tests
  - f15f92318d Add tests for salt.utils.win_reg
  - f7112b19a2 Submit #46527 against 2018.3

• **ISSUE #46334**: (sjorge) [2018.3.0rc1] Stacktrace on call to nacl.dec (refs: #46426)

• **PR #46639**: (terminalmage) Use the correct path for nacl certificates in Windows @ 2018-03-26 19:20:10 UTC
  - **PR #46426**: (garethgreenaway) [2018.3.0rc1] fixes to nacl module & runner (refs: #46639, #46720)
  - dd52368f90 Merge pull request #46639 from terminalmage/nacl-default-path
  - 2f7660fe35 Use the correct path for nacl certificates in Windows

• **PR #46416**: (dincamihai) Fix cp.push empty file @ 2018-03-26 17:52:47 UTC
  - 2efef52a3e Merge pull request #46416 from dincamihai/fx-cp.push-empty-file
  - 536ba0fa1e Fix cp.push empty file

• **PR #46643**: (mcalmer) fix docker return @ 2018-03-26 15:52:31 UTC
  - 84579e7652 Merge pull request #46643 from mcalmer/fx-docker-return
  - 3ceb63f607 fix checking test results
  - af64632bf3 add unit test for failed login
  - 0fc7989236 make it possible to use login, pull and push from module.run and detect errors

• **PR #46650**: (Ch3LL) Mirror libnacl imports in test from the nacl module @ 2018-03-26 14:48:40 UTC
  - c67a9be6b3 Merge pull request #46650 from Ch3LL/nacl_test
  - 9fe8bc431 Mirror libnacl imports in test from the nacl runner
  - f11d58a8e9 Mirror libnacl imports in test from the nacl module

• **PR #46645**: (terminalmage) Add Unicode / Python 3 update to 2018.3.0 release notes @ 2018-03-26 14:43:53 UTC
  - 03b58a01cf Merge pull request #46645 from terminalmage/release-notes
  - 986c7bcdae Rewrite unicode/py3 section

30.2. Previous Releases 4625
• ISSUE #46150: (whytwolf) With chocolatey:version some packages don’t work with check_remote=True (refs: #46661)

• PR #46661: (Kimol) Chocolatey - Lowered name of local and remote packages before comparing versions. @ 2018-03-26 14:35:39 UTC
  
  - 308c9ddf63 Merge pull request #46661 from Kimol/2018.3-fix_chocolatey_check_remote_packages
  
  - 52581e7918 Removed trailing whitespace

  - 123a86947c Chocolatey - Added lowering local packages for unifing both local and remote names to lowercase for comparison.

  - 4be1a991c2 Lowered name of available packages before comparing with local packages

• PR #46569: (rallytime) [2018.3] Merge forward from 2017.7 to 2018.3 (refs: #46631) @ 2018-03-21 20:57:04 UTC
  
  - 2e1f7c37f7 Merge pull request #46569 from rallytime/merge-2018.3

  - 46ba72fb1c Fix pillar unit test failures: file_roots and pillar_roots environments should be lists

  - fe2d46d0d0 Better merge conflict resolution for setup.py windows changes

  - 8886b61576 Update old utils paths to new paths

  - 8d1e1e7f94 Merge branch ‘2017.7’ into ‘2018.3’
    
    * 048b2ba3f6 Merge pull request #46547 from garethgreenaway/46427_service_module_cumulus
      
      - edd0b11447 Merge branch ‘2017.7’ into 46427_service_module_cumulus
      
      - ea3c16080e Disable the service module on Cumulus since it is using systemd.

    * 98e3260b9a Merge pull request #46548 from Ch3LL/profit_test
      
      - db96c4e72e check for foo,bar username,password set in profitbrick config

    * 79f2a76609 Merge pull request #46549 from Ch3LL/dimension_test
      
      - bb338c464c Fix dimensionsdata test random_name call

    * 083846fe0e Merge pull request #46529 from gtmanfred/kitchen
      
      - 50d6e2c7be retry if there is a segfault

    * 5cc11129f1 Merge pull request #46511 from rallytime/bp-45769
      
      - a8ffceda53 Surpress boto WARNING during decode, reference: https://github.com/boto/boto/issues/2965

    * 0e90c8ca6f Merge pull request #46493 from terminalmage/issue46207
      
      - f06f68f10 salt-call: don’t re-use initial pillar if CLI overrides passed

    * b11a8fc8e0 Merge pull request #46450 from gtmanfred/salt_runner
      
      - 7974ff7264 load grains for salt.cmd runner

    * 22d753364b Merge pull request #46337 from gtmanfred/2017.7
      
      - d6d9e36359 add tests for names and listen/listen_in
      
      - 3f8e0db572 let listen_in work with names
      
      - 7161f4d4df fix listen to be able to handle names

    * b7191b8782 Merge pull request #46413 from meaksh/2017.7-explore-result-in-depth
88571634e Add new unit test to check state.apply within module.run
9f19ad5264 Rename and fix recursive method
1476ace558 Fix Python3 and pylint issue
726ca3044d Explore 'module.run' response to catch the 'result' in depth
02a79a2014 Merge pull request #46496 from gtmanfred/kitchen
da002f78d0 include virtualenv path for py3 windows
fe2e03ea remove duplicate setup
5e4c182d75 Merge pull request #46330 from bdrung/fix_kubernetes_test_create_deployments
5008c53c44 Fix ValueError for template in AppsV1beta1DeploymentSpec
c7e05d3ff4 Merge pull request #46482 from rongshengfang/fix-keyerror-in-instance_present
ed8c83e89a Fix KeyError in salt/states/boto_ec2.py when an EIP is being associated to an existing instance with the instance_present state.
573d51afec Merge pull request #46463 from terminalmage/mock-2.0
b958b4699c Update requirements files to depend on mock>=2.0.0
a154d35fc7 Merge pull request #46422 from rallytime/bp-46300
829dfe8e8e Change stringutils path to old utils path for 2017.7
91db2e0782 Python 3 support
2afaca17a1 Merge pull request #46320 from mcalmer/warn-kubernetes

c493c0415 Add warning about future config option change
c7f95581e3 Merge pull request #46449 from bdrung/make-doc-theme-configurable
4a5da2d144 Make documentation theme configurable
10ce09e20 Merge pull request #46162 from rallytime/team-suse-zypper-owner
13a295a3b7 Add pkg and snapper to team-suse
35c7b7b0d3 Add btrfs, xfs, yumpkg, and kubernetes file to team-suse
485d777ac0 Add team-suse to CODEOWNERS file for zypper files
cac096b311 Merge pull request #46434 from gtmanfred/highstate_return
d18f1a55a7 fix pylint
9e2c3f7991 split return key value correctly
7dd71101ce Merge pull request #46455 from whytewolf/Issue_44452_unicode_cloud
5fe474b1a8 .format remove fix for #44452
4c8d9026d3 Merge pull request #46428 from twangboy/win_fix_reqs
e7ab97cc17 Remove six as a hard dep for Salt
cc675c2ef Set six to 1.11.0
e834d9a63b Merge pull request #46454 from gtmanfred/kitchen
b8ab8434a5 fix windows for kitchen
2886dca88f Merge pull request #46452 from gtmanfred/spm_cache_dir
- 169cf7a4e2 make spm cache_dir instead of all cachedirs
- a188984cd9 Merge pull request #46446 from bdrung/fix-typos
  - 7e6e80be87 heat: Fix spelling mistake of environment
  - a3c54b50f6 Fix various spelling mistakes
- e35fc5263c Merge pull request #46309 from bdrung/dynamic-pillarenv
  - 584b451fd1 Support dynamic pillar_root environment
- 35fe9827fe Merge pull request #46430 from terminalmage/issue44032
  - f9f187e915 Improve reliability/idempotence of file.blockreplace state
- 2bad0a21c0 Merge pull request #46429 from twangboy/win_fix_snmp
  - 8995a9b8de Fix problem with __virtual__ in win_snmp
- 93a572f229 Merge pull request #46100 from jfindlay/resolv_scope
  - d5561bedaf tests.unit.grains.core add scoped IPv6 nameserver
  - 4e2e62d508 salt.utils.dns parse scope param for ipv6 servers
- 5acc1d5c54 Merge pull request #46420 from bdrung/2017.7
  - e48c13d9e0 Fix SSH client exception if SSH is not found
- ca6a7e6317 Merge pull request #46379 from angeloudy/2017.7
  - 3acb59c74c Merge branch '2017.7' into 2017.7
  - d971e0c08b Fix indent
  - 269514683f Update http.py
  - 908c040ac3 Update http.py
  - 51ba3c135b Update http.py
  - 14aba24111 fix bytes-object required error in python 3
- 73f9233557 Merge pull request #46404 from gtmanfred/kitchen
  - c56baa95a8 clone .git for the version tests
  - 3620611b5b fix unhold package for debian
  - 5219f7d2ba fix minion log path
- ca28cf44e4 Merge pull request #46310 from twangboy/win_update_installer_build
  - bcf8b19566 Update the installer build
- deccbeca3 Merge pull request #46316 from twangboy/win_fix_dsc
  - 2042d33d59 Fix issues with the DSC module

- PR #46620: (rallytime) [2018.3] Merge 2018.3.0rc1 into 2018.3 @ 2018-03-20 22:45:00 UTC
  - 8cdd56b9dc Merge pull request #46620 from rallytime/merge-2018.3.0rc1-into-2018.3
  - b03cda3cea Merge branch '2018.3.0rc1' into '2018.3'

- PR #46606: (Ch3LL) add autodoc topics for infoblox state modules @ 2018-03-19 21:35:46 UTC
  - 2d2fe22ae2 Merge pull request #46606 from Ch3LL/infoblox_docs
  - 6eab6a7dc4 add autodoc topics for infoblox state modules
• PR #46540: (s0undt3ch) Some missing `isinstance` checks. @ 2018-03-15 16:17:19 UTC
  - 1191d5b379 Merge pull request #46540 from s0undt3ch/2018.3
  - fa1d68774 Some missing `isinstance` checks. Committed again through a PR.
• PR #46513: (rallytime) [2018.3] Merge forward from 2018.3.0rc1 to 2018.3 @ 2018-03-15 15:58:59 UTC
  - 5429438e4b Merge pull request #46513 from rallytime/merge-2018.3
  - aa760334a1 Merge branch '2018.3.0rc1' into '2018.3'
• ISSUE #43208: (mitar) Prevent user.present to change uid and gid of existing user (refs: #46502)
• PR #46502: (terminalmage) user.present: don't change uid/gid unless explicitly told to @ 2018-03-13 14:25:20 UTC
  - 3e073c7e8a Merge pull request #46502 from terminalmage/issue43208
  - 4106840deb user.present: don't change uid/gid unless explicitly told to
• PR #46398: (rallytime) [2018.3] Merge forward from 2017.7 to 2018.3 @ 2018-03-12 20:25:19 UTC
  - 7cdb00ca9c Merge pull request #46398 from rallytime/merge-2018.3
  - d22e5ba44 Merge fix: return back wb+ mode in crypt.gen_keys.
  - c7dddaf8ce Lint: Use log variable, not logger.
  - ca1860cd91 Use new get_umask function in mask calls in virt.py
  - 19ec76dde1 Update old utils paths with new utils paths
  - d83727fd9 Merge branch '2017.7' into '2018.3'
    - 95586678c3 Merge pull request #46394 from Ch3LL/mac_doc
      - 158add6661 change oxdownload to oxdownload-{python_version}
      - 21aa848c89 Add mac py2 and py3 packages to mac installation docs
    - 07b5d59ac1 Merge pull request #46338 from rallytime/fix-44831
      - 90771da999 Remove cmd.wait deprecation reference in docs
    - 3849e7a085 Merge pull request #46333 from danlsgiga/issue-42438
      - 3b13f37b44 Revert changes in the code and change docs instead
      - 38114a65d8 Fixes color parameter mismatch and handles 204 responses correctly
    - a8f2f1b063 Merge pull request #46322 from terminalmage/issue44935
      - 85ac6a9893 yamlify_arg: don't treat leading dashes as lists
    - da5c282cb2 Merge pull request #46327 from samilaine/fix-vmware-cloud-fqdn
      - 4b8ddf326f Modify the way a FQDN is handled in the vmware cloud provider.
    - 78c45d3786 Merge pull request #46318 from terminalmage/squelch-warnings
      - 5889b36646 Skip type-checking for several gitfs/git_pillar/winrepo params
    - bb0d6c263 Merge pull request #46312 from gtmanfred/2017.7
      - 749ae580ed add module_dirs to salt ssh thin tarball
    - 88b5f7383d Merge pull request #46242 from redbaron4/fixed-46127
      - 06db451617 Make changes from review
• 727ebe1056 Merge branch '2017.7' into fix-46127
• 08d1ee8baf Fix Python3 test errors
• aa9d709015 Pass env_vars to pip.freeze
  • a0716643e4 Merge pull request #46265 from Ch3LL/profit_cloud
    • d4893eab4c Add username/password to profitbricks conf for cloud tests
  • ed7bffaca7e0 Merge pull request #46306 from rallytime/bp-46256
    • 6439bee4a8 Don't install msgpack 0.5.5

    • a2e099b744 Merge pull request #46203 from Ch3LL/7.5_release
      • 6ddf3246ce Add 2017.7.5 Release Notes File
    • 973b227818 Merge pull request #46201 from rallytime/merge-2017.7
      • 9ac2101baa Merge branch '2016.11' into '2017.7'
      • a4c5417d23 Merge pull request #46132 from rallytime/2016.11_update_version_doc
      • d2196b6df3 Update release versions for the 2016.11 branch
    • 89cf2e5061 Merge pull request #46139 from bdrung/os-grains
      • 0b445f2a37 tests: Add unit tests for _parse_os_release()
      • f6069b77ed Fix osfinger grain on Debian
      • 8d0e5a761 tests: Add os_grains test cases for Debian
      • ff02ab9937 tests: Add Ubuntu 17.10 (artful) os_grains test case
      • 77d5356aba Fix incorrect oscodename grain on Ubuntu
      • 7e62dc9fd2 tests: Support reading os-release files from disk
- a92ec0db1b Make _parse_os_release() always callable
- eee1fe5b38 tests: Dissolve _run_ubuntu_os_grains_tests
- 1d6ef731fe tests: Deduplicate _run_os_grains_tests()
  * c8c71e75ca Merge pull request #46133 from rallytime/2017.7_update_version_doc
  * 0ed338e643 Update release versions for the 2017.7 branch
  * 390d592aa6 Merge pull request #46185 from terminalmage/issue46124
    - 3b58dd0da0 gitfs: Fix detection of base env when its ref is also mapped to a different env
  * 705caa8cca Merge pull request #46148 from rallytime/merge-2017.7
    - 25deebf7a6 Merge branch '2017.7.3' into '2017.7'
    - b5b083fd26 Merge pull request #46074 from Ch3LL/update-7.4
    - 8d0eeeb059 Update 2017.7.4 Release Notes with new fixes
    - 32f3d00e44 Merge pull request #46066 from rallytime/pin-tornado
    - 6dc1a3b9dc Pin tornado version in requirements file
    - 85761ee650 Merge pull request #46036 from terminalmage/issue43769
    - e2140d9a84 Mock the ssh.key_is_encrypted utils func
    - 16992ab3fe Move ssh.key_is_encrypted to a utils module temporarily
    - 54fbd78f7a Only keep ssh.py in the Windows installer
    - 5f04531e1b Keep ssh state and execution modules in the installer
    - f2ba69f93d git.latest: Fix regression with identity file usage
  * 10a47dcebc4 Merge pull request #46137 from damon-atkins/2017.7_fix_ec2_pillar2
    - 99e7f6a7d3 update ec2 pillar arguments with better names
  * d74cb14557 Merge pull request #46145 from terminalmage/issue46004
    - 467ff81cd pillarenv argument should default to None and not the value from opts
    - 2a185855ea Better solution for fixing the opts munging in pillar.show_pillar runner
    - e2c4702e0c Update tests to reflect changes to the SaltCacheLoader
    - f9301fccc4 Document behavior when orchestration runner invoked with non-orch states
    - 9644579ed0 Instantiate the SaltCacheLoader's fileclient in the __init__
    - f9a6f8e121 salt.runners.pillar.show_pillar: don't modify master opts
    - e0940a9fc4 Properly detect use of the state.orch alias and add orch jid to kwargs

- ISSUE #42932: (bobrik) cmd.run with bg: true doesn't fail properly (refs: #46172, #45932)
- PR #46172: (The-Loeki) cmdmod: reimplemention of #45932 for Oxygen @ 2018-02-28 19:14:26 UTC
  - PR #45932: (The-Loeki) Fix cmd run_all bg error (refs: #46172)
  - PR #39980: (vutny) [2016.3] Allow to use bg kwarg for cmd.run state function (refs: #46172, #45932)
  - 20d869c228 Merge pull request #46172 from The-Loeki/fix_cmd_run_all_bg_oxygen
  - 3e5f018d80 Merge branch '2018.3' into fix_cmd_run_all_bg_oxygen
  - b5315e817b Merge branch '2018.3' into fix_cmd_run_all_bg_oxygen

30.2. Previous Releases

4633
- beabf406b cmdmod: reimplementation of #45932 for Oxygen

- **PR #46238:** (terminalmage) Don't allow salt.utils.files.fopen() to open stdin/stdout/stderr @ 2018-02-28 19:08:23 UTC
  - 687575b582 Merge pull request #46238 from terminalmage/fds-in-fopen
  - fe1527a3c4 Don't allow salt.utils.files.fopen() to open stdin/stdout/stderr

- **PR #46219:** (twangboy) Fix *unit.modules.test_network* for Windows @ 2018-02-28 15:45:02 UTC
  - 3da5dcb313 Merge pull request #46219 from twangboy/win_fix_inet_pton
  - 46f1d2cc09 Use six.text_type instead of six.u

- **PR #46228:** (twangboy) Fix *unit.modules.test_pip* for Windows @ 2018-02-28 15:37:49 UTC
  - 44343f8063 Merge pull request #46228 from twangboy/win_fix_test_pip
  - 415821eee9 Fix encoding issue

- **PR #46198:** (rallytime) [2018.3] Merge forward from 2018.3.0rc1 to 2018.3 @ 2018-02-27 15:17:51 UTC
  - ade8950bbe Merge pull request #46198 from rallytime/merge-2018.3
  - 1b4dc71930 Lint fix
  - 776f2e5ad7 Merge branch '2018.3.0rc1' into '2018.3'

- **ISSUE #45849:** (Epiclemonaid) XenServer Provisioning errors out on this line. removing it succeeds. *(refs: #46168)*

- **PR #46168:** (gtmanfred) driver and provider should be specified @ 2018-02-26 16:17:13 UTC
  - 06d2d38eac Merge pull request #46168 from gtmanfred/2018.3
  - ac99bd26db driver and provider should be specified

- **PR #46161:** (rallytime) [2018.3] Merge forward from 2017.7 to 2018.3 @ 2018-02-26 15:29:39 UTC
  - 605e2ef873 Merge pull request #46161 from rallytime/merge-2018.3
  - 69ac94baca Update utils paths
  - cffbf52c10 Lint fix: remove extra line
  - 79bedc0f1f Merge branch '2017.7' into '2018.3'
    * 0398ce0482 Merge pull request #46135 from rallytime/bp-46088
      - 57a060f62a3 fix kernel subpackages install bug
    * 1fcbdb1e02 Merge pull request #46136 from rallytime/bp-46115
      - 0a481d707f update digitalocean salt-cloud driver
    * 1e5e8eb686 Merge pull request #45911 from twangboy/win_fix_dbg Unicode
      - bcd56627 Update log statement
      - e9fa53d4b7 Change the Invalid Data Message
      - c81d34779f Convert reg values to unicode for debug
    * 524a6a72a0 Merge pull request #46123 from gtmanfred/2017.7
      - 8d36730ef7 If no pubkey is passed in openmode fail
    * e48fa58012 Merge pull request #46131 from vutny/doc-formula-formatting
      - 8d8b051e44 [DOC] Fix code-blocks for reStructuredText

---

4634 Chapter 30. Release Notes
* 6cea44ee95 Merge pull request #46118 from rallytime/bp-44603
  - 2a2c23c66b Fix acme state to correctly return on test
* 16c382b55b Merge pull request #46121 from rallytime/merge-2017.7
  - 4c2f04a85 Merge branch '2016.11' into '2017.7'
  - e197a0fbc5 Merge pull request #46076 from rallytime/bp-46066
  - b94d73c53e Pin tornado version in requirements file
  - c72c1bde5f Merge pull request #46093 from wedge-jarrad/contributing-doc-typo
  - 5a0fe104f7 Fix contributing doc typo
  - 3cb83ea87e Merge pull request #45992 from bgridley/fix-routes-present-state
  - 679787699c Add vpc_peering_connection_id to describe_route_tables route_keys
  - 8a60635da0 Merge pull request #46000 from terminalmage/issue45910
  - 8cf13325ee salt.states.reg.present: Prevent traceback when reg data is binary
  - 1f44e285dc Merge pull request #46011 from terminalmage/fx-solaris-runsas
  - 8ee03a28b Move Solaris USER workaround up a bit
  - 13cdb52690 cmdmod.py: runs workaround for platforms that don't set a USER env var
  - 30b8f7be0 Merge pull request #45467 from twangboy/win_exclude_hidden
  - ea41215646 Make the regex pattern less greedy
  - 6d223cffe7 Add tip about passing bogus saltenv
  - 1282ae3a93 Skip hidden first
  - 437a457911 Skip hidden dirs in genrepo
  - 87dc554dc3 Add final updates to docs
  - 3646d58c9f7 Fix some docs formatting, add some warnings
  - 35c81fafa5a Log the source_dir when caching the files
  - 91c3da8dfd Improve docs for pkg.refresh_db
  - 4803d92707 Add some documentation
  - 08b82e0875 Fix lint error, use raw
  - 2f712691cf Exclude hidden directories in pkg.refresh_db
* b92346645b Merge pull request #46107 from amendlik/yumpkg-assumeyes
  - 8d9a432fb2 Add --assumeyes to yum/dnf commands in yumpkg.refresh_db
* 14fe423e0c Merge pull request #46094 from kstreee/fix-memory-leak
  - 48080a1bae Fixes memory leak, saltclients should be cleaned after used.
  - aba00805f4 Adds set_close_callback function to removes stream instance after closed from a set streams.
* 320c2037e1 Merge pull request #46097 from vutny/fix-https-link
  - 2062fd0e5c [DOC] Put https link to the formulas doc page
* 0eb137f4e Merge pull request #46103 from bdrung/2017.7
• dd3f936557 Fix skipping Kubernetes tests if client is not installed
  * c3a938e994 Merge pull request #46070 from Ch3LL/fix-doc-dns
    2a5d855d97 add required arg to dns_check jinja doc example
  * 01042e9d77 Merge pull request #46067 from rallytime/bp-45994
    a07bb48726 Correct formatting for lint
    e8678f63d3 Fix Comment being None not ” and inject quotes into the TXT ChangeRecords
  * 5e0e2a30e2 Merge pull request #45932 from The-Loeki/fix_cmd_run_all_bg
    f83da27ca5 Merge branch '2017.7' into fix_cmd_run_all_bg
    771758fbca Merge branch '2017.7' into fix_cmd_run_all_bg
    c54fcf7a2d cmd: move separate DRY logging blocks into _run, prevent logging on bg=True, don't use_vt on bg
    ebb181a9b cmd run: when running in bg, force ignore_retcode=True
  * 45ace39961 Merge pull request #46062 from vutny/pg-user-state-fix-typo
    a5f8e49e5e Fix typo in postgres_user.present state function
  * edcb64de76 Merge pull request #45763 from twangboy/win_fix_path_rehash
    b9a2bc7b29 Fix hyperlinks
    29912ade15 Move the test_rehash test to test_win_functions
    adc594c183 Remove duplicate link
    e84628c1eb Add some comments to the code
    d50d55f82f Add additional info to docs for broadcast_setting_change
    3a54e9c9d9 Rename setting to message
    a3f9e99bc0 Change to a generic function to broadcast change
    79299361c3 Create refresh_environment salt util
    967b83940c Fix rehash function
  * a46b5501d Merge pull request #46042 from jfindlay/file_tree_doc
    0ba4954a4b salt.pillar.file_tree revise module documentation
    3c6a5bf967 salt.pillar.file_tree provide better debug info
    bb1cde451e salt.pillar.file_tree no stack trace when nodegroups undefined
  * de86126dd8 Merge pull request #46103 from rallytime/bp-45598
    2ea3b5f43 No lazy logging
    f427b0b9b Change formatting style of logging lines per review
    ebb24396b Patch around ResourceRecords needing to be present for AliasTarget entries to work

• PR #46160: (rallytime) Mark 2 tests as flaky @ 2018-02-23 19:10:06 UTC
  – 05b771bdf7 Merge pull request #46160 from rallytime/flaky-tests
  – 49e49ae51b Mark 2 tests as flaky

• PR #46006: (dincamihai) Remove obsolete unicode handling in pkg.info_installed @ 2018-02-22 19:22:36 UTC
• PR #46078: (rallytime) [oxygen] Merge forward from oxygen.rc1 to oxygen @ 2018-02-20 21:49:04 UTC
  - 93dab45307 Merge pull request #46078 from rallytime/merge-oxygen
  - 2d0f81fd1b Merge branch 'oxygen.rc1' into 'oxygen'

• ISSUE #45938: (edgan) zookeeper.present state doesn't deal with an existing zode with no ACL specified (refs: #46043)

• PR #46071: (rallytime) Back-port #46043 to oxygen @ 2018-02-16 19:56:36 UTC
  - PR #46043: (edgan) Allow zookeeper znode creation to not require an ACL (refs: #46071)
  - 8d99c3b8fe Merge pull request #46071 from rallytime/bp-46043
  - b82c88d630 Allow zookeeper znode creation to not require an ACL

• PR #46056: (Ch3LL) Fix mac_assistive module not loading @ 2018-02-16 14:57:46 UTC
  - 5a31422432 Merge pull request #46056 from Ch3LL/ver_mac
  - e44f5133c5 Fix mac_assistive module not loading

• PR #46041: (rallytime) [oxygen] Merge forward from 2017.7 to oxygen @ 2018-02-16 14:55:51 UTC
  - cdca28f5da Merge pull request #46041 from rallytime/merge-oxygen
  - e060a74fd8 Merge branch '2017.7' into 'oxygen'
    - 07e5735471 Merge pull request #46016 from rallytime/bp-45826
      - 1916e5c4a4 Fix selinux.fcontext_policy_present for Centos 6
    - a1f4092811 Merge pull request #46015 from rallytime/bp-45785
      - ef6ff1492 Resolve linting errors
      - 8047066c46 Remove unused import
      - 8f7c45935a Add tests for salt.modules.selinux.fcontext_get_policy
      - ba87b4e6e Ensure parsed fields are stripped
      - a830a6e819 m/selinux.fcontext_get_policy allow long filespecs
  - 96097c037e Merge pull request #46012 from rallytime/bp-45462
    - 9f76836a6c emit port cli version, variants as separate args
  - 1279924f5f Merge pull request #45991 from terminalmage/fix-duplicate-extra-opts
    - 9167666f51 yumpkg: Fix a couple issues with _get_extra_opts
  - 8b9adc258e Merge pull request #46017 from rallytime/merge-2017.7
    - a06645ce71 Merge branch '2017.7.3' into '2017.7'
    - 6d534c6e7e Merge pull request #46009 from Ch3LL/rn_7.4
    - ac0baf4344 Add 2017.7.4 Release Notes with PRs
    - ca76a0b328 Merge pull request #45981 from gtmanfred/2017.7.3
    - 0d4484d7dc apparently local is not set by default
    - 2a92f4bc16 use local config for vault when masterless
- 6530649dbc Merge pull request #45953 from rallytime/bp-45928-2017.7.3
- 85363189d1 Fixing vault when used with pillar over salt-ssh
- fb378cebb0 Merge pull request #45934 from rallytime/bp-45902
- bb83e8b345 Add regression test for issue 45893
- cdda66d759 Remove duplicated section in docstring and fix example
- 4b6351cda6 Check the effective saltenv for cached archive
- 0d74151c71 Merge pull request #45935 from rallytime/bp-45742
- 6a0b5f7af3 Removed the chained copy
- ad1150fad4 list.copy() is not compatible with python 2.7
  
  * d20ff89414 Merge pull request #45888 from rallytime/bp-45797
  - 953a400d79 follow symlinks
  
  * b18087cee0 Merge pull request #45711 from bdrung/fix-unicode-tests
  - b6181b5d6d Fix Unicode tests when run with LC_ALL=POSIX

  * 5271fb1d40 Merge pull request #45878 from damon-atkins/2017.7_fix_ec2_pillar
    - 0e74025714 Merge branch '2017.7' into 2017.7_fix_ec2_pillar
    - b4d0b23891 py3 fix
    - 75d9e20d8a Add ignoring 'terminated', 'stopped' instances, to improve changes of a single match
    - 0093472a37 added tag_key_list and tag_key_sep to create ec2_tags_list
    - afb3968aa7 ec2_pillar could not find instance-id, resolved. add support to use any tag to compare minion id against.

  * cf367bd04 Merge pull request #45942 from terminalmage/issue45679-2017.7
    - 89ecbd2a0d Don't try to sort ports when translating docker input
    - 9cd47b39dd Fix incorrect translation of docker port_bindings -> ports

  * dae41de7a8 Merge pull request #45959 from rallytime/state-doc-update
    - 6f781cb95d A couple of grammar updates for the state compiler docs

  * 007214f7bf Merge pull request #45908 from DimensionDataResearch/fix/issue/45884
    - 1a75786b5a Fix linter warnings.
    - 82ec0b589c Revert to using salt.utils.cloud.is_public_ip.
    - 9b6b01873b Fix violations reported by flake8.
    - a2bc155c73 Use __utils__['cloud.'] instead of salt.cloud.utils.
    - 98907a32cb Ensure 'auth' parameter is correctly passed to dimensiondata driver.
    - de26b03e2c Fix copy/paste bug in dimensiondata provider integration test.
    - 61b6e427 Add integration tests for dimensiondata cloud provider.
    - f6ea9fed7d Ensure that event data provided by the dimensiondata driver is serialisable.

  * efcba868c Merge pull request #45985 from garethgreenaway/2017_7_fixing_mac_tests_again
    - 7b8dc14433 Missing format in the call to write.
- bf03abd07c Merge pull request #45958 from garethgreenaway/backport-fixing_mactests_queue_full
  - 25dffaee91 Backporting #45935
- bab365d6c6 Merge pull request #45949 from rallytime/merge-2017.7
  - f51687e903 Merge branch '2016.11' into '2017.7'
  - 7779fea7ba Merge pull request #45940 from dmurphy18/fix_aix_cmdmod
  - dd2788419b Fix use of 'su' for AIX to use '-'
- 7fd00ec752 Merge pull request #45928 from garethgreenaway/45915_fixing_vault_pillar_for_salt_ssh
  - 259e60e5d4 Fixing vault when used with pillar over salt-ssh
- 9d14ad9ccf Merge pull request #45925 from terminalmage/fix-spelling
  - 7a143fe454 Fix spelling error in docstring

- PR #45972: (mcalmer) move log_file option to changeable defaults @ 2018-02-15 18:57:24 UTC
  - 057e895faf Merge pull request #45972 from mcalmer/allow-salt-ssh-define-log_file
  - f89a20fb3e move log_file option to changeable defaults

- PR #46007: (rallytime) [oxygen] Merge forward from oxygen.rc1 to oxygen @ 2018-02-13 18:50:09 UTC
  - d4377d4678 Merge pull request #46007 from rallytime/merge-oxygen
  - d6c2d0693a Merge branch 'oxygen.rc1' into 'oxygen'

- PR #45944: (mirceaulinic) Add NetBox module autodoc @ 2018-02-13 00:01:48 UTC
  - 069f790b3c Merge pull request #45944 from cloudflare/netbox-autodoc
  - ed69b987cf Add NetBox module autodoc

- PR #45984: (garethgreenaway) [oxygen] Missing format in the call to write. @ 2018-02-12 19:06:04 UTC
  - 2a6285d313 Merge pull request #45984 from garethgreenaway/fixing_mac_tests_again
  - ae7791d30b Missing format in the call to write.

- PR #45922: (rallytime) [oxygen] Merge forward from 2017.7 to oxygen @ 2018-02-09 20:24:26 UTC
  - 88f481a3df Merge pull request #45922 from rallytime/merge-oxygen
  - 9c49c8d47c Remove extra patch
  - b96f4cf8ad Remove duplicate import in cmdmod.py
  - 34ecdff7a7 Replace old utils paths with new paths
  - d80547e0b8 Merge branch '2017.7' into 'oxygen'
  - 0cebe93cd6 Merge pull request #45920 from rallytime/merge-2017.7
    - e4e4744218 Merge branch '2016.11' into '2017.7'
    - 27ff82f996 Merge pull request #45864 from rallytime/release-note-fix
      - 104a24f244 Remove extraneous ] in release notes for 2016.11.9
    - 5fa010de2b Merge pull request #45787 from rallytime/2016.11.9_docs
      - a38d4d44fa [2016.11] Bump latest and previous versions
  - 643a8a5278 Merge pull request #45814 from gtmanfred/2017.7
- d8ee9aa97 fix cookies dict size changing in http.query
- 3a3f87c16d Merge pull request #45877 from rallytime/new-release-notes
  - 93f7e8ba81 Add release notes file for 2017.7.4 release
- 1c3e0067o Merge pull request #45904 from rallytime/bp-41017
  - 80c566cdrea Fixed typo in pkg state documentation
- 317d35bd15 Merge pull request #45907 from terminalmage//fix-grains-backport
  - 6cf7e5cc4 Fix backport of grains fix

30.2.39 Salt 2018.3.2 Release Notes

Version 2018.3.2 is a bugfix release for 2018.3.0.
The 2018.3.2 release contains only a small number of fixes, which are detailed below.
This release fixes two critical issues.
The first is Issue #48038, which is a critical bug that occurs in a multi-syndic setup where the same job is run multiple times on a minion.
The second issue is #48130. This bug appears in certain setups where the Master reports a Minion time-out, even though the job is still running on the Minion.
Both of these issues have been fixed with this release.

Statistics

- Total Merges: 7
- Total Issue References: 2
- Total PR References: 10
- Contributors: 4 (cro, garethgreenaway, gtmanfred, rallytime)

Warning: If you are using Jinja to dump lists or dictionaries in your SLS files, this will now cause errors in Python 2 since Jinja does not produce YAML-compatible output when strings in the data structures contain unicode types. The dictionary must be passed through a Jinja filter to produce YAML-compatible strings.

The below is an example of invalid SLS:

```
/etc/foo.conf:
    file.mangaged:
        - source: salt://foo.conf
        - template: jinja
        - defaults: {{ mydict }}
```

To make it valid, use either one of Salt's own json or yaml filters:

```
/etc/foo.conf:
    file.mangaged:
        - source: salt://foo.conf
        - template: jinja
        - defaults: {{ mydict | json }}
```

Changelog for v2018.3.1..v2018.3.2

  - 521e926458 Merge pull request #48158 from gtmanfred/2018.3.2
  - ceef564433 always listen when gathering job info
- PR #48138: (rallytime) Update man pages for 2018.3.2 @ 2018-06-14 21:22:34 UTC
30.2.40 Salt 2018.3.3 Release Notes

Version 2018.3.3 is a security and bugfix release for 2018.3.0.
Statistics

- Total Merges: 548
- Total Issue References: 69
- Total PR References: 341

- Contributors: 55 (Ch3LL, FedericoCeratto, KaiSforza, L4rS6, Luteslav, The-Loeki, Vaelatern, admd, aespos-ito91, asenci, astorath, azelezni, babs, bbeceuz, bbinet, brejoc, cro, daa, dmurphy18, dubb-b, dwoz, eliasp, ezh, garethgreenaway, gtmanfred, isbm, jeduardo, kt97679, kuetzti, linopl, lomeroe, lusche, mateiw, max-arnold, maxim-sermin, meaksh, mmulqueen, morganwillcock, mtorromeo, nullify005, paulcollinsii, pritambaral, rallytime, rares-pop, rmarchei, rosscdh, sizgiyaev, sjorge, t0fik, terminalmage, travispaull, twangboy, vinian, weswhet, zerthimon)

Warning: If you are using Jinja to dump lists or dictionaries in your SLS files, this will now cause errors in Python 2 since Jinja does not produce YAML-compatible output when strings in the data structures contain unicode types. The dictionary must be passed through a Jinja filter to produce YAML-compatible strings.

The below is an example of invalid SLS:

```
/etc/foo.conf:
file.mangaged:
  - source: salt://foo.conf
  - template: jinja
  - defaults: {{ mydict }}
```

To make it valid, use either one of Salt's own json or yaml filters. Another option would be to use Jinja's tojson filter.

```
/etc/foo.conf:
file.mangaged:
  - source: salt://foo.conf
  - template: jinja
  - defaults: {{ mydict | tojson }}
```

Security Fix

CVE-2018-15751 Remote command execution and incorrect access control when using salt-api.

CVE-2018-15750 Directory traversal vulnerability when using salt-api. Allows an attacker to determine what files exist on a server when querying /run or /events.

Credit and thanks for discovery and responsible disclosure: nullbr4in, xcuter, koredge, loupos, blackcon, Naver Business Platform

Changes to win_timezone

Improves timezone detection by using the pytz module.

timezone.get_offset and timezone.get_zonecode now work properly.

Adds timezone.list to list supported timezones in either Windows or Unix format.
New Jinja Filter

The `tojson` filter (from Jinja 2.9 and later) has been ported to Salt, and will be used when this filter is not available. This allows older LTS releases such as CentOS 7 and Ubuntu 14.04 to use this filter.

You can use this filter any time you wish to dump a list or dictionary into an SLS file, to ensure that the result is able to be loaded by the YAML renderer. For example:

```yaml
foo:
  bar.baz:
    - some_arg: {{ mydict | toJSON }}
```

MacOSX escape characters with runas

You are now required to escape quotes when using the runas argument with the cmd module on macOS.

Example:

```bash
cmd.run "'echo '"h="baz"''' runas=macuser
```

  - PR #49580: (garethgreenaway) [2018.3] Fixing tests for Python 3.7 (refs: #49594)
    - e3a14e3535 Merge pull request #49594 from rallytime/bp-49580
    - 41a2586fc0 Add file coding line at top of file
- 7df3bebf53 Fixing lint.
- 5fee38d10f Fixes various tests that were failing under python 3.7.

- **PR #49589**: (rallytime) Update old utils paths to use new utils paths @ 2018-09-10 16:51:31 UTC
  - 39f6ec952 Merge pull request #49589 from rallytime/utils-paths
  - 5de2245c11 Update old utils paths to use new utils paths

- **PR #49550**: (rallytime) Back-port #49548 to 2018.3.3 @ 2018-09-07 00:36:05 UTC
  - **PR #49548**: (garethgreenaway) [2018.3] Disabling State boto tests for Python 3.7+ (refs: #49550)
  - 202da7a94f Merge pull request #49550 from rallytime/bp-49548
  - 180692ccce Disable various boto tests when run under python 3.7 because of //github.com/spulec/moto/issues/1706. which was causing the test suite to hang on unit tests. This PR is disabling the tests in the test_boto_vpc state tests.

- **PR #49542**: (twangboy) Update openssl @ 2018-09-06 16:11:34 UTC
  - cae2d61568 Merge pull request #49542 from twangboy/fix_osx_build_3
  - fe02b2776f Add 1.0.2p shasum file
  - 5f06dc7672 Fix issues with osx build scripts on 2018.3.3

- **PR #49536**: (rallytime) Back-port #49524 to 2018.3.3 @ 2018-09-06 16:00:00 UTC
  - **PR #49524**: (garethgreenaway) [2018.3] Disable boto tests under 3.7 (refs: #49536)
  - d9f09da5d9 Merge pull request #49536 from rallytime/bp-49524
  - 9e7203e0fa Disable various boto tests when run under python 3.7 because of //github.com/spulec/moto/issues/1706. which was causing the test suite to hang on unit tests.

- **PR #49535**: (Ch3LL) Skip test_virt and pip_state requirements tests on macosx @ 2018-09-06 15:59:38 UTC
  - cb934b0f6b Merge pull request #49535 from Ch3LL/skip_pip_mac
  - 50237e9daf Skip test_virt and pip_state requirements tests on macosx

- **PR #49499**: (rallytime) Pin CherryPy version to < 18.0.0 in requirements files for PY2 @ 2018-09-04 18:52:44 UTC
  - 87d3gf6805 Merge pull request #49499 from rallytime/pin-cherrypy-2018.3.3
  - 9e27433a3a Pin CherryPy version to < 18.0.0 in requirements files for PY2

- **ISSUE saltstack/salt-jenkins#1075**: (Ch3LL) [2018.3.3] arch python3 tests do not finish (refs: #49303, #49451)

- **PR #49467**: (rallytime) Back-port #49451 to 2018.3.3 @ 2018-08-31 17:38:09 UTC
  - **PR #49451**: (gtmanfred) Handle thread shutdown on system exit (refs: #49467)
  - 39fdacc434 Merge pull request #49467 from rallytime/bp-49451
  - b891a0a8d3 add lock for proxy minion process too
  - 72519878c0 start thread in try block
  - b878f01662 use finally instead of catching baseexception
  - de98be693 use rlock so blocking can be passed in py2
  - d346b42332 import Callable from collections.abc for python3.7
  - d7a410070a Handle thread shutdown on system exit

  - PR #49270: (dwoz) Add async helper to test_sock_path_len (refs: #49365)
  - 9ca9a775ff Merge pull request #49365 from rallytime/bp-49270
  - 1b3f37a8b8 Add async helper to test_sock_path_len

• PR #49364: (rallytime) Back-port #49243 to 2018.3.3 @ 2018-08-28 16:55:55 UTC
  - PR #49243: (dwoz) Revert newline translation change (refs: #49364)
  - bbff57da16 Merge pull request #49364 from rallytime/bp-49243
  - 5db77c6229 Revert newline translation change

• PR #49347: (Ch3LL) [2018.3.3] Backport #49345 @ 2018-08-28 01:54:00 UTC
  - PR #49345: (gtmanfred) upgrade including linux kernels (refs: #49347)
  - 74b78835b3 Merge pull request #49347 from Ch3LL/bp_49345_2018.3.3
  - 7b5f8a8838 upgrade including linux kernels

• PR #49332: (Ch3LL) Skip nonexistent branch test for git versions <1.7.10 @ 2018-08-25 19:52:48 UTC
  - be6691d91b Merge pull request #49332 from Ch3LL/skip_git
  - ee332f74e Skip nonexistent branch for git versions <1.7.10

• ISSUE #32737: (Lothiraldan) No support for compound matcher in external auth configuration (refs: #49236)

• PR #49313: (rallytime) Back-port #49236 to 2018.3.3 @ 2018-08-24 20:59:16 UTC
  - PR #49236: (terminalmage) Allow compound matching in eauth config expressions (refs: #49313)
  - 64d7b0e4c6 Merge pull request #49313 from rallytime/bp-49236
  - 1a5ef996e3 Add 'minion_data_cache: True' to mocked opts for minions unit tests
  - 549f5d58a6 Allow compound matching in eauth config expressions

• ISSUE saltstack/salt-jenkins#1075: (Ch3LL) [2018.3.3] arch python3 tests do not finish (refs: #49303, #49451)

• PR #49311: (rallytime) Back-port #49303 to 2018.3.3 @ 2018-08-24 17:48:23 UTC
  - PR #49303: (gtmanfred) use os._exit instead of sys.exit when daemonizing (refs: #49311)
  - 7a89a46c8a Merge pull request #49311 from rallytime/bp-49303
  - 3fe1387751 use os._exit instead of sys.exit when daemonizing

• PR #49294: (Ch3LL) Move run_function call from __init__ to setup @ 2018-08-24 12:41:35 UTC
  - 7bb356f11e Merge pull request #49294 from Ch3LL/fed_28_tests
  - 0a5d44a3db Move run_function call from __init__ to setup
• PR #49302: (twangboy) Fix installer 2018.3.3 @ 2018-08-24 12:41:14 UTC
  - a607f9332f Merge pull request #49302 from twangboy/fix_installer_2018.3.3
  - 68fd37575e Fix erroneous NSSM reference
  - 103fc289e Remove delete vcredist line
  - 007a16638e Bring installer updates from 2017.7.8 to 2018.3.3

• PR #49241: (terminalmage) Don't silently catch SystemExit @ 2018-08-22 12:57:58 UTC
  - bcb04ac513 Merge pull request #49241 from terminalmage/salt-jenkins-1078
  - 8d144f2c7 Don't silently catch SystemExit
  - c0fd818f7 Don't use a bare except!

• PR #49239: (Ch3LL) Use yaml’s safe_dump in windows ec2 tests @ 2018-08-22 08:48:13 UTC
  - 0fb9ccf60a Merge pull request #49239 from Ch3LL/win_yaml_test
  - f5b42db24 import salt.utils.yaml
  - 67290eaf7 Use yaml’s safe_dump in windows ec2 tests

• PR #49182: (terminalmage) Fix hanging syndic test @ 2018-08-18 12:10:32 UTC
  - 134f125b96 Merge pull request #49182 from terminalmage/salt-jenkins-1078
  - a2d2cd31b Fix hanging syndic test

• PR #49172: (Ch3LL) [2018.3.3] cherry pick #49118 @ 2018-08-17 20:54:05 UTC
  - PR #49118: (dwoz) Multiple fixes for integration.states.test_file (refs: #49172)
  - PR #49088: (dwoz) Multiple file state test fixes (refs: #49118)
  - PR #49087: (dwoz) Filter out scheme’s that are not valid (refs: #49118)
  - b3a247b96 Merge pull request #49172 from Ch3LL/bp-49118
  - ce5e17bbd update is_windows salt.utils to correct path
  - 3ffe1240f Multiple fixes for integration.states.test_file

• PR #49173: (Ch3LL) [2018.3.3] cherry pick #49167 @ 2018-08-17 20:30:27 UTC
  - PR #49167: (dwoz) Fix remaining file state integration tests (py3) (refs: #49173, #49442)
  - a1a298a13c Simplify dict keys lookup
  - 3d26affa10 Fix remaining file state integration tests (py3)

• PR #49171: (Ch3LL) [2018.3.3] cherry pick #49103 @ 2018-08-17 20:23:32 UTC
  - PR #49103: (dwoz) Install the launcher so we can execute py files (refs: #49171)
  - ee54ea5f73 Merge pull request #49171 from Ch3LL/bp-49103
  - 05a2b91fbb Install the launcher so we can execute py files

• PR #49132: (Ch3LL) [2018.3.3] backport PR #49062 @ 2018-08-17 14:51:50 UTC
  - PR #49062: (weswhet) fix memoize on available macOS services (refs: #49132)
  - 58034c9dc3 Merge pull request #49132 from Ch3LL/bp-49062
- 990fdb6a52 decorator link fix, updating context names, as well as updating macutils tests for latest changes
- 3ab5d282be fixing an issue with memoize on macOS services, switching to using `__context__` instead

- **PR #49142**: (Ch3LL) Remove `-Z script_arg` for cloud tests @ 2018-08-16 16:12:59 UTC
  - 01f8f83cf0 Merge pull request #49142 from Ch3LL/rm_z_arg
  - a1ef6a88a6 Remove `-Z script_arg` for cloud tests

- **PR #49137**: (Ch3LL) [2018.3.3] Update bootstrap script to latest release (2018.08.15) @ 2018-08-15 19:49:22 UTC
  - a03828884b Merge pull request #49137 from Ch3LL/bootstrap_2018.3.3
  - eb9a612096 [2018.3.3] Update bootstrap script to latest release (2018.08.15)

- **PR #49110**: (rallytime) [2018.3] Merge forward from 2017.7 to 2018.3 @ 2018-08-14 17:11:25 UTC
  - b412bff534 Merge pull request #49110 from rallytime/merge-2018.3
  - 4649f60209 Update old utils paths with new paths
  - 49c2a784bb Merge branch '2017.7' into '2018.3'
    * d46e23f4c2 Merge pull request #49109 from rallytime/merge-2017.7
      - 3c5527f300 Merge branch '2017.7.8' into '2017.7'
      - 01cf2c71ff Merge pull request #49051 from rallytime/bp-49046
      - fc0817cb35 The osfullname grain differs when using Python2 vs Python3, swapping this out for the "OS" grain which is consistent.
    * 8954dd269f Merge pull request #49090 from dwoz/file_line_fix
      - 0dca634e3c Search for (but do not include) CRLF line ending
    * b99edc3dce Merge pull request #49088 from dwoz/file_hash_diffs
      - 054af8197 Multiple file state test fixes
    * 274977b6c4 Merge pull request #49087 from dwoz/url_file_test_fixes
      - 632b65f975 Filter out scheme's that are not valid
    * db5fb3232a Merge pull request #49086 from rallytime/new-doc-img
      - 90954203cb Update the DOCBANNER image for saltconf
    * af6ec1dce2 Merge pull request #49045 from twangboy/fix_43164
      - 589456d08f Fix lint errors
      - e79243566d Add rallytime's suggestions
      - d1ae6b3d6d Fix docs for the registry module and state
    * a840fe1a11 Merge pull request #49083 from rallytime/bootstrap-2017.7
      - 358e14cdac [2017.7] Update bootstrap script to latest release
    * 9db6cd5654 Merge pull request #49059 from twangboy/fix_37984
      - 7ed45b5b00 Remove import
      - 7fb1ed469 Fix docs to clarify uptime output on Windows
    * f9db72f00c Merge pull request #49061 from saltstack/revert-48982-new_logo_2017.7
      - 98a8da728b Revert "New logo 2017.7 (WIP)"
* bbcd1869ec Merge pull request #48982 from newwebash/new_logo_2017.7
  * 5c1c311f77 Update Salt Conf ad
  * 72dc63c426 Merge branch '2017.7' of https://github.com/saltstack/salt into new_logo_2017.7
  * 9f4e78a7b9 Revert "Update saltconf ad"
  * 3ab8c8d882 Update saltconf ad

• ISSUE #48665: (dgengtek) salt-api auth ldap generates a valid token when using bindpw and an invalid request (refs: #48901)

• PR #48901: (garethgreenaway) [2018.3] fix to auth/ldap.py @ 2018-08-14 16:10:19 UTC
  * e78fc0e0eb Merge pull request #48901 from garethgreenaway/48665_auth_ldap_valid_token_failed_auth
  * d4e4f2e803 Fixing a typo in a comment.
  * 2eb167ea42 Fixing issue when a valid token is generated even when invalid user credentials are passed. This change verifies that the binddn credentials are valid, then verifies that the username & password (if not None) are also valid.

• ISSUE #49081: (frogunder) Fluorine - I see error/traceback when running minion in debug mode (refs: #49085)

• PR #49099: (rallytime) Back-port #49085 to 2018.3 @ 2018-08-14 12:42:51 UTC
  * PR #49085: (gtmanfred) fix async call to process manager (refs: #49099)
  * 484ce0123 Merge pull request #49099 from rallytime/bp-49085
  * 024d9cb843 fix async call to process manager

• ISSUE #49018: (Ch3LL) add MasterPillarUtil tests (refs: #49034)

• PR #49071: (rallytime) Back-port #49034 to 2018.3 @ 2018-08-13 20:15:31 UTC
  * PR #49034: (garethgreenaway) [fluorine] Adding tests for MasterPillarUtil (refs: #49071)
  * bc033da677 Merge pull request #49071 from rallytime/bp-49034
  * 8108a4d31a Adding some tests for the grains, pillar and mine functions in the cache runner. These will also ensure that the relevant functions in salt.utils.master.MasterPillarUtil are functioning properly.

• PR #49077: (rallytime) Back-port #49075 to 2018.3 @ 2018-08-13 20:00:00 UTC
  * PR #49075: (gtmanfred) fix last async issue (refs: #49077)
  * 90c2f026b3 Merge pull request #49077 from rallytime/bp-49075
  * 5e07b8306b fix last async issue

• PR #49096: (rallytime) Update the DOCBANNER image for saltconf @ 2018-08-13 19:59:39 UTC
  * 6942ef1102 Merge pull request #49096 from rallytime/new-doc-img-2018.3
  * 75080705ce Update the DOCBANNER image for saltconf

• PR #49055: (rallytime) [2018.3] Merge forward from 2017.7 to 2018.3 @ 2018-08-13 19:20:11 UTC
  * 0e1ed7b923 Merge pull request #49055 from rallytime/merge-2018.3
  * 83a15cb623 Add optimization_order config to mocked opts
  * ea6883ee55 Update old utils paths to new utils paths
  * 201031fa8a Merge branch '2017.7' into '2018.3'
    * 0d2a495378 Merge pull request #49050 from rallytime/merge-2017.7
30.2. Previous Releases

- ed6fb8b739 Merge branch '2017.7.8' into '2017.7'
- 189e28691f Merge pull request #49044 from Ch3LL/vultr_test
- 0dedf4e4d1 Increase timeout on vultr cloud integration test
- c606a32cf2 Merge pull request #49042 from rallytime/flaky-jinja-test
- a43d9b4ba6 Mark a jinja template test as flaky
- 6415b6f73b Merge pull request #49041 from Ch3LL/ec2_fix
- c7f2459b8 [2017.7.8] backport PR #48212
- 1db036406b Merge pull request #49030 from rallytime/update-client-tests
- f08ee6c6ae Update netapi client tests
- 70be9ac9b1 Merge pull request #49046 from garethgreen-away/1022_fixing_test_failing_py3_Debian_test
  - fa2339bb91 The osfullname grain differs when using Python2 vs Python3, swapping this out
    for the "OS" grain which is consistent.
- 69c9b0afb1 Merge pull request #49036 from cspeidel/doc-fix-netyang
  - f7ac085eb5 minor doc fix in netyang.py
- c5f3ddeb2b Merge pull request #48997 from AVeenstra/patch-1
  - 0e535f2c8c Unpacking dict with the six iterator
  - 5e82685b89 Python 3 related fix in highstate_return.py
- c06a3cf531 Merge pull request #49021 from rallytime/merge-2017.7
  - ca82b3d57a Merge branch '2017.7.8' into merge-2017.7
  - f73ba21bc7 Merge pull request #49024 from rallytime/fx-deb-test
  - a9c16d9137 Fix test error in test_compiler jinja check
  - c6f8429e41 Merge branch '2017.7.8' into '2017.7'
  - 6b6d8c615 Merge pull request #49020 from rallytime/fx-grains-test
  - f72a3ac6be Make grains integration test more robust
  - 92d6c25c7f Merge pull request #49002 from rallytime/skip-jinja-deep-error-test
  - 23b66ef8bb Skip test_jinja_deep_error on Debian 8
  - 41df9f1eb3 Merge pull request #48999 from rallytime/fx-boto-test
  - d0136b1be5 Update expected return value in boto test
- 2ddba6391a Merge pull request #49010 from Ch3LL/univention
  - c09bce9afe Add univention OS to debian os_family mapping
- 41bd36842e Merge pull request #48636 from terminalmage/loader-fixes
  - 0441cd56ef Add optimization_order to mocking
  - 2256fad320 Process pycache files after .py files
  - a78663a301 Lint
  - 0728b5f8b6 Add note about Python 3.5+ only support for optimization_order
  - 764969ce08 Add a test to confirm that .py files are still loaded correctly
• 0f60beb6b6 Fix bad copypasta
• fbcd142ea2 Add configuration docs for optimization_order config option
• 8af2d580f3 Only compile the suffix_order/map once per LazyLoader instance
• 4b95e5f313 Don't put __pycache__ dir in the file list
• e7c10196da Quiet the byte compiling for PY2
• 9338370477 Add unit tests for loader optimization levels
• c3622933c1 PY3: Support different optimization levels
• 6fc8da5bab Add optimization_order config option with default value
• dfe423a1e0 Remove commented-out log message

• PR #49084: (rallytime) [2018.3] Update bootstrap script to latest release @ 2018-08-13 18:14:42 UTC
  – db7ec46875 Merge pull request #49084 from rallytime/bootstrap-2018.3
  – 28dc8ce954 [2017.7] Update bootstrap script to latest release

• PR #49052: (ismb) Python 3.7 support (backport 2018.3) @ 2018-08-13 13:06:51 UTC
  – b0d5aceb0d Merge pull request #49052 from isbm/ismb-python37-support-2018.3
  – 4386a9ca1f Merge branch '2018.3' into isbm-python37-support-2018.3
  – bc85a5fa98 Fix configuration setting
  – 47078a300f Remove async keyword, moving it into the kwargs.
  – 31dccc4df6 fix unicode literals
  – 990936992c Keep runner API unchanged
  – 46bafcaef Fix nag-message
  – 5c887ac2ae Support original API
  – 2c22e794d4 Use kwargs instead of directly named parameters
  – 7d095491d9 Update docstring
  – 9807e8dbb7 Add 'async' backward compatibility
  – e8608aa9be Revert api call: it is about "functionname_async" suffix.
  – 0543578336 Deprecate 'async' parameter in Mandrill API
  – 1107de0dec Lintfix: PEP8 requires two empty lines
  – 2a18e335af Fix function signatures in Cassandra module
  – 603f942a3c Cleanup docstrings at module level
  – b9718d3a09 Fix log error/info/warning and exception messages
  – 6e77aff69a Fix local opts from CLI
  – 493e48ddb5 Remove internal variables/properties with the reserved words
  – be07f64bc4 Change internal function signatures to avoid reserved word
  – 7d095e0b26 Rename async function to asynchronous
  – 35eaebb8a4 Fix docstrings
  – 7a597f19b5 Fix comments
- 69920366ae Fix CLI config
- 17f3d7aa8 Fix docstring typo
- b7da571624 Fix imports
- 7ec3954bef Rename module to full wording

- **ISSUE #48557:** (whytwolf) file.line in python3 on windows 2012 r2 is adding extra CR line endings. (refs: #49026)

- **PR #49026:** (dwoz) Fix file.line line endings @ 2018-08-13 13:05:43 UTC
  - 338ecb70ef Merge pull request #49026 from dwoz/issue_48557
  - a4d22fda2f Merge remote-tracking branch 'origin/issue_48557' into issue_48557
    - 702e76cf9 Merge branch '2018.3' into issue_48557
  - 6cf93e8fc4 Skip newline in binary mode
  - 2cf80c1595 Fix linter errors
  - baf291b4c8 Fix file.line line endings

- **PR #49038:** (gtmanfred) disable enable_ssh_minions to see if it is slowing down 2018.3 tests @ 2018-08-10 18:07:59 UTC
  - 602fed7806 Merge pull request #49038 from gtmanfred/slowtest
  - 6bc44e91c4 remove localhost from tests
  - 7b168a5aac disable enable_ssh_minions to see if it is slowing down 2018.3 tests

- **ISSUE #48996:** (jils2013) file.get_diff not work on version:2018.3.2 (refs: #49033)

- **PR #49033:** (terminalmage) Fix file.get_diff for remote files @ 2018-08-09 21:06:53 UTC
  - 4eef7b5f028 Merge pull request #49033 from terminalmage/issue48996
  - 163aea1c8 Lint
  - d6e5038022 Fix file.get_diff for remote files

- **ISSUE #48856:** (travispaul) Salt fails to start on NetBSD 8 (refs: #49026)

- **PR #48926:** (travispaul) Handle ifconfig output differently for NetBSD >= 8.0 @ 2018-08-09 20:07:44 UTC
  - b24e96a292 Merge pull request #48926 from travispaul/fix-netbsd-8-new-ifconfig
  - d59b6d8269 Add unit test for NetBSD 8 ifconfig changes
  - 80f8a667d1 Handle ifconfig output differently for NetBSD >= 8.0

- **PR #48803:** (dmurphy18) Support for execution modules and states mount on AIX @ 2018-08-09 17:51:55 UTC
  - 7d69ed0a5 Merge pull request #48803 from dmurphy18/aix_filesystems
  - 92818f816b Fixes for testing
  - 77dd7a1743 Adjust unit tests
  - eaed033cde Updated for review comments and adjusted locking when writing files
  - 5bf9e6085b Update due to review comments
  - 9fb5641dc7 Mount unit tests for modules and states for AIX
  - b28f427432 Save off work after laptop issue
  - e5c2741fe7 module and states mount support for AIX
- b701e16ad0 Further updates to support for mount on AIX
- 210076276f Initial support for handling /etc/filesystems on AIX

- **ISSUE #48496**: (icy) Salt-key unable to delete the certificate Test=True (refs: #48929)
- **PR #48929**: (terminalmage) 2 salt-key fixes @ 2018-08-09 17:50:07 UTC
  - 2a38905a8a Merge pull request #48929 from terminalmage/issue48496
  - 7ac10f9eac 2 salt-key fixes
- **ISSUE #47481**: (whytewolf) Oxygen: task.add_trigger with start_date stating strptime needs a string not int. (refs: #49022)
- **PR #49022**: (dwoz) Document time format idiosyncrasies @ 2018-08-09 17:47:12 UTC
  - bb9d23bfa1 Merge pull request #49022 from dwoz/47481_docs
  - 313a3d93d6 Document time format idiosyncrasies
- **PR #48932**: (twangboy) Fix pkg.install when pkg already installed @ 2018-08-09 17:45:51 UTC
  - 9b6a9ff4f1 Merge pull request #48932 from twangboy/fix_win_repo
  - 075ea929d29 remove .lower(), fix debug messages
  - d7c2f476ac Remove current: version for latest as well
  - 522ac26459 Fix typo in code comment
  - 47b2898a85 return empty dict on no changes
  - 6532706d2f Make the tests run on Linux
  - cfe55a391a Add tests for pkg.install output
  - 8ec058f498 Clarify code comment
  - 8af2cfd54a Fix issues where current is not returned
- **PR #49011**: (rallytime) [2018.3] Merge forward from 2017.7 to 2018.3 @ 2018-08-09 17:34:18 UTC
  - d7b7a92ef6 Merge pull request #49011 from rallytime/merge-2018.3
  - 0267096d0 Apply fix to ssh init file that was there before merge
  - 7e1f7915e4 Revert "Allow for not being prompted to supply a password to deploy keys to a minion with salt-ssh"
  - 00416d54d1 Revert "add key-deploy test"
  - c26fa0d6c4 Mark orchestration test as expensive
  - fce6d8d6f Update old utils paths to use new paths
  - 3e6445a9d6 Merge branch '2017.7' into '2018.3'
    * b49ee5a6e9 Merge pull request #49003 from rallytime/boto-test-2017.7
      - 1a23bb233f Update expected return value in boto test
    * 51eed1fd6f Merge pull request #48988 from rallytime/merge-2017.7
      - df8699e2e7 Merge branch '2017.7.8' into '2017.7'
      - a1e54634dc Merge pull request #48976 from rallytime/tornado
      - 0bd838ab6c Skip unreliable tornado tests
      - 22713be9c1 Merge pull request #48979 from rallytime/bp-48959
· 03aa0e49b0 Merge pull request #48970 from Ch3LL/back_48962
· 3ce1b8a3c9 Update the elif block to only be true for versions below Debian 9.
· e6cea5e3c7 Merge pull request #48968 from rallytime/man-pages
· 64fe3be41a Update man pages for 2017.7.8 release
· 10fd4661ff Merge pull request #48978 from gtmanfred/2017.7
· 6108363f82 clean up gemfile
· 5b2423e527 Merge pull request #48959 from rallytime/flaky-tests
  · aa986d728 Mark one grains test as flaky & convert to pytest notation
  · e7e5abcf48 Mark 2 matcher tests as flaky
· 79994ebac4 Merge pull request #48962 from garethgreen-away/1022_test_service_disable_debian_part_deux
  · 9e71551b36 Update the elif block to only be true for versions below Debian 9.
· 1a1bda00cb Merge pull request #48960 from dwoz/block_replace_tests
  · 94ac2b4fc7 Multiple block replace test fixes
· 93b862f350 Merge pull request #48957 from whytewolf/beacons_log_doc_change
  · a77fd16869 Update salt.beacons.log to reflect that re module is used for matching.
· 0245c6b607 Merge pull request #48955 from terminalmage/service-systemd
  · 23f87bd536 Don't load service.py if minion is running a non-sysvinit init system
· 848d583438 Merge pull request #48950 from KaiSforza/kitchenfix-2017.7
  · 5242cb143a Added a quote to kitchen Jenkinsfiles
· 928d688d65 Merge pull request #48943 from rallytime/flaky-tests
  · 668da57ab9 Mark some shell and runner integration tests as flaky
· cd42510d3a Merge pull request #48940 from rallytime/bp-48852
  · fa4ef92e79 Record all the artifacts from the build
· 43649a68be Merge pull request #48935 from garethgreen-away/1045_test_pkg_015_installed_held_centos
  · 0bb1010b6 Merge branch '2017.7' into 1045_test_pkg_015_installed_held_centos
  · 24d56eaa2ff Fixing the test_pkg_015_installed_held test to be able to successfully run on CentOS
· 2421e2a570 Merge pull request #47100 from gtmanfred/ssh
  · 5b443af7ae add key-deploy test
  · a131c9beeb Allow for not being prompted to supply a password to deploy keys to a minion with salt-ssh
· d541bd446 Merge pull request #48891 from damon-atkins/2017.7_win_pkg.list_pkgs_not_found
  · a4af1dbb1 Fix win_pkg issues introduced Jan 2018. If DisplayVersion does not exist it should return version as "Not Found"
· 5f6a5f65dc Merge pull request #48896 from rallytime/bp-48730
  · 57aa204c9d Merge branch '2017.7' into bp-48730
4658 Chapter 30. Release Notes
• **PR #49004:** (rallytime) Port #48999 to 2018.3 @ 2018-08-08 15:32:46 UTC
  - **PR #48999:** (rallytime) Update expected return value in boto test (refs: #49004, #49003)
  - b87bf905c2 Merge pull request #49004 from rallytime/boto-test-2018.3
  - 96b9a1073 Update expected return value in boto test

• **PR #48987:** (twangboy) Fix issue with win_iis.create_cert_binding @ 2018-08-08 13:29:06 UTC
  - 630f61e625 Merge pull request #48987 from twangboy/fix_48786
  - 86d0836f90 Fix issue with iterating over None

• **ISSUE #48777:** (jonasgit) file.recurse fails on file contents encoding not utf-8 (refs: #48934)

• **PR #48934:** (terminalmage) Properly handle latin-1 encoding in file diffs @ 2018-08-07 21:02:24 UTC
  - ab1a719bc3 Merge pull request #48934 from terminalmage/issue48777
  - 52c644ed51 Fix to_unicode test
  - e2d19f40b6 Only try latin-1 from get_diff instead of by default
  - d39fa889f3 Add stringutils.get_diff to mocks
  - 5b191c9120 Fix incorrect use of __salt__ when __utils__ is needed
  - 53ba10ad5f Skip pylint false-positives
  - f14f4daee2 Add unit test for latin-1 fallback, multi-encoding
  - 90664a80f PY3 scoping fix
  - 726dd4331f Add integration test for latin-1 file diffs
  - 2dd1f31d23 Use BASE_FILES instead of redundant STATE_DIR
  - 612ff5fe8 Use new get_diff helper in file module
  - c632265802 Make to_unicode/to_str/to_bytes helpers attempt latin-1
  - 2ac0b49b01 Add get_diff to salt.utils.stringutils

• **ISSUE #47766:** (zerthimon) salt-cloud: openstack driver: crash on instance creation (refs: #48956)

• **PR #48956:** (gtmanfred) if booted from volume, use string from image @ 2018-08-07 16:39:45 UTC
  - bad995462c Merge pull request #48956 from gtmanfred/openstack
  - 4cb1636c4b if booted from volume, use string from image

• **ISSUE #48306:** (davidscholberg) Documentation update for custom returners used for master job cache (refs: #48319)

• **PR #48319:** (gtmanfred) don't break older returners right now @ 2018-08-06 13:19:43 UTC
  - 71f587edd7 Merge pull request #48319 from gtmanfred/jid
  - 084e7f0ef4 Merge branch '2018.3' into jid
  - 60661b4cd0 document minions required on save_load
  - a8c243071d document passing in minions
  - d493810b6 don't break save_load backwards compat
  - cfcacf953a don't break older returners right now

• **PR #48941:** (rallytime) Back-port #48912 to 2018.3 @ 2018-08-06 13:09:38 UTC
- **PR #48912**: (maxim-sermin) make jboss7.py compatible with 2018.3.0 and later (refs: #48941)
- 1623e53ef4 Merge pull request #48941 from rallytime/bp-48912
- 3f5b2f89e make jboss7.py compatible with 2018.3.0 and later

- **PR #48897**: (rallytime) Back-port #48863 to 2018.3 @ 2018-08-05 19:15:51 UTC
  - **PR #48863**: (admd) Decode file contents for python2 as well (refs: #48897)
  - 070af9d925 Merge pull request #48897 from rallytime/bp-48863
  - 0ee1940232 Merge branch '2018.3' into bp-48863
  - f40b966d99 decode file contents for python2 as well

- **PR #48928**: (Ch3LL) fix test_runas integration test for macosx @ 2018-08-05 14:24:13 UTC
  - abd7f1312d Merge pull request #48928 from Ch3LL/mac_runas
  - 3d6455dbcd remove unecessary comment in setup
  - 8e30db0217 move destructivetest to testname
  - 708dec8740 add destructivetest to setup and teardown for runas test
  - c0730ff968 fix test_runas integration test for macosx

- **PR #48899**: (Ch3LL) remove base_top_file file in teardown and add sleep @ 2018-08-05 14:23:42 UTC
  - dbd300ff70 Merge pull request #48899 from Ch3LL/unit_state
  - 0272cadff8 remove base_top_file file in teardown and add sleep

- **PR #48898**: (Ch3LL) [2018.3] Merge forward from 2017.7 to 2018.3 @ 2018-08-05 14:23:19 UTC
  - ffa1fc682 Merge pull request #48898 from rallytime/merge-2018.3
  - 1f093ce5fa Merge branch '2018.3' into merge-2018.3
  - b3a5aa49d7 Merge branch '2017.7' into '2018.3'
    - e79cc635b1 Merge pull request #48876 from Vaelatern/make-network-learning-optional
      - 4a905b0e5d Make IP_LEARNING optional
    - f8bfab4f9f Merge pull request #48890 from Ch3LL/cmd_test
      - acda4ed9ab add sleep in test_cmd integration test
    - 52722f6ded Merge pull request #48885 from rallytime/flaky-tests-shadow
      - da871a2d57 Mark shadow module integration test as flaky
    - bf089565ee Merge pull request #48884 from rallytime/flaky-tests-matchers
      - 3e9deae537 Merge branch '2017.7' into flaky-tests-matchers
    - a567666938 Merge pull request #48868 from terminalmage/fix-loader-race
      - 5f1169b9a2 Fix race when SIGTERM/SIGINT received while lazyloading a module
    - 0ca0b6f2f2 Merge pull request #48883 from terminalmage/salt-jenkins-1023
      - c61f75cb50 Fix failing git worktree tests
    - 3660dff13c Separate compound matcher tests into individual tests
    - a84f5155a1 Merge pull request #48869 from Ch3LL/mac_shell_tests
- 3734b1ec89 Catch socket.error exception in testprogram
  - 7f56b8bf44 Merge pull request #48867 from rallytime/skip-tornado-test
    - 7320aa9104 Skip unreliable tornado test.
- PR #48893: (Ch3LL) handle when ca_certs is None in utils.http @ 2018-08-03 20:30:48 UTC
  - 848e26ed0b Merge pull request #48893 from Ch3LL/http_tests
  - 16d251f7ff Merge branch '2018.3' into http_tests
  - 5674dddb2a handle when ca_certs is None in utils.http
- PR #48903: (Vaelatern) Wrap ElementTree.tostring to make strs, not bytes @ 2018-08-03 19:12:34 UTC
  - PR #48877: (Vaelatern) Wrap ElementTree.tostring to make strs, not bytes (refs: #48903)
  - 1ad45601a7 Merge pull request #48903 from Vaelatern/improve-salt-cloud-python3-virt
  - c45447fe0b Wrap ElementTree.tostring to make strs, not bytes
- PR #48900: (Ch3LL) skip getpwnam check on mac in unit test_cmdmod @ 2018-08-03 16:38:51 UTC
  - d23471262d Merge pull request #48900 from Ch3LL/cmd_unit
  - b82dd708be skip getpwnam check on mac in unit test_cmdmod
- PR #48921: (rallytime) Back-port #48904 to 2018.3 @ 2018-08-03 15:17:15 UTC
  - PR #48904: (KaiSforza) No rehashing in parallel (refs: #48921, #48920)
  - d622a49b58 Merge pull request #48921 from rallytime/bp-48904
  - b50425f61 No rehashing in parallel
- PR #48877: (Vaelatern) Wrap ElementTree.tostring to make strs, not bytes (refs: #48903) @ 2018-08-02 19:28:56 UTC
  - 1e150923aa Merge pull request #48877 from Vaelatern/improve-salt-cloud-libvirt-python3-libvirt
  - fb785315c Wrap ElementTree.tostring to make strs, not bytes
- PR #48824: (rallytime) Bump deprecation in win_servermanager state to Neon @ 2018-08-02 18:01:34 UTC
  - 1b7a9431b Merge pull request #48824 from rallytime/win_servermanager_deprecations
  - 6ef541258 Bump deprecation in win_servermanager state to Neon
- ISSUE #37512: (ChristianBeer) What’s the precedence if multiple master configurations are specified? (refs: #48888)
- PR #48888: (terminalmage) Explicitly document the configuration override priority @ 2018-08-02 16:57:18 UTC
  - ec8e07e8ce Merge pull request #48888 from terminalmage/issue37512
  - 7dce7cde14 Explicitly document the configuration override priority
- PR #48871: (dwoz) Remove unicode key pairs from environ after test @ 2018-08-01 22:33:41 UTC
  - d4bb3a0963 Merge pull request #48871 from dwoz/test_cleanup
  - f2e15e71f1d Do not re-define tearDown
  - 4f8a191a69 Remove unicode key pairs from environ after test
- PR #48843: (isbm) Prevent u'something' to appear in help info. @ 2018-08-01 20:38:58 UTC
  - bec79e83a3 Merge pull request #48843 from isbm/isbm-log-level-names-fix-2
  - a63686180d Merge branch '2018.3' into isbm-log-level-names-fix-2
- Prevent u'something' to appear in help info.

- **PR #48855**: (rallytime) [2018.3] Merge forward from 2017.7 to 2018.3 @ 2018-08-01 17:44:59 UTC
  - a8376b537a Merge pull request #48855 from rallytime/merge-2018.3
  - 44998c208e Lint: Fix undefined logger variable
  - 92c9317a25 Update old utils paths to use new paths
  - 15bfa7143 Merge branch '2017.7' into '2018.3'
    - 05f2d65de3 Merge pull request #48853 from rallytime/bp-48850
      - 3c33ee554a Skip tests in integration.shell.test_master
    - 8a1285239a Merge pull request #48426 from garethgreen-away/46689_fixing_pkg_held_when_package_is_installed
      - 9b05dd212 Fixing indentation, removing some unnecessary conditionals.
      - 727964ab55 One last cleanup.
      - 11cb86e6eb General cleanup in pkg state, reducing duplicate code. Fixing the requires_salt_modules decorator, sys.doc was returning too much information for the event to handle. This change specifically calls sys.doc with the module name.
      - 16fb6ae635 Make sure pkg.hold and pkg.unhold are available before running the test.
      - 998651102d Fixing a situation when a package is already installed via salt or manually and a state attempts to set that package to be held. Previously the holding/unholding logic was only being run against packages that were being installed. This change moves the holding logic outside and runs it against all desired packages. Adding a new test to test holding logic.
    - c8e69431ff Merge pull request #47734 from OrlandoArcapix/Issue47689-pip-state-performance
      - 662bd1f780 Merge branch '2017.7' into Issue47689-pip-state-performance
      - 66936b4f41 Changed string comparison in pip test to match new confirmation string - ref PR #47734.
      - bb5939d6ef Merge branch '2017.7' into Issue47689-pip-state-performance
      - d6a49ae41c Merge branch '2017.7' into Issue47689-pip-state-performance
      - d4083fc9d1 Merge branch 'Issue47689-pip-state-performance' of github.com:OrlandoArcapix/salt into Issue47689-pip-state-performance
      - 779b5fa785 Merge branch '2017.7' into Issue47689-pip-state-performance
      - f3653349ab Removed whitespaces at end of added comments lines
      - db11f2ff4b Merge branch '2017.7' into Issue47689-pip-state-performance
      - eac0178de2 Ref: #47689 - document additional kwarg passed to pip._check_if_installed function
      - 0d19803106 Merge branch '2017.7' into Issue47689-pip-state-performance
      - d3678bf2f3 #47689 fix lint errors
      - 4fec8f6bce #47698 improve run-speed of pip package state checks by only loading the current package list once when checking multiple packages
    - 83a5b3cc47 Merge pull request #48844 from AVeenstra/fix-python3-incompatibility
      - f238779a62 Merge branch '2017.7' into fix-python3-incompatibility
- 6b1805afc6 Fixed Python 3 incompatibility in methods in nilrt_ip and debian_ip.
- 136ff6735a Merge pull request #48662 from slaws/fix-retention-schedule-48637
  - 3c85f5b3d pylint fix
  - 5539eef39e Excluding relative dirs in state.file.retention_schedule
- 1fc04f281b Merge pull request #48840 from gtmanfred/docs
  - 8d2d268e4a fix links in pkg doc.
- 0a19f845ea Merge pull request #48834 from gtmanfred/slsutil
  - f9441d2bef read output of stringio if it is readable
- 2e00939a6e Merge pull request #48788 from Ch3LL/timezone_windows
  - de95a6a215 add unused import to timezone test file
  - 22e424859e add unused import to import
  - 0840fc3117 disable pylint import error
  - f09d1a2c7e Add timezone windows integration tests and fix get_zone

- **ISSUE** #48659: (dstoliker) file.grep with glob (*) in path produces file not found error (refs: #48830)
- **PR** #48830: (garethgreenaway) [2018.3] Fixes to file.grep @ 2018-07-31 21:30:04 UTC
  - e23ba01cd2 Merge pull request #48830 from garethgreenaway/48659_file_grep_glob_fix
  - 0791b0a03c FileGrepTestCase tests back to 2018.3
  - 2e01c55e7e Fixing a bug that prevents specifying wildcards for filenames.
- **PR** #48814: (isbm) dmidecode race conditions check @ 2018-07-31 20:48:29 UTC
  - 9fda70b3d0 Merge pull request #48814 from isbm/isbm-2018.3-smbios-bugfix
  - 5f1141dc05 Merge branch '2018.3' into isbm-2018.3-smbios-bugfix
  - b00ec5efef Update clean clause
  - b1b2e9c222 Remove multiple returns and combine logic to just one clause
  - fd77f760ee Rephrase explanatory comment
  - 1031e0443 Remove unnecessary code
  - c379b7e4ed Get rid of global variable
- **PR** #48804: (Ch3LL) Use brew path from which cmd in mac_brew module @ 2018-07-31 20:24:33 UTC
  - 3d16a63ff2 Merge pull request #48804 from Ch3LL/mac_brew
  - e818c752b3 Merge branch '2018.3' into mac_brew
  - 41e3d17f29 Use brew path from which cmd in mac_brew module
- **PR** #48836: (dwoz) Fix unicode directory listing on py2 @ 2018-07-31 20:22:53 UTC
  - 950c1014aa Merge pull request #48836 from dwoz/unicode_names_py2
  - 47e158b9f0 Optimize if statement
  - 9b462394b2 Fix unicode directory listing on py2
- **PR** #48847: (terminalmage) Update file.blockreplace docs to reflect changed functionality @ 2018-07-31 18:11:30 UTC
- baf8c5784a Merge pull request #48847 from terminalmage/issue48695
- e2bdf7fb92 Update file.blockreplace docs to reflect changed functionality

**PR #48587**: (twangboy) Fix lgpo issue on Py3 @ 2018-07-31 18:05:58 UTC
- 64af1f4f88 Merge pull request #48587 from twangboy/fix_lgpo
- a42621c817 Write file in normal mode
- bfcbdecf3b Fix lgpo issue on Py3

**PR #48796**: (Ch3LL) Remove fake su used in integration tests @ 2018-07-31 17:08:54 UTC
- 2bacc23481 Merge pull request #48796 from Ch3LL/remove_su
- d3b7f2cb18 Remove fake su used in integration tests

**ISSUE #38310**: (ghost) Unable to checkout external pillar git repo using its git tag (refs: #48689)

**PR #48689**: (linoplt) Fix ext_pillar remote checkout using tag (pygit2) @ 2018-07-31 16:15:58 UTC
- 00d06bda76 Merge pull request #48689 from linoplt/fix_38310_pygit2_checkout_ext_pillar_remote_using_tag
- eb4361cc72 Merge branch '2018.3' into fix_38310_pygit2_checkout_ext_pillar_remote_using_tag
- c20977e3bb Merge branch '2018.3' into fix_38310_pygit2_checkout_ext_pillar_remote_using_tag
- b0157c215b Fix ext_pillar remote checkout using tag (pygit2)

**PR #48838**: (sizgiyaev) Fixed: added additional return code 200 for succeeded vault api request @ 2018-07-31 16:14:22 UTC
- 5e14e36195 Merge pull request #48838 from sizgiyaev/fix-vault-policy-state
- 02d9c6281 Fixed: added additional return code 200 for succeeded api request

**PR #48714**: (dwoz) Always transfer bytes from fileserver roots @ 2018-07-30 22:37:13 UTC
- 69f81214d1 Merge pull request #48714 from dwoz/state_echo_fix
- ce3ed43dab Always use unix line endings
- d5e60090bc Merge pull request #2 from terminalmage/state_echo_fix
  - 52fc1c955d Simplify file contents in roots fileserver test
  - b6f73e8e57 Remove trailing whitespace on what should be a blank line
- 95329acb1e Fileserver transfers bytes
- aa34a80997 Always transfer bytes from fileserver roots

**PR #48822**: (Ch3LL) Fix salt-ssh state.sls_id TypeError key must be a string @ 2018-07-30 20:29:29 UTC
- 16cac4ec2eb Merge pull request #48822 from Ch3LL/ssh_2018_id
- 01f6a15da0 Fix salt-ssh state.sls_id TypeError key must be a string

**ISSUE #47999**: (arthurlogilab) Carbon returner failing when run through scheduler on log.trace (refs: #48757)

**PR #48791**: (rallytime) Back-port #48757 to 2018.3 @ 2018-07-27 21:30:44 UTC
- PR #48757: (kuetzri) Update carbon_return.py (refs: #48791)
- 488f6716d4 Merge pull request #48791 from rallytime/bp-48757
- f440ee9f1f Update carbon_return.py

**PR #48799**: (rallytime) [2018.3] Merge forward from 2017.7 to 2018.3 @ 2018-07-27 21:30:13 UTC
- fae29f4257 Merge pull request #48799 from rallytime/merge-2018.3
- 487458ad4b Update old utils paths to use new utils paths
- 436510796f Merge branch '2017.7' into '2018.3'
  - 8e61f3dce0 Merge pull request #48742 from frogunder/45014
    - f08058b043 Merge branch '45014' of https://github.com/frogunder/salt into 45014
    - 757fde70c6 Merge branch '2017.7' into 45014
    - 33c20c1ec0 fix tests
    - a7a914060d add windows integration tests for states.file
- d74f47b340 Merge pull request #48795 from rallytime/fix-48417
  - 5123b17f8d Update linting docs to contain .testing.pylintrc use
- bbea9936d Merge pull request #48789 from rallytime/bp-48783
  - 682a5bebe Threshold was wrong
  - d4ca03a97 test: except for OError only
  - 4547231909 Only run lint checks against changed files
- 41464db39 Merge pull request #48731 from zer0def/virt-runner-init-args
  - a1fa081da0 Documentation to missing parameters in virt.init runner.
  - 365ebdf539 Fixed enable_vnc runner arg being passed into seed_cmd module arg in virt.init.
- 169afea16a Merge pull request #48749 from Ch3LL/logo_docs
  - 73b1fc29f0 Update Saltstack Logo banner on docs.saltproject.io
- ISSUE #48020: (calvinhp) mine.get not returning data in a state orchestrate sls (refs: #48765)
- PR #48765: (FedericoCeratto) [2018.3] Fix mine.get not returning data @ 2018-07-27 18:01:06 UTC
  - bd7d2a8515 Merge pull request #48765 from FedericoCeratto/fix_mine.get_not_returning_data
  - 7183a60e8 Workaround for #48020
- PR #48747: (rallytime) [2018.3] Merge forward from 2017.7 to 2018.3 @ 2018-07-26 18:14:34 UTC
  - 6978ce5d1d Merge pull request #48747 from rallytime/merge-2018.3
  - 4122da40b5 Merge branch '2017.7' into '2018.3'
    - 781c6a6c3e6 Merge pull request #48743 from rallytime/saltconf-ad-2017.7
      - 6df86d8652 Update DOCBANNER with new SaltConf18 image
    - ce4e22224e Merge pull request #48720 from Ch3LL/mac_file_path
      - 01d25fae19 Fix test_managed_source_hash_indifferent_case on macosx to correct tmp path
    - 4b9f037d43 Merge pull request #48719 from Ch3LL/service_mac_state
      - f44a2fc349 Enable service if disabled before running state service tests
    - b2431eb10 Merge pull request #48715 from rallytime/flaky-tests
      - 7322c4ce67 [2017.7] Mark some tornado tests as flaky
    - 801ea3b348 Merge pull request #48672 from frogunder/45012
      - 0747f2e58a add service enabled test
• ISSUE #48676: (djneades) salt-ssh should not target wrong minion from roster file as a result of reverse-DNS lookups (refs: #48771)

• PR #48771: (gtmanfred) only do reverse dns lookup on ips for salt-ssh @ 2018-07-26 15:41:40 UTC
  - 5ea43817ab Merge pull request #48771 from gtmanfred/2018.3
  - 535fb88e7 only do reverse dns lookup on ips for salt-ssh

• PR #48752: (garethgreenaway) [2018.3] Fix when state file is integers @ 2018-07-25 15:03:02 UTC
  - f2ef2d3ef6 Merge pull request #48752 from garethgreenaway/fix_state_file_all_integers
  - 790801c67e Fixing a case where the state module would fail if the state file being passed was all integers. Added a new tests for this edge case.

• ISSUE #46896: (Poil) Proxy + file.managed => Comment: Failed to cache xxx invalid arguments to setopt (refs: #48754)

• PR #48754: (lomeroe) send proxy/ca_cert parameters as strings (not unicode) to tornado httpclient @ 2018-07-25 14:55:42 UTC
  - 030c921914 Merge pull request #48754 from lomeroe/fix-tornado-proxy
  - d33056704b pass proxy_user, proxy_password, proxy_host, and ca_certs through salt.utils.stringutils.to_str()

• PR #48769: (Ch3LL) Update Saltstack Logo banner on docs.saltproject.io @ 2018-07-25 14:47:19 UTC
  - 1eee4b136b Merge pull request #48769 from Ch3LL/update_doc_2018.3
  - 0cb4ac798 Update Saltstack Logo banner on docs.saltproject.io

• PR #48760: (dwoz) Multiple windows test fixes @ 2018-07-25 11:55:27 UTC
  - 19afa3b023 Merge pull request #48760 from dwoz/test_file_fixes
  - a89019e956 Multiple windows test fixes

• PR #48753: (dwoz) Finally fix prepend for real @ 2018-07-25 00:07:15 UTC
  - e6dace3959 Merge pull request #48753 from dwoz/fix_prepend
  - 0d1e8ab3f8 Merge branch '2018.3' into fix_prepend

• PR #48756: (dwoz) os.uname is not available on py2 windows @ 2018-07-24 23:38:32 UTC
  - 8ae6d9960 Merge pull request #48756 from dwoz/core_grains_fix
  - b7a37ecf11 os.uname is not available on py2 windows

• ISSUE #48536: (whytwolf) diskusage beacon does not recognize tmpfs disks in linux. (refs: #48718)

• PR #48718: (garethgreenaway) [2018.3] beacon diskusage fixes @ 2018-07-24 17:45:26 UTC
  - 062fe7ccc5 Merge pull request #48718 from garethgreenaway/48536_beacon_diskusage_fixes
  - 38a6a68fb3 Fixing test_diskusage_nomatch and test_diskusage_match_regex
  - 6ecca166ff Updating psutil.disk_partitions to pull in all mounts not just the physical ones. Check to see if the mount point from the configuration ends with a $ (regular expression end of line) if not we add one in to ensure that a simple / does not end up matching all mount points. Updating tests accordingly.

• PR #48711: (rallytime) [2018.3] Merge forward from 2017.7 to 2018.3 @ 2018-07-24 17:38:58 UTC
  - e873621009 Merge pull request #48711 from rallytime/merge-2018.3
  - ea5c063237 Update old utils paths to use new paths
- e740db208 Merge branch '2017.7' into '2018.3'
  * 689c231d2b Merge pull request #48691 from Ch3LL/win_repo_pkg_test
      - 4b76d80c5 Remove unnecessary jinja in curl.sls file
      - 2beda2d6b Add windows pkg module integration tests
  * 83e4ba91b Merge pull request #48635 from nbraud/acme
      - 36739e9de modules/acme: explicitly ignore the perms return value
      - 1800a231d8 Fixup some schema expectations
      - 8c718cb417 acme: Make the private key mode configurable
      - 917de6761 modules/acme: Use file.check_perms ret-morphing powers
      - d2241eb2d module/acme: Do not exit early when the certificate already exists
      - 98af0db826 modules/acme: Set the private key filemode to 0640
  * 85991680c8 Merge pull request #48345 from twangboy/fix_48169
      - ead19725b6 Merge branch '2017.7' into fix_48169
      - 653f9bb383 Fix some docs errata
      - 8895e5ff11 Add warn_until Fluorine
      - 707906ac15 Fix unit.state.test_powercfg
      - 32c5014eb6 Fix unit tests
      - 0d956e540 Add some more logging
      - b20453de9f Use minutes to set
      - 7dc7eb11c2 Fix documentation to denote seconds when setting
  * 96447ceb54 Merge pull request #48656 from Ch3LL/windows_ip_mod
      - 90c3f568b1 Add windows ip module integration tests
  * 055f3dc8 Merge pull request #48638 from twangboy/fix_vcredist
      - e30d17099d Use goto instead of if statement
      - e1042fa084 Remove vcredist for Py3
  * 1ebd96d909 Merge pull request #48664 from Ch3LL/srv_disable_mac
      - f1fbfad387 move the disable call up in try block
      - f60d2b1dad4 reverse assertion order for service disable test
      - 3d27c1b3b9 switch try/except to match 2018.3
      - fb953d2369 [2017.7] Fix service.disabled test for macosx
  * 3da3c123f Merge pull request #48625 from Ch3LL/ssh_state
      - f590eb2b02 Update state.py
      - 9790ee3d0d Follow up to PR #48555
  * 33812f1 Merge pull request #48673 from Ch3LL/mac_port
      - 87dd85a220 Use different pub and ret ports for testprogram integration tests
  * 5f6a7c4d89 Merge pull request #48675 from Ch3LL/mac_disable

30.2. Previous Releases
· c78efab828 Fix mac service.disable tests
· 93d2f51d2b Merge pull request #48658 from wyardley/wyardley-npm-json-output-2017
  · 7ff3c9c5ff Improve handling of npm json output (#43138)
· 3e29b0513 Merge pull request #48678 from OrlandoArcaPix/fix-npm-dryrun-test
  · 851a40f6b Fix for issue #48677 - return True when no changes are to be made with npm.bootstrap with test=true
· 07a1f6520f Merge pull request #48580 from rallytime/fix-46884
  · 736b382e91 Don’t error on retcode 0 in libcrypto.OPENSSL_init_crypto call
· 9874429741 Merge pull request #48628 from terminalimage/testinfra
  · 5ace9f01ec Fix NameError in testinfra module
· 0d4c80205f Merge pull request #48651 from gtmanfred/pylint-2017.7
  · b6ee52f859 handle pyzmq for python3.4
· 160ae29cf2 Merge pull request #48647 from gtmanfred/pylint-2017.7
  · ff818c4ca2 disable checks on pylint
· 47b1032efa Merge pull request #48652 from pritambaral/fix/2017.7-importlib-pyc-loading-order
  · add7894dee loader: Fix suffix order when importlib is used
· 9da7b2ec8d Merge pull request #48630 from dubb-b/pipeline-updates
  · 8594a8dd05 Adding PY_COLORS=1 as PY_COLORS = 1 instead
  · 314b0e3599 Adding PY_COLORS=1 for python programs to use ANSI Colors
  · b705e8f7a5 Adding correct spacing to options section
  · 9da7b2ec8d Adding options to Jenkins pipeline builds
· a8ae2af6df Merge pull request #48633 from saltstack/revert-48610-2017.7
  · bab4a76d94 Revert ”only run pylint on files that change”
· 6e32bb7f74 Merge pull request #48614 from rallytime/bp-48562
  · cb654b0f2c Add timeouts to all s3 queries
· 1b6e6388f8 Merge pull request #48588 from garethgreenaway/48415_event_send_multi_master
  · fab25af1a9 Add some quick documentation about why we are setting ret=True following the channel.send.
  · bf78f4b188 If the channel send is sucessful and does not raise an exception, we set ret to True, in case a previous exception from a previous channel send to another master has sent it to False.
  · 8d1551e5f5 When using Salt multi-master, if we encounter a salt master that has not accepted the minion key yet we should not exit right away, rather continue on and try the next salt master available in the list.
· 24ffda49ba Merge pull request #48610 from gtmanfred/2017.7
  · 779d1a3dcb only run pylint on files that change
· 5391dd0a8d Merge pull request #48584 from Ch3LL/mac_user_grp
  · 585ee9db90 Fix grp import for mac in test_user integration test
- 61572b6780 Merge pull request #48555 from Ch3LL/ssh_id
  - f69932f506 fix pylint
  - 70e36764ee Add more tests for salt-ssh state.sls_id
  - dab80ef805c Fix state.sls_id to run on ssh minion and not master
- aa6dcf39e8 Merge pull request #48583 from Ch3LL/mac_flaky_tests
  - 4ba2299a87 import flaky decorator on mac tests
  - 811220b41e Add flaky decorator to mac_system and mac_timezone tests
- 6973152057 Merge pull request #48534 from xetix/fix-zypper-latest_version
  - 9985f0b4c1 Lint: remove extra blank line
  - 5fbead8a36 Merge branch '2017.7' into fix-zypper-latest_version
  - 56ac449271 Merge branch 'fix-zypper-latest_version' of https://github.com/xetix/salt into fix-zypper-latest_version
  - 44e87f5a0f Adding testcase for this fix.
  - b354c6863c Fix behaviour of function latest_version in zypper module when multiple packages are passed to function. Function now properly return dict with empty string as version if latest packages is already installed, and multiple packages are passed to function
  - db35d0c1e1 Adding testcase for this fix.
  - d2513757ed Fix behaviour of function latest_version in zypper module when multiple packages are passed to function. Function now properly return dict with empty string as version if latest packages is already installed, and multiple packages are passed to function
- 10124034cb Merge pull request #48582 from dwoz/test_prepend_fix
  - f37571e0bd Merge branch '2017.7' into test_prepend_fix
- 13f67335f3 Merge pull request #48564 from dwoz/test_prepend_fix
  - 136dd5f54 Finally fix prepend for real
  - 66b25e65bf Fix failing prepend test
- b8ce27729f Merge pull request #48558 from dwoz/test_file_fix
  - c858bf477f Remove which mock to get the test passing
- a15c65202d Merge pull request #48552 from KaiSforza/jenkins-junit-2017
  - 72b1830974 Set up junit in jenkins
- f73108026e Merge pull request #48550 from gtmanfred/2017.7
  - d5c603d9b6 add posargs to tox pylint
- 113b0426f8 Merge pull request #48535 from asnell/asnell-patch-2
  - d328fe43d Update manage_file helptext

- **PR #48744**: (rallytime) [2018.3] Update DOCBANNER with new SaltConf18 image @ 2018-07-24 17:15:40 UTC
  - 6c7f1c549d Merge pull request #48744 from rallytime/saltconf-ad-2018.3
  - dbc1f8b772 Update DOCBANNER with new SaltConf18 image

- **PR #48726**: (dwoz) Skip test when syslog not available @ 2018-07-24 16:12:44 UTC
  - 04ab17a4d6 Merge pull request #48726 from dwoz/syslogtest
• PR #48727: (dwoz) Windows compatible cp test @ 2018-07-24 14:41:34 UTC
  – af837424aa Merge pull request #48727 from dwoz/file_cp_test_fix
  – 6e7824266b Windows compatible cp test

• ISSUE #40004: (te-af-github) svn changes report (refs: #47510)

• ISSUE #21025: (RobertFach) svn.export reports invalid change data (2014.7.x) (refs: #47510)

• PR #48710: (rallytime) Back-port #47510 to 2018.3 @ 2018-07-23 21:11:18 UTC
  – PR #47510: (daa) Fix svn export invalid changes data (refs: #48710)
  – 04125b077d Merge pull request #48710 from rallytime/bp-47510
  – e79f4aa5cc put name under "new" key in changes dictionary to be in line with svn.latest
  – 163f99089c made svn.export changes data dictionary, fixes #21025, #40004
    - 3a941055c1 Use salt.utils.platform.is_windows
    - 33e48f7ad7 Finally fix prepend for real

• PR #48699: (terminalmage) Add missing release notes mention of file.blockreplace changes @ 2018-07-23 13:34:32 UTC
  – e1dd10be70 Merge pull request #48699 from terminalmage/issue48695
  – 7ad832e901 Add missing release notes mention of file.blockreplace changes

• PR #48700: (dwoz) Call sync_modules to fix Windows test case @ 2018-07-22 22:23:48 UTC
  – ab44a05fe4 Merge pull request #48700 from dwoz/ext_mod_test
  – d731e6bf8e Call sync_all to fix Windows test case

• PR #48653: (terminalmage) docker_container.running: Fix regression in test mode @ 2018-07-20 19:15:47 UTC
  – 6a494205f2 Merge pull request #48653 from terminalmage/docker-unboundlocal
  – b0440871a0 Merge branch '2018.3' into docker-unboundlocal
  – 9515dd17ff docker_container.running: Fix regression in test mode

• ISSUE #47059: (OrlandoArcapix) Some states incorrectly return None instead of an empty dict when there are no changes (refs: #48685)

• ISSUE #46985: (OrlandoArcapix) grafana4_user.present and grafana4_org.present states not working in 2018.3.0 (refs: #48685)

• PR #48685: (bbinet) Use empty dict for 'changes' instead of None @ 2018-07-20 17:12:43 UTC
  – PR #48671: (bbinet) Few fixes to the grafana module and states (refs: #48685)
  – 2666f2506 Merge pull request #48685 from bbinet/none-changes
  – 842eb3da24 Use empty dict for 'changes' instead of None

• PR #48670: (bbinet) Add the "traverse" jinja filter @ 2018-07-20 16:36:21 UTC
  – 5a67a085c Merge pull request #48670 from bbinet/traverse
  – 32b6d22cf2 Fix RST syntax issue in doc
  – 37a41226d5 Add the "traverse" jinja filter
• PR #48594: (pritambaral) Backport 48418 @ 2018-07-20 14:57:19 UTC
  – PR #48418: (pritambaral) Fix multi-sls salt.state orchestration in masterless systems (refs: #48594)
  – ff11763fd3 Merge pull request #48594 from pritambaral/bp-48418
  – adcee28b84 Fix multi-sls salt.state orchestration in masterless systems
• ISSUE #48184: (mmulqueen) Invalid DMI prevents salt-minion from running (refs: #48440)
• PR #48440: (mmulqueen) Make core.py tolerant of invalid chars in DMI data @ 2018-07-20 14:48:07 UTC
  – PR #48216: (Ch3LL) Fix UnicodeDecodeError when reading file to determine virtual grain (refs: #48440)
  – 111908f519 Merge pull request #48440 from mmulqueen/patch-1
  – 5bbd5e74cd Make core.py tolerant of invalid chars in DMI data
• PR #48663: (Ch3LL) [2018.3] Fix service.disabled test for macosx @ 2018-07-20 14:32:22 UTC
  – 4e77b242f2 Merge pull request #48663 from Ch3LL/srv_disable_mac_2018
  – bddf75d2 reverse assertion order for service disable test
  – 2bfa7fe89 Fix service.disabled test for macosx
• PR #48304: (Ch3LL) Fix macosx grains when swapusage returns comma @ 2018-07-20 14:30:59 UTC
  – dfe1582475 Merge pull request #48304 from Ch3LL/swap_mac
  – 5d6135e1e2 Fix macosx grains when swapusage returns comma
• PR #48671: (bbinet) Few fixes to the grafana module and states (refs: #48685) @ 2018-07-20 13:58:02 UTC
  – 9d7ebd24e Merge pull request #48671 from bbinet/grafana-fixes
  – 3c5083f550 Add support for dry run (test=True) of grafana states
  – 7e7ae8ace7 influxdb: fix conflicts in function arg names with client_args
  – 73a24b774a Ignore readOnly option when diffing
  – 81f09f8a3f Add missing profile argument to grafana4.get_user_data
• PR #48650: (gtmanfred) [2018.3] handle pyzmq for python3.4 @ 2018-07-18 17:34:37 UTC
  – e828167114 Merge pull request #48650 from gtmanfred/pylint-2018.3
  – 3c1882077e handle pyzmq for python3.4
• PR #48648: (gtmanfred) [2018.3] disable checks on pylint @ 2018-07-18 16:21:37 UTC
  – a6f8ac5af4d Merge pull request #48648 from gtmanfred/pylint-2018.3
  – 7c34e2965e disable checks on pylint
• PR #48634: (dwoz) Sync modules for state tests @ 2018-07-17 20:33:06 UTC
  – 01c9ec59a97 Merge pull request #48634 from dwoz/state-module-test-fix
  – 9d9d2ae392 Sync modules for state tests
• PR #48585: (astorath) replaced meta tag @ 2018-07-16 14:11:02 UTC
  – fb7bfc757c Merge pull request #48585 from astorath/fix-vault-meta
  – 42fd3d5f67 replaced meta tag
• PR #48579: (Ch3LL) Fix python2 syslog returner expecting string bytes not unicode @ 2018-07-13 19:50:16 UTC
  – 4b16537a29 Merge pull request #48579 from Ch3LL/fixed_syslog
Salt Documentation, Release 3003.3

- d8288a0ff6 add unicode type for syslog test for tag
- 17e9382d5 Fix python2 syslog returner expecting string bytes not unicode

**ISSUE #48542: (calvinhp)** Missing state git.cloned is listed in the docs as new for 2018.3.2 (refs: #48547)

**PR #48547: (gtmanfred)** fix git.cloned doc versionadded @ 2018-07-13 18:46:25 UTC
  - 3549ce408d Merge pull request #48547 from gtmanfred/git.cloned
  - b596a945b9 Merge branch '2018.3' into git.cloned
  - e41f42d2a0 fix git.cloned doc versionadded

**ISSUE #48110: (whytewolf)** file.line on windows not treating unix line endings correctly. (refs: #48503)

**PR #48503: (rallytime)** Back-port #46291 to 2018.3 @ 2018-07-13 17:14:47 UTC
  - PR #48380: (twangboy) Detect and preserve line endings (refs: #48503)
  - PR #46291: (10fik) Line mixed line ends (refs: #48503)
  - PR #45498: (10fik) Added support for mixed line ending in file (refs: #46291)
  - ee2574f9f1 Merge pull request #48503 from rallytime/bp-46291
  - 8bc71688ea Remove /sr.* pattern from test
  - 5e2e2a63fa Update file unit tests to handle "writelines" change
  - 5d38a8b33 Update file.line to use writelines instead of joining
  - d0b6e82ecb Add 'name' as the passed in filepath for test_line_insert_ensure_before_first_line test
  - d8920c61f Update test_line_insert_ensure_before_first_line to use new mock_open methodologies
  - 475d075d8e Handle list of lines instead of strings in file.line func
  - b9d3d53b04 Added comments
  - f3517a1852 List comprehension replaced
  - adfa3ed0d Empty match on delete or replace not causing IndexError exception
  - 5169b17fd Comprehensions converting to unicode replaced by salt.utils.data.decode_list
  - d3e679e05 Removed regex compilation
  - f29815b49b Fixed file permissions
  - d2a8e9c7 Make integration green. Added test for mode ensure insert before first line
  - 9b7df671a5 file.line function refactored
  - 3af51be1 /sr.* pattern should raise exception
  - 935a9b9d56 test_line_insert_end fixed
  - 7d6e3ad2e2 Make tests green
  - 75a7e368a6 Setting end of line
  - 489e38100 Added _set_line_eol and _get_eol functions
  - aacb8c0e2 line function refactored to work on list
  - de668166f9 _regex_to_static refactored to work on lists
  - 46fe6fe1 _get_line_indent renamed to _set_line_indent

**ISSUE #48507: (emersonveenstra)** mysql_grants.present escape option incorrectly reports failure (refs: #48561)
• **PR #48561:** (garethgreenaway) [2018.3] fixes to grants in mysql module @ 2018-07-13 14:24:58 UTC
  - 2d923f2943 Merge pull request #48561 from garethgreenaway/48507_mysql_grants_incorrect_failure
  - 14c59da72c Following a successful grant application in the MySQL module, the new grant and the desired grant are mismatched because the new grant from Mysql included hashmarks. This change adds the replace which is included for other items such as database name and username.

• **PR #48529:** (rallytime) [2018.3] Merge forward from 2017.7 to 2018.3 @ 2018-07-12 17:59:35 UTC
  - 5b5a930449 Merge pull request #48529 from rallytime/merge-2018.3
  - f9b8c4b257 Use () when using with_tempfile decorator in tests
  - d3190ca0c0 Update old utils paths to new utils paths
  - 29b05fdd1 Merge branch '2017.7' into '2018.3'
    * 0c0c05c2bc Merge pull request #48527 from saltstack/revert-48525-2017.7
      - 18d06ca193 Revert "add kazoo for testing zookeeper."
    * 05bad3e71c Merge pull request #48526 from twangboy/rollback_certifi-win32
      - 361b3dc2f Rollback python-certifi-win32
    * db066effe4 Merge pull request #48521 from Martin819/2017.7
      - d5d01f665c Fix for GlusterFS 4.0 and above
    * ed0bd2bbec Merge pull request #48525 from gtmanfred/2017.7
      - d7a6bff2b2 add kazoo for testing zookeeper.
    * ad5a959ab9 Merge pull request #48388 from garethgreenaway/48277_2017_7_file_roots_wrong
      - 6f11ada35a7 Fixing a few things in the new test.
      - cf747b14c Fixing lint issue
      - 16d36e79c8 When pillar items are compiled a new render is instantiated but the file_roots is the pillar_roots. This change forces the __opts__['file_roots'] to be set to what is set in actual_file_roots for all renderers once compile_pillar has finished. Adding a test when this situation is run via a orchestration runner.
    * 38df812257 Merge pull request #48512 from gtmanfred/npm
      - 9ba0f6b3a0 pin pm and grunt packages for npm tests
    * 04ba31147f Merge pull request #48513 from rallytime/merge-2017.7
      - a466a4880f Merge branch '2017.7.7' into '2017.7'
      - cf2d21ed22c Merge pull request #48172 from rallytime/2017.7.7-release-notes
      - a0ad794132 Update release notes for 2017.7.7

  · 221559358a add 2018.3 requirements for tox/pytest tests
· ISSUE #48336: (JuanManuelVizcainoAbad) file.directory (refs: #48399, #48398)
• **PR #48508**: (rallytime) [2018.3] Fix 2 bugs found in the file.check_perms function @ 2018-07-11 15:03:32 UTC
  
  - **PR #48399**: (garethgreenaway) [2017.7] fixes to module/file.py (refs: #48508)
  - **PR #48398**: (garethgreenaway) [2018.3] fixes to module/file.py (refs: #48508)
  - 70e5cb8a5 Merge pull request #48508 from rallytime/fix-file-bug
  - 0747eb5476 Move comment string join and test/changes check to bottom of file.check_perms
  - aefa1db21 Fix up bad merge - remove extra section of "mode" changes

• **ISSUE #48277**: (dvenckus) init.sls with included states fails with more than one, 'Template was specified incorrectly: False' (refs: #48388, #48389)

• **ISSUE #46986**: (github-abcde) opts file_roots gets overwritten with pillar_roots in orchestration run (refs: #48388, #48389)

• **PR #48389**: (garethgreenaway) [2018.3] reset file_roots for renderers after compile_pillar @ 2018-07-11 13:13:33 UTC
  
  - 5a0b274bf1 Merge pull request #48389 from garethgreenaway/48277_2018_3_file_roots_wrong
  - 4b492fa633 Removing unused start_time variable from test_orchestration_with_pillar_dot_items test.
  - 30c5855d20 Fixing a few things in the new test.
  - 36b7253418 Fixing lint issue
  - ab6abfad31 When pillar items are compiled a new render is instantiated but the file_roots is the pillar_roots. This change forces the __opts__['file_roots'] to be set to what is set in actual_file_roots for all renderers once compile_pillar has finished. Adding a test when this situation is run via a orchestration runner.

• **ISSUE #48342**: (jeffclay) UnicodeDecodeError when using cache mysql (refs: #48495)

• **PR #48495**: (garethgreenaway) [2018.3] Fix to mysql cache module @ 2018-07-10 12:54:10 UTC
  
  - f9fd1a889a Merge pull request #48495 from garethgreenaway/48342_mysql_cache_unicode
  - 0029f19033 Ensure the query_string is a bytestring, otherwise an attempt will be made to convert the msgpack data to unicode which will result in a UnicodeDecodeError error.

• **PR #48487**: (rallytime) [2018.3] Merge forward from 2017.7 to 2018.3 @ 2018-07-09 18:38:00 UTC
  
