A job ID or 0 on failure.  

```
>>> local.cmd_async('localhost', 'salt['server']', [300])
'20131219215921857715'
```  

**cmd_batch(tgt, fun, arg=(), tgt_type='glob', ret='', kwarg=None, batch='10%', **kwargs)**  
Iteratively execute a command on subsets of minions at a time  

The function signature is the same as `cmd()` with the following exceptions.  

Parameters  

- **batch** -- The batch identifier of systems to execute on  

Returns  
A generator of minion returns  

```
>>> returns = local.cmd_batch('localhost', 'salt['server']', batch='10%')
... for ret in returns:
...     print(ret)
...   {'jerry': {...}}
``` (continues on next page)
cmd_iter(tgt, fun, arg=(), timeout=None, tgt_type='glob', ret='', kwarg=None, **kwargs)

Yields the individual minion returns as they come in

The function signature is the same as cmd() with the following exceptions.

Normally cmd_iter() does not yield results for minions that are not connected. If you want it to return results for disconnected minions set expect_minions=True in kwarg.

Returns

A generator yielding the individual minion returns

```python
>>> ret = local.cmd_iter('*', 'test.ping')
>>> for i in ret:
...     print(i)
{'jerry': {'ret': True}}
{'dave': {'ret': True}}
{'stewart': {'ret': True}}
```

cmd_iter_no_block(tgt, fun, arg=(), timeout=None, tgt_type='glob', ret='', kwarg=None, show_jid=False, verbose=False, **kwargs)

Yields the individual minion returns as they come in, or None when no returns are available.

The function signature is the same as cmd() with the following exceptions.

Returns

A generator yielding the individual minion returns, or None when no returns are available. This allows for actions to be injected in between minion returns.

```python
>>> ret = local.cmd_iter_no_block('*', 'test.ping')
>>> for i in ret:
...     print(i)
None
{'jerry': {'ret': True}}
{'dave': {'ret': True}}
None
{'stewart': {'ret': True}}
```

cmd_subset(tgt, fun, arg=(), tgt_type='glob', ret='', kwarg=None, subset=3, cli=False, progress=False, full_return=False, **kwargs)

Execute a command on a random subset of the targeted systems

The function signature is the same as cmd() with the following exceptions.

Parameters

- subset -- The number of systems to execute on
- cli -- When this is set to True, a generator is returned, otherwise a dictionary of the minion returns is returned

```python
>>> SLC.cmd_subset('*', 'test.ping', subset=1)
{'jerry': True}
```

get_cli_returns(jid, minions, timeout=None, tgt='', tgt_type='glob', verbose=False, show_jid=False, **kwargs)

Starts a watcher looking at the return data for a specified JID
Returns

all of the information for the JID

**get_event_iter_returns**(jid, minions, timeout=None)

Gather the return data from the event system, break hard when timeout is reached.

**run_job**(tgt, fun, arg=(), tgt_type='glob', ret='', timeout=None, jid='', kwarg=None, listen=False, **kwargs)

Asynchronously send a command to connected minions

Prep the job directory and publish a command to any targeted minions.

Returns

A dictionary of (validated) pub_data or an empty dictionary on failure. The pub_data contains the job ID and a list of all minions that are expected to return data.

```python
>>> local.run_job('*', 'test.sleep', [300])
{'jid': '20131219215650131543', 'minions': ['jerry']}
```

### Salt Caller

**class** salt.client.Caller(c_path="/etc/salt/minion", mopts=None)

Caller is the same interface used by the **salt-call** command-line tool on the Salt Minion.

Changed in version 2015.8.0: Added the cmd method for consistency with the other Salt clients. The existing function and sminion.functions interfaces still exist but have been removed from the docs.

Importing and using Caller must be done on the same machine as a Salt Minion and it must be done using the same user that the Salt Minion is running as.

**Usage:**

```python
import salt.client
caller = salt.client.Caller()
caller.cmd('test.ping')
```

Note, a running master or minion daemon is not required to use this class. Running salt-call --local simply sets `file_client` to 'local'. The same can be achieved at the Python level by including that setting in a minion config file.

New in version 2014.7.0: Pass the minion config as the mopts dictionary.

```python
import salt.client
import salt.config
__opts__ = salt.config.minion_config('/etc/salt/minion')
__opts__['file_client'] = 'local'
caller = salt.client.Caller(mopts=__opts__)
```

**cmd**(fun, *args, **kwargs)

Call an execution module with the given arguments and keyword arguments

Changed in version 2015.8.0: Added the cmd method for consistency with the other Salt clients. The existing function and sminion.functions interfaces still exist but have been removed from the docs.
Salt Proxy Caller

```python
caller.cmd('test.arg', 'Foo', 'Bar', baz='Baz')
caller.cmd('event.send', 'myco/myevent/something',
          data={'foo': 'Foo'}, with_env=['GIT_COMMIT'], with_grains=True)
```

**class** salt.client.ProxyCaller(c_path='/etc/salt/proxy', mopts=None)

ProxyCaller is the same interface used by the **salt-call** with the args `--proxyid <proxyid>` command-line tool on the Salt Proxy Minion.

Importing and using ProxyCaller must be done on the same machine as a Salt Minion and it must be done using the same user that the Salt Minion is running as.

**Usage:**

```python
import salt.client
caller = salt.client.ProxyCaller()
caller.cmd('test.ping')
```

Note, a running master or minion daemon is not required to use this class. Running **salt-call --local** simply sets `file_client` to 'local'. The same can be achieved at the Python level by including that setting in a minion config file.

```python
import salt.client
import salt.config
__opts__ = salt.config.proxy_config('/etc/salt/proxy', minion_id='quirky_edison')
__opts__['file_client'] = 'local'
caller = salt.client.ProxyCaller(mopts=__opts__)
```

**Note:** To use this for calling proxies, the **is_proxy** functions requires that `--proxyid` be an argument on the commandline for the script this is used in, or that the string **proxy** is in the name of the script.

**cmd**(*fun*, *args*, **kwargs)

Call an execution module with the given arguments and keyword arguments

```python
caller.cmd('test.arg', 'Foo', 'Bar', baz='Baz')
caller.cmd('event.send', 'myco/myevent/something',
          data={'foo': 'Foo'}, with_env=['GIT_COMMIT'], with_grains=True)
```
RunnerClient

class salt.runner.RunnerClient(opts, context=None)
The interface used by the salt-run CLI tool on the Salt Master

It executes runner modules which run on the Salt Master.

Importing and using RunnerClient must be done on the same machine as the Salt Master and it must be
done using the same user that the Salt Master is running as.

Salt's external_auth can be used to authenticate calls. The eauth user must be authorized to execute
runner modules: (@runner). Only the master_call() below supports eauth.

asynchronous(fun, low, user='UNKNOWN', pub=None, local=True)

Execute the function in a multiprocess and return the event tag to use to watch for the return

cmd(fun, arg=None, pub_data=None, kwarg=None, print_event=True, full_return=False)

Execute a function

```python
globals() = salt.config.master_config('/etc/salt/master')
runner = salt.runner.RunnerClient(globals)
runner.cmd('jobs.list_jobs', [])
{
    '20131219215650131543': {
        'Arguments': [300],
        'Function': 'test.sleep',
        'StartTime': '2013, Dec 19 21:56:50.131543',
        'Target': '*',
        'Target-type': 'glob',
        'User': 'saltdev'
    },
    '20131219215921857715': {
        'Arguments': [300],
        'Function': 'test.sleep',
        'Target': '*',
        'Target-type': 'glob',
        'User': 'saltdev'
    }
}
```

cmd_async(low)

Execute a runner function asynchronously; eauth is respected

This function requires that external_auth is configured and the user is authorized to execute runner
functions: (@runner).

```python
runner.cmd_async({
    'fun': 'jobs.list_jobs',
    'username': 'saltdev',
    'password': 'saltdev',
    'eauth': 'pam',
})
```

cmd_sync(low, timeout=None, full_return=False)

Execute a runner function synchronously; eauth is respected
This function requires that `external_auth` is configured and the user is authorized to execute runner functions: (@runner).

```python
runner.cmd_sync(
    
    'fun': 'jobs.list_jobs',
    'username': 'saltdev',
    'password': 'saltdev',
    'eauth': 'pam',
)
```

### WheelClient

**class** `salt.wheel.WheelClient` *(opts, context=None)*

An interface to Salt’s wheel modules

Wheel modules interact with various parts of the Salt Master.

Importing and using `WheelClient` must be done on the same machine as the Salt Master and it must be done using the same user that the Salt Master is running as. Unless `external_auth` is configured and the user is authorized to execute wheel functions: (@wheel).

Usage:

```python
import salt.config
import salt.wheel

opts = salt.config.master_config('/etc/salt/master')
wheel = salt.wheel.WheelClient(opts)
```

**asynchronous** *(fun, low, user='UNKNOWN', pub=None, local=True)*

Execute the function in a multiprocess and return the event tag to use to watch for the return

**cmd** *(fun, arg=None, pub_data=None, kwarg=None, print_event=True, full_return=False)*

Execute a function

```python
>>> wheel.cmd('key.finger', ['jerry'])
{'minions': {'jerry':
```

**cmd_async** *(low)*

Execute a function asynchronously; eauth is respected

This function requires that `external_auth` is configured and the user is authorized

```python
>>> wheel.cmd_async(
    
    'fun': 'key.finger',
    'match': 'jerry',
    'eauth': 'auto',
    'username': 'saltdev',
    'password': 'saltdev',
)
{'jid': '201312192247441661', 'tag': 'salt/wheel/2013121922474416681'}``
**cmd_sync** *(low, timeout=None, full_return=False)*

Execute a wheel function synchronously; eauth is respected

This function requires that `external_auth` is configured and the user is authorized to execute runner functions: `(@wheel)`.

```python
>>> wheel.cmd_sync({
    'fun': 'key.finger',
    'match': 'jerry',
    'eauth': 'auto',
    'username': 'saltdev',
    'password': 'saltdev',
})
{'minions': {'jerry': 
```

---

**CloudClient**

**class** `salt.cloud.CloudClient` *(path=None, opts=None, config_dir=None, pillars=None)*

The client class to wrap cloud interactions

**action** *(fun=None, cloudbin=None, names=None, provider=None, instance=None, kwags=None)*

Execute a single action via the cloud plugin backend

Examples:

```python
client.action(fun='show_instance', names=['myinstance'])
client.action(fun='show_image', provider='my-ec2-config',
             kwags={'image': 'ami-10314d79'})
```

**create** *(provider, names, **kwags)*

Create the named VMs, without using a profile

Example:

```python
client.create(provider='my-ec2-config', names=['myinstance'],
              image='ami-1624987f', size='t1.micro', ssh_username='ec2-user',
              securitygroup='default', delvol_on_destroy=True)
```

**destroy** *(names)*

Destroy the named VMs

**extra_action** *(names, provider, action, **kwags)*

Perform actions with block storage devices

Example:

```python
client.extra_action(names=['myblock'], action='volume_create',
                    provider='my-nova', kwags={'voltype': 'SSD', 'size': 1000})
client.extra_action(names=['salt-net'], action='network_create',
                    provider='my-nova', kwags={'cidr': '192.168.100.0/24'})
```
full_query(query_type='list_nodes_full')
Query all instance information

list_images(provider=None)
List all available images in configured cloud systems

list_locations(provider=None)
List all available locations in configured cloud systems

list_sizes(provider=None)
List all available sizes in configured cloud systems

low(fun, low)
Pass the cloud function and low data structure to run

map_run(path=None, **kwargs)
To execute a map

min_query(query_type='list_nodes_min')
Query select instance information

query(query_type='list_nodes')
Query basic instance information

profile(profile, names, vm_overrides=None, **kwargs)
Pass in a profile to create, names is a list of vm names to allocate
vm_overrides is a special dict that will be per node options overrides
Example:

```python
>>> client = salt.cloud.CloudClient(path='/etc/salt/cloud')
>>> client.profile('do_512_git', names=['minion01',])
{'minion01': {'backups_active': 'False',
  'created_at': '2014-09-04T18:10:15Z',
  'droplet': {'event_id': 31000502,
    'id': 2530006,
    'image_id': 5140006,
    'name': 'minion01',
    'size_id': 66},
  'id': '2530006',
  'image_id': '5140006',
  'ip_address': '107.XXX.XXX.XXX',
  'locked': 'True',
  'name': 'minion01',
  'private_ip_address': None,
  'region_id': '4',
  'size_id': '66',
  'status': 'new'}}
```

query(query_type='list_nodes_select')
Query select instance information
SSHClient

```python
class salt.client.ssh.client.SSHClient(c_path='/etc/salt/master', mopts=None, disable_custom_roster=False)
```

Create a client object for executing routines via the salt-ssh backend

New in version 2015.5.0.

```python
cmd(tgt, fun, arg=(), timeout=None, tgt_type='glob', kwarg=None, **kwargs)
```

Execute a single command via the salt-ssh subsystem and return all routines at once

New in version 2015.5.0.

```python
cmd_iter(tgt, fun, arg=(), timeout=None, tgt_type='glob', ret=' ', kwarg=None, **kwargs)
```

Execute a single command via the salt-ssh subsystem and return a generator

New in version 2015.5.0.

26.2 netapi modules

Netapi modules provide API access to Salt functionality over the network.

The included netapi modules support REST (over HTTP and WSGI) and WebSockets.

Modules expose functions from the NetapiClient and give access to the same functionality as the Salt commandline tools (salt, salt-run, etc).

26.2.1 Client interfaces

Salt's client interfaces provide the ability to execute functions from execution, runner, and wheel modules.

The client interfaces available via netapi modules are defined in the NetapiClient, which is a limited version of the Python API.

The client interfaces accept a dictionary with values for the function and its arguments.

Available interfaces:

- local - run execution modules on minions
- local_subset - run execution modules on a subset of minions
- runner - run runner modules on master
- ssh - run salt-ssh commands
- wheel - run wheel modules

The local, runner, and wheel clients also have async variants to run modules asynchronously.
26.2.2 Configuration

The `netapi_enable_clients` list in the master config sets which client interfaces are available. It is recommended to only enable the client interfaces required to complete the tasks needed to reduce the amount of Salt functionality exposed via the netapi. See the `netapi_enable_clients` documentation.

Enabling netapi client interfaces

From Salt’s 3006.0 release onwards, all netapi client interfaces are disabled by default.

To enable netapi/salt-api functionality, users should follow the process in this documentation. If the `netapi_enable_clients` configuration is not added to the Salt master configuration, then the netapi/salt-api will not function.

Breaking change in Salt 3006.0 and above

Users of netapi/salt-api upgrading to Salt 3006.0 must follow the process in this documentation to enable the required netapi client interfaces. If the `netapi_enable_clients` configuration is not added to the Salt master configuration netapi/salt-api will not function.

Steps to enable netapi client interfaces

1. Select client interfaces to enable
2. Update Salt master config
3. Restart salt-master and salt-api
4. Verify required functionality

Select client interfaces to enable

Salt’s client interfaces provide the ability to execute functions from execution, runner, wheel modules, and via the salt-ssh system.

It is recommended to only enable the client interfaces required to complete the tasks needed to reduce the amount of Salt functionality exposed via the netapi. For example, if the salt-ssh system is not in use, not enabling the ssh client interface will help protect the Salt master from attacks which look to exploit salt-ssh.

The main client interfaces are:

- local - run execution modules on minions
- local_subset - run execution modules on a subset of minions
- runner - run runner modules on master
- ssh - run salt-ssh commands
- wheel - run wheel modules

The local, runner, and wheel clients also have async variants to run modules asynchronously. See `netapi_enable_clients` for the complete list.

Most scenarios will require enabling the local client (and potentially its local_subset and local_async variants). The local client is equivalent to the `salt` command line tool and is required to run execution modules against minions.
Many deployments may also require the ability to call runner functions on the master (for example, where orchestrations are used), but the runner client should only be enabled if this is the case.

As there is not a standard netapi client application, existing users will need to assess which client interfaces are in use. Where an application or tool is making a request to a netapi module, it will usually pass an option indicating which client to use and it should be possible to inspect the source of any tools to understand which client interfaces should be enabled.

For common command line clients, such as pepper they will normally default to using the local client interface unless passed an option to specify a different client interface.

**Update Salt master config**

Once it has been established which client interfaces will be required or are currently in use, those should be listed in the Salt master config, under the `netapi_enable_clients` key.

Example configuration to enable only the local client interfaces:

```
netapi_enable_clients:
  - local
  - local_async
  - local_batch
  - local_subset
```

Example configuration to enable local client functionality and runners:

```
netapi_enable_clients:
  - local
  - local_async
  - local_batch
  - local_subset
  - runner
  - runner_async
```

See `netapi_enable_clients` for the full list of available client interfaces.

**Restart salt-master and salt-api**

Changes to the Salt master configuration require a restart of the `salt-master` service. The `salt-api` service should also be restarted.
Verify required functionality

Testing that the required functionality is available can be done using curl. It is recommended to also check that client interfaces that are not required are not enabled.

Examples

Examples will have to be adjusted to set the correct username, password and external authentication values for the user's system.

Checking that the local client is enabled:

curl -sSKi https://localhost:8000/run \   -H 'Accept: application/x-yaml' \   -d client='local' \   -d tgt='*' \   -d fun='test.ping' \   -d username='saltdev' \   -d password='saltdev' \   -d eauth='auto'

HTTP/1.1 200 OK
Content-Type: application/x-yaml
Server: CherryPy/18.8.0
Date: Mon, 23 Jan 2023 14:54:58 GMT
Allow: GET, HEAD, POST
Access-Control-Allow-Origin: *
Access-Control-Expose-Headers: GET, POST
Access-Control-Allow-Credentials: true
Vary: Accept-Encoding
Content-Length: 25

return:
  - saltdev1: true

Checking that the runner client is not enabled:

curl -sSKi https://localhost:8000/run \   -H 'Accept: application/x-yaml' \   -d client='runner' \   -d fun='test.arg' \   -d arg='test arg' \   -d username='saltdev' \   -d password='saltdev' \   -d eauth='auto'

HTTP/1.1 400 Bad Request
Content-Type: text/html; charset=utf-8
Server: CherryPy/18.8.0
Date: Mon, 23 Jan 2023 14:59:33 GMT
Allow: GET, HEAD, POST
Access-Control-Allow-Origin: *
Access-Control-Expose-Headers: GET, POST

(continues on next page)
Further examples are available in the `netapi modules` documentation.

Individual netapi modules can be enabled by adding the module configuration section to the master config. The required configuration and dependencies are documented for each module.

The `salt-api` daemon manages netapi modules instances and must be started to enable the configured netapi modules. It is possible to run multiple netapi modules and multiple instances of each module.

### netapi_enable_clients

Prior to Salt’s 3006.0 release all client interfaces were enabled and it was not possible to disable clients individually.

#### 26.2.3 Developing modules

Developing custom netapi modules for new transports or protocols is documented in the `Writing netapi modules` and `NetapiClient` documentation.

**Writing netapi modules**

netapi modules, put simply, bind a port and start a service. They are purposefully open-ended and can be used to present a variety of external interfaces to Salt, and even present multiple interfaces at once.

See also:

*The full list of netapi modules*

**Configuration**

All netapi configuration is done in the `Salt master config` and takes a form similar to the following:

```yaml
rest_cherrypy:
  port: 8000
  debug: True
  ssl_crt: /etc/pki/tls/certs/localhost.crt
  ssl_key: /etc/pki/tls/certs/localhost.key
```
The __virtual__ function

Like all module types in Salt, netapi modules go through Salt’s loader interface to determine if they should be loaded into memory and then executed.

The __virtual__ function in the module makes this determination and should return False or a string that will serve as the name of the module. If the module raises an ImportError or any other errors, it will not be loaded.

The start function

The start() function will be called for each netapi module that is loaded. This function should contain the server loop that actually starts the service. This is started in a multiprocess.

Multiple instances

New in version 2016.11.0. 

rest_cherrypy and rest_tornado support running multiple instances by copying and renaming entire directory of those. To start the copied multiple netapi modules, add configuration blocks for the copied netapi modules in the Salt Master config. The name of each added configuration block must match with the name of each directory of the copied netapi module.

Inline documentation

As with the rest of Salt, it is a best-practice to include liberal inline documentation in the form of a module docstring and docstrings on any classes, methods, and functions in your netapi module.

Loader "magic" methods

The loader makes the __opts__ data structure available to any function in a netapi module.

NetapiClient

The NetapiClient class provides access to Python API client interfaces when developing netapi modules

class salt.netapi.NetapiClient(opts)

Provide a uniform method of accessing the various client interfaces in Salt in the form of low-data data structures. For example:

```python
>>> client = NetapiClient(__opts__)
>>> lowstate = {'client': 'local', 'tgt': '*', 'fun': 'test.ping', 'arg': None}
>>> client.run(lowstate)

local(*args, **kwargs)

Run execution modules synchronously

See salt.client.LocalClient.cmd() for all available parameters.

Sends a command from the master to the targeted minions. This is the same interface that Salt’s own CLI uses. Note the arg and kwarg parameters are sent down to the minion(s) and the given function, fun, is called with those parameters.
Returns

Returns the result from the execution module

**local_async**(*args, **kwargs*)

Run execution modules asynchronously

Wraps `salt.client.LocalClient.run_job()`.

Returns job ID

**local_subset**(*args, **kwargs*)

Run execution modules against subsets of minions

New in version 2016.3.0.

Wraps `salt.client.LocalClient.cmd_subset()`

**run**(low)

Execute the specified function in the specified client by passing the lowstate

**runner**(fun, timeout=None, full_return=False, **kwargs)

Run runner modules <all-salt.runners> synchronously

Wraps `salt.runner.RunnerClient.cmd_sync()`.

Note that runner functions must be called using keyword arguments. Positional arguments are not supported.

Returns

Returns the result from the runner module

**runner_async**(fun, **kwargs)

Run runner modules <all-salt.runners> asynchronously

Wraps `salt.runner.RunnerClient.cmd_async()`.

Note that runner functions must be called using keyword arguments. Positional arguments are not supported.

Returns

Returns event data and a job ID for the executed function.

**ssh**(*args, **kwargs*)

Run salt-ssh commands synchronously

Wraps `salt.client.ssh.client.SSHClient.cmd_sync()`.

Returns

Returns the result from the salt-ssh command

**wheel**(fun, **kwargs)

Run wheel modules synchronously

Wraps `salt.wheel.WheelClient.master_call()`.

Note that wheel functions must be called using keyword arguments. Positional arguments are not supported.

Returns

Returns the result from the wheel module

**wheel_async**(fun, **kwargs)

Run wheel modules asynchronously

Wraps `salt.wheel.WheelClient.master_call()`.
Note that wheel functions must be called using keyword arguments. Positional arguments are not supported.

**Returns**

Returns the result from the wheel module
If you are used to configuration management tools that require you to plan down to the last detail before you install anything, you are probably wondering why this section doesn’t appear before the installation instructions. With Salt, you can switch to a high availability architecture at any time, and add additional components to scale your deployment as you go.

Since a single Salt master can manage thousands of systems, we usually recommend that you start by deploying a single Salt master, and then modifying your deployment as needed for redundancy, geographical distribution, and scale.

### 27.1 High Availability Features in Salt

Salt supports several features for high availability and fault tolerance. Brief documentation for these features is listed alongside their configuration parameters in Configuration file examples.

#### 27.1.1 Multimaster

Salt minions can connect to multiple masters at one time by configuring the `master` configuration parameter as a YAML list of all the available masters. By default, all masters are "hot", meaning that any master can direct commands to the Salt infrastructure.

In a multimaster configuration, each master must have the same cryptographic keys, and minion keys must be accepted on all masters separately. The contents of file_roots and pillar_roots need to be kept in sync with processes external to Salt as well.

A tutorial on setting up multimaster with "hot" masters is here:

*Multimaster Tutorial*

#### 27.1.2 Multimaster with Failover

Changing the `master_type` parameter from `str` to `failover` will cause minions to connect to the first responding master in the list of masters. Every `master_alive_interval` seconds the minions will check to make sure the current master is still responding. If the master does not respond, the minion will attempt to connect to the next master in the list. If the minion runs out of masters, the list will be recycled in case dead masters have been restored.

Note that `master_alive_interval` must be present in the minion configuration, or else the recurring job to check master status will not get scheduled.

Failover can be combined with PKI-style encrypted keys, but PKI is NOT REQUIRED to use failover.

Multimaster with PKI and Failover is discussed in *this tutorial*
**master_type**: `failover` can be combined with `random_master`: `True` to spread minion connections across all masters (one master per minion, not each minion connecting to all masters). Adding Salt Syndics into the mix makes it possible to create a load-balanced Salt infrastructure. If a master fails, minions will notice and select another master from the available list.

### 27.1.3 Syndic

Salt's Syndic feature is a way to create differing infrastructure topologies. It is not strictly an HA feature, but can be treated as such.

With the syndic, a Salt infrastructure can be partitioned in such a way that certain masters control certain segments of the infrastructure, and "Master of Masters" nodes can control multiple segments underneath them.

Syndics are covered in depth in *Salt Syndic*.

### 27.1.4 Syndic with Multimaster

New in version 2015.5.0.

Syndic with Multimaster lets you connect a syndic to multiple masters to provide an additional layer of redundancy in a syndic configuration.

Syndics are covered in depth in *Salt Syndic*.

### 27.2 Salt Syndic

The most basic or typical Salt topology consists of a single Master node controlling a group of Minion nodes. An intermediate node type, called Syndic, when used offers greater structural flexibility and scalability in the construction of Salt topologies than topologies constructed only out of Master and Minion node types.

A Syndic node can be thought of as a special passthrough Minion node. A Syndic node consists of a `salt-syndic` daemon and a `salt-master` daemon running on the same system. The `salt-master` daemon running on the Syndic node controls a group of lower level Minion nodes and the `salt-syndic` daemon connects higher level Master node, sometimes called a Master of Masters.

The `salt-syndic` daemon relays publications and events between the Master node and the local `salt-master` daemon. This gives the Master node control over the Minion nodes attached to the `salt-master` daemon running on the Syndic node.

#### 27.2.1 Configuring the Syndic

To setup a Salt Syndic you need to tell the Syndic node and its Master node about each other. If your Master node is located at `10.10.0.1`, then your configurations would be:

On the Syndic node:

```bash
# /etc/salt/master
syndic_master: 10.10.0.1 # may be either an IP address or a hostname

# /etc/salt/minion
# id is shared by the salt-syndic daemon and a possible salt-minion daemon
```
On the Master node:

```bash
# /etc/salt/master
order_masters: True
```

The `syndic_master` option tells the Syndic node where to find the Master node in the same way that the `master` option tells a Minion node where to find a Master node.

The `id` option is used by the `salt-syndic` daemon to identify with the Master node and if unset will default to the hostname or IP address of the Syndic just as with a Minion.

The `order_masters` option configures the Master node to send extra information with its publications that is needed by Syndic nodes connected directly to it.

**Warning:** The syndic process must be run as the same user as the syndic master.

**Note:** Each Syndic must provide its own `file_roots` directory. Files will not be automatically transferred from the Master node.

### 27.2.2 Configuring the Syndic with Multimaster

New in version 2015.5.0.

Syndic with Multimaster lets you connect a syndic to multiple masters to provide an additional layer of redundancy in a syndic configuration.

Higher level masters should first be configured in a multimaster configuration. See *Multimaster Tutorial*.

On the syndic, the `syndic_master` option is populated with a list of the higher level masters.

Since each syndic is connected to each master, jobs sent from any master are forwarded to minions that are connected to each syndic. If the `master_id` value is set in the master config on the higher level masters, job results are returned to the master that originated the request in a best effort fashion. Events/jobs without a `master_id` are returned to any available master.

### 27.2.3 Running the Syndic

The `salt-syndic` daemon is a separate process that needs to be started in addition to the `salt-master` daemon running on the Syndic node. Starting the `salt-syndic` daemon is the same as starting the other Salt daemons.

The Master node in many ways sees the Syndic as an ordinary Minion node. In particular, the Master will need to accept the Syndic's Minion key as it would for any other Minion.

On the Syndic node:

```bash
# salt-syndic
```

or

```bash
# service salt-syndic start
```
On the Master node:

```bash
# salt-key -a my_syndic
```

The Master node will now be able to control the Minion nodes connected to the Syndic. Only the Syndic key will be listed in the Master node's key registry but this also means that key activity between the Syndic's Minions and the Syndic does not encumber the Master node. In this way, the Syndic's key on the Master node can be thought of as a placeholder for the keys of all the Minion and Syndic nodes beneath it, giving the Master node a clear, high level structural view on the Salt cluster.

On the Master node:

```bash
# salt-key -L

Accepted Keys:
my_syndic

Denied Keys:

Unaccepted Keys:

Rejected Keys:

# salt '*' test.version

minion_1:
  2018.3.4

minion_2:
  2018.3.4

minion_4:
  2018.3.4

minion_3:
  2018.3.4
```

### 27.2.4 Topology

A Master node (a node which is itself not a Syndic to another higher level Master node) must run a `salt-master` daemon and optionally a `salt-minion` daemon.

A Syndic node must run `salt-syndic` and `salt-master` daemons and optionally a `salt-minion` daemon.

A Minion node must run a `salt-minion` daemon.

When a `salt-master` daemon issues a command, it will be received by the Syndic and Minion nodes directly connected to it. A Minion node will process the command in the way it ordinarily would. On a Syndic node, the `salt-syndic` daemon will relay the command to the `salt-master` daemon running on the Syndic node, which then propagates the command to the Minions and Syndics connected to it.

When events and job return data are generated by `salt-minion` daemons, they are aggregated by the `salt-master` daemon they are connected to, which `salt-master` daemon then relays the data back through its `salt-syndic` daemon until the data reaches the Master or Syndic node that issued the command.
27.2.5 Syndic wait

syndic_wait is a master configuration file setting that specifies the number of seconds the Salt client should wait for additional syndics to check in with their lists of expected minions before giving up. This value defaults to 5 seconds.

The syndic_wait setting is necessary because the higher-level master does not have a way of knowing which minions are below the syndics. The higher-level master has its own list of expected minions and the masters below them have their own lists as well, so the Salt client does not know how long to wait for all returns. The syndic_wait option allows time for all minions to return to the Salt client.

Note: To reduce the amount of time the CLI waits for Minions to respond, install a Minion on the Syndic or tune the value of the syndic_wait configuration.

While it is possible to run a Syndic without a Minion installed on the same system, it is recommended, for a faster CLI response time, to do so. Without a Minion installed on the Syndic node, the timeout value of syndic_wait increases significantly - about three-fold. With a Minion installed on the Syndic, the CLI timeout resides at the value defined in syndic_wait.

Note: If you have a very large infrastructure or many layers of Syndics, you may find that the CLI doesn't wait long enough for the Syndics to return their events. If you think this is the case, you can set the syndic_wait value in the Master configs on the Master or Syndic nodes from which commands are executed. The default value is 5, and should work for the majority of deployments.

In order for a Master or Syndic node to return information from Minions that are below their Syndics, the CLI requires a short wait time in order to allow the Syndics to gather responses from their Minions. This value is defined in the syndic_wait config option and has a default of five seconds.

27.2.6 Syndic config options

These are the options that can be used to configure a Syndic node. Note that other than id, Syndic config options are placed in the Master config on the Syndic node.

- id: Syndic id (shared by the salt-syndic daemon with a potential salt-minion daemon on the same system)
- syndic_master: Master node IP address or hostname
- syndic_master_port: Master node ret_port
- syndic_log_file: path to the logfile (absolute or not)
- syndic_pidfile: path to the pidfile (absolute or not)
- syndic_wait: time in seconds to wait on returns from this syndic
27.2.7 Minion Data Cache

Beginning with Salt 2016.11.0, the Pluggable Minion Data Cache was introduced. The minion data cache contains the Salt Mine data, minion grains, and minion pillar information cached on the Salt Master. By default, Salt uses the localfs cache module, but other external data stores can be used instead.

Using a pluggable minion cache modules allows for the data stored on a Salt Master about Salt Minions to be replicated on other Salt Masters the Minion is connected to. Please see the Minion Data Cache documentation for more information and configuration examples.
MINION DATA CACHE

New in version 2016.11.0.

The Minion data cache contains the Salt Mine data, minion grains and minion pillar information cached on the Salt Master. By default, Salt uses the `localfs` cache module to save the data in a `msgpack` file on the Salt Master.

28.1 Pluggable Data Cache

While the default Minion data cache is the `localfs` cache, other external data stores can also be used to store this data such as the `consul` module. To configure a Salt Master to use a different data store, the `cache` setting needs to be established:

```
cache: consul
```

The pluggable data cache streamlines using various Salt topologies such as a `Multi-Master` or `Salt Syndics` configuration by allowing the data stored on the Salt Master about a Salt Minion to be available to other Salt Syndics or Salt Masters that a Salt Minion is connected to.

Additional minion data cache modules can be easily created by modeling the custom data store after one of the existing cache modules.

See `cache modules` for a current list.

28.2 Configuring the Minion Data Cache

The default `localfs` Minion data cache module doesn't require any configuration. External data cache modules with external data stores such as Consul require a configuration setting in the master config.

Here's an example config for Consul:

```
consul.host: 127.0.0.1
consul.port: 8500
consul.token: None
consul.scheme: http
consul.consistency: default
consul.dc: dc1
consul.verify: True

.cache: consul
```
CHAPTER TWENTYNINE

SLOTS

New in version 2018.3.0.
Changed in version 3000.

Note: This functionality is under development and could be changed in the future releases

Many times it is useful to store the results of a command during the course of an execution. Salt Slots are designed to allow you to store this information and use it later during the highstate or other job execution.

Slots extend the state syntax and allows you to do things right before the state function is executed. So you can make a decision in the last moment right before a state is executed.

29.1 Execution functions

Note: Using execution modules return data as a state values is a first step of Slots development. Other functionality is under development.

Slots allow you to use the return from a remote-execution function as an argument value in states.

Slot syntax looks close to the simple python function call.

```python
__slot__:salt:<module>.<function>(<args>, ..., <kwargs...>, ...)
```

For the 3000 release, this syntax has been updated to support parsing functions which return dictionaries and for appending text to the slot result.

```python
__slot__:salt:<module>.<function>(<args>..., <kwargs...>, ...).dictionary ~
~append
```

There are some specifics in the syntax coming from the execution functions nature and a desire to simplify the user experience. First one is that you don’t need to quote the strings passed to the slots functions. The second one is that all arguments handled as strings.

Here is a simple example:

```yaml
copy-some-file:
  file.copy:
    - name: __slot__:salt:test.echo(text=/tmp/some_file)
    - source: __slot__:salt:test.echo(/etc/hosts)
```
This will execute the `test.echo` execution functions right before calling the state. The functions in the example will return `/tmp/some_file` and `/etc/hosts` strings that will be used as a target and source arguments in the state function `file.copy`.

Here is an example of result parsing and appending:

```
file-in-user-home:
  file.copy:
    - name: __slot__:salt:user.info(someuser).home ~ /subdirectory
    - source: salt://somefile
```
This section contains details on the Windows Package Manager, and specific information you need to use Salt on Windows.

### 30.1 Multi-minion setup on Windows

There may be a scenario where having a minion running in the context of the current, logged-in user would be useful. For example, the normal minion running under the service account would perform machine-wide, administrative tasks. The minion running under the user context could be launched when the user logs in and would be able to perform configuration tasks as if it were the user itself.

The steps required to do this are as follows:

1. Create new root_dir
2. Set root_dir permissions
3. Create directory structure
4. Write minion config
5. Start the minion
6. Register the minion as a service (optional)

**Note:** The Salt Project has created a powershell script that will configure an additional minion on the system for you. It can be found in the root of the Salt installation. The script is named `multi-minion.ps1`. You can get help on how to use the script by running the following in a PowerShell prompt:

```
Get-Help .\multi-minion.ps1 -Detailed
```

The following guide explains these steps in more detail.
30.1.1 1. Create new root_dir

The minion requires a root directory to store config, cache, logs, etc. The user must have full permissions to this directory. The easiest way to do this is to put the root_dir in the Local AppData directory ($env:LocalAppData).

```
New-Item -Path "$env:LocalAppData\Salt Project\Salt" -Type Directory
```

30.1.2 2. Set root_dir permissions

The user running Salt requires full access to the root_dir. If you have placed the root_dir in a location that the user does not have access to, you'll need to give the user full permissions to that directory. Replace the <placeholder variables> in this example with your own configuration information.

```
$RootDir = "<new root_dir location>"
$User = "<user running salt>"
$acl = Get-Acl -Path "$RootDir"
$acl.AddAccessRule($access_rule)
Set-Acl -Path "$RootDir" -AclObject $acl
```

30.1.3 3. Create directory structure

Salt expects a certain directory structure to be present to avoid unnecessary messages in the logs. This is usually handled by the installer. Since you're running your own instance, you need to do it. Make sure the following directories are present:

- root_dir\conf\minion.d
- root_dir\conf\pki
- root_dir\var\log\salt
- root_dir\var\run
- root_dir\var\cache\salt\minion\extmods\grains
- root_dir\var\cache\salt\minion\proc

```
$RootDir = "<new root_dir location>"
$cache_dir = "$RootDir\var\cache\salt\minion"
New-Item -Path "$RootDir\conf" -Type Directory
New-Item -Path "$RootDir\conf\minion.d" -Type Directory
New-Item -Path "$RootDir\conf\pki" -Type Directory
New-Item -Path "$RootDir\var\log\salt" -Type Directory
New-Item -Path "$RootDir\var\run" -Type Directory
New-Item -Path "$cache_dir\extmods\grains" -Type Directory
New-Item -Path "$cache_dir\proc" -Type Directory
```
30.1.4 4. Write minion config

The minion will need its own config, separate from the system minion config. This config tells the minion where everything is located in the file structure and also defines the master and minion id. Create a minion config file named `minion` in the conf directory.

```
New-Item -Path "$env:LocalAppData\Salt Project\Salt\conf\minion" -Type File
```

Make sure the config file has at least the following contents:

```
master: <ip address, dns name, etc>
id: <minion id>
root_dir: <root_dir>
log_file: <root_dir>\val\log\salt\minion
utils_dirs:
  - <root_dir>\var\cache\salt\minion\extmods
winrepo_dir: <root_dir>\srv\salt\win\repo
winrepo_dir_ng: <root_dir>\srv\salt\win\repo-ng

file_roots:
  base:
    - <root_dir>\srv\salt
    - <root_dir>\srv\spm\salt

pillar_roots:
  base:
    - <root_dir>\srv\pillar
    - <root_dir>\srv\spm\pillar

thorium_roots:
  base:
    - <root_dir>\srv\thorium
```

30.1.5 5. Run the minion

Everything is now set up to run the minion. You can start the minion as you would normally, but you need to specify the full path to the config file you created above.

```
salt-minion.exe -c <root_dir>\conf
```

30.1.6 6. Register the minion as a service (optional)

You can also register the minion as a service, but you need to understand the implications of doing so.

- You will need to have administrator privileges to register this minion service.
- You will need the password to the user account that will be running the minion.
- If the user password changes, you will have to update the service definition to reflect the new password.
- The minion runs all the time under the user context, whether that user is logged in or not.
• This requires great trust from the user as the minion will be able to perform operations under the user’s name without the user knowing, whether they are logged in or not.

• If you decide to run the new minion under the Local System account, it might as well just be a normal minion.

• The helper script does not support registering the second minion as a service.

To register the minion as a service, use the `ssm.exe` binary that came with the Salt installation. Run the following commands, replacing `<service-name>`, `<root_dir>`, `<user_name>`, and `<password>` as necessary:

```plaintext
ssm.exe install <service-name> "salt-minion.exe" "-c \"<root_dir>\conf\" -l @quiet"
ssm.exe set <service-name> Description "Salt Minion <user_name>"
ssm.exe set <service-name> Start SERVICE_AUTO_START
ssm.exe set <service-name> AppStopMethodConsole 24000
ssm.exe set <service-name> AppStopMethodWindow 2000
ssm.exe set <service-name> AppRestartDelay 60000
ssm.exe set <service-name> ObjectName ".\<user_name>\" <password>"
```

### 30.2 Windows Package Manager

#### 30.2.1 Introduction

The Windows Package Manager provides a software repository and a package manager similar to what is provided by `yum` and `apt` on Linux. This tool enables the installation of software on remote Windows systems.

The repository contains a collection of software definition files. A software definition file is a YAML/JINJA file with an `.sls` file extension. It contains all the information Salt needs to install a software package on a Windows system, including the download location of the installer, required command-line switches for silent install, etc.

Software definition files can be hosted in one or more Git repositories. The default repository is hosted on GitHub by SaltStack. It is maintained by SaltStack and the Salt community and contains software definition files for many common Windows packages. Anyone is welcome to submit a pull request to this repo to add new software definitions.

The default github repository is:

- salt-winrepo-ng

The Windows Package Manager is used the same way as other package managers Salt is aware of. For example:

- the `pkg.installed` and similar states work on Windows.
- the `pkg.install` and similar module functions work on Windows.

High level differences to `yum` and `apt` are:

- The repository metadata (SLS files) can be managed through either Salt or git
- Packages can be downloaded from within the Salt repository, a git repository or from HTTP(S) or FTP URLs
- No dependencies are managed. Dependencies between packages need to be managed manually
Requirements

If using the a software definition files hosted on a Git repo, the following libraries are required:

- GitPython 0.3 or later
  
or
- pygit2 0.20.3 with libgit 0.20.0 or later

30.2.2 Quick Start

You can get up and running with winrepo pretty quickly just using the defaults. Assuming no changes to the default configuration (ie, file_roots) run the following commands on the master:

```
salt-run winrepo.update_git_repos
salt * pkg.refresh_db
salt * pkg.install firefox_x64
```

On a masterless minion run the following:

```
salt-call --local winrepo.update_git_repos
salt-call --local pkg.refresh_db
salt-call --local pkg.install firefox_x64
```

These commands clone the default winrepo from github, update the winrepo database on the minion, and install the latest version of Firefox.

30.2.3 Configuration

The Github repository (winrepo) is synced to the file_roots in a location specified by the winrepo_dir_ng setting in the config. The default value of winrepo_dir_ng is as follows:

- Linux master: /srv/salt/win/repo-ng (salt://win/repo-ng)
- Masterless minion: C:\salt\srv\salt\win\repo-ng (salt://win/repo-ng)

Master Configuration

The following are settings available for configuring the winrepo on the master:

- winrepo_dir
- winrepo_dir_ng
- winrepo_remotes
- winrepo_remotes_ng
- winrepo_branch
- winrepo_provider
- winrepo_ssl_verify

See here for detailed information on all master config options for winrepo.
**winrepo_dir**

*winrepo_dir* *(str)*

This setting is maintained for backwards compatibility with legacy minions. It points to the location in the `file_roots` where the winrepo files are kept. The default is: `/srv/salt/win/repo`

**winrepo_dir_ng**

*winrepo_dir_ng* *(str)*

The location in the `file_roots` where the winrepo files are kept. The default is `/srv/salt/win/repo-ng`.