  - fc3eeef6b3 Merge pull request #48487 from rallytime/merge-2018.3
  - 54341d1a8d Update old utils paths to use new utils paths
  - 68aabff0cf Merge branch '2017.7' into '2018.3'
  - 22c4d206c4 Merge pull request #48472 from gtmanfred/2017.7
    - c7a3a7d8bd update jenkins tests to use tox for lint
    - 44aad133 use tox to run pylint
  - 27ea8f35ea Merge pull request #48476 from twangboy/fix_dependencies
    - b0087d425c Add license info
    - 935f9b560c Fix dependencies
  - acf42864aa Merge pull request #48399 from garethgreenaway/48336_2017_7_ensure_chmod_setuid_with_chown
    - 8efd33320f Normalize the mode before we compare it.
```
* f894f0ecb8 Setting the mode with setuid or setgid bits in addition to setting the owner and group
  will force the setuid & setgid bits to reset. This change ensures that we set the mode after setting
  the owner & group.

  6166f6b78 Merge pull request #48471 from gtmanfred/2017.7
  * 392ab4e51f Add some configurations to tox

  6234d9b15d Merge pull request #48433 from discogestalt/fix-redis.hmset
  * 65817ac74d Use clean_kwarg method instead
  * f7fa7f57c6 Found another issue with redismod.hmset
  * 5624865f86 Fix issue with redismod.hmset method

  aace0fe2c Merge pull request #48428 from terminalmage/fix-jobs.lookup_jid
  * 6509aa9089 Fix outputter detection in jobs.lookup_jid runner

  a7e52f0de2 Merge pull request #48429 from rallytime/bp-46824
  * 8b4486248d Added ignore_retcodes to mock unit tests
  * f8beab71dd Regression to ignore retcodes on crontab calls

  4576ef20bc Merge pull request #48432 from dwoz/file-prepend-again
  * 349a2b279e Prepend test needs file.touch method

• PR #48481: (terminalmage) Improve the slack engine docs @ 2018-07-09 13:41:15 UTC

- ab05e00d8c Merge pull request #48332 from rallytime/bp-48321
  - d72af6ab4e Jenkins needs the / to get the directory
- 21ed5b97ce Merge pull request #48295 from rallytime/bp-48193
  - 352fe33fd6 Separate set_result() to a new line apart from Future() call
  - c0180ff33d Properly configure syndic in test case
  - d0a98534a9 Properly wait on returns in saltnado
- 9aa4687ab9 Merge pull request #48117 from twangboy/fix_48026
  - dd37f8bc2 Disable services that are set to manual
- caf630487c Merge pull request #48207 from rallytime/bp-48189
  - e9d0e037f5 Use old is_windows util path on 2017.7
  - b9656ec9b3 If pip binary is passed to bin_env, use that pip binary
- 06a927b2aa Merge pull request #48293 from rallytime/bp-47453
  - e96ab6778e dont reset system locale when running rabbitmqctl commands

• ISSUE #45939: (andygabby) user.present with hash_password: True detects change on every state.apply/highstate (refs: #47147)
• **PR #47147**: (eliasp) states.user.present: Make usage of `hash_password` idempotent @ 2018-06-30 13:29:27 UTC
  - 9b364e25cf Merge pull request #47147 from eliasp/2018.3-issue-45939-shadow-hash-salt
  - dd3be1d76e Add warning log message when using MD5 for hashing shadow passwords
  - 5451ab6b7a states.user.present: Make usage of `hash_password` idempotent

• **PR #48297**: (rallytime) [2018.3] Merge forward from 2017.7 to 2018.3 @ 2018-06-30 12:57:35 UTC
  - 89857ea8b9 Merge pull request #48297 from rallytime/merge-2018.3
  - 9498618418 Use `saltenv` opts instead of `environment`
  - 1c8d35f28 Update old utils paths to use new utils paths
  - c7bb8a50b0 Merge branch '2017.7' into '2018.3'
    * 95ef006e00 Merge pull request #48219 from zer0def/lxc-bootstrap-fixes
      - c77058560b Merge branch '2017.7' into lxc-bootstrap-fixes
      - d63cf30f02 Fixes another case of legacy configuration key usage warning getting in the way of changing container's state.
    * 3327181507 Merge pull request #48234 from dwoz/thin_dir
      - 70c603451b Fix py2 thin dir issues
    * 83d7d286c4 Merge pull request #48080 from lusche/2017.7
      - 917dc95fc4 #47984 remove the line completly
      - ba12ee947b Merge branch '2017.7' of https://github.com/saltstack/salt into 2017.7
      - dbf13d5051 Bugfix #47984 messed up cert serial
    * bbcb4dcd46 Merge pull request #48232 from gtmanfred/cloud
      - d108112e1a do not expand kwargs for cloud.action
    * 056fa3f663 Merge pull request #48238 from mirceaunilnic/fixed-sdb-cache
      - 51e5bfa1d SDB cache module: AttributeError: 'Cache' object has no attribute 'set'
    * 731ec0a11a Merge pull request #48037 from terminalmage/fix-custom-types-sync-docs
      - 052ae83c4b Update versionchanged
      - 8b1bd0eda2 Update test to reflect changed argument name
      - 5e75936198 Change 2018.3.2 to 2018.3.3
      - c53ad603fc Rename sync -> sync_mods per review suggestion
      - e4d67c5fd8 Update docs to include references to new "sync" argument
      - cb8e6f9fb8 Remove redundant mocking
      - bc3ad795e9 Add test for sync argument to state.sls
      - f81ccdf1fdd Add sync option to state.apply/state.sls
      - 8289b07e24 Fix documentation on when custom types are synced
    * 0bae927048 Merge pull request #48249 from rallytime/2017.7.7-release-notes-update
      - 36032c8ec7 Update release notes for 2017.7.7
    * 8e06471817 Merge pull request #48242 from asnell/asnell-patch-1
- f66bf60073 Add sample list data via command line pillar

- **PR #48364**: (dubb-b) Changing debug to info for logging @ 2018-06-28 20:48:24 UTC
  - c5746deb5f Merge pull request #48364 from dubb-b/2018.3
  - d826b6628 Changing debug to info for logging

- **PR #48354**: (rallytime) [2018.3] Merge forward from 2018.3.2 to 2018.3 @ 2018-06-28 20:26:31 UTC
  - 0202493b60 Merge pull request #48354 from rallytime/merge-2018.3.2-to-2018.3
  - fface7c74 Merge branch '2018.3.2' into '2018.3'

- **PR #48347**: (dwoz) Fixes fileserver maintenance process on Windows @ 2018-06-28 13:17:42 UTC
  - bbabb76b Merge pull request #48347 from dwoz/sigfix
  - ccedf5029f Remove unneeded attribute
    - e8362ad7f1 fopen does not support encoding
    - 487161ba8f Fix file encoding on windows
    - fc766b5e0e Fix multiple git module tests

- **PR #47975**: (terminalmage) Add a new git.cloned state @ 2018-06-27 20:53:42 UTC
  - 67303d7901 Merge pull request #47975 from terminalmage/issue47937
  - 3a4bb76fa Merge branch '2018.3' into issue47937

- **PR #48323**: (Ch3LL) Update release versions for the 2018.3 branch @ 2018-06-27 13:44:58 UTC
  - 5b8d55428e Merge pull request #48323 from Ch3LL/update_version_doc_2018.3
  - 4548aaca56 Update release versions for the 2018.3 branch

- **PR #48326**: (Ch3LL) Remove In Progress Warning for 2018.3.2 Release @ 2018-06-27 13:43:16 UTC
  - 7cf403e313 Merge pull request #48326 from Ch3LL/rn_remove_in_prog
  - dcce1ad5ed Remove In Progress Warning for 2018.3.2 Release

- **PR #48301**: (terminalmage) Fix typos in new mock_open docs @ 2018-06-25 19:08:14 UTC
  - 60f7ad5126 Merge pull request #48301 from terminalmage/docs
  - 6c333450f5 Fix typos in new mock_open docs

- **PR #48292**: (rallytime) Back-port #48288 to 2018.3 @ 2018-06-25 19:07:11 UTC
  - PR #48288: (rmarchei) fix lsattr.get in file.check_perms (refs: #48292)
  - 4760f87153 Merge pull request #48292 from rallytime/bp-48288
  - d662053bb fix lsattr.get in file.check_perms

- **PR #48296**: (rallytime) Back-port #48258 to 2018.3 @ 2018-06-25 19:04:41 UTC
  - PR #48258: (nullify005) preserve tuples for ldap modification operations (refs: #48296)
  - 27207fc510 Merge pull request #48296 from rallytime/bp-48258
  - 8b7f362f64 preserve tuples for ldap modification operations

- **ISSUE #48204**: (zerthimon) State mysql_user.present Exception with mysql 8.0.11 (refs: #48275, #48228)

- **PR #48275**: (garethgreenaway) [2018.3] Follow up fix to MySQL user for password management @ 2018-06-25 13:23:35 UTC
• **PR #4826**: (terminalmage) Don’t load the grains again when printing them via salt-call -g @ 2018-06-25 13:19:18 UTC
  
  - 1f306525a7 Merge pull request #4826 from terminalmage/caller-print_grains
  - caa62c051f Don’t load the grains again when printing them via salt-call -g

• **PR #48279**: (terminalmage) Add documentation/further enhancements to rewritten mock_open @ 2018-06-25 13:12:30 UTC
  
  - 27a0e95174 Merge pull request #48279 from terminalmage/mock_open-docs
  - 6a635a94c9 Fix spelling error
  - 830af624e8 Ignore IOError when tearing down filehandles not opened for reading
  - 3b635f640b Raise TypeError when trying to read from filehandles not opened for reading
  - 0a9ae0c82b Add more examples and information on strict string types
  - 8c069d105d Add some mock_open docs
  - a13d1fe1a0 Update mock_open usage to reflect read_data type enforcement
  - 374a8ce31f Add more mock_open tests
  - 0f06adb008 Improve code-reuse in mock_open tests
  - 0e8c88ba6c 2 MockFH enhancements:

• **ISSUE #48141**: (zerthimon) salt-api request causes exception (refs: #48236)

• **PR #48236**: (garethgreenaway) [2018.3] Fix to cmd_batch @ 2018-06-25 12:58:49 UTC
  
  - 6ee856631b Merge pull request #48236 from garethgreenaway/48141_salt_api_local_batch
  - aea4f7ae14 Fixing test_local_batch
  - ce3e1ef2c Changing sort.
  - 83a0f3b20 Fixing test_local_batch
  - 85a5e9752 Fixing a typo in the comment.
  - 85cef126e0 Adding note about why salt.utils.versions is being re-imported. Adding a test for local_batch.
  - 808805fd3d Fixing cmd_batch to work correctly when called via salt-api.

• **ISSUE #48204**: (zerthimon) State mysql_user.present Exception with mysql 8.0.11 (refs: #48275, #48228)

• **PR #48228**: (garethgreenaway) [2018.3] Fixes to mysql module @ 2018-06-22 15:44:00 UTC
  
  - 0b9036c26 Merge pull request #48228 from garethgreenaway/48204_mysql_user_password_exception
  - 1b2ffecf1d Updating the mysql module to not use the PASSWORD when MySQL is version 8.0.11 or higher, where the PASSWORD function has been removed.

• **PR #48252**: (rallytime) [2018.3] Merge forward from 2017.7 to 2018.3 @ 2018-06-22 15:13:42 UTC
  
  - 67cb556ef Merge pull request #48252 from rallytime/merge-2018.3
  - 84ec655c24 Merge branch '2017.7' into '2018.3'
• a172f9de84 Merge pull request #48226 from terminalimage/fix-alias-docstring
  - fb237272f5 Don't display "None" in SaltInvocationError when Salt installed using -OO
  - 90c90f5d5c Fix docstring construction in alias_function when Salt installed using -OO
• c6a0207cae Merge pull request #48227 from Ch3LL/fix_win_tests
  - 236773e3e9 Skip new sha256 files on repo.saltstack.com/windows
• 6929423528 Merge pull request #48131 from bowmanjd-lms/fix-apk-python3
  - f5d2835299 Merge branch '2017.7' into fix-apk-python3
  - 022f9c5a50 Fix py3-incompatible dict.keys()[x] call in apk.py
• 868c17377f Merge pull request #48185 from DSRCorporation/bugs/47901_future_done_exception
  - 5f63316311 Merge branch '2017.7' into bugs/47901_future_done_exception
  - 9f2dfb94cb Don't call .exception() on future unless it's done.
• 80a3e37c2e Merge pull request #48192 from twangboy/fix_pip_version_2017.7
  - 59ae2c65f6 Use --disable-pip-version-check for build_env_.ps1
• 12ec2b882a Merge pull request #48201 from zerodef/lxc-bootstrap-fixes
  - 6fd13440d4 Take lxcpath into account when bootstrapping new containers. Version comparison fixes.
• e079f9ce38d Merge pull request #48190 from terminalimage/fix-vfstab-test
  - 8d70d14362 Fix mount.vfstab unit test
• c8b9ce986 Merge pull request #48115 from KaiSforza/pr-lint-2017
  - 494727ab39 Add docs, kitchen tests
  - 317023bb20 Move .jenkins to .ci for future
  - dedc313ceee Make it parallel so we don't fail right away
  - cd13426726 Add a .jenkins file to run pylint
• fc1752b721 Merge pull request #48174 from terminalimage/docker-update-mine
  - 9af09e0127 Mock config.get due to changes in _refresh_mine_cache
  - c5802ad465 Fix the version number in versionadded
  - 4d03ae58d7 Add unit test for docker.update_mine
  - 44f275698a Actually it's more than just add/remove that updates the mine
  - 0cb699b07 Add release notes mention of docker.update_mine config option
  - de05097b20 Add docs for new config option
  - 04c5a9178 Add note in mine.get_docker docstring about new config item
  - 4e456255c0 Allow mine update to be disabled using new config option

• ISSUE #48029: (vinian) syndic failed to auth when restart salt-master on syndic master (refs: #48034)
• PR #48034: (vinian) restart salt-syndic when salt-master restart @ 2018-06-21 20:12:37 UTC
  - 96f9d90c5b Merge pull request #48034 from vinian/restart-salt-syndic-when-salt-master-retart
  - f7652d8c8b restart salt-syndic when salt-master restart

30.2. Previous Releases
Salt Documentation, Release 3003.3

- **PR #48250:** ([rallytime](#)) Update release notes for 2018.3.2 @ 2018-06-21 18:30:21 UTC
  - ab2ba942ad Merge pull request #48250 from rallytime/2018.3.2-release-notes-update
  - 19c104b6cd Update release notes for 2018.3.2

- **PR #48166:** ([terminalmage](#)) Add trace logging and optimize file handling in grains.core.os_data @ 2018-06-21 18:02:33 UTC
  - 51928ff050 Merge pull request #48166 from terminalmage/salt-jenkins-1000
  - b73df0ab00 Change call_args to call.args to reflect changes to MockFH
  - 0c2cc07704 remove unused import
  - b8e0a055c3 Add test for tell()
  - 1ce89feee Implement tell() for filehandle iteration
  - efb8fa49d4 Add tests for read_data being a list, and containing unicode or bytestrings
  - 38df912fa6 Operate on a copy of the read_data
  - 71eeae1240 Update mount module unit tests to reflect changes in mock_open
  - 16c414e120 Update nfs3 module tests to reflect changes in mock_open
  - b7eab25d6c Update grub_legacy module tests to reflect changes in mock_open
  - cc002b8fd7 Update new network unit test to reflect changes in mock_open
  - a8f11594f1 Update new core grains tests to reflect changes in mock_open
  - 84ce18d956 Update crypt unit tests to reflect changes in mock_open
  - 67c036dc2d Add MockCall to tests.support.mock to track calls
  - 2556a1e13d Remove unused import
  - fd9d700157 Add additional docs to MockOpen class
  - 6acb4e83ec Update newly added test to reflect renaming of handles attribute
  - 77e5288d42 Update fibre_channel grains tests to reflect changes in mock_open
  - ed40371a06 Update timezone module tests to reflect changes in mock_open
  - fc0aa9934f Track call_count in MockOpen
  - 2598d2453a Update snapper module tests to reflect changes in mock_open
  - 51b3fa7b4 Add support for passing multiple strings for a given match in read_data
  - 55487c175c Fix mock_open call to use new multifile syntax
  - 7f516ef73a Update puppet module tests to reflect changes in mock_open
  - 33a97c4ecc Update btmp beacon tests to reflect changes in mock_open
  - bc027ca94 Update wtmp beacon tests to reflect changes in mock_open
  - f5823252bb Track call args/kwargs in MockFH
  - 335591ca90 Mock the seek function in MockFH
  - 7eb4b1ae1c Update cp.push test to reflect changes to mock_open
  - 2be19cfa89 Report correct location when reading using explicit size and EOF reached
  - 5ec95ba5ca On second thought, actually implement tell()
- 19022eb9e5 Add tell mock to MockFH
- 4b5a393445 Update junos tests to reflect changes to mock_open
- 278a222b09 Update dnsutil tests to reflect changes to mock_open
- 4e67955572 Replace the rest of mock_open with a class
- 75307a47c5 Update linux_sysctl tests to reflect changes to mock_open
- 05c68fd5d9 Use explicit config file and fix remaining mac_sysctl tests
- 836fde9a30 Allow Python 2 to accept an exception as read_data
- 543385fd02 Add writelines_calls property
- 42fa84256 Make read func mocks so their calls can be tracked
- 675f03c5f8 Update mac_sysctl tests to reflect new mock_open behavior
- 3d2c41d395 Update file module tests to reflect new mock_open behavior
- b9200dbc3e add a dict containing the handles to the mock_open return object
- 852ba4b982 Add mocked close() function to MockFH
- f6b46bc608 Remove unused import
- 20f60a769b Add blank lines to appease linter
- 48d7cfa63 Add multifile tests for mock_open
- 1861e9b944 mock_open: rewrite multi-file support
- 5e6b539770 Use function for empty string
- cb2620ad2b Update core grains tests to reflect EAFP changes
- 5d09b178d7 Separate mocked file contents per filename, not glob
- 875102f538 Modify mock_open to support multiple file paths
- 096ace74df Move lsb_release parsing into its own function
- 6a0828beed Add unit tests for mock_open
- 8ba6cadac7 More mock_open bugfixes
- 329dea218e Add a bunch of logging for linux os_data core grains
- 2c64b270df Add timestamp to the minion's log_fmt_console

- **PR #48216**: (Ch3LL) Fix UnicodeDecodeError when reading file to determine virtual grain (refs: #48440) @ 2018-06-20 16:53:41 UTC
  - 6072d1ef9c Merge pull request #48216 from Ch3LL/grains_unicode
  - c4334f3f14 Fix UnicodeDecodeError when reading file to determine virtual grain

- **PR #48212**: (Ch3LL) Fix python3 ec2 salt-cloud TypeError when installing salt (refs: #49041) @ 2018-06-20 16:00:21 UTC
  - 77a7e5bdbcf Merge pull request #48212 from Ch3LL/py3_ec2
  - b0d75f459b Fix python3 ec2 salt-cloud TypeError when installing salt

- **ISSUE #47984**: (jeduardo) x509 module/state writing wrong certificate serial number to CRL (refs: #47986, #48080)

- **PR #48209**: (rallytime) Back-port #47986 to 2018.3 @ 2018-06-20 13:44:17 UTC
- PR #48080: (lusche) Bugfix #47984 messed up cert serial (refs: #48209)
- PR #47986: (jeduardo) Fix serial number writing into CRL files with the x509 module (refs: #48209)
- de614d31f5 Merge pull request #48209 from rallytime/bp-47986
- f4b3bd5d2c Changed salt.utils.fopen to salt.utils.files.fopen
- 8686872909 Fixed typos, removed repeated unit tests, and applied code fixes suggested by linter.
- 382df48a72 Removed useless new line
- 5aa99d14c4 Added unit tests for CRL creation and certificate revocation with CRL
- cc12844922 Fixed a problem where the OpenSSL bindings refuse to consume unicode strings.
- 399cf08860 Stopped converting the certificate hexadecimal serial number to an integer in order to avoid breaking CRLs.
- • PR #48210: (rallytime) [2018.3] Merge forward from 2018.3.1 to 2018.3 @ 2018-06-20 13:43:19 UTC
  - 1f88df6e89 Merge pull request #48210 from rallytime/merge-2018.3
  - dae65da256 Merge branch '2018.3.1' into '2018.3'
- • PR #48186: (rallytime) Add autodoc module for saltcheck.py @ 2018-06-19 19:03:55 UTC
  - 5b4897f050 Merge pull request #48186 from rallytime/saltcheck-docs
  - 314fc2d899 Clean up some doc references
  - da7603d879 Add autodoc module for saltcheck.py
- • PR #48191: (twangboy) Use the --disable-pip-version-check option @ 2018-06-19 18:13:44 UTC
  - 7274a33c80 Merge pull request #48191 from twangboy/fix_pip_check
  - 5c00fecebf Use the --disable-pip-version-check option
- • ISSUE #48122: (pasmon) Salt minion 2017.7.6 disregards "bin_env" in pip state (refs: #48189)
- • PR #48189: (gtmanfred) If pip binary is passed to bin_env, use that pip binary (refs: #48207) @ 2018-06-19 18:08:13 UTC
  - 96f79b0674 Merge pull request #48189 from gtmanfred/pip
  - 96c59f3d93 If pip binary is passed to bin_env, use that pip binary
- • PR #48165: (terminalmage) Fix regression with top_file_merging_strategy=same @ 2018-06-19 18:03:07 UTC
  - 71e385501b Merge pull request #48165 from terminalmage/issue48144
  - 92ac2a2d6a Remove unused imports
  - 15a44d5dd4 Remove redundant top file merging tests
  - 12100d9bd3 Add more top file merging tests
  - 0ed686cb3f Add unit test for show_top with "same" merging strategy
  - 35e5492fb7 Revert 7058f10 / 3df6fa7
- • ISSUE #46806: (ezh) Lack of debug messages on authentication fail. (refs: #46807, #48179)
- • PR #48179: (ezh) 2018.3 auth @ 2018-06-19 14:16:40 UTC
  - PR #46807: (ezh) Reduce initial authentication setup complexity (refs: #48179)
  - 2a8e1c6539 Merge pull request #48179 from ezh/2018.3-auth
  - 9ed2d2ec55 Fix integration.shell.test_key and integration.shell.test_runner
- 26a6f79730 Fix integration tests test_list_acc_wrong_eauth, test_salt_run_with_wrong_eauth
- b84c4321c4 Add more verbose debug messages for auth subsystem

**PR #48188: (gtmanfred)** allow virtual aliases to be used for the driver name @ 2018-06-18 21:49:16 UTC
- 023108cf8 Merge pull request #48188 from gtmanfred/2018.3
- 45249d5e10 allow virtual aliases to be used for the driver name

**PR #48116: (KaiSforza)** Add jenkinsfiles to define tests in 2018 @ 2018-06-18 21:27:10 UTC
- 095238da Merge pull request #48116 from KaiSforza/pr-lint-2018
- f158bed5bd Add docs, kitchen tests
- 904a70c187 Move .jenkins to .ci for future
- 365fa0e51f Make it parallel so we don't fail right away
- e59479745 Add a .jenkins file to run pylint

**ISSUE #48146: (rmarchei)** mysql_query.run: exception on 2018.3 (refs: #48164)

**PR #48164: (garethgreenaway)** [2018.3] Fixes to mysql state @ 2018-06-18 13:10:20 UTC
- 60c9490bdc Merge pull request #48164 from garethgreenaway/48146_mysql_output_to_file
- a040643a82 Accounting for certain situations when the query result is not a string, but actually a dictionary.

**ISSUE #48113: (gaetanquentin)** state file.line has error and erase file content completely, while with mode test=true it is ok (refs: #48156)

**PR #48156: (garethgreenaway)** [2018.3] Unicode fixes for file.line @ 2018-06-17 19:34:08 UTC
- 85ebcb3f2 Merge pull request #48156 from garethgreenaway/48113_ensure_writing_strings_with_file_dot_line
- 5a9ef0d1ae Unless we're using py2 and Windows, ensure we're writing out a string when using file.line.

**PR #48161: (rallytime)** [2018.3] Merge forward from 2017.7 to 2018.3 @ 2018-06-17 19:33:29 UTC
- 33400e72db Merge pull request #48161 from rallytime/merge-2018.3
- 0733fa1b02 Update utils path for which function to new path
- 398c78224 Merge branch '2017.7' into '2018.3'
- df2a156338 Merge pull request #48061 from garethgreenaway/port_47049_2017_7
  - 7c472fed51 Fixing failing test_set_hwclock_aix test.
  - ccb0acc958 Porting #47049 to 2017.7.
- 5ec3ef2dd4 Merge pull request #48143 from Ch3LL/fix_long_job
  - 48b5d2e9d3 Add timeout argument to run_salt for ShellCase
- e1e566d1f8 Merge pull request #48135 from rallytime/release-notes-2017.7
  - 7a97f157b3 Add missing v for tag reference
  - 2f2b69ed37 Add "in progress" notation to 2017.7.7 release notes
  - 06a1151a63 Add release notes file for 2017.7.7
  - 885b2862ce Move 2017.7.7 release notes to 2017.7.8
- ac9dabbf8a Merge pull request #48105 from rallytime/merge-2017.7
  - cdb45874de Merge branch '2017.7.6' into '2017.7'
- 16916d6bd2 Merge pull request #47880 from gtmanfred/2017.7.6
- 987ae6358b quote python_version in requirements.txt
- 27670168ea Merge pull request #47875 from rallytime/release-notes-dot-six
- 58dee4c829 Remove sentence about the release being in progress
- b3dcb7330e Remove "in progress" too
- 99e1d7823 Update 2017.7.6 release notes: remove "unreleased" text
- 1f0bada07c Merge pull request #47873 from gtmanfred/2017.7.6
- a1c1b5b5cf allow tornado 5.0 to be installed only for python2
- 2da56a69d9 Merge pull request #48101 from rallytime/update-doc-refs-2017.7
  - 7b6f5fb36 Update 2017.7.7 reference to 2017.7.8
- 5a0e3d46e7 Merge pull request #48091 from terminalmage/fix-file_roots-monkeypatching
  - 6fe711ad76 Reverse monkeypatching after test_symlink_list finishes
- 053b019a8f Merge pull request #48088 from rallytime/update_version_doc_2017.7
  - 1b8d1c936b Remove "in progress" info for 2017.7.6 release notes
  - 9a0f4d190a Update release versions for the 2017.7 branch
- d6d2c5ee18 Merge pull request #48075 from garethgreenaway/48038_jobs_are_not_deduping_minion_side
  - 5c37b3275b Ensure that the shared list of jids is passed when creating the Minion. Fixes an issue when minions are pointed at multiple syndics.
- aa33cc0b0c Merge pull request #48071 from terminalmage/gitfs-docs
  - 24545204b3 Fix inaccurate gitfs_saltenv example in GitFS Walkthrough
- fb4ceacb88 Merge pull request #48053 from rallytime/bp-48040
  - 265b22b194 states/github.py fix for incorrect positional argument
- f37daac6d Merge pull request #48024 from gtmanfred/2017.7
  - 56b074ab27 allow specifying a different state to run on converge
  - cc9c4b4d5a add pytest coverage and xml junits

- **ISSUE** #48145: (max-arnold) Failed to load ext_pillar saltclass: can only assign an iterable (refs: #48155)
- **PR** #48155: (max-arnold) Do not fail on empty saltclass classes (fix for #48145) @ 2018-06-15 20:21:28 UTC
  - 9aa9a83b10 Merge pull request #48155 from max-arnold/2018.3
  - 63ab02c648 Do not fail on empty saltclass classes declaration #48145
  - 3d4fceb3aa Add test for issue #48145
- **PR** #48104: (twangboy) Fix unit.modules.test_win_status @ 2018-06-15 17:05:34 UTC
  - 152c09c0ce Merge pull request #48104 from twangboy/fix_test_win_status
  - 1ec3f436ee Fix test_error_logged_if_process_get_owner_fails
- **PR** #48147: (brejoc) Fix for sorting of multi-version packages @ 2018-06-15 17:03:18 UTC
  - 8cf03110d4 Merge pull request #48147 from brejoc/2018.3-multi-version-fix
  - 90ed25447d Swtiching to salt.utils.versions like linter suggested
- ed09574073 Fix for sorting of multi-version packages (bsc#1097174 and bsc#1097413)
- **PR #47956**: (dmurphy18) Improved support for mount on AIX @ 2018-06-15 13:40:01 UTC
  - 2edc5f5442 Merge pull request #47956 from dmurphy18/aix_mount_support
  - f2a3e321db Improved support for mount on AIX
- **ISSUE #48012**: (Timandes) Found UnicodeDecodeError when trying to start Salt Master (refs: #48081)
- **PR #48081**: (terminalmage) Fix UnicodeDecodeError when parsing hosts file with non-ascii @ 2018-06-15 12:41:13 UTC
  - c05e176782 Merge pull request #48081 from terminalmage/issue48012
  - 8d2fb0bf25 Fix cp.push test
  - e230a7223f Fix definition of test data for wtmp/btmp beacon tests
  - 82874a8c10 Import six like we do everywhere else
  - 54f9a2ab54 Remove unused import
  - 767cc7e87f fix tabs
  - db19636f56 Get rid of additional newline append
  - 7427e192ba Fix more crappy mocking
  - 4eaa5789ce Fix crappy mocking
  - 248467edac Add regression test for _generate_minion_id()
  - 5e62d6d45f Fix UnicodeDecodeError when parsing hosts file with non-ascii
  - e6a4744f85 Use errno instead of hard-coding error 2
  - ff63f36932 Fixes / enhancements for mock_open
- **PR #48133**: (rallytime) Updates the 2018.3.2 and 2018.3.3 release notes files @ 2018-06-14 21:21:15 UTC
  - **PR #48129**: (rallytime) Add release notes for 2018.3.2 (refs: #48133)
  - 5d92e2763a Merge pull request #48133 from rallytime/release-notes-2018.3
  - afe1e91972 Add "in progress" notation to 2018.3.2 release notes
  - 3e4272ac09 Add release notes for 2018.3.2
  - 88c584cb0d Move 2018.3.2 release notes to 2018.3.3
- **PR #48103**: (terminalmage) Fix for gitfs base env being pinned to commit ID @ 2018-06-14 16:29:24 UTC
  - 0e3f846836 Merge pull request #48103 from terminalmage/gitfs-base-pinned-to-commit
  - 31ab2fe8de Fix for gitfs base env being pinned to commit ID
- **PR #48077**: (twangboy) Fix issue with salt.utils.parsers on Windows @ 2018-06-14 16:22:57 UTC
  - 4b6f1c7f75 Merge pull request #48077 from twangboy/fixed_parsers
  - 0f7d7691a2 Call logger in each case
  - 0e99dd741c Fix logic for non-root
  - 2d2534a688 Fix parsers for Windows, fix tests
- **PR #48096**: (twangboy) Fix unit.utils.test_which on Windows @ 2018-06-14 13:15:14 UTC
  - 80332b32a7 Merge pull request #48096 from twangboy/fixed_test_which
- Use os.sep for paths

- **PR #48102** (rallytime) [2018.3] Update 2018.3.2 references to 2018.3.3 @ 2018-06-14 13:14:26 UTC
  - 66b2200913 Merge pull request #48102 from rallytime/update-doc-refs-2018.3
  - 1cfbce3d8 Update 2018.3.2 references to 2018.3

- **PR #48109** (rallytime) Back-port #47851 to 2018.3 @ 2018-06-14 13:09:04 UTC
  - **PR #47851** (rares-pop) Fixup! add master.py:FileserverUpdate **kwargs (refs: #48109)
  - 2902ee6b14 Merge pull request #48109 from rallytime/bp-47851
  - e9dc30f8e Fixup! add master.py:FileserverUpdate **kwargs

- **ISSUE #47925** (JonGriggs) GitFS looking for files in the master branch only (refs: #47943)

- **PR #47943** (terminalmage) Make sure we set the effective environment when lock_saltenv is True @ 2018-06-13 20:02:00 UTC
  - 2529292568 Merge pull request #47943 from terminalmage/issue47925
  - 534e1a7100 Merge branch '2018.3' into issue47925

- **PR #48089** (rallytime) Update release versions for the 2018.3 branch @ 2018-06-13 14:03:44 UTC
  - 9e1d0904e Merge pull request #48089 from rallytime/update_version_doc_2018.3
  - fa26a0991e Remove "in progress" info for 2018.3.1 release notes
  - a3b3b0a1e1 Remove "in progress" info for 2017.7.6 release notes
  - 9b0e1b9125 Update release versions for the 2018.3 branch

- **PR #48054** (rallytime) [2018.3] Merge forward from 2017.7 to 2018.3 @ 2018-06-13 12:58:46 UTC
  - b10b7355a0 Merge pull request #48054 from rallytime/merge-2018.3
  - 508d70fabe Update old utils paths to use new paths
  - 3d2e16c3a Merge branch '2017.7' into '2018.3'
    - ffee3576ec Merge pull request #48044 from twangboy/wua_add_fail_code
      - d41d0c25eb Add fail code for WinHTTP send/receive error
    - 871a910fcb Merge pull request #48009 from dwoz/winswarmfix
      - 502c7bb84 minionswarm runs on windows
    - 0dcaead36d Merge pull request #47968 from gtmanfred/2017.7
      - ae1be0d28bb pass LANG and HOME into tox commands
      - 8d15b93d00 remove tox virtualenvs from doc tests
      - e1872e2036 simplify tox.ini
      - 81bd0f5af add tests.txt for running tests with tox requirements
      - 556a2067fc fix masterapi test to use testing directory for configs
      - 5a4f484ef add EXPENSIVE_TESTS
      - 055cd5a6ba set DESTRUCTIVE_TESTS environment variable for pytest
    - 42db683eb Merge pull request #47978 from twangboy fix_test_pkg
      - 8bb36b3a4b Add try/finally, fix typo in 7zip def file
* a67b21ef3d Merge pull request #47959 from twangboy/fix_test_service
  - 0cd47a81e Remove unused import
  - d4b42540e3 Fix failing test when service doesn’t exist
* b81d482067 Merge pull request #47983 from garethgreenaway/backport_47843_2017_7
  - 7b77fb15d5 Adding missing test sls file.
  - 54e51bc627 Backporting #47843 to 2017.7, updating test for 2017.7.
* d56ddad22c Merge pull request #47533 from twangboy/fix_47178
  - 24717cb21 Change version added to 2017.7.7
  - 0592f1bac2 Fix issues with functions that user makedirs on Windows
* 5c56b8c755 Merge pull request #47827 from twangboy/fix_47791
  - fbbd91f09e Add more descriptive debug message
  - 365f81651b Fix deprecated exception handling
  - 8dd7610b93 Use local instead of network
  - 980d99d74b Fix issue when archive is on mapped drive

• PR #48060: (gtmanfred) mark test as expensive @ 2018-06-13 12:58:21 UTC
  - c83818ef49 Merge pull request #48060 from gtmanfred/2018.3
  - 914935c4d4 Merge branch '2018.3' into 2018.3
• PR #48057: (terminalmage) Fix link without target in 2018.3.0 release notes @ 2018-06-11 18:50:17 UTC
  - a4eb41e23d Merge pull request #48057 from terminalmage/docs-2018.3
  - 20f71ff6f6 Fix link without target in 2018.3.0 release notes
  - d8c035e5e5 mark test as expensive
• PR #48042: (terminalmage) Switch to trace level logging for further test failure troubleshooting @ 2018-06-11 14:03:48 UTC
  - 0f9a3122df Merge pull request #48042 from terminalmage/salt-jenkins-1000
  - b33a0b5ea Switch to trace level logging for further test failure troubleshooting
• PR #48041: (terminalmage) salt.utils.hashutils: Only decode to utf-8 on Windows @ 2018-06-11 13:31:41 UTC
  - 6c5389189a Merge pull request #48041 from terminalmage/hashutils-fix-windows
  - 58c7ce33d7 salt.utils.hashutils: Only decode to utf-8 on Windows
• PR #48014: (cro) Find job pause @ 2018-06-08 13:48:45 UTC
  - dcae209951 Merge pull request #48014 from cro/find_job_pause
  - 440aa67c4f Lint: Add blank line
  - 7b0e99a511 One more case where returner doesn’t respond
  - 5abeedf882 Catch two cases when a returner is not able to be contacted—these would throw a stacktrace.
• PR #47915: (garethgreenaway) [2018.3] state runner pause resume kill @ 2018-06-07 16:08:30 UTC
  - ea85f882be Merge pull request #47915 from garethgreenaway/state_runner_pause_resume_kill
  - 2ecbe9c034 fixing typo in alias_function call.
4377e0cc08 Some fixes to the set_pause and rm_pause function in the state runner, renaming to in line with the functions in the state module. Including aliases to previous names for back-ward compatibility. Including a soft_kill function to kill running orchestration states. A new test to test soft_kill functionality.

• PR #48002: (rallytime) Back-port #47923 to 2018.3 @ 2018-06-07 15:25:39 UTC
  
  • PR #47923: (isbm) Prevent crash if files in file.recurse (refs: #48002)
  
  5c11fcede60 Merge pull request #48002 from rallytime/bp-47923
  
  9465e5f1e9 Use to_unicode from stringutils avoid deprecation warning
  
  73d33cbfc3 Prevent crash if files in file.recurse

• PR #48003: (rallytime) [2018.3] Merge forward from 2017.7 to 2018.3 @ 2018-06-07 15:25:19 UTC
  
  3d0a087c71 Merge pull request #48003 from rallytime/merge-2018.3
  
  a6533a9332 Merge branch '2017.7' into '2018.3'

  • 406efb161e Merge pull request #48015 from garethgreenaway/47546_more_unicode_nonsense
  
  • f457f9cb84 Adding a test to ensure archive.list returns the right results when a tar file contains a file with unicode in its name.
  
  • 9af49b595 Ensure member names are decoded before adding to various lists.

• ISSUE #47955: (frogunder) 2018.3.1 Creating Windows machine in Amazon using salt-cloud fails. (refs: #47989)
• **PR #47989**: (dwoz) Properly decode password from aws using m2crypto @ 2018-06-06 20:44:28 UTC
  - 1ce7d6c38a Merge pull request #47989 from dwoz/awscloud
  - 23ab2727be Fix linter errors
  - 6c8daa2b85 Properly decode password from aws using m2crypto

• **PR #47976**: (terminalmage) Capture and log output of processes that timed out and were killed @ 2018-06-06 19:17:08 UTC
  - 76068c83f5 Merge pull request #47976 from terminalmage/salt-jenkins-1000
  - 41e5a75027 Add catch_timeout to run_script
  - 551ada8e4d Capture and log output of processes that timed out and were killed

• **PR #47990**: (terminalmage) Docs fixes in 2018.3 release branch @ 2018-06-06 17:15:17 UTC
  - f12a52736e Merge pull request #47990 from terminalmage/2018.3-docs
  - f89d2ccdc0 Clean up Sphinx warnings
  - f5fe936865 Add clarifying comment so that we don’t break this
  - 94849780ac fix docs build error due to IndexError

• **PR #47982**: (twangboy) Fix `unit.modules.test_win_dns_client` tests @ 2018-06-06 15:02:10 UTC
  - 9d56af3cad Merge pull request #47982 from twangboy/fix_test_win_dns_client
  - 2cd6f788c Force string to ModuleType

• **PR #47985**: (twangboy) Fix `unit.states.test_reg` test failure @ 2018-06-06 14:56:03 UTC
  - 1b4c72345b Merge pull request #47985 from twangboy/fix_test_reg
  - 4ce551811f Remove the unnecessary `to_unicode` stuff
  - 863ded39fa Mock `reg.cast_vdata`

• **ISSUE #47236**: (MorphBonehunter) x509.private_key_managed broken after upgrade to 2018.3.0 (refs: #47957)

• **PR #47957**: (garethgreenaway) [2018.8] Ensure x509 passphrase is a string @ 2018-06-05 13:27:33 UTC
  - 84100570f7 Merge pull request #47957 from garethgreenaway/47236_ensure_passphrase_is_a_string
  - 99bad3ca6 removing unnecessary change
  - e22df8473d Ensuring that when a passphrase is passed in, it is returned as a string from the passphrase callback.
    - d0cf06a24d Make sure we set the effective environment when lock_saltenv is True
      - 8da6ce45dc Finish the docstring for git.cloned state
      - 4a8260a5e5 Add tests for git.cloned state
      - 311179da05 Add git.cloned state

• **PR #47926**: (dmurphy18) Backport of PR 47808 to 2018.3, improved grains support for AIX @ 2018-06-04 19:31:24 UTC
  - **PR #47808**: (dmurphy18) Updated AIX support for grains reported (refs: #47926)
    - c355a9e0d Merge pull request #47926 from dmurphy18/backport_pr47808
    - ac15d2093a Backport of PR 47808 to 2018.3, improved grains support for AIX

• **PR #47927**: (rallytime) [2018.3] Merge forward from 2017.7 to 2018.3 @ 2018-06-04 18:55:12 UTC

30.2. Previous Releases
- a46e42ab11 Merge pull request #47927 from rallytime/merge-2018.3
- 5baab66f4b Lint: Whitespace fix
- 7e1d278d19 Update old utils paths to use new utils paths
- 3273bbda7 Merge branch '2017.7' into '2018.3'
  - a2b588299b Merge pull request #47860 from terminalmage/state-writing-docs
    - 8cb33d3dec Quiet the linter
    - af51e16f23 Use more elegant RST syntax
    - 91cd57d1e0 Update mocking to reflect changes in service module
    - b9ace5a859 Fix crappy mocking
    - bc9e3acef3 Lint fixes
    - d37f7e4f04 Add 2017.7.6 release notes
    - 9dddeefab Improve documentation on syncing states
    - f465fa3ca7 Add best practices docs for writing states
    - 93ee5ee2b0 Fix all Sphinx warnings
    - 64b9b4d0b8 Clarify that name would override the id declaration
  - d2f3377b5b Merge pull request #47877 from dwoz/sleep_audit
    - ebc7cde9cb Revert job chunk wait time change
  - 735e92093e Merge pull request #47917 from dwoz/winsuite
    - 118601ebd6 Fix windows tests suite breakage
  - 63efb76d51 Merge pull request #47822 from Ch3LL/win_user_test
    - 3a691b405f add user_home path for both windows and linux
    - 788abf771e Add user state integration tests to windows
  - b9da4f1221 Merge pull request #47876 from doesitblend/add-file-read-windows
    - 3f7e7ec327 Add file.read function to Windows module
  - cbe2ecfae8 Merge pull request #47882 from frogunder/45013
    - 38d114a2d2 add whoami test
- PR #47931: (rallytime) Back-port #47913 to 2018.3 @ 2018-06-04 14:39:16 UTC
  - PR #47913: (rare-pop) Fixup! beacons/avahi_announce.py finding grains (refs: #47931)
  - 4db1f8c603 Merge pull request #47931 from rallytime/bp-47913
  - c51e732f4d Fixup! beacons/avahi_announce.py finding grains
- PR #47930: (rallytime) Back-port #47725 to 2018.3 @ 2018-06-04 14:38:58 UTC
  - PR #47725: (bbczeuz) network_settings beacon: Update example to follow new cfg convention (refs: #47930)
  - d05a6c70d3 Merge pull request #47930 from rallytime/bp-47725
  - 5c666409f3 Spelling fix
  - cfe0a5bb42 network_settings: Fix doc using new list/dict syntax
• **PR #47557**: (L4rS6) fix broken rabbitmq list policies in rabbitmq version 3.7 @ 2018-06-04 13:25:07 UTC
  - 484d83014b Merge pull request #47557 from L4rS6/fix-broken-rabbitmq-list-policies
  - 6d7ef27557 Merge branch '2018.3' into fix-broken-rabbitmq-list-policies
  - e043ea2833 refactored list_policies code and added more tests
  - eea81feb7b fix broken rabbitmq list policies in rabbitmq version 3.7

• **PR #47949**: (terminalmage) Continued troubleshooting on salt-jenkins 1000 @ 2018-06-04 13:17:14 UTC
  - 866a2bf5e Merge pull request #47949 from terminalmage/salt-jenkins-1000
  - 9c369c6aa8 Remove temp logging from test
  - af026d5ba7b Add result logging to run_script, make returns DRY

• **PR #47941**: (terminalmage) Update test logging for salt-jenkins @ 2018-06-03 02:40:56 UTC
  - 0b85d1273f Merge pull request #47941 from terminalmage/salt-jenkins-1000
  - fb66368a98 Update test logging for salt-jenkins 1000

• **PR #47924**: (Ch3LL) Catch all exceptions in git import for salt.utils.gitfs @ 2018-06-01 21:06:58 UTC
  - 58b5f2b4dd Merge pull request #47924 from Ch3LL/mac_gitpy
  - 75c51ad69b Catch all exceptions in git import for salt.utils.gitfs

• **ISSUE #47269**: (isdig) Reopen Windows Minion That Has IAM Role Cannot Access to S3 (refs: #47879)

• **PR #47879**: (dwoz) Fix ami role usage warts #47269 @ 2018-06-01 14:11:55 UTC
  - b88ec5258d Merge pull request #47879 from dwoz/ami_role_fix
  - 3884c2cf5f Fix ami role usage warts #47269

• **PR #47788**: (twangboy) Use pytz to calculate timezones @ 2018-05-31 18:33:20 UTC
  - b09596982b Merge pull request #47788 from twangboy/fix_47559
  - 0d229c6182 Merge branch '2018.3' into fix_47559
  - 9e612ec9e7 Fix markup in release notes
  - 60499d18f0 Skip test if pytz not present
  - 72cc361c7b Move pytz to 3rd party import, add to __virtual__
  - b8a6488688 Update __virtual__ function
  - 9923176b68 Use __utils__, fix unit tests
  - 73e033f555 Return offset in the same format as Unix
  - 5656183c5e Add timezone.list, add 2018.3.2 release notes
  - 98669c9b2a Use pytz to calculate timezones

• **PR #47899**: (terminalmage) salt-jenkins issue 1000 @ 2018-05-31 18:24:49 UTC
  - ae73cb947 Merge pull request #47899 from terminalmage/salt-jenkins-1000
  - 25af9c32f7 WIP salt-jenkins issue 1000

• **PR #47753**: (Ch3LL) Add stderr launchctl helper class and fix service mac tests @ 2018-05-31 18:16:57 UTC
  - 8f78e3ae6f Merge pull request #47753 from Ch3LL/service_mac
  - 185c9e9a2e only stop service if its running
- e15e674955 Add stderr launchctl helper class and fix service mac tests
- **PR #47908**: (meaksh) Align SUSE salt-master.service 'LimitNOFILES' limit with upstream Salt @ 2018-05-31 18:13:27 UTC
  - 828bf39695 Merge pull request #47908 from meaksh/2018.3-align-suse-salt-master-service
  - efe308013a Align SUSE salt-master.service 'LimitNOFILES' limit with upstream Salt
- **PR #47868**: (rallytime) [2018.3] Merge forward from 2017.7 to 2018.3 @ 2018-05-30 21:20:38 UTC
  - b4bac9b41b Merge pull request #47868 from rallytime/merge-2018.3
  - e5d386e91c Update solaris core grains test
  - 267f09c1a0 Lint: Remove unused import
  - 120ee16b70 Replace old utils paths with new utils paths
  - dc32b67c03 Merge branch '2017.7' into '2018.3'
  - 4b28e510f1 Merge pull request #47853 from dwoz/py3-cloud-test
    • c2f8ae7f7c5 Fix for py3 ec2 cloud tests
  - 215efa6b73 Merge pull request #47847 from garethgreen-away/47833_reactor_runner_documentation
    • 03676712de Adding some addition documentation to the reactor runner indicating that the reactor system must be active prior to using it.
  - 0bf651b470 Merge pull request #47846 from Ch3LL/p_refresh_test
    • 019edad8e4 Fix flaky refresh pillar integration test
  - 799fc979d Merge pull request #47552 from twangboy/fixed_tests
    • 1e877c44a44 Add release notes for 2017.7.7
    • 008a0ac6b Fix unit tests
    • 87097eeb6 Add comments about how get is returning data
    • f1f1bc5c1 Show GPO settings, raise error if trying to set gpo managed settings
  - ffc2ebc373 Merge pull request #47691 from lomeroe/solaris_product_grains
    • d889bef06 Merge branch '2017.7' into solaris_product_grains
    • 49053bc106 lint fix
    • 6185c9179 another lint fix
    • dbffba6876 fix tons of errors in my tests
    • 8e9355d34c Lint fix
    • b29ec75da7 Update regexes in core grains for detecting the 'product' grain on Solaris Sparc systems. Additionally, copy the 'product' grain to 'productname' to be consistent with other OSes.
  - 96b7c0cc76 Merge pull request #47778 from Ch3LL/win_state_pkg
    • e1786de6b0 Merge branch '2017.7' into win_state_pkg
    • f8c467d3e6 Fix text editor error
    • 872e162137 Add test_pkg integration state tests to windows
• 6f934c2259 Merge pull request #47823 from Ch3LL/win_dns_test
  - 7848114d6a Add win_dns module integration tests for windows
• e63e04602d Merge pull request #47838 from rallytime/bp-47810
  - bd2b62fa66 better debug message
  - 83565c55df Address PR feedback
  - 50bce3a2f3 make decode_linode_plan_label a private function
  - 2ba4fe4cea fix raising when a 'GB' format invalid plan is supplied
  - 3af850d5a2 slight cleanup
  - 319fd3406 match quotation mark types properly
  - 95e0202223 more consistent use of parens in logged warning
  - 52926ca87 log a warning when the user supplied a label we could decode but was not in the proper format
  - 121303d827 reduce complexity of get_plan_id by moving decoding of the user-supplied label to its own function
  - cff534c7314 Fix Linode plan selection
• 9ef6e60617 Merge pull request #47805 from twangboy/add_sign.bat
  - 66d8b0331a Add sign.bat script for signing packages
• 93420950d3 Merge pull request #47500 from dwoz/winuser
  - 0ca5224cbf Merge branch '2017.7' into winuser
  - e5948902af Use salt utils method for this_user
  - a056a293f1 Centralize test username lookup
  - 6a6ab69722 Get the current username on windows
• 552526f309 Merge pull request #47802 from rallytime/bp-40892
  - bb357da084 add minion function to reload beacon #35960
• c9ccf53b9 Merge pull request #47816 from Ch3LL/disable_windows
  - 2509d36888 Add windows to service disable ERROR check in tests
• 2cb6634c6b Merge pull request #47773 from frogunder/45011
  - 7c9b0bda33 add win_servermanager.list_available test
• e65dec202 Merge pull request #47807 from dwoz/winrmtests
  - 1f1cc1357a Increase instance size for cloud tests
  - be8dcdf21f1 Try an even bigger timeout

• PR #47900: (rallytime) [2018.3] Merge forward from 2018.3.1 to 2018.3 @ 2018-05-30 18:09:41 UTC
  - 21550dbd2d Merge pull request #47900 from rallytime/merge-2018.3.1-to-2018.3
  - 2801eacb26 Merge branch '2018.3.1' into '2018.3'

• ISSUE #30367: (paulfanelli) salt-run orchestration via state.sls always successful; it is ignoring state return value (refs: #47843)
• PR #47843: (garethgreenaway) [2018.3] orchestration results False when function is False (refs: #47983) @ 2018-05-30 17:21:54 UTC
  - a0bf565741 Merge pull request #47843 from garethgreenaway/30367_orch_return_false_when_function_fails
  - 09242697b8 Merge branch '2018.3' into 30367_orch_return_false_when_function_fails

• PR #47866: (rallytime) Back-port #47814 to 2018.3 @ 2018-05-29 19:55:24 UTC
  - PR #47814: (travispaul) Bugfixes and unit tests for pkgin module (refs: #47866)
  - da6f7a5538 Merge pull request #47866 from rallytime/bp-47814
  - d50c0ab96b Lint test_pkgin.py
  - 4dac0b4a31 pkgin latest_version bugfix
  - 4ae0313797 Bugfixes and unit tests for pkgin module

• PR #47865: (rallytime) Back-port #47600 to 2018.3 @ 2018-05-29 19:54:44 UTC
  - PR #47600: (travispaul) Prevent crash on NetBSD and OpenBSD when no swap is configured. (refs: #47865)
  - d9ef72b5b1 Merge pull request #47865 from rallytime/bp-47600
  - f9f464fa51 Prevent crash on NetBSD and OpenBSD when no swap is configured.

• PR #47221: (azelezni) Fix boto_ec2 unused parameter "network_interfaces" @ 2018-05-26 14:41:35 UTC
  - 61561a8279 Merge pull request #47221 from azelezni/fix-boto_ec2-network_interfaces
  - 03ee0023eb Fix unused network_interfaces parameter
  - 1ece61d9fa Fix unused network_interfaces parameter
  - 3e074be9c3 Fixing lint
  - 02609b6e61 Adding state files for new test.
  - 377e34c689 Updating function in saltmod to ensure that the result is a failure if the function being run returns False.

• PR #47850: (rallytime) Fix autodoc for new swarm module @ 2018-05-26 01:53:16 UTC
  - c4d828c986 Merge pull request #47850 from rallytime/swarm-autodoc
  - 467c8fa45c Fix autodoc for new swarm module

• PR #47800: (rallytime) [2018.3] Merge forward from 2017.7 to 2018.3 @ 2018-05-26 01:17:40 UTC
  - 30b31c5db5 Merge pull request #47800 from rallytime/merge-2018.3
  - 9e3ce39e8c Typo: test_type --> text_type
  - 8877489386 Fix bad merge caught by test in zpool state
  - c328450be2 Update old utils paths to new paths
  - a4bf26e868 Merge branch '2017.7' into '2018.3'
    - 46618d2ce7 Merge pull request #47765 from meaksh/2017.7-fix-zypper-error-reading-repo
      - 4475ba19b8 Prevent zypper from parsing repo configuration from not .repo files
    - 0e87559ee3 Merge pull request #47781 from rallytime/update-linode-sizes
      - a90ce1b76e0 Update cloud test profile and docs to use new Linode size labels
    - 3ddc56cb9b Merge pull request #47748 from rallytime/merge-2017.7
• b75f5ae38e Merge branch '2017.7.6' into '2017.7'
• edf94c915e Merge pull request #47775 from gtmanfred/2017.7.6
• 548f65d056 catch UnsupportedOperation with AssertionError
• 17596f3025 Merge branch '2017.7.6' into '2017.7'
• 8c38ec75f Merge pull request #47769 from gtmanfred/2017.7.6
• 3f1dc0fa82 skip test that breaks test suite
• e458f40a31 Merge branch '2017.7.6' into '2017.7'
• 0d5b473cc2 Merge pull request #47747 from Ch3LL/rn_2017.7.6
• d4a8639292 Add changelog to 2017.7.6 release notes
• 8a5b34f7d9 Merge pull request #47702 from damon-atkins/2017.7.6_fix_pkg.latest_state
• adcc094e08 Merge branch '2017.7.6' into 2017.7.6_fix_pkg.latest_state
• d610c192d9 Merge pull request #47700 from yannj-fr/2017.7.6
• 961c1ef61e fix roots modification time check
• 2a73e105df Merge branch '2017.7.6' into 2017.7.6
• 266749420f Merge pull request #47632 from gtmanfred/2017.7.6
• 2c50cd2f5 fix pylint
• 4a295f7b16 Fix last test for tornado
• 550ef2e272 allow using tornado 5.0
• 62e4684488 handle new _create_stream in tornado 5.0
• 2643c356af Merge pull request #47720 from rallytime/bp-47692-2017.7.6
• 6e5cb36839 Default windows to m1.small for ec2-classic
• 20d9785244 fix roots modification time check
• aef37dd1ce fix roots modification time check
• d51662e053 Ensure targeted_pkgs always contains value for non-windows.
• 83b4224cf8 Adjusted based on feedback.
• 12f983ce9f Whitespace lint issues
• 075d3d3c49 pkg.install execution module on windows ensures the software package is installed when no version is specified, it does not upgrade the software to the latest. This is per the design. pkg.latest must provide the versions to install to pkg.install

* 0ddc864f90 Merge pull request #47779 from dwoz/winrmtests
  • d5eafe9d53 Use common timeout variable
  • 7e948eb540 Increase ec2 cloud timeouts to 1000

* 17c4c8443c Merge pull request #47430 from baniobloom/vpc_association_not_found
  • 0f1d007f91 added catch for VPCAssociationNotFound

* 9c5dde1449 Merge pull request #47525 from baniobloom/duplicate_sec_group_rule
  • dcc35fd489 if we are trying to add the same rule then we are already in the desired state, return true
* 536ce2fa42 Merge pull request #47772 from gtmanfred/2017.7
  - 67756a50fd lock down dependencies for kitchen-salt
* 12b330f049 Merge pull request #47749 from terminalmage/issue47717
  - cd484bef69 Fix "dnf list upgrades" parsing
* 5cd18b9e70 Merge pull request #47755 from dwoz/winrmtests
  - 57dd89e6c3 Default to ec2 classic compatible images
  - f89668920a Be explicit about winrm setting
* f45a96ba1d Merge pull request #47668 from Ch3LL/win_pkg_test
  - a8981024de Add pkg.latest_version windows test
* 7b12444dfa Merge pull request #4750 from dwoz/cloudtest
  - 63b722ba21 Allow ssh_interface to default to public_ips
* 27fbb42210 Merge pull request #47737 from dwoz/win_timeout
  - e8883a07d Cloud test fixup
* 1a93f060fb Merge pull request #47729 from UtahDave/fix_get_info_doc
  - 443a2d72a2 fix cli example to match function name
* 00a13761c7 Merge pull request #47682 from terminalmage/issue47182
  - d0243e8f23 Suppress spurious lint failure
  - 3b449f11fc Add regression test for excludes issue
  - 28a7d2b81c Skip __exclude__ in find_sls_ids
* 518f7bc6c2 Merge pull request #47708 from darkpixel/47696-do-not-enumerate-none
  - 54e9bf9ec9 Merge branch '2017.7' into 47696-do-not-enumerate-none
* cad062ea7 Merge pull request #47681 from rallytime/merge-2017.7
  - 6c06cb3ae3 Merge branch '2017.7.6' into '2017.7'
* fd2d45d9c2 Merge pull request #47683 from Ch3LL/mac_user_test
  - 5a1b2b9c7 Remove unnecessary setUp in states.test_user_test for mac
* f323799c42 Merge pull request #47692 from dwoz/win_instance_type
  - 20b607d54 Default windows to m1.small for ec2-classic
* 990ece5d5 Merge pull request #47665 from gtmanfred/cloud
  - fd8a02decb use dictupdate to update the providers dictionary and merge lists
* a2ed8cbb7f Merge pull request #47151 from zer0def/configparser-defaultsect
  - a8f2ad977e Merge branch '2017.7' into configparser-defaultsect
  - cca2a806c9 Made interaction with [DEFAULT] section in ConfigParser as sane as upstream permits.
* e6fb8342ef Merge pull request #47673 from terminalmage/bp-45808
  - 454291ad62 Fix errors when attempting to cache files with long names or URLs
* b0446aab07 Merge pull request #47670 from gtmanfred/2017.7
- dfd5a8715f add a pytest.ini and update a dependency for kitchen
- 0d06da6944 Merge pull request #47626 from gtmanfred/2017.7
  - 418364a533 make dev_python27.txt have the same message as dev_python34.txt
  - d53b44d10f remove lock file
  - 493ed7f93d use the toml dict format
  - e0f7cc1447 add proxy tests decorator to pytest conftest
  - 0a621dd0ec add Pипfile for managing dependencies in salt
  - f78b81db94 simplify dev and base.txt to single files
- a07a8906a0 Merge pull request #47578 from Ch3LL/mac_service_disabled
  - 6032a01f55 change disable check for upstart service on ubuntu14
  - 33b4cfbc5b Change service assertion check for systemd platforms
  - 14896f9743 change codeauthor and class name
  - 502c5bdf5 Ensure mac_service.disabled is correctly querying services

95d4488f01 Merge branch '2017.7.6' into 47696-do-not-enumerate-none
16c2153385 Merge pull request #47667 from Ch3LL/mac_user_enable
ba40d3d1a1 Update test_mac_user_enable_auto_login to test both py2 and py3
a4921e86c9 Merge pull request #47645 from Ch3LL/py3_rm_pip
225d90ad4c query the pip path for test test_issue_2087_missing_pip
e441733ac1 Merge pull request #47646 from rallytime/bp-47601-and-47643
9e1d1a5ef8 Fix typo
4e94609136 Remove unwanted file
0109249c78 use ignore-undefined-variable
37caecb7f4 Ignore pylint WindowsError
c1135d90c7 Better doc string
e536b9ed9 Skip tests when we can not use runas
04e4c6dddb Wrap properties loop with a check for None. Closes GH-47696

- PR #47581: (twangboy) Add get_encoding salt util @ 2018-05-25 20:40:07 UTC
  - da9eea1825 Merge pull request #47581 from twangboy/fix_47274
  - 0f600f25ef Merge branch '2018.3' into fix_47274
  - 6eff2f847b Add suggested changes
  - e27e9df1e7 Fix tests on Py3
  - f398cbbda Use os.linesep.join instead of textwrap.dedent
  - 771392e299 Fix unit tests, add newline="" to io.open
  - c0f735d4e3 Remove comment
  - 6d877bb48b Add comment

30.2. Previous Releases
- 9f369d3f22 Remove to_encoding, create get_encoding
- 68be0f9ed2 Add is_encoding salt util

• **ISSUE #47694**: (thuhak) utils/boto and utils/boto3 load error (refs: #47726)
  - b860d95b2c Merge pull request #47726 from gtmanfred/2018.3
  - 43997a466e fix tests
  - 59180e09a8 switch all salt.utils.boto* calls to __utils__ calls
  - 7e30f459c9 rename boto to botomod

• **ISSUE #47701**: (babs) elasticsearch.index_template_present state with check_definition: True. (refs: #47703)
  - PR #47803: (rallytime) Back-port #47703 to 2018.3 @ 2018-05-23 20:12:30 UTC
    - PR #47703: (babs) Fix elasticsearch.index_template_present with check_definition (refs: #47803)
    - 2a270162d0 Merge pull request #47803 from rallytime/bp-47703
    - 8f0e0c562d Fix elasticsearch with check_definition

• **PR #47804**: (rallytime) Back-port #47761 to 2018.3 @ 2018-05-23 20:11:55 UTC
  - PR #47761: (zerthimon) Fix userdata in openstack instances (refs: #47804)
  - b7bc306333 Fix userdata in openstack instances

• **PR #47776**: (garethgreenaway) [2018.3] Fixes to failing _before_connect tests @ 2018-05-23 15:10:35 UTC
  - 1ece891e42 Merge pull request #47776 from garethgreenaway/970_two_minion_unit_tests_failing
  - a5011b49ab Merge branch '2018.3' into 970_two_minion_unit_tests_failing
  - ef2471e69 Fixing unit.test_minion.MinionTestCase.test_beacons_before_connect and unit.test_minion.MinionTestCase.test_scheduler_before_connect.

• **PR #47783**: (rallytime) [2018.3] Merge forward from 2018.3.1 to 2018.3 @ 2018-05-23 14:51:56 UTC
  - 46ca67883 Merge pull request #47783 from rallytime/merge-2018.3
  - 56f082a74 Merge branch '2018.3.1' into '2018.3'

• **PR #47149**: (meaksh) [2018.3] Strip trailing commas on Linux user's GECOS fields @ 2018-05-22 21:18:49 UTC
  - f8a6a85d28 Merge pull request #47149 from meaksh/2018.3-remove-trailing-commas-on-linux-user-gecos-fields
  - 60ec3230db Merge branch '2018.3' into 2018.3-remove-trailing-commas-on-linux-user-gecos-fields

• **ISSUE #46938**: (racooper) Beacons documentation update for 2018.3 (refs: #47740)

• **PR #47740**: (garethgreenaway) [2018.3] Updating Beacon topic to include list based configuration for Beacons @ 2018-05-21 13:58:01 UTC
  - 19f4137b63 Merge pull request #47740 from garethgreenaway/46938_beacons_documentation
  - 5d23e4fdd8 Updating Beacon topic to include list based configuration for Beacons

• **PR #47710**: (terminalmage) salt.loader: add error logging when whitelist lookup fails @ 2018-05-18 16:56:18 UTC
  - 22807ac756 Merge pull request #47710 from terminalmage/fixed-loader-whitelist
- 6192391b7b Add additional missing modules to whitelist
- 7192c38f66 Change key -> function to make log message more clear
- 91f9fd38f6 Fix loader whitelists in unit tests
- d4f266e2e5b Add error logging when whitelist lookup fails

• **PR #47680:** (rallytime) [2018.3] Merge forward from 2018.3.1 to 2018.3 @ 2018-05-17 21:30:27 UTC
  - b91cf0f647 Merge pull request #47680 from rallytime/merge-2018.3
  - 9b1773a763 Merge branch '2018.3.1' into '2018.3'

• **PR #47545:** (dmurphy18) Fix non-root build and signing for rpm packages @ 2018-05-17 21:20:10 UTC
  - dbf12f9be2 Merge pull request #47545 from dmurphy18/fix_nonroot_build
  - 220f887fa6 Fixed review comment, changed file.chown to file.makedirs_perms
  - b15a1652b5 Changed versionadded from 2018.3.1 to 2018.3.2, to reflect when change should be accepted
  - 90eb03e375 Additional error checking and minor cleanup
  - 40d77e03d2 Correct building rpms with non-root user

• **ISSUE #47546:** (ender8282) archive.extracted fails when archive includes files with non-ascii names with 2018.3.0 (refs: #48015, #47572)

• **PR #47572:** (garethgreenaway) [2018.3] archive module, filenames with Unicode characters @ 2018-05-17 20:41:11 UTC
  - 69056e5b67 Merge pull request #47572 from garethgreenaway/47546_archive_non_ascii_filenames
  - 5e97b8b44a Updating with requested changes.
  - cc1aa75a2f only convert to bytes when using Python2
  - 0fe32f4066 Updating integration/modules/test_archive to include filenames with unicode characters.
  - 5a9cadd125 Accounting for when files in an archive contain non-ascii characters

• **PR #47661:** (rallytime) [2018.3] Merge forward from 2017.7 to 2018.3 @ 2018-05-16 15:53:36 UTC
  - dd3e6f30da Merge branch '2017.7' into '2018.3'
    - f63d801858 Merge pull request #47639 from rallytime/merge-2017.7
      - 1503f1020f Merge branch '2017.7.6' into '2017.7'
      - 6f178ca908 Merge pull request #47570 from gtmanfred/2017.7.6
      - 84aa034e03 Update dependency to msgpack
      - 98bd598701 Merge pull request #47523 from rallytime/man-pages
      - 48ecb78dec [2017.7.6] Update man pages
      - e608ea9617 Merge pull request #47517 from rallytime/bp-47505-2017.7.6
      - 0734578533 Raise proper invocation errors
    - db00ef3e8b Merge pull request #47643 from dwoz/runas_detect
      - 8c5e54b8b3 Fix typo
      - 69bc88f1c6 Remove unwanted file
    - 6dd3ab9f06 Merge pull request #47601 from dwoz/runas_detect
- 3235ac08cb use ignore-undefined-variable
- 58911d510a Ignore pylint WindowsError
- 17987d3c5a Better doc string
- a48ac26573 Skip tests when we can not use runas

* f61ccae627 Merge pull request #47611 from Ch3LL/deb_doc
  - 6d2dd050f One more grammar fixup
  - 2d5ff01261 Grammar fix

  - 8e26624db3 Merge pull request #47569 from Ch3LL/core_virt

• PR #47576: (rallytime) [2018.3] Small Documentation Fixes @ 2018-05-10 14:08:11 UTC
  - fc93715eea Merge pull request #47576 from rallytime/doc-updates
  - ca927fc14b Add extra lines that are needed for proper code-block formatting
  - b330d763a4 Remove infoblox state autodoc file

30.2.41 Salt 2018.3.4 Release Notes

Version 2018.3.4 is a bugfix release for 2018.3.0.
State Changes

- The `host.present` state can now remove the specified hostname from IPs not specified in the state. This can be done by setting the newly-added `clean` argument to `True`.

Changelog for v2018.3.3..v2018.3.4

Generated at: 2019-02-06 20:56:17 UTC

- PR #51525: (twangboy) Backport 51095 to 2018.3.4 @ 2019-02-06 20:20:37 UTC
  - a37fb7d Merge pull request #51525 from twangboy/backport_51095_2018.3.4
  - b6acc92 Backport 51095

- PR #51520: (frogunder) Update man pages for 2018.3.4 @ 2019-02-06 18:42:13 UTC
  - 602ddc8 Merge pull request #51520 from frogunder/man_pages
  - 0cbe3f8 Update man pages for 2018.3.4

- ISSUE #51428: (yosnoop) salt.utils.dns.lookup fails with dig method on EL7 (refs: #51429)

- PR #51429: (yosnoop) The +nocl is supported much wider than +noclass @ 2019-02-06 17:48:48 UTC
  - 1f981c6 Merge pull request #51429 from yosnoop/replace-noclass-with-nocl-for-dig
  - 5231e73 Merge branch '2018.3.4' into replace-noclass-with-nocl-for-dig
  - 14e6f77 In case the test machine can't resolve
  - 95e8a2f The +nocl is supported much wider than +noclass
  - a00d708 Test dig options for salt.utils.dns.lookup

- ISSUE #49226: (defanator) salt-cloud grains inheritance from provider to profile (2018 vs 2016) (refs: #51366)

- PR #51441: (Ch3LL) Backport #51366 into 2018.3.4 @ 2019-02-06 17:42:19 UTC
  - PR #51366: (dwoz) Cloud provider and profile configs are merged [2018.3] (refs: #51441)
  - 209ef32 Merge pull request #51441 from Ch3LL/bp-51366
  - 5bc466e Add testing path to run_script commands
  - 5351e5c Fix python 3 path for shell test cases
- 2d8a364 Fix linter issues
- 9b8718a Cloud provider and profile configs are merged

**PR #51458**: (twangboy) Add Py2 Warning for Py2 Installer @ 2019-02-06 17:33:02 UTC
- 90a8682 Merge pull request #51458 from twangboy/add_py2_warning
- 05522c0 Merge branch '2018.3.4' into add_py2_warning

**PR #51460**: (twangboy) Update installer mac 2018.3.4 @ 2019-02-06 17:31:18 UTC
- b492021 Merge pull request #51460 from twangboy/update_installer_mac_2018.3.4
- 3c92688 Merge branch '2018.3.4' into update_installer_mac_2018.3.4

**PR #51471**: (twangboy) Fix the failing dns test on Windows @ 2019-02-03 22:03:34 UTC
- 892d98c Merge pull request #51471 from twangboy/fix_test_win_dns_client
- c9f6b01 Merge branch '2018.3.4' into fix_test_win_dns_client

**PR #51462**: (ShantonRU) Fix insecure SQL queries in MySQL module @ 2019-02-01 21:19:20 UTC
- a05305d Merge pull request #51462 from ShantonRU/fix-insecure-sql-queries-in-mysql-module-1
- d3ef2cb Merge branch '2018.3.4' into fix-insecure-sql-queries-in-mysql-module-1
- f47dada Fix improper use of socket authentication in mysql.user_chpass
- ed62a2f Fix insecure SQL queries in mysql.user_chpass

- 33922c9 Fix the failing dns test on Windows

**PR #51445**: (terminalmage) Remove custom grains module from 2018.3 branch @ 2019-02-01 16:48:13 UTC
- 48936c2 Merge pull request #51445 from terminalmage/fix-custom-grains-traceback
- 191235d Remove custom grains module from 2018.3 branch
- 72fd1a2 Roll back icon change
- 7dd1704 Add welcome_py2.rtf
- c93e9e3 Add Py2 Warning to installer package
- b658900 Add Py2 Warning for Py2 Installer

**PR #51438**: (twangboy) Add missing raise statement @ 2019-01-30 20:04:05 UTC
- a880e42 Merge pull request #51438 from twangboy/fix_raise_2018.3.4
- 5830fad Add missing raise statement

**PR #51432**: (Ch3LL) Backport #51324 into 2018.3.4 @ 2019-01-30 17:51:50 UTC
- PR #51324: (garethgreenaway) [2018.3] Fixes to x509 module and test (refs: #51432)
- 28b898c Merge pull request #51432 from Ch3LL/bp-51324
- bd4f0f0 Fixing various bits in x509 module and unit test to ensure tests are passing on python2 & python3

**PR #51377**: (twangboy) Fix issue when directory doesn’t exist in LGPO module (2018.3.4) @ 2019-01-29 17:33:25 UTC
- 01717d2 Merge pull request #51377 from twangboy/fix_auditpol_2018.3.4
- 19e5181 Fix issue when directory doesn’t exist

**PR #51338**: (Ch3LL) Backport #51207 into 2018.3.4 @ 2019-01-27 23:44:59 UTC
Salt Documentation, Release 3003.3

- **PR #51207**: (twangboy) Backport 50771 to 2018.3 (refs: #51338)
- **PR #50771**: (terminalmage) Fix failing opensuse tests (refs: #51207)
- 43a9d2f Merge pull request #51338 from Ch3LL/bp-50771
- 345ae67 Backport PR# 50771 to 2018.3 branch

• **ISSUE #51158**: (AndreiPashkin) saltmod.state doesn't respect "roster" argument (refs: #51170)

• **PR #51337**: (Ch3LL) Backport #51170 into 2018.3.4 @ 2019-01-27 23:44:24 UTC
  - **PR #51170**: (dwoz) Honor roster system for ssh orchestrations (refs: #51337)
  - 3dcd11d Merge pull request #51337 from Ch3LL/bp-51170
  - 4e85505 Merge branch '2018.3.4' into bp-51170

• **ISSUE #50221**: (tkaehn) file.managed: contents_pillar and pillar.file_tree with keep_newline is broken in 2018.3.3 (refs: #51252)

• **PR #51340**: (Ch3LL) Backport #51252 into 2018.3.4 @ 2019-01-27 23:42:49 UTC
  - **PR #51252**: (dwoz) Preserve newlines from pillar data for file.managed [2018.3] (refs: #51340)
  - 7656aa5 Merge pull request #51340 from Ch3LL/bp-51252
  - e74ac6c Fix py3 managed.file test failure
  - 6f2c7cf Remoe un-needed log statement
  - 824950c Fix 50221 regression test on Windows
  - 1840af9 preserve newlines from pillar data for file.managed

• **PR #51290**: (s0undt3ch) [2018.3.4] Fix minion start @ 2019-01-25 15:14:47 UTC
  - e90ca1d Merge pull request #51290 from s0undt3ch/hotfix/fix-network
  - da3aace Merge branch '2018.3.4' into hotfix/fix-network
  - 04f16b8 Fix tests. We no longer get ipaddress instances back.
  - c3fa82a Fix minion start issue
    - c893dc4 Fix saltmod roster test
    - b61854f Roster defines the roster system not a file
    - 484bab4 Fix linter
    - 5e2dbf2 Honor roster file for ssh orchestrations

• **PR #51317**: (terminalmage) Fix regression in dynamic pillarenv @ 2019-01-25 09:29:44 UTC
  - c8db7e3 Merge pull request #51317 from terminalmage/fir-pr-50417
  - 4be2891 Merge branch '2018.3.4' into fir-pr-50417

• **PR #51311**: (twangboy) Fix failing test unit.states.test_file.TestFileState.test_managed on Windows @ 2019-01-24 21:09:35 UTC
  - e246fd6 Merge pull request #51311 from twangboy/fir_test_file.test_managed
  - f4177e0 Remove mode parameter on Windows
  - 4c4ded3 Fix regression in dynamic pillarenv

• **ISSUE #51195**: (littleski) fstab improperly escaped when spaces are used in options (refs: #51226)

• **ISSUE #27160**: (martinadolfi) salt.states.mount persistence error using spaces in route (refs: #39593)
• **PR #51292**: (Ch3LL) Backport #51226 into 2018.3.4 @ 2019-01-24 11:11:34 UTC
  - **PR #51226**: (garethgreenaway) [2018.3] Handle spaces in fstab opts, similar fix to #39593 (refs: #51292)
  - **PR #39593**: (zwo-bot) Fix issue #27160 - escape whitespaces in fstab entry in module mount when persist=True (refs: #51226)
  - 40b20126 Merge pull request #51292 from Ch3LL/bp-51226
  - aba114e Merge branch '2018.3.4' into bp-51226

• **PR #51295**: (Ch3LL) Backport #51279 into 2018.3.4 @ 2019-01-24 11:10:19 UTC
  - **PR #51279**: (twangboy) Backport __context__ support from develop (refs: #51295)
  - fc0bec5 Merge pull request #51295 from Ch3LL/bp-51279
  - 5c4a7a4 Merge branch '2018.3.4' into bp-51279

• **PR #51293**: (Ch3LL) Backport #51233 into 2018.3.4 @ 2019-01-24 09:17:49 UTC
  - **PR #51233**: (Ch3LL) Backport #51105 to 2018.3 (refs: #51293)
  - **PR #51105**: (garethgreenaway) [develop] Report permission changes in test mode (refs: #51233)
  - dacd1ea Merge pull request #51293 from Ch3LL/bp-51233-2
  - 4f631a6 Handle spaces in fstab opts, similar fix to #39593

• **ISSUE #51248**: (johnnybubonic) "[WARNING ] The file_roots parameter is not properly formatted, using defaults" (refs: #51278)

• **PR #51278**: (dwoz) Warn about proper validation option @ 2019-01-22 22:13:13 UTC
  - 1abffb2 Merge pull request #51278 from dwoz/issue51248
  - c614198 Use pillar roots validation method
  - 0d2b0c6 Fix linter warnings
  - 5b98895 Fix wart in pillar_roots validation

• **PR #51230**: (Ch3LL) [2018.3] Merge forward from 2017.7 to 2018.3 @ 2019-01-18 19:50:10 UTC
  - e53e9b1 Merge pull request #51230 from Ch3LL/merge-2018.3
  - 0ef7675 Merge branch '2017.7' into '2018.3'
  - 4a12c5f Merge pull request #50852 from mirceaulinic/fix-capirca
    * fa91267 Merge branch '2017.7' into fix-capirca
    * 71913ff Merge branch '2017.7' into fix-capirca
    * 6fc3484 Lint?
    * 3d56750 Extra newline for lint
    * 5176cd8 Improve the Capirca and related modules for ACL config generation
  - 3f4759b Merge pull request #50923 from astronouth7303/patch-2
    * 4f631a6 Document [% include %]
- 210e817 Merge pull request #51111 from s0undt3ch/2017.7
  - 08e0ae7 Update to salt-bootstrap v2019.01.08

**ISSUE #51211**: (sathieu) file_roots envs with slash leads to "No such file or directory: '/var/cache/salt/master/file_lists/roots/.foo/bar.w' (refs: #51212)

**ISSUE #48132**: (BenjaminSchiborr) Dynamic File Roots (refs: #51212)

**PR #51212**: (sathieu) Allow slashes in file_roots envs. @ 2019-01-17 17:29:18 UTC
- 26008ef Merge pull request #51212 from sathieu/file_roots_slash
- b769f18 Allow slash in file_roots envs
- f9437e2 Test for file_roots envs with slash leads to "No such file or directory"

**PR #51209**: (garethgreenaway) [2018.3] Back-port PR #51124 to 2018.3 @ 2019-01-17 13:28:32 UTC
- PR #51124: (Ch3LL) Handle encoding when opening file for both py2/py3 (refs: #51209)
- 5916282 Merge pull request #51209 from garethgreenaway/bp-51124
- 82acce4 Handle encoding when opening file for both py2/py3

**PR #51184**: (twangboy) Fix win_lgpo_auditpol salt util on Windows @ 2019-01-16 18:08:01 UTC
- 094bd33 Merge pull request #51184 from twangboy/fix_auditpol
- 2e68d35 directly call cmd.run_all

**PR #51191**: (Ch3LL) Backport #50918 into 2018.3 @ 2019-01-16 18:02:19 UTC
- PR #50918: (twangboy) Fix test_debian_ip on Windows (refs: #51191)
- ac71922 Merge pull request #51191 from Ch3LL/bp-50918
- 7300d84 Skip debian tests on Windows
- 4622433 Fix test_debian_ip on Windows

**ISSUE #49883**: (kiemlicz) salt-cloud azurearm is not working (refs: #51144)

**PR #51144**: (jgleissner) 2018.3 azurearm py3 @ 2019-01-15 16:46:35 UTC
- e7f53a3 Merge pull request #51144 from jgleissner/2018.3-azurearm-py3
- 3178f1a msazure.py: remove unused imports
- 99a4b9d azurearm: fix list_locations
- aebe34b azurearm: fix show_instance function
- d80669f msazure: fix object_to_dict for python 3

**PR #51171**: (twangboy) Add random sleep time to avoid overloading Windows @ 2019-01-15 16:45:33 UTC
- 1206f92 Merge pull request #51171 from twangboy/fix_crypt
- 6caa93b Add random sleep time to avoid overloading Windows

**PR #51174**: (jpsv) Update OpsGenie to use their V2 API (2018.3) @ 2019-01-15 16:44:54 UTC
- a96deed Merge pull request #51174 from jpsv/2018.3
- 055823e Update opsgenie.py
- 501c8df Merge branch '2018.3' into 2018.3
- 220aa8a Update opsgenie.py
- 5dc21cc Update to from V1 API to V2
- f93ce7c Update to V2 API

**ISSUE #42280:** (michaelgibson) make ldap eauth 2 factor compatible (refs: #42426, #45347)

**PR #51010:** (amendlik) Allow unauthenticated bind for listing LDAP groups @ 2019-01-15 16:43:42 UTC
  - PR #45811: (gtmanfred) Fix ldap eauth (refs: #51010)
  - PR #45347: (amendlik) LDAP group membership (refs: #51010)
  - PR #42426: (michaelgibson) adding 2-factor auth capability to ldap eauth module - #42280 (refs: #45347)
  - 563d487 Merge pull request #51010 from amendlik/ldap-groups
  - cd336ed Merge branch '2018.3' into ldap-groups
  - 94f8ee4 Update unit tests for auth.ldap
  - 08e36d0 Allow unauthenticated bind for listing LDAP groups

**PR #51112:** (s0undt3ch) [2018.3] Update to salt-bootstrap v2019.01.08 @ 2019-01-15 16:42:09 UTC
  - 6dc3752 Merge pull request #51112 from s0undt3ch/2018.3
  - 4f1d846 Update to salt-bootstrap v2019.01.08

**PR #51097:** (terminalmage) Fix improper exception raises (2018.3) @ 2019-01-15 16:38:25 UTC
  - b19c990 Merge pull request #51097 from terminalmage/fixed-keyerror-raise
  - a3c0b49 Fix poorly-written test
  - c0ff7b1 Fix more incorrect exception raises
  - f11d8cc Fix improper KeyError raise

**PR #51169:** (twangboy) More descriptive error when missing GitPython or PyGit2 @ 2019-01-15 16:37:44 UTC
  - 8920a86 Merge pull request #51169 from twangboy/fix-git-state
  - f2d1180 More descriptive error when missing GitPython or PyGit2

**ISSUE #51160:** (amendlik) Minion crashes with long hostname under Python 3 (refs: #51173, #51161)

**PR #51173:** (dwoz) Avoid exceptions by passing bytes to idna @ 2019-01-15 16:32:31 UTC
  - PR #51161: (amendlik) Ignore exceptions when generating the minion ID (refs: #51173)
  - 58eed6 Merge pull request #51173 from dwoz/issue51160
  - 11cc7b3 Remove un-needed test
  - 0f87812 Merge develop, Revert exception handling
  - 73651a1 Pass bytes to idna

**PR #51147:** (Ch3LL) [2018.3] Merge forward from 2017.7 to 2018.3 @ 2019-01-15 02:05:51 UTC
  - 06854cf Merge pull request #51147 from Ch3LL/merge-2018.3
  - d39d8b7 Merge branch '2018.3' into merge-2018.3

**ISSUE #51160:** (amendlik) Minion crashes with long hostname under Python 3 (refs: #51173, #51161)

**PR #51161:** (amendlik) Ignore exceptions when generating the minion ID (refs: #51173) @ 2019-01-14 22:47:54 UTC
  - b79c09e Merge pull request #51161 from amendlik/long-hostname
- 6fcc4ad Merge branch '2018.3' into long-hostname

- **ISSUE #51067**: (rkrieger) KeyError u'manufacturer' causes salt-minion crash on start with OpenBSD arm64 system (refs: #51159)
- **ISSUE #3**: (thatch45) libvirt module (refs: #51159)
- **PR #51159**: (rkrieger) Prevent crash by testing for 'manufacturer' in osdata on OpenBSD @ 2019-01-14 18:08:22 UTC
  - 1424734 Merge pull request #51159 from rkrieger/fix-issue-51067
  - 1440ccf Prevent crash by testing for 'manufacturer' in osdata on OpenBSD
  - 1a4e307 Ignore exceptions when generating the minion ID
- **PR #51146**: (terminalmage) Fix invalid assignment in vsphere module @ 2019-01-12 21:44:33 UTC
  - 5e37326 Merge pull request #51146 from terminalmage/fix-vsphere-tuple-issue
  - 5d60022 Fix invalid assignment in vsphere module
- **PR #51154**: (twangboy) Add support for Advanced Audit policies @ 2019-01-12 21:43:27 UTC
  - fad8621 Merge pull request #51154 from twangboy/auditpol
  - 9064376 Add support for Advanced Audit policies
- **PR #51151**: (Ch3LL) Backport #51061 to 2018.3 @ 2019-01-12 03:18:44 UTC
  - **PR #51061**: (garethgreenaway) [fluorine] fix to salt.utils.vt.Terminal (refs: #51151)
  - f7a100c Merge pull request #51151 from Ch3LL/bp_51061
  - ffdae27 When writing output to stdout we want to ensure that the data is a string not bytes. Under py2 the salt.utils.data.encode function results in a string but under py3 the result is a bytestring. Swapping out salt.utils.data.encode for salt.utils.stringutils.to_str.
- **PR #51150**: (Ch3LL) Back-port #49508 to 2018.3 @ 2019-01-12 03:18:19 UTC
  - **PR #49508**: (bergmann) Fix X509 remote signing on python3 (refs: #51150)
  - 3a50a57 Merge pull request #51150 from Ch3LL/bp-49508
  - 7ae53ad Do not silently ignore errors.
  - deb0134 Convert to string before sending via 'publish'.
  - 651c551 Use to_str salt.utils when writing to a file.
- **ISSUE #50433**: (zerthimon) Wildcard grant fails in mysql_grants.present in mysql 8.x (refs: #51152)
- **PR #51152**: (garethgreenaway) [2018.3] Fixes to mysql module to handle ALL PRIVILEGES grant @ 2019-01-12 03:17:15 UTC
  - 8bb589d Merge pull request #51152 from garethgreenaway/50433_handle_grants_better
  - f7caa4d Fixing lint
  - e8c8c0f Adding some tests to ensure "ALL PRIVILEGES" is handled correctly in 8.0 and 5.6
  - b4bf69f Add additional grants. Adding logic to handle when ALL or ALL PRIVILEGES is passed for the grant, including some logic to handle the fact that the grants are split when show grants is run for a particular user.
    - 74edfd9 Fix pylint
    - 81a3d47 Merge branch '2017.7' into '2018.3'
• 8a76a19 Merge pull request #50858 from jasonarewhy/bugfix-2017.7/ubuntu-networking-searchdomain
  • 3395a3d Merge branch `2017.7` into bugfix-2017.7/ubuntu-networking-searchdomain
  • 69d25aa update debian_ip test
  • a6b896c get searchdomain in Ubuntu 12+

  • ISSUE #50849: (SuperShoot) MySQL version needs to be decoded (refs: #51133)
  • PR #51133: (SuperShoot) Fixes mysql server version comparison. @ 2019-01-10 16:45:38 UTC
    – dda1eb Merge pull request #51133 from SuperShoot/issue-#50849
    – ec14e13 Fixes mysql server version comparison.

  • PR #50878: (max-arnold) Fix profile outputter docs @ 2019-01-08 18:32:40 UTC
    – 9d4321d Merge pull request #50878 from max-arnold/output-docs
    – d7403da Fix profile outputter docs

  • PR #51076: (OrangeDog) Typos in index_template_present documentation @ 2019-01-08 18:25:20 UTC
    – ce87504 Merge pull request #51076 from OrangeDog/patch-1
    – 568e4fb Revert add -> check
    – 4d7eb7 Typos in index_template_present documentation

  • PR #51081: (garethgreenaway) [2018.3] Merge forward from 2017.7 to 2018.3 @ 2019-01-07 20:34:16 UTC
    – d08abf Merge pull request #51081 from garethgreenaway/merge-2018.3
    – 027804a Merge branch `2018.3` into merge-2018.3

  • ISSUE #50966: (klafkoff) 2018.3.3 missing a patch to salt/modules/nxos.py (refs: #51080)

  • PR #51080: (garethgreenaway) [2018.3] Fix to nxos module @ 2019-01-07 18:07:25 UTC
    – 335088b Merge pull request #51080 from garethgreenaway/merge-2018.3
    – 230a66b Merge branch `2018.3` into 50966_nxos_ensure_kwargs_list
    – 629decb Ensure kwargs is a list before we attempt to loop through. Similar fix to https://github.com/rallytime/salt/commit/430c462f34eb4eedf2384e06fbee8dc19b8026f6 in the proxy module.
    – a20791b Merge branch `2018.3` into merge-2018.3

  • PR #51079: (termalmage) Fix shadow.set_date/shadow.set_expire on F28 @ 2019-01-07 16:28:36 UTC
    – c47b64a Merge pull request #51079 from termalmage/salt-jenkins-1238
    – ccd5c15 Fix shadow.set_date/shadow.set_expire on F28

  • ISSUE #47043: (xBytez) lsattr slowing down archive.extracted (refs: #51044)

  • PR #51044: (termalmage) archive.extracted: Don’t run lsattr when enforcing user/group ownership @ 2019-01-03 19:26:03 UTC
    – aeeb047 Merge pull request #51044 from termalmage/issue47043
    – 787b79a archive.extracted: Don’t run lsattr when enforcing user/group ownership

  • ISSUE #50964: (gtmanfred) Add a long description to setup.py for the new pypip.org (refs: #51031)

  • PR #51034: (garethgreenaway) Back-port PR #51031 to 2018.3 @ 2019-01-03 15:42:22 UTC
    – PR #51031: (waynew) Set long_description (refs: #51034)
4716 Chapter 30. Release Notes

- 04fdae5 Merge pull request #51034 from garethgreenaway/bp-51031
- cd310c2 Set long_description

- **ISSUE #50634:** (marek-obuchowicz) Debian pkg.managed gpg/tty issue (refs: #50972)
- **PR #50972:** (pirogoeth) Use gpg's --batch in apt-key adv during repo key add @ 2019-01-03 02:34:13 UTC
  - 4685e0e Merge pull request #50972 from pirogoeth/sjohn/2018.3-apt-key-batch
  - cd3d755 Merge branch '2018.3' into sjohn/2018.3-apt-key-batch
- **PR #51028:** (whytewolf) AIX lsattr fix for file module. @ 2019-01-03 01:52:33 UTC
  - 44bc862 Merge pull request #51028 from whytewolf/aix_lsattr_fix
  - 1b733c6 Set lsattr functions to return None if salt.utils.platform.is_aix returns true.
  - 7410008 Merge branch '2018.3' into sjohn/2018.3-apt-key-batch
- **PR #51018:** (garethgreenaway) [fluorine] Merge forward from 2017.7 to 2018.3 @ 2019-01-01 23:11:02 UTC
  - b4774a8 Merge pull request #51018 from garethgreenaway/merge-2018.3
    - 773bf31 Use gpg's --batch in apt-key adv during repo key add
      - 9386aab Merge branch '2017.7' into merge-2018.3
      - 9989ca6 Merge pull request #51030 from terminalmage/issue38502
      - 6dbd81f Add unit test to ensure we don't diff bare repos
  - 12f7583 Merge branch '2017.7' into merge-2018.3
  - 4529150 Merge pull request #50977 from rallytime/config-docs
    - 43c99e7 Add documentation to master config docs for job_cache_store_endtime
    - 887cd07 Add some salt-api options to the master config docs
    - 0d49746 Fix some formatting in master config docs
  - 409594b Merge pull request #50991 from twangboy/requests_2017.7
    - 32b9d2a Update requests for osx
    - 413dc72 Merge branch '2017.7' of https://github.com/saltstack/salt into requests_2017.7
  - e053074 Merge pull request #50983 from garethgreenaway/bp-50885
    - 09a866e fix a del in cloud vmware that crash when the key isn't there
    - 4196690 Update requests to 2.21.0
    - 23f78b0 Upgrade requests to 2.20.1
- **PR #50990:** (twangboy) Requests 2018.3 @ 2018-12-31 20:19:01 UTC
  - c53723a Merge pull request #50990 from twangboy/requests_2018.3
  - e889233 Update requests on osx
  - b22856f Update requests to 2.21.0
  - 242389b Merge branch '2018.3' of https://github.com/saltstack/salt into requests_2018.3
  - 0d4b799 Upgrade requests to 2.20.1
- **PR #51004:** (twangboy) Add tests for the win_wusa state and module @ 2018-12-31 20:03:30 UTC
  - cecd108 Merge pull request #51004 from twangboy/win_wusa
- 0e92528 Merge branch '2018.3' into win_wusa
- c0d2495 Fix lint, add test docs
- 1750270 Add state tests for win_wusa
- 6285b64 Update win_wusa and add tests

**PR #51014**: (madrisan) ssh module: missing space in error message @ 2018-12-31 19:59:19 UTC
- 3e0515b Merge pull request #51014 from madrisan/patch-1
- ab980fb ssh module: missing space in error message

**PR #50883**: (terminalmage) Backport #49622 to 2018.3 branch @ 2018-12-31 19:58:11 UTC
- PR #49622: (angelously) fix command line options (refs: #50883)
- 5826db4 Merge pull request #50883 from terminalmage/bp-49622
- c93dbfa Update archive.py
- 925a9c9 Update archive.py
- ed2bed3 fix command line options

**PR #50945**: (garethgreenaway) [2018.3] Merge forward from 2017.7 to 2018.8 @ 2018-12-30 00:05:47 UTC
- fd9711b Merge pull request #50945 from garethgreenaway/merge-2017.7
- 43b3fa4 Merge branch '2018.3' into merge-2017.7

**ISSUE #50854**: (Ch3LL) [fluorine] windows stops when cannot connect to master (refs: #50855)

**PR #51006**: (dwoz) Let minions try to connect to master indefinitely @ 2018-12-28 21:10:39 UTC
- PR #50855: (dwoz) Let minions try to connect to master indefinitely (refs: #51006)
- b8615e1 Merge pull request #51006 from dwoz/backport_50855
- 5563631 Let minions try to connect to master indefinitely

**ISSUE #50989**: (mpx8701) SLS error (An exception occurred in this state: Traceback) (refs: #51005)

**PR #51005**: (garethgreenaway) [2018.3] Fixes to junos state module @ 2018-12-28 20:51:31 UTC
- cfed697 Merge pull request #51005 from garethgreenaway/50989_fixing_junos_state_arguments
- d4ac180 Fixing the arguments accepted by cli function in the junos state module which are passed along to the cli function in junos module, so they align.
- 3cfa8e Merge branch '2018.3' into merge-2017.7

**PR #50982**: (twangboy) Fix issue with LGPO when returning empty dict (2018.3) @ 2018-12-26 19:58:12 UTC
- daa591b Merge pull request #50982 from twangboy/fix_lgpo_2018.3
- d942934 Get rid of requests import (CaseInsensitiveDict)
  * 6170fa5 Merge branch '2018.3' into merge-2017.7

**ISSUE #46886**: (bbh-kmd) Unable to get salt-minion to call salt-call with alternate configuration (refs: #50959)

**PR #50984**: (garethgreenaway) Back-port PR #50959 to 2018.3 @ 2018-12-26 19:29:54 UTC
- PR #50959: (bbh-kmd) #46886: Use correct path to config_dir when running salt from alternate placement. (refs: #50984)
- 110bc66 Merge pull request #50984 from garethgreenaway/bp-50959
- 20fa5e9 Update sudo.py
• PR #50958: (bdrung) Fix twilio version checking @ 2018-12-25 10:46:15 UTC
  – 8fc89a0 Merge pull request #50958 from bdrung/fix-twilio
  – df8d7b9 Fix twilio version checking
    * d89e9b5 Merge branch '2018.3' into merge-2017.7
• ISSUE #50947: (cachedout) Log full of IPv6 warnings (refs: #50962)
• PR #50962: (terminalmage) Remove redundant overrides for ip_address/ip_interface @ 2018-12-21 22:04:34 UTC
  – bb87822 Merge pull request #50962 from terminalmage/ipv6-warnings
  – 773b983 Merge branch '2018.3' into ipv6-warnings
  – f3b1254 Remove redundant overrides for ip_address/ip_interface
    * cca01e7 Updating valigdate_tgt to ensure tests pass.
    * cdc7825 yet another lint fix.
    * f44a87e One last lint fix.
    * 45f363b Fixing various lint errors.
    * 6a65bf9 Merge branch '2017.7' into merge-2017.7
    * 747dd69 Merge pull request #50876 from terminalmage/issue50153
      * 676a12a Fix compound matching in eauth
    * 07fca64 Merge pull request #50909 from damon-atkins/jenkins_pylint
      * da1fc32 change params.CHANGE_BRANCH to env.CHANGE_BRANCH
    * e7f0ab6 Merge pull request #50873 from Ch3LL/bp-50740
      * 5fd9ed9 Merge branch '2017.7' into bp-50740
    * 2f77b2d Merge pull request #50869 from garethgreenaway/50848_mysql_exception_test
      * 3767d4f Merge branch '2017.7' into 50848_mysql_exception_test
      * af3e145 Cleanup.
      * b85c5bf Adding a test to ensure exception handling is correct.
      * 4242e64 Merge branch '2017.7' into bp-50740
    * a5caab7 Merge pull request #50872 from Ch3LL/bp-50864
      * fe9c64b fix typo in file.managed documentation
      * fd73f86 Catch UnicodeDecodeErrors in id verification
• PR #50937: (Ch3LL) Fix external_pillars documentation @ 2018-12-20 19:15:20 UTC
  – 49f2a35 Merge pull request #50937 from Ch3LL/pillar_doc
  – 1f01489 Fix external_pillars documentation
• ISSUE #50919: (dpkirchner) state.apply test documentation unclear (refs: #50940)
• PR #50940: (terminalmage) Fix confusing state module documentation @ 2018-12-20 18:29:26 UTC
  – 4213527 Merge pull request #50940 from terminalmage/issue50919
  – 3318927 Fix confusing state module documentation
• PR #50929: (twangboy) Fix unit.utils.test_lgpo_netsh on Windows for Py3 (2018.3) @ 2018-12-20 17:50:37 UTC
  - 421e4f4 Merge pull request #50929 from twangboy/fix_test_lgpo_netsh_2018.3
  - 01f9beb Fix failing lgpo netsh tests
• PR #50917: (dwoz) Cherry pick test fixes from fluorine @ 2018-12-19 17:56:19 UTC
  - b08b7e1 Merge pull request #50917 from dwoz/test_fixes
  - 16d106b Fix linter warnings
  - b22f827 Increase and standardize ShellCase timeouts
  - a5c8e18 Do not pass unicode in environment
• PR #50913: (bdrung) Fix documentation build @ 2018-12-19 16:03:55 UTC
  - 59df6b4 Merge pull request #50913 from bdrung/fix-doc-build
  - ecb452 doc: Introduce MOCK_MODULES_MAPPING
  - cfe6824 doc: Move mock_decorator_with_params up
  - 08e6669 doc: Address pylint issues in conf.py
  - 67a3e37 doc: Mark preamble variable as raw string
  - b1e6080 doc: Fix reference to salt executors
  - e48b324 doc: Replace xa0 (non-breaking space) by spaces
  - b973e7a doc: Fix iterating over the Mock object in Python 3
  - bb29948 doc: Do not mock non-existing __mro_entries__ attribute
  - e6cf343 Do not mock json when building the documentation
  - 4acaf45 Fix sphynx error about tornado.version_info
• ISSUE #50892: (cruscio) archive.extracted source_hash is case sensitive (refs: #50906)
• PR #50906: (garethgreenaway) [2018.3] Ensure source_hash returned from get_source_sum is lowercase. @ 2018-12-19 04:22:23 UTC
  - f4e6b88 Merge pull request #50906 from garethgreenaway/50892_archive_extracted_source_hash_case_sensitive
  - bcf8f06 fixing lint
  - 543ec7b Ensure source_hash returned from get_source_sum is lowercase.
• PR #50867: (Ch3LL) [2018.3] Merge forward from 2017.7 to 2018.3 @ 2018-12-14 21:32:23 UTC
  - b95b44f Merge pull request #50867 from Ch3LL/merge-2018.3
  - 512293f Remove dunder_dictionaries.rst. Was added to modules/developing.rst
  - 89b4e09 Merge branch '2017.7' into '2018.3'
  - 858cfac Merge pull request #50863 from 5uper5hoot/fix-issue-50848
    - c90d201 Unpack exception args in python3 compatible way.
  - e28b2da Merge pull request #50752 from kstreee/fix-memory-leak
    - 98cc63a Fixes a memory leak un-cleared stream connections.
  - 1f57602 Merge pull request #50837 from Ch3LL/pyren_doc
    - a873019 Clarify py render docs when data context is available

30.2. Previous Releases
- fdf675 Merge pull request #50844 from twangboy/fix_grains
  - 473f4d7 Fix some unrelated lint
  - fd1a072 Fix grains for future windows releases
- 32dfaba Merge pull request #50816 from dubb-b/2017.7
  - dc7ff48 Pinning bootstrap to the tagged version of salt.
- b1e5f3f Merge pull request #50709 from mattLLVW/service_unmask
  - b199255 Merge branch '2017.7' into service_unmask
  - 38add1d salt style guideline
  - 823c4ad Implement unmask in states.services
  - 91a6bf5 Functional unmask, must add tests
- e4e9563 Merge pull request #50633 from astronouth7303/loader-docs
  - 03e3168 whitelist_modules is linked via enable_whitelist_modules for some reason? idk
  - 5ca1f8e Typos
  - 7cb1a87 Add a quick index of loader-related settings
  - 318ca48 Make a note to not import modules
  - 6294658 Merge remote-tracking branch 'origin/2017.7' into loader-docs
  - 678958e Editing
  - 9d59629 Merge branch '2017.7' into loader-docs
  - 374d0e9 Finish the last sections
  - 1bdd49d Add more links and write some system summaries
  - bd3796a Update TOC
  - 3a9ab1b Merge dunders into developing, expand to cover all dunders.
  - d06739a Add short writeups for a bunch of systems.
  - 705e7e4 Add a bunch of cross linking
  - 40f9b16 Add missing module type sections
  - 172d8c2 Refactor headings
  - 53154a0 Oops, missed that
  - 0dcd341 Possible horrific use of toctrees? maybe
  - bed3509 Refactor, add a TOC
  - f647c1d Fill in some missing modules
  - 9d4b596 Merge branch '2017.7' into loader-docs
  - 26468df Add missing blank line
  - 205f9e9 Some more revising
  - d4a8f7e Remove some code from some links
  - 65e4199 I feel like it should be up there
• d44f5ce Rephrase footnote
• 125e46e Add section on how modules get loaded, including giant table of names
• 5bfc6c6 Update reference to modules/index
• 4b096c1 Move all the module-development documentation into a single folder
  – dcd9b2 Merge pull request #50750 from bewing/pepa12
    • 9931a41 Fix last key detection in pepa key_value_to_tree
  – cb85d5d Merge pull request #50733 from marmarek/patch-3
    • 1011421 Report salt-call exit code from ssh_py_shim.py
  – b086ff3 Merge pull request #50756 from GwiYeong/local-client-fix
    • c488092 fix local client missing minion return
• ISSUE #50850: (akrus) key_cache: sched prints error messages in logs (refs: #50859)
• PR #50859: (garethgreenaway) [2018.3] Fixes for key_cache and python3 @ 2018-12-13 23:57:07 UTC
  – 216fa14 Merge pull request #50859 from garethgreenaway/50850_python_key_cache_file_binary
  – ebc9a01 When reading and writing the key cache file, when using Python3, ensuring the file is read &
    written in binary mode.
• PR #50828: (twangboy) Fix issues with lgpo state and util @ 2018-12-13 16:37:33 UTC
  – 6b45aad Merge pull request #50828 from twangboy/fix_lgpo
  – 05bba95 Merge branch '2018.3' into fix_lgpo
• PR #50843: (bdrung) Fix RemoveCapacityFromDiskgroupTestCase require pyvmomi @ 2018-12-12 20:36:32 UTC
  – 6ea059d Merge pull request #50843 from bdrung/fix-tests
  – 0d00ae4 Fix RemoveCapacityFromDiskgroupTestCase require pyvmomi
• ISSUE #50829: (ghost) process.absent UnicodeDecodeError (refs: #50839)
• PR #50839: (terminalmage) Fix UnicodeDecodeError in ps module @ 2018-12-12 19:59:12 UTC
  – 14d7d1d Merge pull request #50839 from terminalmage/issue50829
  – 3a3d9b7 Ensure that unicode types returned from compatibility funcs
  – 1a00abc Add unit test for _get_proc_cmdline
  – 9ea22ed Remove extraneous comments
• ISSUE saltstack/salt#49393: (Poil) file.directory recurse not always changing perms (refs: #50653)
• PR #50653: (lexvella) Check file_mode in file.directory and _check_directory @ 2018-12-12 16:30:52 UTC
  – 264a042 Merge pull request #50653 from lexvella/2018.3
  – 4ea9386 Merge branch '2018.3' into 2018.3
  – 42e4ab3 Merge branch '2018.3' into 2018.3
  – 79f6b42 Check file_mode in file.directory and _check_directory
    • 1233e2b Fix some lint
    • 56c0e55 Fix issues with lgpo state and util
• ISSUE #45026: (angeloudy) bytes error in mysql module (refs: #50823)
- **PR #50823**: (terminalmage) salt.modules.mysql: Decode fetch results before making string comparisons @ 2018-12-11 21:04:41 UTC
  - a8ad17a Merge pull request #50823 from terminalmage/issue45026
  - ec8e116 Decode fetch results before making string comparisons

- **PR #50817**: (dubb-b) Adding git ‘v’ to the bootstrap options @ 2018-12-11 17:28:10 UTC
  - e31e731 Merge pull request #50817 from dubb-b/2018.3
  - 48fc01f Adding git ‘v’ to the bootstrap options

- **PR #50780**: (twangboy) Add netsh mechanism in the LGPO module @ 2018-12-10 22:09:20 UTC
  - 9b6b39c Merge pull request #50780 from twangboy/lgpo_netsh
  - 5eea728 Fix some lint
  - f077783 Add some tests
  - 2dde12a Fix one more lint item
  - c55b7b4 Fix some lint
  - 1247598 Add more policies
  - b2b9795 Fix overly long lines
  - f18d1aa Add additional policies that use netsh
  - cb50648 Add versionadded tags
  - 00cbf26 Add the netsh mechanism to the lgpo module

- **PR #50783**: (sathieu) gitfs/git_pillar: Fix UnicodeDecodeError while cleaning stale refs @ 2018-12-10 20:34:53 UTC
  - 0351296 Merge pull request #50783 from sathieu/gitfs_stalerefs_unicode
  - ef160a6 gitfs/git_pillar: Fix UnicodeDecodeError while cleaning stale refs

- **ISSUE #45867**: (Nick2253) Icinga2 Module uses incorrect paths (refs: #50615)

- **PR #50765**: (ClaudiuPID) Fix icinga2 cert path @ 2018-12-10 18:10:24 UTC
  - PR #50615: (ClaudiuPID) Fixes icinga2 certs path for newer versions 2.8+ (refs: #50765)
  - deadf9c Merge pull request #50765 from ClaudiuPID/fix-icinga2-cert-path
  - ce1842e Merge branch '2018.3' into fix-icinga2-cert-path
  - 31878d5 Pylint fixes
  - 47bba1 Migrated to cmd.run_all and tested on working srv
  - a1ddcde Fixes icinga2 certs path for newer versions 2.8+

- **PR #50692**: (terminalmage) Update a couple test modules to use with_tempdir/with_tempfile decorators @ 2018-12-10 17:24:02 UTC
  - 9f828b9 Merge pull request #50692 from terminalmage/update-tests
  - 36a44a1a Merge branch '2018.3' into update-tests
  - be14517 Make x509 tests use tempfiles instead of hard-coding them
  - a394cd7 Update file integration tests to use decorator for tempdirs
• ISSUE #32245: (tkwilliams) git_pillar should permit automatic mapping of environment to branch a-la gitfs (refs: #50768)

• PR #50768: (sathieu) git_pillar: Add support for all_saltenvs parameter @ 2018-12-10 16:39:37 UTC
  - 3a71567 Merge pull request #50768 from sathieu/git_pillar_all_saltenvs
  - e971412 git_pillar: Add support for all_saltenvs parameter

• ISSUE #48801: (dstoliker) salt.states.user.present - mindays, warndays, and inactdays won't return to salt's default values (refs: #50796)

• PR #50796: (dwoz) Fix #48801 min, max, inact, and warn changes @ 2018-12-10 16:30:14 UTC
  - 12a8447 Merge pull request #50796 from dwoz/issue48801
  - 6b95223 fix linter errors
  - 87a04df Fix #48801 min, max, inact, and warn changes

• ISSUE #46388: (dynek) IPv4 & v6 network configuration on Debian (refs: #49355)

• ISSUE #40262: (pjediny) Salt enforces configuration from /etc/network/interfaces.d/* to /etc/network/interface (refs: #49355)

• ISSUE #38672: (valentin2105) IPv6 Network states is incomplete (refs: #49355)

• PR #50804: (Ch3LL) Back-port #49355 to 2018.3 @ 2018-12-10 16:21:31 UTC
  - PR #49355: (MTecknology) Improve management of interfaces in debian-based distributions (refs: #50804)
  - PR #46980: (MTecknology) Fix broken rendering debian_eth.jinja. (refs: #49355)
  - b266ec8b Merge pull request #50804 from Ch3LL/bp-49355
  - d34eade Use a temp file instead of /etc/network/interfaces for unit tests.
  - 622c354 Support reading multiple addresses from interface files.
  - 15c34fe Support unicode in space-delimited list; fixes unit tests in py2.
  - 0b59561 Added documentation about debian.interfaces.d/*. (Fixes: #40262)
  - 1b096fb Removed python lint.
  - 6e41225 Finished adding support for multiple IP addresses.
  - 4c7df5f Cleaned up documentation/examples in states.network:
  - 601f434 Added support for -ipaddrs and -ipv6ipaddrs to modules.debian_ip().
  - 638f899 Added support for loopback devices to modules.debian_ip(). (Fixes: #38672)
  - cf61c8d Added a bunch of unit tests for modules.debian_ip.build_interface().
  - b905cf6 Added support for dns_[nameservers,search] being a list or string.

• PR #50767: (dwoz) Make sure ldap passwords are honored @ 2018-12-05 22:59:17 UTC
  - dc9414c Merge pull request #50767 from dwoz/ldap_no_pass
  - 67aa591 Fix linter errors
  - be3945a Remove crufty import
  - 91f50a4 Add more ldap auth tests for ZD-2993
  - 055a8d5 Make sure ldap passwords are honored
• ISSUE #50364: (sathieu) git_pillar mountpoint ignores the root parameter (refs: #50626)

• PR #50626: (sathieu) git_pillar: Allow root and mountpoint parameters together @ 2018-12-05 17:46:59 UTC
  - 60aa0d5 Merge pull request #50626 from sathieu/git_pillar_mountpoint_and_root
  - 5423c27 git_pillar: Allow root and mountpoint parameters together

• PR #50745: (bbinet) Fix grafana dashboard updating when nothing has changed @ 2018-12-04 19:26:32 UTC
  - c02387e Merge pull request #50745 from bbinet/fix-grafana-dashboard-update
  - 70194d7 Fix grafana dashboard updating when nothing has changed

• PR #50737: (garethgreenaway) [develop] Merge forward from 2017.7 to 2018.8 @ 2018-12-04 16:02:13 UTC
  - ae81498 Merge pull request #50737 from garethgreenaway/merge-2017.7
  - fde8db5 Merge branch '2017.7' into merge-2017.7
  - 246c055 Merge pull request #50718 from dwoz/run_run_timeout
    - ecd8486 Honor run_run timeout for shell tests
  - 979b3aa Merge pull request #50702 from damon-atkins/jenkins_pylint
    - 5936066 ensure archiveArtifacts are always collected. Use CHANGE_BRANCH to detect merge-forward
  - 22acaaa Merge pull request #50632 from astronomouth7303/loader-exception-handler
    - 072815 Merge branch '2017.7' into loader-exception-handler
  - d9e7be1 Merge pull request #50670 from damon-atkins/jenkins_pylint
    - b6d1605 ci/lint corrected filenames and test condition on full lint Also fix CODEOWNER team name
      - 194801a Merge branch 'loader-exception-handler' of github.com:astronouth7303/salt into loader-exception-handler
      - daed80d Merge branch '2017.7' into loader-exception-handler
      - 8697744 Use single quotes per style guide
      - 07868f1 Improve logging output
      - fb05b0d Eat an exception from an entry point instead of letting it kill the system.

• PR #50685: (Ch3LL) [2018.3] Merge forward from 2017.7 to 2018.3 @ 2018-11-30 18:46:07 UTC
  - edaa9fe Merge pull request #50685 from Ch3LL/merge_2018.3
  - d46aff0 Merge branch 2017.7 into 2018.3
    - 6dc3af6 Merge pull request #50672 from garethgreenaway/49691_file_replace_search_only_return_false
      - 7e7df06 lint
      - 6b73c76 When using file.replace, with the search_only option, if the pattern does not exist in the file then we should return False.
    - 1236b51 Merge pull request #50659 from garethgreenaway/49954_gem_installed_less_than_greater_than_support
      - 0ec8bce When using the gem installed state, when passing a version that includes greater than or less than symbols, ensure that the installed versions meets that requirement.
    - 6317f3a Merge pull request #50583 from damon-atkins/jenkins_pylint
- 2d1f51c Fix lint only changes, full lint on merge forwards - lint only changes previous diff picked up out of data files, when the branch was out of date. - full limit on merge forward to pick up changes in the lint checks between versions. - update CODEOWNERS for .ci/*

- 15bf09a Merge pull request #50605 from Oloremo/fix-supervisord-dead-state-idempotency
  - ba3f281 Merge branch '2017.7' into fix-supervisord-dead-state-idempotency
  - cf9ab84 Merge branch '2017.7' into fix-supervisord-dead-state-idempotency
  - af386a2 Fixed the supervisord.dead state idempotency

- ISSUE #50016: (abednarik) State augeas.change do not update config file (refs: #50690)

- PR #50690: (garethgreenaway) [2018.3] fixes to augeas_cfg module @ 2018-11-30 18:44:42 UTC
  - 7cb2405 Merge pull request #50690 from garethgreenaway/50016_ensure_path_is_str
  - cec7cb4 Older versions of python-augeas need the path passed to aug.match to be a string.

- ISSUE #49392: (Poil) hosts not replacing existing entry (refs: #50657)

- PR #50657: (terminalmage) Rewrite host.present state to allow for removal of entries not matching IP @ 2018-11-29 17:58:40 UTC
  - a5c7639 Merge pull request #50657 from terminalmage/issue49392
  - 2dd587 Add release notes for new "clean" option
  - e4946f9 Rename "remove" argument to "clean"
  - 7fd3bce Add remove parameter to host.present state
  - 2671a30 Add unit tests for host.present state
  - 30f1b85 Remove non-matching IP's from hosts file
  - ec297a0 Performance improvements in hosts module
  - d1c2038 Add generic ip address validation function
  - 9f54720 Add ignore ability to process_read_exception

- ISSUE #48759: (MyIgel) acme.cert: Fail to update certificate after adding aliases / missing --expand (refs: #50683)

- PR #50683: (garethgreenaway) [2018.3] Fixes to acme module when adding aliases to existing certificate @ 2018-11-29 17:46:54 UTC
  - b604785 Merge pull request #50683 from garethgreenaway/48759_adding_aliases_include_expand
  - 3940af0 When adding aliases to an existing Certbot certificate, if we see a message about expanding in the stderr returned from cmd.run_all we should rerun the cmd with --expand included.

- ISSUE #50406: (glkappe) salt-ssh can’t use Mongo returner (refs: #50664)

- PR #50664: (garethgreenaway) [2018.3] Fix to logic for configuring returners @ 2018-11-28 05:24:30 UTC
  - 15f9ae4 Merge pull request #50664 from garethgreenaway/50406_salt_ssh_returner_configuration
  - 3525411 When pulling values out of the available configuration for returners we should always default to using keys for those returners, eg. mongo.user for the username. Otherwise in certain situations, eg. when using salt-ssh we will end up with the wrong value for the user.

- PR #50652: (twangboy) Fix unit.utils.test_mac_utils on Windows @ 2018-11-27 20:45:41 UTC
  - afbcf03 Merge pull request #50652 from twangboy/fix_test_mac_utils
  - c4cb729 Fix path issues with the tests
• **PR #50640**: (garethgreenaway) [2018.3] Merge forward from 2017.7 to 2018.3 @ 2018-11-26 22:33:22 UTC
  - 61a824f Merge pull request #50640 from garethgreenaway/merge-2017
  - 409c98f Merge branch '2018.3' into merge-2017

• **ISSUE #50403**: (prometheanfire) tornado 5.1.1 is not co-installable with salt on python2.7 (refs: #50639)

• **PR #50639**: (dwoz) Handle pipenv like version restrictions @ 2018-11-26 19:42:11 UTC
  - 20a2de3 Merge pull request #50639 from dwoz/pipfix
  - 9c6f653 Handle pipenv like version restrictions
    * fced78b lint
    * 45a1aa3 Merge branch '2017.7' into merge-2017
    * b2cf134 Merge pull request #50463 from dwoz/zmqpubserv
      - a289e3c Merge branch '2017.7' into zmqpubserv
    * 6679242 Merge pull request #50590 from garethgreenaway/bp-50333
      - 1f5aa4b pkg.installed currently fails when sources is used along with hold: True. This was due to a change in #48426 that swapped out sending the pkgs variable for the desired variable instead. This caused problems with pkg.hold because desired and sources are always populated, and pkg.hold can only include one or the other. This change just includes desired in the call to pkg.hold since desired has the same value for sources.
      * 39e811b Add issue url to tests
      * c4d7a43 Add debug log when connecting
      * 4f81432 Set subscribe via sockopt for better compatibility
      * 6882209 More reliable pub server publishing

• **ISSUE #49957**: (whytwolf) salt-master scheduled items ignore maxrunning. (refs: #50130)

• **PR #50130**: (garethgreenaway) [2018.3] Fixes to schedule maxrunning on master @ 2018-11-26 18:35:35 UTC
  - 5b7ab35 Merge pull request #50130 from garethgreenaway/49957_master_schedule_ignoring_maxrunning
  - 2f6dac9 Updating test_maxrunning_master to Mock get_running_jobs.
  - abda0a4 Reverting changes to doc/conf.py.
  - 6d072fc Some additional cleanup.
  - 4bd0406 Adding integration.scheduler.test_maxrunning to ignore list.
  - 45e160d Adding integration.scheduler.test_maxrunning to filename_map.yml
  - 2201a46 Fixing lint
  - 6c0ee32 removing unused cache_jobs function from utils/master.py
  - c2ed1d4 Adding some logging when the cache files are unable to be removed.
  - 44940d6 Ensure minion tests using minion options.
  - 722be43 Fixing lint
  - 65b4421 Adding some master specific functions to utils/masters.py to determine if a Salt process is running. Updating utils/schedule.py to use the appropriate running function either from utils/master.py or utils/minion.py depending on where the scheduled job is running. Adding tests to test maxrunning in scheduled jobs for both the minion and master.
- 0d65304 Swapping manual mocking to autodoc_mock_imports

- **ISSUE #50542**: (doug-stratoscale) mysql.user_exists doesn't work with Mysql 8.0.13 (refs: #50551)

- **PR #50551**: (garethgreenaway) [2018.3] Fixes to verify_login in mysql module @ 2018-11-26 17:44:25 UTC
  - 26759c2 Merge pull request #50551 from garethgreenaway/50542_mysql_ensure_verify_login_uses_connection_host
  - 96742aed4 Merge branch '2018.3' into 50542_mysql_ensure_verify_login_uses_connection_host
  - eb510a6 Merge branch '2018.3' into 50542_mysql_ensure_verify_login_uses_connection_host
  - 6d2309d Merge branch '2018.3' into 50542_mysql_ensure_verify_login_uses_connection_host
  - db89b27 Merge branch '2018.3' into 50542_mysql_ensure_verify_login_uses_connection_host
  - 0284323 Ensure that verify_login is using the host from the connection_args and not the host associated with the user. Adding a test to ensure user_exists when the passed host is the MySQL wildcard %.

- **PR #50551**: (garethgreenaway) [2018.3] minion_blackout for scheduled jobs @ 2018-11-23 11:15:38 UTC
  - 59809a1 Merge pull request #50586 from garethgreenaway/50562_minion_blackout_scheduler
  - 48673b7 Adding some defaults for minion_blackout code when pillar & grains are not available in opts. Removing some debugging code.
  - 9f422b2 Moving the minion_blackout code to the start of the try...except. Adding a test to ensure we get a log.exception when minion_blackout is True.
  - 2bf8fa5 Adding support for minion_blackout for jobs that are run from the Salt scheduler.

- **PR #50576**: (garethgreenaway) Back-port PR #50549 to 2018.3 @ 2018-11-21 14:39:55 UTC
  - **PR #50549**: (cachedout) Add security credits to release notes (refs: #50576)
  - 5c28179 Merge pull request #50576 from garethgreenaway/bp-50549
  - 807068d Typo fix
  - 2ef8307 Typo fix
  - 7c8957a Typo fix
  - c1ca603 Merge branch '2018.3' into bp-50549
  - b163380 Add security credits to release notes

- **PR #50599**: (terminalmage) Merge Sphinx fixes from 2017.7 to 2018.3 @ 2018-11-21 13:31:18 UTC
  - c9531d8 Merge pull request #50599 from terminalmage/merge-2018.3
  - ba82b07 Merge remote-tracking branch 'upstream/2017.7' into merge-2018.3
  - 1b8a8ac Merge pull request #50592 from terminalmage/docs-2017.7
    - 8127d5 Disable unused shorturls plugin

- **ISSUE #50254**: (jmcook1) file.line adding line every time (refs: #50366)
• PR #50366: (t0fik) 2018.3 fix issue50254 @ 2018-11-20 20:31:30 UTC
  - 60b46d2 Merge pull request #50366 from jdsieci/2018.3-fix-issue50254
  - a9b9fa2 Fixed pylint warnigs
  - 342786b Issue #50254 fixed
  - 1ab59e7 Added integration tests
  - 110f74f Added unit tests reproducing issue

• ISSUE #50558: (angeloudy) 'test=True' does not work with artifactory.download (refs: #50580)

• ISSUE #50155: (mikemartino) artifactory.downloaded state is not respecting test=True (refs: #50580)

• PR #50580: (garethgreenaway) [2018.3] Adding test=True to artifactory.download. @ 2018-11-20 16:37:14 UTC
  - 735c9f4 Merge pull request #50580 from garethgreenaway/50155_artificatory_download_state_test_true
  - 7dd57d0 Lint.
  - 3661ee0 Adding test=True to artifactory.download.

• ISSUE #46292: (asymetrixs) win_wua should have possibility to specify source file (refs: #50397)

• PR #50577: (garethgreenaway) Back-port PR #50397 to 2018.3 @ 2018-11-19 21:28:42 UTC
  - PR #50397: (tlemarchand) Add Win WUSA management, to install Windows Update files (.msu). (refs: #50577)
  - 015834d Merge pull request #50577 from garethgreenaway/bp-50397
  - dd2d872 Documentation
  - af6d21f Import unicode_literals from future and add versionadded tag
  - 09dc09d Disable powershell modules list Add list_kbs function
  - 05852d0 pchanges to changes named parameters
  - 16525e4 Add Win WUSA management, to install Windows Update files (.msu).

• PR #50570: (garethgreenaway) [2018.3] Merge forward from 2017.7 to 2018.3 @ 2018-11-19 20:04:05 UTC
  - 4c85119 merge-forward 2017.7 to 2018.3
  - 02238a7 Merge pull request #50520 from dwoz/issue_50459
    * 1aa2e34 Simplifie and portable homedir lookup
    * f14f747 Fix windows home dir lookup
    * d3620c3 Always set .gitconfig dir to user's home
  - edd9738 Merge pull request #50532 from dubb-b/2017.7
    * 009e52d Adding tag to ec2 cloud tests
  - b0446f5 Merge pull request #50500 from terminalmage/2017.7-docs
    * 870a364 Set docs jenkins job to treat warnings as errors
    * e03bdcd Update docs references for states with func_alias
    * 8a2c08f Disable custom sphinx automodule

• ISSUE #50266: (4815162342lost) grains.virtual show incorrect info (refs: #50519)
• PR #50519: (garethgreenaway) [2018.3] Fix to virtual core grain @ 2018-11-16 23:42:18 UTC
  6fba83c Merge pull request #50519 from garethgreenaway/50266_core_virtual_grain_fixes
  dcae2f0 Merge branch '2018.3' into 50266_core_virtual_grain_fixes
• PR #50427: (sathieu) Backports git_pillar tests improvements to 2018.3 @ 2018-11-16 16:37:29 UTC
  PR #50425: (sathieu) git_pillar: Add tests for mountpoint parameter (refs: #50427)

- 0829944 Merge pull request #50479 from Ch3LL/digital_ocean_location
  * 917781d Lint: Add blank line
  * 3583519 Update digital ocean location for cloud tests
- accf681 Merge pull request #50480 from terminalmage/docs
  * c34690e Don’t import obsolete Directive class from Sphinx
- 2e9b3d2 Merge pull request #50478 from rallytime/update-bootstrap-docs
  * 66b078c Update the bootstrap script documentation to point to bootstrap repo

- **PR #50502**: (twangboy) Add definition for RestrictRemoteSAM @ 2018-11-14 14:30:38 UTC
  - 55b4914 Merge pull request #50502 from twangboy/lgpo_2018.3
  - fe92a3a Add definition for RestrictRemoteSAM

- **ISSUE #48734**: (oddfellow) salt-run.jobs.list_jobs has Target: unknown-target (refs: #50328)

- **ISSUE #43453**: (kunal-bajpai) Runner job load is never saved to job cache (refs: #43454)

- **PR #50328**: (rallytime) Fix issue with salt-run.jobs.list_jobs where Target: unknown-target @ 2018-11-13 19:49:58 UTC
  - **PR #43454**: (kunal-bajpai) Fix save_load which is never called for returner jobs (refs: #50328)
  - c1dde7e Merge pull request #50328 from rallytime/fix-48734
  - 2c51cf9 Make target test job more specific to reduce test flakiness
  - caace3f Rewrite job cache target test to be more robust
  - b29fcfa New test must be py3 compatible...oops. :)
  - c684ec9 Fix issue #48734
  - 6859e0e Add regression test for issue #48734

- **PR #50499**: (dwoz) Fix 2018.3 build @ 2018-11-13 18:46:54 UTC
  - 351faeb Merge pull request #50499 from dwoz/build_fix
  - 5754b4a Fix 2018.3 build

- **PR #50496**: (terminalmage) Fix 2018.3 docs build warnings @ 2018-11-13 17:21:09 UTC
  - 6f4b23f Merge pull request #50496 from terminalmage/2018.3-docs
  - cb25641 Fix header underline length to avoid another sphinx warning
  - 9272f7b Fix more sphinx build errors
  - 18a8104 Late import to fix docs build errors
  - d457132 Fix sphinx build warnings in 2018.3 branch

- **ISSUE #50227**: (sheagcraig) mac_utils _available_services will fail with malformed launchd plists present (refs: #50228)
• PR #50492: (rallytime) Back-port #50228 and #50443 to 2018.3 @ 2018-11-13 16:59:15 UTC
  – PR #50443: (weswhet) fix when checking for service Label on macOS (refs: #50492)
  – PR #50228: (sheagcraig) Fix 50227 malformed plists (refs: #50492, #50443)
  – 6b272c1 Merge pull request #50492 from rallytime/bp-50228-and-50443
  – 7879a2d Fix logging format
  – f578392 Lint Fix: add mock_open import
  – e5b99b add try/except when checking for service Label
  – 3c36bdd Fix linting errors.
  – fab57de Write tests to handle invalid launchd plist XML.
  – bb42b90 Condense service result assertions, add a binary plist test.
  – a809ef Factor out another helper function, implement broken symlink test.
  – 216f7ef Update testing for mac_utils services.
  – 89d8267 Fix trailing-slash bug in User LaunchAgent appending.
  – 0e23b6e Handle bad plists by ignoring them, with py2 and py3 specific approaches
  – fa44149 Avoid AttributeError when checking for exception types.
  – fd62b33 Add secondary exception handler for malformed plists.
  – ae6f49b Make test correctly generate a double exception.

• PR #50486: (twangboy) Back port lgpo from Fluorine @ 2018-11-13 09:40:17 UTC
  – da980d9 Merge pull request #50486 from twangboy/lgpo_2018.3
  – bbbc07b Back port lgpo from Fluorine

• ISSUE #50218: (ata-sql) git.latest with unless command fails after upgrade to 2018.3.3 (refs: #50456)

• PR #50456: (terminalmage) Two bugfixes @ 2018-11-13 06:06:52 UTC
  – 7dd3438 Merge pull request #50456 from terminalmage/issue50218
  – 6143408 Add unit test for TimedProc regression
  – e234abd Add support for list of commands in git states’ onlyif/unless
  – cbf05c8 TimedProc: Don't assume args is a string
  – 87de250 Exit gracefully when mod_run_check raises exception

• PR #50455: (dubb-b) Adding the released version as the bootstrap minion. @ 2018-11-12 22:52:53 UTC
  – d8514e6 Merge pull request #50455 from dubb-b/2018.3
  – fb61482 adding git
  – 181b8a4 removing stable
  – fc93ad6 Adding the released version as the bootstrap minion.

• PR #50483: (rallytime) Back-port #50272 to 2018.3 @ 2018-11-12 22:45:05 UTC
  – PR #50272: (jyurdal) Fix out of order docker Env comparison (refs: #50483)
  – cbf3351 Merge pull request #50483 from rallytime/bp-50272
  – 0f02da7 Remove unnecessary u prefix from string literals
- fc26ae8 Add unit test for comparing containers with the same env vars
- cf7cb4b extra blank line after function definition (pylint)
- 1de9ce3 Compare sorted docker environment

**PR #50481: (rallytime) [2018.3] Merge forward from 2017.7 to 2018.3 @ 2018-11-12 22:44:15 UTC**
- 360ae6a Merge pull request #50481 from rallytime/merge-2018.3
- 1517bb3 Update old utils paths to use new paths
- d8e7c47 Merge branch '2017.7' into '2018.3'
- e5f97cd Merge pull request #50467 from dwoz/test_kitchen_up
  - 8c5e93e Use patched version of test-kitchen until next release
- b16ff9c Merge pull request #50469 from dwoz/minion_timeout_test
  - 57f702d Fix linter warning
  - 686153a Fix up integration.minion.test_timeout
- 45b438e Merge pull request #50470 from dwoz/set_time_flaky
  - 794ba17 Reset date and time after changing
- c85561e Merge pull request #50442 from rallytime/replace-docbanner
  - 193325d Update docbanner hyperlink
- 7200568 Merge pull request #50439 from rallytime/bootstrap-contributing-docs
  - d2158aa Add bootstrap section to contributing docs
- cca7a36 Merge pull request #50441 from rallytime/replace-docbanner
  - 2af92bd Update SaltConf doc banner
- 1e72d20 Merge pull request #50414 from flassman/backmerge-for-typeerror-windows-python3
  - 20fff15 use exc.winerror not exc[0] to avoid python3 TypeError
- 93095cb Merge pull request #50415 from flassman/pass-cwd-to-runas_system
  - 0113137 cwd needs to be passed from runas() to runas_system()

**ISSUE #50461: (absolutejam) elementaryOS 'pkg' __virtual__ returned false (refs: #50468)**

**PR #50468: (garethgreenaway) [2018.3] Adding elementary override to grains/core.py @ 2018-11-12 16:41:57 UTC**
- 3aaad17 Merge pull request #50468 from garethgreenaway/50461_fix_elementary_os_family_grain
- 77e8d0c On later versions of elementary, the os_family is being populated as elementary. In order for the aptpkg module to function, we need to override is to be Debian.

**ISSUE #50311: (marek-obuchowicz) pkg.installed state fails even though it succeeded (refs: #50590, #50333)**

**ISSUE #46689: (mxork) pkg.installed: hold: True not applied to a package which is already installed. (refs: #48426)**

**PR #50333: (garethgreenaway) [2018.3] Fix to pkg.installed for sources and hold: True (refs: #50590) @ 2018-11-08 18:02:33 UTC**
- PR #48426: (garethgreenaway) [2017.7] fixes to states/pkg.py (refs: #50333)
- d9179f9 Merge pull request #50333 from garethgreenaway/50311_pkg_installed_fails_sources_hold
- 7bc9b3d Merge branch '2018.3' into 50311_pkg_installed_fails_sources_hold
- 6e96728 pkg.installed currently fails when sources is used along with hold: True. This was due to a change in #48426 that swapped out sending the pkgs variable for the desired variable instead. This caused problems with pkg.hold because desired and sources are always populated, and pkg.hold can only include one or the other. This change just includes desired in the call to pkg.hold since desired has the same value for sources.

- **PR #50434**: (rallytime) [2018.3] Merge forward from 2017.7 to 2018.3 @ 2018-11-08 17:40:39 UTC
  - 193c80a Merge pull request #50434 from rallytime/merge-2018.3
  - 83dfbb2 Merge branch '2017.7' into '2018.3'
    * ef4509e Merge pull request #50370 from dwoz/pubd_msg_logs
      - 58ced12 log jid to payload size
      - 3c537b5 Log message flow to publish daemon

- **PR #50417**: (meaksh) Get the right target when using ”__env__” on git ext_pillar to avoid merging problems @ 2018-11-08 17:07:03 UTC
  - 73ce80f Merge pull request #50417 from meaksh/2018.3-fix-git_pillar-__env__-solving-for-merging
  - 71af32d Remove unicode references
  - b7af5e5 Test git_ext_pillar across multiple repos using __env__
  - 59894e2 Resolve target branch when using __env__

- **ISSUE #50292**: (dstoliker) sysctl in test=True mode results in [ERROR ] Could not open sysctl file (refs: #50423)

- **PR #50423**: (garethgreenaway) [2018.3] Fixes to sysctl modules and state @ 2018-11-08 14:13:00 UTC
  - e9464c9 Merge pull request #50423 from garethgreenaway/50292_no_error_log_test_true
  - 95a7f12 Adding file check and empty list return to freebsd_sysctl.py
  - 469c090 Adding a check to see if the config file exists, if not then return an empty list so we get the would be changes. Adding a test for this functionality.

- **ISSUE #50420**: (weswhet) mac_system virtual function fails to load on 2018.3.3 (refs: #50421)

- **PR #50421**: (weswhet) fixing an issue on mac_system where the virtual function wouldn't load @ 2018-11-07 21:57:44 UTC
  - fccf875 Merge pull request #50421 from weswhet/fix-mac_system-loader
  - 042445d fixing an issue on mac_system where the virtual function wouldn't load

- **PR #50409**: (casselt) Fix test mode for mount state if device_name_regex is used. @ 2018-11-07 16:04:45 UTC
  - d2fc910 Merge pull request #50409 from casselt/mount-device_name_regex-test-mode-fix
  - 56d5a32 Fix test mode for mount state if device_name_regex is used.

- **PR #50383**: (rallytime) [2018.3] Merge forward from 2017.7 to 2018.3 @ 2018-11-06 15:51:53 UTC
  - c2fda9d Merge pull request #50383 from rallytime/merge-2018.3
  - e993692 Merge branch '2017.7' into '2018.3'
    * cd7c95f Merge pull request #50128 from mgomersbach/fix-py3-reload-compat
      - e453e82 Satisfy pylint, use naming instead of W or E classification
      - d20581c Merge branch 'fix-py3-reload-compat' of github.com:mgomersbach/salt into fix-py3-reload-compat
• 48c6a4f Merge branch '2017.7' into fix-py3-reload-compat
• 5cd9741 Satisfy pylint
• a2838db Satisfy pylint checks
• 05c598c Fix import error by utilizing six and strict version spec
• 95174e6 Merge branch '2017.7' into fix-py3-reload-compat
• ab8b5b4 Update workaround to root of file
• 37ab1f8 Update workaround to root of file
• 253ab11 Workaround for py2 builtin, =<3.3 imp and >=3.4 libimport quirks, solves #50127

• aa6b149 Merge pull request #50354 from rallytime/version_num_docs
  • 0621f7d Add a few more feature release codenames to the version_numbers doc

• 6472100 Merge pull request #50359 from dwoz/clitest
  • 18b5d43 Increase cli batch test timeout for increased reliablity

• 99c8f35 Merge pull request #50345 from dwoz/pub_d_logging
  • fd58523 Fix linter warnings
  • 5e1db3c Fix ZMQ PubServer daemon logging works on winndows
  • 8899832 Configure logging for ZMQ PubServer daemon

• 44f7af4 Merge pull request #50350 from dubb-b/2017.7
  • 346a831 Updating the AMI's and sizes for the test run.

• b947a18 Merge pull request #50274 from rallytime/bp-41472
  • 0a1e607 When the minion key is denied by the master then exit status 77 (permission denied)

• 4725acd Merge pull request #50195 from damon-atkins/jenkins_pylint
  • eb13407 capture some extra info

• ab8e845 Merge pull request #50329 from twangboy/fix_cloud_winrm
  • cf5fb04 Check WinRM port before initiating connection

• e535b38 Merge pull request #50252 from dwoz/backport_fs_fix
  • 59ac284 Do not allow age to be a negative number

• ISSUE #49523: (MTecknology) [salt-cloud] Non-ascii chars cause an exception in salt-cloud (refs: #50146, #50236)
  • PR saltstack/salt#50174: (rallytime) Back-port #50146 to 2018.3 (refs: #50231)

• PR #50236: (rallytime) Fix salt-cloud UnicodeEncodeError when writing to stdout @ 2018-11-05 22:04:18 UTC
  • PR #50235: (rallytime) Don't encode the return values in utils/vt.py (refs: #50236)
  • PR #50231: (rallytime) Revert "Back-port #50146 to 2018.3" (refs: #50236)
  • PR #50230: (rallytime) Add various ssh tests to the filemap for salt/utils/vt.py changes (refs: #50291, #50235)
  • PR #50174: (rallytime) Back-port #50146 to 2018.3 (refs: #50236)
  • PR #50146: (MTecknology) Improve handling of non-ascii characters in terminal output. (Fixes: #49523) (refs: #50235, #saltstack/salt#50174, #50174, #50231, #50236)
• ISSUE #50062: (whytwolf) max_event_size does not always trim large events. (refs: #50382)

• PR #50382: (garethgreenaway) [2018.3] Fix to utils/dicttrim.py to honor max_event_size with nested dictionaries @ 2018-11-05 20:04:06 UTC
  - ed4fa87 Merge pull request #50382 from garethgreenaway/50062_max_event_size_does_not_always_trim_large_events
  - 039f3d1 Increase limit for trimming.
  - 7f77bfe Adding test for utils/dicttrim.py
  - 9b55ac7 Adding _trim_dict_in_dict to utils/dicttrim.py to be called from trim_dict when data contains a nested dictionary. This will ensure that values will still be trimmed correctly.

• PR #50387: (rallytime) Back-port #50339 to 2018.3 @ 2018-11-05 20:03:15 UTC
  - PR #50339: (bartlaarhoven) The driver requires dependency, not the other way around. (refs: #50387)
  - 493d653 Merge pull request #50387 from rallytime/bp-50339
  - a3f264d Lint: Add extra blank line
  - bd18412 The driver requires dependency, not the other way around.

• ISSUE #41342: (githubcdr) beacons.state does not save as list (refs: #50347)

• PR #50347: (garethgreenaway) [2018.3] Fixes to beacon state module @ 2018-11-05 14:19:41 UTC
  - 3022b7d Merge pull request #50347 from garethgreenaway/41342_beacon_state_module_fixes
  - 8885d1f Merge branch '2018.3' into 41342_beacon_state_module_fixes
  - c2354a9 Fixing beacon state test. Adding a reset function to beacon module to clear out beacon configuration. Useful for tests runs to ensure bits are left over between runs.
  - 2390f47 Adding SaltReturnAssertsMixin back in
  - 677d090 Remove zookeeper reference.
  - f3dee43 Updating the beacon state module to ensure that the format of the beacon data that is being sent along to the beacon execution module is in the right format.

• ISSUE #41583: (seanjnkns) mount.swap for swap file test=True results wrong (refs: #50358)

• PR #50358: (garethgreenaway) [2018.3] fixes to function mount.swap in mount state @ 2018-11-05 14:16:50 UTC
  - 929525a Merge pull request #50358 from garethgreenaway/41583_mount_swap_test_true Wrong_results
  - b8ded8b Updating the swap function in the mount.swap function also check the device name when checking the fstab data. Updating tests to reflect new behavior.
    * d07c84d reordering ret dictionary in load test to ascending order
    * f704128 fixing type in load beacon module and adding option validators to config check function along with mock default values in test, fixes #48343
    * 4114a4f fixing type in load beacon module and adding option validators to config check function along with mock default values in test

• ISSUE #49225: (onnodb) [win_lgpo] lgpo_set always reports failure; Registry.pol corruption (refs: #50006)

  • ba526ad remove unused import
  
  • 220e57f create 2 simple unit tests for the netyang state module and fix issue in #47425
  
  • 20bf306 reproduce bug in 47425

• PR #50290: (twangboy) Fix test_state for Windows @ 2018-10-31 19:28:34 UTC
  
  • af1075b Merge pull request #50290 from twangboy/fix_test_state
  
  • 69c02fc Fix some lint and some typos
- d184013 Fix typo
- 92b5ea0 Create salt util that copies file security info

**ISSUE #50050**: (terminalmage) Backport runtests.py's `--from-filenames` functionality to 2018.3 branch (refs: #50308, #50291)

**PR #50291**: (rallytime) Back-port #50230 to 2018.3 @ 2018-10-31 19:22:25 UTC
- PR #50230: (rallytime) Add various ssh tests to the filemap for salt/utils/vt.py changes (refs: #50291, #50235)
- 045d81c Merge pull request #50291 from rallytime/bp-50230
- 1aae681 Merge branch '2018.3' into bp-50230
- 1ef712a Add various ssh tests to the filemap for salt/utils/vt.py changes

**PR #50315**: (rallytime) [2018.3] Merge forward from 2018.3.3 to 2018.3 @ 2018-10-31 14:16:34 UTC
- 00437aa Merge pull request #50315 from rallytime/merge-2018.3
- 422465e Merge branch '2018.3.3' into '2018.3'
- 4d9e2a0 Merge pull request #50088 from vulnbe/fix-incorrect-id-handling-2018-3-3
- 619f2f2 Fix incorrect id handling in file state

**PR #50309**: (rallytime) [2018.3] Merge forward from 2017.7 to 2018.3 @ 2018-10-30 16:07:25 UTC
- 84ee7a3 Merge pull request #50309 from rallytime/merge-2018.3
- 381a59d Merge branch '2017.7' into '2018.3'
- 11fa33e Merge pull request #50295 from dubb-b/remove-cloud-change
  - 80982ad Removing an un needed change and maybe fixing the lint error
  - e00c507 Merge pull request #50287 from whytewolf/boto_vpc
    - 5a39644 minor correction to boto_vpc.route_table_present example, subnet_names was on wrong indent level
  - 37ae06c Merge pull request #50280 from gtmanfred/2017.7
    - 5808074 fix InstallRequirement.from_line for pip 18.1

**ISSUE #50050**: (terminalmage) Backport runtests.py's `--from-filenames` functionality to 2018.3 branch (refs: #50308, #50291)

**PR #50308**: (rallytime) Fix matcher grain file @ 2018-10-30 15:27:47 UTC
- PR #50182: (terminalmage) Backport runtests.py modifications from develop to 2018.3 (refs: #50308)
- b805bab Merge pull request #50308 from rallytime/test-fixes
- f238522 Fix matcher grain file

**PR #50270**: (terrible-broom) apt: speedup installing packages with `>=` or `<=` and reduced memory... @ 2018-10-30 13:24:36 UTC
- 57fe6cd Merge pull request #50270 from terrible-broom/feature/apt-cache-show-instead-of-dump
- 6c1b05a Lint: add extra blank line
- a4df706 fix review notes
- d059edd apt: speedup installing packages with `>=` or `<=` and reduced memory consumption

**PR #50293**: (gtmanfred) update jenkins version for 2018.3 @ 2018-10-29 23:39:34 UTC
4a65402 Merge pull request #50293 from saltstack/jenkins
- fe6bce4 update jenkins version for 2018.3
- PR saltstack/salt-jenkins#1182: (gtmanfred) clean up salt.utils for using 2018.3.3 (refs: #50289)
- PR #50289: (gtmanfred) ignore empty line in localectl status output @ 2018-10-29 21:39:07 UTC
  - 935f181 Merge pull request #50289 from gtmanfred/2018.3
  - fb43601 fix test
  - 5eb0e37 add extra space to localemod test
  - e8dc8ba if line in output of localectl is empty, ignore it
- PR #50276: (rallytime) [2018.3] Merge forward from 2017.7 to 2018.3 @ 2018-10-29 19:05:15 UTC
  - 10ba8b4 Merge pull request #50276 from rallytime/merge-2018.3
  - f05abb0 Merge branch '2017.7' into '2018.3'
    - 6ae8a33 Merge pull request #50281 from dubb-b/add_subnet
      - 4defc7c Lint: Add extra blank line
      - cebfd8a Fixing lint error
      - 0da6301 Merge branch '2017.7' of https://github.com/saltstack/salt into add_subnet
      - 2df6115 Adding subnetID so it knows the right VPC to build the node in.
  - a0c8bdc Merge branch '2017.7' into '2018.3'
    - b94a43b Merge pull request #50184 from ethanculler/fix-minion-return-exception-with-return
      - 283d41c Merge branch '2017.7' into fix-minion-return-exception-with-return
      - a4e54d7 Added handling for minion return exceptions containing the word "return"
    - 6b009b4 Merge pull request #50258 from dubb-b/fix_cloud_ec2
      - 6a1e9f0 Adding securitygroupname as the config instead of securitygroup
    - 3e1aac9 Merge pull request #50251 from gtmanfred/2017.7
      - 061e599 bump salt version to 2017.7.8
    - fe9bc81 Merge pull request #50233 from Ch3LL/bp-50232
      - f83460d change order of search engine ids
      - b3f217 Update search engine IDs for releases
- PR #50282: (twangboy) Fix unit.beacons.test_diskusage on Windows @ 2018-10-29 18:37:13 UTC
  - 0f1dc08 Merge pull request #50282 from twangboy/fix_test_diskusage
  - fd369dd Mock is_windows = False
- PR #50182: (terminalmage) Backport runtests.py modifications from develop to 2018.3 (refs: #50308) @ 2018-10-29 16:25:07 UTC
  - f7c2f04 Merge pull request #50182 from terminalmage/issue50050
  - 113d76e Revert "Move jinja templating tests alongside salt/utils/jinja.py's tests"
  - 3057ca4 Lint fix: add extra blank line in core.py
  - 8968f9d Revert "Rename test_map_conf test file to respect naming convention"
- 85a9395 Remove saltclass pillar unit test for list expansion
- 3d95673 Use get_config_dir() instead of self.config_dir
- e8b3a62 Add init file back in for unit/client pkg

- ab4a670 Remove pgjsonb returner unit tests
- 68ab3ee Remove "test_custom" from grains section of filename_map
- 6814698 Remove test_error from scheduler tests
- c55def0 Add init file back in for integration/cloud/clouds pkg
- f485b4a enable testing only filemaps
- dfa05b9 Remove test files for beacons that don't exist in 2018.3
- 85612cf runtests.py: Fix IndexError in --from-filenames
- 25097f9 Make sure from-filenames intersect with names-file
- ed864ce runtests.py: Accept modified file list from a text file
- 05975c4 Add some doc tests to the filemap that should run on every PR
- b1ee2e5 Set a default value for the filename map path
- 5ea1024 Add documentation explaining naming convention for test files
- 8f790c0 Fix conflicting dict key in filename map
- f2e5512 Evan Moar Lint
- 65fe9a Moar Lint
- 39c2455 Lint
- dd20f12 Make sure we always run the module names test
- 2ac939e Add test to check test module names and make sure they match the naming convention
- 7852d98 Add integration.netapi.rest_tornado.test_app to filename map
- 662ca0d Rename files to match naming convention
- 186d333 Add back changes lost in cherry-pick
- a236531 Add back test accidentally deleted when cherry-picking
- eaa4da3 Rename providers to clouds to respect naming convention
- 85b96e Rename some files to avoid them being identified as test modules
- bfb6015 Rename/consolidate salt.utils unit tests to conform to naming convention
- 84749dd Consolidate and move salt-ssh unit tests to proper location
- 71825a5 Consolidate and move loader tests to test/unit/test_loader.py
- 8326a09 Rename test_map_conf test file to respect naming convention
- 6d9c2eb Move jinja templating tests alongside salt/utils/jinja.py's tests
- 1ef43a3 Add additional paths to the filename map
- 75e6731 Use the new helper to get the test mods
- c3dc8ec Add function to get all of the test modules
- c5593bc Rename custom_grains.py so it's not identified as a test module
- 330c211 Consolidate saltclass pillar unit tests into single module
- a642619 Rename test pgjsonb returner test file to match naming convention
- 6433c48 Don't import old module name
- a97e032 Move helper outside of for loop
- 3f1b6fd Add more unit test mapping
- ac3406d Fill out the filename map a bit
- 07d6f2a Enhancements to --from-filenames, --filename-map options
- b851a41 Don't run unit or integration tests unnecessarily
- 569276b Add an initial filename_map
- 44199b1 Add --from-filenames and --filename-map options to parser

* PR #50267: (m03) Fix missing aptly config paths @ 2018-10-29 13:27:23 UTC

  - 8dd4f43 Merge pull request #50172 from rallytime/bp-50140
  - 02e0ea0 lint fix
  - 819c46c fix lint errors and code factorization
  - 8aa3598 Fix lint error
  - 9092c4e Adding support for XCP-ng
  - c516bc5 Adding XCP-ng to os family map

* PR #50063: (twangboy) Use long when setting REG_QWORD @ 2018-10-25 13:45:03 UTC
  - 9ad43f2 Merge pull request #50063 from twangboy/fix_50039
Salt Documentation, Release 3003.3

- 5fdba7d Disable lint error
- 84b8dd6 Add tests
- 4644bb6 Use long when setting REG_QWORD

**ISSUE #49965**: (nkrishnakishor) Beacon: Usage in windows (refs: #50188)

**PR #50188**: (garethgreenaway) [2018.3] fixes to diskusage beacon @ 2018-10-25 13:41:19 UTC
- 01b083e Merge pull request #50188 from garethgreenaway/49965_beacon_diskusage_windows
- 1f0ab27 Merge branch '2018.3' into 49965_beacon_diskusage_windows
- 42b3203 Fixing lint
- f65fa57 Fixing a bug in the diskusage beacon that prevented it from working on Windows. Adding a couple tests to test functionality on Windows.

**PR #50214**: (rallytime) [2018.3] Merge forward from 2017.7 to 2018.3 @ 2018-10-25 13:38:40 UTC
- 9ea51c0 Merge pull request #50214 from rallytime/merge-2018.3
- 897145c Merge branch '2017.7' into '2018.3'
  - 017d394 Merge pull request #50202 from Ch3LL/_2017.7.8
    - d520f9a Add tests with filename in token data
    - d45f6c7 Add empty token salt-api integration tests
    - 652dbf6 Ensure that tokens are hex to avoid hanging/errors in cherrypy
  - f28a4fa Merge pull request #50211 from channias/fix-spm-modules-install
    - 9b203d5 Fix broken install of additional modules in SPM packages
  - 6b4e07b Merge pull request #50212 from dwoz/test_no_fail
    - 7f613ac Do not fail if process already ended
  - 85e22d2 Merge pull request #50207 from Ch3LL/2update_version_doc_2017.7
    - 198d25c Add 2017.7.8 previous release
    - d4e26ac Update release versions for the 2017.7 branch
  - d035695 Merge pull request #50205 from Ch3LL/rm_2017.7.8
    - 71ee68b [2017.7.8] remove in progress and add security details
  - cc341f2 Merge pull request #50180 from max-arnold/2017.7
    - 881a521 Revert curly braces example for nested dictionaries
  - 622bb51 Merge pull request #50026 from damon-atkins/jenkins_pylint
    - aebce88 Merge branch '2017.7' into jenkins_pylint
    - 5f708fa use awk to create the other files, so git does not need to search again
    - 6b96a24 Adjust jenkins linting process, only run stage if required, use git diff to find files, instead of find, report on status, changed and deleted files, lint only changed files.
  - aa66d1b Merge pull request #50158 from vutny/doc/2017.7/fix-http-tutorial
    - fe2d70d [DOC] Fix JSON payload example in HTTP tutorial

**ISSUE #50162**: (rbthomp) Scheduled job runs in endless loop when using when: and splay: together. (refs: #50216)
**PR #50216:** (garethgreenaway) [2018.3] Fixes to scheduler, list of whens plus splay @ 2018-10-25 13:31:26 UTC

- 51b3fa4 Merge pull request #50216 from garethgreenaway/50162_when_plus_splay_endless_loop
- 685509f Fixing an issue when a combination of the when parameter as a list plus using the splay parameter would cause the schedule to continuously run jobs in an endless loop, regardless of if their scheduled time had been reached. Also fixing a related issue where scheduled jobs that rely on _next_fire_time were not being run as the corrected splayed time but rather running at the original scheduled time. Adding new tests.

**PR #50190:** (dwoz) Fix test_managed_file_with_grains_data on Windows @ 2018-10-24 22:43:35 UTC

- 43303fb Merge pull request #50190 from dwoz/grains_template_test
- b77db48 Fix test_managed_file_with_grains_data on Windows

**PR #50187:** (garethgreenaway) [2018.3] Adding fixes to scheduler tests to 2018.3 @ 2018-10-24 19:45:32 UTC

- PR #49871: (garethgreenaway) [fluorine] Updating scheduler tests for OS X (refs: #50187)
- 462314b Merge pull request #50187 from garethgreenaway/port_49871_to_2018_3
- 25e7cb6 Merge branch '2018.3' into port_49871_to_2018_3
- d232db Update test_eval.py
- d8d8559 Fixing lint
- 76e6232 Removing unnecessary debugging lines
- d2d622 Back porting #49871 to 2018.3. Adding some additional changes to ensure they are passing on OS X.

**PR #50201:** (Ch3LL) [2018.3] Ensure that tokens are hex to avoid hanging/errors in cherrypy @ 2018-10-24 19:44:23 UTC

- 8ad9a1b Merge pull request #50201 from Ch3LL/_2018.3.3

**PR #50208:** (Ch3LL) Update release versions for the 2018.3 branch @ 2018-10-24 15:52:19 UTC

- 88673ad Merge pull request #50208 from Ch3LL/update_version_doc_2018.3
- cdf493 Add 2017.7.8 previous release
- 6f775e7 Update release versions for the 2018.3 branch

**PR #50206:** (Ch3LL) [2018.3.3] remove in progress and add security details @ 2018-10-24 15:50:50 UTC

- db8ef1e Merge pull request #50206 from Ch3LL/rn_2018.3.3
- 896ca31 Add 2016.11.10 release notes to 2018.3 branch
- 1e34158 [2018.3.3] remove in progress and add security details

**PR #50200:** (rallytime) Back-port #50181 to 2018.3 @ 2018-10-24 15:49:59 UTC

- PR #50181: (cro) Testinfra has a python packaging issue that is making version 1.17.0 fail to install some places (refs: #50200)
- 3d3db70 Merge pull request #50200 from rallytime/bp-50181
- f3e5399 Ignore testinfra 1.17.0

**ISSUE #49523:** (MTecknology) [salt-cloud] Non-ascii chars cause an exception in salt-cloud (refs: #50146, #50236)

**PR #50174:** (rallytime) Back-port #50146 to 2018.3 (refs: #50236) @ 2018-10-23 18:16:45 UTC
- PR #50146: (MTecknology) Improve handling of non-ascii characters in terminal output. (Fixes: #49523) (refs: #50235, #saltstack/salt#50174) (MTecknology) Improve handling of non-ascii characters in terminal output. (Fixes: #49523)
- 5f904dd Merge pull request #50174 from rallytime/bp-50146
- 601a5b8 Improve handling of non-ascii characters in terminal output. (Fixes: #49523)
- ISSUE #50142: (m03) stringutils.to_none AttributeError: 'module' object has no attribute 'tex_type' (refs: #50143)
- PR #50173: (rallytime) Back-port #50143 to 2018.3 @ 2018-10-23 17:13:55 UTC
  - PR #50143: (m03) Fix #50142, stringutils.to_none (refs: #50173)
  - PR #45429: (terminalmage) [PY3] Add unicode_literals to salt.utils modules (R-S) (refs: #50143)
  - 1cd0339 Merge pull request #50173 from rallytime/bp-50143
  - f5d6080 Add test_to_none
  - c0ce36b Fix #50142, stringutils.to_none
- PR #50171: (terminalmage) Fix invalid RST link in docker_network docs @ 2018-10-23 13:40:36 UTC
  - 9331f1e Merge pull request #50171 from terminalmage/docs
  - 7ea1d6c Fix invalid RST link in docker_network docs
- PR #50161: (rmarcinik) Add a missing result for task.info @ 2018-10-23 13:31:43 UTC
  - 16eece3 Merge pull request #50161 from rmarcinik/patch-1
  - 9848f06 Add a missing result for task.info
- PR #50136: (terminalmage) Add some debug logging before and after states gather pillar data @ 2018-10-22 14:40:38 UTC
  - 28bc5e3 Merge pull request #50136 from terminalmage/debug-logging
  - 8592a0b Add some debug logging before and after states gather pillar data
- ISSUE #50129: (kmatsoukas) Call to network.get_route fails when interface name contains a dash (refs: #50147)
- PR #50147: (garethgreenaway) [2018.3] Fix to modules/network.py @ 2018-10-22 14:31:03 UTC
  - 593c7ff Merge pull request #50147 from garethgreenaway/50129_network_get_route_fails_dash_in_name
  - 8fa87e3 Update test_network.py
  - 3117969 Fixing scenario where the interface for the default route has a dash in it, regular expression used in get_route currently doesn't not account for this.. Adding some additional tests for network.get_route.
- PR #50156: (rallytime) [2018.3] Merge forward from 2017.7 to 2018.3 @ 2018-10-22 14:24:39 UTC
  - 5c7a7d9 Merge pull request #50156 from rallytime/merge-2018.3
  - 87e20fd Merge branch '2017.7' into '2018.3'
  - 1a90c4f Merge pull request #50144 from dwoz/winrm_fs_release
    * 0951d85 Use newest winrm-fs release
  - e096560 Merge pull request #50113 from rallytime/bp-49989
    * 27c7a5c Increase centos7-py2 kitchen pr timeout to 8 hours
- PR #50148: (MTecknology) Proxmox fixups @ 2018-10-22 11:55:10 UTC
  - ce375f4 Merge pull request #50148 from MTecknology/proxmox-fixups
- 4959947 Race condition still exists at one second timeout.
- 3a62f74 Add support for setting root ssh pubkey to proxmox containers.

• PR #50085: (dwoz) Fix test_win_pkg yet again @ 2018-10-19 18:16:16 UTC
  - 0ece06e Merge pull request #50085 from dwoz/win_pkg-redux
  - f22630e Merge branch '2018.3' into win_pkg-redux
  - 0b033a6 Do not allow age to be a negative number
  - a24d8b8 Debug file list cache
  - 9f5722a The test is not a flush problem
  - 071f8a0 Add cache file name to list cache log
  - 128c2c5 Flush and sync file contents
  - 7d361d8 Add debug log when file list is returned from cache

• PR #49980: (twangboy) Add support for AddPrinterDrivers @ 2018-10-19 13:19:41 UTC
  - 0069247 Merge pull request #49980 from twangboy/lgpo_add_printer_drivers
  - 76c9301 Add support for AddPrinterDrivers

• PR #50114: (rallytime) Back-port #50061 to 2018.3 @ 2018-10-19 11:46:03 UTC
  - PR #50061: (rongzeng54) pkg.install bugfix (refs: #50114)
  - de23c83 Merge pull request #50114 from rallytime/bp-50061
  - 1f09104 Add unit test for pkg.install with epoch
  - af253c6 pkg.install bugfix

• ISSUE #50074: (bigpick) Arista EOS Salt Minion - Debug Log Flooded with Repeated Message (refs: #50115)

• PR #50115: (garethgreenaway) [2018.3] Apply scheduler fixes and tests from #49104 to 2018.3 @ 2018-10-19 11:45:31 UTC
  - PR #49104: (garethgreenaway) [fluorine] Fixes to scheduler for jobs with seconds, minutes, etc. (refs: #50115)
  - 9188bec Merge pull request #50115 from garethgreenaway/apply_49104_to_2018_3
  - adb1e79 Apply scheduler fixes and tests from #49104 to 2018.3

• PR #50119: (terminalmage) Squelch spurious errors logged in unit tests @ 2018-10-19 11:42:31 UTC
  - e892042 Merge pull request #50119 from terminalmage/boto-tests
  - 91812ff Squelch spurious errors logged in unit tests

• PR #50120: (terminalmage) Fix bad merge conflict resolution @ 2018-10-19 11:38:35 UTC
  - 35449b4 Merge pull request #50120 from terminalmage/salt-jenkins-1137
  - 1ddfd26 Fix bad merge conflict resolution

• PR #50013: (Giandom) Passed kwargs to db_exists in db_remove method @ 2018-10-18 11:28:30 UTC
  - 5123488 Merge pull request #50013 from Giandom/2018.3
  - 9c91d3f Merge branch '2018.3' into 2018.3
  - 06bb245 Merge branch '2018.3' into 2018.3
  - 04a99e0 Passed kwargs to db_remove
• **PR #50092**: (rallytime) [2018.3] Merge forward from 2017.7 to 2018.3 @ 2018-10-17 19:57:07 UTC
  - aa94f60 Merge pull request #50092 from rallytime/merge-2018.3
  - 860966 Update old utils paths to use new paths
  - a984ad Merge branch '2017.7' into '2018.3'
    - 7ec3840 Merge pull request #49794 from twangboy/fix_groupadd_test
      - 3d3b67d Gate for Windows
      - decfa52 Check value of result instead of entire dict
    - e56283 Merge pull request #50028 from basseed/fix-windows-virtual-grain
      - 8129ac6 removed whitespaces
      - 82fa866 Fix #50015, Windows grain defaults to physical as unix grain

• **ISSUE #50073**: (jorotenev) boto_cloudfront update distribution fails (refs: #50082)

• **PR #50082**: (garethgreenaway) [2018.3] Fixing a typo in the boto_cloudfront @ 2018-10-17 19:35:00 UTC
  - d1f2c5d Merge pull request #50082 from garethgreenaway/50073_fixing_typo_boto_cloudfront
  - b5b90a1 Fixing a typo in the boto_cloudfront.

• **PR #50090**: (garethgreenaway) [2018.3] Fix to utils/vault.py @ 2018-10-17 13:57:30 UTC
  - 05bd2a0 Merge pull request #50090 from garethgreenaway/fix_vault_sdb_runner_test
  - 444ae5 Merge branch '2018.3' into fix_vault_sdb_runner_test

• **ISSUE #49275**: (dgengtek) execution module cp.cache_file fails with error 'invalid arguments to setopt' (refs: #50080)

• **PR #50080**: (terminalmage) Ensure all string kwargs passed to Tornado’s httpclient are str types @ 2018-10-16 21:01:41 UTC
  - 7092879 Merge pull request #50080 from terminalmage/issue49275
  - 4a6c327 Ensure all string kwargs passed to Tornado’s httpclient are str types

• **ISSUE #44979**: (hunkeelin) Firewalld state cause horrid performance during saltrun. (refs: #49811)

• **PR #49811**: (nhavens) Optimize firewalld state @ 2018-10-16 11:26:46 UTC
  - 45b6da3 Merge pull request #49811 from nhavens/optimize-firewalld-state
  - 7d6e628 Merge branch '2018.3' into optimize-firewalld-state
  - a718b0c Merge branch '2018.3' into optimize-firewalld-state
  - f7299b9 Merge branch '2018.3' into optimize-firewalld-state
  - f289618 Merge branch '2018.3' into optimize-firewalld-state

  - 7cebab4 Merge branch '2018.3' into optimize-firewalld-state
  - c38bb7d Merge branch '2018.3' into optimize-firewalld-state
  - abed058 Merge branch '2018.3' into optimize-firewalld-state
  - 0ec1f82 Merge branch '2018.3' into optimize-firewalld-state
  - db6b23b Merge branch '2018.3' into optimize-firewalld-state
  - 4ca7e12 Merge branch '2018.3' into optimize-firewalld-state
- 4f7c914 fix invalid icmp type handling in firewalld state
- 2d2e2eb resolve lint error in firewalld state
- 081424d resolve indentation issues in updates to firewalld state
- c92c4fe optimize firewalld.present rich rule handling
- 25d1daf optimize firewalld.present source handling
- 5f62c14 optimize firewalld.present interface handling
- 69f2c6c optimize firewalld.present service handling
- 71ec8e7 optimize firewalld.present port forward handling
- f18e09e optimize firewalld.present open port handling
- 35193dc clean up firewalld.present masquerade code (DRY)
- 8c88784 optimize firewalld.present icmp block handling

- **PR #50055**: (rallytime) Back-port #50024 to 2018.3 @ 2018-10-16 09:14:06 UTC
  - PR #50024: (rwaweber) docs: Correct napalm topic spelling mistake and smooth out sentence (refs: #50055)
  - b94e0a0 Merge pull request #50055 from rallytime/bp-50024
  - 1ea72a0 docs: Correct spelling mistake and smooth out sentence

- **PR #50056**: (rallytime) Back-port #50029 to 2018.3 @ 2018-10-16 09:12:59 UTC
  - PR #50029: (thebluesnevrdie) Expose docs for Ansible modules (refs: #50056)
  - 14f3fac Merge pull request #50056 from rallytime/bp-50029
  - 2e46a78 Expose docs for Ansible modules

- **PR #50064**: (rallytime) Back-port #50022 to 2018.3 @ 2018-10-16 09:09:47 UTC
  - PR #50022: (bluesliverx) Make test check_pillar more lenient (refs: #50064)
  - f3fe4b6 Merge pull request #50064 from rallytime/bp-50022
  - 40da3ce Make test check_pillar more lenient

- **ISSUE #49988**: (whytetwol) currently http error logging of urls contains full URL including passwords. (refs: #50066)

- **PR #50066**: (garethgreenaway) [2018.3] Redact any passwords from source paths @ 2018-10-16 09:08:25 UTC
  - c2a46ce Merge pull request #50066 from garethgreenaway/49988_redact_passwords_in_source
  - 27efe10 Redact any passwords that are in http/https based source paths.

- **PR #50068**: (garethgreenaway) [2018.3] Updating salt.utils.mac_utils @ 2018-10-16 09:07:10 UTC
  - ab2cb51 Merge pull request #50068 from garethgreenaway/1140_mac_system_tests_2018_3_failing
  - eedc6b8 Updating another reference to salt.utils.mac_utils to use __utils__

- **6ef5ce4** Due to a previous PR the test_sdb_runner in sdb.test_vault was failing because of an exception that was being swallowed in the test run function. The cause was that when vault related functions were being run, if they were being run on the master then they were being forced to run through the _get_token_and_url_from_master() function, which is pull the id element out of the grains dictionary. When the call was taking place from a runner, the exception was popping up since there is no id when called from a runner. This fix checks to see if the id exists in the dictionary
first, if it is there then _get_token_and_url_from_master() is called, otherwise _use_local_config is called.

- **PR #49987**: (terminalmage) Make Pillar no longer munge file_roots @ 2018-10-15 21:58:08 UTC
  - 4c4bb5a Merge pull request #49987 from terminalmage/pillar_roots
  - f59506d Update tests to reflect behavior changes
  - 58f5fde Make Pillar no longer munge file_roots

- **PR #50065**: (rallytime) Back-port #50044 to 2018.3 @ 2018-10-15 21:32:37 UTC
  - PR #50044: (mchugh19) add saltclass info from release notes to docs (refs: #50065)
  - 1e377ac Merge pull request #50065 from rallytime/bp-50044
  - 1eaaab7 Doc title formatting must match doc name length
  - 6ac26b6 add saltclass docs from release notes

- **PR #50038**: (s0undt3ch) Don't squash the traceback @ 2018-10-15 20:36:55 UTC
  - 8a6b435 Merge pull request #50038 from s0undt3ch/2018.3
  - 852257a Don't squash the traceback

- **PR #50054**: (rallytime) Back-port #50004 to 2018.3 @ 2018-10-15 20:36:03 UTC
  - PR #50004: (kiemlicz) https://github.com/saltstack/salt/issues/49883 (refs: #50054)
  - dbfd7ee Merge pull request #50054 from rallytime/bp-50004
  - 88e3202 https://github.com/saltstack/salt/issues/49883

- **PR #50057**: (rallytime) [2018.3] Merge forward from 2017.7 to 2018.3 @ 2018-10-15 20:35:46 UTC
  - a9e9974 Merge pull request #50057 from rallytime/merge-2018.3
  - 1b5b018 Merge branch ’2017.7’ into ’2018.3’
    - 9eb17ea Merge pull request #50047 from rallytime/bp-49605
      - e3a0f7b Add gce fix to 2017.7.9 release notes
      - e6d86fc document GCE instance credentials configuration
      - c3a0d1b allow empty service_account_private_key in GCE driver
    - 6ccd390 Merge pull request #50017 from gtmanfred/iptables
      - e552e4f Use parse_known_args when checking iptables rules
    - a6a66b9 Merge pull request #50012 from dwoz/norm_log
      - f96b29d Use normal log formatting and add jid
    - 15f86b2 Merge pull request #50001 from kyentei/doc-fix-gpg
      - 3d6ee3e Fix gpg state Documentation
    - 7a235d7 Merge pull request #50000 from kyentei/doc-fix-lvm
      - c2f3d87 Fix LVM state documentation
    - 4edd094 Merge pull request #49999 from kyentei/doc-fix-proxy
      - a180ed7 Fix proxy documentation
    - 58d2302 Merge pull request #49998 from kyentei/doc-fix-process
• edd4f40 Fix documentation on process.py
  • 411635b Merge pull request #49997 from kyentei/doc-fix-mysql
  • 01059cc Fix documentation for mysql processlist

• PR #50060: (rallytime) [2018.3] Fix some pylint issues that have popped up recently @ 2018-10-15 20:35:22 UTC
  - f1bcb1f Merge pull request #50060 from rallytime/fix-lint
  - a8f4f39 Merge branch '2018.3' into fix-lint

• ISSUE #49927: (thetaurean) File Tree external pillar fails to render templates in python 3 (refs: #49943)

• PR #50052: (rallytime) Back-port #49943 to 2018.3 @ 2018-10-15 20:06:20 UTC
  - PR #49943: (thetaurean) Coerce string when calling compile_template_str (refs: #50052)
  - b26b21c Merge pull request #50052 from rallytime/bp-49943
  - d336dec Handle non-ASCII chars during template data decode
  - 435af7b Adjust import to expose stringutils namespace
  - 958c630 Coerce string when calling compile_template_str
  - e73f13d [2018.3] Fix some pylint issues that have popped up recently

• PR #49809: (Ch3LL) Add additional asserts to help investigate test_win_pkg failure @ 2018-10-13 18:00:09 UTC
  - fe7669 Merge pull request #49809 from Ch3LL/win_pkg_flaky
  - f795b60 Merge pull request #7 from dwoz/win_pkg_flaky
    - beaab2a Fix win_pkg test
  - 75809b4 Merge pull request #6 from dwoz/win_pkg_flaky
    - e5ea3f1 Try running fsync to avoid fs caching race condition
  - fd5e842 Merge pull request #5 from dwoz/win_pkg_flaky
    - c386826 Log results of cache_dir for now
  - 2cd4058 Merge pull request #4 from dwoz/win_pkg_flaky
    - 1005b91 Debug win_pkg
  - 9dce5cc Fix the assertion message order
  - 18e9a28 Add additional asserts to help investigate test_win_pkg failure

• PR #49983: (rallytime) [2018.3] Merge forward from 2017.7 to 2018.3 @ 2018-10-11 13:27:34 UTC
  - 8949873 Merge pull request #49983 from rallytime/merge-2018.3
  - f8e73e8 Merge branch '2017.7' into '2018.3'
    - a8a3811 Merge pull request #49972 from rallytime/release-notes-2017.7.9
      - 6c00003 Add 2017.7.9 release notes file
    - 8de58d6 Merge pull request #49974 from rallytime/bp-49940
      - a70358a Update mod_watch() description for all states.
      - bf3d064 Another attempt to clean up service.mod_watch description.
      - 165b799 Clean up documentation/language in service state. (Fixes #40819)
    - d68e5d3 Merge pull request #49978 from whytewolf/inotify_doc_change
b4d9523 using an exclude list that does not list every operating system leaves open the possibility that it would work on those not listed

89cbbb6 Merge pull request #49934 from rallytime/fix-49925

216fd64 Remove event_publisher_pub_hwm and salt_event_pub_hwm from documentation

PR #49979: (cachedout) Update license date and include NOTICE @ 2018-10-11 12:57:21 UTC

- c7d2482 Merge pull request #49979 from cachedout/license_update
- b4f148e Break out support and contributing docs into separate files
- 1dd0e34 Update license date and include NOTICE

PR #49973: (rallytime) Add 2018.3.4 release notes file @ 2018-10-10 17:46:04 UTC

- ef61fc6 Merge pull request #49973 from rallytime/release-notes-2018.3.4
- 32e7d90 Add 2018.3.4 release notes file

PR #49975: (rallytime) Back-port #49958 to 2018.3 @ 2018-10-10 17:44:56 UTC

- PR #49958: (garethgreenaway) [fluorine] Fixes to mac_system.py (refs: #49975)
- 7df8f10c Merge pull request #49958 from rallytime/bp-49958
- a229a50 Swap the call for mac_utils.available_services to use __utils__ so mac_utils.available_services has access to __context__

PR #49946: (ismb) osversion/osversion_info/osmajorrelease grains fixes @ 2018-10-10 14:01:05 UTC

- c912d3a Merge pull request #49946 from isbm/isbm-osversion_info-fixes
- a17ba35 Fix proper part name in the string-bound CPE
- 9d49607 Expand unit test to verify part name
- a6b7d01 Remove linebreak
- 5376886 Keep CPE_NAME only for opensuse series
- 8af3904 Add part parsing
- e202b41 Prevent possible crash if CPE_NAME is wrongly written in the distro
- 712083d Add unit test for broken CPE_NAME
- 1306db Add unit test for v2.3 of CPE format
- 04b61d3 Add unit test for WFN format of CPE_NAME
- 035690f Override VERSION_ID from os-release, if CPE_NAME is given
- 08e235b Remove unnecessary linebreak
- 853e163 Add CPE_NAME parsing

ISSUE #48204: (zerthimon) State mysql_user.present Exception with mysql 8.0.11 (refs: #49918)

PR #49918: (garethgreenaway) [2018.3] Fixes to MySQL module @ 2018-10-10 14:00:11 UTC

- 18fb5df Merge pull request #49918 from garethgreenaway/48204_mysql_user_password_exception_part_deux
- 92c0680 Merge branch '2018.3' into 48204_mysql_user_password_exception_part_deux
- 71e53a3 Cleanup of debugging.
- dd96c13 Fixing lint.
- ac7da89 Tweaking a couple tests to account for new scenarios with later versions.
– 4320c43 Removing __mysql_hash_password, no longer needed.
– 0475acf Removing unnecessary empty line.
– 9265195 Updating the mysql update to handle changes in version 8.0.11 where PASSWORD was removed. Updating unit tests.

• PR #49961: (dmurphy18) Fix aix grains test for prtconf present @ 2018-10-10 13:38:02 UTC
  – 1c2e5be Merge pull request #49961 from dmurphy18/fix_aix_grains
  – f38d543 Correct test for AIX grains prtconf

• ISSUE #49205: (ereslibre) Compound targeting includes unexpected targets in the result (refs: #49897, #49907)

• PR #49907: (brejoc) 2018.3 fix for list compound targeting @ 2018-10-10 13:33:40 UTC
  – PR #49897: (brejoc) 2017.7 fix for list compound targeting (refs: #49907)
  – PR #49435: (brejoc) No longer passes missing in list compound engine (refs: #49897, #49907)
  – e427306 Merge pull request #49907 from brejoc/2018.3-fix-for-list-compound-targeting
  – 1bcadb9 Merge branch '2018.3' into 2018.3-fix-for-list-compound-targeting
  – 649c46c Adds check for engine before adding the additional engine argument
  – 7d0b20c Minor fix for def test_batch_run_grains_targeting
  – 0d64716 Ignore missing minions only when excluding them with 'not'
  – 6a5f3cd No longer passes missing in list compound engine

• ISSUE #48599: (angeloudy) module ldap3 'TypeError: ('expected a byte string in the list'' (refs: #48666)

• PR #49947: (rallytime) Back-port #48666 to 2018.3 @ 2018-10-09 17:48:20 UTC
  – PR #48666: (angeloudy) values need to be bytes when writing back to ldap (refs: #49947)
  – 143c723 Merge pull request #49947 from rallytime/bp-48666
  – 5166917 Update ldap3.py
  – 05e55bd values need to be bytes when writing to ldap
  – 0d749e6 values need to be bytes when writing back to ldap

• PR #49948: (rallytime) Skip pillar refresh test @ 2018-10-09 15:20:52 UTC
  – dbf994e Merge pull request #49948 from rallytime/skip-flaky-test
  – df11e39 Skip pillar refresh test

• PR #49938: (s0undt3ch) Handle missing pkg_resources package @ 2018-10-09 13:41:09 UTC
  – 614d172 Merge pull request #49938 from s0undt3ch/2018.3
  – b1c2928 Handle missing pkg_resources package

• PR #49942: (rallytime) [2018.3] Merge forward from 2017.7 to 2018.3 @ 2018-10-09 13:38:04 UTC
  – bce12c3 Merge pull request #49942 from rallytime/merge-2018.3
  – 91534ee Merge branch '2017.7' into '2018.3'
    * 327796e Merge pull request #49911 from dubb-b/slack-pr
      * 57e630c Adding failure messages for PR.
    * cf1df79 Merge pull request #49900 from dwoz/presence_wart
7bd34f6 Connect before processing presence
* 8c4707d Merge pull request #49899 from twangboy/fix_49892
* a66765f Remove arrInstalled artifact

** PR #49930: (isbm) Get os_family for RPM distros from the RPM macros @ 2018-10-09 13:31:52 UTC
  - a30c053 Merge pull request #49930 from isbm/isbm-osarch-bugfix
  - f8a75f1 Fix imports
  - 70d3de0 Strip and stringify the return for the osarch
  - a248371 Get os_family for RPM distros from the RPM macros.

** PR #49868: (dwoz) windows shell tests @ 2018-10-08 17:32:20 UTC
  - 99c5dba Merge pull request #49868 from dwoz/shelltests
  - 9997f45 Merge branch '2018.3' into shelltests

** PR #49875: (dwoz) Add spm tests to Windows suite @ 2018-10-05 18:13:07 UTC
  - e3ee82d3 Merge pull request #49875 from dwoz/win_spm_tests
  - 76e751 Use os.path.split for more consistancy
  - bc54d15 Fix wart in spm on windows
  - df5e271 Add spm tests for windows

** PR #49872: (twangboy) Fix issues with windows file permissions when using reset=True @ 2018-10-05 13:52:07 UTC
  - c0e2404 Merge pull request #49872 from twangboy/fix_49861
  - 01bd847 Gate the win_function a little better
  - bdb366 Skip on non-windows systems
  - 02f6335 Fix some lint
  - 8ecbe9e Add tests for check_perms
  - d6e7512 Fix issues with file permissions

** ISSUE #49582: (UtahDave) lgpo doesn't seem to allow for unsetting a gpo setting (refs: #49902)

** ISSUE #48661: (mike2523) win_lgpo: User Rights Assignment policies (refs: #49902)

** PR #49902: (lomeroe) lgpo better comments on user right assignments @ 2018-10-05 13:41:16 UTC
  - d3a909f Merge pull request #49902 from lomeroe/issue48661_2018.3
  - 760d8f4 Merge branch '2018.3' into issue48661_2018.3
  - f72ca81 add comments on user right assignment policies when they are already set and note if cumulative_rights_assignment is True that the particular user is already granted the right
    * 75dd5ab Merge branch '2018.3' into shelltests

** PR #49896: (rallytime) [2018.3] Merge forward from 2017.7 to 2018.3 @ 2018-10-04 21:00:24 UTC
  - 4eb43af Merge pull request #49896 from rallytime/merge-2018.3
  - 41c8831 Merge branch '2017.7' into '2018.3'
  - b959033 Merge pull request #49739 from twangboy/fix_49660
    * f3400ad Merge branch '2017.7' into fix_49660
- 0a4f5fc Merge branch '2017.7' into fix_49660
- 1f9bbc8 Populate changes dictionary
  - 71669bd Merge pull request #49885 from dwoz/gemfile
  - 791e3ff Use dwoz/winrm-fs for chunked downloads
  - f3999e1 Move vagrant to its own group
- 0662e37 Merge pull request #49870 from KaiSforza/ci_actually_fail
  - 9ef9206 Actually catch the exception when we fail
    - 19072f0 Use os.path.split for more consistancy
    - 6c22459 Merge remote-tracking branch 'origin/shelltests' into shelltests
    - 43b292f Merge branch '2018.3' into shelltests
    - 876c040 Fix wart in test_cp module
    - 9e6ff11 Add syndic tests to whitelist.txt for Windows
    - 9cab293 Fix wart in spm on windows
    - 58e9d1b Add spm tests to whitelist.txt for Windows
    - 7393610 Add more shell integration tests to whitelist
    - ce85d60 Add shell.test_key to whitelist and fix wart
    - 6fbadd7 Skip tests not valid on windows
    - 9deb2f9 Add shell cp tests and fix them
    - 8fa634 Fix warts in integration.shell.test_matcher
    - 45d2142 Fix wart in test_cp module
    - 0e4fbc5 Add syndic tests to whitelist.txt for Windows
    - f72ad01 Fix wart in spm on windows
    - 4141cc8 Add spm tests to whitelist.txt for Windows
    - 02ad722 Add more shell integration tests to whitelist
    - 48275c0 Add shell.test_key to whitelist and fix wart
    - e5edf4 Skip tests not valid on windows
    - a389729 Add shell cp tests and fix them
- ISSUE #49744: (MTecknology) Group state cannot force empty group membership (refs: #49745)
- PR #49745: (MTecknology) Remove all users from group when members list is empty. @ 2018-10-03 13:48:40 UTC
  - 85478cd Merge pull request #49745 from MTecknology/fix-49744
  - 61afb5d Merge branch '2018.3' into fix-49744
  - 269bde2 Merge branch '2018.3' into fix-49744
  - 0b5d916 Modify if structure, as requested.
  - f57ce67 Remove all users from group when members list is empty. (Fixes #49744)
- PR #49867: (rallytime) [2018.3] Merge forward from 2017.7 to 2018.3 @ 2018-10-03 13:23:35 UTC
- 05cd56b Merge pull request #49867 from rallytime/merge-2018.3
- b53c3e6 Update old utils paths to use new utils paths
- a65c60d Merge branch '2017.7' into '2018.3'
  - 7fa2043 Merge pull request #49858 from Paulo-Nunes/fix-requisite-doc
    - fb6f818 Edit requisite documentation
  - 0587fbc Merge pull request #49828 from dwoz/testslogencoding
    - 2b323df Merge branch '2017.7' into testslogencoding
    - 7ce1b64 Use utf-8 encoding for salt-runtests.log
  - 15ccfffd Merge pull request #49848 from terminalmage/fix-version-rst-2017.7
    - af2dddb Fix badly formatted versionadded directive
  - 297031b Merge pull request #49777 from terminalmage/issue49738
    - 8a9945e Update test docstring to reflect switch to using SHA1
    - 7ddfd72 Switch from base64 encoding to sha1 digest for unique cache filename
    - 0e26dc6 Explicitly import salt.utils.hashutils
    - dca90d7 Skip parallel states test on Windows until we can get it to work
    - 5a11067 Add additional info to the assert to aid in troubleshooting
    - cb19086 Remove/replace unnecessary setUp/tearDown
    - b3e9678 Fix parallel states with long ID dec or name
  - 98c9372 Merge pull request #49763 from twangboy/fix_49730
    - 99bc8f1 Merge branch '2017.7' into fix_49730
    - 7a9278b Fix broken tests, add new tests
    - 2cd1509 Merge branch '2017.7' into fix_49730
    - defba1c Merge branch '2017.7' into fix_49730
    - af1ed1c Add/fix tests
    - 50054d4 Only clear dns entries if you pass []
    - 048561e Add ability to clear DNS entries on static DNS
- PR #49876: (KaiSforza) Actually catch the exception when we fail @ 2018-10-03 12:26:58 UTC
  - 42b540b Merge pull request #49876 from KaiSforza/ci_actually_fail_2018
  - c88a81d Actually catch the exception when we fail
- PR #49852: (terminalmage) Rename logstash engine filename to make it work with the loader @ 2018-10-02 17:42:10 UTC
  - 1c8def9 Merge pull request #49852 from terminalmage/issue49627
  - 559cf1b Rename logstash engine filename to make it work with the loader
- PR #49850: (rallytime) Back-port #49798 to 2018.3 @ 2018-10-02 17:40:29 UTC
  - PR #49798: (mattp-) saltnado: teach runner about full_return (refs: #49850)
  - 675df25 Merge pull request #49850 from rallytime/bp-49798

30.2. Previous Releases
– 4b6dc7 saltndo: teach runner about full_return

• ISSUE #49204: (mchugh19) file.directory state fails if directory contains an invalid symlink (refs: #49209, #49827)

• PR #49846: (rallytime) Back-port #49650 and #49827 to 2018.3 @ 2018-10-01 00:25:24 UTC
  – PR #49827: (dgmorrisjr) fixing mis-spelling of lattrs in file.py, referncing #49204 (refs: #49846)
  – PR #49650: (Yxnt) fix aliyun cloud typeerror (refs: #49846)
  – 93d064a Merge pull request #49846 from rallytime/bp-49650
  – fb7fed7 referncing #49204, fixing mis-spelling of lattrs on line 4514 per request from @gtmanfred
  – ec9fa92 use stringutils instead of hard code
  – a307ae0 fix aliyun cloud typeerror

• ISSUE #49520: (doesitblend) Multi-master DNS Issue - minion connect fail (refs: #49764)

• PR #49764: (garethgreenaway) [2018.3] Adding retry_dns_count to minion @ 2018-10-01 12:20:03 UTC
  – ec97806 Merge pull request #49764 from garethgreenaway/49520_multimaster_dns_issue_fix
  – 30cc5e5 Merge branch ‘2018.3’ into 49520_multimaster_dns_issue_fix
  – 749128b Fixes per request from @rallytime.
  – 04c5983 Moving the check for an empty self.minions into a io_loop.call_later call.
  – 44ee2ec Updating default for retry_dns_count
  – 75f64a6 Removing unneccessary code.
  – e66dc18 Updating the resolve_dns function in minion.py to include a new minion configuration option which will control how many attempts will be made when the master hostname is unable to be resolved before giving up.

• PR #49847: (terminalmage) Fix badly formatted versionadded directive (2018.3 branch) @ 2018-10-01 14:04:27 UTC
  – abdab68 Merge pull request #49847 from terminalmage/fix-version-rst-2018.3
  – a127548 Fix badly formatted versionadded directive

• ISSUE #49043: (awerner) Unicode broken with file.blockreplace on Python2 (refs: #49782)

• PR #49782: (dwoz) Fix issue 49043 @ 2018-10-01 13:43:02 UTC
  – aca87ab Merge pull request #49782 from dwoz/issue-49043
  – b7d904f Merge branch ‘2018.3’ into issue-49043
  – ed35633 Revert diff newline change
  – 2a901e5 Fix issue 49043

• ISSUE #49671: (mchugh19) Vault execution module broken in pillar lookups (refs: #49820)

• PR #49820: (garethgreenaway) [2018.3] Fixing vault when being used from Pillar @ 2018-10-01 13:40:25 UTC
  – 1a41141 Merge pull request #49820 from garethgreenaway/49671_fixing_vault_pillar
  – a57872f Merge branch ‘2018.3’ into 49671_fixing_vault_pillar
  – 5f13219 Merge branch ‘2018.3’ into 49671_fixing_vault_pillar
  – b0ba2ee Fixing the scenario when vault values are used in Pillar, but due to a previous change the minion was not being granted token based access.

4754 Chapter 30. Release Notes
- **PR #49842: (rallytime)** [2018.3] Merge forward from 2018.3.3 to 2018.3 @ 2018-10-01 13:21:42 UTC
  - b9c175 Merge pull request #49842 from rallytime/merge-2018.3
  - 81b0aa7 Add "in progress" notation back to the 2018.3.3 release notes
  - 0e76103 Merge branch '2018.3.3' into '2018.3'
- **PR #49839: (rallytime)** [2018.3] Merge forward from 2017.7 to 2018.3 @ 2018-09-30 16:32:53 UTC
  - e6382cb Merge pull request #49839 from rallytime/merge-2018.3
  - 179e4b1 Merge branch '2017.7' into '2018.3'
  - fd46d35 Merge pull request #49823 from dubb-b/timeout_addition
    - b25ac9f Adding some changes for the status
    - f6d9679 Updating syntax to be better and with new lines
    - 855f6e6 Adding timeout to all pipelines so that the build aborts
- **PR #49815: (isbm)** Bugfix/rework: IPv6 scope errors (bp) @ 2018-09-28 19:44:59 UTC
  - fcc08c Merge pull request #49815 from isbm/isbm-ipv6-scope-errors-2018.3
  - c14f26f Reverse skipping tests: if no ipaddress
  - bb37ba0 Add IPv6 scoped test
  - facb34a Add additional check
  - 615b09a Lintfix: W0611
  - 3ce265e Remove unnecessary manipulation with IPv6 scope outside of the IPv6Address object instance
  - c314e1c Revert method remapping with pylint updates
  - 0a86112 Lintfix refactor: remove duplicate returns as not needed
  - 5932a0d Lintfix
  - f52ea0b Add Py3.4 old implementation's fix
  - 1c02a31 Fix wrong type swap
  - 54233ca Do not use introspection for method swap
  - 12038ea Simplify checking clause
  - 7f2208b Fix py2 case where the same class cannot initialise itself on Python2 via super.
  - cefb16b Add extra detection for hexadecimal packed bytes on Python2. This cannot be detected with type comparison, because bytes == str and at the same time bytes != str if compatibility is not around
  - 379e4d4 Lintfix: mute not called constructors
  - 66ec29c Add scope on str
  - f564abf Add logging to the ip_interface
  - 8bb5438 Add real exception message
  - 693e4d4 Move docstrings to their native places
  - 77f144 Remove duplicated code
  - 40db06b Use ternary operator instead
  - d05999e Remove multiple returns
- 3fde850 Remove unnecessary operator
- deb0b4e Remove duplicated code
- 8e62633 Remove unnecessary variable for import detection
- 7a6ea3b Remove multiple returns and add check for address syntax
- b40e1e1 Add debugging to the ip_address method (py2 and py3)
- cab5f62 Add logging
- eeab9f2 Isolate Py2 and Py3 mode
- 49b32b7 Check version via object
- 1ae94f1 Override standard IPv6Address class
- 5e970ea Fix unicode imports in compat
- bbeec4d Fix ipaddress import
- 561c99e Remove unused import
- 0498e94 Fix ipaddress imports
- b4f1a72 Add missing docstrings

• PR #49784: (rallytime) [2018.3] Merge forward from 2017.7 to 2018.3 @ 2018-09-28 17:29:30 UTC
  - 804d52c Merge pull request #49784 from rallytime/merge-2018.3
  - c6b9d18 Merge branch '2018.3' into merge-2018.3
  - 26461f9 Add helper import comments
  - 22f055c Merge branch '2017.7' into '2018.3'
    - d2a193b Merge pull request #49792 from KaiSforza/fixscriptedpipes
      - 5b16996 Fix the new pipelines
  - dd27d80 Merge branch '2017.7' into '2018.3'
    - 8a71a43 Merge pull request #49774 from KaiSforza/declarativeToScripted
    - cae88f2 Move all pipelines to be fully scripted
    - 8fe8aac Merge pull request #49736 from mattLLVW/fix-file-touch
      - 1da9f34 Fix test opts in append, prepend states/file.py

• PR #49790: (weswhet) fixing an issue where sentry logger would fail to get tags from grain... @ 2018-09-28 13:39:04 UTC
  - d191b08 Merge pull request #49790 from weswhet/fixing-sentry-logger-2018.3
  - 201697d fixing an issue where sentry logger would fail to get tags from grains and some other lint fixes for this file

• ISSUE #49626: (PabloLemos) target grains ip_interface no return received (refs: #49791)

• PR #49791: (terminalmage) Fix 3 bugs in subdict matching @ 2018-09-28 13:38:34 UTC
  - 4d9fc7c Merge pull request #49791 from terminalmage/issue49626
  - 6795472 Add clarifying comment
  - ac0f800 Fix 3 bugs in subdict matching

• PR #49806: (isbm) Bugfix: zypper ZYPPER_EXIT_NO_REPOS exit code @ 2018-09-28 13:20:36 UTC
- 52b0472 Merge pull request #49806 from isbm/isbm-zypper-errcode-6-bp
- 756ef77 Update error list for zypper
- 5b02548 Add error logging

- **ISSUE** saltstack/salt-jenkins#1121: (rallytime) [2018.3] 4 related tests failing on 2018.3 Python 3 (refs: #49795)

- **PR #49795:** (gtmanfred) fix test_managed_file_with_grains_data @ 2018-09-26 22:48:36 UTC
  - fee6701 Merge pull request #49795 from gtmanfred/tests
  - c5c179 fix test_managed_file_with_grains_data

- **PR #49786:** (rallytime) Back-port #49759 to 2018.3 @ 2018-09-26 18:22:01 UTC
  - **PR #49759:** (mattp-) runners.state.orch: generate jid if missing (refs: #49786)
  - 04e5869 Merge pull request #49786 from rallytime/bp-49759
  - df3791c state.orch: generate jid if missing

- **PR #49770:** (rallytime) [2018.3] Merge forward from 2017.7 to 2018.3 @ 2018-09-25 19:03:25 UTC
  - 4138683 Merge pull request #49770 from rallytime/merge-2018.3
  - d9ed59b Merge branch '2017.7' into '2018.3'
  - f664515 Merge pull request #49760 from Ch3LL/raid_docs
    * 0eb90c1 Add mdadm as dependency in mdadm state docs
  - d5a75bf Merge pull request #49749 from erwindon/docufix
    * bae6678 fixed link in documentation
  - 5ef2def Merge pull request #49703 from twangboy/fix_49675_2017.7
    * 9127222 Merge branch '2017.7' into fix_49675_2017.7
    * 4f54422 Fix reboot needed detection
  - b5726d2 Merge pull request #49718 from vutny/doc/2017.7/add-missing-mock-kwarg
    * 3e19176 [DOC] Add missing mock argument for state.apply

- **PR #49757:** (bbinet) Fix influxdb_user state when test=True @ 2018-09-24 19:14:22 UTC
  - db668a Merge pull request #49757 from bbinet/fix-influxdb_user-test
  - 0d9ef4b Fix influxdb_user state when test=True

- **PR #49679:** (dwoz) Add more tests to whitelist @ 2018-09-22 17:46:50 UTC
  - ec2386e Merge pull request #49679 from dwoz/whitelist
  - 0a3d95f Fix linter issues
  - 4c457c9 Close handles only if they exist
  - 44b37a Merge remote-tracking branch 'saltstack/2018.3' into whitelist

- **PR #49722:** (meaksh) Fixes some issues on the Zypper module @ 2018-09-21 13:38:03 UTC
  - 6a3e127 Merge pull request #49722 from meaksh/2018.3-fix-zypper-issue-on-python3
  - bb9cb6e Fix wrong queryformat for zypper list_provides
  - d40c034 Fix index error when running on Python 3

---

**30.2. Previous Releases**
• PR #49720: (cstarke) Separate prlctl and prlsrvctl checks into each requiring function @ 2018-09-21 13:32:46 UTC
  - e7bb83 Merge pull request #49720 from cstarke/2018.3
  - b0be6aa Add documentation for prlctl and prlsrvctl binary requirement
  - 4f8476b Fix tests; add test for CommandExecutionError
  - 3c96dd2 Fix tests for parallels module
  - 9034c4e Add import for CommandExecutionError
  - 752b6f8 Separate prlctl and prlsrvctl checks into each requiring function

• PR #49615: (terminalmage) ping_interval: use service.restart instead of signaling @ 2018-09-21 13:26:41 UTC
  - f745e43 Merge pull request #49615 from terminalmage/ping-interval
  - b49b018 Move service name logic to a separate function
  - 2fddba3 ping_interval: use service.restart instead of signaling

• PR #49731: (terminalmage) Add warning about using jinja filters to dump dicts in Jinja @ 2018-09-21 13:16:04 UTC
  - 0a530d2 Merge pull request #49731 from terminalmage/jinja-filter-warning
  - 8393560 Add warning about using jinja filters to dump dicts in Jinja

• PR #49696: (jgleissner) loosen azure sdk dependencies in azurearm cloud driver @ 2018-09-20 19:17:15 UTC
  - 91acb82 Merge pull request #49696 from jgleissner/2018.3-azurearm-deps
  - 467e017 remove unused import from azurearm driver
  - bad28b6 loosen azure sdk dependencies in azurearm cloud driver

• PR #49684: (twangboy) Detect when system needs reboot after domain join @ 2018-09-20 16:17:50 UTC
  - d434e36 Merge pull request #49684 from twangboy/fix_49675
  - 3600467 Fix some try/except blocks, mark a lazy test
  - 871c11a Fix other functions in the same manner
  - 1b5bc66 Merge branch '2018.3' into fix_49675
  - 95e6f54 Detect when system needs reboot after domain join
    - 9048970 Add some debug info to assert
    - 536fceb Increase function timeout
    - ed4de63 Fix file serialize test
    - 5ac3738 Merge remote-tracking branch 'saltstack/2018.3' into whitelist

• PR #49710: (rallytime) [2018.3] Merge forward from 2017.7 to 2018.3 @ 2018-09-19 18:05:50 UTC
  - 936cae5 Merge pull request #49710 from rallytime/merge-2018.3
  - d19c67f Merge branch '2017.7' into '2018.3'
  - 6bd85b5 Merge pull request #49706 from garethgreenaway/1120_remove_mock_os_path_join
    - f1ccc75 Removing mocking of os.path.join from two tests, one of which was failing when used with coverage argument. No reason we should be mocking os.path.join.
  - c38dc61 Merge pull request #49692 from rallytime/bp-49688
• fde7575 Order the runtests suites
  • 1f60753 Do not use close_fds on Windows OS
  • 4a54c7c Fix file serialize test
  • 0ec1e1e Increase timeout on flaky test
  • 6ae924b Skip test that is not applicable on windows
  • 5980200 Increase timeout on flaky test
  • 1757ed9d Increase ModuleTest.run_function timeout
  • 7c7353c Add more tests to whitelist

• PR #49708: (rallytime) Back-port #49555 to 2018.3 @ 2018-09-19 13:12:12 UTC
  – PR #49555: (bergmann) Change StringIO and BytesIO imports (refs: #49708)
  – b082f79 Merge pull request #49708 from rallytime/bp-49555
  – ed25146 Change StringIO import in python2 to import the class.

• PR #49707: (rallytime) Back-port #49702 to 2018.3 @ 2018-09-19 13:09:10 UTC
  – PR #49702: (rallytime) Mark orchestration test as expensive (refs: #49707)
  – 0e97d9e Merge pull request #49707 from rallytime/bp-49702
  – 7flf05c5 Mark orchestration test as expensive

• PR #49693: (rallytime) [2018.3] Merge forward from 2017.7 to 2018.3 @ 2018-09-18 20:05:28 UTC
  – 0c4005d Merge pull request #49693 from rallytime/merge-2018.3
  – b39dacf Merge branch '2017.7' into '2018.3'
  – 37cbe27 Merge pull request #49685 from rallytime/pillar-headings
  • 02b2d54 Split intro docs for cmd_yamlex pillar into shorter lines.
  • c4be5b Fix heading line-lengths
  – 9bad295 Merge pull request #49689 from terminalmage/2017.7-docs
  • 7ebab7 Fix docs build errors (2017.7 branch)

• PR #49674: (rallytime) [2018.3] Merge forward from 2018.3.3 to 2018.3 @ 2018-09-18 13:37:00 UTC
  – a12176d Merge pull request #49674 from rallytime/merge-2018.3
  – 7bc8b09 Merge pull request #31 from dwoz/merge-2018.3
  • cb35eb Account for filename changes
  – f3b122f Merge branch '2018.3.3' into '2018.3'

• PR #49593: (dwoz) Add more tests to whitelist for Windows @ 2018-09-17 14:57:44 UTC
  – e636dac Merge pull request #49593 from dwoz/add_whitelist
  – 2e1bf13 Merge branch '2018.3' into add_whitelist
  – 2340a58 Fix runner returns test on Windows
  – f908cde Merge branch '2018.3' into add_whitelist
  – be5f6cc Fix linter - blank lines
  – e51b0f8 Fix binary file manage test
- 9e3b44d Fix linter issues
- ca1b05e Fix multiple issues in x509 module and state
- e603e7a Fix encoding issues in file and x509 states
- 7f93c7f Fix map file loading on windows
- 2959da0 Add some runners test files to whitelist
- beec2902 Make windows file remove return like others
- 5770b05 Fix hitelist file order
- 10ec8be Fix linter issues
- ccbcb55 Add more tests to whitelist for Windows

**PR #49639:** (isbm) Retire MD5 checksum for pkg mgmt plugins @ 2018-09-17 14:51:54 UTC
- 7823839 Merge pull request #49639 from isbm/isbm-yumnotify-md5
- 11a949ca Remove an empty line
- adb8324 Use SHA256 algorithm for zyppnotify plugin
- 27001cf Use SHA256 algorithm for yumnotify plugin

**PR #49652:** (rallytime) [2018.3] Merge forwrad from 2018.3.3 to 2018.3 @ 2018-09-14 21:20:39 UTC
- acbec12 Merge pull request #49652 from rallytime/merge-2018.3
- a8a3820 Merge branch '2018.3.3' into '2018.3'

**PR #49646:** (rallytime) [2018.3] Merge forward from 2017.7 to 2018.3 @ 2018-09-14 13:30:22 UTC
- 530e281 Merge pull request #49646 from rallytime/merge-2018.3
- 186f57e Merge branch '2017.7' into '2018.3'
- 3c8ec8a Merge pull request #49644 from rallytime/mark-flaky-test
  - be8a187 Mark grains test as flaky
- 8ac66f1 Merge pull request #49643 from rallytime/bp-49642
  - acce8c Skip some unreliable tests
- 7a75d5e Merge pull request #49597 from rallytime/bp-47232
  - c477b70 Fixed usage of ipaddress
- 2f6cdd9 Merge pull request #49614 from rallytime/bp-49546
  - 0f3881a Skip flaky test on Python 3

**PR #49642:** (rallytime) Skip some unreliable tests (refs: #49643) @ 2018-09-13 18:24:43 UTC
- bb1dcdff Merge pull request #49642 from rallytime/flaky-tests
- 8e74d1c Skip some unreliable tests

**PR #49629:** (rallytime) [2018.3] Merge forward from 2018.3.3 to 2018.3 @ 2018-09-13 14:00:08 UTC
- e319ecce Merge pull request #49629 from rallytime/merge-2018.3
- b628ad7 Merge branch '2018.3.3' into '2018.3'

**PR #49632:** (garethgreenaway) [2018.3] Fixing integration.states.test_file.FileTest.test_directory_max_depth @ 2018-09-13 13:51:56 UTC
- 93d43fa Merge pull request #49632 from garethgreenaway/fixing_failing_test_python_3_7
- 588f744 Fixing failing test under python 3.7 caused by changes to how os.makedirs sets initial permissions.

**PR #49580:** (garethgreenaway) [2018.3] Fixing tests for Python 3.7 @ 2018-09-12 16:33:35 UTC
- 7042fc0 Merge pull request #49580 from garethgreenaway/fixing_failing_test_python_3_7
- b6afdae Fixing lint.
- d2fb68c Fixes various tests that were failing under python 3.7.

**PR #49606:** (rallytime) [2018.3] Merge forward from 2017.7 to 2018.3 @ 2018-09-12 14:26:33 UTC
- ab19082 Merge pull request #49606 from rallytime/merge-2018.3
- c168268 Update old utils paths to use new paths
- 19598d8 Merge branch '2017.7' into '2018.3'
  * aa560c5 Merge pull request #49595 from rallytime/merge-2017.7
    - 09247a3 Merge branch '2017.7.8' into '2017.7'
    - 4d865b4 Merge pull request #49560 from rallytime/pkgng-fix
    - f3e1534 [2017.7.8] Use correct path for is_true function
    - 92369f0 Merge pull request #49541 from twangboy/fix_osx_build_2
    - 750d3fa Remove trusted host switches
    - 397296f Merge pull request #49539 from twangboy/fix_osx_build_2
    - 6b42e73 Fix issues with build script on OSX
  * e8171de Merge pull request #49596 from terminalmage/kill-bare-excepts-with-fire
    - 729dc08 Kill bare excepts with fire
  * 63b6643 Merge pull request #49578 from twangboy/fix_49566
    - 6a5a69c Merge branch '2017.7' into fix_49566
  * f9a01b7 Merge pull request #49584 from terminalmage/squelch-varstack-error
    - c79a823 Squelch error logging when varstack is not installed
  * d4d2b36 Merge pull request #49579 from dwoz/flaky_test
    - dbe40df Increase timeout for flaky git test
  * 5cbe60b Merge pull request #49570 from rallytime/doc-fixes
    - de80bda Fix docstring + import order, move pylint disable to own line
    - 393bc0f Fix doc build errors in saltando documentation
    - 6105ebb Use setup.py clean --all

**PR #49620:** (dwoz) Adding passing windows nacl runner tests to whitelist @ 2018-09-12 14:19:11 UTC
- 0ce91d6 Merge pull request #49620 from dwoz/nacltest
- 51500ac Adding passing windows nacl runner tests to whitelist

**PR #49532:** (meaksh) Fix wrong 'recurse' behavior on for linux_acl.present/absent states @ 2018-09-12 14:16:15 UTC
- c1f97c4 Merge pull request #49532 from meaksh/2018.3-fix-linux_acl-recursive-problems
Salt Documentation, Release 3003.3

- cf27069 Fix some pylint issues
- a0ed59d Fix recursive cases on linux_acl.absent state
- 4a01849 Add unit tests to cover recursive cases of linux_acl states
- f739b6f Fix typo on variable name
- dc6d1d7 Fix wrong recurse behavior on for linux_acl.present state

- **ISSUE #49027:** (lachlanmunro) x509.certificate_managed certificate is mangled on process under py3 m2crypto (refs: #49561)
- **ISSUE #49008:** (lachlanmunro) x509.certificate_managed state fails under py3 m2crypto with "int too large" (refs: #49561)
- **PR #49561:** (dwoz) x509 module and state bug fixes @ 2018-09-11 14:01:43 UTC
  - 283e7d7 Merge pull request #49561 from dwoz/m2crypto_test
  - 5e591ea Merge branch '2018.3' into m2crypto_test
- **PR #49592:** (dwoz) Fix binary file manage test @ 2018-09-10 23:03:18 UTC
  - 4478a44 Merge pull request #49592 from dwoz/bin_file_fix
  - 8556c3d Fix binary file manage test
- **PR #49571:** (rallytime) [2018.3] Merge forward from 2017.7 to 2018.3 @ 2018-09-10 12:58:15 UTC
  - 9004422 Merge pull request #49571 from rallytime/merge-2018.3
  - a00aba9 Merge branch '2017.7' into '2018.3'
    - 5d267a2 Merge pull request #49547 from rallytime/bp-49518
    - 4bb09f7 Skip service module integration tests on CentOS 7
    - 4948071 Merge pull request #49549 from rallytime/codeowners-duplicate
      - 4b257d2 Remove duplicate comment in CODEOWNERS file
      - faafe74 Merge branch '2018.3' into m2crypto_test
- **PR #49577:** (dwoz) Multiple unittest fixes for 2018.3 Python 3 Windows @ 2018-09-08 05:53:38 UTC
  - 4669a9a Merge pull request #49577 from dwoz/unit_test_fixes
  - aa07b3f Multiple unittest fixes for 2018.3 Python 3 Windows
- **PR #49533:** (silenius) [cherry-pick] Optimize postgres groups management @ 2018-09-07 18:58:57 UTC
  - 8b971e5 Merge pull request #49533 from silenius/2018.3.3
  - 7eb8d6e Postgress module unit test fix.
  - b56aedc Optimize postgres groups management
- **PR #49543:** (rallytime) [2018.3] Merge forward from 2017.7 to 2018.3 @ 2018-09-07 18:19:32 UTC
  - 1a41b47 Merge pull request #49543 from rallytime/merge-2018.3
  - cf508a4 Merge branch '2017.7' into '2018.3'
    - 75a3b52 Merge pull request #49527 from terminalmage/remove-special-envs-handling
      - 1478a76 Remove special handling for file_envs filesrver func
    - 13f1d26 Merge pull request #49512 from rallytime/merge-2017.7
      - de7ef3d Add "in progress" notation back to 2017.7.8 release notes
- edad2dc Merge branch '2017.7.8' into '2017.7'
- d24c96f Merge pull request #49505 from Ch3LL/rn_7.8_2
- d40b644 Update 2017.7.8 ChangeLog with new fixes
- 0d7b173 Merge pull request #49498 from rallytime/pin-cherrypy-2017.7.8
- 81a6155 Pin CherryPy version to < 18.0.0 in requirements files for PY2
- 52ab2c0 Merge pull request #49466 from rallytime/bp-49461
- 5842800 Revert "Allow for not being prompted to supply a password to deploy keys to a..."
- 1bbe7df Merge pull request #49284 from twangboy/fix_installer_osx
- a112eaa Fix path to libsodium tarball
- e0e8779 Merge pull request #49272 from twangboy/fix_installer_more
- a8f054b Add 64bit binaries for KB2999226 to the x86 installer
- 0eb6ddf Merge pull request #49218 from twangboy/fix_installer
- e8a1d2f Add more descriptive error when KB not found
- 71737ea Suppress all ui on vcredist installation
- 7daee9bb Fix Windows and OSX installers
- e48f26 Merge pull request #49116 from twangboy/fix_installer
- 1227095 Add nonfatal switch to VCRedist
- 0b9f2f8 Merge pull request #49113 from Ch3LL/rn_7.8
- f6b70bb Add changelog to 2017.7.8 release notes
- 208cfe6 Merge pull request #49515 from rallytime/update-codeowners
  - 1faab8b Add some files to the CODEOWNERS files for team-core to own
- 34e5174 Merge pull request #49327 from twangboy/fix_win_service
  - 74e944b Mark test_service_status_running as flaky
  - c69560c Merge branch '2017.7' into fix_win_service
  - 53e2e05 Merge branch '2017.7' into fix_win_service
  - cf3d287 Merge branch '2017.7' into fix_win_service
  - 1641851 Fix the name of the _cmd_quote test
  - 97567af Skip tests on Linux systems
  - 0ca9cd1 Fix some lint
  - 3800966 Add tests
  - b0d646d Add more details to the functioning of _cmd_quote
  - a9856c2 Fix issues with win_service

- **ISSUE #49452**: (gtmanfred) [python3.7] remove usage of collections.abc stuff from the collections shim (refs: #49487)

- **PR #49487**: (garethgreenaway) [2018.3] Swapping out collections imports @ 2018-09-07 15:36:04 UTC
  - baaf6de Merge pull request #49487 from garethgreenaway/49452_collections_abc
- 2fb3ef7 Merge branch '2018.3' into 49452_collections_abc
- ebfd7f9 Merge branch '2018.3' into 49452_collections_abc
- b27e86b Swapping out the version check for a try...except on the import from collections.abc with a fallback to importing from collections.
- d18a9f Updating various imports that have been moved from collections to collections.abc, and will be deprecated in collections beginning in 3.8.
  * abc9c1a Fix linter issues
  * 8e42384 Fix multiple issues in x509 module and state
  * 2a52158 Fix encoding issues in file and x509 states
  * 49a6da7 Fix map file loading on windows
- PR #49528: (dwoz) Fix merge wart @ 2018-09-06 23:12:39 UTC
  - 06935e9 Merge pull request #49528 from dwoz/mergetests
  - 6a4f823 Fix merge wart
- PR #49548: (garethgreenaway) [2018.3] Disabling State boto tests for Python 3.7+ @ 2018-09-06 21:50:10 UTC
  - 3298e70 Merge pull request #49548 from garethgreenaway/1075_disable_boto_tests_part_deux
  - 0f5191e Disable various boto tests when run under python 3.7 because of //github.com/spulec/moto/issues/1706. which was causing the test suite to hang on unit tests. This PR is disabling the tests in the test_boto_vpc state tests.
- PR #49521: (terminalmage) Fix _get_hash in splay executor @ 2018-09-06 14:06:54 UTC
  - c346825 Merge pull request #49521 from terminalmage/fix-splay-executor
  - bbb8fe8 Fix _get_hash in splay executor
- PR #49526: (terminalmage) Prevent lookup error when trying to lookup fileserver function from LazyDict @ 2018-09-06 14:01:30 UTC
  - 3f7c89c Merge pull request #49526 from terminalmage/fix-backends-error-logging
  - 1f0288e Prevent lookup error when trying to lookup fileserver function from LazyDict
- PR #49524: (garethgreenaway) [2018.3] Disable boto tests under 3.7 @ 2018-09-06 13:35:18 UTC
  - bf939f9 Merge pull request #49524 from garethgreenaway/1075_disable_boto_tests
  - 5ec5578 Disable various boto tests when run under python 3.7 because of //github.com/spulec/moto/issues/1706. which was causing the test suite to hang on unit tests.
- PR #49511: (rallytime) [2018.3] Merge forward from 2018.3.3 to 2018.3 @ 2018-09-05 19:52:25 UTC

  - ac50eb8 Remove redundant "test" from filename
  - b03a563 Move jinja templating tests alongside salt/utils/jinja.py’s tests
Salt Documentation, Release 3003.3

- b49d8df Fix bad copypasta in docstring
- 069102b Rename sentry returner test to match naming convention
- 2398083 Use tests.support.paths instead of deprecated integration module
- ffb842d Move salt.utils.context tests to their proper location
- d69069b Move context cache tests to their proper location

- PR #49062: (weswhet) fix memoize on available macOS services @ 2018-08-15 15:34:25 UTC
  - c8510a6 Merge pull request #49062 from weswhet/fix-mac-available-services
  - f1b40c4 decorator link fix, updating context names, as well as updating macutils tests for latest changes
  - 1e4497d fixing an issue with memoize on macOS services, switching to using __context__ instead

- ISSUE #49100: (pruiz) salt.utils.yamldumper.dump/safe_dump incorrectly return 'str' instead of unicode on python2.7 (centos) (refs: #49125)

- PR #49125: (terminalmage) Ensure that we don't feed jinja2.Markup() a str type @ 2018-08-15 04:02:30 UTC
  - 21435be Merge pull request #49125 from terminalmage/issue49100
  - ec258e2 Add integration tests for yaml and json filters
  - f5f16cf Ensure that we don't feed jinja2.Markup() a str type

30.2.42 Salt 2018.3.5 Release Notes

Version 2018.3.5 is a CVE-fix release for 2018.3.0.

Security Fix

CVE-2019-17361

With the Salt NetAPI enabled in addition to having a SSH roster defined, unauthenticated access is possible when specifying the client as SSH. Additionally, when the raw_shell option is specified any arbitrary command may be run on the Salt master when specifying SSH options.

30.2.43 Salt 2017.7.0 Release Notes - Codename Nitrogen

30.2.44 Python 3

The 2017.7 Salt Release adds initial Python 3 support.

The default Python version of Salt will remain Python 2, although Python 3 packages will be supplied for users who want to help test this new feature.
30.2.45 Python 2.6 Deprecation

Salt will no longer support Python 2.6. We will provide python2.7 packages on our repo for RedHat and CentOS 6 to ensure users can still run Salt on these platforms.

As this will impact the installation of additional dependencies for salt modules please use pip packages if there is not a package available in a repository. You will need to install the python27-pip package to get access to the correct pip27 executable: `yum install python27-pip`

30.2.46 Known Issues

The following salt-cloud drivers have known issues running with Python 3. These drivers will not work with Python 3, and Python 2.7 should be used instead:

- Joyent

  - When running under Python 3, users who require Unicode support should ensure that a locale is set on their machines. Users using the C locale are advised to switch to a UTF-aware locale to ensure proper functionality with Salt with Python 3.

Remember to update the Salt Master first

Salt’s policy has always been that when upgrading, the minion should never be on a newer version than the master. Specifically with this update, because of changes in the fileclient, the 2017.7 minion requires a 2017.7 master.

Backwards compatibility is still maintained, so older minions can still be used.

More information can be found in the Salt FAQ

States Added for Management of systemd Unit Masking

The `service.masked` and `service.umasked` states have been added to allow Salt to manage masking of systemd units.

Additionally, the following functions in the `systemd` execution module have changed to accommodate the fact that indefinite and runtime masks can co-exist for the same unit:

- `service.masked`: The return from this function has changed from previous releases. Before, `False` would be returned if the unit was not masked, and the output of `systemctl is-enabled <unit name>` would be returned if the unit was masked. However, since indefinite and runtime masks can exist for the same unit at the same time, this function has been altered to accept a `runtime` argument. If `True`, the minion will be checked for a runtime mask assigned to the named unit. If `False`, then the minion will be checked for an indefinite mask. If one is found, `True` will be returned. If not, then `False` will be returned.

- `service.umasked`: This function used to just run `systemctl is-enabled <unit name>` and based on the return from this function the corresponding mask type would be removed. However, if both runtime and indefinite masks are set for the same unit, then `systemctl is-enabled <unit name>` would show just the indefinite mask. The indefinite mask would be removed, but the runtime mask would remain. The function has been modified to accept a `runtime` argument, and will attempt to remove a runtime mask if that argument is set to `True`. If set to `False`, it will attempt to remove an indefinite mask.

These new runtime arguments default to `False`.

30.2. Previous Releases
Pillar Encryption

Beginning in 2016.3.0 the CLI pillar data passed to several functions could conditionally be passed through a renderer to be decrypted. This functionality has now been extended to pillar SLS files as well. See here for detailed documentation on this feature.

Grains Changes

- The osmajorrelease grain has been changed from a string to an integer. State files, especially those using a templating language like Jinja, may need to be adjusted to account for this change.
- Add ability to specify disk backing mode in the VMWare salt cloud profile.

State Module Changes

- The service.running and service.dead states now support a no_block argument which, when set to True on systemd minions, will start/stop the service using the --no-block flag in the systemctl command. On non-systemd minions, a warning will be issued.
- The module.run state has dropped its previous syntax with m_ prefix for reserved keywords. Additionally, it allows running several functions in a single batch.

Note: It is necessary to explicitly turn on the new behavior (see below)