**Warning:** You can change the location of the winrepo directory. However, it must always be set to a path that is inside the `file_roots`. Otherwise the software definition files will be unreachable by the minion.

**Important:** A common mistake is to change the `file_roots` setting and fail to update the `winrepo_dir_ng` and `winrepo_dir` settings so that they are inside the `file_roots`.

**winrepo_remotes**

*winrepo_remotes* *(list)*

This setting is maintained for backwards compatibility with legacy minions. It points to the legacy git repo. The default is a list containing a single URL:

https://github.com/saltstack/salt-winrepo

The legacy repo can be disabled by setting it to an empty list in the master config.

```
winrepo_remotes: []
```

**winrepo_remotes_ng**

*winrepo_remotes_ng* *(list)*

This setting tells the `winrepo.upgrade_git_repos` command where the next generation winrepo is hosted. This a list of URLs to multiple git repos. The default is a list containing a single URL:

https://github.com/saltstack/salt-winrepo-ng
winrepo_refspecs

**winrepo_refspecs** (list)
Specify what references to fetch from remote repositories. The default is `['+refs/heads/*:refs/remotes/origin/*', '+refs/tags/*:refs/tags/*']`

winrepo_branch

**winrepo_branch** (str)
The branch of the git repo to checkout. The default is master

winrepo_provider

**winrepo_provider** (str)
The provider to be used for winrepo. Default is pygit2. Falls back to gitpython when pygit2 is not available

winrepo_ssl_verify

**winrepo_ssl_verify** (bool)
Ignore SSL certificate errors when contacting remote repository. Default is False

**Master Configuration (pygit2)**

The following configuration options only apply when the **winrepo_provider** option is set to pygit2.

- **winrepo_insecure_auth**
- **winrepo_passphrase**
- **winrepo_password**
- **winrepo_privkey**
- **winrepo_pubkey**
- **winrepo_user**

winrepo_insecure_auth

**winrepo_insecure_auth** (bool)
Used only with pygit2 provider. Whether or not to allow insecure auth. Default is False
**winrepo_passphrase**

*winrepo_passphrase* (str)
Used only with *pygit2* provider. Used when the SSH key being used to authenticate is protected by a passphrase. Default is ''

**winrepo_privkey**

*winrepo_privkey* (str)
Used only with *pygit2* provider. Used with *winrepo_pubkey* to authenticate to SSH remotes. Default is ''

**winrepo_pubkey**

*winrepo_pubkey* (str)
Used only with *pygit2* provider. Used with *winrepo_privkey* to authenticate to SSH remotes. Default is ''

**winrepo_user**

*winrepo_user* (str)
Used only with *pygit2* provider. Used with *winrepo_password* to authenticate to HTTPS remotes. Default is ''

**winrepo_password**

*winrepo_password* (str)
Used only with *pygit2* provider. Used with *winrepo_user* to authenticate to HTTPS remotes. Default is ''

**Minion Configuration**

Refreshing the package definitions can take some time, these options were introduced to allow more control of when it occurs. These settings apply to all minions whether in masterless mode or not.

- *winrepo_cache_expire_max*
- *winrepo_cache_expire_min*
- *winrepo_cachefile*
- *winrepo_source_dir*
**winrepo_cache_expire_max**

*winrepo_cache_expire_max* (int)

Sets the maximum age in seconds of the winrepo metadata file to avoid it becoming stale. If the metadata file is older than this setting it will trigger a `pkg.refresh_db` on the next run of any `pkg` module function that requires the metadata file. Default is 604800 (1 week).

Software package definitions are automatically refreshed if stale after `winrepo_cache_expire_max`. Running a highstate normal forces the refresh of the package definition and generation of the metadata, unless the metadata is younger than `winrepo_cache_expire_max`.

**winrepo_cache_expire_min**

*winrepo_cache_expire_min* (int)

Sets the minimum age in seconds of the winrepo metadata file to avoid refreshing too often. If the metadata file is older than this setting the metadata will be refreshed unless you pass `refresh: False` in the state. Default is 1800 (30 min).

**winrepo_cachefile**

*winrepo_cachefile* (str)

The file name of the winrepo cache file. The file is placed at the root of `winrepo_dir_ng`. Default is `winrepo.p`.

**winrepo_source_dir**

*winrepo_source_dir* (str)

The location of the .sls files on the Salt file server. This allows for using different environments. Default is `salt://win/repo-ng/`.

Warning: If the default for `winrepo_dir_ng` is changed, this setting may need to changed on each minion. The default setting for `winrepo_dir_ng` is `/srv/salt/win/repo-ng`. If that were changed to `/srv/salt/new/repo-ng` then the `winrepo_source_dir` would need to be changed to `salt://new/repo-ng`.

**Masterless Minion Configuration**

The following are settings are available for configuring the winrepo on a masterless minion:

- `winrepo_dir`
- `winrepo_dir_ng`
- `winrepo_remotes`
- `winrepo_remotes_ng`

See [here](#) for detailed information on all minion config options for winrepo.
**winrepo_dir**

*winrepo_dir* (str)

This setting is maintained for backwards compatibility with legacy minions. It points to the location in the `file_roots` where the winrepo files are kept. The default is: `C:\salt\srv\salt\win\repo`

**winrepo_dir_ng**

*winrepo_dir_ng* (str)

The location in the `file_roots` where the winrepo files are kept. The default is `C:\salt\srv\salt\win\repo-ng`.

**Warning:** You can change the location of the winrepo directory. However, it must always be set to a path that is inside the `file_roots`. Otherwise the software definition files will be unreachable by the minion.

**Important:** A common mistake is to change the `file_roots` setting and fail to update the `winrepo_dir_ng` and `winrepo_dir` settings so that they are inside the `file_roots`. You might also want to verify `winrepo_source_dir` on the minion as well.

**winrepo_remotes**

*winrepo_remotes* (list)

This setting is maintained for backwards compatibility with legacy minions. It points to the legacy git repo. The default is a list containing a single URL:

https://github.com/saltstack/salt-winrepo

The legacy repo can be disabled by setting it to an empty list in the minion config.

```
winrepo_remotes: []
```

**winrepo_remotes_ng**

*winrepo_remotes_ng* (list)

This setting tells the `winrepo.upgate_git_repos` command where the next generation winrepo is hosted. This is a list of URLs to multiple git repos. The default is a list containing a single URL:

https://github.com/saltstack/salt-winrepo-ng
30.2.4 Initialization

Populate the Local Repository

The SLS files used to install Windows packages are not distributed by default with Salt. Use the `winrepo.update_git_repos` runner initialize the repository in the location specified by `winrepo_dir_ng` in the master config. This will pull the software definition files down from the git repository.

```
salt-run winrepo.update_git_repos
```

If running a minion in masterless mode, the same command can be run using `salt-call`. The repository will be initialized in the location specified by `winrepo_dir_ng` in the minion config.

```
salt-call --local winrepo.update_git_repos
```

These commands will also sync down the legacy repo to maintain backwards compatibility with legacy minions. See Legacy Minions

The legacy repo can be disabled by setting it to an empty list in the master or minion config.

```
winrepo_remotes: []
```

Generate the Metadata File (Legacy)

This step is only required if you are supporting legacy minions. In current usage the metadata file is generated on the minion in the next step, Update the Minion Database. For legacy minions the metadata file is generated on the master using the `winrepo.genrepo` runner.

```
salt-run winrepo.genrepo
```

Update the Minion Database

Run `pkg.refresh_db` on each of your Windows minions to synchronize the package repository to the minion and build the package database.

```
# From the master
salt -G 'os:windows' pkg.refresh_db

# From the minion in masterless mode
salt-call --local pkg.refresh_db
```

The above command returns the following summary denoting the number of packages that succeeded or failed to compile:

```
local:
    ---------
    failed:
        0
    success:
        301
    total:
        301
```
Note: This command can take a few minutes to complete as the software definition files are copied to the minion and the database is generated.

Note: Use pkg.refresh_db when developing new Windows package definitions to check for errors in the definitions against one or more Windows minions.

30.2.5 Usage

After completing the configuration and initialization steps, you are ready to manage software on your Windows minions.

Note: The following example commands can be run from the master using salt or on a masterless minion using salt-call

List Installed Packages

You can get a list of packages installed on the system using pkg.list_pkgs.

```bash
# From the master
salt -G 'os:windows' pkg.list_pkgs

# From the minion in masterless mode
salt-call --local pkg.list_pkgs
```

This will return all software installed on the system whether it is managed by Salt or not as shown below:

```
local: ---------
    Frhed 1.6.0:
        1.6.0
    GNU Privacy Guard:
        2.2.16
    Gpg4win (3.1.9):
        3.1.9
    git:
        2.17.1.2
    nsis:
        3.03
    python3_x64:
        3.7.4150.0
    salt-minion-py3:
        2019.2.3
```

You can tell by how the software name is displayed which software is managed by Salt and which software is not. When Salt finds a match in the winrepo database it displays the short name as defined in the software definition file. It is usually a single-word, lower-case name. All other software names will be displayed with the full name as they are shown in Add/Remove Programs. So, in the return above, you can see that Git (git), Nullsoft Installer (nsis),
Python 3.7 (python3_x64) and Salt (salt-minion-py3) all have a corresponding software definition file. The others do not.

**List Available Versions**

You can query the available version of a package using `pkg.list_available` and passing the name of the software:

```shell
# From the master
salt winminion pkg.list_available firefox_x64

# From the minion in masterless mode
salt-call --local pkg.list_available firefox_x64
```

The above command will return the following:

```
winminion:
- 69.0
- 69.0.1
- 69.0.2
- 69.0.3
- 70.0
- 70.0.1
- 71.0
- 72.0
- 72.0.1
- 72.0.2
- 73.0
- 73.0.1
- 74.0
```

As you can see, there are many versions of Firefox available for installation. You can refer to a software package by its name or its full_name surrounded by quotes.

**Note:** From a Linux master it is OK to use single-quotes. However, the cmd shell on Windows requires you to use double-quotes when wrapping strings that may contain spaces. Powershell seems to accept either one.

**Install a Package**

You can install a package using `pkg.install`:

```shell
# From the master
salt winminion pkg.install 'firefox_x64'

# From the minion in masterless mode
salt-call --local pkg.install "firefox_x64"
```

The above will install the latest version of Firefox.

```shell
# From the master
salt winminion pkg.install 'firefox_x64' version=74.0
```

(continues on next page)
From the minion in masterless mode
salt-call --local pkg.install "firefox_x64" version=74.0

The above will install version 74.0 of Firefox.

If a different version of the package is already installed it will be replaced with the version in the winrepo (only if the package itself supports live updating).

You can also specify the full name:

# From the master
salt winminion pkg.install 'Mozilla Firefox 17.0.1 (x86 en-US)'

# From the minion in masterless mode
salt-call --local pkg.install "Mozilla Firefox 17.0.1 (x86 en-US)"

Remove a Package

You can uninstall a package using pkg.remove:

# From the master
salt winminion pkg.remove firefox_x64

# From the minion in masterless mode
salt-call --local pkg.remove firefox_x64

30.2.6 Software Definition Files

A software definition file is a YAML/JINJA2 file that contains all the information needed to install a piece of software using Salt. It defines information about the package to include version, full name, flags required for the installer and uninstaller, whether or not to use the Windows task scheduler to install the package, where to download the installation package, etc.

Directory Structure and Naming

The files are stored in the location designated by the winrepo_dir_ng setting. All files in this directory that have a .sls file extension are considered software definition files. The files are evaluated to create the metadata file on the minion.

You can maintain standalone software definition files that point to software on other servers or on the internet. In this case the file name would be the short name of the software with the .sls extension, ie firefox.sls.

You can also store the binaries for your software together with their software definition files in their own directory. In this scenario, the directory name would be the short name for the software and the software definition file would be inside that directory and named init.sls.

Look at the following example directory structure on a Linux master assuming default config settings:

dsrv/
|---salt/
|   |---win/

(continues on next page)
In the above directory structure, the user has created the `custom_defs` directory in which to store their custom software definition files. In that directory you see a folder for MS Office 2013 that contains all the installer files along with a software definition file named `init.sls`. The user has also created two more standalone software definition files; `openssl.sls` and `zoom.sls`.

The `salt-winrepo-ng` directory is created by the `winrepo.update_git_repos` command. This folder contains the clone of the git repo designated by the `winrepo_remotes_ng` config setting.

**Warning:** It is recommended that the user not modify the files in the `salt-winrepo-ng` directory as it will break future runs of `winrepo.update_git_repos`.

**Warning:** It is recommended that the user not place any custom software definition files in the `salt-winrepo-ng` directory. The `winrepo.update_git_repos` command wipes out the contents of the `salt-winrepo-ng` directory each time it is run. Any extra files stored there will be lost.
Writing Software Definition Files

A basic software definition file is really easy to write if you already know some basic things about your software:

- The full name as shown in Add/Remove Programs
- The exact version number as shown in Add/Remove Programs
- How to install your software silently from the command line

The software definition file itself is just a data structure written in YAML. The top level item is a short name that Salt will use to reference the software. There can be only one short name in the file and it must be unique across all software definition files in the repo. This is the name that will be used to install/remove the software. It is also the name that will appear when Salt finds a match in the repo when running `pkg.list_pkgs`.

The next indentation level is the version number. There can be many of these, but they must be unique within the file. This is also displayed in `pkg.list_pkgs`.

The last indentation level contains the information Salt needs to actually install the software. Available parameters are:

- `full_name`: The full name as displayed in Add/Remove Programs
- `installer`: The location of the installer binary
- `install_flags`: The flags required to install silently
- `uninstaller`: The location of the uninstaller binary
- `uninstall_flags`: The flags required to uninstall silently
- `msiexec`: Use msiexec to install this package
- `allusers`: If this is an MSI, install to all users
- `cache_dir`: Cache the entire directory in the installer URL if it starts with `salt://`
- `cache_file`: Cache a single file in the installer URL if it starts with `salt://`
- `use_scheduler`: Launch the installer using the task scheduler
- `source_hash`: The hash sum for the installer

Usage of these parameters is demonstrated in the following examples and discussed in more detail below. To understand these examples you’ll need a basic understanding of Jinja. The following links have some basic tips and best practices for working with Jinja in Salt:

Understanding Jinja

Jinja

Example: Basic

Take a look at this basic, pure YAML example for a software definition file for Firefox:

```
firefox_x64:
  '74.0':
    full_name: Mozilla Firefox 74.0 (x64 en-US)
    installer: 'https://download-installer.cdn.mozilla.net/pub/firefox/releases/74.0/win64/en-US/Firefox%20Setup%2074.0.exe'
    install_flags: '/S'
    uninstaller: '%ProgramFiles(x86)%/Mozilla Firefox/uninstall/helper.exe'
    uninstall_flags: '/S'
```

(continues on next page)
'73.0.1':
    full_name: 'Mozilla Firefox 73.0.1 (x64 en-US)'
    installer: 'https://download-installer.cdn.mozilla.net/pub/firefox/
               releases/73.0.1/win64/en-US/Firefox%20Setup%2073.0.1.exe'
    install_flags: '/S'
    uninstaller: '%ProgramFiles(x86)%/Mozilla Firefox/uninstall/helper.exe'
    uninstall_flags: '/S'

You can see the first item is the short name for the software, in this case firefox_x64. It is the first line in
the definition. The next line is indented two spaces and contains the software version. The lines following the
version are indented two more spaces and contain all the information needed to install the Firefox package.

**Important:**  The package name must be unique to all other packages in the software repository. The `full_name`
combined with the version must also be unique. They must also match exactly what is shown in Add/Remove
Programs (`appwiz.cpl`).

**Important:**  The version number must be enclosed in quotes, otherwise the YAML parser will remove trailing zeros.
For example, 74.0 will just become 74.

As you can see in the example above, a software definition file can define multiple versions for the same piece of
software. These are denoted by putting the next version number at the same indentation level as the first with its
software definition information indented below it.

**Example: Jinja**

When there are tens or hundreds of versions available for a piece of software definition file can become quite large.
This is a scenario where Jinja can be helpful. Consider the following software definition file for Firefox using Jinja:

```yaml
{% set lang = salt['config.get']('firefox:pkg:lang', 'en-US') %}

firefox_x64:
    {%- for version in ['74.0',
                        '73.0.1', '73.0',
                        '72.0.2', '72.0.1', '72.0',
                        '71.0', '70.0.1', '70.0',
                        '69.0.3', '69.0.2', '69.0.1'] %}
        {{ version }}:
          full_name: 'Mozilla Firefox {{ version }} (x64 {{ lang }})'
          installer: 'https://download-installer.cdn.mozilla.net/pub/firefox/
                     releases/{{ version }}/win64/{{ lang }}/Firefox%20Setup%20{{ version }}.exe'
          install_flags: '/S'
          uninstaller: '%ProgramFiles(x86)%/Mozilla Firefox/uninstall/helper.exe'
          uninstall_flags: '/S'
    {%- endfor %}
```

In this example we are able to generate a software definition file that defines how to install 12 versions of Firefox.
We use Jinja to create a list of available versions. That list is in a `for` loop where each version is placed in the
version variable. The version is inserted everywhere there is a `{{ version }}` marker inside the `for` loop.

You'll notice that there is a single variable (`lang`) defined at the top of the software definition. Because these files
are going through the Salt renderer many Salt modules are exposed via the `salt` keyword. In this case it is calling the `config.get` function to get a language setting that can be placed in the minion config. If it is not there, it defaults to `en-US`.

Example: Latest

There are some software vendors that do not provide access to all versions of their software. Instead they provide a single URL to what is always the latest version. In some cases the software keeps itself up to date. One example of this is the Google Chrome web browser.

Chrome

To handle situations such as these, set the version to `latest`. Here's an example:

```yaml
chrome:
  latest:
    full_name: 'Google Chrome'
    installer: 'https://dl.google.com/edgedl/chrome/install/
    →GoogleChromeStandaloneEnterprise.msi'
    install_flags: '/qn /norestart'
    uninstaller: 'https://dl.google.com/edgedl/chrome/install/
    →GoogleChromeStandaloneEnterprise.msi'
    uninstall_flags: '/qn /norestart'
    msiexec: True
```

The above example shows us two things. First it demonstrates the usage of `latest` as the version. In this case Salt will install the version of Chrome at the URL and report that version.

The second thing to note is that this is installing software using an MSI. You can see that `msiexec` is set to `True`.

Example: MSI Patch

When the `msiexec` parameter is set to `True` it uses the `/i` option for installs and the `/x` option for uninstalls. This is problematic when trying to install an MSI patch which requires the `/p` option. You can't combine the `/i` and `/p` options. So how do you apply a patch to installed software in winrepo using an `.msp` file?

One wiley contributor came up with the following solution to this problem by using the `%cd%` environment variable. Consider the following software definition file:

```yaml
MyApp:
  '1.0':
    full_name: MyApp
    installer: 'salt://win/repo-ng/MyApp/MyApp.1.0.msi'
    install_flags: '/qn /norestart'
    uninstaller: '{B5B5868F-23BA-297A-917D-0DF345TF5764}'
    uninstall_flags: '/qn /norestart'
    msiexec: True
  '1.1':
    full_name: MyApp
    installer: 'salt://win/repo-ng/MyApp/MyApp.1.0.msi'
    install_flags: '/qn /norestart /update "%cd%\MyApp.1.1.msp"'
    uninstaller: '{B5B5868F-23BA-297A-917D-0DF345TF5764}'
    uninstall_flags: '/qn /norestart'
    msiexec: True
    cache_file: salt://win/repo/MyApp/MyApp.1.1.msp
```
There are a few things to note about this software definition file. First, is the solution we are trying to solve, that of applying a patch. Version 1.0 just installs the application using the 1.0 MSI defined in the installer parameter. There is nothing special in the install_flags and nothing is cached.

Version 1.1 uses the same installer, but uses the cache_file option to specify a single file to cache. In order for this to work the MSP file needs to be in the same directory as the MSI file on the file_roots. The final step to getting this to work is to add the additional /update flag to the install_flags parameter. Add the path to the MSP file using the %cd% environment variable. %cd% resolves to the current working directory which is the location in the minion cache where the installer file is cached.

See issue #32780 for more details.

This same approach could be used for applying MST files for MSIs and answer files for other types of .exe based installers.

Parameters

These are the parameters that can be used to generate a software definition file. These parameters are all placed under the version in the software definition file:

Example usage can be found on the github repo

full_name (str)

This is the full name for the software as shown in "Programs and Features" in the control panel. You can also get this information by installing the package manually and then running pkg.list_pkgs. Here's an example of the output from pkg.list_pkgs:

```
salt 'test-2008' pkg.list_pkgs
test-2008
----------
  7-Zip 9.20 (x64 edition):
    9.20.00.0
  Mozilla Firefox 74.0 (x64 en-US)
    74.0
  Mozilla Maintenance Service:
    74.0
  salt-minion-py3:
    3001
```

Notice the Full Name for Firefox: Mozilla Firefox 74.0 (x64 en-US). That's exactly what should be in the full_name parameter in the software definition file.

If any of the software installed on the machine matches the full name defined in one of the software definition files in the repository the package name will be returned. The example below shows the pkg.list_pkgs for a machine that has Mozilla Firefox 74.0 installed and a software definition for that version of Firefox.

```
test-2008:
----------
  7zip:
    9.20.00.0
  Mozilla Maintenance Service:
    74.0
  firefox_x64:
```

(continues on next page)
Important: The version number and full_name need to match the output from pkg.list_pkgs exactly so that the installation status can be verified by the state system.

Note: It is still possible to successfully install packages using pkg.install, even if the full_name or the version number don't match exactly. The module will complete successfully, but continue to display the full name in pkg.list_pkgs. If this is happening, verify that the full_name and the version match exactly what is displayed in Add/Remove Programs.

Tip: To force Salt to display the full name when there's already an existing package definition file on the system, you can pass a bogus saltenv parameter to the command like so: pkg.list_pkgs saltenv=NotARealEnv

Tip: It's important use pkg.refresh_db to check for errors and ensure the latest package definition is on any minion you're testing new definitions on.

installer (str)

This is the path to the binary (.exe, .msi) that will install the package. This can be a local path or a URL. If it is a URL or a Salt path (salt://), the package will be cached locally and then executed. If it is a path to a file on disk or a file share, it will be executed directly.

Note: When storing software in the same location as the winrepo it is usually best practice to place each installer in its own directory rather than in the root of winrepo.

Best practice is to create a sub folder named after the package. That folder will contain the software definition file named init.sls. The binary installer should be stored in that directory as well if you're hosting those files on the file_roots.

pkg.refresh_db will process all .sls files in all sub directories in the winrepo_dir_ng directory.

install_flags (str)

This setting contains any flags that need to be passed to the installer to make it perform a silent install. These can often be found by adding /? or /h when running the installer from the command-line. A great resource for finding these silent install flags is the WPKG project wiki:

Warning: Salt will appear to hang if the installer is expecting user input. So it is imperative that the software have the ability to install silently.
uninstaller (str)

This is the path to the program used to uninstall this software. This can be the path to the same exe or msi used to install the software. Exe uninstallers are pretty straightforward. MSIs, on the other hand, can be handled a couple different ways. You can use the GUID for the software to uninstall or you can use the same MSI used to install the software.

You can usually find uninstall information in the registry:

- `Software\Microsoft\Windows\CurrentVersion\Uninstall`
- `Software\WOW6432Node\Microsoft\Windows\CurrentVersion\Uninstall`

Here's an example using the GUID to uninstall software.

```
7zip:
'9.20.00.0':
  full_name: 7-Zip 9.20 (x64 edition)
  installer: salt://win/repo-ng/7zip/7z920-x64.msi
  install_flags: '/qn /norestart'
  uninstaller: '{23170F69-40C1-2702-0920-000001000000}'
  uninstall_flags: '/qn /norestart'
  msiexec: True
```

Here's an example using the same MSI used to install the software:

```
7zip:
'9.20.00.0':
  full_name: 7-Zip 9.20 (x64 edition)
  installer: salt://win/repo-ng/7zip/7z920-x64.msi
  install_flags: '/qn /norestart'
  uninstaller: salt://win/repo-ng/7zip/7z920-x64.msi
  uninstall_flags: '/qn /norestart'
  msiexec: True
```

uninstall_flags (str)

This setting contains any flags that need to be passed to the uninstaller to make it perform a silent uninstall. These can often be found by adding /? or /h when running the uninstaller from the command-line. A great resource for finding these silent install flags the WPKG project wiki:

**Warning:** Salt will appear to hang if the uninstaller is expecting user input. So it is imperative that the software have the ability to uninstall silently.
### msiexec (bool, str)

This tells Salt to use `msiexec /i` to install the package and `msiexec /x` to uninstall. This is for `.msi` installations only.

Possible options are:

- True
- False (default)
- the path to `msiexec.exe` on your system

#### 7zip:

<table>
<thead>
<tr>
<th>'9.20.00.0':</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>full_name</strong>: 7-Zip 9.20 (x64 edition)</td>
</tr>
<tr>
<td><strong>installer</strong>: <code>salt://win/repo/7zip/7z920-x64.msi</code></td>
</tr>
<tr>
<td><strong>install_flags</strong>: <code>/qn /norestart</code></td>
</tr>
<tr>
<td><strong>uninstaller</strong>: <code>salt://win/repo/7zip/7z920-x64.msi</code></td>
</tr>
<tr>
<td><strong>uninstall_flags</strong>: <code>/qn /norestart</code></td>
</tr>
<tr>
<td><strong>msiexec</strong>: <code>C:\Windows\System32\msiexec.exe</code></td>
</tr>
</tbody>
</table>

#### allusers (bool)

This parameter is specific to `.msi` installations. It tells `msiexec` to install the software for all users. The default is True.

#### cache_dir (bool)

This setting requires the software to be stored on the `file_roots` and only applies to URLs that begin with `salt://`. If True the entire directory where the installer resides will be recursively cached. This is useful for installers that depend on other files in the same directory for installation.

**Warning:** Be aware that all files and directories in the same location as the installer file will be copied down to the minion. If you place your software definition file in the root of winrepo (`/srv/salt/win/repo-ng`) and it contains `cache_dir`: True the entire contents of winrepo will be cached to the minion. Therefore, it is best practice to place your installer files in a subdirectory if they are to be stored in winrepo.

Here’s an example using cache_dir:

#### sqlexpress:

<table>
<thead>
<tr>
<th>'12.0.2000.8':</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>full_name</strong>: Microsoft SQL Server 2014 Setup (English)</td>
</tr>
<tr>
<td><strong>installer</strong>: <code>salt://win/repo/sqlexpress/setup.exe</code></td>
</tr>
<tr>
<td><strong>install_flags</strong>: <code>/ACTION=install /IACCEPTSQLSERVERLICENSETERMS /Q</code></td>
</tr>
<tr>
<td><strong>cache_dir</strong>: True</td>
</tr>
</tbody>
</table>
cache_file (str)

This setting requires the file to be stored on the file_roots and only applies to URLs that begin with salt://. It indicates a single file to copy down for use with the installer. It is copied to the same location as the installer. Use this over cache_dir if there are many files in the directory and you only need a specific file and don't want to cache additional files that may reside in the installer directory.

use_scheduler (bool)

If set to True, Windows will use the task scheduler to run the installation. A one-time task will be created in the task scheduler and launched. The return to the minion will be that the task was launched successfully, not that the software was installed successfully.

Note: This is used by the software definition for Salt itself. The first thing the Salt installer does is kill the Salt service, which then kills all child processes. If the Salt installer is launched via Salt, then the installer itself is killed leaving Salt on the machine but not running. Use of the task scheduler allows an external process to launch the Salt installation so its processes aren't killed when the Salt service is stopped.

source_hash (str)

This tells Salt to compare a hash sum of the installer to the provided hash sum before execution. The value can be formatted as <hash_algorithm>=<hash_sum>, or it can be a URI to a file containing the hash sum.

For a list of supported algorithms, see the hashlib documentation.

Here's an example using source_hash:

```yaml
messageanalyzer:
  '4.0.7551.0':
    full_name: 'Microsoft Message Analyzer'
    installer: 'salt://win/repo/messageanalyzer/MessageAnalyzer64.msi'
    install_flags: '/quiet /norestart'
    uninstaller: '{1CC02C23-8FCD-487E-860C-311EC0A0C933}'
    uninstall_flags: '/quiet /norestart'
    msiexec: True
    source_hash: 'sha1=62875ff451f13b10a8ff988f2943e76a4735d3d4'
```

Not Implemented

The following parameters are often seen in the software definition files hosted on the Git repo. However, they are not implemented and have no effect on the installation process.

param bool reboot
  Not implemented

param str locale
  Not implemented
30.2.7 Managing Windows Software on a Standalone Windows Minion

The Windows Software Repository functions similarly in a standalone environment, with a few differences in the configuration.

To replace the winrepo runner that is used on the Salt master, an execution module exists to provide the same functionality to standalone minions. The functions are named the same as the ones in the runner, and are used in the same way; the only difference is that `salt-call` is used instead of `salt-run`:

```
salt-call winrepo.update_git_repos
salt-call pkg.refresh_db
```

After executing the previous commands the repository on the standalone system is ready for use.

30.2.8 Troubleshooting

My software installs correctly but pkg.installed says it failed

If you have a package that seems to install properly, but Salt reports a failure then it is likely you have a version or full_name mismatch.

Check the exact full_name and version as shown in Add/Remove Programs (appwiz.cpl). Use `pkg.list_pkgs` to check that the full_name and version exactly match what is installed. Make sure the software definition file has the exact value for full_name and that the version matches exactly.

Also, make sure the version is wrapped in single quotes in the software definition file.

Changes to sls files not being picked up

You may have recently updated some of the software definition files on the repo. Ensure you have refreshed the database on the minion.

```
salt winminion pkg.refresh_db
```

How Success and Failure are Reported by pkg.installed

The install state/module function of the Windows package manager works roughly as follows:

1. Execute `pkg.list_pkgs` to get a list of software currently on the machine
2. Compare the requested version with the installed version
3. If versions are the same, report no changes needed
4. Install the software as described in the software definition file
5. Execute `pkg.list_pkgs` to get a new list of software currently on the machine
6. Compare the requested version with the new installed version
7. If versions are the same, report success
8. If versions are different, report failure
Winrepo Upgrade Issues

To minimize potential issues, it is a good idea to remove any winrepo git repositories that were checked out by the legacy (pre-2015.8.0) winrepo code when upgrading the master to 2015.8.0 or later. Run `winrepo.update_git_repos` to clone them anew after the master is started.

30.2.9 pygit2/GitPython Support for Maintaining Git Repos

The `winrepo.update_git_repos` runner now makes use of the same underlying code used by the Git Fileserver Backend and Git External Pillar to maintain and update its local clones of git repositories. If a compatible version of either `pygit2` (0.20.3 and later) or `GitPython` (0.3.0 or later) is installed, Salt will use it instead of the old method (which invokes the `git.latest` state).

Note: If compatible versions of both `pygit2` and `GitPython` are installed, then Salt will prefer `pygit2`. To override this behavior use the `winrepo_provider` configuration parameter:

```
winrepo_provider: gitpython
```

The `winrepo` execution module (discussed above in the Managing Windows Software on a Standalone Windows Minion section) does not yet officially support the new pygit2/GitPython functionality, but if either `pygit2` or `GitPython` is installed into Salt's bundled Python then it should work. However, it should be considered experimental at this time.

30.2.10 Accessing Authenticated Git Repos (pygit2)

Support for pygit2 added the ability to access authenticated git repositories and to set per-remote config settings. An example of this would be the following:

```
winrepo_remotes:
- https://github.com/saltstack/salt-winrepo.git
- git@github.com:myuser/myrepo.git:
  - pubkey: /path/to/key.pub
  - privkey: /path/to/key
  - passphrase: myaw3s0m3pa$$phr4$3
- https://github.com/myuser/privaterepo.git:
  - user: mygithubuser
  - password: CorrectHorseBatteryStaple
```

Note: Per-remote configuration settings work in the same fashion as they do in gitfs, with global parameters being overridden by their per-remote counterparts. For instance, setting `winrepo_passphrase` would set a global passphrase for winrepo that would apply to all SSH-based remotes, unless overridden by a `passphrase` per-remote parameter.

See here for more a more in-depth explanation of how per-remote configuration works in gitfs. The same principles apply to winrepo.
30.2.11 Maintaining Git Repos

A `clean` argument has been added to the `winrepo.update_git_repos` runner. When `clean` is `True` it will tell the runner to dispose of directories under the `winrepo_dir_ng/winrepo_dir_ng` which are not explicitly configured. This prevents the need to manually remove these directories when a repo is removed from the config file. To clean these old directories, just pass `clean=True`:

```
salt-run winrepo.update_git_repos clean=True
```

If a mix of git and non-git Windows Repo definition files are being used, then this should *not* be used, as it will remove the directories containing non-git definitions.

30.2.12 Name Collisions Between Repos

Collisions between repo names are now detected. The `winrepo.update_git_repos` runner will not proceed if any are detected. Consider the following configuration:

```
winrepo_remotes:
  - https://foo.com/bar/baz.git
  - https://mydomain.tld/baz.git
  - https://github.com/foobar/baz
```

The `winrepo.update_git_repos` runner will refuse to update repos here, as all three of these repos would be checked out to the same directory. To work around this, a per-remote parameter called `name` can be used to resolve these conflicts:

```
winrepo_remotes:
  - https://foo.com/bar/baz.git
  - https://mydomain.tld/baz.git:
    - name: baz_junior
  - https://github.com/foobar/baz:
    - name: baz_the_third
```

30.2.13 Legacy Minions

The Windows Package Manager was upgraded with breaking changes starting with Salt 2015.8.0. To maintain backwards compatibility Salt continues to support older minions.

The breaking change was to generate the winrepo database on the minion instead of the master. This allowed for the use of Jinja in the software definition files. It enabled the use of pillar, grains, execution modules, etc. during compile time. To support this new functionality, a next-generation (ng) repo was created.

See the *Changes in Version 2015.8.0* for details.

On prior versions of Salt, or legacy minions, the winrepo database was generated on the master and pushed down to the minions. Any grains exposed at compile time would have been those of the master and not the minion.

The repository for legacy minions is named `salt-winrepo` and is located at:

- https://github.com/saltstack/salt-winrepo
Legacy Configuration

Winrepo settings were changed with the introduction of the Next Generation (ng) of winrepo.

Legacy Master Config Options

There were three options available for a legacy master to configure winrepo. Unless you’re running a legacy master as well, you shouldn't need to configure any of these.

- **win_gitrepos**
- **win_repo**
- **win_repo_mastercachefile**

**win_gitrepos**: (list)
A list of URLs to github repos. Default is a list with a single URL:

- ‘https://github.com/saltstack/salt-winrepo.git’

**win_repo**: (str)
The location on the master to store the winrepo. The default is /srv/salt/win/repo.

**win_repo_mastercachefile**: (str) The location on the master to generate the winrepo database file. The default is /srv/salt/win/repo/winrep.p

Legacy Minion Config Options

There is only one option available to configure a legacy minion for winrepo.

- **win_repo_cachefile**

**win_repo_cachefile**: (str)
The location on the Salt file server to obtain the winrepo database file. The default is salt://win/repo/winrepo.p

**Note:** If the location of the winrepo.p file is not in the default location on the master, the win_repo_cachefile setting will need to be updated to reflect the proper location on each minion.

Legacy Quick Start

You can get up and running with winrepo pretty quickly just using the defaults. Assuming no changes to the default configuration (ie, file_roots) run the following commands on the master:

```
salt-run winrepo.update_git_repos
salt-run winrepo.genrepo
salt * pkg.refresh_db
salt * pkg.install firefox
```

These commands clone the default winrepo from github, generate the metadata file, push the metadata file down to the legacy minion, and install the latest version of Firefox.
Legacy Initialization

Initializing the winrepo for a legacy minion is similar to that for a newer minion. There is an added step in that the metadata file needs to be generated on the master prior to refreshing the database on the minion.

Populate the Local Repository

The SLS files used to install Windows packages are not distributed by default with Salt. So, the first step is to clone the repo to the master. Use the `winrepo.update_git_repos` runner initialize the repository in the location specified by `winrepo_dir` in the master config. This will pull the software definition files down from the git repository.

```
salt-run winrepo.update_git_repos
```

Generate the Metadata File

The next step is to create the metadata file for the repo (`winrepo.p`). The metadata file is generated on the master using the `winrepo.genrepo` runner.

```
salt-run winrepo.genrepo
```

Note: You only need to do this if you need to support legacy minions.

Update the Minion Database

Run `pkg.refresh_db` on each of your Windows minions to copy the metadata file down to the minion.

```
# From the master
salt -G 'os:windows' pkg.refresh_db
```

Changes in Version 2015.8.0+

Git repository management for the Windows Software Repository changed in version 2015.8.0, and several master/minion config parameters were renamed for consistency.

For a complete list of the new winrepo config options, see here for master config options, and here for configuration options for masterless Windows minions.

pygit2/GitPython Support

On the master, the `winrepo.update_git_repos` runner was updated to use either pygit2 or GitPython to checkout the git repositories containing repo data. If pygit2 or GitPython is installed, existing winrepo git checkouts should be removed after upgrading to 2015.8.0. Then they should be cloned again by running `winrepo.update_git_repos`.

If neither GitPython nor pygit2 are installed, Salt will fall back to pre-existing behavior for `winrepo.update_git_repos`, and a warning will be logged in the master log.
Note: Standalone Windows minions do not support the new GitPython/pygit2 functionality, and will instead use the *git.latest* state to keep repositories up-to-date. More information on how to use the Windows Software Repo on a standalone minion can be found [here](#).

## Config Parameters Renamed

Many of the legacy winrepo configuration parameters changed in version 2015.8.0 to make them more consistent. Below are the parameters which changed for version 2015.8.0:

### Master Config

<table>
<thead>
<tr>
<th>Old Name</th>
<th>New Name</th>
</tr>
</thead>
<tbody>
<tr>
<td>win_repo</td>
<td>winrepo_dir</td>
</tr>
<tr>
<td>win_repo_mastercachefile</td>
<td>No longer used on master</td>
</tr>
<tr>
<td>win_gitrepos</td>
<td>winrepo_remotes</td>
</tr>
</tbody>
</table>

Note: The `winrepo_dir_ng` and `winrepo_remotes_ng` settings were introduced in 2015.8.0 for working with the next generation repo.

See [here](#) for detailed information on all master config options for the Windows Repo.

### Minion Config

<table>
<thead>
<tr>
<th>Old Name</th>
<th>New Name</th>
</tr>
</thead>
<tbody>
<tr>
<td>win_repo</td>
<td>winrepo_dir</td>
</tr>
<tr>
<td>win_repo_cachefile</td>
<td>winrepo_cachefile</td>
</tr>
<tr>
<td>win_gitrepos</td>
<td>winrepo_remotes</td>
</tr>
</tbody>
</table>

Note: The `winrepo_dir_ng` and `winrepo_remotes_ng` settings were introduced in 2015.8.0 for working with the next generation repo.

See [here](#) for detailed information on all minion config options for the Windows Repo.

## 30.3 Windows-specific Behaviour

Salt is capable of managing Windows systems, however due to various differences between the operating systems, there are some things you need to keep in mind.

This document will contain any quirks that apply across Salt or generally across multiple module functions. Any Windows-specific behavior for particular module functions will be documented in the module function documentation. Therefore this document should be read in conjunction with the module function documentation.
30.3.1 Group parameter for files

Salt was originally written for managing Unix-based systems, and therefore the file module functions were designed around that security model. Rather than trying to shoehorn that model on to Windows, Salt ignores these parameters and makes non-applicable module functions unavailable instead.

One of the commonly ignored parameters is the `group` parameter for managing files. Under Windows, while files do have a 'primary group' property, this is rarely used. It generally has no bearing on permissions unless intentionally configured and is most commonly used to provide Unix compatibility (e.g. Services For Unix, NFS services).

Because of this, any file module functions that typically require a group, do not under Windows. Attempts to directly use file module functions that operate on the group (e.g. `file.chgrp`) will return a pseudo-value and cause a log message to appear. No group parameters will be acted on.

If you do want to access and change the 'primary group' property and understand the implications, use the `file.get_pgid` or `file.get_pgroup` functions or the `pgroup` parameter on the `file.chown` module function.

30.3.2 Dealing with case-insensitive but case-preserving names

Windows is case-insensitive, but however preserves the case of names and it is this preserved form that is returned from system functions. This causes some issues with Salt because it assumes case-sensitive names. These issues generally occur in the state functions and can cause bizarre looking errors.

To avoid such issues, always pretend Windows is case-sensitive and use the right case for names, e.g. specify `user=Administrator` instead of `user=administrator`.

Follow issue 11801 for any changes to this behavior.

30.3.3 Dealing with various username forms

Salt does not understand the various forms that Windows usernames can come in, e.g. `username`, `mydomain\username`, `username@mydomain.tld` can all refer to the same user. In fact, Salt generally only considers the raw username value, i.e. the username without the domain or host information.

Using these alternative forms will likely confuse Salt and cause odd errors to happen. Use only the raw username value in the correct case to avoid problems.

Follow issue 11801 for any changes to this behavior.

30.3.4 Specifying the None group

Each Windows system has built-in _None_ group. This is the default 'primary group' for files for users not on a domain environment.

Unfortunately, the word _None_ has special meaning in Python - it is a special value indicating 'nothing', similar to `null` or `nil` in other languages.

To specify the None group, it must be specified in quotes, e.g. `./salt '*' file.chgrp C:\path\to\file "None"`. 
30.3.5 Symbolic link loops

Under Windows, if any symbolic link loops are detected or if there are too many levels of symlinks (defaults to 64), an error is always raised.

For some functions, this behavior is different to the behavior on Unix platforms. In general, avoid symlink loops on either platform.
31.1 Overview

In its most typical use, Salt is a software application in which clients, called "minions" can be commanded and controlled from a central command server called a "master".

Commands are normally issued to the minions (via the master) by calling a client script simply called, 'salt'.

Salt features a pluggable transport system to issue commands from a master to minions. The default transport is ZeroMQ.

31.2 Salt Client

31.2.1 Overview

The salt client is run on the same machine as the Salt Master and communicates with the salt-master to issue commands and to receive the results and display them to the user.

The primary abstraction for the salt client is called 'LocalClient'.

When LocalClient wants to publish a command to minions, it connects to the master by issuing a request to the master's ReqServer (TCP: 4506)

The LocalClient system listens to responses for its requests by listening to the master event bus publisher (master_event_pub.ipc).

31.3 Salt Master

31.3.1 Overview

The salt-master daemon runs on the designated Salt master and performs functions such as authenticating minions, sending, and receiving requests from connected minions and sending and receiving requests and replies to the 'salt' CLI.
31.3.2 Moving Pieces

When a Salt master starts up, a number of processes are started, all of which are called 'salt-master' in a process-list but have various role categories.