```yaml
# Before
run_something:
  module.run:
    - name: mymodule.something
    - m_name: 'some name'
    - kwargs: {
      first_arg: 'one',
      second_arg: 'two',
      do_stuff: 'True'
    }

# After
run_something:
  module.run:
    - mymodule.something:
      - name: some name
      - first_arg: one
      - second_arg: two
      - do_stuff: True
```

Since a lot of users are already using module.run states, this new behavior must currently be explicitly turned on, to allow users to take their time updating their SLS files. However, please keep in mind that the new syntax will take effect in the next feature release of Salt (Oxygen) and the old usage will no longer be supported at that time.

Another feature of the new module.run is that it allows calling many functions in a single batch, such as:

```yaml
run_something:
  module.run:
    - mymodule.function_without_parameters:
```

(continues on next page)
In a rare case that you have a function that needs to be called several times but with the different parameters, an additional feature of "tagging" is to the rescue. In order to tag a function, use a colon delimiter. For example:

```
run_something:
module.run:
- mymodule.same_function:1:
- mymodule.same_function:2:
  - myparam
  - my_other_param
- mymodule.same_function:3:
- foo: bar
```

The example above will run `mymodule.same_function` three times with the different parameters.

To enable the new behavior for `module.run`, add the following to the minion config file:

```
use_superseded:
  - module.run
```

- The default for the `fingerprint_hash_type` option used in the `present` function in the `ssh` state changed from `md5` to `sha256`.

**Execution Module Changes**

- Several functions in the `systemd` execution module have gained a `no_block` argument, which when set to `True` will use `--no-block` in the `systemctl` command.

- In the `solarisips pkg` module, the default value for the `refresh` argument to the `list_upgrades` function has been changed from `False` to `True`. This makes the function more consistent with all of the other `pkg` modules (The other `pkg.list_upgrades` functions all defaulted to `True`).

- The functions which handle masking in the `systemd` module have changed. These changes are described above alongside the information on the new states which have been added to manage masking of `systemd` units.

- The `pkg.list_repo_pkgs` function for yum/dnf-based distros has had its default output format changed. In prior releases, results would be organized by repository. Now, the default for each package will be a simple list of versions. To get the old behavior, pass `byrepo=True` to the function.

- A `pkg.list_repo_pkgs` function has been added for both `Debian/Ubuntu` and `Arch Linux`-based distros.

- The `system` module changed its return format from "HH:MM AM/PM" to "HH:MM:SS AM/PM" for `get_system_time`.

- The default for the `fingerprint_hash_type` option used in the `ssh` execution module changed from `md5` to `sha256`. 
Proxy Module Changes

The `proxy_merge_grains_in_module` configuration variable introduced in 2016.3, has been changed, defaulting to True.

The connection with the remote device is kept alive by default, when the module implements the `alive` function and `proxy_keep_alive` is set to True. The polling interval is set using the `proxy_keep_alive_interval` option which defaults to 1 minute.

The developers are also able to use the `proxy_always_alive`, when designing a proxy module flexible enough to open the connection with the remote device only when required.

Wildcard Versions in `pkg.installed` States

- The `pkg.installed` state now supports wildcards in package versions, for the following platforms:
  - SUSE/openSUSE Leap/Thumbleweed
  - Debian/Ubuntu
  - RHEL/CentOS
  - Arch Linux

  This support also extends to any derivatives of these distros, which use the `aptpkg`, `yumpkg`, or `pacman` providers for the `pkg` virtual module.

  Using wildcards can be useful for packages where the release name is built into the version in some way, such as for RHEL/CentOS which typically has version numbers like `1.2.34-5.el7`. An example of the usage for this would be:

  ```
  mypkg:
  pkg.installed:
    version: '1.2.34*'
  ```

Master Configuration Additions

- `syndic_forward_all_events` - Option on multi-syndic or single when connected to multiple masters to be able to send events to all connected masters.
- `eauth_acl_module` - In case external auth is enabled master can get authenticate and get the authorization list from different auth modules.
- `keep_acl_in_token` - Option that allows master to build ACL once for each user being authenticated and keep it in the token.

Minion Configuration Additions

- `pillarenv_from_saltenv` - When set to True (default is False), the `pillarenv` option will take the same value as the effective saltenv when running states. This would allow a user to run `salt '*' state.apply mysls saltenv=dev`, and the SLS for both the state and pillar data would be sourced from the dev environment, essentially the equivalent of running `salt '*' state.apply mysls saltenv=dev pillarenv=dev`. Note that if `pillarenv` is set in the minion config file, or if `pillarenv` is provided on the CLI, it will override this option.
salt-api Changes

The rest_cherrypy netapi module has received a few minor improvements:

- A CORS bugfix.
- A new /token convenience endpoint to generate Salt eauth tokens.
- A proof-of-concept JavaScript single-page application intended to demonstrate how to use the Server-Sent Events stream in an application. It is available in a default install by visiting the /app URL in a browser.

Python API Changes

expr_form Deprecation

The LocalClient's expr_form argument has been deprecated and renamed to tgt_type. This change was made due to numerous reports of confusion among community members, since the targeting method is published to minions as tgt_type, and appears as tgt_type in the job cache as well.

While expr_form will continue to be supported until the 2019.2.0 release cycle (two major releases after this one), those who are using the LocalClient (either directly, or implicitly via a netapi module) are encouraged to update their code to use tgt_type.

full_return Argument in LocalClient and RunnerClient

An full_return argument has been added to the cmd and cmd_sync methods in LocalClient and RunnerClient which causes the return data structure to include job meta data such as retcode.

This is useful at the Python API:

```python
>>> import salt.client
>>> client = salt.client.LocalClient()
>>> client.cmd("*", "cmd.run", ["return 1"], full_return=True)
{'jerry': {'jid': '20170520151213898053', 'ret': '', 'retcode': 1}}
```

As well as from salt-api:

```bash
% curl -b /tmp/cookies.txt -sS http://localhost:8000 \
   -H 'Content-type: application/json' \
   -d '[[
      "client": "local",
      "tgt": "*",
      "fun": "cmd.run",
      "arg": ["return 1"],
      "full_return": true
    ]]

{"return": [["jerry": {"jid": "20170520151213898053", "retcode": 1, "ret": ""}]}}
```
Jinja

Filters

New filters in 2017.7.0:

- to_bool
- exactly_n_true
- exactly_one_true
- quote
- regex_search
- regex_match
- uuid
- is_list
- is_iter
- min
- max
- avg
- union
- intersect
- difference
- symmetric_difference
- is_sorted
- compare_lists
- compare_dicts
- is_hex
- contains_whitespace
- substring_in_list
- check_whitelist_blacklist
- date_format
- str_to_num
- to_bytes
- json_decode_list
- json_decode_dict
- rand_str
- md5
- sha256
- sha512
• `base64_encode`
• `base64_decode`
• `hmac`
• `http_query`
• `is_ip`
• `is_ipv4`
• `is_ipv6`
• `ipaddr`
• `ipv4`
• `ipv6`
• `network_hosts`
• `network_size`
• `gen_mac`
• `mac_str_to_bytes`
• `dns_check`
• `is_text_file`
• `is_binary_file`
• `is_empty_file`
• `file_hashsum`
• `list_files`
• `path_join`
• `which`

Logs

Another new feature - although not limited to Jinja only - is being able to log debug messages directly from the template:

```latex
{%- do salt.log.error('logging from jinja') -%}
```

See the `logs` paragraph.

Network Automation

NAPALM

Introduced in 2016.11, the modules for cross-vendor network automation have been improved, enhanced and widened in scope:
• Manage network devices like servers: the NAPALM modules have been transformed so they can run in both proxy and regular minions. That means, if the operating system allows, the salt-minion package can be installed directly on the network gear. Examples of such devices (also covered by NAPALM) include: Arista, Cumulus, Cisco IOS-XR or Cisco Nexus.

• Not always alive: in certain less dynamic environments, maintaining the remote connection permanently open with the network device is not always beneficial. In those particular cases, the user can select to initialize the connection only when needed, by specifying the field always_alive: false in the proxy configuration or using the proxy always_alive option.

• Proxy keepalive: due to external factors, the connection with the remote device can be dropped, e.g.: packet loss, idle time (no commands issued within a couple of minutes or seconds), or simply the device decides to kill the process. In 2017.7.0 we have introduced the functionality to re-establish the connection. One can disable this feature through the proxy_keep_alive option and adjust the polling frequency specifying a custom value for proxy_keep_alive_interval, in minutes.

New modules:

• Netconfig state module - Manage the configuration of network devices using arbitrary templates and the Salt-specific advanced templating methodologies.

• Network ACL execution module - Generate and load ACL (firewall) configuration on network devices.

• Network ACL state - Manage the firewall configuration. It only requires writing the pillar structure correctly!

• NAPALM YANG execution module - Parse, generate and load native device configuration in a standard way, using the OpenConfig/IETF models. This module contains also helpers for the states.

• NAPALM YANG state module - Manage the network device configuration according to the YANG models (OpenConfig or IETF).

• NET finder - Runner to find details easily and fast. It's smart enough to know what you are looking for. It will search in the details of the network interfaces, IP addresses, MAC address tables, ARP tables and LLDP neighbors.

• BGP finder - Runner to search BGP neighbors details.

• NAPALM syslog - Engine to import events from the napalm-logs library into the Salt event bus. The events are based on the syslog messages from the network devices and structured following the OpenConfig/IETF YANG models.

• NAPALM Helpers - Generic helpers for NAPALM-related operations. For example, the Compliance report function can be used inside the state modules to compare the expected and the existing configuration.

New functions:

• Configuration getter - Return the whole configuration of the network device.

• Optics getter - Fetches the power usage on the various transceivers installed on the network device (in dBm).

New grains: Host, Host DNS, Username and Optional args.
Custom Refspecs in GitFS / git_pillar / winrepo

It is now possible to specify the refspecs to use when fetching from remote repositories for GitFS, git_pillar, and winrepo. More information on how this feature works can be found here in the GitFS Walkthrough. The git_pillar and winrepo versions of this feature work the same as their GitFS counterpart.

**git_pillar "mountpoints" Feature Added**

See here for detailed documentation.

**Big Improvements to Docker Support**

The old docker state and execution modules have been moved to salt-contrib. The dockerng execution module has been renamed to docker and now serves as Salt's official Docker execution module.

The old dockerng state module has been split into 4 state modules:

- **docker_container** - States to manage Docker containers
- **docker_image** - States to manage Docker images
- **docker_volume** - States to manage Docker volumes
- **docker_network** - States to manage Docker networks

The reason for this change was to make states and requisites more clear. For example, imagine this SLS:

```
myuser/appimage:
    docker.image_present:
        - sls: docker.images.appimage

myapp:
    docker.running:
        - image: myuser/appimage
        - require:
            - docker: myuser/appimage
```

The new syntax would be:

```
myuser/appimage:
    docker_image.present:
        - sls: docker.images.appimage

myapp:
    docker_container.running:
        - image: myuser/appimage
        - require:
            - docker_image: myuser/appimage
```

This is similar to how Salt handles MySQL, MongoDB, Zabbix, and other cases where the same execution module is used to manage several different kinds of objects (users, databases, roles, etc.).

**Note:** With the Moby announcement coming at this year’s DockerCon, Salt’s docker execution module (as well as the state modules) work interchangeably when docker is replaced with moby (e.g. moby_container.running, moby_image.present, moby.inspect_container, etc.)
The old syntax will continue to work until the 2019.2.0 release of Salt. The old docker naming will also continue to work until that release, so no immediate changes need to be made to your SLS files (unless you were still using the old docker states that have been moved to salt-contrib).

The `docker_container.running` state has undergone a significant change in how it determines whether or not a container needs to be replaced. Rather than comparing individual arguments to their corresponding values in the named container, a temporary container is created (but not started) using the passed arguments. The two containers are then compared to each other to determine whether or not there are changes, and if so, the old container is stopped and destroyed, and the temporary container is renamed and started.

Salt still needs to translate arguments into the format which docker-py expects, but if it does not properly do so, the `skip_translate` argument can be used to skip input translation on an argument-by-argument basis, and you can then format your SLS file to pass the data in the format that the docker-py expects. This allows you to work around any changes in Docker's API or issues with the input translation, and continue to manage your Docker containers using Salt. Read the documentation for `skip_translate` for more information.

**Note:** When running the `docker_container.running` state for the first time after upgrading to 2017.7.0, your container(s) may be replaced. The changes may show diffs for certain parameters which say that the old value was an empty string, and the new value is `None`. This is due to the fact that in prior releases Salt was passing empty strings for these values when creating the container if they were undefined in the SLS file, where now Salt simply does not pass any arguments not explicitly defined in the SLS file. Subsequent runs of the state should not replace the container if the configuration remains unchanged.

### New SSH Cache Roster

The **SSH cache Roster** has been rewritten from scratch to increase its usefulness. The new roster supports all minion matchers, so it is now possible to target minions identically through `salt` and `salt-ssh`.

Using the new `roster_order` configuration syntax it's now possible to compose a roster out of any combination of grains, pillar and mine data and even Salt SDB URLs. The new release is also fully IPv4 and IPv6 enabled and even has support for CIDR ranges.

### Salt-SSH Default Options

Defaults for rosters can now be set, so that they don’t have to be set on every entry in a roster or specified from the commandline.

The new option is `roster_defaults` and is specified in the master config file:

```yaml
roster_defaults:
  user: daniel
  sudo: True
  priv: /root/.ssh/id_rsa
  tty: True
```
Blacklist or Whitelist Extmod Sync

The modules that are synced to minions can now be limited.

The following configuration options have been added for the master:

- `extmod_whitelist`
- `extmod_blacklist`

and for the minion:

- `extmod_whitelist`
- `extmod_blacklist`

Additional Features

- The `mine.update` function has a new optional argument `mine_functions` that can be used to refresh mine functions at a more specific interval than scheduled using the `mine_interval` option. However, this argument can be used by explicit schedule. For example, if we need the mines for `net.lldp` to be refreshed every 12 hours:

  ```
  schedule:
  lldp_mine_update:
      function: mine.update
      kwargs:
        mine_functions: net.lldp: []
        hours: 12
  ```

- The `salt` runner has a new function: `salt.execute`. It is mainly a shortcut to facilitate the execution of various functions from other runners, e.g.:

  ```
  ret1 = __salt__["salt.execute"]("*", "mod.fun")
  ```

New Modules

Beacons

- `salt.beacons.log`

Cache

- `salt.cache.redis_cache`
Salt Documentation, Release 3003.3

Engines

- `salt.engines.stalekey`
- `salt.engines.junos_syslog`
- `salt.engines.napalm_syslog`

Execution modules

- `salt.modules.apk`
- `salt.modules.at_solaris`
- `salt.modules.boto_kinesis`
- `salt.modules.boto3_elasticache`
- `salt.modules.boto3_route53`
- `salt.modules.capirca_acl`
- `salt.modules.freebsd_update`
- `salt.modules.grafana4`
- `salt.modules.heat`
- `salt.modules.icinga2`
- `salt.modules.kubernetesmod`
- `salt.modules.logmod`
- `salt.modules.mattermost`
- `salt.modules.namecheap_dns`
- `salt.modules.namecheap_domains`
- `salt.modules.namecheap_ns`
- `salt.modules.namecheap_users`
- `salt.modules.namecheap_ssl`
- `salt.modules.napalm`
- `salt.modules.napalm_acl`
- `salt.modules.napalm_yang_mod`
- `salt.modules.pdbedit`
- `salt.modules.solrcloud`
- `salt.modules.statuspage`
- `salt.modules.zonecfg`
- `salt.modules.zoneadm`
Grains

- `salt.grains.metadata`
- `salt.grains.mdata`

Outputters

- `salt.output.table_out`

Pillar

- `salt.pillar.postgres`
- `salt.pillar.vmware_pillar`

Returners

- `salt.returners.mattermost_returner`
- `salt.returners.highstate_return`

Roster

- `salt.roster.cache`

Runners

- `salt.runners.bgp`
- `salt.runners.mattermost`
- `salt.runners.net`

SDB

- `salt.sdb.yaml`
- `salt.sdb.tism`
- `salt.sdb.cache`
States

- `salt.states.boto_kinesis`
- `salt.states.boto_efs`
- `salt.states.boto3_elasticache`
- `salt.states.boto3_route53`
- `salt.states.docker_container`
- `salt.states.docker_image`
- `salt.states.docker_network`
- `salt.states.docker_volume`
- `salt.states.elasticsearch`
- `salt.states.grafana4_dashboard`
- `salt.states.grafana4_datasource`
- `salt.states.grafana4_org`
- `salt(states.grafana4_user`
- `salt.states.heat`
- `salt.states.icinga2`
- `salt.states.influxdb_continuous_query`
- `salt.states.influxdb_retention_policy`
- `salt.states.kubernetes`
- `salt.states.logadm`
- `salt.states.logrotate`
- `salt.states.msteams`
- `salt.states.netacl`
- `salt.states.netconfig`
- `salt.states.netyang`
- `salt.states.nix`
- `salt.states.pdbedit`
- `salt.states.solrcloud`
- `salt.states.statuspage`
- `salt.states.vault`
- `salt.states.win_wua`
- `salt.states.zone`
Deprecations

General Deprecations

- Removed support for aliasing `cmd.run` to `cmd.shell`.
- Removed support for Dulwich from `GitFS`.
- Beacon configurations should be lists instead of dictionaries.
- The `PidfileMixin` has been removed. Please use `DaemonMixIn` instead.
- The `use_pending` argument was removed from the `salt.utils.event.get_event` function.
- The `pending_tags` argument was removed from the `salt.utils.event.get_event` function.

Configuration Option Deprecations

- The `client_acl` configuration option has been removed. Please use `publisher_acl` instead.
- The `client_acl_blacklist` configuration option has been removed. Please use `publisher_acl_blacklist` instead.
- The `win_gitrepos` configuration option has been removed. Please use the `winrepo_remotes` option instead.
- The `win_repo` configuration option has been removed. Please use `winrepo_dir` instead.
- The `win_repo_mastercache_file` configuration option has been removed. Please use the `winrepo_cache_file` option instead.

Module Deprecations

The `git` execution module had the following changes:

- The `fmt` argument was removed from the `archive` function. Please use `format` instead.
- The `repository` argument was removed from the `clone` function. Please use `url` instead.
- The `is_global` argument was removed from the `config_set` function. Please use `global` instead.
- The `branch` argument was removed from the `merge` function. Please use `rev` instead.
- The `branch` argument was removed from the `push` function. Please use `rev` instead.

The `glusterfs` execution module had the following functions removed:

- `create`: Please use `create_volume` instead.
- `delete`: Please use `delete_volume` instead.
- `list_peers`: Please use `peer_status` instead.

The `htpasswd` execution module had the following function removed:

- `useradd_all`: Please use `useradd` instead.

The `img` execution module has been removed. All of its associated functions were marked for removal in the 2017.7.0 release. The functions removed in this module are mapped as follows:

- `mount_image/mnt_image`: Please use `mount.mount` instead.
- `umount_image`: Please use `mount.umount` instead.
• bootstrap: Please use genesis.bootstrap instead.

The smartos_virt execution module had the following functions removed:
• create: Please use start instead.
• destroy: Please use stop instead.
• list_vms: Please use list_domains instead.

The virt execution module had the following functions removed:
• create: Please use start instead.
• destroy: Please use stop instead.
• list_vms: Please use list_domains instead.

The virtualenv_mod execution module had the following changes:
• The package_or_requirement argument was removed from both the get_resource_path and the get_resource_content functions. Please use package instead.
• The resource_name argument was removed from both the get_resource_path and get_resource_content functions. Please use resource instead.

The win_repo execution module had the following changes:
• The win_repo_source_dir option was removed from the win_repo module. Please use winrepo_source_dir instead.

The xapi execution module had the following functions removed:
• create: Please use start instead.
• destroy: Please use stop instead.
• list_vms: Please use list_domains instead.

The zypper execution module had the following function removed:
• info: Please use info_available instead.

Pillar Deprecations

• Support for the raw_data argument for the file_tree ext_pillar has been removed. Please use keep_newline instead.
• SQLite3 database connection configuration previously had keys under pillar. This legacy compatibility has been removed.

Proxy Minion Deprecations

• The proxy_merge_grains_in_module default has been switched from False to True.
Salt Documentation, Release 3003.3

Salt-API Deprecations

- The `SaltAPI.run()` function has been removed. Please use the `SaltAPI.start()` function instead.

Salt-Cloud Deprecations

- Support for using the keyword `provider` in salt-cloud provider config files has been removed. Please use `driver` instead. The `provider` keyword should now only be used in cloud profile config files.

Salt-SSH Deprecations

- The `wipe_ssh` option for `salt-ssh` has been removed. Please use the `ssh_wipe` option instead.

State Deprecations

The `apache_conf` state had the following functions removed:
- `disable`: Please use `disabled` instead.
- `enable`: Please use `enabled` instead.

The `apache_module` state had the following functions removed:
- `disable`: Please use `disabled` instead.
- `enable`: Please use `enabled` instead.

The `apache_site` state had the following functions removed:
- `disable`: Please use `disabled` instead.
- `enable`: Please use `enabled` instead.

The `chocolatey` state had the following functions removed:
- `install`: Please use `installed` instead.
- `uninstall`: Please use `uninstalled` instead.

The `git` state had the following changes:
- The `config` function was removed. Please use `config_set` instead.
- The `is_global` option was removed from the `config_set` function. Please use `global` instead.
- The `always_fetch` option was removed from the `latest` function, as it no longer has any effect. Please see the 2015.8.0 release notes for more information.
- The `force` option was removed from the `latest` function. Please use `force_clone` instead.
- The `remote_name` option was removed from the `latest` function. Please use `remote` instead.

The `glusterfs` state had the following function removed:
- `created`: Please use `volume_present` instead.

The `openvswitch_port` state had the following change:
- The `type` option was removed from the `present` function. Please use `tunnel_type` instead.
Build Notes

Windows Installer Packages

Windows Installer packages have been patched with the following PR: 42347

30.2.47 Salt 2017.7.1 Release Notes

Version 2017.7.1 is a bugfix release for 2017.7.0.

Statistics

- Total Merges: 16
- Total Issue References: 12
- Total PR References: 31
- Contributors: 11 (Ch3LL, TiteiKo, garethgreenaway, gtmanfred, llua, rallytime, seedickcode, skizunov, terminmage, twangboy, whiteinge)

Security Fix

CVE-2017-12791 Maliciously crafted minion IDs can cause unwanted directory traversals on the Salt-master

Correct a flaw in minion id validation which could allow certain minions to authenticate to a master despite not having the correct credentials. To exploit the vulnerability, an attacker must create a salt-minion with an ID containing characters that will cause a directory traversal. Credit for discovering the security flaw goes to: Vernhk@qq.com

Changelog for v2017.7.0..v2017.7.1

Generated at: 2018-05-26 20:28:44 UTC

- ISSUE saltstack/salt-jenkins#460: (Ch3LL) decorator tests failing on python3 (refs: #42548)
- PR #42595: (gtmanfred) make sure to pass arg as well @ 2017-07-28 16:21:58 UTC
  - PR #42548: (gtmanfred) pass in empty kwarg for reactor (refs: #42595)
  - a50fe5433a Merge pull request #42595 from gtmanfred/2017.7.1
  - 8f73804b24 make sure to pass arg as well
- PR #42597: (rallytime) Back-port #42590 to 2017.7.1 @ 2017-07-28 00:20:01 UTC
  - PR #42590: (TiteiKo) Fix missing tornado import (refs: #42597)
  - 3b583350de Merge pull request #42597 from rallytime/bp-42590
  - 8818b06f22 Fix missing tornado import
- ISSUE #42404: (gabekahen) [2017.7] file.managed with cmd_check "No such file or directory" (refs: #42411)

- PR #42598: (rallytime) Back-port #42411 to 2017.7.1 @ 2017-07-28 00:19:13 UTC
  - PR #42411: (seedickcode) Fix file.managed check_cmd file not found - Issue #42404 (refs: #42598)
  - PR #38063: (llu) tmp file clean up in file.manage - fix for #33708 (refs: #42411)
- 76f1e53e10 Merge pull request #42598 from rallytime/bp-42411
- 190cdb8693 Fix file.managed check_cmd file not found - Issue #42404

- **PR #42564:** (rallytime) Back-port #42555 to 2017.7.1 @ 2017-07-26 17:32:02 UTC
  - PR #42555: (Ch3LL) add changelog to 2017.7.1 release notes (refs: #42564)
- 5c7def9a43 Merge pull request #42564 from rallytime/bp-42555
- 7bca5a4cc small markup fix for title
  - d066b599ca add changelog to 2017.7.1 release notes

- **ISSUE saltstack/salt-jenkins#460:** (Ch3LL) decorator tests failing on python3 (refs: #42548)

- **PR #42548:** (gtmanfred) pass in empty kwarg for reactor (refs: #42595) @ 2017-07-26 00:41:20 UTC
  - 711b742c54 Merge pull request #42548 from gtmanfred/2017.7.1
  - 0257c1dc32 pass in empty kwarg for reactor
  - b948e980d2 update chunk, not kwarg in chunk

- **ISSUE #42519:** (suhec) Error when installing package from file under Arch Linux (refs: #42522)

- **PR #42522:** (gtmanfred) pacman wildcard is only for repository installs @ 2017-07-24 20:51:05 UTC
  - 50c1635dcc Merge pull request #42522 from gtmanfred/2017.7.1
  - 7787b9e1b pacman wildcard is only for repository installs

- **PR #42508:** (rallytime) Back-port #42474 to 2017.7.1 @ 2017-07-24 20:49:51 UTC
  - PR #42474: (whiteinge) Cmd arg kwarg parsing test (refs: #42508)
  - PR #39646: (terminalmage) Handle deprecation of passing string args to load_args_and_kwargs (refs: #42474)
  - 05e07ac049 Merge pull request #42508 from rallytime/bp-42474
  - 76f074433 Add a test.arg variant that cleans the pub kwargs by default
  - 624f63648e Lint fixes
  - d246a5fc61 Add back support for string kwargs
  - 854e098aa0 Add LocalClient.cmd test for arg/kwarg parsing

- **ISSUE #42427:** (grichmond-salt) Issue Passing Variables created from load_json as Inline Pillar Between States (refs: #42435)

- **PR #42472:** (rallytime) Back-port #42435 to 2017.7.1 @ 2017-07-24 15:11:13 UTC
  - PR #42435: (terminalmage) Modify our custom YAML loader to treat unicode literals as unicode strings (refs: #42472)
  - 95fe2558e4 Merge pull request #42472 from rallytime/bp-42435
  - 5c47af5b98 Modify our custom YAML loader to treat unicode literals as unicode strings

- **ISSUE #42374:** (tyhunt99) [2017.7.0] salt-run manage.versions throws exception if minion is offline or unresponsive (refs: #42436)

- **PR #42473:** (rallytime) Back-port #42436 to 2017.7.1 @ 2017-07-24 15:10:29 UTC
  - PR #42436: (garethgreenaway) Fixes to versions function in manage runner (refs: #42473)
  - 5b99d45f54 Merge pull request #42473 from rallytime/bp-42436
– 82ed919803 Updating the versions function inside the manage runner to account for when a minion is offline and we are unable to determine its version.

• ISSUE #42381: (zebooka) Git.detached broken in 2017.7.0 (refs: #42399)

• ISSUE #38878: (tomlaredo) [Naming consistency] git.latest "rev" option VS git.detached "ref" option (refs: #38898)

• PR #42471: (rallytime) Back-port #42399 to 2017.7.1 @ 2017-07-24 15:09:50 UTC
  – PR #42399: (rallytime) Update old "ref" references to "rev" in git.detached state (refs: #42471)
  – PR #38898: (terminalmage) git.detached: rename ref to rev for consistency (refs: #42399)
  – 3d1a2d3f9f Merge pull request #42471 from rallytime/bp-42399
  – b9a4669e5a Update old "ref" references to "rev" in git.detached state

• ISSUE #42400: (Enquier) Conflict in execution of passing pillar data to orch/reactor event executions 2017.7.0 (refs: #42031)

• PR #42470: (rallytime) Back-port #42031 to 2017.7.1 @ 2017-07-24 15:09:30 UTC

Security Fix

CVE-2017-14695 Directory traversal vulnerability in minion id validation in SaltStack. Allows remote minions with incorrect credentials to authenticate to a master via a crafted minion ID. Credit for discovering the security flaw goes to: Julian Brost (julian@0x4a42.net)

CVE-2017-14696 Remote Denial of Service with a specially crafted authentication request. Credit for discovering the security flaw goes to: Julian Brost (julian@0x4a42.net)

Changelog for v2017.7.1..v2017.7.2

Generated at: 2018-05-26 21:06:12 UTC

- PR #43868: (rallytime) Back-port #43847 to 2017.7.2 @ 2017-10-03 12:00:52 UTC
  - PR #43847: (cachedout) Fix to module.run (refs: #43868)
  - dd0b338cf Merge pull request #43847 from rallytime/bp-43847
  - e21d8e9583 Use six.iterkeys() instead of dict.keys()
  - c297ae5557 Improve failures for module.run states
  - 782e67c199 Lint
  - a6c2d78518 Fix typo found by @s0undt3ch
  - 0ca15e502 Fix typo found by module.run [WIP]
- PR #43871: (rallytime) Add updated release notes to 2017.7.2 branch @ 2017-10-03 11:59:29 UTC
  - 47af4ae38a Merge pull request #43871 from rallytime/update-release-notes
  - 2337904656 Add updated release notes to 2017.7.2 branch
- PR #43756: (gtmanfred) split build and install for pkg osx @ 2017-09-26 20:51:28 UTC
  - 88414d5f73 Merge pull request #43756 from gtmanfred/2017.7.2
  - f7df41fa94 split build and install for pkg osx
- ISSUE #43077: (Manoj2087) Issue with deleting key via wheel (refs: #43330)
- PR #43585: (rallytime) Back-port #43330 to 2017.7.2 @ 2017-09-19 17:33:34 UTC
- **PR #43330**: (terminalmage) Fix reactor regression + unify reactor config schema (refs: #43585)
  - 89f629233f Merge pull request #43585 from rallytime/bp-43330
  - c4f693bae8 Merge branch '2017.7.2' into bp-43330

- **ISSUE #43447**: (UtahDave) When using Syndic with Multi Master the top level master doesn't reliably get returns from lower minion. (refs: #43586)

- **PR #43586**: (rallytime) Back-port #43526 to 2017.7.2 @ 2017-09-19 15:36:27 UTC
  - **PR #43526**: (DmitryKuzmenko) Forward events to all masters syndic connected to (refs: #43586)
    - abb7fe4422 Merge pull request #43586 from rallytime/bp-43526
    - e076e9b634 Forward events to all masters syndic connected to.
    - 7ab07f0a07 Simplify client logic
    - b5f10696c2 Improve the reactor documentation
    - 7a2f12b96a Include a better example for reactor in master conf file
    - 531cc610ec Rewrite the reactor unit tests
    - 2a35ab7f39 Unify reactor configuration, fix caller reactors
    - 4af179bad Un-deprecate passing kwargs outside of 'kwarg' param

- **PR #43551**: (twangboy) Fix preinstall script on OSX for 2017.7.2 @ 2017-09-18 18:35:35 UTC
  - 3d3b90902d Merge pull request #43551 from twangboy/osx_fix_preinstall_2017.7.2
  - c3d9f63f0 Merge branch '2017.7.2' into osx_fix_preinstall_2017.7.2

- **PR #43590**: (rallytime) Back-port #43333 to 2017.7.2 @ 2017-09-15 21:21:40 UTC
  - **PR #43333**: (damon-atkins) Docs are wrong cache_dir (bool) and cache_file (str) cannot be passed as params + 1 bug (refs: #43590)
    - 24691da888 Merge pull request #43590 from rallytime/bp-43333-2017.7.2
    - b3dbab035 Update doco
    - 5cdcbf428 Update win_pkg.py
    - c3e16661c3 Docs are wrong cache_dir (bool) and cache_file (str) cannot be passed on the cli (#2)
    - f339f1lee Fix logic in /etc/paths.d/salt detection

- **PR #43440**: (rallytime) Back-port #43421 to 2017.7.2 @ 2017-09-11 20:59:33 UTC
  - **PR #43421**: (gtmanfred) Revert "Reduce fileclient.get_file latency by merging _file_find and ... (refs: #43440)
    - 8964acbf8 Merge pull request #43440 from rallytime/bp-43421
    - ea66e61755 Revert "Reduce fileclient.get_file latency by merging _file_find and _file_hash"

- **PR #43377**: (rallytime) Back-port #43193 to 2017.7.2 @ 2017-09-11 15:32:23 UTC
  - **PR #43193**: (jettero) Prevent spurious "Template does not exist" error (refs: #43377)
  - **PR #39516**: (jettero) Prevent spurious "Template does not exist" error (refs: #43193)
    - 7fda186b18 Merge pull request #43377 from rallytime/bp-43193
    - 842b07fd25 Prevent spurious "Template does not exist" error

- **ISSUE #42459**: (iavael) Broken ldap groups retrieval in salt.auth.ldap after upgrade to 2017.7 (refs: #43283)
• PR #43315: (rallytime) Back-port #43283 to 2017.7.2 @ 2017-09-05 20:04:25 UTC
  - PR #43283: (DmitryKuzmenko) Fix ldap token groups auth. (refs: #43315)
  - 85dba1e898 Merge pull request #43315 from rallytime/bp-43283
  - f295b0ce Fix for tests: don't require 'groups' in the eauth token.
  - 56938d5bf2 Fix ldap token groups auth.
• ISSUE #43259: (mahesh21) NameError: global name '__opts__' is not defined (refs: #43266)
• PR #43266: (gtmanfred) switch virtualbox cloud driver to use __utils__ @ 2017-08-30 18:36:20 UTC
  - 26ff8088cb Merge pull request #43266 from gtmanfred/virtualbox
  - 382bf9de7 switch virtualbox cloud driver to use __utils__
• ISSUE #42936: (Mapel88) bug in win_iis module & state - container_setting (refs: #43073)
• PR #43073: (Mapel88) Fix bug #42936 - win_iis module container settings @ 2017-08-30 18:34:37 UTC
  - ee209b144c Merge pull request #43073 from Mapel88/patch-2
  - b1a3d15b28 Remove trailing whitespace for linter
  - 25c8190e48 Fix pyLint errors
  - 1eba8c4b8e Fix pyLint errors
  - 290d7b54af Fix plint errors
  - f4f32421ab Fix plint errors
  - ec20e9a19a Fix bug #43110 - win_iis module
  - 009ef6686b Fix dictionary keys from string to int
  - dc793f9a05 Fix bug #42936 - win_iis state
  - 13404a47b5 Fix bug #42936 - win_iis module
• PR #43254: (twangboy) Fix unit.modules.test_inspect_collector on Windows @ 2017-08-30 15:46:07 UTC
  - ec1bedc646 Merge pull request #43254 from twangboy/win_fix_test_inspect_collector
  - b401340e6c Fix unit.modules.test_inspect_collector on Windows
• ISSUE #43241: (mirceaulinic) Error whilst collecting napalm grains (refs: #43255)
• PR #43255: (gtmanfred) always return a dict object @ 2017-08-30 14:47:15 UTC
  - 1fc7307735 Merge pull request #43255 from gtmanfred/2017.7
  - 83b0bab34b opt_args needs to be a dict
• PR #43229: (twangboy) Bring changes from #43228 to 2017.7 @ 2017-08-30 14:26:55 UTC
  - PR #43228: (twangboy) Win fix pkg.install (refs: #43229)
  - fa904ee225 Merge pull request #43229 from twangboy/win_fix_pkg.install-2017.7
  - e007a1c26e Fix regex, add .
  - 23ec47c74c Add _ to regex search
  - b1788b1e5f Bring changes from #43228 to 2017.7
• PR #43251: (twangboy) Skips unit.modules.test_groupadd on Windows @ 2017-08-30 13:56:36 UTC
  - 25666f88f7 Merge pull request #43251 from twangboy/win_skip_test_groupadd
- 5185071d5a Skips `unit.modules.test_groupadd` on Windows

- **PR #43256**: (twangboy) Skip mac tests for user and group @ 2017-08-30 13:18:13 UTC
  - a8ec0962b2 Merge pull request #43256 from twangboy/win_skip_mac_tests
  - cec627a60b Skip mac tests for user and group

- **ISSUE #42279**: (dafyddj) `win_lgpo` matches multiple policies due to startswith() (refs: #43116, #43156, #43166, #43226)

- **PR #43226**: (lomeroe) Fixes for issues in PR #43166 @ 2017-08-29 19:05:39 UTC
  - PR #43166: (lomeroe) Backport #43116 to 2017.7 (refs: #43226)
  - PR #43156: (lomeroe) Backport #43116 to 2017.7 (refs: #43166)
  - PR #43116: (lomeroe) Fix 42279 in develop (refs: #43166, #43156)
  - PR #39773: (twangboy) Make `win_file` use the `win_dacl` salt util (refs: #43226)
  - ac2189c870 Merge pull request #43226 from lomeroe/fixed
  - 0c42dc4a3 Merge branch '2017.7' into fixed
  - 324cf8d81e correcting bad format statement in search for policy to be disabled (fix for #43166) verify that file exists before attempting to remove (fix for commits from #39773)

- **PR #43227**: (twangboy) Fix `unit.fileserver.test_gitfs` for Windows @ 2017-08-29 19:03:36 UTC
  - 6199fb46dc Merge pull request #43227 from twangboy/win_fix_unit_test_gitfs
  - c956d2483 Fix is_windows detection when USERNAME missing
  - 869e8c603 Fix `unit.fileserver.test_gitfs` for Windows

- **PR #43217**: (rallytime) [2017.7] Merge forward from 2016.11 to 2017.7 @ 2017-08-28 16:36:28 UTC
  - 6adc03e4b4 Merge pull request #43217 from rallytime/merge-2017.7
  - 3911df2f4b Merge branch '2016.11' into '2017.7'
  - 5308e27f9f Merge pull request #43202 from garethgreenaway/42642_2016_11_augeas_module_revert_fix
    - ef7e93eb3f Reverting this change due to it breaking other uses.
  - f16b7246e4 Merge pull request #43103 from aogier/43101-genesis-bootstrap
    - db94f3bb1c better formatting
    - e5cc667762 tests: fix a leftover and simplify some parts
    - 13e5997457 lint
    - 21ced69e5 allow comma-separated pkgs lists, quote args, test deb behaviour
    - d8612ae006 fix debootstrap and enhance packages selection/deletion via cmdline
  - 4863771428 Merge pull request #42663 from StreetHawkInc/fixed
    - 3f2e96e561 Convert set to list for serializer
    - 27285d977 Only include new tags in changes
    - 2b5a55b59d Remove refs/tags prefix from remote tags
    - 3f2e96e561 Convert set to list for serializer
    - 4b1df2f223 Exclude annotated tags from checks
  - 389c037285 Check remote tags before deciding to do a fetch #42329

- **PR #43201**: (rallytime) [2017.7] Merge forward from 2016.11 to 2017.7 @ 2017-08-25 22:56:46 UTC
- a563a9422a Merge pull request #43201 from rallytime/merge-2017.7
- d40eba6b37 Merge branch '2016.11' into '2017.7'
  * 4193e7f0a2 Merge pull request #43199 from corywright/disk-format-alias
    - f00d3a9ddc Add disk.format alias for disk_format_
  * 5471f9fe0c Merge pull request #43196 from gtmanfred/2016.11
    - ccd2241777 Pin request install to version
  * ace2715c60 Merge pull request #43178 from terminalmage/issue43143
    - 2640833400 git.detached: Fix traceback when rev is a SHA and is not present locally
  * 12e9507b9e Merge pull request #43179 from terminalmage/old-deprecation
    - 3adf8ad04b Fix missed deprecation
  * b595440d90 Merge pull request #43171 from terminalmage/salt-utils-warning
    - 7b5943a31a Add warning about adding new functions to salt/utils/__init__.py
  * 4f273cac4f Merge pull request #43173 from Ch3LL/add_branch_docs
    - 1b24244bd3 Add New Release Branch Strategy to Contribution Docs

- PR #42997: (twangboy) Fix unit.test_test_module_names for Windows @ 2017-08-25 21:19:11 UTC
  - c04ab4286 Merge pull request #42997 from twangboy/win_fix_test_module_names
  - 2722e9521d Use os.path.join to create paths

- ISSUE #26995: (jbouse) Issue with artifactory.downloaded and snapshot artifacts (refs: #43006)

- PR #43006: (SuperPommeDeTerre) Try to fix #26995 @ 2017-08-25 21:16:07 UTC
  - c0279e491e Merge pull request #43006 from SuperPommeDeTerre/SuperPommeDeTerre-patch-#26995
  - 30dd6f5d12 Merge remote-tracking branch 'upstream/2017.7' into SuperPommeDeTerre-patch-#26995
    - 50ee3d5682 Merge remote-tracking branch 'remotes/origin/2017.7' into SuperPommeDeTerre-patch-#26995
    - 0b666e100b Fix typo.
    - 1b8729b3e7 Fix for #26995
  - e31402978 Fix typo.
  - db11e1985b Fix for #26995

- ISSUE #43162: (MorphBonehunter) docker_container.running interference with restart_policy (refs: #43184)

- PR #43184: (terminalmage) docker.compare_container: Perform boolean comparison when one side's value is null/None @ 2017-08-25 18:42:11 UTC
  - b6c5314fe9 Merge pull request #43184 from terminalmage/issue43162
  - 081f42ad71 docker.compare_container: Perform boolean comparison when one side's value is null/None

- PR #43165: (mirceaulinic) Improve napalm state output in debug mode @ 2017-08-24 23:05:37 UTC
  - 688125bb4f Merge pull request #43165 from cloudflare/fix-napalm-ret
  - c10717dc89 Lint and fix

30.2. Previous Releases 4801
- 1cd33cb9a9 Simplify the loaded_ret logic
- 0bbea6b04c Document the new compliance_report arg
- 3a906109bd Include compliance reports
- 3634055e34 Improve napalm state output in debug mode

**PR #43155**: (terminalmage) Resolve image ID during container comparison @ 2017-08-24 22:09:47 UTC
- a6a327b1e5 Merge pull request #43155 from terminalmage/issue43001
- 0186835ebf Fix docstring in test
- a0bb654e46 Fixing lint issues
- d5b2a0be68 Resolve image ID during container comparison

**PR #43170**: (rallytime) [2017.7] Merge forward from 2016.11 to 2017.7 @ 2017-08-24 19:22:26 UTC
- c071fd4ac8 Merge pull request #43170 from rallytime/merge-2017.7
- 3daad5a3a2 Merge branch '2016.11' into '2017.7'
  - 669b376a8f Merge pull request #43151 from ushmodin/2016.11
    - c5841e2ade state.sls hangs on file.recurse with clean: True on windows

**ISSUE #43040**: (darcoli) gitFS ext_pillar with branch name __env__ results in empty pillars (refs: #43041)

**PR #43168**: (rallytime) Back-port #43041 to 2017.7 @ 2017-08-24 19:07:23 UTC
- PR #43041: (darcoli) Do not try to match pillarenv with __env__ (refs: #43168)
- 034c325a09 Merge pull request #43168 from rallytime/bp-43041
- d010b74b87 Do not try to match pillarenv with __env__

**PR #43172**: (rallytime) Move new utils/__init__.py funcs to utils.files.py @ 2017-08-24 19:05:30 UTC
- PR #43056: (damon-atkins) safe_filename_leaf(file_basename) and safe_filepath(file_path_name) (refs: #43172)
  - d48938e6b4 Merge pull request #43172 from rallytime/move-utils-funcs
  - 5385c7901e Move new utils/__init__.py funcs to utils.files.py

**ISSUE #43043**: (pabloh007) docker.save and docker.load problem (refs: #43061)

**PR #43061**: (pabloh007) Have docker.save use the image name when valid if not use image id, i... @ 2017-08-24 16:32:02 UTC
- e60f58ed4c Merge pull request #43061 from pabloh007/fix-save-image-name-id
- 0ff571d1f Have docker.save use the image name when valid if not use image id, issue when loading and image is savid with id issue #43043

**ISSUE #42279**: (dafyddj) win_lgpo matches multiple policies due to startswith() (refs: #43116, #43156, #43166, #43226)

**PR #43166**: (lomeroe) Backport #43166 to 2017.7 (refs: #43226) @ 2017-08-24 15:01:23 UTC
- PR #43156: (lomeroe) Backport #43116 to 2017.7 (refs: #43166)
- PR #43116: (lomeroe) Fix 42279 in develop (refs: #43166, #43156)
- 9da5754f8e Merge pull request #43166 from lomeroe/bp-43116-2017.7
- af181b3257 correct fopen calls from salt.utils for 2017.7
- 44b3caead1 Merge pull request #43056 from damon-atkins/2017.7
- 08ded1546e more lint
- 6e9c0957fb fix typo
- ee41171c9f lint fixes
- 8c86f02c7 fix missing imports
- 964ceb954 safe_filename_leaf(file_basename) and safe_filepath(file_path_name)

- PR #43146: (rallytime) [2017.7] Merge forward from 2016.11 to 2017.7 @ 2017-08-23 16:56:10 UTC
  - 6ca9131a23 Merge pull request #43146 from rallytime/merge-2017.7
  - bcbef80bfc Merge branch '2016.11' into '2017.7'
    - ae9d2b7985 Merge pull request #42986 from renner/systemd-notify
      - 79c53f3f81 Fallback to systemd_notify_call() in case of socket.error
      - f1765472dd Notify systemd synchronously (via NOTIFY_SOCKET)
    - b420f6e18 Merge pull request #43037 from mcarlton00/fix-bhyve-grains
      - 73315f0cf0 Issue #43036 Bhyve virtual grain in Linux VMs
    - 0a86f2d884 Merge pull request #43100 from vutny/doc-add-missing-utils-ext
      - af743ff6c3 [DOCS] Add missing utils sub-dir listed for extension_modules

- PR #43123: (twangboy) Fix unit.utils.test_which for Windows @ 2017-08-23 16:01:39 UTC
  - 03f652159f Merge pull request #43123 from twangboy/win_fix_test_which
  - ed97c5f56f Fix unit.utils.test_which for Windows

- ISSUE #42505: (ikogan) selinux.fcontext_policy_present exception looking for selinux.filetype_id_to_string
  (refs: #43068)

- PR #43142: (rallytime) Back-port #43068 to 2017.7 @ 2017-08-23 15:56:48 UTC
  - PR #43068: (ixs) Mark selinux._filetype_id_to_string as public function (refs: #43142)
  - 5a4f007863 Merge pull request #43142 from rallytime/bp-43068
  - e3c8c506 Mark selinux._filetype_id_to_string as public function

- PR #43038: (twangboy) Fix unit.utils.test_url for Windows @ 2017-08-23 13:35:25 UTC
  - 0467a0e3bf Merge pull request #43038 from twangboy/win_unit_utils_test_url
  - 7f5ee555f7 Fix unit.utils.test_url for Windows

- PR #43097: (twangboy) Fix group.present for Windows @ 2017-08-23 13:19:56 UTC
  - e9cca61d2 Merge pull request #43097 from twangboy/win_fix_group
  - 43b0360763 Fix lint
  - 9fffe3157d Add kwarg

30.2. Previous Releases 4803
- 4f4e34c79f Fix group state for Windows

- **PR #43115**: (rallytime) Back-port **#42067** to 2017.7 @ 2017-08-22 20:09:52 UTC
  - **PR #42067**: (vitaliyf) Removed several uses of name.split('.')[0] in SoftLayer driver. (refs: #43115)
  - 8140855627 Merge pull request #43115 from rallytime/bp-42067
  - 8a6ad0a9cf Fixed typo.
  - 9a5ae2bba1 Removed several uses of name.split('.')[0] in SoftLayer driver.

- **PR #42962**: (twangboy) Fix unit.test_doc test for Windows @ 2017-08-22 18:06:23 UTC
  - 1e1a81036c Merge pull request #42962 from twangboy/win_unit_test_doc
  - 201ceae4c4 Fix lint, remove debug statement
  - 37029c1a16 Fix unit.test_doc test

- **PR #42995**: (twangboy) Fix malformed requisite for Windows @ 2017-08-22 16:50:01 UTC
  - d347d1cf8f Merge pull request #42995 from twangboy/win_fix_invalid_requisite
  - 9390de888 Fix malformed requisite for Windows

- **PR #43108**: (rallytime) Back-port **#42988** to 2017.7 @ 2017-08-22 16:49:27 UTC
  - **PR #42988**: (thusoy) Fix broken negation in iptables (refs: #43108)
  - 1c7992a832 Merge pull request #43108 from rallytime/bp-42988
  - 1a987cb948 Fix broken negation in iptables

- **PR #43107**: (rallytime) [2017.7] Merge forward from 2016.11 to 2017.7 @ 2017-08-22 16:11:25 UTC
  - c6993faa84 Merge pull request #43107 from rallytime/merge-2017.7
  - 328dd6a223 Merge branch '2016.11' into '2017.7'
  - e2bf2ff4de Merge pull request #42985 from DSRCorporation/bugs/15171_recursion_limit
    - 651b1bab09 Properly handle prereq having lost requisites.
  - e5133306c Merge pull request #43092 from mitodl/2016.11
    - d4b113acdf Fixed issue with silently passing all tests in Testinfra module
  - 77a443ce08 Merge pull request #43060 from twangboy/osx_update_pkg_scripts
    - ef8a14cd99 Remove /opt/salt instead of /opt/salt/bin
    - 2dd62aa1da Add more information to the description
    - f44f570dc Only stop services if they are running
    - 3b62bf953c Remove salt from the path
    - ebdc3a0f5 Update pkg-scripts
  - 1bb67e803d Merge pull request #43064 from terminalmage/image42869
    - 093ec2777 Fix race condition in git.latest
  - 96e8e836d1 Merge pull request #43054 from lorengordon/fix/yumpkg/config-parser
    - 3b2cb81a72 fix typo in salt.modules.yumpkg
    - 38add0e4a2 break if leading comments are all fetched
    - d7f65dc7a7 fix configparser import & log if error was raised
- ca1b1bb633 use configparser to parse yum repo file

- **PR #42996**: (twangboy) Fix `unit.test_stateconf` for Windows @ 2017-08-21 22:43:58 UTC
  - f9b4976c02 Merge pull request #42996 from twangboy/win_fix_test_stateconf
  - 92dc30e6e Use os.sep for path

- **PR #43024**: (twangboy) Fix `unit.utils.test_find` for Windows @ 2017-08-21 22:38:10 UTC
  - 19fc644c9b Merge pull request #43024 from twangboy/win_unit_utils_test_find
  - fbe54c9a33 Remove unused import six (lint)
  - b04d1a2f18 Fix `unit.utils.test_find` for Windows

- **PR #43088**: (gtmanfred) allow docker util to be reloaded with reload_modules @ 2017-08-21 22:14:37 UTC
  - 1a531169fc Merge pull request #43088 from gtmanfred/2017.7
  - 373a90be4 allow docker util to be reloaded with reload_modules

- **PR #43091**: (blarghmatey) Fixed issue with silently passing all tests in Testinfra module @ 2017-08-21 22:06:22 UTC
  - 83e528f0b3 Merge pull request #43091 from mitodl/2017.7
  - b502560e61 Fixed issue with silently passing all tests in Testinfra module

- **PR #41994**: (twangboy) Fix `unit.modules.test_cmdmod` on Windows @ 2017-08-21 21:53:01 UTC
  - 5482524270 Merge pull request #41994 from twangboy/win_unit_test_cmdmod
  - a5f7288ad9 Skip test that uses pwd, not available on Windows

- **ISSUE #42873**: (TheVakman) osquery Data Empty Upon Return / Reporting Not Installed (refs: #42933)

- **PR #42933**: (garethgreenaway) Fixes to osquery module @ 2017-08-21 20:48:31 UTC
  - b33c4abc15 Merge pull request #42933 from garethgreenaway/42873_2017_7_osquery_fix
  - 8915e62b9 Removing an import that is not needed.
  - 74bc377eb4 Updating the other function that uses cmd.run_all
  - e6a4619ec1 Better approach without using python_shell=True.
  - 5ac41f496d When running osquery commands through cmd.run we should pass python_shell=True to ensure everything is formatted right. #42873

- **PR #43093**: (gtmanfred) Fix ec2 list_nodes_full to work on 2017.7 @ 2017-08-21 20:21:21 UTC
  - 53c2115769 Merge pull request #43093 from gtmanfred/ec2
  - c7ffbb5a04 This block isn't necessary
  - b7283bcca6f_vm_provider_driver isn't needed anymore

- **ISSUE #43085**: (brejoc) Patch for Kubernetes module missing from 2017.7 and 2017.7.1 (refs: #43087)

- **PR #43087**: (rallytime) Back-port #42174 to 2017.7 @ 2017-08-21 18:40:18 UTC
  - **PR #42174**: (mcalmer) kubernetes: provide client certificate authentication (refs: #43087)
  - 32f9ad14d8 Merge pull request #43087 from rallytime/bp-42174
  - 87563645b add support for certificate authentication to kubernetes module

- **PR #43029**: (terminalmage) Normalize the salt caching API @ 2017-08-21 16:54:58 UTC
  - 882fd846fa Merge pull request #43029 from terminalmage/fix-func-alias

---

**30.2. Previous Releases**
- f8f74a310c Update localfs cache tests to reflect changes to func naming
- c4ae79b229 Rename other refs to cache.ls with cache.list
- ee59d127e8 Normalize the salt caching API

**ISSUE #42843:** (brejoc) Kubernetes module won't work with Kubernetes Python client > 1.0.2 (refs: #42845)

**PR #43039:** (gtmanfred) catch ImportError for kubernetes.client import @ 2017-08-21 14:32:38 UTC
- PR #42845: (brejoc) API changes for Kubernetes version 2.0.0 (refs: #43039)
- dbee735f6e Merge pull request #43039 from gtmanfred/kube
- 7e269c368 cache ImportError for kubernetes.client import

**PR #43058:** (rallytime) Update release version number for jenkins.run function @ 2017-08-21 14:13:34 UTC
- c56a8499b3 Merge pull request #43058 from rallytime/fix-release-num
- d7ee70d0f0 Update release version number for jenkins.run function

**PR #43051:** (rallytime) [2017.7] Merge forward from 2016.11 to 2017.7 @ 2017-08-18 17:05:57 UTC
- 7b0c94768a Merge pull request #43051 from rallytime/merge-2017.7
- 153a463b86 Lint: Add missing blank line
- 84829a6f8c Merge branch '2016.11' into '2017.7'
- 43aa46f512 Merge pull request #43048 from rallytime/bp-43031
  - 35e45049e2 use a ruby gem that doesn’t have dependencies
- ad89ff3104 Merge pull request #43023 from terminalmage/fix-jenkins-xml-caching
  - 33fd8ff939 Update jenkins.py
  - fc306fc8c3 Add missing colon in if statement
  - 822eabcc81 Catch exceptions raised when making changes to jenkins
  - 91b583b493 Improve and correct exception raising
  - f096917a0e Raise an exception if we fail to cache the config xml
- 2957467ed7 Merge pull request #43026 from rallytime/bp-43020
  - 0eb15a1f67 test with gem that appears to be abandoned
- 4150b094fe Merge pull request #43033 from rallytime/bp-42760
  - 3e3f7f5d8e Catch TypeError thrown by m2crypto when parsing missing subjects in certificate files.
- b124d3667e Merge pull request #43032 from rallytime/bp-42547
  - ea4d7f4176 Updated testinfra modules to work with more recent versions
- a88386ad44 Merge pull request #43027 from pabloh007/fix-docker-save-push-2016-11
  - d0fd949f85 Fixes ignore push flag for docker.push module issue #42992
- 51d16840bb Merge pull request #42890 from DSRCorporation/bugs/42627_salt-cp
  - cffdb1fc75 Apply code review: update the doc
  - afedd3b654 Typos and version fixes in the doc.
  - 9fedf6012e Fixed 'test_valid_docs' test.
  - 999388680c Make chunked mode in salt-cp optional (disabled by default).
**PR #43035**: (rallytime) [2017.7] Merge forward from 2017.7.1 to 2017.7 @ 2017-08-18 12:58:17 UTC
- **PR #42948**: (Ch3LL) [2017.7.1] Add clean_id function to salt.utils.verify.py (refs: #43035)
- **PR #42945**: (Ch3LL) [2017.7] Add clean_id function to salt.utils.verify.py (refs: #43035)
- d15bca937 Merge pull request #43035 from rallytime/merge-2017.7
- 756128a896 Merge branch '2017.7.1' into '2017.7'
  - ab1b099730 Merge pull request #42948 from Ch3LL/2017.7.0_follow_up

**ISSUE #42989**: (blbradley) GitFS GitPython performance regression in 2017.7.1 (refs: #42523, #42958)

**PR #43034**: (rallytime) Back-port #43002 to 2017.7 @ 2017-08-17 23:18:16 UTC
- **PR #43002**: (the-glu) Try to fix #42989 (refs: #43034)
- bcbb973a71 Merge pull request #43034 from rallytime/bp-43002
- 350c0767dc Try to fix #42989 by doing sslVerify and refspects for origin remote only if there is no remotes

**ISSUE #42375**: (dragonpaw) salt.modules.*.__virtualname__ doesnt work as documented. (refs: #42523, #42958)

**PR #42958**: (gtmanfred) runit module should also be loaded as runit @ 2017-08-17 22:30:23 UTC
- 9182f55bb Merge pull request #42958 from gtmanfred/2017.7
- fd6874668b runit module should also be loaded as runit

**PR #43031**: (gtmanfred) use a ruby gem that doesn't have dependencies (refs: #43048) @ 2017-08-17 22:26:25 UTC
- 5985cc4e8e Merge pull request #43031 from gtmanfred/test_gem
- ba80a7d4b5 use a ruby gem that doesn’t have dependencies

- **PR #43030**: (rallytime) Small cleanup to dockermad.save @ 2017-08-17 22:26:00 UTC
  - 246176b1a6 Merge pull request #43030 from rallytime/dockermad-minor-change
  - d6a5e85632 Small cleanup to dockermad.save

- **ISSUE #42992**: (pabloh007) docker.save flag push does is ignored (refs: #42993, #43027)

- **PR #42993**: (pabloh007) Fixes ignored push flag for docker.push module issue #42992 @ 2017-08-17 18:50:37 UTC
  - 160001120b Merge pull request #42993 from pabloh007/fix-docker-save-push
  - fe7554cf8e Fixes ignored push flag for docker.push module issue #42992

- **ISSUE #42941**: (danlsgiga) pkg.installed fails on installing from HTTPS rpm source (refs: #42967)

- **PR #42967**: (terminalmage) Fix bug in on_header callback when no Content-Type is found in headers @ 2017-08-17 18:48:52 UTC
  - 9009a971b1 Merge pull request #42967 from terminalmage/issue42941
  - b838460816 Fix bug in on_header callback when no Content-Type is found in headers

- **ISSUE #43008**: (evelineraine) states.service.running always succeeds when watched state has changes (refs: #43016)

- **PR #43016**: (gtmanfred) service should return false on exception @ 2017-08-17 18:08:05 UTC
  - 58f070d7a7 Merge pull request #43016 from gtmanfred/service
  - 21c264fe55 service should return false on exception

- **PR #43020**: (gtmanfred) test with gem that appears to be abandoned (refs: #43026) @ 2017-08-17 16:40:41 UTC
  - 973d288eca Merge pull request #43020 from gtmanfred/test_gem
  - 0a1f40a664 test with gem that appears to be abandoned

- **PR #42999**: (garethgreenaway) Fixes to slack engine @ 2017-08-17 15:46:24 UTC
  - 9cd607f4d4 Merge pull request #42999 from garethgreenaway/slack_engine_allow_editing_messages
  - 0ce2a8f0c Fixing a bug that prevented editing Slack messages and having the commands resent to the Slack engine.

- **PR #43010**: (rallytime) [2017.7] Merge forward from 2016.11 to 2017.7 @ 2017-08-17 15:10:29 UTC
  - 31627a9163 Merge pull request #43010 from rallytime/merge-2017.7
  - 8a0f948e4a Merge branch ‘2016.11’ into ‘2017.7’
  - 1ee9499d28 Merge pull request #42968 from vutny/doc-salt-cloud-ref
    - 44ed53b1df [DOCS] Fix link to Salt Cloud Feature Matrix
  - 923f9741fe Merge pull request #42291 from vutny/fixed-task-2839
    - 5f8f98a01f Fix #38839: remove state from Reactor runner kwags
  - c20bc7d515 Merge pull request #42940 from gtmanfred/2016.11
    - 253be216a8d fix IP address spelling
    - bd63074e7a create new ip address before checking list of allocated ips
  - d6496eca72 Merge pull request #42959 from rallytime/bp-42883
- c6b9ca4b9e Lint fix: add missing space
- 5597b1a30e Skip 2 failing tests in Python 3 due to upstream bugs
- a0b19bcd27 Update account id value in boto_secgroup module unit test
- 60b40ee088 @mock_elb needs to be changed to @mock_elb_deprecated as well
- 6ae1111295 Replace @mock_ec2 calls with @mock_ec2_deprecated calls
- 6366e05d0d Merge pull request #42944 from Ch3LL/2016.11.6_follow_up
  * 7e0a20afca Add release notes for 2016.11.7 release
  * 63823f8c3e Add clean_id function to salt.utils.verify.py
- 49d339e976 Merge pull request #42952 from Ch3LL/latest_2016.11
  * 74e7055d54 [2016.11] Bump latest and previous versions
- b0d2e05a79 Merge pull request #42950 from Ch3LL/2016.11.7_docs
  * a6f902db40 Add Security Notice to 2016.11.77 Release Notes
- c0ff2f88ec Merge pull request #42836 from lyft/backport-utils.versions-to-2016.11
  * 86ce7004a2 Backport salt.utils.versions from develop to 2016.11
- 64a79dd5ac Merge pull request #42919 from rallytime/bp-42871
  * 4e46c968e6 Update joyent.rst
- bea8ec1098 Merge pull request #42918 from rallytime/bp-42848
  * cdb48126f7 Make lint happier.
  * 62eca9b00b Execute fire_master asynchronously in the main minion thread.
- 52bce329cb Merge pull request #42861 from twangboy/win_pkg_install_salt
  * 0d3789f0c6 Fix pkg.install salt-minion using salt-call
- b9f4f87aa5 Merge pull request #42798 from s-sebastian/2016.11
  * 1cc86592ed Update return data before calling returners

- ISSUE #42842: (Giandom) retrieve kwargvs passed with slack engine (refs: #42884)
- PR #42884: (Giandom) Convert to dict type the pillar string value passed from slack @ 2017-08-16 22:30:43 UTC
  - 82be9dceb6 Merge pull request #42884 from Giandom/2017.7.1-fix-slack-engine-pillar-args
  - 80fd733c99 Update slack.py
- PR #42963: (twangboy) Fix unit.test_fileclient for Windows @ 2017-08-16 14:18:18 UTC
  - 42bd553b98 Merge pull request #42963 from twangboy/win_unit_test_fileclient
  - e9febe4893 Fix unit.test_fileclient
- PR #42964: (twangboy) Fix salt.utils.recursive_copy for Windows @ 2017-08-16 14:17:27 UTC
  - 7dddeee8ad Merge pull request #42964 from twangboy/win_fix_recursive_copy
  - 121cd4ef81 Fix salt.utils.recursive_copy for Windows
- ISSUE #42943: (mirceaulinic) extension_modules defaulting to /var/cache/minion although running under proxy minion (refs: #42946)
- PR #42946: (mirceaulinic) extension_modules should default to $CACHE_DIR/proxy/extmods @ 2017-08-15 21:26:36 UTC
6da4d1d95e Merge pull request #42946 from cloudflare/px_extmods_42943
73f9135340 extension_modules should default to /proxy/extmods

- **PR #42945**: (Ch3LL) [2017.7] Add clean_id function to salt.utils.verify.py (refs: #43035) @ 2017-08-15 18:04:20 UTC
  - 95645d49f9 Merge pull request #42945 from Ch3LL/2017.7.0_follow_up
  - dc92042e3 remove extra doc
  - 693a504ef0 update release notes with cve number

- **ISSUE #42427**: (grichmond-salt) Issue Passing Variables created from load_json as Inline Pillar Between States (refs: #42435)

- **PR #42812**: (terminalmage) Update custom YAML loader tests to properly test unicode literals @ 2017-08-15 17:50:22 UTC
  - **PR #42435**: (terminalmage) Modify our custom YAML loader to treat unicode literals as unicode strings (refs: #42812)
  - 47ff9d5627 Merge pull request #42812 from terminalmage/yaml-loader-tests
  - 9d8486a894 Add test for custom YAML loader with unicode literal strings
  - a0118becce Remove bytestrings and use textwrap.dedent for readability

- **PR #42953**: (Ch3LL) [2017.7] Bump latest and previous versions @ 2017-08-15 17:23:28 UTC
  - 5d0c2198ac Merge pull request #42953 from Ch3LL/latest_2017.7
  - cbef65823 [2017.7] Bump latest and previous versions

- **PR #42951**: (Ch3LL) Add Security Notice to 2017.7.1 Release Notes @ 2017-08-15 16:49:56 UTC
  - 730e71db17 Merge pull request #42951 from Ch3LL/2017.7.1_docs
  - 1d8f827c58 Add Security Notice to 2017.7.1 Release Notes

- **PR #42868**: (carsonoid) Stub out required functions in redis_cache @ 2017-08-15 14:33:54 UTC
  - c1c8eb9bfa Merge pull request #42868 from carsonoid/redisjobcachefix
  - 885bee2a7d Stub out required functions for redis cache

- **PR #42810**: (amendlik) Ignore error values when listing Windows SNMP community strings @ 2017-08-15 03:55:15 UTC
  - e192d6e0af Merge pull request #42810 from amendlik/win-snmp-community
  - dc20e651b Ignore error values when listing Windows SNMP community strings

- **PR #42920**: (cachedout) pid_race @ 2017-08-15 03:49:10 UTC
  - a1817f1de3 Merge pull request #42920 from cachedout/pid_race
  - 5e93b8cbde If we catch the pid file in a transistory state, return None

- **PR #42925**: (terminalmage) Add debug logging to troubleshoot test failures @ 2017-08-15 03:47:51 UTC
  - 11a33fe692 Merge pull request #42925 from terminalmage/f26-debug-logging
  - 8165f46165 Add debug logging to troubleshoot test failures

- **PR #42913**: (twangboy) Change service shutdown timeouts for salt-minion service (Windows) @ 2017-08-14 20:55:24 UTC
  - a537197030 Merge pull request #42913 from twangboy/win_change_timeout
- ffb23fbc47 Remove the line that wipes out the cache
- a3becf8342 Change service shutdown timeouts

- **PR #42800**: (skizunov) Fix exception when master_type=disable @ 2017-08-14 20:53:38 UTC
  - ca0555f516 Merge pull request #42800 from skizunov/develop6
  - fa5822009f Fix exception when master_type=disable

- **PR #42679**: (mirceaulinic) Add multiprocessing option for NAPALM proxy @ 2017-08-14 20:45:06 UTC
  - 3af26ab664 Merge pull request #42679 from cloudflare/napalm-multiprocessing
  - 9c4566db0c multiprocessing option tagged for 2017.7.2
  - 37bca1b902 Add multiprocessing option for NAPALM proxy
  - a2565ba8e5 Add new napalm option: multiprocessing

- **ISSUE #42611**: (nhavens) selinux.boolean state does not return changes (refs: #42612)

- **PR #42657**: (nhavens) back-port #42612 to 2017.7 @ 2017-08-14 19:42:26 UTC
  - **PR #42612**: (nhavens) fix for issue #42611 (refs: #42657)
  - 4fcdab3ae9 Merge pull request #42657 from nhavens/2017.7
  - d73cb55b7 back-port #42612 to 2017.7

- **PR #42709**: (whiteinge) Add token_expire_user_override link to auth runner docstring @ 2017-08-14 19:03:06 UTC
  - d2b6ce327a Merge pull request #42709 from whiteinge/doc-token_expire_user_override
  - c7ea631558 Add more docs on the token_expire param
  - 4af6b4a44f Add token_expire_user_override link to auth runner docstring

- **ISSUE #42803**: (gmcwhistler) master_type: str, not working as expected, parent salt-minion process dies. (refs: #42848)

- **ISSUE #42753**: (grichmond-salt) SaltReqTimeout Error on Some Minions when One Master in a Multi-Master Configuration is Unavailable (refs: #42848)

- **PR #42848**: (DmitryKuzmenko) Execute fire_master asynchronously in the main minion thread. (refs: #42918) @ 2017-08-14 18:28:38 UTC
  - c6a7bf02e9 Merge pull request #42848 from DSRCorporation/bugs/42753_mmaster_timeout
  - 7f5412c19e Make lint happier.
  - ff6b7aaf0 Execute fire_master asynchronously in the main minion thread.

- **PR #42911**: (gtmanfred) cloud driver isn’t a provider @ 2017-08-14 17:47:16 UTC
  - 6a3279ea50 Merge pull request #42911 from gtmanfred/2017.7
  - 99046b441f cloud driver isn’t a provider

- **PR #42860**: (skizunov) hash_and_stat_file should return a 2-tuple @ 2017-08-14 15:44:54 UTC
  - 44567383d Merge pull request #42860 from skizunov/develop7
  - 5f85a03636 hash_and_stat_file should return a 2-tuple

- **PR #42889**: (rallytime) [2017.7] Merge forward from 2016.11 to 2017.7 @ 2017-08-14 14:16:20 UTC
  - c6ca7639f Merge pull request #42889 from rallytime/merge-2017.7
- fb7117f2ac Use salt.utils.versions.LooseVersion instead of distutils
- 29ff19e587 Merge branch ‘2016.11’ into ‘2017.7’
  * c15d0034fe Merge pull request #41977 from redmatter/fix-dockerng-network-ignores-test
    - 1cc2a503a Fix dockerng.network_* ignoring of tests=True
  * 3b9e3c5671 Merge pull request #42886 from sarcasticadmin/adding_docs_salt_outputs
    - 744bf954ff Adding missing output flags to salt cli
  * e5b98c8a88 Merge pull request #42882 from gtmanfred/2016.11
    - da3402a53d make sure cmd is not run when npm isn’t installed
  * 5962c9588b Merge pull request #42788 from amendlik/saltify-timeout
    - 928b523797 Remove waits and retries from Saltify deployment
  * 227ecddd13 Merge pull request #42877 from terminalmage/add-cron-state-virtual
    - f1de196740 Add virtual func for cron state module
  * ab9f6cef33 Merge pull request #42859 from terminalmage/gitpython-git-cli-note
    - 35e05c9515 Add note about git CLI requirement for GitPython to GitFS tutorial
  * 682b4a8d14 Merge pull request #42856 from gtmanfred/2016.11
    - b458b9f8b8 skip cache_clean test if npm version is >= 5.0.0
  * 01ea854029 Merge pull request #42849 from whiteinge/syndic-log-root_dir
    - 4b1f55da9c Make syndic_log_file respect root_dir setting

- PR #42898: (mirceaulinic) Minor eos doc correction @ 2017-08-14 13:42:21 UTC
  - 4b6fe2ee59 Merge pull request #42898 from mirceaulinic/patch-11
  - 93be79a135 Index eos under the installation instructions list
  - f903e7bc39 Minor eos doc correction

- PR #42883: (rallytime) Fix failing boto tests (refs: #42959) @ 2017-08-11 20:29:12 UTC
  - 1764878754 Merge pull request #42883 from rallytime/fixed-boto-tests
  - 6a7bf99849 Lint fix: add missing space
  - 43643227c6 Skip 2 failing tests in Python 3 due to upstream bugs
  - 7f46603e9c Update account id value in boto SecGroup module unit test
  - 7c1d493fdd @mock_elb needs to be changed to @mock_elb_deprecated as well
  - 3055e17ed5 Replace @mock_ec2 calls with @mock_ec2_deprecated calls

- PR #42885: (terminalmage) Move weird tearDown test to an actual tearDown @ 2017-08-11 19:14:42 UTC
  - b21778efac Merge pull request #42885 from terminalmage/fix-f26-tests
  - 462d653082 Move weird tearDown test to an actual tearDown

- ISSUE #42870: (boltronics) webutil.useradd marked as deprecated.: 2016.3.0 by mistake? (refs: #42887)

- PR #42887: (rallytime) Remove extraneous "deprecated" notation @ 2017-08-11 18:34:25 UTC
  - 9868ab6f3b Merge pull request #42887 from rallytime/fixed-42870
  - 71e7581a2d Remove extraneous "deprecated" notation
• PR #42881: (gtmanfred) fix vmware for python 3.4.2 in salt.utils.vmware @ 2017-08-11 17:52:29 UTC
  - da7f2a11b Merge pull request #42881 from gtmanfred/vmware
  - 05ecc6ac8d fix vmware for python 3.4.2 in salt.utils.vmware
• ISSUE #42843: (brejoc) Kubernetes module won’t work with Kubernetes Python client > 1.0.2 (refs: #42845)
• PR #42845: (brejoc) API changes for Kubernetes version 2.0.0 (refs: #43039) @ 2017-08-11 14:04:30 UTC
  - c7750d5717 Merge pull request #42845 from brejoc/updates-for-kubernetes-2.0.0
  - 81674aa88a Version info in :optdepends: not needed anymore
  - 71995505bc Not depending on specific K8s version anymore
  - d8f7d7a7c0 API changes for Kubernetes version 2.0.0
• PR #42678: (frankiexyz) Add eos.rst in the installation guide @ 2017-08-11 13:58:37 UTC
  - 459fdedc67 Merge pull request #42678 from frankiexyz/2017.7
  - 159857f152 Add eos.rst in the installation guide
• ISSUE #42646: (gmacon) SPM fails to install multiple packages (refs: #42778)
• PR #42778: (gtmanfred) make sure to use the correct out_file @ 2017-08-11 13:44:48 UTC
  - 4ce96eb1a1 Merge pull request #42778 from gtmanfred/spm
  - 7ef691e8da make sure to use the correct out_file
• ISSUE saltstack/salt-jenkins#480: (rallytime) [2017.7] PY3 Debian 8 has several vmware unit tests failing (refs: #42857)
• PR #42857: (gtmanfred) use older name if _create_unverified_context is unavailable @ 2017-08-11 13:37:59 UTC
  - 3d05d89e09 Merge pull request #42857 from gtmanfred/vmware
  - c1f673eca4 use older name if _create_unverified_context is unavailable
• PR #42866: (twangboy) Change to GitPython version 2.1.1 @ 2017-08-11 13:23:52 UTC
  - 7e8c8ff21c Merge pull request #42866 from twangboy/osx_downgrade_gitpython
  - 28053a84a6 Change GitPython version to 2.1.1
• PR #42855: (rallytime) [2017.7] Merge forward from 2016.11 to 2017.7 @ 2017-08-10 21:40:39 UTC
  - 3ce18637be Merge pull request #42855 from rallytime/merge-2017.7
  - 08bbcf5790 Merge branch '2016.11' into '2017.7'
  - 2dde1f77e9 Merge pull request #42851 from terminalmage/bp-42651
    * a3da86ee8a fix syntax
    * 6ecdbce1d make sure names are correct
    * f83b553d6e add py3 for versionlock
    * 21934f61bb python2- prefix for fedora 26 packages
  - c746f79a3a Merge pull request #42806 from rallytime/fix-42683
    * 8c8640d6b8 Update doc references in glusterfs.volume_present
  - 27a8a2695a Merge pull request #42829 from twangboy/win_pkg_fix_install
    * 83b9b230cd Add winrepo to docs about supporting versions in pkgs

30.2. Previous Releases 4813
• 81fefa6e67 Add ability to pass version in pkgs list
• 3c3ac6aeb2 Merge pull request #42838 from twangboy/win_doc_pki
  • f0a1d06b46 Standardize PKI Client
  • 7de687aa57 Document requirements for win_pki
• b3e2ae3c58 Merge pull request #42805 from rallytime/bp-42552
  • 5a91c1f2d1 update consul module following this documentation https://www.consul.io/api/acl/acl.html
• d2ee7934ed Merge pull request #42804 from rallytime/bp-42784
  • dbd29e4aaa only read file if it is not a string
• 4cbf8057b3 Merge pull request #42826 from terminalmage/fix-spelling
  • 00f93142e4 Fix misspelling of "versions"
• de997edd90 Merge pull request #42786 from Ch3LL/fx_typo
  • 90a2fb66a2 Fix typo for template_dict in http docs
• bf6153ebe5 Merge pull request #42795 from lomeroe/bp-42744_201611
  • 69f8c1ae4 fix #42600 in develop
• 61fad97286 Merge pull request #42748 from whiteinge/save-before-output
  • de6077c82 Workaround Orchestrate problem that highstate outputter mutates data
• a4e3ce786 Merge pull request #42764 from amendlik/cloud-win-loop
  • f3dcfca4e0 Fix infinite loops on failed Windows deployments
• da85326ad4 Merge pull request #42694 from gtmanfred/2016.11
  • 1a0457af51 allow adding extra remotes to a repository
• ISSUE #42774: (rossengeorgiev) pkg.installed succeeds, but fails when you specify package version (refs: #42808)
• PR #42808: (terminalmage) Fix regression in yum/dnf version specification @ 2017-08-10 15:59:22 UTC
  • f95f4f33a Merge pull request #42808 from terminalmage/issue42774
  • c69f17dd18 Add integration test for #42774
  • 78d826dd14 Fix regression in yum/dnf version specification
• ISSUE #42639: (amnonbc) k8s module needs a way to manage configmaps (refs: #42807)
• PR #42807: (rallytime) Update modules --> states in kubernetes doc module @ 2017-08-10 14:10:40 UTC
  • d9b0f44885 Merge pull request #42807 from rallytime/fx-42639
  • 152eb88d9f Update modules --> states in kubernetes doc module
• ISSUE #42818: (Mapel88) Bug in win_iis module - "create_cert_binding" (refs: #42841)
• PR #42841: (Mapel88) Fix bug #42818 in win_iis module @ 2017-08-10 13:44:21 UTC
  • b8c7bd8da86d Merge pull request #42841 from Mapel88/patch-1
  • 497241fbb7 Fix bug #42818 in win_iis module
• ISSUE #42697: (Ch3LL) [Python3] NameError when running salt-run manage.versions (refs: #42782)
• PR #42782: (rallytime) Add a cmp compatibility function utility @ 2017-08-09 22:37:29 UTC
- 135f9522d0 Merge pull request #42782 from rallytime/fix-42697
- d70f94863 Update all other calls to "cmp" function
- 5605104285 Add a cmp compatibility function utility

• **PR #42784**: (gtmanfred) only read file if ret is not a string in http.query (refs: #42804) @ 2017-08-08 17:20:13 UTC
- ac752223ad Merge pull request #42784 from gtmanfred/http
- d397c90e92 only read file if it is not a string

• **ISSUE #42600**: (twangboy) Unable to set 'Not Configured' using win_lgpo execution module (refs: #42744, #42794, #42795)

• **PR #42794**: (lomeroe) Backport #42744 to 2017.7 @ 2017-08-08 17:16:31 UTC
  - PR #42744: (lomeroe) fix #42600 in develop (refs: #42794, #42795)
  - 44995b1abf Merge pull request #42794 from lomeroe/bp-42744
  - 0accc6df5 fix #42600 in develop

• **ISSUE #42707**: (cro) Service module and state fails on FreeBSD (refs: #42708)

• **PR #42708**: (cro) Do not change the arguments of the function when memoizing @ 2017-08-08 13:47:01 UTC
  - dcf47ac47c Merge pull request #42708 from cro/dont_change_args_during_memoize
  - a260e913b5 Do not change the arguments of the function when memoizing

• **PR #42783**: (rallytime) Sort lists before comparing them in python 3 unit test @ 2017-08-08 13:25:15 UTC
  - PR #42206: (rallytime) [PY3] Fix test that is flaky in Python 3 (refs: #42783)
  - ddb671b8fe Merge pull request #42783 from rallytime/fixed-flaky-py3-test
  - 998834fbae Sort lists before comparing them in python 3 unit test

• **PR #42721**: (hibbert) Allow no ip sg @ 2017-08-07 22:07:18 UTC
  - d6982f3e93 Merge pull request #42721 from hibbert/allow_no_ip_sg
  - f8256802a allow_no_ip_sg: Allow user to not supply ipaddress or securitygroups when running boto_efs.create_mount_target

• **ISSUE #42538**: (marnovdm) docker_container.running issue since 2017.7.0: passing domainname gives Error 500: json: cannot unmarshal array into Go value of type string (refs: #42769)

• **PR #42769**: (terminalmage) Fix domainname parameter input translation @ 2017-08-07 20:46:07 UTC
  - bf7938f6be0 Merge pull request #42769 from terminalmage/issue42538
  - 665de2d1f9 Fix domainname parameter input translation

• **PR #42388**: (The-Loeki) pillar.items pillar_env & pillar_override are never used @ 2017-08-07 17:54:48 UTC
  - 7bf2c9b35b Merge pull request #42388 from The-Loeki/patch-1
  - 664fa577b pillar.items pillar_env & pillar_override are never used

• **PR #42770**: (rallytime) [2017.7] Merge forward from 2017.7.1 to 2017.7 @ 2017-08-07 16:21:45 UTC
  - 9a8c9ebf8c Merge pull request #42770 from rallytime/merge-2017.7.1-into-2017.7
  - 6d17c9d227 Merge branch '2017.7.1' into '2017.7'

• **PR #42768**: (rallytime) [2017.7] Merge forward from 2016.11 to 2017.7 @ 2017-08-07 16:21:17 UTC
- c765e528d0 Merge pull request #42768 from rallytime/merge-2017.7
- 0f75482c37 Merge branch '2016.11' into '2017.7'
  - 7b2119fhee Merge pull request #42669 from garethgreenaway/2016_11_augeas_module_fix
    - 24413084e2 Updating the call to shlex_split to pass the posix=False argument so that quotes
      are preserved.
  - 30725769ed Merge pull request #42629 from xiaoanyunfei/tornadoapi
    - 1e13383b95 tornado api
  - f0f00fcee1 Merge pull request #42655 from whiteinge/rest_cherrypy-reenable-stats
    - deb6316d67 Fix lint errors
    - 6bd91ce8b3 Reenable cpstats for rest_cherrypy
  - 21cf159c3c Merge pull request #42693 from gilbsgilbs/fix-rabbitmq-tags
    - 78fccdc7e2 Cast to list in case tags is a tuple.
    - 287b57b5c5 Fix RabbitMQ tags not properly set.
  - f2b0c9b4fa Merge pull request #42574 from sbojarski/boto-cfn-error-reporting
    - 5c945f10c2 Fix debug message in "boto_cfn._validate" function.
    - 181a1beec6 Fixed error reporting in "boto_cfn.present" function.
- bc1eefc4f2 Merge pull request #42623 from terminalmage/fix-unicode-constructor
  - 78fccdc7e2 Fix unicode constructor in custom YAML loader

- **PR #42651**: (gtmanfred) python2- prefix for fedora 26 packages (refs: #42851) @ 2017-08-07 14:35:04 UTC
  - 3f5827f61e Merge pull request #42651 from gtmanfred/2017.7
  - 8784899942 fix syntax
  - 178cc1bd81 make sure names are correct
  - f179b9752 add py3 for versionlock
  - 1958d18634 python2- prefix for fedora 26 packages

- **ISSUE #42688**: (hibbert) salt.modules.boto_efs module Invalid type for parameter Tags - type: <type 'dict'>, valid types: <type 'list'>, <type 'tuple'> (refs: #42689)
- **PR #42689**: (hibbert) boto_efs_fix_tags: Fix #42688 invalid type for parameter tags @ 2017-08-06 17:47:07 UTC
  - 791248e398 Merge pull request #42689 from hibbert/boto_efs_fix_tags
  - 157fb28851 boto_efs_fix_tags: Fix #42688 invalid type for parameter tags

- **ISSUE #42705**: (hbruch) salt.states.docker_container.running replaces container on subsequent runs if oom_kill_disable unsupported (refs: #42745)
- **PR #42745**: (terminalmage) docker.compare_container: treat null oom_kill_disable as False @ 2017-08-05 15:28:20 UTC
  - 1b3407649b Merge pull request #42745 from terminalmage/issue42705
  - 710bd6115 docker.compare_container: treat null oom_kill_disable as False

- **ISSUE #42649**: (tehsu) local_batch no longer working in 2017.7.0, 500 error (refs: #42704)
- **PR #42704**: (whiteinge) Add import to work around likely multiprocessing scoping bug @ 2017-08-04 23:03:13 UTC
- 5d5b22021b Merge pull request #42704 from whiteinge/expr_form-warn-scope-bug
- 03b675a618 Add import to work around likely multiprocessing scoping bug

• **ISSUE #42741**: (kkoppel) docker_container.running keeps re-creating containers with links to other containers (refs: #42743)

• **PR #42743**: (kkoppel) Fix docker.compare_container for containers with links @ 2017-08-04 16:00:33 UTC
  - 888e954e73 Merge pull request #42743 from kkoppel/fix-issue-42741
  - de6d3cc0cf Update dockermod.py
  - 58b997c67f Added a helper function that removes container names from container HostConfig:Links values to enable compare_container() to make the correct decision about differences in links.

• **ISSUE #42668**: (UtahDave) Minions under syndics don’t respond to MoM (refs: #42710)

• **ISSUE #42545**: (paul-mulvihill) Salt-api failing to return results for minions connected via syndics. (refs: #42710)

• **PR #42710**: (gtmanfred) use subtraction instead of or @ 2017-08-04 15:14:14 UTC
  - 03a7f9bbee Merge pull request #42710 from gtmanfred/syndic
  - 683561a711 use subtraction instead of or

• **PR #42670**: (gtmanfred) render kubernetes docs @ 2017-08-03 20:30:56 UTC
  - 005182b6a1 Merge pull request #42670 from gtmanfred/kube
  - bca17902f5 add version added info
  - 4bbf751ae render kubernetes docs

• **PR #42712**: (twangboy) Remove master config file from minion-only installer @ 2017-08-03 20:25:02 UTC
  - df354ddabf Merge pull request #42712 from twangboy/win_build_pkg
  - 8604312a7b Remove master conf in minion install

• **PR #42714**: (cachedout) Set fact gathering style to 'old' for test_junos @ 2017-08-03 13:39:40 UTC
  - bb1df4d4a42 Merge pull request #42714 from cachedout/workaround_jnpr_test_bug
  - 834d6c605e Set fact gathering style to 'old' for test_junos

• **PR #42481**: (twangboy) Fix unit.test_crypt for Windows @ 2017-08-01 18:10:50 UTC
  - 4c1d931654 Merge pull request #42481 from twangboy/win_unit_test_crypt
  - 102509029e Remove chown mock, fix path seps

• **PR #42654**: (morganwillcock) Disable ZFS in the core grain for NetBSD @ 2017-08-01 17:52:36 UTC
  - 8bcefb5e67 Merge pull request #42654 from morganwillcock/zfsgrain
  - 49023de9b4 Disable ZFS grain on NetBSD

• **ISSUE #42421**: (bfilipek) archive.extracted on Windows failed when dir not exist (refs: #42453)

• **PR #42453**: (gtmanfred) don’t pass user to madeirs on windows @ 2017-07-31 19:57:57 UTC
  - 5baf2650fc Merge pull request #42453 from gtmanfred/madeirs
  - 559d432930 fix tests
  - afa7a13ce5 use logic from file.directory for madeirs

• **PR #42603**: (twangboy) Add runas_passwd as a global for states @ 2017-07-31 19:49:49 UTC
- fb81e78f71 Merge pull request #42603 from twangboy/win_fix_runsas
- 0c9e40012b Remove deprecation, add logic to state.py
- 464ec34713 Fix another instance of runas_passwd
- 18d6ce4d55 Add global vars to cmd.call
- 6c71ab6f80 Remove runas and runas_password after state run
- 4ea264e3db Change to runas_password in docs
- 61aba35718 Deprecate password, make runas_password a named arg
- 41f0f75a06 Add new var to list, change to runas_password
- b9c91eba60 Add runas_passwd as a global for states

• PR #42541: (Mareo) Avoid confusing warning when using file.line @ 2017-07-31 19:41:58 UTC
  - 75ba23e253 Merge pull request #42541 from epita/fix-file-line-warning
  - 2fd172e07b Avoid confusing warning when using file.line

• PR #42625: (twangboy) Fix the list function in the win_wua execution module @ 2017-07-31 19:27:16 UTC
  - 3d328eba80 Merge pull request #42625 from twangboy/fix_win_wua
  - 1340c15ce7 Add general usage instructions
  - 19f34bd55 Fix docs, formatting
  - b17495c9c8 Fix problem with list when install=True

• ISSUE #42514: (rickh563) module.run does not work as expected in 2017.7.0 (refs: #42602)

• PR #42602: (garethgreenaway) Use superseded and deprecated configuration from pillar @ 2017-07-31 18:53:06 UTC
  - 25094ad9b1 Merge pull request #42602 from garethgreenaway/42514_2017_7 superseded deprecated from pillar
  - 2e132daa73 Slight update to formatting
  - 74bae13939 Small update to something I missed in the first commit. Updating tests to also test for pillar values.
  - 928a4808dd Updating the superseded and deprecated decorators to work when specified as pillar values.

• PR #42621: (rallytime) [2017.7] Merge forward from 2016.11 to 2017.7 @ 2017-07-28 19:45:51 UTC
  - b7cd30d3ee Merge pull request #42621 from rallytime/merge-2017.7
  - 58dcb58a47 Merge branch '2016.11' into '2017.7'
    * cbf752cd73 Merge pull request #42515 from gtmanfred/backslash
      * cc4e45656d Allow not interpreting backslashes in the repl
    * 549495831f Merge pull request #42586 from gdubroeucq/2016.11
      * 9c0b5cc1d6 Remove extra newline
      * d2ef4483e4 yumpkg.py: clean
      * a967c09e0 yumpkg.py: add option to the command "check-update"
    * 6b45deb2f8 Merge pull request #41988 from redmatter/fix-dockerng-network-matching
      * 9eaa796da8 Add regression tests for #41982
      * 3369f0072f Fix broken unit test test_network_absent
- 0ef6c634c Add trace logging of docker.ng.networks result
- 515c612808 Fix docker.ng.network_* name matching

- ISSUE #34245: (Talkless) ini.options_present always report state change (refs: #41690)

- PR #42618: (rallytime) Back-port #41690 to 2017.7 @ 2017-07-28 19:27:11 UTC
  - PR #41690: (m03) Fix issue #34245 with ini.options_present reporting changes (refs: #42618)
  - d48749b476 Merge pull request #42618 from rallytime/bp-41690
  - 22c6a7c7ff Improve output precision
  - ee4ea6b860 Fix #34245 ini.options_present reporting changes

- ISSUE #42588: (ixs) salt-ssh fails when using scan roster and detected minions are uncached (refs: #42589)

- PR #42619: (rallytime) Back-port #42589 to 2017.7 @ 2017-07-28 19:26:36 UTC
  - PR #42589: (ixs) Fix ssh-salt calls with scan roster for uncached clients (refs: #42619)
  - e671242a4f Merge pull request #42619 from rallytime/bp-42589
  - cd5eb93903 Fix ssh-salt calls with scan roster for uncached clients

- ISSUE #41982: (abulford) dockerng.network_* matches too easily (refs: #42006, #41988)

- PR #42006: (abulford) Fix dockerng.network_* name matching @ 2017-07-28 15:52:52 UTC
  - PR #41988: (abulford) Fix dockerng.network_* name matching (refs: #42006)
  - 7d385f8bde Merge pull request #42006 from redmatter/fixedockerng-network-matching-2017.7
  - f83960c02a Lint: Remove extra line at end of file.
  - c7d364ec56 Add regression tests for #41982
  - d31f2913bd Fix broken unit test test_network_absent
  - d42f781c64 Add trace logging of docker.networks result
  - 8c00c63b55 Fix dockerng.network_* name matching

- ISSUE #12587: (Katafalbas) salt-cloud custom functions/actions (refs: #42616)

- PR #42616: (amendlik) Sync cloud modules @ 2017-07-28 15:40:36 UTC
  - ee8ae1496 Merge pull request #42616 from amendlik/sync-clouds
  - ab21bd9b5b Sync cloud modules when saltutil.sync_all is run

- PR #42601: (rallytime) [2017.7] Merge forward from 2016.11 to 2017.7 @ 2017-07-27 22:32:07 UTC
  - e2dd43002 Merge pull request #42601 from rallytime/merge-2017.7
  - 36a1bcf8c5 Merge branch '2016.11' into '2017.7'
    - 4b16109122 Merge pull request #42339 from isbm/isbm-jobs-scheduled-in-a-future-bsc1036125
      - bbba84ce2d Bugfix: Jobs scheduled to run at a future time stay pending for Salt minions (bsc#1036125)
    - 6c5a7e604a Merge pull request #42077 from vutny/fixed-jobs-scheduled-with-whens
      - b1960ee4a4 Fix scheduled job run on Master if when parameter is a list
    - f9cb536589 Merge pull request #42414 from vutny/unify-hash-params-format
      - d1f2a93368 DOCS: unify hash sum with hash type format

30.2. Previous Releases 4819
* 535c922511 Merge pull request #42523 from rallytime/fix-42375
  - 685c2ced6 Add information about returning a tuple with an error message
  - fa466519c4 Add a mention of the True/False returns with __virtual__() 
* 0df0e7e749 Merge pull request #42527 from twangboy/win_wua
  - 037379f2a Correct capatilization 
  - af3bce927b Document changes to Windows Update in 10/2016 
* 69b06586eda Merge pull request #42551 from binoclvar/fix-lack-of-align-check-output
  - c4faba192 Remove `-s` (--script) argument to parted within align_check function 
* 9e0b4e9af Merge pull request #42573 from rallytime/bp-42433
  - 0293429e24 Only force saltenv/pillarenv to be a string when not None 
* e931ed2517 Merge pull request #42571 from twangboy/win_add_pythonpath
  - d55a44dd1a Avoid loading user site packages
  - 9af1eb2741 Ignore any PYTHON* environment vars already on the system 
  - 4e2f03a95 Add pythonpath to batch files and service 
* de2f97041 Merge pull request #42387 from DSRCorporation/bugs/42371_KeyError_WeakValueDict
  - e723c3ee2 Don't use key in weakvaluedict because it could lie. 
* 641a9d7efd Merge pull request #41968 from root360-AndreasUlm/fix-rabbitmqctl-output-handler
  - 76fd941d91 added tests for rabbitmq 3.6.10 output handler 
  - 3602af1e1b Fix rabbitmqctl output handler for 3.6.10 
* 66fede378a Merge pull request #42479 from gtmanfred/interface
  - c32c1b2803 fix pylint
  - 99ec634c6b validate ssh_interface for ec2 
* a925c7029a Merge pull request #42516 from rallytime/fix-42405
  - e3a6717efa Add info about top file to pillar walk-through example to include edit.vim

• ISSUE #42148: (sjorge) [2017.7.0rc1] use_superseded and module.run changes from release notes do nothing? (refs: #42270)

• PR #42290: (ismb) Backport of #42270 @ 2017-07-27 22:30:05 UTC
  - PR #42270: (The-Loeki) State module.run/wait misses args when looking for kwargs (refs: #42290)
  - 22ee389fa Merge pull request #42290 from isbm/ismbmodule_run_parambug_42270_217
  - e38d32f90 Fix docs
  - 1e8a56eda5 Describe function tagging
  - 1d7233224b Describe function batching
  - 1391a055e5 Bugfix: syntax error in the example
  - 8c71257a4b Call unnamed parameters properly
  - 94c97a8f25 Update and correct the error message
  - ea8351362c Bugfix: args gets ignored alongside named parameters
- 74689e3462 Add ability to use tagged functions in the same set

- **PR #42251**: (twangboy) Fix `unit.modules.test_win_ip` for Windows @ 2017-07-27 19:22:03 UTC
  - 4c20f1c6bb Merge pull request #42251 from twangboy/unit_win_test_win_ip
  - 97261be6b9 Fix win_inet_pton check for malformatted ip addresses

- **PR #42255**: (twangboy) Fix `unit.modules.test_win_system` for Windows @ 2017-07-27 19:12:42 UTC
  - 2985e4c0e6 Merge pull request #42255 from twangboy/win_unit_test_win_system
  - acc0345bc8 Fix unit tests

- **PR #42528**: (twangboy) Namespace `cmp_to_key` in the pkg state for Windows @ 2017-07-27 18:30:23 UTC
  - a573386260 Merge pull request #42528 from twangboy/win_fix_pkg_state
  - a040443fa1 Move functools import inside pylint escapes
  - 118d5134e2 Remove namespaced function `cmp_to_key`
  - a02c91adda Namespace `cmp_to_key` in the pkg state for Windows

- **ISSUE #42521**: (rickh563) chocolatey.installed broken on 2017.7.0 (refs: #42534)

- **PR #42534**: (jmarinaro) Fixes AttributeError thrown by chocolatey state @ 2017-07-27 17:59:50 UTC
  - 62ae12bcd9 Merge pull request #42534 from jmarinaro/2017.7
  - b242d2d6b5 Fixes AttributeError thrown by chocolatey state

- **ISSUE #40354**: (exc414) CentOS 6.8 Init Script - Sed unterminated address regex (refs: #42557)

- **ISSUE #37312**: (gtmanfred) CLI flags should take overload settings in the config files (refs: #42557)

- **PR #42557**: (justincbeard) Fixing output so --force-color and --no-color override master and min... @ 2017-07-27 17:07:33 UTC
  - ee3bc6eb10 Fixing output so --force-color and --no-color override master and minion config color value

- **PR #42567**: (skizunov) Fix disable_<tag-name> config option @ 2017-07-27 17:05:00 UTC
  - 0f0b7e3e0a Fix disable_<tag-name> config option

- **PR #42577**: (twangboy) Compile scripts with -E -s params for Salt on Mac @ 2017-07-26 22:44:37 UTC
  - 69d5973651 Compile scripts with --E -s params for python

- **PR #42524**: (rallytime) [2017.7] Merge forward from 2016.11 to 2017.7 @ 2017-07-26 22:41:06 UTC
  - 1bd5bbccc2 Merge pull request #42509 from clem-compilatio/fix-42417
  - 72924b06b8 Fix _assign_floating_ips in openstack.py
  - 4bf35a74de Merge pull request #42464 from garethgreenaway/2016_11_remove_tmp_identity_file
  - ff24102d51 Uncomment the line that removes the temporary identity file.
  - e2120db0e Merge pull request #42443 from garethgreenaway/2017.7_pass_args_kwarg_correctly

---

30.2. Previous Releases 4821
635810b3e3 Updating the slack engine in 2016.11 to pass the args and kwrags correctly to LocalClient

- 8262cc9054 Merge pull request #42200 from shengis/sqlite3_fix_row_absent_2016.11
- 407b8f4bb3 Fix #42198 If where_args is not set, not using it in the delete request.
- d9df97e5a3 Merge pull request #42424 from goten4/2016.11
- 1c0574d05e Fix error message when tornado or pycurl is not installed

• PR #42575: (rallytime) [2017.7] Merge forward from 2017.7.1 to 2017.7 @ 2017-07-26 22:39:10 UTC
  - 2a0cde837df Merge pull request #42575 from rallytime/merge-2017.7.1-into-2017.7
  - 63bb0f2b2c4 pass in empty kwarg for reactor
  - 2868061ee4 update chunk, not kwarg in chunk
  - 467d15e9d94 Merge branch '2017.7.1' into '2017.7'

• PR #42555: (Ch3LL) add changelog to 2017.7.1 release notes @ 2017-07-26 14:57:43 UTC
  - 1d93e92194 Merge pull request #42555 from Ch3LL/7.1_add_changelog
  - 669aee10d fix changelog to 2017.7.1 release notes

• PR #42266: (twangboy) Fix unit.states.test_file for Windows @ 2017-07-25 20:26:32 UTC
  - 07c2793e86 Merge pull request #42266 from twangboy/win_unit_states_test_file
  - 669aee10d Mock file exists properly
  - a423e9827 Fix ret mock for linux
  - 0c484f8979 Fix unit tests on Windows

• PR #42484: (shengis) Fix a potential Exception with an explicit error message @ 2017-07-25 18:34:12 UTC
  - df417eae17 Merge pull request #42484 from shengis/fix-explicit-error-msg-x509-sign-remote
  - 0b548c72e1 Fix a potential Exception with an explicit error message

• ISSUE saltstack/salt-jenkins#396: (Ch3LL) Python3 Fix Test: JoyentTest.test_instance (refs: #42529)

• ISSUE #41720: (rallytime) [Py3] Some salt-cloud drivers do not work using Python 3 (refs: #42529)

• PR #42529: (gtmanfred) Fix joyent for python3 @ 2017-07-25 16:37:48 UTC
  - 0f25ec76f9 Merge pull request #42529 from gtmanfred/2017.7
  - b7ebb4d81a these drivers do not actually have an issue.
  - e90ca7a114 use salt encoding for joyent on 2017.7

• PR #42465: (garethgreenaway) [2017.7] Small fix to modules/git.py @ 2017-07-24 17:24:55 UTC
  - 488457c5a0 Merge pull request #42465 from garethgreenaway/2017_7_remove_tmp_identity_file
  - 1920dc6079 Uncomment the line that removes the temporary identity file.

• ISSUE #23516: (dkiser) BUG: cron job scheduler sporadically works (refs: #42077)

• PR #42107: (vutny) [2017.7] Fix scheduled jobs if when parameter is a list @ 2017-07-24 17:04:12 UTC
  - PR #42077: (vutny) Fix scheduled job run on Master if when parameter is a list (refs: #42107)
  - PR #41973: (vutny) Fix Master/Minion scheduled jobs based on Cron expressions (refs: #42077)
  - 4f044999fa Merge pull request #42107 from vutny/2017.7-fix-jobs-scheduled-with-whens
• PR #42506: (terminalmage) Add PER_REMOTE_ONLY to init_remotes call in git_pillar runner @ 2017-07-24 16:59:21 UTC
  — 6eaa0763e1 Merge pull request #42506 from terminalmage/fix-git-pillar-runner
  — 6352f447ce Add PER_REMOTE_ONLY to init_remotes call in git_pillar runner
• PR #42502: (shengis) Fix azurerm query to show IPs @ 2017-07-24 15:54:45 UTC
  — b88e645f10 Merge pull request #42502 from shengis/fix_azurerm_request_ips
  — 92f1890701 Fix azurerm query to show IPs
• PR #42180: (twangboy) Fix unit.modules.test_timezone for Windows @ 2017-07-24 14:46:16 UTC
  — c793d83d26 Merge pull request #42180 from twangboy/win_unit_test_timezone
  — 832a3d86dd Skip tests that use os.symlink on Windows
• PR #42474: (whiteinge) Cmd arg kwarg parsing test @ 2017-07-24 14:13:30 UTC
  — PR #39646: (terminalmage) Handle deprecation of passing string args to load_args_and_kwargs (refs: #42474)
  — 083ff00410 Merge pull request #42474 from whiteinge/cmd-arg-kwarg-parsing-test
  — 00cc0967a Lint fixes
  — 66093738c8 Add back support for string kwargs
  — 622ff5be40 Add LocalClient.cmd test for arg/kwarg parsing
  — 9f4eb80d90 Add a test.arg variant that cleans the pub kwargs by default
• PR #42425: (rallytime) [2017.7] Merge forward from 2016.11 to 2017.7 @ 2017-07-21 22:43:41 UTC
  — c91a5e539e Merge pull request #42425 from rallytime/merge-2017.7
  — ea457aa0a5 Remove ALIASES block from template util
  — c673b64583 Merge branch '2016.11' into '2017.7'
  * 42bb1a64ca Merge pull request #42350 from twangboy/win_fix_ver_grains_2016.11
    • 8c048403d7 Detect Server OS with a desktop release name
  * 0a72e56f6b Merge pull request #42356 from meaksh/2016.11-AliasesLoader-wrapper-fix
    • 915d94219e Allow to check whether a function is available on the AliasesLoader wrapper
  * 10eb7b7a79 Merge pull request #42368 from twangboy/win_fix_build_2016.11
    • a7c910c31e Remove build and dist directories before install

    • 0aa5d8e1de Merge branch '2016.3' into '2016.11'
    • e9b0f20f8a Merge pull request #42359 from Ch3LL/doc-update-2016.3
    • dc85b5edbe [2016.3] Update version numbers in doc config for 2017.7.0 release
  * f06a6f1796 Merge pull request #42360 from Ch3LL/doc-update-2016.11
    • b90b7a7506 [2016.11] Update version numbers in doc config for 2017.7.0 release
    • e0595b0af0 Merge pull request #42319 from rallytime/config-docs

30.2. Previous Releases 4823
b40f980632 Add more documentation for config options that are missing from master/minion docs

7894004003 Merge pull request #42352 from CorvinM/issue42333

526b6ee14d Multiple documentation fixes

ISSUE #42357: (Giandom) Salt pillarenv problem with slack engine (refs: #42443, #42444)

PR #42444: (garethgreenaway) [2017.7] Fix to slack engine @ 2017-07-21 22:03:48 UTC

- 10e4d9234b Merge pull request #42444 from garethgreenaway/42357_2017_7_pass_args_kwargs_correctly
- f411cf2a9 Updating the slack engine in 2017.7 to pass the args and kwargs correctly to LocalClient

PR #42461: (rallytime) Bump warning version from Oxygen to Fluorine in roster cache @ 2017-07-21 21:33:25 UTC

- 723be49fac Merge pull request #42461 from rallytime/bump-roster-cache-deprecations
- c0d0137f5 Bump warning version from Oxygen to Fluorine in roster cache

ISSUE #42374: (tyhunt99) [2017.7.0] salt-run mange.versions throws exception if minion is offline or unresponsive (refs: #42436)

PR #42436: (garethgreenaway) Fixes to versions function in manage runner @ 2017-07-21 19:41:07 UTC

- 09521602c1 Merge pull request #42436 from garethgreenaway/42374_manage_runner_minion_offline
- 0fd39498c0 Updating the versions function inside the manage runner to account for when a minion is offline and we are unable to determine its version.

ISSUE #42427: (grichmond-salt) Issue Passing Variables created from load_json as Inline Pillar Between States (refs: #42435)

PR #42435: (terminalmage) Modify our custom YAML loader to treat unicode literals as unicode strings (refs: #42812) @ 2017-07-21 19:40:34 UTC

- 54193ea543 Merge pull request #42435 from terminalmage/issue42427
- 31273c7ec1 Modify our custom YAML loader to treat unicode literals as unicode strings

ISSUE #42381: (zebooka) Git.detached broken in 2017.7.0 (refs: #42399)

ISSUE #38878: (tomlaredo) [Naming consistency] git.latest "rev" option VS git.detached "ref" option (refs: #38898)

PR #42399: (rallytime) Update old "ref" references to "rev" in git.detached state @ 2017-07-21 19:38:59 UTC

- PR #38898: (terminalmage) git.detached: rename ref to rev for consistency (refs: #42399)
- 0b3179135c Merge pull request #42399 from rallytime/fix-42381
- d9d394fe0f Update old "ref" references to "rev" in git.detached state

ISSUE #42400: (Enquier) Conflict in execution of passing pillar data to orch/reactor event executions 2017.7.0 (refs: #42031)

PR #42031: (skizunov) Fix: Reactor emits critical error @ 2017-07-21 19:38:34 UTC

- bd4adb483d Merge pull request #42031 from skizunov/develop3
- 540977b4b1 Fix: Reactor emits critical error

ISSUE #41949: (jrporcaro) Event returner doesn’t work with Windows Master (refs: #42027)

PR #42027: (gtmanfred) import salt.minion for EventReturn for Windows @ 2017-07-21 19:37:03 UTC

- 3ab7ad7d7 Merge pull request #42027 from gtmanfred/2017.7
- fd4458b6c7 import salt.minion for EventReturn for Windows

- **PR #42454**: (terminalmage) Document future renaming of new rand_str jinja filter @ 2017-07-21 18:47:51 UTC
  - 994d3dc7a Merge pull request #42454 from terminalmage/jinja-docs-2017.7
  - 98b661406e Document future renaming of new rand_str jinja filter

- **PR #42452**: (Ch3LL) update windows urls to new py2/py3 naming scheme @ 2017-07-21 17:20:47 UTC
  - 4480075129 Merge pull request #42452 from Ch3LL/fix_url_windows
  - 3f4a9187f3 update windows urls to new py2/py3 naming scheme

- **ISSUE #4204**: (gabekahen) [2017.7] file.managed with cmd_check "No such file or directory" (refs: #42411)

- **ISSUE #33708**: (pepinje) visudo check command leaves cache file in /tmp (refs: #42411, #38063)

- **PR #42411**: (seedickcode) Fix file.managed check_cmd file not found - Issue #42404 @ 2017-07-20 21:59:17 UTC
  - PR #38063: (llua) tmp file clean up in file.manage - fix for #33708 (refs: #42411)
  - 33e90be1fe Merge pull request #42411 from seedickcode/check_cmd_fix
  - 4480075129 Merge pull request #42452 from Ch3LL/fix_url_windows
  - 3f4a9187f3 update windows urls to new py2/py3 naming scheme

- **PR #42409**: (twangboy) Add Scripts to build Py3 on Mac @ 2017-07-20 21:36:34 UTC
  - edde31376a Merge pull request #42409 from twangboy/mac_py3_scripts
  - ac0e04a72 Remove build and dist, sign pkgs
  - 9d66e273ce Fix hard coded pip path
  - 7b8d6cbbd2 Add support for Py3
  - aa4ec93c8 Update Python and other reqs

- **ISSUE #4203**: (astronouth7303) [2017.7] Pillar empty when state is applied from orchestrate (refs: #42433)

- **PR #42433**: (terminalmage) Only force saltenv/pillarenv to be a string when not None (refs: #42573) @ 2017-07-20 21:32:24 UTC
  - 82982f940d Merge pull request #42433 from terminalmage/issue42403

- **PR #42408**: (CorvinM) Fix documentation misformat in salt.states.file.replace @ 2017-07-20 00:45:43 UTC
  - a71938ecfe Merge pull request #42408 from CorvinM/file-replace-doc-fix
  - 246a2b3e74 Fix documentation misformat in salt.states.file.replace

- **PR #42347**: (twangboy) Fixes problem with Version and OS Release related grains on certain versions of Python @ 2017-07-19 17:05:43 UTC
  - d385dfd19d Merge pull request #42347 from twangboy/win_fix_ver_grains
  - ef1f663fc9 Detect server OS with a desktop release name

- **PR #42366**: (twangboy) Remove build and dist directories before install @ 2017-07-19 16:37:41 UTC
  - eb9e4206c9 Merge pull request #42366 from twangboy/win_fix_build
  - 0946002713 Add blank line after delete
  - f7c06bf4f6 Remove build and dist directories before install

- **PR #42373**: (Ch3LL) Add initial 2017.7.1 Release Notes File @ 2017-07-19 16:28:46 UTC
  - af7820f25d Merge pull request #42373 from Ch3LL/add_2017.7.1
  - ce1c1b6d28 Add initial 2017.7.1 Release Notes File
• PR #42150: (twangboy) Fix `unit.modules.test_pip` for Windows @ 2017-07-19 16:01:17 UTC
  - 59e012b485 Merge pull request #42150 from twangboy/win_unit_test_pip
  - 4ec242f2b Fix unit tests for test_pip

• PR #42154: (twangboy) Fix `unit.modules.test_reg_win` for Windows @ 2017-07-19 16:00:38 UTC
  - ade25c6b34 Merge pull request #42154 from twangboy/win_unit_test_reg
  - 00d9a528f2 Fix problem with handling REG_QWORD in list values

• PR #42182: (twangboy) Fix `unit.modules.test_useradd` for Windows @ 2017-07-19 15:55:33 UTC
  - 07593675e2 Merge pull request #42182 from twangboy/win_unit_test_useradd
  - 8260a71c07 Disable tests that require pwd in Windows

• PR #42364: (twangboy) Windows Package notes for 2017.7.0 @ 2017-07-18 19:24:45 UTC
  - a175c40c1d Merge pull request #42364 from twangboy/release_notes_2017.7.0
  - 96517d1355 Add note about patched windows packages

• PR #42361: (Ch3LL) [2017.7] Update version numbers in doc config for 2017.7.0 release @ 2017-07-18 19:23:22 UTC
  - 4de50e558 Merge pull request #42361 from Ch3LL/doc-update-2017.7
  - dc5bb301f7 [2017.7] Update version numbers in doc config for 2017.7.0 release

• PR #42363: (rallytime) [2017.7] Merge forward from 2016.11 to 2017.7 @ 2017-07-18 18:40:48 UTC
  - 587138d7f1 Merge pull request #42363 from rallytime/merge-2017.7
  - 7aa31ff030 Merge branch '2016.11' into '2017.7'
    * b256001760 Merge pull request #42353 from terminalmage/git-test
      - 14cf6ce322 is_windows is a function, not a property/attribute
    * 86da1febb4 Merge pull request #42264 from rallytime/fiv-41116
      - bd638880e3 Add mono-spacing to salt-minion reference for consistency
      - 30d62f43da Update minion restart section in FAQ doc for windows
    * 9a707088ad Merge pull request #42275 from terminalmage/issue42194
      - 663874908a pkg.installed: pack name/version into pkgs argument
    * e588f235e0 Merge pull request #42269 from rallytime/fiv-41721
      - f2250d474a Add a note about using different styles of quotes.
      - 38d9b3d553 Add some clarity to "multiple quotes" section of yaml docs
    * 5aaa214a75 Merge pull request #42282 from rallytime/fiv-42152
      - 0f32223843 Handle libcloud objects that throw RepresenterErrors with --out=yaml
    * fb5697a4bc Merge pull request #42308 from lubyou/fix-file-absent-windows
      - 026c4f01a Force file removal on Windows. Fixes #42295
    * da2a8a518f Merge pull request #42314 from rallytime/fiv-42267
      - c406046940 Add clarification to salt ssh docs about key auto-generation.
    * acadd54013 Merge pull request #41945 from garethgreen-away/41936_allow_identity_files_with_user
- 44841e5626 Moving the call to cp.get_file inside the with block to ensure the umask is preserved when we grab the file.
- f9ba60eed8 Merge pull request #1 from terminalmage/pr-41945
- 1b6026177c Restrict set_umask to mkstemp call only
- 685493496 Fixing umask to we can set files as executable.
- 4949f33f3 Updating to swap on the new salt.utils.files.set_umask context_manager
- 8faa9f6d92 Updating PR with requested changes.
- 494765e939 Updating the git module to allow an identity file to be used when passing the user parameter

* f90e04a2bc Merge pull request #42289 from CorvinM/bp-41543
  - 357dc22f05 Fix user creation with empty password
* a91a3f81b1 Merge pull request #42123 from vutny/fix-master-utils-import
  - 6bb88b8f98c Add missing doc for utils_dirs Minion config option
  - f1bc58f6d5 Utils: add example of module import
* e2aa5114e4 Merge pull request #42261 from rallytime/minor-doc-fix
  - 8c76bb53d Some minor doc fixes for dnsutil module so they'll render correctly
* 3e9dfbc9cc Merge pull request #42262 from rallytime/bp-42224
  - c31ded341c Remove duplicate instruction in Openstack Rackspace config example
* 7780579c36 Merge pull request #42181 from garethgreenaway/42137_backport_fix_from_2017_7
  - a34970b45b Back porting the fix for 2017.7 that ensures the order of the names parameter.
* 72537868a6 Merge pull request #42253 from gtmanfred/2016.11
  - 53e25760be Only use unassociated ips when unable to allocate
* b2a4698b5d Merge pull request #42252 from UtahDave/2016.11local
  - e6a9563d47 simple doc updates

Windows Changes

pkg Execution Module

Significant changes (PR #43708 & #45390, damon-atkins) have been made to the pkg execution module. Users should test this release against their existing package sls definition files.

• pkg.list_available no longer defaults to refreshing the winrepo meta database.
• pkg.install without a version parameter no longer upgrades software if the software is already installed. Use pkg.install version=latest (or simply use a pkg.latest state to get the old behavior.
• pkg.list_pkgs now returns multiple versions if software installed more than once.
• pkg.list_pkgs now returns Not Found when the version is not found instead of (value not set) which matches the contents of the sls definitions.
• pkg.remove will wait up to 3 seconds (normally about a second) to detect changes in the registry after removing software, improving reporting of version changes.
• pkg.remove can remove latest software, if latest is defined in sls definition.
• Documentation was update for the execution module to match the style in new versions, some corrections as well.
• All install/remove commands are prefix with cmd.exe shell and cmdmod is called with a command line string instead of a list. Some sls files in saltstack/salt-winrepo-ng expected the commands to be prefixed with cmd.exe (i.e. the use of &).
• Some execution module functions results, now behave more like their Unix/Linux versions.
cmd Execution Module

Due to a difference in how Python's `subprocess.Popen()` spawns processes on Windows, passing the command as a list of arguments can result in problems. This is because Windows' `CreateProcess` requires the command to be passed as a single string. Therefore, `subprocess` will attempt to re-assemble the list of arguments into as string. Some escaped characters and quotes can cause the resulting string to be incorrectly-assembled, resulting in a failure to execute the command.

Salt now deals with these cases by joining the list of arguments correctly and ensuring that the command is passed to `subprocess.Popen()` as a string.

Changelog for v2017.7.2..v2017.7.3

  - 36972677b opkg.py: make owner function return value, instead of iterator
- **PR #45634**: (Ch3LL) Add different service name for Mac 10.13 test (refs: #45649)
- 7934372b7b Merge pull request #45649 from rallytime/bp-45634
- 1c78fc23ea Add different service name for Mac 10.13 test

- **PR #45654**: (twangboy) Merge forward #45638 @ 2018-01-24 14:59:14 UTC
  - PR #45638: (twangboy) Win fix shell info (refs: #45654)
  - 770f0c4664 Merge pull request #45654 from twangboy/win_fix_shell_info_2017.7.3
  - 5bb01ae8bc Merge forward #45638

- **PR #45653**: (rallytime) Back-port #45611 to 2017.7.3 @ 2018-01-24 05:20:11 UTC
  - PR #45611: (terminalmage) Fix unnecessary/incorrect usage of six.binary_type (refs: #45653)
  - 6fc293da46 Merge pull request #45653 from rallytime/bp-45611
  - 0a6b06d8ea Fix unnecessary/incorrect usage of six.binary_type

- **PR #45642**: (rallytime) Back-port #45636 to 2017.7.3 @ 2018-01-23 22:00:30 UTC
  - PR #45636: (Ch3LL) Fix mac service and pkg tests for 10.13 (refs: #45642)
  - d0ad54e9a remove unnecessary variable for test
  - acbf6d43a fix pylint
  - a9b12cd1ea Fix mac service and pkg tests for 10.13

- **PR #45645**: (rallytime) Back-port #45606 to 2017.7.3 @ 2018-01-23 21:54:45 UTC
  - PR #45606: (terminalmage) Fix bug affecting salt-ssh when root_dir differs from the default (refs: #45645)
  - f37a5b6d8d Merge pull request #45645 from rallytime/bp-45606
  - 0d2d96f30a Fix bug affecting salt-ssh when root_dir differs from the default

- **PR #45641**: (rallytime) Back-port #45508 to 2017.7.3 @ 2018-01-22 16:54:15 UTC
  - PR #45508: (froinger) fix test archive test for mac on 2017.7 branch (refs: #45641)
  - e659793c09 Merge pull request #45641 from rallytime/bp-45508
  - e6917a291e fix test_archive test for mac on 2017.7 branch

- **PR #45604**: (rallytime) Back-port #45582 to 2017.7.3 @ 2018-01-22 16:54:15 UTC
  - PR #45582: (terminalmage) Two salt-ssh fixes (refs: #45604)
  - ced3269ae8 Merge pull request #45604 from rallytime/bp-45582
  - bc8a450cc7 Remove state.py utils file from thin list
  - 629e6c6744 Further fixes to for salt-ssh test under heavy load
  - 0d5f596b59 Add salt/utils/state.py to thin tarball
  - a61a100 Pass on OSError if thin tarball already removed

- **PR #45591**: (gtmanfred) mark minion_blackout tests as flaky @ 2018-01-22 00:14:31 UTC
  - 4672baa6c8 Merge pull request #45591 from gtmanfred/2017.7.3
  - f7fd35f4a2 test updating the minion blackout timeout to 10 seconds

- **PR #45585**: (rallytime) Back-port #45579 to 2017.7.3 @ 2018-01-22 00:13:59 UTC
  - PR #45579: (terminalmage) Test suite stability fixes (refs: #45585)
- 2a992f9017 Merge pull request #45585 from rallytime/bp-45579
- 0292c8345b Lint fix: use six's map
- 108d8cheef Use correct utils path for 2017.7
- a38f4cb6d6 Restrict pyzmq optimizations to pyzmq >= 14.3.0
- 58ad558346 Fix event unpack

- **PR #45573**: (gtmanfred) update 2017.7.3 tests @ 2018-01-20 20:05:13 UTC
  - 19cd97ed3b Merge pull request #45573 from gtmanfred/2017.7.3
  - bd3cb47fa7 fix mock for opensuse
  - 808e26e69a test simple website

- **PR #45570**: (gtmanfred) Fix tests for 2017.7.3 @ 2018-01-20 15:01:21 UTC
  - e72d81ef22 Merge pull request #45570 from gtmanfred/2017.7.3
  - 1f71f301ba specify checking man page path
  - 2dbcb45c1 fix pkg_resources for usage with testing pip
  - 0ba39a7108 switch systemd-journald for sshd for arch service test

- **PR #45538**: (gtmanfred) Backport test fixes to 2017.7.3 @ 2018-01-19 14:39:44 UTC
  - 7bc60c56d4 Merge pull request #45538 from gtmanfred/2017.7.3
  - 801e639b6 Merge branch '2017.7.3' into 2017.7.3

- **PR #45533**: (rallytime) Back-port #45529 to 2017.7.3 @ 2018-01-18 22:52:29 UTC
  - **PR #45529**: (Ch3LL) Fix UnboundLocalError for pacman pkg installs (refs: #45533)
  - 8ad65e3359 Merge pull request #45533 from rallytime/bp-45529
  - 6d56c64d88 Fix UnboundLocalError for pacman pkg installs
    - 8d907ee1a0 fix moto version
    - 1241ab5fc6 fix test boto imports
    - f4b6367cf9 fix fedora pkg test

- **ISSUE #45394**: (dmurphy18) git.latest fails when "depth" is used with a non-default branch (refs: #45399)

- **PR #45442**: (rallytime) Back-port #45399 to 2017.7.3 @ 2018-01-17 17:20:48 UTC
  - **PR #45399**: (terminalmage) Fix git.latest failure when rev is not the default branch (refs: #45442)
  - 7379f9e3e5 Merge pull request #45442 from rallytime/bp-45399
  - 590a96b626 Lint: use support TMP path instead of integration TMP path
  - c081b26c2c Fix git.latest failure when rev is not the default branch

- **PR #45468**: (twangboy) Fix some issues with reg.py @ 2018-01-16 22:23:47 UTC
  - ee5090f69b Merge pull request #45468 from twangboy/win_reg
  - a0d1c6354 Fix some issues with reg.py

- **ISSUE #44913**: (ari) FreeBSD packaging install performance regression (refs: #45174)

- **PR #45434**: (rallytime) Back-port #45174 to 2017.7.3 @ 2018-01-14 12:43:16 UTC
  - **PR #45174**: (eradman) Do not force pkg reinstall on FreeBSD (refs: #45434)
- ef7a896eb6 Merge pull request #45434 from rallytime/bp-45174
- b310ff7ab8 Do not force pkg reinstall on FreeBSD

**PR #45395:** (rallytime) Back-port #45380 to 2017.7.3 @ 2018-01-12 18:49:20 UTC
- PR #45380: (twangboy) Backport changes from #45308 (refs: #45395)
- PR #45308: (twangboy) Fix integration.modules.test_state for Windows (refs: #45380)
- c3fd1dc4 Merge pull request #45395 from rallytime/bp-45380
- 0356b3d56f Backport changes from #45308

**ISSUE #44107:** (anlutro) salt-ssh 2017.7 doesn’t work with Python 3, missing backports_abc (refs: #45294)

**PR #45294:** (gtmanfred) include backports_abc @ 2018-01-11 18:18:16 UTC
- f7da716d32 Merge pull request #45294 from gtmanfred/2017.7
- 3633eeea7 Merge branch '2017.7' into 2017.7
- 29806e4496 ignore salt.ext in pylint
- 8b597a4890 include backports_abc

**ISSUE #43130:** (boltronics) module.run documentation issues (refs: #45381)

**PR #45381:** (gtmanfred) fix module.run docs @ 2018-01-11 18:02:38 UTC
- f77a3e9c4 Merge pull request #45381 from gtmanfred/module.run
- 230e899192 fix module.run docs

**ISSUE #43995:** (dragonpaw) Using zmq built with --enable-draft breaks Salt (refs: #45368)

**PR #45368:** (DmitryKuzmenko) Fixes to work with pyzmq with --enable-drafts @ 2018-01-11 17:53:16 UTC
- 8efd29fdd9 Merge pull request #45368 from DSRCorporation/bugs/zmq_draft
- 7622e355cf Minor: removed a stale comment.
- 00f31b9b5 Fixes to work with pyzmq with --enable-drafts

**PR #45371:** (rallytime) Back-port #45158 to 2017.7 @ 2018-01-11 17:51:38 UTC
- PR #45158: (terminalmage) Fix integration.modules.test_state.StateModuleTest.test_exclude (refs: #45371)
- 22ce3e0fda06 Merge pull request #45371 from rallytime/bp-45158
- 3565bc2f2b Don’t use include-test SLS in orch tests
- 8bc17e0d7a Fix integration.modules.test_state.StateModuleTest.test_exclude

**PR #45378:** (renner) Set SHELL environment variable @ 2018-01-11 16:23:21 UTC
- PR #40630: (mateiw) develop: SUSE specific changes to salt-api.service (refs: #45378)
- PR #40620: (mateiw) SUSE specific changes to salt-api.service (refs: #40630, #45378)
- 3a0e2de995 Merge pull request #45378 from renner/patch-2
- 530ddd29e2 Set SHELL environment variable

**PR #45387:** (terminalmage) Fix loader error in 2017.7 tests @ 2018-01-11 16:13:53 UTC
- dcf98a26a Merge pull request #45387 from terminalmage/fix-test-loader-error
- 5473c085d9 Fix loader error in 2017.7 tests
- **PR #45382**: (terminalmage) Skip flaky test on 2017.7 branch @ 2018-01-11 14:23:05 UTC
  - d15f9e1020 Merge pull request #45382 from terminalmage/salt-jenkins-686
  - ff309db6c Skip flaky test on 2017.7 branch

- **PR #45369**: (rallytime) [2017.7] Merge forward from 2016.11 to 2017.7 @ 2018-01-10 22:14:05 UTC
  - dbe21b2c0d Merge pull request #45369 from rallytime/merge-2017.7
  - f6e091df8 Merge branch '2016.11' into '2017.7'
    - 0959ae4ea3 Merge pull request #45327 from lomeroe/bp-44861_2016.11
      - 784139f734 Check for values other than 0 or 1
    - a6db5f95f0 Merge pull request #45268 from damon-atkins/2016.11_win_pkg_pkg_install_latest
      - 325a9f0f66 Update 2016.11.9.rst
      - 4da9200b9c Update 2016.11.9.rst
      - 126ae36ac Update 2016.11.9.rst
      - 1c01967943 Update 2016.11.9.rst
      - a0d89882b8 Fix pkg.install packagename version=latest i.e. if on an old version upgrade to the latest

- **PR #45379**: (rhoths) Minor spelling/grammar fixes in the highstate returner documentation @ 2018-01-10 20:09:52 UTC
  - 55979b3a48 Merge pull request #45379 from rhoths/rhoths-doc-highstate-1
  - abbd492c2d Merge pull request #45358 from rhoths/rhoths-doc-highstate-1

- **PR #45358**: (UtahDave) gate the minion data cache refresh events. @ 2018-01-10 17:21:05 UTC
  - PR #45299: (garethgreenaway) [2017.7] config gate auth_events (refs: #45358)
  - 541e59fa75 Merge pull request #45358 from UtahDave/gate_data_cache_refresh
  - 379b6cd23e should be self, not salt
  - a82e158f2d Merge pull request #45297 from UtahDave/gate_data_cache_refresh

- **PR #45297**: (Ch3LL) Allow macosx service state tests to check for pid return @ 2018-01-09 20:47:24 UTC
  - fb87010461 Merge pull request #45297 from Ch3LL/mac_service_state
  - 4e569b5802 Allow macosx service state tests to check for pid return

- **PR #45351**: (dmurphy18) Update debbuild to explicitly include source code for Debian, Ubuntu @ 2018-01-09 17:21:51 UTC
  - beedf6e815 Merge pull request #45351 from dmurphy18/upd_debbuild
  - 478dc70092 Update debbuild flags

- **PR #45299**: (garethgreenaway) [2017.7] config gate auth_events (refs: #45358) @ 2018-01-09 15:00:30 UTC
  - 66da9b47bc Merge pull request #45299 from garethgreenaway/config_gate_auth_events
  - 9a15ec3430 Updating versionadded string. Fixing typo.
  - eedf3dc078 Adding in document for auth_events configuration option
  - 3ee4eabf8d Fixing small typo
  - 6a28bddd9 Adding some code to config gate if auth_events are sent
- **PR #44856**: (Ch3LL) Add state.running ssh integration test @ 2018-01-08 21:40:50 UTC
  - 8d04c2b3d4 Merge pull request #44856 from Ch3LL/running_test
  - 9a35a73711 add time limit to while loop
  - aeb54e248 Add state.running ssh integration test
- **ISSUE saltstack/salt-jenkins#675**: (rallytime) [2017.7] unit.states.test_file:TestFileState.test_directory is failing on Fedora 27 and CentOS 6 (refs: #45295)
- **PR #45295**: (gtmanfred) test directory that doesn’t exist @ 2018-01-08 20:59:53 UTC
  - d0e5e70277 Merge pull request #45295 from gtmanfred/test_directory
  - e6178fe6d4 Merge branch '2017.7' into test_directory
  - 24114e91c1 test was different slightly on 2017.7
  - d20fc93625 test directory that doesn’t exist
- **ISSUE saltstack/salt-jenkins#678**: (rallytime) [2017.7] Proxy Minion Tests for Py3 are failing (refs: #45302)
- **PR #45302**: (gtmanfred) fix proxy tests for py3 on 2017.7 @ 2018-01-08 17:41:58 UTC
  - f49b204b75 Merge pull request #45302 from gtmanfred/proxyp3
  - b295ec0429 make dummy proxy module py3 compatible
  - 8736e21f65 fix starting proxy minion on py3
  - e2824a7253 fix py3 tests
- **PR #45279**: (rallytime) [2017.7] Merge forward from 2016.11 to 2017.7 @ 2018-01-08 17:26:49 UTC
  - eea7158e82 Merge pull request #45279 from rallytime/merge-2017.7
  - 8025b14584 Merge branch '2016.11' into '2017.7'
    - 1c5e905b61 Merge pull request #45256 from rallytime/bp-45034
      - 68f971b38f Apply test fixes from #45034 to parsers_test.py
      - 9454236694 Fix for pidfile removal logging
- **PR #44853**: (gtmanfred) remove not from vault utils @ 2018-01-05 17:43:18 UTC
  - dab4a8c0f3 Merge pull request #44853 from gtmanfred/vault
  - bfee1c0ad6 set role for loading minion config
  - c5af2e5048 if utils is not loaded, load it
  - 6a5e0f9ac1 remove not from vault utils
- **PR #45277**: (rallytime) Back-port #45025 to 2017.7 @ 2018-01-05 15:35:53 UTC
  - PR #45025: (steverweber) Fix pillar include merge order (refs: #45277)
  - f09d0e5f6d Merge pull request #45277 from rallytime/bp-45025
  - 942c14bb29 pillar body overrides includes
  - 1152202fde fix pillar includes from merging over the current sls defines
- **PR #45276**: (rallytime) Back-port #45260 to 2017.7 @ 2018-01-05 14:45:40 UTC
  - PR #45260: (gtmanfred) Make some kitchen-salt tests blue (refs: #45276)
  - fc84f1104f Merge pull request #45276 from rallytime/bp-45260
- 9ab1af738f switch kitchen-salt to use rsync transport to preserve symlinks
  - cf98ed472e fix up symlinks

• ISSUE #43340: (syphernl) Upgrading Salt via Salt results in dying minions and broken dpkg (refs: #45255)
  - PR #45255: (rallytime) Back-port #44427 to 2017.7 @ 2018-01-04 21:46:17 UTC
    - PR #44427: (samodid) use KillMode=process for salt-minion.service (refs: #45255)
    - ff9880c498 Merge pull request #45255 from rallytime/bp-44427
    - 6ceafbbf3a use KillMode=process for salt-minion.service

• ISSUE #23454: (HontoNoRoger) SLS rendering error with Salt-SSH (pydsl) (refs: #45251)
  - PR #45251: (forksaber) Fix #23454: make pydsl work with salt-ssh @ 2018-01-04 21:33:09 UTC
    - 2934b60d53 Merge pull request #45254 from Ch3LL/fx_mac_grain_ssh
    - 85e853a63d Add darwin value for ssh grain items tests on MacOSX

• ISSUE #43806: (Ch3LL) Add spm man Test to Auto Test Suite (refs: #44930)
  - PR #44930: (frogunder) man_spm_test @ 2018-01-04 20:58:02 UTC
    - 48e6953e1f fix_string_error
    - c9fa4ed2a7 man_spm_test

• PR #45259: (Ch3LL) Fix MacOSX Service Status Check and integration test @ 2018-01-04 14:25:01 UTC
    - 74e6ed60ea Fix MacOSX Service Status Check and integration test

• PR #45263: (sumeetisp) Updating python version for 2017.7 @ 2018-01-04 14:16:26 UTC
    - 71aea9a3bc Merge pull request #1 from sumeetisp/sumeetisp-python-version
      - 1b4806e2b9 Updating python version

• PR #45244: (twangboy) Fix search/replace in Py3 @ 2018-01-04 14:02:22 UTC
    - 3a1e9a93c01 Get path to python binary based on executable
    - 03ae9c7040 Fix search/replace in Py3
• PR #45233: (rallytime) [2017.7] Merge forward from 2016.11 to 2017.7 @ 2018-01-03 15:34:00 UTC
  - eba360870a Merge pull request #45233 from rallytime/merge-2017.7
  - a3d251b2cd Merge branch ’2016.11’ into ’2017.7’
    * b75f50afe3 Merge pull request #45235 from rallytime/bp-45209
      * 2d0a9bbf7e enable UsePAM for ssh tests
  - 5d9a1e91e9 Merge branch ’2016.11’ into ’2017.7’
    * 3ab962b01a Merge pull request #44965 from gtmanfred/2016.11
      * a5d8a6340e check if VALUE is a string_type
    * 40fb30f63f Merge pull request #45232 from rasathus/2016.11
      * 7a2bd8f49b Merge branch ’2016.11’ into 2016.11
      * de53c45c29 Backport #27160 to 2016.11
• PR #45175: (amendlik) Pkg uptodate @ 2018-01-02 17:38:36 UTC
  - 693cc807e8 Merge pull request #45175 from amendlik/pkg-uptodate
  - 4f514a29a7 Merge branch ’2017.7’ into pkg-uptodate
• PR #45226: (gtmanfred) Update kitchen to use runtests verifier on 2017.7 @ 2017-12-31 18:13:28 UTC
  - 1b3f5ba1be Merge pull request #45226 from gtmanfred/2017.7
  - 4f3b089e0e fix copying back
  - f56f062a6a download xml for junit
  - 7cc342a5d6 use new runtests verifier
• PR #45221: (rallytime) [2017.7] Merge forward from 2016.11 to 2017.7 @ 2017-12-30 18:08:29 UTC
  - 7d3a6cbc65 Merge pull request #45221 from rallytime/merge-2017.7
  - 508599e159 Merge branch ’2016.11’ into ’2017.7’
  - 707ef55175 Merge pull request #45161 from lomeroe/bp-44944_2016.11
    * 0a4c6b5a83 remove references to six.unichr
    * f3196d795d lint fixes for static regexes
    * 11b637d108 lint fixes
    * c14d628ad do not decode registry.pol file wholesale, but instead decode individual elements of the file
  - 6f52034e08 Merge pull request #45199 from gtmanfred/status
    * fb079ea7d status.pid returns pid ids not process names
• ISSUE #45176: (thuhak) osquery execution module doesn’t work with attrs parameter (refs: #45204)
• PR #45204: (garethgreenaway) [2017.7] Fixes to osquery module & addition of unit tests @ 2017-12-30 13:25:38 UTC
  - abed378981 Merge pull request #45204 from garethgreenaway/45176_fixes_to_osquery_module
  - dc933e9e24 Fixing typo
  - d834bd1b6f Fixing some minor lint issues.
  - 4738205154 Fixing a bug when attributes are passed to various osquery module functions.
- 66884334d9 Update states.pkg for Python3 compatibility
- 2a7d76ad6e Fail pkg.uptodate if expected packages are not upgraded
- 29ef67bac2 Test pkg.uptodate with failed upgrades
- 23ab93353b Produce changes dict for pkg.uptodate dry-run mode
- 7c67ec39d9 Add tests for pkg.uptodate state

**PR #45203**: (rallytime) [2017.7] Merge forward from 2016.11 to 2017.7 @ 2017-12-29 01:11:03 UTC
- 5991d8ca15 Merge pull request #45203 from rallytime/merge-2017.7
- 430c913c8c Merge branch '2016.11' into '2017.7'
  - d3381e27d0 Merge pull request #45118 from garethgreenaway/44728_nodegroups_seq
    - 0ff811de70 Swapping import to be the old path for 2016.11
    - b3e2f388f5 Fix to allow nodegroups to include sequences
  - f969aca3a3 Merge pull request #45127 from twangboy/win_fix_pkg
    - 14639739f2 Fix issue with 1641 return code
  - dc357b39f0 Merge pull request #45137 from twangboy/win_fix_reg_tests
    - b6f4ef8d73 Catch correct error type in list_keys and list_values
  - 0aa1662731 Merge pull request #45130 from rallytime/api-groups
    - 2dcc8d845 Resolve groups for salt api
  - 7dc3cc4641 Merge pull request #45114 from twangboy/win_fix_pam
    - cf5eae1f77 Move pam library load to try/except block

**PR #45201**: (rallytime) [2017.7] Check for running on python3 before decoding bytes @ 2017-12-28 22:59:14 UTC
- PR #45090: (angeloudy) fix TypeError in python 3 (refs: #45201)
- 882267314f Merge pull request #45201 from rallytime/fix-jinja-template-test-failure
- b4af3bdf8f Check for running on python3 before decoding bytes

**PR #45200**: (rallytime) [2017.7] Fix docstring integration test failure @ 2017-12-28 22:58:34 UTC
- PR #44552: (Da-Juan) pip_state: Check if available upgrades fulfill version requirements. (refs: #45200)
- 2e18398f12 Merge pull request #45200 from rallytime/fix-docstring-test-failure
- a26d4795bd [2017.7] Fix docstring integration test failure

**PR #45186**: (rallytime) Back-port #44922 to 2017.7 @ 2017-12-28 19:02:51 UTC
- PR #44922: (dincamihai) Fix salt-master for old psutil (refs: #45186)
- 67d97303b5 Merge pull request #45186 from rallytime/bp-44922
- 6970fe8103 Fix salt-master for old psutil

**PR #44624**: (eliasp) Fix Traceback when using the service.enabled state on non-booted systems @ 2017-12-28 10:58:43 UTC
- 30d7f7257a Merge pull request #44624 from eliasp/fix-upstart-utmp-exception
- 43d44e051a Do not blindly assume presence of either /var/run/utmp or /run/utmp, none of both might be available (e.g. on non-booted systems).
• PR #45183: (twangboy) Add libnacl dependency @ 2017-12-27 22:08:32 UTC
  - 3832e7b227 Merge pull request #45183 from twangboy/win_add_libnacl_2017.7
  - b46845888d Add libnacl dependency

• ISSUE #44928: (rcallphin) Duplicating master token when no match for Minion policy (Vault Module) (refs: #44966)

• PR #44966: (rcallphin) Fix bug with vault runner creating token on empty policy @ 2017-12-22 20:30:37 UTC
  - fbbf3357e4 Merge pull request #44966 from rcallphin/fix-bug-vault-empty-policy
  - 7f327ab760 Lint: Remove extra whitespace
  - 04ab6a5e9d Merge branch '2017.7' into fix-bug-vault-empty-policy
  - 5be463bb46 Merge branch '2017.7' into fix-bug-vault-empty-policy
  - 48d9c36744 Fix bug with vault runner creating token on empty policy

• PR #44552: (Da-Juan) pip_state: Check if available upgrades fulfill version requirements. (refs: #45200) @ 2017-12-22 19:25:17 UTC
  - 487207f61d Merge pull request #44552 from Da-Juan/avoid_unneeded_pip_install
  - 49a6a8f02e Merge branch '2017.7' into avoid_unneeded_pip_install
  - 3a8e62493d pip_state: Check if available upgrades fulfill version requirements
  - 62252d74d9 pip_state: Compare versions using pkg_resources.parse_version
  - 5219a979c4 Add list_all_versions function to pip module

• PR #45090: (angeloudy) fix TypeError in python 3 (refs: #45201) @ 2017-12-22 18:11:13 UTC
  - 5ae26f0c09 Merge pull request #45090 from angeloudy/2017.7
  - cf411f8984 Merge branch '2017.7' into 2017.7
  - 177fd18671 fix TypeError in python 3

• ISSUE #44315: (whytewolf) cmd.* cwd does not escape spaces. 2017.7.2 (refs: #45134)

• PR #45134: (garethgreenaway) [2017.7] fix to cmd.script for cwd with space @ 2017-12-22 15:31:24 UTC
  - a1946730a9 Merge pull request #45134 from garethgreenaway/44315_cmd_script_cwd_with_space
  - 48eafe3206 Adding some tests to tests cmd.script with cwd
  - 8dfc71b08 Adding _cmd_quote to handle cases when the current working directory for cmd.script might have a space in it.

• PR #44964: (Giandom) added-highstate-output-to-slack-engine @ 2017-12-21 21:32:01 UTC
  - f41adfc913 Merge pull request #44964 from Giandom/2017.7-added-highstate-output-to-slack-engine
  - 4526c158f1 added-highstate-output-to-slack-engine
  - 573a0a4143 added-highstate-output-to-slack-engine
  - 9a6e036e66 added-highstate-output-to-slack-engine

• PR #45124: (gtmanfred) enable using kitchen-salt with ec2 on 2017.7 @ 2017-12-21 19:11:27 UTC
  - b49ee97938 Merge pull request #45124 from gtmanfred/2017.7
  - d0586013eb fix pylint
  - 59e2e56d13 chmod the xml files before trying to copy
- a5c1410e23 catch IOError when copying xml files back
- 23bd38ad66 enable using kitchen-salt on ec2

**PR #45087**: (rallytime) [2017.7] Merge forward from 2016.11 to 2017.7 @ 2017-12-20 22:24:51 UTC
- 42e894570d Merge pull request #45087 from rallytime/merge-2017.7
- fe81e2d39a Merge branch '2016.11' into '2017.7'
  * 7e128e8f15 Merge pull request #45100 from rallytime/bp-45070
    - 0dbd46db9 add clouds modules to index
  * bd9f339d Merge pull request #45098 from rallytime/bp-45092
    - 80b6bd6813 Fix integration.states.test_pip.PipStateTest.test_pip_installed_weird_install

- 4f21a2bbfd Merge branch '2016.11' into '2017.7'
  * 324b7d4058 Merge pull request #44078 from rossengeorgiev/fixed-41044
    - a81a6fe23c fix #41044; allow for date param to be 0
  * 48a59761df Merge pull request #44970 from rallytime/update-bootstrap-script
    - b2c8057427 Update bootstrap script to latest release: 2017.12.13
  * 637fdaed58 Merge pull request #45069 from rallytime/bp-45040
    - aa438e1605 Installation Fails on headless machines.
  * 4d6d640381 Merge pull request #44969 from rallytime/bp-41305
    - 5c4bee43dc correct accept_vpc_peering_connection
  * 10de46f113 Merge pull request #45031 from terminalmage/fixed-mysql-returner
    - 3bd12c27c Fix invalid exception class in mysql returner
  * 9a7406207f Merge pull request #44972 from terminalmage/bp-44958
    - a416b0f0112 No need to manually do connect_pub, use listen=True in run_job
    - 3ec004bd2e Fix a race condition in manage runner
  * 1032ca3290 Merge pull request #44385 from gtmanfred/schedule
    - 9e15c38da2 add comma
    - 855d933cb7 schedule should be a dict

**PR #45112**: (Ch3LL) Fix spm big file build test to check /tmp @ 2017-12-20 22:09:21 UTC
- 9550e742ac Merge pull request #45112 from Ch3LL/fixed-arch
- 1bd7110a14 Fix spm big file build test to check /tmp

**ISSUE #44303**: (mwerickso) boto3_route53 module times out on retries (refs: #44976)

**PR #45068**: (rallytime) Back-port #44976 to 2017.7 @ 2017-12-20 16:31:22 UTC
- **PR #44976**: (tkwilliams) Fix bad variable name in boto3_route53 module - resolves #44303 (refs: #45068)
- 71f9c7ee49 Merge pull request #45068 from rallytime/bp-44976
- 0ca0f37805 44303 - resolves #44303

**ISSUE #44961**: (golmaal) The archive tar function fails to untar file when dest argument is passed (refs: #44983)

**PR #45099**: (rallytime) Back-port #44983 to 2017.7 @ 2017-12-20 14:41:22 UTC
- **PR #44983**: (golmaal) Ref:44961 - Modified archive.tar to add dest at the end of the tar cmd (refs: #45099)
- 54a33c0e1d Merge pull request #45099 from rallytime/bp-44983
- 23361de8a2 Ref:44961 - Modified archive.tar to add dest argument at the end of the tar cmd.

- **ISSUE #43533**: (Ch3LL) Add status.pid Test to Auto Test Suite (refs: #44650)
- **PR #44650**: (frogunder) add status.pid test @ 2017-12-19 16:21:09 UTC
  - e0d7b330fa Merge pull request #44650 from frogunder/status
  - 904c0da893 Merge branch '2017.7' into status
  - 619bd2be1e fix lint error
  - d406c907a3 add status.pid test

- **ISSUE #44516**: (doesitblend) Windows PY3 Minion Returns UTF16 UnicodeError (refs: #45161, #44944)
- **PR #44944**: (lomeroe) win_lgpo registry.pol encoding updates (refs: #45161) @ 2017-12-19 14:42:49 UTC
  - 422d8b8f1b Merge pull request #44944 from lomeroe/update_regpol_encoding
  - 07d04c7bc7 lint fixes for static regexes
  - d17c46ce41 lint fixes
  - ab8e431729 do not decode registry.pol file wholesale, but instead decode individual elements of the file

- **PR #44938**: (The-Loeki) Libcloud dns fixes @ 2017-12-18 15:47:18 UTC
  - d9a4b9681e Merge pull request #44938 from The-Loeki/libcloud_dns_fixes
  - 276e8828ae libcloud_dns: pylint fix
  - c994423286 Merge branch '2017.7' into libcloud_dns_fixes

- **PR #44951**: (rallytime) [2017.7] Merge forward from 2016.11 to 2017.7 @ 2017-12-16 13:16:24 UTC
  - 5137be01ec Merge pull request #44951 from rallytime/merge-2017.7
  - a0d2dd2069 Lint fix
  - 9db4179462 Merge branch '2016.11' into '2017.7'
  - 68d901b12c Merge pull request #44770 from cruscio/2016.11
    - e2682bf441 Fix minion ping_interval documentation
  - d4a55ec47 Merge pull request #44335 from gtmanfred/2016.11
    - 3f1268d67f fix patching for python 2.6
    - 1d0bd5bb32 Merge branch '2016.11' into 2016.11
    - 02b02032d Merge pull request #4 from terminalmage/pr-44335
    - b4eb1527a6 Add test for PR 44335
    - a3043525e add docker-ce to docker subtype grains check

- **PR #44995**: (twangboy) Fix unit.modules.test_file for Windows @ 2017-12-15 17:05:49 UTC
  - 698b04779e Merge pull request #44995 from twangboy/win_fix_atomicfile
  - 8316481944 Comment the salt import
  - fe348c877 Set owner properly on Windows
• ISSUE #44934: (vernondcole) http.wait_for_successful_query does not pause for documented intervals (refs: #44968)

• PR #44968: (gtmanfred) fix http wait for state @ 2017-12-14 20:06:01 UTC
  - 2e1a57b9bc Merge pull request #44968 from gtmanfred/http
  - ca6936f6eb fix http wait for state
    * c72db283d5 libcloud_dns: Further fixes to state output, pylint fixes
    * e9bbc23b11 Merge branch '2017.7' into libcloud_dns_fixes

• ISSUE #44811: (xuhcc) rbenv.installed fails when rbenv installed globally (refs: #44900)

• PR #44900: (xuhcc) Fix TypeError during rbenv ruby installation when rbenv is not found @ 2017-12-14 17:37:14 UTC
  - c4f0894689 Merge pull request #44900 from xuhcc/rbenv-ret-fix
  - fdd8310c31 Merge branch '2017.7' into rbenv-ret-fix
  - bfd0972d25 Fix TypeError during rbenv ruby installation when rbenv is not found

• PR #44974: (twangboy) Skip test_log_created on Windows @ 2017-12-14 13:59:25 UTC
  - f0c2cf3cec Merge pull request #44974 from twangboy/win_skip_test_parsers
  - 40665d7b08 Skip test_log_created on Windows

• ISSUE #44820: (msteed) Custom returner breaks manage runner (refs: #44958)

• PR #44958: (terminalmage) Fix a race condition in manage runner (refs: #44972) @ 2017-12-13 15:20:36 UTC
  - dad2d723ca Merge pull request #44958 from terminalmage/issue44820
  - ef749abfc6 No need to manually do connect_pub, use listen=True in run_job
  - 2ac70caf5 Fix a race condition in manage runner

• PR #44956: (terminalmage) Avoid traceback when bogus value in pidfile @ 2017-12-13 14:30:12 UTC
  - db58345abb Merge pull request #44956 from terminalmage/fix-get_pidfile
  - d666d7b08 Skip test_log_created on Windows

• ISSUE #44932: (knine) ACLs Not Completely Verified (refs: #44945)

• PR #44945: (gtmanfred) Fix handling of effective acls @ 2017-12-12 21:49:34 UTC
  - e8e3b3c8ff Merge pull request #44945 from gtmanfred/2017.7
  - 66b755751 add test for effective acls
  - 0ff52a93dd use last entry in acl

• PR #44942: (rallytime) Update README with SaltConf18 info @ 2017-12-12 21:47:23 UTC
  - 47dc7b7a9b Merge pull request #44942 from rallytime/readme-saltconf-update
  - d1317c44e2 Update README with SaltConf18 info

• ISSUE #44665: (mvivaldi) Documentation of salt renders jinja (refs: #44943, #44895)

• PR #44943: (mvivaldi) Fix for the jinja documentation @ 2017-12-12 20:20:41 UTC
  - 7572982419 Merge pull request #44943 from mvivaldi/filters-doc
  - d23ac4eabc Fix for the jinja documentation

• ISSUE #43417: (damon-atkins) win_pkg: pkg.install and pkg.remove general issues (refs: #44832, #43708)
• **PR #44832**: (damon-atkins) win_pkg: Merge full copy of 2016.11 with many fixes and improvements to 2017.7 @ 2017-12-12 18:30:06 UTC
  - 465cacad83 Merge pull request #44832 from damon-atkins/2017.7_replace_with_newer_2016.11_win_pkg
  - a4f0b41ba2 Should be a smaller change set since recent update from 2016.11
  - 69534b201 Merge branch '2017.7_replace_with_newer_2016.11_win_pkg' of github.com:damon-atkins/salt into 2017.7_replace_with_newer_2016.11_win_pkg
    - 843e204582 Merge branch '2017.7' into 2017.7_replace_with_newer_2016.11_win_pkg
  - 4b60b1ec84 Merge remote branch 'refs/remotes/upstream/2017.7' into 2017.7_replace_with_newer_2016.11_win_pkg
  - b46f818a57 Raise a PR to fix 2016 issues commited here, fixed issues with merge.
  - 32ef1e12ae Merge branch '2017.7' into 2017.7_replace_with_newer_2016.11_win_pkg
  - 494835c3f2 I backported develop and applied a long list of fixes to 2016.11 this brings these fixes into 2017.7 - Software was not always being removed, general if & was in the string or msi was downloaded to uninstall the software - pkg.list_upgrades failed. Added support for 'latest' and 'Not Found' for version_cmp() to fix this. - output fixes - pkg.list_available no longer forces a pkg.refresh_db this is no longer required, as by default it will update if older than 6 hours - cmd /s /c is prefixed for all commands i.e. installs and removes. - cmd are now strings, instead of a list when using cmd.run. As windows only supports strings. And the " were being broken

• **PR #44754**: (twangboy) Fix inet_pton for Windows on Py3 @ 2017-12-12 14:04:20 UTC
  - a811a92b17 Merge pull request #44754 from twangboy/win_fix_inet_pton
  - 25a20109fe Merge branch '2017.7' into win_fix_inet_pton
  - 849b99eb34 Merge branch '2017.7' into win_fix_inet_pton
  - df1e6a020b Use salt.ext.six
  - 5ac8812585 Use six to ensure unicode value
  - 9b5d84c4b1 Handle unicode values

• **PR #44931**: (pkruk) add missing parenthis to keep integration with python3 @ 2017-12-12 13:49:39 UTC
  - 53b34e24cd Merge pull request #44931 from pkruk/fix-missing-parenthis
  - b1ed739b44 Merge branch '2017.7' into fix-missing-parenthis
  - 4f1b1f12d2 Merge branch 'fix-missing-parenthis' of https://github.com/pkruk/salt into fix-missing-parenthis
    - 347f3f0a01 add missing parenthis to keep integration with python3
    - a2d8ca2af2 add missing parenthis to keep integration with python3
    - 55e334f57 libcloud_dns: fix state output
    - a68d594e3a libcloud_dns: copy args before deleting from them

• **PR #44891**: (twangboy) Fix issue with unsafe path in Windows jenkins tests @ 2017-12-11 21:10:43 UTC
  - ba646250a Merge pull request #44891 from twangboy/win_fix_verify
  - 7232579167 Allow test suite file_roots as a safe path

• **PR #44921**: (Ch3LL) Add test to ensure log files are created @ 2017-12-11 18:24:16 UTC
  - 85160fd297 Merge pull request #44921 from Ch3LL/log_test
- 3bb58f577 skip salt-key log creation test
- 6a379195bc Add test to ensure log files are created

**PR #44787:** (rallytime) GroupAdd test: Add destructive test decorator to entire class @ 2017-12-11 18:14:18 UTC
- 54d29a61cb Merge pull request #44787 from rallytime/groupadd-destructive-clean
- 817ac002b0 Add destructive test decorator to test class

**ISSUE #44665:** (mvivaldi) Documentation of salt renders jinja (refs: #44943, #44895)

**PR #44895:** (mvivaldi) Jinja Filters doc @ 2017-12-11 15:32:07 UTC
- 0292e3612a Merge pull request #44895 from mvivaldi/filters-doc
- 62409d608a Added Escape Filters and Set Theory Filters in jinja documentation

**PR #44879:** (rallytime) [2017.7] Merge forward from 2016.11 to 2017.7 @ 2017-12-10 16:53:44 UTC
- PR #44855: (rallytime) [2017.7] Merge forward from 2016.11 to 2017.7 (refs: #44879)
- df28f312ac Merge pull request #44879 from rallytime/merge-2017.7
- 235a4ca3e Merge branch '2016.11' into '2017.7'
  - bb1f8dceaf Merge pull request #44579 from roaldf/fix-cron-identifier
    - df73a4c051 Merge branch '2016.11' into fix-cron-identifier
  - af0131fa1f Merge pull request #44852 from damon-atkins/2016.11_win_pkg_typo_n_fix
    - 0e7c19084f Lint: Remove extra whitespace
    - 7c7e21f94d Fix spelling typo, and fix backwards compatible minion option for repo location
  - 88c0d66b4e Merge pull request #44794 from terminalmage/issue44365
    - 3bb6df256e Remove debugging line
    - 153bf45b03 Fix regression in file.managed when source_hash used with local file
  - c8bb9d1bbb Merge pull request #44738 from rallytime/bump-oxygen-warnings
    - ead3c569e1 Bump deprecation warnings from Oxygen to Fluorine
  - 88e3aab00d Merge pull request #44741 from gtmanfred/rhip
    - 439dc8dce6 if gateway is not specified use iface
    - 3ec4329307 Merge branch '2016.11' into fix-cron-identifier
    - 99fa05a456 Fix for bug in cron state
    - 97328faeac Fix for bug in cron module

**PR #44880:** (UtahDave) Determine windows hardware arch correctly @ 2017-12-08 22:24:09 UTC
- 8e14bc3941 Merge pull request #44880 from UtahDave/2017.7local
- 6e37ac1ac Merge branch '2017.7' into 2017.7local

**PR #44861:** (twangboy) Fix win_lgpo for unknown values (refs: #45327) @ 2017-12-08 18:52:05 UTC
- dc51174670 Merge pull request #44861 from twangboy/win_fix/lgplpo_invalid_value
- 89f65e19ff Check for values other than 0 or 1

**PR #44621:** (isbm) Bugfix: errors in external pillar causes crash, instead of report of them @ 2017-12-08 18:46:56 UTC
- f5a143f8c5 Merge pull request #44621 from isbm/isbm-bsc106846-2017.7
- 0d2675e4fe Use variable, instead of direct value
- 1ddc47da0a Add unit test for _get_pillar_errors when external pillar is clean and internal contains errors
- 68480d5dc9 Add unit test for _get_pillar_errors when both external and internal pillars contains errors
- 218a59e93b Add unit test for _get_pillar_errors when external pillar has errors and internal is clean
- 3ce19356c2 Add unit test for _get_pillar_errors when external and internal pillars are clean
- 67034139d9 Fix unit test: wrong error types in side effect
- d9359bca13 Bugfix: unit test mistakenly expects pillar errors as a string, while it is a list
- 8c2bdc696b Bugfix: do not pull '_errors' from unchecked objects
- d5e30999c7 Remove unused variable (no exception, within the try/finally block)
- aad668d559 Fix and clarify docstring.
- c2c47e4e71 Rename function from ambiguous name
- 265de8e61c Bugfix the logic according to the exact described purpose of the function.
  * dae966a5c Determine windows hardware arch correctly

**PR #43379:** (twangboy) Fix file.managed on Windows with test=True @ 2017-12-07 21:10:43 UTC
- abee09ad54 Merge pull request #43379 from twangboy/win_fix_file.managed
- edc581ca5 Merge branch '2017.7' into win_fix_file.managed
- a27bb6993a Fix py3 error
- 0ff9fa498a Fix test_directory
- 187bc1e61e Add back the try/finally blocks
- d7241d004f Fix 2 more tests
- d5dd4aebe Fix integration tests for Windows
- d5bc9ea9e9 Fix typo
- af5565859e Use file functions for symlink and remove
- 72ac59c991 Fix some more integration tests for Linux
- 3f0499bc4 Fix some integration tests
- a24b964ea5 Fix unit test to handle new Exception
- e3c38457f3 Raise CommandExecutionError when file doesn’t exist
- 460f499a2 Remove loader module mixin, add linux paths
- 99b27c037f Add tests to avoid future regression
- 5c215ed8c2 Fix documentation formatting
- 6a4e77e4b9 Return empty or unmodified dict on file not found

**ISSUE #44565:** (arthurlogilab) NameError: global name '__jid_event__' is not defined when running a runner in the scheduler (refs: #44570)

**PR #44570:** (gtmanfred) Include client mixin globals in scheduler for runner modules @ 2017-12-07 20:23:33 UTC
- cf4cbcd340 Merge pull request #44570 from gtmanfred/2017.7
- 7b17f9f63c Merge branch ‘2017.7’ into 2017.7

- **PR #44494**: (skizunov) Fix broken `beacons_before_connect` feature @ 2017-12-07 18:24:49 UTC
  - PR #38289: (skizunov) Add config options for running beacons/scheduler before connect (refs: #44494)
  - febb913743 Merge pull request #44494 from skizunov/develop2
  - 7adcfbf8ec Merge branch ‘2017.7’ into develop2

- **ISSUE #44298**: (skjar0) ipset state check problem (refs: #44356)

- **ISSUE #39552**: (Xiami2012) ipset.check new implementation by @lingonl has countless critical bugs (refs: #44356)

- **PR #44512**: (rallytime) Back-port #44356 to 2017.7 @ 2017-12-07 14:44:50 UTC
  - PR #44356: (skjaro) Fix ipset state with multiple entries and subtypes separated with comma (refs: #44512)
  - 284a817565 Merge pull request #44512 from rallytime/bp-44356
  - 6f92c71834 Merge branch ‘2017.7’ into bp-44356
  - 9a325146df Fix lint violation
  - 5ac729855 Fix check multiple entries with subtypes separated with comma

- **PR #44748**: (twangboy) Fix auto login support for OSX @ 2017-12-07 14:22:23 UTC
  - 74ee7ce541 Merge pull request #44748 from twangboy/osx_fix_auto_login
  - 068e463870 Fix lint, add integration tests
  - 3df886df75 Fix lint, add gtmanfreds change
  - 16cb24614f Add kcpassword functionality

- **PR #44842**: (twangboy) Win fix lgpo unicode on Py3 issue @ 2017-12-07 14:21:14 UTC
  - b60ca174c Merge pull request #44842 from twangboy/win_fix_lgpo
  - efe77999d1 Gate log.debug statement behind successful pop
  - 1c0ec79cd1 Fix py3 issue

- **PR #44843**: (twangboy) Fix 2 typos in lgpo module @ 2017-12-06 17:56:44 UTC
  - bb58e2fe0c Merge pull request #44843 from twangboy/win_fix_lgpo_typo
  - c8f93e6dd7 Fix 2 types, shorten line lengths for spellchecking

- **PR #44824**: (Ch3LL) Add spm -y and -f arg integration tests @ 2017-12-05 21:49:32 UTC
  - 019169ed61 Merge pull request #44824 from Ch3LL/spm_args

- **PR #44827**: (mz-bmcqueen) add more clone options to virtualbox and add better dhcp handling @ 2017-12-06 15:02:23 UTC
  - d6c37e19c Merge pull request #44827 from mz-bmcqueen/2017.7
  - 4ead3014b7 Merge branch ‘2017.7’ into 2017.7
  - b7ce154014 Merge branch ‘2017.7’ of https://github.com/mz-bmcqueen/salt into 2017.7
    - 2f80f431b3 Merge branch ‘2017.7’ into 2017.7
  - c2018c9021 fix pylint complaints
  - c38ff74261 add more clone options to virtualbox and add better dhcp handling

- **PR #44824**: (Ch3LL) Add spm -y and -f arg integration tests @ 2017-12-05 21:49:32 UTC
  - 019169ed61 Merge pull request #44824 from Ch3LL/spm_args
- d8f81d2e4d fix pylint
- 61ac5cf157 Add spm -y and -f arg integration tests

**PR #44742:** (Ch3LL) Add salt-cloud action rename integration test @ 2017-12-05 17:44:50 UTC
- 59b930668c Merge pull request #44742 from Ch3LL/cloud_action_test
- 951d09ca2f remove unnecessary try/except block
- c329ced7ee Add salt-cloud action rename integration test

**ISSUE #42676:** (mind-code) Changes in Pillar defined Beacons only apply after Minion restart (refs: #44771)

**PR #44771:** (garethgreenaway) [2017.7] Back porting #44071 @ 2017-12-05 17:16:06 UTC
- **PR #44071:** (garethgreenaway) [develop] Various fixes to beacons (refs: #44771)
- 10442d9211 Merge pull request #44771 from garethgreenaway/42676_backport_44071
- ec2a8b2032 Merge branch '2017.7' into 42676_backport_44071
- 180971203e Updating minion to respond to list_available events for beacons
- db6cecf62 Adding list_available which is used by the add function to verify that a becaon exists.
- e9e0318bc6 Backporting fixes related to having beacons in pillar from #44071

**PR #44784:** (rallytime) [2017.7] Merge forward from 2016.11 to 2017.7 @ 2017-12-05 17:13:49 UTC
- **PR #44732:** (rallytime) [2017.7] Merge forward from 2016.11 to 2017.7 (refs: #44784)
- 23d151b40a Merge pull request #44784 from rallytime/merge-2017.7-1
- 3d9eafc4bd Lint: Remove extra empty lines at end of files
- 239f3511bf Merge branch '2016.11' into '2017.7'
  * 97e0cf569c Merge pull request #44699 from jfindlay/attr_file
    - 9e5a40ea7c Merge branch '2016.11' into attr_file
    - 5c34607f6c utils/files remove temp file upon move failure
  * 7434e0afdf Merge pull request #44714 from rallytime/fx-44556
    - 1bbe1abe6b2 Allow --static option to display state runs with highstate output
  * 998d714ee7 Merge pull request #44517 from whytewolf/publish_port_doc_missing
    - 4b5855283a missed one place where i didnt chanbge master_port from my copy to publish_port
    - e4610bae5 update doc to have publish port
  * 6169b52749 Merge pull request #41279 from Ch3LL/add_grain_tests
    - 1b64f15692 Merge branch '2016.11' into add_grain_tests
  * dc6de050a9 Merge pull request #44563 from creideiki/pgjsonb-timestamps-44544
    - 231e412ca4 Merge branch '2016.11' into pgjsonb-timestamps-44544
  * 4369d020b Merge pull request #44602 from rallytime/fx-44601
    - ff303fd60 Handle timeout_monitor/TimeoutError issues for new versions of CherryPy
  * 4a4756cf37 Merge pull request #44604 from lorengordon/doc-exclude
    - c4a6c40eb3 Documents the exclude argument in state execution module

30.2. Previous Releases 4849
- 15c445e6b9 Send Unix timestamps to database in pgjsonb
- 095f1b7d7a Merge branch '2016.11' into add_grain_tests
- 91d46d4cfc Merge pull request #44434 from whytwolf/1837
  - d148e39dda change from md to rst for code reference
  - 955e305bda fix bad english, as requested by cachedout
  - 7256fcc1c9 update note to take into account grains_cache
  - 7a2981585e Merge branch '2016.11' into 1837
  - aca0405b26 add a note that describes grain rebuilding on restart and refresh
  - 9ea4db4224 mock socket.getaddrinfo
  - 78a07e30f4 add more fqdn tests and remove some of the mocking
  - 5dbf4144ce add ipv6 in opts
  - eabc1bf9c Add fqdn and dns core grain tests
- a3bd99317f Merge pull request #44321 from gvengel/fix-file-line-diff-output
  - 69a50204a6 Add newline for lint.
  - ef7b6bbb81 Fixed issue with file.line on Windows running Python 2.
  - 8f89c99f5 Fix FileModuleTest setUp and tearDown to work on Windows.
  - 3ac5391f5f Namespace missing functions for file.line on Windows.
  - b2b8f075b9 Fixed test to work on Windows.
  - 5a5a2dd026 Added integration test for issue #41474
  - 24d7315f1a Fix file.line diff formatting.
- 9ca563718d Merge pull request #43708 from damon-atkins/2016.11_43417_Backport_and_Fixes
  - 04d03ea6b8 Updated comment
  - 1dd565e585 Merge remote branch ‘upstream/2016.11’ into 2016.11_43417_Backport_and_Fixes
  - dd48ba2616 Merge remote branch ‘upstream/2016.11’ into 2016.11_43417_Backport_and_Fixes
  - a0d08598bf dco fix
  - 9467899fc6 Merge remote branch ‘upstream/2016.11’ into 2016.11_43417_Backport_and_Fixes
  - 6dc180fd0e dco fixes
  - 2496aad2ea4 lint fix
  - 2c937f5e19 Merge remote branch ‘upstream/2016.11’ into 2016.11_43417_Backport_and_Fixes
  - c9c848a4d all remove/install commands are passed to cmd.exe /s /c and commands are passed as strings to cmdmod
  - 350244bd9 typo in comments and doc strings.
  - ec31f5a9bd 2017.11/develop version() was ignoring saltenv setting.
  - b314549a32 Backport of devlop to 2016.11 with additional bug fixes
* 68ea22188e Merge pull request #44477 from rallytime/bp-44424
  - 4a9f8dce96 Fix #44423: Handle index=None and index=0 distinctly
* 2c89050a24 Merge pull request #44483 from terminalmage/issue44034
  - a9db8beec8 salt-call: account for instances where __pillar__ is empty
* b5c2028680 Merge pull request #44489 from whytwolf/1956_log-granular-levels
  - 9cdebe4903 update log-granular-levels to describe what they are filtering on
* ea07f9c54c Merge pull request #44193 from twangboy/win_fix_reg
  - 44d6d9f46d Remove unused import (lint)
  - f7502436d6 Fix various issues
  - 221e6e3b91 make salt.utils.to_unicode return none when passed none
  - ce41acc788 Fix many issues with reg.py
  - 4a19df1f7f Use six.text_type instead of str
  - 1b12ac3d03 Check type before casting
  - 03fa37b445 Cast vdata to its proper type
* ed8da2450b Merge pull request #43863 from nicholasmhughes/fix-atomicfile-permission-copy
  - ea852e5d3 remove index use with stat module attributes
  - dbeeb09e17 fixes #38452 atomicfile only copies mode and not user/group perms

- PR #44788: (kris-anderson) Example yaml of influxdb_user state @ 2017-12-04 14:28:45 UTC
  - 4643a112e7 Merge pull request #44788 from kris-anderson/example-yaml-of-influxdb-user-state
  - afd3d058c converted yaml example to use 2 spaces
  - 29e410c1ea added a code-block example of how the yaml should be formatted

- ISSUE #42713: (boltronics) 2017.7.0 master upgrade breaks mine data on non-glob matching on minions (refs: #44735)

- PR #44735: (gracinet) Backported issue #42713 to 2017.7 @ 2017-12-04 01:43:23 UTC
  - 4ebac09f60 Merge pull request #44735 from gracinet/42713_backport_2017.7
  - 6806d83314 Merge branch '2017.7' into 42713_backport_2017.7
  - fb586c6dce Backported issue #42713 to 2017.7

- PR #44766: (twangboy) Fix unit.utils.test_process for Windows @ 2017-12-02 13:15:53 UTC
  - 066e877328 Merge pull request #44766 from twangboy/win_fix_test_process
  - a573e8f3c3 Fix lint errors
  - be96de09cc Fix pickling error by decorating

- ISSUE #44083: (ari) timezone.system fails when /etc/localtime is missing on FreeBSD (refs: #44605)

- PR #44716: (rallytime) Back-port #44605 to 2017.7 @ 2017-12-01 23:12:24 UTC
  - PR #44605: (campbellmc) Add handling for FreeBSD in timezone.zone_compare (refs: #44716)
  - f8b8a8966d Merge pull request #44716 from rallytime/bp-44605
  - 9d43221422 Correct indentation
- Add handling for FreeBSD in method zone_compare to avoid exception when /etc/localtime file does is absent. This is valid configuration on FreeBSD and represents UTC.

- **ISSUE #41869**: (mirceaulinic) Thorium: unable to execute runners (refs: #44781)

- **PR #44781**: (mirceaulinic) Correct the thorium runner @ 2017-12-01 22:55:52 UTC
  - 8ed6287762 Merge pull request #44781 from cloudflare/thorium-fix-41869
  - 83c73a69cb Instance the Runner class instead of the RunnerClient as we're running on the Master
  - b72b7c5402 Correct the thorium runner

- **PR #44466**: (twangboy) Fix unit.modules.test_disk for Windows @ 2017-12-01 22:31:42 UTC
  - 52596be102 Merge pull request #44466 from twangboy/win_fix_test_disk
  - 5615862f23 Fix some lint
  - 627d5ab0c9 Mock salt.utils.which
  - e5a96fe00f Skip test_fstype on Windows

- **ISSUE #42763**: (xuhcc) acme.cert state falsely reports about renewed certificate (refs: #44667)

- **PR #44719**: (rallytime) Back-port #44667 to 2017.7 @ 2017-12-01 15:20:49 UTC
  - PR #44667: (oarmstrong) Fix acme.cert to run certbot non-interactively (refs: #44719)
  - b9ad4bba2d Merge pull request #44719 from rallytime/bp-44667
  - 3d85a260c4 Fix acme.cert to run certbot non-interactively

- **ISSUE #44744**: (brmzkw) roster_defaults breaks salt-ssh globbing (refs: #44747)

- **PR #44747**: (gtmanfred) use a copy so roster_defaults doesn't mangle @ 2017-12-01 15:13:48 UTC
  - d23192c492 Merge pull request #44747 from gtmanfred/roster_defaults
  - 911411ed8f add unit test
  - eefcfc719c use a copy so roster_defaults doesn't mangle

- **ISSUE #44694**: (thuhak) state module at.absent doesn't work (refs: #44717)

- **PR #44717**: (garethgreenaway) [2017.7] Fixes to at module @ 2017-12-01 14:37:05 UTC
  - 20f20ad9e1 Merge pull request #44717 from garethgreenaway/44694_at_absent_failing_to_find_jobs
  - 1f2b3c5f46 Merge branch '2017.7' into 44694_at_absent_failing_to_find_jobs
  - 3bb385b44e removing debugging logging
  - 7f0ff5a8b0 When passing IDs on the command line convert them all the strings for later compairison.
  - 99e436aadd4 When looking for job ids to remove based on the tag_name the compairison was comparing an INT to a STR, so the correct job id was not being returned.

- **ISSUE #44136**: (dupsatou) Key Error: ‘runas’ after updating to latest salt in yum repo. (refs: #44695)

- **PR #44695**: (gtmanfred) pop None for runas and runas_password @ 2017-12-01 14:35:01 UTC
  - 6e61aa787f Merge pull request #44695 from gtmanfred/pop
  - 0e9b90b6f7 Merge branch '2017.7' into pop

- **PR #44725**: (whytewolf) document note suggesting systemd-run --scope with cmd.run_bg @ 2017-11-30 19:18:06 UTC
  - 20391c54e0 Merge pull request #44725 from whytewolf/1919_cmd.run_no_daemons
- 4b11f8d66d add quick documentation suggesting systemd-run --scope if using cmd.run_bg with systemd

- **ISSUE #42300**: (mirceaulinic) Grains state doesn't work (fine) with proxy minions (refs: #44760)

- **ISSUE #42074**: (mirceaulinic) How to configure static grains for proxy minions (refs: #44549)

- **PR #44760**: (mirceaulinic) Fix the grains.setvals execution function when working with proxy minions @ 2017-11-30 18:27:02 UTC
  - **PR #44549**: (mirceaulinic) Allow proxy minions to load static grains (refs: #44760)
  - 85451ae977 Merge pull request #44760 from cloudflare/px-grains-set-42300
  - 655139d01c Different path to the static grains file when running under a proxy minion
  - 3ee88dbc63 Dummy proxy: catch EOFError instead of IOError

- **ISSUE #44583**: (creideiki) Using splay in cron schedule throws exception "unsupported operand type(s) for +: 'NoneType' and 'int'" (refs: #44640)

- **PR #44640**: (vutny) Fix #44583: splay with cron-like scheduled jobs @ 2017-11-30 15:30:41 UTC
  - 06fb80b69c Merge pull request #44640 from vutny/fix-cron-schedule-splay
  - d1f247e49e Add basic unit tests for schedule util eval func
  - 6ff8e75ac6 Fix #44583: splay with cron-like scheduled jobs

- **PR #44712**: (Ch3LL) Add pillar ssh integration tests @ 2017-11-30 15:29:33 UTC
  - e5a1401b82 Merge pull request #44712 from Ch3LL/ssh_pillar_items
  - 97ec0e6ea0 Merge branch '2017.7' into ssh_pillar_items
  - c7f5af1274 Add pillar ssh integration tests

- **PR #44763**: (mirceaulinic) Just a small improvement to the Thorium documentation @ 2017-11-30 14:38:03 UTC
  - 2e1c946990 Merge pull request #44763 from cloudflare/thorium-doc
  - f8d69dd0ba Add thorium_roots configuration example
  - 4610fb4e62 thorium_roots not thorium_roots_dir

- **PR #44531**: (mirceaulinic) Add deprecation notes for the NAPALM native templates @ 2017-11-30 14:18:56 UTC
  - 8ba2d1ea0 Merge pull request #44531 from cloudflare/deprecate-napalm-tpl
  - b46277d8b Add deprecation notes for the NAPALM native templates

- **PR #44737**: (twangboy) Skip unit.transport.test_ipc for Windows @ 2017-11-29 19:18:21 UTC
  - 7bde4828e Merge pull request #44737 from twangboy/win_skip_test_ipc
  - 4e0359b60 Skip IPC transport tests in Windows, not supported

- **PR #44629**: (Ch3LL) Add masterless state.highstate integration test @ 2017-11-29 19:05:23 UTC
  - c5206113ce Merge pull request #44629 from Ch3LL/high_masterless
  - 9b7421b261 Change check to the state id
  - 9cc853e3d5 Add masterless state.highstate integration test

- **PR #44613**: (Ch3LL) Add pillar.items test for masterless @ 2017-11-29 14:43:11 UTC
  - 2dc3e5c42a Merge pull request #44613 from Ch3LL/pillar_masterless
  - 2c2e1e2332 Merge branch '2017.7' into pillar_masterless
  - 69134e83ca Change order of local kwarg in run_call method

---

**30.2. Previous Releases**

---
- b3b5ecc6ff Add pillar.items test for masterless

- **PR #44659**: (Ch3LL) Add state.sls_id to ssh wrapper and tests @ 2017-11-29 14:41:47 UTC
  - cc05481026 Merge pull request #44659 from Ch3LL/ssh_slid
  - 04b5a3d4de Add state.sls_id to ssh wrapper and tests

- **PR #44698**: (Ch3LL) Add salt-ssh mine.get integration test @ 2017-11-28 22:15:29 UTC
  - 642ee611e1 Merge pull request #44698 from Ch3LL/mine_ssh
  - f6a72aefe3 Merge branch '2017.7' into mine_ssh
  - 9e67babf85 Add teardown to remove ssh dir
  - f90b4f7653 Add salt-ssh mine.get integration test

- **PR #44697**: (Ch3LL) Sort the show_top results for test_state_show_top test @ 2017-11-28 20:35:41 UTC
  - 5d82df6676 Merge pull request #44697 from Ch3LL/show_top_test
  - 974db59dc1 convert the assert to a union set instead
  - add434cf6 Sort the show_top results for test_state_show_top test

- **PR #44608**: (Ch3LL) Add jinja to ssh sls test file @ 2017-11-27 22:00:28 UTC
  - f2fe817e86 Merge pull request #44608 from Ch3LL/ssh_jinja
  - df69b551d Merge branch '2017.7' into ssh_jinja
  - ca97517795 Add jinja to ssh sls test file

- **ISSUE #33957**: (ghost) grains.setval doesn't setval if set in /etc/salt/minion (refs: #44663)

- **PR #44663**: (whytewolf) Update notes around grains topic, and salt.modules.grains and salt.state.grains @ 2017-11-27 21:33:38 UTC
  - 04b97bcfad Merge pull request #44663 from whytewolf/ZD1777_ensure_understanding_of_minion_config_over_grains_file
  - c912e4b85 fixed pylint error, and updated description on at the top the the module and state.
  - 7b208b55ad Update note in topics/grains to reflect that not all grains are ignored. only those set in the minion config

- **PR #44332**: (mirceaaulinic) Improve the net.load_config execution function @ 2017-11-27 21:22:18 UTC
  - 364dee66ac Merge pull request #44332 from cloudflare/improve-net-load
  - cd0bac786e Merge branch '2017.7' into improve-net-load
  - 6d8619a74 Disable pylint warning
  - 3a0945ce3d Merge pull request #11 from tonybaloney/gh_44332_clone
    - 88ef9f18fc ignore lint error on import
    - 25427d845e convert key iterator to list as python 3 wont index an iterator
  - bce50154e5 Merge branch '2017.7' into improve-net-load
  - ba4a62769c Fix trailing spaces
  - 0a47a7acb7 Merge pull request #10 from tonybaloney/gh_44332_clone
    - ba0280e727 linting updates
    - 78b90f3d0c add remaining tests
    - 386c4e5791 add tests for all the getters
- f3d2d1aaa Merge pull request #9 from tonybaloney/gh_44332_clone
  - c63222358b update tests with correct assertions and mock methods on device instance
  - b69c559c52 fix kwargs typo
- edea763f33 Improve the net.load_config function

- **PR #44664**: (mvivaldi) Patch 1 @ 2017-11-27 21:17:20 UTC
  - b6a1ed06b8 Merge pull request #44664 from mvivaldi/patch-1
  - 4551999ec7 Update jinja.py
  - ae13d57307 Update file.py

- **ISSUE #42074**: (mirceaulinic) How to configure static grains for proxy minions (refs: #44549)

- **PR #44549**: (mirceaulinic) Allow proxy minions to load static grains (refs: #44760) @ 2017-11-27 20:57:09 UTC
  - 9ea4ee1479 Merge pull request #44549 from cloudflare/fix-proxy-grains
  - 7b03574ab6 Merge branch '2017.7' into fix-proxy-grains
  - 0320174ea4 Add doc note regarding static grains on proxy minions
  - 509df1a832 Allow proxy minions to load static grains

- **PR #44572**: (Ch3LL) Add watch_in integration test @ 2017-11-27 20:52:31 UTC
  - 5ec7ea0b5 Merge pull request #44572 from Ch3LL/watchin_test
  - 0a54584db8 Merge branch '2017.7' into watchin_test
  - 898e28e6d9 Merge branch '2017.7' into watchin_test
  - 3df0f3fed remove iter for watch_in failure test
  - ac437dd90 add order check and remove iter
  - 5f2bf4f34e Add watch_in integration test
    - c673ac1e pop None

- **PR #44616**: (Ch3LL) Add Non Base Environment salt:// source integration test @ 2017-11-22 16:13:54 UTC
  - d6ccf4bb30 Merge pull request #44616 from Ch3LL/nonbase_test
  - 80b71652e3 Merge branch '2017.7' into nonbase_test
  - c9ba33432e Add Non Base Environment salt:// source integration test

- **PR #44617**: (Ch3LL) Add ssh thin_dir integration test @ 2017-11-22 16:12:51 UTC
  - 3ace5048c8c Merge pull request #44617 from Ch3LL/thindir_ssh
  - 071a1bd65b Merge branch '2017.7' into thindir_ssh

- **PR #44625**: (Ch3LL) Add salt-key -d integration test @ 2017-11-22 03:15:23 UTC
  - 2cd618f99b Merge pull request #44625 from Ch3LL/delete_key_test
  - 443d1e16b Merge branch '2017.7' into delete_key_test

- **ISSUE #44601**: (rallytime) CherryPy 12.0 removed support for "engine.timeout_monitor.on" config option (refs: #44602)

- **PR #44614**: (rallytime) [2017.7] Move PR #44602 forward to 2017.7 @ 2017-11-21 21:21:06 UTC
  - PR #44602: (rallytime) Handle timeout_monitor attribute error for new versions of CherryPy (refs: #44614)
Salt Documentation, Release 3003.3

- 4f30e845ee Merge pull request #44614 from rallytime/44602-2017.7
- 628f015c1b Move TimeoutError check lower down in exception list
- d26df95e4 Handle timeout_monitor/TimeoutError issues for new versions of CherryPy
- 359a59dd64 Add salt-key -d integration test
- 74ededa47 Add ssh thin_dir integration test
  - 4d0806e28c Merge branch '2017.7' into develop2
  - 4d0023115 Fix broken beacons_before_connect feature
  - 98536110d9 Merge branch '2017.7' into 2017.7

**PR #44571:** (rallytime) Back-port #43822 to 2017.7 @ 2017-11-20 19:01:26 UTC
  - PR #43822: (chnrxn) check_result: Correctly check the __extend__ state. (refs: #44571)
  - 136b9e3bc4 Merge pull request #44571 from rallytime/bp-43822
  - f81b89f2d check_result: Correctly check the __extend__ state.

**PR #44588:** (rallytime) Add documentation about logging before modules are loaded @ 2017-11-20 18:43:18 UTC
  - PR #44576: (rallytime) Remove logging from top of napalm util file (refs: #44588)
  - PR #44439: (mirceaulinic) Adapt napalm modules to the new library structure (refs: #44576)
  - b76e459b1 Merge pull request #44588 from rallytime/logging-in-virtual-funcs
  - 901b6221d Add documentation about logging before modules are loaded

**PR #44513:** (rallytime) Back-port #44472 to 2017.7 @ 2017-11-20 16:09:02 UTC
  - PR #44472: (mephi42) nova: fix endpoint URL determination in _v3_setup() (refs: #44513)
  - a804b73c3 Merge pull request #44413 from rallytime/bp-44472
  - 60e04e15d3 nova: fix endpoint URL determination in _v3_setup()

**PR #44596:** (roaldnefs) Fixed Mattermost module documentation @ 2017-11-19 23:30:53 UTC
  - f55b9d0da63 Merge pull request #44596 from roaldnefs/fix-mattermost-doc
  - 549f4806ce Add documentation in Mattermost module

**PR #44528:** (tkwilliams) INFRA-5978 - fix for https://github.com/saltstack/salt/issues/44290 @ 2017-11-17 17:35:44 UTC
  - f84a25ab1 Merge pull request #44528 from bodhi-space/infra5978
  - ba1d5f75eb Merge branch '2017.7' into infra5978
  - 02169b24e9 INFRA-5978 - pylint / whitespace fix
  - c2210a4f7c INFRA-5978 - fix for https://github.com/saltstack/salt/issues/44290

**PR #44537:** (Ch3LL) Add multiple salt-ssh state integration tests @ 2017-11-17 17:17:48 UTC
  - 7f2dd0382c Merge pull request #44537 from Ch3LL/ssh_highlow
  - b98df6de24 Add known_hosts_file to salt-ssh opts_pkg in wfunccs
  - 913edc699 Add multiple salt-ssh state integration tests

**PR #44576:** (rallytime) Remove logging from top of napalm util file (refs: #44588) @ 2017-11-17 14:55:13 UTC
  - PR #44439: (mirceaulinic) Adapt napalm modules to the new library structure (refs: #44576)
- 1975fb41bc Merge pull request #44576 from rallytime/remove-napalm-logging
- eb91af999e Remove logging from top of napalm util file

- **PR #44575:** (Ch3LL) Add service.running integration state test @ 2017-11-16 22:27:57 UTC
  - c2c3048f46 Merge pull request #44575 from Ch3LL/ser_run_test
  - 7536150567 Add service.running integration state test

- **PR #44518:** (twangboy) Pass root_dir to the win_verify_env function @ 2017-11-16 20:57:49 UTC
  - 24b1d7af31 Merge pull request #44518 from twangboy/win_fix_verify_env
  - 47114fdb30 Pass root_dirs to the win_verify_env function
    - 3385f7faf3 fix pylint
    - a2af3cb857 Include client mixin globals in scheduler for runner modules

- **PR #44551:** (mirceaulinic) Removes proxy minions false alarms and security risks @ 2017-11-16 15:09:14 UTC
  - 1643bb7fd4 Merge pull request #44551 from cloudflare/annoying-tmpnam
  - ce1882943d Use salt.utils.files.mkstemp() instead
  - 6689bd3b2d Dont use dangerous os.tmpnam
  - 2d617b0bc Fx2 proxy minion: clean return, like all the other modules

- **ISSUE #30454:** (favoretti) Using yaml serializer inside jinja template results in unicode being prepended by "!!python/unicode" (refs: #30481, #42064, #38554)

- **PR #44541:** (terminalmage) Fix test to reflect changes in YAML dumper @ 2017-11-15 13:23:58 UTC
  - PR #42064: (The-Loeki) utils.jinja: use utils.yamlldumper for safe yaml dumping (refs: #44541)
  - PR #38554: (multani) Fix YAML deserialization of unicode (refs: #42064)
  - PR #30481: (basepi) Add yaml_safe jinja filter (refs: #38554)
  - 60083ac27b Merge pull request #44541 from terminalmage/fixed-yaml-test
  - 5bbf54084b Merge branch '2017.7' into fix-yaml-test

- **PR #44538:** (gtmanfred) Fix up some test kitchen stuff @ 2017-11-14 20:36:56 UTC
  - 5c123eb551 Merge pull request #44538 from gtmanfred/kitchen
  - 3e04d2d44c use kitchen-sync for copying files
  - 9bc70fd31b back up to 2017.7.1 for kitchen tests
  - 3b93ea058b ubuntu 14 and centos 6 should not have py3 tests
  - 958e1aeb8d Fix test to reflect changes in YAML dumper

- **ISSUE #30454:** (favoretti) Using yaml serializer inside jinja template results in unicode being prepended by "!!python/unicode" (refs: #30481, #42064, #38554)

- **PR #42064:** (The-Loeki) utils.jinja: use utils.yamlldumper for safe yaml dumping (refs: #44541) @ 2017-11-13 19:45:14 UTC
  - PR #38554: (multani) Fix YAML deserialization of unicode (refs: #42064)
  - PR #30481: (basepi) Add yaml_safe jinja filter (refs: #38554)
  - 27a7b607b1 Merge pull request #42064 from The-Loeki/jinja_unicode
  - b1cf43c02d Merge branch '2017.7' into jinja_unicode
- 8c2ac58523 Merge branch '2017.7' into jinja_unicode
- 57dc6226a2 Merge branch '2017.7' into jinja_unicode
- 0a8346b585 Merge branch '2017.7' into jinja_unicode
- 393fe061b2 jinja utils: yaml import still necessary
- 3c9130f9f0 utils.jinja: use utils.yamldumper for safe yaml dumping

- **PR #43692**: (mirceaulinic) Addressing a bug in the network find runner @ 2017-11-13 19:42:24 UTC
  - b1f14c7518 Merge pull request #43692 from cloudflare/fixed-net-runner
  - 02ffbf438e Merge branch '2017.7' into fixed-net-runner
  - 4b2f791bd2 Check if addr is short IPv6
  - 765504c137 Add all the possible keys to the result

- **ISSUE #42393**: (The-Loeki) pillar_env ignored with Salt Master pillar_cache: True (refs: #43689)

- **ISSUE #36153**: (krcroft) Pillarenv doesn’t allow using separate pillar environments (refs: #43689)

- **PR #43689**: (The-Loeki) make cached pillar use pillarenv rather than saltenv @ 2017-11-13 19:30:00 UTC
  - 1e9a5bd5f Merge pull request #43689 from The-Loeki/cached_pillarenv
  - 395c0424d Merge branch '2017.7' into cached_pillarenv
  - 60e001733b make cached pillars use pillarenv rather than saltenv

- **PR #43837**: (twangboy) Fix `unit.states.test_archive` for Windows @ 2017-11-13 19:12:19 UTC
  - f9b273a894 Merge pull request #43837 from twangboy/win_unit_test_archive
  - 5505a8819 Merge branch '2017.7' into win_unit_test_archive
  - b1df69c3c8 Format patching with statements for easier reading
  - ba2f2eb788 Add Erik’s changes
  - 4e4f13e4b Fix `unit.states.test_archive` for Windows

- **PR #44507**: (Ch3LL) Increase sleep timeout for pillar refresh test @ 2017-11-13 18:29:06 UTC
  - c9a81728a0 Merge pull request #44507 from Ch3LL/pillar_time
  - ffa4bbdcdc Increase sleep timeout for pillar refresh test

- **PR #44302**: (morganwillcock) Fix traceback and incorrect message when resolving an unresolvable SID @ 2017-11-13 18:19:01 UTC
  - cffea5ac71 Merge pull request #44302 from morganwillcock/badsid
  - f3af10ed33 Merge branch 'badsid' of https://github.com/morganwillcock/salt into badsid
    - 9573f3bb3b Merge branch '2017.7' into badsid
    - facb2cd16 Merge branch '2017.7' into badsid
  - c7cf5f67f0 Format pywintypes.error
  - 957daabb67 Fix traceback and incorrect message when resolving an unresolvable SID

- **PR #44439**: (mirceaulinic) Adapt napalm modules to the new library structure (refs: #44576) @ 2017-11-13 17:43:24 UTC
  - 32fc952000 Merge pull request #44439 from cloudflare/fixed-napalm
  - f45378af04 Lint: remove extra spaces
- c6a38258a3 Add napalm>2.0.0 note and update URLs
- 52f73835b8 Adapt napalm modules to the new library structure

- **PR #44457**: (twangboy) Remove wmi monkeypatching @ 2017-11-13 17:38:52 UTC
  - ebbe5949e6a Merge pull request #44457 from twangboy/win_remove_wmi_monkeypatching
  - 6c87e2956e Add back the setup_loader_modules function
  - 20273e3697 No need for setup_loader_modules since we're actually importing wmi
  - 8c107873cd Remove wmi monkeypatching

- **PR #44490**: (Ch3LL) Enable test_deploy ssh test @ 2017-11-13 17:12:48 UTC
  - 1da1a97d7 Merge pull request #44490 from Ch3LL/ssh_ping
  - e952cd6712 Enable test_deploy ssh test

- **PR #44491**: (Ch3LL) Add salt-ssh raw integration tests @ 2017-11-13 15:47:12 UTC
  - 18624d6798 Merge pull request #44491 from Ch3LL/ssh_raw
  - 3de8673417 change class name to raw
  - 308596ac8d Add salt-ssh raw integration tests

- **PR #44492**: (twangboy) Fix unit.utils.test_cloud for Windows @ 2017-11-13 15:44:31 UTC
  - aa17bfa8e Merge pull request #44492 from twangboy/win_skip_mode_check
  - 2f30ad93b1 Skips mode check in Windows

- **PR #44484**: (Ch3LL) Add orchestration tests when target exists or not @ 2017-11-10 19:24:22 UTC
  - 5b95495e7 Merge pull request #44484 from Ch3LL/orch_test
  - f3eced76e Add orchestration tests when target exists or not

- **PR #44480**: (Ch3LL) Add integration pillar command line test @ 2017-11-10 19:14:31 UTC
  - 62e42ca6a6 Merge pull request #44480 from Ch3LL/override_pillar
  - 12fed1d4d8 Add integration pillar command line test

- **PR #44317**: (Ch3LL) Add state tests and state request system to salt-ssh @ 2017-11-10 18:28:43 UTC
  - cc08ad2edc Merge pull request #44317 from Ch3LL/ssh_test
  - 46bce3bd5e add additional parser argument for ssh integration tests
  - e9231430b5 remove logic similar to cloud/proxy tests
  - c731eb8e6a add ssh dir to test runner when --ssh-tests set
  - 8089a885c2 add wipe function to other run_ssh method
  - 200b12ae6a change versionadded salt version
  - e3eb85e9b3 fix comment and variables
  - fad886a7 Add state tests and state request system to salt-ssh

- **PR #44478**: (rallytime) [2017.7] Merge forward from 2016.11 to 2017.7 @ 2017-11-10 18:00:56 UTC
  - 6669035a30 Merge pull request #44478 from rallytime/merge-2017.7
  - 9fcc2a70b5 Merge branch '2016.11' into '2017.7'
    - a66cd67d15 Merge pull request #44260 from seanjnkns/issue-39901
**PR #44444:** (twangboy) LGPO: Issue with Maximum Password Age @ 2017-11-10 17:26:53 UTC
- 60719d0683 Merge pull request #44444 from twangboy/win_lgpo_non_zero
- de6b394445 Remove unneeded functions
- ee0914f7e9 Fix some lint, remove unnecessary function
- d52a7c12db Fix typo in PasswordComplexity policy
- 44f8f43812 Fix problem where 0 isn’t 0

**PR #44467:** (twangboy) Fix *unit.test_doc* for Windows @ 2017-11-10 15:21:58 UTC
- 4f3a79df07 Merge pull request #44467 from twangboy/win_fix_test_doc
- 0a9e862bf4 Use regex to split

**PR #44443:** (Ch3LL) Add salt-ssh grains.items test @ 2017-11-09 00:42:11 UTC
- ff4f13877f Merge pull request #44443 from Ch3LL/ssh_grains
- 5d1a9af4b5 Add salt-ssh grains.items test

**PR #44429:** (Ch3LL) Fix orch doc from pillat.get to pillar.get @ 2017-11-07 23:06:38 UTC
- dcdf2d4c90 Merge pull request #44429 from Ch3LL/orch_doc
- 38ca5520f0 Fix orch doc from pillat.get to pillar.get

**ISSUE #42568:** (clallen) Orchestration runner doesn’t populate __pillar__ based on pillarenv (refs: #43817)

**PR #43817:** (The-Loeki) Orchestrate runner forces pillarenv and saltenv to None @ 2017-11-07 06:00:16 UTC
- 62e4addef8 Merge pull request #43817 from The-Loeki/orch-pillarenv
- 3fd652623c orchestrate runner: retain default envs

**PR #44408:** (rallytime) [2017.7] Merge forward from 2016.11 to 2017.7 @ 2017-11-06 15:53:00 UTC
- 9e4708b7b9 Merge pull request #44408 from rallytime/merge-2017.7
- edb8d5fc2b Merge branch ‘2016.11’ into ‘2017.7’
- 5e289f42ba Merge pull request #44383 from gtmanfred/2016kitchen
  * b65f4ea4ea switch salt-jenkins over to saltstack
  * cab54e34b5 Merge pull request #44173 from twangboy/win_system_docs
    * 8e111b413d Fix some of the wording and grammer errors
    * a12b5ae41 Use google style docstrings
- 7aaea1d179 Merge pull request #44304 from jfindlay/cron_id
  * cc038c5bec states.cron identifier defaults to name
- e4dbbd734 Merge pull request #44322 from rossengeorgiev/saltssh-docs-update
  * b18f2e5a6d fix program name and description for --static

4860 Chapter 30. Release Notes
5b10918f02 updated CLI docs for salt-ssh

- **PR #44358**: (The-Loeki) Kubernetes client certificate file usage fix @ 2017-11-03 21:51:27 UTC
  - b11da0d2da Merge pull request #44358 from The-Loeki/kube-client-cert-file
  - 35a8b0bb38 Kubernetes client certificate file usage fix

- **PR #44347**: (rallytime) [2017.7] Merge forward from 2016.11 to 2017.7 @ 2017-11-03 21:48:21 UTC
  - 1974e52c06 Merge pull request #44347 from rallytime/merge-2017.7
  - 9bad04b94b Merge branch '2016.11' into '2017.7'
    - 4e6f09e3eb Merge pull request #44345 from gtmanfred/2016kitchen
      - 79b8b2d0bf remove binding
    - 209847c8c2 Merge pull request #44342 from gtmanfred/2016kitchen
      - c50508f0b7 render template files platforms.yml and driver.yml
    - 1be65224cb Merge pull request #44339 from corywright/issue-44336-fix-archive-tar-docs-2016-11
      - 9c1c35a59f Remove leading dash (-) from options in archive.tar documentation
    - bebc33daf5 Merge pull request #44295 from HeinleinSupport/issue44272
      - f972715a45 fixes issue #44272
    - e7ca9f8407 Merge pull request #44286 from gtmanfred/2016.11
      - 193e715e37 use our git repo for kitchen-salt

- **PR #44364**: (Ch3LL) Include disk size check for test_spm_build_big_file test @ 2017-11-01 13:57:24 UTC
  - aea9fa115 Merge pull request #44364 from Ch3LL/fix_size_test
  - 952d6bea4 Merge pull request #44364 from Ch3LL/fix_size_test

- **ISSUE #44239**: (boltronics) --progress fails when hosts routed via syndic (refs: #44273)

- **PR #44273**: (DmitryKuzmenko) Workaround progressbar failure if minion is behind syndic. @ 2017-10-31 17:07:17 UTC
  - 609de9367a Merge pull request #44273 from DSRCorporation/bugs/44239_syndic_progress
  - e1a7605623 Workaround progressbar failure if minion is behind syndic.

- **PR #44350**: (gtmanfred) update salt-jenkins repo to 2017.7 @ 2017-10-30 21:31:30 UTC
  - eef6d6fa58 Merge pull request #44350 from gtmanfred/2017.7
  - cf71e3d9f2 Update salt-jenkins repo to 2017.7

- **PR #44346**: (gtmanfred) remove binding from erb template rendering (2017.7) @ 2017-10-30 20:57:19 UTC
  - d586b3bf97 Merge pull request #44346 from gtmanfred/2017.7
  - bf577c3dbb remove binding

- **PR #44343**: (gtmanfred) render template files platforms.yml and driver.yml (2017.7) @ 2017-10-30 20:04:22 UTC
  - 5474ac6658 Merge pull request #44343 from gtmanfred/2017.7
  - ec24fbc0ac2 render template files platforms.yml and driver.yml

- **ISSUE #44336**: (corywright) Docs for archive.tar should not use leading dash for tar options (refs: #44339, #44338)
Salt Documentation, Release 3003.3

- **PR #44338**: (corywright) Remove leading dash from options in archive.tar docs (2017.7 and develop) @ 2017-10-30 18:59:33 UTC
  - 6e2a74c18b Merge pull request #44338 from corywright/issue-44336-fix-archive-tar-docs-2017-7-and-newer
  - 49b0abc284 Remove leading dash (-) from options in archive.tar documentation

- **PR #44265**: (Ch3LL) Add service.status integration test @ 2017-10-30 15:00:12 UTC
  - 71923bed97 Merge pull request #44265 from Ch3LL/service_test
  - 716aabc0bf Merge branch '2017.7' into service_test
  - dd5c823210 remove skipIf import
  - ff92f31cbe remove skipif for docker
  - c13f37eee4 change service name depending on os
  - 980c43ebc9 change skip message check to docker
  - 3955537609 change skip if check to docker
  - aa8875a0e2 change service name to docker
  - 654071028b change service to crond
  - 7911b4b3eb Add service.status integration test

- **PR #44294**: (nasenbaer13) Boto asg fixes, Backport of #43858 @ 2017-10-30 14:48:52 UTC
  - PR #43858: (nasenbaer13) Boto_ASG fixes for scaling policy rate limiting and tag conversion (refs: #44294)
  - 8ae9769fbf Merge pull request #44294 from eyj/boto_asg
  - f5ad6aeb70 Debug log added when throttled by API
  - c05d9aeced Encode tags as utf-8, retry policy readout

- **PR #44312**: (rallytime) Back-port #44287 to 2017.7 @ 2017-10-30 14:25:56 UTC
  - PR #44287: (jf) Fix utils.files.guess_archive_type to recognize the "tbz" extension as well (refs: #44312)
  - 68a9beb9f0 Merge pull request #44312 from rallytime/bp-44287
  - 4d02e61f97 Merge branch '2017.7' into bp-44287
  - ba0eaae95e Fix utils.files.guess_archive_type to recognize the "tbz" extension as well (also tidy up list of extensions)

- **ISSUE #44258**: (oarmstrong) docker_container.running recreates containers with multiple links (refs: #44262)

- **PR #44311**: (rallytime) Back-port #44262 to 2017.7 @ 2017-10-30 14:25:35 UTC
  - PR #44262: (oarmstrong) docker_container.running sort list of links (refs: #44311)
  - b8854e27c0 Merge pull request #44311 from rallytime/bp-44262
  - 72d617cfe Merge branch '2017.7' into bp-44262
  - ae34a15503 docker_container.running sort list of links

- **PR #44314**: (gtmanfred) update .kitchen.yml to run py3 tests too @ 2017-10-30 14:23:15 UTC
  - 48df79ef77 Merge pull request #44314 from gtmanfred/2017.7
  - 54265769c4 Merge branch '2017.7' into 2017.7
• PR #44316: (rallytime) Fix lint failure on 2017.7 branch @ 2017-10-27 18:36:08 UTC
  - dbc5e224e9 Merge pull request #44316 from rallytime/fix-lint
  - 6d2490f6a0 Fix lint failure on 2017.7 branch
  - 39262b625e update .kitchen.yml to run py3 tests too
• PR #44279: (rallytime) [2017.7] Merge forward from 2016.11 to 2017.7 @ 2017-10-27 16:17:19 UTC
  - b2b0c770a4 Merge pull request #44279 from rallytime/merge-2017.7
  - 8237f45a46 Add print_function to __future__ import list
  - 055b0701de Lint fix from sloppy merge conflict resolution
  - 1c3cb5c6a4 Merge branch '2016.11' into '2017.7'
    * 8a1ea165af Merge pull request #44259 from gtmanfred/2016.11
      - 56a3ad8f68 fix pylint comments
      - 4add66db1 add comment to Gemfile and move copyartifacts
      - b4c87eb57 fix pylint
      - 392fd4f837 try newest salttesting
      - 79251287d0 add logging
      - 38963d5a82 use transport if not set in state_file
      - 10e309a64f which vagrant should go to stderr
      - 9307564de0 fix output columns
      - 2da22f87e1 test opennebula
      - 9f38f16905 add opennebula to Gemfile
      - 7465f9b27a add script for copying back artifacts
      - 255118cfd7 run tests with kitchen
    * 9d6bc8509b Merge pull request #44268 from twangboy/win_fix_lgpo_typo
      - a6a4c10a77 Fix typo
    * 0beb65a283 Merge pull request #44269 from terminalmage/fix-log-message
      - bc9cd65496 Fix log message in salt.utils.gifs
    * 304dd2529d Merge pull request #44160 from gtmanfred/directory
      - a7d3d668f4 missed removing changes in the next test
      - ac0b5ec440 fix test
      - d3d00c3c622 add changes to test return
    * e10395483d Merge pull request #44205 from rallytime/bp-44177
      - b9940f8521 Fixing default redis.host in documentation
• PR #44291: (Ch3LL) add saltutil.refresh_pillar test @ 2017-10-27 15:19:43 UTC
  - bd5b9d0a4 Merge pull request #44291 from Ch3LL/pillar_test
  - 34e2955445 add saltutil.refresh_pillar test
• PR #44267: (twangboy) Fix type and Py3 issues in LGPO module @ 2017-10-27 14:27:50 UTC
**PR #44285**: (Ch3LL) add spm integration tests for remove and build @ 2017-10-26 21:20:10 UTC
- e16707c403 Merge pull request #44285 from Ch3LL/all_spm
- f77f3e6a3 add skipif logic for fallocate cmd
- 03b5c4bc6d add spm integration tests for remove and build

**PR #44301**: (twangboy) Fix test_pydsl on Windows @ 2017-10-26 21:14:21 UTC
- 6392896a22 Merge pull request #44301 from twangboy/win_fix_test_pydsl
- 6db23757bc Fix test_pydsl on Windows

**PR #44293**: (UtahDave) Fix documentation grammar and spelling errors @ 2017-10-26 13:05:31 UTC
- 8787d02688 Merge pull request #44293 from UtahDave/unittest_docs
- c919648ab4 Fix documentation grammar and spelling errors

**PR #44248**: (Ch3LL) SPM tests: use _spm_build_files method during test_build setup @ 2017-10-25 19:45:03 UTC
- 6e3374c1a Merge pull request #44248 from Ch3LL/spm_create_repo
- 0a387c2ecd fix pylint
- f383f05a93 Add SPM create_repo integration test

**PR #44253**: (Ch3LL) Add multiple spm integration tests @ 2017-10-25 13:36:03 UTC
- bd75be24ca Merge pull request #44253 from Ch3LL/spm_install
- 9e2e785034 add spm tests to test runner
- 4729cd32b Add multiple spm integration tests

**PR #44254**: (twangboy) Fix unit.modules.test_win_groupadd for Windows @ 2017-10-25 13:33:40 UTC
- 75ee1ebc50 Merge pull request #44254 from twangboy/win_fix_test_win_groupadd
- 609361bf48 Fix some lint errors
- 1f44d8d5e6 Document helper functions
- b0caec320e Move _get_all_groups up to the top
- 7a3ff9387d Mock the rest of the tests
- 5ce14df82c Change how members are retrieved in win_groupadd
- 6ab82394be Set up mocking

**PR #44266**: (Ch3LL) Add state, grains and service proxy tests @ 2017-10-25 13:08:50 UTC
- 4e23fa63bb Merge pull request #44266 from Ch3LL/proxy_tests
- e5701b472d Add state, grains and service proxy tests

**ISSUE #43187**: (mirceaulinic) How to point from an execution module that a certain function failed (refs: #44244)

**PR #44244**: (mirceaulinic) Add explicit non-zero retcode to napalm config functions @ 2017-10-24 09:23:40 UTC
• PR #44228: (rklaren) Fixes #44227, make salt-cloud/libvirt cleanup after errors more robust @ 2017-10-23 17:09:35 UTC
  - 195b225540 Merge pull request #44228 from rklaren/fix-salt-cloud-libvirt-clean-up-after-errors
  - 7917d1e61e Incorporate review comments.
  - 3a10b6af1 Fixes #44227, make salt-cloud/libvirt cleanup after errors more robust

• ISSUE #19532: (stolendog) salt-ssh running git clone with not root user (refs: #43769)

• ISSUE #10582: (mtorromeo) Git ssh helper may be unable run (refs: #43769)

• PR #44008: (mtorromeo) Backport #43769 to 2017.7 @ 2017-10-23 14:19:57 UTC
  - PR #43769: (mtorromeo) Copy git ssh-id-wrapper to /tmp only if necessary (Fixes #10582, #19532) (refs: #44008)
  - 01e7bab990 Merge pull request #44008 from mtorromeo/git-noexec-fix
  - a7a841d9d2 Merge branch '2017.7' into git-noexec-fix
  - d177240cfc Merge branch '2017.7' into git-noexec-fix
  - a63e6aca963 Copy git ssh-id-wrapper to /tmp only if necessary (Fixes #10582, Fixes #19532)

• PR #44202: (rallytime) [2017.7] Merge forward from 2016.11 to 2017.7 @ 2017-10-23 14:18:30 UTC
  - 85c0e6493f Merge pull request #44202 from rallytime/merge-2017.7
  - 99ff7a5c12 Merge branch ‘2016.11’ into ‘2017.7’
    * 09ddf0c08f Merge pull request #44167 from garethgreenaway/44140_debian_ip_fixes
      * 5f7555846f When looping through the various pre, post, up and down commands put them into the interface dict using the right internet family variable.

      - 881f1822f2 Format fix code example local returner doc

• **ISSUE #43918:** (mwerickso) subset argument does not work with saltmod.state (refs: #43933)

• **PR #43933:** (gtmanfred) if expect_minions is passed use that instead @ 2017-10-18 16:43:39 UTC
- 0b47eb7242 Merge pull request #43933 from gtmanfred/2017.7
- 272dc6ba5 add inline comment about popping expect_minions
- b615ce1762 if expect_minions is passed use that instead

- **PR #44081**: (skizunov) Windows: Fix usage of pkgrepo state @ 2017-10-18 16:16:46 UTC
  - 36da1a7fac Merge pull request #44081 from skizunov/develop3
  - 351d16840b Move strip_uri to salt/utils/pkg/deb.py
  - f54c7a6f01 Windows: Fix usage of pkgrepo state

- **PR #43913**: (twangboy) Fix unit.templates.test_jinja for Windows @ 2017-10-17 21:09:05 UTC
  - afcaa0c591 Merge pull request #43913 from twangboy/win_fix_test_jinja
  - a4e2d8059d Fix unit.templates.test_jinja for Windows

- **PR #43917**: (twangboy) Fix unit.test_pillar for Windows @ 2017-10-17 21:06:46 UTC
  - fc5754c6a1 Merge pull request #43917 from twangboy/win_unit_test_pillar
  - 00dbba5712 Fix unit.test_pillar for Windows

- **PR #44133**: (cachedout) Fix typos in parallel states docs @ 2017-10-17 15:24:19 UTC
  - 6252f82f58 Merge pull request #44133 from cachedout/fix_parallell_docs
  - 8d1c1e21f0 Fix typos in paralell states docs

- **PR #44135**: (timfreund) Insert missing verb in gitfs walkthrough @ 2017-10-17 14:32:13 UTC
  - 0d3f5db867 Merge pull request #44135 from timfreund/insert_missing_verb
  - 9557504b75 Insert missing verb in gitfs walkthrough

- **PR #44055**: (nasenbaer13) Activate jid_queue also for SingleMinions to workaround (Backport) @ 2017-10-16 20:14:52 UTC
  - **PR #43860**: (nasenbaer13) Activate jid_queue also for SingleMinions (occurs on reconnect) (refs: #44055)
  - a9700f6061 Merge pull request #44055 from eyj/jid_queue
  - 4bd5bb6b6 Merge branch '2017.7' into jid_queue
  - facef227d Merge branch '2017.7' into jid_queue
  - 2fedec6bb Merge branch '2017.7' into jid_queue
  - 255aa94c6d4 Activate jid_queue also for SingleMinions to workaround 0mq reconnection issues

- **PR #44125**: (rallytime) [2017.7] Merge forward from 2017.7.2 to 2017.7 @ 2017-10-16 20:02:25 UTC
  - 2fba45cd3f Merge pull request #44125 from rallytime/merge-2017.7
  - c4ae6b50 Merge branch '2017.7.2' into '2017.7'
    - 5d719a2219 Merge pull request #44027 from rallytime/bp-44012
    - f7824e41f3 Don't allow path separators in minion ID
    - 44060de9c1 Do not allow IDs with null bytes in decoded payloads

- **ISSUE #43307**: (marek-knappe) Filesystem creation is failing on newly created LV (refs: #44029)

- **PR #44029**: (msummers42) addresses issue #43307, disk.format_ to disk.format (refs: #44131) @ 2017-10-16 19:59:20 UTC
  - 68974aa74d Merge pull request #44029 from msummers42/2017.7
16e1c1dfc8 fixed test addressing issue #43307, disk.format_ to disk.format
3d597db51c Merge branch '2017.7' into 2017.7
18fb0be96a addresses issue #43307, disk.format_ to disk.format

**PR #44079**: (skizunov) opkg: Fix usage with pkgrepo.managed @ 2017-10-16 19:58:13 UTC
- d0bbe65fba Merge pull request #44079 from skizunov/develop2
- 0614d1af30 Merge branch '2017.7' into develop2
- b6b12fe495 opkg: Fix usage with pkgrepo.managed

**PR #44090**: (pratik705) Fix create_attach_volumes salt-cloud action for gcp @ 2017-10-16 19:04:22 UTC
- 22a8253595 Merge pull request #44090 from pratik705/fixed-create_attach_volumes_salt-cloud_action-GCP
- 3eef334c5 Fixed "create_attach_volumes" salt-cloud action for GCP

**PR #44121**: (benediktwerner) Fixed code snippet in unit testing documentation @ 2017-10-16 18:28:36 UTC
- 888e5f51a2 Merge pull request #44121 from benediktwerner/2017.7
- 1319c822bd Fixed code snippet in unit testing doc

**PR #44098**: (twangboy) Return multiprocessing queue in LogSetupMock class @ 2017-10-16 18:14:30 UTC
- 9fe9d7843 Merge pull request #44098 from twangboy/win_mock_test_parsers
- cc43ca27af Return multiprocessing queue in LogSetupMock class

**PR #44118**: (rallytime) [2017.7] Merge forward from 2016.11 to 2017.7 @ 2017-10-16 17:01:38 UTC
- 0ee04ef1d Merge pull request #44118 from rallytime/merge-2017.7
- bbec47ab8c Merge branch '2016.11' into '2017.7'
  - c960ca32c2 Merge pull request #44092 from techhat/awsunicode
    - bbd9db4d00 One more encoding
    - 0e8b325667 Apparently __salt_system_encoding__ is a thing
    - 1e7211838d Use system encoding
    - 1af21bbe5e Made sure that unicoded data is sent to sha256()
  - d89c317d96 Merge pull request #44021 from whiteinge/cpstats-attribute-error
    - bf14e5f578 Also catch cpstats AttributeError for bad CherryPy release ~5.6.0
  - bbdabe242a Merge pull request #44025 from dayid/lover_typo
    - 385980c21a Merge branch '2016.11' of https://github.com/saltstack/salt into lover_typo
    - 266dc00a23 Typo correction of lover to lower
  - d8f3891a5e Merge pull request #44030 from rallytime/merge-2016.11
    - 53eaf0d75c Merge branch '2016.3' into '2016.11'
    - 64fd839377 Merge pull request #44010 from Ch3LL/2016.3.7_follow_up
    - 9a00302cd8 fix 2016.3.7 release notes merge conflict
    - 63da1214db Do not allow IDs with null bytes in decoded payloads
    - ee792581fc Don't allow path separators in minion ID
Salt Documentation, Release 3003.3

- 8aab65c718 fix 2016.3.7 release notes merge conflict
- bd73dc02c Merge pull request #43977 from Ch3LL/3.8_sec
- 5fb3f5f6b1 Add Security Notes to 2016.3.8 Release Notes

- PR #44099: (twangboy) Skip Master, Minion, and Syndic parser tests @ 2017-10-16 16:07:00 UTC
  - 28fa097b9b Merge pull request #44099 from twangboy/win_skip_test_parsers
  - caf086c05a Skip Master, Minion, and Syndic parser tests

- PR #44106: (roaldnefs) Fix mattermost returner documentation @ 2017-10-16 13:12:23 UTC
  - dbf112ead7 Merge pull request #44106 from roaldnefs/fixedoc-mattermost_returner
  - b3761a0401 Fix doc indentation in mattermost_returner

- PR #44054: (nasenbaer13) Backport of missing delete_on_termination @ 2017-10-13 15:45:25 UTC
  - PR #43859: (nasenbaer13) Add missing delete_on_termination passthrough. Adapt docs. (refs: #44054)
  - fd2c51b76c Merge pull request #44054 from eyj/boto_lc
  - 34d4629a64 Merge branch '2017.7' into boto_lc
  - 9ef63526a Adapted documentation of delete_on_termination parameter
  - eb2b6f047b Add missing delete_on_termination passthrough. Adapt docs.

- PR #44076: (Ch3LL) Add spm shell tests @ 2017-10-13 14:32:19 UTC
  - b61ed96268 Merge pull request #44076 from Ch3LL/spm_test
  - d2e91c33bd Add spm shell tests

- PR #44051: (twangboy) Fix some documentation formatting issues in the win_dacl state @ 2017-10-12 15:40:17 UTC
  - e38f313ac0 Merge pull request #44051 from twangboy/win_fix_docs_dacl
  - 377d6b6171 Fix some docs in the win_dacl state module

- PR #44066: (Ch3LL) Add Known CherryPy Issue to 2017.7.2 Release Notes @ 2017-10-12 15:18:25 UTC
  - a85837d72b Merge pull request #44066 from Ch3LL/cherry_release
  - 8e597fcce9 Add Known CherryPy Issue to 2017.7.2 Release Notes

- ISSUE #43643: (doublez13) salt-ssh: multiple targets fails after upgrade to 2017.7 (refs: #43889)

- ISSUE #43449: (ecgg) salt-ssh -L with hosts down or unreachable returns wrong results (refs: #43889)

- PR #43889: (CorvinM) Fix issue with using roster_defaults with flat or cloud rosters. @ 2017-10-11 23:22:11 UTC
  - fcab77ac7b Merge pull request #43889 from CorvinM/issue43449
  - fefd28d896 Add futureproofing to roster_defaults to support roster dictionary options
  - aabe76b6f8 Fix issue with using roster_defaults with flat or cloud rosters. fixes #43449 fixes #43643

- PR #44031: (rallytime) [2017.7] Merge forward from 2016.11 to 2017.7 @ 2017-10-11 22:03:31 UTC
  - 3ad1c6d1d9 Merge pull request #44031 from rallytime/merge-2017.7
  - 1d4a6c3949 Lint: Fixup undefined variable errors
  - 788ad0609a Merge branch '2016.11' into '2017.7'
    - 0dbf41e79e Merge pull request #44011 from Ch3LL/2016.11.7_follow_up
- c0149101c0 Do not allow IDs with null bytes in decoded payloads
- 19481423dd Don’t allow path separators in minion ID
- d61300df20 Merge pull request #44023 from Ch3LL/11.9rn
- 7f9015eb41 Add 2016.11.9 Release Note File
- 9ff53bf63a Merge pull request #44019 from benediktwerwer/2016.11
  - bc53598027 Fixed spelling mistake in salt_bootstrap tutorial
  - 6c30344824 Added missing tutorial docs to the tutorial index
- 364523f5f8 Merge pull request #43955 from meaksh/2016.11-fix-2291
  - a81b78381b Merge branch '2016.11' into 2016.11-fix-2291
  - 44bc91bb98 Enable ‘--with-salt-version’ parameter for setup.py script
- fec714b91d Merge pull request #43962 from bobrik/kmod-built-in
  - 95ab901553 Require that bindpw be non-empty if auth.ldap.anonymous=False
  - 9df3d91d8f Release notes blurb for change to bindpw requirements
- e9dfda2177 Merge pull request #43991 from Ch3LL/3.8_sec_2
  - 1977df8462 Add Security Notes to 2016.3.8 Release Notes
- 2346d2691e Merge pull request #43968 from rossengeorgiev/fixed-zenoss-prod_state
  - e6d31c1ea6 fix zenoss state module not respecting test=true
- 8d56a5ac45 Merge pull request #43776 from Ch3LL/2016.11.8_docs
  - f72bc00000 [2016.11] Bump latest and previous versions
- 21bf71c3f5 Merge pull request #43976 from Ch3LL/11.8_sec
  - f0c3184288 Add Security Notes to 2016.11.8 Release Notes
- 1d5597ab5b Merge pull request #43973 from terminalmage/fixed-grains.has_value
  - bf45ae6e6a Fix grains.has_value when value is False
- 9ac3f2ca7b Merge pull request #43888 from rallytime/bp-43841
  - 87d67608a add -n with netstat so we don’t resolve
- f880ac4c08 Merge pull request #43916 from dereckson/fixed-typo-cloud-scaleway
  - 15b88a9f4 Fix typo in salt-cloud scaleway documentation
- PR #44045: (isbm) Bugfix: always return a string “list” on unknown job target type. @ 2017-10-11 21:58:12 UTC
  - 5db1e8c6ca Merge pull request #44045 from isbm/isbm-tgttype-fix-2017-port
  - 471ff35c2f Bugfix: always return a string “list” on unknown job target type.
- ISSUE #43949: (arthurlogilab) [logger] [sentry] KeyError: ‘SENTRY_PROJECT’ (refs: #43950)
- PR #44026: (rallytime) Back-port #43950 to 2017.7 @ 2017-10-11 15:27:49 UTC
  - PR #43950: (arthurlogilab) [log/sentry] avoid KeyError: ‘SENTRY_PROJECT’ (refs: #44026)
  - 6c87fd5sec Merge pull request #44026 from rallytime/bp-43950
- a37e0bad62 [log/sentry] avoid KeyError: 'SENTRY_PROJECT'

- **PR #44012**: (Ch3LL) Security Fixes for 2017.7.2 (refs: #44027) @ 2017-10-10 20:04:08 UTC
  - 369ee8a132 Merge pull request #44012 from Ch3LL/2017.7.1_follow_up
  - 92e05c1fc0 Don’t allow path separators in minion ID
  - 70133aa305 Do not allow IDs with null bytes in decoded payloads

- **PR #44024**: (Ch3LL) Add 2017.7.3 Release Note File @ 2017-10-10 20:03:12 UTC
  - 4fe029a0ab Merge pull request #44024 from Ch3LL/7.3rn

- **ISSUE #43997**: (unthought) gce cloud provider breaks for make_master: True (refs: #43998)

- **PR #43998**: (unthought) Fix gce make_master @ 2017-10-10 20:01:25 UTC
  - e484d16817 Merge pull request #43998 from unthought/fixed-gce-make_master
  - 6e9f0fa24e Fix GCE provider: #create returns bootstrap result

- **ISSUE #44013**: (DenisBY) pkgrepo.managed broken in 2017.7.2 (refs: #44016)

- **PR #44016**: (terminalmage) Fix on_header callback when not redirecting and no Content-Type present @ 2017-10-10 19:59:24 UTC
  - 82b92d54b3 Merge pull request #44016 from terminalmage/issue44013
  - d594b9f92 No need to set a specific encoding if one hasn’t been provided via the headers
  - 425ede4b84 Fix on_header callback when not redirecting and no Content-Type present

- **PR #43952**: (t0fik) add requisites to stateconf (backport #43920) @ 2017-10-10 13:03:31 UTC
  - PR #43920: (t0fik) Added missing requisites to stateconf renderer (refs: #43952)
  - bd879eb66e Merge pull request #43952 from jdsieci/2017.7_add_requisites_to_stateconf
  - 9994c64670 Merge branch '2017.7' into 2017.7_add_requisites_to_stateconf

- **PR #43777**: (Ch3LL) [2017.7] Bump latest and previous versions @ 2017-10-09 17:21:57 UTC
  - a4358dfa36 Merge pull request #43777 from Ch3LL/2017.7.2_docs
  - 410c624f7a [2017.7] Bump latest and previous versions

- **PR #43978**: (Ch3LL) Add Security Notes to 2017.7.2 Release Notes @ 2017-10-09 17:20:04 UTC
  - 2a064c1a72 Merge pull request #43978 from Ch3LL/7.2_sec
  - 57fd67bcb Add Security Notes to 2017.7.2 Release Notes

- **PR #43932**: (techhat) Don’t try to modify dict while looping through it @ 2017-10-06 21:20:54 UTC
  - d9530e3c52 Merge pull request #43932 from techhat/moddict
  - 4a77560646 Don’t try to modify dict while looping through it

- **PR #43956**: (terminalmage) Fix fileclient’s get_url when redirecting to a redirect @ 2017-10-06 21:19:41 UTC
  - 39893a1dab Merge pull request #43956 from terminalmage/fix-get_url-redirects
  - 9a4f6a260f Fix fileclient’s get_url when redirecting to a redirect

- **PR #43943**: (twangboy) Fix unit.utils.test_utils for Windows @ 2017-10-06 19:35:24 UTC
  - 1baf286719 Merge pull request #43943 from twangboy/win_unit_test_utils
• PR #43939: (terminalmage) Fix typo in log message @ 2017-10-05 23:20:04 UTC
  - a8f1750323 Merge pull request #43939 from terminalmage/fix-typo
  - 29d8cf4f26 Fix typo in log message

• ISSUE #43909: (frogunder) state.highstate not working on py3 setup (refs: #43910)

• ISSUE #43605: (cruscio) Module.Run: Passed invalid arguments to state.apply: can't serialize dict_keys(['task.create_task']) (refs: #43910)

• PR #43910: (terminalmage) Don't put unserializable dict.keys() into state return @ 2017-10-05 20:33:47 UTC
  - 1a718eb1ed Merge pull request #43910 from terminalmage/issue43605
  - 042e092ac8 Don't put unserializable dict.keys() into state return

• ISSUE #41894: (DR3EVR8u8c) Salt-cloud can't resize root volume with public ami images (refs: #43907)

• ISSUE #39257: (aig787) Using del_root_vol_on_destroy option in salt-cloud gives IndexError (refs: #43907)

• PR #43927: (rallytime) Back-port #43907 to 2017.7 @ 2017-10-05 20:10:16 UTC
  - PR #43907: (richardsimko) Make sure EBS volume exists before querying (refs: #43927)
  - PR #33115: (rbjorklin) Fix override of ec2 volumetype (refs: #43907)
  - a7a59868c8 Merge pull request #43927 from rallytime/bp-43907
  - f62e8ca87f Make sure volume exists before querying

• PR #43934: (rallytime) [2017.7] Merge forward from 2016.11 to 2017.7 @ 2017-10-05 20:07:36 UTC
  - 4fcd4709ea Merge pull request #43934 from rallytime/merge-2017.7
  - eaca3291e2 Merge branch '2016.11' into '2017.7'
    - 2ab7549d48 Merge pull request #43884 from UtahDave/2016.11local
      - e3b2857285 Merge branch '2016.11' into 2016.11local
    - 4b882d4272 Merge pull request #43869 from terminalmage/issue43522
      - fe28b0d4fb Only join cmd if it's not a string
      - 8c671fd0c1 Update SaltConf banner per Rhett's request
    - a2161efda3 Merge pull request #43707 from terminalmage/issue43373
      - 3ebde1895f Merge branch '2016.11' into issue43373
      - e580ed4c96 Merge branch '2016.11' into issue43373
      - 5b3be8e8af Fix failing unit test
      - f73764481b Add missing support for use/use_in requisites to state.sls_id

• ISSUE #43658: (kvnaveen) KeyError: 'as_dict' [DEBUG ] LazyLoaded nested.output (refs: #43886)

• PR #43886: (techhat) Fix object_to_dict in azure @ 2017-10-05 19:33:56 UTC
  - 7d174172a0 Merge pull request #43886 from techhat/azuredict
  - 223a1eea8a Fix object_to_dict in azure

• PR #43899: (gtmanfred) enable tox for tests @ 2017-10-04 15:08:16 UTC
- 7028248820 Merge pull request #43899 from gtmanfred/2017.7
- 51eca1a6bd enable tox for tests

- **PR #43828**: (rallytime) [2017.7] Merge forward from 2016.11 to 2017.7 @ 2017-10-04 13:10:13 UTC
  - a5abe3e1c Merge pull request #43828 from rallytime/merge-2017.7
  - 2ff02e4320 Merge branch '2016.11' into '2017.7'
    * 85b3aa332a Merge pull request #43807 from terminalmage/issue43522
      - d8708bf698 cmdmod: Don't list-ify string commands on Windows
    * ea8d273c2b Merge pull request #43768 from vutny/fix-pylint-deprecation-warnings
      - f8b3fa9da1 Merge branch '2016.11' into fix-pylint-deprecation-warnings
      - 651ed16ad3 Fix Pylint deprecated option warnings

- **PR #43854**: (keesbos) Map __env__ in git_pillar before sanity checks @ 2017-10-02 20:44:53 UTC
  - **PR #43656**: (keesbos) Git pillar fixes (refs: #43854)
  - 36b0b1174b Merge pull request #43854 from keesbos/2017.7
  - fba9c9a935 Map __env__ in git_pillar before sanity checks

- **PR #43847**: (cachedout) Fix to module.run @ 2017-10-02 19:25:03 UTC
  - c81e8457b8 Merge pull request #43847 from cachedout/module_run_compare
  - b11f8c8f29 Merge pull request #17 from terminalmage/pr-43847
    * 93eaba7c54 Use six.iterkeys() instead of dict.keys()
    * 5d56a03a67 Improve failures for module.run states
  - 71780beb5a Merge branch '2017.7' into module_run_compare

- **ISSUE #43819**: (mephi42) archive.extracted shows the http password in the comment field on failure (refs: #43844)

- **PR #43844**: (garethgreenaway) [2017.7] Changes to states/file.py and states/archived.py @ 2017-10-01 09:08:48 UTC
  - dd01e0ce67 Merge pull request #43844 from garethgreenaway/43819_redact_url_additions
  - c58c72aff9 When using URLs in archive.extracted, on failure the username & password is in the exception. Calling salt.utils.url.redact_http_basic_auth to ensure the credentials are redacted.
    * f0b985cbbe Merge branch 'module_run_compare' of ssh://github.com/cachedout/salt into module_run_compare
      - aefc773c2f Merge branch '2017.7' into module_run_compare

- **PR #43840**: (twangboy) Fix unit.states.test_augeas for Windows @ 2017-09-29 21:53:21 UTC
  - 1f52546eab Merge pull request #43840 from twangboy/win_fix_test_augeas
  - fd16c31de Fix unit.states.test_augeas for Windows

- **ISSUE #43553**: (dafyddj) Vagrant setup (Windows guest) broken on upgrade to 2017.7 (refs: #43801)

- **PR #43801**: (terminalmage) Properly handle UNC paths in salt.utils.path.readlink() @ 2017-09-29 09:58:02 UTC
  - c6fd2cd452 Merge pull request #43801 from terminalmage/issue43553
  - 66e6e89dc7 Properly handle UNC paths in salt.utils.path.readlink()
• **PR #43800**: (Ch3LL) Add note to nitrogen release notes about pip for cent6 @ 2017-09-28 17:36:49 UTC
  - 7304907db6 Merge pull request #43800 from Ch3LL/update_7.0
  - 50779c3b1c Add note to nitrogen release notes about pip for cent6

• **PR #43779**: (twangboy) Fix `unit.modules.test_state` for Windows @ 2017-09-28 14:27:03 UTC
  - 6f68f9f7a Merge pull request #43779 from twangboy/win_test_state
  - a64fe75816 Use os agnostic paths

• **PR #43780**: (twangboy) Fix `unit.modules.test_v(3056,3129)``` for Windows @ 2017-09-28 14:25:16 UTC
  - 719232758 Fix `unit.modules.test_virt` for Windows

• **PR #43723**: (nicholasmhughes) Fix ini_manage error and change handling @ 2017-09-28 09:52:09 UTC
  - dd4fe52f1e Merge pull request #43723 from nicholasmhughes/ini_manage-error-handling
  - d8c5c4be0 prevent exception when test=True
  - cfe37916c3 handling changes per section
  - 1c48f6ad5 prevent exception when test=True

• **PR #43781**: (twangboy) Fix `unit.modules.test_status` for Windows @ 2017-09-28 09:06:19 UTC
  - 5e29507c21 Merge pull request #43781 from twangboy/win_test_status
  - 16ae8253c1 Mock which, use os.linesep for cmd.run return

• **PR #43785**: (twangboy) Fix `unit.modules.test_znc` for Windows @ 2017-09-28 08:56:11 UTC
  - 6c78e6a649 Merge pull request #43785 from twangboy/win_test_znc
  - 7d90721f6b Merge branch '2017.7' into win_test_znc
  - 228e74c8e3 Fix `unit.modules.test_znc` for Windows

• **PR #43786**: (twangboy) Fix `unit.modules.test_zypper` for Windows @ 2017-09-28 08:51:59 UTC
  - 10d8b491c Merge pull request #43786 from twangboy/win_test_zypper
  - 1c05e37a66 Merge branch '2017.7' into win_test_zypper
  - aafe74b30c Fix `unit.modules.test_zypper` for Windows

• **PR #43773**: (rallytime) [2017.7] Merge forward from 2016.11 to 2017.7 @ 2017-09-28 08:48:39 UTC
  - 9615ca32d5 Merge pull request #43773 from rallytime/merge-2017.7
  - f703ed7da Merge branch '2017.7' into merge-2017.7
  - d4f4a722c Merge branch '2016.11' into '2017.7'
    - 1a8cc60bb4 Merge pull request #43772 from gtmanfred/2016.11
      - 0194c60960 dont print Minion not responding with quiet
    - 9dee896b9 Merge pull request #43747 from rallytime/gpg-verification
      - 7a70de19f4 Merge branch '2016.11' into gpg-verification
      - 23bb4a5d0e Add GPG Verification section to Contributing Docs

• **PR #43784**: (twangboy) Fix `unit.modules.test_win_service` @ 2017-09-28 03:14:39 UTC
  - 9a9cc69d55 Merge pull request #43784 from twangboy/win_test_win_service

30.2. Previous Releases 4875
- 058e50e530 Fix unit.modules.test_win_service

- **PR #43774:** (The-Loeki) typo fix aka what is a 'masterarpi' @ 2017-09-27 18:52:19 UTC
  - 1254da1df5 Merge pull request #43774 from The-Loeki/patch-1
  - 84bbe85e60 typo fix aka what is a 'masterarpi'

- **PR #43732:** (twangboy) Skip unit.stats.test_mac_packages on Windows @ 2017-09-27 14:48:08 UTC
  - 3f888753d4 Merge pull request #43732 from twangboy/win_skip_mac_pkg_tests
  - 1c01e06097 Only skip test on Windows
  - ec99a3ce3c Fix lint error
  - 61f8a27f7f Skip mac specific tests

- **PR #43761:** (Ch3LL) Release Notes for 2017.7.2 @ 2017-09-27 14:34:52 UTC
  - fb86935d99 Merge pull request #43761 from Ch3LL/release_2017.7.2
  - caf5795856 add mac patch notes
  - 3d5f6ce9955 Add 2017.7.2 Release Notes

- **PR #43767:** (twangboy) Skip unit.modules.test_snapper on Windows @ 2017-09-27 14:10:27 UTC
  - 5ea603cf16 Merge pull request #43767 from twangboy/win_skip_test_snapper
  - b41b9c8378 Skip snapper tests on Windows

- **PR #43759:** (rallytime) [2017.7] Merge forward from 2016.11 to 2017.7 @ 2017-09-27 13:30:38 UTC
  - 77c2c7cbf7 Merge pull request #43759 from rallytime/merge-2017.7
  - 120f49f2c4 Merge branch '2016.11' into '2017.7'
    - 1cc3ad1c8d Merge pull request #43733 from terminalmage/issue43729
      - 6e5c99bda0 Allow docker_events engine to work with newer docker-py
    - 5d38be4ff7 Merge pull request #43458 from terminalmage/issue42082
      - 5f90812b12 Fix missing PER_REMOTE_ONLY in cache.clear_git_lock runner
    - 023a563657 Merge pull request #43727 from rallytime/fix-43650
      - babad12d83 Revise "Contributing" docs: merge-forwards/release branches explained!

- **ISSUE #43737:** (syedaali) salt.loaded.int.module.boto_kinesis.__virtual__() is wrongly returning `None`. It should either return `True`, `False` or a new name. If you're the developer of the module 'boto_kinesis', please fix this. (refs: #43748)

- **PR #43748:** (rallytime) Add message to boto_kinesis modules if boto libs are missing @ 2017-09-27 13:19:33 UTC
  - 5c203df056 Merge pull request #43748 from rallytime/fix-43737
  - 5a2593dbd3 Add message to boto_kinesis modules if boto libs are missing

- **PR #43731:** (twangboy) Fix unit.beacons.test_status for Windows @ 2017-09-26 16:25:12 UTC
  - 2581098595 Merge pull request #43731 from twangboy/win_unit_beacons_test_status
  - dc1b36b7e2 Change expected return for Windows

- **PR #43724:** (brejoc) Improved delete_deployment test for kubernetes module @ 2017-09-26 16:19:31 UTC
  - 10f3d47498 Merge pull request #43724 from brejoc/2017.7.kubernetes_delete_test
- 85b0a8c401 Improved delete_deployment test for kubernetes module

- **PR #43734**: (twangboy) Fix `unit.modules.test_poudriere` for Windows @ 2017-09-26 14:13:47 UTC
  - 13cc27bdab Merge pull request #43734 from twangboy/win_unit_test_poudriere
  - 922e60fa67 Add os agnostic paths

- **PR #43742**: (terminalmage) Fix incorrect value in docstring @ 2017-09-26 13:55:00 UTC
  - 41aece7ac8 Merge pull request #43742 from terminalmage/docstring
  - 553335b1c9 Fix incorrect value in docstring

- **PR #41998**: (twangboy) Fix `unit.modules.test_environ` for Windows @ 2017-09-26 12:25:48 UTC
  - d78b9a3294 Merge pull request #41998 from twangboy/win_unit_test_environ
  - d73ef44cf6 Mock with uppercase KEY
  - 048e16883f Use uppercase KEY

- **PR #42036**: (twangboy) Fix `unit.modules.test_file` for Windows @ 2017-09-26 12:23:10 UTC
  - 7fbb3a3806 Merge pull request #42036 from twangboy/win_unit_test_file
  - 056f3bb4c0 Use with to open temp file
  - 352fe69e35 Clarify the purpose of the for loop
  - b55172d5dc Split by Windows and Linux style line endings
  - e20aa5c39b Fix line, use os.sep instead of os.linesep
  - d5f27901e3 Fix additional bytestring issue
  - 716e99c453 Fix py3 bytestring problems
  - 543610570c Fix bytestring issues, fix errored tests
  - 9fe83a34a5 Remove old variable declaration
  - c5cf5e92c1 Fix many tests

- **PR #43557**: (clan) disable modify yaml constructor @ 2017-09-25 14:03:47 UTC
  - a81d4b8d8d Merge pull request #43557 from clan/yaml
  - 485471c8a7 Merge branch '2017.7' into yaml
  - da15658304 remove modify yaml constructor

- **PR #43566**: (damon-atkins) 2017.7 update salt.utils.files.safe_filename_func @ 2017-09-25 13:58:29 UTC
  - b5bec16e8 Merge pull request #43566 from damon-atkins/2017.7_update_safe_filename_func
  - c7a652784a remove blank line at end of file
  - e97651d49b Merge branch '2017.7' into 2017.7_update_safe_filename_func
  - 3b4c1bb7f Merge branch '2017.7' into 2017.7_update_safe_filename_func