Among those categories are:

- Publisher
- EventPublisher
- MWorker

31.3.3 Publisher

The Publisher process is responsible for sending commands over the designated transport to connected minions. The Publisher is bound to the following:

- TCP: port 4505
- IPC: publish_pull.ipc

Each salt minion establishes a connection to the master Publisher.

31.3.4 EventPublisher

The EventPublisher publishes master events out to any event listeners. It is bound to the following:

- IPC: master_event_pull.ipc
- IPC: master_event_pub.ipc

31.3.5 MWorker

Worker processes manage the back-end operations for the Salt Master.

The number of workers is equivalent to the number of 'worker_threads' specified in the master configuration and is always at least one.

Workers are bound to the following:

- IPC: workers.ipc

31.3.6 ReqServer

The Salt request server takes requests and distributes them to available MWorker processes for processing. It also receives replies back from minions.

The ReqServer is bound to the following:

- TCP: 4506
- IPC: workers.ipc

Each salt minion establishes a connection to the master ReqServer.
31.3.7 Job Flow

The Salt master works by always publishing commands to all connected minions and the minions decide if the command is meant for them by checking themselves against the command target.

The typical lifecycle of a salt job from the perspective of the master might be as follows:

1. A command is issued on the CLI. For example, 'salt my_minion test.version'.
2. The ‘salt’ command uses LocalClient to generate a request to the salt master by connecting to the ReqServer on TCP:4506 and issuing the job.
3. The salt-master ReqServer sees the request and passes it to an available MWorker over workers.ipc.
4. A worker picks up the request and handles it. First, it checks to ensure that the requested user has permissions to issue the command. Then, it sends the publish command to all connected minions. For the curious, this happens in ClearFuncs.publish().
5. The worker announces on the master event bus that it is about to publish a job to connected minions. This happens by placing the event on the master event bus (master_event_pull.ipc) where the EventPublisher picks it up and distributes it to all connected event listeners on master_event_pub.ipc.
6. The message to the minions is encrypted and sent to the Publisher via IPC on publish_pull.ipc.
7. Connected minions have a TCP session established with the Publisher on TCP port 4505 where they await commands. When the Publisher receives the job over publish_pull, it sends the jobs across the wire to the minions for processing.
8. After the minions receive the request, they decrypt it and perform any requested work, if they determine that they are targeted to do so.
9. When the minion is ready to respond, it publishes the result of its job back to the master by sending the encrypted result back to the master on TCP 4506 where it is again picked up by the ReqServer and forwarded to an available MWorker for processing. (Again, this happens by passing this message across workers.ipc to an available worker.)
10. When the MWorker receives the job it decrypts it and fires an event onto the master event bus (master_event_pull.ipc). (Again for the curious, this happens in AESFuncs._return().)
11. The EventPublisher sees this event and re-publishes it on the bus to all connected listeners of the master event bus (on master_event_pub.ipc). This is where the LocalClient has been waiting, listening to the event bus for minion replies. It gathers the job and stores the result.
12. When all targeted minions have replied or the timeout has been exceeded, the salt client displays the results of the job to the user on the CLI.

31.4 Salt Minion

31.4.1 Overview

The salt-minion is a single process that sits on machines to be managed by Salt. It can either operate as a stand-alone daemon which accepts commands locally via `salt-call` or it can connect back to a master and receive commands remotely.

When starting up, salt minions connect back to a master defined in the minion config file. They connect to two ports on the master:
• **TCP: 4505**
  This is the connection to the master Publisher. It is on this port that the minion receives jobs from the master.

• **TCP: 4506**
  This is the connection to the master ReqServer. It is on this port that the minion sends job results back to the master.

### 31.4.2 Event System

Similar to the master, a salt-minion has its own event system that operates over IPC by default. The minion event system operates on a push/pull system with IPC files at minion_event_<unique_id>_pub.ipc and minion_event_<unique_id>_pull.ipc.

The astute reader might ask why have an event bus at all with a single-process daemon. The answer is that the salt-minion may fork other processes as required to do the work without blocking the main salt-minion process and this necessitates a mechanism by which those processes can communicate with each other. Secondarily, this provides a bus by which any user with sufficient permissions can read or write to the bus as a common interface with the salt minion.

### 31.4.3 Minion Job Flow

When a salt minion starts up, it attempts to connect to the Publisher and the ReqServer on the salt master. It then attempts to authenticate and once the minion has successfully authenticated, it simply listens for jobs.

Jobs normally come either from the 'salt-call' script run by a local user on the salt minion or they can come directly from a master.

The job flow on a minion, coming from the master via a 'salt' command is as follows:

1) A master publishes a job that is received by a minion as outlined by the master's job flow above. 2) The minion is polling its receive socket that's connected to the master Publisher (TCP 4505 on master). When it detects an incoming message, it picks it up from the socket and decrypts it. 3) A new minion process or thread is created and provided with the contents of the decrypted message. The _thread_return() method is provided with the contents of the received message. 4) The new minion thread is created. The _thread_return() function starts up and actually calls out to the requested function contained in the job. 5) The requested function runs and returns a result. [Still in thread.] 6) The result of the function that's run is published on the minion's local event bus with event tag "__master_req_channel_payload" [Still in thread.] 7) Thread exits. Because the main thread was only blocked for the time that it took to initialize the worker thread, many other requests could have been received and processed during this time. 8) Minion event handler gets the event with tag "__master_req_channel_payload" and sends the payload to master's ReqServer (TCP 4506 on master), via the long-running async request channel that was opened when minion first started up.

### 31.5 A Note on ClearFuncs vs. AESFuncs

A common source of confusion is determining when messages are passed in the clear and when they are passed using encryption. There are two rules governing this behaviour:

1) ClearFuncs is used for intra-master communication and during the initial authentication handshake between a minion and master during the key exchange. 2) AESFuncs is used everywhere else.
31.6 Changelog

With the addition of SEP 01 the keepachangelog format was introduced into our CHANGELOG.md file. The Salt project is using the towncrier tool to manage the CHANGELOG.md file. The reason this tool was added to manage the changelog was because we were previously managing the file manually and it would cause many merge conflicts. This tool allows us to add changelog entries into separate files and before a release we simply need to run towncrier --version=<version> for it to compile the changelog correctly.

31.6.1 How do I add a changelog entry

To add a changelog entry you will need to add a file in the changelog directory. The file name should follow the syntax <issue #>.<type>.md. If it is a security fix then the following syntax will need to be used cve-<cve-number>.security.md.

The types are in alignment with keepachangelog:

- **removed:** any features that have been removed
- **deprecated:** any features that will soon be removed
- **changed:** any changes in current existing features
- **fixed:** any bug fixes
- **added:** any new features added
- **security:** any fixes for a CVE

For example if you are fixing a bug for issue number #1234 your filename would look like this: changelog/1234.fixed.md. The contents of the file should contain a summary of what you are fixing. If there is a legitimate reason to not include an issue number with a given contribution you can add the PR number as the file name (<PR #>.<type>.md).

For a security fix your filename would look like this: changelog/cve-2021-25283.security.md.

If your PR does not align with any of the types, then you do not need to add a changelog entry.

**Note:** Requirement Files: Updates to package requirements files also require a changelog file. This will usually be associated with .fixed if its resolving an issue or .security if it's resolving a CVE issue in an upstream project. If updates are made to testing requirement files it does not require a changelog.
### 31.6.2 How to generate the changelog

This step is only used when we need to generate the changelog right before releasing. You should NOT run towncrier on your PR, unless you are preparing the final PR to update the changelog before a release.

You can run the `towncrier` tool directly or you can use `tools` to help run the command and ensure towncrier is installed in a virtual environment. The instructions below will detail both approaches.

**Installing tools**

If you want to see what output towncrier will produce before generating the change log you can run towncrier in draft mode:

```
towncrier --draft --version=3001
```

```
tools changelog update-changelog-md --draft 3000.1
```

Version will need to be set to whichever version we are about to release. Once you are confident the draft output looks correct you can now generate the changelog by running:

```
towncrier --version=3001
```

```
tools changelog update-changelog-md 3000.1
```

After this is run towncrier will automatically remove all the files in the changelog directory.

If you want to force towncrier to automatically remove all the files in the changelog directory without asking you to type yes, you can set force to True.

```
towncrier --yes --version=3001
```

The `tools changelog update-changelog-md <version>` command will automatically add `--yes` if `--draft` is not passed.

### 31.7 Contributing

So you want to contribute to the Salt project? Excellent! You can help in a number of ways:

- Use Salt and open well-written bug reports.
- Join a working group.
- Answer questions on irc, the community Slack, the salt-users mailing list, Server Fault, or r/saltstack on Reddit.
- Fix bugs.
- Improve the documentation.
- Provide workarounds, patches, or other code without tests.
- Tell other people about problems you solved using Salt.

If you'd like to update docs or fix an issue, you're going to need the Salt repo. The best way to contribute is using Git.
Salt Documentation, Release 3006.4

31.7.1 Environment setup
To hack on Salt or the docs you're going to need to set up your development environment. If you already have a
workflow that you're comfortable with, you can use that, but otherwise this is an opinionated guide for setting up
your dev environment. Follow these steps and you'll end out with a functioning dev environment and be able to
submit your first PR.
This guide assumes at least a passing familiarity with Git, a common version control tool used across many open
source projects, and is necessary for contributing to Salt. For an introduction to Git, watch Salt Docs Clinic - Git
For the True Beginner. Because of its widespread use, there are many resources for learning more about Git. One
popular resource is the free online book Learn Git in a Month of Lunches.
pyenv, Virtual Environments, and you
We recommend pyenv, since it allows installing multiple different Python versions, which is important for testing
Salt across all the versions of Python that we support.
On Linux
Install pyenv:
git clone https://github.com/pyenv/pyenv.git ~/.pyenv
export PATH="$HOME/.pyenv/bin:$PATH"
git clone https://github.com/pyenv/pyenv-virtualenv.git $(pyenv root)/plugins/
,→pyenv-virtualenv

On Mac
Install pyenv using brew:
brew update
brew install pyenv
brew install pyenv-virtualenv

Now add pyenv to your .bashrc:
echo 'export PATH="$HOME/.pyenv/bin:$PATH"' >> ~/.bashrc
pyenv init 2>> ~/.bashrc
pyenv virtualenv-init 2>> ~/.bashrc
For other shells, see the pyenv instructions.
Go ahead and restart your shell. Now you should be able to install a new version of Python:
pyenv install 3.7.0
If that fails, don't panic! You're probably just missing some build dependencies. Check out pyenv common build
problems.
Now that you've got your version of Python installed, you can create a new virtual environment with this command:

31.7. Contributing

4739


Then activate it:

```
pyenv activate salt
```

Sweet! Now you're ready to clone Salt so you can start hacking away! If you get stuck at any point, check out the resources at the beginning of this guide. IRC and Slack are particularly helpful places to go.

Get the source!

Salt uses the fork and clone workflow for Git contributions. See Using the Fork-and-Branch Git Workflow for how to implement it. But if you just want to hurry and get started you can go ahead and follow these steps:

Clones are so shallow. Well, this one is anyway:

```
git clone --depth=1 --origin salt https://github.com/saltstack/salt.git
```

This creates a shallow clone of Salt, which should be fast. Most of the time that's all you'll need, and you can start building out other commits as you go. If you really want all 108,300+ commits you can just run `git fetch --unshallow`. Then go make a sandwich because it's gonna be a while.

You're also going to want to head over to GitHub and create your own fork of Salt. Once you've got that set up you can add it as a remote:

```
git remote add yourname <YOUR SALT REMOTE>
```

If you use your name to refer to your fork, and `salt` to refer to the official Salt repo you'll never get upstream or `origin` confused.

Note: Each time you start work on a new issue you should fetch the most recent changes from `salt/upstream`.

Set up pre-commit and nox

Here at Salt we use pre-commit and nox to make it easier for contributors to get quick feedback, for quality control, and to increase the chance that your merge request will get reviewed and merged. Nox enables us to run multiple different test configurations, as well as other common tasks. You can think of it as Make with superpowers. Pre-commit does what it sounds like: it configures some Git pre-commit hooks to run `black` for formatting, `isort` for keeping our imports sorted, and `pylint` to catch issues like unused imports, among others. You can easily install them in your virtualenv with:

```
python -m pip install pre-commit nox
pre-commit install
```

Warning: Currently there is an issue with the pip-tools-compile pre-commit hook on Windows. The details around this issue are included here: [https://github.com/saltstack/salt/issues/56642](https://github.com/saltstack/salt/issues/56642). Please ensure you export `SKIP=pip-tools-compile` to skip pip-tools-compile.

Now before each commit, it will ensure that your code at least looks right before you open a pull request. And with that step, it's time to start hacking on Salt!
Set up imagemagick

One last prerequisite is to have imagemagick installed, as it is required by Sphinx for generating the HTML documentation.

```bash
# On Mac, via homebrew
brew install imagemagick

# Example Linux installation: Debian-based
sudo apt install imagemagick
```

31.7.2 Salt issues

Create your own

Perhaps you've come to this guide because you found a problem in Salt, and you've diagnosed the cause. Maybe you need some help figuring out the problem. In any case, creating quality bug reports is a great way to contribute to Salt even if you lack the skills, time, or inclination to fix it yourself. If that's the case, head on over to Salt's issue tracker on GitHub.

Creating a good report can take a little bit of time - but every minute you invest in making it easier for others to reproduce and understand your issue is time well spent. The faster someone can understand your issue, the faster it will be able to get fixed correctly.

The thing that every issue needs goes by many names, but one at least as good as any other is MCVE - Minimum Complete Verifiable Example.

In a nutshell:

- **Minimum**: All of the extra information has been removed. Will 2 or 3 lines of master/minion config still exhibit the behavior?
- **Complete**: Minimum also means complete. If your example is missing information, then it's not complete. Salt, Python, and OS versions are all bits of information that make your example complete. Have you provided the commands that you ran?
- **Verifiable**: Can someone take your report and reproduce it?

Slow is smooth, and smooth is fast - it may feel like you're taking a long time to create your issue if you're creating a proper MCVE, but a MCVE eliminates back and forth required to reproduce/verify the issue so someone can actually create a fix.

Pick an issue

If you don't already have an issue in mind, you can search for help wanted issues. If you also search for good first issue then you should be able to find some issues that are good for getting started contributing to Salt. Documentation issues are also good starter issues. When you find an issue that catches your eye (or one of your own), it's a good idea to comment on the issue and mention that you're working on it. Good communication is key to collaboration - so if you don't have time to complete work on the issue, just leaving some information about when you expect to pick things up again is a great idea!
31.7.3 Hacking away

Salt, tests, documentation, and you

Before approving code contributions, Salt requires:

• documentation
• meaningful passing tests
• correct code

Documentation fixes just require correct documentation.

What if I don’t write tests or docs?

If you aren’t into writing documentation or tests, we still welcome your contributions! But your PR will be labeled Needs Testcase and Help Wanted until someone can get to write the tests/documentation. Of course, if you have a desire but just lack the skill we are more than happy to collaborate and help out! There’s the documentation working group and the testing working group. We also regularly stream our test clinic live on Twitch every Tuesday afternoon and Thursday morning, Central Time. If you’d like specific help with tests, bring them to the clinic. If no community members need help, you can also just watch tests written in real time.

Documentation

Salt uses both docstrings, as well as normal reStructuredText files in the salt/doc folder for documentation. Sphinx is used to generate the documentation, and does require imagemagick. See Set up imagemagick for more information.

Before submitting a documentation PR, it helps to first build the Salt docs locally on your machine and preview them. Local previews helps you:

• Debug potential documentation output errors before submitting a PR.
• Saves you time by not needing to use the Salt CI/CD test suite to debug, which takes more than 30 minutes to run on a PR.
• Ensures the final output looks the way you intended it to look.

To set up your local environment to preview the core Salt and module documentation:

1. Install the documentation dependencies. For example, on Ubuntu:

```
sudo apt-get update

sudo apt-get install -y enchant-2 git gcc imagemagick make zlib1g-dev

liblzma-dev libxml2 libxml2-dev libxslt-dev libcurl4-

openssl-dev libssl-dev libgnutls28-dev xz-utils inkscape
```

2. Navigate to the folder where you store your Salt repository and remove any .nox directories that might be in that folder:

```
rm -rf .nox
```

3. Install pyenv for the version of Python needed to run the docs. As of the time of writing, the Salt docs theme is not compatible with Python 3.10, so you’ll need to run 3.9 or earlier. For example:
4. Activate `pyenv` if it’s not auto-activated:

```bash
pyenv exec pip install -U pip setuptools wheel
```

5. Install `nox` into your `pyenv` environment, which is the utility that will build the Salt documentation:

```bash
pyenv exec pip install nox
```

Since we use `nox`, you can build your docs and view them in your browser with this one-liner:

```bash
python -m nox -e 'docs-html(compress=False, clean=False)'; cd doc/_build/html; python -m webbrowser http://localhost:8000/contents.html; python -m http.server
```

The first time you build the docs, it will take a while because there are a lot of modules. Maybe you should go grab some dessert if you already finished that sandwich. But once `nox` and `Sphinx` are done building the docs, `python` should launch your default browser with the URL `http://localhost:8000/contents.html`. Now you can navigate to your docs and ensure your changes exist. If you make changes, you can simply run this:

```bash
cd -; python -m nox -e 'docs-html(compress=False, clean=False)'; cd doc/_build/html; python -m http.server
```

And then refresh your browser to get your updated docs. This one should be quite a bit faster since `Sphinx` won’t need to rebuild everything.

Alternatively, you could build the docs on your local machine and then preview the build output. To build the docs locally:

```bash
pyenv exec nox -e 'docs-html(compress=False, clean=True)'
```

The output from this command will put the preview files in: `doc > _build > html`.

If your change is a docs-only change, you can go ahead and commit/push your code and open a PR. You can indicate that it’s a docs-only change by adding `[Documentation]` to the title of your PR. Otherwise, you’ll want to write some tests and code.

### Running development Salt

Note: If you run into any issues in this section, check the Troubleshooting section.

If you’re going to hack on the Salt codebase you’re going to want to be able to run Salt locally. The first thing you need to do is install Salt as an editable pip install:

```bash
python -m pip install -e .
```

This will let you make changes to Salt without having to re-install it.

After all of the dependencies and Salt are installed, it’s time to set up the config for development. Typically Salt runs as `root`, but you can specify which user to run as. To configure that, just copy the master and minion configs. We have `.gitignore` setup to ignore the `local/` directory, so we can put all of our personal files there.
mkdir -p local/etc/salt/

Create a master config file as local/etc/salt/master:

```
cat <<EOF >local/etc/salt/master
user: $(whoami)
root_dir: $PWD/local/
publish_port: 55505
ret_port: 55506
EOF
```

And a minion config as local/etc/salt/minion:

```
cat <<EOF >local/etc/salt/minion
user: $(whoami)
root_dir: $PWD/local/
master: localhost
id: saltdev
master_port: 55506
EOF
```

Now you can start your Salt master and minion, specifying the config dir.

```
salt -master --config-dir=local/etc/salt/ --log-level=debug --daemon
salt-minion --config-dir=local/etc/salt/ --log-level=debug --daemon
```

Now you should be able to accept the minion key:

```
salt-key -c local/etc/salt -Ay
```

And check that your master/minion are communicating:

```
salt -c local/etc/salt \* test.version
```

Rather than running `test.version` from your master, you can run it from the minion instead:

```
salt-call -c local/etc/salt test.version
```

Note that you're running `salt-call` instead of `salt`, and you're not specifying the minion (\*), but if you're running the dev version then you still will need to pass in the config dir. Now that you've got Salt running, you can hack away on the Salt codebase!

If you need to restart Salt for some reason, if you've made changes and they don't appear to be reflected, this is one option:

```
kill -INT $(pgrep salt-master)
kill -INT $(pgrep salt-minion)
```

If you'd rather not use `kill`, you can have a couple of terminals open with your salt virtualenv activated and omit the `--daemon` argument. Salt will run in the foreground, so you can just use ctrl+c to quit.
Test first? Test last? Test meaningfully!

You can write tests first or tests last, as long as your tests are meaningful and complete! Typically the best tests for Salt are going to be unit tests. Testing is a whole topic on its own, but you may also want to write functional or integration tests. You'll find those in the salt/tests directory.

When you're thinking about tests to write, the most important thing to keep in mind is, “What, exactly, am I testing?” When a test fails, you should know:

- What, specifically, failed?
- Why did it fail?
- As much as possible, what do I need to do to fix this failure?

If you can't answer those questions then you might need to refactor your tests.

When you're running tests locally, you should make sure that if you remove your code changes your tests are failing. If your tests aren't failing when you haven't yet made changes, then it's possible that you're testing the wrong thing.

But whether you adhere to TDD/BDD, or you write your code first and your tests last, ensure that your tests are meaningful.

Running tests

As previously mentioned, we use nox, and that's how we run our tests. You should have it installed by this point but if not you can install it with this:

```
python -m pip install nox
```

Now you can run your tests:

```
python -m nox -e "test-3(coverage=False)" -- tests/unit/cli/test_batch.py
```

It's a good idea to install espeak or use say on Mac if you're running some long-running tests. You can do something like this:

```
python -m nox -e "test-3(coverage=False)" -- tests/unit/cli/test_batch.py;\n  --espeak "Tests done, woohoo!"
```

That way you don't have to keep monitoring the actual test run.

```
python -m nox -e "test-3(coverage=False)" -- --core-tests
```

You can enable or disable test groups locally by passing their respected flag:

- --no-fast-tests - Tests that are ~10s or faster. Fast tests make up ~75% of tests and can run in 10 to 20 minutes.
- --slow-tests - Tests that are ~10s or slower.
- --core-tests - Tests of any speed that test the root parts of salt.
- --flaky-jail - Test that need to be temporarily skipped.

In your PR, you can enable or disable test groups by setting a label. All fast, slow, and core tests specified in the change file will always run.

- test:no-fast
- test:core
• test:slow
• test:flaky-jail

Changelog and commit!

When you write your commit message you should use imperative style. Do this:

Add frobnosticate capability

Don't do this:

Added frobnosticate capability

But that advice is backwards for the changelog. We follow the keepachangelog approach for our changelog, and use towncrier to generate it for each release. As a contributor, all that means is that you need to add a file to the salt/changelog directory, using the <issue #>.<type> format. For instance, if you fixed issue 123, you would do:

```
echo "Made sys.doc inform when no minions return" > changelog/123.fixed
```

And that's all that would go into your file. When it comes to your commit message, it's usually a good idea to add other information, such as

• What does a reviewer need to know about the change that you made?
• If someone isn't an expert in this area, what will they need to know?

This will also help you out, because when you go to create the PR it will automatically insert the body of your commit messages.

See the changelog docs for more information.

Pull request time!

Once you've done all your dev work and tested locally, you should check out our PR guidelines. After you read that page, it's time to open a new PR. Fill out the PR template - you should have updated or created any necessary docs, and written tests if you're providing a code change. When you submit your PR, we have a suite of tests that will run across different platforms to help ensure that no known bugs were introduced.

Now what?

You've made your changes, added documentation, opened your PR, and have passing tests... now what? When can you expect your code to be merged?

When you open your PR, a reviewer will get automatically assigned. If your PR is submitted during the week you should be able to expect some kind of communication within that business day. If your tests are passing and we're not in a code freeze, ideally your code will be merged that week or month. If you haven't heard from your assigned reviewer, ping them on GitHub, irc, or Community Slack.

It's likely that your reviewer will leave some comments that need addressing - it may be a style change, or you forgot a changelog entry, or need to update the docs. Maybe it's something more fundamental - perhaps you encountered the rare case where your PR has a much larger scope than initially assumed.

Whatever the case, simply make the requested changes (or discuss why the requests are incorrect), and push up your new commits. If your PR is open for a significant period of time it may be worth rebasing your changes on the most recent changes to Salt. If you need help, the previously linked Git resources will be valuable.
But if, for whatever reason, you're not interested in driving your PR to completion then just note that in your PR. Something like, "I'm not interested in writing docs/tests, I just wanted to provide this fix - someone else will need to complete this PR." If you do that then we'll add a "Help Wanted" label and someone will be able to pick up the PR, make the required changes, and it can eventually get merged in.

In any case, now that you have a PR open, congrats! You're a Salt developer! You rock!

## 31.7.4 Troubleshooting

### zmq.core.error.ZMQError

Once the minion starts, you may see an error like the following:

```bash
zmq.core.error.ZMQError: ipc path "/path/to/your/virtualenv/var/run/salt/minion/minion_event_7824dcbebcf68a8f6755939af70b9f4_pub.ipc" is longer than 107 characters (sizeof(sockaddr_un.sun_path)).
```

This means that the path to the socket the minion is using is too long. This is a system limitation, so the only workaround is to reduce the length of this path. This can be done in a couple different ways:

1. Create your virtualenv in a path that is short enough.
2. Edit the `:conf_minion:sock_dir` minion config variable and reduce its length. Remember that this path is relative to the value you set in `:conf_minion:root_dir`.

**NOTE:** The socket path is limited to 107 characters on Solaris and Linux, and 103 characters on BSD-based systems.

### No permissions to access ...

If you forget to pass your config path to any of the `salt*` commands, you might see

```
No permissions to access "/var/log/salt/master", are you running as the correct user?
```

Just pass `-c local/etc/salt` (or whatever you named it)

### File descriptor limit

You might need to raise your file descriptor limit. You can check it with:

```
ulimit -n
```

If the value is less than 3072, you should increase it with:

```
ulimit -n 3072
```

# For c-shell:

```
limit descriptors 3072
```
Pygit2 or other dependency install fails

You may see some failure messages when installing requirements. You can directly access your nox environment and possibly install pygit (or other dependency) that way. When you run nox, you'll see a message like this:

```bash
$ nox
```

```
Re-using existing virtual environment at .nox/pytest-parametrized-3-crypto-none-transport-zeromq-coverage-false.
```

For this, you would be able to install with:

```bash
$ .nox/pytest-parametrized-3-crypto-none-transport-zeromq-coverage-false/bin/python -m pip install pygit2
```

## 31.8 Deprecating Code

Salt should remain backwards compatible, though sometimes, this backwards compatibility needs to be broken because a specific feature and/or solution is no longer necessary or required. At first one might think, let me change this code, it seems that it's not used anywhere else so it should be safe to remove. Then, once there's a new release, users complain about functionality which was removed and they where using it, etc. This should, at all costs, be avoided, and, in these cases, that specific code should be deprecated.

In order to give users enough time to migrate from the old code behavior to the new behavior, the deprecation time frame should be carefully determined based on the significance and complexity of the changes required by the user.

Salt feature releases are based on the Periodic Table. Any new features going into the master branch will be named after the next element in the Periodic Table. For example, Magnesium was the feature release name associated with the v3002 tag. At that point in time, any new features going into the master branch, after v3002 was tagged, were part of the Aluminium feature release.

A deprecation warning should be in place for at least two major releases before the deprecated code and its accompanying deprecation warning are removed. More time should be given for more complex changes. For example, if the current release under development is 3001, the deprecated code and associated warnings should remain in place and warn for at least Aluminium.

To help in this deprecation task, salt provides `salt.utils.versions.warn_until`. The idea behind this helper function is to show the deprecation warning to the user until salt reaches the provided version. Once that provided version is equal to `salt.utils.versions.warn_until` will raise a `RuntimeError` making salt stop its execution. This stoppage is unpleasant and will remind the developer that the deprecation limit has been reached and that the code can then be safely removed.

Consider the following example:

```python
def some_function(bar=False, foo=None):
    if foo is not None:
        salt.utils.versions.warn_until("Aluminium",
            "The 'foo' argument has been deprecated and its "
            "functionality removed, as such, its usage is no longer "
            "required.",
        )
```

Development begins on Aluminium, or v3003, after the v3002 tag is applied to the master branch. Once this occurs, all uses of the `warn_until` function targeting Aluminium, along with the code they are warning about should be removed from the code.
31.8.1 Silence Deprecation Warnings

If you set the `PYTHONWARNINGS` environment variable to `ignore` Salt will not print the deprecation warnings.

31.9 Python 2 Deprecation FAQ

FAQ

- **Python 2 Deprecation FAQ**
  - Why are we deprecating Python 2?
  - Was this announced/decided before making the change?
  - Can I contribute Python 2 code?
  - What if my OS does not include Python 3 packages? Or, how do I upgrade from Salt on Python 2 to Salt on Python 3?
    - On Modern Platforms
    - On Other Platforms
      - Build Your Own
      - pop-build distributions
  - Will you support a Python 3 master with an older Python 2 minion?
  - Will you support Python 2 master with a new Python 3 minion?
  - How does this impact Salt-SSH support?
  - What is your plan for removing Python 2 code?
  - Will Salt continue to package for Python 2?

31.9.1 Why are we deprecating Python 2?

Python 2.7.18 was the final release of Python2, released in April 2020. At this point, Python 2 will no longer receive any unpaid support. The Python core developers are focusing their efforts on improving and enhancing Python 3. Additionally, many libraries that Salt depends on have also dropped Python 2 support.

To take advantage of continued support and improvements, Salt is joining the ranks of projects that are dropping legacy Python support in favor of Python 3.
31.9.2 Was this announced/decided before making the change?

SEP 5 was approved in April, 2019.

31.9.3 Can I contribute Python 2 code?

For several years, Salt has been a Python 2/3 codebase, requiring Python 3 support for all contributions. The only changes contributors can expect to this process is that we will now accept Python 3-only code changes.

While there is a significant subset of Python that is compatible with both Python 3 and legacy Python, changes requiring six or otherwise removing Python 3-only code will not be accepted.

31.9.4 What if my OS does not include Python 3 packages? Or, how do I upgrade from Salt on Python 2 to Salt on Python 3?

There are several options to upgrade to Python 3.

**On Modern Platforms**

At this point, most modern Linux distributions have Python 3 packages. Ubuntu 20.04 LTS has moved to Python 3.8 as it’s default system Python.

**On Other Platforms**

**Build Your Own**

If your current distribution does not have Python 3 it’s pretty simple to use Salt to build and distribute Python 3 on your own. Installing Python 3 and pip installing Salt gives you the most control over your distribution.

**pop-build distributions**

Another approach is to use the pop-build distribution of Salt. With the Sodium release we will begin releasing packages for Salt using pop-build, in tandem with our normal build process. The pop-build distribution will contain Salt, Python, and any necessary dependencies, which will make it trivial to have a completely supported version of Salt.

31.9.5 Will you support a Python 3 master with an older Python 2 minion?

Yes! Our policy of keeping newer masters backwards compatible with at least the most recent minion version is not changing. You should be able to run modern Salt Masters on Python 3 with slightly older minions running on legacy Python. Of course, if you want your minions to be able to take advantage of the newest features in Salt, upgrading to Python 3 will be necessary.
31.9.6 Will you support Python 2 master with a new Python 3 minion?

In keeping with our existing policy, we make no guarantees about older masters with newer minions. It may work, but breakages are common and should be expected.

31.9.7 How does this impact Salt-SSH support?

Salt-SSH will need Python 3 on the target minions. We will be upgrading Salt-SSH to provide instructions or recommendations on adding Python3 if it is not detected.

31.9.8 What is your plan for removing Python 2 code?

Legacy Python code will be gradually removed from the Salt codebase.

While we could remove most of it at once, that introduces a high level of risk. Instead, beginning with the Sodium (v3001) release, Salt will simply drop support for Python 2. PRs will no longer be required to support Python 2 before merging.

Over time, as modules are changed, six and other legacy Python syntax will be removed. It may be at some point in the future it becomes necessary to remove the last vestiges of legacy Python from Salt, but currently the plan is to take a more measured approach.

31.9.9 Will Salt continue to package for Python 2?

No. Beginning with Sodium (v3001), Salt will no longer release packages for, or support Python 2.

31.10 Installing Salt for development

Clone the repository using:

```
git clone https://github.com/saltstack/salt
```

**Note:** tags

Just cloning the repository is enough to work with Salt and make contributions. However, fetching additional tags from git is required to have Salt report the correct version for itself. To do this, first add the git repository as an upstream source:

```
git remote add upstream https://github.com/saltstack/salt
```

Fetching tags is done with the git ‘fetch’ utility:

```
git fetch --tags upstream
```

Create a new virtualenv:

```
virtualenv /path/to/your/virtualenv
```
Avoid making your virtualenv path too long.

On Arch Linux, where Python 3 is the default installation of Python, use the virtualenv2 command instead of virtualenv.

On Gentoo you must use --system-site-packages to enable pkg and portage_config functionality.

Note: Using system Python modules in the virtualenv

To use already-installed python modules in virtualenv (instead of having pip download and compile new ones), run virtualenv --system-site-packages Using this method eliminates the requirement to install the salt dependencies again, although it does assume that the listed modules are all installed in the system PYTHONPATH at the time of virtualenv creation.

Note: Python development package

Be sure to install python devel package in order to install required Python modules. In Debian/Ubuntu run sudo apt-get install -y python-dev. In RedHat based system install python-devel

Activate the virtualenv:

```bash
source /path/to/your/virtualenv/bin/activate
```

Install Salt (and dependencies) into the virtualenv:

```bash
pip install pyzmq PyYAML pycrypto msgpack jinja2 psutil futures tornado
pip install -e ./salt  # the path to the salt git clone from above
```

Note: Installing psutil

Python header files are required to build this module, otherwise the pip install will fail. If your distribution separates binaries and headers into separate packages, make sure that you have the headers installed. In most Linux distributions which split the headers into their own package, this can be done by installing the python-dev or python-devel package. For other platforms, the package will likely be similarly named.

Note: Installing dependencies on macOS.

You can install needed dependencies on macOS using homebrew or macports. See the Salt install guide for more information.

Warning: Installing on RedHat-based Distros

If installing from pip (or from source using setup.py install), be advised that the yum-utils package is needed for Salt to manage packages on RedHat-based systems.
31.10.1 Running a self-contained development version

During development it is easiest to be able to run the Salt master and minion that are installed in the virtualenv you created above, and also to have all the configuration, log, and cache files contained in the virtualenv as well.

The `/path/to/your/virtualenv` referenced multiple times below is also available in the variable `$VIRTUAL_ENV` once the virtual environment is activated.

Copy the master and minion config files into your virtualenv:

```bash
mkdir -p /path/to/your/virtualenv/etc/salt/pki/{master,minion}
cp ./salt/conf/master ./salt/conf/minion /path/to/your/virtualenv/etc/salt/
```

Edit the master config file:

1. Uncomment and change the `user: root` value to your own user.
2. Uncomment and change the `root_dir: /` value to point to `/path/to/your/virtualenv`.
3. Uncomment and change the `pki_dir: /etc/salt/pki/master` value to point to `/path/to/your/virtualenv/etc/salt/pki/master`.
4. If you are running version 0.11.1 or older, uncomment, and change the `pidfile: /var/run/salt-master.pid` value to point to `/path/to/your/virtualenv/salt-master.pid`.
5. If you are also running a non-development version of Salt you will have to change the `publish_port` and `ret_port` values as well.

Edit the minion config file:

1. Repeat the edits you made in the master config for the `user` and `root_dir` values as well as any port changes.
2. Uncomment and change the `pki_dir: /etc/salt/pki/minion` value to point to `/path/to/your/virtualenv/etc/salt/pki/minion`.
3. If you are running version 0.11.1 or older, uncomment, and change the `pidfile: /var/run/salt-minion.pid` value to point to `/path/to/your/virtualenv/salt-minion.pid`.
4. Uncomment and change the `master: salt` value to point at `localhost`.
5. Uncomment and change the `id:` value to something descriptive like "saltdev". This isn't strictly necessary but it will serve as a reminder of which Salt installation you are working with.
6. If you changed the `ret_port` value in the master config because you are also running a non-development version of Salt, then you will have to change the `master_port` value in the minion config to match.

Note: Using `salt-call` with a Standalone Minion

If you plan to run `salt-call` with this self-contained development environment in a masterless setup, you should invoke `salt-call` with `-c /path/to/your/virtualenv/etc/salt` so that salt can find the minion config file. Without the `-c` option, Salt finds its config files in `/etc/salt`.

Start the master and minion, accept the minion’s key, and verify your local Salt installation is working:

```bash
cd /path/to/your/virtualenv
salt-master -c ./etc/salt -d
salt-minion -c ./etc/salt -d
salt-key -c ./etc/salt -L
```
Running the master and minion in debug mode can be helpful when developing. To do this, add `-l debug` to the calls to `salt-master` and `salt-minion`. If you would like to log to the console instead of to the log file, remove the `-d`.

**Note:** Too long socket path?

Once the minion starts, you may see an error like the following:

```
zmq.core.error.ZMQError: ipc path "/path/to/your/virtualenv/
var/run/salt/minion/minion_event_7824dcbe67a8f675593af70b96249f_pub.ipc"
is longer than 107 characters (sizeof(sockaddr_un.sun_path)).
```

This means that the path to the socket the minion is using is too long. This is a system limitation, so the only workaround is to reduce the length of this path. This can be done in a couple different ways:

1. Create your virtualenv in a path that is short enough.
2. Edit the `sock_dir` minion config variable and reduce its length. Remember that this path is relative to the value you set in `root_dir`.

**NOTE:** The socket path is limited to 107 characters on Solaris and Linux, and 103 characters on BSD-based systems.

**Note:** File descriptor limits

Ensure that the system open file limit is raised to at least 2047:

```
# check your current limit
ulimit -n

# raise the limit. persists only until reboot
# use 'limit descriptors 2047' for c-shell
ulimit -n 2047
```

To set file descriptors on macOS, see the Salt install guide instructions for macOS.

### Changing Default Paths

Instead of updating your configuration files to point to the new root directory and having to pass the new configuration directory path to all of Salt's CLI tools, you can explicitly tweak the default system paths that Salt expects:

```
generateSaltSysoptpaths=1 pip install --global-option='--salt-root-dir=/path/to/your/virtualenv/'
   -e ./salt # the path to the salt git clone from above
```

You can now call all of Salt's CLI tools without explicitly passing the configuration directory.
Additional Options

If you want to distribute your virtualenv, you probably don’t want to include Salt’s clone .git/ directory, and, without it, Salt won’t report the accurate version. You can tell setup.py to generate the hardcoded version information which is distributable:

```bash
GENERATE_SALT_SYSPATHS=1 WRITE_SALT_VERSION=1 pip install --global-option='--salt-root-dir=/path/to/your/virtualenv/ ' \\
-e ./salt # the path to the salt git clone from above
```

Instead of passing those two environmental variables, you can just pass a single one which will trigger the other two:

```bash
MIMIC_SALT_INSTALL=1 pip install --global-option='--salt-root-dir=/path/to/your/virtualenv/ ' \\
-e ./salt # the path to the salt git clone from above
```

This last one will grant you an editable salt installation with hardcoded system paths and version information.

### 31.10.2 Installing Salt from the Python Package Index

If you are installing using easy_install, you will need to define a USE_SETUPTOOLS environment variable, otherwise dependencies will not be installed:

```bash
USE_SETUPTOOLS=1 easy_install salt
```

### 31.10.3 Editing and previewing the documentation

You need sphinx-build command to build the docs. In Debian/Ubuntu this is provided in the python-sphinx package. Sphinx can also be installed to a virtualenv using pip:

```bash
pip install Sphinx==1.3.1
```

Change to salt documentation directory, then:

```bash
cd doc; make html
```

- This will build the HTML docs. Run make without any arguments to see the available make targets, which include html, man, and text.
- The docs then are built within the docs/_build/ folder. To update the docs after making changes, run make again.
- The docs use reStructuredText for markup. See a live demo at http://rst.ninjs.org/.
- The help information on each module or state is culled from the python code that runs for that piece. Find them in salt/modules/ or salt/states/.
- To build the docs on Arch Linux, the python2-sphinx package is required. Additionally, it is necessary to tell make where to find the proper sphinx-build binary, like so:

```bash
make SPHINXBUILD=sphinx-build2 html
```

- To build the docs on RHEL/CentOS 6, the python-sphinx10 package must be installed from EPEL, and the following make command must be used:
Once you've updated the documentation, you can run the following command to launch a simple Python HTTP server to see your changes:

```
cd _build/html; python -m SimpleHTTPServer
```

### 31.10.4 Running unit and integration tests

Run the test suite with following command:

```
./setup.py test
```

See [here](#) for more information regarding the test suite.

### 31.10.5 Issue and Pull Request Labeling System

SaltStack uses several labeling schemes to help facilitate code contributions and bug resolution. See the *Labels and Milestones* documentation for more information.

### 31.11 GitHub Labels and Milestones

SaltStack uses several label categories, as well as milestones, to triage incoming issues and pull requests in the GitHub issue tracker. Labels are used to sort issues by type, priority, severity, status, functional area, functional group, and targeted release and pull requests by status, functional area, functional group, type of change, and test status. Milestones are used to indicate whether an issue is fully triaged or is scheduled to be fixed by SaltStack in an upcoming sprint.

#### 31.11.1 Milestones

All issues are assigned to a milestone, whereas pull requests are almost never assigned to a milestone as the mean lifetime of pull requests is short enough that there is no need to track them temporally.

SaltStack uses milestones to indicate which issues are blocked on submitter or upstream actions, are approved, or are scheduled to be fixed or implemented in an upcoming sprint. If an issue is not attached to a sprint milestone, you are welcome to work on it at your own desire and convenience. If it is attached to a sprint milestone and you have already begun working on it or have a solution in mind or have other ideas related to the issue, you are encouraged to coordinate with the assignee via the GitHub issue tracker to create the best possible solution or implementation.

- **Approved** - The issue has been validated and has all necessary information.
- **Blocked** - The issue is waiting on actions by parties outside of SaltStack, such as receiving more information from the submitter or resolution of an upstream issue. This milestone is usually applied in conjunction with the labels *Info Needed, Question, Expected Behavior, Won't Fix For Now,* or *Upstream Bug.*
31.11.2 Labels

Labels are used to sort and describe issues and pull requests. Some labels are usually reserved for one or the other, though most labels may be applied to both.

New issues will receive at least one label and a milestone, and new pull requests will receive at least one label. Except for the functional area and functional group label categories, issues will generally receive only up to one label per category.

Type

Issues are categorized into one of several types. Type labels are almost never used for pull requests. GitHub treats pull requests like issues in many ways, so a pull request could be considered an issue with an implicit Pull Request type label applied.

- Feature - The issue is a request for new functionality including changes, enhancements, refactors, etc.
- Bug - The issue documents broken, incorrect, or confusing behavior. This label is always accompanied by a severity label.
- Duplicate - The issue is a duplicate of another feature request or bug report.
- Upstream Bug - The issue is a result of an upstream issue.
- Question - The issue is more of a question than a request for new features or a report of broken features, but can sometimes lead to further discussion or changes of confusing or incongruous behavior or documentation.
- Expected Behavior - The issue is a bug report of intended functionality.

Priority

An issue’s priority is relative to its functional area. If a bug report, for example, about gitfs indicates that all users of gitfs will encounter this bug, then a P1 label will be applied, even though users who are not using gitfs will not encounter the bug. If a feature is requested by many users, it may be given a high priority.

- P1 - The issue will be seen by all users.
- P2 - The issue will be seen by most users.
- P3 - The issue will be seen by about half of users.
- P4 - The issue will not be seen by most users. Usually the issue is a very specific use case or corner case.

Severity

Severity labels are almost always only applied to issues labeled Bug.

- Blocker - The issue is blocking an impending release.
- Critical - The issue causes data loss, crashes or hangs salt processes, makes the system unresponsive, etc.
- High Severity - The issue reports incorrect functionality, bad functionality, a confusing user experience, etc.
- Medium Severity - The issue reports cosmetic items, formatting, spelling, colors, etc.
Functional Area

Many major components of Salt have corresponding GitHub labels. These labels are applied to all issues and pull requests as is reasonably appropriate. They are useful in organizing issues and pull requests according to the source code relevant to issues or the source code changed by pull requests.

- Execution Module
- File Servers
- Grains
- Multi-Master
- Packaging Related to packaging of Salt, not Salt's support for package management.
- Pillar
- RAET
- Returners
- Runners
- SPM
- Salt-API
- Salt-Cloud
- Salt-SSH
- Salt-Syndic
- State Module
- Tests
- Transport
- Windows
- ZMQ

Functional Group

These labels sort issues and pull requests according to the internal SaltStack engineering teams.

- Core - The issue or pull request relates to code that is central or existential to Salt itself.
- Platform - The issue or pull request relates to support and integration with various platforms like traditional operating systems as well as containers, platform-based utilities like filesystems, command schedulers, etc., and system-based applications like webservers, databases, etc.
- RIoT - The issue or pull request relates to support and integration with various abstract systems like cloud providers, hypervisors, API-based services, etc.
- Console - The issue or pull request relates to the SaltStack enterprise console.
- Documentation - The issue or pull request relates to documentation.
Status

Status labels are used to define and track the state of issues and pull requests. Not all potential statuses correspond to a label, but some statuses are common enough that labels have been created for them. If an issue has not been moved beyond the **Blocked** milestone, it is very likely that it will only have a status label.

- **Cannot Reproduce** - The issue is a bug and has been reviewed by a SaltStack engineer, but it cannot be replicated with the provided information and context. Those involved with the bug will need to work through additional ideas until the bug can be isolated and verified.

- **Confirmed** - The issue is a bug and has been confirmed by a SaltStack engineer, who often documents a minimal working example that reproduces the bug.

- **Fixed Pending Verification** - The issue is a bug and has been fixed by one or more pull requests, which should link to the issue. Closure of the issue is contingent upon confirmation of resolution from the submitter. If the submitter reports a negative confirmation, this label is removed. If no response is given after a few weeks, then the issue will be assumed fixed and closed.

- **Info Needed** - The issue needs more information before it can be verified and resolved. For a feature request this may include a description of the use cases. Almost all bug reports need to include at least the versions of salt and its dependencies, the system type and version, commands used, debug logs, error messages, and relevant configs.

- **Pending Changes** - The pull request needs additional changes before it can be merged.

- **Pending Discussion** - The issue or pull request needs more discussion before it can be closed or merged. The status of the issue or pull request is not clear or apparent enough for definite action to be taken, or additional input from SaltStack, the submitter, or another party has been requested. If the issue is not a pull request, once the discussion has arrived at a cogent conclusion, this label will be removed and the issue will be accepted. If it is a pull request, the results of the discussion may require additional changes and thus, a **Pending Changes** label.

- **won't-fix** - The issue is legitimate, but it is not something the Salt core team is currently able or willing to fix or implement. Issues having this label may be revisited in the future, or solved by a Salt community member.

Test Status

These labels relate to the status of the automated tests that run on pull requests.

- **has-failing-test** - The PR currently has one or more failing tests that prevent the PR from being merged.

- **Needs Testcase** - The PR has code changes, but lack any automated tests. These PRs need automated tests written before they may be merged.

Other

These labels indicate miscellaneous issue types or statuses that are common or important enough to be tracked and sorted with labels.

- **Awesome** - The pull request implements an especially well crafted solution, or a very difficult but necessary change.

- **Help Wanted** - The issue appears to have a simple solution. Issues having this label should be a good starting place for new contributors to Salt.

- **Regression** - The issue is a bug that breaks functionality known to work in previous releases.
• **Story** - The issue is used by a SaltStack engineer to track progress on multiple related issues in a single place.
• **Stretch** - The issue is an optional goal for the current sprint but may not be delivered.
• **ZD** - The issue is related to a Zendesk customer support ticket.
• **<Release>** - The issue is scheduled to be implemented by <Release>. See here for a discussion of Salt’s release codenames.

### 31.12 Logging Internals

TODO

### 31.13 Package Providers

This page contains guidelines for writing package providers.

#### 31.13.1 Package Functions

One of the most important features of Salt is package management. There is no shortage of package managers, so in the interest of providing a consistent experience in pkg states, there are certain functions that should be present in a package provider. Note that these are subject to change as new features are added or existing features are enhanced.

**list_pkgs**

This function should declare an empty dict, and then add packages to it by calling `pkg_resource.add_pkg`, like so:

```python
__salt__[
  "pkg_resource.add_pkg"
](ret, name, version)
```

The last thing that should be done before returning is to execute `pkg_resource.sort_pkglist`. This function does not presently do anything to the return dict, but will be used in future versions of Salt.

```python
__salt__[
  "pkg_resource.sort_pkglist"
](ret)
```

**list_pkgs** returns a dictionary of installed packages, with the keys being the package names and the values being the version installed. Example return data:

```
{
  "foo": "1.2.3-4", 
  "bar": "5.6.7-8"
}
```

**latest_version**

Accepts an arbitrary number of arguments. Each argument is a package name. The return value for a package will be an empty string if the package is not found or if the package is up-to-date. The only case in which a non-empty string is returned is if the package is available for new installation (i.e. not already installed) or if there is an upgrade available.

If only one argument was passed, this function return a string, otherwise a dict of name/version pairs is returned.

This function must also accept **kwargs, in order to receive the fromrepo and repo keyword arguments from pkg states. Where supported, these arguments should be used to find the install/upgrade candidate in the specified
repository. The fromrepo kwarg takes precedence over repo, so if both of those kwargs are present, the repository specified in fromrepo should be used. However, if repo is used instead of fromrepo, it should still work, to preserve backwards compatibility with older versions of Salt.

**version**

Like latest_version, accepts an arbitrary number of arguments and returns a string if a single package name was passed, or a dict of name/value pairs if more than one was passed. The only difference is that the return values are the currently-installed versions of whatever packages are passed. If the package is not installed, an empty string is returned for that package.

**upgrade_available**

Deprecated and destined to be removed. For now, should just do the following:

```
def myfunc():
    return __salt__['pkg.latest_version'](name) != ''
```

**install**

The following arguments are required and should default to None:

1. name (for single-package pkg states)
2. pkgs (for multiple-package pkg states)
3. sources (for binary package file installation)

The first thing that this function should do is call pkg_resource.parse_targets (see below). This function will convert the SLS input into a more easily parsed data structure. pkg_resource.parse_targets may need to be modified to support your new package provider, as it does things like parsing package metadata which cannot be done for every package management system.

```
pkg_params, pkg_type = __salt__['pkg_resource.parse_targets'](name, pkgs, sources)
```

Two values will be returned to the install function. The first of them will be a dictionary. The keys of this dictionary will be package names, though the values will differ depending on what kind of installation is being done:

- If name was provided (and pkgs was not), then there will be a single key in the dictionary, and its value will be None. Once the data has been returned, if the version keyword argument was provided, then it should replace the None value in the dictionary.

- If pkgs was provided, then name is ignored, and the dictionary will contain one entry for each package in the pkgs list. The values in the dictionary will be None if a version was not specified for the package, and the desired version if specified. See the Multiple Package Installation Options section of the pkg.installed state for more info.

- If sources was provided, then name is ignored, and the dictionary values will be the path/URI for the package.

The second return value will be a string with two possible values: repository or file. The install function can use this value (if necessary) to build the proper command to install the targeted package(s).

Both before and after the installing the target(s), you should run list_pkgs to obtain a list of the installed packages. You should then return the output of salt.utils.data.compare_dicts():

---

31.13. Package Providers 4761
```python
def myfunc():
    return salt.utils.data.compare_dicts(old, new)
```

remove

Removes the passed package and return a list of the packages removed.

### 31.13.2 Package Repo Functions

There are some functions provided by `pkg` which are specific to package repositories, and not to packages themselves. When writing modules for new package managers, these functions should be made available as stated below, in order to provide compatibility with the `pkgrepo` state.

All repo functions should accept a `basedir` option, which defines which directory repository configuration should be found in. The default for this is dictated by the repo manager that is being used, and rarely needs to be changed.

```python
basedir = "/etc/yum.repos.d"
__salt__["pkg.list_repos"](basedir)
```

list_repos

Lists the repositories that are currently configured on this system.

```python
__salt__["pkg.list_repos"]()
```

Returns a dictionary, in the following format:

```json
{'reponame': 'config_key_1': 'config value 1',
 'config_key_2': 'config value 2',
 'config_key_3': ['list item 1 (when appropriate)',
                 'list item 2 (when appropriate)']}
```

get_repo

Displays all local configuration for a specific repository.

```python
__salt__["pkg.get_repo"](repo="myrepo")
```

The information is formatted in much the same way as list_repos, but is specific to only one repo.

```json
{'config_key_1': 'config value 1',
 'config_key_2': 'config value 2',
 'config_key_3': ['list item 1 (when appropriate)',
                 'list item 2 (when appropriate)']}
```
del_repo

Removes the local configuration for a specific repository. Requires a repo argument, which must match the locally configured name. This function returns a string, which informs the user as to whether or not the operation was a success.

```
__salt__["pkg.del_repo"](repo="myrepo")
```

mod_repo

Modifies the local configuration for one or more option for a configured repo. This is also the way to create new repository configuration on the local system; if a repo is specified which does not yet exist, it will be created.

The options specified for this function are specific to the system; please refer to the documentation for your specific repo manager for specifics.

```
__salt__["pkg.mod_repo"](repo="myrepo", url="http://myurl.com/repo")
```

31.13.3 Low-Package Functions

In general, the standard package functions as describes above will meet your needs. These functions use the system’s native repomanager (for instance, yum or the apt tools). In most cases, the repo manager is actually separate from the package manager. For instance, yum is usually a front-end for rpm, and apt is usually a front-end for dpkg. When possible, the package functions that use those package managers directly should do so through the low package functions.

It is normal and sane for pkg to make calls to lowpkg, but lowpkg must never make calls to pkg. This is affects functions which are required by both pkg and lowpkg, but the technique in pkg is more performant than what is available to lowpkg. When this is the case, the lowpkg function that requires that technique must still use the lowpkg version.

list_pkgs

Returns a dict of packages installed, including the package name and version. Can accept a list of packages; if none are specified, then all installed packages will be listed.

```
installed = __salt__["lowpkg.list_pkgs"]("foo", "bar")
```

Example output:

```
{"foo": "1.2.3-4", "bar": "5.6.7-8"}
```
verify

Many (but not all) package management systems provide a way to verify that the files installed by the package manager have or have not changed. This function accepts a list of packages; if none are specified, all packages will be included.

```python
installed = __salt__['lowpkg.verify']('httpd')
```

Example output:

```
{
    "/etc/httpd/conf/httpd.conf": {
        "mismatch": ["size", "md5sum", "mtime"],
        "type": "config",
    }
}
```

file_list

Lists all of the files installed by all packages specified. If not packages are specified, then all files for all known packages are returned.

```python
installed = __salt__['lowpkg.file_list']('httpd', 'apache')
```

This function does not return which files belong to which packages; all files are returned as one giant list (hence the file_list function name. However, This information is still returned inside of a dict, so that it can provide any errors to the user in a sane manner.

```
{
    "errors": ["package apache is not installed"],
    "files": ["/etc/httpd", "/etc/httpd/conf", "/etc/httpd/conf.d", "...SNIP...", "..."]
}
```

defile_dict

Lists all of the files installed by all packages specified. If not packages are specified, then all files for all known packages are returned.

```python
installed = __salt__['lowpkg.file_dict']('httpd', 'apache', 'kernel')
```

Unlike file_list, this function will break down which files belong to which packages. It will also return errors in the same manner as file_list.

```
{
    "errors": ["package apache is not installed"],
    "packages": {
        "httpd": ["/etc/httpd", "/etc/httpd/conf", "...SNIP..."],
        "kernel": ["/boot/vmlinuz-2.6.32-279.el6.x86_64.hmac",
                   "/boot/System.map-2.6.32-279.el6.x86_64",
                   "...SNIP..."],
    }
}
```
31.14 Pull Requests

Salt is a large software project with many developers working together. We encourage all Salt users to contribute new features, bug fixes and documentation fixes. For those who haven't contributed to a large software project before we encourage you to consider the following questions when preparing a pull request.

This isn't an exhaustive list and these aren't necessarily hard and fast rules, but these are things we consider when reviewing a pull request.

- Does this change work on all platforms? In cases where it does not, is an appropriate and easy-to-understand reason presented to the user? Is it documented as-such? Have we thought about all the possible ways this code might be used and accounted as best we can for them?

- Will this code work on versions of all Python we support? Will it work on future versions?

- Are Python reserved keywords used? Are variables named in a way that will make it easy for the next person to understand what's going on?

- Does this code present a security risk in any way? What is the worst possible thing that an attacker could do with this code? If dangerous cases are possible, is it appropriate to document them? If so, has this been done? Would this change pass muster with a professional security audit? Is it obvious to a person using this code what the risks are?

- Is it readable? Does it conform to our style guide? Is the code documented such that the next person who comes along will be able to read and understand it? Most especially, are edge-cases documented to avoid regressions? Will it be immediately evident to the next person who comes along why this change was made?

- If appropriate, has the person who wrote the code which is being modified been notified and included in the process?

- What are the performance implications of this change? Is there a more efficient way to structure the logic and if so, does making the change balance itself against readability in a sensible way? Do the performance characteristics of the code change based on the way it is being invoked (i.e., through an API or various command-line tools.) Will it be easy to profile this change if it might be a problem?

- Are caveats considered and documented in the change?

- Will the code scale? More critically, will it scale in both directions? Salt runs in data-centers and on Raspberry Pi installations in the Sahara. It needs to work on big servers and tiny devices.

- Is appropriate documentation written both in public-facing docs and in-line? How will the user know how to use this? What will they do if it doesn't work as expected? Is this something a new user will understand? Can a user know all they need to about this functionality by reading the public docs?

- Is this a change in behavior? If so, is it in the appropriate branch? Are deprecation warnings necessary? Have those changes been fully documented? Have we fully thought through what implications a change in behavior might have?

- How has the code been tested? If appropriate are there automated tests which cover this? Is it likely to regress? If so, how has the potential of that regression been mitigated? What is the plan for ensuring that this code works going forward?

- If it's asynchronous code, what is the potential for a race condition?
- Is this code an original work? If it's borrowed from another project or found online are the appropriate licensing/attribution considerations handled?

- Is the reason for the change fully explained in the PR? If not for review, this is necessary so that somebody in the future can go back and figure out why it was necessary.

- Is the intended behavior of the change clear? How will that behavior be known to future contributors and to users?

- Does this code handle errors in a reasonable way? Have we gone back through the stack as much as possible to make sure that an error cannot be raised that we do not account for? Are errors tested for as well as proper functionality?

- If the code relies on external libraries, do we properly handle old versions of them? Do we require a specific version and if so is this version check implemented? Is the library available on the same platforms that module in question claims to support? If the code was written and tested against a particular library, have we documented that fact?

- Can this code freeze/hang/crash a running daemon? Can it stall a state run? Are there infinite loops? Are appropriate timeouts implemented?

- Is the function interface well documented? If argument types can not be inferred by introspection, are they documented?

- Are resources such as file-handles cleaned-up after they are used?

- Is it possible that a reference-cycle exists between objects that will leak memory?

- Has the code been linted and does it pass all tests?

- Does the change fully address the problem or is it limited to a small surface area? By this, I mean that it should be clear that the submitter has looked for other cases in the function or module where the given case might also be addressed. If additional changes are necessary are they documented in the code as a FIXME or the PR and in Github as an issue to be tracked?

- Will the code throw errors/warnings/stacktraces to the console during normal operation?

- Has all the debugging been removed?

- Does the code log any sensitive data? Does it show sensitive data in process lists? Does it store sensitive data to disk and if so, does it do so in a secure manner? Are there potential race conditions in between writing the data to disk and setting the appropriate permissions?

- Is it clear from the solution that the problem is well-understood? How can somebody who has never seen the problem feel confident that this proposed change is the best one?

- What's hard-coded that might not need to be? Are we making sensible decisions for the user and allowing them to tune and change things where appropriate?

- Are utility functions used where appropriate? Does this change re-implement something we already have code for?

- Is the right thing being fixed? There are cases where it's appropriate to fix a test and cases where it's appropriate to fix the code that's under test. Which is best for the user? Is this change a shortcut or a solution that will be solid in the months and years to come?

- How will this code react to changes elsewhere in the code base? What is it coupled to and have we fully thought through how best to present a coherent interface to consumers of a given function or method?

- Does this PR try to fix too many bugs/problems at once?

- Should this be split into multiple PRs to make them easier to test and reason about?
31.15 Pull Request Requirements

The following outlines what is required before a pull request can be merged into the salt project. For each of these requirements, an exception can be made that requires 3 approvals before merge. The exceptions are detailed more below.

31.15.1 All PR requirements

- Approval Required: approval review from core team member OR 1 approval review from captain of working group
- Cannot merge your own PR until 1 reviewer approves from defined list above that is not the author.
- All Tests Pass

31.15.2 Bug Fix PR requirements

- Test Coverage: regression test written to cover bug fix. Contributors only need to write test coverage for their specific changes.
- Point to the issue the PR is resolving. If there is not an issue one will need to be created.

31.15.3 Feature PR requirements

- Test Coverage: tests written to cover new feature. Contributors only need to write test coverage for their specific changes.
- Add .. versionadded:: <release> to module's documentation. If you are not certain which release your fix will be included in you can include TBD and the PR reviewer will let you know the correct name of the release you need to update to the versionadded.

31.15.4 Exceptions to all requirements

As previously stated, all of the above requirements can be bypassed with 3 approvals. PR's that do not require tests include:

- documentation
- cosmetic changes (for example changing from log.debug to log.trace)
- fixing tests
- pylint
- changes outside of the salt directory
31.16 Release Notes

You can edit the release notes to highlight a new feature being added to a given release. The release notes are templated with Jinja and are generated at release time.

31.16.1 How do I edit the release notes

To edit the release notes you need to look in doc/topics/releases/templates for your given release and edit the template. Do not edit the release note files in doc/topics/releases/, as this will be written over with the content in the template file. For example, if you want to add content to the 3006.0 release notes you would edit the doc/topics/releases/templates/3006.0.md.template file. Do not edit the changelog portion of the template file, since that is auto generated with the content generated for the changelog for each release.

31.16.2 How to generate the release notes

This step is only used when we need to generate the release notes before releasing. You should NOT need to run these steps as they are ran in the pipeline, but this is documented so you can test your changes to the release notes template.

To generate the release notes requires the tools command. The instructions below will detail how to install and use tools.

Installing tools

To view the output the release notes will produce before generating them you can run tools in draft mode:

```
tools changelog update-release-notes --draft
```

To generate the release notes just remove the --draft argument:

```
tools changelog update-release-notes
```

To specify a specific Salt version you add that version as an argument:

```
tools changelog update-release-notes 3006.0
```

To only generate the template for a new release

```
tools changelog update-release-notes --template-only
```

31.17 Reporting Bugs

Salt uses GitHub to track open issues and feature requests.

To file a bug, please navigate to the new issue page for the Salt project.

In an issue report, please include the following information:

- The output of salt --versions-report from the relevant machines. This can also be gathered remotely by using salt <my_tgt> test.versions_report.
• A description of the problem including steps taken to cause the issue to occur and the expected behaviour.
• Any steps taken to attempt to remediate the problem.
• Any configuration options set in a configuration file that may be relevant.
• A reproducible test case. This may be as simple as an SLS file that illustrates a problem or it may be a link to a repository that contains a number of SLS files that can be used together to re-produce a problem. If the problem is transitory, any information that can be used to try and reproduce the problem is helpful.
• [Optional] The output of each salt component (master/minion/CLI) running with the–debug flag set.

Note: Please be certain to scrub any logs or SLS files for sensitive data!

31.18 Salt Extensions

Salt modules can be distributed as Salt Extensions.

The existing Salt modules will be carved up into one of three categories. Each category will be implemented in the following way:

## Core Modules
Core Modules will be kept inside the main Salt codebase, and development will be tied to the Salt release cycle.

## Supported Modules
Supported modules will be moved to their own repositories within the SaltStack Github organization where they can be maintained separately from the Salt codebase.

## Community Modules
Remaining modules will be deprecated from the Salt Core codebase and community members will be able to continue independent maintainership if they are interested. Some plugins are almost exclusively maintained by external corporations – if these corporations wish for formal documentation outlining transfer of ownership it can be handled on a case-by-case basis. The community modules can be hosted either in individual or corporate source control systems, alternatively they can also be hosted in the community run Salt Extensions Github organization, that will operate like the the Salt Formulas Github organization. The criteria to determine which category to place modules in will follow these rules:

## Core Modules
1. Required Salt Functionality
   a. Modules such as state, sys, peer, grains, pillar, etc.
2. Modules critical to Salt's Multi OS support
   a. Modules that function across multiple operating systems like cmd and file.

## Supported Modules
1. Modules to support specific operating systems traditionally maintained by the core team – such as RedHat, MacOS, Windows, Solaris, etc.
   2. Modules to support specific but critical applications, such as Apache, MySQL, etc.
3. Modules created and maintained as part of VMware backed support agreements and contracts.

## Community Extension Modules

1. Modules to support specific operating systems traditionally maintained by the OS vendor – such as SUSE, openBSD, NetBSD, etc.

2. Modules to support cloud interfaces, such as AWS, Azure, etc.

3. Modules no longer maintained, or which we suspect are also no longer used or maintained, such as moosefs, qemu_img, etc.

### 31.18.1 How do I deprecate a Salt module to a Salt extension

To indicate that a Salt module is being deprecated in favor of a Salt extension, for each Salt module include `__deprecated__` tuple in the module. The tuple should include the version of Salt that the module will be removed, the name of the collection of modules that are being deprecated, and the URL where the source for the new extension can be found. The version should be 2 major versions from the next major release. For example, if the next major release of Salt is 3100, the deprecation version should be set to 3102.

### 31.19 Salt Topology

Salt is based on a powerful, asynchronous, network topology using ZeroMQ. Many ZeroMQ systems are in place to enable communication. The central idea is to have the fastest communication possible.

#### 31.19.1 Servers

The Salt Master runs 2 network services. First is the ZeroMQ PUB system. This service by default runs on port 4505/tcp and can be configured via the `publish_port` option in the master configuration.

Second is the ZeroMQ REP system. This is a separate interface used for all bi-directional communication with minions. By default this system binds to port 4506/tcp and can be configured via the `ret_port` option in the master.

#### 31.19.2 PUB/SUB

The commands sent out via the salt client are broadcast out to the minions via ZeroMQ PUB/SUB. This is done by allowing the minions to maintain a connection back to the Salt Master and then all connections are informed to download the command data at once. The command data is kept extremely small (usually less than 1K) so it is not a burden on the network.

#### 31.19.3 Return

The PUB/SUB system is a one way communication, so once a publish is sent out the PUB interface on the master has no further communication with the minion. The minion, after running the command, then sends the command’s return data back to the master via the `ret_port`.
31.20 Developing Salt Tutorial

This tutorial assumes you have:

- a web browser
- a GitHub account (<my_account>)
- a command line (CLI)
- git
- a text editor

31.20.1 Fork

In your browser, navigate to the saltstack/salt GitHub repository.
Click on Fork (https://github.com/saltstack/salt/#fork-destination-box).

Note: If you have more than one GitHub presence, for example if you are a member of a team, GitHub will ask you into which area to clone Salt. If you don’t know where, then select your personal GitHub account.

31.20.2 Clone

In your CLI, navigate to the directory into which you want to clone the Salt codebase and submit the following command:

```
$ git clone https://github.com/<my_account>/salt.git
```

where <my_account> is the name of your GitHub account. After the clone has completed, add SaltStack as a second remote and fetch any changes from upstream.

```
$ cd salt
$ git remote add upstream https://github.com/saltstack/salt.git
$ git fetch upstream
```

For this tutorial, we will be working off from the master branch, which is the default branch for the SaltStack GitHub project. This branch needs to track upstream/master so that we will get all upstream changes when they happen.

```
$ git checkout master
$ git branch --set-upstream-to upstream/master
```
31.20.3 Fetch

Fetch any upstream changes on the master branch and sync them to your local copy of the branch with a single command:

```
$ git pull --rebase
```

Note: For an explanation on pull vs pull --rebase and other excellent points, see this article by Mislav Marohnić.

31.20.4 Branch

Now we are ready to get to work. Consult the sprint beginner bug list and select an execution module whose __virtual__ function needs to be updated. I'll select the alternatives module.

Create a new branch off from master. Be sure to name it something short and descriptive.

```
$ git checkout -b virt_ret
```

31.20.5 Edit

Edit the file you have selected, and verify that the changes are correct.

```
$ vim salt/modules/alternatives.py
$ git diff
```

diff --git a/salt/modules/alternatives.py b/salt/modules/alternatives.py
index 1653e5f..30c0a59 100644
--- a/salt/modules/alternatives.py
+++ b/salt/modules/alternatives.py
@@ -30,7 +30,7 @@ def __virtual__():
     
-    return False
+    return (False, 'Cannot load alternatives module: /etc/alternatives
     → dir not found')

     return True

def _get_cmd():
```
31.20.6 Commit

Stage and commit the changes. Write a descriptive commit summary, but try to keep it less than 50 characters. Review your commit.

```bash
$ git add salt/modules/alternatives.py
$ git commit -m 'modules.alternatives: __virtual__ return err msg'
$ git show
```

Note: If you need more room to describe the changes in your commit, run `git commit` (without the `-m` message, option) and you will be presented with an editor. The first line is the commit summary and should still be 50 characters or less. The following paragraphs you create are free form and will be preserved as part of the commit.

31.20.7 Push

Push your branch to your GitHub account. You will likely need to enter your GitHub username and password.

```bash
$ git push origin virt_ret
```

Note: If authentication over https does not work, you can alternatively setup ssh keys. Once you have done this, you may need add the keys to your git repository configuration

```bash
$ git config ssh.key ~/.ssh/<key_name>
```

where `<key_name>` is the file name of the private key you created.

31.20.8 Merge

In your browser, navigate to the new pull request page on the saltstack/salt GitHub repository and click on compare across forks. Select `<my_account>` from the list of head forks and the branch you are wanting to merge into master (virt_ret in this case).

When you have finished reviewing the changes, click Create pull request.

If your pull request contains only a single commit, the title and comment will be taken from that commit’s summary and message, otherwise the branch name is used for the title. Edit these fields as necessary and click Create pull request.

Note: Although these instructions seem to be the official pull request procedure on github’s website, here are two alternative methods that are simpler.

- If you navigate to your clone of salt, https://github.com/<my_account>/salt, depending on how old your branch is or how recently you pushed updates on it, you may be presented with a button to create a pull request with your branch.
- I find it easiest to edit the following URL:

  https://github.com/saltstack/salt/compare/master...<my_account>:virt_ret
31.20.9 Resources

GitHub offers many great tutorials on various aspects of the git- and GitHub-centric development workflow:
https://help.github.com/

There are many topics covered by the Salt Developer documentation:
https://docs.saltproject.io/en/latest/topics/development/index.html

The contributing documentation presents more details on specific contributing topics:
https://docs.saltproject.io/en/latest/topics/development/contributing.html

31.21 Modular Systems

When first working with Salt, it is not always clear where all of the modular components are and what they do. Salt comes loaded with more modular systems than many users are aware of, making Salt very easy to extend in many places.

The most commonly used modular systems are execution modules and states. But the modular systems extend well beyond the more easily exposed components and are often added to Salt to make the complete system more flexible.

31.21.1 Developing New Modules

Interactive Debugging

Sometimes debugging with print() and extra logs sprinkled everywhere is not the best strategy.

IPython is a helpful debug tool that has an interactive python environment which can be embedded in python programs.

First the system will require IPython to be installed.

```bash
# Debian
apt-get install ipython

# Arch Linux
pacman -Syu ipython2

# RHEL/CentOS (via EPEL)
yum install python-ipython
```

Now, in the troubling python module, add the following line at a location where the debugger should be started:

```python
test = "test123"
import IPython
IPython.embed_kernel()
```

After running a Salt command that hits that line, the following will show up in the log file:

```
[CRTICAL] To connect another client to this kernel, use:
[IPKernelApp] --existing kernel-31271.json
```

Now on the system that invoked embed_kernel, run the following command from a shell:
This provides a console that has access to all the vars and functions, and even supports tab-completion.

```
print(test)
test123
```

To exit IPython and continue running Salt, press Ctrl-d to logout.

**The Salt Loader**

Salt's loader system is responsible for reading *Special Module Contents* and providing the context for the special Dunder Dictionaries. When modules developed for Salt's loader are imported directly, the dunder attributes won't be populated. You can use the *Loader Context* to work around this.

**Loader Context**

Given the following.

```
# coolmod.py

def utils_func_getter(name):
    return __utils__[name]
```

You would not be able import coolmod and run `utils_func_getter` because `__utils__` would not be defined. You must run `coolmod.utils_func_getter` in the context of a loader.

```
import coolmod
import salt.loader

opts = {}
utils = salt.loader.utils(opts)
with salt.loader.context(utils):
    func = coolmod.utils_func_getter("foo.bar")
```

**Special Module Contents**

These are things that may be defined by the module to influence various things.
__virtual__

__virtual_aliases__

__virtualname__

__init__

Called before __virtual__() on grains and proxy modules

__proxyenabled__

As a list containing the names of the proxy types that the module supports.

__load__

__func_alias__

__outputter__

Dunder Dictionaries

Salt provides several special “dunder” dictionaries as a convenience for Salt development. These include __opts__, __context__, __grains__, __pillar__, and others. This document will describe each dictionary and detail where they exist and what information and/or functionality they provide.

The following dunder dictionaries are always defined, but may be empty

- __context__
- __grains__
- __pillar__
- __opts__

__opts__

.. versionchanged:: 3006.0

The __opts__ dictionary can now be accessed via context.`.

Defined in: All modules

The __opts__ dictionary contains all of the options passed in the configuration file for the master or minion.

**Note:** In many places in salt, instead of pulling raw data from the __opts__ dict, configuration data should be pulled from the salt get functions such as config.get

```
__salt__['config.get']('foo:bar')
```
The `get` functions also allow for dict traversal via the `:` delimiter. Consider using `get` functions whenever using `__opts__` or `__pillar__` and `__grains__` (when using grains for configuration data)

The configuration file data made available in the `__opts__` dictionary is the configuration data relative to the running daemon. If the modules are loaded and executed by the master, then the master configuration data is available, if the modules are executed by the minion, then the minion configuration is available. Any additional information passed into the respective configuration files is made available

```
__salt__
```

Defined in: Auth, Beacons, Engines, Execution, Executors, Outputters, Pillars, Proxies, Renderers, Returners, Runners, SDB, SSH Wrappers, State, Thorium

`__salt__` contains the execution module functions. This allows for all functions to be called as they have been set up by the salt loader.

```
__salt__['cmd.run']('fdisk -l')
__salt__['network.ip_addrs']()
```

Note: When used in runners or outputters, `__salt__` references other runner/outputter modules, and not execution modules.

```
__grains__
```

Filled in for: Execution, Pillar, Renderer, Returner, SSH Wrapper, State.

The `__grains__` dictionary contains the grains data generated by the minion that is currently being worked with. In execution modules, state modules and returners this is the grains of the minion running the calls, when generating the external pillar the `__grains__` is the grains data from the minion that the pillar is being generated for.

While `__grains__` is defined for every module, it’s only filled in for some.

```
__pillar__
```

Filled in for: Execution, Renderer, Returner, SSH Wrapper, State

The `__pillar__` dictionary contains the pillar for the respective minion.

While `__pillar__` is defined for every module, it’s only filled in for some.

```
__ext_pillar__
```

Filled in for: Pillar

The `__ext_pillar__` dictionary contains the external pillar modules.
During a state run the __context__ dictionary persists across all states that are run and then is destroyed when the state ends.

When running an execution module __context__ persists across all module executions until the modules are refreshed; such as when `saltutil.sync_all` or `state.apply` are executed.

A great place to see how to use __context__ is in the cp.py module in salt/modules/cp.py. The fileclient authenticates with the master when it is instantiated and then is used to copy files to the minion. Rather than create a new fileclient for each file that is to be copied down, one instance of the fileclient is instantiated in the __context__ dictionary and is reused for each file. Here is an example from salt/modules/cp.py:

```python
if not "cp.fileclient" in __context__:  
  __context__["cp.fileclient"] = salt.fileclient.get_file_client(__opts__)
```

Note: Because __context__ may or may not have been destroyed, always be sure to check for the existence of the key in __context__ and generate the key before using it.

Defined in: Cloud, Engine, Execution, File Server, Grain, Pillar, Proxy, Roster, Runner, SDB, State

Defined in: Beacon, Engine, Execution, Executor, Proxy, Renderer, Returner, State, Util

Defined in: Engine, Roster, Thorium

Note: When used in engines, it should be called __runners__ (plural)

Defined in: Executor

Defined in: Proxy
31.21.2 Configuration Options

A number of configuration options can affect the load process. This is a quick list of them:

- `autoload_dynamic_modules` (*Minion*)
- `cython_enable` (*Minion, Master*)
- `disable_modules` (*Minion*)
- `disable_returners` (*Minion*)
- `enable_zip_modules` (*Minion*)
- `extension_modules` (*Master*)
- `extmod_whitelist` (*Minion, Master*)
- `extmod_blacklist` (*Minion, Master*)
- `whitelist_modules` (*Minion*)
- `grains_dirs` (*Minion*)
- `module_dirs` (*Minion, Master*)
- `outputter_dirs` (*Minion, Master*)
- `providers` (*Minion*)
- `render_dirs` (*Minion*)
- `returer_dirs` (*Minion*)
- `runner_dirs` (*Master*)
- `states_dirs` (*Minion*)
- `utils_dirs` (*Minion*)
31.21.3 Loading Modules

Modules come primarily from several sources:

- The Salt package itself
- The Salt File Server
- The extmods directory
- Secondary packages installed

Using one source to override another is not supported.

The Salt Package

Salt itself ships with a large number of modules. These are part of the Salt package itself and don’t require the user to do anything to use them. (Although a number of them have additional dependencies and/or configuration.)

The Salt File Server

The user may add modules by simply placing them in special directories in their fileserver. The name of the directory inside of the file server is the directory name prepended by underscore, such as:

- _grains
- _modules
- _states

Modules must be synced before they can be used. This can happen a few ways, discussed below.

Note: Using saltenvs besides base may not work in all contexts.

Sync Via States

The minion configuration contains an option autoload_dynamic_modules which defaults to True. This option makes the state system refresh all dynamic modules when states are run. To disable this behavior set autoload_dynamic_modules to False in the minion config.

When dynamic modules are autoloaded via states, only the modules defined in the same saltenvs as the states currently being run.

Sync Via the saltutil Module

The saltutil module has a number of functions that can be used to sync all or specific dynamic modules. The saltutil.sync_* execution functions and runner functions can be used to sync modules to minions and the master, respectively.
The extmods Directory

Any files places in the directory set by extension_modules settings (minion, master, default /var/cache/salt/*/extmods) can also be loaded as modules. Note that these directories are also used by the saltutil.sync_* functions (mentioned above) and files may be overwritten.

Secondary Packages

Third-party packages may also add modules to Salt if they are installed in the same system and Python environment as the Salt Minion or Master.

This is done via setuptools entry points:

```python
setup(
    # ...
    entry_points={"salt.loader": ["module_dirs=spirofs.loader:module"],
    # ...
)
```

Note that these are not synced from the Salt Master to the Minions. They must be installed independently on each Minion.

31.21.4 Module Types

The specific names used by each loading method above are as follows. See sections below for a short summary of each of these systems.

<table>
<thead>
<tr>

</tr>
</tbody>
</table>

**Note:** While it is possible to import modules directly with the import statement, it is strongly recommended that the appropriate dunder dictionary is used to access them instead. This is because a number of factors affect module names, module selection, and module overloading.

### Auth

The auth module system allows for external authentication routines to be easily added into Salt. The auth function needs to be implemented to satisfy the requirements of an auth module. Use the pam module as an example. See External Authentication System for more about authentication in Salt.

### Beacon

- **Writing Beacons**

Beacons are polled by the Salt event loop to monitor non-salt processes. See Beacons for more information about the beacon system.

### Cache

The minion cache is used by the master to store various information about minions. See Minion Data Cache for more information.

---

\(^1\) These modules cannot be loaded from the Salt File Server.
Cloud

Cloud modules are backend implementations used by Salt Cloud.

Engine

Engines are open-ended services managed by the Salt daemon (both master and minion). They may interact with event loop, call other modules, or a variety of non-salt tasks. See Salt Engines for complete details.

Execution

Execution modules make up the core of the functionality used by Salt to interact with client systems. The execution modules create the core system management library used by all Salt systems, including states, which interact with minion systems.

Execution modules are completely open ended in their execution. They can be used to do anything required on a minion, from installing packages to detecting information about the system. The only restraint in execution modules is that the defined functions always return a JSON serializable object.

Executor

Executors control how execution modules get called. The default is to just call them, but this can be customized.

File Server

The file server module system is used to create file server backends used by the Salt Master. These modules need to implement the functions used in the fileserver subsystem. Use the gitfs module as an example.

See File Server Backends for more information.

Grains

- Writing Grains

Grain modules define extra routines to populate grains data. All defined public functions will be executed and MUST return a Python dict object. The dict keys will be added to the grains made available to the minion.

See Grains for more.

Log Handler

Log handlers allows the logs from salt (master or minion) to be sent to log aggregation systems.
Matcher

Matcher modules are used to define the *minion targeting expressions*. For now, it is only possible to override the existing matchers (the required CLI plumbing for custom matchers is not implemented yet).

Metaproxy

Metaproxy is an abstraction layer above the existing proxy minion. It enables adding different types of proxy minions that can still load existing proxymodules.

Net API

Net API modules are the actual server implementation used by Salt API.

Output

The output modules supply the outputter system with routines to display data in the terminal. These modules are very simple and only require the *output* function to execute. The default system outputter is the *nested* module.

Pillar

External Pillars

Salt provides a mechanism for generating pillar data by calling external pillar interfaces. This document will describe an outline of an ext_pillar module.

Location

Salt expects to find your ext_pillar module in the same location where it looks for other python modules. If the extension_modules option in your Salt master configuration is set, Salt will look for a pillar directory under there and load all the modules it finds. Otherwise, it will look in your Python site-packages salt/pillar directory.

Configuration

The external pillars that are called when a minion refreshes its pillars is controlled by the ext_pillar option in the Salt master configuration. You can pass a single argument, a list of arguments or a dictionary of arguments to your pillar:

```yaml
ext_pillar:
  - example_a: some argument
  - example_b:
    - argumentA
    - argumentB
  - example_c:
    - keyA: valueA
    - keyB: valueB
```
The Module

Imports and Logging

Import modules your external pillar module needs. You should first include generic modules that come with stock Python:

```python
import logging
```

And then start logging. This is an idiomatic way of setting up logging in Salt:

```python
log = logging.getLogger(__name__)
```

Finally, load modules that are specific to what you are doing. You should catch import errors and set a flag that the __virtual__ function can use later.

```python
try:
    import weird_thing
    EXAMPLE_A_LOADED = True
except ImportError:
    EXAMPLE_A_LOADED = False
```

Options

If you define an __opts__ dictionary, it will be merged into the __opts__ dictionary handed to the ext_pillar function later. This is a good place to put default configuration items. The convention is to name things modulename.option.

```python
__opts__ = {"example_a.someconfig": 137}
```

Initialization

If you define an __init__ function, it will be called with the following signature:

```python
def __init__(__opts__):
    # Do init work here
    ...
```

Note: The __init__ function is ran every time a particular minion causes the external pillar to be called, so don't put heavy initialization code here. The __init__ functionality is a side-effect of the Salt loader, so it may not be as useful in pillars as it is in other Salt items.
__virtual__

If you define a __virtual__ function, you can control whether or not this module is visible. If it returns False then Salt ignores this module. If it returns a string, then that string will be how Salt identifies this external pillar in its ext_pillar configuration. If you're not renaming the module, simply return True in the __virtual__ function, which is the same as if this function did not exist, then, the name Salt's ext_pillar will use to identify this module is its conventional name in Python.

This is useful to write modules that can be installed on all Salt masters, but will only be visible if a particular piece of software your module requires is installed.