  - 4c88c80ef9 Merge branch '2017.7' into 2017.7_update_safe_filename_func
  - 4171d11838 utils.files.safe_filenamefunc add support to override the os default directory separator

- **ISSUE #43711**: (wedge-jarrad) `fcontext_get_policy` emits command error if policy doesn’t exist (refs: #43712)

- **PR #43712**: (wedge-jarrad) Ignore retcode on call to grep in selinux.py module @ 2017-09-25 13:56:17 UTC
  - 3bb337cf6a Merge pull request #43712 from wedge-jarrad/fix-43711
- 9c1ef486 Ignore retcode on call to grep in selinux.py module

- **ISSUE #43659**: (gaborn57) unable to retrieve pillar data in postgres db (refs: #43716)

- **PR #43716**: (gaborn57) Corrected custom port handling @ 2017-09-25 13:44:58 UTC
  - 5b7411e335 Merge pull request #43716 from gaborn57/2017.7
  - 78137c0860 Corrected custom port handling

- **PR #43700**: (rklaren) Ensure salt-cloud with libvirt provider does not write low level errors to stderr @ 2017-09-25 01:47:25 UTC
  - PR #43684: (rklaren) salt-cloud libvirt updates (refs: #43700)
  - 6bbd50c453 Merge pull request #43700 from rklaren/fixed-libvirt-stderr-spam
  - 88530c4cb6 Lint fixes
  - 235bec49b2 salt-cloud + libvirt: Mention Fedora 26 support
  - 9aeef58647 Remove stderr spam when using salt-cloud with libvirt

- **PR #43702**: (rallytime) [2017.7] Merge forward from 2016.11 to 2017.7 @ 2017-09-25 01:26:20 UTC
  - 437ac03801 Merge pull request #43702 from rallytime/merge-2017.7
  - 132b1b343b Merge branch '2017.7' into merge-2017.7

- **ISSUE #38971**: (morganwillcock) archive.extracted: lots of unnecessary file transferring, copying, and hashing (refs: #43681, #43518)

- **PR #43681**: (terminalmage) Backport the non-fileclient changes from PR 43518 to 2017.7 @ 2017-09-22 19:27:25 UTC
  - PR #43518: (terminalmage) Reduce unnecessary file downloading in archive/file states (refs: #43681)
  - 47cd8723c6 Merge pull request #43681 from terminalmage/issue38971-2017.7
  - 91edf865e2 Merge branch '2017.7' into issue38971-2017.7
  - 8f4f3e93be Backport the non-fileclient changes from PR 43518 to 2017.7

- **ISSUE #43396**: (mkurtak) yumpkg pkg.installed slowed down due to wildcard naming support (refs: #43687)

- **PR #43687**: (mkurtak) yumpkg.py: install calls list_repo_pkgs only if wildcard is used in pkg name @ 2017-09-22 19:23:18 UTC
  - 0a1c5185f5 Merge pull request #43687 from mkurtak/fix-43396
  - b1e64b111b yumpkg.py: install calls list_repo_pkgs only if wildcard in pkg name is used

- **ISSUE #43124**: (UtahDave) publisher_acl with regex on username not working and has no documentation (refs: #43467)

- **PR #43467**: (DmitryKuzmenko) Bugs/43124 users regex @ 2017-09-22 19:21:09 UTC
  - 3a79549af6 Merge pull request #43467 from DSRCorporation/bugs/43124_users_regex
  - 14bf2dd8ff Support regex in publisher_acl.
  - 9f3e32f8b6 Regex support for user names in external_auth config.

- **ISSUE #43381**: (V3XATT0N) Sharing minion data cache causes false errors in returns (refs: #43670)

- **PR #43670**: (DmitryKuzmenko) Fix for list and contains redis cache logic. @ 2017-09-22 17:56:58 UTC
  - 0e88266b93 Merge pull request #43670 from DSRCorporation/bugs/43381_redis_cache_fix
  - 1c979d5809 Update redis cache contains logic to use more efficient sismember.
- 039d236948 Fixed list and contains redis cache logic.
  - 6e5cf65d65 Merge branch '2016.11' into '2017.7'
  - f46c858f25 Merge pull request #43648 from runtime/handle-boto-vpc-errors
    - 54842b5012 Handle VPC/Subnet ID not found errors in boto_vpc module
- PR #43697: (runtime) [2017.7] Merge forward from 2016.11 to 2017.7 @ 2017-09-22 17:31:09 UTC
  - aa47da35dd Merge pull request #43697 from runtime/merge-2017.7
  - cbae45bec4 Lint: Remove extra line at end of file
  - fca4e5563a Merge branch '2016.11' into '2017.7'
  - 9dba34aa06 Merge pull request #43575 from akissa/fix-csr-not-recreated-if-key-changes
    - b1b4dafd39 Fix CSR not recreated if key changes
  - 1d4fa48209 Merge pull request #43672 from runtime/bp-43415
    - 3fb42bc238 Fix env_order in state.py
  - ff832ee607 Merge pull request #43673 from runtime/bp-43652
    - d91c47c6f0 Salt Repo has Deb 9 and 8
  - 365cb9fa8 Merge pull request #43677 from terminalmage/runners-docs-2016.11
    - 2fd88e94fa Fix RST headers for runners (2016.11 branch)
  - be38239e5d Merge pull request #43534 from twangboy/win_fix_pkg.install_2016.11
    - 1546c1ca04 Add posix=False to call to salt.utils.shlex_split
  - 0d3fd3d374 Merge pull request #43661 from moio/2016.11-multiprocessing-doc-fix
    - 625ebb83f multiprocessing minion option: documentation fixes
  - 6b4516c025 Merge pull request #43646 from brejoc/2016.11.4-pidfile-tests
    - 9639a420b Fixed linting
    - 08fba98735 Fixed several issues with the test
    - 3a089e450f Added tests for pid-file deletion in DaemonMixIn
  - cfb1625741 Merge pull request #43591 from runtime/merge-2016.11
    - 57b9d642c2 Merge branch '2016.11.8' into '2016.11'
      - e83421694f Merge pull request #43550 from twangboy/osx_fix_preinstall_2016.11.8
      - 1b0a4d39d2 Fix logic in /etc/paths.d/salt detection
      - a648f75949 Merge pull request #43508 from runtime/bp-43333
      - d4981a2717 Update doco
      - a7c8b9e048 Update win_pkg.py
      - 1d6dc6fb72 Docs are wrong cache_dir (bool) and cache_file (str) cannot be passed on the cli (#2)
      - e7009877bc Merge pull request #43434 from runtime/2016.11.8-release-notes
      - 68f529ee5e Add 2016.11.8 release notes
  - 8671b91f62 Merge pull request #43572 from vutny/fix-salt-cloud-list-min-instance-set
21966e7ce8 cloud.action: list_nodes_min returns all instances

• PR #43314: (twangboy) Fix unit.utils.test_verify for Windows @ 2017-09-21 22:26:13 UTC
  - e6dc4d40df Merge pull request #43314 from twangboy/win_fix_unit.utils.test_verify
  - 9ada7f626c Merge branch '2017.7' into win_fix_unit.utils.test_verify
  - c0dc3f73ef Use sys.platform instead of salt.utils to detect Windows
  - e496d28c6e Fix unit.utils.test_verify for Windows

• ISSUE #43599: (ver nondco le) Incorrect default for salt.cache.Cache() if opts does not define "cache" (refs: #43680)

• PR #43680: (ver nondco le) correct default value for salt.cache.Cache @ 2017-09-21 20:09:36 UTC
  - ec34df2c27 Merge pull request #43680 from vernondcole/fixed-salt.cache.Cache-default

• PR #43530: (twangboy) Fixes removal of double-quotes by shlex_split in winrepo @ 2017-09-21 18:04:48 UTC
  - 99d9d784b1 Merge pull request #43530 from twangboy/win_fix_pkg.install
  - 7f59119f95 Merge branch '2017.7' into win_fix_pkg.install
  - f14639f7a Use posix=False for shlex.split

• PR #43671: (rallytime) [2017.7] Merge forward from 2017.7.2 to 2017.7 @ 2017-09-21 16:39:49 UTC
  - 12b5e62d81 Merge pull request #43671 from rallytime/merge-2017.7
  - a40166db5 Merge branch '2017.7.2' into '2017.7'

• PR #43676: (terminalmage) Fix RST headers for runners (2017.7 branch) @ 2017-09-21 16:36:21 UTC
  - e3a22bc2a3 Merge pull request #43676 from terminalmage/runners-docs-2017.7
  - 9b74634b23 Fix badly-formatted RST in mattermost runner docstring
  - c07a7c0a4 Fix RST headers for runners (2017.7 branch)

• PR #43235: (brejoc) Improve delete_deployment handling @ 2017-09-20 21:33:33 UTC
  - d02953ce6a Merge pull request #43235 from brejoc/improve-async-operation-handling-in-kubernetes-module
  - 4e8da3045f Fixed logic for windows fallback
  - 3b1cb884b9 Merge branch '2017.7' into improve-async-operation-handling-in-kubernetes-module
  - d1b5ec098c Merge branch '2017.7' into improve-async-operation-handling-in-kubernetes-module
  - 35cf69bc50 Moved exception Salt core
  - 7431ec64e3 Removed unused sys import
  - 0c71da95f6 Using salt method to identify MS Windows, single instead of double quotes
  - 20619b24c4 Fixed test for delete_deployment
  - 91076bbafa Merge branch '2017.7' into improve-async-operation-handling-in-kubernetes-module
  - 7b600e2832 Added pylint-disable statements and import for salt.ext.six.moves.range
  - 99fe138325 Code styling and added log message for timeout
  - dcd8d4f639 Merge branch '2017.7' into improve-async-operation-handling-in-kubernetes-module
  - 702a058c38 Fixed linting
- 3fe623778e Added Windows fallback
- 52b1cb8147 Compatibility with Python3.6
- 767af9bb4f Added timeout for checking the deployment
- 32d7d34fe5 First simple draft for the deletion verification

**PR #43554:** (twangboy) Win fix chocolatey @ 2017-09-20 16:06:18 UTC
- 73cb0c27b5 Merge pull request #43554 from twangboy/win_fix_chocolatey
- e04ac6216 Merge branch '2017.7' into win_fix_chocolatey
- 56be5c35eb Improve logic for handling chocolatey states
- bcf7b4e68 Add logic for test=True

**ISSUE #43598:** (davidvon) Passed invalid arguments to mysql.file_query: unsupported operand type(s) for +=: 'int' and 'tuple' (refs: #43625)

**PR #43625:** (gtmanfred) results and columns are lists for mysql returns @ 2017-09-20 15:42:59 UTC
- ed7eeaaaf8 Merge pull request #43625 from gtmanfred/2017.7
- f84b50a6b results and columns are lists for mysql returns

**ISSUE #43560:** (smitelli) salt.states.linux_acl requires setfacl/getacl binaries but this is not obvious (refs: #43587, #43580)

**PR #43587:** (rallytime) Add reason to linux_acl state loading failure @ 2017-09-19 16:26:51 UTC
- PR #43580: (garethgreenaway) Updating ACL module and state module documentation (refs: #43587)
- 1bda4832ef Merge pull request #43587 from rallytime/fixed-virtual
- e5297c3869 Add reason to linux_acl state loading failure

**PR #43584:** (cachedout) Enhance engines docs @ 2017-09-18 20:40:57 UTC
- 2e19533e3c Merge pull request #43584 from cachedout/engines_doc_clarification
- 634536b0ff Merge branch '2017.7' into engines_doc_clarification
- 1a619708c1 Enhance engines docs

**PR #43519:** (terminalmage) Fix incorrect handling of pkg virtual and os_family grain @ 2017-09-18 20:35:01 UTC
- 50b134ef4c Merge pull request #43519 from terminalmage/fixed-aptpkg
- 0e3c447567 Fix incorrect handling of pkg virtual and os_family grain

**PR #43520:** (clan) __search_name is " if acl type is other @ 2017-09-18 20:33:51 UTC
- dd953f36ae Merge pull request #43520 from clan/acl
- 54216177c1 __search_name is " if acl type is other

**PR #43561:** (wedge-jarrad) Clean up doc formatting in selinux state & module @ 2017-09-18 20:28:47 UTC
- ad9663a7fe Merge pull request #43561 from wedge-jarrad/selinux-doc-cleanup
- 1bd263ced5 Clean up doc formatting in selinux state & module

**ISSUE #43560:** (smitelli) salt.states.linux_acl requires setfacl/getacl binaries but this is not obvious (refs: #43587, #43580)

**PR #43580:** (garethgreenaway) Updating ACL module and state module documentation (refs: #43587) @ 2017-09-18 20:11:26 UTC
- cc3d9c1a01 Merge pull request #43580 from garethgreenaway/43560_update_linux_acl_documentation
- e63fae4e91 Merge branch '2017.7' into 43560_update_linux_acl_documentation

- **PR #43523**: (skizunov) Add back lost logic for multifunc_ordered @ 2017-09-18 17:46:16 UTC
  
  - **PR #38168**: (skizunov) Add support for a multi-func job using same func more than once (refs: #43523)
  
- bf7b2331f6 Merge pull request #43523 from skizunov/develop2
- fb579321a9 Add back lost logic for multifunc_ordered
  
  - 117a0ddjbc Updating the documentation to call out the requirement for the getfacl and setfacl binaries
  
  - 49f25b9f19 Lint
  
  - 31d17c0124 Fix typo found by @s0undt3ch
  
  - 5dba74d2cb Fix to module.run [WIP]

- **ISSUE #43447**: (UtahDave) When using Syndic with Multi Master the top level master doesn’t reliably get returns from lower minions. (refs: #43526)

- **PR #43526**: (DmitryKuzmenko) Forward events to all masters syndic connected to @ 2017-09-18 16:54:46 UTC
  
  - e29efecf4f Merge pull request #43526 from DSRCorporation/bugs/43447_syndic_events_forwarding
  
  - 64d6109654 Merge branch '2017.7' into bugs/43447_syndic_events_forwarding
  
  - 3b2a529385 Merge branch '2017.7' into bugs/43447_syndic_events_forwarding
  
  - 0e4a744dj5 Forward events to all masters syndic connected to.

- **ISSUE #43077**: (Manoj2087) Issue with deleting key via wheel (refs: #43330)

- **PR #43330**: (termimalmage) Fix reactor regression + unify reactor config schema @ 2017-09-18 16:46:11 UTC
  
  - 56b671e087 Merge pull request #43330 from termimalmage/issue43077
  
  - a7b4e1f782 Simplify client logic
  
  - b85c8510c7 Improve the reactor documentation
  
  - 20f6f3cc39 Include a better example for reactor in master conf file
  
  - 4243a2211d Rewrite the reactor unit tests
  
  - 9db3f5ae6d Unify reactor configuration, fix caller reactors
  
  - 34b6cb65f6 Un-deprecate passing kwargs outside of ‘kwarg’ param

- **ISSUE #33793**: (mstarostik) states.ssh_auth adds bogus newline before newly added keys (refs: #43483)

- **PR #43483**: (rallytime) Back-port #43483 to 2017.7 @ 2017-09-15 21:22:12 UTC
  
  - **PR #43483**: (3add3287) Handle bogus newline before newly added keys (refs: #43505)
  
  - 078d5d17de Merge pull request #43505 from rallytime/bp-43483
  
  - c68dd5b8a4 Lint: fix spacing
  
  - 406661ac9a Fix indentation from tabs to spaces
  
  - 923ec62771 Copy paste typo
  
  - 6f6619242f Fix checking for newline on end of file by properly checking the last byte of the file if the file is non empty.

- **ISSUE #43464**: (psagers) acme.cert state: IOError on failure to create a new certificate (refs: #43465)
- **PR #43491**: (rallytime) Back-port #43465 to 2017.7 @ 2017-09-15 18:24:47 UTC
  - PR #43465: (psagers) acme.cert: avoid IOError on failure. (refs: #43491)
  - a6df3f2acc Merge pull request #43491 from rallytime/bp-43465
  - 3118faca0a acme.cert: avoid IOError on failure.

- **PR #43492**: (rallytime) [2017.7] Merge forward from 2016.11 to 2017.7 @ 2017-09-15 18:23:49 UTC
  - 3620c15c9a Merge pull request #43492 from rallytime/merge-2017.7
  - a6df3f2acc Merge pull request #43465 from rallytime/bp-43465
  - 3118faca0a acme.cert: avoid IOError on failure.

- **ISSUE #43479**: (haam3r) Mattermost runner failing to retrieve config values due to unavailable config runner (refs: #43513)
- **PR #43513**: (haam3r) Issue #43479 No runners.config in 2017.7 branch @ 2017-09-15 14:58:27 UTC
  - 8a90c7059b Merge pull request #43513 from haam3r/2017.7
  - 58f7d051c9 Issue #43479 No runners.config in 2017.7 branch

- **ISSUE #42926**: (nixjdm) network.system not setting hostname in hosts file, preventing sudo. (refs: #43431)
- **PR #43431**: (mattLLVW) Fix /etc/hosts not being modified when hostname is changed @ 2017-09-13 18:35:55 UTC
  - c3d9e2d9b2 Merge pull request #43431 from mattLLVW/fix-hosts-deb
  - c6320b1df Merge branch '2017.7' into fix-hosts-deb
- a3b2e19149 Fix /etc/hosts not being modified when hostname is changed

- **PR #43403:** (twangboy) Proper timestamp conversion in redis.lastsave @ 2017-09-12 21:18:06 UTC
  - a09f289fbb Merge pull request #43403 from twangboy/win_fix_redismod
  - 6fa23e1aa Properly handle timestamp conversion

- **PR #43463:** (twangboy) Add /norestart switch to vcredist installer @ 2017-09-12 20:29:27 UTC
  - 0eaa5acb72 Merge pull request #43463 from twangboy/win_norestart_2017.7
  - 6984b8fd60 Add /norestart to vcredist installer

- **ISSUE #43386:** (rajvidhimar) Scheduler's job_kwargs not working as expected. (refs: #43443, #43442)

- **PR #43443:** (garethgreenaway) [2017.7] Fixes to scheduler __pub values in kwargs @ 2017-09-12 18:14:46 UTC
  - 2fc237a806 Merge pull request #43443 from garethgreenaway/43386_2017_7_schedule_kwargs_pub
  - a29a9855a6 Fixing typo.
  - 26817b3d3fa Merge branch '2017.7' into 43386_2017_7_schedule_kwargs_pub

- **ISSUE #39775:** (mirceaulinic) Proxy mine_interval config ignored (refs: #41547)

- **PR #41547:** (mirceaulinic) Override proxy minion opts with pillar data @ 2017-09-11 21:47:51 UTC
  - 5378ac7756 Merge pull request #41547 from cloudflare/px_merge_pillar_opts
  - aad39ba665 Document the new opts
  - cdc0d9674a Allow disabling the mines details merge
  - 732b63b0b9 Merge mine details whenever possible
  - 96b31d5643 Override proxy opts with pillar data when required
  - fd499887f9 Define new proxy merge pillar in opts... opts
  - abab6fd91c Override minion opts with pillar data

- **PR #41943:** (twangboy) Fix unit.returners.test_local_cache for Windows @ 2017-09-11 21:34:03 UTC
  - 08d102c869 Merge pull request #41943 from twangboy/win_unit_test_local_cache
  - 377b34572 Merge branch '2017.7' into win_unit_test_local_cache
  - 35b79edce6 Remove cur variable, use time.time() in comparison
  - 9b61533b09 Get more accurate current time in local_cache
  - 84e3f65bc Fix unit tests for Windows

- **PR #43424:** (twangboy) Fix unit.modules.test_hosts for Windows @ 2017-09-11 21:28:41 UTC
  - 50ab79f0cb Merge pull request #43424 from twangboy/win_unit_test_hosts
  - 90dcb8278c Fix unit.modules.test_hosts for Windows

- **PR #42652:** (skizunov) Fix loader.py's raw_mod() to look in all module dirs @ 2017-09-11 19:43:48 UTC
  - 0f0ed5a093 Merge pull request #42652 from skizunov/develop3
  - d82e406f15 Fix loader.py's raw_mod() to look in all module dirs

- **PR #43438:** (rallytime) [2017.7] Merge forward from 2016.11 to 2017.7 @ 2017-09-11 18:33:39 UTC
  - ca091bc8ad Merge pull request #43438 from rallytime/merge-2017.7
  - ef7b4242c3 Merge branch '2016.11' into '2017.7'
* 57cccd75d0 Merge pull request #43390 from aogier/43387-genesis-qemu
  - 496f14a7e7 forgot to mock the proper one
  - 51c7a1ba00 only check if static_qemu is_executable()
  - 70642e495d better qemu_static parameter mangle in debootstrap management, tests
* 6106aec696 Merge pull request #43356 from gtmanfred/2016.11
  - 3f19b247f3 Add handler.messages back in for test comparison
  - 9911b04208 fix test
  - 3c6ae99a77 never-download got readded
* e638fac54e Merge pull request #43325 from doesitblend/salt-mine-doc-fix
  - 1e94d0ac3a Lint: Remove trailing whitespace
  - 51af8f8757 Fix mine_interval phrasing in default file
  - ba0cdd4536 Fix phrasing for mine_interval description
  - 9ff03c2d43 Update Salt Mine documentation to show that the mine_interval option is configured in minutes.
* fc587f784a Merge pull request #43105 from aogier/43086-no-member
  - 5111cf8bad Merge branch ’2016.11’ into 43086-no-member
* d97a680372 Merge pull request #43333 from damon-atkins/2016.11
  - 92de2bb498 Update doco
  - fc96c1d12e Update win_pkg.py
  - c91fc14704 Merge branch ’2016.11’ into 2016.11
  - cb3af2bbbd Docs are wrong cache_dir (bool) and cache_file (str) cannot be passed on the cli (#2)
  - 42a118ff56 fixed cmd composition and unified his making across module
  - 3fd59ed369 Adding a small check to ensure we do not continue to populate kwargs with __pub__ items from the kwargs item.

- **PR #43320:** (twangboy) Fix `unit.modules.test_alternatives` for Windows @ 2017-09-11 17:28:00 UTC
  - a9592dd82 Merge pull request #43320 from twangboy/win_fix_alternatives
  - a909813fa5 Remove unused import (lint)
  - 3ef8d714cb Fix unit tests to mock salt.utils.path.readlink
  - c008b129e1 Use salt.utils.path.readlink
  - c0d81aa1ce Fix unit tests for Windows
- **PR #43363:** (twangboy) Fix `unit.modules.test_ini_manage` for Windows @ 2017-09-11 17:10:31 UTC
  - 9b88e49846 Merge pull request #43363 from twangboy/scratch_ini_tests
  - a94319a082 Make sure formatting of TEST_FILE_CONTENT matches original
  - 6263bc8983 Remove print statement
  - 79cd3831ae Fix empty value preserved test
  - 85997391f1 Is this handled the same on Linux and Windows
• PR #43421: (gtmanfred) Revert "Reduce fileclient.get_file latency by merging _file_find and ... @ 2017-09-11 17:07:18 UTC
  - 673ce387c1 Merge pull request #43421 from gtmanfred/compat
  - f85bf8c18f Revert "Reduce fileclient.get_file latency by merging _file_find and _file_hash"

• ISSUE #42165: (arount) top_file_merging_strategy: merge does not works (refs: #43415)

• PR #43415: (mattLLVW) Fix env_order in state.py (refs: #43672) @ 2017-09-11 15:18:08 UTC
  - 47d982fd37 Merge pull request #43415 from mattLLVW/fix-env-order
  - f6313a1b2c Merge branch '2017.7' into fix-env-order
  - e93a962980 Fix env_order in state.py

• PR #43422: (twangboy) Fix unit.cloud.clouds.test_ec2 for Windows @ 2017-09-11 15:17:20 UTC
  - e89e23a32e Merge pull request #43422 from twangboy/win_unit_cloud_ec2
  - 1379627334 Merge unit.cloud.clouds.test_ec2 for Windows

• PR #43423: (twangboy) Fix unit.modules.test_gem for Windows @ 2017-09-11 15:15:28 UTC
  - 54f833ac59 Merge pull request #43423 from twangboy/win_unit_test_gem
  - b2ce181d13 Fix unit.modules.test_gem for Windows

• PR #43419: (gtmanfred) make cache dirs when spm starts (refs: #43432) @ 2017-09-11 13:42:50 UTC
  - b3116109e5 Merge pull request #43419 from gtmanfred/2017.7
  - 58378866e5 make cache dirs when spm starts

• PR #43371: (rallytime) [2017.7] Merge forward from 2016.11 to 2017.7 @ 2017-09-08 15:39:12 UTC
  - 9b27473763 Merge pull request #43371 from rallytime/merge-2017.7
  - 7b07b58396 Merge branch '2016.11' into '2017.7'
    - 0c986f5e6a Merge pull request #43361 from rallytime/bp-43329
      - b09e5b4379 Fix #43295, better handling of consul initialization issues
    - 22287439e6 Merge pull request #42903 from junovitch/issue-35840-fix-preserve-minion-cache-2016.11
      - c9d4fd7b45 Merge branch '2016.11' into issue-35840-fix-preserve-minion-cache-2016.11
      - 93a68e32a5 Merge branch '2016.11' into issue-35840-fix-preserve-minion-cache-2016.11
      - 079f997985 Fix 'preserve_minion_cache: True' functionality (fixes #35840)
    - 4860710757 Merge pull request #43360 from terminalimage/sj-496
      - 433bca14b1 Fix KeyError in yumpkg configparser code on Python 3
      - f6c16935d8 Move --showduplicates before repository-packages
    - 4ba2d6e841 Merge pull request #43244 from rallytime/release-branch-clarifications
      - 0d5a46dbaa Update release branch section with a few more details
    - 1a012eb3d7 Merge pull request #43359 from gtmanfred/ipaddr
      - 23d9abb560 ipaddr_start ipaddr_end for el7
    - 8f88111be8 Merge pull request #43247 from rallytime/mentionbot-backports
      - 2b85757d73 Always notify tkwilliams when changes occur on boto files
- 40b5a29f90 Add basepi to userBlacklist for mention bot
- bad8f56969 Always notify ryan-lane when changes occur on boto files

- **PR #43398**: (twangboy) Fix `unit.modules.test_mount` for Windows @ 2017-09-08 13:39:29 UTC
  - 97f0f6f03 Merge pull request #43398 from twangboy/win_fix_test_mount
  - 4a8d7e522c Fix tests, Use full path to salt.utils.which

- **PR #43399**: (twangboy) Fix `unit.modules.test_pam` for Windows @ 2017-09-08 13:37:50 UTC
  - 6a4cc5c1b0 Merge pull request #43399 from twangboy/win_fix_test_pam
  - 6257aa964a Fix `unit.modules.test_pam` for Windows

- **PR #43400**: (twangboy) Fix `unit.modules.test_parted` for Windows @ 2017-09-08 13:37:00 UTC
  - 2b5fae3f8 Merge pull request #43400 from twangboy/win_unit_test_parted
  - 8e3e897ee2 Fix `unit.modules.test_parted` for Windows

- **PR #43401**: (twangboy) Fix `unit.modules.test_pw_group` for Windows @ 2017-09-08 13:35:45 UTC
  - 332deeb013 Merge pull request #43401 from twangboy/win_unit_test_pw_group
  - 78e39a1b9d Fix `unit.modules.test_pw_group` for Windows

- **PR #43402**: (twangboy) Fix `unit.modules.test_qemu_nbd` for Windows @ 2017-09-08 13:34:58 UTC
  - c054bfe1 Merge pull request #43402 from twangboy/win_unit_test_qemu_nbd
  - 531ce8022b Fix `unit.modules.test_qemu_nbd` for Windows

- **PR #43404**: (twangboy) Fix `unit.modules.test_seed` for Windows @ 2017-09-08 13:32:41 UTC
  - be88bb45f Merge pull request #43404 from twangboy/win_unit_test_seed
  - 6c65b94a84 Use os.path.join for paths

- **PR #43301**: (twangboy) Fix `unit.test_spm` for Windows @ 2017-09-08 13:24:35 UTC
  - 6126e8756 Merge pull request #43301 from twangboy/win_fix_unit_test_spm
  - 8608a6b303 Merge branch '2017.7' into win_fix_unit_test_spm
  - b8da04c04d Add Mike's changes
  - f36e8bb6a7 Fix `unit.test_spm` for Windows

- **PR #43372**: (skizunov) Fix system.set_system_time when no hw clock is present @ 2017-09-07 17:45:33 UTC
  - f959113694 Merge pull request #43372 from skizunov/develop5
  - 281e471853 Fix system.set_system_time when no hw clock is present

- **PR #43193**: (jettero) Prevent spurious "Template does not exist" error @ 2017-09-06 20:16:58 UTC
  - PR #39516: (jettero) Prevent spurious "Template does not exist" error (refs: #43193)
  - 6d13535ed0 Merge pull request #43193 from jettero/template-dne-again
  - cde8ae2dcf Merge branch '2017.7' into template-dne-again

- **ISSUE #42706**: (blarghmatey) Parallel Cache Failure (refs: #43018, #43159)

- **PR #43159**: (jubrad) Bp 43018 @ 2017-09-05 22:29:16 UTC
  - PR #43056: (damon-atkins) safe_filename_leaf(file_basename) and safe_filepath(file_path_name) (refs: #43159, #43172)
- **PR #43018**: (jubrad) Update state.py (refs: #43159, #43727)
  - 015bc57d9 Merge pull request #43159 from jubrad/bp-43018
  - 25419a56db Merge branch '2017.7' into bp-43018
  - 971bc0890 Merge branch '2017.7' into bp-43018
  - 4f86c65e5 access safe_filename_leaf through utils.files, changed in #43172
  - 42064883ea state.py remove unused urllib import
  - 4957268b37 update state.py to use safe_filename_leaf
  - b8ead879ed Fixing lint issues
  - 446457d017 Swapping from for import
  - fb80e17400 state.py: fix import and utf8 encode before quote

- **PR #43232**: (terminalmage) Improve inheritance in salt.utils.gitfs @ 2017-09-05 20:37:06 UTC
  - 6e1b541b46 Merge pull request #43232 from terminalmage/gitfs-inheritance
  - 53bd3a3e23 Improve inheritance in salt.utils.gitfs

- **PR #43238**: (s0undt3ch) Include the line number by default on the log file format @ 2017-09-05 20:31:54 UTC
  - 086bb20091 Merge pull request #43238 from s0undt3ch/2017.7
  - 630a1db3ab Include the line number by default on the log file format

- **PR #43294**: (twangboy) Win build scripts @ 2017-09-05 20:12:54 UTC
  - 09dc58cde5 Merge pull request #43294 from twangboy/win_build_scripts
  - 9979c966a3 Remove Py2 and Py3 in the same run
  - a5d9f85db6 Modifications to build scripts

- **PR #43322**: (rallytime) [2017.7] Merge forward from 2016.11 to 2017.7 @ 2017-09-05 18:21:26 UTC
  - 21ab306ef4 Merge pull request #43322 from rallytime/merge-2017.7
  - b1062f8c15 Merge branch '2016.11' into '2017.7'
    - 02867fdcd2 Merge pull request #43277 from rallytime/owners-file
      - 2b4da0f0e7 Add CODEOWNERS file
    - 1c1c484479 Merge pull request #43312 from lordcirth/fixed-cron-docs
      - ec94a13750 cron docs: Remind user to use quotes for special strings
    - 0d1ed4b750 Merge pull request #43290 from lordcirth/fixed-file-path-docs
      - 14a4591854 file.py docs: correct group and mode
      - d4214ca283 file.py docs: specify absolute paths
    - 26ff89539e Merge pull request #43274 from terminalmage/fixed-int-types
      - d533877743 Use six.integer_types instead of int
    - cf21f91fb2 Merge pull request #43271 from twangboy/win_fixed_pkg.install
      - 91b062f564 Fix formatting issue, spaces surrounding +

- **PR #43324**: (twangboy) Fix unit.modules.test_chef for Windows @ 2017-09-05 16:40:11 UTC
- 62429c547d Merge pull request #43324 from twangboy/fix_unit.modules.test_chef
- 5bd5ea042a Fix unit.modules.test_chef for Windows

- **PR #43268:** (rallytime) Back-port #43237 to 2017.7 @ 2017-09-01 18:17:13 UTC
  - **PR #43237:** (timka) .utils.aws.get_location() expects a dict (refs: #43268)
  - 367668a0a3 Merge pull request #43268 from rallytime/bp-43237
  - 047ad07da4 .utils.aws.get_location() expects a dict

- **PR #43270:** (rallytime) [2017.7] Merge forward from 2016.11 to 2017.7 @ 2017-09-01 18:09:46 UTC
  - 02504dd363 Merge pull request #43270 from rallytime/merge-2017.7
  - f8b025f6dc Merge branch '2016.11' into '2017.7'
  - 3a0b02f3ae Merge pull request #43228 from twangboy/win_fix_pkg.install
    - 13dfabb1ce Fix regex statement, add .
    - 31ff69f0ad Add underscore to regex search
    - 3cf2b6575c Fix spelling
    - ed030a35a5 Use regex to detect salt-minion install
    - e5daf495a Fix pkg.install

- b4c689df5 Merge pull request #43191 from viktorkrivak/fix-apache-config-multi-entity
  - c15bcbe1cc Merge remote-tracking branch 'upstream/2016.11' into fix-apache-config-multi-entity
  - 4164047951 Fix apache.config with multiple statement At this moment when you post more than one statement in config only last is used. Also file is rewrited multiple times until last statement is written. Example: salt '*' apache.config /etc/httpd/conf.d/ports.conf config="[{'Listen': '8080'},
{'Proxy': "Something"}]" Ends only with Proxy Something and ignore Listen 8080. This patch fix this issue.

- b90e59ede9 Merge pull request #43154 from lomeroe/bp-43116-2016.11
- 8f593b0b02 verify that files exist before trying to remove them, win_file.remove raises an exception if the file does not exist
- 33a30bac06 correcting bad format statement in search for policy to be disabled
- acc3d7ac82 correct fopen calls from salt.utils for 2016.11’s utils function
- 2da1cdd109 lint fix
- 61bd12c0de track xml namespace to ensure policies w/duplicate IDs or Names do not conflict
- f232bed9f9 add additional checks for ADM policies that have the same ADMX policy ID (#42279)

- **ISSUE #42459:** (iavael) Broken ldap groups retrieval in salt.auth.ldap after upgrade to 2017.7 (refs: #43283)

- **PR #43283:** (DmitryKuzmenko) Fix ldap token groups auth. @ 2017-09-01 17:49:46 UTC
  - ece0e393ef Merge pull request #43283 from DSRCorporation/bugs/42459_broken_ldap_groups
  - 3ad6911210 Fix for tests: don’t require ‘groups’ in the eauth token.
  - 1f104cf85b Fix ldap token groups auth.

- **PR #43149:** (BenoitKnecht) Fix iptables.get_rules when rules contain --nfmask or --ctmask @ 2017-09-01 15:57:05 UTC
  - 4f023c4cb6 Merge pull request #43149 from BenoitKnecht/2017.7.1
- 3c1ddc9bde modules: iptables: correctly parse `--nfmask/--ctmask`

- **ISSUE #43258**: (nomeelnoj) metadata_server_grains problems (refs: #43265)
- **PR #43265**: (gtmanfred) make sure meta-data grains work on ec2 @ 2017-09-01 15:31:12 UTC
  - cf2b75bb86 Merge pull request #43265 from gtmanfred/2017.7
  - 04dd8edbed make sure meta-data grains work on ec2
- **PR #43299**: (twangboy) Fix `unit.netapi.rest_cherrypy.test_tools` for Windows @ 2017-09-01 15:13:43 UTC
  - 618b221895 Merge pull request #43299 from twangboy/win_fix_netapi_cherrypy
  - fd74ac603 Merge branch '2017.7' into win_fix_netapi_cherrypy
- **PR #43300**: (twangboy) Fix `unit.netapi.rest_tornado.test_handlers` for Windows @ 2017-09-01 13:10:11 UTC
  - aee654da92 Merge pull request #43300 from twangboy/win_fix_netapi_rest_tornado
  - c93d2ed386 Use os.sep instead of '/'
  - 3fb24b91a Use os.sep instead of '/'
- **ISSUE #43259**: (mahesh21) NameError: global name '__opts__' is not defined (refs: #43266)
- **PR #43278**: (gtmanfred) bootstrap can come from dunders @ 2017-08-31 13:31:20 UTC
  - **PR #43266**: (gtmanfred) switch virtualbox cloud driver to use __utils__ (refs: #43278)
  - aed2975979 Merge pull request #43278 from gtmanfred.virtualbox
  - c4ae2de30f bootstrap can come from dunders
- **PR #42975**: (brejoc) Added unit tests for Kubernetes module @ 2017-08-30 20:30:16 UTC
  - 479e0e06ac Merge pull request #42975 from brejoc/tests-for-kubernetes-module
  - fdad9177b5 Merge branch '2017.7' into tests-for-kubernetes-module
  - c227cb25ad Skipping test on ImportError
  - bd76a870ce Dunder vars are now defined via setup_loader_modules
  - 3c99e61637 Renamed test to match new convention
  - caf78d206d Fixed imports for pytest
  - c8e98c88da Added unit tests for Kubernetes module
- **ISSUE #42935**: (BenjaminSchubert) docker_image.present always ends up failing even on correct result. (refs: #43176)
- **PR #43176**: (terminalmage) docker_image states: Handle Hub images prefixed with "docker.io/" @ 2017-08-30 20:08:13 UTC
  - ca7df1d4cf Merge pull request #43176 from terminalmage/issue42935
  - df18a89836 Lint: Remove unused import
  - 7279f98e92 docker_image states: Handle Hub images prefixed with "docker.io/"
  - f7c945f6e4 Prevent spurious "Template does not exist" error
30.2.50 Salt 2017.7.4 Release Notes

Version 2017.7.4 is a bugfix release for 2017.7.0.

Statistics

- Total Merges: 8
- Total Issue References: 4
- Total PR References: 11
- Contributors: 6 (Ch3LL, garethgreenaway, gtmanfred, marccardinal, rallytime, terminalmage)

Changelog for v2017.7.3..v2017.7.4

- **PR #46074**: (Ch3LL) Update 2017.7.4 Release Notes with new fixes @ 2018-02-16 16:47:56 UTC
  - b5b083fd26 Merge pull request #46074 from Ch3LL/update-7.4
  - 8d0eeeb059 Update 2017.7.4 Release Notes with new fixes
- **ISSUE #45790**: (bdarnell) Test with Tornado 5.0b1 (refs: #46066)
- **PR #46066**: (rallytime) Pin tornado version in requirements file @ 2018-02-16 16:40:05 UTC
  - 32f3d00e44 Merge pull request #46066 from rallytime/pin-tornado
  - 6dc1a3b9dc Pin tornado version in requirements file
- **PR #46036**: (terminalmage) git.latest: Fix regression with identity file usage @ 2018-02-16 13:57:23 UTC
  - 85761ee650 Merge pull request #46036 from terminalmage/issue43769
  - e2140d9a84 Mock the ssh.key_is_encrypted utils func
  - 169924b3fe Move ssh.key_is_encrypted to a utils module temporarily
  - 54f4d78f7a Only keep ssh.py in the Windows installer
  - 5f04531e1b Keep ssh state and execution modules in the installer
  - f2b69f703d git.latest: Fix regression with identity file usage
- **PR #46009**: (Ch3LL) Add 2017.7.4 Release Notes with PRs @ 2018-02-13 16:40:30 UTC
  - 6d534c6c7e Merge pull request #46009 from Ch3LL/rm_7.4
  - ac0baf4b34 Add 2017.7.4 Release Notes with PRs
- **ISSUE #45976**: (ghost) 6a5e0f9 introduces regression that breaks Vault module for salt masterless (refs: #45981)
- **PR #45981**: (gtmanfred) use local config for vault when masterless @ 2018-02-13 15:22:01 UTC
  - ca76a0h328 Merge pull request #45981 from gtmanfred/2017.7.3
  - 0d448457dc apparently local is not set by default
  - 2a92f4bc16 use local config for vault when masterless
- **ISSUE #45915**: (MatthiasKuehneE11erhold) 2017.7.3: Salt-SSH & Vault Pillar: Permission denied "minion.pem" (refs: #45928)
- **PR #45928**: (rallytime) Back-port #45928 to 2017.7.3 @ 2018-02-09 22:29:10 UTC

30.2. Previous Releases
Changes to file.blockreplace State

The append_newline argument was added to this state. Additionally, to improve idempotence, if the string represented by marker_end is found in the middle of the line, the content preceding the marker will be removed when the block is replaced. This allows one to remove append_newline: False from the SLS and have the block properly replaced if the end of the content block is immediately followed by the marker_end (i.e. no newline before the marker).

Note: This will require changes to your SLS if your marker_end does not include the very beginning of the content you want to keep.
See the `file.blockreplace` state documentation for further information.

**Changelog for v2017.7.4..v2017.7.5**

*Generated at: 2018-05-26 21:50:00 UTC*

- **PR #46612**: (Ch3LL) Add changelog to 2017.7.5 release notes @ 2018-03-19 20:47:38 UTC
  - 19bb725698 Merge pull request #46612 from Ch3LL/7.5_rn
  - 6076ba2ee Add changelog to 2017.7.5 release
- **PR #46572**: (dmurphy18) Addition of -sa flag to allow for revision numbers other than -0 or -1 @ 2018-03-19 20:07:26 UTC
  - 31c78ae5c1 Merge pull request #46572 from dmurphy18/update_xxxbuild
  - c87511570d Merge branch '2017.7.5' into update_xxxbuild
- **ISSUE saltstack/salt-jenkins#884**: (gtmanfred) [2017.7.5][Fedora 27][py2/py3] integration.states.test_npm.NpmStateTest.test_npm_install_url_referenced_package (refs: #46577)
- **PR #46577**: (gtmanfred) Fix npm issue @ 2018-03-19 11:51:04 UTC
  - cdd76fa4d Merge pull request #46577 from gtmanfred/2017.7.5
  - 78cbf7b5cd Fix npm issue
  - c76f7eb028 enable debug logging on the minionlog
- **PR #46551**: (terminalmage) Fix failing pkg integration test on OpenSUSE @ 2018-03-19 11:50:12 UTC
  - e6682ca60c Merge pull request #46551 from terminalmage/salt-jenkins-885
  - 7035e7e65 Change versionadded to show that 2018.3.0 will not have this function
  - 010d260d06 Rewrite failing Suse pkg integration test
  - f3f5dec239 zypper.py: fix version argument being ignored
  - 214df2dd30 Add pkg.list_repo_pkgs to zypper.py
    - 0a541613f2 Additon of -sa flag to allow for revision numbers other than -0 or -1
- **ISSUE saltstack/salt-jenkins#886**: (gtmanfred) [2017.7.5][Fedora 26/Ubuntu 17.10][py3] integration.states.test_pip.PipStateTest.test_46127_pip_env_vars (refs: #46563)
- **PR #46563**: (gtmanfred) virtualenv version too old for python3.6 @ 2018-03-15 20:17:16 UTC
  - bd62699cc0 Merge pull request #46563 from gtmanfred/2017.7.5
  - 8d5ab72983 virtualenv version too old for python3.6
- **PR #46561**: (gtmanfred) disable verbose @ 2018-03-15 16:36:41 UTC
  - 2916708124 Merge pull request #46561 from gtmanfred/2017.7.5
  - 2c39ac6dbb disable verbose
- **PR #46537**: (rallytime) Back-port #46529 to 2017.7.5 @ 2018-03-14 14:47:28 UTC
  - **PR #46529**: (gtmanfred) retry if there is a segfault (refs: #46537)
  - ee3bf6e3e2 Merge pull request #46537 from rallytime/bp-46529
  - 289c7a228f retry if there is a segfault
- **PR #46519**: (rallytime) Update man pages for 2017.7.5 @ 2018-03-13 20:00:51 UTC
- `1271536a89` Merge pull request #46519 from rallytime/man-pages-2017.7.5
- `782a5584f5` Update man pages for 2017.7.5

**ISSUE #46207**: (seanjnkns) Issue #44034 still unresolved (refs: #46493)

**ISSUE #44034**: (seanjnkns) salt-call pillar overrides broken in 2016.11.8 and 2017.7.2 (refs: #44483)

**PR #46493**: (terminalmage) salt-call: don’t re-use initial pillar if CLI overrides passed @ 2018-03-12 20:41:52 UTC

- `#44483`: (terminalmage) salt-call: account for instances where __pillar__ is empty (refs: #46493)
- `0e90c8ca6f` Merge pull request #46493 from terminalmage/issue46207
- `f06ff68f10` salt-call: don’t re-use initial pillar if CLI overrides passed

**PR #46450**: (gtmanfred) load grains for salt.cmd runner @ 2018-03-12 18:52:22 UTC

- `b11a8fc8e0` Merge pull request #46450 from gtmanfred/salt_runner
- `7974ff7264` load grains for salt.cmd runner

**ISSUE #30115**: (gtmanfred) [BUG] listen does not appear to respect the special names directive (refs: #46337)

**PR #46337**: (gtmanfred) Fix using names with listen and listen_in @ 2018-03-12 18:50:00 UTC

- `22d753364b` Merge pull request #46337 from gtmanfred/2017.7
- `d6d9e36359` add tests for names and listen/listen_in
- `3f8e0db572` let listen_in work with names
- `7161f4d4df` fix listen to be able to handle names

**PR #46413**: (meaksh) Explore 'module.run' state module output in depth to catch "result" properly @ 2018-03-12 18:49:07 UTC

- `b7191b8782` Merge pull request #46413 from meaksh/2017.7-explore-result-in-depth
- `885751634e` Add new unit test to check state.apply within module.run
- `9f19ad5264` Rename and fix recursive method
- `1476ace558` Fix Python3 and pylint issue
- `726ca3044d` Explore 'module.run' response to catch the 'result' in depth

**PR #46496**: (gtmanfred) more test kitchen clean up @ 2018-03-12 18:28:34 UTC

- `02a79a2014` Merge pull request #46496 from gtmanfred/kitchen
- `da002f78d0` include virtualenv path for py3 windows
- `fe2efe03ea` remove duplicate setup

**ISSUE #46329**: (bdrung) test_create_deployments fails with python-kubernetes 4.0.0 (refs: #46330)

**PR #46330**: (bdrung) Fix ValueError for template in AppsV1beta1DeploymentSpec @ 2018-03-12 16:56:18 UTC

- `5c4c182d75` Merge pull request #46330 from bdrung/fix_kubernetes_test_create_deployments
- `5008c53c44` Fix ValueError for template in AppsV1beta1DeploymentSpec

**ISSUE #46479**: (rongshengfang) boto_ec2.instance_present throwing KeyError exception when associating EIP to an existing instance (refs: #46482)

**PR #46482**: (rongshengfang) Fix KeyError in salt/states/boto_ec2.py @ 2018-03-12 15:13:13 UTC

- `c7e05d3ff4` Merge pull request #46482 from rongshengfang/fix-keyerror-in-instance_present
- ed8c83e89a Fix KeyError in salt/states/boto_ec2.py when an EIP is being associated to an existing instance with the instance_present state.
- **PR #46463**: (terminalmage) Update requirements files to depend on mock>=2.0.0 @ 2018-03-09 19:24:41 UTC
  - 573d51afec Merge pull request #46463 from terminalmage/mock-2.0
  - b958b4699c Update requirements files to depend on mock>=2.0.0
- **ISSUE #46299**: (gclinch) debconf module fails on Python 3 (refs: #46300)
- **PR #46422**: (rallytime) Back-port #46300 to 2017.7 @ 2018-03-09 19:19:25 UTC
  - **PR #46300**: (gclinch) Python 3 support for debconfmod (fixes #46299) (refs: #46422)
  - a154d35fc7 Merge pull request #46422 from rallytime/bp-46300
  - 829dfde8e8 Change stringutils path to old utils path for 2017.7
  - 91db2e0782 Python 3 support
- **PR #46320**: (mcalmer) add warning about future config option change @ 2018-03-09 17:48:29 UTC
  - 2afaca17a1 Merge pull request #46320 from mcalmer/warn-kubernetes
  - c493ced415 add warning about future config option change
- **PR #46449**: (bdrung) Make documentation theme configurable @ 2018-03-09 17:47:15 UTC
  - c7f95581e3 Merge pull request #46449 from bdrung/make-doc-theme-configurable
  - 4a5da2d144 Make documentation theme configurable
- **PR #46162**: (rallytime) Add team-suse to CODEOWNERS file for zypper files @ 2018-03-09 17:46:13 UTC
  - 10ce0e9e20 Merge pull request #46162 from rallytime/team-suse-zypper-owner
  - 13a295a3b7 Add pkg and snapper to team-suse
  - 35c7b7b0d3 Add btrfs, xfs, yumpkg, and kubernetes file to team-suse
  - 485d777ac0 Add team-suse to CODEOWNERS file for zypper files
- **PR #46434**: (gtmanfred) split return key value correctly @ 2018-03-09 17:45:21 UTC
  - cac096b311 Merge pull request #46434 from gtmanfred/highstate_return
  - d18f1a55a7 fix pylint
  - 9e2c3f7991 split return key value correctly
- **ISSUE #44452**: (konstest) salt-cloud can’t create snapshots, because there is a bug in the Unicode name of the virtual machine (refs: #46455)
- **PR #46455**: (whytewolf) .format remove fix for #44452 @ 2018-03-09 17:37:19 UTC
  - 7dd71101ce Merge pull request #46455 from whytewolf/Issue_44452_unicode_cloud
  - 5fe474b1a8 .format remove fix for #44452
- **PR #46428**: (twangboy) Fix issue with dev env install on Windows @ 2018-03-09 14:52:46 UTC
  - 4c8d9026d3 Merge pull request #46428 from twangboy/win_fix_reqs
  - e7ab97cc17 Remove six as a hard dep for Salt
  - cc67e5c2ef Set six to 1.11.0
- **PR #46454**: (gtmanfred) fix windows for kitchen @ 2018-03-08 21:19:31 UTC
  - e834d9a63b Merge pull request #46454 from gtmanfred/kitchen
• ISSUE #46451: (gmacon) SPM fails to start with customized cache location (refs: #46452)

• PR #46452: (gtmanfred) make spm cache_dir instead of all cachedirs @ 2018-03-08 21:12:20 UTC
  - 2886dca88f Merge pull request #46452 from gtmanfred/spm_cache_dir
  - 169cf7a4e2 make spm cache_dir instead of all cachedirs

• PR #46446: (bdrung) Fix various typos @ 2018-03-08 21:11:47 UTC
  - a188984cd9 Merge pull request #46446 from bdrung/fix-typos
  - 7e6e80be87 heat: Fix spelling mistake of environment
  - a3c54b50f6 Fix various spelling mistakes

• ISSUE #20581: (notpeter) Many environments: one pillar_root (all your envs are belong to base) (refs: #46309)

• PR #46309: (bdrung) Support dynamic pillar_root environment @ 2018-03-08 19:15:35 UTC
  - e35fc5263e Merge pull request #46309 from bdrung/dynamic-pillarenv
  - 584b451fd1 Support dynamic pillar_root environment

• ISSUE #44032: (PhilippeAB) blockreplace marker_end isn't applied with newline (refs: #46430)

• PR #46430: (terminalmage) Improve reliability/idempotence of file.blockreplace state @ 2018-03-08 15:41:38 UTC
  - 35fe9827fe Merge pull request #46430 from terminalmage/issue44032
  - f9f187e915 Improve reliability/idempotence of file.blockreplace state

• PR #46429: (twangboy) Fix problem with __virtual__ in win_snmp @ 2018-03-07 23:26:46 UTC
  - 2bad0a21c0 Merge pull request #46429 from twangboy/win_fix_snmp
  - 8995a9b8de Fix problem with __virtual__ in win_snmp

• PR #46100: (jfindlay) Handle IPv6 scope parameter in resolv.conf @ 2018-03-07 19:51:20 UTC
  - 93a572f229 Merge pull request #46100 from jfindlay/resolv_scope
  - d5561bedaf tests.unit.grains.core add scoped IPv6 nameserver
  - 4e2e62d508 salt.utils.dns parse scope param for ipv6 servers

• PR #46420: (bdrung) Fix SSH client exception if SSH is not found @ 2018-03-07 17:49:00 UTC
  - 5acc1d5c54 Merge pull request #46420 from bdrung/2017.7
  - e48c13d9e0 Fix SSH client exception if SSH is not found

• PR #46379: (angeloudy) TypeError: a bytes-like object is required, not 'str' @ 2018-03-07 15:00:47 UTC
  - ca6a76e317 Merge pull request #46379 from angeloudy/2017.7
  - 3acb59c74c Merge branch '2017.7' into 2017.7
  - d971e0c08b Fix indent
  - 269514683f Update http.py
  - 908c040ac3 Update http.py
  - 51ba3c135b Update http.py
  - 14aba24111 fix bytes-object required error in python 3
• PR #46404: (gtmanfred) get 2017.7 ready to switch over to the new jenkins @ 2018-03-07 14:29:30 UTC
  - 73f9233557 Merge pull request #46404 from gtmanfred/kitchen
  - c56baa95a8 clone .git for the version tests
  - 362061b5b fix unhold package for debian
  - 52197d2ba fix minion log path

• ISSUE #46192: (asymetrix) salt-log-setup: AttributeError 'NoneType' object has no attribute 'flush' (refs: #46310)

• PR #46310: (twangboy) Update the Windows installer build scripts @ 2018-03-06 20:21:58 UTC
  - ca28cf4e4 Merge pull request #46310 from twangboy/win_update_installer_build
  - bc58b195e6 Update the installer build

• PR #46316: (twangboy) Fix issues with the DSC module @ 2018-03-06 20:16:18 UTC
  - dcecebeca3 Merge pull request #46316 from twangboy/win_fix_dsc
  - 2042d35d9 Fix issues with the DSC module

• PR #46394: (Ch3LL) Add mac py2 and py3 packages to mac installation docs @ 2018-03-06 16:45:30 UTC
  - 95586678c3 Merge pull request #46394 from Ch3LL/mac_doc
  - 158add6661 change odownload to odownload-[python_version]
  - 21aa84c8e9 Add mac py2 and py3 packages to mac installation docs

• ISSUE #44831: (kivoli) cmd.wait deprecated but cannot replicate conditional execution with onchanges (refs: #46338)

• PR #46338: (rallytime) Remove cmd.wait deprecation reference in docs @ 2018-03-05 21:48:52 UTC
  - 07b5d09ac1 Merge pull request #46338 from rallytime/fix-44831
  - 90771da999 Remove cmd.wait deprecation reference in docs

• ISSUE #42438: (ajoaugustine) Failed to send message: hipchat-message (refs: #46333)

• PR #46333: (danlsgiga) Fixes color parameter mismatch and handles 204 responses correctly @ 2018-03-05 19:42:26 UTC
  - 3849e7a085 Merge pull request #46333 from danlsgiga/issue-42438
  - 3b13f7b44 Revert changes in the code and change docs instead
  - 38114a65d8 Fixes color parameter mismatch and handles 204 responses correctly

• ISSUE #44935: (grinapo) module.file.replace string seems to be mutated into arrays (refs: #46322)

• PR #46322: (terminalmage) yamlify_arg: don’t treat leading dashes as lists @ 2018-03-05 15:40:17 UTC
  - a82f1b063 Merge pull request #46322 from terminalmage/issue44935
  - 85a6a9893 yamlify_arg: don’t treat leading dashes as lists

• PR #46327: (samilaine) Modify the way a FQDN is handled in the vmware cloud provider. @ 2018-03-05 15:35:37 UTC
  - da5c282cb2 Merge pull request #46327 from samilaine/fix-vmware-cloud-fqdn
  - 4b8df326f Modify the way a FQDN is handled in the vmware cloud provider.

• PR #46318: (terminalmage) Skip type-checking for several gitfs/git_pillar/winrepo params @ 2018-03-05 15:04:27 UTC
- 78c45d3786 Merge pull request #46318 from terminalmage/squelch-warnings
- 5889b36646 Skip type-checking for several gitfs/git_pillar/winrepo params

- **ISSUE #45535:** (whytwolf) module_dirs left out salt-ssh, leaving custom ext_pillars and modules out of salt-ssh (refs: #46312)

- **PR #46312:** (gtmanfred) add module_dirs to salt ssh thin tarball @ 2018-03-05 15:00:48 UTC
  - bb0d6fc263 Merge pull request #46312 from gtmanfred/2017.7
  - 749ae580ed add module_dirs to salt ssh thin tarball

- **ISSUE #46127:** (redbaron4) pip.installed does not pass env_vars when calling freeze to check if package is already installed (refs: #46242)

- **PR #46242:** (redbaron4) Pass env_vars to pip.freeze @ 2018-03-05 14:53:13 UTC
  - 88b5f7383d Merge pull request #46242 from redbaron4/fixed-46127
  - 06db4a51617 Make changes from review
  - 727ebe1056 Merge branch '2017.7' into fix-46127
  - 081de3e8baf Fix Python3 test errors
  - aa9d709015 Pass env_vars to pip.freeze

- **PR #46265:** (Ch3LL) Add username/password to profitbricks conf for cloud tests @ 2018-03-02 21:40:22 UTC
  - a0716c4fe4 Merge pull request #46265 from Ch3LL/profit_cloud
  - d4893eab4c Add username/password to profitbricks conf for cloud tests

- **PR #46306:** (rallytime) Back-port #46256 to 2017.7 @ 2018-03-02 21:37:26 UTC
  - PR #46256: (rallytime) Don't install msgpack 0.5.5 (refs: #46306)
  - ed7b9fa7e0 Merge pull request #46306 from rallytime/bp-46256
  - 6493bce4a8 Don't install msgpack 0.5.5

- **PR #46208:** (terminalmage) Blacklist os.umask @ 2018-03-02 18:46:07 UTC
  - 8c2c4e3316 Merge pull request #46208 from terminalmage/audit-umask-usage
  - 9c9aaddc8e Disable blacklisted-function check for legitimate uses
  - 58a11aaa26 Disable pylint check in salt-ssh shim
  - 0cad6e7659 Blacklist os.umask
  - 31b1d98c8c Replace direct use of os.umask with use of existing context manager
  - 82ce43e4e18 Prevent failed os.makedirs from leaving modified umask in place

- **PR #46293:** (eliasp) Fix Python3 comparison TypeError in salt.modules.upstart @ 2018-03-02 16:36:10 UTC
  - PR #46242: (eliasp) Fix Traceback when using the service.enabled state on non-booted systems (refs: #46293)
  - 978e6949e0 Merge pull request #46293 from eliasp/2017.7-4624-py3-compat
  - 2e80b09c8 Fix Python3 comparison TypeError in salt.modules.upstart

- **ISSUE #46128:** (Boulet-) Mountpoint in git_pillar (refs: #46264)

- **PR #46264:** (terminalmage) Fix incorrect merge conflict resolution @ 2018-03-02 14:21:13 UTC
  - bee4a66d0c Merge pull request #46264 from terminalmage/issue46128
- 68000b7211 Fix incorrect merge conflict resolution

- **PR #46296**: (vutny) [DOC] Add missing params to pillar.get docstring @ 2018-03-02 14:19:41 UTC
  - 1e0b3aa348 Merge pull request #46296 from vutny/doc-pillar-get
  - 1fa8331e1 [DOC] Add missing params to pillar.get docstring

- **PR #45874**: (GwiYeong) fix for local client timeout bug @ 2018-03-01 19:39:35 UTC
  - c490a50452 Merge pull request #45874 from GwiYeong/2017.7-local-client-hotfix
  - 949aefc82b Merge branch '2017.7' into 2017.7-local-client-hotfix
  - 45d663f435 fix for local client timeout bug

- **PR #46261**: (rallytime) [2017.7] Merge forward from 2016.11 to 2017.7 @ 2018-03-01 17:55:23 UTC
  - 8e8a3a2897 Merge pull request #46261 from rallytime/merge-2017.7
  - 8256ae5ee5 Merge branch '2016.11' into '2017.7'
    - 140ef46b9 Merge pull request #46253 from rallytime/doc-banners
      - 07ed67d3b Update docbanner for SaltConf18
    - 9fe86ee520 Merge pull request #46179 from wedge-jarrad/cifs-remount-fix
      - 9ca254313 Add credentials and secretfile to mount.mounted mount_invisible_keys

- **ISSUE #44046**: (t2b) docker_container.running states fail if the argument ulimits is set and a watch requisite is triggered (refs: #46276)

- **PR #46276**: (terminalmage) salt.utils.docker.translate_input: operate on deepcopy of kwargs @ 2018-03-01 15:37:44 UTC
  - 88a3166589 Merge pull request #46276 from terminalmage/issue44046
  - a14d4d8c salt.utils.docker.translate_input: operate on deepcopy of kwargs

- **ISSUE #46182**: (oeuftete) docker_container.running is sensitive to HostConfig Ulimits ordering (refs: #46183)

- **PR #46183**: (oeuftete) Fix docker_container.running HostConfig Ulimits comparison @ 2018-02-28 22:22:11 UTC
  - da6039b8f Merge pull request #46183 from oeuftete/fx-docker-container-running-host-config-ulimits
  - 5b09644429 Sort lists from Ulimits before comparing
  - 0b80f0226 Update old dockerng doc ref

- **ISSUE #46259**: (terminalmage) git_pillar_branch overrides branch defined in git_pillar configuration (refs: #46260)

- **ISSUE #46258**: (terminalmage) git_pillar_base doesn’t work for values when PyYAML loads them as int/float (refs: #46260)

- **PR #46260**: (terminalmage) Normalize global git_pillar/winrepo config items @ 2018-02-28 22:05:26 UTC
  - 509429f08c Merge pull request #46260 from terminalmage/git_pillar
  - b1ce2501fd Normalize global git_pillar/winrepo config items

- **PR #46101**: (jfindlay) In OpenRC exec module, make sure to ignore retcode on status @ 2018-02-28 20:01:37 UTC
  - a97a36f0b Merge pull request #46101 from jfindlay/openrc_ret
  - 2eef3c65a6 tests.unit.modules.gentoo_service add retcode arg
- 81ec66fd8b modules.gentoo_service handle stopped retcode

- **PR #46254**: (rallytime) Update enterprise banner @ 2018-02-28 19:54:03 UTC
  - 1a17593c05 Merge pull request #46254 from rallytime/enterprise-banner
  - 5fae3d6df Update enterprise banner

- **PR #46250**: (terminalmage) Add documentation to the fileserver runner @ 2018-02-28 18:53:49 UTC
  - 8c50f32bd Merge pull request #46250 from terminalmage/runner-docs
  - 91b4895087 Add documentation to the fileserver runner

- **ISSUE #46215**: (racker-markh) salt-cloud will only intermittently build rackspace cloud instances with purely private networks (refs: #46243)

- **PR #46243**: (racker-markh) Don't ignore 'private_ips' unnecessarily @ 2018-02-28 15:28:29 UTC
  - 53067cca43 Merge pull request #46243 from racker-markh/fix-openstack-private-network-issue
  - 50c1e140f0 Don't check deny private_ips already in the original list of private_ips

- **ISSUE #46109**: (rombert) archive.extracted takes a long time (> 4 minutes) even though directory exists (refs: #46239)

- **PR #46239**: (terminalmage) archive.extracted: don't check source file when if_missing path exists @ 2018-02-28 15:01:36 UTC
  - 15405c8760 Merge pull request #46239 from terminalmage/issue46109
  - 586d8b0def archive.extracted: don't check source file when if_missing path exists

- **PR #46221**: (terminalmage) Fix hanging tests in integration suite @ 2018-02-27 21:32:25 UTC
  - 63e1208e4 Merge pull request #46221 from terminalmage/salt-jenkins-854
  - 0eb012659c Fix hanging tests in integration suite

- **PR #46214**: (vutny) [DOC] Replace note rST block for GitHub @ 2018-02-27 17:42:37 UTC
  - 7917277345 Merge pull request #46214 from vutny/formulas-readme-formatting
  - d702846961 [DOC] Replace note rST block for GitHub

- **PR #46203**: (Ch3LL) Add 2017.7.5 Release Notes File @ 2018-02-26 21:17:48 UTC
  - a2e099b744 Merge pull request #46203 from Ch3LL/7.5_release
  - 6dd3246e9 Add 2017.7.5 Release Notes File

- **PR #46201**: (rallytime) [2017.7] Merge forward from 2016.11 to 2017.7 @ 2018-02-26 18:56:47 UTC
  - 973b227818 Merge pull request #46201 from rallytime/merge-2017.7
  - 9ac2101b9a Merge branch '2016.11' into '2017.7'
  - a4c5417d23 Merge pull request #46132 from rallytime/2016.11_update_version_doc
    * d2196bdf3 Update release versions for the 2016.11 branch

- **ISSUE #34423**: (bdrung) oscodename wrong on Debian 8 (jessie) (refs: #46139)

- **PR #46139**: (bdrung) Add os grains test cases for Debian/Ubuntu and fix oscodename on Ubuntu @ 2018-02-26 16:44:04 UTC
  - 89cf2e5061 Merge pull request #46139 from bdrung/os-grains
  - 0b445f2a37 tests: Add unit tests for _parse_os_release()
- f6069b77ed Fix osfinger grain on Debian
- 8dde55a761 tests: Add os_grains test cases for Debian
- ff02ab9937 tests: Add Ubuntu 17.10 (artful) os_grains test case
- 77d5356aba Fix incorrect oscodename grain on Ubuntu
- 7e62dc9fd2 tests: Support reading os-release files from disk
- a92ec0db1b Make _parse_os_release() always callable
- eee1fe5b38 tests: Dissolve _run_ubuntu_os_grains_tests
- 1d6ef731fe tests: Deduplicate _run_os_grains_tests()

• PR #46133: (rallytime) Update release versions for the 2017.7 branch @ 2018-02-26 16:42:43 UTC
  - c8c71e75ca Merge pull request #46133 from rallytime/2017.7_update_version_doc
  - 0ed338e643 Update release versions for the 2017.7 branch

• ISSUE #46124: (moremo) GitFS saltenv ref won't pick up multiple of the same ref (refs: #46185)

• PR #46185: (terminalmage) gitfs: Fix detection of base env when its ref is also mapped to a different env @ 2018-02-26 14:52:16 UTC
  - 390d592aa6 Merge pull request #46185 from terminalmage/issue46124
  - 3b58dd0da0 gitfs: Fix detection of base env when its ref is also mapped to a different env

• PR #46148: (rallytime) [2017.7] Merge forward from 2017.7.3 to 2017.7 @ 2018-02-23 19:21:38 UTC
  - 705ca88cca Merge pull request #46148 from rallytime/merge-2017.7
  - 25deeb7a6 Merge branch '2017.7.3' into '2017.7'

• PR #46137: (damon-atkins) [2017.7] update ec2 pillar arguments with better names @ 2018-02-23 13:32:04 UTC
  - PR #45878: (damon-atkins) ec2_pillar update to fix finding instance-id (refs: #46137)
  - 10a47dcb34 Merge pull request #46137 from damon-atkins/2017.7_fix_ec2_pillar2
  - 99e7f6a7d3 update ec2 pillar arguments with better names

• ISSUE #46004: (github-abcde) opts file_roots gets overwritten with pillar_roots in orchestration run (refs: #46145)

• PR #46145: (terminalmage) 3 small fixes for runners/orchestration @ 2018-02-22 22:11:11 UTC
  - d74cb14557 Merge pull request #46145 from terminalmage/issue46004
  - 467ff841cd pillar/env argument should default to None and not the value from opts
  - 2a185855ea Better solution for fixing the opts munging in pillar.show_pillar runner
  - e2c4702e0c Update tests to reflect changes to the SaltCacheLoader
  - f9301f3934 Document behavior when orchestration runner invoked with non-orch states
  - 9644579cd0 Instantiate the SaltCacheLoader's fileclient in the __init__
  - f9a6c86e21 salt.runners.pillar.show_pillar: don't modify master opts
  - e0940a9fc4 Properly detect use of the state.orch alias and add orch jid to kwargs

• PR #46135: (rallytime) Back-port #46088 to 2017.7 @ 2018-02-22 15:11:14 UTC
  - PR #46088: (rongzeng54) fix kernel subpackages install bug (refs: #46135)
  - 0398ce0482 Merge pull request #46135 from rallytime/bp-46088
- 57a60f62a3 fix kernel subpackages install bug

- **ISSUE #45837**: (johje349) Salt Cloud does not recognise all Digitalocean sizes (refs: #46115)

- **PR #46136**: (rallytime) Back-port #46115 to 2017.7 @ 2018-02-21 19:17:23 UTC
  - PR #46115: (samodid) update digitalocean salt-cloud driver (refs: #46136)
  - 1fcbbd1e02 Merge pull request #46136 from rallytime/bp-46115
  - 0a481d707f update digitalocean salt-cloud driver

- **PR #45911**: (twangboy) LGPO Module: Convert reg values to unicode for debug @ 2018-02-21 19:02:17 UTC
  - 11e5e8eb86 Merge pull request #45911 from twangboy/win_fix_lgpo_unicode
  - bcde5cc625 Update log statement
  - e9fa53d3b7 Change the Invalid Data Message
  - c818d4b791 Convert reg values to unicode for debug

- **ISSUE #46085**: (zmedico) 2017.7.3 salt master with "open_mode: True" becomes unresponsive if minion submits empty public key (refs: #46123)

- **PR #46123**: (gtmanfred) If no pubkey is passed in openmode fail @ 2018-02-21 19:01:47 UTC
  - 524a6a72a0 Merge pull request #46123 from gtmanfred/2017.7
  - 8d36730ef7 If no pubkey is passed in openmode fail

- **PR #46131**: (vutny) [DOC] Fix code-blocks for reStructuredText @ 2018-02-21 15:47:05 UTC
  - e48fa58012 Merge pull request #46131 from vutny/doc-formula-formatting
  - d8fb051e44 [DOC] Fix code-blocks for reStructuredText

- **ISSUE #42763**: (xuhcc) acme.cert state falsely reports about renewed certificate (refs: #44603)

- **ISSUE #40208**: (bewing) Inconsistent state return when test=True (refs: #44603)

- **PR #46118**: (rallytime) Back-port #44603 to 2017.7 @ 2018-02-21 15:21:42 UTC
  - PR #44603: (oarmstrong) Fix acme state to correctly return on test (refs: #46118)
  - 6ceaa4ee95 Merge pull request #46118 from rallytime/bp-44603
  - 2a2c23c66b Fix acme state to correctly return on test

- **PR #46121**: (rallytime) [2017.7] Merge forward from 2016.11 to 2017.7 @ 2018-02-21 10:07:18 UTC
  - 16c382b55b Merge pull request #46121 from rallytime/merge-2017.7
  - 4c2f504a85 Merge branch '2016.11' into '2017.7'

  - 320c2037e1 Merge pull request #46097 from vutny/fix-https-link
  - 2062fd0e5c [DOC] Put https link to the formulas doc page
• PR #46103: (bdrung) Fix skipping Kubernetes tests if client is not installed @ 2018-02-20 16:33:42 UTC
  - 0eb137fb4c Merge pull request #46103 from bdrung/2017.7
  - dd3f936557 Fix skipping Kubernetes tests if client is not installed
• PR #46070: (Ch3LL) add required arg to dns_check jinja doc example @ 2018-02-16 20:00:44 UTC
  - c3a938e994 Merge pull request #46070 from Ch3LL/fixedoc-dns
  - 2a5d855d97 add required arg to dns_check jinja doc example
• PR #46067: (rallytime) Back-port #45994 to 2017.7 @ 2018-02-16 19:55:27 UTC
  - PR #45994: (nullify005) Fix hosted zone Comment updates & quote TXT entries correctly (refs: #46067)
  - 01042e0875 Fix lint error, use raw
  - 2f712691cf Exclude hidden directories in pkg.refresh_db

30.2. Previous Releases
Salt Documentation, Release 3003.3

- a07bb48726 Correct formatting for lint
- e867bf6f33d Fix Comment being None not “ and inject quotes into the TXT ChangeRecords

**ISSUE #42932**: (bobrik) cmd.run with bg: true doesn't fail properly (refs: #45932)

**PR #45932**: (The-Loeki) Fix cmd run_all bg error @ 2018-02-16 14:53:15 UTC

- PR #39980: (vutny) [2016.3] Allow to use bg kwarg for cmd.run state function (refs: #45932)
- 5e0e2a30e2 Merge pull request #45932 from The-Loeki/fix_cmd_run_all_bg
- f83da7bca5 Merge branch '2017.7' into fix_cmd_run_all_bg
- 77178bca Merge branch '2017.7' into fix_cmd_run_all_bg
- c54fe7a2d cmd: move separate DRY logging blocks into _run, prevent logging on bg=True, don't use_vt on bg
- e881f81a9b cmd run: when running in bg, force ignore_retcode=True

**PR #46062**: (vutny) Fix typo in postgres_user.present state function @ 2018-02-16 14:44:29 UTC

- 45ace39961 Merge pull request #46062 from vutny/pg-user-state-fix-typo
- 5a5fe4e95e Fix typo in postgres_user.present state function

**PR #45763**: (twangboy) Fix rehash function in win_path.py @ 2018-02-15 20:05:16 UTC

- edcb64de76 Merge pull request #45763 from twangboy/win_fix_path_rehash
- b9a2bc7b29 Fix hyperlinks
- 29912ac15 Move the test_rehash test to test_win_functions
- adc594c183 Remove duplicate link
- e84628c1eb Add some comments to the code
- d50df5f582f Add additional info to docs for broadcast_setting_change
- 3a54e09cd9 Rename setting to message
- a3f9e99bc0 Change to a generic function to broadcast change
- 79299361c3 Create refresh_environment salt util
- 967b83940c Fix rehash function

**PR #46042**: (jfindlay) Revise file_tree pillar module documentation @ 2018-02-15 19:29:52 UTC

- PR #46027: (jfindlay) Revise file_tree pillar module documentation (refs: #46042)
- a46bc54dc Merge pull request #46042 from jfindlay/file_tree_doc
- b9a2bc7b29 Fix hyperlinks
- 3c6a5f967 salt.pillar.file_tree provide better debug info
- bb1dc41c5e salt.pillar.file_tree no stack trace when nodegroups undefined

**PR #46013**: (rallytime) Back-port #45598 to 2017.7 @ 2018-02-15 16:11:05 UTC

- PR #45598: (nullify005) Patch around ResourceRecords needing to be present for AliasTarget (refs: #46013)
- de86126dd8 Merge pull request #46013 from rallytime/bp-45598
- 2ea3f5f43 No lazy logging
- f427b0fede Change formatting style of logging lines per review
- ebb244396b Patch around ResourceRecords needing to be present for AliasTarget entries to work

- **ISSUE #45825:** (philpep) selinux.fcontext_policy_present doesn’t work on Centos 6 with filetype = all files (refs: #45826)

- **PR #46016:** (rallytime) Back-port #45826 to 2017.7 @ 2018-02-14 18:16:24 UTC
  - PR #45826: (philpep) Fix selinux.fcontext_policy_present for Centos 6 (refs: #46016)
  - 07e5735471 Merge pull request #46016 from rallytime/bp-45826
  - 1916e5c4a4 Fix selinux.fcontext_policy_present for Centos 6

- **ISSUE #45784:** (oarmstrong) SELinux module fcontext_get_policy fails with long regex (refs: #45785)

- **PR #46015:** (rallytime) Back-port #45785 to 2017.7 @ 2018-02-14 18:16:09 UTC
  - PR #45785: (oarmstrong) m/selinux.fcontext_get_policy allow long filespecs (refs: #46015)
  - a1f4092811 Merge pull request #46015 from rallytime/bp-45785
  - ef66fb1492 Resolve linting errors
  - 8047066c46 Remove unused import
  - 87f45935a Add tests for salt.modules.selinux.fcontext_get_policy
  - baf6b4e6e Ensure parsed fields are stripped
  - a830a6e819 m/selinux.fcontext_get_policy allow long filespecs

- **PR #46012:** (rallytime) Back-port #45462 to 2017.7 @ 2018-02-14 18:14:56 UTC
  - PR #45462: (aphor) emit port cli version, variants as separate args (refs: #46012)
  - 96097c037e Merge pull request #46012 from rallytime/bp-45462
  - 9f76836a6c emit port cli version, variants as separate args

- **PR #45991:** (terminalmage) yumpkg: Fix a couple issues with _get_extra_opts @ 2018-02-14 16:48:28 UTC
  - 1279924f5f Merge pull request #45991 from terminalmage/fix-duplicate-extra-opts
  - 916766f651 yumpkg: Fix a couple issues with _get_extra_opts

- **PR #46017:** (rallytime) [2017.7] Merge forward from 2017.7.3 to 2017.7 @ 2018-02-13 21:43:15 UTC
  - 8b9adce258e Merge pull request #46017 from rallytime/merge-2017.7
  - a06645ce71 Merge branch ‘2017.7.3’ into ‘2017.7’

- **ISSUE #45796:** (L4rS6) aliases module doesn’t follow symlinks (refs: #45797)

- **PR #45988:** (rallytime) Back-port #45797 to 2017.7 @ 2018-02-13 17:49:02 UTC
  - PR #45797: (L4rS6) follow symlinks in aliases module (close #45796) (refs: #45988)
  - d20ff89281 Merge pull request #45988 from rallytime/bp-45797
  - 953a400d79 follow symlinks

- **PR #45711:** (bdrung) Fix Unicode tests when run with LC_ALL=POSIX @ 2018-02-13 17:42:07 UTC
  - b18087cee0 Merge pull request #45711 from bdrung/fix-unicode-tests
  - b6181b5ed6 Fix Unicode tests when run with LC_ALL=POSIX

- **PR #45878:** (damon-atkins) ec2_pillar update to fix finding instance-id (refs: #46137) @ 2018-02-13 17:34:14 UTC
  - 5271fb1d40 Merge pull request #45878 from damon-atkins/2017.7_fix_ec2_pillar
- 0e74025714 Merge branch '2017.7' into 2017.7_fix_ec2_pillar
- b4d0b23891 py3 fix
- 75d9e20d8a Add ignoring 'terminated', 'stopped' instances, to improve changes of a single match
- 0093472a37 added tag_key_list and tag_key_sep to create ec2_tags_list
- afb3968aa7 ec2_pillar could not find instance-id, resolved. add support to use any tag to compare minion id against.

- PR #45942: (terminalmage) Fix incorrect translation of docker port_bindings -> ports (2017.7 branch) @ 2018-02-13 16:10:03 UTC
  - cf367dbd04 Merge pull request #45942 from terminalmage/issue45679-2017.7
  - 89cbd72a0d Don't try to sort ports when translating docker input
  - 9cd47b39dd Fix incorrect translation of docker port_bindings -> ports

- PR #45959: (rallytime) A couple of grammar updates for the state compiler docs @ 2018-02-12 22:17:49 UTC
  - dae41de7a8 Merge pull request #45959 from rallytime/state-doc-update
  - 6f781cb95d A couple of grammar updates for the state compiler docs

- ISSUE saltstack/salt#45884: (tintoy) "TypeError: can’t serialize <NodeImage" when calling salt-cloud with the dimensiondata driver (refs: #45908)

- ISSUE #45884: (tintoy) "TypeError: can’t serialize <NodeImage" when calling salt-cloud with the dimension-data driver (refs: #45908)

- PR #45908: (tintoy) Fix for #45884 ("TypeError: can’t serialize <NodeImage" when calling salt-cloud with the dimension-data driver) @ 2018-02-12 22:05:29 UTC
  - 007214f7bf Merge pull request #45908 from DimensionDataResearch/fix/issue/45884
  - 1a75786b5a Fix linter warnings.
  - 82ec6b589c Revert to using salt.utils.cloud.is_public_ip.
  - 9b6b01873b Fix violations reported by flake8.
  - a2bc155c73 Use __utils__['cloud.'] instead of salt.cloud.utils.
  - 98907a32cb Ensure 'auth' parameter is correctly passed to dimensiondata driver.
  - de26b03e2c Fix copy/paste bug in dimensiondata provider integration test.
  - 6b1b6be427 Add integration tests for dimensiondata cloud provider.
  - 6ee99ed7d Ensure that event data provided by the dimensiondata driver is serialisable.

- PR #45985: (garethgreenaway) [2017.7] Backport #45894 - Missing format in the call to write. @ 2018-02-12 20:22:31 UTC
  - 007214f7bf Merge pull request #45908 from DimensionDataResearch/fix/issue/45884
  - 1a75786b5a Fix linter warnings.
  - 82ec6b589c Revert to using salt.utils.cloud.is_public_ip.
  - 9b6b01873b Fix violations reported by flake8.
  - a2bc155c73 Use __utils__['cloud.'] instead of salt.cloud.utils.
  - 98907a32cb Ensure 'auth' parameter is correctly passed to dimensiondata driver.
  - de26b03e2c Fix copy/paste bug in dimensiondata provider integration test.
  - 6b1b6be427 Add integration tests for dimensiondata cloud provider.
  - 6ee99ed7d Ensure that event data provided by the dimensiondata driver is serialisable.

- PR #45958: (garethgreenaway) Backporting #45935 to 2017.7 @ 2018-02-12 16:25:07 UTC
  - PR #45936: (garethgreenaway) [oxygen] Fix to log/handlers/__init__.py (refs: #45958)
  - PR #45935: (rallytime) Back-port #45742 to 2017.7.3 (refs: #45958)
  - PR #45742: (marccardinal) list.copy() is not compatible with python 2.7 (refs: #45935)
- bf03abd07c Merge pull request #45958 from garethgreenaway/backport-fixing_mactests_queue_full
- 25dfaae91 Backporting #45935

- **PR #45949**: (rallytime) [2017.7] Merge forward from 2016.11 to 2017.7 @ 2018-02-09 22:32:09 UTC
  - bab365d6c6 Merge pull request #45949 from rallytime/merge-2017.7
  - f51687e903 Merge branch '2016.11' into '2017.7'
  - 7779fa7e9b Merge pull request #45940 from dmurphy18/fix_aix_cmdmod
    - dd2788419b Fix use of 'su' for AIX to use '-'

- **ISSUE #45915**: (MatthiasKuehneEllerhold) 2017.7.3: Salt-SSH & Vault Pillar: Permission denied "minion.pem" (refs: #45928)

- **PR #45928**: (garethgreenaway) [2017.7] Fixing vault when used with pillar over salt-ssh @ 2018-02-09 16:32:35 UTC
  - 7fd00ec752 Merge pull request #45928 from garethgreenaway/45915_fixing_vault_pillar_for_salt_ssh
  - 259e6e5d4a Fixing vault when used with pillar over salt-ssh

- **PR #45925**: (terminalmage) Fix spelling error in docstring @ 2018-02-08 21:52:35 UTC
  - 9da14d9ccf Merge pull request #45925 from terminalmage/fix-spelling
  - 7a143fe454 Fix spelling error in docstring

- **PR #45920**: (rallytime) [2017.7] Merge forward from 2016.11 to 2017.7 @ 2018-02-08 15:43:49 UTC
  - 0cbe93cd69 Merge pull request #45920 from rallytime/merge-2017.7
  - e4e474218 Merge branch '2016.11' into '2017.7'
  - 27ff82f996 Merge pull request #45864 from rallytime/release-note-fix
    - 104a24f244 Remove extraneous ] in release notes for 2016.11.9
  - 5fa01de27b Merge pull request #45787 from rallytime/2016.11.9_docs
    - a384d4441a [2016.11] Bump latest and previous versions

- **ISSUE #45805**: (bgridley) Execution module victorops throws an error "RuntimeError: dictionary changed size during iteration" (refs: #45814)

- **PR #45814**: (gtmanfred) fix cookies dict size changing in http.query @ 2018-02-08 15:35:30 UTC
  - 643a8a5278 Merge pull request #45814 from gtmanfred/2017.7
  - d8ee9aa97 Fix cookies dict size changing in http.query

- **PR #45877**: (rallytime) Add release notes file for 2017.7.4 release @ 2018-02-08 14:07:43 UTC
  - 3a3f87c16d Merge pull request #45877 from rallytime/new-release-notes
  - f93ae8ba81 Add release notes file for 2017.7.4 release

- **PR #45904**: (rallytime) Back-port #41017 to 2017.7 @ 2018-02-08 13:57:45 UTC
  - PR #41017: (cebe) Fixed typo in pkg state documentation (refs: #45904)
  - 1c3cc00670 Merge pull request #45904 from rallytime/bp-41017
  - 80c6cdce6a Fixed typo in pkg state documentation

- **PR #45907**: (terminalmage) Fix backport of grains fix @ 2018-02-08 13:57:26 UTC
  - 317d35b1d5 Merge pull request #45907 from terminalmage/fix-grains-backport
- 6cf7e50cc4 Fix backport of grains fix

- **PR #45906**: (rallytime) Back-port #45548 to 2017.7 @ 2018-02-08 13:57:07 UTC
  - PR #45548: (viktdorland) Update x509.py - documentation fix (refs: #45906)
  - 1be5f0c40d Merge pull request #45906 from rallytime/bp-45548

- **ISSUE #45893**: (CrackerJackMack) archive.extracted ValueError "No path specified" in 2017.7.3 (refs: #45902)

- **PR #45862**: (rallytime) Back-port #45830 to 2017.7 @ 2018-02-08 13:22:26 UTC
  - PR #45830: (garethgreenaway) [oxygen] Catch exception when logging queue is full (refs: #45862)
  - f4d5f4d3c8 Merge pull request #45862 from rallytime/bp-45830

  - Wrapping the put_nowait in a try…except and catching the exception when the multiprocessing queue is full. This situation is happening when running the full testing suite on MacOS where the queue limit is 32767 vs on Linux where the queue limit is unlimited.

- **PR #45779**: (The-Loeki) SSH shell shim: Don’t use $() for optimal support @ 2018-02-05 18:35:21 UTC
  - 43a45b42c3 Merge pull request #45779 from The-Loeki/patch-3

  - Adding a couple tests to ensure that duration is included in state run results even when states do not run.

- **PR #45788**: (rallytime) [2017.7] Bump latest and previous versions @ 2018-02-05 15:30:46 UTC
  - 9f73c1d0ba Merge pull request #45788 from rallytime/2017.7.3_docs

  - d5f6126b [2017.7] Bump latest and previous versions

- **PR #45842**: (rallytime) Back-port #45827 to 2017.7 @ 2018-02-05 15:04:11 UTC
  - PR #45827: (terminalmage) Fix traceback in disks grains when /sys/block not available (refs: #45842)
  - c631598a8f Fix traceback in disks grains when /sys/block not available

- **ISSUE #44978**: (dosesitblend) State duration not always calculated (refs: #45721)

- **PR #45721**: (garethgreenaway) [2017.7] Ensure duration and start time exist @ 2018-02-05 14:59:33 UTC
  - 9b0aad67 Merge pull request #45721 from garethgreenaway/44978_show_duration_when_no_state_run

  - Adding a couple tests to ensure that duration is included in state run results even when states do not run.

  - 912347abc3 Include the duration when a state does not run, for example when the onchanges requisite is not met.

- **PR #45517**: (kstreee) Fixes base dir making logic to ensure not raising the exception when base directory already exists. @ 2018-02-05 14:56:23 UTC
  - 80a2d009b4 Merge pull request #45517 from kstreee/fix-mkdir
- 24d41f2451 Fixes base dir making logic to ensure not raising the exception when base directory already exists.

- **PR #45835**: (kstreee) Adds a missing return statement. @ 2018-02-02 22:51:41 UTC
  - 7a4b1b2e77 Merge pull request #45835 from kstreee/fix-missing-return-statement
  - 68c7f3dcba Fixes a missing return statement.

- **PR #45840**: (rallytime) Back-port #45603 to 2017.7 @ 2018-02-02 20:17:32 UTC
  - **PR #45603**: (andreaspe) Fix for duplicate entries with pkrepo.managed (refs: #45840)
  - 0a04ff118c2 Merge pull request #45840 from rallytime/bp-45603
  - 9653363131 Fixes for duplicate entries with pkrepo.managed

- **ISSUE #44315**: (whytwolf) cmd.* cwd does not escape spaces. 2017.7.2 (refs: #45134)

- **PR #45716**: (ciivr) fixed quoting of script path in cmd.script @ 2018-02-02 14:36:49 UTC
  - **PR #45134**: (garethgreenaway) [2017.7] fix to cmd.script for cwd with space (refs: #45716)
  - bd2178c3d5f Merge pull request #45716 from ciivr/fix_cmd_script_quoting
  - 217791079b some code cleanup (lint errors and escape_argument as _cmd_quote)
  - 1c29bc5a3d fixed quoting of script path in cmd.script

- **ISSUE #45684**: (bdrung) salt documentation fails to build with Python 3 version of sphinx (refs: #45719)

- **PR #45719**: (bdrung) Fix python3 sphinx build @ 2018-02-02 14:20:37 UTC
  - 272f7912c7c Merge pull request #45719 from bdrung/fixed-python3-sphinx-build
  - 179e86be73 doc: Do not mock non-existing __qualname__ attribute
  - 971e59ebe2 Drop enforcing new-style object for SaltYamlSafeLoader

- **PR #45764**: (mchugh19) support amazon linux 2 for service module @ 2018-02-02 14:12:07 UTC
  - **PR #45758**: (mchugh19) support amazon linux 2 for service module (refs: #45764)
  - fc04336c3b Merge pull request #45764 from mchugh19/2017.7
  - 0a7f1a4d75 English better
  - 37e067c7b5 support amazon linux 2 for service module

- **PR #45756**: (roaldnefs) Fix Grafana4 states documentation @ 2018-01-31 19:01:33 UTC
  - f234bf52f4 Merge pull request #45756 from roaldnefs/fix-grafana4-documentation
  - 92979c0b57 Fix grafana4 states documentation

- **PR #45801**: (rallytime) [2017.7] Merge forward from 2016.11 to 2017.7 @ 2018-01-31 18:55:52 UTC
  - 685be683db5 Merge pull request #45801 from rallytime/merge-2017.7
  - 26e992e011 Merge branch '2016.11' into '2017.7'
    - 746386d04c Merge pull request #45794 from vutny/doc-file-state-examples
      - dfdeae6a29 [DOC] Fix code-block rST directive in file state module
    - ab09e6214 Merge pull request #45780 from vutny/doc-pkgrepo-zypper
      - f80c7d8d69 [DOC] Add missing gpgautoimport for pkgrepo.managed

- **PR #45802**: (rallytime) [2017.7] Merge forward from 2017.7.3 to 2017.7 @ 2018-01-31 18:55:35 UTC
- c7d319f3bc Merge pull request #45802 from rallytime/merge-2017.7-from-2017.7.3
- eb48513ba0 Merge branch '2017.7.3' into '2017.7'

**ISSUE #45738:** (UtahCampusD) minion cache overwritten for scheduled jobs (refs: #45761)

**PR #45761:** (gtmanfred) generate a jid for cache_jobs on the minion @ 2018-01-31 18:01:53 UTC
- 96e9232cc2 Merge pull request #45761 from gtmanfred/2017.7
- 280767ed57 generate a jid for cache_jobs on the minion

**ISSUE #45301:** (twangboy) Ctl+C causes stack trace on Windows (refs: #45707)

**PR #45707:** (skizunov) Fix exception when shutting down logging listener @ 2018-01-30 13:28:10 UTC
- 38ed46a61a Merge pull request #45707 from skizunov/develop2
- e84801a381 Ensure we have at least one logging root handler
- 3da9b8dd33 Fix exception when shutting down logging listener

**PR #45773:** (terminalmage) Fix misspellings @ 2018-01-30 13:24:52 UTC
- 53008ffece Merge pull request #45773 from terminalmage/fix-misspelling
- 0a45f998fe Fix misspellings

**ISSUE #45489:** (ipmb) cache.grains runner returns all minions when match is not found (refs: #45588)

**PR #45571:** (rallytime) Back-port #45588 to 2017.7 @ 2018-01-29 17:12:25 UTC
- PR #45588: (samodid) update MasterPillarUtil get_minion_grains method (refs: #45751)
- 454ed25f62 Merge pull request #45571 from rallytime/bp-45588
- aa149a0e7a fix typo
- 3e794a043d fix copy-paste error in get_minion_grains method doc string
- 1fb94a08e0 update MasterPillarUtil

**PR #45753:** (rallytime) [2017.7] Merge forward from 2016.11 to 2017.7 @ 2018-01-29 17:11:11 UTC
- 860e21955c Merge pull request #45753 from rallytime/merge-2017.7
- cb50cece181 Merge branch '2016.11' into '2017.7'
- d7e09de269 Merge pull request #45749 from vutny/fixed-typo
  
  * e80bfb206c The zypper.mod_repo: fix typo in the docstring
- cb6ce378ea Merge pull request #45459 from vutny/salt-cloud-fix-loading-utf-cache
  
  * b370796e9d Salt Cloud: write/read cached data in UTF-8 explicitly
  
  * cd999201be [2016.11] Salt Cloud: fix loading UTF-8 cached data

**ISSUE #40173:** (gtmanfred) Document the Open File limit issue better (refs: #45688)

**PR #45688:** (bdrung) Raise LimitNOFILE to default max open files @ 2018-01-29 14:26:57 UTC
- 9fb4d4a528 Merge pull request #45688 from bdrung/raise-max-open-files
- bbedee756 Raise LimitNOFILE to default max open files

**PR #45686:** (bdrung) Use dbus-run-session instead of dbus-launch @ 2018-01-29 14:24:11 UTC
- 79da9e8c8b Merge pull request #45686 from bdrung/2017.7
- f49d0a0e6f Use dbus-run-session instead of dbus-launch
• **PR #45740**: (terminalmage) Fix incorrect attempt at version comparison. @ 2018-01-29 14:12:05 UTC
  - 7fb666bcd2 Merge pull request #45740 from terminalmage/fix-incorrect-version-comparison
  - 1e0b38dca6 Fix incorrect attempt at version comparison.
• **PR #45747**: (SteffenKockel) Fix typos @ 2018-01-29 13:53:27 UTC
  - fe636f53f8 Merge pull request #45747 from SteffenKockel/2017.7
  - 319b513183 Fix typos
• **PR #45734**: (terminalmage) Fix traceback in CLI output when value is trimmed @ 2018-01-28 13:35:56 UTC
  - eb91ae8b6e Merge pull request #45734 from terminalmage/fix-trimmed-output
  - 966ad07452 Fix traceback in CLI output when value is trimmed
• **PR #45712**: (bdrung) Decode git call output in Python 3 @ 2018-01-28 02:03:21 UTC
  - 7516bf8ff3 Merge pull request #45712 from bdrung/fix-version-decode
  - 217183405a Decode git call output in Python 3
• **ISSUE #44449**: (brianthelion) salt-ssh + salt-cloud: cloud roster not working and/or update_cachedir is broken (refs: #45720)
• **PR #45720**: (dwoz) Salt cloud adds newly created instances to cache @ 2018-01-26 22:45:43 UTC
  - 91b848debb Merge pull request #45720 from dwoz/issue-44449-prod-fix
  - 444bd6119d Salt cloud adds newly created instances to cache
• **PR #45724**: (eliasp) Typo (Hellium → Helium) @ 2018-01-26 22:37:44 UTC
  - 831698d066 Merge pull request #45724 from eliasp/2017.7-typo-from-hell
  - bec78276f3 Replace left-over mistyped codename reference (Hellium → 2014.7.0)
• **PR #45722**: (rallytime) [2017.7] Merge forward from 2016.11 to 2017.7 @ 2018-01-26 22:15:40 UTC
  - cdb21a0186 Merge pull request #45722 from rallytime/merge-2017.7
  - 8e3a2e25fe Merge branch '2016.11' into '2017.7'
  - e4047a1234 Merge pull request #45511 from twangboy/win_fix_git
    - 160dd7c6ce Pull the first item in the list
    - 52d6d78150 Only keep ssh.py in the Windows installer
    - 54eb0db2c4 Keep ssh state and execution modules in the installer
    - 0fa801a329 Add additional path to find ssh.exe
  - a550e8d25d Merge pull request #45694 from twangboy/win_reg_add_keys
    - 8f53cd2d68 Add new keys to subkey_slash_check
    - 62050c711c Add support for additional reg keys
  - 7ceebf62f0 Merge pull request #45577 from zer0def/git-detached-31363
    - a924b971ef Applied PR #40524 to git.detached state module function. (refs #31363)
• **PR #45718**: (rallytime) [2017.7] Merge forward from 2017.7.3 to 2017.7 @ 2018-01-26 16:49:44 UTC
  - 3a413e96c5 Merge pull request #45718 from rallytime/merge-2017.7
  - f10c7ee92d Merge branch '2017.7.3' into '2017.7'

**PR #45365: (meaksh)** Return an error when "gid_from_name" is set but group does not exist @ 2018-01-16 18:31:50 UTC
- 5f58a87e84 Merge pull request #45365 from meaksh/2017.7-issue-45345
- da23067f80 Refactor to prevent logical bug when gid is 0
- 9fdaa0d5e9 Update documentation for 'gid_from_name' parameter
- 52f9c06908 Fix integration tests for 'user.present' state.
- e2c32dc6dc Make pylint happy
- a18db0c11 Return error when gid_from_name and group does not exist.
- ce7b1f4baf Ensure empty string gid is set to None

**ISSUE #43535: (Ch3LL)** Add pkg.latest_version Test to Auto Test Suite (refs: #44822)

**PR #44822: (frogunder)** add pkg_latest_version test @ 2018-01-16 14:16:54 UTC
- de080983e3 Merge pull request #44822 from frogunder/pkg_latestversion
- 08644e02a0 skip if mac
- df68f32d2 fix if statements and string
- 3504083849 add pkg_latest_version test

**ISSUE saltstack/salt-jenkins#603: (rallytime)** [oxygen] CentOS 7 is failing several boto tests with module import failures (refs: #45401)

**PR #45435: (rallytime)** Back-port #45401 to 2017.7 @ 2018-01-14 12:43:48 UTC
- PR #45401: (gtmanfred) fix boto import failures (refs: #45435)
- cb3e0cfeb3 Merge pull request #45435 from rallytime/bp-45401
- b9761971c2 fix moto version
- 0cd951cc6 fix test boto imports

**PR #45380: (twangboy)** Backport changes from #45308 @ 2018-01-11 19:45:21 UTC
- PR #45380: (twangboy) Fix integration.modules.test_state for Windows (refs: #45380)
- 2340f0b487 Merge pull request #45380 from twangboy/backport_45308
- 419be8a9b5 Backport changes from #45308
30.2.52 Salt 2017.7.6 Release Notes

Version 2017.7.6 is a bugfix release for 2017.7.0.

Statistics

- Total Merges: 182
- Total Issue References: 60
- Total PR References: 217
- Contributors: 47 (Ch3LL, DmitryKuzmenko, GwiYeong, Quarky9, RichardW42, amaclean199, arif-ali, baniobloom, bdrung, benediktwerner, bmiguel-teixeira, cachedout, dafenko, damon-atkins, dwoz, ezh, foli, fpicot, frogunder, garethgreenaway, gtmanfred, isbm, jeroennijhof, jfindlay, jjoboss, kstreee, lom-eroe, mattp-, meaksh, mirceaulinic, myinitialsarepm, mzbroch, nages13, paclat, pcjeff, pruiiz, psyer, rallytime, s0undt3ch, skizunov, smitty42, terminalmage, twangboy, vitny, yagnik, yannj-fr)

Tornado 5.0 Support for Python 2 Only

Tornado 5.0 moves to using asyncio for all python3 versions. Because of this and changes in asyncio between python 3.4 and 3.5 to only be able to use one ioloop, which requires some rearchitecting, support for tornado 5.0 and python3 versions of salt has been delayed to a later release.

For now, to use tornado 5.0, the python 2 version of salt must be used.

Option to Return to Previous Pillar Include Behavior

Prior to version 2017.7.3, keys from pillar includes would be merged on top of the pillar SLS. Since 2017.7.3, the includes are merged together and then the pillar SLS is merged on top of that.

The pillar_includes_override_sls option has been added allow users to switch back to the pre-2017.7.3 behavior.

Changelog for v2017.7.5..v2017.7.6

Generated at: 2018-05-29 14:05:53 UTC

- PR #47775: (gtmanfred) catch UnsupportedOperation with AssertionError @ 2018-05-22 19:04:13 UTC
  - edf94c915e Merge pull request #47775 from gtmanfred/2017.7.6
  - 548f65d056 catch UnsupportedOperation with AssertionError
- PR #47769: (gtmanfred) skip test that breaks test suite @ 2018-05-22 15:12:54 UTC
  - 8c38ecd75f Merge pull request #47769 from gtmanfred/2017.7.6
- 3fdcf0fa82 skip test that breaks test suite

- **PR #47747:** (Ch3LL) Add changelog to 2017.7.6 release notes @ 2018-05-21 14:25:00 UTC
  - 0d5b473ce2 Merge pull request #47747 from Ch3LL/rm_2017.7.6
  - d4a83b92d Add changelog to 2017.7.6 release notes

- **ISSUE #47484:** (whytewolf) Windows: pkg.latest state not updating packages. (refs: #47702)

- **PR #47702:** (damon-atkins) State pkg.latest called win pkg.install with list of pkgs and the required versions @ 2018-05-19 11:21:23 UTC
  - 8a5b34f7d9 Merge pull request #47702 from damon-atkins/2017.7.6_fix_pkg.latest_state
  - adcc094e08 Merge branch '2017.7.6' into 2017.7.6_fix_pkg.latest_state

- **PR #47700:** (yannj-fr) fix roots modification time check @ 2018-05-18 18:42:17 UTC
  - d610c192d9 Merge pull request #47700 from yannj-fr/2017.7.6
  - 961c1e61e fix roots modification time check
    - 2a73e905df Merge branch '2017.7.6' into 2017.7.6

- **PR #47632:** (gtmanfred) handle new _create_stream in tornado 5.0 @ 2018-05-18 14:25:17 UTC
  - 266749420f Merge pull request #47632 from gtmanfred/2017.7.6
  - 2c50c0d2f5 fix pylint
  - 4a29057b16 Fix last test for tornado
  - 550ef2e272 allow using tornado 5.0
  - 62e468448b handle new _create_stream in tornado 5.0

- **PR #47720:** (rallytime) Back-port #47692 to 2017.7.6 @ 2018-05-18 13:23:03 UTC
  - **PR #47692:** (dwoz) Default windows to m1.small for ec2-classic (refs: #47720)
  - 2643c356af Merge pull request #47720 from rallytime/bp-47692-2017.7.6
  - 6e5cb36839 Default windows to m1.small for ec2-classic
    - 20d9785244 fix roots modification time check
      - aef37dd1ce fix roots modification time check
      - d51666053 Ensure targeted_pkgs always contains value for non-windows.
      - 83b4224cf8 Adjusted based on feedback.
      - 12f983ce9f Whitespace lint issues
      - 075d3d3c49 pkg.install execution module on windows ensures the software package is installed when no version is specified, it does not upgrade the software to the latest. This is per the design. pkg.latest must provide the versions to install to pkg.install

- **PR #47667:** (Ch3LL) Update test_mac_user_enable_auto_login to test both py2 and py3 @ 2018-05-16 15:54:49 UTC
  - 16c2153385 Merge pull request #47667 from Ch3LL/mac_user_enable
  - ba40d3d1a1 Update test_mac_user_enable_auto_login to test both py2 and py3

- **PR #47645:** (Ch3LL) query the pip path for test test_issue_2087_missing_pip @ 2018-05-15 17:16:10 UTC
  - a492186c9 Merge pull request #47645 from Ch3LL/py3_rm_pip
- 225d90ad4c query the pip path for test test_issue_2087_missing_pip

- **PR #47646**: (rallytime) Back-port #47601 and #47643 to 2017.7.6 @ 2018-05-15 14:04:45 UTC
  - **PR #47643**: (dwoz) Remove unwanted file (refs: #47646)
  - **PR #47601**: (dwoz) Skip tests when we can not use runas (refs: #47646)
  - e441733ac1 Merge pull request #47646 from rallytime/bp-47601-and-47643
  - 9e1d1a5ef8 Fix typo
  - 4e94609136 Remove unwanted file
  - 0109249c78 use ignore-undefined-variable
  - 37caecb7f4 Ignore pylint WindowsError
  - c1135d90c7 Better doc string
  - e53d6b9ed9 Skip tests when we can not use runas

- **PR #47570**: (gtmanfred) Update dependency to msgpack @ 2018-05-10 13:23:09 UTC
  - 6f178ca908 Merge pull request #47570 from gtmanfred/2017.7.6
  - 84aaa03e03 Update dependency to msgpack

- **PR #47523**: (rallytime) [2017.7.6] Update man pages @ 2018-05-08 13:31:19 UTC
  - 98bd598701 Merge pull request #47523 from rallytime/man-pages
  - 48ecb78dec [2017.7.6] Update man pages

- **ISSUE #47443**: (skylerberg) Input validation does not raise SaltInvocationError in win_dsc.py (refs: #47505)

- **PR #47517**: (rallytime) Back-port #47505 to 2017.7.6 @ 2018-05-07 19:42:37 UTC
  - **PR #47505**: (dwoz) Raise proper invocation errors (refs: #47517)
  - e608ea9617 Merge pull request #47517 from rallytime/bp-47505-2017.7.6
  - 0734578533 Raise proper invocation errors

- **PR #47476**: (gtmanfred) Specify the cache directory for newer virtualenv modules @ 2018-05-04 19:20:45 UTC
  - 611ca1fc03 Merge pull request #47476 from gtmanfred/2017.7.7
  - 1f91a85587 specify cache dir for pip install
  - 99e150e09c Check for kitchen-vagrant gem before loading windows tests

- **PR #47412**: (twangboy) Fix issue where the cwd was being removed @ 2018-05-04 17:28:11 UTC
  - 7c3f2c56da Merge pull request #47412 from twangboy/fix_47125
  - c9bab0b8e3 Merge branch '2017.7' into fix_47125
  - 2600e404d5 Fix overly long line
  - 5c8db05769 Fix issue where the cwd was being removed

- **PR #47467**: (twangboy) Remove unused settings, update NSIS @ 2018-05-04 17:11:37 UTC
  - 4846e957c4 Merge pull request #47467 from twangboy/cleanup_settings
  - 9d498293b1 Remove unused settings, update NSIS

- **PR #47196**: (twangboy) Fix issues with pip @ 2018-05-04 14:23:04 UTC
  - da9871d36b Merge pull request #47196 from twangboy/fix_47024

30.2. Previous Releases
- 14ee5337b9 Add @with_tempdir helper
- 6c3b5fa6fa Fix typo
- f031710af2 Merge branch '2017.7' into fix_47024
- 7c46d9d0d4 Fix integration.modules.test_pip
- 22ac81df63 Fix integration.modules.test_pip
- 57d98224d4 Merge pull request #9 from terminalmage/twangboy/fix_47024
  - 37a13d8004 Update pip unit tests to reflect changes
  - 7f86779be0 Lint fix
- c48d8f4f61 DRY and other fixes in pip module
- b1117896a0 Change from global variable to __context__``
- 3e6e524eca Fix some tests``
- c94f0f20e4 Fix lint error
- fd47b21530 Fix merge conflict

- **PR #47455:** (Ch3LL) Add In Progress Warning for 2017.7.6 Release Notes @ 2018-05-04 13:44:54 UTC
  - e8c4524bae Merge pull request #4755 from Ch3LL/unreleased_rn
  - b6d0c2a6b7 Add In Progress Warning for 2017.7.6 Release Notes

- **PR #47459:** (gtmanfred) update ubuntu-rolling to 18.04 @ 2018-05-03 20:39:20 UTC
  - 2c7a4b6179 Merge pull request #4749 from gtmanfred/2017.7
  - d228e72477 update ubuntu-rolling to 18.04

- **PR #47462:** (terminalmage) Fix docs build on Sphinx 1.7+ @ 2018-05-03 20:06:57 UTC
  - 64a64c0ed7 Merge pull request #47462 from terminalmage/docs
  - 6d7803ece0 Fix docs build on Sphinx 1.7+

- **ISSUE #47436:** (lomeroe) Some Administrative Template policies are not properly set by lgpo (refs: #47438)

- **ISSUE #44516:** (doesitblend) Windows PY3 Minion Returns UTF16 UnicodeError (refs: #44944)

- **PR #47438:** (lomeroe) lgpo fix for issue #47436 @ 2018-05-03 14:40:27 UTC
  - PR #44944: (lomeroe) win_lgpo registry.pol encoding updates (refs: #46913, #47438)
  - 6cd0d31c03 Merge pull request #47438 from lomeroe.double_admx_test
  - 4902f1e2ba check if a policy has either an enabled value or enabled list entry or a disabled value or disabled list entry when determining the state of the policy

- **ISSUE #45790:** (bdarnell) Test with Tornado 5.0b1 (refs: #47106, #47433)

- **PR #47433:** (s0undt3ch) Add missing requirements files not commited in #47106 @ 2018-05-02 20:57:14 UTC
  - PR #47106: (DmitryKuzmenko) Tornado50 compatibility fixes (refs: #47433)
  - ed69281d19 Merge pull request #47433 from s0undt3ch/2017.7
  - 5ab9d25f6d Add missing requirements files not commited in #47106

- **ISSUE #47424:** (bcharron) "salt-cloud -m" fails with nova driver: "There was a query error: u'state'" (refs: #47429)

- **PR #47429:** (gtmanfred) server_list_min should use state, not status @ 2018-05-02 16:27:56 UTC
7ae3497b0c Merge pull request #47429 from gtmanfred/2017.7
8ae32033cc server_list_min should use state, not status

- PR #47399: (isbm) zeromq 17 deprecation warning backport from 2018.3 + tornado 5 fixes @ 2018-05-02 15:11:16 UTC
  - 2f5fc4ecc5 Merge pull request #47399 from isbm/isbm-zeromq17-deprecationwarning-2017.7.2-v2
  - a36e49fd27 fix pylint
  - 98b5629b36 Fix imports
  - d94c0f0152 Remove unnecessary variable
  - 8e377b5653 Lintfix: E0203 and attribute access
  - 2aab70b1b8 Install ZMQ handler if <15 version
  - 296c589f4b Use ZMQ switch utility in the integration tests
  - ab5fa34d7c Use ZMQ_VERSION_INFO constant everywhere
  - 43b5558b82 Add trace logging on ZMQ sockets communication
  - 164204a9fe Remove duplicate code for ZMQ monitor handling
  - 834b1e4ff0 Remove obsolete ZMQIOLoop direct instance
  - 1c90bdb3c Remove an empty line
  - ef2e0acd66 Add logging on ZMQ socket exception
  - 38ceed371d Lintfix: ident
  - 1ece6a5f52 Lintfix: line too long
  - 4e650c0b44 Remove code duplicate by using utilities functions
  - 57da54b676 Fix imports
  - 948368e9a1 Add libzmq version info builder
  - 0b4a17b859 Update log exception message
  - 116e1809fc Put a message alongside the exception to the logs
  - 4bc43124b7 Remove unnecessary ZMQ import and check for its presence
  - 05f4d40269 Use utility for ZMQ import handling in SSH client
  - 457e7d9a5 Use utility for ZMQ import handling in flo/zero
  - 08dee6f5bd Use utility for ZMQ import handling
  - e2a355cb8 Remove unnecessary ZMQ extra-check for cache utils
  - c8f2cc271d Remove unnecessary ZMQ extra-check for master utils
  - 3940667bb9 Remove old ZMQ import handling
  - f34a53e029 Use ZMQ utility for version check
  - cbb26dcb28 Use ZMQ installer for master
  - 453e83210a Add ZMQ version build
  - af9601e21d Use ZMQ importer utility in async
  - d50b2b2023 Incorporate tornado-5 fixes
- 1fd9af0655 Add ZMQ backward-compatibility tornado installer for older versions
- ad4b40415c Add one place for handling various ZMQ versions and IOLoop classes

**PR #47343**: (Ch3LL) Add additional service module integration tests and enable for windows @ 2018-05-02 13:39:46 UTC
- b14e974b5f Merge pull request #47343 from Ch3LL/win_srv_test
- 2173b6f549 ensure we are enabling/disabling before test
- d58be06751 Add additional service module integration tests and enable for windows

**PR #47375**: (terminalmage) Warn on use of virtual packages in pkg.installed state @ 2018-05-01 21:12:18 UTC
- b0f3b577f Merge pull request #47375 from terminalmage/issue47310
- fa2be52bb Remove extra blank line to appease linter
- f8ab2be81c Add debug logging if we fail to detect virtual packages
- 67c4fc56ac Warn on use of virtual packages in pkg.installed state

**PR #47415**: (kstreee) Fixes a bug of rest_tornado's 'local' client, complement fix of #46326 @ 2018-05-01 21:11:25 UTC
- PR #47200: (kstreee) Resolve a conflict with syndic timeout and bug fixes of the local client in rest_tornado (refs: #47415)
- PR #47123: (rallytime) [develop] Merge forward from 2018.3 to develop (refs: #47200)
- PR #47110: (kstreee) Fixes misusing of the timeout option. (refs: #47200)
- PR #46692: (mattp-) saltnado bugfixes for ldap & syndics (refs: #47123, #47200)
- PR #46326: (kstreee) Fixes a timing bug of saltnado's client local. (refs: #47110, #47123, #47200, #47415)
- PR #45874: (GwiYeong) fix for local client timeout bug (refs: #46326)
- 56235032f4 Merge pull request #47415 from kstreee/fix-local-client-tgt-bug
- b8d37e0a1e To add a test case for the syndic environment, copies the test case which was written by @mattp- that was already merged into develop branch, related pr is #46692.
- 4627bad1fd Realizes 'tgt' field into actual minions using ckminions to subscribe results of the minions before publishing a payload.

**PR #47286**: (baniobloom) fixed vpc_peering_connection_name option @ 2018-05-01 19:02:10 UTC
- d65ceae03 Merge pull request #47286 from baniobloom/vpc_peering_connection_name_fix
- a96965087 Merge branch '2017.7' into vpc_peering_connection_name_fix

**PR #47270**: (meaksh) Fix minion scheduler to return 'retcode' from executed functions @ 2018-04-30 18:21:55 UTC
- 8a5d4437bb Merge pull request #47270 from meaksh/2017.7-fix-retcode-on-schedule-utils
- d299cf3385 Merge branch '2017.7' into 2017.7-fix-retcode-on-schedule-utils
- b6da600ff Initialize __context__ retcode for functions handled via schedule util module

**ISSUE #47264**: (jf) doc: https://docs.saltproject.io/en/latest/ref/modules/all/salt.modules.grains.html#salt.modules.grains.delval s/of pass/or pass/ (refs: #47371)

**PR #47371**: (rallytime) Fix "of pass" typo in grains.delval docs: change to "or pass" @ 2018-04-30 18:18:46 UTC
- 5b51075384 Merge pull request #47371 from rallytime/fix-47264
• PR #47389: (dwoz) Older GitPython versions will not have close @ 2018-04-29 16:42:06 UTC
  - a86e53be66 Merge pull request #47389 from dwoz/moregittestfix
  - 67745c1362 Older GitPython versions will not have close

• PR #47388: (dwoz) Fix missing import @ 2018-04-28 18:33:14 UTC
  - a5367eaf63 Merge pull request #47388 from dwoz/test_pip_fix
  - eb26321e8b Fix missing import

• PR #47380: (gtmanfred) add io_loop handling to runtests engine @ 2018-04-28 17:25:28 UTC
  - 9b59b991c2 Merge pull request #47380 from gtmanfred/2017.7
  - 93d1445e1c1 add io_loop handling to runtests engine

• PR #47384: (dwoz) Fix py2 version of pip test @ 2018-04-28 15:13:28 UTC
  - 37822c0cbb Merge pull request #47384 from dwoz/test_pip_fix
  - a37a9da1fb Fix py2 version of pip test

• PR #47382: (dwoz) Close the repo and fix multiple tests @ 2018-04-28 15:09:17 UTC
  - eefd96732e Merge pull request #47382 from dwoz/gitfs_tests
  - 1570708fac Close the repo and fix multiple tests

• PR #47369: (terminalmage) Return an empty dict if no search_order in ldap ext_pillar config file @ 2018-04-27 20:58:52 UTC
  - 57c75ff660 Merge pull request #47369 from terminalmage/ldap_pillar
  - 085883ae2d Return an empty dict if no search_order in ldap ext_pillar config file

• PR #47363: (DmitryKuzmenko) Tornado5.0: Future.exc_info is dropped @ 2018-04-27 18:30:18 UTC
  - bcc66dd9bf Merge pull request #47363 from DSRCorporation/bugs/replace_exc_info_with_exception
  - 3f7b93a23c Tornado5.0: Future.exc_info is dropped

• PR #47334: (terminalmage) pillar_ldap: Fix cryptic errors when config file fails to load @ 2018-04-27 17:53:51 UTC
  - bce3f7e1 Merge pull request #47334 from terminalmage/ldap_pillar
  - 0175a8687c pillar_ldap: Fix cryptic errors when config file fails to load
  - 65c3ba7ff1 Remove useless documentation
  - 5d67cb27de Remove unnecessary commented line

• PR #47347: (dwoz) Proper fix for mysql tests @ 2018-04-27 17:27:53 UTC
  - 31db8ca7ad Merge pull request #47347 from dwoz/test_mysql_fix_again
  - add78b618 Fix linter warnings
  - 2644cc7553 Fix linter nits
  - 799c601184 Proper fix for mysql tests

• PR #47359: (gtmanfred) add mention of the formulas channel to the formulas docs @ 2018-04-27 16:56:13 UTC
  - e573236848 Merge pull request #47359 from gtmanfred/2017.7
  - 6214ed8133 add mention of the formulas channel to the formulas docs
• PR #47317: (dwoz) Do not join a thread that is stopped @ 2018-04-27 13:15:09 UTC
  – PR #47279: (dwoz) Gracefully shutdown worker threads (refs: #47317)
  – 629503b2a8 Merge pull request #47317 from dwoz/threadshutdown
  – 6db2a0e4d3 Log exceptions at exception level
  – d4ae787595 Do not join a thread that is stopped
• PR #47304: (cachedout) Pass timeout to salt CLI for tests @ 2018-04-27 13:11:58 UTC
  – aacd5cefe3 Merge pull request #47304 from cachedout/test_cli_timeout_arg
  – 85025af83c Pass timeout to salt CLI for tests
• PR #47311: (Ch3LL) Add firewall execution modules tests for windows @ 2018-04-27 13:10:54 UTC
  – 55534fb659 Merge pull request #47311 from Ch3LL/firewall_windows
  – 4e16c18c16 Add firewall module windows tests to whitelist
  – 4b2fc4ec66 Add windows firewall execution modules integration tests
• PR #47348: (dwoz) Ignore gifs tests when symlinks not enabled @ 2018-04-27 13:08:27 UTC
  – 1667375a80 Merge pull request #47348 from dwoz/no_symlinks
  – 94a70e847a Ignore gifs tests when symlinks not enabled
• PR #47342: (dwoz) Fix mysql test cases @ 2018-04-27 00:50:53 UTC
  – dac04261b5 Merge pull request #47342 from dwoz/test_mysql_fix
  – 7496f4c5a8 Fix mysql test cases
• PR #47341: (dwoz) Fix python 3 support for inet_pton function @ 2018-04-26 23:35:45 UTC
  – 34e78ef564 Merge pull request #47341 from dwoz/inet_pton_fix
  – 85451f4b8d4 Fix python 3 support for inet_pton function
• PR #47339: (dwoz) Use salt.utils.fopen for line ending consistancy @ 2018-04-26 22:39:56 UTC
  – e4779f3246 Merge pull request #47339 from dwoz/ssh_key_test_fix
  – e37a93a1ca Remove redundant close call
  – b2ae5889b7 Close the temporary file handle
  – 9ef783a975 Use salt.utils.fopen for line ending consistancy
• PR #47335: (dwoz) Remove un-needed string-escape @ 2018-04-26 21:49:27 UTC
  – b221860151 Merge pull request #47335 from dwoz/pip_test_fix
  – dcb6a22c00 Remove un-needed string-escape
• PR #47331: (dwoz) Do not encode usernames @ 2018-04-26 19:57:28 UTC
  – 1c527bfd3a Merge pull request #47331 from dwoz/py3_wingroup_fix
  – cc154ef857 Do not encode usernames
• PR #47329: (cachedout) Credit Frank Spierings @ 2018-04-26 16:37:59 UTC
  – 708078b152 Merge pull request #47329 from cachedout/frank_credit
  – 33c0644ac4 Credit Frank Spierings
• PR #47281: (Ch3LL) Add win_system integration module tests @ 2018-04-26 16:07:41 UTC
- a545e55543 Merge pull request #47281 from Ch3LL/system_test
- c9181a75a6 Add destructivetest decorator on tests
- 0d0c8987fc Add win_system integration module tests
- PR #47283: (Ch3LL) Add windows ntp integration module tests @ 2018-04-26 16:04:44 UTC
  - b64d930df0 Merge pull request #47283 from Ch3LL/ntp_test
  - ced7f6564d Add windows ntp integration module tests
- PR #47314: (Ch3LL) Skip netstat test on macosx as its not supported @ 2018-04-26 16:00:37 UTC
  - 910aff910f Merge pull request #47314 from Ch3LL/net_mac_test
  - 67beb1451c Skip netstat test on macosx as its not supported
- PR #47307: (rallytime) Back-port #47257 to 2017.7 @ 2018-04-26 15:16:23 UTC
  - PR #47257: (jeroennijhof) Role is not a list but a dictionary (refs: #47307)
  - 0549ef7c16 Merge pull request #47307 from rallytime/bp-47257
  - 6c5b9f29b2c Role is not a list but a dictionary
- PR #47312: (rallytime) Update bootstrap script to latest release: 2018.04.25 @ 2018-04-26 15:15:13 UTC
  - d6f4689f6 Merge pull request #47312 from rallytime/update-bootstrap-release
  - 765ce06a2 Update bootstrap script to latest release: 2018.04.25
- PR #47279: (dwoz) Gracefully shutdown worker threads (refs: #47317) @ 2018-04-25 21:15:43 UTC
  - e0765f5719 Merge pull request #47279 from dwoz/py3_build_fix
  - 21dc1bab91 Pep-8 line endings
  - 717abedaf7 Fix comman wart
  - 4100cdd64c Close might get called more than once
  - dbe67f943 Stop socket before queue on delete
  - 9587f5c69e Silence pylint import-error for six.moves
  - 4b0c7d5b34 Fix typo
  - 05df7c2b1 Use six.moves for queue import
  - fe340778fa Gracefully shutdown worker threads
- PR #47113: (jfindlay) Support proto for IPSec policy extension in iptables state @ 2018-04-25 18:01:19 UTC
  - 44f19b2f94 Merge pull request #47113 from jfindlay/iptables_state
  - 8bd0801e2e modules,states.iptables support proto for policy ext
- PR #47302: (Ch3LL) Remove unnecessary code from core grains and add test @ 2018-04-25 17:58:48 UTC
  - b7a6206330 Merge pull request #47302 from Ch3LL/dead_code
  - daa68b4877 Add virtual grains test for core grains
  - a59dd2785d Remove dead code in core grains file for virt-what
- PR #47303: (baniobloom) Added clarity on oldest supported main release branch @ 2018-04-25 17:52:39 UTC
  - e29362afcf Merge pull request #47303 from baniobloom/bug_fix_doc
  - b97c9df5f3 added clarity on how to figure out what is the oldest supported main release branch

30.2. Previous Releases

4925
• **ISSUE #45790**: (bdarnell) Test with Tornado 5.0b1 (refs: #47106, #47433)

• **PR #47106**: (DmitryKuzmenko) Tornado50 compatibility fixes (refs: #47433) @ 2018-04-25 15:32:37 UTC
  - 0d9d55e013 Merge pull request #47106 from DSRCorporation/bugs/tornado50
  - 39e403b18d Merge branch '2017.7' into bugs/tornado50
  - 6706b3a2d1 Run off of a temporary config
  - d6873800d5 Allow running pytest>=3.5.0
  - 2da983740 Tornado 5.0 compatibility fixes

• **ISSUE #47258**: (drewmat) service state no longer working after kernel upgrade (refs: #47271)

• **PR #47217**: (gtmanfred) load rh_service for amazon linux not booted with systemd @ 2018-04-25 14:47:06 UTC
  - 2e014f4746 Merge pull request #47271 from gtmanfred/amazon
  - 8a53908908 Do not load rh_service module when booted with systemd
  - e41d15bf11 Revert "support amazon linux 2 for service module"

• **ISSUE #44847**: (malbertus) netconfig.managed state.apply unexpected behaviour of test & debug variables (refs: #47246)

• **PR #47246**: (mirceaulinic) Attempting to fix #44847: allow a different way to get the test and debug flags into the netconfig state @ 2018-04-25 14:44:02 UTC
  - 599b0ed1e9 Merge pull request #47246 from cloudflare/fixed#44847-2017.7
  - ad8028104 This way, we can pass flags such as debug into the state, but also test.

• **PR #47220**: (benediktwerner) Fix pip.installed when no changes occurred with pip >= 1.0.0 @ 2018-04-25 14:23:50 UTC
  - **PR #47207**: (benediktwerner) Fix pip_state with pip3 if no changes occurred (refs: #47220)
  - **PR #47102**: (gtmanfred) dont allow using no_use_wheel for pip 10.0.0 or newer (refs: #47220)
  - 4e2e1f0719 Merge pull request #47220 from benediktwerner/fixed-pip-2017.7
  - 0197c3e973 Fix pip test
  - 34bf66c09 Fix pip.installed with pip>=10.0.0

• **PR #47272**: (rallytime) Add windows tests and reg module/state to CODEOWNERS file for team-windows @ 2018-04-25 13:25:29 UTC
  - 92e60625f1 Merge pull request #47272 from rallytime/registry regulate-codeowners
  - 9445af0185 Add windows tests and reg module/state to CODEOWNERS file for team-windows
    - 8de3d41ad Fixed vpc_peer_connection_name option

• **PR #47252**: (rallytime) Fix the matching patterns in the CODEOWNERS file to use fnmatch patterns @ 2018-04-24 14:10:42 UTC
  - 9da5c0222 Merge pull request #47252 from rallytime/codeowners-fixes
  - 204b6af92fb Fix the matching patterns in the CODEOWNERS file to use fnmatch patterns

• **ISSUE #47173**: (fpicot) pkg.installed ignores normalize parameter (refs: #47177)

• **PR #47177**: (fpicot) fix normalize parameter in pkg.installed @ 2018-04-24 13:37:54 UTC
  - 3de1bb49c8 Merge pull request #47177 from fpicot/fixed#47173_pkg_normalize
  - 14f846f34 fix normalize parameter in pkg.installed
- **PR #47251**: (Ch3LL) Update Docs to remove unnecessary + sign @ 2018-04-23 19:37:04 UTC
  - 10e30515dc Merge pull request #47251 from Ch3LL/pub_fix_rn
  - f4c2e6575 Update Docs to remove unnecessary + sign

- **PR #47249**: (Ch3LL) Add CVE number to 2016.3.6 Release @ 2018-04-23 19:05:42 UTC
  - bb7850a431 Merge pull request #47249 from Ch3LL/pub_fix_rn
  - 24dea24b7e Add CVE number to 2016.3.6 Release

- **ISSUE #47225**: (pruiz) zfs.filesystem_present takes forever on a dataset with lots (10k+) of snapshots (refs: #47226, #47227)

- **PR #47227**: (pruiz) Fix issue #47225: avoid zfs.filesystem_present slowdown when dataset has lots of snapshots (2017.7 branch) @ 2018-04-23 14:05:58 UTC
  - PR #47226: (pruiz) Fix issue #47225: avoid zfs.filesystem_present slowdown when dataset has lots of snapshots (refs: #47227)
  - 56933eb0b2 Merge pull request #47227 from pruiz/pruiz/zfs-dataset-present-slow-2017.7
  - fded61f19b Fix issue #47225: avoid zfs.filesystem_present slowdown when dataset has lots of snapshots

- **PR #47167**: (smitty42) Adding updates for python3 compatibility and new virtualbox SDK version support. @ 2018-04-23 13:20:42 UTC
  - 9825065048 Merge pull request #47167 from smitty42/vbox-skd-fix
  - 5de53139cd Merge branch '2017.7' into vbox-skd-fix

- **PR #47213**: (dwoz) Fix coverage on py3 windows builds @ 2018-04-20 22:09:57 UTC
  - 976f031170 Merge pull request #47213 from dwoz/py3win
  - ad9c7f63f0 Fix coverage on py3 windows builds
  - 91252bac95 Adding updates for python3 compatibility and new virtualbox SDK version support.

- **PR #47197**: (dwoz) Move process target to top level module namespace @ 2018-04-20 15:41:06 UTC
  - cebcd6d069 Merge pull request #47197 from dwoz/testfix
  - 25803c9176 Move process target to top level module namespace

- **PR #47193**: (Ch3LL) Add network module integration tests @ 2018-04-20 13:37:19 UTC
  - d4269c2b70 Merge pull request #47193 from Ch3LL/network_test
  - bbf997c19 Add network module integration tests

- **PR #47189**: (Ch3LL) Add autoruns.list integration test for Windows @ 2018-04-19 21:16:34 UTC
  - c777248a78 Merge pull request #47189 from Ch3LL/autoruns
  - 6a88bedb7a Add autoruns to windows whitelist
  - e9e4d4af70 Add autoruns.list integration test for Windows

- **PR #47184**: (Ch3LL) Add status module integration modules tests for Windows @ 2018-04-19 19:38:56 UTC
  - 65f344e371 Merge pull request #47184 from Ch3LL/status_test
  - 25a84428b8 Add status module integration modules tests for Windows

- **PR #47163**: (rallytime) Updage jenkins module autodocs to use jenkinsmod name instead @ 2018-04-19 19:35:00 UTC
  - PR #46801: (yagnik) rename jenkins to jenkinsmod (refs: #46900, #47163)
- 965600ad6c Merge pull request #47163 from rallytime/jenkins-autodoc
- 0039395017 Updage jenkins module autodocs to use jenkinsmod name instead

**PR #47185**: (twangboy) Add additional integration tests to whitelist @ 2018-04-19 18:20:25 UTC
  - 0a43dde5fc Merge pull request #47185 from twangboy/add_tests
  - 345daa0423 Add additional integration tests to whitelist

**PR #47172**: (dwoz) Allow non admin name based runs on windows @ 2018-04-19 17:26:42 UTC
  - 1a600bb9a4 Merge pull request #47172 from dwoz/cover_without_admin
  - cadd759727 Use warnings to warn user
  - 14468e214 Allow non admin name based runs on windows

**PR #47110**: (kstreee) Fixes misusing of the timeout option. (refs: #47200) @ 2018-04-18 17:16:20 UTC
  - PR #46326: (kstreee) Fixes a timing bug of saltndo's client local. (refs: #47110, #47123, #47200, #47415)
  - PR #45874: (GwiYeong) fix for local client timeout bug (refs: #46326)
  - d5997d2301 Merge pull request #47110 from kstreee/fix-misusing-of-timeout
  - 0624ee0ed Fixes misusing of the timeout option.

**ISSUE #40948**: (ScoreUnder) salt-call falsely reports a master as down if it does not have PKI directories created (refs: #40961)

**PR #40961**: (terminalmage) Make error more explicit when PKI dir not present for salt-call @ 2018-04-18 16:08:17 UTC
  - 87ca2b4003 Merge pull request #40961 from terminalmage/issue40948
  - 6ba66cca41 Fix incorrect logic in exception check
  - fed5041c5f Make error more specific to aid in troubleshooting
  - 8c67ab53b4 Fix path in log message
  - 3198ca8b19 Make error more explicit when PKI dir not present for salt-call

**PR #47134**: (Ch3LL) Add user integration tests for windows OS @ 2018-04-18 14:29:40 UTC
  - 5fe63584d4 Merge pull request #47134 from Ch3LL/user_win_test
  - e7c9bc4038 Add user integration tests for windows OS

**PR #47131**: (gtmanfred) add __cli opts variable for master processes @ 2018-04-17 21:33:57 UTC
  - da26a3fac Merge pull request #47131 from gtmanfred/cli
  - 1b1c29bf62 add __cli for master processes

**ISSUE #47116**: (pcjeff) pip 10.0.0 can not import pip.req (refs: #47121)

**PR #47129**: (rallytime) Back-port #47121 to 2017.7 @ 2018-04-17 20:45:11 UTC
  - PR #47121: (pcjeff) fix pip import error in pip 10.0.0 (refs: #47129)
  - 9b8e6ff8c Merge pull request #47129 from rallytime/bp-47121
  - 11da526b21 add ImportError
  - bd0c23396c fix pip.req import error in pip 10.0.0

**PR #47102**: (gtmanfred) dont allow using no_use_wheel for pip 10.0.0 or newer (refs: #47220) @ 2018-04-17 20:44:58 UTC
- eb5ac51a48 Merge pull request #47102 from gtmanfred/2017.7
- 3dc93b310b fix tests
- 8497e08f8e fix pip module for 10.0.0
- 4e07a3d1e9 fix other tests
- b71e3d8a04 dont allow using no_use_wheel for pip 10.0.0 or newer

- **PR #47037**: (twangboy) Fix build_env scripts @ 2018-04-17 18:54:17 UTC
  - c1dc42e67e Merge pull request #47037 from twangboy/fix_dev_scripts
  - 990a24d7ed Fix build_env scripts

- **PR #47108**: (dwoz) Fix unit.utils.test_event.TestAsyncEventPublisher.test_event_subscription @ 2018-04-17 00:25:07 UTC
  - 64ac0b8a1a Merge pull request #47108 from dwoz/async_test_fix
  - 3d85e90ce5 AsyncTestCase is required for AsyncEventPublisher

- **PR #47068**: (cachedout) Catch an operation on a closed socket in a test @ 2018-04-16 19:56:03 UTC
  - 03892eaf0b Merge pull request #47068 from cachedout/catch_value_error_socket_test
  - 7db562632 Catch an operation on a closed socket in a test

- **PR #47065**: (dwoz) Jinja test fix @ 2018-04-16 16:16:42 UTC
  - 1ea2885ce2 Merge pull request #47065 from dwoz/jinja_test_fix
  - 673cd31c65 Merge branch '2017.7' into jinja_test_fix

- **PR #47077**: (dwoz) Fix failing state test by normalizing line endings @ 2018-04-16 15:48:39 UTC
  - 5293b5b5ca Merge pull request #47077 from dwoz/test_state_fix
  - 444da3f893 Fix py3 wart (chr vs bytesstring)
  - e8acca01c2 Fix failing state test by normalizing line endings

- **ISSUE #46538**: (HenriWahl) salt-cloud gives "FutureWarning: The behavior of this method will change in future versions." (refs: #47067)

- **PR #47067**: (gtmanfred) use the recommended opennebula lookup method @ 2018-04-16 15:48:15 UTC
  - ca967de5da Merge pull request #47067 from gtmanfred/2017.7
  - f913a7859ca use the recommended opennebula lookup method

- **PR #47064**: (dwoz) Fix fileserver roots tests @ 2018-04-14 21:30:23 UTC
  - 7fddad6cd9 Merge pull request #47064 from dwoz/roots_tests_fix
  - 25fd7e0694 fix py3 wart, encode os.linesep
  - d79f1a1961 Fix fileserver roots tests

- **PR #47069**: (cachedout) Pass the timeout variable to the CLI when calling salt in tests @ 2018-04-14 15:20:25 UTC
  - 977c6939c4 Merge pull request #47069 from cachedout/match_timeout_arg
  - b89905258 Pass the timeout variable to the CLI when calling salt in tests

- **PR #47074**: (dwoz) Kitchn should ignore artifacts directory @ 2018-04-14 13:06:19 UTC
  - 2c4c19c622 Merge pull request #47074 from dwoz/ignore_artifacts
- c3941efad0 Kitchn should ignore artifacts directory

- **ISSUE #47000**: (mvintila) Client API: full_return parameter missing from cmd_subset function (refs: #47055)

- **PR #47055**: (mattp-) #47000 - add proper handling of full_return in cmd_subset @ 2018-04-13 20:17:10 UTC
  - c484c0bd71 Merge pull request #47055 from bloomberg/GH-47000
  - 8af3f5b874 GH-47000: add proper handling of full_return in cmd_subset

- **PR #47039**: (twangboy) Fix winrm powershell script @ 2018-04-13 18:09:56 UTC
  - f3496b9003f Fix winrm powershell script
    - 46fa2c04de Fix py3 os.linesep wart
    - 3c56d7e54 Use salt.utils.fopen
    - aa965310f1 Clean up cruft
    - efc9866580 Jinja test fixes

- **PR #46326**: (kstreee) Fixes a timing bug of saltnado's client local. (refs: #47110, #47200, #47415) @ 2018-04-13 13:59:28 UTC
  - PR #45874: (GwiYeong) fix for local client timeout bug (refs: #46326)
  - 1700a10ebe Merge pull request #46326 from kstreee/client-local
  - 0f358a9c9e Fixes a timing bug of saltnado's client local.

- **ISSUE #46877**: (trudesea) Unable to apply GPO (Windows 2016) (refs: #46913)

- **ISSUE #44516**: (doesitblend) Windows PY3 Minion Returns UTF16 UnicodeError (refs: #44944)

- **PR #46913**: (lomeroe) 2017.7 Fix #46877 -- win_lgpo start/shutdown script reading @ 2018-04-12 15:10:50 UTC
  - PR #44944: (lomeroe) win_lgpo registry.pol encoding updates (refs: #46913, #47438)
  - c3c00316c5 Merge pull request #46913 from lomeroe/2017_7-fix46877
  - 369a0645ed move exception for clarity
  - 32ce5bfda5 Use configparser serializer object to read psscript.ini and script.ini startup/shutdown script files.

- **PR #47025**: (terminalmage) Fix server_id grain in PY3 on Windows @ 2018-04-12 15:08:00 UTC
  - 9e37cfc9d6 Merge pull request #47025 from terminalmage/fixed-server_id-windows
  - cb0c8f9ed3 Fix server_id grain in PY3 on Windows

- **PR #47027**: (rallytime) Back-port #44508 to 2017.7 @ 2018-04-12 15:05:51 UTC
  - PR #44508: (mzbroch) Capirca integration (refs: #47027)
  - 2e193c9b45 Merge pull request #47027 from rallytime/bp-44508
  - 8e72f362f4 Add priority field to support the latest capirca.
  - 112f92baab Add priority field to support the latest capirca.

- **PR #47020**: (rallytime) Back-port #46970 to 2017.7 @ 2018-04-11 21:48:25 UTC
  - PR #46970: (garethgreenaway) [2017.7] fix to pkgrepo comments test (refs: #47020)
  - 385fe2bc1e Merge pull request #47020 from rallytime/bp-46970
  - 9373df52b Update test_pkgrepo.py
- 13cf9eb5b1 Removing debugging.
- a61a8593e5 Removing suse from pkgrepo comments tests. the pkgrepo functions in SUSE pkg module do not support comments.

- **ISSUE #46504**: (jfoboss) ntp.managed fails on non-english systems (refs: #46539)
- **PR #46539**: (jfoboss) #46504 Fix @ 2018-04-11 14:13:24 UTC
  - 8f994e7cf9 Merge pull request #46539 from jfoboss/patch-1
  - 6890122e41 Merge pull request #1 from twangboy/pull_46539
    - 19c3fadbe5 Fix unit test for win_ntp
  - 826a8d3099 Fixing #46504

- **PR #46999**: (gtmanfred) switch pip test package @ 2018-04-10 21:18:33 UTC
  - 74d70e95a5 Merge pull request #46999 from gtmanfred/2017.7
  - 791af860ce switch pip test package

- **PR #46023**: (mattp-) add parallel support for orchestrations @ 2018-04-10 19:26:04 UTC
  - 8ada77f526 Merge pull request #46023 from bloomberg/parallel-orch
  - 0ac0b3ca29 Merge branch '2017.7' into parallel-orch

- **ISSUE #46581**: (qcypeter) puppet.fact tries to parse output to stderr (refs: #46613)

- **PR #46613**: (myinitialsarepm) Fix puppet.fact and puppet.facts to use stdout. @ 2018-04-10 15:18:07 UTC
  - 39d65a39cf Merge pull request #46613 from myinitialsarepm/fix_puppet.fact_and_puppet.facts
  - 44ecd13abc Update tests to use cmd.run_all
  - 7d7d40f541 Merge branch '2017.7' into fix_puppet.fact_and_puppet.facts
  - 0cee1520bd0 Merge branch '2017.7' into fix_puppet.fact_and_puppet.facts
  - 69e1ff681 Fix puppet.fact and puppet.facts to use stdout.

- **PR #46991**: (gtmanfred) use saltstack salt-jenkins @ 2018-04-10 14:19:00 UTC
  - ba5421d988 Merge pull request #46991 from gtmanfred/windows
  - 98588c1dc5 use saltstack salt-jenkins

- **PR #46975**: (gtmanfred) Make windows work for test runs in jenkinsci @ 2018-04-10 13:41:18 UTC
  - 00c4067585 Merge pull request #46975 from gtmanfred/windows
  - 1f69c0d7f8 make sure windows outputs xml junit files
  - 4a2ec1bb3 support new versions of winrm-fs
  - b9efec8526 remove libnacl on windows
  - 2edd5ea9e fix path
  - b03e272e44 windows work

- **PR #46945**: (vutny) [DOC] Fix Jinja block in FAQ page @ 2018-04-09 13:05:28 UTC
  - 3cf2353e41 Merge pull request #46945 from vutny/doc-faq-fix-jinja

- **PR #46925**: (terminalmage) Remove reference to directory support in file.patch state @ 2018-04-06 13:54:47 UTC
- fc2f728665 Merge pull request #46925 from terminalmage/fix-file.patch-docstring
- 97695657f0 Remove reference to directory support in file.patch state

**PR #46900:** (rallytime) Back-port #46801 to 2017.7 @ 2018-04-06 13:47:44 UTC
- PR #46801: (yagnik) rename jenkins to jenkinsmod (refs: #46900, #47163)
- eef6c518e1 Merge pull request #46900 from rallytime/bp-46801
- 6a41e8b457 rename jenkins to jenkinsmod

**PR #46899:** (rallytime) Back-port #45116 to 2017.7 @ 2018-04-06 13:47:17 UTC
- PR #45116: (arif-ali) fix adding parameters to http.query from sdb yaml (refs: #46899)
- 71839b0303 Merge pull request #46899 from rallytime/bp-45116
- b92f908d4 fix adding parameters to http.query from sdb yaml
  - 3d56960b0b address lint issues raised by @isbm
  - a9866c7a03 fix parallel mode py3 compatibility
  - 6d773086a4 removing prereq from test orch
  - 6c8a25778f add integration test to runners/test_state to exercise parallel
  - 2c86f16b39 cherry-pick cdata KeyError prevention from #39832
  - 26a96e8933 record start/stop duration for parallel processes separately
  - 4e844bd2b revisit previous join() behavior in check_requisites
  - f00a359cdf join() parallel process instead of a recursive sleep
  - 6e7007a4dc add parallel support for orchestrations

**ISSUE #43529:** (Ch3LL) Add publisher_acl Test to Auto Test Suite (refs: #44926)

**PR #44926:** (frogunder) whitelist_acl_test @ 2018-04-05 15:09:26 UTC
- d05b43753 Merge pull request #44926 from frogunder/whitelisted_acl
- 18e460fc30 Merge branch '2017.7' into whitelisted_acl
- 1ad4d7d988 fix assert errors
- 6a656016df update test
- 19a2244cb7 whitelist_acl_test

**ISSUE #46456:** (vitaliyf) "ValueError" when running orch with "subset" (refs: #46464)

**PR #46464:** (gtmanfred) fix salt subset in orchestrator @ 2018-04-05 14:52:01 UTC
- 7d822f9feca Merge pull request #46464 from gtmanfred/orchestration
- 637c3c6b7b fix pylint
- 0151013ddb document cli option for cmd_subset
- 4a3ed6607d add test for subset in orchestration
- 3112359dd6 fix salt subset in orchestrator

**ISSUE #46523:** (dwoz) Add a test to the cloud suite for Windows minion on EC2 (refs: #46879)

**PR #46879:** (dwoz) Fix multiple typos causing tests to fail @ 2018-04-05 13:59:28 UTC
- 805ed1c964 Merge pull request #46879 from dwoz/cloudtestfix
- dc54fc53c3 Fix multiple typos causing tests to fail

- **PR #46647**: (twangboy) Fix the tear down function in integration.modules.test_grains @ 2018-04-04 21:14:06 UTC
  - f70f6de282 Merge pull request #46647 from twangboy/win_fix_test_grains
  - c179388b0e Fix the tear down function in integration.modules.test_grains.GrainAppendTestCase

- **ISSUE #46754**: (nages13) grain item virtual_subtype shows 'Xen PV DomU' on Docker containers (refs: #46756)

- **ISSUE #43405**: (kfix) LXD-created LXC container is detected as a Xen domU (refs: #46756)

- **PR #46756**: (nages13) fix grains['virtual_subtype'] to show Docker on xen kernels @ 2018-04-04 20:53:49 UTC
  - 91c078ce12 Merge pull request #46756 from nages13/bugfix-grain-virtual_subtype
  - 781f5030a4 Merge branch 'bugfix-grain-virtual_subtype' of https://github.com/nages13/salt into bugfix-grain-virtual_subtype
    - cd1ac4b7f9 Merge branch '2017.7' into bugfix-grain-virtual_subtype
    - 0ace76c0e7 Merge branch '2017.7' into bugfix-grain-virtual_subtype
    - 9eb6f5c0d0 Merge branch '2017.7' into bugfix-grain-virtual_subtype
    - 73d6d9d365 Merge branch '2017.7' into bugfix-grain-virtual_subtype
    - 4a11e7a5aa Merge branch '2017.7' into bugfix-grain-virtual subtype
    - bf5034dbdb Merge branch '2017.7' into bugfix-grain-virtual_subtype
    - 8d12770951 Merge branch '2017.7' into bugfix-grain-virtual subtype
  - 7e704c0e81 Moved down container check code below hypervisors to validate containers type running in virtual environment. Fixes #46754 & #43405
  - 710f74c4a6 fix grains['virtual_subtype'] to show Docker on xen kernels

- **ISSUE #46762**: (ScoreUnder) prereq stack overflow (refs: #46788, #46799)

- **PR #46799**: (garethgreenaway) [2017.7] Adding test for PR #46788 @ 2018-04-04 20:41:23 UTC
  - **PR #46788**: (garethgreenaway) [2017.7] Ensure failed tags are added to self.pre (refs: #46799)
  - 058bbed221 Merge pull request #46799 from garethgreenaway/46762_prereq_shenanigans_tests
  - 13875e78cf Fixing documentation string for test.
  - 3d288c44d4 Fixing test documentation
  - 6cff02ef6a Adding tests for #46788

- **PR #46867**: (terminalmage) Backport string arg normalization to 2017.7 branch @ 2018-04-04 18:06:57 UTC
  - d9770bf3f8 Merge pull request #46867 from terminalmage/unicode-logging-normalization
  - 7652688e83 Backport string arg normalization to 2017.7 branch

- **PR #46770**: (twangboy) Change the order of SID Lookup @ 2018-04-04 17:33:10 UTC
  - 9eb98b1f6e Merge pull request #46770 from twangboy/fix_46433
  - 89af0a6222 Merge branch '2017.7' into fix_46433
  - 67b4697578 Remove unused import (ling)
  - 9302fa5ab0 Clean up code comments
  - b3839b330 Change the order of SID Lookup
- ISSUE #46826: (robgott) grain modules using tuples affect targeting (refs: #46839)
- PR #46839: (gtmanfred) match tuple for targets as well @ 2018-04-04 14:07:12 UTC
  - 9c77c0ff7 Merge pull request #46839 from gtmanfred/tupletarget
  - 3b7200ce27 merge tuple for targets as well
- ISSUE #40245: (czhong111) salt-api automatically restart caused by "opening too many files" (refs: #46817)
- ISSUE #36374: (szjur) Descriptor leaks in multithreaded environment (refs: #46817)
- ISSUE #20639: (GrizzlyV) salt.client.LocalClient leaks connections to local salt master (refs: #46817)
- PR #46845: (rallytime) Back-port #46817 to 2017.7 @ 2018-04-03 19:52:29 UTC
  - PR #46817: (mattp-) address filehandle/event leak in async run_job invocations (refs: #46845)
  - PR #32145: (paclat) fixes 29817 (refs: #46845)
  - 7db251dc11 Merge pull request #46845 from rallytime/bp-46817
  - 36a0ff0d8ca address filehandle/event leak in async run_job invocations
- PR #46847: (dwoz) strdup from libc is not available on windows @ 2018-04-03 19:51:33 UTC
  - e3d17a7bc Merge pull request #46847 from dwoz/missing-strdup
  - 55845e4e46 strdup from libc is not available on windows
- ISSUE #46765: (roskens) pkg.mod_repo fails with a python error when removing a dictionary key (refs: #46776)
- PR #46776: (gtmanfred) fix shrinking list in for loop bug @ 2018-04-03 17:32:16 UTC
  - f2dd79f9c4 Merge pull request #46776 from gtmanfred/2017.7
  - edc1059ee0 fix shrinking list in for loop bug
- PR #46838: (gtmanfred) use http registry for npm @ 2018-04-03 17:02:32 UTC
  - 194142dd2e8 Merge pull request #46838 from gtmanfred/npm
  - 989508b100 use http registry for npm
- ISSUE #42312: (frogunder) salt-call --local sys.doc none gives error/traceback in raspberry pi (refs: #46823)
- PR #46823: (rallytime) Improve __virtual__ checks in sensehat module @ 2018-04-03 16:56:08 UTC
  - e54254e7b Merge pull request #46823 from rallytime/fixed2312
  - dafa820f93 Improve __virtual__ checks in sensehat module
- PR #46641: (skizunov) Make LazyLoader thread safe @ 2018-04-03 16:09:17 UTC
  - 37f6d3d2e Merge pull request #46641 from skizunov/develop3
  - c624aa4827 Make LazyLoader thread safe
- PR #46837: (rallytime) [2017.7] Merge forward from 2016.11 to 2017.7 @ 2018-04-03 14:54:10 UTC
  - 989508b100 Merge pull request #46837 from rallytime/merge-2017.7
  - 8522c1d634 Merge branch '2016.11' into '2017.7'
  - 3e842d1df Merge pull request #46739 from rallytime/2016.11_update_version_doc
  - 4d865cc0f Update release versions for the 2016.11 branch
- PR #46740: (rallytime) Update release versions for the 2017.7 branch @ 2018-04-03 14:36:07 UTC
  - 307e7f35f9 Merge pull request #46740 from rallytime/2017.7_update_version_doc
- 7edf98d224 Update 2018.3.0 information and move branch from "latest" to "previous"
- 5336e866ac Update release versions for the 2017.7 branch

- **PR #46783**: (twangboy) Fix network.managed test=True on Windows @ 2018-04-03 12:54:56 UTC
  - ebf5dd276f Merge pull request #46783 from twangboy/fix_46680
  - da5ce25ef3 Fix unit tests on Linux
  - b7f4f377cd Add space I removed
  - f1c68a09b5 Fix network.managed test=True on Windows

- **PR #46821**: (rallytime) Fix the new test failures from the mantest changes @ 2018-04-03 12:40:51 UTC
  - **PR #46778**: (terminalmage) Replace flaky SPM man test (refs: #46821)
  - f652f25c1b Merge pull request #46821 from rallytime/fix-mantest-failures
  - 209a8029c3 Fix the new test failures from the mantest changes

- **ISSUE #46627**: (vangourd) Win_LGPO fails on writing Administrative Template for Remote Assistance (refs: #46800)

- **PR #46800**: (lomeroe) fix win_lgpo to correctly create valuenames of list item types @ 2018-04-03 12:38:45 UTC
  - c460f62081 Merge pull request #46800 from lomeroe/2017_7-46627
  - 2bee383e9d correct create list item value names if the valuePrefix attribute does not exist on the list item, the value is the value name, other wise, the valuename a number with the valuePrefix prepended to it

- **ISSUE #46347**: (twangboy) Buid 449: unit.modules.test_inspect_collector (refs: #46675)

- **PR #46675**: (dwoz) Skip test when git symlinks are not configured @ 2018-04-03 12:19:19 UTC
  - df26f2641e Merge pull request #46675 from dwoz/inspectlib-tests
  - d39f4852d8 Handle non-zero status exception
  - 83c005802b Handle cases where git can not be found
  - 628b875c4 Skip test when git symlinks are not configured

- **ISSUE #46808**: (ezh) Sharedsecret authentication is broken (refs: #46809)

- **PR #46815**: (terminalmage) Backport #46809 to 2017.7 @ 2018-04-02 20:05:15 UTC
  - **PR #46809**: (ezh) Fix sharedsecret authentication (refs: #46815)
  - 4083ec460 Merge pull request #46815 from terminalmage/bp-46809
  - 71d5601507 Fix sharedsecret authentication

- **PR #46769**: (dwoz) Adding windows minion tests for salt cloud @ 2018-04-02 18:51:49 UTC
  - 3bac917f4 Merge pull request #46769 from dwoz/wincloudtest
  - eabc234e5d Fix config override name
  - 5c22a0f88d Use absolute imports
  - 810042710d Set default cloud test timeout back to 500 seconds
  - 5ac89ad307 Use winrm_verify_ssl option causing tests to pass
  - 7185a709c allow not verifying ssl winrm saltcloud
  - ba5f11476c Adding windows minion tests for salt cloud

- **PR #46786**: (twangboy) Return int(-1) when pidfile contains invalid data @ 2018-04-02 18:42:12 UTC
– f1be939763 Merge pull request #46786 from twangboy/fix_46757
– b0053250ff Remove int(), just return -1
– 7d56126d74 Fixes some lint
– 49b3e937da Return int(-1) when pidfile contains invalid data

• PR #46814: (terminalmage) Backport #46772 to 2017.7 @ 2018-04-02 18:39:37 UTC
  – PR #46772: (bmiguel-teixeira) fix container removal if auto_remove was enabled (refs: #46814)
  – 89bf24b15c Merge pull request #46814 from terminalmage/bp-46772
  – a9f26f2ab8 avoid breaking if AutoRemove is not found
  – 7d56126d74 Fixes some lint

• PR #46813: (terminalmage) Get rid of confusing debug logging @ 2018-04-02 18:19:27 UTC
  – 5ea4ffbdb6 Merge pull request #46813 from terminalmage/event-debug-log
  – 5d6de3a2eb Get rid of confusing debug logging

• PR #46766: (twangboy) Change the way we’re cleaning up after some tests @ 2018-03-30 18:01:03 UTC
  – e533b718d2 Merge pull request #46766 from twangboy/win_fix_test_git
  – 5afc66452c Remove unused/redundant imports
  – 88fd72c52c Use with_tempfile decorator where possible

• PR #46778: (terminalmage) Replace flaky SPM man test (refs: #46821) @ 2018-03-30 17:55:14 UTC
  – 69d450db84 Merge pull request #46778 from terminalmage/salt-jenkins-906
  – bbf353d3ea Replace flaky SPM man test

• ISSUE #46762: (ScoreUnder) prereq stack overflow (refs: #46788, #46799)

• PR #46788: (garethgreenaway) [2017.7] Ensure failed tags are added to self.pre (refs: #46799) @ 2018-03-30 17:11:38 UTC
  – c935fb740 Merge pull request #46788 from garethgreenaway/46762_prereq_shenanigans
  – fa7aed6424 Ensure failed tags are added to self.pre.

• ISSUE #46354: (twangboy) Build 449: unit.test_state (refs: #46655)

• ISSUE #46349: (twangboy) Build 449: unit.test_pyds (refs: #46655)

• PR #46655: (dwoz) Fixing cleanUp method to restore environment @ 2018-03-29 18:31:48 UTC
  – 395b7f8fd2 Merge pull request #46655 from dwoz/pyobjects-46350
  – 5aad442f2 Fix up import and docstring syntax
  – 62d6e9230 Fix missing import
  – 18b1730320 Skip test that requires pywin32 on *nix platforms
  – 45dce1a485 Add reg module to globals
  – 09f9322981 Fix pep8 wart
  – 73d06f664b Fix linter error
- 009a8f56ea Fix up environ state tests for Windows
- b4be10b7fc Fixing cleanUp method to restore environment

**ISSUE #36802** (rmarcinik) using clean=True parameter in file.recurse causes python process to spin out of control (refs: #46632)

**PR #46632** (dwoz) Fix file.recurse w/ clean=True #36802 @ 2018-03-29 18:30:42 UTC
  - af45c49c42 Merge pull request #46632 from dwoz/file-recursively-36802
  - 44db77ae79 Fix lint errors and typo
  - cb5619537f Only change what is essential for test fix
  - eb822f5a12 Fix file.recurse w/ clean=True #36802

**ISSUE #46660** (mruepp) top file merging same does produce conflicting ids with gitfs (refs: #46751)

**PR #46751** (folti) top file merging strategy 'same' works again @ 2018-03-28 21:12:27 UTC
  - 6e9f504ed1 Merge pull request #46751 from folti/2017.7
  - 7058f10381 same top merging strategy works again

**PR #46691** (Ch3LL) Add groupadd module integration tests for Windows @ 2018-03-28 18:01:46 UTC
  - d3625e0815 Merge pull request #46691 from Ch3LL/win_group_test
  - 7cda825e90 Add groupadd module integration tests for Windows

**ISSUE #46352** (twangboy) Build 449: unit.test_client (refs: #46696)

**PR #46696** (dwoz) Windows unit.test_client fixes @ 2018-03-28 17:55:47 UTC
  - 14ab50d3f4 Merge pull request #46696 from dwoz/win_test_client
  - ec4634fc06 Better explanation in doc strings
  - d9ae2abb34 Fix spilling in docstring
  - b40fc5db8 Windows test client fixes

**ISSUE #45956** (frogunder) CTRL-C gives traceback on py3 setup (refs: #46032)

**PR #46732** (rallytime) Back-port #46032 to 2017.7 @ 2018-03-28 13:43:17 UTC
  - PR #46032: (DmitryKuzmenko) Workaroung python bug in traceback.format_exc() (refs: #46732)
  - 1222bdc0e0 Merge pull request #46732 from rallytime/bp-46032
  - bd19b962cd0 Workaroung python bug in traceback.format_exc()

**ISSUE #28142** (zmalone) Deprecate or update the copr repo (refs: #46749)

**PR #46749** (vutny) [DOC] Remove mentions of COPR repo from RHEL installation page @ 2018-03-28 13:20:50 UTC
  - 50fe1e9480 Merge pull request #46749 from vutny/doc-deprecate-copr
  - a1cc55da3d [DOC] Remove mentions of COPR repo from RHEL installation page

**PR #46734** (terminalmage) Make busybox image builder work with newer busybox releases @ 2018-03-27 21:14:28 UTC
  - bd1e8bccc7d Merge pull request #46734 from terminalmage/busybox
  - 6502b6b4ff Make busybox image builder work with newer busybox releases
• ISSUE saltstack/salt-jenkins#902: (rallytime) [2017.7/.5] Test failures for NPM on CentOS 6/7, Ubuntu 14, and OpenSUSE (refs: #46742)

• PR #46742: (gtmanfred) only use npm test work around on newer versions @ 2018-03-27 21:13:28 UTC
  - c09c6f819c Merge pull request #46472 from gtmanfred/2017.7
  - fd0e49d1e only use npm test work around on newer versions

• PR #46743: (Ch3LL) Workaround getpwnam in auth test for MacOSX @ 2018-03-27 21:10:47 UTC

- fa0b0efc46 Fix some installer script inconsistencies
• ISSUE #46552: (JeffLee123) State with require requisite executes despite onfail requisite on another state. (refs: #46571)

• PR #46571: (garethgreenaway) [2017.7] fixes to state.py @ 2018-03-20 13:40:04 UTC
  - f038e3c452 Merge pull request #46571 from garethgreenaway/46552_onfail_and_require
  - 152c43e843 Accounting for a case when multiple onfails are used along with requires. Previously if you have multiple states using 'onfail' and two of those states using a 'require' against the first one state, the last two will run even if the 'onfail' isn't met because the 'require' is met because the first state returns true even though it didn't execute. This change adds an additional hidden variable that is used when checking requisities to determine if the state actually ran.

### 30.2.53 Salt 2017.7.7 Release Notes

Version 2017.7.7 is a bugfix release for 2017.7.0.

The 2017.7.7 release contains only a small number of fixes, which are detailed below.

This release fixes two critical issues.

The first is Issue #48038, which is a critical bug that occurs in a multi-syndic setup where the same job is run multiple times on a minion.

The second issue is #48130. This bug appears in certain setups where the Master reports a Minion time-out, even though the job is still running on the Minion.

Both of these issues have been fixed with this release.

Generated at: 2018-06-17 19:26:52 UTC

- ISSUE #48130: (rmarchei) Minion timeouts with 2018.3.1 (refs: #48157)
- PR #48157: (gtmanfred) always listen when gathering job info @ 2018-06-17 19:04:09 UTC
  - 8af4f52134 Merge pull request #48157 from gtmanfred/2017.7.7
  - d8209e8a40 always listen when gathering job info
- PR #48140: (rallytime) Update man pages for 2017.7.7 @ 2018-06-14 21:22:43 UTC
  - b98c52ee51 Merge pull request #48140 from rallytime/man-pages-2017.7.7
  - 8893bf0d4c Update man pages for 2017.7.7
- PR #48136: (gtmanfred) [2017.7.7] bootstrap kitchen branch tests with 2017.7.6 @ 2018-06-14 21:20:16 UTC
  - baa0363336 Merge pull request #48136 from gtmanfred/2017.7.7
  - fce1c31146 bootstrap kitchen branch tests with 2017.7.6
- PR #48134: (rallytime) Add release notes file for 2017.7.7 @ 2018-06-14 16:31:34 UTC
  - b0ba0f8fd9 Merge pull request #48134 from rallytime/release-notes-2017.7.7
  - 217005b8f1 Add missing v for tag reference
  - d53569d1e3 Add release notes file for 2017.7.7
- ISSUE #48038: (austinpapp) jobs are not dedup'ing minion side (refs: #48075)
- PR #48098: (rallytime) Back-port #48075 to 2017.7.7 @ 2018-06-14 12:53:42 UTC
  - PR #48075: (garethgreenaway) [2017.7] Ensure that the shared list of jids is passed (refs: #48098)
  - 084de927fe Merge pull request #48098 from rallytime/bp-48075-2017.7.7
  - e4e628b3a Ensure that the shared list of jids is passed when creating the Minion. Fixes an issue when minions are pointed at multiple syndics.

30.2.54 Salt 2017.7.8 Release Notes

Version 2017.7.8 is a security and bugfix release for 2017.7.0.

Statistics

- Total Merges: 237
- Total Issue References: 48
- Total PR References: 279
- Contributors: 52 (Aveenstra, Ch3LL, Circuitsoft, DmitryKuzmenko, KaiSforza, Martin819, OrlandoAr-capix, UtahDave, Vaelaturn, abednarik, asnell, b1naryth1ef, baniobloom, baseri, bdruge, beornf, bmcorser, bowmanjd-lms, damon-atkins, darkpixel, discogestalt, doesitblend, dqminh, dubb-b, dwoz, frankiexyz, fro-gunder, fzizi, garethgreenaway, grokrecursion, gtmanfred, jacksonj, jagulli, lejambon, lomeroe, lorcith, lusche, mbunkus, meakh, mirceaulinic, nbraud, pritambaral, ralex, rallytime, rmcintosh, slaws, terminalmage, twangboy, twellspring, wyardley, xetix, zer0def)
Security Fix

CVE-2018-15751 Remote command execution and incorrect access control when using salt-api.
CVE-2018-15750 Directory traversal vulnerability when using salt-api. Allows an attacker to determine what files exist on a server when querying /run or /events.

Credit and thanks for discovery and responsible disclosure: nullbr4in, xcuter, koredge, loupos, blackcon, Naver Business Platform

New win_snmp behavior

- `win_snmp.get_community_names` now returns the SNMP settings actually in effect on the box. If settings are managed via GroupPolicy, those settings will be returned. Otherwise, normal settings are returned.
- `win_snmp.set_community_names` now raises an error when SNMP settings are being managed by GroupPolicy.

Option Added to Disable Docker Mine Updates

When a docker container is added, removed, started, stopped, etc., the results of a `docker.ps verbose=True all=True host=True` are sent to the `mine`, to be used by `mine.get_docker`.

A new config option (docker.update_mine) has been added. When set to False, Salt will not send this information to the mine. This is useful in cases where sensitive information is stored in the container's environment.

Changelog for v2017.7.7..v2017.7.8

Generated at: 2018-09-04 21:09:41 UTC

- **PR #49498**: (rallytime) Pin CherryPy version to < 18.0.0 in requirements files for PY2 @ 2018-09-04 17:55:02 UTC

    – 3c33ee554a Skip tests in integration.shell.test_master
• ISSUE #46689: (mxork) pkg.installed: hold: True not applied to a package which is already installed. (refs: #48426)
• PR #48426: (garethgreenaway) [2017.7] fixes to states/pkg.py @ 2018-07-31 20:18:05 UTC
- 8a1285239a Merge pull request #48426 from garethgreenaway/46689_fixing_pkg_held_when_package_is_installed
- 9b0f5dd212 Fixing indentation, removing some unnecessary conditionals.
- 727964ab55 One last cleanup.
- 11cb86e6eb General cleanup in pkg state, reducing duplicate code. Fixing the requires_salt_modules decorator, sys.doc was returning too much information for the event to handle. This change specifically calls sys.doc with the module name.
- 16fb6ae635 Make sure pkg.hold and pkg.unhold are available before running the test.
- 998651102d Fixing a situation when a package is already installed via salt or manually and a state attempts to set that package to be held. Previously the holding/unholding logic was only being run against packages that were being installed. This change moves the holding logic outside and runs it against all desired packages. Adding a new test to test holding logic.

- **ISSUE #47689:** (OrlandoArcapix) Poor performance of pip.installed when given a list of packages (refs: #47734)
- **PR #47734:** (OrlandoArcapix) #47689 improve run-speed of pip package state @ 2018-07-31 19:15:35 UTC
  - c8e69431ff Merge pull request #47734 from OrlandoArcapix/Issue47689-pip-state-performance
  - 662bd1f780 Merge branch '2017.7' into Issue47689-pip-state-performance
  - 66936b4f41 Changed string comparison in pip test to match new confirmation string - ref PR #47734.
  - bb5939d6ef Merge branch '2017.7' into Issue47689-pip-state-performance
  - d6a49ae41c Merge branch '2017.7' into Issue47689-pip-state-performance
  - d4083fc9d1 Merge branch 'issue47689-pip-state-performance' of github.com:OrlandoArcapix/salt into Issue47689-pip-state-performance
  - 779b5fa785 Merge branch '2017.7' into Issue47689-pip-state-performance
  - f3653349ab Removed whitespaces at end of added comments lines
  - db11f2ff4b Merge branch '2017.7' into Issue47689-pip-state-performance
  - eac0178de2 Ref: #47689 - document additional kwarg passed to pip._check_if_installed function
  - 0d19803106 Merge branch '2017.7' into Issue47689-pip-state-performance
  - d3678bf2f3 #47689 fix lint errors
  - 4f8ec8f0cb #47698 improve run-speed of pip package state checks by only loading the current package list once when checking multiple packages

- **PR #48844:** (AVeenstra) Fixed Python 3 incompatibility in methods in nilrt_ip and debian_ip. @ 2018-07-31 17:20:27 UTC
  - 83a5b3ec47 Merge pull request #48844 from AVeenstra/fix-python3-incompatibility
  - f238779a62 Merge branch '2017.7' into fix-python3-incompatibility
  - 6b1805af6c Fixed Python 3 incompatibility in methods in nilrt_ip and debian_ip.

- **ISSUE #48637:** (slaws) state.file.retention_schedule does not ignore relative directory when using getmtime() (refs: #48662)
- **PR #48662:** (slaws) Excluding relative dirs in state.file.retention_schedule @ 2018-07-31 16:15:09 UTC
  - 136f6735a Merge pull request #48662 from slaws/fix-retention-schedule-48637
  - 3c8f5f5b3d pylint fix
  - 5539eff39e Excluding relative dirs in state.file.retention_schedule
• ISSUE #48818: (guettli) Broken Link in Docs (refs: #48840)

• PR #48840: (gtmanfred) fix links in pkg doc. @ 2018-07-31 16:13:00 UTC
  - 1fc04f281b Merge pull request #48840 from gtmanfred/docs
  - 8d2d268c4a fix links in pkg doc.

• PR #48834: (gtmanfred) read output of stringio if it is readable @ 2018-07-31 13:40:48 UTC
  - 0a19f845ea Merge pull request #48834 from gtmanfred/slsutil
  - f9441d2bef read output of stringio if it is readable

• PR #48788: (Ch3LL) Add timezone windows integration tests and fix get_zone @ 2018-07-27 20:14:30 UTC
  - 2e00939a6e Merge pull request #48788 from Ch3LL/timezone_windows
  - de95a6a215 add unused import to timezone test file
  - 22e424859e add unused import to import
  - 0840fc3117 disable pylint import error
  - f09d1a2c7e Add timezone windows integration tests and fix get_zone

• PR #48742: (frogunder) add windows integration tests for states.file @ 2018-07-27 13:57:27 UTC
  - 8e61f3dce0 Merge pull request #48742 from frogunder/45014
  - f0858b043 Merge branch '45014' of https://github.com/frogunder/salt into 45014
    * 757fde70c6 Merge branch '2017.7' into 45014
  - 33c20c1ec0 fix tests
  - a7a914060d add windows integration tests for states.file

• ISSUE #48417: (samilaine) Contribution Documentation Refers to Incorrect Pylintrc (refs: #48795)

• PR #48795: (rallytime) Update linting docs to contain .testing.pylintrc use @ 2018-07-27 13:34:13 UTC
  - d74f47b340 Merge pull request #48795 from rallytime/fix-48417
  - 5123b17fffd Update linting docs to contain .testing.pylintrc use

• PR #48789: (rallytime) Back-port #48783 to 2017.7 @ 2018-07-26 21:47:49 UTC
  - PR #48783: (KaiSforza) Only run lint checks against changed files (refs: #48789)
  - PR #48610: (gtmanfred) only run pylint on files that change (refs: #48783)
  - bbea9ae936 Merge pull request #48789 from rallytime/bp-48783
  - 682a05bebe Threshold was wrong
  - d4ca03a97 test: except for OSError only
  - 4547231909 Only run lint checks against changed files

• PR #48731: (zer0def) Fixed enable_vnc runner arg being passed into seed_cmd module arg in virt.init. @ 2018-07-26 21:13:59 UTC
  - 41464d4b39 Merge pull request #48731 from zer0def/virt-runner-init-args
  - a1fa081ad0 Documentation to missing parameters in virt.init runner.
  - 365ebdf539 Fixed enable_vnc runner arg being passed into seed_cmd module arg in virt.init.

• PR #48749: (Ch3LL) Update Saltstack Logo banner on docs.saltproject.io @ 2018-07-25 13:05:04 UTC
- 169afea16a Merge pull request #48749 from Ch3LL/logo_docs
- 73b1fc29f0 Update Saltstack Logo banner on docs.saltproject.io

- **PR #48743**: (rallytime) Update DOCBANNER with new SaltConf18 image @ 2018-07-24 16:46:19 UTC
  - 781c6a6c36 Merge pull request #48743 from rallytime/saltconf-ad-2017.7
  - 6df8fd8652 Update DOCBANNER with new SaltConf18 image

- **PR #48720**: (Ch3LL) Fix test_managed_source_hash_indifferent_case on macosx to correct tmp path @ 2018-07-23 22:32:56 UTC
  - ce4e22224 Merge pull request #48720 from Ch3LL/mac_file_path
  - 01d25fae19 Fix test_managed_source_hash_indifferent_case on macosx to correct tmp path

- **PR #48719**: (Ch3LL) Enable service if disabled before running state service tests @ 2018-07-23 21:01:14 UTC
  - 4b9f037d43 Merge pull request #48719 from Ch3LL/service_mac_state
  - f44a2fc349 Enable service if disabled before running state service tests

- **PR #48715**: (rallytime) [2017.7] Mark some tornado tests as flaky @ 2018-07-23 17:27:13 UTC
  - b2431eb10 Merge pull request #48715 from rallytime/flaky-tests
  - 7332c567 [2017.7] Mark some tornado tests as flaky

- **PR #48672**: (frogunder) add service enabled test @ 2018-07-23 15:38:49 UTC
  - 801ea38b8d Merge pull request #48672 from frogunder/45012
  - 074f2e58a add service enabled test

- **PR #48691**: (Ch3LL) Add windows pkg module integration tests @ 2018-07-22 20:01:30 UTC
  - 689c2312d2b Merge pull request #48691 from Ch3LL/win_repo_pkg_test
  - 4b7d6d80c5 Remove unnecessary jinja in curl.sls file
  - 2bedadfa Add windows pkg module integration tests

- **ISSUE #48627**: (nbraud) acme module's group parameter is non-functional (refs: #48635)

- **ISSUE #48626**: (nbraud) acme module fails to set file permissions if the certificate is already present (refs: #48635)

- **PR #48635**: (nbraud) Bug fixes in the acme module & state @ 2018-07-22 19:53:49 UTC
  - 83e4bba916 Merge pull request #48635 from nbraud/acme
  - 3673ae9de modules/acme: explicitly ignore the perms return value
  - 1800231e8 Fixup some schema expectations
  - 8c718cb417 acme: Make the private key mode configurable
  - 917dea6761 modules/acme: Use file.check_perms ret-morphing powers
  - d2241ceb2d module/acme: Do not exit early when the certificate already exists
  - 98af0db826 modules/acme: Set the private key filemode to 0640

- **PR #48345**: (twangboy) Fix behavior of powercfg module and state @ 2018-07-20 17:37:13 UTC
  - 85991680c8 Merge pull request #48345 from twangboy/fix_48169
  - ead19725b6 Merge branch '2017.7' into fix_48169
  - 653f8cb383 Fix some docs errata

30.2. Previous Releases

4951
- 8898e5ff11 Add warn_until Fluorine
- 707906ac15 Fix unit.state.test_powercfg

- 0d9c56e540 Add some more logging
- b20453de9f Use minutes to set
- 7dc7eb11c2 Fix documentation to denote seconds when setting

- **PR #48656**: (Ch3LL) Add windows ip module integration tests @ 2018-07-20 14:57:45 UTC
  - 96447ce541 Merge pull request #48656 from Ch3LL/windows_ip_mod
  - 90c3f568b1 Add windows ip module integration tests

- **PR #48638**: (twangboy) Remove vcredist 2015 from Py3 installer @ 2018-07-20 14:56:40 UTC
  - 0c5ff3dc8 Merge pull request #48638 from twangboy/fix_vcredist
  - e30d17099d Use goto instead of if statement
  - e1042fa084 Remove vcredist for Py3

- **PR #48664**: (Ch3LL) [2017.7] Fix service.disabled test for macosx @ 2018-07-20 14:32:56 UTC
  - 1ebd96d909 Merge pull request #48664 from Ch3LL/srv_disable_mac
  - f1fbfad387 move the disable call up in try block
  - f60d21bda4 reverse assertion order for service disable test
  - 3727d1b3b9 switch try/except to match 2018.3
  - fb953c2369 [2017.7] Fix service.disabled test for macosx

- **PR #48625**: (Ch3LL) Follow up to PR #48555 @ 2018-07-20 14:27:55 UTC
  - **PR #48555**: (Ch3LL) Fix state.sls_id not running on ssh minion (refs: #48625)
  - 3da3cf2f3f Merge pull request #48625 from Ch3LL/ssh_state
  - f590eb2b02 Update state.py
  - 9790ee3d0d Follow up to PR #48555

- **PR #48673**: (Ch3LL) Use different pub and ret ports for testprogram integration tests @ 2018-07-20 14:11:51 UTC
  - 33812f78f1 Merge pull request #48673 from Ch3LL/mac_port
  - 87dd85a220 Use different pub and ret ports for testprogram integration tests

- **PR #48675**: (Ch3LL) Fix mac service.disable tests @ 2018-07-20 14:09:41 UTC
  - 5f6a7c4d89 Merge pull request #48675 from Ch3LL/mac_disable
  - c78efab828 Fix mac service.disable tests

- **ISSUE #43138**: (F30) npm.installedmistakenly throws error for packages which are "installed via remote" (refs: #48492, #48658)

- **PR #48658**: (wyardley) Improve handling of json output (#43138) @ 2018-07-20 14:08:34 UTC
  - **PR #48492**: (wyardley) Improve identifying json out in npm module (#43138) (refs: #48658)
  - 93d2f51d2b Merge pull request #48658 from wyardley/wyardley-npm-json-output-2017
  - 7ff3c9c5ff Improve handling of npm json output (#43138)
• ISSUE #48677: (OrlandoArcapix) npm.bootstrap does not return True (clean) with test=true and no changes (refs: #48678)

• PR #48678: (OrlandoArcapix) Fix for issue #48677 - return clean npm.bootstrap on no changes @ 2018-07-20 14:07:22 UTC
  - 3e293b0513 Merge pull request #48678 from OrlandoArcapix/fix-npm-dryrun-test
  - 851a40ff6b Fix for issue #48677 - return True when no changes are to be made with npm.bootstrap with test=true

• ISSUE #46884: (alexandergraul) salt.utils.rsax931._init_libcrypto() fails to initialize libopenssl1_1-1.1.0h (refs: #48580)

• PR #48580: (rallytime) Don’t error on retcode 0 in libcrypto.OPENSSL_init_crypto call @ 2018-07-19 19:21:13 UTC
  - 3e293b0513 Merge pull request #48580 from OrlandoArcapix/fix-npm-dryrun-test
  - 851a40ff6b Fix for issue #48677 - return True when no changes are to be made with npm.bootstrap with test=true

• ISSUE #46924: (chschmitt) Stale custom roster from __pycache__ executed instead of changed .py file (refs: #48593)

• PR #48593: (pritambaral) Fix importlib pyc loading order @ 2018-07-17 21:06:28 UTC
  - a8ae2adf64 Merge pull request #48593 from pritambaral/fix-2017.7-importlib-pyc-loading-order
  - bab4a769d4 Revert "only run pylint on files that change"

30.2. Previous Releases
• **PR #48614**: (rallytime) Back-port #48562 to 2017.7 @ 2018-07-17 15:04:04 UTC
  - **PR #48562**: (basepi) Add timeouts to all s3 queries (refs: #48614)
  - 6e32bb7f74 Merge pull request #48614 from rallytime/bp-48562
  - cb65abf2ec Add timeouts to all s3 queries

• **ISSUE #48415**: (doesitblend) Event.send short-circuiting in multi-master mode (refs: #48588)

• **PR #48588**: (garethgreenaway) [2017.7] event send multi master @ 2018-07-17 10:31:20 UTC
  - 1b6e638f88 Merge pull request #48588 from garethgreenaway/48415_event_send_multi_master
  - fab25af1a9 Adding some quick documentation about why we are setting ret=True following the channel.send.
  - bf78f4b188 If the channel send is successful and does not raise an exception, we set ret to True, in case a previous exception from a previous channel send to another master has sent it to False.
  - 8d1551c5f8 When using Salt multi-master, if we encounter a salt master that has not accepted the minion key yet we should not exit right away, rather continue on and try the next salt master available in the list.

• **PR #48610**: (gtmanfred) only run pylint on files that change (refs: #48783) @ 2018-07-17 01:36:50 UTC
  - 24ffda49ba Merge pull request #48610 from gtmanfred/2017.7
  - 779d1a5dcb only run pylint on files that change

• **PR #48584**: (Ch3LL) Fix grp import for mac in test_user integration test @ 2018-07-16 19:28:13 UTC
  - 5391dd0a8d Merge pull request #48584 from Ch3LL/mac_user_grp
  - 585ee9db90 Fix grp import for mac in test_user integration test

• **PR #48555**: (Ch3LL) Fix state.sls_id not running on ssh minion (refs: #48625) @ 2018-07-16 13:24:41 UTC
  - 61572b6780 Merge pull request #48555 from Ch3LL/ssh_id
  - f69932f506 fix pylint
  - 70e36764ee Add more tests for salt-ssh state.sls_id
  - dab80e805c Fix state.sls_id to run on ssh minion and not master

• **PR #48583**: (Ch3LL) Add flaky decorator to mac_system and mac_timezone tests @ 2018-07-13 19:56:40 UTC
  - aa6dcf39e8 Merge pull request #48583 from Ch3LL/mac_flaky_tests
  - 4ba2299a87 import flaky decorator on mac tests
  - 8112284b1e Add flaky decorator to mac_system and mac_timezone tests

• **PR #48534**: (xetix) Fix behaviour of function latest_version in zypper module when multip... @ 2018-07-13 19:56:05 UTC
  - 6973152057 Merge pull request #48534 from xetix/fix-zypper-latest_version
  - 9985f0b4c1 Lint: remove extra blank line
  - 5fbeda8a36 Merge branch '2017.7' into fix-zypper-latest_version
  - 56a44927b1 Merge branch 'fix-zypper-latest_version' of https://github.com/xetix/salt into fix-zypper-latest_version
    - 4e87f5a0f Adding testcase for this fix.
• b354c6863c Fix behaviour of function latest_version in zypper module when multiple packages are passed to function. Function now properly return dict with empty string as version if latest packages is already installed, and multiple packages are passed to function
  – db35d0c1e1 Adding testcase for this fix.
  – d2513757ed Fix behaviour of function latest_version in zypper module when multiple packages are passed to function. Function now properly return dict with empty string as version if latest packages is already installed, and multiple packages are passed to function

• PR #48582: (dwoz) Finally fix prepend for real @ 2018-07-13 18:45:35 UTC

  – f37571e0bd Merge branch '2017.7' into test_prepend_fix

• PR #48564: (dwoz) Fix failing prepend test @ 2018-07-13 14:12:47 UTC
  – 13f67335f3 Merge pull request #48564 from dwoz/test_prepend_fix
    • 136ddf5f54 Finally fix prepend for real
  – 66b25e65bf Fix failing prepend test

• PR #48558: (dwoz) Remove which mock to get the test passing @ 2018-07-12 19:04:12 UTC
  – b8e27729f Merge pull request #48558 from dwoz/test_file_fix
  – c85bf477f Remove which mock to get the test passing

• PR #48552: (KaiSforza) Set up junit in jenkins @ 2018-07-12 16:23:33 UTC
  – a15ec65202d Merge pull request #48552 from KaiSforza/jenkins-junit-2017
  – 72b1830974 Set up junit in jenkins

• PR #48550: (gtmanfred) add posargs to tox pylint @ 2018-07-12 14:34:25 UTC
  – f73108026e Merge pull request #48550 from gtmanfred/2017.7
  – d5ec03d9b6 add posargs to tox pylint

• PR #48535: (asnell) Update manage_file helptext @ 2018-07-12 13:34:47 UTC
  – 113b0426f8 Merge pull request #48535 from asnell/asnell-patch-2
  – d328f6e43d Update manage_file helptext
    – PR saltstack/salt#48525: (gtmanfred) add kazoo for testing zookeeper. (refs: #48527)

• PR #48527: (gtmanfred) Revert "add kazoo for testing zookeeper." @ 2018-07-11 17:29:16 UTC
  – 0c0c05c2bc Merge pull request #48527 from saltstack/revert-48525-2017.7
  – 18d06c1a93 Revert "add kazoo for testing zookeeper."

• PR #48526: (twangboy) Rollback python-certifi-win32 @ 2018-07-11 17:26:56 UTC
  – 05bad3e71c Merge pull request #48526 from twangboy/rollback_certifi-win32
  – 361b3dc2f Rollback python-certifi-win32

• PR #48521: (Martin819) Back-port #48222 to 2017.7 @ 2018-07-11 16:42:51 UTC
  – PR #48222: (Martin819) Fix GlusterFS module for version 4.0 and above (refs: #48521)
    – db066eef4 Merge pull request #48521 from Martin819/2017.7
    – d5d01f6698 Fix for GlusterFS 4.0 and above
• **PR #48525**: ![gtmanfred](https://github.com/gtmanfred) add kazoo for testing zookeeper. **@ 2018-07-11 16:09:40 UTC**
  - ed0bd2bbe4 Merge pull request **#48525** from gtmanfred/2017.7
  - d7a6bfc2bc add kazoo for testing zookeeper.

• **ISSUE #48277**: ![dvenckus](https://github.com/dvenckus) init.sls with included states fails with more than one, 'Template was specified incorrectly: False' (refs: **#48388**)

• **ISSUE #46986**: ![github-abcde](https://github.com/github-abcde) opts file_roots gets overwritten with pillar_roots in orchestration run (refs: **#48388**)

• **PR #48388**: ![garethgreenaway](https://github.com/garethgreenaway) [2017.7] reset file_roots for renderers after compile_pillar **@ 2018-07-11 13:13:45 UTC**
  - ad5a959ab9 Merge pull request **#48388** from garethgreenaway/48277_2017.7_file_roots_wrong
  - 6f11da35a7 Fixing a few things in the new test.
  - cf747b14ec Fixing lint issue
  - 16d36c79c8 When pillar items are compiled a new render is instantiated but the file_roots is the pillar_roots. This change forces the __opts__['file_roots'] to be set to what is set in actual_file_roots for all renderers once compile_pillar has finished. Adding a test when this situation is run via a orchestration runner.

• **PR #48512**: ![gtmanfred](https://github.com/gtmanfred) pin pm and grunt packages for npm tests **@ 2018-07-11 13:06:06 UTC**
  - 38df812257 Merge pull request **#48512** from gtmanfred/npm
  - 9ba0f6b3a0 pin pm and grunt packages for npm tests

• **PR #48513**: ![rallytime](https://github.com/rallytime) [2017.7] Merge forward from 2017.7.7 to 2017.7 **@ 2018-07-11 13:04:01 UTC**
  - 04ba31147e Merge pull request **#48513** from rallytime/merge-2017.7
  - a466a4880f Merge branch '2017.7.7' into '2017.7'

• **PR #48514**: ![gtmanfred](https://github.com/gtmanfred) upgrade dependencies for pytest tests **@ 2018-07-10 20:53:55 UTC**
  - f0352ea95a Merge pull request **#48514** from gtmanfred/2017.7
  - 739bf92599 upgrade dependencies for pytest tests

• **PR #48491**: ![grokrecursion](https://github.com/grokrecursion) Group gid fixed as integer **@ 2018-07-10 19:31:40 UTC**
  - 5372b60137 Merge pull request **#48491** from grokrecursion/group-fix-v2
  - 1556b37221 fixed pylint errors
  - f6d9177dab fixed indentation for pep8
  - b9556bf923 v2 try of gid converted to integer

• **PR #48375**: ![Ch3LL](https://github.com/Ch3LL) Add user and group to makedirs cmd in file.copy **@ 2018-07-10 12:35:10 UTC**
  - 16d3daab3c Merge pull request **#48375** from Ch3LL/file_copy
  - d16a790775 Add mode to _makedirs call in file.copy
  - 2cbcb4fd26 Add user and group to makedirs cmd in file.copy

• **PR #48490**: ![KaiSforza](https://github.com/KaiSforza) Cifixes **@ 2018-07-09 15:20:46 UTC**
  - d38951bb3 Merge pull request **#48490** from KaiSforza/cifixes
  - 96e7199af5 Mark failed if anything is found
  - 6749a6bf19 Stop archiving the docs
• PR #48472: (gtmanfred) use tox to run pylint @ 2018-07-07 02:46:46 UTC
  - 22cd4206c4 Merge pull request #48472 from gtmanfred/2017.7
  - c7a3a7d8bd update jenkins tests to use tox for lint
  - 44aaac1d33 use tox to run pylint
• PR #48476: (twangboy) Fix dependencies @ 2018-07-06 23:43:26 UTC
  - 27ea8f35ea Merge pull request #48476 from twangboyfix_dependencies
  - b0087d425c Add license info
  - 935f9b560c Fix dependencies
• ISSUE #48336: (JuanManuelVizcainoAbad) file.directory (refs: #48399)
• PR #48399: (garethgreenaway) [2017.7] fixes to module/file.py @ 2018-07-06 18:02:29 UTC
  - acf42864aa Merge pull request #48399 from garethgreenaway/48336_2017_7_ensure_chmod_setuid_with_chown
  - 8efd33320f Normalize the mode before we compare it.
  - f894f0ce8 Setting the mode with setuid or setgid bits in addition to setting the owner and group will force the setuid & setgid bits to reset. This change ensures that we set the mode after setting the owner & group.
• PR #48471: (gtmanfred) Add some configurations to tox @ 2018-07-06 17:45:55 UTC
  - 616ff6b78 Merge pull request #48471 from gtmanfred/2017.7
  - 392ab4e51f Add some configurations to tox
• PR #48433: (discogestalt) Fix issue with redismod.hmset method @ 2018-07-06 15:55:44 UTC
  - 6234d9b15d Merge pull request #48433 from discogestalt/fix-redismod.hmset
  - 65817ac74d Use clean_kwarg method instead
  - f7fa7f57c6 Found another issue with redismod.hmset
  - 5624865f86 Fix issue with redismod.hmset method
• PR #48428: (terminalmage) Fix outputter detection in jobs.lookup_jid runner @ 2018-07-06 14:37:37 UTC
  - aacee0fe2c Merge pull request #48428 from terminalmage/fix-jobs.lookup_jid
  - 6509aa9089 Fix outputter detection in jobs.lookup_jid runner
• PR #48429: (rallytime) Back-port #46824 to 2017.7 @ 2018-07-03 21:45:36 UTC
  - PR #46824: (beorni) Regression to ignore retcodes on crontab calls (refs: #48429)
  - a7e52f0de2 Merge pull request #48429 from rallytime/bp-46824
  - 8b4486248d Added ignore_retcode to mock unit tests
  - f8beab71dd Regression to ignore retcodes on crontab calls
• PR #48432: (dwoz) Prepend test needs file.touch method @ 2018-07-03 21:32:48 UTC
  - 4576ef20bc Merge pull request #48432 from dwoz/file-prepend-again
  - 349a2b279e Prepend test needs file.touch method
• ISSUE #48230: (whytewolf) file.managed source_hash case-sensitive for test=true (refs: #48422)
• ISSUE #38914: (hgfischer) Uppercase checksums are not accepted by archive.extracted (refs: #40754, #48422)
• PR #48422: (rallytime) Allow file.managed to work with uppercase source_hash in test=true mode @ 2018-07-03 16:40:59 UTC
  – PR #40754: (lordcirth) file.manage_file: uppercase checksums now work (refs: #48422)
  – 422441505d Merge pull request #48422 from rallytime/fix-48230
  – a6abf85621 Allow file.managed to work with uppercase source_hash in test=true mode
  – 4c691ac57a Add regression test for Issue #48230
• PR #48410: (dwoz) Fix service dead test on windows @ 2018-07-03 14:17:29 UTC
  – 83e387c951 Merge pull request #48410 from dwoz/service_dead_test_fix
  – 5c0923484d Fix service dead test on windows
• PR #48413: (twangboy) Fix archive.extracted to handle UNC paths @ 2018-07-03 14:14:46 UTC
  – d3ba345da5 Merge pull request #48413 from twangboy/fix_47811
  – c5aad0f30d handle unc paths
• PR #48416: (dwoz) Fix service integration test (py3) @ 2018-07-02 23:21:08 UTC
  – 827ef2a9a4 Merge pull request #48416 from dwoz/service_integration_fix
  – c4f150dcd Fix service integration test (py3)
• PR #48385: (Ch3LL) Update release versions for the 2017.7 branch @ 2018-07-03 13:39:29 UTC
  – 10fe7d2bb9 Merge pull request #48385 from Ch3LL/update_version_doc_2017.7
  – 3cf335b0b9 Update release versions for the 2017.7 branch
• PR #48405: (Ch3LL) [2017.7] Remove In Progress Warning on 2017.7.7 @ 2018-07-03 13:32:10 UTC
  – f8a9a037e6 Merge pull request #48405 from Ch3LL/rm_inprog_2017.7
  – 03ed516fa [2017.7] Remove In Progress Warning on 2017.7.7
• PR #48409: (dwoz) Fix file state prepend test @ 2018-07-02 23:21:08 UTC
  – 8ac867c168 Merge pull request #48409 from dwoz/test_prepend_fix
  – 9c7085b70f Fix file state prepend test
• PR #48396: (dwoz) Fix file.symlink state test for windows @ 2018-07-02 18:10:32 UTC

  – d345631e6 Fix file.symlink state test for windows
• PR #48362: (twangboy) Fix stacktrace when registry entries are missing @ 2018-06-30 13:20:01 UTC
  – 7e5f26837 Merge pull request #48362 from twangboy/fix_48276
  – 77629f640a Fix module unit tests
  – b5ca560b73 Fix lint error
  – 210e280ecf Use explicit parameter names
  – 776db98a5e Handle missing registry entries
• PR #48383: (rallytime) Back-port #48379 to 2017.7 @ 2018-06-29 19:48:38 UTC
  – PR #48379: (KaiSforza) Clean up the workspaces at the end for every job (refs: #48383)
  – 8022bb6b7c Merge pull request #48383 from rallytime/bp-48379

4958 Chapter 30. Release Notes
- 9fc7815594 Clean up the workspaces at the end for every job
- **PR #48382**: (rallytime) Back-port #48346 to 2017.7 @ 2018-06-29 19:45:12 UTC
  - PR #48346: (KaiSforza) Use the right ssh key to destroy kitchen (refs: #48382)
  - aa68aa774a Merge pull request #48382 from rallytime/bp-48346
  - 6a70ba222e Use the right ssh key to destroy kitchen
- **PR #48381**: (rallytime) Back-port #48330 to 2017.7 @ 2018-06-29 19:43:46 UTC
  - PR #48330: (KaiSforza) Add warnings plugin to replace violations (refs: #48381)
  - 9519f640e7 Merge pull request #48381 from rallytime/bp-48330
  - 6857bedcc2 Add warnings plugin to replace violations
- **PR #48363**: (dubb-b) Changing debug to info for logging @ 2018-06-28 20:45:17 UTC
  - 14db0aa35d Merge pull request #48363 from dubb-b/2017.7
  - c0b962e28d Changing debug to info for logging
- **PR #48352**: (Ch3LL) Add missing key to accept_dict function in wheel docs @ 2018-06-28 13:54:37 UTC
  - 5b29cd326f Merge pull request #48352 from Ch3LL/wheel_doc
  - 89ada68165 Add missing key to accept_dict function in wheel docs
- **ISSUE #48316**: (ralex) Wrong init system used in virtual module "service" on Manjaro (refs: #48349)
- **PR #48349**: (ralex) Disable the "service" module on Manjaro since it is using systemd @ 2018-06-28 13:32:37 UTC
  - 53cf1794be Merge pull request #48349 from ralex/fix-manjaro-service-behaviour
  - 6cafe547e Disable the service module on Manjaro since it is using systemd
- **PR #48332**: (Ch3LL) Update release versions for the 2017.7 branch @ 2018-06-27 13:44:22 UTC
  - 89dfcf3a4e Merge pull request #48332 from Ch3LL/update_version_doc_2017.7
  - 47845ba810 Update release versions for the 2017.7 branch
- **PR #48331**: (rallytime) Back-port #48215 to 2017.7 @ 2018-06-27 13:12:35 UTC
  - PR #48215: (KaiSforza) Notify during tests using different credentials (refs: #48331)
  - ec4c300ac Merge pull request #48331 from rallytime/bp-48215
  - 9d6ba3c247 Set jobs to pending when they come in
  - 727d2b4ffe Use proper creds with githubNotify
  - d355861c5c Test using different credentials
- **PR #48332**: (rallytime) Back-port #48321 to 2017.7 @ 2018-06-27 13:12:15 UTC
  - PR #48321: (KaiSforza) Jenkins needs the / to get the directory (refs: #48332)
  - ab05e00d8c Merge pull request #48332 from rallytime/bp-48321
  - d72af6ab4e Jenkins needs the / to get the directory
- **ISSUE #42659**: (szin2012) rest_tornado is not able to return normal result (refs: #48193, #48295)
- **PR #48295**: (rallytime) Back-port #48193 to 2017.7 @ 2018-06-26 23:42:18 UTC
  - **PR #48193**: (jacksontj) Properly wait on returns in saltnado (refs: #48295)
  - 21ed5b97ce Merge pull request #48295 from rallytime/bp-48193
  - 352fe33fd6 Separate set_result() to a new line apart from Future() call
  - c0180ff33d Properly configure syndic in test case
  - d0a98534a9 Properly wait on returns in saltnado
- **PR #48117**: (twangboy) service.disabled on Windows @ 2018-06-26 23:35:59 UTC
  - 9aa4687ab9 Merge pull request #48117 from twangboy/fix_48026
  - d37f8fbc2 Disable services that are set to manual
- **ISSUE #48122**: (pasmon) Salt minion 2017.7.6 disregards "bin_env" in pip state (refs: #48189)
- **PR #48207**: (rallytime) Back-port #48189 to 2017.7 @ 2018-06-25 19:26:56 UTC
  - **PR #48189**: (gtmanfred) If pip binary is passed to bin_env, use that pip binary (refs: #48207)
  - caf630487c Merge pull request #48207 from rallytime/bp-48189
  - e9d09e0375 Use old is_windows utils path on 2017.7
  - b965d6c9b3 If pip binary is passed to bin_env, use that pip binary
- **ISSUE #45383**: (jodok) RabbitMQ commands fail due to wrong locale (refs: #47453)
- **PR #48293**: (rallytime) Back-port #47453 to 2017.7 @ 2018-06-25 19:06:42 UTC
  - **PR #47453**: (dqminh) dont reset system locale when running rabbitmqctl commands (refs: #48293)
  - 06a927b2aa Merge pull request #48293 from rallytime/bp-47453
  - e96ab6778e dont reset system locale when running rabbitmqctl commands
- **PR #48219**: (zer0def) Fix: LXC legacy configuration key warnings falsely report errors during state change @ 2018-06-25 13:46:07 UTC
  - 95ef00e000 Merge pull request #48219 from zer0def/lxc-bootstrap-fixes
  - c77058560b Merge branch '2017.7' into lxc-bootstrap-fixes
  - d63cf0727 Fixes another case of legacy configuration key usage warning getting in the way of changing container’s state.
- **ISSUE #46507**: (akv16786) Failed to return clean data (refs: #48234)
- **PR #48234**: (dwoz) Fix py2 thin dir issues @ 2018-06-25 13:33:02 UTC
  - 3327181507 Merge pull request #48234 from dwoz/thin_dir
  - 70c603451b Fix py2 thin dir issues
- **ISSUE #47984**: (jeduardo) x509 module/state writing wrong certificate serial number to CRL (refs: #48080)
- **PR #48080**: (lusche) Bugfix #47984 messed up cert serial @ 2018-06-22 18:00:14 UTC
  - 83d7d286c4 Merge pull request #48080 from lusche/2017.7
  - 917de985fc #47984 remove the line completly
  - ba12ee947b Merge branch '2017.7' of https://github.com/saltstack/salt into 2017.7
  - dbf13d5051 Bugfix #47984 messed up cert serial
• PR #48232: (gtmanfred) do not expand kwargs for cloud.action @ 2018-06-22 15:49:21 UTC
  - bccb4dcd46 Merge pull request #48232 from gtmanfred/cloud
  - d10811e2a do not expand kwargs for cloud.action
• PR #48238: (mirceaulinic) SDB cache module: AttributeError: 'Cache' object has no attribute 'set' @ 2018-06-22 15:37:22 UTC
  - 056f43f663 Merge pull request #48238 from mirceaulinic/fix-sdb-cache
  - 51e5fba1d SDB cache module: AttributeError: 'Cache' object has no attribute 'set'
• ISSUE #48025: (onmeac) Autoloading Utility Modules? (refs: #48037)
• PR #48037: (terminalmage) Add "sync_mods" argument to state.apply/state.sls @ 2018-06-21 19:57:03 UTC
  - 731ec0a11a Merge pull request #48037 from terminalmage/fix-custom-types-sync-docs
  - 052ae83c4b Update versionchanged
  - 8b1bd0eda2 Update test to reflect changed argument name
  - 5e75936198 Change 2018.3.2 to 2018.3.3
  - c53ad603f6 Rename sync -> sync_mods per review suggestion
  - e4d67c5fd8 Update docs to include references to new "sync" argument
  - cb8e6f9fb8 Remove redundant mocking
  - bc3ad795e9 Add test for sync argument to state.sls
  - f81cde1fdd Add sync option to state.apply/state.sls
  - 8289b07e24 Fix documentation on when custom types are synced
• PR #48249: (rallytime) Update release notes for 2017.7.7 @ 2018-06-21 18:30:39 UTC
  - 0bae927048 Merge pull request #48249 from rallytime/2017.7.7-release-notes-update
  - 36032c8ee7 Update release notes for 2017.7.7
• PR #48242: (asnell) Add sample list data via command line pillar @ 2018-06-21 18:27:41 UTC
  - 8e06471817 Merge pull request #48242 from asnell/asnell-patch-1
  - f66bf60073 Add sample list data via command line pillar
• PR #48226: (terminalmage) 2 fixes for when Salt is installed using -OO @ 2018-06-20 20:12:34 UTC
  - a172f9de84 Merge pull request #48226 from terminalmage/fix-alias-docstring
  - fb237272f5 Don't display "None" in SaltInvocationError when Salt installed using -OO
  - 90c90f5d5c Fix docstring construction in alias_function when Salt installed using -OO
• PR #48227: (Ch3LL) Skip new sha256 files on repo.saltstack.com/windows @ 2018-06-20 20:12:09 UTC
  - c6a0207cae Merge pull request #48227 from Ch3LL/fix_win_tests
  - 236773e3e9 Skip new sha256 files on repo.saltstack.com/windows
• ISSUE #48128: (bowmanjd-lms) apk.py Python 3 compatibility (refs: #48131)
• PR #48131: (bowmanjd-lms) Fix py3-incompatible dict.keys()[] call in apk.py @ 2018-06-19 18:19:02 UTC
  - 6929423528 Merge pull request #48131 from bowmanjd-lms/fixed-apk-py3
  - 6929423528 Merge branch '2017.7' into fix-apk-py3
- 02f9cba50 Fix py3-incompatible dict.keys()[x] call in apk.py

• ISSUE #47901: (frogunder) 2017.7.6 - Exiting command with CTRL-C gives Error/Traceback (refs: #48185)

• PR #48185: (DmitryKuzmenko) Don’t call .exception() on future unless it’s done. @ 2018-06-19 18:16:27 UTC
  - 868c17377f Merge pull request #48185 from DSRCorporation/bugs/47901_future_done_exception
  - 5f63316311 Merge branch ’2017.7’ into bugs/47901_future_done_exception
  - 9f2d2b94cb Don’t call .exception() on future unless it’s done.

• PR #48192: (twangboy) Use the --disable-pip-version-check option (2017.7) @ 2018-06-19 18:13:12 UTC
  - 80a3e37c2e Merge pull request #48192 from twangboy/fix_pip_version_2017.7
  - 59ae2cc5fc Use --disable-pip-version-check for build_env_#.ps1

• PR #48201: (zer0def) Fixes to LXC bootstrap when alternate lxcpath is provided. @ 2018-06-19 12:56:40 UTC
  - 12e2b882a Merge pull request #48201 from zer0def/lxc-bootstrap-fixes
  - 6f6d3d40d4 Take lxcpath into account when bootstrapping new containers. Version comparison fixes.

• PR #48190: (terminalmage) Fix mount.vfstab unit test @ 2018-06-18 21:47:54 UTC
  - e079f0ce38d Merge pull request #48190 from terminalmage/fix-vfstab-test
  - 8d70d14362 Fix mount.vfstab unit test

• PR #48115: (KaiSforza) Add jenkinsfiles to define tests in 2017 @ 2018-06-18 21:27:40 UTC
  - c8b9ec986 Merge pull request #48115 from KaiSforza/pr-lint-2017
  - 494727ab39 Add docs, kitchen tests
  - 317023bb20 Move .jenkins to .ci for future
  - dedc313ee Make it parallel so we don’t fail right away
  - cd1342726 Add a .jenkins file to run pylint

• PR #48174: (terminalmage) Add docker.update_mine config option @ 2018-06-18 19:04:54 UTC
  - fc1752b721 Merge pull request #48174 from terminalmage/docker-update-mine
  - 9af09e0127 Mock config.get due to changes in _refresh_mine_cache
  - c580ad65 Fix the version number in versionadded
  - d403ae58d7 Add unit test for docker.update_mine
  - 44c275698a Actually it’s more than just add/remove that updates the mine
  - 0cb696b07 Add release notes mention of docker.update_mine config option
  - de0597b20 Add docs for new config option
  - 04c55a9178 Add note in mine.get_docker docstring about new config item
  - 3e45625c0 Allow mine update to be disabled using new config option

• ISSUE #47031: (lejambon) Cannot set hwclock on UTC on CentOS 7 (refs: #47049, #48061)

• PR #48061: (garethgreenaway) [2017.7] Porting #47049 to 2017.7. @ 2018-06-15 17:15:50 UTC
  - PR #47049: (lejambon) Centos set utc hwclock (refs: #48061)
  - df2a156338 Merge pull request #48061 from garethgreenaway/port_47049_2017_7
  - 7c472fed51 Fixing failing test_set_hwclock_aix test.
- ccb0acc958 Porting #47049 to 2017.7.

- **PR #48143:** (Ch3LL) Add timeout argument to run_salt for ShellCase @ 2018-06-15 17:04:57 UTC
  - 5ec3cf2ddde Merge pull request #48143 from Ch3LL/fix_long_job
  - 485bd2e9d3 Add timeout argument to run_salt for ShellCase

- **PR #48135:** (rallytime) Update the 2017.7.7 and 2017.7.8 release notes @ 2018-06-14 21:22:06 UTC
  - **PR #48134:** (rallytime) Add release notes file for 2017.7.7 (refs: #48135
  - e185661f8 Merge pull request #48135 from rallytime/release-notes-2017.7
  - 7a97f157b3 Add missing v for tag reference
  - 2f2b69ed37 Add "in progress" notation to 2017.7.7 release notes
  - 06a1151a63 Add release notes file for 2017.7.7
  - 885b286ce Move 2017.7.7 release notes to 2017.7.8

- **PR #48105:** (rallytime) [2017.7] Merge forward from 2017.7.6 to 2017.7 @ 2018-06-14 17:00:09 UTC
  - ac9dabbfaa Merge pull request #48105 from rallytime/merge-2017.7
  - cdb45874de Merge branch '2017.7.6' into '2017.7'

- **PR #48101:** (rallytime) [2017.7] Update 2017.7.7 reference to 2017.7.8 @ 2018-06-14 13:14:09 UTC
  - 2da5669d9 Merge pull request #48101 from rallytime/update-doc-refs-2017.7
  - 7ba6f5b36 Update 2017.7.7 reference to 2017.7.8

- **PR #48091:** (terminalmage) Reverse monkeypatching after test_symlink_list finishes @ 2018-06-13 18:02:53 UTC
  - 5a0e3d467 Merge pull request #48091 from terminalmage/fix-file_roots-monkeypatching
  - 6fe711ad76 Reverse monkeypatching after test_symlink_list finishes

- **PR #48088:** (rallytime) Update release versions for the 2017.7 branch @ 2018-06-13 14:03:03 UTC
  - 053b019a8bf Merge pull request #48088 from rallytime/update_version_doc_2017.7
  - 1b8d1c936b Remove "in progress" info for 2017.7.6 release notes
  - 9a0f4d190a Update release versions for the 2017.7 branch

- **ISSUE #48038:** (austinpapp) jobs are not dedup'ing minion side (refs: #48075

- **PR #48075:** (garethgreenaway) [2017.7] Ensure that the shared list of jids is passed @ 2018-06-13 13:25:35 UTC
  - d6d2c5ee18 Merge pull request #48075 from garethgreenaway/48038_jobs_are_not_deduping_minion_side
  - c537b3275b Ensure that the shared list of jids is passed when creating the Minion. Fixes an issue when minions are pointed at multiple syndics.

- **PR #48071:** (terminalmage) Fix inaccurate gitfs_saltenv example in GitFS Walkthrough @ 2018-06-12 20:34:13 UTC
  - aa33cc0b0c Merge pull request #48071 from terminalmage/gitfs-docs
  - 24545204b3 Fix inaccurate gitfs_saltenv example in GitFS Walkthrough

- **ISSUE #48039:** (twellspring) github.repo_present returns stacktrace, got multiple values for keyword argument profile (refs: #48040)

- **PR #48053:** (rallytime) Back-port #48040 to 2017.7 @ 2018-06-12 14:46:12 UTC
4964 Chapter 30. Release Notes

- PR #48040: (twellspring) states/github.py fix for incorrect positional argument (refs: #48053)
- fb4ceacb88 Merge pull request #48053 from rallytime/bp-48040
- 265b22b194 states/github.py fix for incorrect positional argument

- PR #48024: (gtmanfred) add pytest coverage and xml junits @ 2018-06-12 14:03:26 UTC
  - f37dcac6d Merge pull request #48024 from gtmanfred/2017.7
  - 56b074ab27 allow specifying a different state to run on converge
  - cc9c4b4d5a add pytest coverage and xml junits

- PR #48044: (twangboy) Add fail code for WinHTTP send/receive error @ 2018-06-11 13:49:29 UTC
  - ffee3576ec Merge pull request #48044 from twangboy/wua_add_fail_code
  - d41d0c25eb Add fail code for WinHTTP send/receive error

- PR #48009: (dwoz) minionswarm runs on windows @ 2018-06-08 13:52:36 UTC
  - 871a910fc9 Merge pull request #48009 from dwoz/winswarmfix
  - 5027cb884 minionswarm runs on windows

- PR #47968: (gtmanfred) Clean up tox + pytest @ 2018-06-06 21:23:52 UTC
  - 0dcaed36d Merge pull request #47968 from gtmanfred/2017.7
  - ae1b0d28bb pass LANG and HOME into tox commands
  - 8d1b93d00 remove tox virtualenvs from doc tests
  - e1872e2036 simplify tox.ini
  - 81b0df5af add tests.txt for running tests with tox requirements
  - 556a2067fc fix masterapi test to use testing directory for configs
  - 5a41f484ef add EXPENSIVE_TESTS
  - 055cd5a6ba set DESTRUCTIVE_TESTS environment variable for pytest

- PR #47978: (twangboy) Add try/finally, fix typo in 7zip def file @ 2018-06-06 19:06:04 UTC
  - 42d6d83eb Merge pull request #47978 from twangboy/fix_test_pkg
  - 8b36b34ab Add try/finally, fix typo in 7zip def file

- PR #47959: (twangboy) Fix failing test when service doesn’t exist @ 2018-06-06 19:05:43 UTC
  - a67b21ef3d Merge pull request #47959 from twangboy/fix_test_service
  - 0cd47a81e Remove unused import
  - d4b42540e3 Fix failing test when service doesn’t exist

- ISSUE #30367: (paulfanelli) salt-run orchestration via state.sls always successful; it is ignoring state return value (refs: #47843)

- PR #47983: (garethgreenaway) [2017.7] Backporting #47843 @ 2018-06-06 19:03:15 UTC
  - PR #47843: (garethgreenaway) [2018.3] orchestration results False when function is False (refs: #47983)
  - b81d482067 Merge pull request #47843 from garethgreenaway/backport_47843_2017_7
  - 7b7fb1f5d5 Adding missing test sls file.
  - 54e51bc627 Backporting #47843 to 2017.7, updating test for 2017.7.
• PR #47533: (twangboy) Fix issues with functions that use `makedirs` on Windows @ 2018-06-06 17:20:51 UTC
  - d56ddad22c Merge pull request #47533 from twangboy/fix_47178
  - 24717cbc21 Change version added to 2017.7.7
  - 0592f1bac2 Fix issues with functions that use `makedirs` on Windows

• PR #47827: (twangboy) Fix issue when archive is on mapped drive @ 2018-06-06 17:18:00 UTC
  - 5c56b8c755 Merge pull request #47827 from twangboy/fix_47791
  - fbbd91f09e Add more descriptive debug message
  - 365f81651b Fix deprecated exception handling
  - 8dd6710b93 Use local instead of network
  - 980d99d74b Fix issue when archive is on mapped drive

• ISSUE #47888: (mbunkus) postfix.set_main overwrites wrong keys (refs: #47966)

• PR #47966: (mbunkus) Fix postfix.set_main's assumption of prefix-free key names @ 2018-06-06 15:43:24 UTC
  - 998a1c13d5 Merge pull request #47966 from mbunkus/fix-postfix-prefix-free-key-names-assumption
  - 0ae402d1b5 Fix postfix.set_main's assumption of prefix-free key names

• PR #47824: (twangboy) Fix issues with setup.py in Windows @ 2018-06-05 17:39:53 UTC
  - df50ce7b1b Merge pull request #47824 from twangboy/fix_setup.py
  - 4538b3abb3 Remove 'len-as-condition' disablement
  - d4efcc3e8b Skip lint errors
  - 1b3977f8d4 Remove m2crypto download for Windows

• PR #47922: (damon-atkins) win_pkg: pkg.refresh_db verbose=True PY3 compatibility fix @ 2018-06-05 13:31:49 UTC
  - 3e91a31134 Merge pull request #47922 from damon-atkins/2017.7_win_pkg_keys_fix
  - 7129203b1b Merge branch '2017.7' into 2017.7_win_pkg_keys_fix

• PR #47933: (terminalmage) Clarify pillar.get docs @ 2018-06-04 14:07:58 UTC
  - 8008fca2f6 Merge pull request #47933 from terminalmage/add-pillar.get-docs
  - 4eb022b675 Clarify pillar.get docs

• PR #47944: (terminalmage) Replace use of deprecated argument name in git.detached docstring @ 2018-06-04 13:53:34 UTC
  - ab565bfaa3 Merge pull request #47944 from terminalmage/fix-git.detached-docs
  - 1d082b4389 Replace use of deprecated argument name in git.detached docstring
  - 6253793cb6 Merge branch '2017.7' into 2017.7_win_pkg_keys_fix

• PR #47860: (terminalmage) Clean up doc build warnings, add best practices for writing states @ 2018-06-01 14:42:55 UTC
  - a2b588299b Merge pull request #47860 from terminalmage/state-writing-docs
  - 8cb33d3dec Quiet the linter
  - af51e16f23 Use more elegant RST syntax
  - 91cd57d1e0 Update mocking to reflect changes in service module
- b9ace5a859 Fix crappy mocking
- bc9e3acef3 Lint fixes
- d37f7e4f04 Add 2017.7.6 release notes
- 9ddeeefab Improve documentation on syncing states
- f465fa3ca7 Add best practices docs for writing states
- 93ee5ee2b0 Fix all Sphinx warnings
- 64b9b4d0b8 Clarify that name would override the id declaration

- **PR #47877**: (dwoz) Revert job chunk wait time change @ 2018-06-01 14:11:46 UTC
  - d2f3377b5b Merge pull request #47877 from dwoz/sleep_audit
  - ebc7cde9cb Revert job chunk wait time change
    - 4ce0fe6546 win_pkg under py3 keys returns a view instead of a list, wrap keys in list()

- **PR #47917**: (dwoz) Fix windows tests suite breakage @ 2018-06-01 11:42:15 UTC
  - PR #47500: (dwoz) Get the current username on windows (refs: #47917)
  - 735e92093e Merge pull request #47917 from dwoz/winsuite
  - 118601ebd6 Fix windows tests suite breakage

- **PR #47822**: (Ch3LL) Add user state integration tests to windows @ 2018-05-30 21:13:07 UTC
  - 63efb76d51 Merge pull request #47822 from Ch3LL/win_user_test
  - 3a691b405f add user_home path for both windows and linux
  - 788abf771e Add user state integration tests to windows

- **PR #47876**: (doesitblend) Add file read windows @ 2018-05-30 14:03:55 UTC
  - b9da4f1221 Merge pull request #47876 from doesitblend/add-file-read-windows
  - 3f7e7ec327 Add file.read function to Windows module

- **PR #47882**: (frogunder) add whoami test @ 2018-05-30 13:47:13 UTC
  - cbe2ecfae8 Merge pull request #47882 from frogunder/45013
  - 38d114a2d2 add whoami test

- **PR #47853**: (dwoz) Fix for py3 ec2 cloud tests @ 2018-05-28 23:08:09 UTC
  - 4b28e510f1 Merge pull request #47853 from dwoz/py3-cloud-test
  - c2f8ae7c5 Fix for py3 ec2 cloud tests

- **ISSUE #47833**: (blefeuvr) reactor.add | list | delete -> python exception (refs: #47847)

- **PR #47847**: (garethgreenaway) [2017.7] reactor runner documentation @ 2018-05-25 23:23:31 UTC
  - 215efa6b73 Merge pull request #47847 from garethgreenaway/47833_reactor_runner_documentation
  - 03676712e4 Adding some addition documentation to the reactor runner indicating that the reactor system must be active prior to using it.

- **PR #47846**: (Ch3LL) Fix flaky refresh pillar integration test @ 2018-05-25 20:50:48 UTC
  - 0b6f51b470 Merge pull request #47846 from Ch3LL/p_refresh_test
  - 019edad8e4 Fix flaky refresh pillar integration test
• **PR #47552**: (twangboy) Show GPO settings, raise error if trying to set gpo managed settings @ 2018-05-25 20:41:22 UTC
  - 799fcee979d Merge pull request #47552 from twangboy/fix_46981
  - cffcc9b7806 Merge branch '2017.7' into fix_46981
  - 81308a4a44 Add release notes for 2017.7.7
  - 008af0ac6b Fix unit tests
  - 87097eebf6 Add comments about how get is returning data
  - f1f1bfc5c1 Show GPO settings, raise error if trying to set gpo managed settings

• **ISSUE #47690**: (lomeroe) productname grain missing on Solaris (refs: #47691)

• **PR #47691**: (lomeroe) Update regexes for Solaris 'product' grain and copy to 'productname' grain @ 2018-05-25 20:38:18 UTC
  - ffc2ecb373 Merge pull request #47691 from lomeroe/solaris_product_grains
  - 6889bfe6c6b Merge branch '2017.7' into solaris_product_grains
  - 49053bc106 lint fix
  - 6f185c9179 another lint fix
  - dbffba6876 fix tons of errors in my tests
  - 8c9355534c Lint fix
  - b29ec75da7 Update regexes in core grains for detecting the 'product' grain on Solaris Sparc systems. Additionally, copy the 'product' grain to 'productname' to be consistent with other OSes.

• **PR #47778**: (Ch3LL) Add test_pkg integration state tests to windows @ 2018-05-25 20:36:47 UTC
  - 96b7c0ec76 Merge pull request #47778 from Ch3LL/win_state_pkg
  - e1786de6b0 Merge branch '2017.7' into win_state_pkg
  - f8c467d36e Fix text editor error
  - 872e162137 Add test_pkg integration state tests to windows

• **PR #47823**: (Ch3LL) Add win_dns module integration tests for windows @ 2018-05-25 20:34:03 UTC
  - 6f934c2259 Merge pull request #47823 from Ch3LL/win_dns_test
  - 7848114d6a Add win_dns module integration tests for windows

• **PR #47838**: (rallytime) Back-port #47810 to 2017.7 @ 2018-05-25 20:33:44 UTC
  - **PR #47810**: (rmcintosh) Fix Linode plan selection (refs: #47838)
  - e63e04602d Merge pull request #47838 from rallytime/bp-47810
  - bd2b62fa66 better debug message
  - 83565c55df Address PR feedback
  - 50bce3a2f3 make decode_linode_plan_label a private function
  - 2ba4fc4cea fix raising when a 'GB' format invalid plan is supplied
  - 3ab50d5a2 slight cleanup
  - 319fbd3406 match quotation mark types properly
  - 95e0202223 more consistent use of parens in logged warning
- f52926ca87 log a warning when the user supplied a label we could decode but was not in the proper format
- 121303d827 reduce complexity of get_plan_id by moving decoding of the user-supplied label to its own function
- cf534c7314 Fix Linode plan selection

**PR #47805**: (twangboy) Add sign.bat script for signing packages @ 2018-05-25 13:53:58 UTC
- 9ef6e60617 Merge pull request #47805 from twangboy/add_sign.bat
- 66d8b0331a Add sign.bat script for signing packages

**PR #47500**: (dwoz) Get the current username on windows (refs: #47917) @ 2018-05-24 19:14:07 UTC
- 93420950d3 Merge pull request #47500 from dwoz/winuser
- 0ca5224cbf Merge branch '2017.7' into winuser
- e5948902af Use salt utils method for this_user
- a056a293f1 Centralize test username lookup
- 6a6ab69722 Get the current username on windows

**ISSUE #35960**: (basepi) Beacons cannot be reloaded/refreshed without minion restart (refs: #40892)

**PR #47802**: (rallytime) Back-port #40892 to 2017.7 @ 2018-05-24 16:34:35 UTC
- PR #40892: (jagguli) add minion function to reload beacon #35960 (refs: #47802)
- 552526f309 Merge pull request #47802 from rallytime/bp-40892
- bb357da084 add minion function to reload beacon #35960

**PR #47816**: (Ch3LL) Add windows to service disable ERROR check in tests @ 2018-05-24 15:31:36 UTC
- c9cccf53b9 Merge pull request #47816 from Ch3LL/disable_windows
- 2cb6634c6b Merge pull request #47773 from frogunder/45011
- 7cb6b0da33 add win_servermanager.list_available test

**PR #47807**: (dwoz) Try an even bigger timeout @ 2018-05-23 19:38:21 UTC
- e65dece202 Merge pull request #47807 from dwoz/winrmtests
- 1f1cc1357a Increase instance size for cloud tests
- be8dcd21f1 Try an even bigger timeout

**PR #47765**: (meaksh) Prevent zypper from parsing repo configuration from not .repo files @ 2018-05-23 14:45:04 UTC
- 46618d2ce7 Merge pull request #47765 from meaksh/2017.7-fix-zypper-error-reading-repo
- 4475ba19b8 Prevent zypper from parsing repo configuration from not .repo files

**PR #47781**: (rallytime) Update cloud test profile and docs to use new Linode size lables @ 2018-05-23 13:09:13 UTC
- 0e87559ee3 Merge pull request #47781 from rallytime/update-linode-sizes
- a90c1b760e Update cloud test profile and docs to use new Linode size lables
• **PR #47748**: (rallytime) [2017.7] Merge forward from 2017.7.6 to 2017.7 @ 2018-05-22 20:53:02 UTC
  - 3ddc56cb9b Merge pull request #47748 from rallytime/merge-2017.7
  - b75f5ae38e Merge branch '2017.7.6' into '2017.7'
  - 17596f3025 Merge branch '2017.7.6' into '2017.7'
  - e458f4a031 Merge branch '2017.7.6' into '2017.7'

• **PR #47779**: (dwoz) Increase ec2 cloud timeouts to 1000 @ 2018-05-22 20:35:45 UTC
  - 0ddc864f90 Merge pull request #47779 from dwoz/winrmtests
  - d5eafe9d53 Use common timeout variable
  - 7e948eb540 Increase ec2 cloud timeouts to 1000

• **PR #47430**: (baniobloom) Add catch for VPCAssociationNotFound @ 2018-05-22 14:54:01 UTC
  - 17c4c8443c Merge pull request #47430 from baniobloom/vpc_association_not_found
  - 0ff1d007f1 added catch for VPCAssociationNotFound

• **PR #47525**: (baniobloom) Trying to add a duplicate sec group rule true @ 2018-05-22 14:51:09 UTC
  - 9c5dde1449 Merge pull request #47525 from baniobloom/duplicate_sec_group_rule
  - dcc35df489 if we are trying to add the same rule then we are already in the desired state, return true

• **PR #47772**: (gtmanfred) lock down dependencies for kitchen-salt @ 2018-05-22 14:21:49 UTC
  - 536ce2fa42 Merge pull request #47772 from gtmanfred/2017.7
  - 67756a50fd lock down dependencies for kitchen-salt

• **ISSUE #47717**: (server-monitoring) Invalid output of pkg.list_upgrades on Fedora 27 Server (refs: #47749)

• **PR #47749**: (terminalmage) Fix "dnf list upgrades" parsing @ 2018-05-22 12:51:29 UTC
  - 12b330f049 Merge pull request #47749 from terminalmage/issue47717
  - cd484bef69 Fix "dnf list upgrades" parsing

• **PR #47755**: (dwoz) Be explicit about winrm setting @ 2018-05-21 22:39:24 UTC
  - 5cd18b9e70 Merge pull request #47755 from dwoz/winrmtests
  - 57dd89e6c3 Default to ec2 classic compatible images
  - f89668920a Be explicit about winrm setting

• **PR #47668**: (Ch3LL) Add pkg.latest_version windows test @ 2018-05-21 20:26:45 UTC
  - f45a96ba1d Merge pull request #47668 from Ch3LL/win_pkg_test
  - a8981024de Add pkg.latest_version windows test

• **PR #47750**: (dwoz) Allow ssh_interface to default to public_ips @ 2018-05-21 17:14:11 UTC
  - 7b12444df8 Merge pull request #47750 from dwoz/cloudtest
  - 63b722ba21 Allow ssh_interface to default to public_ips

30.2.55 In Progress: Salt 2017.7.9 Release Notes

Version 2017.7.9 is an unreleased bugfix release for 2017.7.0. This release is still in progress and has not been released yet.

Salt Cloud Features

GCE Driver

The GCE salt cloud driver can now be used with GCE instance credentials by setting the configuration parameters
service_account_private_key and service_account_private_email to an empty string.

30.2.56 Salt 2016.11.0 Release Notes - Codename Carbon

New Features

Docker Introspection and Configuration

Major additions have been made to the Docker support in 2016.11.0. The new addition allows Salt to be executed
within a Docker container without a minion running or installed in the container. This allows states to be run inside
a container, but also all of Salt's remote execution commands to be run inside docker containers as well. This makes
container introspection simple and powerful. See the tutorial on using this new feature here:

See Salt in Docker Containers.

Advanced Ceph Control

Our friends over at SUSE have delivered a powerful new tool to make the deployment of Ceph storage systems using
Salt very easy. These new Ceph tools allow for a storage system to be easily defined using the new ceph.quorum
state.
Thorium Additions and Improvements

The Thorium advanced reactor has undergone extensive testing and updates. These updates include many more Thorium states, a system for automating key management, the ability to use Thorium to easily replace old reactors and a great deal of stability and bug fixes.

State Rollback Using Snapper

Rollback has been one of the most prevalent requests for Salt. We have researched it extensively and concluded that the only way to accomplish truly reliable rollback would be to execute it at the filesystem layer. To accomplish this we have introduced Snapper integration into Salt States.

Snapper is a tool which allows for simple and reliable snapshots of the filesystem to be made. With the new `snapper_states` option set to `True` in the minion config a snapshot will be made before and after every Salt State run.

These snapshots can be viewed, managed and rolled back to via the `snapper` execution module.

Preserve File Perms in File States

This feature has been requested for years, the ability to set a flag and use the same file permissions for files deployed to a minion as the permissions set to the file on the master. Just set the `keep_mode` option on any file management state to `True`.

Ponies!

We all agreed that cowsay was just not good enough, install the `ponysay` command and the new `pony` outputter will work. Fun for the whole family!

Additional Features

- Minions can run in stand-alone mode to use beacons and engines without having to connect to a master. (Thanks @adelcast!)
- Added a salt runner to allow running salt modules via salt-run.

```bash
salt-run salt.cmd test.ping
# call functions with arguments and keyword arguments
salt-run salt.cmd test.arg 1 2 3 a=1
```

- Added SSL support to Cassandra CQL returner. SSL can be enabled by setting `ssl_options` for the returner. Also added support for specifying `protocol_version` when establishing cluster connection.
- The `mode` parameter in the `file.managed` state, and the `file_mode` parameter in the `file.recurse` state, can both now be set to `keep` and the minion will keep the mode of the file from the Salt fileserver. This works only with files coming from sources prefixed with `salt://`, or files local to the minion (i.e. those which are absolute paths, or are prefixed with `file://`). For example:

```yaml
/etc/myapp/myapp.conf:
  file.managed:
    - source: salt://conf/myapp/myapp.conf
    - mode: keep
```
The `junos` state module is now available. It has all the functions that are present in the `junos` execution module.

The `junos` state module is now available. It has all the functions that are present in the `junos` execution module.

The minion data cache is a pluggable data store now. It's configurable with `cache` option. Default is `localfs`.

User names in `client_acl` support glob matching now.

**New Top File Merging Strategy for States**

A new strategy called `merge_all` has been added to provide a new way of merging top file matches when executing a `highstate`. See the `top_file_merging_strategy` documentation for further information.

In addition, the `same` merging strategy was not functioning as documented. This has now been corrected. While this is technically a bugfix, we decided to hold a change in top file merging until a feature release to minimize user impact.

**Improved Archive Extraction Support**

The `archive.extracted` state has been overhauled. Notable changes include the following:

- When enforcing ownership (with the `user` and/or `group` arguments), the `if_missing` argument no longer has any connection to which path(s) have ownership enforced. Instead, the paths are determined using the either the newly-added `archive.list` function, or the newly-added `enforce_ownership_on` argument.

- `if_missing` also is no longer required to skip extraction, as Salt is now able to tell which paths would be present if the archive were extracted. It should, in most cases, only be necessary in cases where a semaphore file is used to conditionally skip extraction of the archive.

- Password-protected ZIP archives are now detected before extraction, and the state fails without attempting to extract the archive if no password was specified.

- By default, a single top-level directory is enforced, to guard against 'tar-bombs'. This enforcement can be disabled by setting `enforce_toplevel` to `False`.

- The `tar_options` and `zip_options` arguments have been deprecated in favor of a single `options` argument.

- The `archive_format` argument is now optional. The ending of the `source` argument is used to guess whether it is a tar, zip or rar file. If the `archive_format` cannot be guessed, then it will need to be specified, but in many cases it can now be omitted.

- Ownership enforcement is now performed irrespective of whether or not the archive needed to be extracted. This means that the state can be re-run after the archive has been fully extracted to repair changes to ownership.

A number of new arguments were also added. See the docs py:func:`docs for the archive.extracted state <salt.states.archive.extracted>` for more information.
Additionally, the following changes have been made to the `archive` execution module:

- A new function (`archive.list`) has been added. This function lists the files/directories in an archive file, and supports a `verbose` argument that gives a more detailed breakdown of which paths are files, which are directories, and which paths are at the top level of the archive.

- A new function (`archive.is_encrypted`) has been added. This function will return `True` if the archive is a password-protected ZIP file, `False` if not. If the archive is not a ZIP file, an error will be raised.

- `archive.cmd_unzip` now supports passing a password, bringing it to feature parity with `archive.unzip`. Note that this is still not considered to be secure, and `archive.unzip` is recommended for dealing with password-protected ZIP archives.

- The default value for the `extract_perms` argument to `archive.unzip` has been changed to `True`.

**Improved Checksum Handling in `file.managed`, `archive.extracted` States**

When the `source_hash` argument for these states refers to a file containing checksums, Salt now looks for checksums matching the name of the source URI, as well as the file being managed. Prior releases only looked for checksums matching the filename being managed. Additionally, a new argument (`source_hash_name`) has been added, which allows the user to disambiguate ambiguous matches when more than one matching checksum is found in the `source_hash` file.

A more detailed explanation of this functionality can be found in the `file.managed` documentation, in the section for the new `source_hash_name` argument.

**Note:** This improved functionality is also available in the 2016.3 (Boron) release cycle, starting with the 2016.3.5 release.

**Config Changes**

The following default config values were changed:

- `gitfs_ssl_verify`: Changed from `False` to `True`
- `git_pillar_ssl_verify`: Changed from `False` to `True`
- `winrepo_ssl_verify`: Changed from `False` to `True`

**Grains Changes**

- All core grains containing `VMWare` have been changed to `VMware`, which is the official capitalization. Additionally, all references to `VMWare` in the documentation have been changed to `VMware` issue #30807. Environments using versions of Salt before and after Salt 2016.11.0 should employ case-insensitive grain matching on these grains.

```
{% set on_vmware = grains['virtual'].lower() == 'vmware' %}
```

- On Windows the `cpu_model` grain has been changed to provide the actual cpu model name and not the cpu family.

Old behavior:
New behavior:

```
root@master:~# salt 'testwin200' grains.item cpu_model
testwin200:  
           -------
cpu_model:  
           Intel64 Family 6 Model 58 Stepping 9, GenuineIntel
```

```
root@master:~# salt 'testwin200' grains.item cpu_model
testwin200:  
           -------
cpu_model:  
           Intel(R) Core(TM) i7-3520M CPU @ 2.90GHz
```

Beacons Changes

- The `loadavg` beacon now outputs averages as integers instead of strings. (Via issue #31124.)

Runner Changes

- Runners can now call out to `utility modules` via `__utils__`.
- ref:`Utility modules <writing-utility-modules>` (placed in `salt://_utils/`) are now able to be synced to the master, making it easier to use them in custom runners. A `saltutil.sync_utils` function has been added to the `saltutil runner` to facilitate the syncing of utility modules to the master.

Pillar Changes

- Thanks to the new `saltutil.sync_utils` runner, it is now easier to get ref:`utility modules <writing-utility-modules>` synced to the correct location on the Master so that they are available in execution modules called from Pillar SLS files.

Junos Module Changes

- The following new functionalities were added to the junos module
  - facts - Displays the facts gathered during the connection.
  - shutdown - Shut down or reboot a device running Junos OS.
  - install_config - Modify the configuration of a Junos device.
  - install_os - Install Junos OS software package.
  - zeroize - Remove all configuration information on the Routing Engines and reset all key values on a device.
  - file_copy - Copy file from proxy to the Junos device.
Network Automation: NAPALM

Beginning with 2016.11.0, network automation is included by default in the core of Salt. It is based on a the NAPALM library and provides facilities to manage the configuration and retrieve data from network devices running widely used operating systems such: JunOS, IOS-XR, eOS, IOS, NX-OS etc.

- see the complete list of supported devices.

The connection is established via the NAPALM proxy.

In the current release, the following modules were included:

- NAPALM grains - Select network devices based on their characteristics
- NET execution module - Networking basic features
- NTP execution module
- BGP execution module
- Routes execution module
- SNMP execution module
- Users execution module
- Probes execution module
- NTP peers management state
- SNMP configuration management state
- Users management state

Cisco NXOS Proxy Minion

Beginning with 2016.11.0, there is a proxy minion that can be used to configure nxos cisco devices over ssh.

- Proxy Minion
- Execution Module
- State Module

Cisco Network Services Orchestrator Proxy Minion

Beginning with 2016.11.0, there is a proxy minion to use the Cisco Network Services Orchestrator as a proxy minion.

- Proxy Minion
- Execution Module
- State Module
Junos Module Changes

- The following new functionalities were added to the junos module
  - facts - Displays the facts gathered during the connection.
  - shutdown - Shut down or reboot a device running Junos OS.
  - install_config - Modify the configuration of a Junos device.
  - install_os - Install Junos OS software package.
  - zeroize - Remove all configuration information on the Routing Engines and reset all key values on a device.
  - file_copy - Copy file from proxy to the Junos device.

Returner Changes

- Any returner which implements a save_load function is now required to accept a minions keyword argument. All returners which ship with Salt have been modified to do so.

Renderer Changes

Added the ability to restrict allowed renderers. Two new config parameters, renderer_whitelist and renderer_blacklist are introduced for this purpose.

eAuth Changes

- External auth modules’ auth method can return an ACL list for the given username instead of True. This list should be in the same format as described in the eAuth documentation. It will be used for the user instead of one set in master config.

  Example of the auth method return that allows a user to execute functions in the test and network modules on the minions that match the web* target and allow access to wheel and runner modules:

  ```
  [{"web*": ["test.*", "network.*"]}, @wheel, @runner]
  ```

- External auth is supported by salt-run and salt-key now. Note that master must be started to use them with eAuth.

External Module Packaging

Modules may now be packaged via entry-points in setuptools. See external module packaging tutorial for more information.
Functionality Changes

- The onfail requisite now uses OR logic instead of AND logic. issue #22370
- The consul external pillar now strips leading and trailing whitespace. issue #31165
- The win_system.py state is now case sensitive for computer names. Previously computer names set with a state were converted to all caps. If you have a state setting computer names with lower case letters in the name that has been applied, the computer name will be changed again to apply the case sensitive name.
- The mac_user.list_groups function in the mac_user execution module now lists all groups for the specified user, including groups beginning with an underscore. In previous releases, groups beginning with an underscore were excluded from the list of groups.
- The junos.call_rpc function in the junos execution module can now be used to call any valid rpc. Earlier it used to call only "get_software_information".
- A new option for minions called master_tries has been added. This specifies the number of times a minion should attempt to contact a master to attempt a connection. This allows better handling of occasional master downtime in a multi-master topology.
- The default hash_type is now sha256 instead of md5. You will need to make sure both your master and minion share the same hash_type.
- Nodegroups consisting of a simple list of minion IDs can now also be declared as a yaml list. The below two examples are equivalent:

```yaml
# Traditional way
nodegroups:
- group1: L@host1,host2,host3

# New way (optional)
nodegroups:
- group1:
  - host1
  - host2
  - host3
```

New Azure ARM Cloud Driver

A new cloud driver has been added for Azure ARM, aka, the Azure Resource Manager. The older Azure driver is still required to work with the older Azure API. This new driver works with the newer ARM API, which is managed via the newer Azure Portal website.

New Modules

Beacons

- salt.beacons.avahi_announce
- salt.beacons.bonjour_announce
- salt.beacons.haproxy
- salt.beacons.status
Clouds

- `salt.cloud.clouds.azurearm`

Engines

- `salt.engines.hipchat`
- `salt.engines.http_logstash`

Modules

- `salt.modules.boto_cloudwatch_event`
- `salt.modules.celery`
- `salt.modules.ceph`
- `salt.modules.influx08`
- `salt.modules.inspectlib.entities`
- `salt.modules.inspectlib.fsdb`
- `salt.modules.inspectlib.kiwiproc`
- `salt.modules.inspector`
- `salt.modules.libcloud_dns`
- `salt.modules.openstack_mng`
- `salt.modules.servicenow`
- `salt.modules.testinframod`
- `salt.modules.win_lgpo`
- `salt.modules.win_pki`
- `salt.modules.win_psget`
- `salt.modules.win_snmp`
- `salt.modules.xbpspkg`

Outputters

- `salt.output.pony`
Pillar

- `salt.pillar.csvpillar`
- `salt.pillar.http_json`
- `salt.pillar.makostack`

Returners

- `salt.returners.zabbix_return`

Runners

- `salt.runners.auth`
- `salt.runners.event`
- `salt.runners.smartos_vmadm`
- `salt.runners.vistara`

SDB

- `salt.sdb.env`

States

- `salt.states.boto_cloudwatch_event`
- `salt.states.csf`
- `salt.states.ethtool`
- `salt.states.influxdb08_database`
- `salt.states.influxdb08_user`
- `salt.states.libcloud_dns`
- `salt.states.snapper`
- `salt.states.testinframod`
- `salt.states.win_lgpo`
- `salt.states.win_pki`
- `salt.states.win_snmp`
Thorium

- `salt.thorium.calc`
- `salt.thorium.key`
- `salt.thorium.runner`
- `salt.thorium.status`
- `salt.thorium.wheel`

Deprecations

General Deprecations

- `env` to `saltenv`

All occurrences of `env` and some occurrences of `__env__` marked for deprecation in Salt 2016.11.0 have been removed. The new way to use the salt environment setting is with a variable called `saltenv`:

```python
def fcn(msg="", env="base", refresh=True, saltenv="base", **kwargs):
    ...
```

has been changed to

```python
def fcn(msg="", refresh=True, saltenv="base", **kwargs):
    ...
```

- If `env` (or `__env__`) is supplied as a keyword argument to a function that also accepts arbitrary keyword arguments, then a new warning informs the user that `env` is no longer used if it is found. This new warning will be removed in Salt 2017.7.0.

```python
def fcn(msg="", refresh=True, saltenv="base", **kwargs):
    ...
```

    # will result in a warning log message
    fcn(msg="add more salt", env="prod", refresh=False)

- If `env` (or `__env__`) is supplied as a keyword argument to a function that does not accept arbitrary keyword arguments, then python will issue an error.

```python
def fcn(msg="", refresh=True, saltenv="base"):
    ...
```

    # will result in a python TypeError
    fcn(msg="add more salt", env="prod", refresh=False)

- If `env` (or `__env__`) is supplied as a positional argument to a function, then undefined behavior will occur, as the removal of `env` and `__env__` from the function's argument list changes the function's signature.

```python
def fcn(msg="", refresh=True, saltenv="base"):
    ...
```
# will result in refresh evaluating to True and saltenv likely not being a string at all
fcn("add more salt", "prod", False)

- Deprecations in minion.py:
  - The salt.minion.parse_args_and_kwargs function has been removed. Please use the salt.minion.load_args_and_kwargs function instead.

Cloud Deprecations

- The vsphere cloud driver has been removed. Please use the vmware cloud driver instead.
- The private_ip option in the linode cloud driver is deprecated and has been removed. Use the assign_private_ip option instead.
- The create_dns_record and delete_dns_record functions are deprecated and have been removed from the digital_ocean driver. Use the post_dns_record function instead.

Execution Module Deprecations

- The blockdev execution module had four functions removed:
  - dump
  - tune
  - resize2fs
  - wipe
  The disk module should be used instead with the same function names.
- The boto_vpc execution module had two functions removed, boto_vpc.associate_new_dhcp_options_to_vpc and boto_vpc.associate_new_network_acl_to_subnet in favor of more concise function names, boto_vpc.create_dhcp_options and boto_vpc.create_network_acl, respectively.
- The data execution module had getval and getvals functions removed in favor of one function, get, which combines the functionality of the removed functions.
- File module deprecations:
  - The contains_regex_multiline function was removed. Use file.search instead.
  - Additional command line options for file.grep should be passed one at a time. Please do not pass more than one in a single argument.
- The lxc execution module has the following changes:
  - The run_cmd function was removed. Use lxc.run instead.
  - The nic argument was removed from the lxc.init function. Use network_profile instead.
  - The clone argument was removed from the lxc.init function. Use clone_from instead.
  - passwords passed to the lxc.init function will be assumed to be hashed, unless password_encrypted=False.
  - The restart argument for lxc.start was removed. Use lxc.restart instead.
- The old style of defining lxc containers has been removed. Please use keys under which LXC profiles should be configured such as lxc.container_profile.profile_name.

- The env and activate keyword arguments have been removed from the install function in the pip execution module. The use of bin_env replaces both of these options.

- **reg execution module**

Functions in the reg execution module had misleading and confusing names for dealing with the Windows registry. They failed to clearly differentiate between hives, keys, and name/value pairs. Keys were treated like value names. There was no way to delete a key.

New functions were added in 2015.5 to properly work with the registry. They also made it possible to edit key default values as well as delete an entire key tree recursively. With the new functions in place, the following functions have been deprecated:

- read_key
- set_key
- create_key
- delete_key

Use the following functions instead:

- for read_key use read_value
- for set_key use set_value
- for create_key use set_value with no vname and no vdata
- for delete_key use delete_key_recursive. To delete a value, use delete_value.

- The hash_hostname option was removed from the salt.modules.ssh execution module. The hash_known_hosts option should be used instead.

- The human_readable option was removed from the uptime function in the status execution module. The function was also updated in 2015.8.9 to return a more complete offering of uptime information, formatted as an easy-to-read dictionary. This updated function replaces the need for the human_readable option.

- The persist kwarg was removed from the win_useradd execution module. This option is no longer supported for Windows. persist is only supported as part of user management in UNIX/Linux.

- The zpool_list function in the zpool execution module was removed. Use list instead.

**Outputter Module Deprecations**

- The compact outputter has been removed. Set state_verbose to False instead.

**Runner Module Deprecations**

- The grains.cache runner no longer accepts outputter or minion as keyword arguments. Users will need to specify an outputter using the --out option. tgt is replacing the minion kwarg.

- The fileserver runner no longer accepts the outputter keyword argument. Users will need to specify an outputter using the --out option.

- The jobs runner no longer accepts the outputter keyword argument. Users will need to specify an outputter using the --out option.

- virt runner module:
- The hyper kwarg was removed from the init, list, and query functions. Use the host option instead.
- The next_hyper function was removed. Use the next_host function instead.
- The hyper_info function was removed. Use the host_info function instead.

State Module Deprecations

- The env and activate keyword arguments were removed from the installed function in the pip state module. The use of bin_env replaces both of these options.

- reg state module

  The reg state module was modified to work with the new functions in the execution module. Some logic was left in the reg.present and the reg.absent functions to handle existing state files that used the final key in the name as the value name. That logic has been removed so you now must specify value name (vname) and, if needed, value data (vdata).

  For example, a state file that adds the version value/data pair to the Software\Salt key in the HKEY_LOCAL_MACHINE hive used to look like this:

  ```
  HKEY_LOCAL_MACHINE\Software\Salt\version:
  reg.present:
  - value: 2016.3.1
  ```

  Now it should look like this:

  ```
  HKEY_LOCAL_MACHINE\Software\Salt
  reg.present:
  - vname: version
  - vdata: 2016.3.1
  ```

  A state file for removing the same value added above would have looked like this:

  ```
  HKEY_LOCAL_MACHINE\Software\Salt\version:
  reg.absent:
  ```

  Now it should look like this:

  ```
  HKEY_LOCAL_MACHINE\Software\Salt
  reg.absent:
  - vname: version
  ```

  This new structure is important as it allows salt to deal with key default values which was not possible before. If vname is not passed, salt will work with the default value for that hivekey.

  Additionally, since you could only delete a value from a the state module, a new function (key_absent) has been added to allow you to delete a registry key and all subkeys and name/value pairs recursively. It uses the new delete_key_recursive function.

  For additional information see the documentation for the reg execution and state modules.

- lxc state module: The following functions were removed from the lxc state module:
  - created: replaced by the present state.
  - started: replaced by the running state.
- cloned: replaced by the present state. Use the clone_from argument to set the name of the clone source.

- The hash_hostname option was removed from the salt.states.ssh_known_hosts state. The hash_known_hosts option should be used instead.

- The always kwarg used in the built function of the pkgbuild state module was removed. Use force instead.

Utils Module Deprecations

- The use of jid_dir and jid_load were removed from the salt.utils.jid.jid_dir functionality for job_cache management was moved to the local_cache returner. jid_load data is now retrieved from the master_job_cache.

- ip_in_subnet function in salt.utils.network.py has been removed. Use the in_subnet function instead.

- The iam utils module had two functions removed: salt.utils.iam.get_iam_region and salt.utils.iam.get_iam_metadata in favor of the aws utils functions salt.utils.aws.get_region_from_metadata and salt.utils.aws.creds, respectively.

30.2.57 Salt 2016.11.1 Release Notes

Version 2016.11.1 is a bugfix release for 2016.11.0.

Statistics

- Total Merges: 89

Changelog for v2016.10.0..v2016.11.1

Generated at: 2018-05-27 14:25:03 UTC

- PR #38186: (Ch3LL) add 2016.11.1 changelog to release notes
- PR #38182: (rallytime) [2016.11] Merge forward from 2016.3 to 2016.11 @ 2016-12-09 21:25:47 UTC
  - 23c039347e Merge pull request #38182 from rallytime/merge-2016.11
  - 627242ab5d Merge branch '2016.3' into '2016.11'
    - 65b2ad7b14 Merge pull request #38163 from Ch3LL/enabled_ec2_cloud
      - be74c45463 enabled ec2 cloud tests
    - b63f74e034 Merge pull request #38177 from vutny/fix-cp-get-file-str
      - a449880672 Correct cp.get_file_str docstring and add integration tests
    - 7596313be0 Merge pull request #38153 from vutny/master-includes-error-tolerance
· cd0154ee93 Master config includes may contain errors and be safely skipped

- **ISSUE #38094**: (bfilipek) TypeError: object of type 'float' has no len() in grains.filter_by (refs: #38158)
- **PR #38158**: (cachedout) Fix type problem in grains.filter_by @ 2016-12-09 21:24:40 UTC
  - 8355acd535 Merge pull request #38158 from cachedout/issue_38094
  - e8196e23c2 Lint, remove set literal
  - 94eb3c18 Fix type problem in grains.filter_by

- **ISSUE #38090**: (jf) pkg.installed does not seem to refresh the repo database, no matter what (refs: #38113, #38156)
- **PR #38156**: (terminalmage) Remove rtag when windows minion refreshes early in state @ 2016-12-09 21:15:01 UTC
  - 31a157d902 Merge pull request #38156 from terminalmage/fix-windows-refresh
  - 258b4d42aa Remove rtag when windows minion refreshes early in state

- **ISSUE #37981**: (tazaki) Salt-cloud ec2 vpc securitygroupid always returning default (refs: #38183)
- **PR #38183**: (cro) Fix bad set operations when setting up securitygroups in AWS. @ 2016-12-09 21:12:10 UTC
  - c638952684 Merge pull request #38183 from cro/fixed_38183
  - 0527df25e Fix bad set operations when setting up securitygroups in AWS. Fixes #37891.
  - **PR #38181**: (rallytime) Reset socket default timeout to None (fixes daemons_tests failures)

- **PR #38148**: (whiteinge) Remove ssh_async from NetapiClient clients; it is not implemented @ 2016-12-09 18:49:42 UTC
  - 7ccbedd2cc Merge pull request #38148 from whiteinge/no-ssh-async-client
  - cb58cd4795 Remove ssh_async from NetapiClient clients; it is not implemented

- **PR #38160**: (terminalmage) Update information about xz-utils in archive state/module docs @ 2016-12-09 18:34:03 UTC
  - 84de194400 Merge pull request #38160 from terminalmage/update-archive-docs
  - 8e4addc8f3 Update information about xz-utils in archive state/module docs

- **ISSUE #38024**: (Ch3LL) 2016.11.0 release notes missing azure arm reference (refs: #38164)
- **PR #38164**: (techhat) Add Azure ARM docs for 2016.11.0 @ 2016-12-09 18:00:22 UTC
  - 05136f0d48 Merge pull request #38164 from techhat/azuredocs
  - 71b787e250 Add Azure ARM docs for 2016.11.0

- **PR #38173**: (rallytime) Bump some win* module deprecations from Nitrogen to Oxygen @ 2016-12-09 16:57:29 UTC
  - e3c858cc28 Merge pull request #38173 from rallytime/update-win-deprecation-versions
  - 09a50b25e7 Bump some win* module deprecations from Nitrogen to Oxygen

- **PR #38036**: (terminalmage) archive.extracted: fix problems with overwrite arg @ 2016-12-08 19:08:41 UTC
  - **PR #38036**: (terminalmage) archive.extracted: fix problems with overwrite arg @ 2016-12-08 19:08:41 UTC
  - 827bf59999 Merge pull request #38036 from terminalmage/archive-extracted-override
  - a1c70c7b95 archive.extracted: fix problems with overwrite arg

- **PR #38133**: (terminalmage) Fix edge case in creation of trans tar for salt-thin @ 2016-12-08 17:47:26 UTC
- 50773af96 Merge pull request #38133 from terminalmage/zd1067
- 71e0bd023f Fix edge case in creation of trans tar for salt-thin

• PR #38138: (rallytime) [2016.11] Merge forward from 2016.3 to 2016.11 @ 2016-12-07 20:15:56 UTC
  - 6026cb23b2 Merge pull request #38138 from rallytime/merge-2016.11
  - 28b56ea3b4 Merge branch '2016.3' into '2016.11'
  - 86091db647 Skip daemon unit tests when running on Python 2.6 (#38134)

• PR #38130: (rallytime) [2016.11] Merge forward from 2016.3 to 2016.11 @ 2016-12-07 20:11:19 UTC
  - 90478ef25e Merge pull request #38130 from rallytime/merge-2016.11
  - 4d7d9abb41 Merge branch '2016.3' into '2016.11'
    - d3d98fd4eb Merge pull request #38102 from rallytime/fix-38091
      - 4f79d5a0d1 Add False + msg tuple return if requests is missing for zenoss module
    - 8c8cbc2734 Merge pull request #38104 from rallytime/bp-36794
      - ca06ca80d5 Pylint fixes
      - da3eb83e6 FreeBSD sysctl module now handels config_file parameter in show method
  - PR #38129: (Ch3LL) Fix beacon index
  - PR #38127: (rallytime) Add versionadded tags for network module funcs

• ISSUE #38042: (MTecknology) [2016.11.0] Invalid interfaces file produced by debian_ip module (refs: #38043)

• PR #38043: (MTecknology) Debian networking fix @ 2016-12-07 17:32:18 UTC
  - fd06bab673 Merge pull request #38043 from MTecknology/2016.11
  - 6d5e132e44 Removing trailing whitespace from previous commit
  - f882674acf Adding some options that are valid for inet6 blocks.
  - 81cb688d4c Better check for dual stack.
  - 525c746274 May Cthulhu take mercy on my soul for this commit.
  - 300ca6047e I guess this makes the previous commit a bit redundant, but I'm not sure if I want to remove it.
  - 6e7fc39c68 This now seems absurdly obvious, but I'm not ruling out that I'll break everything.
  - 82d2b89e0c Rolling back unit test.
  - b3edbcfd05 Adding larger and more complete debian_ip unit test.
  - 3af7b6cf4 Adding the valid/documentet 'slaves' option.
  - b61adc091b Typo: missing closing parenthesis
  - 756e41ca2f Fixing a typo; line should not be commented
  - 32a1374748 Corrects expected return value
  - 88f9d9f22c Mostly whitespace & comment changes
  - 41ff8b8d05 Removing redundant line
  - 3a8168667b Ensure iface_dict not being populated will not produce a stacktrace
  - 4de2cb2805 Corrects regression in debian_ip/debian_eth.jinja
• **PR #38107**: (cachedout) Status beacon should raise proper exception @ 2016-12-07 17:21:49 UTC
  - **PR #38088**: (dmurphy18) Updated to match formulas and allow for missing functions (refs: #38107)
  - 4b9a7f2295 Merge pull request #38107 from cachedout/supersede_38088
  - 73d724845d Change to log.debug per Tom
  - da135b1b59 Fix docs
  - 792b422dc2 Pylint fix
  - 88e03bbad6 Fix typo
  - a8ce153252 Status beacon should raise proper exception

• **PR #38101**: (lorengordon) Clarifies file.replace behavior on symlinks @ 2016-12-07 13:27:11 UTC
  - da8f5ac06c Merge pull request #38101 from lorengordon/file-replace-note
  - 345960f2b0 Clarifies file.replace behavior on symlinks

• **ISSUE #38090**: (jf) pkg.installed does not seem to refresh the repo database, no matter what (refs: #38113, #38156)

• **PR #38113**: (terminalmage) Revert changes to refresh tag for pkg states @ 2016-12-07 13:11:14 UTC
  - d47761f349 Merge pull request #38113 from terminalmage/issue38090
  - 9f347df012 Revert changes to refresh tag for pkg states

• **ISSUE #37976**: (t0nyhays) Error when status beacon fires (2016.11.0) (refs: #38120)

• **PR #38120**: (Da-Juan) Fix status beacon config default values @ 2016-12-07 13:08:33 UTC
  - d4c34ea58 Merge pull request #38120 from Da-Juan/2016.11
  - 7e4a35e8ad Fix status beacon config default values

• **PR #38114**: (rallytime) [2016.11] Merge forward from 2016.3 to 2016.11 @ 2016-12-07 12:45:04 UTC
  - 6868089a87 Merge pull request #38114 from rallytime/merge-2016.11
  - fe9dec23a Merge branch '2016.3' into '2016.11'
    - fbc8776b9 Merge pull request #38039 from twangboy/fix_refresh_db
      - 978af6d8c Remove only .sls files from the cached winrepo-ng
    - 9dcfdef6b Merge pull request #38059 from rallytime/daemons-test-fix
      - eb372b7d8 Add missing "not" statement: The last syndic test should assertFalse()
      - 4e10f8e018 Call exec_test for the Syndic daemon in tests.unit.daemons_test.py
    - 9cd42b9f3 Merge pull request #38039 from rallytime/fix-37939
      - 1da7acbf8 Update unit tests to account for additional file.search call
      - 8a685b1820 Check to see if a line is already commented before moving on
      - f2c045520d Write an integration test demonstrating the issue
    - a34a738984 Merge pull request #38045 from terminalmage/issue38037
      - 65289s0d9 Simplify logic for matching desired pkg arch with actual pkg arch
      - 3bbceda94 yumpkg.py: don't include non-upgrade versions found by "yum list available"

• **PR #38109**: (gtmanfred) mode needs to be an integer @ 2016-12-07 11:58:24 UTC
- b9920e54eea Merge pull request #38109 from gtmanfred/2016.11
- 7546760eb3 mode needs to be an integer

**PR #38103: (rallytime) Back-port #37283 to 2016.11 @ 2016-12-06 23:12:59 UTC**
- PR #37283: (jeanpralo) Handle docker-compose up to version 1.9.0 (refs: #38103)
- PR #37215: (mschneider82) removed version check (refs: #37283)
- fd77dcbdf0 Merge pull request #38103 from rallytime/bp-37283
- 11944df69b handle up to version 1.9.0

**PR #38057: (rallytime) [2016.11] Merge forward from 2016.3 to 2016.11 (refs: #38059) @ 2016-12-06 23:11:41 UTC**
- 5d9692b9280 Merge pull request #38057 from rallytime/merge-2016.11
- 342884018b Fix SaltKeyOptionParserTestCase test failures
- 186e2d0d03 Don't allow libcloud mock module injection in unit/states/libcloud_dns_test.py either
- d513a60189 Do not allow libcloud to be injected as a mock value in the libcloud_dns_test
- 74a417e527 Update the mocked cloud configs to also include master configs
- f2c8cbeb3d Better merge conflict resolution from the initial merge
- 8fd534a4808 Merge branch '2016.3' into '2016.11'
  * 6724fe4871 Modify daemons test to use multiprocessing (#38034)
  * 6942d5d95b Merge pull request #37995 from rallytime/merge-2016.3
    * b44e17921c Merge branch '2015.8' into '2016.3'
    * 7a7e36728f Merge pull request #37978 from terminalmage/ext_pillar_first-docs
    * 61ed9a8657 Add clarifying language to ext_pillar_first docs
  * cd66c179cb fix broken yaml code block (#38002)
  * 3dd45fbedf Merge pull request #37912 from attiasr/fix_aws_response_encoding
    * ba4ec4e7f1 use Requests result encoding to encode the text
    * abe4eb3b98 fix encoding problem aws responses
  * 69a74a44d2 Merge pull request #37950 from vutny/fix-starting-up-syndic
    * 7d9bc9abe6b syndic_master: correct default value, documentation and example config
    * 92a7c7ed1b Set default Salt Master address for a Syndic (like for a Minion)
  * 7f269bc7f9 Add clarification on expr_form usage and future deprecation (#37964)
  * 1001987f64 Catch possible exception from lsb_release (#37962)
  * 330021cd8b Handle empty tokens safely (#37961)
  * ea46639cc7 Merge pull request #37272 from vutny/fix-getting-default-logging-opts
    * e5ce52388a Fix description in the Salt Syndic usage info
    * 51a83d7ee Add unit tests for Salt parsers processing logging options
    * 83d6a4254 Add ssh_log_file option to master config and documentation
    * c8a0915460 Fix configuration example and documentation for syndac_log_file option
• e64dd3ed6b Correct default attributes for various parser classes
• 82a2e216b3 Fix default usage string for Salt command line programs
• 45dffa292f Fix readding and updating logfile and pidfile config options for Salt API
• f47253c21b Fix reading and applying Salt Cloud default configuration
• fad5bec936 Work with a copy of default opts dictionaries
• b7c24811e5 Fix *log_level_logfile* config value type
• 1bd76a1d96 Fix setting temporary log level if CLI option omitted
• 121848cc77 Fix obtaining *log_granular_levels* config setting
• 44cf07f32c Make CLI options take precedence for setting up *logfile_logger*
• 61afaf1792 Fix setting option attributes when processing *log_level* and *log_file*
• 3c60e2388e Fix processing of *log_level_logfile* config setting
• 55a0af5bbd Use attribute functions for getting/setting options and config values
• c25f2d091e Fix getting Salt API default logfile option
• f2422373c1 Remove processing of unused and undocumented *cli_* *log_* config options
• 2065e8311c Get default logging level and file from default opts dict

* f2f957da6 Merge pull request #37925 from kontrollld/add-ipv6-centos-network
  • ac2b477412 Adding IPv6 functionality for CentOS /etc/sysconfig/network
* c07ad11279 Merge pull request #37899 from DSRCorporation/bugs/37059_schedule_task_hang
  • 9497748546 Clear functions context in schedule tasks for ZeroMQ.
* a55519db40 Merge pull request #37928 from techhat/issue37737
  • a09a60e89b Don't modify self.opts directly
* 9d17f1ce90 Merge pull request #37929 from gtmanfred/2016.3
  • c7d2c73503 add list_nodes_min to nova driver
* 3bb743b59f Merge pull request #37926 from kontrollld/fix-ipv6-centos-network
  • 3ed42e5b44 updated
  • 3b3bc4f239 Fixes no IPv6 functionality in /etc/sysconfig/network
* 271170a9f3 Merge pull request #37921 from rallytime/merge-2016.3
  • 523a67c422 Merge branch '2015.8' into '2016.3'
  • 4cd6cf5ec Update earlier release channels' docs with Carbon release notes (#37914)
  • d31491a7fe [2015.8] Update version numbers in doc config for 2016.11.0 release (#37918)
* 6cd6429ac0 Merge pull request #37924 from cachedout/fix_gem_states
  • 894cca3427 Update test for new gem ver

  PR #38112: (rallytime) Account for case where vim install already exists and is at an older version

• ISSUE #19502: (kt97679) salt-ssh fails to run state.highstate with custom master_tops (refs: #38021)
• PR #38021: (mateiw) Add master_tops support in salt-ssh @ 2016-12-06 14:26:22 UTC
  • f8c67a9598 Merge pull request #38021 from mateiw/salt-ssh_master_tops
- Add/remove newlines
- Add master_tops support in salt-ssh
- PR #38084: (rallytime) Start release notes file for 2016.11.1 release

- PR #37878: (kstreee) Makes threads avoid blocking waiting while communicating using Zeromq. @ 2016-12-05 19:50:46 UTC
  - Merge pull request #37878 from kstreee/2016.11
  - Fixes blocking waiting through implementing a socket pool class.

- PR #37987: (rbjorklin) consul_pillar support for limiting pillar exposure via minion targeting @ 2016-12-05 19:48:20 UTC
  - PR #37985: (rbjorklin) consul_pillar support for limiting pillar exposure via minion targeting (refs: #37987)
  - Merge pull request #37987 from rbjorklin/consul-pillar-target
  - 0809ccd429 Merge pull request #37987 from rbjorklin/consul-pillar-target
  - 5d0454a7ca Ignore W1401 (anomalous-backslash-in-string)
  - 2e929a5ecc Linting fixes
  - 171cab1726 Fixed possible incorrect behavior if target wasn’t on start/end of str
  - 7440582ce8 consul_pillar support for limiting pillar exposure via minion targeting

- ISSUE #38062: (UtahDave) archive execution module not loading on Windows in 2016.11.0 (refs: #38067)

- PR #38067: (terminalmage) Remove virtual funcs for archive state/module @ 2016-12-05 16:37:23 UTC
  - Merge pull request #38067 from terminalmage/issue38062
  - 83dce81ea Merge pull request #38067 from terminalmage/issue38062
  - 2e0f6a084 Remove virtual funcs for archive state/module

- ISSUE #38001: (tomlaredo) Regression on postgres_group.present ('postgres_group' __virtual__ returned False) (refs: #38023)

• ISSUE #37935: (ipmb) Postgres module regression on 2016.11 (refs: #37946, #37993, #38023, #38058)
• PR #37946: (scott-w) Updated the bins_dir to default to pg_bin @ 2016-11-29 16:48:27 UTC
  - 36f91408e5 Merge pull request #37946 from scott-w/37935-fix-bin-dir
  - d3d403969 Restored missing initdb #37935
  - a041b9f8e8 Use Salt deprecation warning #37935
  - a9678935f3 Updated the bins_dir to default to pg_bin #37935
• PR #37889: (isbm) Allow overwrite archives extraction (refs: #38036) @ 2016-11-29 16:18:57 UTC
  - d8650c5474 Merge pull request #37889 from isbm/isbm-states-archive-fix
  - e67706bd29 Document the behaviour.
  - 1970814111 Prevent crash during externally changed archive permissions
  - 91b42578b2 Add overwrite option so the extraction of the archive can be always performed.
  - e6958f7f15 Remove nonsense comment and react on generally absent path name
• PR #37869: (isbm) Input sanitation (16.11) @ 2016-11-29 16:17:16 UTC
  - e2b9e58d30 Merge pull request #37869 from isbm/isbm-input-sanitation-16.11
  - 9f9c5d68af Use six instead of builtins
  - 203dfc8238 Use American spelling instead
  - 91ed307af9 Sanitise input for the keys and IDs
  - 86623f91d3 Add a stub for ID sanitiser (at the moment same as hostname)
  - 637144c841 Rename "general.py" to "sanitisers.py"
  - 2f571fc7bf Add hostname sanitiser
  - 3ae086af4 Add filename sanitiser
- 816b1d1977 Add general sanitisers

**PR #37884:** (ismbm) Do not include "gpg-pubkey" packages, filtering by their name @ 2016-11-28 21:11:37 UTC
- e539a94a56 Merge pull request #37884 from isbm/ismbm-zypper-gpgkey-pkg-filter
- 038374a586 Do not include "gpg-pubkey" packages, filtering by their name

**PR #37882:** (attiasr) multiple issues in boto_rds state and module @ 2016-11-28 21:09:11 UTC
- eb3d81a1de Merge pull request #37882 from attiasr/fix_missing_tags
- 73bc3c5fa1a Add newline
- 166c42bc51 fix boto_rds.describe
- ddd88ba047 fix boto_rds.describe parameters and subnetgroup_present
- bfe7f92cb4 fix missing tags in call to boto_rds.exists
- PR #37931: (rallytime) Remove release candidate doc ref from 2016.11.0 release notes

**PR #37930:** (cachedout) Remove dictionary comprehension in netusers @ 2016-11-28 20:27:06 UTC
- 3d2dabc7b7 Merge pull request #37930 from cachedout/fix_comp
- 670e83200b Remove dictionary comprehension in netusers

**PR #37923:** (rallytime) [2016.11] Merge forward from 2016.3 to 2016.11 @ 2016-11-28 19:55:03 UTC
- 0f8b1870b1 Merge pull request #37923 from rallytime/merge-2016.11
- da7f5518eb Don't let 2016.3 doc config changes overwrite the 2016.11 changes
- dfedd1185a Merge branch '2016.3' into '2016.11'
  - c35ba1f390 Merge pull request #37916 from rallytime/doc-update-2016.3
    - bd40592289 [2016.3] Update version numbers in doc config for 2016.11.0 release
  - e13a2488c8 Merge pull request #37785 from Cloudtek/ddns-respect-trailing-dot
    - 262e3b3697 respect trailing dot in ddns name parameter
  - c03b389422 Merge pull request #37895 from fj40crawler/fix-augeas-return-for-test
    - ddc238df36 Fixed augeas_test.py to match True v.s. None for test_change_in_test_mode
    - e75c459c0 Merge branch '2016.3' of github.com:saltstack/salt into fix-augeas-return-for-test
    - b0fe0cd256 Change return value for salt/states/augeas.py to be True instead of None for cases where salt is run with test=True. Fixes #37870
  - fdbc31e88d8 Merge pull request #37907 from Talkless/patch-2
    - 072a319490 Fix server trust in test run of svn.latest
  - f39f44f3f Merge pull request #37896 from toanju/2016.3
    - c95304188e rh networking: add missing values
  - ea935c5a91 Merge pull request #37886 from bdrung/fix-typos
    - 9a51ba5c5b Fix various spelling mistakes
  - 371b0a85d9 Merge pull request #37736 from dhaines/issue-37732
    - 7ef590a505 Update selinux.py
    - 516a67e6a3 fix indexing error

30.2. Previous Releases

4997
- 4e49c1e991 fix typo
- b16f2d8400 handle semodule version >=2.4 (#37732) and fix typo
  * 87ae666bf Merge pull request #37797 from clan/extfs
    - acf0f960ef check count of columns after split
  * f7c7109152 Merge pull request #37762 from twangboy/fix_chocolatey_state
    - 9696b6daa5 Use keyword args instead of relying on ordering
    - 398ea074d Add pre_versions to the available arguments
  * 56baa92d55 Merge pull request #37866 from meaksh/bp-37149-36938-36784
    - 9d8d578109 Fix pkg.latest_version when latest already installed
    - ffca0d491c acl.delfacl: fix position of `-X` option to setfacl
    - 3dfed6841 Adjust linux_acl unit test argument ordering
    - f185ecdde1 core.py: quote style fixed
    - 8404d13424 Setting up OS grains for SLES Expanded Support (SUSE's Red Hat compatible platform)
  * d0cc70d56 Merge pull request #37863 from rallytime/bp-36893
    - 4c70534991 Add versionadded to reauth option in dockerng module
    - 5ca2c388c2 added documentation for the new reuth option in docker registry configuration
    - 5b0c11ab47 add option to force a reauth for a docker registry
  * b17a118e72 add multiline encryption documentation to nacl (#37847)
    - PR #37927: (thatch45) Add a release notes reference to the docker-sls tutorial
    - PR #37917: (rallytime) [2016.11] Update version numbers in doc config for 2016.11.0 release
  * PR #37890: (bbinet) Fix support for extra_mods='six' to add six module to a thin.tgz tarball @ 2016-11-28 13:53:06 UTC
    - ee00592995 Merge pull request #37890 from bbinet/fixed-thinth-six
    - 7fcee3476 Fix support for extra_mods='six' to add six module to a thin.tgz tarball
  * ISSUE #37713: (aboe76) masterless minion can't call pillar.item from pillar stack (development branch) (refs: #37843)
    - PR #37843: (terminalmage) Don't skip pillar compilation when master_type='disable'
    - PR #32521: (adelcast) Fix salt-call on standalone minion case (refs: #37843)
  * ISSUE #37449: (thatch45) Allow TLS connections in the Tornado TCP transport (refs: #37776, #37859)
    - PR #37849: (skizunov) Eliminate warning when 'ssl' not set
    - PR #37776: (DmitryKuzmenko) Full TLS/SSL options support as provided by Tornado TCPServer. (refs: #37849)
  * ISSUE #37449: (thatch45) Allow TLS connections in the Tornado TCP transport (refs: #37776, #37859)
    - PR #37859: (DmitryKuzmenko) TLS example config
    - PR #37841: (terminalmage) Clarify the master_type docs
    - PR #37831: (skizunov) PY3: Fix exception when handling connect exception in TCP transport

30.2.58 Salt 2016.11.10 Release Notes

Version 2016.11.10 is a security release for 2016.11.0.

Changes for v2016.11.9..v2016.11.10

Security Fix

CVE-2018-15751 Remote command execution and incorrect access control when using salt-api.
CVE-2018-15750 Directory traversal vulnerability when using salt-api. Allows an attacker to determine what files exist on a server when querying /run or /events.

Credit and thanks for discovery and responsible disclosure: nullbr4in, xcuter, koredge, loupos, blackcon, Naver Business Platform

30.2.59 Salt 2016.11.2 Release Notes

Version 2016.11.2 is a bugfix release for 2016.11.0.

Statistics

- Total Merges: 157
- Total Issue References: 34
- Total PR References: 116
- Contributors: 45 (Ch3LL, Cybolic, DmitryKuzmenko, UtahDave, Vaelatern, alex-zel, alxwr, amendlik, annlutro, aossagie, bbinet, benediktwerner, cachedout, clinta, cro, dereckson, disaster123, ewapptus, ezh, folti, gmacon, ggunhed, gtmanfred, koppel, lorengordon, martintamare, mcalmer, meaksh, mirceaulinic, mostafahussein, mvdwalle, rallytime, rbjorklin, scthi, sorge, techhat, terminalmage, tsaridas, twangboy, vutny, wolfpackmars2, yhekma, yopito, yue9944882)
Security Fixes

CVE-2017-5192 local_batch client external authentication not respected

The LocalClient.cmd_batch() method client does not accept external_auth credentials and so access to it from salt-api has been removed for now. This vulnerability allows code execution for already-authenticated users and is only in effect when running salt-api as the root user.

CVE-2017-5200 Salt-api allows arbitrary command execution on a salt-master via Salt’s ssh_client

Users of Salt-API and salt-ssh could execute a command on the salt master via a hole when both systems were enabled.

We recommend everyone upgrade to 2016.11.2 as soon as possible.

Changelog for v2016.11.1..v2016.11.2

- PR #38859: (alxwr) fix parsing of sockstat -4 @ 2017-01-23 16:47:22 UTC
  - ec59ae67c8 Merge pull request #38859 from alxwr/2016.11
  - 30fe5641c7 fix parsing of sockstat -4
- PR #38850: (techhat) Strip .p from cache file names @ 2017-01-23 16:28:46 UTC
  - 5fe6db201 Merge pull request #38850 from techhat/stripcache
  - 109cb62e76 Remove .p from test
  - 534aa35f27 Strip .p from cache file names
  - PR #38848: (Ch3LL) add 2016.11.2 changelog to release notes
- PR #38819: (twangboy) Remove Users from c:salt [DO NOT MERGE FORWARD] @ 2017-01-20 20:17:35 UTC
  - eb04ed7eeef Merge pull request #38819 from twangboy/salt_perms_2016.11
- PR #38815: (rallytime) [2016.11] Merge forward from 2016.3 to 2016.11 @ 2017-01-20 18:53:01 UTC
  - a275b9714e Merge pull request #38815 from rallytime/merge-2016.11
  - ce661b103d Make sure we're using the opts dict mocking in parsers_test
  - 315b2e8072 Merge branch '2016.3' into '2016.11'
    - d14f0c64eb Merge pull request #38812 from rallytime/pyobjects-test
      - f3e84c1a7b Update pyobjects test to be a list
    - 50f03f8057 Merge pull request #38813 from gtmanfred/2016.3
      - ce34722c2c ce34722ce2 catch SIGPIPE in vmware connection
    - 23b8b47258 Merge pull request #38809 from twangboy/fix_hostname_2016.3
      - d57a51f9f9 Fix tests for get_hostname
      - 7ca36f7484 Fix get_hostname to handle longer computer names
    - 1033bbde8e Merge pull request #38808 from vutny/fix-38388
      - 9bd203ffcc Fix #38388
    - f3ae3c5c8 Merge pull request #38668 from terminalmage/issue38604

• PR #38832: (terminalmage) archive.extracted: Identify symlinks when checking for incorrect types @ 2017-01-20 18:36:15 UTC
  – efe1bf10e8 Merge pull request #38832 from terminalmage/issue38711
  – d10c068e25 Update archive state unit tests to reflect symlinks in archive.list
  – d6adfb6d12 Identify symlinks when looking for incorrect types
  – 09b9e95f7c archive.list: organize symlinks separately from files in verbose mode
  – e6483f096d Support removing symlinks in salt.utils.rm_rf

• PR #38726: (twangboy) Add VC Redist 2008 SP1 MFC to installer @ 2017-01-19 19:13:42 UTC
  – 10a3d8b8dd Merge pull request #38726 from twangboy/vcredist
  – f0a635355d change extensions .ext to .exe
  – 98c40e278c Add VC Redist 2008 SP1 MFC to installer

• PR #38810: (UtahDave) Fix beacon doc @ 2017-01-18 21:37:21 UTC
  – d5f2d92a4e Merge pull request #38810 from UtahDave/fix_beacon_doc_zd1035
  – db9ed8b06 fix reactor example.

• PR #38811: (Techhat) Show a lot less data when requesting a VM @ 2017-01-18 21:08:03 UTC
  – 88fa08a71 Merge pull request #38811 from techhat/sanvm
  – 47c19325cf Show a lot less data when requesting a VM
  – PR #38807: (Ch3LL) refine the os detection in archive test

• PR #38799: (aosagie) Parse ansible dynamic inventory output correctly @ 2017-01-18 15:32:47 UTC
  – e3ca6881c8 Merge pull request #38799 from aosagie/fix-ansible-dynamic-roster
  – 26df6f99a7 Parse ansible dynamic inventory output correctly

• PR #38787: (rallytime) [2016.11] Merge forward from 2016.3 to 2016.11 @ 2017-01-18 08:39:08 UTC
  – 76df6a43f3 Merge pull request #38787 from rallytime/merge-2016.11
  – 2aadd54c49f Merge branch '2016.3' into '2016.11'
    – 3417adc617 Merge pull request #38796 from saltstack/revert-38707-root_dir_fix-gh
      – cb080f3bbe Revert "Fixed prepending of root_dir override to the other paths"
    – 64d866f7ab Merge branch '2016.3' into '2016.11'
- bab3479a3c Merge pull request #38585 from rallytime/follow-up-38527
  * 05587201b6 Pylint fix: add line at end of file
  * fa01367599 Keep a copy of the DEFAULT_API_OPTS and restore them after the test run
  * 2ad07634d9 Test clean up
  * fd2ee7db30 Add some simple unit tests for salt.config.api_config function
  * 3d2feca83b Make sure the pidfile and log_file values are overriden by api opts
  * 1f6b540e46 Make sure the pidfile and log_file values are overriden by api opts
  * 04d307f917 salt-api no longer forces the default timeout
- 0fb6bb77 Merge pull request #38707 from alexbleotu/root_dir_fix-gh
  * 0bac8c8be3 Fixed prepending of root_dir override to the other paths
- 96c9dc10f7 Merge pull request #38774 from vutny/dev-test-docs
  * 4620dc4afa DOCS: add C++ compiler installation on RHEL required for bundled zmq
  * aeddb74a3 Merge pull request #38749 from vutny/pkg-build-better-exception-msg
    * 53f2be5b21 pkg build modules throw better exception message if keyid wasn't found
- PR #38660: (techhat) Don't force salt.cache to use cachedir from opts @ 2017-01-17 18:38:35 UTC
  - 4e6146f65f Merge pull request #38660 from techhat/cachedir
  - be55b57abf One last fix
  - fc24b24998 Add correct function name
  - 9bbe4f7960 Typo fix
  - 436ba28f08 Change getlist back to list (using _list)
  - f734fe93b Default to CACHE_DIR in syspaths
  - 380abd3744 Add cachedir args to tests
  - deb08c0587 Not every module will need cachedir
  - 4489f77 cac0 Don't force salt.cache to use cachedir from opts
- ISSUE #37948: (djacobs2016) ssh_known_hosts.present is failing when checking key/host (refs: #37982)

• **PR #38664**: (clinta) X509 Improvements. Expose setting permissions, encrypted private keys, and combined key and cert management in one state @ 2017-01-17 02:20:18 UTC
  - 6663107021 Merge pull request #38664 from clinta/x509-passphrase2
  - 77c78723fe pep8
  - a2b20ee518 No mutable default args, remove unneeded import
  - b48b85cc70 bug fixes
  - f62393b864 pep8
  - c8613243a1 change documentation
  - 9a0abde9ac expose passphrase functionality to state
  - e47a93d496 add passphrase to execution module
  - a4d6598f1e preserve detailed change reports
  - d0ad251778 combine private key and cert management
  - 3d1474d911 cross call file.managed to get permissions options

• **PR #38682**: (mirceaulinic) [2016.11.2/napalm] Better error message when NotImplementedError raised @ 2017-01-15 18:34:25 UTC
  - bf6d74c98e Merge pull request #38682 from cloudflare/NotImplementedError-MSG
  - f847639dee Better error message when NotImplementedError raised

• **ISSUE #37996**: (stefan-as) influxdb_user.present does not pass client_args (refs: #38695)

• **PR #38695**: (rallytime) Pass in client_args when calling influxdb execution module funcs @ 2017-01-15 18:33:48 UTC
  - df12e49d80 Merge pull request #38695 from rallytime/fix-37996
  - 05b0975888 Pass in client_args when calling influxdb execution module funcs

• **ISSUE #38521**: (vladvasiliu) State cloud.present on AWS: TypeError: 'NoneType' object is not iterable (refs: #38651)

• **ISSUE #37981**: (tazaki) Salt-cloud ec2 vpc securitygroupid always returning default (refs: #38183)

• **PR #38651**: (rallytime) Don't lose the set reference for ec2 securitygroup ids @ 2017-01-15 18:06:25 UTC
  - PR #38183: (cro) Fix bad set operations when setting up securitygroups in AWS. (refs: #38651)
  - 834e5469fc Merge pull request #38651 from rallytime/fixed
  - 830c03ce6 Don't lose the set reference for ec2 securitygroup ids

• **ISSUE #38216**: (pgrishin) salt-run: can't get cache.grains (refs: #38659)

• **PR #38659**: (techhat) Turn None into an empty string (for minion matching) @ 2017-01-15 18:02:03 UTC
  - 8b38cfe8a8 Merge pull request #38659 from techhat/issue38216
  - 4073c91584 Turn None into an empty string (for minion matching)

• **PR #38703**: (yhekma) The test option is only valid for the minion, not the master @ 2017-01-15 17:56:22 UTC
  - 0ad5d22ad4 Merge pull request #38703 from yhekma/docfix
  - 57df3bf148 The test option is only valid for the minion, not the master

• **PR #38718**: (terminalmage) Fix for dynamic git_pillar when pillarenv is used @ 2017-01-15 14:37:30 UTC
- 8c1222e7db Merge pull request #38718 from terminalmage/zd909
- 12bbea5a24 Fix for dynamic git_pillar when pillarenv is used

**ISSUE #38676:** (yhekma) consul cache backend broken (refs: #38676)

**PR #38676:** (yhekma) Removed overloading of list() @ 2017-01-15 05:42:13 UTC

- aae8b54860 Merge pull request #38676 from yhekma/2016.11
- 3237d23e1c Locals should also be changed of course
- 9d9de67219 We do not want to overload the list() type because if we do, we turn this function into a recursive one, which results in an exception because set() cannot be concatenated with str('/')

**ISSUE #38684:** (rukender) 2016.11.1 :[ERROR][11182] Failed to import beacons avahi_announce (refs: #38713)

**PR #38713:** (rallytime) Add NameError to exception in avahi_announce beacon @ 2017-01-15 05:33:04 UTC

- c246ab41c5 Merge pull request #38713 from rallytime/fix-38684
- db60bed24c Add NameError to exception in avahi_announce beacon

**PR #38729:** (rallytime) [2016.11] Merge forward from 2016.3 to 2016.11 @ 2017-01-13 23:15:33 UTC

- 6e14774c04 Merge pull request #38729 from rallytime/merge-2016.11
- 4e1e45d640 Merge branch '2016.3' into '2016.11'
- 7b850d472d Merge pull request #38647 from gtmanfred/nova
  - 5be9b60851 add documentation about using keystoneauth for v3
  - 7b657ca4ae add the ability to use keystone v2 and v3
  - 5646ae1b34 add ability to use keystoneauth to authenitcate in nova driver
- 383768d838 Merge pull request #38650 from rallytime/remove-ubuntu-ppa-docs
  - 30429b2e44 Remove the installation instructions for out-of-date community ppa
- 7d9f56e3b5 Merge pull request #38657 from DSRCorporation/bugs/38087_syndic_event_format_fix
  - 594c33f396 Publish the 'data' field content for Syndic evets
- 83987511fd Merge pull request #38649 from Ch3LL/test_apply_template
  - 47f8b68e0b fix unit.modules.file_test

**ISSUE #38631:** (doitian) In Orchestration, kwargs are not passed to state.sls in masterless mode (refs: #38635)

**PR #38635:** (lorenegordon) Sends pass-through params to state module @ 2017-01-10 20:01:59 UTC

- cfd82d1631 Merge pull request #38635 from lorenegordon/issue-38631
- 14666138b9 Sends pass-through params to state module

**PR #38640:** (mirceaulinic) Import napalm_base instead of napalm @ 2017-01-10 19:58:01 UTC

- 017094a207 Merge pull request #38640 from cloudflare/NAPALM-IMPORTS
- 8f13f63880 Import napalm_base instead of napalm

**PR #38661:** (techhat) Add sane cache defaults for minion and cloud @ 2017-01-10 19:55:15 UTC

- 79663132dd Merge pull request #38661 from techhat/sanedefault
- aee40648ec Add a sane cache default for cloud
- c9e01a36e7 Add a sane cache default for minions
• PR #38645: (rallytime) [2016.11] Merge forward from 2016.3 to 2016.11 @ 2017-01-10 19:54:06 UTC
  - b0ed91ee2d Merge pull request #38645 from rallytime/merge-2016.11
  - 7a668e9749 Merge branch '2016.3' into '2016.11'

  - b292ad7b7b Adds new import required for extract_hash
• **ISSUE #38071**: (luochun-95) remote execute is very slow (refs: #38167)
• **PR #38167**: (cachedout) Kill pkg_resources for CLI tools [DO NOT MERGE] @ 2016-12-22 22:11:22 UTC
  - 4c4f07ca4c Merge pull request #38167 from cachedout/no_pkg_resources
  - ec6901720a Remove debugging
  - f28e33b9b6 Remove from all but salt cli
  - bb3af72317 Remove from salt-call
  - c676846066 Kill pkg_resources for CLI tools
• **PR #38417**: (rallytime) [2016.11] Merge forward from 2016.3 to 2016.11 @ 2016-12-22 19:00:44 UTC
  - 2fc8c154af Merge pull request #38417 from rallytime/merge-2016.11
  - efb8a8df5 Merge branch '2016.3' into '2016.11'
  - 27253522c8 Improve pillar documentation (#38407)
  - 423b1fddf7 Merge pull request #38398 from terminalmage/issue38372
    - c80dbaa914 Fix call to file.get_managed in cron.file state
  - 5a33d1e697 Fix http.query when result has no text (#38382)
  - b74b5c7d38 Merge pull request #38390 from meaksh/2016.3-fix-try-restart-for-autorestarting-on-SUSE-systems
    - de6ec05ec0 add try-restart to fix autorestarting on SUSE systems
  - 2c3a3976a0 Merge pull request #38221 from UtahDave/fix_default_returner
    - 385640765b remove a blank line to satisfy linter
    - 9c248aa14c validate return opt, remove default.
    - 8bb37f9fe7 specify allowed types and default for "returner"
    - 11863a4bfe add examples of default minion returners
    - e7c6012655 add support for default returners using return
• PR #38342: (scthi) Bugfix ext pillar nodegroups @ 2016-12-22 16:47:42 UTC
  - bbc149e67f Merge pull request #38342 from scthi/bugfix-ext-pillar-nodegroups
  - dba315c4b6 ext-pillar nodegroups works for all minions now.

• PR #38403: (terminalmage) git_pillar: Document the transition from env to saltenv in the jinja context @ 2016-12-22 16:34:48 UTC
  - 453476d982 Merge pull request #38403 from terminalmage/document-saltenv
  - 0a72e0f0be git_pillar: Document the transition from env to saltenv in the jinja context

• ISSUE #38253: (gmacon) There was no error installing package 'setuptools' although it does not show when calling 'pip.freeze'. (refs: #38354)

• PR #38354: (gmacon) Use --all when calling pip.py @ 2016-12-20 20:40:21 UTC
  - 12436efb54 Merge pull request #38354 from gmacon/pip-freeze-all
  - dca24b270e Use --all when calling pip.py

• PR #38348: (rallytime) Update autodoc topics for new modules added in 2016.11 @ 2016-12-20 20:36:20 UTC
  - 68430b1fa6 Merge pull request #38348 from rallytime/mod-docs-2016.11
  - b31c2412ca Add __iter__ and next options to doc/conf.py
  - b8c16094c4 Revert "Move import/error messaging logic for snapper module into __virtual__()"
  - 640db5b5ac Move import/error messaging logic for snapper module into __virtual__()
  - 366271f459 Add snapper to state index doc module list
  - 135d254c80 Remove netapi autodoc files: they should not be added as their doc structure is different
  - 0006139aca Update autodoc topics for new modules added in 2016.11

• PR #38377: (DmitryKuzmenko) Implementation and docs for Consul key-value store plugin for minion data cache. @ 2016-12-20 20:36:02 UTC
  - 6ee7b2bae7 Merge pull request #38377 from DSRCorporation/features/consul_cache
  - 6fb4430ae3 Configuration options and documentation for Consul data cache plugin.
  - dad748f57a Data cache plugin configuration documentation.
  - c7209cd90c Consul data cache plugin.

• PR #38373: (rallytime) Back-port #38212 to 2016.11 @ 2016-12-20 20:35:09 UTC
  - PR #38212: (disaster123) ZMQ: add an option for zmq.BACKLOG to salt master (zmq_backlog) (refs: #38373)
  - f6d1b559bc Merge pull request #38373 from rallytime/bp-38212
  - 52fc6daac0 ZMQ: add an option for zmq.BACKLOG to salt master (zmq_backlog)

• PR #38374: (mirceaulinic) NAPALM proxy module: Fix optional_args key issue @ 2016-12-20 20:34:59 UTC
  - 69c3f19fc1 Merge pull request #38374 from cloudflare/FIX-NAPALM-PROXY
  - 44169315d8 Fix optional_args key issue

• ISSUE #38048: (ezh) [2016.11.0] Salt-cloud throws TypeError exception (refs: #38073)

• PR #38073: (ezh) 2016.11 @ 2016-12-20 14:51:11 UTC
  - 530f495955 Merge pull request #38073 from doublescoring/2016.11
- 42d3d26f28 [38073] Fix test assertion
- 9b37ead913 Fix broken os.write without string.encode

- **PR #38344**: (bbinet) Fix influxdb_database.present state @ 2016-12-20 13:57:45 UTC
  - 67908d5aba Merge pull request #38344 from bbinet/fix-influx-createdb
  - c6b075d6f4 Fix influxdb_database.present state

- **PR #38358**: (rallytime) [2016.11] Merge forward from 2016.3 to 2016.11 @ 2016-12-20 00:11:48 UTC
  - 04d6898958 Merge pull request #38358 from rallytime/merge-2016.11
  - c6e191ad0d Remove doc markup references from 2016.11 branch
  - 513058945c Merge branch '2016.3' into '2016.11'
  - 09d9c0f992 Merge pull request #38288 from terminalmage/archive-extracted-local-source-2016.3
    - 8453d0e75 Update tests to reflect change in cache behavior
    - 5a08d7c70a archive.extracted: don't try to cache local sources (2016.3 branch)
  - bf37667f8a Merge pull request #38312 from cro/proxy_config_inCfg
    - 2006c4000e Typo
    - 689d95b10f Backport feature allowing proxy config to live in pillar OR /etc/salt/proxy.
  - c83db5a785 Merge pull request #38260 from rallytime/cleanup-doc-refs
    - 62978cb7a0 Don't check the doc/conf.py file for doc markup refs
    - 770e732d76 Add a unit test to search for new doc markup refs
    - 5e42a361a0 Remove ":doc:" references from all doc/topics/installation/* files
    - 23bece929 Remove ":doc:" references from all doc/topics/releases/* files
    - 4aafa41d22 Remove ":doc:" references from a bunch of doc/* files
    - 02bf2e912c Remove more ":doc:" references from doc/* files
    - 6e32267d0c Remove ":doc:" references in salt/* files
  - **PR #38285**: (terminalmage) archive.extracted: don't try to cache local sources

- **PR #37947**: (vutny) Fix salt-minion initscript for RHEL5 (SysV) to pick up proper python version @ 2016-12-19 21:03:50 UTC
  - 13414949e3 Merge pull request #37947 from vutny/fix-rhel5-minion-init
  - c94e79bb8a SysV init script for rpm: get and show unique PIDs only
  - 8ff68ce4128 Fix initscript for RHEL5 (SysV) to pick up proper python version

- **PR #38106**: (techhat) "test" is not necessarily in opts, for thorium @ 2016-12-19 14:40:32 UTC
  - 4d072ca689 Merge pull request #38106 from techhat/stateget
  - 5ed166f606 "test" is not necessarily in opts, for thorium

- **PR #38233**: (amendlik) Suppress errors when checking if an alternative exists @ 2016-12-19 13:40:49 UTC
  - a01fade604 Merge pull request #38233 from amendlik/states-alternatives
  - 8bcd5bcd5 Adjust alternatives test for updated error message
  - 09dee3611 Suppress errors when checking if an alternative exists
• PR #38340: (ewapptus) Backport PR #38251: Fixed nested orchestrate not respecting failures @ 2016-12-19 13:31:16 UTC
  - PR #38251: (ewapptus) Fixed nested orchestrate not respecting failures (refs: #38340)
  - 15d3b476e9 Merge pull request #38340 from ewapptus/bp-38251
  - 266e0a465c Fixed nested orchestrate not respecting failures
• PR #38229: (mcalmer) provide kwargs of sls_build to dockerng.create @ 2016-12-18 13:13:10 UTC
  - ecd441d090 Merge pull request #38229 from mcalmer/dockerng-sls_build-kwargs
  - 6fba25f8a7 Use machine readable output for list
  - cdbd2fbe3c Added limit-output to eliminate false packages
  - 9e78dce80e Merge pull request #38279 from rallytime/fixtures-38174
  - 4a62d01577 Add docs for syndic_wait setting
• ISSUE #30195: (Vaelatern) Add Void Linux support in Salt (refs: #31262, #38326)
• PR #38326: (yopito) fix runit init support (grain init) in 2016.11 @ 2016-12-18 12:07:25 UTC
  – PR #31262: (Vaelatern) Add support for Void Linux (refs: #38326)
  – 54a2bb95de Merge pull request #38326 from yopito/fix-runit-init-support
  – 25b91bb686 fix detection of runit as init system (grain init)
  – PR #38322: (rallytime) Add azurearm module to doc index
• PR #38305: (dereckson) Avoid normalization call for normalized mode value @ 2016-12-16 17:31:25 UTC
  – 1e4f299e7d Merge pull request #38305 from dereckson/fix-mode-extraneous-normalization
  – 573ac3565e Avoid normalization call for normalized mode value
  – PR #38291: (terminalmage) Improve documentation for archive.extracted in 2016.11
• ISSUE #37966: (Cybolic) salt-cloud EC2 instance can't be initiated (refs: #37967)
• PR #38298: (rallytime) Back-port #37967 to 2016.11 @ 2016-12-16 15:20:04 UTC
  – PR #37967: (Cybolic) Fixed faulty logic preventing instance initialisation. (refs: #38298)
  – 3cf0135d50 Merge pull request #38298 from rallytime/bp-37967
  – 42d367f39d Fixed faulty logic preventing instance initialisation.
• ISSUE #38070: (ezh) [2016.11.0] Salt-cloud throws UnicodeDecodeError exception (refs: #38076)
• PR #38076: (ezh) Fix decoding of broken string from remote sources @ 2016-12-15 19:05:25 UTC
  – f4f0036f30 Merge pull request #38076 from doublescoring/fix-2016.11-38070
  – 70c8db5489 Fix decoding of broken string from remote sources
• PR #38278: (rallytime) Back-port #38207 to 2016.11 @ 2016-12-15 18:09:27 UTC
  – PR #38207: (tsaridas) remove empty strings from list but not ones with one empty space char (refs: #38278)
  – PR #38188: (tsaridas) fix for push_dir in different OS (refs: #38203, #38207)
  – 2ccab22c19 Merge pull request #38278 from rallytime/bp-38207
  – 5e8bf571d8 python3 compatibility and fix pylint
  – e0df04700 remove empty strings from list but not ones with one empty space char
• PR #38277: (rallytime) [2016.11] Merge forward from 2016.3 to 2016.11 @ 2016-12-15 18:09:10 UTC
  – a748e842a8 Merge pull request #38277 from rallytime/merge-2016.11
  – 49a3355915 Merge branch '2016.3' into '2016.11'
  – fc9e1df35 Merge pull request #38248 from meaksh/salt-api-successfully-close-child-processes
    * e6eae9855 Successfully exit of salt-api child processes when SIGTERM.
  – 3c718ed35e Merge pull request #38254 from terminalmage/check-pillarenv
    * fa9ad311c6 Also check if pillarenv is in opts
  – 6b9060c38f [2016.3] Bump latest release version to 2016.11.1 (#38256)
• ISSUE #38231: (tjuup) Typo: salt-key deleteed (refs: #38232)
• PR #38232: (rallytime) Strip final 'e' in key cmd to correct "deleteed" misspelling @ 2016-12-15 10:38:49 UTC
  – 0af343e71f Merge pull request #38232 from rallytime/fix-38231
- 26e1ee3650 Strip final ‘e’ in key cmd to correct "deleteed" misspelling

- **ISSUE #38200**: (sebw) selinux.mode doesn’t return any output and doesn’t persist (refs: #38236)

- **PR #38236**: (gtmanfred) SELINUXTYPE should not be changed @ 2016-12-15 10:37:06 UTC
  - 6c1ca9dae7 Merge pull request #38236 from gtmanfred/2016.11
  - d1b070c894 clean up selinux unit test
  - 96eadb4939 SELINUXTYPE should not be changed

- **ISSUE #38228**: (vquiring) archive.extracted with options and user/group (refs: #38262)

- **PR #38262**: (terminalmage) Fix archive.extracted when --strip or --strip-components is in the options @ 2016-12-15 08:57:18 UTC
  - fd32dc3e9b Merge pull request #38262 from terminalmage/issue38228
  - 6442fa7b5 Add tests for --strip/--strip-components
  - c502e68f12 Detect --strip/--strip-components in tar options and handle properly
  - e95770594d Add strip_components arg to archive.list

- **PR #38264**: (mirceaulinic) Port #37862 into 2016.11 @ 2016-12-15 08:51:20 UTC
  - **PR #37862**: (mirceaulinic) [2016.11.1] Docstring fixes and new features for napalm_network (refs: #38264)
  - b232bd8ce8 Merge pull request #38264 from cloudflare/PORT-37862
  - 28bb73151 Import from napalm_base instead of napalm
  - 0a675a4c40 Vice-versa docstring
  - 09c50176e2 More docfix
  - 215bf83e2 Lint cleanup

- **PR #38260**: (rallytime) Add 2016.11.2 release notes

- **PR #38257**: (rallytime) [2016.11] Bump latest release version to 2016.11.1

- **PR #38233**: (terminalmage) Correct an inaccurate warning when top_file_merging_strategy == merge_all

- **PR #38234**: (rallytime) [2016.11] Merge forward from 2016.3 to 2016.11 @ 2016-12-13 18:28:02 UTC
  - ba62fcf2ec Merge pull request #38234 from rallytime/merge-2016.11
  - 6a327d1367 Merge branch '2016.3' into '2016.11'
  - 004e46afe7 Merge pull request #38198 from vutny/unit-tests-require-libcloud-boto3
    - * a6098b81ca Remove note about SaltTesting installation, now it is in the requirements
    - * 004bf113e Add missing requirements for running unit tests: libcloud and boto3
  - 9d497bc74c Merge pull request #38213 from rallytime/skip-tls-test
    - * bdb807fc7c Skip test_cert_info tls unit test on pyOpenSSL upstream errors
  - 203109d17 Merge pull request #38224 from whiteinge/cors-options-unauthed
    - * de4d3227a6 Allow CORS OPTIONS requests to be unauthenticated
  - 721a5fecd Merge pull request #38223 from whiteinge/salt-api-root_dirs
    - * bbf390c0e Add root_dir to salt-api file paths

---

**30.2. Previous Releases**
Salt Documentation, Release 3003.3

- PR #38205: (rallytime) [2016.11] Merge forward from 2016.3 to 2016.11 @ 2016-12-12 18:13:18 UTC
  - 7ead1ed336 Merge pull request #38205 from rallytime/merge-2016.11
  - e3f97c7f71 Merge branch '2016.3' into '2016.11'
  - 70f7d22ad6 Merge pull request #38191 from terminalmage/issue38162
    - 1ae543a98a Clarify the fact that git_pillar.update does not fast-forward
  - 28171cbfc5 Merge pull request #38194 from vutny/integration-test-requirements-doc
    - e9f419ff64 Document the requirements for running ZeroMQ-based integration tests
  - a4ef037ab1 Merge pull request #38185 from rallytime/bp-38181
    - 609f814544 Reset socket default timeout to None (fixes daemons_tests failures)
- PR #38203: (rallytime) Back-port #38188 to 2016.11 @ 2016-12-12 17:48:51 UTC
  - PR #38188: (tsaridas) fix for push_dir in different OS (refs: #38203, #38207)
  - 669409d681 Merge pull request #38203 from rallytime/bp-38188
  - 50d3200b12 removing not needed join
  - 7af708e1e7 fix for push_dir in different OS

30.2.60 Salt 2016.11.3 Release Notes

Version 2016.11.3 is a bugfix release for 2016.11.0.

Changelog for v2016.11.2..v2016.11.3

Generated at: 2018-05-27 19:39:56 UTC

- PR #39536: (twangboy) Namespace 'status' functions in 'win_status' @ 2017-02-21 23:45:31 UTC
  - PR #39005: (cro) Ungate the status.py module and raise unsupported errors in functions not executable on Windows. (refs: #39536)
  - 40f72db53e Merge pull request #39536 from twangboy/fix_win_status
  - d5453e2f9e Remove unused import (lint)
  - 837c32e673 Remove list2cmdline
  - c258cb3f73 Streamline wmic command returns for easier parsing
• d2cf8171e Fix 'ping_master' function
• d946d10597 Namespace 'status' functions in 'win_status'

• PR #39534: (rallytime) Fix breakage in aptpkg and dpkg execution modules @ 2017-02-21 20:31:15 UTC
  – PR #39418: (anlutro) Allow aptpkg.info_installed on package names that aren't installed (refs: #39534)
  – dc8f578447 Merge pull request #39534 from rallytime/fix-pkg-function-specs
  – d34a8fe9dc Fix breakage in aptpkg and dpkg execution modules

• ISSUE #34712: (richardscollin) Salt Test Suite Error - develop (refs: #37366)
  – PR #39521: (vutny) Upgrade SaltTesting to run test suite for 2016.11 and add SaltPyLint
  – PR #37366: (eradman) dev_python*.txt: use current SaltTesting and SaltPyLint modules (refs: #39521)

• PR #39370: (twangboy) Gate win_osinfo and winservice @ 2017-02-17 23:53:58 UTC
  – e4c71683d9 Merge pull request #39370 from twangboy/gate_win_utils
  – 167c0b3447 Gate windows specific imports, add __virtual__
  – e67387deb7 Add option to return a Non instantiated class
  – 315b0cc105 Clarify return value for win_osinfo
  – 994314ed3d Fix more docs
  – 2bbe3cbf49 Fix some docs
  – 4103563ee1 Merge branch 'gate_win_utils' of https://github.com/twangboy/salt into gate_win_utils
    * 24c1bd079d Remove extra newlines
  – 82a86ced55 Add helper function for winservice
  – 0051b5a5e2 Put the win_osinfo classes in a helper function
  – 4e08534877 Gate win_osinfo and winservice better

• PR #39486: (twangboy) Remove orphaned function list_configurable_policies @ 2017-02-17 22:21:50 UTC
  – a3e71b6c6ce Merge pull request #39486 from twangboy/win_remove_orphaned
  – 1328055c4d Remove orphaned function list_configurable_policies

• PR #39418: (anlutro) Allow aptpkg.info_installed on package names that aren't installed (refs: #39534) @ 2017-02-17 18:34:19 UTC
  – 87b2695c80 Merge pull request #39418 from alprs/fix-aptpkg_info_nonexistent_pkg
  – 24bfb1e938 add failhard argument to various apt pkg functions

• PR #39438: (mirceaulinic) file.get_managed: refetch source when file hashsum is changed @ 2017-02-17 17:58:29 UTC
  – e816d6c23e Merge pull request #39438 from cloudflare/fix_39422
  – 8453800639 file.get_managed: refetch cached file when hashsum chnaged

• ISSUE #39203: (dmaziuk) salt.users gecos field (refs: #39432)

• ISSU #39432: (dmaziuk) Quick and dirty fix for GECOS fields with more than 3 commas @ 2017-02-17 17:57:30 UTC
  – a5e8f0fa6 Merge pull request #39432 from dmaziuk/issue39203
  – 41c046308c Remove #
- 4f877c6b6f Quick and dirty fix for GECOS fields with more than 3 commas

- **PR #39484: (corywright)** The Reactor docs should use pillar='{}' instead of 'pillar={}' @ 2017-02-17 17:50:57 UTC
  - 3665229a5a Merge pull request #39484 from corywright/fix-reactor-docs-pillar-keyword-args
  - cc90d053f The Reactor docs should use pillar='{}' instead of 'pillar={}'

- **PR #39456: (twangboy)** Add salt icon to buildenv directory @ 2017-02-16 22:47:58 UTC
  - 2e3a9c5e58 Merge pull request #39456 from twangboy/win_fix_icon
  - 8dd915dae4 Add salt icon to buildenv directory

- **PR #39462: (twangboy)** Use url_path instead of url_data.path @ 2017-02-16 22:44:18 UTC
  - 63ade03484 Merge pull request #39462 from twangboy/win_fix_fileclient
  - a96bc13133 Use url_path instead of url_data.path

- **PR #39458: (rallytime)** Fix more warnings in doc build @ 2017-02-16 21:45:52 UTC
  - e9b034f02f Merge pull request #39458 from rallytime/fixup-more-doc-build-warnings
  - e698bc3508 Fix more warnings in doc build

- **PR #39437: (sakateka)** Fixes about saltfile @ 2017-02-16 20:32:15 UTC
  - e4f8c2bf0 Merge pull request #39437 from sakateka/fixes_about_saltfile
  - ab68524d7a less pylint: salt/utils/parsers.py
  - 9e7d9dcc78 Revert "pylint: salt/utils/parsers.py"
  - f3f129cf81 document ~/.salt/Saltfile
  - 33f361b1e pylint: salt/utils/parsers.py
  - 0f36e10c7d expand config_dir and `~/.salt/Saltfile` as last resort
  - **PR #39451: (Ch3LL)** add 2016.11.3 changelog to release notes

- **ISSUE #38032: (meggiebot)** Add missing Carbon docs (refs: #39448)

- **PR #39448: (gtmanfred)** Add release notes for cisco proxy minions added in Carbon @ 2017-02-16 17:29:48 UTC
  - 8e2cb2307 Merge pull request #39448 from gtmanfred/2016.11
  - 3172e88700 Add release notes for cisco proxy minions added in Carbon

- **PR #39428: (rallytime)** [2016.11] Merge forward from 2016.3 to 2016.11 @ 2017-02-16 00:01:15 UTC
  - 07090b719 Merge pull request #39428 from rallytime/merge-2016.11
  - 2acb18ac9 Change path value from a tuple to a list
  - 6d78adbf08 Merge branch '2016.3' into '2016.11'
    - 4f13acf88b salt.fileserver.roots: Fix regression in symlink_list (#39409)
    - 8b8ab8f8e Merge pull request #39362 from dincamihai/cp-push-test-2016.3
      - 9138e5ca19 Add cp.push test
    - 4b72f955b Merge pull request #39380 from joe-niland/quote-numeric-usernames
      - c2edfdd464 Quote numeric user names so pwd.getpwnam handles them properly
    - 1116d32df0 Merge pull request #39400 from meaksh/2016.3-fix-local-cache-issue
      - e7559e5f5c Prevents 'OSError' exception in case path doesn’t exist
• 6c854da1d4 Merge pull request #39300 from terminalmage/loader-optimization
  • d3e5d1525e Replace more usage of str.format in the loader
• 5286b5ff1b Merge pull request #39337 from terminalmage/issue34428
  • a7d2135dc2 Don’t re-walk the roots fileserver in symlink_list()
• ce781deeb5 Merge pull request #39339 from cro/pillar_filetree_doc
  • 410810cea2 Clarification on external pillar usage.
• fa3014393c Document the upstream RedHat bug with their pygit2 package (#39316)
  • ISSUE #39360: (bbinet) file.symlink should not try to set ownership to root:root (refs: #39364)
  • PR #39429: (rallytime) Back-port #39364 to 2016.11 @ 2017-02-15 21:27:21 UTC
    • PR #39364: (gtmanfred) set default user variable to the user cmd runs as (refs: #39429)
    • 54a572e50c Merge pull request #39429 from rallytime/bp-39364
    • 157f4dcd9f set default user variable to the user cmd runs as
  • PR #39424: (twangboy) Fix problem with too many connection attempts in Windows @ 2017-02-15 18:51:35 UTC
    • 881ebf2e93 Merge pull request #39424 from twangboy/win_fix_dos
    • d3f7dd7f50 Add sleep to eval_master
  • ISSUE #30561: (jfindlay) salt-ssh fails with IPv6 address (refs: #39419, #38831)
  • ISSUE #22984: (tomasfejfar) salt-ssh problem possibly related to ipv6 (refs: #39419, #38831)
  • PR #39419: (The-Loeki) Backport Salt-SSH IPv6 fixes to 2016.11 @ 2017-02-15 17:33:13 UTC
    • PR #38877: (The-Loeki) Salt-SSH client: Don’t overwrite self.host w/IPv6 brackets (refs: #39419)
    • PR #38831: (The-Loeki) Salt-SSH deal with raw IPv6 addresses (refs: #39419, #38877)
    • 47872355a8 Merge pull request #39419 from The-Loeki/bp-ssh-ipv6
    • 4fc562f16 Don’t overwrite self.host w/IPv6 brackets
    • dd1223468b Salt-SSH deal with raw IPv6 addresses

      * 5d9f36d58d Fix typo
    * cfaafece34 Merge pull request #39296 from sergeizv/whitespace-fix
      * 1d4c1dc140 Whitespace fix in docs Makefile

5022 Chapter 30. Release Notes
- 0b4dc4a47 Merge pull request #39294 from sergeizv/fix-link
  - 04bde6ed2 Fix link in proxyminion guide
- dd3ca0eb0 Fix #38595 - Unexpected error log from redis retuner in master's log (#39299)
- f16027d30e Merge pull request #39297 from cro/pg_returner_docs
  - 28bac649ae Typo
  - 19fedcdd23 Add doc to recommend pgjsonb for master job caches
- 77e50ed8b7 Merge pull request #39286 from terminalmage/fix-pillarenv-precedence
  - 3cb9833e57 Allow minion/CLI saltenv/pillarenv to override master when compiling pillar
- 5244016ca Merge pull request #39221 from lvg01/fix-bug-39220
  - e8a41d6341 Removes to early content stripping (stripping is allready done when needed with
    ident:true), fixes #39220
  - a4b169e0bd Fixed wrong logic, fixes #39220
- 5a27207c57 Add warning for Dulwich removal (#39280)

• ISSUE #38451: (ezh) 2016.11 file.replace has multiple errors under python 3 (refs: #38464)
• PR #38464: (ezh) [38451] Fix file.replace 2016.11 @ 2017-02-09 23:07:49 UTC
  - c3621a9b0 Merge pull request #38464 from doublescoring/fix-2016.11-38451
  - 81f0337338 [38451] Fix few bugs after review
  - 1bdab253ad [38451] Fix pylint W1699(incompatible-py3-code)
  - 3bfc6547da [38451] Fix file.replace to make it suitable to python 3
• PR #39291: (terminalmage) Add note about using saltenv jinja var in pillar top files @ 2017-02-09 21:43:50 UTC
  - 6365211a6f Merge pull request #39291 from terminalmage/pillar-docs
  - fbdc51e069 Add note about using saltenv jinja var in pillar top files
• PR #39281: (tangboy) Require VCRedist on 2008R2 and below instead of 2008 @ 2017-02-09 17:59:57 UTC
  - a49e62a16 Merge pull request #39281 from tangboy/win_installer
  - ef5078729a Capitalize the 'r' for 2008R2
  - 1b6bd634ac Require VCRedist on 2008R2 and below instead of 2008
• PR #39264: (rallytime) [2016.11] Merge forward from 2016.3 to 2016.11 @ 2017-02-09 17:10:14 UTC
  - db6140a83 Merge pull request #39264 from rallytime/merge-2016.11
  - a9c2c106c1 Pylint fix
  - f6aad99db2 Merge branch '2016.3' into '2016.11'
    - 1b9217636 Update jsonschema tests to reflect change in jsonschema 2.6.0 (#39260)
    - c1d16c3d0 Better handling of enabled/disabled arguments in pkgrepo.managed (#39251)

      - c750662946 Loader optimization
    - bc89b297f8 Merge pull request #39228 from gtmanfred/2016.3
      - afee047b08 default to utf8 encoding if not specified
• d9b0671dbd Merge pull request #39231 from terminalmage/clarify-jenkins-depends
  • ad1b1255f2 Add clarification for jenkins execution module
• ddcff89a84 Merge pull request #39232 from terminalmage/issue21342
  • c88896c277 Avoid recursion in s3/svn ext_pillars
• ef4e437bbbc Fix the win_ip_test failures (#39230)
• df5f934c34 Merge pull request #39199 from rallytime/bp-39170
  • c129905310 Added missing source_hash_name argument in get_managed function Additional fix to #33187 Customer was still seeing errors, this should now work. Tested with 2015.8.13 and 2016.11.2
• 2621c119fd Merge pull request #39206 from cachedout/issue_issue_37174
  • be31e0559c Ignore empty dicts in highstate outputter
• dda40452ea Merge pull request #39209 from terminalmage/sorted-envs
  • e6dda4a625 Sort the return list from the fileserver.envs runner
• 7bed68743e [2016.3] Pylint fix (#39202)
• ab76054127 Merge pull request #39197 from cachedout/pr-38793
  • f3d35fb5c6 Lint fixes
  • 624f25b78d Fix for #38697

• ISSUE #39269: (alexharrington) Remount forced with lizardfs fuse filesystem due to device mismatch (refs: #39276)
• ISSUE #39106: (carsten-AEI) CVMFS fuse mount gets remounted every time (refs: #39276)
• PR #39276: (gtmanfred) _device_mismatch_ignored will never be True @ 2017-02-09 17:05:28 UTC
  • 304eb19b18 Merge pull request #39276 from gtmanfred/2016.11
  • 6635a9f3d3b_device_mismatch_ignored will never be True
• PR #39238: (dmurphy18) Update disk fstype, inodeusage, percent and mount.active functions for AIX support @ 2017-02-08 21:53:32 UTC
  • 7611698474 Merge pull request #39238 from dmurphy18/fix_aix_disk_mount
  • a8a519c493 Removed space for pylint
  • 8fa0ff4a427 Updates due to code review comments
  • 97c59a8d1c Updated mount functionality for active on AIX
  • 1a32b2cc89 Updated disk functionality for fstype, inodeusage and percent on AIX
• PR #39233: (rallytime) Various doc updates to fix warnings in doc build @ 2017-02-08 19:29:53 UTC
  • 99bfa7dfee Merge pull request #39233 from rallytime/fixup-more-doc-build-warnings
  • 2f74dcf685 Various doc updates to fix warnings in doc build
• PR #39237: (axmetishe) fix rds subnet group creation @ 2017-02-08 19:04:31 UTC
  • 59e927b520 Merge pull request #39237 from axmetishe/2016.11
  • 6f4be8b69c fix rds subnet group creation
  • PR #39234: (rallytime) [2016.11] Merge forward from 2016.3 to 2016.11
- **PR #39225**: (terminalmage) Put legacy git_pillar on a deprecation path for Oxygen

- **ISSUE #39078**: (morganwillcock) setup.py: cannot install without setting global options (refs: #39180)

- **PR #39180**: (morganwillcock) setup.py: Remove global options from install command @ 2017-02-07 16:20:49 UTC
  - 19c3d90a32 Merge pull request #39180 from morganwillcock/setup
  - d7e05091a2 Remove global options from Install

- **PR #38863**: (hujunya) fix django auth not work @ 2017-02-07 15:43:00 UTC
  - a0907bc861 Merge pull request #38863 from hujunya/fix_django_auth
  - 2a9ff46d3 check if django_auth_path has been in sys.path
  - 933ebf15d7 fix pylint violations
  - 6b5a7fb64 fix django auth not work

- **PR #39198**: (rallytime) [2016.11] Merge forward from 2016.3 to 2016.11 @ 2017-02-06 21:01:56 UTC
  - c3e541e0a2 Merge pull request #39198 from rallytime/merge-2016.11
  - 7ea5f7f2f2 Merge branch '2016.3' into '2016.11'
    - fa45cbe359 Merge pull request #39166 from Ch3LL/fix_boto_ec2_docs
      - 90af96331 fix boto ec2 module create_image doc
    - a40cb46249 Merge pull request #39173 from rallytime/restore-community-docs
      - 5aed4f2a0 Restore "Salt Community" doc section

- **ISSUE #39059**: (mirceaulinic) KeyError: 'multiprocessing' in the master logs (proxy minions) (refs: #39063)

- **PR #39063**: (mirceaulinic) Avoid KeyError: 'multiprocessing' in the master logs @ 2017-02-06 19:37:35 UTC
  - 2a85d73f59 Merge pull request #39063 from cloudflare/ISS-39059
  - 7118eff034 Merge pull request #36336 from cloudflare/ISS-39059
  - 5aed4f2a0 Restore "Salt Community" doc section

- **ISSUE #38782**: (lomeroe) win_lgpo unable to find some Administrative Template policies (refs: #38783, #39083, #39090)

- **ISSUE #38761**: (DaveOHenry) Cannot apply state that contains lgpo.set (refs: #39083, #39088)

- **ISSUE #38689**: (lomeroe) win_lgpo state fails to set single policy due to case sensitive check (refs: #39083, #39084, #38690)

- **ISSUE #38100**: (skjarro) Problem with win_lgpo.py in salt 2016.11.0 (refs: #39083, #39089, #38779)

- **ISSUE #21485**: (lorendgordon) Feature Request: Manage Windows Local Security Policy Settings (refs: #36336)

- **PR #39083**: (lomeroe) Backport #36336 to 2016.11 @ 2017-02-06 18:50:52 UTC
  - **PR #36336**: (lomeroe) add additional static policies to computer configuration policy class (refs: #39083)
  - 91c25bd651 Merge pull request #39083 from lomeroe/bp-36336
  - 03e5319124 Merge branch '2016.11' into bp-36336
  - 981ec89a4d update command line example to correct policy name
  - e2574da0b8 Fix/Add documentation, 80 char line lengths
  - 5e94a30a34 add additional static policies to computer configuration policy class duplicate code cleanup/misc code efficiencies
- **PR #39153**: (nicholasmhughes) Fix selinux.mode state config file handling @ 2017-02-06 18:37:34 UTC
  - 30455079fe Merge pull request #39153 from nicholasmhughes/fix-selinux.mode-config-predictability
  - 8d8ba9c7d2 added the new getconfig function to the test
  - a6a24e1a1b Addressed edge case when attempting to set the config file to 'Disabled'. The state should only check the file, since the in-memory setting won't disappear until after reboot.
  - 6858658cc2 The selinux.mode state only checked the current status of SELinux in memory (getenforce) when determining if changes needed to be made. The /etc/selinux/config file could have a different value, and it would not be changed. This commit enhances idempotency of the state in regards to both the in-memory and configuration file enforcement of SELinux.

- **ISSUE #38081**: (haraldrudell) x509 state or module cannot generate password protected private keys (refs: #39159)

- **PR #39159**: (clinta) Csr crl passphrase @ 2017-02-06 18:36:05 UTC
  - 7b5eb17cbe Merge pull request #39159 from clinta/CSR-crl-passphrase
  - cf548ac717 Remove unnecessary pass
  - 4ebe7a3df4 Remove unnecessary pass statement
  - 6a8046973e fix csr bugs and pep8
  - 36dc5f3da only overwrite if overwrite option is specified
  - 403000d375 recreate cert on bad password
  - 6497094ba7 passphrase for crl
  - 3ef809fb0f passphrase for csr

- **PR #39162**: (meaksh) Adding more function to Snapper module @ 2017-02-06 18:33:53 UTC
  - b240468525 Merge pull request #39162 from meaksh/snapper-module-improvements
  - f950732fa0 pylint fixes
  - aa2f9906e0 Removing extra spaces
  - 96a33f257 Adds 'snapper.create_config' unit tests
  - d38ed5058b Adds 'snapper.modify_snapshots' unit tests
  - d5496c99e9 Adds 'snapper.delete_snapshots' unit tests
  - 3eefb6076b Snapper: Adding support for creating configurations
  - 041e5d4d4a Snapper: Adding support for snapshot metadata modification
  - eaf5de9dce Snapper: Adding support for deleting snapshots

- **ISSUE #38370**: (tjyang) Salt-Cloud: There was a query error: Required field "deviceChange" not provided (not @optional) (refs: #39171)

- **PR #39171**: (techhat) Raise an error for a disk size that is too small @ 2017-02-06 18:19:46 UTC
  - 6f9251ebd Merge pull request #39171 from techhat/issue38370
  - ec57a39c00 Typo
  - 2ed932387 Clean up debug logs
  - 671282656a Raise an error for a disk size that is too small

- **PR #39179**: (mcalmer) fix error parsing @ 2017-02-06 17:57:00 UTC
- 036f36dc9b Merge pull request #39179 from mcalmer/fixedockerng-error-parsing
- 6750c7d8f6 fix error parsing

**PR #39189: (morganwillcock) Fix NetBSD sockstat parsing @ 2017-02-06 17:28:08 UTC**
- 30f83156cb Merge pull request #39189 from morganwillcock/sockstat
- 344d13e5f5 Fix NetBSD sockstat example
- 6a693195c Fix NetBSD sockstat parsing

**ISSUE #38003: (morganwillcock) salt.runners.cache functions seem to ignore minion targeting parameter (refs: #39141)**

**PR #39141: (UtahDave) Don’t overwrite the minion_ids var that was passed @ 2017-02-03 20:56:25 UTC**
- 6a7704189f Merge pull request #39141 from UtahDave/fix_cache_lookup_ZD1187
- 0340614d3c return all minions’ grains if no tgt
- f8339f3a79 Don’t overwrite the minion_ids var that was passed

**PR #39164: (rallytime) [2016.11] Merge forward from 2016.3 to 2016.11 @ 2017-02-03 17:57:07 UTC**
- d19ce7e1f Merge pull request #39164 from rallytime/merge-2016.11
- 6504bb6b02 Merge branch ’2016.3’ into ’2016.11’
  - 9de08af95b Apply fix from #38705 to 2016.3 branch (#39077)
  - da3053ea9b update vmware getting started doc (#39146)
  - f87ca0f575 Fixing a weird edge case when using salt syndics and targetting via pillar. Without this fix the master of masters ends up in an infinite loop since the data returned from the minions is differently structured than if a sync was not in use. (#39145)
  - cd8077ab81 Merge pull request #38804 from alexbleotu/root_dir_fix-2016.3-gh
    - b3b0d0b4a Add missing whitelinel
    - c77151a5c5 Merge pull request #3 from cro/ab_rootdirfix
    - e8cbafaf1 When running testsuite, salt.syspaths.ROOT_DIR is often empty.
    - b12dd44a26 Merge pull request #1 from cro/ab_rootdirfix
    - b78c3c7a9 Remove extra if statements (rstrip will check for the presence anyway).
    - 9df521b3468 Second attempt to fix prepending of root_dir to paths
  - 6fcfeda3ee5 Clarify ipv6 option for minion and interface for master, closes #39118 (#39131)
  - 6469ea4ae5 Don’t abort pillar.get with merge=True if default is None (#39116)

**PR #39152: (twangboy) Remove files not needed by salt-minion @ 2017-02-03 17:11:11 UTC**
- ed12512045 Merge pull request #39152 from twangboy/win_installer
- 5f8a14317 Fix problem deleting files
- 4524dd49d4 Remove files not needed by salt-minion

**ISSUE #38691: (lomeroe) win_lgpo module throws a key error when run with return_not_configured=True (refs: #39085, #38666)**
- PR #39085: (lomeroe) Backport #38666 to 2016.11
- PR #38666: (lomeroe) correct issue when running lgpo.get with return_not_configured=True (refs: #39085)
• **ISSUE #38241**: (frogunder) mine.get and salt-ssh gives error message (refs: #38970)

• **PR #38970**: (gtmanfred) when using local_cache we have to pass the list of minions @ 2017-02-02 19:24:39 UTC
  - ebb9df3ec7 when using local_cache we have to pass the list of minions

• **ISSUE #39110**: (morganwillcock) archive.extracted: 2016.11.2 returns state failure for some zip formats, if already extracted (refs: #39128)
  - **PR #39128**: (terminalmage) Fix archive.list on Windows

• **ISSUE saltstack/salt#36712**: (dmitrievav) s3.put function does not create s3 bucket (refs: #36714)
  - **PR #39133**: (rallytime) Back-port #36714 to 2016.11
  - **PR #36714**: (dmitrievav) s3.put can’t create s3 bucket (refs: #39133)

• **ISSUE #38689**: (lomeroe) win_lgpo state fails to set single policy due to case sensitive check (refs: #39083, #39084, #38690)
  - **PR #39084**: (lomeroe) Backport #38690 to 2016.11
  - **PR #38690**: (lomeroe) correct checking of policy_class to compare with lower() version of t... (refs: #39084)

• **ISSUE #38100**: (skjaro) Problem with win_lgpo.py in salt 2016.11.0 (refs: #39083, #39089, #38779)
  - **PR #39089**: (lomeroe) Backport #38779 to 2016.11
  - **PR #38779**: (lomeroe) win_lgpo handle errors when 'encoding="unicode"' exists in ADMX file (refs: #39089)

• **ISSUE #38782**: (lomeroe) win_lgpo unable to find some Administrative Template policies (refs: #38783, #39083, #39090)
  - **PR #39090**: (lomeroe) Backport #38783 to 2016.11
  - **PR #38783**: (lomeroe) Perform a "starts-with" search to match ADML text names (refs: #39090)

• **ISSUE #38761**: (DaveOHenry) Cannot apply state that contains lgpo.set (refs: #39083, #39088)
  - **PR #39088**: (lomeroe) Backport #37262 to 2016.11
  - **PR #37262**: (lomeroe) correct issues in win_lgpo module (refs: #39088)

• **PR #39122**: (rallytime) [2016.11] Merge forward from 2016.3 to 2016.11 @ 2017-02-01 21:41:59 UTC
  - 50d72da3f6 Merge pull request #39122 from rallytime/merge-2016.11
  - a782b00ee1 Merge branch '2016.3' into '2016.11'
  - cc9b69b6bc Merge pull request #39091 from terminalmage/update-test-valid-docs
    - d76f0380d0 add debug logging for batch vars
    - b4afea2a25 Don't fail test if data is empty
    - b3a5d549c1 Account for trimmed value in 'salt -d' output
    - 909916c78e Run test_valid_docs in batches
  - bcee3d1ef6 Move fileclient tests to tests/integration/fileserver/fileclient_test.py (#39081)
• PR #39087: (lomeroe) Backport #37375 to 2016.11 @ 2017-02-01 19:02:58 UTC
  - PR #37375: (lomeroe) add updating gpt.ini file when ADM template policies are modified (gp... (refs: #39087)
  - f8a6863d98 Merge pull request #39087 from lomeroe/bp-37375
  - c3aaa536f3 _in_range_inclusive class method incorrectly called isinstance
  - ce263f9372 set_computer_policy and set_user_policy call ”set” by the original function name (set) instead of the aliased function name set_
  - f7d74bf6b0 correct tool extension guid for user registry policies
  - 08f007ef3 spelling correction
  - 5fc40485f7 add updating gpt.ini file when ADM template policies are modified (gpt.ini file must exist with proper data for ADM policies to apply)
• PR #39094: (rallytime) Add a bunch of missing doc module references @ 2017-02-01 18:56:27 UTC
  - c4c6701af Merge pull request #39094 from rallytime/doc-build-warnings
  - b866427f59 Add a bunch of missing doc module references
• PR #39108: (janhorstmann) [Bugfix] Fix state x509.crl_managed @ 2017-02-01 18:32:43 UTC
  - d302bb747e Merge pull request #39108 from janhorstmann/fix-x509-state
  - 9f5532510 [Bugfix] Fix state x509.crl_managed
• ISSUE #39100: (whytewolf) salt-run fileserver.update Exception (refs: #39107)
• ISSUE #39098: (FraaJad) state.event runner fails with TypeError: argument of type 'NoneType' is not iterable (refs: #39107)
• ISSUE #38638: (mirceafulinic) salt.cmd runner raises TypeError when function returns bool (refs: #39107)
• PR #39107: (mirceafulinic) Check if data[’return’] is dict type @ 2017-02-01 18:21:46 UTC
  - bf61ec9515 Merge pull request #39107 from cloudflare/FIX-38638
  - 7c34816f79 Check if data[’return’] is dict type
• ISSUE #39065: (jak3kaj) primary bonding option is not applied (refs: #39068, #39069)
  - PR #39069: (jak3kaj) Update primary bonding option in rh_ip.py
• ISSUE #39065: (jak3kaj) primary bonding option is not applied (refs: #39068, #39069)
  - PR #39068: (jak3kaj) Update primary bonding option in debian_ip.py
• ISSUE #38704: (nasenbaer13) Archive extracted fails when another state run is queued (refs: #38705)
• PR #39076: (terminalmage) Re-submit PR #38705 against 2016.11 branch @ 2017-01-31 20:11:55 UTC
  - PR #38705: (nasenbaer13) Fix for #38704 archive extracted and dockerio states (refs: #39077, #39076)
  - 98c3dd29 Merge pull request #39076 from terminalmage/pr-38705
  - 15db8d47ed Fix for #38704 archive extracted and dockerio states
• ISSUE #39057: (sergeizv) modules.linux_lvm.fullversion provides incomplete info (refs: #39058)
• PR #39058: (sergeizv) Fix salt.modules.linux_lvm.fullversion @ 2017-01-31 19:01:12 UTC
  - 86b4b77bfe Merge pull request #39058 from sergeizv/fix-lvm-fullversion

30.2. Previous Releases
- e46c89f9ed Fix salt.modules.linux_lvm.fullversion
- fb7ef99838 Fix mock emulating lvm version

- **ISSUE #39051:** (afletch) salt.roster.cache / salt.utils.cloud is_public_ip - incorrect public IP address (refs: #39066)
- **PR #39066:** (techhat) 127.0.0.0/8 is all loopback @ 2017-01-31 18:43:22 UTC
  - 721b245f90 Merge pull request #39066 from techhat/issue39051
  - ea43bb8101 127.0.0.0/8 is all loopback

- **ISSUE #39070:** (sergeizv) modules.linux_lvm.pvcreate misbehaves if all submitted devices are already LVM
  - c54d9f4e2a Merge pull request #39071 from sergeizv/fix-lvm-pvcreate
  - f1e3e86e6a Fix modules.linux_lvm.pvcreate on existing LVM PVs
  - 0f84ca2487 Add test for modules.linux_lvm.pvcreate on existing LVM PVs
  - 3967992bfd Fix test for modules.linux_lvm.pvcreate

- **PR #39048:** (rallytime) [2016.11] Merge forward from 2016.3 to 2016.11 @ 2017-01-31 15:55:49 UTC
  - 88b171f863 Merge pull request #39048 from rallytime/merge-2016.11
  - b2b989773 Merge branch '2016.3' into '2016.11'
    - a24af5ac46 Merge pull request #39047 from rallytime/merge-2016.3
      - b732a1f646 Merge branch '2015.8' into '2016.3'
      - 56cca6ff7 Add 2015.8.14 release notes file (39046)
      - 5943fe65d3 Update 2015.8.13 release notes (39037)
    - fef1b1133d Add 2016.3.6 release notes file (39045)
    - 7c43f4ac32 [2016.3] Update release numbers for doc build (39042)
    - ff324599d5 Update 2016.3.5 release notes (39038)
    - 5b09d4198 Merge pull request #39028 from terminalmage/clarify-delimiter-argument
      - f29ef071f3 Clarify delimiter argument
    - f1f359fa58 Add CLI Example for rest_sample_utils.get_test_string function (39030)
    - f13fb9ef1e Enable __proxy__ availability in states, highstate, and utils. Enable __utils__ availability in proxies. (38899)

- **PR #39035:** (cro) Add CLI Examples so tests will pass
- **PR #39044:** (rallytime) Add 2016.11.3 release notes file
- **PR #39040:** (rallytime) [2016.11] Update release numbers for doc build
- **PR #39039:** (rallytime) Update 2016.11.2 release notes
- **PR #39005:** (cro) Ungate the status.py module and raise unsupported errors in functions not executable on Windows. (refs: #39536)

- **PR #39012:** (terminalmage) Fix "invalid lexer" errors in docs build @ 2017-01-28 06:47:45 UTC
  - e70904c480 Merge pull request #39012 from terminalmage/invalid-lexer
  - 868001baac Fix "invalid lexer" errors in docs build
• **PR #39003** (rallytime) [2016.11] Merge forward from 2016.3 to 2016.11 @ 2017-01-28 00:09:09 UTC
  - cea0f32936 Merge pull request #39003 from rallytime/merge-2016.11
  - 76e9f087fd Merge branch '2016.3' into '2016.11'
  - da96221741 Merge pull request #38951 from DSRCorporation/bugs/37938_fix_depends_decorator_memleak
    * 0b18f34678 Keep the only one record per module-function in depends decorator.
  - 8516edeb70 Merge pull request #38982 from rallytime/fx-34780
    * 1583c5579a Set response when using "GET" method in s3 utils
  - cfdb699e12 Merge pull request #38989 from alprs/docfix-state_pt3_environ
    * 52a9ad1c60 fix SLS in environment variable examples
  - 55e4d2572e Merge pull request #39000 from rallytime/skip-badload-test
    * 4b3ff0fe0f Skip the test_badload test until Jenkins move is complete
  - fe054eb772 Merge pull request #38995 from terminalmage/fx-pillar.item-docstring
    * 06d094d8f8 Fix pillar.item docstring

• **ISSUE #38853**: (bobrik) file.serialize still expects show_diff instead of show_changes (refs: #38908)

• **PR #38908**: (bobrik) Deprecate show_diff for file.serialize to mimic file.managed, closes #38853 @ 2017-01-27 17:15:37 UTC
  - 58543d5cbf Merge pull request #38908 from bobrik/show-changes-for-serialize
  - e0af212c1b Remove unnecessary blank lines
  - a08c1ca530 Deprecate show_diff for file.serialize to mimic file.managed, closes #38853

• **ISSUE saltstack/salt-bootstrap#1021**: (sjorge) salt-bootstrap missing salt-api.xml on smartos (refs: #38978)

• **PR #38978**: (sjorge) fixes saltstack/salt-bootstrap#1021 @ 2017-01-27 17:05:10 UTC
  - 4b75dfac95 Merge pull request #38978 from sjorge/2016.11-bootstrap
  - 26eb35f99d fixes salt/salt-bootstrap`#1021`

• **PR #38991**: (isbm) Isbm zypper state unknown pkg crash @ 2017-01-27 16:59:38 UTC
  - b40f369d98 Merge pull request #38991 from isbm/isbm-zypper-state-unknown-pkg-crash
  - 35f620e1c8 Prevent crash on unknown to the repo package

• **PR #38979**: (rallytime) [2016.11] Merge forward from 2016.3 to 2016.11 @ 2017-01-26 22:56:13 UTC
  - 3e76662166 Merge pull request #38979 from rallytime/merge-2016.11
  - fd4aa5ac1b0 Merge branch '2016.3' into '2016.11'
  - b66b6f6423 Merge pull request #38950 from mbom2004/2016.3
    * c0f39d6c9 Remove unused json import
    * 249efa3068 Fixed Logstash Engine in file logstash.py
  - a6c6e47842 Handle changing "is_default" value in moto package for boto test mock (#38973)
  - b965b5d0c2 Merge pull request #38952 from terminalmage/zd1168
    * 6b01453fc Rename on_demand_pillar to on_demand_ext_pillar
    * d216f90c63 Document new on_demand_pillar option and add to config template
Salt Documentation, Release 3003.3

- 426b20f02f Add documentation for on-demand pillar to pillar.ext docstring
- 7b10274b6b Make on-demand ext_pillars tunable
- d54723ccae Add on_demand_pillar config option
  - 2c4ad85a78 Merge pull request #38948 from rallytime/bump-template-context-deprecation
    - 794e0031d7 Bump the template context deprecation version to Oxygen
  - e4514ca7d8 Merge pull request #38946 from rallytime/bp-37632
    - ee37cdace9 Fix some lint
    - c08071e182 Fix versions report for server OSs
  - 953a20350a Merge pull request #38913 from Adaephon-GH/patch-1
    - e2fa16fdd Removing trailing whitespace
    - 616292c6b1 Ignore plist files without Label key
  - 826dce1059 Merge pull request #38917 from twangboy/update_jinja_mac
    - 62e608b627 Update Jinja2 to 2.9.4
  - b27733cc33 Merge pull request #38925 from terminalmage/issue38540
    - 76392fc6ad Fix traceback when a netapi module uses wheel_async
    - bd4474fa62 Fix 'success' value for wheel commands
  - 618596f0cc Merge pull request #38926 from gtmanfred/2016.3
    - 9cae953c93 add note about pysss for pam eauth

- PR #38937: (arthru) Fix smtp ret require gnupg @ 2017-01-26 20:08:16 UTC
  - 0660cc3cf2 Merge pull request #38937 from HashBangDev/fixed-smt-ret-require-gnupg
  - 399556b9fe Remove trailing whitespace
  - f308d13a17 log an error on gnupg absence instead of raising an exception
  - 0427879d19 fails if gpgowner is set in smtp returner config but the installation lacks gnupg module
  - 27449c5a9b smtp returner does not require gnupg to be installed

- ISSUE #38816: (grichmond-salt) Errors in cloud runners are not reliably being captured as failures. (refs: #38955)

- PR #38955: (techhat) Do a better job at error detection in runners @ 2017-01-26 20:00:18 UTC
  - d947c5c449 Merge pull request #38955 from techhat/issue38816
  - ea8654f400 Typo
  - 94050ff716 Watch out for bools
  - 0142b0cb3 Do a better job at error detection in runners

- PR #38953: (thatch45) fix an issue where thorium would remove keys of reattaching minions @ 2017-01-26 19:15:59 UTC
  - 04a5b05c36 Merge pull request #38953 from thatch45/thorium_keyfix
  - 68e96b11ac This is faster and cleaner
  - 13d28a34a6 fix an issue where thorium would remove keys of reattaching minions

- PR #38972: (rallytime) Add CLI Example for rest_sample_utils.get_test_string function (refs: #39030)
Salt Documentation, Release 3003.3

- **PR #38957**: (mcalmer) Fix timezone handling for rpm installtime @ 2017-01-26 18:41:15 UTC
  - 27166fad4e Merge pull request #38957 from mcalmer/fix-rpm-install_date-timezone
  - c7d9a7fb6e Fix timezone handling for rpm installtime

- **PR #38965**: (toanju) salt-cloud will use list_floating_ips for OpenStack @ 2017-01-26 16:44:12 UTC
  - PR #34280: (kevinanderson1) salt-cloud will use list_floating_ips for Openstack (refs: #38965)
  - ec69a0a12 Merge pull request #38965 from toanju/2016.11
  - 1253ce9b63 salt-cloud will use list_floating_ips for OpenStack

- **PR #38949**: (clinta) Use signing passphrase as public passphrase when generating self-sign... @ 2017-01-25 20:20:58 UTC
  - d906e8fadb Merge pull request #38949 from clinta/x509-passphrase-bug
  - c8697e38a8 Use signing passphrase as public passphrase when generating self-signed certificates

- **PR #38929**: (MTecknology) Fix psutil regressions in 2016.11 @ 2017-01-25 20:17:41 UTC
  - de3b2cc97b Merge pull request #38929 from MTecknology/2016.11
  - 73a8c6d121 Load core grains only if required.
  - 4966011cb5 Modules might still be needed, even if psutil loads.
  - fb0432fd21 Fixes a regression with old versions of python-psutil.

- **PR #38940**: (isbm) Isbm sanitizers fix and unit test @ 2017-01-25 20:15:56 UTC
  - 3ec806c003 Merge pull request #38940 from isbm/isbm-sanitizers-fix-and-unit-test
  - a112b790fe Fix typo
  - 47a16916c3 Add unit test
  - 046c5436eb Fix leading dots on sanitized hostname

- **PR #38944**: (rallytime) [2016.11] Merge forward from 2016.3 to 2016.11 @ 2017-01-25 19:44:42 UTC
  - e420763285 Merge pull request #38944 from rallytime/merge-2016.11
  - ee33a53a64 Merge branch '2016.3' into '2016.11'
    - b5df104fc2 Merge pull request #38875 from terminalmage/issue36121
      - fbc4d2a2c4 reactor: ensure glob_ref is a string
        - 2e443d79a3 cp.cache_file: add note re: return for nonexistant salt:// path
    - e9ebec4d80 Merge pull request #38890 from cro/vmware_reset_vm_20163
      - 0146562fb4 Call correct function for resetting a VM
    - c3bfcf231 Merge pull request #38883 from techhat/dontrequire
      - 67bc4d6687 Don't require text_out path to exist
    - 6430a45196 Merge pull request #38851 from terminalmage/docker-py-2.0
      - 3c061b21fe Support docker-py 2.0 in dockerng
• ac8008d843 Merge pull request #38844 from cachedout/http_memory_leak
  • c46bf85518 Fix memory leak in HTTP client
• dfe6de963 Merge pull request #38823 from gtmanfred/2016.3
  • f0a71e8707 pass pillar to compound matcher in match module
• a04ab86da1 Merge pull request #38833 from Ch3LL/add_release_notes_2016.3.5
• 374dc1ab88 skip 2016.3.5 due to :doc: references
• 31f324c4ff add 2016.3.5 changelog to release notes

• ISSUE #38753: (alexbleotu) __proxy__ dunder is not injected when invoking the salt variable in sls files (refs: #38899, #38900, #38829)
• ISSUE #38557: (alexbleotu) Proxy not working on develop (refs: #38829)
• ISSUE #38265: (mirceaulinic) __utils__ object not available in proxy module (refs: #38899, #38900, #38829)
• ISSUE #32918: (mirceaulinic) Proxy minions reconnection (refs: #38829)
• PR #38900: (cro) Enable __proxy__ availability in states, highstate, and utils. Enable __utils__ for proxies. @ 2017-01-25 19:36:48 UTC
  • PR #38899: (cro) Enable __proxy__ availability in states, highstate, and utils. Enable __utils__ for proxies. (refs: #38900)

  • PR #37864: (mirceaulinic) Proxy keepalive feature (refs: #38829)
  • bd4889ac73 Merge pull request #38900 from cro/px_dunder_201611
  • 9a86fdda1 Remove extra call to salt.loader.utils.
  • f4ba89735c Resolve merge conflict
• PR #38918: (thatch45) Thorium typos @ 2017-01-25 19:00:40 UTC
  • f4b8798b6 Merge pull request #38918 from thatch45/thorium_typos
  • 0b4aca9145 fix some minor typos in the thorium docs
  • 58a18e2b58 Add test= True to the master so that thorium does not stack trace
• ISSUE #38543: (amendlik) salt --subset returns wrong number of minions (refs: #38919)
• PR #38919: (cachedout) Correctly pass subset to cmd_subset @ 2017-01-25 18:59:16 UTC
  • 32fbb945b7 Merge pull request #38919 from cachedout/issue_38543
  • a555de7c56 Correctly pass subset to cmd_subset
• PR #38922: (twangboy) Fix 64bit detection, vcredist only on <= 2008 @ 2017-01-25 18:47:41 UTC
  • 6b3c738bdf Merge pull request #38922 from twangboy/fix_vcredist
  • 214e1cc598 Fix 64bit detection, vcredist only on <= 2008
• ISSUE #38371: (syphernl) [2016.11.1] Scheduled highstates not returning to master (refs: #38923)
• PR #38923: (DmitryKuzmenko) Fixed broken __schedule_return handler. @ 2017-01-25 18:45:30 UTC
  • PR #36202: (hu-dabao) for 36049, log current connected master and make status module more useful and efficient (refs: #38923)
  • 954658523b Merge pull request #38923 from DSRCorporation/bugs/38371_fix_schedule_return
- b18f675486 Fixed broken __schedule_return handler.

- **PR #38927**: (l2ol33rt) Adding explicit install of python-systemd in jessie-backports on Debian Guide @ 2017-01-25 18:21:18 UTC
  - 828e9bd8f9 Merge pull request #38927 from l2ol33rt/debian_doc_fix
  - 9cc9c6110d Adding explicit call to python-systemd in jessie-backports

- **ISSUE #37413**: (Snarfingcode666) Salt-cloud vmware missing reboot command (refs: #38890, #38887, #38889)
  - **PR #38889**: (cro) Backport #38887 to 2016.11: Call correct function for resetting a VM @ 2017-01-24 15:20:29 UTC
    - **PR #3887**: (cro) Enable resetting a VM via salt-cloud & VMware driver (refs: #38890, #38889)
    - 5ff5e97598 Merge pull request #38889 from cro/vmware_reset_vm_201611
    - 76a9920a6b Call correct function for resetting a VM

- **PR #38891**: (UtahDave) Proper function parameter default @ 2017-01-24 15:06:09 UTC
  - 53d0aa8855 Merge pull request #38891 from UtahDave/fix_cassandra_protocol_version
  - c475609683 Proper function parameter default

- **PR #38904**: (terminalmage) Add top file merging docs to the master config file documentation @ 2017-01-24 14:59:26 UTC
  - c680e3174 Merge pull request #38904 from terminalmage/docs
  - 42a3652620 Add top file merging docs to the master config file documentation

- **PR #38885**: (meaksh) Increasing timeouts for running integrations tests @ 2017-01-23 18:59:50 UTC
  - 41a3055213 Merge pull request #38885 from meaksh/2016.11-fix-tests-issues
  - 4311b0b6de Increasing timeouts for running integrations tests

- **PR #38639**: (ismb) Isbm disable custom roster for api 2016.11 @ 2017-01-23 18:59:11 UTC
  - bde6d3ee7 Merge pull request #38639 from isbm/isbm-disable-custom-roster-for-api-2016.11
  - ffbd45062e Explain what it is about and how to configure that

### 30.2.61 Salt 2016.11.4 Release Notes

Version 2016.11.4 is a bugfix release for **2016.11.0**.

---

**30.2. Previous Releases** 5035
AIX Support Expanded

AIX support has been added for the following execution modules:

- user
- group
- network
- status
- timezone

Additionally, AIX is now supported in the `disk.iostat` remote-execution function, and the `status` beacon is now supported.

Minion Data Cache Enhancement

Memcache is now supported as a data store for the minion data cache.

Memcache is an additional cache layer that keeps a limited amount of data fetched from the minion data cache for a limited period of time in memory that makes cache operations faster. It doesn't make much sense for the `localfs` cache driver but helps for more complex drivers like `consul`.

For more details see `memcache_expire_seconds` and other `memcache_*` options in the master config reference.

Docker Fixes

- Docker authentication has been re-organized. Instead of attempting a login for each push/pull (which was unnecessary), a new function called `dockerng.login` has been added, which authenticates to the registry and adds the credential token to the `~/.docker/config.json`. After upgrading, if you have not already performed a `docker login` on the minion using the docker CLI, you will need to run `dockerng.login` to login. This only needs to be done once.

- A bug in resolving the tag name for images in a custom registry (where a colon can appear in the image name, e.g. `myregistry.com:5000/image:tagname`) has been fixed. In previous releases, Salt would use the colon to separate the tag name from the image name, and if there was no colon, the default tag name of `latest` would be assumed. However, this caused custom registry images to be misidentified when no explicit tag name was passed (e.g. `myregistry.com:5000/image`). To work around this in earlier releases, simply specify the tag name.

Salt-Cloud Fixes

2016.11.0 added support for templating userdata files for the `ec2` driver, using the `renderer` option from the master config file. However, as the default renderer first evaluates jinja templating, followed by loading the data as a YAML dictionary, this results in unpredictable results when userdata files are comprised of non-YAML data (which they generally are).

2016.11.4 fixes this by only templating the `userdata_file` when it is explicitly configured to do so. This is done by adding a new optional parameter to the cloud profile called `userdata_template`. This option is used in the same way as the `template` argument in `file.managed` states, it is simply set to the desired templating renderer:
my-ec2-config:
    # Pass userdata to the instance to be created
    userdata_file: /etc/salt/my-userdata-file
    userdata_template: jinja

If no `userdata_template` option is set in the cloud profile, then salt-cloud will check for the presence of the master configuration parameter `userdata_renderer`. If this is also not set, then no templating will be performed on the `userdata_file`.

In addition, the other cloud drivers which support setting a `userdata_file` (azurearm, nova, and openstack) have had templating support added to bring them to feature parity with the ec2 driver’s implementation of the `userdata_file` option.

Changelog for v2016.11.3..v2016.11.4

- **PR #40708**: (Ch3LL) Add 2016.11.4 Release Note ChangeLog @ 2017-04-14 22:12:57 UTC
  - e5cd6086a7 Merge pull request #40708 from Ch3LL/2016.11.4_release
  - d228b6ee02 Add 2016.11.4 Release Note ChangeLog
- **PR #40685**: (Ch3LL) Fix errno code for filecache test for other operating systems. @ 2017-04-14 16:54:25 UTC
  - 7702ba6c4e Merge pull request #40685 from Ch3LL/fix_mac_file
  - 9ea6e8b456 remove io and change to EROFS
  - 688791ff60 remove try-except and change errno
  - e30af4c01 add exception type
  - acf33df08 change errno code for fileclient test
- **ISSUE #40688**: (jbadson) Syslog returner does not work with Python 2.6 (refs: #40689)
- **PR #40689**: (jbadson) Fixes bug that prevents syslog returner from working under Python 2.6 @ 2017-04-14 10:45:13 UTC
  - bc70772f9d Merge pull request #40689 from jbadson/fix-syslog-returner
  - e5a3a7d217 Fixes bug that prevents syslog returner from working under Python 2.6
- **ISSUE #40658**: (sebw) State tomcat.war_deployed regression when WAR filename contains version (refs: #40690)
- **PR #40690**: (thor) Fixes #40658: even clearer and working(!) Tomcat version handling @ 2017-04-14 10:44:02 UTC
  - 983d35ad38 Merge pull request #40690 from thor/2016.11-tomcat
  - 09145ea1a5 Fixes unindexed strfmt curly braces for python 2.6
  - b78fc46b91 Fixes #40658: clearer version handling
- **PR #40686**: (twangboy) Fix ’salt-minion’ service for Win 10 Creators Update 1703 @ 2017-04-13 20:00:12 UTC
  - 3cd9a50b22 Merge pull request #40686 from twangboy/fix_service
  - b6ac4aa86d Fix service for win10 update
- **PR #40675**: (gtmanfred) use loader for getting war version @ 2017-04-13 19:58:30 UTC
  - ad4d6839fd Merge pull request #40675 from gtmanfred/2016.11

30.2. Previous Releases
- a61fc824c4 use loader for war extraction

- **ISSUE #38497**: (chrisLeeTW) local_batch client ignore external auth (refs: #40598)

- **PR #40680**: (rallytime) Back-port #40598 to 2016.11 @ 2017-04-13 19:58:16 UTC
  - **PR #40598**: (mchugh19) Ensure batch uses passed eauth token or credentials (refs: #40680)
  - 7ea526f59e Merge pull request #40680 from rallytime/bp-40598
  - cc1643eb1f Fix netapi lint
  - e790930f5a re-add batch support to cherrypy saltapi
  - 6ee04b2db pop out of kwargs
  - 260dd84758 Create eauth dict for passing into batch class
  - 5fb190d44 Ensure batch uses passed eauth token or credentials

- **PR #40681**: (cachedout) Allow status beacon to run on all operating systems @ 2017-04-13 19:33:10 UTC
  - db68df23dd Merge pull request #40681 from cachedout/status Beacon
  - ecbb01d86f Allow status beacon to run on all operating systems

- **PR #40678**: (Ch3LL) fix test fstype test for mac @ 2017-04-13 19:20:32 UTC
  - 39dd6e284d Merge pull request #40678 from Ch3LL/fstx_fstype
  - 60724980ec fix test fstype test for mac

- **PR #40665**: (rallytime) Back-port #35665 to 2016.11 @ 2017-04-12 21:06:36 UTC
  - **PR #35665**: (sthrasher) Speed up /jobs for salt-api when run under cherrypy. (refs: #40665)
  - 6d766f687 Merge pull request #40665 from rallytime/bp-35665
  - 0f897b2426 Switch from comprehension to logic used in jobs runner. This makes it easier to deal with potential unicode in returns.
  - 78dd629f09 Fix compat issues with /jobs return values.
  - 4778bc7365 Speed up /jobs for salt-api when run under cherrypy.

- **PR #40666**: (gtmanfred) make sure userdata is always defined in ec2 @ 2017-04-12 21:06:00 UTC
  - 3e41a248a5 Merge pull request #40666 from gtmanfred/userdata
  - 5e92d0948 make sure userdata is always defined in ec2

- **PR #40662**: (twangboy) Backport msi-conformant-version function @ 2017-04-12 18:49:23 UTC
  - b245abbde5 Merge pull request #40662 from twangboy/backport_msi_versioning
  - 825832812b Backport msi-conformant-version function

- **ISSUE #39868**: (amontalban) archive.extracted issue when source_hash_update=True and extracted files does not exist (refs: #40551)

- **PR #40551**: (terminalmage) Fix four issues in archive.extracted state @ 2017-04-12 18:37:52 UTC
  - 92b5f03beb Merge pull request #40551 from terminalmage/issue39868
  - a722ca9ccf archive.extracted: also cleanup fileclient's cached location
  - 5ea1f607b0 Fix mocking in unit tests
  - 8df51f31f Moar fixes for source_hash_update
  - 710370d49 Remove unnecessary versionadded lines
- a717881f53 Just get a hash for the source archive
- 9da4eb18bf Check hash of cached source against source_hash before downloading archive
- ad24faa59d Fix three issues in archive.extracted state

- **PR #40637**: (twangboy) Add unicode_literals import @ 2017-04-12 16:55:03 UTC
  - 0638418d22 Merge pull request #40637 from twangboy/fix_unicode_issues
  - 021783dbae Add unicode_literals import

- **PR #40651**: (twangboy) Fix status.diskusage for Windows on Py3 @ 2017-04-12 16:21:29 UTC
  - 491661f323 Merge pull request #40651 from twangboy/fix_diskusage_py3
  - 7c5079ec91 Correct capitalization problem with api call

- **ISSUE #40624**: (sumeetisp) Issue - grains.append (refs: #40631)

- **PR #40631**: (gtmanfred) if grain is defined as None still convert in append @ 2017-04-12 16:19:16 UTC
  - 3aabdb5e53 Merge pull request #40631 from gtmanfred/grains
  - b0bd9b26d add comment and unit test
  - b21b7628f if grain is defined as None still convert in append

- **PR #40629**: (aabognah) Fixing issue # 40167 @ 2017-04-11 22:45:08 UTC
  - 3737289bee Merge pull request #40629 from aabognah/fix-bug-40167
  - 28ff774cb6 Fixing issue # 40167 with file.replace where the diff output does not display correctly.

- **PR #40646**: (twangboy) Keep network.py execution module @ 2017-04-11 22:03:02 UTC
  - 2a22bea290 Merge pull request #40646 from twangboy/fix_win_network
  - 0f7a8cd34 Keep network.py execution module

- **PR #40645**: (rallytime) [2016.11] Merge forward from 2016.3 to 2016.11 @ 2017-04-11 20:59:13 UTC
  - e1f5a5dfc3 Merge pull request #40645 from rallytime/merge-2016.11
  - 8d6497933 Merge branch '2016.3' into '2016.11'
    - 2ae9ea176e Merge pull request #40638 from rallytime/bp-40571
      - 2d1e4be2df pkgrepo.managed: properly handle comments for debian

- **ISSUE #40594**: (anlutro) salt-ssh file.recurse adds a lot of unwanted directories (refs: #40642)

- **ISSUE #38458**: (duk3luk3) salt-ssh uses sudo to create cache dir, later fails to access it (refs: #40442)

- **PR #40462**: (DmitryKuzmenko) Correctly resolve relative cache path to absolute. @ 2017-04-11 20:43:57 UTC
  - PR #40442: (gtmanfred) allow file_client to figure out cachedir (refs: #40642)
  - 6c6ae3e9c14 Merge pull request #40642 from DSRCorporation/bugs/40594_ssh_cacherdird
  - 055256c518 Correctly resolve relative cache path to absolute.

- **ISSUE #40075**: (afletch) salt-ssh temporary files - insecure permissions (refs: #40609)

- **PR #40609**: (gtmanfred) stat_file when keep is set, instead of mirroring all file permissions @ 2017-04-11 18:48:47 UTC
  - 8492ce7a5 Merge pull request #40609 from gtmanfred/2016.11
- 6e34c2b5e5 stat file when placing it on server instead of caching

- **PR #40620:** (mateiw) SUSE specific changes to salt-api.service @ 2017-04-11 14:45:00 UTC
  - 05ac613ecf Merge pull request #40620 from mateiw/2016.11-suse-saltapi-service
  - ee91a74b4 suse specific changes to salt-api.service

- **ISSUE #39463:** (githubcdr) Transport TCP minions don’t reconnect/recover (refs: #40614)

- **PR #40614:** (gtmanfred) add retries on authentications of the salt minion reconnecting @ 2017-04-10 22:42:16 UTC
  - b0a2414d68 Merge pull request #40614 from gtmanfred/tcp
  - a86b101ae6 suse retries on authentications of the salt minion reconnecting

- **PR #40606:** (kaszuba) Use correct exec_driver in dockerng.sls module @ 2017-04-10 22:25:31 UTC
  - 7fe121a9ee Merge pull request #40606 from kaszuba/fix-dockerng-sls
  - 3a0d61f108 Use correct exec_driver in dockerng.sls module

- **ISSUE #39863:** (daswathn) Salt-Master not responding when the list of minions are high after upgrade to 2016.11.2 (refs: #40615)

- **PR #40615:** (rallytime) Call out to _pki_minions() once, rather than in a loop in _check_list_minions() @ 2017-04-10 22:22:18 UTC
  - **PR #34920:** (cachedout) Key cache (refs: #40615)
  - b6c948afe Merge pull request #40615 from rallytime/fix-39863
  - 1a9f03ab92 Call out to _pki_minions() once, rather than in a loop in _check_list_minions()

- **PR #40588:** (rallytime) [2016.11] Merge forward from 2016.3 to 2016.11 @ 2017-04-07 19:30:14 UTC
  - 4fa58be22 Merge pull request #40588 from rallytime/merge-2016.11
  - 5a419b8aae Merge branch '2016.3' into '2016.11'
  - 83f6d3d9bb Merge pull request #40567 from terminalmage/fix-pillar-get-merge-lists
    - cb4db56eb5 Allow pillar.get to merge list as well as dictionaries
    - a8304cd5a1 Merge pull request #40552 from terminalmage/fix-hash-type-refs
      - 8c61f333ae Don't use __opts__.get() for hash_type
    - 705e1d8a08 Merge pull request #4056 from terminalmage/fix-get-client
      - 7f1ef72f83 Fix dockerng _get_client() regression
    - 00f8ef0c55 Merge pull request #40548 from Ch3LL/fixed_vultrpy
      - 771035553a check for salt install fail on vultur test
      - aae3d14e4 fix vultr cloud race condition to match on 0

- **PR #40575:** (rallytime) Back-port #40559 to 2016.11 @ 2017-04-07 15:42:26 UTC
  - **PR #40559:** (jinn) Fix v3 for https://github.com/saltstack/salt/issues/38472 (refs: #40575)
  - 3d07f637ca Merge pull request #40575 from rallytime/bp-40559
  - 8280e5256e Merge pull request #40562 from https://github.com/saltstack/salt/issues/38472

- **PR #40576:** (rallytime) Back-port #40573 to 2016.11 @ 2017-04-07 15:20:11 UTC
  - **PR #40573:** (ardakuyumcu) Fix typo in IAM state for managed policies (refs: #40576)
- 9041ca2ba5 Merge pull request #40576 from ralltime/bp-40573
- 12180808ee Fix typo in IAM state for managed policies

- **PR #40563**: (terminalmage) Merge-forward 2016.3 -> 2016.11 @ 2017-04-07 15:08:20 UTC
  - **PR #40562**: (terminalmage) Fix dockerng _get_client() regression (refs: #40563)
  - **PR #40481**: (terminalmage) Backport auth and custom registry fixes from #40480 to 2016.3 branch (refs: #40563, #40562)
  - **PR #40480**: (terminalmage) Improved Docker auth handling and other misc. Docker improvements (refs: #40481)
- f8bc423ef9 Merge pull request #40563 from terminalmage/merge-2016.3-2016.11
- 0c608d7417 Add client_args_mock back to test
- a7a78da984 remove unused imports
- a6d8f50fe Merge remote-tracking branch 'upstream/2016.3' into merge-2016.3-2016.11
  * 0918311330 Don't mark files that already were deleted as errors
  * 51d88a16c8 Merge branch 'zer0def-fix-31363' into 2016.3
    - 7f3cb5cf9 Merge branch 'fix-31363' of https://github.com/zer0def/salt into zer0def-fix-31363
    - 3c750c2b4 Changed rm_rf's argument to actually remove intended file. (refs #31363)
    - 9ed85f3c59 Remove directory content instead of directory itself when using force_clone in git.latest state. (refs #31363)
  - cfba4cb422 Merge pull request #40534 from terminalmage/issue39892
    * ad88c58a09 Check master's ssh_minion_opts for fileserver/pillar values and ignore them
  - 8da27c9e1d Merge pull request #40306 from terminalmage/issue40279
    * 57ace1f336 Merge branch 'issue40279' of https://github.com/terminalmage/salt into issue40279
    * 8b2cd1a761 Remove unused import for lint
    * 808ad7e419 systemd.py: when getting all services, don't repeat gathering of systemd services
    * 2d219af67a Don't use context caching for gathering systemd services
  - 97caac4c0a Merge pull request #40481 from terminalmage/docker-auth-handling-2016.3
    * dce50ed44b Make sure we keep the cached client when clearing context
    * 1e2a04cf5c Backport auth and custom registry fixes from #40480 to 2016.3 branch
  - e62603d5eb Merge pull request #40505 from gtmanfred/2016.3
    * 6e2f9080ca update docs for logging handlers

- **ISSUE #39778**: (Talkless) pkgrepo.managed state always report changes with test=True on APT system (refs: #40571)
- **PR #40571**: (terminalmage) pkgrepo.managed: properly handle comments for debian (refs: #40638) @ 2017-04-06 21:55:46 UTC
  - fd757f8fa3 Merge pull request #40571 from terminalmage/issue39778
  - 191610482d pkgrepo.managed: properly handle comments for debian

30.2. Previous Releases 5041
• **ISSUE #40278**: (UtahDave) cloud.action giving errors on 2016.11.1 (refs: #40572)

• **PR #40572**: (rallytime) Clean out kwargs dict in cloud.action before calling cloud driver function @ 2017-04-06 21:53:40 UTC
  
  - b1698e830e Merge pull request #40572 from rallytime/fix-40278
  
  - c978466452 Clean out kwargs dict in cloud.action before calling cloud driver function

• **ISSUE #39842**: (smarsching) File module removes trailing newline on Windows (refs: #39882)

• **PR #39882**: (smarsching) Fix handling of trailing newlines on Windows @ 2017-04-06 21:12:24 UTC
  
  - 62d8ad2ba Merge pull request #39882 from smarsching/issue-39842
  
  - d485d1af44 Fix context for _splitlines_preserving_trailing_newline.
  
  - 76cb7f612 Fix trailing newlines on Windows (#39842).

• **PR #40451**: (isbm) Fileclient testcase (2016.11) @ 2017-04-06 19:53:31 UTC
  
  - ae13de62a Merge pull request #40451 from isbm/isbm-fileclient-testcase-2016.11
  
  - 74c65557dd Add space before in-lint comment for lint
  
  - 35fcb8b52d Fix race condition on cache directory creation
  
  - aba94495a5 lintfix (Py3 code compat)
  
  - 9f9dc6e47 Add unit test case for fileclient

• **ISSUE #40084**: (podstava) profile fields in azurearm salt-cloud need to be actualized to sources (refs: #40564)

• **PR #40564**: (techhat) Update Azure ARM docs @ 2017-04-06 18:17:32 UTC
  
  - 74366c57a Add space before in-lint comment for lint
  
  - 08d071bc68 Update Azure ARM docs

• **ISSUE #40005**: (vutny) ssh_known_hosts.present does not support SHA256 key fingerprints (refs: #40543)

• **PR #40543**: (rallytime) Add the "fingerprint_hash_type" option to ssh state and module @ 2017-04-05 21:21:16 UTC
  
  - cb9dcb1e1b Merge pull request #40543 from rallytime/fix-40005
  
  - 1ef816a55 Add the "fingerprint_hash_type" option to ssh state and module

• **PR #40450**: (DmitryKuzmenko) A quick fix for Cache has no 'list' attribute. @ 2017-04-05 18:50:18 UTC
  
  - PR #40494: (rallytime) [develop] Merge forward from 2016.11 to develop (refs: #40540)
  
  - 30695575a Merge pull request #40450 from DSRCorporation/bugs/40494_merge_forward_cache_list_fix
  
  - 0c0f5634cf A quick fix for Cache has no 'list' attribute.

• **ISSUE #32662**: (anlutro) salt-cloud: allow templating of EC2 userdata, similar to deploy script (refs: #32698)

• **PR #40464**: (terminalmage) salt-cloud: Do not pass userdata_file through yaml renderer @ 2017-04-05 17:32:07 UTC
  
  - PR #32698: (techhat) Allow EC2 userdata to be templated (refs: #40464)
  
  - 28fc048030 Merge pull request #40464 from terminalmage/userdata-renderer
  
  - 84e6e93006 Nova and openstack don’t accept base64-encoded userdata
  
  - 73f4c43e2a Allow for userdata_template to be disabled in a cloud_profile
  
  - 78b47981b Update compile_template test to use StringIO
- 5f7c5613ce Properly handle renderers which return StringIO objects
- d551b0d857 Bring in salt.utils.stringio from develop branch
- 6a6ef0ad8f Move userdata templating to salt.utils.cloud
- b440d0c679 Update 2016.11.4 release notes for userdata_renderer -> userdata_template
- a6183d93d3 Preserve windows newlines in salt.template.compile_template()
- 04f02df5fe Try to read compiled template as StringIO
- 79cc253bbf Only template the userdata_file if explicitly configured to do so
- b58065f85 Update cloud docs to reflect userdata_renderer -> userdata_template
- a6064b2e4 Rename userdata_renderer -> userdata_template in master config docs
- 50f2b2831f Remove userdata_renderer value
- cc2186f35a Add templating support for other cloud drivers that support userdata_file
- be8d34c59b ec2: Add support for using userdata_renderer to template userdata_file
- eddbd41265 Openstack did not have templating support for userdata_file before 2016.11.4
- a85a416c72 Add userdata_renderer fix info to 2016.11.4 release notes
- 111188742a Add documentation for userdata_renderer
- 9ee2d24c2d Add userdata_renderer master config param

- **PR #40530**: (dmurphy18) Update release information for 2016.11.4 for additional AIX support @ 2017-04-05 16:20:22 UTC
  - 990bde4c07 Merge pull request #40530 from dmurphy18/aix_docupd
  - fd93caf206 Added further support for functionality on AIX for 2016.11.4
  - 17b58917f2 Update release information for new AIX support

- **PR #40528**: (dmurphy18) Allow for nightly build designations in Salt versions @ 2017-04-04 20:34:26 UTC
  - 4d932691f1 Merge pull request #40528 from dmurphy18/salt_nightlybuild
  - d62a119fc1 Allow for nightly build designations in Salt versions

- **ISSUE #37699**: (gstachowiak) Artifactory state. Incorrect timeout error reporting. (refs: #40465)
  - PR #40465: (rallytime) Artifactory Execution & State Module: Fixup Error Handling @ 2017-04-04 20:12:21 UTC
    - 0ed385210f Merge pull request #40465 from rallytime/fixed-37699
    - 8f084f7056 Update unit test to look for actual string comment
    - ef664b46ae Artifactory State: Only wrap main function call to module in try/except and wrap exc comment in str()
    - f1015e3900 Artifactory Module: catch URLErrors as well as HTTPErrors

- **ISSUE #39275**: (yhekma) Cache backend gets hit a lot (refs: #40497, #40429)
  - PR #40497: (DmitryKuzmenko) Memcache documentation and minor updates. @ 2017-04-04 19:55:18 UTC
    - PR #40429: (DmitryKuzmenko) MemCache - a minion data cache booster. (refs: #40497, #40468)
    - 7a04ed2439 Merge pull request #40497 from DSRCorporation/features/39275_memcache
    - 82c45b1a52 Memcache documentation and minor updates.
• ISSUE #38683: (gstachowiak) require/order/failhard combination error (refs: #40504)

• PR #40504: (rallytime) Group checks for failhard setting in () in state.check_failhard function @ 2017-04-04 19:53:48 UTC

  - f8b3006898 Fix boto_vpc.create_route() to work with interface_id

• ISSUE #39275: (yhekma) Cache backend gets hit a lot (refs: #40497, #40429)

• PR #40468: (techhat) Add __func_alias__ back in @ 2017-04-04 17:02:43 UTC
  - PR #40429: (DmitryKuzmenko) MemCache - a minion data cache booster. (refs: #40497, #40468)
  - 3eb80baf1 Merge pull request #40468 from techhat/cachealias
  - 6ec0baa9a0 Swap around aliases
  - 76e54a2900 Add __func_alias__ back in

• ISSUE #29104: (adithep) Merging Order warning (refs: #39109)

• PR #39109: (bdrung) Fix top_file_merging_strategy warning if env_order is set @ 2017-04-04 14:20:56 UTC
  - 8c0befaa8b Merge pull request #39109 from bdrung/fix-merge-order-warning
  - fb8fca98 Simplify __get_envs() by using list comprehensions
  - 74a3b066ea Fix top_file_merging_strategy warning if env_order is set
  - ec219b5f42 Remove duplicate client_envs variable definitions
  - 6279fc120 fix do to pre correct on python randome function
  - 66b9515af7 Fix up the doc for failover clarity

• PR #40495: (rallytime) [2016.11] Merge forward from 2016.3 to 2016.11 @ 2017-04-03 18:36:16 UTC
  - 02a1f642ab Merge pull request #40495 from rallytime/merge-2016.11
  - 8111909bb1 Merge branch '2016.3' into '2016.11'
- 3d45a004b0 Merge pull request #40427 from terminalmage/clarify-master-tops-docs
  - bda781d8f9 Grammar fix
  - 0d7b0c4ef0 Improve the master_tops documentation
  - d2734a9f2 Add saltutil.sync_tops runner func
- **PR #40466**: (dmurphy18) Support for execution module status on AIX @ 2017-04-01 00:28:51 UTC
  - ac82972cb8 Merge pull request #40466 from dmurphy18/aix_status
  - 7c0b30d9a4 Support for AIX
- **ISSUE #39275**: (yhekma) Cache backend gets hit a lot (refs: #40497, #40429)
- **PR #40429**: (DmitryKuzmenko) MemCache - a minion data cache booster. (refs: #40497, #40468) @ 2017-03-31 20:21:00 UTC
  - fdb0250c95 Merge pull request #40429 from DSRCorporation/features/39275_memcache
  - 4475d1757d In-memory minion data cache.
- **ISSUE #38458**: (duk3luk3) salt-ssh uses sudo to create cache dir, later fails to access it (refs: #40442)
- **PR #40442**: (gtmanfred) allow file_client to figure out cachedir (refs: #40642) @ 2017-03-31 20:14:27 UTC
  - 31d4e6949c Merge pull request #40442 from gtmanfred/salt-ssh
  - 8367735063 allow file_client to figure out cachedir
- **PR #40456**: (rallytime) [2016.11] Merge forward from 2016.3 to 2016.11 @ 2017-03-31 17:51:11 UTC
  - 0cfcd188a9 Merge pull request #40456 from rallytime/merge-2016.11
  - 0da4c46b68 Merge branch '2016.3' into '2016.11'
  - c26f4cc76c Merge pull request #40371 from terminalmage/pr-40344
    - a8bcaaa7d7 Force use of posixpath when joining salt fileserver paths in gitfs
    - cafa08d8e0 Add ability for salt.utils.path_join to force the use of posixpath
  - df9df82959 Merge pull request #40379 from rallytime/tests-for-39855
    - 96259d6c63 Lint fix
    - 4f7ac1431e Create a unit test for the _replace_auth_key function in the ssh module
- **PR #40443**: (gtmanfred) prepend ssh_log_file with root_dir @ 2017-03-31 09:23:46 UTC
  - 8617be9c6d Merge pull request #40443 from gtmanfred/sshlog
  - 7f6046dec3 prepend ssh_log_file with root_dir
- **PR #40376**: (nmandhok) Backporting changes in vmware cloud driver from develop branch to 2016.11 branch @ 2017-03-30 22:35:13 UTC
  - 132d8b7888 Merge pull request #40376 from nmandhok/2016.11
  - dd62310941 Adding unit tests for vmware_test
  - 36edf0af64 Add additional VMware related exceptions
  - 034ef307c Remove old vmware unit tests
  - 7c144888da Backporting changes in vmware cloud driver from develop branch to 2016.11 branch
- **ISSUE #39692**: (djsly) tuned module and state are broken on 7.3 families. (refs: #40387, #39719, #39768)
- **PR #40387**: (redbaron4) More complete fix for 39692 @ 2017-03-30 22:29:05 UTC
- dfaa67b66 Merge pull request #40387 from redbaron4/fix-39692
- 77a40a0c44 Lint fixes
- 8c1dafad5 More complete fix for 39692

- **ISSUE #7287:** (dragozov) django.loaddata treats fixture list as arguments and prepends "--" for each (refs: #40404)

- **PR #40404:** (roaldnefs) Fix for fixtures in the djangomod module @ 2017-03-30 22:26:09 UTC
  - 313d21626f Merge pull request #40404 from roaldnefs/fix-djangomod-loaddata
  - 92285cb045 Fix for fixtures in the djangomod module

- **PR #40416:** (loregordon) Adds some missing file functions on Windows @ 2017-03-30 22:22:44 UTC
  - 5379899442 Merge pull request #40416 from lorengordon/win-file-funcs
  - 8edaf25e10 Adds some missing file functions on Windows

- **ISSUE #40417:** (loregordon) temp.file does not close the file handle (refs: #40418)

- **PR #40418:** (loregordon) Closes handle to temporary file before returning the path @ 2017-03-30 22:22:03 UTC
  - 1f5d688f9 Merge pull request #40418 from lorengordon/close-temp-file
  - 7ba2809cf Closes handle to temporary file before returning the path

- **PR #40430:** (twangboy) Fix logic for __virtual__ in win_dsc and win_psget @ 2017-03-30 22:06:16 UTC
  - 5c78d58eab Merge pull request #40430 from twangboy/fix_virtual
  - 08e95e4f0 Add logging on __virtual__ failures
  - 43ecb1a197 Fix logic for __virtual__

- **PR #40431:** (rallytime) [2016.11] Merge forward from 2016.3 to 2016.11 @ 2017-03-30 21:37:39 UTC
  - b85f29928 Merge pull request #40431 from rallytime/merge-2016.11
  - d5576d75e7 Merge branch '2016.3' into '2016.11'
  - b677af691f Merge pull request #40407 from aesdana/fix_rabbitmq_version_check
    - 4e0763fa2f Added split to cut off debian_revision from rabbitmq-server version Fixes #40396
  - d4fb45d9f8 Merge pull request #40424 from terminalmage/fix-open-filehandle
    - 6d52163cf Fix open filehandles
  - 8708096365 Merge pull request #40399 from terminalmage/docker-py_version
    - 14c6575555 Add docker-py version to the versions report
  - ff126eb3a6 Merge pull request #40391 from Ch3LL/2016.3.7_release_notes
    - f532ec5288 initial 2016.3.7 release notes
  - 96bf9427b0 Merge pull request #40368 from Ch3LL/bump_version_3
    - a02fa7d1ff [2016.3] Bump previous version to 2016.3.6

- **PR #40401:** (roaldnefs) fix Ubuntu notation in docs/faq.rst @ 2017-03-29 20:28:31 UTC
  - 7d900d31ea Merge pull request #40401 from roaldnefs/fix-doc-faq
  - 21f161fecc fix Ubuntu notation in docs/faq.rst

- **ISSUE #29028:** (kevins9) state.sls fails to render state with pillar data: Jinja variable ‘dict object’ has no attribute (refs: #37795)
• PR #40390: (rallytime) Back-port #37795 to 2016.11 @ 2017-03-29 19:05:12 UTC
  - PR #37795: (jettero) please tell me where is the "error: 'dict' object has no ...") (refs: #40390)
  - 70a3f963ec Merge pull request #40390 from rallytime/bp-37795
  - 1ba15577bd Pylint fix
  - ec65924659 please tell me where is the "error: 'dict' object has no attribute 'seek'" ?

• PR #40395: (rallytime) Handle AttributeError for dockerng_mod.docker attempt fails and docker is installed @ 2017-03-29 17:47:11 UTC
  - f8fbff7dc Merge pull request #40395 from rallytime/catch-attribute-error-docker-test
  - 99c8d6c18e Handle AttributeError for dockerng_mod.docker attempt fails and docker is installed

• PR #40362: (rallytime) [2016.11] Merge forward from 2016.3 to 2016.11 @ 2017-03-28 22:50:32 UTC
  - d763d6b035 Merge pull request #40362 from rallytime/merge-2016.11
  - 4f1543c2a1 Merge branch '2016.3' into '2016.11'
    - 1381f97292 Merge pull request #40264 from meaksh/2016.3-gather_job_timeout-fix
      - 6dca5eb4 Makes sure "gather_job_timeout" is an integer

• PR #40372: (zer0def) Fixes related to cache directory argument changes in pip>=6. @ 2017-03-28 22:48:41 UTC
  - 2febd05896 Merge pull request #40372 from zer0def/pip-cache-fixes
  - d6b07f1d7 Merge remote-tracking branch 'main/2016.11' into pip-cache-fixes
  - 4f23a23ca8 Fixed the \texttt{test\_install\_download\_cache\_argument\_in\_resulting\_command} to accomodate introduced cache directory argument fixes and renamed it to \texttt{test\_install\_download\_cache\_dir\_arguments\_in\_resulting\_command}.

• PR #40369: (Ch3LL) [2016.11] Bump previous version to 2016.3.6 @ 2017-03-28 18:50:39 UTC
  - 6162698c87 Merge pull request #40369 from Ch3LL/bump_version_11
  - 7597d96db [2016.11] Bump previous version to 2016.3.6

• ISSUE #40322: (Whissi) ssh_auth.absent: Wrong comment when test=True (refs: #40333)

• ISSUE #40321: (Whissi) state.alternatives: Wrong comment when test=True (refs: #40333)

• PR #40333: (gtmanfred) fix some test=True comments @ 2017-03-28 16:11:01 UTC
  - 2d2cb5b837 Merge pull request #40333 from gtmanfred/2016.11
  - 5596620db fix some test=True comments

• PR #40347: (rallytime) [2016.11] Merge forward from 2016.3 to 2016.11 @ 2017-03-28 02:39:31 UTC
  - bb37f133fc Merge pull request #40347 from rallytime/merge-2016.11
  - e77e86db3a Merge branch '2016.3' into '2016.11'
  - 17ab1da0ab Merge pull request #40345 from twangboy/fix_osx_build
    - 3207d607c Fix osx build
  - 7ab10491ab Merge pull request #40338 from UtahDave/fix_cherrypy_ssl_error_link
    - 280b501950 Upstream cherrypy moved to Github from Bitbucket
- **PR saltstack/salt#40332**: (zer0def) Fixes related to cache directory argument changes in pip>=6. (refs: #40346)

- **PR #40346**: (cachedout) Revert "Fixes related to cache directory argument changes in pip>=6." @ 2017-03-27 23:17:29 UTC
  - a572b46183 Merge pull request #40346 from saltstack/revert-40332-pip-cache-fixes
  - b4753d1a5a Revert "Fixes related to cache directory argument changes in pip>=6."

- **ISSUE #40296**: (L4rS6) Wrong documentation in mount.mounted (refs: #40326)

- **PR #40326**: (L4rS6) Update mount state documentation (Fixes: #40296) @ 2017-03-27 23:15:53 UTC
  - a91bab867e Merge pull request #40326 from L4rS6/update-mount-state-doc
  - a717c527a1 Update mount state documentation (Fixes: #40296)

- **PR #40328**: (L4rS6) Fixes wrong compared extra_mount_ignore_fs_keys key. @ 2017-03-27 23:14:22 UTC
  - ca2980cfe0 Merge pull request #40328 from L4rS6/fix-mount-state-extra-ignore-fs-key
  - f0f68b9033 Fixes wrong compared extra_mount_ignore_fs_keys key.

- **PR #40329**: (ismb) Merge tops (backport) @ 2017-03-27 23:13:47 UTC
  - 3a6c5d0297 Merge pull request #40329 from isbm/ismb-merge-tops-201611
  - a762c9edda Merge output from master_tops

- **PR #40285**: (rallytime) Dockerng unit tests fixes: isolate global variables @ 2017-03-27 23:05:03 UTC
  - 2b7b2f1c4 Merge pull request #40285 from rallytime/docker-test-fixes
  - 0f263a52e0 Mock out the get_client_args mocks in the dockerng module tests more aggressively
  - f1352fe253 Add one more dockerng.version mock that was missed previously
  - 0d31d2c4d1 Add a couple more patches for docker.version information
  - a9c5eeba0 Clean up dockerng unit tests to avoid global variables and fixup some patching

- **PR #40341**: (twangboy) Fix service.create, fix docs @ 2017-03-27 21:46:19 UTC
  - 01efc842c1 Merge pull request #40341 from twangboy/fix_win_service
  - 6736457ec8 Docs for create
  - 652cf08f8a Fix service.create, fix docs

- **PR #40332**: (zer0def) Fixes related to cache directory argument changes in pip>=6. @ 2017-03-27 21:01:15 UTC
  - 8eabcca6dc Merge pull request #40332 from zer0def/pip-cache-fixes
  - 7976840100 Fixes related to cache directory changes in pip>=6.

- **PR #40337**: (Ch3LL) Add archive.extracted with use_cmd_unzip argument @ 2017-03-27 21:00:23 UTC
  - ceba1b9bc6 Merge pull request #40337 from Ch3LL/add_unzip_test
  - 8b21b4c8bb add use_cmd_unzip test

- **PR #40312**: (rallytime) Update minion data cache documentation @ 2017-03-27 20:56:55 UTC
  - a192597ec2 Merge pull request #40312 from rallytime/cache-docs
  - 53630b5588 Update minion data cache documentation

- **PR #40315**: (rallytime) [2016.11] Merge forward from 2016.3 to 2016.11 @ 2017-03-27 15:11:25 UTC
  - 7f16754619 Merge pull request #40315 from rallytime/merge-2016.11
- c65d602f60 Merge branch '2016.3' into '2016.11'
  - 7c21153d3a Merge pull request #40300 from meaksh/2016.3-adding-timeouts-parameters-to-cmd_batch
    - 9174e6f281 Fixes testing opts dict for batch unit tests
    - b1de79abc6 Adds custom 'timeout' and 'gather_job_timeout' to 'local_batch' client
- PR #40313: (techhat) Add minimum and maximum to calls to calc @ 2017-03-27 14:54:15 UTC
  - a9a73bf8dc Merge pull request #40313 from techhat/calcref
  - 7106a86258 Use named kwargs
- PR #40277: (eldadru) Fixing boto_rds.py delete() wait_for_deletion, if statement was inco... @ 2017-03-24 22:29:25 UTC
  - 9d0762deca Merge pull request #40277 fromeldadru/Fix-40247-boto_rds-delete-wait-for-deletion-failure
  - 3c15a327d64 Fixing boto_rds.py delete() wait_for_deletion, if statement was incorrectly checking the return value of boto_rds.py exists() method.
- PR #40280: (bewing) Clean up temporary file in net.load_template @ 2017-03-24 22:27:04 UTC

  - dd193cc740 Make sure the tornado web server is stopped at the end of the test class

• PR #40158: (rallytime) [2016.11] Merge forward from 2016.3 to 2016.11 @ 2017-03-20 20:35:21 UTC
  - 461e15f0f4 Merge pull request #40158 from rallytime/merge-2016.11
  - 88f3ebd7e9 Remove extra "connect" kwarg caught by linter
  - f4d4768a6d Merge branch '2016.3' into '2016.11'
    * 28e4fc17b6 Merge pull request #40123 from twangboy/win_fix_network
      * 06dfd55ef9 Adds support for inet_pton in Windows to network util
    * 35ddb79f59 Merge pull request #40141 from bobrik/fallback-resolve
      * af1545deed Use the first address if cannot connect to any

• PR #40165: (rallytime) Don't try to run the dockerng unit tests if docker-py is missing @ 2017-03-20 20:33:19 UTC
  - b235f0953f Merge pull request #40165 from rallytime/gate-docker-unit-tests
  - f32da8683 Don't try to run the dockerng unit tests if docker-py is missing

• PR #40085: (mirceaulinic) VRF arg and better doc for ping and traceroute @ 2017-03-20 19:48:57 UTC
  - db9fb58b82 Merge pull request #40085 from cloudflare/fix-ping-tr
  - 6cbb61b54 Strip trailing whitespaces
  - 897a2ac37c3 VRF arg and better doc for ping and traceroute

• PR #40095: (skizunov) dns_check should not try to connect when connect=False @ 2017-03-17 17:31:42 UTC
  - 3bac6f099 Merge pull request #40095 from skizunov/develop2
- `880790f743` `dns_check` should not try to connect when `connect=False`

- **PR #40096**: (skizunov) When building up the `master_uri_list`, do not try to connect @ 2017-03-17 17:13:41 UTC
  - `31da90edd9` Merge pull request #40096 from skizunov/develop3
  - `eb9a06d6d1` When building up the `master_uri_list`, do not try to connect

- **PR #40111**: (eldadru) Fixing simple issue 40081 - the key parameter of the method `create`... @ 2017-03-17 17:00:03 UTC
  - `5303386d93` Merge pull request #40111 from eldadru/fix-issue-40081-boto-rds-create-overwritten-key-parameter
  - `78b5d112d7` Fixing simple issue 40081 - the key parameter of the method `create` overwritten by internal loop.

- **PR #40118**: (rallytime) Add CLI Example for `dockerng.get_client_args` @ 2017-03-17 16:34:13 UTC
  - `d2e376e8f2` Merge pull request #40118 from rallytime/cli-example
  - `bb496bb7f4` Add CLI Example for `dockerng.get_client_args`

- **PR #40097**: (rallytime) [2016.11] Merge forward from 2016.3 to 2016.11 @ 2017-03-17 15:17:08 UTC
  - `baef5009aa` Merge pull request #40097 from rallytime/merge-2016.11
  - `ef1f38f8d` Merge branch '2016.3' into '2016.11'
  - `116201f345` Merge pull request #40059 from terminalmage/fx-virtualenv-traceback
    - `e3cfd29d6b` Fix traceback when `virtualenv.managed` is invoked with nonexistant user
  - `a01b52b9a3` Merge pull request #40090 from rallytime/bp-40056
    - `ae012db87a` update mention bot blacklist
  - `d1570baa4c` Merge pull request #40057 from cachedout/ollie_blacklist
    - `0ac2e83d37` Merge branch '2016.3' into ollie_blacklist
    - `5592c680b5` More mentionbot blacklists

- **ISSUE #39771**: (mirceaulinic) Empty `__proxy__` dunder inside scheduler (refs: #40077)

- **PR #40077**: (mirceaulinic) Fix #39771 (Empty `__proxy__` dunder inside scheduler) @ 2017-03-16 20:56:02 UTC
  - `9ef3e070c2` Merge pull request #40077 from cloudflare/fx-39771
  - `cd319e7e39` Add proxy kwarg to scheduler
  - `c6e6dd1a04` ProxyMinion: correctly build the scheduler

- **PR #40088**: (rallytime) [2016.11] Merge forward from 2016.3 to 2016.11 @ 2017-03-16 19:58:44 UTC
  - `b12720a56f` Merge pull request #40088 from rallytime/merge-2016.11
  - `62bd03885` Merge branch '2016.3' into '2016.11'
  - `d36dbd1a6e` Merge pull request #40070 from Ch3LL/2016.3.6_release
    - `a1f8b49b6d1` update 2016.3.6 release notes with additional PR's
  - `8dce6c7751` Merge pull request #40018 from meaksh/2016.3-handling-timeouts-for-manage.up-runner
    - `9f5c3b7dcd` Allows to set custom timeouts for `manage.up` and `manage.status`
    - `2102d9c75c` Allows to set `timeout` and `gather_job_timeout` via kwargs
  - `22fc5299a2` Merge pull request #40038 from velom/fx-pip-freeze-parsing
• 3fae91d879 correctly parse "pkg_name===version" from pip freeze
- 3584f935fa Merge pull request #40053 from saltstack/rh_ip_patch
  • 219947acdb Update rh_ip.py
- 837432d3d2 Merge pull request #40041 from terminalmage/issue40011
  • 5b5d1b375c Fix transposed lines in salt.utils.process

• PR #40055: (rallytime) Update "yaml" code-block references with "jinja" where needed @ 2017-03-16 16:30:38 UTC
  - 703ab23953 Merge pull request #40055 from rallytime/doc-build-warnings
  - 72d16c9fa9 Update "yaml" code-block references with "jinja" where needed

• PR #40072: (meaksh) [2016.11] Allows overriding 'timeout' and 'gather_job_timeout' to 'manage.up' runner call @ 2017-03-16 15:31:46 UTC
  - PR #40018: (meaksh) Allows overriding 'timeout' and 'gather_job_timeout' to 'manage.up' runner call (refs: #40072)
  - e73a1d0e54 Merge pull request #40072 from meaksh/2016.11-handling-timeouts-for-manage.up-runner
  - 40246d3723 Allows to set custom timeouts for 'manage.up' and 'manage.status'
  - ad232fdc01 Allows to set 'timeout' and 'gather_job_timeout' via kwargs

• PR #40045: (terminalmage) Fix error when chhome is invoked by user.present state in Windows @ 2017-03-15 19:00:41 UTC

    - 13ed0d1209 Fix --non-gpg-checks in zypper module

• PR #39963: (cachedout) Mention bot delay disable for 2016.11 @ 2017-03-10 20:25:25 UTC
- 269a2fd739 Merge pull request #39963 from cachedout/disable_mentionbot_delay_11
- 5fcea05691 Mention bot delay disable for 2016.11

- ISSUE #7997: (shantanub) Proper way to upgrade salt-minions / salt-master packages without losing minion connectivity (refs: #39952)

- PR #39952: (vutny) Fix #7997: describe how to upgrade Salt Minion in a proper way @ 2017-03-10 18:41:57 UTC
  - 6350b07384 Merge pull request #39952 from vutny/doc-faq-minion-upgrade-restart
  - d989d749d6 Fix #7997: describe how to upgrade Salt Minion in a proper way

- ISSUE #39775: (mirceaulinic) Proxy mine_interval config ignored (refs: #39935, #saltstack/salt#39935, #39776)

- PR #39935: (cro) Add special token to insert the minion id into the default_include path @ 2017-03-10 17:51:55 UTC
  - dc7d4f4224 Merge pull request #39935 from cro/namespace_proxy_cfg
  - e4ae54c73 Add special token to insert the minion id into the default_include path

- PR #39936: (rallytime) [2016.11] Merge forward from 2016.3 to 2016.11 @ 2017-03-10 17:05:04 UTC
  - 9503a1d06c Merge pull request #39936 from rallytime/merge-2016.11
  - c8b5d390b5 Merge branch '2016.3' into '2016.11'
    - 4526fc6e08 Merge pull request #39929 from terminalimage/pr-39770-2016.3
      - cf0100dabe Scrap event-based approach for refreshing grains
    - 111110caf8 Merge pull request #39919 from The-Loeki/patch-1
      - 170cbadc54 CIDR matching supports IPv6, update docs
    - c910e9988 Merge pull request #39899 from techhat/cleanupdisks
      - baf4579e63 Update cleanup function for azure
    - fcf95f3654 Merge pull request #39871 from terminalimage/squelch-import-warning
      - 2b2ec65d04 Squelch warning for pygit2 import
    - f223fa8906 Merge pull request #39794 from cachedout/clean_monitor_socket_shutdown
      - 2e683e788b Clean up errors which might be thrown when the monitor socket shuts down
    - 4002dc1947 Merge pull request #39819 from terminalimage/top-file-matching-docs
      - 7178e77eee Improve the Top File matching docs
    - c08aeb7fd Merge pull request #39820 from ni3mm4nd/beacons_topic_doc_typo
      - 804b12048c Add missing apostrophe
    - c5d2a4e3cc Merge pull request #39826 from cachedout/yubikey_fix
      - 6125eff02d Add group func to yubikey auth
    - f575ef459f Merge pull request #39624 from drawsmcgraw/39622
      - 13da50be33 Fix indentation lint errors
      - 545026352f Address issue 39622
    - 1f3619c1e5 Merge pull request #39796 from cachedout/master_shutdown

30.2. Previous Releases
- e31d46c1b8 Stop the process manager when it no longer has processes to manage
  - 53341cf152 Merge pull request #39791 from gtmanfred/2016.3
  - 3ab4f843bf load runners if role is master
  - c234c25092 Merge pull request #39784 from sergeizv/fix-39782
    - b71c3fe13c Revert "cloud.clouds.ec2: cache each named node (#33164)"
  - 4ee59be22c Merge pull request #39766 from rallytime/fix-ipv6-connection
    - 65b239664e Restore ipv6 connectivity and "master: <ip>:<port>" support

• ISSUE #38121: (Da-Juan) Beacon configuration doesn't work as a list (refs: #39932, #39930)
• PR #39932: (rallytime) Cherry-pick the beacon fixes made in #39930 to 2016.11 @ 2017-03-10 00:21:09 UTC
  - PR #39930: (s0undt3ch) Moar Py3 and a fix for #38121 (refs: #39932)
  - 899e037f0a Merge pull request #39932 from rallytime/cp-beacon-fixes
  - 4a52ca926 Pylint fixes
  - 4627c4ea6d Code cleanup and make sure the beacons config file is deleted after testing
  - c7fc09f97d Support the new list configuration format.
  - be06df9b64 Remove "args, **kwargs. Not needed, not useful.
  - 4a242829e6 These tests aren’t even using mock!
  - 6408b123e7 These tests are not destructive
  - 50e51b5b9d The beacons configuration is now a list. Handle it!
• PR #39933: (hkrist) Fixed rawfile.json returner output format. @ 2017-03-10 00:20:52 UTC
  - 2e68edee4a Merge pull request #39933 from hkrist/fix-rawfile_json_returner-format
  - 4d0ddcd110 Fixed rawfile_json returner output format. It outputted python object instead of standard json.
• PR #39934: (dmurphy18) Correct comment lines output from execution module’s host.list_hosts @ 2017-03-10 00:20:14 UTC
  - fb0dc333c42 Merge pull request #39934 from dmurphy18/fix_host_list
  - e7ba945079 Correct comment lines output got list_hosts
• PR #39900: (twangboy) Namespcae the line function properly in win_file @ 2017-03-09 22:19:12 UTC
  - a6f8d03df Merge pull request #39900 from twangboy/win_fix_line
  - 462bdec33 Namespace the line function properly in win_file
• ISSUE #37741: (discountbin) Check in file.replace state for ignore_if_missing (refs: #37743, #39910)
• PR #39910: (rallytime) Back-port #37743 to 2016.11 @ 2017-03-09 22:16:58 UTC
  - PR #37743: (discountbin) Adding check for ignore_if_missing param when calling _check_file. (refs: #39910)
  - 77ecff4e02 Merge pull request #39910 from rallytime/bp-37743
  - ca30e0860 Replace pass with updated comment for return
  - 1a78878b47 Adding check for ignore_if_missing param when calling _check_file.
• PR #39770: (rallytime) [2016.11] Merge forward from 2016.3 to 2016.11 @ 2017-03-09 22:00:17 UTC
- Merge pull request #39770 from rallytime/merge-2016.11
- Remove extra refresh reference that snuck in
- Don’t shadow refresh_pillar
- Remove manual refresh code from minion.py
- Scrap event-based approach for refreshing grains
- Merge branch '2016.3' into '2016.11'
  - Merge pull request #39761 from cachedout/issue_33187
    - Properly display error in jboss7 state
  - Merge pull request #39728 from rallytime/update-release-ver-2016.3
    - Bump latest release version to 2016.11.3
  - Merge pull request #39619 from terminalmage/zd1207
    - Fix mocking for grains refresh
    - Properly hand proxy minions
    - Add a function to simply refresh the grains

- Add installation tips for azurearm driver @ 2017-03-07 23:18:04 UTC
- Merge pull request #39872 from techhat/fixdocs
  - Add installation tips for azure
  - Change example master in azure docs

- Fix regression in archive.extracted when it runs file.directory @ 2017-03-07 03:51:56 UTC
  - Merge pull request #39858 from techhat/statuskey
    - Reorder keys that were being declared in the wrong place

- salt-ssh: vault fails to use config (refs: #38943)
  - Merge pull request #39852 from rallytime/bp-39651
    - Back-port #39651 to 2016.11 @ 2017-03-06 21:18:34 UTC

30.2. Previous Releases
- bb5ddbe18c Checking instance exists in master._get_cached_minion_data when cache.fetch returns None

- 855f87554c Checking instance exists in master._get_cached_minion_data when cache.fetch returns None

• ISSUE #39052: (githubcdr) Minion restart very slow since 2016.11.2 (refs: #39104)

• PR #39851: (rallytime) Back-port #39104 to 2016.11 @ 2017-03-06 21:17:43 UTC
  - PR #39104: (githubcdr) Do not use name resolving for --notrim check (refs: #39851)
  - 897275ae5f Merge pull request #39851 from rallytime/bp-39104
  - 6539dbdbca Do not use name resolving for --notrim check

• ISSUE #38231: (tjuup) Typo: salt-key deleteed (refs: #39799)

• PR #39799: (Ch3LL) Fix deleteed message when key is deleted @ 2017-03-03 05:17:43 UTC
  - d0440e2a2a Merge pull request #39799 from Ch3LL/fixed_salt_key_msg
  - 8346682cf7 Fix deleteed message when key is deleted

• ISSUE #38962: (gstachowiak) Broken /jobs in salt-api in salt 2016.11.1 (Carbon) (refs: #39472)

• PR #39472: (whiteinge) Update _reformat_low to not run kwarg dicts through parse_input @ 2017-03-02 17:46:20 UTC
  - 9f70ad7164 Merge pull request #39472 from whiteinge/_reformat_low-update
  - d11f5381a4 Add RunnerClient test for old/new-style arg/kwarg parsing
  - ec377ab379 Reenable skipped RunnerClient tests
  - 27f7fd9ad4 Update _reformat_low to run arg through parse_input
  - 5177153459 Revert parse_input change from #32005

• PR #39727: (terminalmage) salt.modules.state: check gathered pillar for errors instead of in-memory pillar @ 2017-03-02 17:06:43 UTC
  - 7dfc4b572a Merge pull request #39727 from terminalmage/issue39627
  - 3bb0ebd872 Update tests for PR 39727
  - c334b59c96 salt.modules.state: check gathered pillar for errors instead of in-memory pillar
  - 97dd8a13d9 Ensure that ext_pillar begins with pillar_override if ext_pillar_first is True
  - f951266944 Add log message for successful makostack processing

• ISSUE #39775: (mirceaulinic) Proxy mine_interval config ignored (refs: #39935, #saltstack/salt`#39935`_, #39776)

• PR #39776: (mirceaulinic) WIP: Save _schedule.conf under <proxy ID> dir @ 2017-03-02 16:27:45 UTC
  - 965f474316 Merge pull request #39776 from cloudflare/proxy-schedule
  - 35b88fd64 Save _schedule.conf under <minion ID> dir

• PR #39788: (cachedout) Disable one API test that is flaky @ 2017-03-02 16:17:31 UTC
555f1e7e1f Merge pull request #39788 from cachedout/disable_api_test
523e37f733 Disable one API test that is flaky

- **PR #39762**: (terminalmage) Fix regression in file.get_managed @ 2017-03-02 02:59:34 UTC
  - 7f93979cb96 Merge pull request #39762 from terminalmage/issue39751
  - 64db0b8563 Add integration tests for remote file sources
  - f9f894d981 Fix regression in file.get_managed when skip_verify=True
  - 28651a6699 Remove next(iter()) extraction

- **ISSUE #35088**: (Modulus) salt/cloud/ec2.py encoding problems. (refs: #37912)
- **PR #39767**: (rallytime) Back-port #38316 to 2016.11 @ 2017-03-02 02:54:57 UTC
  - **PR #38316**: (mlalpho) salt utils aws encoding fix (refs: #39767)
  - **PR #37912**: (attiasr) fix encoding problem aws responses (refs: #38316)
  - 91a9377a63 Merge pull request #39767 from rallytime/bp-38316
  - 1dec018d77 requests api says Response.encoding can sometimes be None

- **ISSUE #39692**: (djsly) tuned module and state are broken on 7.3 families. (refs: #40387, #39719, #39768)
- **PR #39768**: (rallytime) Back-port #39719 to 2016.11 @ 2017-03-02 02:54:40 UTC
  - **PR #39719**: (Seb-Solon) Support new version of tuned-adm binary (refs: #39768)
  - 4a01bd064ea Merge pull request #39768 from rallytime/bp-38316
  - d7cb70f203 Enh: Support new version of tuned-adm binary

- **PR #39760**: (Ch3LL) Initial 2016.11.4 Release Notes Doc @ 2017-03-02 02:54:40 UTC
  - 780457f934 Merge pull request #39760 from Ch3LL/2016.11.4_notes
  - 1853c998c4 add initial 2016.11.4 release notes

- **PR #39731**: (twangboy) Add docs for Kwargs in pkg.refresh_db @ 2017-02-28 22:02:59 UTC
  - 0147f78a5 Merge pull request #39731 from twangboy/win_pkg_docs
  - 423e6f7448 Add docs for Kwargs in pkg.refresh_db

- **ISSUE #39710**: (huangfupeng) schedule.add parameter can not use "after" (refs: #39734)

- **PR #39734**: (garethgreenaway) Missing parameter in the schedule.add function @ 2017-02-28 20:43:08 UTC
  - fce2d184f3 Merge pull request #39734 from garethgreenaway/39710_missing_schedule_add_parameter
  - 636610245 Per #39710, missing parameter in the schedule.add function

- **PR #39729**: (rallytime) [2016.11] Bump latest release version to 2016.11.3 @ 2017-02-28 18:08:25 UTC
  - 7b4865c058 Merge pull request #39729 from rallytime/update-release-ver-2016.11
  - 5a7111ad9 [2016.11] Bump latest release version to 2016.11.3

- **PR #39721**: (vutny) DOCS: add 2nd level header for advanced targeting methods @ 2017-02-28 17:57:46 UTC
  - 47e494fe07 Merge pull request #39721 from vutny/doc-targeting
  - 1d86c1161 DOCS: add 2nd level header for advanced targeting methods

- **ISSUE #39683**: (alankrita) Error in Saltstack's rest auth "Authentication module throw 'status' " (refs: #39711)
• **PR #39711**: (alankrita) Fix error in Saltstack's rest auth "Authentication module threw 'status' " @ 2017-02-28 15:56:09 UTC
  - d39b679d82 Merge pull request #39711 from alankrita fixes-4auth
  - ee426562a7 Fix error in Saltstack's rest auth "Authentication module threw 'status' ">

• **PR #39699**: (techhat) Strip shabang line from rendered HTTP data @ 2017-02-28 00:05:01 UTC
  - 3940321462 Merge pull request #39699 from techhat/strip-shabang
  - 559eb93576 Strip shabang line from rendered HTTP data

• **PR #39694**: (rallytime) [2016.11] Merge forward from 2016.3 to 2016.11 @ 2017-02-27 22:13:49 UTC
  - 00f121ea Merge pull request #39694 from rallytime/merge-2016.11
  - 756f1de2d2 Merge branch '2016.3' into '2016.11'
    * 3f8b5e6733 Merge pull request #39487 from bobrik/pep docs
      - 41ef69b3ca Document default permission modes for file module
    * f7389bf1f5 Merge pull request #39641 from smarsching/issue-39169-2016.3
      - 88c2d9a540 Fix return data structure for runner (issue #39169).
    * fc970b6a16 Merge pull request #39633 from terminalmage/fix-systemd-typo
      - ca54541abe Add missing unit test for disable func
      - 17109e1522 Fix misspelled argument in salt.modules.systemd.disable()
    * 53e78d67f6 Merge pull request #39613 from terminalmage/fix-docs
      - 9342eda377 Fix inaccurate documentation

• **ISSUE #39642**: (drawsmcgraw) boto_vpc.nat_gateway_present does not honor the allocation_id parameter like the module does (refs: #39643)

• **PR #39643**: (drawsmcgraw) issue 39642 - boto_vpc.nat_gateway_present should accept parameter all... @ 2017-02-27 20:19:09 UTC
  - 2c919e31d6 Merge pull request #39643 from drawsmcgraw/39642
  - 56d9ad1f66 issue 39642 - boto_vpc.nat_gateway_present should accept parameter allocation_id.

• **PR #39666**: (terminalmage) Rewrite the tests_valid_docs test @ 2017-02-26 20:14:33 UTC
  - df013c5f31 Merge pull request #39666 from terminalmage/test_valid_docs
  - 5a3c099e4f Rewrite the tests_valid_docs test

• **PR #39662**: (The-Loeki) Py3 compat: Force minions to be a list for local serialized caches @ 2017-02-26 02:36:46 UTC
  - a29a7be7f8 Merge pull request #39662 from The-Loeki/py3cachefix
  - b02ef9848f7 Add comment
  - 0fe5c90a05 Py3 compat: Force minions to be a list for local serialized caches

• **PR #39664**: (vutny) Improve and align dockerng execution module docs @ 2017-02-25 04:16:28 UTC
  - bd6ef18b1 Merge pull request #39644 from vutny/dockerng-docs
  - c4988e874e Improve and align dockerng execution module docs

• **PR #39516**: (jettero) Prevent spurious "Template does not exist" error @ 2017-02-24 23:41:36 UTC
- ffab54078 Merge pull request #39516 from jettero/give-pillarenv-tops-similar-treatment
- 8fe48fa5c4 prevent billions of inexplicable lines of this:

- **PR #39654**: (skizunov) Fix issue where compile_pillar failure causes minion to exit @ 2017-02-24 22:47:52 UTC
  - be9629b180 Merge pull request #39654 from skizunov/develop2
  - 9f80bce07 Fix issue where compile_pillar failure causes minion to exit

- **PR #39653**: (cachedout) Use salt's ordereddict for comparison @ 2017-02-24 22:46:24 UTC
  - e63cbbaab9 Merge pull request #39653 from cachedout/26_odict
  - 91eb7210bb Use salt's ordereddict for comparison

- **ISSUE #38836**: (toanctruong) file.managed with S3 Source errors out with obscure message (refs: #39609, #39589)

- **PR #39609**: (gtmanfred) initialize the Client stuff in FSClient @ 2017-02-24 18:50:55 UTC
  - 0bc6027e68 Merge pull request #39609 from gtmanfred/2016.11
  - 0820620ef8 initialize the Client stuff in FSClient

- **PR #39615**: (skizunov) Bonjour/Avahi beacons: Make sure TXT record length is valid @ 2017-02-24 18:47:05 UTC
  - 28035c07b3 Merge pull request #39615 from skizunov/develop2
  - b1c7e9b505 Bonjour/Avahi beacons: Make sure TXT record length is valid

- **PR #39617**: (rallytime) [2016.11] Merge forward from 2016.3 to 2016.11 @ 2017-02-24 16:07:55 UTC
  - e9410fb669 Merge pull request #39617 from rallytime/merge-2016.11
  - 13622899d2 Merge branch '2016.3' into '2016.11'
  - 4e2b852f83 Merge pull request #39600 from vutny/state-file-docs
    - 9b0427c27a state.file: drop non-relevant examples for source_hash parameter
    - ed83420417 Merge pull request #39584 from cachedout/mentionbot_docs
      - 652044b18f A note in the docs about mentionbot
  - d3e50b4f2f Merge pull request #39583 from cachedout/mentionbot_blacklist
    - 62491c900d Add empty blacklist to mention bot

- **ISSUE #38758**: (bobrik) Remote state execution is much slower on 2016.11.1 compared to 2016.3.4 (refs: #39505)

- **ISSUE #33575**: (anlutro) File states seem slower in 2016.3, especially on first cache retrieval (refs: #33896)

- **ISSUE #29643**: (matthayes) Can't get batch mode and --failhard to work as expected (refs: #31164)

- **ISSUE #28569**: (andrejohansson) Reactor alert on highstate fail (refs: #31164)

- **PR #39505**: (cachedout) Thread safety option for context dictionaries @ 2017-02-23 19:38:13 UTC
  - PR #37378: (skizunov) Fix __context__ to properly sandbox (refs: #39505)
  - PR #33896: (DmitryKuzmenko) Don't deep copy context dict values. (refs: #39505)
  - PR #31164: (DmitryKuzmenko) Issues/29643 fix invalid retcode (refs: #33896)
  - 0d31201e08 Merge pull request #39505 from cachedout/issue_38758
  - 1dbaf99cb0 Add warning in docs
  - 9cf654b72c Thread safety option for context dictionaries

### 30.2. Previous Releases

5063
• PR #39507: (joe-niland) Detect IIS version and vary certificate association command depending on version @ 2017-02-23 19:15:40 UTC
  - c0d4357f46 Merge pull request #39507 from joe-niland/iis-7-cert-binding
  - c94fb8c62 Fix additional issue whereby existing certificate bindings were not found in IIS 7.5, due to the fact that IIS earlier than 8 doesn't support SNI
  - 18effe0103 Detect IIS version and vary certificate association command depending on version

• PR #39565: (terminalmage) states.file.patch/modules.file.check_hash: use hash length to determine type @ 2017-02-23 19:14:28 UTC
  - e6f5e8a474 Merge pull request #39565 from terminalmage/issue39512
  - cbdf905b9f Update test to reflect new state comment
  - 650dbaca4e states.file.patch/modules/file.check_hash: use hash length to determine type

• PR #39591: (mcalmer) fix case in os_family for Suse @ 2017-02-23 19:07:17 UTC
  - 53e22b8f15 Merge pull request #39591 from mcalmer/fixed-case-in-os_family
  - 81bd96e32d fix case in os_family for Suse

• ISSUE #38452: (jf) file.line with mode=delete does not preserve ownership of a file (refs: #39592)

Chapter 30. Release Notes
- b8e321bec Merge pull request #39577 from rallytime/merge-2016.11
- 397c756a01 Merge branch '2016.3' into '2016.11'
  * 8352e6b44b Merge pull request #39579 from rallytime/fix-lint
    * 65889e1f30 [2016.3] Pylint: Remove unused import
  * 43dba3254c Merge pull request #39578 from cachedout/2016.3
    * 34449eeef7 Add mention-bot configuration
- c52ecd856 Fix syntax error leftover from incomplete merge-conflict resolution
- 7b9b3f700d Merge branch '2016.3' into '2016.11'
  * 8f7a0f9d96 Merge pull request #39542 from twangboy/gate_ssh_known_hosts
    * c90a52ef27 Remove expensive check
    * 6d645cae0e Add __virtual__ function
  * c10965833a Merge pull request #39289 from bobrik/autodetect-ipv6
    * 2761a1b244 Move new kwargs to the end of argument list
    * 0df6b922e7 Narrow down connection exception to socket.error
    * e8a2cc0488 Do no try to connect to salt master in syndic config test
    * af9578631e Properly log address that failed to resolve or pass connection check
    * 9a34f6ba9 Actually connect to master instead of checking route availability
    * c494839c65 Avoid bare exceptions in dns_check
    * 29f376676d Rewrite dns_check to try to connect to address
    * 55965ce505 Autodetect IPv6 connectivity from minion to master
  * 3fb928b63a Merge pull request #39569 from s0undt3ch/2016.3
    * 49da135ab Don't use our own six dictionary fixes in this branch
  * 91e3319df8 Merge pull request #39508 from dincamihai/openscap
    * 9fedb84607 Always return oscap's stderr
    * 0e9e2c2d02 Include oscap returncode in response
  * fbe2194a93 Merge pull request #39562 from terminalmage/issue30802
    * c50374041d Add ulimits to dockerng state/exec module
    * da42040c1a Try the docker-py 2.0 client name first
  * 01d4a84a2f dockerng.get_client_args: Fix path for endpoint config for some versions of docker-py (#39544)

- **PR #39574:** (Ch3LL) Update 2016.11.3 release notes @ 2017-02-23 00:10:23 UTC
  - cff9334929 Merge pull request #39574 from Ch3LL/update_release_notes
  - c08c35df7 fix reference to set in docs
  - 663f6f159d add additional PRs to 2016.11.3 release notes
- **PR #39528:** (thatch45) Add better ssl option docs (refs: #39554) @ 2017-02-22 18:29:47 UTC
  - b492f7094c Merge pull request #39528 from thatch45/ssl_docs
– c357e37831 Add minion config
– 539bb2a880 Add better ssl option docs

• ISSUE saltstack/salt#35869: (amontalban) timezone.system state fails on FreeBSD when /etc/localtime does not exists (refs: #39532)

• PR #39532: (amontalban) Fix case when /etc/localtime is a file and it is not updated @ 2017-02-22 18:28:54 UTC
  – 0dad49cdf Merge pull request #39532 from amontalban/corner_case_35869
  – f0d3c16547 Fix case when /etc/localtime is a file and it is not updated

• PR #39540: (rallytime) [2016.11] Merge forward from 2016.3 to 2016.11 @ 2017-02-22 18:24:01 UTC
  – 9cfa3b599 Merge pull request #39540 from rallytime/merge-2016.11
  – 49fe4e891e Merge branch '2016.11' into '2016.11'
  – c613d19e76 Merge branch '2016.3' into '2016.11'
  – dff35b58f8 Merge pull request #39498 from terminalmage/pr-39483

  – 56fe2f198e Merge pull request #39554 from DSRCorporation/bugs/ssl_bool
  – 7a6fc11291 Cosmetic: support bool value for 'ssl' config option.
• PR #39560: (vutny) [CLOUD] Log error when private/public IP was not detected @ 2017-02-22 16:49:46 UTC
  – cf37f83565 Merge pull request #39560 from vutny/cloud-detect-ips
  – 567bb50884 [CLOUD] Log error when private/public IP was not detected

30.2.62 Salt 2016.11.5 Release Notes

Version 2016.11.5 is a bugfix release for 2016.11.0.

Statistics

• Total Merges: 82
• Total Issue References: 23
• Total PR References: 80
• Contributors: 32 (BenoitKnecht, Ch3LL, DmitryKuzmenko, Enquier, SolarisYan, UtahDave, alexproca, benediktwerner, bobrik, brd, cachedout, clinta, corywright, cro, danlsgiga, drawsmcgraw, ezh, gtmanfred, isbm, jf, jleproust, lorengordon, nevins-b, oeufete, peter-funktionIT, rallytime, rkgrunt, senthilkumar-e, sjorge, skizunov, terminalmage, twangboy)

Patched Packages

Due to the critical nature of issue issue #41230 we have decided to patch the 2016.11.5 packages with PR #41244. This issue affects all calls to a salt-minion if there is an ipv6 nameserver set on the minion’s host. The patched packages on repo.saltstack.com will diverge from the v2016.11.5 tag and pypi packages due to the patches applied to the packages.

Changelog for v2016.11.4..v2016.11.5

Generated at: 2018-05-27 20:12:47 UTC

• PR #41134: (twangboy) Fix pkg.install on Windows on 2016.11 @ 2017-05-09 15:10:19 UTC
  – a10f0146a4 Merge pull request #41134 from twangboy/fix_get_msiexec
  – d808a60129 Remove redundant if statement
  – b4d6d5a927 Fix for version_num of None and Latest
  – 0f31822a83 Fix problem when use_msiexec is a bool

• ISSUE #41100: (frogunder) Exception occurred in runner jobs.list_jobs (refs: #41102)

• PR #41102: (gtmanfred) don’t pass jid to list_jobs @ 2017-05-08 17:45:40 UTC
  – 4ecab68bb9 Merge pull request #41102 from gtmanfred/2016.11
  – 83057d0f0f don’t pass jid to list_jobs
  – de9f6b448 show changes in file.blockreplace function in testing mode. also used same programming style as in file.managed function: (ret['changes']['diff'] = ret['pchanges']['diff'])

• PR #41103: (lorengordon) Adds a get_route() function to win_network.py @ 2017-05-06 06:19:42 UTC
  – 2af89beb53 Merge pull request #41103 from lorengordon/win.get_route

30.2. Previous Releases
- 93ce564e4ea Adds test for win_network.get_route
- b9cbb0290 Adds a get_route() function to win_network.py

• PR #41098: (rallytime) Back-port #41088 to 2016.11 @ 2017-05-05 19:04:03 UTC
  - PR #41088: (sjorge) Fix docs for zfs state module (refs: #41098)
  - 2f9b5a4074 Merge pull request #41098 from rallytime/bp-41088
  - dc6cd2ea45 Fix docs for zfs state module

• PR #41097: (rallytime) Back-port #41079 to 2016.11 @ 2017-05-05 19:03:43 UTC
  - PR #41079: (brd) Remove an extra colon that is causing rendering issues (refs: #41097)
  - 2123001f32 Merge pull request #41097 from rallytime/bp-41079
  - 845b49c304 Remove and extra colon that is causing rendering issues

• PR #41093: (rallytime) [2016.11] Merge forward from 2016.3 to 2016.11 @ 2017-05-05 17:22:09 UTC
  - ff6fa2b120 Merge pull request #41093 from rallytime/merge-2016.11
  - a670ea1db Merge branch '2016.3' into '2016.11'
  - 247400c44e Merge pull request #41083 from rallytime/git-state-fix
     * b85ee48ff4 Git state: head_ref should be head_rev in "latest" function

• PR #41084: (rallytime) Skip the test_salt_documentation_arguments_not_assumed test for Arch @ 2017-05-04 21:56:29 UTC
  - PR #41074: (rallytime) Skip integration.shell.matcher.MatchTest.test_salt_documentation test for Arch (refs: #41084)
  - 4c2e636cd1 Merge pull request #41084 from rallytime/disable-matcher-test-arch
  - da811fe505 Skip the correct test for the matcher tests in Arch
  - b9d1ce9aed Revert "Skip integration.shell.matcher.MatchTest.test_salt_documentation test for Arch"

• PR #41069: (rallytime) [2016.11] Merge forward from 2016.3 to 2016.11 @ 2017-05-04 20:34:58 UTC
  - 1179720327 Merge pull request #41069 from rallytime/merge-2016.11
  - 08c58919cb Merge branch '2016.3' into '2016.11'
     * 69418092bd Merge pull request #41070 from rallytime/lint-2016.3
        * 486e2ba62e Pylint: remove extra line in mac_system module