```python
# This external pillar will be known as `example_a`
def __virtual__():
    if EXAMPLE_A_LOADED:
        return True
    return False
```

```python
# This external pillar will be known as `something_else`
__virtualname__ = "something_else"

def __virtual__():
    if EXAMPLE_A_LOADED:
        return __virtualname__
    return False
```

ext_pillar

This is where the real work of an external pillar is done. If this module is active and has a function called ext_pillar, whenever a minion updates its pillar this function is called.

How it is called depends on how it is configured in the Salt master configuration. The first argument is always the current pillar dictionary, this contains pillar items that have already been added, starting with the data from pillar_roots, and then from any already-ran external pillars.

Using our example above:

```python
ext_pillar(id, pillar, "some argument") # example_a
ext_pillar(id, pillar, "argumentA", "argumentB") # example_b
ext_pillar(id, pillar, keyA="valueA", keyB="valueB") # example_c
```

In the example_a case, pillar will contain the items from the pillar_roots, in example_b pillar will contain that plus the items added by example_a, and in example_c pillar will contain that plus the items added by example_b. In all three cases, id will contain the ID of the minion making the pillar request.

This function should return a dictionary, the contents of which are merged in with all of the other pillars and returned to the minion. Note: this function is called once for each minion that fetches its pillar data.
return my_pillar

You can call pillar with the dictionary's top name to retrieve its data. From above example, 'external_pillar' is the top dictionary name. Therefore:

```
salt '*' pillar.get external_pillar
```

You shouldn't just add items to `pillar` and return that, since that will cause Salt to merge data that already exists. Rather, just return the items you are adding or changing. You could, however, use `pillar` in your module to make some decision based on pillar data that already exists.

This function has access to some useful globals:

- __opts__
  A dictionary of mostly Salt configuration options. If you had an __opts__ dictionary defined in your module, those values will be included.

- __salt__
  A dictionary of Salt module functions, useful so you don't have to duplicate functions that already exist. E.g. __salt__['cmd.run']( 'ls -l' )

- __grains__
  A dictionary of the grains of the minion making this pillar call.

Example configuration

As an example, if you wanted to add external pillar via the `cmd_json` external pillar, add something like this to your master config:

```
ext_pillar:
  - cmd_json: 'echo {"arg":"value"}'
```

Reminder

Just as with traditional pillars, external pillars must be refreshed in order for minions to see any fresh data:

```
salt '*' saltutil.refresh_pillar
```

Used to define optional external pillar systems. The pillar generated via the filesystem pillar is passed into external pillars. This is commonly used as a bridge to database data for pillar, but is also the backend to the libvirt state used to generate and sign libvirt certificates on the fly.
Proxy

Proxy Minions are a way to manage devices that cannot run a full minion directly.

Renderers

Renderers are the system used to render sls files into salt highdata for the state compiler. They can be as simple as the py renderer and as complex as stateconf and pydsl.

Returners

Returners are used to send data from minions to external sources, commonly databases. A full returner will implement all routines to be supported as an external job cache. Use the redis returner as an example.

Roster

The Roster system is used by Salt SSH to enumerate devices.

Runners

Runners are purely master-side execution sequences.

SDB

- Writing SDB Modules

SDB is a way to store data that’s not associated with a minion. See Storing Data in Other Databases.

Serializer

Primarily used with file.serialize.

State

State modules are used to define the state interfaces used by Salt States. These modules are restrictive in that they must follow a number of rules to function properly.

Note: State modules define the available routines in sls files. If calling an execution module directly is desired, take a look at the module state.
SPM pkgdb

- *SPM Development Guide: Package Database*

pkgdb modules provide storage backends to the package database.

SPM pkgfiles

- *SPM Development Guide: Package Database*

pkgfiles modules handle the actual installation.

SSH Wrapper

SSH Wrapper

Salt-SSH Background

Salt-SSH works by creating a tar ball of salt, a bunch of python modules, and a generated short minion config. It then copies this onto the destination host over ssh, then uses that host’s local python install to run `salt-client --local` with any requested modules. It does not automatically copy over states or cache files and since it is uses a local file_client, modules that rely on `cp.cache*` functionality do not work.

SSH Wrapper modules

To support cp modules or other functionality which might not otherwise work in the remote environment, a wrapper module can be created. These modules are run from the salt-master initiating the salt-ssh command and can include logic to support the needed functionality. SSH Wrapper modules are located in `/salt/client/ssh/wrapper/` and are named the same as the execution module being extended. Any functions defined inside of the wrapper module are called from the salt-ssh module.function argument command rather than executing on the minion.

State Module example

Running salt states on an salt-ssh minion, obviously requires the state files themselves. To support this, a state module wrapper script exists at `salt/client/ssh/wrapper/state.py`, and includes standard state functions like `apply`, `sls`, and `highstate`. When executing `salt-ssh minion state.highstate`, these wrapper functions are used and include the logic to walk the low_state output for that minion to determine files used, gather needed files, tar them together, transfer the tar file to the minion over ssh, and run a state on the ssh minion. This state then extracts the tar file, applies the needed states and data, and cleans up the transferred files.

Wrapper Handling

From the wrapper script any invocations of `__salt__["some.module"]()` do not run on the master which is running the wrapper, but instead magically are invoked on the minion over ssh. Should the function being called exist in the wrapper, the wrapper function will be used instead.

One way of supporting this workflow may be to create a wrapper function which performs the needed file copy operations. Now that files are resident on the ssh minion, the next step is to run the original execution module function. But since that function name was already overridden by the wrapper, a function alias can be created in the original execution module, which can then be called from the wrapper.
Example

The saltcheck module needs sls and tst files on the minion to function. The invocation of `saltcheck.run_state_tests` is run from the wrapper module, and is responsible for performing the needed file copy. The `saltcheck` execution module includes an alias line of `run_state_tests_ssh = salt.utils.functools.alias_function(run_state_tests, 'run_state_tests_ssh')` which creates an alias of `run_state_tests` with the name `run_state_tests_ssh`. At the end of the `run_state_tests` function in the wrapper module, it then calls `__salt__['saltcheck.run_state_tests_ssh']()`. Since this function does not exist in the wrapper script, the call is made on the remote minion, which then having the needed files, runs as expected.

Replacement execution modules for *Salt SSH.*

**Thorium**

Modules for use in the *Thorium* event reactor.

**Tokens**

Token stores for *External Authentication.* See the `salt.tokens` docstring for details.

**Note:** The runner to load tokens modules is `saltutil.sync_eauth_tokens`.

**Tops**

Tops modules are used to convert external data sources into top file data for the state system.

**Util**

Just utility modules to use with other modules via `__utils__` (see Dunder Dictionaries).

**Wheel**

The wheel system is used to manage master side management routines. These routines are primarily intended for the API to enable master configuration.

**31.22 Salt Extend**

`salt-extend` is a templating tool for extending SaltStack. If you’re looking to add a module to SaltStack, then the `salt-extend` utility can guide you through the process.

You can use Salt Extend to quickly create templated modules for adding new behaviours to some of the module subsystems within Salt.

Salt Extend takes a template directory and merges it into a SaltStack source code directory.
31.22.1 Command line usage

See `salt-extend`

31.22.2 Choosing a template

The following templates are available:

**module**

Creates a new execution module within `salt/modules/{{module_name}}.py`

**module_unit**

Creates a new execution module unit test suite within `tests/unit/modules/test_{{module_name}}.py`

**state**

Creates a new state module within `salt/states/{{module_name}}.py`

**state_unit**

Creates a new state module unit test suite within `tests/unit/states/test_{{module_name}}.py`

31.22.3 Adding templates

1. Create a directory under `<src>/templates`
2. Create a file `template.yml` containing properties for
   - `description` - a description of the template
   - `questions` - a collection of additional questions to ask the user, the name of the item will be used as the key in the context dictionary within the jinja template.
     - `question` - The question to ask the user, as a string
     - `default` - (optional) the default value, can contain Jinja2 template syntax and has access to the default context properties

Example `template.yml`

```yaml
description: "Execution module"
questions:
  depending_libraries:
    question: "What libraries does this module depend upon?"
  virtual_name:
    question: "What module virtual name to use?"
    default: "{{module_name}}"
```

3. Create the files within `<src>/templates/<your template>` to match the target
Salt Documentation, Release 3006.4

Note: File names can contain Jinja 2 template syntax, e.g. '{{module_name}}.py}}'

Example file in the template directory

```python
print("Hello {{module_name}}")
__virtual__ = "{{__virtual_name__}}"
```

Default context properties

The default context provides the following properties

- **description** - A description of the template
- **short_description** - A short description of the module as entered by the user
- **version** - The version name of the next release
- **module_name** - The module name as entered by the user
- **release_date** - The current date in the format YYYY-MM-DD
- **year** - The current year in the format YYYY

As well as any additional properties entered from the questions section of template.yml

### 31.22.4 API

**salt.utils.extend module**

**SaltStack Extend**

A templating tool for extending SaltStack.

Takes a template directory and merges it into a SaltStack source code directory. This tool uses Jinja2 for templating.

This tool is accessed using `salt-extend`

```python
codeauthor
Anthony Shaw <anthonyshaw@apache.org>
```

salt.utils.extend.apply_template(template_dir, output_dir, context)

Apply the template from the template directory to the output using the supplied context dict.

**Parameters**

- **src** (str) -- The source path
- **dst** (str) -- The destination path
- **context** (dict) -- The dictionary to inject into the Jinja template as context

salt.utils.extend.run(extension=None, name=None, description=None, salt_dir=None, merge=False, temp_dir=None)

A template factory for extending the salt ecosystem

**Parameters**

- **extension** (str) -- The extension type, e.g. 'module', 'state', if omitted, user will be prompted
- **name** (str) -- Python-friendly name for the module, if omitted, user will be prompted
• **description** (str) -- A description of the extension, if omitted, user will be prompted
• **salt_dir** (str) -- The targeted Salt source directory
• **merge** (bool) -- Merge with salt directory, *False* to keep separate, *True* to merge trees.
• **temp_dir** (str) -- The directory for generated code, if omitted, system temp will be used

### 31.23 Salt’s Test Suite

Salt comes with a powerful integration and unit test suite allowing for the fully automated run of integration and/or unit tests from a single interface. It uses the combination of pytest, nox and *Kitchen Salt* to run these tests. Nox is used to manage all of the test python dependencies. When you run the test runner with nox, you will be installing the same python dependencies that we use to run our test suite on PRs and branch tests. *Kitchen Salt* is used to spin up our virtual machines based off of golden images. These virtual machines use the *salt-jenkins* sls states to configure any system dependencies.

To learn the basics of how Salt’s test suite works, be sure to check out the *Salt’s Test Suite: An Introduction* tutorial.

#### 31.23.1 Nox

Nox is used to manage all of the python dependencies used in the test suite and spins up the different nox sessions. You can look at the `noxfile.py` in the salt repo to view all of the current nox configurations. In that file you will notice various nox sessions. When creating each of these sessions, nox will create a virtualenv with the specified interpreter. Once the virtualenv is created it will also install all of the required python dependencies required for that session and run the tests.

For example if you want to run all of the tests using the zeromq transport on python3 you would need to specify the zeromq transport and python3.

```bash
nox -e 'test-zeromq-3(coverage=False)'
```

And because zeromq is the default transport, the following nox session can also be used:

```bash
nox -e 'test-zeromq-3(coverage=False)'
```

To run all the tests but on the tcp transport, you would need to specify the tcp session.

```bash
nox -e 'test-tcp-3(coverage=False)'
```

As a contrast, when using the deprecated `runtests.py` test runner, the command would be:

```bash
nox -e 'runtests-tcp-3(coverage=False)'
```

You can view all available sessions by running:

```bash
nox --list-sessions
```

For the most part you will only need nox to run the test suite, as this tool will install the exact same python dependencies we use to run on our test runs. The exception to this is when a system dependency is required, for example *mysql*. These system dependencies are installed with sls states managed in the *salt-jenkins* repo or you can manually install the dependency yourself.
31.23.2 System Dependencies

The system dependencies are installed from the salt-jenkins repo. The golden-images-provision state is what is run to determine what dependencies to install on which platform. We run this state only when we want to update our current VM images with new dependencies.

31.23.3 Kitchen Salt

We also use Kitchen Salt to spin up the VM's used for testing. You can view the kitchen-salt getting started for instructions on how to install and set it up. Kitchen Salt uses Test Kitchen to spin up the VM or container in the configured provider. Once the VM is spun up, Kitchen Salt can install salt and run a particular set of states. In the case of our branch and PR tests we create "Golden Images" which run the salt-jenkins states and install salt system dependencies beforehand. We only update these "Golden Images" when we need to upgrade or install a system dependency. You can view the kitchen-salt jenkins setup docs for instructions on how to set up Kitchen Salt similar to the jenkins environment we use to run branch and PR tests.

31.23.4 Test Directory Structure

Salt's test suite is located in the tests/ directory in the root of Salt's codebase. With the migration to PyTest, Salt has created a separate directory for tests that are written taking advantage of the full potential of PyTest. These are located under tests/pytests.

As for the old test suite, it is divided into two main groups:

- Integration Tests
- Unit Tests

Within each of these groups, the directory structure roughly mirrors the structure of Salt's own codebase. Notice that there are directories for states, modules, runners, output, and more in each testing group.

The files that are housed in the modules directory of either the unit or the integration testing factions contain respective integration or unit test files for Salt execution modules.

The PyTest only tests under tests/pytests should, more or less, follow the same grouping as the old test suite.

Integration Tests

The Integration section of Salt's test suite start up a number of Salt daemons to test functionality in a live environment. These daemons include two Salt Masters, one Syndic, and two Minions. This allows the Syndic interface to be tested and Master/Minion communication to be verified. All of the integration tests are executed as live Salt commands sent through the started daemons.

Integration tests are particularly good at testing modules, states, and shell commands, among other segments of Salt's ecosystem. By utilizing the integration test daemons, integration tests are easy to write. They are also SaltStack's generally preferred method of adding new tests.

The discussion in the Integration vs. Unit section of the testing tutorial is beneficial in learning why you might want to write integration tests vs. unit tests. Both testing arenas add value to Salt's test suite and you should consider adding both types of tests if possible and appropriate when contributing to Salt.
**Unit Tests**

Unit tests do not spin up any Salt daemons, but instead find their value in testing singular implementations of individual functions. Instead of testing against specific interactions, unit tests should be used to test a function’s logic as well as any return or raises statements. Unit tests also rely heavily on mocking external resources.

The discussion in the *Integration vs. Unit* section of the testing tutorial is useful in determining when you should consider writing unit tests instead of, or in addition to, integration tests when contributing to Salt.

- **Unit Test Documentation**

### 31.23.5 Running The Tests

There is only one requirement to install, to quickly get started running salt’s test suite: `nox`.

```bash
pip install nox
```

Once this requirement is installed, you can use the `nox` binary to run all of the tests included in Salt’s test suite:

```bash
nox -e 'test-3(coverage=False)'
```

For more information about options you can pass the test runner, see the `--help` option:

```bash
nox -e 'test-3(coverage=False)' -- --help
```

**Running Test Subsections**

Instead of running the entire test suite all at once, which can take a long time, there are several ways to run only specific groups of tests or individual tests:

- **Run unit tests only**: `nox -e 'test-3(coverage=False)' -- tests/unit/`
- **Run unit and integration tests for states**: `nox -e 'test-3(coverage=False)' -- tests/unit/states/ tests/integration/states/`
- **Run integration tests for an individual module**: `nox -e 'test-3(coverage=False)' -- tests/pytests/integration/modules/test_virt.py`
- **Run unit tests for an individual module**: `nox -e 'test-3(coverage=False)' -- tests/unit/modules/test_virt.py`
- **Run an individual test by using the class and test name** (this example is for the `test_default_kvm_profile` test in the `tests/pytests/integration/module/test_virt.py`): `nox -e 'test-3(coverage=False)' -- tests/pytests/integration/modules/test_virt.py::VirtTest::test_default_kvm_profile`

For more specific examples of how to run various test subsections or individual tests, please see the `pytest` documentation on how to run specific tests or the *Running Specific Tests* section of the *Salt’s Test Suite: An Introduction* tutorial.
Running Unit Tests Without Integration Test Daemons

Since the unit tests do not require a master or minion to execute, it is often useful to be able to run unit tests individually, or as a whole group, without having to start up the integration testing daemons. Starting up the master, minion, and syndic daemons takes a lot of time before the tests can even start running and is unnecessary to run unit tests. To run unit tests without invoking the integration test daemons, simply add the unit directory as an argument:

```
nox -e 'test-3(coverage=False)' -- tests/unit/
```

All of the other options to run individual tests, entire classes of tests, or entire test modules still apply.

Running Destructive Integration Tests

Salt is used to change the settings and behavior of systems. In order to effectively test Salt's functionality, some integration tests are written to make actual changes to the underlying system. These tests are referred to as “destructive tests”. Some examples of destructive tests are changes may be testing the addition of a user or installing packages. By default, destructive tests are disabled and will be skipped.

Generally, destructive tests should clean up after themselves by attempting to restore the system to its original state. For instance, if a new user is created during a test, the user should be deleted after the related test(s) have completed. However, no guarantees are made that test clean-up will complete successfully. Therefore, running destructive tests should be done with caution.

Note: Running destructive tests will change the underlying system. Use caution when running destructive tests.

To run tests marked as destructive, set the `--run-destructive` flag:

```
nox -e 'test-3(coverage=False)' -- --run-destructive
```

Running Cloud Provider Tests

Salt's testing suite also includes integration tests to assess the successful creation and deletion of cloud instances using Salt-Cloud for providers supported by Salt-Cloud.

The cloud provider tests are off by default and run on sample configuration files provided in `tests/integration/files/conf/cloud.providers.d/`. In order to run the cloud provider tests, valid credentials, which differ per provider, must be supplied. Each credential item that must be supplied is indicated by an empty string value and should be edited by the user before running the tests. For example, DigitalOcean requires a client key and an api key to operate. Therefore, the default cloud provider configuration file for DigitalOcean looks like this:

```
digitalocean-config:
  driver: digitalocean
  client_key: ''
  api_key: ''
  location: New York 1
```

As indicated by the empty string values, the `client_key` and the `api_key` must be provided:

```
digitalocean-config:
  driver: digitalocean
  client_key: wFGEwgregeqw3435gDger
```

(continues on next page)
Once all of the valid credentials for the cloud provider have been supplied, the cloud provider tests can be run like:

```
nox -e 'test-cloud-3(coverage=False)'  
```

### 31.23.6 Automated Test Runs

SaltStack maintains a Jenkins server to allow for the execution of tests across supported platforms. The tests executed from Salt's Jenkins server create fresh virtual machines for each test run, then execute destructive tests on the new, clean virtual machine.

SaltStack's Jenkins server continuously runs the entire test suite, including destructive tests, on an array of various supported operating systems throughout the day. Each actively supported branch of Salt's repository runs the tests located in the respective branch's code. Each set of branch tests also includes a pylint run. These branch tests help ensure the viability of Salt code at any given point in time as pull requests are merged into branches throughout the day.

In addition to branch tests, SaltStack's Jenkins server also runs tests on pull requests. These pull request tests include a smaller set of virtual machines that run on the branch tests. The pull request tests, like the branch tests, include a pylint test as well.

When a pull request is submitted to Salt's repository on GitHub, the suite of pull request tests are started by Jenkins. These tests are used to gauge the pull request's viability to merge into Salt's codebase. If these initial tests pass, the pull request can then merged into the Salt branch by one of Salt's core developers, pending their discretion. If the initial tests fail, core developers may request changes to the pull request. If the failure is unrelated to the changes in question, core developers may merge the pull request despite the initial failure.

As soon as the pull request is merged, the changes will be added to the next branch test run on Jenkins.

For a full list of currently running test environments, go to [https://jenkins.saltproject.io](https://jenkins.saltproject.io).

**Using Salt-Cloud on Jenkins**

For testing Salt on Jenkins, SaltStack uses *Salt-Cloud* to spin up virtual machines. The script using Salt-Cloud to accomplish this is open source and can be found here: [tests/jenkins.py](https://github.com/saltstack/salt/blob/master/tests/jenkins.py)

### 31.23.7 Writing Tests

The salt testing infrastructure is divided into two classes of tests, integration tests and unit tests. These terms may be defined differently in other contexts, but for Salt they are defined this way:

- **Unit Test**: Tests which validate isolated code blocks and do not require external interfaces such as `salt-call` or any of the salt daemons.
- **Integration Test**: Tests which validate externally accessible features.

Salt testing uses `unittest2` from the python standard library and `MagicMock`.

- **Writing integration tests**
• Writing unit tests

Naming Conventions

Any function in either integration test files or unit test files that is doing the actual testing, such as functions containing assertions, must start with test_:

```python
def test_user_present(self):
...
```

When functions in test files are not prepended with test_, the function acts as a normal, helper function and is not run as a test by the test suite.

Submitting New Tests

Which branch of the Salt codebase should new tests be written against? The location of where new tests should be submitted depends largely on the reason you’re writing the tests.

Tests for New Features

If you are adding new functionality to Salt, please write the tests for this new feature in the same pull request as the new feature. New features should always be submitted to the master branch.

If you have already submitted the new feature, but did not write tests in the original pull request that has already been merged, please feel free to submit a new pull request containing tests. If the feature was recently added to Salt’s master branch, then the tests should be added there as well. However, if the feature was added to master some time ago and is already present in one or more release branches, please refer to the Tests for Entire Files or Functions section below for more details about where to submit tests for functions or files that do not already have tests.

Tests to Accompany a Bugfix

If you are writing tests for code that fixes a bug in Salt, tests will be required before merging the PR. A great option for most bugfixes is to adopt a TDD style approach:

• reproduce the issue
• write a test that exhibits the behavior
• write the bugfix

This helps ensure that known issues are not reintroduced into the codebase.

Tests for Entire Files or Functions

Sometimes entire files in Salt are completely untested. If you are writing tests for a file that doesn’t have any tests written for it, write your test against the earliest supported release branch that contains the file or function you’re testing.

Once your tests are submitted in a pull request and is merged into the branch in question, the tests you wrote will be merged-forward by SaltStack core engineers and the new tests will propagate to the newer release branches. That way the tests you wrote will apply to all current and relevant release branches, and not just the master branch, for example. This methodology will help protect against regressions on older files in Salt’s codebase.
There may be times when the tests you write against an older branch fail in the merge-forward process because functionality has changed in newer release branches. In these cases, a Salt core developer may reach out to you for advice on the tests in question if the path forward is unclear.

**Note:** If tests are written against a file in an older release branch and then merged forward, there may be new functionality in the file that is present in the new release branch that is untested. It would be wise to see if new functionality could use additional testing once the test file has propagated to newer release branches.

### Module/Global Level Variables

If you need access to module or global level variables, please use a pytest fixture. The use of module and global variables can introduce mutable global objects and increases processing time because all globals are evaluated when collecting tests. If there is a use case where you cannot use a fixture and you are using a type of string, integer, or tuple you can use global/module level variables. Any mutable types such as lists and dictionaries must use pytest fixtures. For an example, if all of your tests need access to a string variable:

```python
FOO = "bar"

def test_foo_bar():
    assert FOO == "bar"

def test_foo_not():
    assert not FOO == "foo"
```

We recommend using a pytest fixture:

```python
import pytest

@ pytest.fixture()
def foo():
    return "bar"

def test_foo_bar(foo):
    assert foo == "bar"

def test_foo_not(foo):
    assert not foo == "foo"
```

If you need a class to mock something, it can be defined at the global scope, but it should only be initialized on the fixture:

```python
class Foo:
    def __init__(self):
        self.bar = True

@ pytest.fixture
(continues on next page)"
Test Helpers

Several Salt-specific helpers are available. A full list is available by inspecting functions exported under tests/support/*.py.

Test Markers

@py.test.mark.expensive_test -- Designates a test which typically requires a relatively costly external resource, like a cloud virtual machine. This decorator is not normally used by developers outside of the Salt core team.

@py.test.mark.destructive_test -- Marks a test as potentially destructive. It will not be run unless the --run-destructive flag is expressly passed.

@py.test.mark.requires_network -- Requires a network connection for the test to operate successfully. If a network connection is not detected, the test will not run.

These are just a small preview of the supported marker. For a full listing, please run:

```
nox -e 'test-3(coverage=False)' -- --markers
```

31.24 Integration Tests

The Salt integration tests come with a number of classes and methods which allow for components to be easily tested. These classes are generally inherited from and provide specific methods for hooking into the running integration test environment created by the integration tests.

It is noteworthy that since integration tests validate against a running environment that they are generally the preferred means to write tests.

The integration system is all located under tests/integration in the Salt source tree. Each directory within tests/integration corresponds to a directory in Salt’s tree structure. For example, the integration tests for the test.py Salt module that is located in salt/modules should also be named test.py and reside in tests/integration/modules.

31.24.1 Preparing to Write Integration Tests

This guide assumes that your Salt development environment is already configured and that you have a basic understanding of contributing to the Salt codebase. If you're unfamiliar with either of these topics, please refer to the Installing Salt for Development and the Contributing pages, respectively.

This documentation also assumes that you have an understanding of how to run Salt’s test suite, including running the test subsections, and running a single integration test file, class, or individual test.
31.24.2 Best Practices

Integration tests should be written to the following specifications.

What to Test?

Since integration tests are used to validate against a running Salt environment, integration tests should be written with the Salt components, and their various interactions, in mind.

- Isolate testing functionality. Don't rely on the pass or failure of other, separate tests.
- Individual tests should test against a single behavior.
- Since it occasionally takes some effort to "set up" an individual test, it may be necessary to call several functions within a single test. However, be sure that once the work has been done to set up a test, make sure you are clear about the functionality that is being tested.

Naming Conventions

Test names and docstrings should indicate what functionality is being tested. Test functions are named `test_<fcn>_<test-name>` where `<fcn>` is the function being tested and `<test-name>` describes the behavior being tested.

In order for integration tests to get picked up during a run of the test suite, each individual test must be prepended with the `test_` naming syntax, as described above.

If a function does not start with `test_`, then the function acts as a "normal" function and is not considered a testing function. It will not be included in the test run or testing output.

The setUp and tearDown Functions

There are two special functions that can be utilized in the integration side of Salt's test suite: setUp and tearDown. While these functions are not required in all test files, there are many examples in Salt's integration test suite illustrating the broad usefulness of each function.

The setUp function is used to set up any repetitive or useful tasks that the tests in a test class need before running. For example, any of the `mac_*` integration tests should only run on macOS machines. The setUp function can be used to test for the presence of the Darwin kernel. If the Darwin kernel is not present, then the test should be skipped.

```python
def setUp(self):
    """
    Sets up test requirements
    """
    os_grain = self.run_function("grains.item", ["kernel"])  
    if os_grain["kernel"] not in "Darwin":
        self.skipTest("Test not applicable to '{kernel}' kernel".format(**os_grain))
```

The setUp function can be used for many things. The above code snippet is only one example. Another example might be to ensure that a particular setting is present before running tests that would require the setting.

The tearDown function is used to clean up after any tests. This function is useful for restoring any settings that might have been changed during the test run.
**Note:** The `setUp` and `tearDown` functions run before and after each test in the test class that the `setUp` and `tearDown` functions are defined.

Be sure to read the *Destructive vs Non-Destructive Tests* section when using any kind of destructive functions that might alter the system running the test suite in either the `setUp` or `tearDown` function definitions.

**Testing Order**

The test functions within a test class do not run in the order they were defined, but instead run in lexicographical order.

Note that if any `setUp` or `tearDown` functions are defined in the class, those functions will run before (for `setUp`) or after (for `tearDown`) each test case.

### 31.24.3 Integration Classes

The integration classes are located in `tests/integration/__init__.py` and can be extended therein. There are four classes available to extend:

- `ModuleCase`
- `ShellCase`
- `SSHCase`
- `SyndicCase`

**ModuleCase**

Used to define executions run via the master to minions and to call single modules and states. The available testing functions are:

**run_function**

Run a single salt function and condition the return down to match the behavior of the raw function call. This will run the command and only return the results from a single minion to verify.

**run_state**

Run the state.single command and return the state return structure.
minion_run

Run a single salt function on the 'minion' target and condition the return down to match the behavior of the raw function call.

ShellCase

Shell out to the scripts which ship with Salt. The testing functions are:

run_cp

Execute salt-cp. Pass in the argument string as it would be passed on the command line.

run_call

Execute salt-call, pass in the argument string as it would be passed on the command line.

run_cloud

Execute the salt-cloud command. Pass in the argument string as it would be passed on the command line.

run_key

Execute the salt-key command. Pass in the argument string as it would be passed on the command line.

run_run

Execute the salt-run command. Pass in the argument string as it would be passed on the command line.

run_run_plus

Execute the runner function the and return the return data and output in a dict

run_salt

Execute the salt command. Pass in the argument string as it would be passed on the command line.
run_script

Execute a salt script with the given argument string.

run_ssh

Execute the salt-ssh. Pass in the argument string as it would be passed on the command line.

SSHCASE

Used to execute remote commands via salt-ssh. The available methods are as follows:

run_function

Run a single salt function via salt-ssh and condition the return down to match the behavior of the raw function call. This will run the command and only return the results from a single minion to verify.

SyndicCase

Used to execute remote commands via a syndic and is only used to verify the capabilities of the Salt Syndic. The available methods are as follows:

run_function

Run a single salt function and condition the return down to match the behavior of the raw function call. This will run the command and only return the results from a single minion to verify.

31.24.4 Examples

The following sections define simple integration tests present in Salt’s integration test suite for each type of testing class.

Module Example via ModuleCase Class

Import the integration module, this module is already added to the python path by the test execution. Inherit from the integration.ModuleCase class.

Now the workhorse method run_function can be used to test a module:

```python
import os
from tests.support.case import ModuleCase

class TestModuleTest(ModuleCase):
    
    """
    Validate the test module
    """
```

(continues on next page)
The fist example illustrates the testing master issuing a `test.ping` call to a testing minion. The test asserts that the minion returned with a `True` value to the master from the `test.ping` call.

The second example similarly verifies that the minion executed the `test.echo` command with the `text` argument. The `assertEqual` call maintains that the minion ran the function and returned the data as expected to the master.

**Shell Example via ShellCase**

Validating the shell commands can be done via shell tests:

```python
import sys
import shutil
import tempfile

from tests.support.case import ShellCase

class KeyTest(ShellCase):
    
        Test salt-key script
    

        _call_binary_ = "salt-key"

    def test_list(self):
        
            test salt-key -L
        
        data = self.run_key("-L")
        expect = [
            "Unaccepted Keys:",
            "Accepted Keys:",
            "minion",
            "sub_minion",
            "Rejected:",
            "",
        ]
        self.assertEqual(data, expect)
```

This example verifies that the `salt-key` command executes and returns as expected by making use of the `run_key` method.
SSH Example via SSHCase

Testing salt-ssh functionality can be done using the SSHCase test class:

```python
from tests.support.case import SSHCase

class SSHGrainsTest(SSHCase):
    """
    Test salt-ssh grains functionality
    Depend on proper environment set by integration.SSHCase class
    """

    def test_grains_id(self):
        """
        Test salt-ssh grains id work for localhost.
        """
        cmd = self.run_function("grains.get", ["id"])
        self.assertEqual(cmd, "localhost")
```

Testing Event System via SaltMinionEventAssertsMixin

The fundamentally asynchronous nature of Salt makes testing the event system a challenge. The SaltMinionEventAssertsMixin provides a facility for testing that events were received on a minion event bus.

```python
import salt.utils.event
from tests.support.mixins import SaltEventAssertsMixin

class TestEvent(SaltEventAssertsMixin):
    """
    Example test of firing an event and receiving it
    """

    def test_event(self):
        e = salt.utils.event.get_event(
            "minion", sock_dir=self.minion_opts["sock_dir"], opts=self.minion_opts)

        e.fire_event({"a": "b"}, "/test_event")
        self.assertMinionEventReceived({"a": "b"})
```
Syndic Example via SyndicCase

Testing Salt’s Syndic can be done via the SyndicCase test class:

```python
from tests.support.case import SyndicCase

class TestSyndic(SyndicCase):
    
    """
    Validate the syndic interface by testing the test module
    """

    def test_ping(self):
        """
        test.ping
        """
        self.assertTrue(self.run_function("test.ping"))
```

This example verifies that a test.ping command is issued from the testing master, is passed through to the testing syndic, down to the minion, and back up again by using the run_function located with in the SyndicCase test class.

### 31.24.5 Integration Test Files

Since using Salt largely involves configuring states, editing files, and changing system data, the integration test suite contains a directory named files to aid in testing functions that require files. Various Salt integration tests use these example files to test against instead of altering system files and data.

Each directory within tests/integration/files contain files that accomplish different tasks, based on the needs of the integration tests using those files. For example, tests/integration/files/ssh is used to bootstrap the test runner for salt-ssh testing, while tests/integration/files/pillar contains files storing data needed to test various pillar functions.

The tests/integration/files directory also includes an integration state tree. The integration state tree can be found at tests/integration/files/file/base.

The following example demonstrates how integration files can be used with ModuleCase to test states:

```python
# Import python libs
from __future__ import absolute_import
import os
import shutil

# Import Salt Testing libs
from tests.support.case import ModuleCase
from tests.support.paths import FILES, TMP
from tests.support.mixins import SaltReturnAssertsMixin

# Import salt libs
import salt.utils.files

HFILE = os.path.join(TMP, "hosts")
```

(continues on next page)
class HostTest(ModuleCase, SaltReturnAssertsMixin):
    """
    Validate the host state
    """
    def setUp(self):
        shutil.copyfile(os.path.join(FILES, "hosts"), HFILE)
        super(HostTest, self).setUp()

    def tearDown(self):
        if os.path.exists(HFILE):
            os.remove(HFILE)
        super(HostTest, self).tearDown()

    def test_present(self):
        """
        host.present
        """
        name = "spam.bacon"
        ip = "10.10.10.10"
        ret = self.run_state("host.present", name=name, ip=ip)
        self.assertSaltTrueReturn(ret)
        with salt.utils.files.fopen(HFILE) as fp_:
            output = fp_.read()
        self.assertIn("{0}\t{1}".format(ip, name), output)

To access the integration files, a variable named FILES points to the tests/integration/files directory. This is where the referenced host.present sls file resides.

In addition to the static files in the integration state tree, the location TMP can also be used to store temporary files that the test system will clean up when the execution finishes.

### 31.24.6 Destructive vs Non-Destructive Tests

Since Salt is used to change the settings and behavior of systems, one testing approach is to run tests that make actual changes to the underlying system. This is where the concept of destructive integration tests comes into play. Tests can be written to alter the system they are running on. This capability is what fills in the gap needed to properly test aspects of system management like package installation.

Any test that changes the underlying system in any way, such as creating or deleting users, installing packages, or changing permissions should include the @destructive decorator to signal system changes and should be written with care. System changes executed within a destructive test should also be restored once the related tests have completed. For example, if a new user is created to test a module, the same user should be removed after the test is completed to maintain system integrity.

To write a destructive test, import, and use the destructiveTest decorator for the test method:

```python
from tests.support.case import ModuleCase
from tests.support.helpers import destructiveTest, skip_if_not_root

class DestructiveExampleModuleTest(ModuleCase):
    """
(continues on next page)```
Demonstrate a destructive test

```python
@destructiveTest
@skip_if_not_root
def test_user_not_present(self):
    
    """
    This is a DESTRUCTIVE TEST it creates a new user on the minion.
    And then destroys that user.
    """
    ret = self.run_state("user.present", name="salt_test")
    self.assertSaltTrueReturn(ret)
    ret = self.run_state("user.absent", name="salt_test")
    self.assertSaltTrueReturn(ret)
```

31.24.7 Cloud Provider Tests

Cloud provider integration tests are used to assess Salt-Cloud's ability to create and destroy cloud instances for various supported cloud providers. Cloud provider tests inherit from the ShellCase Integration Class.

Any new cloud provider test files should be added to the tests/integration/cloud/providers/ directory. Each cloud provider test file also requires a sample cloud profile and cloud provider configuration file in the integration test file directory located at tests/integration/files/conf/cloud.*.d/.

The following is an example of the default profile configuration file for Digital Ocean, located at: tests/integration/files/conf/cloud.profiles.d/digitalocean.conf:

```
digitalocean-test:
    provider: digitalocean-config
    image: Ubuntu 14.04 x64
    size: 512MB
```

Each cloud provider requires different configuration credentials. Therefore, sensitive information such as API keys or passwords should be omitted from the cloud provider configuration file and replaced with an empty string. The necessary credentials can be provided by the user by editing the provider configuration file before running the tests.

The following is an example of the default provider configuration file for Digital Ocean, located at: tests/integration/files/conf/cloud.providers.d/digitalocean.conf:

```
digitalocean-config:
    driver: digitalocean
    client_key: ''
    api_key: ''
    location: New York 1
```

In addition to providing the necessary cloud profile and provider files in the integration test suite file structure, appropriate checks for if the configuration files exist and contain valid information are also required in the test class's setUp function:

```python
from tests.support.case import ShellCase
from tests.support.paths import FILES
```
class LinodeTest(ShellCase):
    """
    Integration tests for the Linode cloud provider in Salt-Cloud
    """

    def setUp(self):
        """
        Sets up the test requirements
        """
        super(LinodeTest, self).setUp()

        # check if appropriate cloud provider and profile files are present
        profile_str = "linode-config:"
        provider = "linode"
        providers = self.run_cloud("--list-providers")
        if profile_str not in providers:
            self.skipTest("Configuration file for {0} was not found. Check {0}.conf
                      in tests/integration/files/conf/cloud.*.d/ to run these tests.".format(provider))

        # check if apikey and password are present
        path = os.path.join(FILES, "conf", "cloud.providers.d", provider + ".conf")
        config = cloud_providers_config(path)
        api = config["linode-config"]['linode']['apikey']
        password = config["linode-config"]['linode']['password']
        if api == "" or password == "":
            self.skipTest("An api key and password must be provided to run these tests.
                          tests/integration/files/conf/cloud.providers.d/{0}.conf".format(provider))

Repeatedly creating and destroying instances on cloud providers can be costly. Therefore, cloud provider tests are off by default and do not run automatically. To run the cloud provider tests, the `--cloud-provider-tests` flag must be provided:

```
./tests/runtests.py --cloud-provider-tests
```

Since cloud provider tests do not run automatically, all provider tests must be preceded with the `@expensiveTest` decorator. The expensive test decorator is necessary because it signals to the test suite that the `--cloud-provider-tests` flag is required to run the cloud provider tests.

To write a cloud provider test, import, and use the `expensiveTest` decorator for the test function:
from tests.support.helpers import expensiveTest

@expensiveTest
def test_instance(self):
    """
    Test creating an instance on Linode
    """
    name = "linode-testing"

    # create the instance
    instance = self.run_cloud("-p linode-test {0}".format(name))
    str = "{0}".format(name)

    # check if instance with salt installed returned as expected
    try:
        self.assertIn(str, instance)
    except AssertionError:
        self.run_cloud("-d {0} --assume-yes".format(name))
        raise

    # delete the instance
    delete = self.run_cloud("-d {0} --assume-yes".format(name))
    str = "True"
    try:
        self.assertIn(str, delete)
    except AssertionError:
        raise

31.24.8 Adding New Directories

If the corresponding Salt directory does not exist within tests/integration, the new directory must be created along with the appropriate test file to maintain Salt’s testing directory structure.

In order for Salt’s test suite to recognize tests within the newly created directory, options to run the new integration tests must be added to tests/runtests.py. Examples of the necessary options that must be added can be found here: tests/runtests.py. The functions that need to be edited are setup_additional_options, validate_options, and run_integration_tests.

31.25 Test Pipeline

Salt’s test suite is run on jenkins. We have added the @pytest.mark.slow_test pytest decorator to help designate tests that take a significant amount of time to run. These tests are only run on our branch tests, unless your PR is editing code that requires running a specific slow test. When you submit a PR it will by default, only run the tests that do not include the @pytest.mark.slow_test pytest decorator.
31.25.1 Process to Fix Test Failures on Branch Tests

If there is a failure on the branch tests on jenkins, this is the process to follow to ensure it is fixed.

- Review the issues in Salt repo with the label Test-Failure to ensure there isn’t an already open issue assigned to someone to fix.
- If there is not an issue open for the failing test, create a new issue in Salt’s repo
- Select “Test Failure” and the issue will create the correct template you need.
- Include the name of the test that is failing in the title
- Include the jenkins URL to the test in the body and any additional information needed.
- When you create the issue it will automatically add the label Test-Failure.
- If you are going to fix the test assign yourself to the issue.
- If you are not going to fix the test, there is nothing else to do. The core team will review these open issues and ensure they are assigned out to be fixed.

31.26 Writing Unit Tests

31.26.1 Introduction

Like many software projects, Salt has two broad-based testing approaches -- integration testing and unit testing. While integration testing focuses on the interaction between components in a sandboxed environment, unit testing focuses on the singular implementation of individual functions.

Unit tests should be used specifically to test a function’s logic. Unit tests rely on mocking external resources.

While unit tests are good for ensuring consistent results, they are most useful when they do not require more than a few mocks. Effort should be made to mock as many external resources as possible. This effort is encouraged, but not required. Sometimes the isolation provided by completely mocking the external dependencies is not worth the effort of mocking those dependencies.

In these cases, requiring an external library to be installed on the system before running the test file is a useful way to strike this balance. For example, the unit tests for the MySQL execution module require the presence of the MySQL python bindings on the system running the test file before proceeding to run the tests.

Overly detailed mocking can also result in decreased test readability and brittleness as the tests are more likely to fail when the code or its dependencies legitimately change. In these cases, it is better to add dependencies to the test runner dependency state.

31.26.2 Preparing to Write a Unit Test

This guide assumes that your Salt development environment is already configured and that you have a basic understanding of contributing to the Salt codebase. If you’re unfamiliar with either of these topics, please refer to the Installing Salt for Development and the Contributing pages, respectively.

This documentation also assumes that you have an understanding of how to run Salt’s test suite, including running the unit test subsection, running the unit tests without testing daemons to speed up development wait times, and running a unit test file, class, or individual test.
31.26.3 Best Practices

Unit tests should be written to the following specifications.

What to Test?

Since unit testing focuses on the singular implementation of individual functions, unit tests should be used specifically to test a function's logic. The following guidelines should be followed when writing unit tests for Salt's test suite:

- Each `raise` and `return` statement needs to be independently tested.
- Isolate testing functionality. Don't rely on the pass or failure of other, separate tests.
- Test functions should contain only one assertion, at most, multiple assertions can be made, but against the same outcome.
- Many Salt execution modules are merely wrappers for distribution-specific functionality. If there isn't any logic present in a simple execution module, consider writing an integration test instead of heavily mocking a call to an external dependency.

Mocking Test Data

A reasonable effort needs to be made to mock external resources used in the code being tested, such as APIs, function calls, external data either globally available or passed in through function arguments, file data, etc.

- Test functions should contain only one assertion and all necessary mock code and data for that assertion.
- External resources should be mocked in order to "block all of the exits". If a test function fails because something in an external library wasn't mocked properly (or at all), this test is not addressing all of the "exits" a function may experience. We want the Salt code and logic to be tested, specifically.
- Consider the fragility and longevity of a test. If the test is so tightly coupled to the code being tested, this makes a test unnecessarily fragile.
- Make sure you are not mocking the function to be tested so vigorously that the test return merely tests the mocked output. The test should always be testing a function's logic.

Mocking Loader Modules

Salt loader modules use a series of globally available dunder variables, `__salt__`, `__opts__`, `__pillar__`, etc. To facilitate testing these modules `pytest-salt-factories` has a plugin which will prepare the module globals by patching and mocking the dunders prior to running each test, as long as the test module defines a fixture named `configure_loader_modules`. Check out the code for the `pytest-salt-factories` plugin to know how it's internals work.

The reason for the existence of this plugin is because historically one would add these dunder variables directly on the imported module. This, however, introduces unexpected behavior when running the full test suite since those attributes would not be removed once we were done testing the module and would therefore leak to other modules being tested with unpredictable results. This is the kind of work that should be deferred to mock, and that's exactly what this plugin provides.

As an example, if one needs to specify some options which should be available to the module being tested one should do:
import pytest
import salt.modules.somemodule as somemodule

@pytest.fixture
def configure_loader_modules():
    """
    This fixture should return a dictionary which is what's going to be used to
    patch and mock Salt's loader
    """
    return {somemodule: {"__opts__": {"test": True}}}

Consider this more extensive example from tests/pytests/unit/beacons/test_sensehat.py:

import pytest
import salt.beacons.sensehat as sensehat
from tests.support.mock import MagicMock

@pytest.fixture
def configure_loader_modules():
    return {sensehat: {
        "__salt__": {
            "sensehat.get_humidity": MagicMock(return_value=80),
            "sensehat.get_temperature": MagicMock(return_value=30),
            "sensehat.get_pressure": MagicMock(return_value=1500),
        }
    }}

def test_non_list_config():
    config = {}
    ret = sensehat.validate(config)
    assert ret == (False, "Configuration for sensehat beacon must be a list.")

def test_empty_config():
    config = [{},]
    ret = sensehat.validate(config)
    assert ret == (False, "Configuration for sensehat beacon requires sensors.
    ...")

def test_sensehat_humidity_match():
    config = [{"sensors": {"humidity": "70\%"}}]
What happens in the above example is we mock several calls of the `sensehat` module to return known expected values to assert against.
Mocking Filehandles

**Note:** This documentation applies to the 2018.3 release cycle and newer. The extended functionality for `mock_open` described below does not exist in the 2017.7 and older release branches.

Opening files in Salt is done using `salt.utils.files.fopen()`. When testing code that reads from files, the `mock_open` helper can be used to mock filehandles. Note that this *is not* the same `mock_open` as `unittest.mock.mock_open()` from the Python standard library, but rather a separate implementation which has additional functionality.

```python
from tests.support.mock import patch, mock_open
import salt.modules.mymod as mymod

def test_something():
    fopen_mock = mock_open(read_data="foo\nbar\nbaz\n")
    with patch("salt.utils.files.fopen", fopen_mock):
        result = mymod.myfunc()
    assert result is True
```

This will force any filehandle opened to mimic a filehandle which, when read, produces the specified contents.

**Important:** String Types

When configuring your read_data, make sure that you are using bytestrings (e.g. `b"foo\nbar\nbaz\n"`) when the code you are testing is opening a file for binary reading, otherwise the tests will fail. The mocked filehandles produced by `mock_open` will raise a `TypeError` if you attempt to read a bytestring when opening for non-binary reading, and similarly will not let you read a string when opening a file for binary reading. They will also not permit bytestrings to be "written" if the mocked filehandle was opened for non-binary writing, and vice-versa when opened for non-binary writing. These enhancements force test writers to write more accurate tests.

**More Complex Scenarios**

**Multiple File Paths**

What happens when the code being tested reads from more than one file? For those cases, you can pass `read_data` as a dictionary:

```python
import textwrap
from tests.support.mock import patch, mock_open
import salt.modules.mymod as mymod

def test_something():
    contents = {
        "/etc/foo.conf": textwrap.dedent(""

foo
bar
baz

"/etc/b*.conf": textwrap.dedent(
    "one
two
three"
),

"/etc/b*.conf": textwrap.dedent(
    "one
two
three"
),

fopen_mock = mock_open(read_data=contents)
with patch("salt.utils.files.fopen", fopen_mock):
    result = mymod.myfunc()
    assert result is True

This would make salt.utils.files.fopen() produce filehandles with different contents depending on which file was being opened by the code being tested.  /etc/foo.conf and any file matching the pattern /etc/b*.conf would work, while opening any other path would result in a `FileNotFoundError` being raised.

Since file patterns are supported, it is possible to use a pattern of `'*'` to define a fallback if no other patterns match the filename being opened.  The below two `mock_open` calls would produce identical results:

mock_open(read_data="foo\n")
mock_open(read_data={"*": "foo\n"})

Note:  Take care when specifying the `read_data` as a dictionary, in cases where the patterns overlap (e.g. when both /etc/b*.conf and /etc/bar.conf are in the `read_data`).  Dictionary iteration order will determine which pattern is attempted first, second, etc., with the exception of `'*'` which is used when no other pattern matches.  If your test case calls for specifying overlapping patterns, and you are not running Python 3.6 or newer, then an `OrderedDict` can be used to ensure matching is handled in the desired way:

```python
contents = OrderedDict()
contents["/etc/bar.conf"] = "foo\nbar\nbaz\n"
contents["/etc/b*.conf"] = IOError(errno.EACCES, "Permission denied")
contents["*"] = 'This is a fallback for files not beginning with "/etc/b"\n'
fopen_mock = mock_open(read_data=contents)
```

**Raising Exceptions**

Instead of a string, an exception can also be used as the `read_data`:

```python
import errno
from tests.support.mock import patch, mock_open
import salt.modules.mymod as mymod
```
def test_something():
    exc = IOError(errno.EACCES, "Permission denied")
    fopen_mock = mock_open(read_data=exc)
    with patch("salt.utils.files.fopen", fopen_mock):
        mymod.myfunc()

The above example would raise the specified exception when any file is opened. The expectation would be that
mymod.myfunc() would gracefully handle the IOError, so a failure to do that would result in it being raised and
causing the test to fail.

Multiple File Contents

For cases in which a file is being read more than once, and it is necessary to test a function's behavior based on what
the file looks like the second (or third, etc.) time it is read, just specify the contents for that file as a list. Each time the
file is opened, mock_open will cycle through the list and produce a mocked file handle with the specified contents.
For example:

import errno
import textwrap

from tests.support.mock import patch, mock_open

import salt.modules.mymod as mymod

def test_something():
    contents = {
        "/etc/foo.conf": [
            textwrap.dedent(""
            foo
            bar
            """"
        ],
        textwrap.dedent(""
        foo
        bar
        baz
        """"
        ),
        """"""""""
    ],
        "/etc/b*.conf": [
            IOError(errno.ENOENT, "No such file or directory"),
            textwrap.dedent(""
            one
            two
            three
            """

(continues on next page)
Using this example, the first time `/etc/foo.conf` is opened, it will simulate a file with the first string in the list as its contents, while the second time it is opened, the simulated file's contents will be the second string in the list.

If no more items remain in the list, then attempting to open the file will raise a `RuntimeError`. In the example above, if `/etc/foo.conf` were to be opened a third time, a `RuntimeError` would be raised.

Note that exceptions can also be mixed in with strings when using this technique. In the above example, if `/etc/bar.conf` were to be opened twice, the first time would simulate the file not existing, while the second time would simulate a file with string defined in the second element of the list.

Note: Notice that the second path in the `contents` dictionary above (`/etc/b*.conf`) contains an asterisk. The items in the list are cycled through for each match of a given pattern (not separately for each individual file path), so this means that only two files matching that pattern could be opened before the next one would raise a `RuntimeError`.

### Accessing the Mocked Filehandles in a Test

The above examples simply show how to mock `salt.utils.files.fopen()` to simulate files with the contents you desire, but you can also access the mocked filehandles (and more), and use them to craft assertions in your tests.

To do so, just add an `as` clause to the end of the `patch` statement:

```python
fopen_mock = mock_open(read_data="foo
bar
baz
")
with patch("salt.utils.files.fopen", fopen_mock) as m_open:
    # do testing here
    ...
    ...
```

When doing this, `m_open` will be a `MockOpen` instance. It will contain several useful attributes:

- **read_data** - A dictionary containing the `read_data` passed when `mock_open` was invoked. In the event that multiple file paths are not used, then this will be a dictionary mapping `*` to the `read_data` passed to `mock_open`.
- **call_count** - An integer representing how many times `salt.utils.files.fopen()` was called to open a file.
- **calls** - A list of `MockCall` objects. A `MockCall` object is a simple class which stores the arguments passed to it, making the positional arguments available via its `args` attribute, and the keyword arguments available via its `kwargs` attribute.
from tests.support.mock import patch, mock_open, MockCall
import salt.modules.mymod as mymod

def test_something():
    with patch("salt.utils.files.fopen", mock_open(read_data=b"foo\n")) as m_open:
        mymod.myfunc()
        # Assert that only two opens attempted
        assert m_open.call_count == 2
        # Assert that only /etc/foo.conf was opened
        assert all(call.args[0] == "/etc/foo.conf" for call in m_open.calls)
        # Assert that the first open was for binary read, and the
        # second was for binary write.
        assert m_open.calls == [
            MockCall("/etc/foo.conf", "rb"),
            MockCall("/etc/foo.conf", "wb"),
        ]

Note that MockCall is imported from tests.support.mock in the above example. Also, the second assert above is redundant since it is covered in the final assert, but both are included simply as an example.

- **filehandles** - A dictionary mapping the unique file paths opened, to lists of MockFH objects. Each open creates a unique MockFH object. Each MockFH object itself has a number of useful attributes:
  - **filename** - The path to the file which was opened using salt.utils.files.fopen()
  - **call** - A MockCall object representing the arguments passed to salt.utils.files.fopen(). Note that this MockCall is also available in the parent MockOpen instance’s calls list.
  - The following methods are mocked using unittest.mock.Mock objects, and Mock’s built-in asserts (as well as the call data) can be used as you would with any other Mock object:
    - .read()
    - .readlines()
    - .readline()
    - .close()
    - .write()
    - .writelines()
    - .seek()
  - The read functions (.read(), .readlines(), .readline()) all work as expected, as does iterating through the file line by line (i.e. for line in fh:).
  - The .tell() method is also implemented in such a way that it updates after each time the mocked filehandle is read, and will report the correct position. The one caveat here is that .seek() doesn’t actually work (it’s simply mocked), and will not change the position. Additionally, neither .write() or .writelines() will modify the mocked filehandle’s contents.
  - The attributes .write_calls and .writelines_calls (no parenthesis) are available as shorthands and correspond to lists containing the contents passed for all calls to .write() and .writelines(), respectively.
Examples

```python
with patch("salt.utils.files.fopen", mock_open(read_data=contents)) as m_open:
    # Run the code you are unit testing
    mymod.myfunc()
    # Check that only the expected file was opened, and that it was opened
    # only once.
    assert m_open.call_count == 1
    assert list(m_open.filehandles) == ["/etc/foo.conf"]
    # "opens" will be a list of all the mocked filehandles opened
    opens = m_open.filehandles["/etc/foo.conf"]
    # Check that we wrote the expected lines ("expected" here is assumed to
    # be a list of strings)
    assert opens[0].write_calls == expected
```

```python
with patch("salt.utils.files.fopen", mock_open(read_data=contents)) as m_open:
    # Run the code you are unit testing
    mymod.myfunc()
    # Check that .readlines() was called (remember, it's a Mock)
    m_open.filehandles["/etc/foo.conf"][0].readlines().assert_called()
```

```python
with patch("salt.utils.files.fopen", mock_open(read_data=contents)) as m_open:
    # Run the code you are unit testing
    mymod.myfunc()
    # Check that we read the file and also wrote to it
    m_open.filehandles["/etc/foo.conf"][0].read().assert_called_once()
    m_open.filehandles["/etc/foo.conf"][1].writelines().assert_called_once()
```

Naming Conventions

Test names and docstrings should indicate what functionality is being tested. Test functions are named `test_<fcn>_<test-name>` where `<fcn>` is the function being tested and `<test-name>` describes the `raise` or `return` being tested.

Unit tests for `salt/.../<module>.py` are contained in a file called `tests/pytests/unit/.../test_<module>.py`, e.g. the tests for `salt/modules/alternatives.py` are in `tests/pytests/unit/modules/test_alternatives.py`.

In order for unit tests to get picked up during a run of the unit test suite, each unit test file must be prefixed with `test_` and each individual test must also be prefixed with the `test_` naming syntax, as described above.

If a function does not start with `test_`, then the function acts as a "normal" function and is not considered a testing function. It will not be included in the test run or testing output. The same principle applies to unit test files that do not have the `test_*`.py naming syntax. This test file naming convention is how the test runner recognizes that a test file contains tests.
Imports

Most commonly, the following imports are necessary to create a unit test:

```python
import pytest
```

If you need mock support to your tests, please also import:

```python
from tests.support.mock import MagicMock, patch, call
```

### 31.26.4 Evaluating Truth

A longer discussion on the types of assertions one can make can be found by reading PyTest's documentation on assertions.

### 31.26.5 Tests Using Mock Objects

In many cases, the purpose of a Salt module is to interact with some external system, whether it be to control a database, manipulate files on a filesystem or something else. In these varied cases, it's necessary to design a unit test which can test the function whilst replacing functions which might actually call out to external systems. One might think of this as "blocking the exits" for code under tests and redirecting the calls to external systems with our own code which produces known results during the duration of the test.

To achieve this behavior, Salt makes heavy use of the `MagicMock` package.

To understand how one might integrate Mock into writing a unit test for Salt, let's imagine a scenario in which we're testing an execution module that's designed to operate on a database. Furthermore, let's imagine two separate methods, here presented in pseudo-code in an imaginary execution module called 'db.py'.

```python
def create_user(username):
    qry = "CREATE USER {0}".format(username)
    execute_query(qry)

def execute_query(qry):
    # Connect to a database and actually do the query...
    ...
```

Here, let's imagine that we want to create a unit test for the `create_user` function. In doing so, we want to avoid any calls out to an external system and so while we are running our unit tests, we want to replace the actual interaction with a database with a function that can capture the parameters sent to it and return pre-defined values. Therefore, our task is clear -- to write a unit test which tests the functionality of `create_user` while also replacing 'execute_query' with a mocked function.

To begin, we set up the skeleton of our test much like we did before, but with additional imports for `MagicMock`:

```python
from salt.modules import db
from tests.support.mock import MagicMock, patch, call

def test_create_user():
    """
    Test creating a user
    """
```
# First, we replace 'execute_query' with our own mock function
with patch.object(db, "execute_query", MagicMock()) as db_exq:

    # Now that the exits are blocked, we can run the function under test.
    db.create_user("testuser")

    # We could now query our mock object to see which calls were made
    # to it.
    ## print db_exq.mock_calls

    # Construct a call object that simulates the way we expected
    # execute_query to have been called.
    expected_call = call("CREATE USER testuser")

    # Compare the expected call with the list of actual calls. The
    # test will succeed or fail depending on the output of this
    # assertion.
    db_exq.assert_has_calls(expected_call)

31.26.6 Modifying __salt__ In Place

At times, it becomes necessary to make modifications to a module's view of functions in its own __salt__ dictionary. Luckily, this process is quite easy.

Below is an example that uses MagicMock's patch functionality to insert a function into __salt__ that's actually a MagicMock instance.

```python
import pytest
import salt.modules.my_module as my_module

@ pytest.fixture
def configure_loader_modules():
    """
    This fixture should return a dictionary which is what's going to be used to
    patch and mock Salt's loader
    """
    return {my_module: {}}

def show_patch(self):
    with patch.dict(my_module.__salt__, {"function.to_replace": MagicMock()}):
        # From this scope, carry on with testing, with a modified __salt__!
        ...
```
31.26.7 A Simple Example

Let’s assume that we’re testing a very basic function in an imaginary Salt execution module. Given a module called `fib.py` that has a function called `calculate(num_of_results)`, which given a `num_of_results`, produces a list of sequential Fibonacci numbers of that length.

A unit test to test this function might be commonly placed in a file called `tests/pytests/unit/modules/test_fib.py`. The convention is to place unit tests for Salt execution modules in `test/pytests/unit/modules/` and to name the tests module prefixed with `test_*`.py.

Tests are grouped around test cases, which are logically grouped sets of tests against a piece of functionality in the tested software. To return to our example, here’s how we might write the skeleton for testing `fib.py`:

```python
import salt.modules.fib as fib

def test_fib():
    """
    To create a unit test, we should prefix the name with 'test_' so
    that it's recognized by the test runner.
    """
    fib_five = (0, 1, 1, 2, 3)
    assert fib.calculate(5) == fib_five
```

At this point, the test can now be run, either individually or as a part of a full run of the test runner. To ease development, a single test can be executed:

```bash
nox -e 'test-3(coverage=False)' -- -v tests/pytests/unit/modules/test_fib.py
```

This will report the status of the test: success, failure, or error. The `-v` flag increases output verbosity.

To review the results of a particular run, take a note of the log location given in the output for each test run:

```bash
...etc... --log-file=artifacts/logs/runtests-20210106103414.685791.log ...etc.
```

31.26.8 A More Complete Example

Consider the following function from `salt/modules/linux_sysctl.py`.

```python
def get(name):
    """
    Return a single sysctl parameter for this minion
    
    CLI Example:
    .. code-block:: bash

        salt '*' sysctl.get net.ipv4.ip_forward
    """
    cmd = "sysctl -n {}".format(name)
    out = _salt_"["cmd.run"](cmd, python_shell=False)
    return out
```

---

4824 Chapter 31. Developing Salt
This function is very simple, comprising only four source lines of code and having only one return statement, so we
know only one test is needed. There are also two inputs to the function, the `name` function argument and the call
to `__salt__['cmd.run']()` , both of which need to be appropriately mocked.

Mocking a function parameter is straightforward, whereas mocking a function call will require, in this case, the
use of MagicMock. For added isolation, we will also redefine the `__salt__` dictionary such that it only contains
`'cmd.run'`.

```python
import pytest
import salt.modules.linux_sysctl as linux_sysctl
from tests.support.mock import MagicMock, patch

@pytest.fixture
def configure_loader_modules():
    return {linux_sysctl: {}}

def test_get():
    """
    Tests the return of get function
    """
    mock_cmd = MagicMock(return_value=1)
    with patch.dict(linux_sysctl.__salt__, {'cmd.run': mock_cmd}):
        assert linux_sysctl.get("net.ipv4.ip_forward") == 1
```

Since `get()` has only one raise or return statement and that statement is a success condition, the test func-
tion is simply named `test_get()`. As described, the single function call parameter, `name` is mocked with
`net.ipv4.ip_forward` and `__salt__['cmd.run']` is replaced by a MagicMock function object. We are
only interested in the return value of `__salt__['cmd.run']`, which MagicMock allows us by specifying via
`return_value=1`. Finally, the test itself tests for equality between the return value of `get()` and the ex-
pected return of 1. This assertion is expected to succeed because `get()` will determine its return value from
`__salt__['cmd.run']`, which we have mocked to return 1.

### 31.26.9 A Complex Example

Now consider the `assign()` function from the same salt/modules/linux_sysctl.py source file.

```python
def assign(name, value):
    ""
    Assign a single sysctl parameter for this minion
    
    CLI Example:
    .. code-block:: bash

        salt '*' sysctl.assign net.ipv4.ip_forward 1
    ""
    value = str(value)
    tran_tab = name.translate("".maketrans("/", ",/\")")
    sysctl_file = "/proc/sys/{}/".format(tran_tab)
```

(continues on next page)
if not os.path.exists(sysctl_file):
    raise CommandExecutionError("sysctl {} does not exist".format(name))

ret = {}
cmd = 'sysctl -w {}="{}"'.format(name, value)
data = __salt__['cmd.run_all'](cmd, python_shell=False)
out = data["stdout"]
err = data["stderr"]

# Example:
#   # sysctl -w net.ipv4.tcp_rmem="4096 87380 16777216"
# net.ipv4.tcp_rmem = 4096 87380 16777216
regex = re.compile(r'^{}\s+=\s+{}$'.format(re.escape(name), re.escape(value)))

if not regex.match(out) or "Invalid argument" in str(err):
    if data["retcode"] != 0 and err:
        error = err
    else:
        error = out
    raise CommandExecutionError("sysctl -w failed: {}").format(error))
new_name, new_value = out.split(" = ", 1)
ret[new_name] = new_value
return ret

This function contains two raise statements and one return statement, so we know that we will need (at least) three
tests. It has two function arguments and many references to non-built-in functions. In the tests below you will see
that MagicMock’s patch() method may be used as a context manager or as a decorator. When patching the salt
dunders however, please use the context manager approach.

There are three test functions, one for each raise and return statement in the source function. Each function is self-
contained and contains all and only the mocks and data needed to test the raise or return statement it is concerned
with.

---

import pytest
import salt.modules.linux_sysctl as linux_sysctl
from salt.exceptions import CommandExecutionError
from tests.support.mock import MagicMock, patch

@pytest.fixture
def configure_loader_modules():
    return {linux_sysctl: {}}

def test_assign_proc_sys_failed():
    """
    Tests if /proc/sys/<kernel-subsystem> exists or not
    """
    with patch("os.path.exists", MagicMock(return_value=False)):  #
        cmd = {
            "pid": 1337,
            "retcode": 0,
        }

(continues on next page)
"stderr": "", 
"stdout": "net.ipv4.ip_forward = 1",
}
mock_cmd = MagicMock(return_value=cmd)
with patch.dict(linux_sysctl.__salt__, {"cmd.run_all": mock_cmd}):
    with pytest.raises(CommandExecutionError):
        linux_sysctl.assign("net.ipv4.ip_forward", 1)

def test_assign_cmd_failed():
    
    Tests if the assignment was successful or not
    
    with patch("os.path.exists", MagicMock(return_value=True)):
        cmd = {
            "pid": 1337,
            "retcode": 0,
            "stderr": 'sysctl: setting key "net.ipv4.ip_forward": Invalid\
            --argument',
            "stdout": "net.ipv4.ip_forward = backward",
        }
    mock_cmd = MagicMock(return_value=cmd)
    with patch.dict(linux_sysctl.__salt__, {"cmd.run_all": mock_cmd}):
        linux_sysctl.assign("net.ipv4.ip_forward", "backward")

def test_assign_success():
    
    Tests the return of successful assign function
    
    with patch("os.path.exists", MagicMock(return_value=True)):
        cmd = {
            "pid": 1337,
            "retcode": 0,
            "stderr": "",
            "stdout": "net.ipv4.ip_forward = 1",
        }
    ret = {{"net.ipv4.ip_forward": "1"}}
    mock_cmd = MagicMock(return_value=cmd)
    with patch.dict(linux_sysctl.__salt__, {"cmd.run_all": mock_cmd}):
        assert linux_sysctl.assign("net.ipv4.ip_forward", 1) == ret
31.27 SaltStack Git Policy

The SaltStack team follows a git policy to maintain stability and consistency with the repository.

The git policy has been developed to encourage contributions and make contributing to Salt as easy as possible. Code contributors to SaltStack projects DO NOT NEED TO READ THIS DOCUMENT, because all contributions come into SaltStack via a single gateway to make it as easy as possible for contributors to give us code.

The primary rule of git management in SaltStack is to make life easy on contributors and developers to send in code. Simplicity is always a goal!

31.27.1 New Code Entry

All new SaltStack code should be submitted against master.

31.27.2 Release Branching

SaltStack maintains two types of releases, Feature Releases and Point Releases (also commonly referred to as Bugfix Releases). A feature release is managed by incrementing the first or second release point number, so 2015.5.5 -> 2015.8.0 signifies a feature release and 2015.8.0 -> 2015.8.1 signifies a point release.

Feature Release Branching

Each feature release is maintained in a dedicated git branch derived from the last applicable release commit on develop. All file changes relevant to the feature release will be completed in the master branch prior to the creation of the feature release branch. The feature release branch will be named after the relevant numbers to the feature release, which constitute the first two numbers. This means that the release branch for the 2015.8.0 series is named 2015.8.

A feature release branch is created with the following command:

```
# git checkout -b 2015.8 # From the master branch
# git push origin 2015.8
```

Point Releases

As documented in SEP 14, point releases should be rare.

31.28 Salt Conventions

31.28.1 Writing Salt documentation

For the latest information about writing Salt documentation, see:

- Salt docs contributing guide
- Salt rST guide
- Salt style guide
31.28.2 Salt Formulas

Formulas are pre-written Salt States. They are as open-ended as Salt States themselves and can be used for tasks such as installing a package, configuring, and starting a service, setting up users or permissions, and many other common tasks.

All official Salt Formulas are found as separate Git repositories in the "saltstack-formulas" organization on GitHub: https://github.com/saltstack-formulas

As a simple example, to install the popular Apache web server (using the normal defaults for the underlying distro) simply include the url apache-formula from a top file:

```yaml
base:
  'web*':
    - apache
```

Installation

Each Salt Formula is an individual Git repository designed as a drop-in addition to an existing Salt State tree. Formulas can be installed in the following ways.

Adding a Formula as a GitFS remote

One design goal of Salt's GitFS fileserver backend was to facilitate reusable States. GitFS is a quick and natural way to use Formulas.

1. Install any necessary dependencies and configure GitFS.
2. Add one or more Formula repository URLs as remotes in the gitfs_remotes list in the Salt Master configuration file:

   ```yaml
   gitfs_remotes:
     - https://github.com/saltstack-formulas/apache-formula
     - https://github.com/saltstack-formulas/memcached-formula
   ```

   We strongly recommend forking a formula repository into your own GitHub account to avoid unexpected changes to your infrastructure.

   Many Salt Formulas are highly active repositories so pull new changes with care. Plus any additions you make to your fork can be easily sent back upstream with a quick pull request!

3. Restart the Salt master.

Beginning with the 2018.3.0 release, using formulas with GitFS is now much more convenient for deployments which use many different fileserver environments (i.e. saltenvs). Using the all_saltenvs parameter, files from a single git branch/tag will appear in all environments. See here for more information on this feature.
Adding a Formula directory manually

Formulas are simply directories that can be copied onto the local file system by using Git to clone the repository or by downloading and expanding a tarball or zip file of the repository. The directory structure is designed to work with `file_roots` in the Salt master configuration.

1. Clone or download the repository into a directory:

```bash
mkdir -p /srv/formulas
cd /srv/formulas
git clone https://github.com/saltstack-formulas/apache-formula.git
```

# or

```bash
mkdir -p /srv/formulas
cd /srv/formulas
wget -O apache-formula-master.tar.gz https://github.com/saltstack-formulas/apache-formula/archive/master.tar.gz
tar xf apache-formula-master.tar.gz
```

2. Add the new directory to `file_roots`:

```yaml
file_roots:
  base:
  - /srv/salt
  - /srv/formulas/apache-formula
```

3. Restart the Salt Master.

Usage

Each Formula is intended to be immediately usable with sane defaults without any additional configuration. Many formulas are also configurable by including data in Pillar; see the `pillar.example` file in each Formula repository for available options.

Including a Formula in an existing State tree

Formula may be included in an existing `sls` file. This is often useful when a state you are writing needs to require or extend a state defined in the formula.

Here is an example of a state that uses the `url epel-formula` in a `require` declaration which directs Salt to not install the `python26` package until after the EPEL repository has also been installed:

```yaml
include:
  - epel

python26:
  pkg.installed:
    - require:
      - pkg: epel
```
Including a Formula from a Top File

Some Formula perform completely standalone installations that are not referenced from other state files. It is usually cleanest to include these Formula directly from a Top File.

For example the easiest way to set up an OpenStack deployment on a single machine is to include the `url openstack-standalone-formula` directly from a `top.sls` file:

```yaml
base:
  'myopenstackmaster':
    - openstack
```

Quickly deploying OpenStack across several dedicated machines could also be done directly from a Top File and may look something like this:

```yaml
base:
  'controller':
    - openstack.horizon
    - openstack.keystone
  'hyper-*':
    - openstack.nova
    - openstack.glance
  'storage-*':
    - openstack.swift
```

Configuring Formula using Pillar

Salt Formulas are designed to work out of the box with no additional configuration. However, many Formula support additional configuration and customization through Pillar. Examples of available options can be found in a file named `pillar.example` in the root directory of each Formula repository.

Using Formula with your own states

Remember that Formula are regular Salt States and can be used with all Salt’s normal state mechanisms. Formula can be required from other States with `require` declarations, they can be modified using `extend`, they can made to watch other states with `The__in version of requisites`.

The following example uses the stock `url apache-formula` alongside a custom state to create a vhost on a Debian/Ubuntu system and to reload the Apache service whenever the vhost is changed.

```yaml
# Include the stock, upstream apache formula.
include:
  - apache

# Use the watch_in requisite to cause the apache service state to reload
# apache whenever the my-example-com-vhost state changes.
my-example-com-vhost:
  file:
    - managed
    - name: /etc/apache2/sites-available/my-example-com
    - watch_in:
      - service: apache
Don't be shy to read through the source for each Formula!

**Reporting problems & making additions**

Each Formula is a separate repository on GitHub. If you encounter a bug with a Formula please file an issue in the respective repository! Send fixes and additions as a pull request. Add tips and tricks to the repository wiki.

**Writing Formulas**

Each Formula is a separate repository in the `saltstack-formulas` organization on GitHub.

**Get involved creating new Formulas**

The best way to create new Formula repositories for now is to create a repository in your own account on GitHub and notify a SaltStack employee when it is ready. We will add you to the Contributors team on the `saltstack-formulas` organization and help you transfer the repository over. Ping a SaltStack employee on IRC (`#salt` on LiberaChat), join the `#formulas` channel on the `salt-slack` (bridged to `#saltstack-formulas` on LiberaChat) or send an email to the `salt-users` mailing list. Note that IRC logs are available at [http://ngxbot.nginx.org/logs/%23salt/](http://ngxbot.nginx.org/logs/%23salt/) and archives for FreeNode (up to mid-June 2021) [https://logbot-archive.s3.amazonaws.com/freenode/salt.gz](https://logbot-archive.s3.amazonaws.com/freenode/salt.gz) and [https://logbot-archive.s3.amazonaws.com/freenode/saltstack-formulas.gz](https://logbot-archive.s3.amazonaws.com/freenode/saltstack-formulas.gz).

There are a lot of repositories in that organization! Team members can manage which repositories they are subscribed to on GitHub’s watching page: [https://github.com/watching](https://github.com/watching).

Members of the Contributors team are welcome to participate in reviewing pull requests across the Organization. Some repositories will have regular contributors and some repositories will not. As you get involved in a repository be sure to communicate with any other contributors there on pull requests that are large or have breaking changes.

In general it is best to have another Contributor review and merge any pull requests that you open. Feel free to at-mention other regular contributors to a repository and request a review. However, there are a lot of formula repositories so if a repository does not yet have regular contributors or if your pull request has stayed open for more than a couple days feel free to “selfie-merge” your own pull request.

**Style**

Maintainability, readability, and reusability are all marks of a good Salt sls file. This section contains several suggestions and examples.

```
# Deploy the stable master branch unless version overridden by passing
# Pillar at the CLI or via the Reactor.

deploy_myapp:
    git.latest:
      - name: git@github.com/myco/myapp.git
      - version: {{ salt.pillar.get('myapp:version', 'master') }}
```
Use a descriptive State ID

The ID of a state is used as a unique identifier that may be referenced via other states in *requisites*. It must be unique across the whole state tree (*it is a key in a dictionary*, after all).

In addition a state ID should be descriptive and serve as a high-level hint of what it will do, or manage, or change. For example, `deploy_webapp`, or `apache`, or `reload_firewall`.

Use *module.function* notation

So-called "short-declaration" notation is preferred for referencing state modules and state functions. It provides a consistent pattern of *module.function* shared between Salt States, the Reactor, Salt Mine, the Scheduler, as well as with the CLI.

```
# Do
apache:
  pkg.installed:
    - name: httpd

# Don't
apache:
  pkg:
    - installed
    - name: httpd
```

Salt's state compiler will transform "short-decs" into the longer format *when compiling the human-friendly highstate structure into the machine-friendly lowstate structure*.

Specify the *name* parameter

Use a unique and permanent identifier for the state ID and reserve *name* for data with variability.

The *name declaration* is a required parameter for all state functions. The state ID will implicitly be used as *name* if it is not explicitly set in the state.

In many state functions the *name* parameter is used for data that varies such as OS-specific package names, OS-specific file system paths, repository addresses, etc. Any time the ID of a state changes all references to that ID must also be changed. Use a permanent ID when writing a state the first time to future-proof that state and allow for easier refactors down the road.

Comment state files

YAML allows comments at varying indentation levels. It is a good practice to comment state files. Use vertical whitespace to visually separate different concepts or actions.

```
# Start with a high-level description of the current sls file.
# Explain the scope of what it will do or manage.

# Comment individual states as necessary.
update_a_config_file:
  # Provide details on why an unusual choice was made. For example:
  #
```

(continues on next page)
# This template is fetched from a third-party and does not fit our company norm of using Jinja. This must be processed using Mako.

```yaml
file.managed:
  - name: /path/to/file.cfg
  - source: salt://path/to/file.cfg.template
  - template: mako

# Provide a description or explanation that did not fit within the state ID. For example:
#
# Update the application's last-deployed timestamp.
# This is a workaround until Bob configures Jenkins to automate RPM builds of the app.

cmd.run:
  # FIXME: Joe needs this to run on Windows by next quarter. Switch these from shell commands to Salt's file.managed and file.replace state modules.
  - name: |
    touch /path/to/file_last_updated
    sed -e 's/foo/bar/g' /path/to/file_environment
  - onchanges:
    - file: a_config_file
```

Be careful to use Jinja comments for commenting Jinja code and YAML comments for commenting YAML code.

```
# BAD EXAMPLE
# The Jinja in this YAML comment is still executed!
# {% set apache_is_installed = 'apache' in salt.pkg.list_pkgs() %}

# GOOD EXAMPLE
# The Jinja in this Jinja comment will not be executed.
#{% set apache_is_installed = 'apache' in salt.pkg.list_pkgs() %} #}
```

Easy on the Jinja!

Jinja templating provides vast flexibility and power when building Salt sls files. It can also create an unmaintainable tangle of logic and data. Speaking broadly, Jinja is best used when kept apart from the states (as much as is possible).

Below are guidelines and examples of how Jinja can be used effectively.

**Know the evaluation and execution order**

High-level knowledge of how Salt states are compiled and run is useful when writing states.

The default `renderer` setting in Salt is Jinja piped to YAML. Each is a separate step. Each step is not aware of the previous or following step. Jinja is not YAML aware, YAML is not Jinja aware; they cannot share variables or interact.

- Whatever the Jinja step produces must be valid YAML.
- Whatever the YAML step produces must be a valid highstate data structure. (This is also true of the final step for any of the alternate renderers in Salt.)
• Highstate can be thought of as a human-friendly data structure; easy to write and easy to read.
• Salt's state compiler validates the highstate and compiles it to low state.
• Low state can be thought of as a machine-friendly data structure. It is a list of dictionaries that each map directly to a function call.
• Salt's state system finally starts and executes on each "chunk" in the low state. Remember that requisites are evaluated at runtime.
• The return for each function call is added to the "running" dictionary which is the final output at the end of the state run.

The full evaluation and execution order:

```
Jinja --> YAML --> Highstate --> low state --> execution
```

Avoid changing the underlying system with Jinja

Avoid calling commands from Jinja that change the underlying system. Commands run via Jinja do not respect Salt's dry-run mode (test=True)! This is usually in conflict with the idempotent nature of Salt states unless the command being run is also idempotent.

Inspect the local system

A common use for Jinja in Salt states is to gather information about the underlying system. The grains dictionary available in the Jinja context is a great example of common data points that Salt itself has already gathered. Less common values are often found by running commands. For example:

```
{% set is_selinux_enabled = salt.cmd.run('sestatus') == '1' %}
```

This is usually best done with a variable assignment in order to separate the data from the state that will make use of the data.

Gather external data

One of the most common uses for Jinja is to pull external data into the state file. External data can come from anywhere like API calls or database queries, but it most commonly comes from flat files on the file system or Pillar data from the Salt Master. For example:

```
{% set some_data = salt.pillar.get('some_data', {'sane default': True}) %}
[# or #]
{% import_yaml 'path/to/file.yaml' as some_data %}
[# or #]
{% import_json 'path/to/file.json' as some_data %}
[# or #]
{% import_text 'path/to/ssh_key.pub' as ssh_pub_key %}
```

(continues on next page)
This is usually best done with a variable assignment in order to separate the data from the state that will make use of the data.

**Light conditionals and looping**

Jinja is extremely powerful for programmatically generating Salt states. It is also easy to overuse. As a rule of thumb, if it is hard to read it will be hard to maintain!

Separate Jinja control-flow statements from the states as much as is possible to create readable states. Limit Jinja within states to simple variable lookups.

Below is a simple example of a readable loop:

```jinja
{% for user in salt.pillar.get('list_of_users', []) %}
  {{ user.name }}-{{ loop.index }}:
  - name: {{ user.name }}
  - shell: {{ user.shell }}
{% endfor %}
```

Avoid putting a Jinja conditionals within Salt states where possible. Readability suffers and the correct YAML indentation is difficult to see in the surrounding visual noise. Parametrization (discussed below) and variables are both useful techniques to avoid this. For example:

```jinja
# ---- Bad example ---- #
apache:
  pkg.installed:
    {% if grains.os_family == 'RedHat' %}
    - name: httpd
    {% elif grains.os_family == 'Debian' %}
    - name: apache2
    {% endif %}

# ---- Better example ---- #

{% if grains.os_family == 'RedHat' %}
{% set name = 'httpd' %}
{% elif grains.os_family == 'Debian' %}
{% set name = 'apache2' %}
{% endif %}

apache:
  pkg.installed:
```

(continues on next page)
Dictionaries are useful to effectively "namespace" a collection of variables. This is useful with parametrization (discussed below). Dictionaries are also easily combined and merged. And they can be directly serialized into YAML which is often easier than trying to create valid YAML through templating. For example:

```yaml
{# ---- Bad example ---- #}

haproxy_conf:
  file.managed:
    - name: /etc/haproxy/haproxy.cfg
    - template: jinja
      {# if 'external_loadbalancer' in grains.roles %}
      - source: salt://haproxy/external_haproxy.cfg
      {# elseif 'internal_loadbalancer' in grains.roles %}
      - source: salt://haproxy/internal_haproxy.cfg
      {# endif %}
    - context:
      {# if 'external_loadbalancer' in grains.roles %}
      ssl_termination: True
      {# elseif 'internal_loadbalancer' in grains.roles %}
      ssl_termination: False
      {# endif %}
{# ---- Better example ---- #}

{% load_yaml as haproxy_defaults %}
common_settings:
  bind_port: 80

internal_loadbalancer:
  source: salt://haproxy/internal_haproxy.cfg
  settings:
    bind_port: 8080
    ssl_termination: False

external_loadbalancer:
  source: salt://haproxy/external_haproxy.cfg
  settings:
    ssl_termination: True
{% endload %}
```
{% if 'external_loadbalancer' in grains.roles %}
{% set haproxy = haproxy_defaults['external_loadbalancer'] %}
{% elif 'internal_loadbalancer' in grains.roles %}
{% set haproxy = haproxy_defaults['internal_loadbalancer'] %}
{% endif %}

{% do haproxy.settings.update(haproxy_defaults.common_settings) %}

haproxy_conf:
  file.managed:
    - name: /etc/haproxy/haproxy.cfg
    - template: jinja
    - source: {{ haproxy.source }}
    - context: {{ haproxy.settings | yaml() }}

There is still room for improvement in the above example. For example, extracting into an external file or replacing the if-elif conditional with a function call to filter the correct data more succinctly. However, the state itself is simple and legible, the data is separate and also simple and legible. And those suggested improvements can be made at some future date without altering the state at all!

Avoid heavy logic and programming

Jinja is not Python. It was made by Python programmers and shares many semantics and some syntax but it does not allow for arbitrary Python function calls or Python imports. Jinja is a fast and efficient templating language but the syntax can be verbose and visually noisy.

Once Jinja use within an sls file becomes slightly complicated -- long chains of if-elif-elif-else statements, nested conditionals, complicated dictionary merges, wanting to use sets -- instead consider using a different Salt renderer, such as the Python renderer. As a rule of thumb, if it is hard to read it will be hard to maintain -- switch to a format that is easier to read.

Using alternate renderers is very simple to do using Salt’s ”she-bang” syntax at the top of the file. The Python renderer must simply return the correct highstate data structure. The following example is a state tree of two sls files, one simple and one complicated.

/srv/salt/top.sls:

```
base:
  '*':
    - common_configuration
    - roles_configuration
```

/srv/salt/common_configuration.sls:

```
common_users:
  user.present:
    - names:
      - larry
      - curly
      - moe
```

/srv/salt/roles_configuration:
def run():
    list_of_roles = set()

    # This example has the minion id in the form 'web-03-dev'.
    # Easily access the grains dictionary:
    try:
        app, instance_number, environment = __grains__['id'].split('-')
        instance_number = int(instance_number)
    except ValueError:
        app, instance_number, environment = ['Unknown', 0, 'dev']

    list_of_roles.add(app)

    if app == 'web' and environment == 'dev':
        list_of_roles.add('primary')
        list_of_roles.add('secondary')
    elif app == 'web' and environment == 'staging':
        if instance_number == 0:
            list_of_roles.add('primary')
        else:
            list_of_roles.add('secondary')

    # Easily cross-call Salt execution modules:
    if __salt__['myutils.query_valid_ec2_instance']():
        list_of_roles.add('is_ec2_instance')

    return {
        "set_roles_grains": {
            "grains.present": [["name": "roles"], {"value": list(list_of_roles)}],
        },
    }

Jinja Macros

In Salt sls files Jinja macros are useful for one thing and one thing only: creating mini templates that can be reused and rendered on demand. Do not fall into the trap of thinking of macros as functions; Jinja is not Python (see above). Macros are useful for creating reusable, parameterized states. For example:

{% macro user_state(state_id, user_name, shell='/bin/bash', groups=[]) %}
{{ state_id }}:
    user.present:
        - name: {{ user_name }}
        - shell: {{ shell }}
        - groups: {{ groups | json() }}
{% endmacro %}

{% for user_info in salt.pillar.get('my_users', []) %}
{{ user_state('user_number_' ~ loop.index, **user_info) }}
{% endfor %}
Macros are also useful for creating one-off "serializers" that can accept a data structure and write that out as a domain-specific configuration file. For example, the following macro could be used to write a php.ini config file:

/srv/salt/php.sls:

```yaml
php_ini:
  file.managed:
    - name: /etc/php.ini
    - source: salt://php.ini.tmpl
    - template: jinja
    - context:
      php_ini_settings: {{ salt.pillar.get('php_ini', {}) | json() }}
```

/srv/pillar/php.sls:

```yaml
php_ini:
  PHP:
    engine: 'On'
    short_open_tag: 'Off'
    error_reporting: 'E_ALL & ~E_DEPRECATED & ~E_STRICT'
```

/srv/salt/php.ini.tmpl:

```jinja
{% macro php_ini_serializer(data) %}
{% for section_name, name_val_pairs in data.items() %}
  [{{ section_name }}]
  {% for name, val in name_val_pairs.items() -%}
    {{ name }} = "{{ val }}"
  {%- endfor %}
{% endfor %}
{%- endmacro %}

; File managed by Salt at {{{ source }}}.  
; Your changes will be overwritten.