  - db70b2d42e Pylint: remove extra line in mac_system module
  - 855d157aa6 Merge branch '2016.3' into '2016.11'
     * 3101694d71 Merge pull request #41048 from willkil/mac_system_non_root
        * b65b82a750 mac_system: return False for non-root user

• PR #41074: (rallytime) Skip integration.shell.matcher.MatchTest.test_salt_documentation test for Arch (refs: #41084) @ 2017-05-04 19:26:16 UTC
  - 9d638abc62 Merge pull request #41074 from rallytime/disable-matcher-test-arch
  - 9eb482d5c7 Skip integration.shell.matcher.MatchTest.test_salt_documentation test for Arch

• PR #41078: (Ch3LL) Add 2016.11.5 release notes and change log @ 2017-05-04 19:00:58 UTC
  - 72c854d9ac Merge pull request #41078 from Ch3LL/add_2016.11.5_release
• **PR #40879**: (peter-funktionIT) Update win_pki.py @ 2017-05-04 16:12:00 UTC
  - eac8401e90 Merge pull request #40879 from peter-funktionIT/2016.11
  - 80fa9e5b76 Update win_pki.py
  - a48b05f158 Update win_pki.py
  - 3a4ed9d91 Update win_pki.py
• **ISSUE #40928**: (sokratisg) Orchestration runner, highstate and environment question (refs: #41036)
• **PR #41036**: (terminalmage) Do not force effective saltenv when running states via orchestration @ 2017-05-04 15:44:14 UTC
  - 547a9738db Merge pull request #41036 from terminalmage/issue40928
  - 72ef34c420 Do not force effective saltenv when running states via orchestration
• **PR #41039**: (terminalmage) Look for currently-running python’s pip first @ 2017-05-04 15:43:52 UTC
  - 6e2458e171 Merge pull request #41039 from terminalmage/improve-pip-bin
  - effe8b9432 Look for currently-running python’s pip first
• **PR #41049**: (Ch3LL) fix integration wheel test_gen test @ 2017-05-04 15:33:59 UTC
  - ff39613a53 Merge pull request #41049 from Ch3LL/fix_wheel_test
  - ba23827b9 fix integration wheel test_gen test
• **PR #41054**: (terminalmage) Update package targets for Arch pkg tests @ 2017-05-04 14:59:42 UTC
  - 4e4b3514b4 Merge pull request #41054 from terminalmage/salt-jenkins-315
  - ee493bae47 Update package targets for Arch pkg tests
• **PR #41046**: (twangboy) Fix pkg.remove @ 2017-05-04 14:58:57 UTC
  - 62df52820 Merge pull request #41046 from twangboy/fx_pkg_remove
  - 2af38e5564 Use target instead of version_num
• **PR #41045**: (terminalmage) Clarify gitfs docs @ 2017-05-03 22:24:55 UTC
  - 2b47b7bec6 Merge pull request #41045 from terminalmage/clarify-gitfs-docs
  - c757eda331 Clarify gitfs docs
• **PR #41032**: (rallytime) [2016.11] Merge forward from 2016.3 to 2016.11 @ 2017-05-03 19:31:58 UTC
  - 819007cd00 Merge pull request #41032 from rallytime/merge-2016.11
  - d26fd0bbf4 Merge branch '2016.3' into '2016.11'
    • b00acb0034 Merge pull request #41011 from terminalmage/docker-refresh-credentials
      • b8d1dce307 Use proposed docker-py reload_config() func
• **ISSUE #35699**: (jleproust) LVM state fails to add new device, volume group name is empty string (refs: #41007)
• **PR #41007**: (jleproust) Recognize LVM2 pv with empty vg as orphan @ 2017-05-03 18:24:51 UTC
  - d7fbd38474 Merge pull request #41007 from jleproust/fix_lvm_empty_vg
  - 3b9a845145 Recognize LVM2 pv with empty vg as orphan
• **PR #41029**: (rallytime) Back-port #38565 to 2016.11 @ 2017-05-03 17:05:10 UTC
- PR #38565: (drawsmcgraw) Update management of ip addresses for salt cloud azurearm module (refs: #41029)
- 4eab962e9e Merge pull request #41029 from rallytime.bp-38565
- 2df93ae3ab Update management of ip addresses. - Assign static, private IP addresses. - Ability to not assign a public IP to a VM.
- • PR #41012: (rallytime) [2016.11] Merge forward from 2016.3 to 2016.11 @ 2017-05-02 22:06:40 UTC
  - 97500f078d Merge pull request #41012 from rallytime/merge-2016.11
  - fc756c595c Merge branch '2016.3' into '2016.11'
  - 19894f68ca Merge pull request #40724 from cro/minion_key_revoke_cfg
    * cbc70195c0 Change message level when minion requests key revoke and feature is turned off.
    * 65ea8997b7 Add allow_minion_key_revoke config option
    * 8920495943 Add config option to prevent minions from revoking their own keys.
  - 129859f79b Merge pull request #40952 from terminalmage/fix-dockerng.login-docs
    * dfbbeb5946 Fix documentation for docker login function in pre-nitrogen release branches
- • PR #40726: (benediktwerner) Fixed minion keys remaining pending after auto signing and fixed typo (Resubmitted to 2016.3) @ 2017-05-02 16:57:34 UTC
  - e210eaed4 Merge pull request #40726 from benediktwerner/fix-minions-remain-pending-after-autosign-and-typo
  - 82c144e960 Fixed minion keys remaining pending after auto signing and fixed typo
- • PR #40960: (danlsgiga) Fix consul module "AttributeError: 'dict' object has no attribute 'json'" @ 2017-05-02 16:16:57 UTC
  - 4f342e2fe5 Merge pull request #40960 from danlsgiga/2016.11
  - 6e4cc6db47 Fix consul module "AttributeError: 'dict' object has no attribute 'json'"
- • PR #40963: (twangboy) Fix fullname parameter for add function @ 2017-05-02 16:08:59 UTC
  - c3b329b398 Merge pull request #40963 from twangboy/fix_win_useradd
  - 5371b6b85e Fix fullname parameter for add function
- • PR #40995: (twangboy) Remove unused code fragments @ 2017-05-02 15:31:58 UTC
  - d79c033239 Merge pull request #40995 from twangboy/remove_utils
  - 8c01aad9b Remove unused code fragments
- • ISSUE #40981: (ezh) docker-events engine is broken with modern docker (refs: #40982)
- • PR #40991: (rallytime) Back-port #40982 to 2016.11 @ 2017-05-01 22:31:30 UTC
  - PR #40982: (ezh) Fix docker_events field handling (refs: #40991)
  - c6162876d6 Merge pull request #40991 from rallytime/bp-40982
  - 8fcb7205db Fix docker_events field handling
- • ISSUE #40965: (weirdbricks) salt-cloud sudo failing (refs: #40987)
- • PR #40987: (gtmanfred) get sudo_password correctly @ 2017-05-01 19:39:55 UTC
  - 3fb24929c6 Merge pull request #40987 from gtmanfred/2016.11
  - 2ed694ac6 get sudo_password correctly
• ISSUE #40988: (santzi) status.netdev tx_bytes is always zero (refs: #40992)

• PR #40992: (gtmanfred) fix bug in status.netdev @ 2017-05-01 19:38:35 UTC
  - ecbac138d1 Merge pull request #40992 from gtmanfred/netdev
  - a9ee67f1c9 fix bug in status.netdev

• ISSUE #40976: (sjorge) smtp.send_msg state oddities (refs: #40993)

• PR #40993: (gtmanfred) smtp state can use profile or sender @ 2017-05-01 19:35:47 UTC
  - d852320d34 Merge pull request #40993 from gtmanfred/smtp
  - 068ebfd9ec smtp state can use profile or sender

• PR #40958: (rallytime) Back-port #40939 to 2016.11 @ 2017-04-28 18:01:17 UTC
  - PR #40939: (Ch3LL) Allow vmware to query deploy arg from opts (refs: #40958)
  - fc26fb8a05 Merge pull request #40958 from rallytime/bp-40939
  - 3e9394862f allow vmware to query deploy arg from opts

• ISSUE saltstack/salt#34640: (nevins-b) utils.shlex_split removing quotes which are required for augeas (refs: `saltstack/salt#34643`) ★
  - PR saltstack/salt#34643: (nevins-b) fix augeas module so shlex doesn't strip quotes (refs: #38115)

• PR #40957: (rallytime) Back-port #38115 to 2016.11 @ 2017-04-28 18:01:02 UTC
  - PR #38115: (cro) Revert "fix augeas module so shlex doesn't strip quotes" (refs: #40957)
  - a586e12180 Merge pull request #40957 from rallytime/bp-38115
  - eb889173b0 Revert "fix augeas module so shlex doesn't strip quotes"

• ISSUE #40635: (promorphus) Orchestrate + Batches returns false failed information (refs: #40905)

• PR #40905: (rkgrunt) Fixed issue with parsing of master minion returns when batching is enabled... @ 2017-04-28 17:52:32 UTC
  - 00a15eba60 Merge pull request #40905 from rkgrunt/40635
  - 4f9c92a012 Fixed issue with parsing of master minion returns when batching is enabled.

• PR #40954: (rallytime) [2016.11] Merge forward from 2016.3 to 2016.11 @ 2017-04-28 16:41:49 UTC
  - bb50d4f646 Merge pull request #40954 from rallytime/merge-2016.11
  - 7fb31e41aa6 Merge branch '2016.3' into '2016.11'
  - 55a399583e Merge pull request #40930 from rallytime/bp-40811
    * 3cbb553f9f get config_dir based off conf_file
  - 7bc01be859 Merge pull request #40927 from terminalmage/docs
    * 8c078f144c Add additional note about quoting within load_yaml
    * 123b5c9c11 Add documentation for PyYAML's loading of time expressions
  - 7eb9c6cf4 Merge pull request #40891 from terminalmage/pip-installed
    * 75eb6c0a3 Fix two issues with pip.install

• ISSUE #39531: (ypid) Use yaml.safe_* instead of yaml.load / yaml.dump / ... (refs: #40751)

• PR #40751: (rallytime) Use Salt's SaltYamlSafeLoader and SafeOrderedDumper classes for yaml.load/dump @ 2017-04-28 12:56:06 UTC
Salt Documentation, Release 3003.3

- 909d519ddb Merge pull request #40751 from rallytime/fix-39531
- 85dc4164f5 Don’t change the salt.utils.jinja yaml Dumper class
- 4fe6ac93c6 Add extra line for lint
- 55cfa12975 Use salt.utils.yamlldumper with SafeOderedDumper as the Dumper in yaml.dump
- 62c4d37c2f Use salt.utils.yamlloader with SaltYamlSafeLoader as the Loader with yaml.load

• ISSUE #37507: (szjur) Minions run every job twice and open 2 connections to the same syndic - apparently after reconnection between masters (refs: #40861)

• PR #40861: (DmitryKuzmenko) Don’t run status.master while minion is failing-over. @ 2017-04-28 12:14:56 UTC
  - 18fdd8c34 Merge pull request #40861 from DSRCorporation/bugs/37507_minion_run_jobs_twice
  - f0d46d0af Don’t run status.master while minion is failing-over.

• PR #40923: (terminalmage) aptpkg: fix temp pkg unhold when version is specified @ 2017-04-28 11:59:54 UTC
  - 62cb71ae6 Merge pull request #40923 from terminalmage/aptpkg-install-fix-fix-unhold
  - 6dda4f2bc3 aptpkg: fix temp pkg unhold when version is specified

• ISSUE #40908: (nicksloan) If master_port is a string the minion cannot connect and prints an unhelpful error message (refs: #40933)

• ISSUE #39118: (bobrik) Minion ipv6 option is not documented (refs: #39289)

• PR #40933: (gtmanfred) allow master_port to be a string @ 2017-04-28 11:54:58 UTC
  - PR #39289: (bobrik) Autodetect IPv6 connectivity from minion to master (refs: #40933)
  - 9d29a7878 Merge pull request #40933 from gtmanfred/2016.11
  - 194423c08e allow master_port to be a string

• ISSUE #40912: (razed11) IPV6 Warning when ipv6 set to False (refs: #40934)

• PR #40934: (gtmanfred) Only display IPvX warning if role is master @ 2017-04-28 11:53:50 UTC
  - d5e0b8655 Merge pull request #40934 from gtmanfred/ipv6
  - 7855cd6ce6 Only display IPvX warning if role is master

• ISSUE #40881: (stamak) 2016.11 SoftLayer salt-cloud driver connects on private IP instead of public IP (refs: #40935)

• PR #40935: (gtmanfred) Attempt to connect to public ip address in softlayer @ 2017-04-28 11:43:57 UTC
  - 8fde4ec6 Merge pull request #40935 from gtmanfred/softlayer
  - d6eb1140f Attempt to connect to public ip address in softlayer

• PR #40936: (terminalmage) Add dockerng fixes to 2016.11.4 release notes @ 2017-04-27 19:54:16 UTC
  - 7404390bec Merge pull request #40936 from terminalmage/release_notes
  - e494ae43e5 Add dockerng fixes to 2016.11.4 release notes

• ISSUE #33093: (gtmanfred) [salt-cloud][nova] race condition when assigning floating ips to cloud servers (refs: #37696)

• PR #40929: (rallytime) Back-port #37696 to 2016.11 @ 2017-04-27 17:43:26 UTC
  - PR #37696: (SolarisYan) if vm state is not ACTIVE, it will fail (refs: #40929)
  - a622518ad2 Merge pull request #40929 from rallytime/bp-37696
- 1a28722c5a Pylint fix
- 8e0a9864c5 if vm state is not ACTIVE, associate floating ip to it will fail. So we should wait for state of vm is ACTIVE, then associate the assigned floating ip to it

- **PR #40921:** (corywright) Make salt.auth.rest heading consistent with all other salt.auth documentation @ 2017-04-27 17:36:47 UTC
  - f88c8e84de Merge pull request #40921 from corywright/consistent-salt-auth-headings
  - 2995a05c2b Make salt.auth.rest heading consistent with all other salt.auth documentation

- **ISSUE #37824:** (dxiri) SSLError Trying to use v3 API of Openstack Newton as provider. (refs: #40752)

- **PR #40752:** (Enquier) Add ability to specify a custom SSL certificate or disable SSL verification in KeystoneAuth v3 @ 2017-04-27 17:29:09 UTC
  - 26be306b5c Merge pull request #40752 from Enquier/nova_ssl_2
  - 817f49296e fixing lint errors in keystone auth error
  - f683636c61 fix trailing whitespace
  - 4a70b8c0cc fixing minor error in security_groups security groups parser had incorrect split action which caused errors
  - c9d68e5ed adding note in documentation
  - c24de3fba adding support for cacert verification
  - bfa5fe322d Merge pull request #5 from saltstack/2016.11

- **ISSUE #40845:** (e-senthilkumar) /jobs call is broken in 2016.11.4 (refs: #40894)

- **PR #40894:** (senthilkumar-e) Fix for broken /jobs/<jid> in 2016.11.4 @ 2017-04-27 11:33:00 UTC
  - 0f2ec1e1d8 Merge pull request #40894 from senthilkumar-e/broken_jobs_api_fix
  - 2f55b26e08 Fixing the pylint issue
  - fb607bab75 Fix for broken /jobs/<jid> in 2016.11.4

- **PR #40876:** (BenoitKnecht) states: sqlite3: fix table_present with multi-line schema @ 2017-04-26 15:21:19 UTC
  - ea55e15367 Merge pull request #40876 from BenoitKnecht/fixed-sqlite3-table-present-with-multiline-schema
  - 2ca627d02d states: sqlite3: fix table_present with multi-line schema

- **ISSUE #40741:** (clinta) Regression in 2016.11.3. File.managed downloads every time. (refs: #40742)

- **PR #40742:** (clinta) Fix #40741 @ 2017-04-25 22:52:06 UTC
  - e09bafdbce Merge pull request #40742 from clinta/40741
  - 72bf5af9e6 Set sfn if cached_sum == source_sum

- **PR #40859:** (skizunov) Fix TCP Transport to work with Tornado 4.5 @ 2017-04-25 04:29:00 UTC
  - 52a49f6d74 Merge pull request #40859 from skizunov/develop2
  - 958edace8 Fix TCP Transport to work with Tornado 4.5

- **PR #40862:** (gtmanfred) status should be an int @ 2017-04-24 23:11:31 UTC
  - ca80f287af Merge pull request #40862 from gtmanfred/2016.11
  - 87ec1da771 status should be an int

- **PR #40865:** (rallytime) [2016.11] Merge forward from 2016.3 to 2016.11 @ 2017-04-24 23:06:28 UTC
- c95341959d Merge pull request #40865 from rallytime/merge-2016.11
- 53ad3159cc Merge branch '2016.3' into '2016.11'
- 2a71dc3552 Merge pull request #40854 from Ch3LL/11.4_release_2016.3
  - 889540a313 [2016.3] Bump latest release version to 2016.11.4
- b5f67f0750 Merge pull request #40822 from lordcirth/fixed-rsync-changes
  - 1b304bb476 Extra space before inline comment
  - ea4592de91 rsync.py: Don't return changes when clean

**PR #40855:** (Ch3LL) [2016.11] Bump latest release version to 2016.11.4 @ 2017-04-24 17:37:47 UTC
- 7861f12df8 Merge pull request #40855 from Ch3LL/11.4_release_2016.11
- e7b604339d [2016.11] Bump latest release version to 2016.11.4

**PR #40817:** (isbm) Some UT for cloud @ 2017-04-23 10:01:40 UTC
- 25b62ae47 Merge pull request #40817 from isbm/isbm-skip-false-values-from-preferred-ip-201611
- 7c5714b90b Describe debug information
- e0210ff8cb Reformat idents, fix typos
- fb777e3f3e PEP8: fix unused variable
- b2e85de85d Fix lint, typos and readability
- 116c96a4b7 Fix UT parameter changes
- 61558f08e7 Lintfix E0602
- ed84420d0 Add unit test for node ip filtering
- 82582cff77 Skip test, if libcloud is not around
- f005d53c56 Fix name error exception
- b668e60b4c Move out nested function for testing purposes
- 5e574a24d9 Add unit test for nova connector
- 181d0780d0 Lintfix
- 8e9ce1a68d Move out nested function to be unit-testable
- cd43805770 Add initial unit test for openstack cloud module
- 177f31446d Add fake preferred IP function for testing
- d1aeb13ac7 Move out openstack's nested function to be testable

**PR #40824:** (rallytime) [2016.11] Merge forward from 2016.3 to 2016.11 @ 2017-04-21 20:03:10 UTC
- 50ddf219a6 Merge pull request #40824 from rallytime/merge-2016.11
- f31f9512b8 Merge branch '2016.3' into '2016.11'
  - 3b9ebeb98f Merge pull request #40754 from lordcirth/fixed-uppercase-checksums
    - c80c792704 remove too many newlines for lint
    - a7df8f375e8 file.manage_file: uppercase checksums now work

**PR #40811:** (UtahDave) get config_dir based off conf_file if __opts__['config_dir'] doesn't exist (refs: #40930) @ 2017-04-21 17:44:42 UTC
- d6e26d18cb Merge pull request #40811 from UtahDave/2016.11local
- 9f6e2e9c92 get config_dir based off conf_file

- **PR #40820:** (gtmanfred) remove deprecated firstgen rackspace cloud driver @ 2017-04-21 17:42:19 UTC
  - dded05b7d Merge pull request #40820 from gtmanfred/2016.11
  - b60a8d013a remove rackspace from index
  - 559a1d8b6 remove deprecated firstgen rackspace cloud driver

- **PR #40797:** (rallytime) [2016.11] Merge forward from 2016.3 to 2016.11 @ 2017-04-20 19:42:04 UTC
  - 2ab42489df Merge pull request #40797 from rallytime/merge-2016.11
  - 22500a7261 Merge branch '2016.3' into '2016.11'
    * 623e2eb61f Merge pull request #40791 from a-powell/s3-util-get-memory-fix
      * 36f6521014 Merge remote-tracking branch 'upstream/2016.3' into s3-util-get-memory-fix
      * 04637cd4eb Fixing objects being loaded into memory when performing a GET request with a local file specified.

- **PR #40800:** (rallytime) Back-port #40720 to 2016.11 @ 2017-04-20 19:41:41 UTC
  - PR #40720: (oeufette) Call tornado.httputil.url_concat compatibly (refs: #40800)
  - ced839f841 Merge pull request #40800 from rallytime/wp-40720
  - 6c0124ae21 Call tornado.httputil.url_concat compatibly

- **ISSUE #19137:** (jeffclay) MSI installer(s) for windows minion (refs: #40716)

- **PR #40785:** (alexproca) win_pkg: backport 2016.11 add msiexec override to enable selection of 32 or 64 msiexec.exe @ 2017-04-20 16:45:14 UTC
  - PR #40716: (alexproca) win_pkg: add msiexec override to enable selection of 32 or 64 msiexec.exe (refs: #40785)
  - 5388fa7a2 Merge pull request #40785 from alexproca/backport-winexec-selection
  - 91cafd5094 Add option to select 32 or 64 version of msiexec

- **PR #40796:** (terminalmage) Fix inaccurate nodegroup docs @ 2017-04-20 16:08:22 UTC
  - f0f135c71d Merge pull request #40796 from terminalmage/fix-nodegroup-docs
  - f99259a6eb Fix inaccurate nodegroup docs

- **ISSUE #40737:** (jf) Fix consul_pillar documentation: 'root=' canNOT start with a slash (refs: #40760)

- **PR #40769:** (rallytime) Back-port #40760 to 2016.11 @ 2017-04-19 20:23:22 UTC
  - PR #40760: (jf) Fix 'root=/...' references in consul_pillar documentation: 'keys should not start with a forward slash!' (refs: #40769)
  - d8f78550d9 Merge pull request #40769 from rallytime/wp-40760
  - 71ac15fc4c Fix 'root=/...' references in consul_pillar documentation: 'keys should not start with a forward slash!'

- **PR #40756:** (rallytime) [2016.11] Merge forward from 2016.3 to 2016.11 @ 2017-04-19 17:47:51 UTC
  - 61f8de43df Merge pull request #40756 from rallytime/merge-2016.11
  - 0e087323f1 Merge branch '2016.3' into '2016.11'
  - f4f3ee69ba Merge pull request #40721 from gtmanfred/2016.3
* 58b88859b3 unset the bitwise instead of toggle

• ISSUE #29602: (multani) cloud.action start raises "got an unexpected keyword argument 'kwargs" (refs: #40735)

• PR #40735: (rallytime) Handle stacktraces in cloud.action function in module and runner @ 2017-04-18 20:05:06 UTC
  - 3557b5140e Merge pull request #40735 from rallytime/handle-cloud-traces
  - 87154a9954 Use log.error instead of log.err
  - b35bf919a3 Handle stacktraces in cloud.action function in module and runner

• PR #40745: (cro) Backport Add support for specifying a datastore for new disks. PR #36457 @ 2017-04-18 20:00:51 UTC
  - PR #36457: (cro) Add support for specifying a datastore for new disks. (refs: #40745)
  - e700d8183b Merge pull request #40745 from cro/vmware_disk_datastore_bp
  - 1460f82ce4 Remove leftover conflict markers (oops! :-/ )
  - b266e652dd Remove leftover conflict markers (oops! :-/ )
  - 096f063464 Remove leftover conflict markers (oops! :-/ )
  - d24078d1a0 Add docs for "datastore" param for disks
  - 500d6b281d Document validity of a datastore key inside a disk definition.
  - 7608b10225 Add support for specifying a datastore for new disks.

• PR #40740: (cro) Backport pr #39802 to add random_startup_delay @ 2017-04-18 19:47:55 UTC
  - PR #39802: (cachedout) A random startup delay option for minions (refs: #40740)
  - 78dbab01dc Merge pull request #40740 from cro/minion_delay_start
  - 2ab95b7dd5 Set minion test to use default opts
  - 785e6060a9 Add requested docs
  - 8ab321f934 A random startup delay option for minions

• PR #40728: (rallytime) [2016.11] Merge forward from 2016.3 to 2016.11 @ 2017-04-17 21:13:15 UTC
  - a48ec4a5c Merge pull request #40728 from rallytime/merge-2016.11
  - 0a5e05a6e5 Merge branch '2016.3' into '2016.11'
  - bf8bb0fd6 Merge pull request #40719 from rallytime/bp-40714
    * d6c436246b Make salt.modules.pw_user.get_loginclass return string rather than dict
  - 4145d33e46 Merge pull request #40718 from terminalmage/fix-docstring
  - 14e8b85da5 Fix copypasta in the pw_user docstring

• ISSUE #36967: (gmykhailiuta) S3fs objects list gets truncated (refs: #40707)

• PR #40707: (gtmanfred) Use markers when s3 bucket list is truncated @ 2017-04-17 16:45:21 UTC
  - c5cbfc2e63 Merge pull request #40707 from gtmanfred/2016.11
  - 1932f7265d Use markers when s3 bucket list is truncated
30.2.63 Salt 2016.11.6 Release Notes

Version 2016.11.6 is a bugfix release for 2016.11.0.

Statistics

- Total Merges: 137
- Total Issue References: 58
- Total PR References: 153

Changelog for v2016.11.5..v2016.11.6

Generated at: 2018-05-27 20:18:17 UTC

- **PR #41861**: (twangboy) Fix problems with get_rule and delete_rule @ 2017-06-20 20:37:23 UTC
  - afc61ffe63 Merge pull request #41861 from twangboy/fix_win_firewall
  - 78892074f5 Merge pull request #41861 from twangboy/fix_win_firewall

- **ISSUE #41778**: (frogunder) 2016.11.6 - TCP Transport gives Exception (refs: #41787)

- **PR #41787**: (skizunov) Fix #41778 @ 2017-06-20 20:11:23 UTC
  - PR #41436: (skizunov) TCP transport: Fix occasional errors when using salt command (refs: #41787)
  - 938d4fdff1 Merge pull request #41787 from skizunov/develop3
  - 2ff20cde Fix #41778

- **PR #41812**: (skizunov) TCP: Fix salt-master in bad state if remote side closed connection @ 2017-06-20 19:46:53 UTC
  - 03b6ae5ea8 Merge pull request #41812 from skizunov/develop4
  - 736420eb83 TCP: Fix salt-master in bad state if remote side closed connection

- **PR #41857**: (dmurphy18) Modified support for deprecated netstat being removed by utilizing ss @ 2017-06-20 18:46:27 UTC
  - cf2252bcea Merge pull request #41857 from dmurphy18/netstat_fix
  - 017fd0bc53 Modified support for deprecated netstat being removed by utilizing ss

- **ISSUE #40878**: (joewreschnig) SSH modules spam warning about MD5 fingerprints when there aren’t any (refs: #41837)

- **ISSUE #40005**: (vutny) ssh_known_hosts.present does not support SHA256 key fingerprints (refs: #40543)

- **PR #41837**: (rallytime) Add fingerprint_hash_type option to ssh_auth state and related functions @ 2017-06-20 18:14:53 UTC
  - PR #40543: (rallytime) Add the "fingerprint_hash_type" option to ssh state and module (refs: #41837)
  - 12ec5f9f23 Merge pull request #41837 from rallytime/fixed-40878

30.2. Previous Releases
- 48ff5d2a62 Add fingerprint_hash_type option to ssh_auth state and related functions

- **PR #41839**: (cro) Extend proxy to jinja @ 2017-06-19 23:03:00 UTC
  - c7fc30f82 Merge pull request #41839 from cro/extend_proxy_to_jinja
  - 172d3520ea Merge branch 'extend_proxy_to_jinja' of github.com:cro/salt into extend_proxy_to_jinja
    - 2e4a0633da Extend __proxy__ to jinja as proxy (like __salt__->salt)
    - 2ffad2af35 Extend __proxy__ to jinja as proxy (like __salt__->salt)

- **ISSUE #41733**: (sumeetisp) Salt Rest Api call (refs: #41786)

- **ISSUE #40845**: (e-senthilkumar) /jobs call is broken in 2016.11.4 (refs: #41786)

- **ISSUE #38962**: (gstachowiak) Broken /jobs in salt-api in salt 2016.11.1 (Carbon) (refs: #39472)

- **PR #41786**: (whiteinge) Runner arg parsing regressions @ 2017-06-19 23:00:07 UTC
  - **PR #39472**: (whiteinge) Update _reformat_lowtonotrunkwargdicts through parse_input (refs: #41786)
  - 58387b127a Merge pull request #41786 from whiteinge/runner-arg-parsing-regressions
  - bf15c0b5f Restore sending __current_eauth_* through to the function
  - 6be975da2c Fix regressions from not calling load_args_and_kwargs
  - 9d1cc1a176 Add test to check that runners ignore invalid kwARGS

- **PR #41776**: (gtmanfred) npm 5.0.0 added a second line after fsevents @ 2017-06-19 16:53:43 UTC
  - be0e9abed6 Merge pull request #41776 from gtmanfred/2016.11
  - 733a2279ca npm 5.0.0 added a second line after fsevents

- **ISSUE #32400**: (rallytime) Document Default Config Values (refs: #41783)

- **PR #41783**: (rallytime) Add a bunch of config options to the various master/minion files that are missing @ 2017-06-19 16:42:54 UTC
  - d94d4e4d19 Merge pull request #41783 from rallytime/config-doc-updates
  - c828ad803a Add a bunch of config options to the various master/minion files that are missing

- **PR #41816**: (twangboy) Upgrade psutil to version 5.2.2 @ 2017-06-17 01:51:29 UTC
  - 2c681887d3 Merge pull request #41816 from twangboy/update_psutil_req
  - 8b4e3ad77d Upgrade psutil to version 5.2.2

- **ISSUE #41785**: (UtahDave) Using master tops without a top.sls file causes extra errors in minion log (refs: #41803)

- **PR #41803**: (terminalmage) Don't log an error when no top.sls is found @ 2017-06-16 22:49:08 UTC
  - 3e5fe7ca4b Merge pull request #41803 from terminalmage/issue41785
  - f9f4d49f05 Don't log an error when no top.sls is found

- **PR #41801**: (terminalmage) Don't take hostname from name param when creating docker container (2016.11 branch) @ 2017-06-16 17:02:02 UTC
  - d12bc4ee68 Merge pull request #41801 from terminalmage/issue41781-2016.11
  - 8236d3e1c3 Don't take hostname from name param when creating docker container (2016.11 branch)

- **PR #41768**: (rallytime) Manually back-port the changes in PR #41615 @ 2017-06-15 20:41:45 UTC
  - **PR #41615**: (Ch3LL) Fix get_hwclock_aix test on MacOSX (refs: #41768)
- 87e2c72d94 Merge pull request #41768 from rallytime/bp-41615
- b6cc0b6bf0 Manually backport the changes in PR #41615

**PR #41740: (terminalmage)** Fix spurious error when glob/regex used in publisher_acl @ 2017-06-15 15:14:56 UTC
  - 36cb223ab2 Merge pull request #41740 from terminalmage/zd1532
  - e5f3d08751 Fix spurious error when glob/regex used in publisher_acl

**PR #41749: (terminalmage)** Fix bug in pkg_resource.parse_targets when version passed @ 2017-06-15 15:05:52 UTC
  - 126a36747b Merge pull request #41749 from terminalmage/parse_targets
  - 698806fb09 No need to manually create pkg_params dict when name and version passed
  - 7484bcc6c6 parse_targets: include version in packed return data

**PR #41753: (rallytime)** Back-port #41449 to 2016.11 @ 2017-06-14 22:16:10 UTC
  - PR #41449: (sebw) Fix state "svn.latest" diff output in test mode (refs: #41753)
  - 2c24012ded Merge pull request #41753 from rallytime/bp-41449
  - fae41c2875 Adjusting SVN unit test
  - eac6b151eb Improved SVN output in test mode

**PR #41750: (rallytime)** [2016.11] Merge forward from 2016.3 to 2016.11 @ 2017-06-14 22:15:41 UTC
  - e685858269 Merge pull request #41750 from rallytime/merge-2016.11
  - 89834e49c2 Merge branch '2016.3' into '2016.11'
    * c5a79a1ea6 Merge pull request #41695 from xiaoyunfei/fixRecursion
      * c54fde69a0 fix spell error
      * bc855b4711 fix swallow exception
      * c0b1f57fc0 add exception
      * aacf9f0a44 fix maximum recursion depth exceeded
    * 4b43ba3366 Merge pull request #41585 from cro/sign_minion_messages
      * 628f709c3c Correct test--caching requires files on disk but the test just supplies what would have been read from disk.
      * 687872a488 Lint
      * dadf4b851c Add documentation to the example master and minion configuration files. Move minion event signing to a saner place. Enable dropping messages when signature does not verify or when minion is not adding the signature to its payloads.
      * e44673cdae Add caching of key.
      * c3917d1e91 Fat finger fix.
      * 3b9326fda7 Sign_minion_messages support

**PR #41756: (Ch3LL)** Add Change Log to 2016.11.6 Release Notes @ 2017-06-14 20:57:08 UTC
  - 36cc8f1e35 Merge pull request #41756 from Ch3LL/2016.11.6_release
  - fa368f21ac Add Change Log to 2016.11.6 Release Notes

**ISSUE #40155: (grichmond-salt)** State module boto_vpc not working with boto 2 (refs: #41692)
• **PR #41692**: (rallytime) Add boto and boto3 version dependencies to boto_vpc state docs @ 2017-06-14 19:05:07 UTC
  - edcacf6a26 Merge pull request #41692 from rallytime/fix-40155
  - 539c1b0692 Add boto and boto3 version dependencies to boto_vpc state docs
• **ISSUE #39918**: (kivoli) Enabling list merging leads to multiplying of unique list items (refs: #40902)
• **PR #40902**: (lorenegordon) Removes duplicates when merging pillar lists and adds pillar.get override for pillar_merge_lists @ 2017-06-14 18:39:09 UTC
  - bdaeb55a77 Merge pull request #40902 from lorenegordon/pillar-get-merge-lists
  - 6e35673fe3 Preserves order when removing duplicates
  - 18eda7084c Updates list merge tests to check for sorted, unique lists
  - 74bf91f99e Sorts the list when removing duplicates
  - 26a4b1b17f Adds pillar.get param to control list merge/overwrite behavior
  - ed04bae94c Removes duplicate values when merging lists
• **ISSUE #32743**: (tonybaloney) Issue with salt-cloud on OpenSUSE (refs: #41723)
• **PR #41723**: (rallytime) Support apache-libcloud work-around for issue #32743 for versions older than 2.0.0 @ 2017-06-14 17:13:38 UTC
  - PR #40837: (tonybaloney) Upgrade apache-libcloud package dependency for 2.0 (refs: #41723)
  - 203ec6730f Merge pull request #41723 from rallytime/libcloud-support
  - 1e9a06000b Bump version check down to 1.4.0 and use distutils.version lib
  - a30f654b04 Support apache-libcloud work-around for issue #32743 for versions older than 2.0.0
• **ISSUE #41654**: (Enquier) Nova Cloud module doesn’t work for python-novaclient 8.0.0+ (refs: #41655)
• **PR #41655**: (Enquier) Allow Nova cloud module to set a specific floating ip address @ 2017-06-14 16:44:05 UTC
  - 62dbf5083c Merge pull request #41655 from Enquier/nova-cloud-set_ip_address
  - 293bc64158 Removed empty debug log
  - 3d9871fe11 Cleaning up, removing debugging tests
  - c78e5f6ea9 Fixing error message
  - 404dfbb6b8 Debugging variable format
  - 6fa3b976a5 removing string call
  - 005995e1b0 modifying variable calls
  - 9e5e7a38ec Testing variable changes
  - 05e240f37f Debugging Format of floating_ip variable
  - 366aca00a8 Adding Max version check for Nova since Cloud no longer operates at higher versions
  - 6f66c9d10c Fixing response of floating_ip_show to align with other floating ip's. Spelling fix
  - 58459adbe8 Adding ability to set a Floating IP by a specific IP address
• **PR #41731**: (terminalmage) Clarify that archive_format is required pre-2016.11.0 @ 2017-06-14 15:05:21 UTC
  - 82eab84883 Merge pull request #41731 from terminalmage/docs
  - d3f4ea1a84 Clarify that archive_format is required pre-2016.11.0

Chapter 30. Release Notes
• PR #41663: (skizunov) Don't invoke lspci if enable_lspci is False @ 2017-06-13 21:19:42 UTC
  - b6d27beac2 Merge pull request #41663 from skizunov/develop3
  - 154d6ce59e Don't invoke lspci if enable_lspci is False

• ISSUE #40446: (sumeetisp) [Documentation] include list of kwargs for ec2.create_volume in cloud driver (refs: #41693)

• PR #41693: (rallytime) Document available kwargs for ec2.create_volume function @ 2017-06-13 19:51:10 UTC
  - 46b85dc4b Merge pull request #41693 from rallytime/fix-40446
  - 569eb2b7e Document available kwargs for ec2.create_volume function

• ISSUE #41691: (jdonofrio728) Can't pass integers as cmd.run environment variables (refs: #41696)

• PR #41696: (terminalmage) Handle a few edge/corner cases with non-string input to cmd.run @ 2017-06-13 18:48:56 UTC
  - aab55d304a Merge pull request #41696 from terminalmage/issue41691
  - 0623e40d33 Apparently some funcs are passing tuples to cmd.run *
  - cdbf94ce Handle a few edge/corner cases with non-string input to cmd.run

• PR #41697: (terminalmage) Resubmit #41545 against 2016.11 branch @ 2017-06-13 16:10:37 UTC
  - PR #41545: (kiorky) Make print_cli resilient on slow systems (refs: #41697)
  - 97897d7a7a Merge pull request #41697 from terminalmage/pr-41545
  - faaacf88bf Use error name instead of error number
  - 7eacda5cbf Make print_cli resilient on slow systems

• ISSUE #40605: (sumeetisp) Salt-run manage.bootstrap (refs: #41711)

• PR #41711: (rallytime) Update deprecated version info in manage.bootstrap func for root_user @ 2017-06-13 16:04:32 UTC
  - 09260d7ec0 Merge pull request #41711 from rallytime/fix-40605
  - 903c2ffca5 Update deprecated version info in manage.bootstrap fucn for root_user

• ISSUE #39668: (mirceaulinic) Master scheduled job not recorded on the event bus (refs: #41658)

• PR #41658: (garethgreenaway) Fixes to the salt scheduler @ 2017-06-13 16:00:57 UTC
  - d563b3e345 Merge pull request #41658 from garethgreenaway/39668_schedule_runners_fire_events
  - d688a1cd88 Enable jobs scheduled on the master to fire their return data to the event bus

• PR #41706: (twangboy) Add missing batch files @ 2017-06-13 15:32:53 UTC
  - 3c3b934b7 Merge pull request #41706 from twangboy/batch_files
  - 0d4be0220b Add batch files for master

• PR #41710: (rallytime) [2016.11] Merge forward from 2016.3 to 2016.11 @ 2017-06-13 15:11:38 UTC
  - 1afc4adc5a Merge pull request #41710 from rallytime/merge-2016.11
  - 5150916556 Merge branch '2016.3' into '2016.11'
  - 5058b0de1f Merge pull request #41707 from terminalmage/master-tops-docs
  - 6ec9dfb7f3 Update version in master-tops docs
  - 1c1964d807 Merge pull request #41689 from yannj-fr/fix-41688
* a47edccd2 Fix #41688 : fix mkfs command linux-swap support

- PR #41702: (gtmanfred) npm 5 and greater requires --force for cache clean @ 2017-06-12 23:21:56 UTC
  - 5d763b9b7f Merge pull request #41702 from gtmanfred/2016.11
  - 8bd19fcc17 fix version number
  - 0fa380f75c npm 5 and greater requires --force for cache clean

- ISSU #41668: (yannj-fr) Parted modules mkfs command does not work with NTFS (refs: #41670)

- PR #41704: (rallytime) Back-port #41670 to 2016.11 @ 2017-06-12 23:20:31 UTC
  - PR #41670: (yannj-fr) fixes #41668 ntfs case problem in parted module (refs: #41704)
  - f6519e7f80 Merge pull request #41704 from rallytime/bp-41670
  - 8af8792d1 fixes #41668 ntfs case problem in parted module

- ISSUE #39939: (martinschipper) Relative symlinks are changed with file.recurse 2016.11.3 (refs: #41700)

- PR #41700: (terminalmage) roots: return actual link destination when listing symlinks @ 2017-06-12 22:07:03 UTC
  - 0b89377dce Merge pull request #41700 from terminalmage/issue39939
  - bdb265a6b roots: return actual link destination when listing symlinks

- PR #41699: (rallytime) Remove note about version incompatibility with salt-cloud @ 2017-06-12 19:44:28 UTC
  - 7c4f79651 Merge pull request #41699 from rallytime/troubleshooting-doc-update
  - c91ca5f809 Remove note about version incompatibility with salt-cloud

- ISSUE #40410: (DarrenDai) Targeting Minions by IP Range via restful API doesn't work (refs: #41694)

- PR #41694: (rallytime) Add ipcidr options to "Allowed Values" list in LocalClient expr_form docs @ 2017-06-12 19:06:16 UTC
  - d68a316b8 Merge pull request #41694 from rallytime/fix-40410
  - 6de9da1d5d Add ipcidr options to "Allowed Values" list in LocalClient expr_form docs

- ISSUE #41365: (lubyou) file.managed chokes on windows paths when source_hash is set to the URI of a file that contains source hash strings (refs: #41659)

- PR #41659: (lubyou) Use re.escape to escape paths before handing them to re.match @ 2017-06-12 18:10:53 UTC
  - 80d4a3ab98 Merge pull request #41659 from lubyou/41365-fix-file-managed
  - d49a1579b0 Use re.escape to escape paths, before handing them to re.match
  - ac240faca use correct variable
  - c777eba2c1 Use re.escape to escape paths, before handing them to re.match

- PR #41661: (whiteinge) Add note about avoiding the -i flag for the /keys endpoint @ 2017-06-09 15:03:40 UTC
  - 564df5fd9d3 Merge pull request #41661 from whiteinge/rest_cherrypy-keys-headers
  - a66f2e9d3e Add note about avoiding the -i flag for the /keys endpoint

- ISSUE #41651: (Sakorah) pkg.installed fails when unholding and test=true (refs: #41660)

- PR #41660: (garethgreenaway) Fix to modules/aptpkg.py for unheld @ 2017-06-09 14:53:23 UTC
  - 384243e3e Merge pull request #41660 from garethgreenaway/41651_fixing_aptpkg_held_unheld_with_test
  - 30da2370a4 Fix when test=True and packages were being set to unheld.
PR #41656: (rallytime) Back-port #41575 to 2016.11 @ 2017-06-08 22:43:23 UTC
  - PR #41575: (dschaller) Fix 41562 (refs: #41656)
    - a308b960d8 Merge pull request #41656 from rallytime/bp-41575
    - 4374e6b034 Replace "tbd" with release version information
    - 81413896d1 Lint: Add index numbers to format [] calls
    - 384570384e only list top level npm modules during (un)install
PR #41456: (bdrung) Fix pkgrepo.managed always return changes for test=true @ 2017-06-08 18:21:05 UTC
  - e6d37b5f3e Merge pull request #41456 from bdrung/fix-pkgrepo.managed-changes-check
  - d3ce7bf05f Fix pkgrepo.managed always return changes for test=true
  - 1592687294 Document aptpkg architectures parameter
ISSUE #41478: (jf) security / information leak with consul pillar when subsitution values are not present (refs: #41530)
PR #41530: (gtmanfred) Set default for consul_pillar to None @ 2017-06-08 18:13:15 UTC
  - 721e56bcb9 Merge pull request #41530 from gtmanfred/2016.11
  - 2a4633ce16 Set default for consul_pillar to None
ISSUE #41629: (lubyou) salt.states.cmd.script: Parameter "args" is overwritten if "name/id" contains spaces (refs: #41638)
PR #41638: (gtmanfred) don't overwrite args if they are passed to the script @ 2017-06-08 17:48:48 UTC
  - 8926d1c731 Merge pull request #41638 from gtmanfred/cmdscript
  - 6c7d68b97d don't overwrite args if they are passed to the script
PR #41639: (dmurphy18) Update notrim check, netstat takes minutes if large number connections @ 2017-06-07 23:03:24 UTC
  - eb9b8694 Merge pull request #41639 from dmurphy18/minion_netstat_check
  - 7ab3319090 Update notrim check, netstat takes minutes if large number connections - 260K
ISSUE #38894: (amendlik) salt.runner and salt.wheel ignore test=True (refs: #41309, #41611)
PR #41611: (garethgreenaway) Additional fixes to states/saltmod.py @ 2017-06-07 22:58:24 UTC
  - 2913a33b27 Merge pull request #41611 from garethgreenaway/41309_right_return_res
  - fda41ede76 Updating result values to be None for test cases.
  - 003f2d9323 Following the documentation, when passed the test=True argument the runner and wheel functions should return a result value of False.
ISSUE #41626: (ruiaylin) When onlyif and bg are used together the (refs: #41637)
PR #41637: (gtmanfred) never run bg for onlyif or unless cmd states @ 2017-06-07 17:37:47 UTC
  - 334a5fc2a0 Merge pull request #41637 from gtmanfred/cmd
  - 40b6c6249 never run bg for onlyif or unless cmd states
PR #41255: (lordcirth) linux_sysctl.default_config(): only return path, don't create it @ 2017-06-07 14:13:07 UTC
  - 34dd9e862 Merge pull request #41255 from lordcirth/fix-sysctl-test-11
  - 0089be4440 linux_sysctl: use dirname() as suggested
- 262d95e41d linux_sysctl.default_config(): only return path, don’t create it
- 277232b3ac linux_sysctl.persist(): create config dir if needed

**ISSUE #35481**: (giany) global_identifier does not work when using Softlayer driver (refs: #41551)

**PR #41616**: (rallytime) Back-port #41551 to 2016.11 @ 2017-06-06 22:44:09 UTC

- PR #41551: (darenjacobs) Update __init__.py (refs: #41616)
- 4cf577771b Merge pull request #41616 from rallytime/bp-41551
- 58bca96328 Update __init__.py

**PR #41552**: (Enquier) Adding logic so that update_floatingip can dissassociate floatingip’s @ 2017-06-06 18:25:56 UTC

- 846ca54688 Merge pull request #41552 from Enquier/neutron-floatingip-remove
- aeed51c1e3 Adding port=None default and documentation
- fcc0651e4 Adding logic so that update_floatingip can dissassociate floatingip’s Previously update_floatingip would cause an error if port is set to None.

**PR #41569**: (gtmanfred) Check all entries in result @ 2017-06-06 18:18:17 UTC

- b720ebcb73 Merge pull request #41569 from gtmanfred/fix_test_result_check
- 19ea5481b6 remove test that never passed
- e2a4d5e1e2 Check all entries in result

**ISSUE #41540**: (UtahDave) archive.extracted fails on second run (refs: #41599)

**PR #41599**: (garethgreenaway) Fixes to modules/archive.py @ 2017-06-06 18:02:14 UTC

- d9546c6283 Merge pull request #41599 from garethgreenaway/41540_fixes_to_archive_module
- 66a136e6d8 Fixing issues raised in #41540 when a zip file is created on a Windows system. The issue has two parts, first directories that end up in the archive end up in the results of aarchive.list twice as they show up as both files and directories because of the logic to handle the fact that Windows doesn’t mark them as directories. This issue shows up when an extraction is run a second time since the module verified the file types and the subdirectory is not a file. The second issue is related to permissions, if Salt is told to extract permissions (which is the default) then the directory and files end up being unreadable since the permissions are not available. This change sets the permissions to what the default umask for the user running Salt is.

**ISSUE #40950**: (idokaplan) Import certificate (refs: #41453, #41383)

**PR #41453**: (peter-funktionIT) Update win_pki.py @ 2017-06-06 17:15:55 UTC

- PR #41383: (peter-funktionIT) Update win_pki.py (refs: #41453)
- 10ac80ee96 Merge pull request #41453 from peter-funktionIT/fix_win_pki_state_import_cert
- d146fd029c Update win_pki.py
- e8e3ef569 Update win_pki.py

**PR #41557**: (dmurphy18) Add symbolic link for salt-proxy service similar to other service files @ 2017-06-06 17:13:52 UTC

- 3335fbc7d Merge pull request #41557 from dmurphy18/fix-proxy-service
- ffe492d6a9 Add symbolic link salt-proxy service similar to other service files

**PR #41597**: (rallytime) Back-port #41533 to 2016.11 @ 2017-06-06 15:15:09 UTC
- PR #41533: (svinota) unit tests: add pyroute2 interface dict test (refs: #41597)
- 65ed230f45 Merge pull request #41597 from rallytime/bp-41533
- 535b8e8d8e Update new pyroute2 unit test to conform with 2016.11 branch standards
- 5c86dee73c unit tests: test_pyroute2 -- add skipIf
- 026b39493f unit tests: add encoding clause into test_pyroute2
- 9ab203d54b unit tests: fix absolute imports in test_pyroute2
- 1f507cafa7 unit tests: add pyroute2 interface dict test

- PR #41596: (rallytime) Back-port #41487 to 2016.11 @ 2017-06-06 02:44:17 UTC
  - PR #41487: (svinota) clean up change attribute from interface dict (refs: #41596)
  - bf8aed153d Merge pull request #41596 from rallytime/bp-41487
  - 7b497d9ec6 clean up change attribute from interface dict

- ISSUE #41435: (seanjnkns) 2016.11: Keystone.endpoint_present overwrites all interfaces (refs: #41509)

- PR #41509: (seanjnkns) Add keystone V3 API support for keystone.endpoint_present|absent @ 2017-06-03 03:01:05 UTC
  - cc6c98a8d8 Merge pull request #41509 from seanjnkns/fix-keystone-v3-endpoint_present
  - 095e5949a3 Fix unit tests for PR #41509
  - eb7ef3c856 Add keystone V3 API support for keystone.endpoint_present|get, endpoint_absent|delete.

- ISSUE #38061: (Ch3LL) x509.crl Managed ValueError when digest is not specified in the module (refs: #41539)

- PR #41539: (gtmanfred) allow digest to be empty in create_crl @ 2017-06-02 17:00:04 UTC
  - 0a08649637 Merge pull request #41539 from gtmanfred/x509
  - 0989be8919 allow digest to be empty in create_crl

- ISSUE #41154: (mephi42) archive.extracted outputs password embedded in archive URL (refs: #41561)

- PR #41561: (terminalmage) Redact HTTP basic authentication in archive.extracted @ 2017-06-02 15:33:14 UTC
  - 3ae8336895 Merge pull request #41561 from terminalmage/issue41154
  - cbf8acbafe Redact HTTP basic authentication in archive.extracted

- PR #41436: (skizunov) TCP transport: Fix occasional errors when using salt command (refs: #41787) @ 2017-06-01 16:37:43 UTC
  - 398406be4e Merge pull request #41436 from skizunov/develop2
  - 07d5862773 unit.transport.tcp_test: Clean up channel after use
  - 4b6aec7154 Preserve original IO Loop on cleanup
  - 892c6d4d24 TCP transport: Fix occasional errors when using salt command

- ISSUE #41335: (syphernl) [2016.11.5] ssh_auth.present: IndexError: list index out of range (refs: #41337)

- PR #41337: (Foxlik) Fix #41335 - list index out of range on empty line in authorized_keys @ 2017-05-31 19:59:17 UTC
  - 916feb64f modify ssh_test.py, to check empty lines and comments in authorized_keys #41335
  - 011d6d65e7 Fix #41335 - list index out of range on empty line in authorized_keys
• PR #41512: (twangboy) Use psutil where possible in win_status.py @ 2017-05-31 19:56:00 UTC
  - 1ace72d871 Merge pull request #41512 from twangboy/fix_win_status
  - 582d90b484 Get psutil import
  - fd88b277f Remove unused imports (lint)
  - 41a39df00 Use psutil where possible

• PR #41490: (t0fik) Backport of SELinux module installation and removal @ 2017-05-31 19:38:00 UTC
  - 683cc5f414 Merge pull request #41490 from jdsieci/2016.11_selinux
  - e2fbada1c1 Backport of SElinux module installation and removal

• PR #41522: (jettero) Sadly, you can’t have ‘.’s and ‘$’s in dict keys in a mongodb doc. @ 2017-05-31 15:55:24 UTC
  - 2e7e84b8f2 Merge pull request #41522 from jettero/mongodb-keys-are-stupid
  - 126485439 dang, thought I already got that. Apparently only got the bottom one. This should do it.
  - 7ca763518 ugh, forgot about this lint too. This one looks especially terrible.
  - c979988d8d forgot about the lint pass ... fixed
  - da0d9e4045 Sadly, you can’t have ‘.’s and ‘$’s in dict keys in a mongodb doc.

• ISSUE #41504: (mtkennerly) Can’t set REG_DWORD registry value larger than 0xFFFFFFFF (refs: #41506)

• PR #41506: (gtmanfred) check for integer types @ 2017-05-31 00:48:21 UTC
  - 30ad4fd9a0 Merge pull request #41506 from gtmanfred/2016.11
  - 5fe2e9bb5 check for integer types

• PR #41469: (Ch3LL) Fix keep_jobs keyerror in redis returner @ 2017-05-30 18:37:42 UTC
  - 06ef17dec3 Merge pull request #41469 from Ch3LL/fix_redis_error
  - 8ee1251a3a Fix keep_jobs keyerror in redis returner

• PR #41473: (twangboy) Fix win_firewall execution and state modules @ 2017-05-30 18:35:24 UTC
  - 7a09b2b678 Merge pull request #41473 from twangboy/fix_win_firewall
  - e503b455c3 Fix lint error
  - d3f0f8b2d2 Fix win_firewall execution and state modules

• PR #41499: (rallytime) [2016.11] Merge forward from 2016.3 to 2016.11 @ 2017-05-30 18:06:03 UTC
  - f635cb11c4 Merge pull request #41499 from rallytime/merge-2016.11
  - 20d893d97 Merge branch '2016.3' into '2016.11'
  - 964b1ee027 Merge pull request #41439 from terminalmage/salt-cp-base64
    - ebf6cc78c7 base64 encode binary data sent using salt-cp

• PR #41464: (rallytime) Back-port #39850 to 2016.11 @ 2017-05-26 21:22:44 UTC
  - PR #39850: (epcim) Fix endpoint handling per region (refs: #41464)
  - 83f1e48241 Merge pull request #41464 from rallytime/bp-39850
  - 9b4b751b2 Pylint fixes
  - 6db8915021 Endpoint handling per region, fixes #35874 - extend tests for multiple regions - region arg by default set to None - print verbose changes to be exec.
• PR #41443: (UtahDave) use proper arg number @ 2017-05-26 20:36:37 UTC
  - 960c5767fa Merge pull request #41443 from UtahDave/fix_args_masterpy
  - dbdcd275ca use proper arg number
• ISSUE #41341: (lorenzordon) TypeError traceback in network.system with retain_settings=True (refs: #41350)
• PR #41350: (lorenzordon) Supports quoted values in /etc/sysconfig/network @ 2017-05-26 16:22:03 UTC
  - 88c28c18c3 Merge pull request #41350 from lorenzordon/issue-41341
  - f26da7039 Supports quoted values in /etc/sysconfig/network
• PR #41398: (rallytime) [2016.11] Merge forward from 2016.3 to 2016.11 @ 2017-05-26 15:17:49 UTC
  - 824f2d3b69 Merge pull request #41398 from rallytime/merge-2016.11
  - 2941e9c923 Merge pull request #22 from terminalmage/merge-2016.11
    * 087a958afc base64 encode binary data sent using salt-cp
    - 503f925275 Add missing import
    - d2d9a3d29f Merge branch ‘2016.3’ into ’2016.11’
      * d617c9fe72 Merge pull request #41265 from terminalmage/issue41234
        - edf552fe9a Update PKG_TARGETS for RHEL-based distros
          - 0ccc7b9b20 yumpkg: fix latest_version() when showdupesfromrepos=1 set in /etc/yum.conf
      * 26bd914580 Merge pull request #41316 from Ch3LL/update_latest_2016.3
        - 520740682 [2016.13] Bump latest release version to 2016.11.5
      * 18898bd7df Merge pull request #41216 from terminalmage/issue16592
        - 0e15fbb1a Update salt-cp integration test to reflect recent changes
        - 10dc695cc4 Make salt-cp work with larger files
        - c078180539 Make KeyErrors more specific when interpreting returns
        - fc401c9eb4 Add generator functions for reading files
• PR #41442: (UtahDave) use proper arg number @ 2017-05-26 13:42:50 UTC
  - ec08064b99 Merge pull request #41442 from UtahDave/fix_args
  - 0324833c9e use proper arg number
• ISSUE #37824: (dxiri) SSLError Trying to use v3 API of Openstack Newton as provider. (refs: #41397, #40752)
• ISSUE #36548: (abonillasuse) openstack auth with nova driver (refs: #38647)
• PR #41397: (Enquier) Updating Nova/Neutron modules to support KeystoneAuth and SSLVerify @ 2017-05-25 21:16:14 UTC
  - PR #40752: (Enquier) Add ability to specify a custom SSL certificate or disable SSL verification in KeystoneAuth v3 (refs: #41397)
  - PR #38647: (gtmanfred) Allow novaclient to use keystoneauth1 sessions for authentication (refs: #41397)
  - 2209de9213 Merge pull request #41397 from Enquier/neutron-ssl-verify
  - d25d6c61d5 Small error in nova that was preventing execution
  - 0e7a10099a Updated module docs to include changes made
  - 05e0192665 Adding missing os_auth_system

30.2. Previous Releases 5087
• ISSUE #34460: (Ch3LL) Receive an error when using salt-api to call a runner (refs: #41409)

• PR #41409: (garethgreenaway) Fixes to ipc transport @ 2017-05-25 21:06:27 UTC
  – 14a58cf536 Merge pull request #41409 from garethgreenaway/34460_fixes_ipc_transport
  – 5613b72dfe Updating the exception variable to be more in line with the rest of the exception code
  – 41ee8b333 Fixing a potential lint issue
  – 760d561dfa Fixing a potential lint issue
  – c11b0d0d12 Changing the approaching and including an except for the action socket.error exception, then logging a trace log if error number is 0 and an error log otherwise.
  – 3f95056f4 Fixing lint issues.

• PR #41421: (UtahDave) Correct doc to actually blacklist a module @ 2017-05-25 21:01:46 UTC
  – 824428700d Merge pull request #41421 from UtahDave/fix_blacklist_docs
  – 5eb2757140 Correct doc to actually blacklist a module

• ISSUE #41353: (rmarchei) Orchestrate runner needs saltenv on 2016.11.5 (refs: #41431)

• PR #41431: (terminalmage) Fix regression in state orchestration @ 2017-05-25 18:44:53 UTC
  – b98d5e0d34 Merge pull request #41431 from terminalmage/issue41353
  – 16ea64ca64 Fix regression in state orchestration

• ISSUE #41338: (ricohouse) Exception not raised when running config compare and the device (Juniper) returns error (refs: #41429)

• PR #41429: (ricohouse) Issue #41338: Return false when compare config fails @ 2017-05-25 17:18:02 UTC
  – eeff3dd7fb Merge pull request #41429 from ricohouse/fix-compare-bug
  – 9b61665c4c Issue #41338: Return false when compare config fails

• PR #41414: (Ch3LL) Update bootstrap script version to latest release(v2017.05.24) @ 2017-05-24 19:51:49 UTC
  – 561a16cf34 Merge pull request #41414 from Ch3LL/update_bootstrap
  – d8c03eef60 Update bootstrap script version to latest release(v2017.05.24)

• PR #41336: (mcalmer) fix setting and getting locale on SUSE systems @ 2017-05-24 17:46:08 UTC
  – 88fd3c9ed9 Merge pull request #41336 from mcalmer/fix-locale-on-SUSE
  – f30f5c8a25 fix unit tests
  – 428baa9bce fix setting and getting locale on SUSE systems

• PR #41393: (rallytime) Back-port #41235 to 2016.11 @ 2017-05-24 16:08:56 UTC
  – PR #41235: (moio) rest_cherrypy: remove sleep call (refs: #41393)
- 4265959647 Merge pull request #41393 from rallytime/bp-41235
- c79c0e3f43 rest_cherrypy: remove sleep call

- **PR #41394**: (rallytime) Back-port #41243 to 2016.11 @ 2017-05-24 16:00:17 UTC
  - PR #41243: (arif-ali) Remove the keys that don’t exist in the new change (refs: #41394)
- 83f5469f49 Merge pull request #41394 from rallytime/bp-41243
- a5351302af Lint fix
- 05fadc0a3f Remove the keys that don’t exist in the new change

- **PR #41401**: (bdrung) Add documentation key to systemd service files @ 2017-05-24 15:49:54 UTC
  - 3a45ac30f0 Merge pull request #41401 from bdrung/systemd-service-documentation-key
  - 3f7f0895d Add documentation key to systemd service files

- **PR #41404**: (bdrung) Fix typos @ 2017-05-24 14:42:44 UTC
  - d34333c30b Merge pull request #41404 from bdrung/fix-typos
  - 33a78b82ec Fix typos

- **PR #41388**: (bdrung) Do not require sphinx-build for cleaning docs @ 2017-05-23 19:32:41 UTC
  - 3083764195 Merge pull request #41388 from bdrung/clean-doc-without-sphinx
  - 5b79a0a9f8 Do not require sphinx-build for cleaning docs

- **ISSUE #41362**: (automate-solutions) On AWS EC2: salt-cloud -f delete_keypair ec2 keyname=mykeypair doesn’t delete the keypair (refs: #41364)

- **PR #41364**: (automate-solutions) Fix issue #41362 invalid parameter used: KeyName.1 instead of KeyName @ 2017-05-23 17:32:10 UTC
  - 842875e590 Merge pull request #41364 from automate-solutions/fix-issue-41362
  - cfd8eb7a87 Set DescribeKeyPairs back to KeyName.1 according to documentation
  - 6a82dd6c6f Fix issue #41362 invalid parameter used: KeyName.1 instead of KeyName

- **ISSUE #40950**: (idokaplan) Import certificate (refs: #41453, #41383)

- **PR #41383**: (peter-funktionIT) Update win_pki.py (refs: #41453) @ 2017-05-23 17:26:43 UTC
  - 92f94e66bc Merge pull request #41383 from peter-funktionIT/fix-win_pki-get_cert_file
  - 4d9bd06176 Update win_pki.py

- **PR #41113**: (cro) Rescue proxy_auto_tests PR from git rebase hell @ 2017-05-22 17:05:07 UTC
  - PR #39575: (cro) WIP: Proxy auto test, feedback appreciated (refs: #41113)
  - 1ba95684a9 Merge pull request #41113 from cro/proxy_auto_test2
  - 19db038b99 Fix test--use proxy_config instead of minion_config
  - 7749e0c2d6 Change default proxy minion opts so only the proxy-specific ones are listed, and the rest are taken from DEFAULT_MINION_OPTS.
  - 106394c80c Lint.
  - 3be90cc9f4 Rescue proxy_auto_tests PR from git rebase hell

- **PR #41360**: (cro) Sysrc on FreeBSD, YAML overeager to coerce to bool and int @ 2017-05-22 15:54:31 UTC
  - 375892d910 Merge pull request #41360 from cro/sysrc_fix
• ISSUE #41190: (jheidbrink) Cannot extract tar.xz archive when it exceeds size of /tmp (refs: #41372)

• PR #41372: (terminalmage) Don’t use intermediate file when listing contents of tar.xz file @ 2017-05-22 15:36:45 UTC
  - 01b71c75c1 Merge pull request #41372 from terminalmage/issue41190
  - 1f08936d9c Remove unused import
  - 68cb897520 Replace reference to fileobj
  - 788874408a Remove ‘’ from mode
  - 3d4b833627 Don’t use intermediate file when listing contents of tar.xz file

• PR #41373: (alex-zel) Allow HTTP authentication to ES. @ 2017-05-22 15:32:09 UTC
  - 5edfc972c Merge pull request #41373 from alex-zel/patch-3
  - 392eab128 Allow HTTP authentication to ES.

• ISSUE #40748: (djhaskin987) Consul backend minion cache does not work (refs: #41287)

• PR #41287: (garethgreenaway) Fix to consul cache @ 2017-05-19 18:32:56 UTC
  - 29bd7f48b7 Merge pull request #41287 from garethgreenaway/40748_2016_11_consul
  - 5039ef12bf Removing chdir as it is no needed with this change
  - 4550c0e49 Updating the code that is pulling in the list of cached minions to use self.cache.list instead of relying on checking the local file system, which only works for the localfs cache method. #40748

• ISSUE #38894: (amendlik) salt.runner and salt.wheel ignore test=True (refs: #41309, #41611)

• PR #41309: (garethgreenaway) Adding test argument for runners & wheel orchestration modules @ 2017-05-19 18:26:09 UTC
  - 672aaa88d3 Merge pull request #41309 from garethgreenaway/38894_allowing_test_argument
  - e1a88e86f7 Allowing test=True to be passed for salt.runner and salt.wheel when used with orchestration

• ISSUE #41306: (lomeroe) win_lgpo does not properly pack group policy version number in gpt.ini (refs: #41319, #41307)

• PR #41319: (lomeroe) backport #41307 to 2016.11, properly pack version numbers into single @ 2017-05-19 18:25:00 UTC
  - PR #41307: (lomeroe) properly pack/unpack the verison numbers into a number (refs: #41319)
  - 140b0427e1 Merge pull request #41319 from lomeroe/bp_41307
  - 4f0aa577a5 backport 41307 to 2016.11, properly pack version numbers into single number

• PR #41327: (Ch3LL) Add 2016.11.6 Release Notes @ 2017-05-19 18:05:09 UTC
  - 6eb77cca7d Merge pull request #41327 from Ch3LL/add_2016.11.6_release
  - e5f00a9c9e Add 2016.11.6 Release Notes

• PR #41329: (lorengordon) Corrects versionadded for win_network.get_route @ 2017-05-19 17:47:57 UTC
  - 1faa3932 Merge pull request #41329 from lorengordon/doc-fix
  - 3c471247f0 Corrects versionadded for win_network.get_route

• PR #41322: (Ch3LL) Add patched packages warning to 2016.11.5 release notes @ 2017-05-18 21:53:26 UTC
  - 6ca65592da Merge pull request #41322 from Ch3LL/fix_release_2016.11.5_notes
- 9a1bf4205f fix url refs in rst
- cde008f77 Add patched packages warning to 2016.11.5 release notes

- **PR #41208:** (pkazmierczak) Fix: zypper handling of multiple version packages @ 2017-05-18 15:44:26 UTC
  - 9f359d841f Merge pull request #41208 from pkazmierczak/pkazmierczak-zypper-multiple-ver-pkgs
  - d411a91676 Reverted back to cascading with statements for python 2.6 compat
  - 7204013653 Compacted with statements in the unit test.
  - 6dc408042c Added unit tests and copied the behavior to .upgrade method, too.
  - 5f952007f6 Fix: zypper handling of multiple version packages

- **PR #41317:** (Ch3LL) [2016.11] Bump latest release version to 2016.11.5 @ 2017-05-18 15:34:13 UTC
  - bce999f6b6 Merge pull request #41317 from Ch3LL/update_latest_2016.11
  - cdb072c207 [2016.11] Bump latest release version to 2016.11.5

- **PR #41232:** (axmetishe) Add basic auth for SPM @ 2017-05-17 19:08:56 UTC
  - 761042f4a4 Merge pull request #41232 from axmetishe/2016.11

- **PR #41236:** (BenoitKnecht) states: cron: show correct changes when using special @ 2017-05-17 18:51:58 UTC
  - 7a636d969 Merge pull request #41236 from BenoitKnecht/2016.11
  - 33211d032e states: cron: show correct changes when using special

- **PR #41269:** (isbm) Bugfix: Unable to use "127" as hostname for the Minion ID @ 2017-05-17 18:31:15 UTC
  - 1c1e092f56 Merge pull request #41269 from isbm/isbm-minion-id-127-name
  - 5168ef8959 Add unit test for hostname can be started from 127
  - 0d0354f198b Harden to 127. IP part
  - d9c8324a6b Unit test for accepting host names as 127
  - 65b03c667b Bugfix: unable to use 127 as hostname

- **PR #41289:** (garethgreenaway) Fixing consul cache @ 2017-05-17 16:54:12 UTC
  - 70a28d793c Merge pull request #41289 from garethgreenaway/2016_11_5_fix_consul_cache_ls
  - 780a28d793 Swapping the order in the func_alias so the ls function is available.

- **ISSUE #41291:** (lomeroe) win_lgpo does not properly convert large decimal values in regpol data (refs: #41301, #41303)

- **PR #41303:** (lomeroe) backport #41301 -- properly convert packed string to decimal values @ 2017-05-17 16:32:22 UTC
  - PR #41301: (lomeroe) properly convert packed string to decimal values (refs: #41303)
  - 65664894f Merge pull request #41303 from lomeroe/bp-41301
  - f4b93fd9a properly convert packed string to decimal values

- **ISSUE #41231:** (kaihowl) PR #30777 misses an update to the documentation for pkg.installed and hold:true (refs: #41251)

- **ISSUE #30733:** (ealphonse) version-controlled packages with hold: True can no longer be upgraded by salt (refs: #30777)

- 7a0e4b4f8 Add unit test for get_zone and various platforms

- **ISSUE #41105**: (terminalmage) ssl_verify gitfs/git_pillar option does not work with pygit2 (refs: #41111)

- **PR #41111**: (terminalmage) Allow "ssl_verify: False" to work with pygit2 @ 2017-05-09 17:56:12 UTC
  - 6fa41dc89d Merge pull request #41111 from terminalmage/issue41105
  - 8c6410e3cd Add notices about ssl_verify only working in 0.23.2 and newer
  - 98ce829729 Support ssl_verify in pygit2
  - 73c477167 Add http(s) auth config docs for GitPython

- **PR #41008**: (cro) Look in /opt//lib instead of just /opt/local/lib on Illumos distros. @ 2017-05-09 16:56:00 UTC
  - 81add1944 Merge pull request #41008 from cro/rax_smos
  - a4f7aa145e Look for libcrypto in both /opt/tools and /opt/local on Illumos-based distros.

- **PR #41124**: (gtmanfred) add user_data to digitalocean @ 2017-05-09 16:47:42 UTC
  - c649725e9b Merge pull request #41124 from gtmanfred/do
  - 2370d9316b add user_data to digital ocean

- **ISSUE #41125**: (tmeneau) service.running returns True if enable=None and init script returns 0 (refs: #41127)
• PR #41127: (tmeneau) Fix incorrect service.running state response when enable=None and init script returns 0 @ 2017-05-09 16:43:35 UTC
  – d0a3fcf33a Merge pull request #41127 from xetus-oss/fix-4125-service-running
  – d8766562c9 fix incorrect service.running success response

30.2.64 Salt 2016.11.7 Release Notes

Version 2016.11.7 is a bugfix release for 2016.11.0.

Security Fix

CVE-2017-12791 Maliciously crafted minion IDs can cause unwanted directory traversals on the Salt-master
This release corrects a flaw in minion ID validation which could allow certain minions to authenticate to a master despite not having the correct credentials. To exploit the vulnerability, an attacker must create a salt-minion with an ID containing characters that will cause a directory traversal. Credit for discovering the security flaw goes to: Vernhk@qq.com

30.2.65 Salt 2016.11.8 Release Notes

Version 2016.11.8 is a bugfix release for 2016.11.0.

Statistics

• Total Merges: 171
• Total Issue References: 68
• Total PR References: 202
• Contributors: 61 (AFriemann, Ch3LL, CorvinM, Da-Juan, DmitryKuzmenko, UtahDave, abulford, amalleo25, amendlik, aneeshusa, aogier, arount, arthurlogilab, astronouth7303, binoclar, blarghmatey, cachedout, clem- compilatio, corywright, cri-epita, damon-atkins, davidjb, dglloyd, dmurphy18, ferringb, garethgreenaway, gdubroeucq, gilbsgilbs, goten4, gtmanfred, isbm, jagguli, kevinanderson1, kjoirimike, kstreee, leeclemens, lomeroe, lorengordon, lubyou, mcarlton00, meaksh, morganwillcock, nhavens, pabloh007, rallytime, remi-jouannet, renner, root360-AndreasUlm, s-sebastian, sarcasticaadmin, sbojarski, shengis, tdutrion, terminal-mage, toanju, twangboy, ushmolin, viktorkrivak, vutny, whiteinge, xiaoanynfei)

Security Fix

CVE-2017-14695 Directory traversal vulnerability in minion id validation in SaltStack. Allows remote minions with incorrect credentials to authenticate to a master via a crafted minion ID. Credit for discovering the security flaw goes to: Julian Brost (julian@0x4a42.net)

CVE-2017-14696 Remote Denial of Service with a specially crafted authentication request. Credit for discovering the security flaw goes to: Julian Brost (julian@0x4a42.net)
Anonymous Binds and LDAP/Active Directory

When `auth.ldap.anonymous` is set to `False`, the bind password can no longer be empty.

Changelog for v2016.11.7..v2016.11.8

- **PR #43508**: (rallytime) Back-port #43333 to 2016.11.8 @ 2017-09-14 21:40:19 UTC
  - PR #43333: (damon-atkins) Docs are wrong cache_dir (bool) and cache_file (str) cannot be passed as params + 1 bug (refs: #43508)
  - a648f75949 Merge pull request #43508 from rallytime/bp-43333
  - d4981a2717 Update doco
  - a7c8b9e048 Update win_pkg.py
  - 1d6dc6fb72 Docs are wrong cache_dir (bool) and cache_file (str) cannot be passed on the cli (#2)
- **PR #43434**: (rallytime) Add 2016.11.8 release notes @ 2017-09-11 17:06:29 UTC
  - e7009877bc Merge pull request #43434 from rallytime/2016.11.8-release-notes
  - 68f529ee5e Add 2016.11.8 release notes
- **PR #43271**: (twangboy) Fix minor formatting issue @ 2017-08-30 14:26:21 UTC
  - cf21f91fb2 Merge pull request #43271 from twangboy/win_fix_pkg.install
  - 91b062f564 Fix formatting issue, spaces surrounding +
  - 31ff69f0ad Add underscore to regex search
  - 3cf2b6575c Fix spelling
  - ed030a35a5 Use regex to detect salt-minion install
- **PR #43228**: (twangboy) Win fix pkg.install @ 2017-08-30 14:26:21 UTC
  - 3ab0b2f3ae Merge pull request #43228 from twangboy/win_fix_pkg.install
  - 13dfabb1ce Fix regex statement, add .
  - 31ff69f0ad Add underscore to regex search
  - 3cf2b6575c Fix spelling
  - ed030a35a5 Use regex to detect salt-minion install
- **PR #43191**: (viktokrivak) Fix apache.config with multiple statement @ 2017-08-28 18:13:44 UTC
  - b4c689df5 Merge pull request #43191 from viktokrivak/fix-apache-config-multi-entity
  - c15bcbe1cc Merge remote-tracking branch 'upstream/2016.11' into fix-apache-config-multi-entity
  - 4164047951 Fix apache.config with multiple statement At this moment when you post more than one statement in config only last is used. Also file is rewrited multiple times until last statement is written. Example: salt "" apache.config /etc/httpd/conf.d/ports.conf config=""[{'Listen': '8080'}, {'Proxy': "Something"}]"" Ends only with Proxy Something and ignore Listen 8080, This patch fix this issue.
- **ISSUE #42279**: (dafyddj) win_lgpo matches multiple policies due to startswith() (refs: #43154, #43116)
- **PR #43154**: (lomeroe) Backport #43116 to 2016.11 @ 2017-08-28 16:40:41 UTC
  - PR #43116: (lomeroe) Fix 42279 in develop (refs: #43154)
  - b90e59ede9 Merge pull request #43154 from lomeroe/bp-43116-2016.11
– 8f593b0b02 verify that files exist before trying to remove them, win_file.remove raises an exception if
the file does not exist
– 33a30bac06 correcting bad format statement in search for policy to be disabled
– acc3d7ac82 correct fopen calls from salt.utils for 2016.11’s utils function
– 2da1cdd109 lint fix
– 61bd12c0de track xml namespace to ensure policies w/duplicate IDs or Names do not conflict
– f323bed9f9 add additional checks for ADM policies that have the same ADMX policy ID (#42279)

• ISSUE #42642: (githubcdr) state.augeas (refs: #42669, #43202)
• PR #43202: (garethgreenaway) Reverting previous augeas module changes @ 2017-08-28 13:14:27 UTC
  – 5308c27f9f Merge pull request #43202 from garethgreenaway/2642_2016_11_augeas_module_revert_fix
  – ef7e93eb3f Reverting this change due to it breaking other uses.
• ISSUE #43101: (aogier) genesis.bootstrap fails if no pkg AND exclude_pkgs (which can’t be a string) (refs: #43103)
• PR #43103: (aogier) genesis.bootstrap deboostrap fix @ 2017-08-25 20:48:23 UTC
  – f16b7246ed Merge pull request #43103 from aogier/43101-genesis-bootstrap
  – db94f3bb1c better formatting
  – e5cc667762 tests: fix a leftover and simplify some parts
  – 13e5997457 lint
  – 216ced69e5 allow comma-separated pkgs lists, quote args, test deb behaviour
  – d8612ea006 fix debootstrap and enhance packages selection/deletion via cmdline
• ISSUE #42329: (jagguli) State git.latest does not pull latest tags (refs: #42663)
• PR #42663: (jagguli) Check remote tags before deciding to do a fetch #42663 @ 2017-08-25 20:14:32 UTC
  – 4863771428 Merge pull request #42663 from StreetHawkInc/fix_git_tag_check
  – 2b5af5b59d Remove refs/tags prefix from remote tags
  – 3f2e96e561 Convert set to list for serializer
  – 2728e5d977 Only include new tags in changes
  – 4b1df2f223 Exclude annotated tags from checks
  – 389c037285 Check remote tags before deciding to do a fetch #42329
• ISSUE #43198: (corywright) disk.format._ needs to be aliased to disk.format (refs: #43199)
• PR #43199: (corywright) Add disk.format alias for disk.format._ @ 2017-08-25 19:21:07 UTC
  – 4193e7f0a2 Merge pull request #43199 from corywright/disk-format-alias
  – f0d3a9ddc Add disk.format alias for disk.format_
• ISSUE saltstack/salt-jenkins#495: (Ch3LL) npm tests failing (refs: #43196)
• PR #43196: (gtmanfred) Pin request install to version for npm tests @ 2017-08-25 18:43:06 UTC
  – 5471f9fe0c Merge pull request #43196 from gtmanfred/2016.11
  – ccd2241777 Pin request install to version
• ISSUE #43143: (abulford) git.detached does not fetch if rev is missing from local (refs: #43178)
• **PR #43178**: (terminalmage) git.detached: Fix traceback when rev is a SHA and is not present locally @ 2017-08-25 13:58:37 UTC
  - ace2715c60 Merge pull request #43178 from terminalmage/issue43143
  - 2640833400 git.detached: Fix traceback when rev is a SHA and is not present locally
• **PR #43179**: (terminalmage) Fix missed deprecation @ 2017-08-24 22:52:34 UTC
  - 12e9507b9e Merge pull request #43179 from terminalmage/old-deprecation
  - 3adf8ad04b Fix missed deprecation
• **PR #43171**: (terminalmage) Add warning about adding new functions to salt/utils/__init__.py @ 2017-08-24 19:10:23 UTC
  - b595440d90 Merge pull request #43171 from terminalmage/salt-utils-warning
  - 7b5943a31a Add warning about adding new functions to salt/utils/__init__.py
• **PR #43173**: (Ch3LL) Add New Release Branch Strategy to Contribution Docs @ 2017-08-24 19:04:56 UTC
  - 4f273cac4f Merge pull request #43173 from Ch3LL/add_branch_docs
  - 1b2424bd3 Add New Release Branch Strategy to Contribution Docs
• **PR #43151**: (ushmodin) state.sls hangs on file.recurse with clean: True on windows @ 2017-08-23 17:25:33 UTC
  - PR #42969: (ushmodin) state.sls hangs on file.recurse with clean: True on windows (refs: #43151)
  - 669b376abf Merge pull request #43151 from ushmodin/2016.11
  - c5841e2ade state.sls hangs on file.recurse with clean: True on windows
• **PR #42986**: (renner) Notify systemd synchronously (via NOTIFY_SOCKET) @ 2017-08-22 16:52:56 UTC
  - ae9d2b7985 Merge pull request #42986 from renner/systemd-notify
  - 79c53f3f81 Fallback to systemd_notify_call() in case of socket.error
  - f1765472dd Notify systemd synchronously (via NOTIFY_SOCKET)
• **ISSUE #43036**: (mcarlton00) Linux VMs in Bhyve aren’t displayed properly in grains (refs: #43037)
• **PR #43037**: (mcarlton00) Issue #43036 Bhyve virtual grain in Linux VMs @ 2017-08-22 16:43:40 UTC
  - b420be618 Merge pull request #43037 from mcarlton00/fx-bhyve-grains
  - 733150fc0 Issue #43036 Bhyve virtual grain in Linux VMs
• **PR #43100**: (vutny) [DOCS] Add missing utils sub-dir listed for extension_modules @ 2017-08-22 15:40:09 UTC
  - 0a86f2d884 Merge pull request #43100 from vutny/doc-add-missing-utils-ext
  - af743f6c3 [DOCS] Add missing utils sub-dir listed for extension_modules
• **ISSUE #15171**: (JensRantil) Maximum recursion limit hit related to requisites (refs: #42985)
• **PR #42985**: (DmitryKuzmenko) Properly handle prereq having lost requisites. @ 2017-08-21 22:49:39 UTC
  - e2b2f448e Merge pull request #42985 from DSRCorporation/bugs/15171_recursion_limit
  - 651b1ab09 Properly handle prereq having lost requisites.
• **PR #43092**: (blarghmatey) Fixed issue with silently passing all tests in Testinfra module @ 2017-08-21 20:22:08 UTC
  - e51333306c Merge pull request #43092 from mitodl/2016.11
  - d4b113acdf Fixed issue with silently passing all tests in Testinfra module
• PR #43060: (twangboy) Osx update pkg scripts @ 2017-08-21 20:06:12 UTC
  - 77a443ce8e Merge pull request #43060 from twangboy/osx_update_pkg_scripts
  - ef8a14cd9 Remove /opt/salt instead of /opt/salt/bin
  - 2dd62aa1da Add more information to the description
  - f44f5b70dc Only stop services if they are running
  - 3b62bf953c Remove salt from the path
  - ebca3a05f5 Update pkg-scripts

• ISSUE #42869: (abednarik) Git Module : Failed to update repository (refs: #43064)

• PR #43064: (terminalmage) Fix race condition in git.latest @ 2017-08-21 14:29:52 UTC
  - 1b1b6da803 Merge pull request #43064 from terminalmage/issue42869
  - 093c0c2f77 Fix race condition in git.latest

• ISSUE #42041: (lorengordon) pkg.list_repo_pkgs fails to find pkgs with spaces around yum repo enabled value
  (refs: #43054)

• PR #43054: (lorengordon) Uses ConfigParser to read yum config files @ 2017-08-18 20:49:44 UTC
  - PR #42045: (arount) Fix: salt.modules.yumpkg: ConfigParser to read ini like files. (refs: #43054)
  - 96e8836d1 Merge pull request #43054 from lorengordon/fix/yumpkg/config-parser
  - 3b2cb81a72 fix typo in salt.modules.yumpkg
  - 38add0e4a2 break if leading comments are all fetched
  - d7f6dc7a7 fix configparser import & log if error was raised
  - ca11bb633 use configparser to parse yum repo file

• PR #43048: (rallytime) Back-port #43031 to 2016.11 @ 2017-08-18 12:56:04 UTC
  - PR #43031: (gtmanfred) use a ruby gem that doesn't have dependencies (refs: #43048)
  - 43aa46f512 Merge pull request #43048 from rallytime/bp-43031
  - 35e45049e2 use a ruby gem that doesn't have dependencies

• PR #43023: (terminalmage) Fixes/improvements to Jenkins state/module @ 2017-08-18 01:33:10 UTC
  - ad89ff3104 Merge pull request #43023 from terminalmage/fix-jenkins-xml-caching
  - 5100 Chapter 30. Release Notes
  - 33fd8ff939 Update jenkins.py
  - fc306fc8c3 Add missing colon in if statement
  - 822eabc8b1 Catch exceptions raised when making changes to jenkins
  - 91b583b493 Improve and correct exception raising
  - f096917a0e Raise an exception if we fail to cache the config xml

• PR #43026: (rallytime) Back-port #43020 to 2016.11 @ 2017-08-17 23:19:46 UTC
  - PR #43020: (gtmanfred) test with gem that appears to be abandoned (refs: #43026)
  - 2957467ed7 Merge pull request #43026 from rallytime/bp-43020
  - 0eb15a1f67 test with gem that appears to be abandoned

• ISSUE #40490: (alxwr) saltstack x509 incompatible to m2crypto 0.26.0 (refs: #42760)
• PR #43033: (rallytime) Back-port #42760 to 2016.11 @ 2017-08-17 22:24:43 UTC
  - PR #42760: (AFriemann) Catch TypeError thrown by m2crypto when parsing missing subjects in c...
    (refs: #43033)
  - 4150b094fe Merge pull request #43033 from rallytime/bp-42760
  - 3e3f75d8e Catch TypeError thrown by m2crypto when parsing missing subjects in certificate files.

• PR #43032: (rallytime) Back-port #42547 to 2016.11 @ 2017-08-17 21:53:50 UTC
  - PR #42547: (blarghmatey) Updated testinfra modules to work with more recent versions (refs: #43032)
  - b124d3667e Merge pull request #43032 from rallytime/bp-42547
  - ea4d7f4176 Updated testinfra modules to work with more recent versions

• ISSUE #42992: (pabloh007) docker.save flag push does is ignored (refs: #43027)

• PR #43027: (pabloh007) Fixes ignore push flag for docker.push module issue #42992 @ 2017-08-17 19:55:37 UTC
  - a8838ad44 Merge pull request #43027 from pabloh007/fix-docker-save-push-2016-11
  - d0fd94f85 Fixes ignore push flag for docker.push module issue #42992

• ISSUE #42627: (taigrrr8) salt-cp no longer works. Was working a few months back. (refs: #42890)

• PR #42890: (DmitryKuzmenko) Make chunked mode in salt-cp optional @ 2017-08-17 18:37:44 UTC
  - 51d16840bb Merge pull request #42890 from DSRCorporation/bugs/42627_salt-cp
  - cfddf1c75 Apply code review: update the doc
  - afedd3b654 Typos and version fixes in the doc.
  - 9fedef012e Fixed 'test_valid_docs' test.
  - 999388680c Make chunked mode in salt-cp optional (disabled by default).

• PR #43009: (rallytime) [2016.11] Merge forward from 2016.3 to 2016.11 @ 2017-08-17 18:00:09 UTC
  - b3c253cdefa Merge pull request #43009 from rallytime/merge-2016.11
  - 566ba4fe76 Merge branch '2016.3' into '2016.11'
    - 13b8637d53 Merge pull request #42942 from Ch3LL/2016.3.6_follow_up
      - f281e1795f move additional minion config options to 2016.3.8 release notes
      - 168604ba6b remove merge conflict
      - 8a07d95212 update release notes with cve number
      - 149633fdca Add release notes for 2016.3.7 release
      - 7a4ccdd9c5 Add clean_id function to salt.utils.verify.py
    - bb1b29c6cb Merge pull request #42954 from Ch3LL/latest_2016.3
      - b551e66744 [2016.3] Bump latest and previous versions
    - 5d5edc54b7 Merge pull request #42949 from Ch3LL/2016.3.7_docs
      - d75d37f41f8 Add Security Notice to 2016.3.7 Release Notes

• PR #43021: (terminalmage) Use socket.AF_INET6 to get the correct value instead of doing an OS check @ 2017-08-17 17:57:09 UTC
  - PR #43014: (Ch3LL) Change AF_INET6 family for mac in test_host_to_ips (refs: #43021)
  - 37c63e7cf2 Merge pull request #43021 from terminalmage/fix-network-test
- 4089b7b1bc Use socket.AF_INET6 to get the correct value instead of doing an OS check

**PR #43019:** (rallytime) Update bootstrap script to latest stable: v2017.08.17 @ 2017-08-17 17:56:41 UTC
- 8f6423247c Merge pull request #43019 from rallytime/bootstrap_2017.08.17
- 2f7623a17 Update bootstrap script to latest stable: v2017.08.17

**PR #43014:** (Ch3LL) Change AF_INET6 family for mac in test_host_to_ips (refs: #43021) @ 2017-08-17 16:17:51 UTC
- ff1caee68 Merge pull request #43014 from Ch3LL/fix_network_mac
- b8ee4401e Change AF_INET6 family for mac in test_host_to_ips

**PR #42968:** (vutny) [DOCS] Fix link to Salt Cloud Feature Matrix @ 2017-08-16 13:16:16 UTC
- 1ee9499d28 Merge pull request #42968 from vutny/doc-salt-cloud-ref
- 44ed53b1df [DOCS] Fix link to Salt Cloud Feature Matrix

**ISSUE #38839:** (DaveOHenry) Invoking runner.cloud.action via reactor sls fails (refs: #42291)

**PR #42291:** (vutny) Fix #38839: remove state from Reactor runner kwags @ 2017-08-15 23:01:08 UTC
- 923f9741fe Merge pull request #42291 from vutny/fixed-state
- 58f898a01f Fix #38839: remove state from Reactor runner kwags

**ISSUE #42644:** (stamak) nova salt-cloud -P Private IPs returned, but not public. Checking for misidentified IPs (refs: #42940)

**PR #42940:** (gtmanfred) create new ip address before checking list of allocated ips @ 2017-08-15 21:47:18 UTC
- c20bc7d515 Merge pull request #42940 from gtmanfred/2016.11
- 253e16a8d fix IP address spelling
- bd63074e7a create new ip address before checking list of allocated ips

**PR #42959:** (rallytime) Back-port #42883 to 2016.11 @ 2017-08-15 21:25:48 UTC
- **PR #42883:** (rallytime) Fix failing boto tests (refs: #42959)
- d6496eca72 Merge pull request #42959 from rallytime/bp-42883
- c69ca4b9e Lint fix: add missing space
- 5597b1a30e Skip 2 failing tests in Python 3 due to upstream bugs
- a0b19bdc27 Update account id value in boto_secgroup module unit test
- 60b406e088 @mock_elb needs to be changed to @mock_elb_deprecated as well
- 6ae1111295 Replace @mock_ec2 calls with @mock_ec2_deprecated calls

**PR #42944:** (Ch3LL) [2016.11] Add clean_id function to salt.utils.verify.py @ 2017-08-15 18:06:12 UTC
- 6366e05d0d Merge pull request #42944 from Ch3LL/2016.11.6_follow_up
- 7e0a20afca Add release notes for 2016.11.7 release
- 638238c3e Add clean_id function to salt.utils.verify.py

**PR #42952:** (Ch3LL) [2016.11] Bump latest and previous versions @ 2017-08-15 17:23:02 UTC
- 49d339c976 Merge pull request #42952 from Ch3LL/latest_2016.11
- 74c7055d54 [2016.11] Bump latest and previous versions

**PR #42950:** (Ch3LL) Add Security Notice to 2016.11.7 Release Notes @ 2017-08-15 16:50:23 UTC
- b0d2e05a79 Merge pull request #42950 from Ch3LL/2016.11.7_docs
- a6f902db40 Add Security Notice to 2016.11.77 Release Notes

- **PR #42836**: (aneeshusa) Backport salt.utils.versions from develop to 2016.11 @ 2017-08-14 20:56:54 UTC
  - PR #42835: (aneeshusa) Fix typo in utils/versions.py module (refs: #42836)
  - c0ff69f88c Merge pull request #42836 from lyft/backport-utils.versions-to-2016.11
  - 86ce7004a2 Backport salt.utils.versions from develop to 2016.11

- **PR #42919**: (rallytime) Back-port #42871 to 2016.11 @ 2017-08-14 20:44:00 UTC
  - PR #42871: (amalleo25) Update joyent.rst (refs: #42919)
  - 64a79dd5ac Merge pull request #42919 from rallytime/bp-42871
  - 4e46c968e6 Update joyent.rst

- **ISSUE #42803**: (gmcwhistler) master_type: str, not working as expected, parent salt-minion process dies. (refs: #42848)

- **ISSUE #42753**: (grichmond-salt) SaltReqTimeout Error on Some Minions when One Master in a Multi-Master Configuration is Unavailable (refs: #42848)

- **PR #42918**: (rallytime) Back-port #42848 to 2016.11 @ 2017-08-14 20:43:43 UTC
  - PR #42848: (DmitryKuzmenko) Execute fire_master asynchronously in the main minion thread. (refs: #42918)
  - bea8ec1098 Merge pull request #42918 from rallytime/bp-42848
  - cdbf4126f7 Make lint happier.
  - 62eca9b00b Execute fire_master asynchronously in the main minion thread.

- **PR #42861**: (twangboy) Fix pkg.install salt-minion using salt-call @ 2017-08-14 19:07:22 UTC
  - 52bec329cb Merge pull request #42861 from twangboy/win_pkg_install_salt
  - 0d3789f0c6 Fix pkg.install salt-minion using salt-call

- **PR #42798**: (s-sebastian) Update return data before calling returners @ 2017-08-14 15:51:30 UTC
  - b9f4f87aa5 Merge pull request #42798 from s-sebastian/2016.11
  - 1cc86592ed Update return data before calling returners

- **ISSUE #41976**: (abulford) dockerng network states do not respect test=True (refs: #41977)

- **PR #41977**: (abulford) Fix dockerng.network_ ignoring of tests=True @ 2017-08-11 18:37:20 UTC
  - c15d0034fe Merge pull request #41977 from redmatter/fixedockerng-network-ignores-test
  - 1cc2a503a Fix dockerng.network_ ignoring of tests=True

- **PR #42886**: (sarcasticadmin) Adding missing output flags to salt cli docs @ 2017-08-11 18:35:19 UTC
  - 3b9c3c5671 Merge pull request #42886 from sarcasticadmin/adding_docs_salt_outputs
  - 744bf954ff Adding missing output flags to salt cli

- **PR #42882**: (gtmanfred) make sure cmd is not run when npm isn't installed @ 2017-08-11 17:53:14 UTC
  - e5b98c8a88 Merge pull request #42882 from gtmanfred/2016.11
  - da3402a53d make sure cmd is not run when npm isn't installed

- **PR #42788**: (amendlik) Remove waits and retries from Saltify deployment @ 2017-08-11 15:38:05 UTC
- 5962c9588b Merge pull request #42788 from amendlik/saltify-timeout
- 928b523797 Remove waits and retries from Saltify deployment

**PR #42877:** (terminalmage) Add virtual func for cron state module @ 2017-08-11 15:33:09 UTC
- 227eceddd13 Merge pull request #42877 from terminalmage/add-cron-state-virtual
- f1de196740 Add virtual func for cron state module

**PR #42859:** (terminalmage) Add note about git CLI requirement for GitPython to GitFS tutorial @ 2017-08-11 14:53:03 UTC
- ab9f6cef33 Merge pull request #42859 from terminalmage/gitpython-git-cli-note
- 35e05c9515 Add note about git CLI requirement for GitPython to GitFS tutorial

**ISSUE saltstack/salt-jenkins#475:** (rallytime) Arch is failing npm cache test (refs: #42856)

**ISSUE #41770:** (Ch3LL) NPM v5 incompatible with salt.modules.cache_list (refs: #42856)

**PR #42856:** (gtmanfred) skip cache_clean test if npm version is >= 5.0.0 @ 2017-08-11 13:39:20 UTC
- 682b4a8d14 Merge pull request #42856 from gtmanfred/2016.11
- b458b99fb8 skip cache_clean test if npm version is >= 5.0.0

**PR #42864:** (whiteinge) Make syndic_log_file respect root_dir setting @ 2017-08-11 13:28:21 UTC
- 01ea854029 Merge pull request #42864 from whiteinge/syndic-log-root_dir
- 4b1f55da9c Make syndic_log_file respect root_dir setting

**PR #42851:** (terminalmage) Backport #42651 to 2016.11 @ 2017-08-10 18:02:39 UTC
- PR #42651: (gtmanfred) python2- prefix for fedora 26 packages (refs: #42851)
- 2ddece17e9 Merge pull request #42851 from terminalmage/bp-2016.11
- a3da86eaa8 fix syntax
- 6ecdbcec1d make sure names are correct
- f38b553d6e add py3 for versionlock
- 21934f61bb python2- prefix for fedora 26 packages

**ISSUE #42683:** (rgcosma) Gluster module broken in 2017.7 (refs: #42806)

**PR #42806:** (rallytime) Update doc references in glusterfs.volume_present @ 2017-08-10 14:10:16 UTC
- c746f79a3a Merge pull request #42806 from rallytime/fx-2017.6
- 8c64d0d88 Update doc references in glusterfs.volume_present

**PR #42829:** (twangboy) Fix passing version in pkgs as shown in docs @ 2017-08-10 14:07:24 UTC
- 27a8a2695a Merge pull request #42829 from twangboy/win_pkg_fix_install
- 83b9b230cd Add winrepo to docs about supporting versions in pkgs
- 81fefa6e67 Add ability to pass version in pkgs list

**PR #42838:** (twangboy) Document requirements for win_pki @ 2017-08-10 13:59:46 UTC
- 3c3ac6aeb2 Merge pull request #42838 from twangboy/win_doc_pki
- f0a1d0b46 Standardize PKI Client
- 7de687aa57 Document requirements for win_pki
• **PR #42805**: (rallytime) Back-port #42552 to 2016.11 @ 2017-08-09 22:37:56 UTC
  - **PR #42552**: (remijouannet) update consul module following this documentation https://www.consul.io/api/acl/acl.html (refs: #42805)
  - b3e2ae3c8 Merge pull request #42805 from rallytime/bp-42552
  - 5a91c1f2d1 update consul module following this documentation https://www.consul.io/api/acl/acl.html
• **ISSUE #42731**: (infoveinx) http.query template_data render exception (refs: #42804)
• **PR #42804**: (rallytime) Back-port #42784 to 2016.11 @ 2017-08-09 22:37:40 UTC
  - **PR #42784**: (gtmanfred) only read file if ret is not a string in http.query (refs: #42804)
  - d2ee7934ed Merge pull request #42804 from rallytime/bp-42784
  - dbd29e4aaa only read file if it is not a string
• **PR #42826**: (terminalmage) Fix misspelling of "versions" @ 2017-08-09 19:39:43 UTC
  - 4cbf8057b3 Merge pull request #42826 from terminalmage/fix-spelling
  - 00f93142e4 Fix misspelling of "versions"
• **PR #42786**: (Ch3LL) Fix typo for template_dict in http docs @ 2017-08-08 18:14:50 UTC
  - de997edd90 Merge pull request #42786 from Ch3LL/fix-typo
  - 90a2fb66a2 Fix typo for template_dict in http docs
• **ISSUE #42600**: (twangboy) Unable to set 'Not Configured' using win_lgpo execution module (refs: #42795, #42744)
• **PR #42795**: (lomeroe) backport #42744 to 2016.11 @ 2017-08-08 17:17:15 UTC
  - **PR #42744**: (lomeroe) fix #42600 in develop (refs: #42795)
  - bf6153ebe5 Merge pull request #42795 from lomeroe/bp-42744_201611
  - 695f8c1ae4 fix #42600 in develop
• **ISSUE #42747**: (whiteing) Outputters mutate data which can be a problem for Runners and perhaps other things (refs: #42748)
• **PR #42748**: (whiteing) Workaround Orchestrate problem that highstate outputter mutates data @ 2017-08-07 21:11:33 UTC
  - 61fad97286 Merge pull request #42748 from whiteing/save-before-output
  - de60b77c82 Workaround Orchestrate problem that highstate outputter mutates data
• **PR #42764**: (amendlik) Fix infinite loop with salt-cloud and Windows nodes @ 2017-08-07 20:47:07 UTC
  - a4e3e7e786 Merge pull request #42764 from amendlik/cloud-win-loop
  - f3dcfca4e0 Fix infinite loops on failed Windows deployments
• **ISSUE #42690**: (ChristianBeer) git.latest state with remote set fails on first try (refs: #42694)
• **PR #42694**: (gtmanfred) allow adding extra remotes to a repository @ 2017-08-07 18:08:11 UTC
  - da85326ad4 Merge pull request #42694 from gtmanfred/2016.11
  - 1a0457af51 allow adding extra remotes to a repository
• **ISSUE #42642**: (githubcdr) state.augeas (refs: #42669, #43202)
• **PR #42669**: (garethgreenaway) [2016.11] Fixes to augeas module @ 2017-08-06 17:58:03 UTC
- 7b2119fee Merge pull request #42669 from garethgreenaway/42642_2016_11_augeas_module_fix
- 24413084e2 Updating the call to shlex_split to pass the posix=False argument so that quotes are preserved.

- **PR #42629**: (xiaoanyunfei) tornado api @ 2017-08-03 22:21:20 UTC
  - 30725769ed Merge pull request #42629 from xiaoanyunfei/tornadoapi
  - 1e13383b95 tornado api

- **PR #42655**: (whiteinge) Reenable cpstats for rest_cherrypy @ 2017-08-03 20:44:10 UTC
  - PR #33806: (cachedout) Work around upstream cherrypy bug (refs: #42655)
  - f0f00fcee1 Merge pull request #42655 from whiteinge/rest_cherrypy-reenable-stats
  - deb6316d67 Fix lint errors
  - 6bd91c8b03 Reenable cpstats for rest_cherrypy

- **ISSUE #42686**: (gilbsgilbs) Unable to set multiple RabbitMQ tags (refs: #42693)

- **PR #42693**: (gilbsgilbs) Fix RabbitMQ tags not properly set. @ 2017-08-03 20:23:08 UTC
  - 21cf15f9c3 Merge pull request #42693 from gilbsgilbs/fix-rabbitmq-tags
  - 78fcdc7e2 Cast to list in case tags is a tuple.
  - 287b57b5c5 Fix RabbitMQ tags not properly set.

- **ISSUE #41433**: (sbojarski) boto_cfn.present fails when reporting error for failed state (refs: #42574)

- **PR #42574**: (sbojarski) Fixed error reporting in "boto_cfn.present" function. @ 2017-08-01 17:55:29 UTC
  - f2b0c9b4fa Merge pull request #42574 from sbojarski/boto-cfn-error-reporting
  - 5c94f10c2 Fix debug message in "boto_cfn._validate" function.
  - 181a1beccc Fixed error reporting in "boto_cfn.present" function.

- **PR #42623**: (terminalmage) Fix unicode constructor in custom YAML loader @ 2017-07-31 19:25:18 UTC
  - bc1efc4f2 Merge pull request #42623 from terminalmage/fix-unicode-constructor
  - fcf45889dd Fix unicode constructor in custom YAML loader

- **PR #42515**: (gtmanfred) Allow not interpreting backslashes in the repl @ 2017-07-28 16:00:09 UTC
  - cbf752cd73 Merge pull request #42515 from gtmanfred/backslash
  - cc445656d Allow not interpreting backslashes in the repl

- **ISSUE #42456**: (gdubroeucq) Use yum lib (refs: #42586)

- **PR #42586**: (gdubroeucq) [Fix] yumpkg.py: add option to the command "check-update" @ 2017-07-27 23:52:00 UTC
  - 549495831f Merge pull request #42586 from gdubroeucq/2016.11
  - 9c0b5cc1d6 Remove extra newline
  - d2ef4483e4 yumpkg.py: clean
  - a96f7c09e0 yumpkg.py: add option to the command "check-update"

- **ISSUE #41982**: (abulford) dockerng.network_* matches too easily (refs: #41988)

- **PR #41988**: (abulford) Fix dockerng.network_* name matching @ 2017-07-27 21:25:06 UTC
  - 6b45debf28 Merge pull request #41988 from redmatter/fixedockerng-network-matching
- 9eea796da8 Add regression tests for #41982
- 3369f0072f Fix broken unit test test_network_absent
- 0ef6cf634c Add trace logging of dockerng.networks result
- 515c612808 Fix dockerng.network_* name matching

**PR #42339**: (ismb) Bugfix: Jobs scheduled to run at a future time stay pending for Salt minions (bsc#1036125) @ 2017-07-27 19:05:51 UTC
  - 4b16109122 Merge pull request #42339 from isbm/ismb-jobs-scheduled-in-a-future-bsc1036125
  - bba84ce2d Bugfix: Jobs scheduled to run at a future time stay pending for Salt minions (bsc#1036125)

**ISSUE #23516**: (dkiser) BUG: cron job scheduler sporadically works (refs: #42077)

**PR #42077**: (vutny) Fix scheduled job run on Master if when parameter is a list @ 2017-07-27 19:04:23 UTC
  - PR #41973: (vutny) Fix Master/Minion scheduled jobs based on Cron expressions (refs: #42077)
  - 6c5a7c604a Merge pull request #42077 from vutny/fix-jobs-scheduled-with-whens
  - b1960cea44 Fix scheduled job run on Master if when parameter is a list

**PR #42414**: (vutny) DOCS: unify hash sum with hash type format @ 2017-07-27 18:48:40 UTC
  - f9cb536589 Merge pull request #42414 from vutny/unify-hash-params-format
  - d1f2a93368 DOCS: unify hash sum with hash type format

**ISSUE #42375**: (dragonpaw) salt.modules.*.virtualname doesn’t work as documented. (refs: #42523)

**PR #42523**: (rallytime) Add a mention of the True/False returns with __virtual__() @ 2017-07-27 18:13:07 UTC
  - 535c922511 Merge pull request #42523 from rallytime/fix-42375
  - 685c2cde6 Add information about returning a tuple with an error message
  - fa466519c4 Add a mention of the True/False returns with __virtual__()

**PR #42527**: (twangboy) Document changes to Windows Update in Windows 10/Server 2016 @ 2017-07-27 17:45:38 UTC
  - 0df0e7e749 Merge pull request #42527 from twangboy/win_wua
  - 0373791f2a Correct capatlization
  - af3bce927b Document changes to Windows Update in 10/2016

**PR #42551**: (binocvlar) Remove ‘-s’ (--script) argument to parted within align_check function @ 2017-07-27 17:35:31 UTC
  - 69b06586da Merge pull request #42551 from binocvlar/fix-lack-of-align-check-output
  - c4faba192 Remove ‘-s’ (--script) argument to parted within align_check function

**ISSUE #42403**: (astronouth7303) [2017.7] Pillar empty when state is applied from orchestrate (refs: #42433)

**PR #42573**: (rallytime) Back-port #42433 to 2016.11 @ 2017-07-27 13:51:21 UTC
  - PR #42433: (terminalmage) Only force saltenv/pillarenv to be a string when not None (refs: #42573)
  - 9e0b4e9faf Merge pull request #42573 from rallytime/bp-42433
  - 0293429e24 Only force saltenv/pillarenv to be a string when not None

**PR #42571**: (twangboy) Avoid loading system PYTHON* environment vars @ 2017-07-26 22:48:55 UTC
  - e931ed2517 Merge pull request #42571 from twangboy/win_add_pythonpath
- d55a44dd1a Avoid loading user site packages
- 9af1eb2741 Ignore any PYTHON* environment vars already on the system
- 4e2f03a95 Add pythonpath to batch files and service

**ISSUE #42371:** (tsaridas) Minion unresponsive after trying to failover (refs: #42387)

**PR #42387:** (DmitryKuzmenko) Fix race condition in usage of weakvaluedict @ 2017-07-25 20:57:42 UTC
- de2f397041 Merge pull request #42387 from DSRCorporation/bugs/42371_ValidationError_WeakValueDict
- e721c7ee81 Don't use *key in weakvaluedict* because it could lie.

**ISSUE #41955:** (root360-AndreasUlm) rabbitmq 3.6.10 changed output => rabbitmq-module broken (refs: #41968)

**PR #41968:** (root360-AndreasUlm) Fix rabbitmqctl output sanitizer for version 3.6.10 @ 2017-07-25 19:12:36 UTC
- 641a9d7ef9 Merge pull request #41968 from root360-AndreasUlm/fixed-rabbitmqctl-output-sanitizer
- 76fd941d91 added tests for rabbitmq 3.6.10 output handler
- 3602af1b1f Fix rabbitmqctl output handler for 3.6.10

**ISSUE #42477:** (aikar) Invalid ssh_interface value prevents salt-cloud provisioning without reason of why (refs: #42479)

**PR #42479:** (gtmanfred) validate ssh_interface for ec2 @ 2017-07-25 18:37:18 UTC
- 66fede378a Merge pull request #42479 from gtmanfred/interf
- c321b2803 fix pylint
- 99ec634c6b validate ssh_interface for ec2

**ISSUE #42405:** (felrivero) The documentation is incorrectly compiled (PILLAR section) (refs: #42516)

**PR #42516:** (rallytime) Add info about top file to pillar walk-through example to include edit.vim @ 2017-07-25 17:01:12 UTC
- a925c7029a Merge pull request #42516 from rallytime/fix-42405
- e3a6717efa Add info about top file to pillar walk-through example to include edit.vim

**ISSUE #42417:** (clem-compilatio) salt-cloud - openstack - "no more floating IP addresses" error - but public_ip in node (refs: #42509)

**PR #42509:** (clem-compilatio) Fix _assign_floating_ips in openstack.py @ 2017-07-24 17:14:13 UTC
- 1bd5bbccc2 Merge pull request #42509 from clem-compilatio/fix-42417
- 72924b06b8 Fix _assign_floating_ips in openstack.py

**PR #42464:** (garethgreenaway) [2016.11] Small fix to modules/git.py @ 2017-07-21 21:28:57 UTC
- 4bf35a4dfe Merge pull request #42464 from garethgreenaway/2016_11_remove_tmp_identity_file
- ff2410d51a Uncomment the line that removes the temporary identity file.

**ISSUE #42357:** (Giandom) Salt pillarenv problem with slack engine (refs: #42443)

**PR #42443:** (garethgreenaway) [2016.11] Fix to slack engine @ 2017-07-21 15:48:57 UTC
- e2102d0d0e Merge pull request #42443 from garethgreenaway/42357_pass_args_kwarg_correctly
- 635810b3e3 Updating the slack engine in 2016.11 to pass the args and kwarg correctly to LocalClient

**ISSUE #42198:** (shengis) state sqlite3.row_absent fail with "parameters are of unsupported type" (refs: #42200)
• **PR #42200**: (shengis) Fix #42198 @ 2017-07-21 14:47:29 UTC
  - 8262cc9054 Merge pull request #42200 from shengis/sqlite3_fix_row_absent_2016.11
  - 407bf8f4bb3 Fix #42198 If where_args is not set, not using it in the delete request.

• **ISSUE #42413**: (goten4) Invalid error message when proxy_host is set and tornado not installed (refs: #42424)

• **PR #42424**: (goten4) Fix error message when tornado or pycurl is not installed @ 2017-07-20 21:53:40 UTC
  - d9df97e5a3 Merge pull request #42424 from goten4/2016.11
  - 1c0574d05e Fix error message when tornado or pycurl is not installed

• **PR #42350**: (twangboy) Fixes problem with Version and OS Release related grains on certain versions of Python (2016.11) @ 2017-07-19 17:07:26 UTC
  - 42bb1a64ca Merge pull request #42350 from twangboy/win_fix_ver_grains_2016.11
  - 8c048403d7 Detect Server OS with a desktop release name

• **PR #42356**: (meaksh) Allow to check whether a function is available on the AliasesLoader wrapper @ 2017-07-19 16:56:41 UTC
  - 0a7e56f60 Merge pull request #42356 from meaksh/2016.11-AliasesLoader-wrapper-fix
  - 915d4219e Allow to check whether a function is available on the AliasesLoader wrapper

• **PR #42368**: (twangboy) Remove build and dist directories before install (2016.11) @ 2017-07-19 16:47:28 UTC
  - 10eb7b7a79 Merge pull request #42368 from twangboy/win_fix_build_2016.11
  - a7c910c31e Remove build and dist directories before install

• **PR #42370**: (rallytime) [2016.11] Merge forward from 2016.3 to 2016.11 @ 2017-07-18 22:39:41 UTC
  - 016189f62f Merge pull request #42370 from rallytime/merge-2016.11
  - 0aa5dde1de Merge branch '2016.3' into '2016.11'
  - e9b0f208a Merge pull request #42359 from Ch3LL/doc-update-2016.3
  * dc85b5edbe [2016.3] Update version numbers in doc config for 2017.7.0 release

• **PR #42360**: (Ch3LL) [2016.11] Update version numbers in doc config for 2017.7.0 release @ 2017-07-18 19:23:30 UTC
  - f06a6f1796 Merge pull request #42360 from Ch3LL/doc-update-2016.11
  - b90b7a7506 [2016.11] Update version numbers in doc config for 2017.7.0 release

• **ISSUE #32400**: (rallytime) Document Default Config Values (refs: #42319)

• **PR #42319**: (rallytime) Add more documentation for config options that are missing from master/minion docs @ 2017-07-18 18:02:32 UTC
  - e0595b0af Merge pull request #42319 from rallytime/config-docs
  - b40f980632 Add more documentation for config options that are missing from master/minion docs

• **ISSUE #42333**: (b3hn4) Getting "invalid type of dict, a list is required" when trying to configure engines in master config file (refs: #42352)

• **PR #42352**: (CorvinM) Multiple documentation fixes @ 2017-07-18 15:10:37 UTC
  - 78940400e3 Merge pull request #42352 from CorvinM/issue42333
  - 526b6ee14d Multiple documentation fixes

• **PR #42353**: (terminalmage) is_windows is a function, not a property/attribute @ 2017-07-18 14:38:51 UTC
- b256001760 Merge pull request #42353 from terminalmage/fix-git-test
- 14cf6ce322 is_windows is a function, not a propery/attribute

- **ISSUE #41116:** (hrumph) FAQ has wrong instructions for upgrading Windows minion. (refs: #42264)
- **PR #42264:** (rallytime) Update minion restart section in FAQ doc for windows @ 2017-07-17 17:40:40 UTC
  - 866a1febb4 Merge pull request #42264 from rallytime/fix-41116
  - bd638880e3 Add mono-spacing to salt-minion reference for consistency
  - 30d62f43da Update minion restart section in FAQ doc for windows

- **ISSUE #42194:** (jryberg) pkg version: latest are now broken, appending <package>-latest to filename (refs: #42275)
- **PR #42275:** (terminalmage) pkg.installed: pack name/version into pkgs argument @ 2017-07-17 17:38:39 UTC
  - 9a707088ad Merge pull request #42275 from terminalmage/issue42194
  - 663874908a pkg.installed: pack name/version into pkgs argument

- **ISSUE #41721:** (sazaro) state.sysrc broken when setting the value to YES or NO (refs: #42269)
- **PR #42269:** (rallytime) Add some clarity to "multiple quotes" section of yaml docs @ 2017-07-17 17:38:18 UTC
  - e588f235e0 Merge pull request #42269 from rallytime/fix-41721
  - f2250d474a Add a note about using different styles of quotes.
  - 38d9b3d553 Add some clarity to "multiple quotes" section of yaml docs

- **ISSUE #42152:** (dubb-b) salt-cloud errors on Rackspace driver using -out=yaml (refs: #42282)
- **PR #42282:** (rallytime) Handle libcloud objects that throw RepresenterErrors with --out=yaml @ 2017-07-17 17:36:35 UTC
  - 5aaa214a75 Merge pull request #42282 from rallytime/fix-42152
  - f032223843 Handle libcloud objects that throw RepresenterErrors with --out=yaml

- **ISSUE #42295:** (lubyou) file.absent fails on windows if the file to be removed has the "readonly" attribute set (refs: #42308)
- **PR #42308:** (lubyou) Force file removal on Windows. Fixes #42295 @ 2017-07-17 17:12:13 UTC
  - fb5697a4bc Merge pull request #42308 from lubyou/42295-fix-file-absent-windows
  - 026ccf401a Force file removal on Windows. Fixes #42295

- **ISSUE #42267:** (gzcwnk) salt-ssh not creating ssh keys automatically as per documentation (refs: #42314)
- **PR #42314:** (rallytime) Add clarification to salt ssh docs about key auto-generation. @ 2017-07-17 14:07:49 UTC
  - da2a8a518f Merge pull request #42314 from rallytime/fix-42267
  - c406046940 Add clarification to salt ssh docs about key auto-generation.

- **ISSUE #41936:** (michaelkarrer81) git.latest identity does not set the correct user for the private key file on the minion (refs: #41945)
- **PR #41945:** (garethgreenaway) Fixes to modules/git.py @ 2017-07-14 17:46:10 UTC
  - acadd54013 Merge pull request #41945 from garethgreenaway/41936_allow_identity_files_with_user
  - 44841e5626 Moving the call to cp.get_file inside the with block to ensure the umask is preserved when we grab the file.
  - f9ba60eed8 Merge pull request #1 from terminalmage/pr-41945
1b6026177c Restrict set_umask to mkstemp call only
   68549f3496 Fixing umask to we can set files as executable.
   4949bf3ff3 Updating to swap on the new salt.utils.files.set_umask context_manager
   8fa9f6d92 Updating PR with requested changes.
   494765e939 Updating the git module to allow an identity file to be used when passing the user parameter

• ISSUE #42240: (casselt) empty_password in user.present always changes password, even with test=True (refs: #42289)
• PR #42289: (CorvinM) Multiple empty_password fixes for state.user @ 2017-07-14 16:14:02 UTC
   − PR #41543: (cri-epita) Fix user creation with empty password (refs: #42289)
   − f90e04a2bc Merge pull request #42289 from CorvinM/bp-41543
   − 357dc22f05 Fix user creation with empty password
• PR #42123: (vutny) DOCS: describe importing custom util classes @ 2017-07-12 15:53:24 UTC
   − a91a3f81b1 Merge pull request #42123 from vutny/fix-master-utils-import
   − 6bb8bf98c Add missing doc for utils_dirs Minion config option
   − f1bc58fd55 Utils: add example of module import
• PR #42261: (rallytime) Some minor doc fixes for dnsutil module so they'll render correctly @ 2017-07-11 23:14:53 UTC
   − e2aa5114e4 Merge pull request #42261 from rallytime/minor-doc-fix
   − 8c76bb53d Some minor doc fixes for dnsutil module so they'll render correctly
• PR #42262: (rallytime) Back-port #42224 to 2016.11 @ 2017-07-11 23:14:25 UTC
   − PR #42224: (tdutrion) Remove duplicate instruction in Openstack Rackspace config example (refs: #42262)
   − 3e91dbc9cc Merge pull request #42262 from rallytime/bp-42224
   − c31ded341c Remove duplicate instruction in Openstack Rackspace config example
• ISSUE #42137: (kiemlicz) cmd.run with multiple commands - random order of execution (refs: #42181)
• PR #42181: (garethgreenaway) fixes to state.py for names parameter @ 2017-07-11 21:21:32 UTC
   − 7780579c36 Merge pull request #42181 from garethgreenaway/42137_backport_fix_from_2017_7
   − a34970b45b Back porting the fix for 2017.7 that ensures the order of the names parameter.
• PR #42253: (gtmanfred) Only use unassociated ips when unable to allocate @ 2017-07-11 20:53:51 UTC
   − PR #38965: (toanju) salt-cloud will use list_floating_ips for OpenStack (refs: #42253)
   − PR #34280: (kevinanderson1) salt-cloud will use list_floating_ips for Openstack (refs: #38965)
   − 72537868a6 Merge pull request #42253 from gtmanfred/2016.11
   − 53e25760be Only use unassociated ips when unable to allocate
• PR #42252: (UtahDave) simple docstring updates @ 2017-07-11 20:48:33 UTC
   − b2a4698b5d Merge pull request #42252 from UtahDave/2016.11local
   − e6a9563d47 simple doc updates
• ISSUE #42232: (astronouth7303) Half of dnsutil refers to dig (refs: #42235)
• PR #42235: (astronouth7303) Abolish references to `dig` in examples. @ 2017-07-10 20:06:11 UTC
  - 781fe13be7 Merge pull request #42235 from astronouth7303/patch-1-2016.3
  - 4cb51bd03a Make note of `dig` partial requirement.
  - 08e7d8351a Abolish references to `dig` in examples.

• PR #42215: (twangboy) Add missing config to example @ 2017-07-07 20:18:44 UTC
  - 83cdb76f16 Merge pull request #42215 from twangboy/win_iis_docs
  - c07e22041a Add missing config to example

• PR #42211: (terminalmage) Only pass a saltenv in orchestration if one was explicitly passed (2016.11) @ 2017-07-07 20:16:35 UTC
  - 274946ab00 Merge pull request #42211 from terminalmage/issue40928
  - 22a18fa2ed Only pass a saltenv in orchestration if one was explicitly passed (2016.11)

• PR #42173: (rallytime) Back-port #37424 to 2016.11 @ 2017-07-07 16:39:59 UTC
  - PR #37424: (kojiromike) Avoid Early Convert ret['comment'] to String (refs: #42173)
  - 89261cf06c Merge pull request #42173 from rallytime/bp-37424
  - 01addb6053 Avoid Early Convert ret['comment'] to String

• ISSUE #39365: (dglloyd) service.running fails if sysv script has no status command and enable: True (refs: #39366)

• PR #42175: (rallytime) Back-port #39366 to 2016.11 @ 2017-07-06 19:51:47 UTC
  - PR #39366: (dglloyd) Pass sig to service.status in after_toggle (refs: #42175)
  - 3b17bf7f83 Merge pull request #42175 from rallytime/bp-39366
  - 53f7b987e8 Pass sig to service.status in after_toggle

• PR #42172: (rallytime) [2016.11] Merge forward from 2016.3 to 2016.11 @ 2017-07-06 18:15:35 UTC
  - ea16f47f0a Merge pull request #42172 from rallytime/merge-2016.11
  - b1fa332a11 Merge branch '2016.3' into '2016.11'
    - 8fa1fa5bb1 Merge pull request #42155 from phsteve/doc-fix-puppet
      - fb2cb78a31 Fix docs for puppet.plugin_sync so code-block renders properly and sync is spelled consistently

• PR #42176: (rallytime) Back-port #42109 to 2016.11 @ 2017-07-06 18:15:35 UTC
  - PR #42109: (arthurlogilab) [doc] Update aws.rst - add Debian default username (refs: #42176)
  - 6307b9873f Merge pull request #42176 from rallytime/bp-42109
  - 686926daf7 Update aws.rst - add Debian default username

• PR #42095: (terminalmage) Add debug logging to dockerng.login @ 2017-07-06 17:13:05 UTC
  - 28c4e4c3b7 Merge pull request #42095 from terminalmage/docker-login-debugging
  - bd27870a71 Add debug logging to dockerng.login

• ISSUE #42116: (terminalmage) CLI pillar override regression in 2017.7.0rc1 (refs: #42119)

• PR #42119: (terminalmage) Fix regression in CLI pillar override for salt-call @ 2017-07-06 17:02:52 UTC
  - 2b754bc5af Merge pull request #42119 from terminalmage/issue42116
– 9a268949e3 Add integration test for 42116
– 1bb42bb609 Fix regression when CLI pillar override is used with salt-call

• ISSUE #42114: (clallen) saltenv bug in pillar.get execution module function (refs: #42121)

• PR #42121: (terminalmage) Fix pillar.get when saltenv is passed @ 2017-07-06 16:52:34 UTC
– 8c0a83cbb5 Merge pull request #42121 from terminalmage/issue42114
– d14291267f Fix pillar.get when saltenv is passed

• PR #42094: (terminalmage) Prevent command from showing in exception when output_loglevel=quiet @ 2017-07-06 16:18:09 UTC
– 687992c240 Merge pull request #42094 from terminalmage/quiet-exception
– 47d61f4edf Prevent command from showing in exception when output_loglevel=quiet

• ISSUE #42115: (nomeeeno) Installing EPEL repo breaks salt-cloud (refs: #42163)

• PR #42163: (vtuny) Fix #42115: parse libcloud "rc" version correctly @ 2017-07-06 16:15:07 UTC
– dad255160c Merge pull request #42163 from vtuny/fix-42115
– b27b1e340a Fix #42115: parse libcloud "rc" version correctly

• PR #42164: (Ch3LL) Fix kerberos create_keytab doc @ 2017-07-06 15:55:33 UTC
– 2a8ae2b3b6 Merge pull request #42164 from Ch3LL/fixed_kerb_doc
– 7c0f8248ec Fix kerberos create_keytab doc

• PR #42141: (rallytime) Back-port #42098 to 2016.11 @ 2017-07-06 15:11:49 UTC
– PR #42098: (twangboy) Change repo_ng to repo-ng (refs: #42141)
– 678d4d4098 Merge pull request #42141 from rallytime/bp-42098
– bd80243233 Change repo_ng to repo-ng

• PR #42140: (rallytime) Back-port #42097 to 2016.11 @ 2017-07-06 15:11:29 UTC
– PR #42097: (gtmanfred) require large timediff for ipv6 warning (refs: #42140)
– c8af7a3c9 Merge pull request #42140 from rallytime/bp-42097
– 9c4e132540 Import datetime
– 1435bf177e require large timediff for ipv6 warning

• PR #42142: (Ch3LL) Update builds available for rc1 @ 2017-07-05 21:11:56 UTC
– c239664c8b Merge pull request #42142 from Ch3LL/change_builds
– e1b9af39c Update builds available for rc1

• PR #42078: (damon-atkins) pkg.install and pkg.remove fix version number input. @ 2017-07-05 06:04:57 UTC
– 4780d7830a Merge pull request #42078 from damon-atkins/fix_convert_flt_str_version_on_cmd_line
– 09d37dd892 Fix comment typo
– 7167549425 Handle version=None when converted to a string it becomes 'None' parm should default to empty string rather than None, it would fix better with existing code.
– 4fb2bb1856 Fix typo
– cf55c3361c pkg.install and pkg.remove on the command line take number version numbers, store them within a float. However version is a string, to support versions numbers like 1.3.4

Windows Changes

pkg Execution Module`

Significant changes (PR #43708 & #45390, damon-atkins) have been made to the pkg execution module. Users should test this release against their existing package sls definition files.

- `pkg.list_available` no longer defaults to refreshing the winrepo meta database.
- `pkg.install` without a version parameter no longer upgrades software if the software is already installed. Use `pkg.install version=latest` (or simply use a `pkg.latest` state to get the old behavior.
- `pkg.list_pkgs` now returns multiple versions if software installed more than once.
- `pkg.list_pkgs` now returns Not Found when the version is not found instead of (value not set) which matches the contents of the sls definitions.
- `pkg.remove` will wait up to 3 seconds (normally about a second) to detect changes in the registry after removing software, improving reporting of version changes.
- `pkg.remove` can remove latest software, if latest is defined in sls definition.
- Documentation was update for the execution module to match the style in new versions, some corrections as well.
- All install/remove commands are prefix with cmd.exe shell and cmdmod is called with a command line string instead of a list. Some sls files in saltstack/salt-winrepo-ng expected the commands to be prefixed with cmd.exe (i.e. the use of &).
- Some execution module functions results, now behave more like their Unix/Linux versions.
cmd Execution Module

Due to a difference in how Python's `subprocess.Popen()` spawns processes on Windows, passing the command as a list of arguments can result in problems. This is because Windows' `CreateProcess` requires the command to be passed as a single string. Therefore, `subprocess` will attempt to re-assemble the list of arguments into a string. Some escaped characters and quotes can cause the resulting string to be incorrectly-assembled, resulting in a failure to execute the command.

Salt now deals with these cases by joining the list of arguments correctly and ensuring that the command is passed to `subprocess.Popen()` as a string.

Changelog for v2016.11.8..v2016.11.9

* PR #45638: (twangboy) Win fix shell info @ 2018-01-23 22:38:22 UTC
  - 10812969f0 Merge pull request #45638 from twangboy/win_fix_shell_info
  - 872da3ffba Only convert text types in the list_values function
  - 0e41535cdbl Fix reg.py to only convert text types to unicode
  - 3579534ea5 Fix issue with detecting powershell

* PR #45564: (Ch3LL) Add PR changes to 2016.11.9 Release Notes @ 2018-01-19 21:36:05 UTC
  - 2d1dd1186e Merge pull request #45564 from Ch3LL/r-notes-2016
  - 325f4c6cdA Add PR changes to 2016.11.9 Release Notes

* PR #45563: (Ch3LL) Update man pages for 2016.11.9 @ 2018-01-19 21:19:00 UTC
  - 28e4398150 Merge pull request #45563 from Ch3LL/man_2016
  - 529bc0c680 update release number for salt-call man page 2016.11.9
  - 11b7222148 Update man pages for 2016.11.9

* PR #45532: (gtmanfred) fix mock for opensuse @ 2018-01-18 22:48:30 UTC
  - 654df0f526 Merge pull request #45532 from gtmanfred/2016.11.9
  - 6c26025664 fix mock for opensuse

* PR #45518: (gtmanfred) fix last 2016.11.9 failing tests @ 2018-01-18 12:03:50 UTC
  - 571c33aa39 Merge pull request #45518 from gtmanfred/2016.11.9
  - 5455d2de6f fix centos 6 pip test
  - 40255194b0 fix fedora pkg test

* ISSUE #45394: (dmurphy18) git.latest fails when "depth" is used with a non-default branch (refs: #45399)

* PR #45443: (rallytime) Back-port #45399 to 2016.11.9 @ 2018-01-17 14:53:58 UTC
  - PR #45399: (terminalmage) Fix git.latest failure when rev is not the default branch (refs: #45443)
  - 4e0a0ee41f Merge pull request #45443 from rallytime/bp-45399-2016.11.9
  - 919e92c911 Fix git.latest failure when rev is not the default branch

* ISSUE #45432: (TheBigBear) winrepo-ng fault pkg.refresh_db doesn't work - it processes ANY stray .git metadata *.sls files present on minion (refs: #45493)
• PR #45493: (damon-atkins) win_pkg: pkg.refresh_db report an issue if a sls pkg definition does not contain a dict instead of aborting @ 2018-01-17 14:52:03 UTC
  - ebd4db66b8 Merge pull request #45493 from damon-atkins/2016.11_fix_sls_defintion_wrong_type
  - af108440df win_pkg lint space after ,
  - c6e922a236 win_pkg lint issues
  - f4627d7a80 fix quote i.e. change ` to ’
  - 6938a4c099 pkg.refresh_db report an issue if a sls pkg definition id not a dict instead of aborting.
• PR #45446: (rallytime) Back-port #45390 to 2016.11.9 @ 2018-01-16 20:08:38 UTC
  - PR #45390: (damon-atkins) win_pkg: fix pkg.remove, pkg.list_pkgs (refs: #45446)
  - 7322efba92 Merge pull request #45390 from rallytime/bp-45390
  - 69f045ea24 lint too-many-blank-lines
  - 10a7501ede Update release notes
  - 6f2a22e01c fix pkg.remove, pkg.list_pkgs
• PR #45424: (twangboy) Fix some issues with reg.py @ 2018-01-13 19:34:47 UTC
  - b0ece94d4 Merge pull request #45424 from twangboy/win_reg
  - 30f6205f7 Fix some issues with reg.py
• PR #45327: (lomeroe) Backport #44861 to 2016.11 @ 2018-01-08 21:10:41 UTC
  - PR #44861: (twangboy) Fix win_lgpo for unknown values (refs: #45327)
  - 0959ae4ea3 Merge pull request #45327 from lomeroe/bp-44861_2016.11
  - 784139f734 Check for values other than 0 or 1
• PR #45268: (damon-atkins) Fix pkg.install packagename version=latest i.e. if on an old version is installed @ 2018-01-08 17:34:15 UTC
  - a6db5f95f0 Merge pull request #45268 from damon-atkins/2016.11_win_pkg_pkg_install_latest
  - 325a9f0f66 Update 2016.11.9.rst
  - 4da9200b9c Update 2016.11.9.rst
  - 126ae36ac Update 2016.11.9.rst
  - 1c01967943 Update 2016.11.9.rst
  - a0d89882b8 Fix pkg.install packagename version=latest i.e. if on an old version upgrade to the latest
• PR #45256: (rallytime) Back-port #45034 to 2016.11 @ 2018-01-04 14:25:42 UTC
  - PR #45034: (brejoc) Fix for pidfile removal logging (refs: #45256)
  - 1c5e905b61 Merge pull request #45034 from rallytime/bp-45034
  - 68f971b38f Apply test fixes from #45034 to parsers_test.py
  - 9454236694 Fix for pidfile removal logging
• ISSUE saltstack/salt-jenkins#598: (rallytime) [oxygen] CentOS 7 is failing ~ 20 tests in the integration.ssh.test_state.SSHStateTest (refs: #45209)
• PR #45235: (rallytime) Back-port #45209 to 2016.11 @ 2018-01-02 20:20:15 UTC
  - PR #45209: (gtmanfred) enable UsePAM for ssh tests (refs: #45235)
- b75f50afe3 Merge pull request #45235 from rallytime/bp-45209
- 2d0a9bfb7e enable UsePAM for ssh tests

- PR #44965: (gtmanfred) check if VALUE is a string_type @ 2018-01-02 16:42:39 UTC
  - 3ab962b01a Merge pull request #44965 from gtmanfred/2016.11
  - a5d8a6340e check if VALUE is a string_type

- ISSUE #27160: (martinadolfi) salt.states.mount persistence error using spaces in route (refs: #45232)

- PR #45232: (rasathus) Backport #27160 to 2016.11 @ 2018-01-02 15:48:22 UTC
  - 40fb30f63f Merge pull request #45232 from rasathus/2016.11
  - 7a2bd8f49b Merge branch '2016.11' into 2016.11

- ISSUE #44516: (doesitblend) Windows PY3 Minion Returns UTF16 UnicodeError (refs: #44944, #45161)

- PR #45161: (lomeroe) Backport #44944 to 2016.11 @ 2017-12-30 13:19:35 UTC
  - PR #44944: (lomeroe) win_lgpo registry.pol encoding updates (refs: #45161)
  - 707ef5175 Merge pull request #45161 from lomeroe/bp-44944_2016.11
  - 0a46b5a83 remove references to six.unichr
  - f3196d795d lint fixes for static regexes
  - 11b637d108 lint fixes
  - c14d628ad do not decode registry.pol file wholesale, but instead decode individual elements of the file

- ISSUE #45188: (jak3kaj) salt state status.process always returns false (refs: #45199)

- PR #45199: (gtmanfred) status.pid returns pid ids not process names @ 2017-12-28 19:06:11 UTC
  - 6f52034e08 Merge pull request #45199 from gtmanfred/status
  - fb07f9ea7d status.pid returns pid ids not process names

- ISSUE #44728: (casselt) Nodegroups can not be defined by glob with ? or seq (refs: #45118)

- PR #45118: (garethgreenaway) [2016.11] Fix to allow nodegroups to include sequences @ 2017-12-27 18:49:10 UTC
  - d338e27d0 Merge pull request #45118 from garethgreenaway/44728_nodegroups_seq
  - 0ff811de70 Swapping import to be the old path for 2016.11
  - b3e2f388f5 Fix to allow nodegroups to include sequences

- PR #45127: (twangboy) Fix issue with 1641 return code @ 2017-12-22 15:18:28 UTC
  - f969aca3a3 Merge pull request #45127 from twangboy/win_fix_pkg
  - 14639739f2 Fix issue with 1641 return code

- PR #45137: (twangboy) Catch correct error type in list_keys and list_values @ 2017-12-22 14:45:22 UTC
  - dc357b39f0 Merge pull request #45137 from twangboy/win_fix_reg_tests
  - b6f4e8d75 Catch correct error type in list_keys and list_values

- PR #45130: (rallytime) Resolve groups for salt api @ 2017-12-21 20:38:32 UTC
  - 00a1662731 Merge pull request #45130 from rallytime/api-groups
  - 2d2c8df845 Resolve groups for salt api
• PR #45114: (twangboy) Move pam library load to try/except block @ 2017-12-21 14:37:17 UTC
  – 7dc3cc4641 Merge pull request #45114 from twangboy/win_fix_pam
  – cf5ee1777 Move pam library load to try/except block
• ISSUE #45049: (vermondcole) salt cloud module documentation is missing from the index. (refs: #45070)
• PR #45100: (rallytime) Back-port #45070 to 2016.11 @ 2017-12-20 14:55:01 UTC
  – PR #45070: (vermondcole) insert clouds modules in index (refs: #45100)
  – 7e128e8f15 Merge pull request #45100 from rallytime/bp-45070
  – 0bdb46dab9 add clouds modules to index
• PR #45098: (rallytime) Back-port #45092 to 2016.11 @ 2017-12-20 14:40:51 UTC
  – PR #45092: (terminalmage) Fix integration.states.test_pip.PipStateTest.test_pip_installed_weird_install (refs: #45098)
  – bdf93f339d Merge pull request #45098 from rallytime/bp-45092
  – 80b6bd6813 Fix integration.states.test_pip.PipStateTest.test_pip_installed_weird_install
• ISSUE #41044: (pirxthepilot) user.present 'date' parameter is not applying (refs: #44078)
• PR #44078: (rossengeorgiev) user.present: allow date param to be 0 @ 2017-12-19 15:59:29 UTC
  – 324b7d4058 Merge pull request #44078 from rossengeorgiev/fx-41044
  – a81a6fe23c fix #41044; allow for date param to be 0
• PR #44970: (rallytime) Update bootstrap script to latest release: 2017.12.13 @ 2017-12-19 15:49:05 UTC
  – PR #44970: (terminalmage) Fix integration.states.test_pip.PipStateTest.test_pip_installed_weird_install (refs: #45098)
  – 48a59761df Merge pull request #44970 from rallytime/update-bootstrap-script
  – b2c8057427 Update bootstrap script to latest release: 2017.12.13
• ISSUE #45036: (dijit) Quiet installation of packaged minions fails due to redistributable not being quietly installed [py3] [Windows] (refs: #45040)
• PR #45069: (rallytime) Back-port #45040 to 2016.11 @ 2017-12-19 14:25:57 UTC
  – PR #45040: (dijit) Installation Fails on headless machines. (refs: #45069)
  – 637fdaed58 Merge pull request #45069 from rallytime/bp-45040
  – aa438e1605 Installation Fails on headless machines.
    - de55c45c29 Backport #27160 to 2016.11
• ISSUE #41286: (arthtux) boto_vpc.accept_vpc_peering_connection wait a object (refs: #41305)
• PR #44969: (rallytime) Back-port #41305 to 2016.11 @ 2017-12-15 17:22:18 UTC
  – PR #41305: (arthtux) correct accept_vpc_peering_connection (refs: #44969)
  – 4d6d640381 Merge pull request #44969 from rallytime/bp-41305
  – 5c4bee43dc correct accept_vpc_peering_connection
• PR #45031: (terminalmage) Fix invalid exception class in mysql returner @ 2017-12-15 15:00:15 UTC
  – 10de468f13 Merge pull request #45031 from terminalmage/fix-mysql-returner
  – f3bd12c27c Fix invalid exception class in mysql returner
• ISSUE #44820: (msteed) Custom returner breaks manage runner (refs: #44958)
• PR #44972: (terminalmage) Backport #44958 to 2016.11 branch @ 2017-12-14 16:56:02 UTC
- **PR #44958**: (terminalmage) Fix a race condition in manage runner (refs: #44972)
- 9a7466207f Merge pull request #44972 from terminalmage/bp-44958
- a416bf0112 No need to manually do connect_pub, use listen=True in run_job
- 3ec004bd2e Fix a race condition in manage runner

- **ISSUE #44378**: (llua) minion: infinite loop during start when schedule key is null (refs: #44385)

- **PR #44385**: (gtmanfred) schedule should be a dict in opts @ 2017-12-12 20:44:02 UTC
  - 1032ca3290 Merge pull request #44385 from gtmanfred/schedule
  - 9e15c38da2 add comma
  - 855d933cb7 schedule should be a dict

- **ISSUE #44734**: (cruscio) Documentation inconsistency for minion ping_interval timing (refs: #44770)

- **PR #44770**: (cruscio) Fix minion ping_interval documentation @ 2017-12-11 19:50:19 UTC
  - 68d901b12c Merge pull request #44770 from cruscio/2016.11
  - e262bf441 Fix minion ping_interval documentation

- **ISSUE #44292**: (andrew-regan) grains['virtual_subtype'] assignment for Docker broken on Mac (refs: #44335)

- **PR #44335**: (gtmanfred) add docker-ce to docker subtype grains check @ 2017-12-10 17:17:49 UTC
  - d4ab55ce47 Merge pull request #44335 from gtmanfred/2016.11
  - 3f1268d67f fix patching for python 2.6
  - 1d0bd5bb32 Merge branch '2016.11' into 2016.11
  - f02b02032d Merge pull request #4 from terminalmage/pr-44335
  - b4eb1527a6 Add test for PR 44335
  - a30af3252e add docker-ce to docker subtype grains check

- **ISSUE #44530**: (roaldnefs) Identifier not working in salt.states.cron when special is used (refs: #44579)

- **PR #44579**: (roaldnefs) Fix bug in cron module and state - Fixes #44530 @ 2017-12-07 20:18:27 UTC
  - bb1f8dceaf Merge pull request #44579 from roaldnefs/fix-cron-identifier
  - df73ac051 Merge branch '2016.11' into fix-cron-identifier

- **PR #44852**: (damon-atkins) win_pkg fix spelling typos and minion option 2016.11 @ 2017-12-06 16:49:17 UTC
  - af0131fa1f Merge pull request #44852 from damon-atkins/2016.11_win_pkg typo_n_fix
  - 0e7c19084f Lint: Remove extra whitespace
  - 7c7e21f94d Fix spelling typo, and fix backwards compatible minion option for repo location

- **ISSUE #44365**: (icycle77) file.managed appears to ignore source_hash check (refs: #44794)

- **PR #44794**: (terminalmage) Fix regression in file.managed when source_hash used with local file @ 2017-12-04 14:23:29 UTC
  - 88c0d66b4e Merge pull request #44794 from terminalmage/issue44365
  - 3b8b6f25e6 Remove debugging line
  - 153bf45b03 Fix regression in file.managed when source_hash used with local file

- **ISSUE #35777**: (rallytime) Properly deprecate template context data in Fluorine (refs: #44738)
• ISSUE #35523: (rallytime) Come up with a reasonable alternative for lxc.edited_conf (refs: #44738)
• PR #44738: (rallytime) Bump some deprecation warnings from Oxygen to Fluorine @ 2017-12-01 23:10:08 UTC
  c8bb9dfbbb Merge pull request #44738 from rallytime/bump-oxygen-warnings
  ead3c569e1 Bump deprecation warnings from Oxygen to Fluorine
• ISSUE #44730: (msciciel) State network.routes could not add route without gateway on centos7 (refs: #44741)
• PR #44741: (gtmanfred) if gateway is not specified use iface @ 2017-12-01 23:09:03 UTC
  88e3aab00d Merge pull request #44741 from gtmanfred/riph
  439dc8dc6e if gateway is not specified use iface
• ISSUE #31405: (SEJeff) Salt leaves tmp file when file.managed dest file is immutable (refs: #44699)
• PR #44699: (jfindlay) utils/files.py remove temp file upon move failure @ 2017-12-01 15:03:54 UTC
  97e0cf569c Merge pull request #44699 from jfindlay/attr_file
  9e5a40ea7c Merge branch '2016.11' into attr_file
  5c346076fc utils/files remove temp file upon move failure
• ISSUE #44556: (doesitblend) --static option doesn't return highstate output (refs: #44714)
• PR #44714: (rallytime) Allow --static option to display state runs with highstate output @ 2017-12-01 14:31:19 UTC
  7434e0a0df Merge pull request #44714 from rallytime/fix-44556
  1bbe1abaeb2 Allow --static option to display state runs with highstate output
• PR #44517: (whytwolf) Publish port doc missing @ 2017-11-28 21:50:19 UTC
  998d714ee7 Merge pull request #44517 from whytwolf/publish_port_doc_missing
  4b5855283a missed one place where i didnt chang master_port from my copy to publish_port
  e4610babc5 update doc to have publish port
• PR #41279: (Ch3LL) Add fqdn and dns core grain tests @ 2017-11-27 21:28:10 UTC
  6169b52749 Merge pull request #41279 from Ch3LL/add_grain_tests
  1b64f15692 Merge branch '2016.11' into add_grain_tests
  095f1b7d7a Merge branch '2016.11' into add_grain_tests
  9ea4db4224 mock socket.getaddrinfo
  78a07e30f4 add more fqdn tests and remove some of the mocking
  5dbf4144ce add ipv6 in opts
  eabc1b4f9c Add fqdn and dns core grain tests
  3ec4329307 Merge branch '2016.11' into fix-cron-identifier
• ISSUE #44544: (creideiki) pgjsonb returner sets wrong timezone on timestamps in database when using Python 2 (refs: #44563)
• PR #44563: (creideiki) Send Unix timestamps to database in pgjsonb returner @ 2017-11-21 17:44:32 UTC
  dc6de50a9 Merge pull request #44563 from creideiki/pgjsonb-timestamps-44544
  231e412ca4 Merge branch '2016.11' into pgjsonb-timestamps-44544
• **ISSUE #44601**: (rallytime) CherryPy 12.0 removed support for "engine.timeout_monitor.on" config option (refs: #44602)

• **PR #44602**: (rallytime) Handle timeout_monitor attribute error for new versions of CherryPy @ 2017-11-20 21:38:40 UTC
  - 4369df020b Merge pull request #44602 from rallytime/fix-44601
  - ff303df060 Handle timeout_monitor/TimeoutError issues for new versions of CherryPy

• **PR #44604**: (loren gordon) Documents the exclude argument in state execution module @ 2017-11-20 18:19:18 UTC
  - 4a4756fc37 Merge pull request #44604 from loren gordon/doc-exclude
  - c4a6c40eb3 Documents the exclude argument in state execution module
  - 15c445e6b9 Send Unix timestamps to database in pgjsonb
    - 99fa05a456 Fix for bug in cron state
    - 97328faeac Fix for bug in cron module

• **PR #44434**: (whytewolf) add a note that describes grain rebuilding on restart and refresh @ 2017-11-14 11:21:54 UTC
  - 91d46d4fc6 Merge pull request #44434 from whytewolf/1837
  - d148e39dda change from md to rst for code reference
  - 955e305bda fix bad english, as requested by cachedout
  - 7256fccc1c9 update note to take into account grains_cache
  - 7a2981585e Merge branch '2016.11' into 1837
  - aca0405b26 add a note that describes grain rebuilding on restart and refresh

• **ISSUE #41474**: (dm aziuk) state.file:* line endings (refs: #44321)

• **PR #44321**: (gvengel) Fix file.line diff formatting. @ 2017-11-13 19:36:39 UTC
  - a3bd99317f Merge pull request #44321 from gvengel/fix-file-line-diff-output
  - 69a50204a6 Add newline for lint.
  - e7b6bbdb81 Fixed issue with file.line on Windows running Python 2.
  - 8fb9c99fa5 Fix FileModuleTest setUp and tearDown to work on Windows.
  - 3ac5391f5f Namespace missing functions for file.line on Windows.
  - b2b8075b9 Fixed test to work on Windows.
  - 5a5a2dd026 Added integration test for issue #41474
  - 24d7315f1a Fix file.line diff formatting.

• **ISSUE #43417**: (damon-atkins) win_pkg: pkg.install and pkg.remove general issues (refs: #43708)

• **PR #43708**: (damon-atkins) Merge Ready : Backport develop win_pkg to 2016.11 with additional bug fixes @ 2017-11-13 19:33:41 UTC
  - 9ca563718d Merge pull request #43708 from damon-atkins/2016.11_43417_Backport_and Fixes
  - 04d03ea6b8 Updated comment
  - 1dd565e585 Merge remote branch 'upstream/2016.11' into 2016.11_43417_Backport_and Fixes
  - dd48ba2616 Merge remote branch 'upstream/2016.11' into 2016.11_43417_Backport_and Fixes
a0d08598bf dco fix
9467899fc6 Merge remote branch 'upstream/2016.11' into 2016.11_43417_Backport_and_Fixes
6dc180fd0e dco fixes
2496a42ea4 lint fix
2c93fbeb19 Merge remote branch 'upstream/2016.11' into 2016.11_43417_Backport_and_Fixes
c9ec8ea4ad all remove/install commands are passed to cmd.exe /s/c and commands are passed as strings
to cmdmod
35024bd93 typo in comments and doc strings.
ec3f5a9bd 2017.11/develop version() was ignoring saltenv setting.
b31459a32 Backport of devlop to 2016.11 with additional bug fixes

• ISSUE #44423: (mtkennerly) The win_path.exists state cannot prepend to the very start of the PATH (refs: #44424)

• PR #44477: (rallytime) Back-port #44424 to 2016.11 @ 2017-11-13 17:33:29 UTC
  - PR #44424: (mtkennerly) Fix #44423: Handle index=None and index=0 distinctly in the win_path.exists state (refs: #44477)
  - 68ea22188e Merge pull request #44477 from rallytime/bp-44424
  - 4af98dc96 Fix #44423: Handle index=None and index=0 distinctly

• ISSUE #44034: (seanjnkns) salt-call pillar overrides broken in 2016.11.8 and 2017.7.2 (refs: #44483)

• PR #44483: (terminalmage) salt-call: account for instances where __pillar__ is empty @ 2017-11-13 17:30:36 UTC
  - 2c8905902a Merge pull request #44483 from terminalmage/issue44034
  - a9db8beeca salt-call: account for instances where __pillar__ is empty

• PR #44489: (whytewolf) update log-granular-levels to describe what they are filtering on @ 2017-11-13 17:27:37 UTC
  - b5c2028680 Merge pull request #44489 from whytewolf/1956_log-granular-levels
  - 9cdeb4093 update log-granular-levels to describe what they are filtering on

• PR #44193: (twangboy) Fix reg.py for use with LGPO module @ 2017-11-10 19:01:17 UTC
  - ea07f9c54e Merge pull request #44193 from twangboy/win_fix_reg
  - 44d6d9f4ed Remove unused import (lint)
  - f7502436bd Fix various issues
  - 2216e33b91 make salt.utils.to_unicode return none when passed none
  - ce41acc788 Fix many issues with reg.py
  - 4a19df17e Use six.text_type instead of str
  - 1b12ad303 Check type before casting
  - 03fa37b445 Cast vdata to its proper type

• PR #43863: (nicholasmhughes) Atomicfile only copies mode and not user/group perms @ 2017-11-10 18:47:55 UTC
  - ed8da2450b Merge pull request #43863 from nicholasmhughes/fix-atomicfile-permission-copy
- `ea852ec5d3` remove index use with stat module attributes
- `dbeeb0e917` fixes #38452 atomicfile only copies mode and not user/group perms

**ISSUE #39901:** (seanjkns) network.managed ipaddrs ignored (refs: #44260)

**PR #44260:** (seanjkns) Fixes #39901 for RH/CentOS 7 @ 2017-11-07 23:14:59 UTC
- `a66cd67d15` Merge pull request #44260 from seanjkns/issue-39901
- `ed8ccf457 #39901`: Fix pylint
- `43c81dfdee #39901`: Add unit tests
- `613d500876` Merge branch '2016.11' into issue-39901
- `b97e8046ca` Utilize salt.utils.validate.net.* and _raise_error_iface
- `681f3631d Fixes #39901 for RH/CentOS 7`

**PR #44383:** (gtmanfred) switch salt-jenkins over to saltstack for kitchen-salt tests @ 2017-11-03 19:56:48 UTC
- `5e289f42ba` Merge pull request #44383 from gtmanfred/2016kitchen
- `b65f4a4ea switch salt-jenkins over to saltstack`

**PR #44173:** (twangboy) Use google style docstrings in win_system.py @ 2017-10-31 17:56:34 UTC
- `cab54e34b5` Merge pull request #44173 from twangboy/win_system_docs
- `8e111b413d` Fix some of the wording and grammar errors
- `a12bc5a4e Use google style docstrings`

**PR #44304:** (jfindlay) states.cron identifier defaults to name @ 2017-10-31 16:39:47 UTC
- `7aae1d179` Merge pull request #44304 from jfindlay/cron_id
- `cc038c5bec states.cron identifier defaults to name`

**ISSUE #44313:** (rossengeorgiev) salt-ssh: --user option missing from the cli documentation (refs: #44322)

**PR #44322:** (rossengeorgiev) updated CLI docs for salt-ssh @ 2017-10-30 21:39:23 UTC
- `e4dbbde734` Merge pull request #44322 from rossengeorgiev/saltssh-docs-update
- `b18f2e5a6d` fix program name and description for --static
- `5b10918f02 updated CLI docs for salt-ssh`

**PR #44345:** (gtmanfred) remove binding from erb template rendering @ 2017-10-30 20:57:43 UTC
- `4e6f09e3eb` Merge pull request #44345 from gtmanfred/2016kitchen
- `79b8b2d0bf remove binding`

**PR #44342:** (gtmanfred) render template files platforms.yml and driver.yml @ 2017-10-30 20:04:00 UTC
- `209847c8c2` Merge pull request #44342 from gtmanfred/2016kitchen
- `c50508f0b7 render template files platforms.yml and driver.yml`

**ISSUE #44336:** (corywright) Docs for archive.tar should not use leading dash for tar options (refs: #44339)

**PR #44339:** (corywright) Remove leading dash from options in archive.tar docs (2016.11) @ 2017-10-30 19:00:34 UTC
- `1be65224cb` Merge pull request #44339 from corywright/issue-44336-fix-archive-tar-docs-2016-11
- `9c1c35a59f` Remove leading dash (-) from options in archive.tar documentation
• ISSUE #44272: (gurubert) [patch] win_service.stop() fails (refs: #44295)

• PR #44295: (gurubert) fixes issue #44272 @ 2017-10-27 14:28:57 UTC
  - bebc33da5 Merge pull request #44295 from HeinleinSupport/issue44272
  - f972715a45 fixes issue #44272

• PR #44286: (gtmanfred) use our git repo for kitchen-salt @ 2017-10-25 19:27:32 UTC
  - e7ca9f8407 Merge pull request #44286 from gtmanfred/2016.11
  - 193e71e3e7 use our git repo for kitchen-salt

• PR #44259: (gtmanfred) begin switching in kitchen-salt for running the test suite @ 2017-10-25 13:30:35 UTC
  - 8a1ea165af Merge pull request #44259 from gtmanfred/2016.11
  - 56a3ad8f68 fix pylint comments
  - 4add66db1 add comment to Gemfile and move copyartifacts
  - b4c8f7eb57 fix pylint
  - 392fd4f837 try newest salttesting
  - 79251287d0 add logging
  - 38963d5a82 use transport if not set in state_file
  - 10e309a64f which vagrant should go to stderr
  - 9307564de0 fix output columns
  - 2da22f87e1 test opennebula
  - 9f38f16905 add opennebula to Gemfile
  - 7465f9b27a add script for copying back artifacts
  - 255118cfd7 run tests with kitchen

• PR #44268: (twangboy) Fix typo @ 2017-10-25 13:01:35 UTC
  - 9d0be8509b Merge pull request #44268 from twangboy/win_fix_lgpo_typo
  - a6a410a77 Fix typo

• PR #44269: (terminalmage) Fix log message in salt.utils.gifs @ 2017-10-25 13:00:58 UTC
  - 0beb65a283 Merge pull request #44269 from terminalmage/fx-fix-log-message
  - bc9cd65496 Fix log message in salt.utils.gifs

• ISSUE #44155: (rhoths) file.directory with clean not triggering listener in test mode (refs: #44160)

• PR #44160: (gtmanfred) add changes to test return @ 2017-10-23 14:35:21 UTC
  - 304dd2529d Merge pull request #44160 from gtmanfred/directory
  - a7d3d668f4 missed removing changes in the next test
  - ac0b5ec440 fix test
  - d3d00c3e62 add changes to test return

• PR #44205: (rallytime) Back-port #44177 to 2016.11 @ 2017-10-23 14:09:07 UTC
  - PR #44177: (senthilkumar-e) Fixing default redis.host in documentation (refs: #44205)
  - e10395483d Merge pull request #44205 from rallytime/bp-44177
- b9940f8521 Fixing default redis.host in documentation
- **ISSUE #44140**: (vtolstov) incorrect network interfaces settings with network.managed under debian jessie (refs: #44167)

- **PR #44167**: (garethgreenaway) Fixes to modules/debian_ip @ 2017-10-20 14:25:39 UTC
  - 09d6d80c08 Merge pull request #44167 from garethgreenaway/44140_debian_ip_fixes
  - 5f7555846f When looping through the various pre, post, up and down commands put them into the interface dict using the right internet family variable.

- **PR #43830**: (rallytime) Back-port #43644 to 2016.11 @ 2017-10-19 22:57:51 UTC
  - **PR #43644**: (defanator) Several fixes for RDS DB parameter group management (refs: #43830)
  - 99e93b52 Merge pull request #43830 from rallytime/bp-43644
  - 12845ae802 Several fixes for RDS DB parameter group management

- **ISSUE #43936**: (oeuftete) manage.present still reports lost minion (refs: #43994)

- **ISSUE #38367**: (tyeapple) logic error in connected_ids function of salt/utils/minions.py when using include_localhost=True (refs: #43994)

- **PR #43994**: (oeuftete) Fix manage.present to show lost minions @ 2017-10-19 22:27:59 UTC
  - 07db6a3d8b Merge pull request #43994 from oeuftete/fix-manage-runner-presence
  - f3980d7d83 Fix manage.present to show lost minions

- **ISSUE #44150**: (rossengeorgiev) version param in pkg.installed broken in 2016.11.8/2017.7.2 in EL6-7 (refs: #44188)

- **PR #44188**: (terminalmage) yumpkg: Check pkgname instead of name to see if it is a kernel pkg @ 2017-10-19 22:20:35 UTC
  - a07537e258 Merge pull request #44188 from terminalmage/issue44150
  - 0692f442db yumpkg: Check pkgname instead of name to see if it is a kernel pkg

- **ISSUE #43427**: (tylerjones4508) Salt-Cloud There was a profile error: invalid literal for int() with base 10: (refs: #44089)

- **PR #44158**: (rallytime) Back-port #44089 to 2016.11 @ 2017-10-19 20:38:15 UTC
  - **PR #44089**: (cetanu) Catch on empty Virtualbox network addr #43427 (refs: #44158)
  - 715edc3969 Merge pull request #44158 from rallytime/bp-44089
  - 534f3a5b7a Catch on empty Virtualbox network addr #43427

- **ISSUE #43307**: (marek-knappe) Filesystem creation is failing on newly created LV (refs: #44029)

- **PR #44131**: (rallytime) Back-port #44029 to 2016.11 @ 2017-10-17 15:05:39 UTC
  - **PR #44029**: (msummers42) addresses issue #43307, disk.format_ to disk.format (refs: #44131)
  - 0cd49b89b1 Merge pull request #44131 from rallytime/bp-44029
  - b4ba7ae2fc addresses issue #43307, disk.format_ to disk.format

- **ISSUE #44087**: (mfussenegger) Using state.highstate with terse=true prevents useful error output (refs: #44093)

- **PR #44093**: (gtmanfred) don't filter if return is not a dict @ 2017-10-16 19:13:19 UTC
  - 3a68e356f8 Merge pull request #44093 from gtmanfred/fixed-44087
5455c5053b fix pylint
- f749cafa25 don’t filter if return is not a dict

**PR #44122**: (cachedout) Add note about GPG signing to PR template @ 2017-10-16 19:09:38 UTC
- c785d7a847 Merge pull request #44122 from cachedout/gpg_pr_template
- e41e3d76be Typo fix
- 37c980880 Add note about GPG signing to PR template

**PR #44124**: (rallytime) [2016.11] Merge forward from 2016.11.8 to 2016.11 @ 2017-10-16 19:07:14 UTC
- bf90ea1f51 Merge pull request #44124 from rallytime/merge-2016.11
- 59861291c8 Merge branch '2016.11.8' into '2016.11'
  - 57623e2abe Merge pull request #44028 from rallytime/bp-44011
    - 89e084bda3 Do not allow IDs with null bytes in decoded payloads
    - 206ae23f15 Don’t allow path separators in minion ID

**PR #44097**: (gtmanfred) OpenNebula does not require the template_id to be specified @ 2017-10-16 18:36:17 UTC
- 13f3ffa83a Merge pull request #44097 from gtmanfred/openneb
- c29655b2c2 Merge branch '2016.11' into openneb
- bd2490b149 OpenNebula does not require the template_id to be specified

**PR #44110**: (roaldnefs) Format fix code example local returner doc @ 2017-10-16 15:57:50 UTC
- ac3e4df964 Merge pull request #44110 from roaldnefs/fix-doc-local-returner
- e4f5f7594 Merge branch '2016.11' into fix-doc-local-returner

**PR #44092**: (techhat) Made sure that unicoded data is sent to sha256() @ 2017-10-13 21:20:12 UTC
- c960ca32c2 Merge pull request #44092 from techhat/awsunicode
- bbd9d4d00 One more encoding
- 0e8b325667 Apparently __salt_system_encoding__ is a thing
- 1e7211838d Use system encoding
- 1af21bbe5e Made sure that unicoded data is sent to sha256()

**ISSUE #43581**: (jcourington) cherrypy stats issue (refs: #44021)

**PR #44021**: (whiteinge) Also catch cpstats AttributeError for bad CherryPy release ~5.6.0 @ 2017-10-12 18:11:41 UTC
- PR #42655: (whiteinge) Reenable cpstats for rest_cherrypy (refs: #44021)
- PR #33806: (cachedout) Work around upstream cherrypy bug (refs: #42655)
- d89c317d96 Merge pull request #44021 from whiteinge/cpstats-attribute-error
- bf14e5f578 Also catch cpstats AttributeError for bad CherryPy release ~5.6.0

**PR #44025**: (dayid) Typo correction of lover to lower @ 2017-10-11 17:31:45 UTC
- bbdabe242a Merge pull request #44025 from dayid/lover_typo
- 385980c21a Merge branch '2016.11' of https://github.com/saltstack/salt into lover_typo
- 266dc00a23 Typo correction of lover to lower
• **PR #44030**: (rallytime) [2016.11] Merge forward from 2016.3 to 2016.11 @ 2017-10-11 13:01:42 UTC
  - d8f3891a5e Merge pull request #44030 from rallytime/merge-2016.11
  - 53aef0d75c Merge branch '2016.3' into '2016.11'
  - 64fd539377 Merge pull request #44010 from Ch3LL/2016.3.7_follow_up
    - 9a00302cd8 fix 2016.3.7 release notes merge conflict
    - 63da1214db Do not allow IDs with null bytes in decoded payloads
    - ee792581fc Don't allow path separators in minion ID
    - 8aab65c718 fix 2016.3.7 release notes merge conflict
  - bd73dc02c Merge pull request #43977 from Ch3LL/3.8_sec
  - 5fb3f6b1 Add Security Notes to 2016.3.8 Release Notes
• **PR #44011**: (Ch3LL) Security Fixes for 2016.11.8 (refs: #44028) @ 2017-10-10 20:04:36 UTC

  - c0149101c0 Do not allow IDs with null bytes in decoded payloads
  - 19481423dd Don't allow path separators in minion ID
• **PR #44023**: (Ch3LL) Add 2016.11.9 Release Note File @ 2017-10-10 20:03:03 UTC
  - d61300df20 Merge pull request #44023 from Ch3LL/11.9rn
  - 7f9015eb41 Add 2016.11.9 Release Note File
• **PR #44019**: (benediktwerner) Added missing docs to the tutorial index and fixed spelling mistake @ 2017-10-10 19:57:06 UTC
  - 9df53bf63a Merge pull request #44019 from benediktwerner/2016.11
  - bc53598027 Fixed spelling mistake in salt_bootstrap tutorial
  - 6c0344824 Added missing tutorial docs to the tutorial index
• **PR #43955**: (meaksh) Enable a new `--with-salt-version` parameter for the "setup.py" script @ 2017-10-10 17:36:52 UTC
  - 364523f5f8 Merge pull request #43955 from meaksh/2016.11-fix-2291
  - a81b78381b Merge branch '2016.11' into 2016.11-fix-2291
  - 44bc91bb824 Added '--with-salt-version' parameter for setup.py script
• **ISSUE #43945**: (bobrik) kmod.present doesn't work with compiled-in modules (refs: #43962)
• **PR #43962**: (bobrik) Report built-in modiles in kmod.available, fixes #43945 @ 2017-10-10 16:31:39 UTC
  - fec714b91d Merge pull request #43962 from bobrik/kmod-built-in
  - 95a901553 Report built-in modules in kmod.available, fixes #43945
• **PR #43960**: (cro) Require that bindpw be non-empty when auth.ldap.anonymous is False @ 2017-10-09 23:09:02 UTC
  - e43ae3c9e Merge pull request #43960 from cro/ldap_nopw_bind2
  - 962a20cf4b Require that bindpw be non-empty if auth.ldap.anonymous=False
  - 9df3d91d8f Release notes blurb for change to bindpw requirements
• **PR #43991**: (Ch3LL) Add Security Notes to 2016.3.8 Release Notes @ 2017-10-09 22:00:25 UTC
• ISSUE #42947: (rossengeorgiev) Zenoss state changes production state even when test=true (refs: #43968)

• PR #43968: (rossengeorgiev) fix zenoss state module not respecting test=true @ 2017-10-09 21:27:31 UTC
  e9dfda2177 Merge pull request #43991 from Ch3LL/3.8_sec_2
  1977df8462 Add Security Notes to 2016.3.8 Release Notes

• PR #43776: (Ch3LL) [2016.11] Bump latest and previous versions @ 2017-10-09 17:22:15 UTC
  8d56a5ac45 Merge pull request #43776 from Ch3LL/2016.11.8_docs
  f72be00000 [2016.11] Bump latest and previous versions

• PR #43976: (Ch3LL) Add Security Notes to 2016.11.8 Release Notes @ 2017-10-09 17:20:54 UTC
  21bf71c3f5 Merge pull request #43976 from Ch3LL/11.8_sec

• PR #43973: (terminalmage) Fix grains.has_value when value is False @ 2017-10-09 14:59:20 UTC
  1d5397ab5b Merge pull request #43973 from terminalmage/fix-grains.has_value
  bf45ae66a Fix grains.has_value when value is False

• PR #43888: (rallytime) Back-port #43841 to 2016.11 @ 2017-10-05 20:09:58 UTC
  PR #43841: (austinpapp) add -n with netstat so we don’t resolve IPs (refs: #43888)
  9ac3f2ea7b Merge pull request #43888 from rallytime/bp-43841
  87d676f08a add -n with netstat so we don’t resolve

• PR #43916: (dereckson) Fix typo in salt-cloud scaleway documentation @ 2017-10-05 18:58:00 UTC
  f880ac4c08 Merge pull request #43916 from dereckson/fix-typo-cloud-scaleway
  15b8b8a9f4 Fix typo in salt-cloud scaleway documentation

• PR #43869: (UtahDave) Update SaltConf banner per Rhett’s request @ 2017-10-04 13:08:30 UTC
  2ab7549d48 Merge pull request #43869 from UtahDave/2016.11local
  e3b2857285 Merge branch ‘2016.11’ into 2016.11local

• PR #43869: (terminalmage) Only join cmd if it’s not a string @ 2017-10-03 16:25:07 UTC
  4b882d4272 Merge pull request #43869 from terminalmage/issue43522
  fe28b0d4f4 Only join cmd if it’s not a string
  8c671fd0c1 Update SaltConf banner per Rhett’s request

• ISSUE #43373: (rgcosma) use keyword breaks sls_id (refs: #43707)

• PR #43707: (terminalmage) Add missing support for use/use_in requisites to state.sls_id @ 2017-10-01 14:07:53 UTC
  a2161efda3 Merge pull request #43707 from terminalmage/issue43373
  3ebde1895f Merge branch ‘2016.11’ into issue43373
  e580ed4caa Merge branch ‘2016.11’ into issue43373
  5b3be6e8af Fix failing unit test
- f73764481b Add missing support for use/use_in requisites to state.sls_id

- **PR #43807**: (terminalmage) cmdmod: Don't list-ify string commands on Windows @ 2017-09-29 02:48:36 UTC
  - 85b3aa332a Merge pull request #43807 from terminalmage/issue43522
  - d8708bf698 cmdmod: Don't list-ify string commands on Windows

- **PR #43768**: (vutny) Fix Pylint deprecated option warnings @ 2017-09-28 12:27:36 UTC
  - ea8d273c2b Merge pull request #43768 from vutny/fix-pylint-deprecation-warnings
  - f8b3fa9da1 Merge branch '2016.11' into fix-pylint-deprecation-warnings

- **ISSUE #40311**: (cralston0) --hide-timeout used with --output json --static produces unparsable JSON (refs: #43772)

- **PR #43772**: (gtmanfred) dont print Minion not responding with quiet @ 2017-09-27 15:39:18 UTC
  - 1a8cc60bb4 Merge pull request #43772 from gtmanfred/2016.11
  - 0194c60960 dont print Minion not responding with quiet

- **PR #43747**: (rallytime) Add GPG Verification section to Contributing Docs @ 2017-09-26 21:25:37 UTC
  - 9dee896fb9 Merge pull request #43747 from rallytime/gpg-verification
  - 7a70de19f4 Merge branch '2016.11' into gpg-verification

- **ISSUE #43729**: (The-Loeki) Docker events engine broken on newer docker.py (refs: #43733)

- **PR #43733**: (terminalmage) Allow docker_events engine to work with newer docker-py @ 2017-09-26 16:47:40 UTC
  - 1cc3ad1c8d Merge pull request #43733 from terminalmage/issue43729
  - 6e5c99bda0 Allow docker_events engine to work with newer docker-py

- **ISSUE #42082**: (stamak) [salt.utils.gitfs] [CRITICAL] Invalid gitfs configuration parameter 'saltenv' in remote git+ssh://git@ourgitserver/ourgitrepo.git. (refs: #43458)

- **PR #43458**: (terminalmage) Fix missing PER_REMOTE_ONLY in cache.clear_git_lock runner @ 2017-09-26 14:39:01 UTC
  - 5d38be4ff7 Merge pull request #43458 from terminalmage/issue42082
  - 5f90812b12 Fix missing PER_REMOTE_ONLY in cache.clear_git_lock runner
    - 23bb4a5dde Add GPG Verification section to Contributing Docs

- **ISSUE #43650**: (rallytime) Review contributing documentation and the merge-forward process (refs: #43727)

- **ISSUE #42706**: (blarghmatey) Parallel Cache Failure (refs: #43018)

- **PR #43727**: (rallytime) Revise "Contributing" docs: merge-forwards/release branches explained! @ 2017-09-26 12:43:16 UTC
  - PR #43018: (jubrad) Update state.py (refs: #43727)
  - 023a563657 Merge pull request #43727 from rallytime/fix-43650
  - babad12d83 Revise "Contributing" docs: merge-forwards/release branches explained!

- **PR #43648**: (rallytime) Handle VPC/Subnet ID not found errors in boto_vpc module @ 2017-09-22 17:40:43 UTC
  - f46c858f25 Merge pull request #43648 from rallytime/handle-boto-vpc-errors
  - 54842b5012 Handle VPC/Subnet ID not found errors in boto_vpc module
    - 651ed166d3 Fix Pylint deprecated option warnings
• **PR #43575**: (akissa) Fix CSR not recreated if key changes @ 2017-09-21 17:52:01 UTC
  - 9dba34aa06 Merge pull request #43575 from akissa/fix-csr-not-recreated-if-key-changes
  - b1b4dafd39 Fix CSR not recreated if key changes

• **ISSUE #42165**: (arount) top_file_merging_strategy: merge does not works (refs: #43415)

• **PR #43672**: (rallytime) Back-port #43415 to 2016.11 @ 2017-09-21 16:38:56 UTC
  - **PR #43415**: (mattLLVW) Fix env_order in state.py (refs: #43672)
  - 1d4fa48209 Merge pull request #43672 from rallytime/bp-43415
  - 3fb42bc238 Fix env_order in state.py

• **PR #43673**: (rallytime) Back-port #43652 to 2016.11 @ 2017-09-21 16:37:36 UTC
  - **PR #43652**: (VertigoRay) Salt Repo has Deb 9 and 8 (refs: #43673)
  - ff832ee607 Merge pull request #43673 from rallytime/bp-43652
  - d91c47c6f9 Salt Repo has Deb 9 and 8

• **PR #43677**: (terminalmage) Fix RST headers for runners (2016.11 branch) @ 2017-09-21 16:35:57 UTC
  - 3d6cb9fba8 Merge pull request #43677 from terminalmage/runners-docs-2016.11
  - 2fd88e94fa Fix RST headers for runners (2016.11 branch)

• **PR #43534**: (twangboy) Fixes removal of double-quotes by shlex_split in winrepo for 2016.11 @ 2017-09-21 14:39:42 UTC
  - be38239e5d Merge pull request #43534 from twangboy/win_fix_pkg.install_2016.11
  - 1546c1ca04 Add posix=False to call to salt.utils.shlex_split
  - **PR #43663**: (moio) multiprocessing minion option: documentation fixes (develop) (refs: #43661)

• **PR #43661**: (moio) multiprocessing minion option: documentation fixes (2016.11) @ 2017-09-21 13:02:27 UTC
  - 0d3fd3d374 Merge pull request #43661 from moio/2016.11-multiprocessing-doc-fix
  - 625eabb83f multiprocessing minion option: documentation fixes

• **PR #43646**: (brejoc) Added tests for pid-file deletion in DaemonMixIn @ 2017-09-20 19:21:54 UTC
  - 6b4516c025 Merge pull request #43646 from brejoc/2016.11-pidfile-tests
  - 96f39a420b Fixed linting
  - 08fba98735 Fixed several issues with the test
  - 3a089e450f Added tests for pid-file deletion in DaemonMixIn

• **PR #43591**: (rallytime) [2016.11] Merge forward from 2016.11.8 to 2016.11 @ 2017-09-19 16:18:34 UTC
  - cfb1625741 Merge pull request #43591 from rallytime/merge-2016.11
  - 57b9d642c2 Merge branch '2016.11.8' into '2016.11'
    - e83421694f Merge pull request #43550 from twangboy/osx_fix_preinstall_2016.11.8
    - 1b044d39d2 Fix logic in /etc/paths.d/salt detection

• **PR #43572**: (vutny) cloud.action: list_nodes_min returns all EC2 instances @ 2017-09-18 20:36:44 UTC
  - 8671b91f62 Merge pull request #43572 from vutny/fix-salt-cloud-list-min-instance-set
  - 21966e7ce8 cloud.action: list_nodes_min returns all instances
• PR #43461: (twangboy) Add /norestart switch to vcredist install @ 2017-09-12 20:33:46 UTC
  - f2b86fa2db Merge pull request #43461 from twangboy/win_norestart
  - 2d269d1a76 Change all comment markers to '#'
  - d80aae16cb Handle ErrorCode returned by VCRedist installer
  - fb31e9a530 Add /norestart switch to vcredist install
• ISSUE #43267: (brejoc) OSError - Can’t delete PIDfile when not root (refs: #43366)
• PR #43366: (brejoc) Adding error when PIDfile cannot be deleted @ 2017-09-12 15:31:16 UTC
  - 90e8ca9c36 Merge pull request #43366 from brejoc/2016.11.pidfile-fix
  - 6e3eb76c79 Removed unused format argument
  - daf498b3d Catching error when PIDfile cannot be deleted
• ISSUE #43386: (rajvidhimar) Scheduler’s job_kwarg not working as expected. (refs: #43442)
• PR #43442: (garethgreenaway) [2016.11] Fixes to scheduler __pub values in kwargs @ 2017-09-12 15:16:20 UTC
  - a6c458607a Merge pull request #43442 from garethgreenaway/43386_2016_11_schedule_kwarg_pub
  - e637ecebe86 Merge branch '2016.11__11_schedule_kwarg_pub' into 43386_2016_11_schedule_kwarg_pub
  - 6114df8dc3 Adding a small check to ensure we do not continue to populate kwargs with __pub items from the kwargs item.
• ISSUE #43223: (rallytime) Properly deprecate describe_route_table function in boto_vpc module (refs: #43445)
• PR #43445: (rallytime) Add Neon to version list @ 2017-09-12 15:00:27 UTC
  - PR #43445: (rallytime) Bump deprecation warning for boto_vpc.describe_route_table (refs: #43445)
  - 3c4299f9 Merge pull request #43456 from rallytime/43445_follow_up
  - 35c1d8898d Add Neon to version list
• PR #43441: (meaksh) Use $HOME to get the user home directory instead using '~' char @ 2017-09-11 21:25:20 UTC
  - 6db7a721c0 Merge pull request #43441 from meaksh/2016.11-salt-bash-completion-fix
  - b4f26ab21 Use $HOME to get the user home directory instead using '~' char
• ISSUE #43223: (rallytime) Properly deprecate describe_route_table function in boto_vpc module (refs: #43445)
• PR #43445: (rallytime) Bump deprecation warning for boto_vpc.describe_route_table (refs: #43445) @ 2017-09-11 21:23:28 UTC
  - 05f4f4a50 Merge pull request #43445 from rallytime/bump-deprecation-warning
  - c91cd1c6d9 Bump deprecation warning for boto_vpc.describe_route_table
• PR #43432: (rallytime) Back-port #43419 to 2016.11 @ 2017-09-11 17:36:37 UTC
  - PR #43419: (gtmanfred) make cache dirs when spm starts (refs: #43432)
  - c57dc50093 Merge pull request #43432 from rallytime/bp-43419
  - c471a29527 make cache dirs when spm starts
• ISSUE #43387: (aogier) genesis.bootstrap debootstrap fails if no qemu specified (refs: #43390)