{{ php_ini_serializer(php_ini_settings) }}
```

### Abstracting static defaults into a lookup table

Separate data that a state uses from the state itself to increases the flexibility and reusability of a state.

An obvious and common example of this is platform-specific package names and file system paths. Another example is sane defaults for an application, or common settings within a company or organization. Organizing such data as a dictionary (aka hash map, lookup table, associative array) often provides a lightweight namespacing and allows for quick and easy lookups. In addition, using a dictionary allows for easily merging and overriding static values within a lookup table with dynamic values fetched from Pillar.

A strong convention in Salt Formulas is to place platform-specific data, such as package names and file system paths, into a file named map.jinja that is placed alongside the state files.

The following is an example from the MySQL Formula. The `grains.filter_by` function performs a lookup on that table using the `os_family` grain (by default).

The result is that the `mysql` variable is assigned to a subset of the lookup table for the current platform. This allows states to reference, for example, the name of a package without worrying about the underlying OS. The syntax for
referencing a value is a normal dictionary lookup in Jinja, such as {{ mysql['service'] }} or the shorthand
{{ mysql.service }}.

map.jinja:

```jinja
{% set mysql = salt['grains.filter_by']({
    'Debian': {
        'server': 'mysql-server',
        'client': 'mysql-client',
        'service': 'mysql',
        'config': '/etc/mysql/my.cnf',
        'python': 'python-mysqldb',
    },
    'RedHat': {
        'server': 'mysql-server',
        'client': 'mysql',
        'service': 'mysqld',
        'config': '/etc/my.cnf',
        'python': 'MySQL-python',
    },
    'Gentoo': {
        'server': 'dev-db/mysql',
        'client': 'dev-db/mysql',
        'service': 'mysql',
        'config': '/etc/mysql/my.cnf',
        'python': 'dev-python/mysql-python',
    },
}, merge=salt['pillar.get']('mysql:lookup')) %}
```

Values defined in the map file can be fetched for the current platform in any state file using the following syntax:

```jinja
{% from "mysql/map.jinja" import mysql with context %}

mysql-server:
  pkg.installed:
    - name: {{ mysql.server }}
  service.running:
    - name: {{ mysql.service }}
```

Organizing Pillar data

It is considered a best practice to make formulas expect all formula-related parameters to be placed under second-level lookup key, within a main namespace designated for holding data for particular service/software/etc, managed by the formula:

```yaml
mysql:
  lookup:
    version: 5.7.11
```
Collecting common values

Common values can be collected into a base dictionary. This minimizes repetition of identical values in each of the lookup_dict sub-dictionaries. Now only the values that are different from the base must be specified by the alternates:

map.jinja:

```jinja
{% set mysql = salt['grains.filter_by']({
    'default': {
        'server': 'mysql-server',
        'client': 'mysql-client',
        'service': 'mysql',
        'config': '/etc/mysql/my.cnf',
        'python': 'python-mysqldb',
    },
    'Debian': {},
    'RedHat': {
        'client': 'mysql',
        'service': 'mysqld',
        'config': '/etc/my.cnf',
        'python': 'MySQL-python',
    },
    'Gentoo': {
        'server': 'dev-db/mysql',
        'client': 'dev-db/mysql',
        'python': 'dev-python/mysql-python',
    },
},
merge=salt['pillar.get']('mysql:lookup'), base='default') %}
```

Overriding values in the lookup table

Allow static values within lookup tables to be overridden. This is a simple pattern which once again increases flexibility and reusability for state files.

The merge argument in filter_by specifies the location of a dictionary in Pillar that can be used to override values returned from the lookup table. If the value exists in Pillar it will take precedence.

This is useful when software or configuration files is installed to non-standard locations or on unsupported platforms. For example, the following Pillar would replace the config value from the call above.

```yaml
mysql:
    lookup:
        config: /usr/local/etc/mysql/my.cnf
```

Note:  Protecting Expansion of Content with Special Characters

When templating keep in mind that YAML does have special characters for quoting, flows, and other special structure and content. When a Jinja substitution may have special characters that will be incorrectly parsed by YAML care must be taken. It is a good policy to use the yaml_encode or the yaml_dquote Jinja filters:
The above will be rendered as below:

```yaml
foo: 7.7
bar: null
baz: true
zap: "The word of the day is \"salty\"."
zip: "\"The quick brown fox . . .\""
```

The `filter_by` function performs a simple dictionary lookup but also allows for fetching data from Pillar and overriding data stored in the lookup table. That same workflow can be easily performed without using `filter_by`; other dictionaries besides data from Pillar can also be used.

```jinja
{% set lookup_table = { ... } %}
{% do lookup_table.update(salt.pillar.get('my:custom:data')) %}
```

**When to use lookup tables**

The `map.jinja` file is only a convention within Salt Formulas. This greater pattern is useful for a wide variety of data in a wide variety of workflows. This pattern is not limited to pulling data from a single file or data source. This pattern is useful in States, Pillar and the Reactor, for example.

Working with a data structure instead of, say, a config file allows the data to be cobbled together from multiple sources (local files, remote Pillar, database queries, etc), combined, overridden, and searched.

Below are a few examples of what lookup tables may be useful for and how they may be used and represented.
Platform-specific information

An obvious pattern and one used heavily in Salt Formulas is extracting platform-specific information such as package names and file system paths in a file named `map.jinja`. The pattern is explained in detail above.

Sane defaults

Application settings can be a good fit for this pattern. Store default settings along with the states themselves and keep overrides and sensitive settings in Pillar. Combine both into a single dictionary and then write the application config or settings file.

The example below stores most of the Apache Tomcat `server.xml` file alongside the Tomcat states and then allows values to be updated or augmented via Pillar. (This example uses the BadgerFish format for transforming JSON to XML.)

```
/srv/salt/tomcat/defaults.yaml:

Server:
  '@port': '8005'
  '@shutdown': SHUTDOWN

GlobalNamingResources
  Resource:
    '@auth': Container
    '@description': User database that can be updated and saved
    '@factory': org.apache.catalina.users.MemoryUserDatabaseFactory
    '@name': UserDatabase
    '@pathname': conf/tomcat-users.xml
    '@type': org.apache.catalina.UserDatabase

/srv/pillar/tomcat.sls:

appX:
  server_xml_overrides:
    Server:
      Service:
        '@name': Catalina
      Connector:
        '@port': '8009'
        '@protocol': AJP/1.3
        '@redirectPort': '8443'

/srv/salt/tomcat/server_xml.sls:

{% import_yaml 'tomcat/defaults.yaml' as server_xml_defaults %}
{% set server_xml_final_values = salt.pillar.get('appX:server_xml_overrides',
    default=server_xml_defaults, merge=True) %}

appX_server_xml:

(continues on next page)
The `file.serialize` state can provide a shorthand for creating some files from data structures. There are also many examples within Salt Formulas of creating one-off "serializers" (often as Jinja macros) that reformat a data structure to a specific config file format. For example, look at the `Nginx vhosts` states or the `php.ini` file template.

Environment specific information

A single state can be reused when it is parameterized as described in the section below, by separating the data the state will use from the state that performs the work. This can be the difference between deploying `Application X` and `Application Y`, or the difference between production and development. For example:

```
/srv/salt/app/deploy.sls:

{% import_yaml 'app/defaults.yaml' as app_defaults %}

{% app = app_defaults.get(salt.grains.get('role')) %}

{% do app_defaults.update(salt.pillar.get('myapp', {})) %}

deploy_application:
  git.latest:
    - name: {{ app.repo_url }}
    - version: {{ app.version }}
    - target: {{ app.deploy_dir }}

myco/myapp/deployed:
  event.send:
    - data:
      version: {{ app.version }}
    - onchanges:
      - git: deploy_application

/srv/salt/app/defaults.yaml:

appX:
  repo_url: git@github.com/myco/appX.git
  target: /var/www/appX
  version: master

appY:
  repo_url: git@github.com/myco/appY.git
  target: /var/www/appY
  version: v1.2.3.4
```
**Single-purpose SLS files**

Each sls file in a Formula should strive to do a single thing. This increases the reusability of this file by keeping unrelated tasks from getting coupled together.

As an example, the base Apache formula should only install the Apache httpd server and start the httpd service. This is the basic, expected behavior when installing Apache. It should not perform additional changes such as set the Apache configuration file or create vhosts.

If a formula is single-purpose as in the example above, other formulas, and also other states can include and use that formula with *Requisites and Other Global State Arguments* without also including undesirable or unintended side-effects.

The following is a best-practice example for a reusable Apache formula. (This skips platform-specific options for brevity. See the full url apache-formula for more.)

```sh
# apache/init.sls
apache:
  pkg.installed:
    [...]
  service.running:
    [...]

# apache/mod_wsgi.sls
include:
  - apache

mod_wsgi:
  pkg.installed:
    [...]
  require:
    - pkg: apache

# apache/conf.sls
include:
  - apache

apache_conf:
  file.managed:
    [...]
  watch_in:
    - service: apache
```

To illustrate a bad example, say the above Apache formula installed Apache and also created a default vhost. The mod_wsgi state would not be able to include the Apache formula to create that dependency tree without also installing the unneeded default vhost.

*Formulas should be reusable.* Avoid coupling unrelated actions together.
Parameterization

Parameterization is a key feature of Salt Formulas and also for Salt States. Parameterization allows a single Formula to be reused across many operating systems; to be reused across production, development, or staging environments; and to be reused by many people all with varying goals.

Writing states, specifying ordering and dependencies is the part that takes the longest to write and to test. Filling those states out with data such as users or package names or file locations is the easy part. How many users, what those users are named, or where the files live are all implementation details that should be parameterized. This separation between a state and the data that populates a state creates a reusable formula.

In the example below the data that populates the state can come from anywhere -- it can be hard-coded at the top of the state, it can come from an external file, it can come from Pillar, it can come from an execution function call, or it can come from a database query. The state itself doesn’t change regardless of where the data comes from. Production data will vary from development data will vary from data from one company to another, however the state itself stays the same.

```
{% set user_list = [%
   {'name': 'larry', 'shell': 'bash'},
   {'name': 'curly', 'shell': 'bash'},
   {'name': 'moe', 'shell': 'zsh'},
%]

#{ or #}

{% set user_list = salt['pillar.get']('user_list') %}

#{ or #}

{% load_json "default_users.json" as user_list %}

#{ or #}

{% set user_list = salt['acme_utils.get_user_list']() %}

{% for user in user_list %}
   {{ user.name }}:
   user.present:
   - name: {{ user.name }}
   - shell: {{ user.shell }}
{% endfor %}
```

Configuration

Formulas should strive to use the defaults of the underlying platform, followed by defaults from the upstream project, followed by sane defaults for the formula itself.

As an example, a formula to install Apache should not change the default Apache configuration file installed by the OS package. However, the Apache formula should include a state to change or override the default configuration file.
Pillar overrides

Pillar lookups must use the safe `get()` and must provide a default value. Create local variables using the Jinja `set` construct to increase readability and to avoid potentially hundreds or thousands of function calls across a large state tree.

```jinja
{% from "apache/map.jinja" import apache with context %}
{% set settings = salt['pillar.get']('apache', {}) %}

mod_status:
  file.managed:
    - name: {{ apache.conf_dir }}
    - source: {{ settings.get('mod_status_conf', 'salt://apache/mod_status.conf') }}
    - template: {{ settings.get('template_engine', 'jinja') }}
```

Any default values used in the Formula must also be documented in the `pillar.example` file in the root of the repository. Comments should be used liberally to explain the intent of each configuration value. In addition, users should be able copy-and-paste the contents of this file into their own Pillar to make any desired changes.

Scripting

Remember that both State files and Pillar files can easily call out to Salt execution modules and have access to all the system grains as well.

```jinja
{% if '/storage' in salt['mount.active']() %}
/usr/local/etc/myfile.conf:
  file:
    - symlink
    - target: /storage/myfile.conf
{% endif %}
```

Jinja macros to encapsulate logic or conditionals are discouraged in favor of writing custom execution modules in Python.

Repository structure

A basic Formula repository should have the following layout:

```bash
foo-formula
 |-- foo/
 |   |-- map.jinja
 |   |-- init.sls
 |   `-- bar.sls
 |-- CHANGELOG.rst
 |-- LICENSE
 |-- pillar.example
 |-- README.rst
 `-- VERSION
```

See also:

url template-formula
The `url template-formula` repository has a pre-built layout that serves as the basic structure for a new formula repository. Just copy the files from there and edit them.

**README.rst**

The README should detail each available `.sls` file by explaining what it does, whether it has any dependencies on other formulas, whether it has a target platform, and any other installation or usage instructions or tips.

A sample skeleton for the README.rst file:

```rst
==
foo
==

Install and configure the FOO service.

**NOTE**

See the full `Salt Formulas installation and usage instructions <https://docs.saltproject.io/en/latest/topics/development/conventions/formulas.html>`_.

**Available states**

.. contents::

    :local:

```
```
ofoo```
```

Install the ``foo`` package and enable the service.

```
```
ofoo.bar```
```

Install the ``bar`` package.

**CHANGELOG.rst**

The CHANGELOG.rst file should detail the individual versions, their release date and a set of bullet points for each version highlighting the overall changes in a given version of the formula.

A sample skeleton for the CHANGELOG.rst file:

```
CHANGELOG.rst

foo formula
============
0.0.2 (2013-01-01)
- Re-organized formula file layout

(continues on next page)
Fixed filename used for upstart logger template
Allow for pillar message to have default if none specified

Versioning

Formula are versioned according to Semantic Versioning, [https://semver.org/](https://semver.org/).

**Note:** Given a version number MAJOR.MINOR.PATCH, increment the:

1. MAJOR version when you make incompatible API changes,
2. MINOR version when you add functionality in a backwards-compatible manner, and
3. PATCH version when you make backwards-compatible bug fixes.

Additional labels for pre-release and build metadata are available as extensions to the MAJOR.MINOR.PATCH format.

Formula versions are tracked using Git tags as well as the VERSION file in the formula repository. The VERSION file should contain the currently released version of the particular formula.

Testing Formulas

A smoke-test for invalid Jinja, invalid YAML, or an invalid Salt state structure can be performed by with the `state.show_sls` function:

```
salt '*' state.show_sls apache
```

Salt Formulas can then be tested by running each `.sls` file via `state.apply` and checking the output for the success or failure of each state in the Formula. This should be done for each supported platform.

31.28.3 SaltStack Packaging Guide

Since Salt provides a powerful toolkit for system management and automation, the package can be split into a number of sub-tools. While packaging Salt as a single package containing all components is perfectly acceptable, the split packages should follow this convention.

Patching Salt For Distributions

The occasion may arise where Salt source and default configurations may need to be patched. It is preferable if Salt is only patched to include platform specific additions or to fix release time bugs. It is preferable that configuration settings and operations remain in the default state, as changes here lowers the user experience for users moving across distributions.

In the event where a packager finds a need to change the default configuration it is advised to add the files to the master.d or minion.d directories.
Source Files

Release packages should always be built from the source tarball distributed via pypi. Release packages should *NEVER* use a git checkout as the source for distribution.

Single Package

Shipping Salt as a single package, where the minion, master, and all tools are together is perfectly acceptable and practiced by distributions such as FreeBSD.

Split Package

Salt Should always be split in a standard way, with standard dependencies, this lowers cross distribution confusion about what components are going to be shipped with specific packages. These packages can be defined from the Salt Source as of Salt 2014.1.0:

Salt Common

The `salt-common` or `salt` package should contain the files provided by the salt python package, or all files distributed from the `salt/` directory in the source distribution packages. The documentation contained under the `doc/` directory can be a part of this package but splitting out a doc package is preferred. Since salt-call is the entry point to utilize the libs and is useful for all salt packages it is included in the salt-common package.

Name

- `salt` OR `salt-common`

Files

- `salt/*`
- `man/salt.7`
- `scripts/salt-call`
- `tests/*`
- `man/salt-call.1`

Depends

- `Python 2.6-2.7`
- `PyYAML`
- `Jinja2`
Salt Master

The salt-master package contains the applicable scripts, related man pages and init information for the given platform.

Name

- salt-master

Files

- scripts/salt-master
- scripts/salt
- scripts/salt-run
- scripts/salt-key
- scripts/salt-cp
- pkg/<master init data>
- man/salt.1
- man/salt-master.1
- man/salt-run.1
- man/salt-key.1
- man/salt-cp.1
- conf/master

Depends

- Salt Common
- ZeroMQ >= 3.2
- PyZMQ >= 2.10
- PyCrypto
- M2Crypto
- Python MessagePack (Messagepack C lib, or msgpack-pure)

Salt Syndic

The Salt Syndic package can be rolled completely into the Salt Master package. Platforms which start services as part of the package deployment need to maintain a separate salt-syndic package (primarily Debian based platforms). The Syndic may optionally not depend on the anything more than the Salt Master since the master will bring in all needed dependencies, but fall back to the platform specific packaging guidelines.
Name

- salt-syndic

Files

- scripts/salt-syndic
- pkg/<syndic init data>
- man/salt-syndic.1

Depends

- Salt Common
- Salt Master
- ZeroMQ >= 3.2
- PyZMQ >= 2.10
- PyCrypto
- M2Crypto
- Python MessagePack (Messagepack C lib, or msgpack-pure)

Salt Minion

The Minion is a standalone package and should not be split beyond the salt-minion and salt-common packages.

Name

- salt-minion

Files

- scripts/salt-minion
- pkg/<minion init data>
- man/salt-minion.1
- conf/minion
Depends

- Salt Common
- ZeroMQ >= 3.2
- PyZMQ >= 2.10
- PyCrypto
- M2Crypto
- Python MessagePack (Messagepack C lib, or msgpack-pure)

Salt SSH

Since Salt SSH does not require the same dependencies as the minion and master, it should be split out.

Name

- salt-ssh

Files

- scripts/salt-ssh
- man/salt-ssh.1
- conf/cloud*

Depends

- Salt Common
- Python MessagePack (Messagepack C lib, or msgpack-pure)

Salt Cloud

As of Salt 2014.1.0 Salt Cloud is included in the same repo as Salt. This can be split out into a separate package or it can be included in the salt-master package.

Name

- salt-cloud
31.28.4 Salt Release Process

The goal for Salt projects is to cut a new feature release every three to four months. This document outlines the process for these releases, and the subsequent bug fix releases which follow.

Feature Release Process

When a new release is ready to be cut, the person responsible for cutting the release will follow the following steps (written using the 3000 release as an example):

1. Create first public draft of release notes with major features.
2. Remove any deprecations for the upcoming release.
3. Ensure all required features are merged.
4. Create issue to start the process of deprecating for the next feature release.
5. Run through a manual test run based off of the head of the feature branch.
6. Update all name references to version number in the docs. For example all neon references in the docs needs to be moved to v3000
7. Review the release notes with major features.
8. Generate the new man pages for the release.
9. Create internal RC tag for testing from the head of the master branch.
10. Build latest windows, mac, ubuntu, debian and redhat packages.
11. Run manual and package tests against new RC packages.
12. Push the internal tag live to salt’s repo.
13. Publish release archive to pypi based off tag.
15. Announce new RC to salt-users and salt-announce google groups.
17. Fix RC issues once they are categorized as a release blocker.
18. Depending on the issues found during the RC process make a decision on whether to release based off the RC or go through another RC process
19. If a RC is categorized as stable, build all required packages.
20. Test all release packages.
21. Test links from repo.saltproject.io.
22. Update installation instructions with new release number at repo.saltproject.io.
23. Review and update all impacted Installation documentation.
24. Update and build docs to include new version (3000) as the latest.
25. Pre-announce on salt-users google group that we are about to update our repo.
26. Publish release (v3000) archive to pypi based off tag.
27. Publish all packages live to repo.
28. Publish the docs.
29. Create release at github
30. Update win-repo-ng with new salt versions.
31. Announce release is live to irc, salt-users, salt-announce and release slack community channel.

**Bugfix Releases**

Once a feature release branch has been cut from the master branch, if serious bugs or a CVE is found for the most recent release a bugfix release will need to be cut. A temporary branch will be created based off of the previous release tag. For example, if it is determined that a 3000.1 release needs to occur a 3000.1 branch will be created based off of the v3000 tag. The fixes that need to go into 3000.1 will be added and merged into this branch. Here are the steps for a bugfix release.

1. Ensure all required bug fixes are merged.
2. Create release branch with the version of the release. (ex. 3000.1)
3. Create jenkins jobs that test the new release branch.
4. Run through a manual test run based off of the head of the branch.
5. Generate the new man pages for the release.
6. Create internal tag for testing (ex v3000.1)
7. Build all release packages.
8. Run manual and package tests against new packages.
9. Update installation instructions with new release number at repo.saltproject.io.
10. Update and build docs to include new version (ex. 3000.1)
11. Pre-announce on salt-users google groups that we are about to update our repo.
12. Push the internal tag live to salt’s repo.
13. Publish release archive to pypi based off tag.
14. Push the packages live.
15. Publish release (v3000) archive to pypi based off tag.
16. Publish all packages live to repo.
17. Publish the docs.
18. Create release at github
20. Announce release is live to irc, salt-users, salt-announce and release slack channel.

### 31.28.5 Salt Coding Style

To make it easier to contribute and read Salt code, SaltStack has adopted Black as its code formatter. There are a few places where Black is silent, and this guide should be used in those cases.

Coding style is NEVER grounds to reject code contributions, and is never grounds to talk down to another member of the community (There are no grounds to treat others without respect, especially people working to improve Salt)!

**Linting**

Most Salt style conventions are codified in Salt’s .pylintrc file. Salt’s linting has two major dependencies: pylint and saltpylint, the full lint requirements can be found under requirements/static/ci/lint.in and the pinned requirements at requirements/static/ci/py3.<minor-version>/lint.txt, however, linting should be done using nox, which is how pull requests are checked.

```bash
nox -e lint
```

One can target either salt’s source code or the test suite (different pylint rules apply):

```bash
nox -e lint-salt
nox -e lint-tests
```
**Variables**

Variables should be a minimum of three characters and should provide an easy-to-understand name of the object being represented.

When keys and values are iterated over, descriptive names should be used to represent the temporary variables.

Multi-word variables should be separated by an underscore.

Variables which are two-letter words should have an underscore appended to them to pad them to three characters.

**Formatting Strings**

All strings which require formatting should use the `.format` string method:

Please do NOT use printf formatting, unless it's a log message.

**Good:**

```python
data = "some text"
mORE = "{} and then some".format(data)
log.debug("%s and then some", data)
```

**Bad:**

```python
data = "some text"
log.debug("{} and then some".format(data))
```

**Docstring Conventions**

When adding a new function or state, where possible try to use a `versionadded` directive to denote when the function, state, or parameter was added.

```python
def new_func(msg="

    .. versionadded:: 0.16.0
    
    Prints what was passed to the function.
    
    msg : None
        The string to be printed.
    
    print(msg)
```

If you are uncertain what version should be used, either consult a core developer in IRC or bring this up when opening your pull request and a core developer will let you know what version to add. Typically this will be the next element in the periodic table.

Similar to the above, when an existing function or state is modified (for example, when an argument is added), then under the explanation of that new argument a `versionadded` directive should be used to note the version in which the new argument was added. If an argument's function changes significantly, the `versionchanged` directive can be used to clarify this:
```python
def new_func(msg="", signature=""):  
    
    .. versionadded:: 0.16.0
    Prints what was passed to the function.

    msg : None
        The string to be printed. Will be prepended with 'Greetings! '.

    .. versionchanged:: 0.17.1

    signature : None
        An optional signature.

    .. versionadded:: 0.17.0
    
    print("Greetings! {0}\n\n{1}".format(msg, signature))
```

**Dictionaries**

Dictionaries should be initialized using `[]` instead of `dict()`.
See [here](#) for an in-depth discussion of this topic.

**Imports**

Salt code prefers importing modules and not explicit functions. This is both a style and functional preference. The functional preference originates around the fact that the module import system used by pluggable modules will include callable objects (functions) that exist in the direct module namespace. This is not only messy, but may unintentionally expose code python libs to the Salt interface and pose a security problem.

To say this more directly with an example, this is **GOOD**:

```python
import os

def minion_path():
    path = os.path.join(self.opts['cachedir'], 'minions')
    return path
```

This on the other hand is **DISCOURAGED**:

```python
from os.path import join

def minion_path():
    path = join(self.opts['cachedir'], 'minions')
    return path
```

The time when this is changed is for importing exceptions, generally directly importing exceptions is preferred:

This is a good way to import exceptions:
Absolute Imports

Although absolute imports seems like an awesome idea, please do not use it. Extra care would be necessary all over salt's code in order for absolute imports to work as supposed. Believe it, it has been tried before and, as a tried example, by renaming `salt.modules.sysmod` to `salt.modules.sys`, all other salt modules which needed to import `sys` would have to also import `absolute_import`, which should be avoided.

Note: An exception to this rule is the `absolute_import from __future__` at the top of each file within the Salt project. This import is necessary for Py3 compatibility. This particular import looks like this:

```
from __future__ import absolute_import
```

This import is required for all new Salt files and is a good idea to add to any custom states or modules. However, the practice of avoiding absolute imports still applies to all other cases as to avoid a name conflict.

Code Churn

Many pull requests have been submitted that only churn code in the name of PEP 8. Code churn is a leading source of bugs and is strongly discouraged. While style fixes are encouraged they should be isolated to a single file per commit, and the changes should be legitimate, if there are any questions about whether a style change is legitimate please reference this document and the official PEP 8 ([https://legacy.python.org/dev/peps/pep-0008/](https://legacy.python.org/dev/peps/pep-0008/)) document before changing code. Many claims that a change is PEP 8 have been invalid, please double check before committing fixes.

31.29 Salt code and internals

Reference documentation on Salt's internal code.

31.29.1 Contents

salt.aggregation

salt.utils.aggregation

This library makes it possible to introspect dataset and aggregate nodes when it is instructed.

Note: The following examples with be expressed in YAML for convenience's sake:

- `!aggr-scalar` will refer to Scalar python function
- `!aggr-map` will refer to Map python object
- `!aggr-seq` will refer for Sequence python object
How to instruct merging

This yaml document has duplicate keys:

```yaml
foo: !aggr-scalar first
foo: !aggr-scalar second
bar: !aggr-map {first: foo}
bar: !aggr-map {second: bar}
baz: !aggr-scalar 42
```

but tagged values instruct Salt that overlapping values they can be merged together:

```yaml
foo: !aggr-seq [first, second]
bar: !aggr-map {first: foo, second: bar}
baz: !aggr-seq [42]
```

Default merge strategy is keep untouched

For example, this yaml document still has duplicate keys, but does not instruct aggregation:

```yaml
foo: first
foo: second
bar: {first: foo}
bar: {second: bar}
baz: 42
```

So the late found values prevail:

```yaml
foo: second
bar: {second: bar}
baz: 42
```

Limitations

Aggregation is permitted between tagged objects that share the same type. If not, the default merge strategy prevails.

For example, these examples:

```yaml
foo: {first: value}
foo: !aggr-map {second: value}
bar: !aggr-map {first: value}
bar: 42
baz: !aggr-seq [42]
baz: [fail]
qux: 42
qux: !aggr-scalar fail
```

are interpreted like this:
foo: `!aggr-map{second: value}`

bar: 42

baz: `[fail]`

qux: `!aggr-seq [fail]`

Introspection

TODO: write this part

class salt.utils.aggregation.Aggregate
Aggregation base.

class salt.utils.aggregation.Map
Map aggregation.

class salt.utils.aggregation.OrderedDict
salt.utils.aggregation.Scalar(obj)
Shortcut for Sequence creation

```python
>>> Scalar('foo') == Sequence(['foo'])
True
```

class salt.utils.aggregation.Sequence(iterable=(), /)
Sequence aggregation.

salt.utils.aggregation.aggregate(obj_a, obj_b, level=False, map_class=<class 'salt.utils.aggregation.Map'>, sequence_class=<class 'salt.utils.aggregation.Sequence'>)
Merge obj_b into obj_a.

```python
>>> aggregate('first', 'second', True) == ['first', 'second']
True
```

salt.utils.aggregation.levelise(level)
Describe which levels are allowed to do deep merging.

level can be:

True
all levels are True

False
all levels are False

an int
only the first levels are True, the others are False

a sequence
it describes which levels are True, it can be:
- a list of bool and int values
- a string of 0 and 1 characters
salt.utils.aggregation.mark(obj, map_class=<class 'salt.utils.aggregation.Map'>, sequence_class=<class 'salt.utils.aggregation.Sequence'>)

Convert obj into an Aggregate instance

Exceptions

Salt-specific exceptions should be thrown as often as possible so the various interfaces to Salt (CLI, API, etc) can handle those errors appropriately and display error messages appropriately.

```
salt.exceptions
```

This module is a central location for all salt exceptions

```
salt.exceptions
```

This module is a central location for all salt exceptions

**exception** salt.exceptions.ArgumentValueError(message='', info=None)

Used when an invalid argument was passed to a command execution

**exception** salt.exceptions.AuthenticationError(message='')

If sha256 signature fails during decryption

**exception** salt.exceptions.AuthorizationError(message='')

Thrown when runner or wheel execution fails due to permissions

**exception** salt.exceptions.CheckError(message='', info=None)

Used when a check fails

**exception** salt.exceptions.CodePageError(message='', info=None)

Raised when an error occurs while getting or setting the windows code page

**exception** salt.exceptions.CommandExecutionError(message='', info=None)

Used when a module runs a command which returns an error and wants to show the user the output gracefully instead of dying

**exception** salt.exceptions.CommandNotFoundError(message '')

Used in modules or grains when a required binary is not available

**exception** salt.exceptions.EauthAuthenticationError(message '')

Thrown when eauth authentication fails

**exception** salt.exceptions.FileLockError(message, time_start=None, *args, **kwargs)

Used when an error occurs obtaining a file lock

**exception** salt.exceptions.FileserverConfigError(message '')

Used when invalid fileservers settings are detected

**exception** salt.exceptions.GitLockError(errno, message, *args, **kwargs)

Raised when an uncaught error occurs in the midst of obtaining an update/checkout lock in salt.utils.gitfs.

NOTE: While this uses the errno param similar to an OSErrror, this exception class is not as subclass of OSErrror. This is done intentionally, so that this exception class can be caught in a try/except without being caught as an OSErrror.
exception salt.exceptions.GitRemoteError (message='')

   Used by GitFS to denote a problem with the existence of the "origin" remote or part of its configuration

exception salt.exceptions.InvalidConfigError (message='', info=None)

   Used when the config is invalid

exception salt.exceptions.InvalidEntityError (message='', info=None)

   Used when an entity fails validation

exception salt.exceptions.InvalidKeyError (message='')

   Raised when we encounter an invalid RSA key.

exception salt.exceptions.LoaderError (message='')

   Problems loading the right render

exception salt.exceptions.LoggingRuntimeError

   Raised when we encounter an error while logging

exception salt.exceptions.MasterExit

   Rise when the master exits

exception salt.exceptions.MinionError (message='')

   Minion problems reading uris such as salt:// or http://

exception salt.exceptions.MissingSmb (message='')

   Raised when no smb library is found.

exception salt.exceptions.NotImplemented (message='')

   Used when a module runs a command which returns an error and wants to show the user the output gracefully
   instead of dying

exception salt.exceptions.Nxos CliError (message='')

   NX-OS Cli Error raised when Cli command rejected by the NX-OS device

exception salt.exceptions.NxosClientError (message='')

   NX-OS Client Error raised for problems connecting to the NX-OS device

exception salt.exceptions.NxosError (message='')

   NX-OS Base Exception class

exception salt.exceptions.NxosRequestNotSupported (message='')

   Raised for unsupported client requests

exception salt.exceptions.PkgParseError (message='')

   Used when of the pkg modules cannot correctly parse the output from the CLI tool (pacman, yum, apt, aptitude,
   etc)

exception salt.exceptions.PublishError (message='')

   Problems encountered when trying to publish a command

exception salt.exceptions.SaltCacheError (message='')

   Thrown when a problem was encountered trying to read or write from the salt cache

exception salt.exceptions.SaltClientError (message='')

   Problem reading the master root key
exception salt.exceptions.SaltClientTimeout(message, jid=None, *args, **kwargs)
    Thrown when a job sent through one of the Client interfaces times out
    Takes the jid as a parameter

exception salt.exceptions.SaltCloudConfigError(message="")
    Raised when a configuration setting is not found and should exist.

exception salt.exceptions.SaltCloudException(message="")
    Generic Salt Cloud Exception

exception salt.exceptions.SaltCloudExecutionFailure(message="")
    Raised when too much failures have occurred while querying/waiting for data.

exception salt.exceptions.SaltCloudExecutionTimeout(message="")
    Raised when too much time has passed while querying/waiting for data.

exception salt.exceptions.SaltCloudNotFound(message="")
    Raised when some cloud provider function cannot find what's being searched.

exception salt.exceptions.SaltCloudPasswordError(message="")
    Raise when virtual terminal password input failed

exception salt.exceptions.SaltCloudSystemExit(message, exit_code=1)
    This exception is raised when the execution should be stopped.

exception salt.exceptions.SaltConfigurationError(message="")
    Configuration error

exception salt.exceptions.SaltDaemonNotRunning(message="")
    Throw when a running master/minion/syndic is not running but is needed to perform the requested operation (e.g., eauth).

exception salt.exceptions.SaltDeserializationError(message="")
    Thrown when salt cannot deserialize data.

exception salt.exceptions.SaltException(message="")
    Base exception class; all Salt-specific exceptions should subclass this

pack()
    Pack this exception into a serializable dictionary that is safe for transport via msgpack

exception salt.exceptions.SaltInvocationError(message="")
    Used when the wrong number of arguments are sent to modules or invalid arguments are specified on the command line

exception salt.exceptions.SaltMasterError(message="")
    Problem reading the master root key

exception salt.exceptions.SaltMasterUnresolvableError(message="")
    Problem resolving the name of the Salt master

exception salt.exceptions.SaltNoMinionsFound(message="")
    An attempt to retrieve a list of minions failed

exception salt.exceptions.SaltRenderError(message, line_num=None, buf='', marker='<======================', trace=None)
    Used when a renderer needs to raise an explicit error. If a line number and buffer string are passed, get_context will be invoked to get the location of the error.
exception salt.exceptions.SaltReqTimeoutError(message="")  
Thrown when a salt master request call fails to return within the timeout

exception salt.exceptions.SaltRunnerError(message="")  
Problem in runner

exception salt.exceptions.SaltSyndicMasterError(message="")  
Problem while proxying a request in the syndication master

exception salt.exceptions.SaltSystemExit(code=0, msg=None)  
This exception is raised when an unsolvable problem is found. There's nothing else to do, salt should just exit.

exception salt.exceptions.SaltWheelError(message="")  
Problem in wheel

exception salt.exceptions.TemplateError(message="")  
Used when a custom error is triggered in a template

exception salt.exceptions.TimedProcTimeoutError(message="")  
Thrown when a timed subprocess does not terminate within the timeout, or if the specified timeout is not an int or a float

exception salt.exceptions.TimeoutError(message="")  
Thrown when an operation cannot be completed within a given time limit.

exception salt.exceptions.TokenAuthenticationError(message="")  
Thrown when token authentication fails

exception salt.exceptions.VMwareApiError(message="", info=None)  
Used when representing a generic VMware API error

exception salt.exceptions.VMwareConnectionError(message="", info=None)  
Used when the client fails to connect to a either a VMware vCenter server or to a ESXi host

exception salt.exceptions.VMwareFileNotFoundException(message="", info=None)  
Used when representing a generic VMware error if a file not found

exception salt.exceptions.VMwareMultipleObjectsError(message="", info=None)  
Used when multiple objects were retrieved (and one was expected)

exception salt.exceptions.VMwareNotFoundError(message="", info=None)  
Used when a VMware object was not found

exception salt.exceptions.VMwareObjectExistsError(message="", info=None)  
Used when a VMware object already exists

exception salt.exceptions.VMwareObjectNotFoundError(message="", info=None)  
Used when a VMware object was not found

exception salt.exceptions.VMwareObjectRetrievalError(message="", info=None)  
Used when a VMware object cannot be retrieved

exception salt.exceptions.VMwarePowerOnError(message="", info=None)  
Used when error occurred during power on

exception salt.exceptions.VMwareRuntimeError(message="", info=None)  
Used when a runtime error is encountered when communicating with the vCenter
exception salt.exceptions.VMwareSaltError(message='', info=None)
    Used when a VMware object cannot be retrieved

exception salt.exceptions.VMwareSystemError(message='', info=None)
    Used when representing a generic VMware system error

exception salt.exceptions.VMwareVmCreationError(message='', info=None)
    Used when a configuration parameter is incorrect

exception salt.exceptions.VMwareVmRegisterError(message='', info=None)
    Used when a configuration parameter is incorrect

salt.exceptions.get_error_message(error)
    Get human readable message from Python Exception

The Salt Fileserver and Client

Introduction

Salt has a modular fileserver, and multiple client classes which are used to interact with it. This page serves as a developer's reference, to help explain how the fileserver and clients both work.

Fileserver

The fileserver is not a daemon, so the fileserver and client are not a true server and client in the traditional sense. Instead, the fileserver is simply a class (salt.fileserver.Fileserver), located in salt/fileserver/__init__.py. This class has access to the configured fileserver backends via a loader instance, referenced as self.servers. When a request comes in from the fileclient, it will ultimately result in a Fileserver class function being run.

The functions in this class will run corresponding functions in the configured fileserver backends to perform the requested action. So, in summary:

1. A fileclient class makes a request...
2. which triggers the fileserver to run a function...
3. which runs a named function in each of the configured backends.

Not all of the functions will always execute on every configured backend. For instance, the find_file function in the fileserver will stop when it finds a match, so if it finds a match for the desired path in the first configured backend, it won't proceed and try to find the file in the next backend in the list.

Additionally, not all backends implement all functions in the salt.fileserver.Fileserver class. For instance, there is a function called update, which exists to update remote fileservers such as the git, hg, and svn backends. This action has no use however in the roots backend, so it is simply not implemented there, and thus the roots backend will be skipped if the update function is run on the fileserver.

Backends for the fileserver are located in salt/fileserver/ (the files not named __init__.py).
Fileclient

There are three fileclient classes:

salt.fileclient.RemoteClient

This client is used when `file_client` is set to `remote`. This is how minions request files from the master.

Functions in this client will craft a payload and send it to the master via the transport channel. This is the same way that the minion asks the minion to do other things, such as updating and requesting data from the mine. The payload will be a dictionary with a key called `cmd`, and other values as needed.

Payloads sent via the transport channel are processed my an MWorker instance on the master, and the MWorker's `_handle_aes()` function will execute the command. The command will be a function attribute of the `salt.master.AESFuncs` class. The AESFuncs class' `__setup_fileserver()` function instantiates a `salt.fileserver.Fileserver` instance and maps its member functions to AESFuncs attributes. This is what makes the fileserver functions available remotely. The result of the function is returned back through the transport channel to the minion.

Transporting files is done in chunks, the size of which is decided by the `file_buffer_size` config option. If you look at the `serve_file()` function in any of the fileserver backends, you can see how the `loc` value in the payload determines the offset so that an intermediate chunk of the file can be served. The RemoteClient's `get_file()` function will loop until the end of the file is reached, retrieving one chunk at a time.

salt.fileclient.FSClient

This client is used when `file_client` is set to `local`. This is how masterless minions request files.

This class inherits from the RemoteClient, but instead of using a transport channel (zmq, tcp, etc.), it uses a "fake" transport channel (`salt.fileserver.FSChan`), which implements its own `send()` function. Thus, when a function that the FSClient inherits from the RemoteClient runs `self.channel.send()`, it's actually calling `salt.fileserver.FSChan.send()`, which calls corresponding functions in the `salt.fileserver.Fileserver()` class. The result is that local file requests use the same code as remote file requests, they just bypass sending them through an actual transport channel and instead call them on the FSChan's Fileserver instance.

salt.fileclient.LocalClient

This client is now used exclusively by Pillar. This used to be used when `file_client` was set to `local`, but the `FSChan` class was written to allow minions with `file_client: local` to access the full set of backends. This class will probably be renamed at some point as it is often confused with `salt.client.LocalClient`.

The cp Module

Most of the user-facing interaction with the fileclient happens via the `cp` module. The functions in this module instantiate a fileclient instance (if one is not already saved to the `__context__` dunder) and run fileclient functions.

### Updating the Fileserver

The master daemon spawns a process dedicated to routine maintenance tasks upon startup. This process runs an instance of `salt.master.Maintenance`, which loops forever, running a series of functions and then sleeping for a length of time determined by the `loop_interval` config option. One of the maintenance tasks is to update the fileserver, and it essentially runs `salt.fileserver.Fileserver.update()`, which as we know from above will run all configured backends' `update()` functions, if present. This is now remote fileservers like git, hg, and svn stay up-to-date.

For the local file_client (FSClient), since it does not interact with the master, upon spawning of its FSChan it will update the fileserver.

### Salt opts dictionary

It is very common in the Salt codebase to see `opts` referred to in a number of contexts. For example, it can be seen as `__opts__` in certain cases, or simply as `opts` as an argument to a function in others. Simply put, this data structure is a dictionary of Salt’s runtime configuration information that’s passed around in order for functions to know how Salt is configured.

When writing Python code to use specific parts of Salt, it may become necessary to initialize a copy of `opts` from scratch in order to have it available for a given function.

To do so, use the utility functions available in `salt.config`.

As an example, here is how one might generate and print an options dictionary for a minion instance:

```python
code
import salt.config

opts = salt.config.minion_config("/etc/salt/minion")
print(opts)
```

To generate and display `opts` for a master, the process is similar:

```python
code
import salt.config

opts = salt.config.master_config("/etc/salt/master")
print(opts)
```

### Unicode in Salt

Though Unicode handling in large projects can often be complex, Salt adheres to several basic rules to help developers handle Unicode correctly.

(For a basic introduction to this problem, see Ned Batchelder's [excellent introduction to the topic](http://nedbatchelder.com/text/unipain/unipain.html).

Salt’s basic workflow for Unicode handling is as follows:

1. Salt should convert whatever data is passed on CLI/API to Unicode. Internally, everything that Salt does should be Unicode unless it is printing to the screen or writing to storage.

2. Modules and various Salt pluggable systems use incoming data assuming Unicode.

   2.1) For Salt modules that query an API, the module should convert the data received from the API into Unicode.
2.2) For Salt modules that shell out to get output; the module should convert data received into Unicode. (This does not apply if using the `cmd` execution module, which should handle this for you.

2.3) For Salt modules which print directly to the console (not via an outputter) or which write directly to disk, a string should be encoded when appropriate. To handle this conversion, the global variable `__salt_system_encoding__` is available, which declares the locale of the system that Salt is running on.

3) When a function in a Salt module returns a string, it should return a `unicode` type in Python 2.

4) When Salt delivers the data to an outputter or a returner, it is the job of the outputter or returner to encode the Unicode before displaying it on the console or writing it to storage.

### 31.30 Salt Community Projects

This page contains links to Salt-related projects created by community members. If you come across a useful project please add it to the list!

#### 31.30.1 Hubblestack

Hubble is a modular, open-source security compliance framework built on top of SaltStack. The project provides on-demand profile-based auditing, real-time security event notifications, automated remediation, alerting and reporting.

https://hubblestack.io/

#### 31.30.2 alkali

alkali is a collection of SaltStack states and pillar data that provide just the basics for provisioning Linux instances that may be built upon. alkali is a starter kit of sorts, to help new users to SaltStack get up-and-running quickly with the most commonly used, core packages.

https://github.com/zulily/alkali

#### 31.30.3 buoyant

buoyant leverages docker to provide an alternative to VM-centric SaltStack development environments. buoyant containers may be spun up nearly instantly, once an initial docker image has been built.

https://github.com/zulily/buoyant

#### 31.30.4 Salt Sandbox

Salt Sandbox is a multi-VM Vagrant-based Salt development environment used for creating and testing new Salt state modules outside of your production environment. It’s also a great way to learn firsthand about Salt and its remote execution capabilities.

https://github.com/elasticdog/salt-sandbox
31.30.5 Salt Vagrant Demo

A Salt Demo using Vagrant.

https://github.com/UtahDave/salt-vagrant-demo
RELEASE NOTES

This page links to the release notes for Salt, including the current, upcoming, and past releases.

- New releases and security updates are announced on the Salt Project blog. You can subscribe to an RSS feed for announcements.
- See the version numbers page for more information about the version numbering scheme.

32.1 Upcoming release

See Install a release candidate for more information about installing an RC when one is available.

32.2 Previous releases

(release-3006.0)=

32.2.1 Salt 3006.0 release notes

Onedir packaging

Going forward from the 3006.0 release, the Salt Project will only provide onedir packages to install or upgrade Salt. The classic, non-onedir packages will not be provided for supported operating systems. See Upgrade to onedir in the Salt Install Guide for information about upgrading from the classic packages to the onedir packages.

Linux Packaging Salt Master Salt User and Group

The linux Salt Master packages will now add a Salt user and group by default. The packages will add the user: salt config option to the Salt Master config. The Salt Master service will run as this user. If you do not want to run the Salt Master as a different user you can remove the user: salt config from /etc/salt/master or change the user to the desired user to run the Salt Master.

Since the Salt Master is running as a different user, you will need to ensure you set the owner and group to salt for your file_roots and pillar_roots (commonly /srv/salt and /srv/pillar).

If you are running a Salt Master, Salt-Api and a Salt Minion on the same host using the new salt user and you install a pip dependency into the onedir environment using salt-pip or the pip module, you need to to chown the directory /opt/saltstack/salt/lib/<python_version>/site-packages/ with the salt user and group.
Caveat of salt-pip

Salt ships with a wrapper script around pip called salt-pip. Users should use salt-pip to install any python packages needed to extend Salt. salt-pip installs python packages into an extras-3.10 directory located in the root of the ondir directory, by setting the --target argument for pip. This ensures those packages remain installed when upgrading Salt. There is a known bug in pip when using --target where scripts and other non-python assets may not be cleaned up properly when un-installing. The Salt team is working to resolve this bug in the up-stream pip project.

Dropping support for Python 3.5 and 3.6

Python 3.5 and 3.6 will no longer be supported by Salt since they are end of life. Going forward our policy will be to align with Python's supported versions. See Salt support for Python versions for more information.

All salt-api functionality disabled by default

All netapi clients, which provide the functionality to salt-api, will now be disabled by default as a security precaution. If you use salt-api, you must add the new netapi_enable_clients option to your salt master config. This is a breaking change and the salt-api will not function without this new configuration option. See Enabling netapi client interfaces for more information.

How do I migrate to the onedir packages?

The migration path from the classic, non-onedir packages to the onedir packages will include:

- Repo File: You need to update your repo file to point to the new repo paths for your platform. After the repo file is updated, upgrade your Salt packages.

- Pip packages: You need to ensure any 3rd party pip packages are installed in the correct onedir path. This can be accomplished in two ways:
  - salt-pip install <package name>
  - Using the pip.installed Salt state.

To install python packages into the system python environment, user's must now provide the pip_bin or bin_env to the pip state module.

For example:

```markdown
lib-foo:
  pip.installed:
    - pip_bin: /usr/bin/pip3

lib-bar:
  pip.installed:
    - bin_env: /usr/bin/python3
```
Changelog

Removed

- Remove and deprecate the `orchestration` key from `salt.runner` and `salt.wheel` return data. To get it back, set `features.enable_deprecated_orchestration_flag` master configuration option to True. The flag will be completely removed in Salt 3008 Argon. #59917
- Removed distutils and replaced with setuptools, given distutils is deprecated and removed in Python 3.12 #60476
- Removed `runtests` targets from `noxfile.py` #62239
- Removed the PyObjC dependency. This addresses problems with building a one dir build for macOS. It became problematic because depending on the macOS version, it pulls different dependencies, and we would either have to build a macos onedir for each macOS supported release, or ship a crippled onedir (because it would be tied to the macOS version where the onedir was built). Since it's currently not being used, it's removed. #62432
- Removed `SixRedirectImporter` from Salt. Salt hasn't shipped `six` since Salt 3004. #63874

Deprecated

- renamed `keep_jobs`, specifying job cache TTL in hours, to `keep_jobs_seconds`, specifying TTL in seconds. `keep_jobs` will be removed in the Argon release #55295
- Removing all references to napalm-base which is no longer supported. #61542
- The `ip_bracket` function has been moved from `salt/utils/zeromq.py` in `salt/utils/network.py` #62009
- The `expand_repo_def` function in `salt.modules.aptpkg` is now deprecated. It's only used in `salt.states.pkgrepo` and it has no use of being exposed to the CLI. #62485
- Deprecated defunct Django returner #62644
- Deprecate core ESXi and associated states and modules, vcenter and vsphere support in favor of Salt VMware Extensions #62754
- Removing manufacture grain which has been deprecated. #62914
- Removing deprecated `utils/boto3_elasticsearch.py` #62915
- Removing support for the now deprecated `_ext_nodes` from `salt/master.py`. #62917
- Deprecating the Salt Slack engine in favor of the Salt Slack Bolt Engine. #63095
- `salt.utils.version.StrictVersion` is now deprecated and it's use should be replaced with `salt.utils.version.Version`. #63383
Changed

- More intelligent diffing in changes of file.serialize state. #48609
- Move deprecation of the neutron module to Argon. Please migrate to the neutronng module instead. #49430
- umask is now a global state argument, instead of only applying to cmd states. #57803
- Update pillar.obfuscate to accept kwargs in addition to args. This is useful when passing in keyword arguments like saltenv that are then passed along to pillar.items. #58971
- Improve support for listing macOS brew casks #59439
- Add missing MariaDB Grants to mysql module. MariaDB has added some grants in 10.4.x and 10.5.x that are not present here, which results in an error when creating. Also improved exception handling in grant_add which did not log the original error message and replaced it with a generic error. #61409
- Use VENV_PIP_TARGET environment variable as a default target for pip if present. #62089
- Disabled FQDNs grains on macOS by default #62168
- Replaced pyroute2.IPDB with pyroute2.NDB, as the former is deprecated #62218
- Enhance capture of error messages for Zypper calls in zypperpkg module. #62346
- Removed GPG_1_3_1 check #62895
- Requisite state chunks now all consistently contain __id__, __sls__, and name. #63012
- netapi_enable_clients option to allow enabling/disabling of clients in salt-api. By default all clients will now be disabled. Users of salt-api will need to update their master config to enable the clients that they use. Not adding the netapi_enable_clients option with required clients to the master config will disable salt-api. #63050
- Stop relying on salt/_version.py to write Salt's version. Instead use salt/_version.txt which only contains the version string. #63383
- Set enable_fqdns_grains to be False by default. #63595
- Changelog snippet files must now have a .md file extension to be more explicit on what type of rendering is done when they are included in the main CHANGELOG.md file. #63710
- Upgraded to relenv==0.9.0 #63883

Fixed

- Add kwargs to handle extra parameters for http.query #36138
- Fix mounted bind mounts getting active mount options added #39292
- Fix sysctl.present converts spaces to tabs. #40054
- Fixes state pkg.purged to purge removed packages on Debian family systems #42306
- Fix fun_args missing from syndic returns #45823
- Fix mount.mounted with 'mount: False' reports unmounted file system as unchanged when running with test=True #47201
- Issue #49310: Allow users to touch a file with Unix date of birth #49310
- Do not raise an exception in pkg.info_installed on nonzero return code #51620
- Passes the value of the force parameter from file.copy to its call to file.remove so that files with the read-only attribute are handled. #51739
• Fixed x509.certificate_managed creates new certificate every run in the new cryptography x509 module. Please migrate to the new cryptography x509 module for this improvement. #52167
• Don’t check for cached pillar errors on state.apply #52354, #57180, #59339
• Swapping out args and kwargs for arg and kwarg respectively in the Slack engine when the command passed is a runner. #52400
• Ensure when we’re adding chunks to the rules when running aggregation with the iptables state module we use a copy of the chunk otherwise we end up with a recursive mess. #53353
• When user_create or user_remove fail, return False instead of returning the error. #53377
• Include sync_roster when sync_all is called. #53914
• Avoid warning noise in lograte.get #53988
• Fixed listing revoked keys with gpg.list_keys #54347
• Fix mount.mounted does not handle blanks properly #54508
• Fixed grain num_cpus get wrong CPUs count in case of inconsistent CPU numbering. #54682
• Fix spelling error for python_shell argument in dpkg_lower module #54907
• Cleaned up bytes response data before sending to non-bytes compatible returners (postgres, mysql) #55226
• Fixed malformed state return when testing file.managed with unavailable source file #55269
• Included stdout in error message for Zypper calls in zypperpkg module. #56016
• Fixed pillar.filter_by with salt-ssh #56093
• Fix boto_route53 issue with (multiple) VPCs. #57139
• Remove log from mine runner which was not used. #57463
• Fixed x509.read_certificate error when reading a Microsoft CA issued certificate in the new cryptography x509 module. Please migrate to the new cryptography x509 module for this improvement. #57535
• Updating Slack engine to use slack_bolt library. #57842
• Fixed warning about replace=True with x509.certificate_managed in the new cryptography x509 module. #58165
• Fix salt.modules.pip.is_installed doesn’t handle locally installed packages #58202
• Add missing MariaDB Grants to mysql module. MariaDB has added some grants in 10.4.x and 10.5.x that are not present here, which results in an error when creating. #58297
• linux_shadow: Fix cases where malformed shadow entries cause user.present states to fail. #58423
• Fixed salt.utils.compat.cmp to work with dictionaries #58729
• Fixed formatting for terse output mode #58953
• Fixed RecursiveDictDiffer with added nested dicts #59017
• Fixed x509.certificate_managed has DoS effect on master in the new cryptography x509 module. Please migrate to the new cryptography x509 module for this improvement. #59169
• Fixed saltnado websockets disconnecting immediately #59183
• Fixed x509.certificate_managed rolls certificates every now and then in the new cryptography x509 module. Please migrate to the new cryptography x509 module for this improvement. #59315
• Fix postgres_privileges.present not idempotent for functions #59585
- Fixed influxdb_continuous_query.present state to provide the client args to the underlying module on create. #59766
- Warn when using insecure (http://based) key_urls for apt-based systems in pkgrepo.managed, and add a kwarg that determines the validity of such a url. #59786
- add load balancing policy default option and ensure the module can be executed with arguments from CLI #59909
- Fix salt-ssh when using imports with extra-filerefs. #60003
- Fixed cache directory corruption startup error #60170
- Update docs remove dry_run in docstring of file.blockreplace state. #60227
- Adds Parrot to OS_Family_Map in grains. #60249
- Fixed stdout and stderr being empty sometimes when use_vt=True for the cmd.run[*] functions #60365
- Use return code in iptables --check to verify rule exists. #60467
- Fix regression pip.installed does not pass env_vars when calling pip.list #60557
- Fix xfs module when additional output included in mkfs.xfs command. #60853
- Fixed parsing new format of terraform states in roster.terraform #60915
- Fixed recognizing installed ARMv7 rpm packages in compatible architectures. #60994
- Fixing changes dict in pkg state to be consistent when installing and test=True. #60995
- Fix cron.present duplicating entries when changing timespec to special. #60997
- Made salt-ssh respect --wipe again #61083
- state.orchestrate_single only passes a pillar if it is set to the state function. This allows it to be used with state functions that don’t accept a pillar keyword argument. #61092
- Fix ipset state when the comment kwarg is set. #61122
- Fix issue with archive.unzip where the password was not being encoded for the extract function #61422
- Some Linux distributions (like AlmaLinux, Astra Linux, Debian, Mendel, Linux Mint, Pop!_OS, Rocky Linux) report different oscodename, osfullname, osfinger grains if lsb-release is installed or not. They have been changed to only derive these OS grains from /etc/os-release. #61618
- Pop!_OS uses the full version (YY.MM) in the osfinger grain now, not just the year. This allows differentiating for example between 20.04 and 20.10. #61619
- Fix ssh config roster to correctly parse the ssh config files that contain spaces. #61650
- Fix SoftLayer configuration not raising an exception when a domain is missing #61727
- Allow the minion to start or salt-call to run even if the user doesn’t have permissions to read the root_dir value from the registry #61789
- Need to move the creation of the proxy object for the ProxyMinion further down in the initialization for sub proxies to ensure that all modules, especially any custom proxy modules, are available before attempting to run the init function. #61805
- Fixed malformed state return when merge-serializing to an improperly formatted file #61814
- Made cmdmod_run[_.all]_quiet work during minion startup on MacOS with runas specified (which fixed mac_service) #61816
- When deleting the vault cache, also delete from the session cache #61821
• Ignore errors on reading license info with dpkg_lowpkg to prevent tracebacks on getting package information. #61827

• win_lgpo: Display conflicting policy names when more than one policy is found #61859

• win_lgpo: Fixed intermittent KeyError when getting policy setting using lgpo.get_policy #61860

• Fixed listing minions on OpenBSD #61966

• Make Salt to return an error on "pkg" modules and states when targeting duplicated package names #62019

• Fix return of REST-returned permissions when auth_list is set #62022

• Normalize package names once on using pkg.installed/removed with yum to make it possible to install packages with the name containing a part similar to a name of architecture. #62029

• Fix inconsistency regarding name and pkgs parameters between zypperpkg.upgrade() and yumpkg.upgrade() #62030

• Fix attr=all handling in pkg.list_pkgs() (yum/zypper). #62032

• Fixed the humanname being ignored in pkgrepo.managed on openSUSE Leap #62053

• Fixed issue with some LGPO policies having whitespace at the beginning or end of the element alias #62058

• Fix ordering of args to libcloud_storage.download_object module #62074

• Ignore extend declarations in sls files that are excluded. #62082

• Remove leftover usage of impacket #62101

• Pass executable path from _get_path_exec() is used when calling the program. The $HOME env is no longer modified globally. Only trailing newlines are stripped from the fetched secret. Pass process arguments are handled in a secure way. #62120

• Ignore some command return codes in openbsdrctl_service to prevent spurious errors #62131

• Fixed extra period in filename output in tls module. Instead of "server.crt." it will now be "server.crt". #62139

• Make sure lingering PAexec-*exe files in the Windows directory are cleaned up #62152

• Restored Salt’s DeprecationWarnings #62185

• Fixed issue with forward slashes on Windows with file.recurse and clean=True #62197

• Recognize OSMC as Debian-based #62198

• Fixed Zypper module failing on RPM lock file being temporarily unavailable. #62204

• Improved error handling and diagnostics in the proxmox salt-cloud driver #62211

• Added EndeavourOS to the Arch os_family. #62220

• Fix salt ssh not detecting platform_python as a valid interpreter on EL8 #62235

• Fix pkg.version_cmp on openEuler and a few other os flavors. #62248

• Fix localhost detection in glusterfs.peers #62273

• Fix Salt Package Manager (SPM) exception when calling spm create_repo. #62281

• Fix matcher slowness due to loader invocation #62283

• Fixes the Puppet module for non-aio Puppet packages for example running the Puppet module on FreeBSD. #62323

• Issue 62334: Displays a debug log message instead of an error log message when the publisher fails to connect #62334

32.2. Previous releases
• Fix pyobjects renderer access to opts and sls #62336
• Fix use of random shuffle and sample functions as Jinja filters #62372
• Fix groups with duplicate GIDs are not returned by get_group_list #62377
• Fix the "zpool.present" state when enabling zpool features that are already active. #62390
• Fix ability to execute remote file client methods in saltcheck #62398
• Update all platforms to use pycparser 2.21 or greater for Py 3.9 or higher, fixes fips fault with openssl v3.x #62400
• Due to changes in the Netmiko library for the exception paths, need to check the version of Netmiko python library and then import the exceptions from different locations depending on the result. #62405
• When using prereq on a state, then prereq state will first be run with test=True to determine if there are changes. When there are changes, the state with the prereq option will be run prior to the prereq state. If this state fails then the prereq state will not run and the state output uses the test=True run. However, the proposed changes are included for the prereq state are included from the test=True run. We should pull those out as there weren't actually changes since the prereq state did not run. #62408
• Added directory mode for file.copy with makedirs #62426
• Provide better error handling in the various napalm proxy minion functions when the device is not accessible. #62435
• When handling aggregation, change the order to ensure that the requisites are aggregated first and then the state functions are aggregated. Caching whether aggregate functions are available for particular states so we don't need to attempt to load them everytime. #62439
• The patch allows to bootstrap kubernetes clusters in the version above 1.13 via salt module #62451
• sysctl.persist now updates the in-memory value on FreeBSD even if the on-disk value was already correct. #62461
• Fixed parsing CDROM apt sources #62474
• Update sanitizing masking for Salt SSH to include additional password like strings. #62483
• Fix user/group checking on file state functions in the test mode. #62499
• Fix user.present to allow removing groups using optional_groups parameter and enforcing idempotent group membership. #62502
• Fix possible tracebacks if there is a package with '------' or '=======' in the description is installed on the Debian based minion. #62519
• Fixed the omitted "pool" parameter when cloning a VM with the proxmox salt-cloud driver #62521
• Fix rendering of pyobjects states in saltcheck #62523
• Fixes pillar where a corrupted CacheDisk file forces the pillar to be rebuilt #62527
• Use str() method instead of repo_line for when python3-apt is installed or not in aptpkg.py. #62546
• Remove the connection_timeout from netmiko_connection_args before netmiko_connection_args is added to context["netmiko_device"]["args"] which is passed along to the Netmiko library. #62547
• Fix order specific mount.mounted options for persist #62556
• Fixed salt-cloud cloning a proxmox VM with a specified new vmid. #62558
• Fix runas with cmd module when using the onedir bundled packages #62565
• Update setproctitle version for all platforms #62576
• Fixed missing parameters when cloning a VM with the proxmox salt-cloud driver #62580
• Handle PermissionError when importing crypt when FIPS is enabled. #62587
• Correctly reraise exceptions in states.http #62595
• Fixed syndic auth. Now jobs will be published when a valid auth user is targeting allowed minions/functions. #62618
• Updated rest_cherry/app to properly detect arg sent as a string as curl will do when only one arg is supplied. #62624
• Prevent possible tracebacks in core grains module by ignoring non utf8 characters in /proc/1/environ, /proc/1/cmdline, /proc/cmdline #62633
• Fixed vault ext pillar return data for KV v2 #62651
• Fix saltcheck _get_top_states doesn't pass saltenv to state.show_top #62654
• Fix groupadd.* functions hard code relative command name #62657
• Fixed pdbedit.create trying to use a bytes-like hash as string. #62670
• Fix dependency on legacy boto module in boto3 modules #62672
• Modified "_get_flags" function so that it returns regex flags instead of integers #62676
• Change startup ReqServer log messages from error to info level. #62728
• Fix kmod.* functions hard code relative command name #62772
• Remove mako as a dependency in Windows and macOS. #62785
• Fix mac_brew_pkg to work with null taps #62793
• Fixing a bug when listing the running schedule if "schedule.enable" and/or "schedule.disable" has been run, where the "enabled" items is being treated as a schedule item. #62795
• Prevent annoying RuntimeWarning message about line buffering (buffering=1) not being supported in binary mode #62817
• Include UID and GID checks in modules.file.check_perms as well as comparing ownership by username and group name. #62818
• Fix presence events on TCP transport by removing a client's presence when minion disconnects from publish channel correctly #62826
• Remove Azure deprecation messages from functions that always run w/ salt-cloud #62845
• Use select instead of iterating over entrypoints as a dictionary for importlib_metadata>=5.0.0 #62854
• Fixed master job scheduler using when #62858
• LGPO: Added support for missing domain controller policies: VulnerableChannelAllowList and LdapEnforceChannelBinding #62873
• Fix unnecessarily complex gce metadata grains code to use googles metadata service more effectively. #62878
• Fixed dockermod version_info function for docker-py 6.0.0+ #62882
• Moving setting the LOAD_BALANCING_POLICY_MAP dictionary into the try except block that determines if the cassandra_cql module should be made available. #62886
• Updating various MongoDB module functions to work with latest version of pymongo. #62900
• Restored channel for Syndic minions to send job returns to the Salt master. #62933
• removed _resolve_deps as it required a library that is not generally available and switched to apt-get for everything as that can auto resolve dependencies. #62934

• Updated pyzmq to version 22.0.3 on Windows builds because the old version was causing salt-minion/salt-call to hang #62937

• Allow root user to modify crontab lines for non-root users (except AIX and Solaris). Align crontab line changes with the file ones and also with listing crontab. #62940

• Fix systemd_service.* functions hard code relative command name #62942

• Fix file.symlink backupname operation can copy remote contents to local disk #62953

• Issue #62968: Fix issue where cloud deployments were putting the keys in the wrong location on Windows hosts #62968

• Fixed gpg_passphrase issue with gpg decrypt/encrypt functions #62977

• Fix file.tidied FileNotFoundError #62986

• Fixed bug where module.wait states were detected as running legacy module.run syntax #62988

• Fixed issue with win_wua module where it wouldn't load if the CryptSvc was set to Manual start #62993

• The __opts__ dunder dictionary is now added to the loader's pack if not already present, which makes it accessible via the salt.loader.context.NamedLoaderContext class. #63013

• Issue #63024: Fix issue where grains and config data were being place in the wrong location on Windows hosts #63024

• Fix btrfs.subvolume_snapshot command failing #63025

• Fix file.retention_schedule always reports changes #63033

• Fix mongo authentication for mongo ext_pillar and mongo returner

This fix also include the ability to use the mongo connection string for mongo ext_pillar #63058

• Fixed x509.create_csr creates invalid CSR by default in the new cryptography x509 module. #63103

• TCP transport documentation now contains proper master/minion-side filtering information #63120

• Fixed gpg.verify does not respect gnupghome #63145

• User responsible for the runner is now correctly reported in the events on the event bus for the runner. #63148

• Made pillar cache pass extra minion data as well #63208

• Fix serious performance issues with the file.tidied module #63231

• Fix rpm_lowpkg version comparison logic when using rpm-vercmp and only one version has a release number. #63317

• Import StrictVersion and LooseVersion from setuptools.distutils.version or setuptools._distutils.version, if first not available #63350

• service.status on Windows does no longer throws a CommandExecutionError if the service is not found on the system. It now returns "Not Found" instead. #63577

• When the shell is passed as powershell or pwsh, only wrapper the shell in quotes if cmd.run is running on Windows. When quoted on Linux hosts, this results in an error when the keyword arguments are appended. #63590

• LGPO: Added support for "Relax minimum password length limits" #63596

• Fixed the ability to set a scheduled task to auto delete if not scheduled to run again (delete_after) #63650
• When a job is disabled only increase it's _next_fire_time value if the job would have run at the current time, eg. the current _next_fire_time == now. #63699
• have salt.template.compile_template_str cleanup its temp files. #63724
• Check file is not empty before attempting to read pillar disk cache file #63729
• Fixed an issue with generating fingerprints for public keys with different line endings #63742
• Add fileserv_interval and maintenance_interval master configuration options. These options control how often to restart the FileServerUpdate and Maintenance processes. Some file server and pillar configurations are known to cause memory leaks over time. A notable example of this are configurations that use pygit2. Salt can not guarantee dependency libraries like pygit2 won't leak memory. Restarting any long running processes that use pygit2 guarantees we can keep the master's memory usage in check. #63747
• mac_xattr.list and mac_xattr.read will replace undecode-able bytes to avoid raising CommandExecutionError. #63779
• Change default GPG keyserv from pgp.mit.edu to keys.openpgp.org. #63806
• fix cherrypy 400 error output to be less generic. #63835
• Ensure kwargs is passed along to _call_apt when passed into install function. #63847
• remove eval and update logging to be more informative on bad config #63879
• add linux_distribution to util to stop dep warning #63904
• Fix valuerro when trying to close fileclient. Remove usage of del and close the filclient properly. #63920
• Handle the situation when a sub proxy minion does not init properly, eg. an exception happens, and the sub proxy object is not available. #63923
• Clarifying documentation for extension_modules configuration option. #63929
• Windows pkg module now properly handles versions containing strings #63935
• Handle the scenario when the check_cmd requisite is used with a state function when the state has a local check_cmd function but that function isn't used by that function. #63948
• Issue #63981: Allow users to pass verify_ssl to pkg.install/pkg.installed on Windows #63981
• Hardened permissions on workers.ipc and master_event_pub.ipc. #64063

Added

• Introduce a LIB_STATE_DIR syspaths variable which defaults to CONFIG_DIR, but can be individually customized during installation by specifying --salt-lib-state-dir during installation. Change the default pki_dir to <LIB_STATE_DIR>/pki/master (for the master) and <LIB_STATE_DIR>/pki/minion (for the minion). #3396
• Allow users to enable 'queue=True' for all state runs via config file #31468
• Added pillar templating to vault policies #43287
• Add support for NVMeF as a transport protocol for hosts in a Pure Storage FlashArray #51088
• A new salt-ssh roster that generates a roster by parses a known_hosts file. #54679
• Added Windows Event Viewer support #54713
• Added the win_lgpo_reg state and execution modules which will allow registry based group policy to be set directly in the Registry.pol file #56013
• Added resource tagging functions to boto_dynamodb execution module #57500

32.2. Previous releases 4883
- Added `openvswitch_db` state module and functions `bridge_to_parent`, `bridge_to_vlan`, `db_get`, and `db_set` to the `openvswitch` execution module. Also added optional `parent` and `vlan` parameters to the `openvswitch_bridge.present` state module function and the `openvswitch.bridge_create` execution module function. #58986

- State module to manage SysFS attributes #60154

- Added ability for `salt.wait_for_event` to handle `event_ids` that have a list value. #60430

- Added support for Linux ppc64le core grains (cpu_model, virtual, productname, manufacturer, serialnumber) and arm core grains (serialnumber, productname) #60518

- Added autostart option to `virt.defined` and `virt.running` states, along with `virt.update` execution modules. #60700

- Added `.0` back to our versioning scheme for future versions (e.g. 3006.0) #60722

- Initial work to allow parallel startup of proxy minions when used as sub proxies with Deltaproxy. #61153

- Added node label support for GCE #61245

- Support the `-priority` flag when adding sources to Chocolatey. #61319

- Add namespace option to `ext_pillar.http_json` #61335

- Added a filter function to `ps` module to get a list of processes on a minion according to their state. #61420

- Add `postgres.timeout` option to `postgres` module for limiting `postgres` query times #61433

- Added new optional vault option, `config_location`. This can be either `master` or `local` and defines where vault will look for connection details, either requesting them from the master or using the local config. #61857

- Add `ipwrap()` Jinja filter to wrap IPv6 addresses with brackets. #61931

- `tcp` transport is now available in ipv6-only network #62009

- Add `diff_attr` parameter to `pkg.upgrade()` (zypper/yum). #62031

- `Config` option `pass_variable_prefix` allows to distinguish variables that contain paths to pass secrets. `Config` option `pass_strict_fetch` allows to error out when a secret cannot be fetched from pass. `Config` option `pass_dir` allows setting the `PASSWORD_STORE_DIR` env for pass. `Config` option `pass_gnupghome` allows setting the `$GNUPGHOME` env for pass. #62120

- Add `file.pruned` state and expanded `file.rmdir` exec module functionality #62178

- Added "dig.PTR" function to resolve PTR records for IPs, as well as tests and documentation #62275

- Added the ability to remove a KB using the DISM state/execution modules #62366

- Add "python" subcommand to allow execution or arbitrary scripts via bundled Python runtime #62381

- Add ability to provide conditions which convert normal state actions to no-op when true #62446

- Added debug log messages displaying the command being run when installing packages on Windows #62480

- Add `biosvendor` grain #62496

- Add `ifelse` Jinja function as found in CFEngine #62508

- Implementation of Amazon EC2 instance detection and setting `virtual_subtype` grain accordingly including the product if possible to identify. #62539

- Adds `__env__substitution` to `ext_pillar.stack`; followup of #61531, improved exception handling for stacked template (jinja) template rendering and yaml parsing in `ext_pillar.stack` #62578

- Increase `file.tidied` flexibility with regard to age and size #62678
• Added "connected_devices" feature to netbox pillar module. It contains extra information about devices connected to the minion #62761
• Add atomic file operation for symlink changes #62768
• Add password/account locking/unlocking in user.present state on supported operating systems #62856
• Added onchange configuration for script engine #62867
• Added output and bare functionality to export_key gpg module function #62978
• Add keyvalue serializer for environment files #62983
• Add ability to ignore symlinks in file.tidied #63042
• salt-cloud support IMDSv2 tokens when using 'use-instance-role-credentials' #63067
• Fix running fast tests twice and add git labels to suite. #63081
• Add ability for file.symlink to not set ownership on existing links #63093
• Restore the previous slack engine and deprecate it, rename replace the slack engine to slack_bolt until deprecation #63095
• Add functions that will return the underlying block device, mount point, and filesystem type for a given path #63098
• Add ethtool execution and state module functions for pause #63128
• Add boardname grain #63131
• Added management of ECDSA/EdDSA private keys with x509 modules in the new cryptography x509 module. Please migrate to the new cryptography x509 module for this improvement. #63248
• Added x509 modules support for different output formats in the new cryptography x509 module. Please migrate to the new cryptography x509 module for this improvement. #63249
• Added deprecation_warning test state for ensuring that deprecation warnings are correctly emitted. #63315
• Adds a state_events option to state.highstate, state.apply, state.sls, state.sls_id. This allows users to enable state_events on a per use basis rather than having to enable them globally for all state runs. #63316
• Allow max queue size setting for state runs to prevent performance problems from queue growth #63356
• Add support of exposing meta_server_grains for Azure VMs #63606
• Include the version of relyenv in the versions report. #63827
• Added debug log messages displaying the command being run when removing packages on Windows #63866
• Adding the ability to exclude arguments from a state that end up passed to cmd.retcode when requisites such as onlyif or unless are used. #63956
• Add --next-release argument to salt/version.py, which prints the next upcoming release. #64023

32.2. Previous releases 4885
Security

• Upgrade Requirements Due to Security Issues.
  – Upgrade to cryptography>=39.0.1 due to:
    ∗ https://github.com/advisories/GHSA-x4qr-2fvf-3mr5
    ∗ https://github.com/advisories/GHSA-w7pp-m8wf-vj6r
  – Upgrade to pyopenssl==23.0.0 due to the cryptography upgrade.
  – Update to markdown-it-py==2.2.0 due to:
    ∗ https://github.com/advisories/GHSA-jrwr-5x3p-hvc3
    ∗ https://github.com/advisories/GHSA-vrjv-mxr7-vjf8 #63882

(release-3006.1)=

32.2.2 Salt 3006.1 release notes

Changelog

Fixed

• Check that the return data from the cloud create function is a dictionary before attempting to pull values out. #61236
• Ensure NamedLoaderContext’s have their value() used if passing to other modules #62477
• add documentation note about reactor state ids. #65589
• Added support for test=True to the file.cached state module #63785
• Updated source_hash documentation and added a log warning when source_hash is used with a source other than http, https and ftp. #63810
• Fixed clear pillar cache on every highstate and added clean_pillar_cache=False to saltutil functions. #64081
• Fix dmsetup device names with hyphen being picked up. #64082
• Update all the scheduler functions to include a fire_event argument which will determine whether to fire the completion event onto the event bus. This event is only used when these functions are called via the schedule execution modules. Update all the calls to the schedule related functions in the deltaproxy proxy minion to include fire_event=False, as the event bus is not available when these functions are called. #64102, #64103
• Default to a 0 timeout if none is given for the terraform roster to avoid -o ConnectTimeout=None when using salt-ssh #64109
• Disable class level caching of the file client on SaltCacheLoader and properly use context managers to take care of initialization and termination of the file client. #64111
• Fixed several file client uses which were not properly terminating it by switching to using it as a context manager whenever possible or making sure .destroy() was called when using a context manager was not possible. #64113
• Fix running setup.py when passing in --salt-config-dir and --salt-cache-dir arguments. #64114
• Moved /etc/salt/proxy and /lib/systemd/system/salt-proxy@.service to the salt-minion DEB package #64117
• Stop passing **kwargs and be explicit about the keyword arguments to pass, namely, to cp.cache_file call in salt.states.pkg #64118
· \texttt{lgpo\_reg.set\_value} now returns \texttt{True} on success instead of \texttt{None} #64126
· Make salt user's home `/opt/saltstack/salt` #64141
· Fix \texttt{cmd.run} doesn't output changes in test mode #64150
· Move salt user and group creation to common package #64158
· Fixed issue in salt-cloud so that multiple masters specified in the cloud are written to the minion config properly #64170
· Make sure the \texttt{salt-ssh} CLI calls it's \texttt{fsclient.destroy()} method when done. #64184
· Stop using the deprecated \texttt{salt.transport.client} imports. #64186
· Add a \texttt{.pth} to the Salt onedir env to ensure packages in extras are importable. Bump relevenv to 0.12.3. #64192
· Fix \texttt{lgpo\_reg} state to work with User policy #64200
· Cloud deployment directories are owned by salt user and group #64204
· \texttt{lgpo\_reg} state now enforces and reports changes to the registry #64222

(Release-3006.2)=

### 32.2.3 Salt 3006.2 release notes

#### Changelog

**Fixed**

- In scenarios where PythonNet fails to load, Salt will now fall back to WMI for gathering grains information #64897

#### Security

- fix CVE-2023-20897 by catching exception instead of letting exception disrupt connection #cve-2023-20897
- Fixed \texttt{gitfs} \texttt{cachedir\_basename} to avoid hash collisions. Added MP Lock to \texttt{gitfs}. These changes should stop race conditions. #cve-2023-20898
- Upgrade to \texttt{requests==2.31.0}

Due to:

- [https://github.com/advisories/GHSA-j8r2-6x86-q33q](https://github.com/advisories/GHSA-j8r2-6x86-q33q) #64336

- Upgrade to \texttt{cryptography==41.0.3} (and therefor \texttt{pyopenssl==23.2.0} due to [https://github.com/advisories/GHSA-jm77-qphf-c4w8](https://github.com/advisories/GHSA-jm77-qphf-c4w8))

This only really impacts pip installs of Salt and the windows onedir since the linux and macos onedir build every package dependency from source, not from pre-existing wheels.

Also resolves the following cryptography advisories:

Due to:

- [https://github.com/advisories/GHSA-5cpq-8wj7-hf2v](https://github.com/advisories/GHSA-5cpq-8wj7-hf2v)
- [https://github.com/advisories/GHSA-x4qr-2fvf-3mr5](https://github.com/advisories/GHSA-x4qr-2fvf-3mr5)
- [https://github.com/advisories/GHSA-w7pp-m8wf-vj6r](https://github.com/advisories/GHSA-w7pp-m8wf-vj6r)
There is no security upgrade available for Py3.5 #64595

- Bump to certifi==2023.07.22 due to https://github.com/advisories/GHSA-xqr8-7jwr-rhp7 #64718
- Upgrade relenv to 0.13.2 and Python to 3.10.12
  
  Addresses multiple CVEs in Python's dependencies: https://docs.python.org/release/3.10.12/whatsnew/changelog.html#python-3-10-12 #64719

(release-3006.3)=

32.2.4 Salt 3006.3 release notes

Changelog

Removed

- Fedora 36 support was removed because it reached EOL #64315
- Handle deprecation warnings:
  - Switch to FullArgSpec since Py 3.11 no longer has ArgSpec, deprecated since Py 3.0
  - Stop using the deprecated cgi module
  - Stop using the deprecated pipes module
  - Stop using the deprecated imp module #64553

Changed

- Replace libnacl with PyNaCl #64372
- Don't hardcode the python version on the Salt Package tests and on the pkg/debian/salt-cloud. postinst file #64553
- Some more deprecated code fixes:
  - Stop using the deprecated locale.getdefaultlocale() function
  - Stop accessing deprecated attributes
  - pathlib.Path.__enter__() usage is deprecated and not required, a no-op #64565
- Bump to pyyaml==6.0.1 due to https://github.com/yaml/pyyaml/issues/601 and address lint issues #64657

Fixed

- Fix for assume role when used salt-cloud to create aws ec2. #52501
- fixes aptpkg module by checking for blank comps. #58667
- wheel.file_roots.find is now able to find files in subdirectories of the roots. #59800
- pkg.latest no longer fails when multiple versions are reported to be installed (e.g. updating the kernel) #60931
- Do not update the credentials dictionary in utils/aws.py while iterating over it, and use the correct delete functionality #61049
- fixed runner not having a proper exit code when runner modules throw an exception. #61173
• `pip.list_all_versions` now works with `index_url` and `extra_index_url` #61610
• speed up `file.recurse` by using prefix with `cp.list_master_dir` and remove an un-needed loop. #61998
• Preserve test=True condition while running sub states. #62590
• Job returns are only sent to originating master #62834
• Fixes an issue with failing subsequent state runs with the `lgpo` state module. The `lgpo.get_policy` function now returns all boolean settings. #63296
• Fix SELinux get policy with trailing whitespace #63336
• Fixes an issue with boolean settings not being reported after being set. The `lgpo.get_policy` function now returns all boolean settings. #63473
• Ensure body is returned when `salt.utils.http` returns something other than 200 with tornado backend. #63557
• Allow long running pillar and file client requests to finish using `request_channel_timeout` and `request_channel_tries` minion config. #63824
• Fix `state_queue` type checking to allow int values #64122
• Call global logger when catching `pip.list` exceptions in states.pip.installed Rename global logger `log` to `logger` inside `pip_state` #64169
• Fixes permissions created by the Debian and RPM packages for the salt user.

The salt user created by the Debian and RPM packages to run the salt-master process, was previously given ownership of various directories in a way which compromised the benefits of running the salt-master process as a non-root user.

This fix sets the salt user to only have write access to those files and directories required for the salt-master process to run. #64193
• Fix `user.present` state when groups is unset to ensure the groups are unchanged, as documented. #64211
• Fixes issue with MasterMinion class loading configuration from `/etc/salt/minion.d/*.conf.`

The MasterMinion class (used for running orchestrations on master and other functionality) was incorrectly loading configuration from `/etc/salt/minion.d/*.conf` when it should only load configuration from `/etc/salt/master` and `/etc/salt/master.d/*.conf`. #64219
• Fixed issue in `mac_user.enable_auto_login` that caused the user's keychain to be reset at each boot #64226
• Fixed `KeyError` in logs when running a state that fails. #64231
• Fixed `x509_v2.create_private_key/create_crl unknown kwargs: __pub_fun...` #64232
• remove the hard coded python version in error. #64237
• `salt-pip` now properly errors out when being called from a non onedir environment. #64249
• Ensure we return an error when adding the key fails in the pkgrepo state for debian hosts. #64253
• Fixed file client private attribute reference on `SaltMakoTemplateLookup` #64280
• Fix `pkgrepo.absent` failures on apt-based systems when repo either a) contains a trailing slash, or b) there is an arch mismatch. #64286
• Fix detection of Salt codename by "salt_version" execution module #64306
• Ensure selinux values are handled lowercase #64318
• Remove the `clr.AddReference`, it is causing an `Illegal characters in path` exception #64339
• Update `pkg.group_installed` state to support repo options #64348
- Fix salt user login shell path in Debian packages #64377
- Allow for multiple users' keys presented when authenticating, for example: root, salt, etc. #64398
- Fixed an issue with lgpo_reg where existing entries for the same key in Registry.pol were being overwritten in subsequent runs if the value name in the subsequent run was contained in the existing value name. For example, a key named SetUpdateNotificationLevel would be overwritten by a subsequent run attempting to set UpdateNotificationLevel #64401
- Add search for %ProgramData%\Chocolatey\choco.exe to determine if Chocolatey is installed or not #64427
- Fix regression for user.present on handling groups with dupe GIDs #64430
- Fix inconsistent use of args in ssh_auth.managed #64442
- Ensure we raise an error when the name argument is invalid in pkgrepo.managed state for systems using apt. #64451
- Fix file.symlink will not replace/update existing symlink #64477
- Fixed salt-ssh state.* commands returning retcode 0 when state/pillar rendering fails #64514
- Fix pkg.install when using a port in the url. #64516
- win_pkg Fixes an issue runing pkg_install with version=latest where the new installer would not be cached if there was already a cached present with the same name. #64519
- Added a test:full label in the salt repository, which, when selected, will force a full test run. #64539
- Syndic's async_req_channel uses the asynchronous version of request channel #64552
- Ensure runners properly save information to job cache. #64570
- Added salt.ufw to salt-master install on Debian and Ubuntu #64572
- Added support for Chocolatey 2.0.0+ while maintaining support for older versions #64622
- Updated semanage fcontext to use --modify if context already exists when adding context #64625
- Preserve request client socket between requests. #64627
- Show user friendly message when pillars timeout #64651
- File client timeouts during jobs show user friendly errors instead of tracbacks #64653
- SaltClientError does not log a traceback on minions, we expect these to happen so a user friendly log is shown. #64729
- Look in location salt is running from, this accounts for running from an unpacked onedir file that has not been installed. #64877
- Preserve credentials on spawning platforms, minions no longer re-authenticate with every job when using multiprocessing=True. #64914
- Fixed uninstaller to not remove the salt directory by default. This allows the extras-3.## folder to persist so salt-pip dependencies are not wiped out during an upgrade. #64957
- fix msteams by adding the missing header that Microsoft is now enforcing. #64973
- Fix env and improve cache cleaning see more info at pull #65017. #65002
- Better error message on inconsistent decoded payload #65020
- Handle permissions access error when calling lsb_release with the salt user #65024
- Allow schedule state module to update schedule when the minion is offline. #65033
- Fixed creation of wildcard DNS in SAN in x509_v2 #65072
• The macOS installer no longer removes the extras directory #65073

Added

• Added a script to automate setting up a 2nd minion in a user context on Windows #64439
• Several fixes to the CI workflow:
  – Don't override the `on` Jinja block on the `ci.yaml` template. This enables reacting to labels getting added/removed to/from pull requests.
  – Switch to using `tools` and re-use the event payload available instead of querying the GH API again to get the pull request labels
  – Concentrate test selection by labels to a single place
  – Enable code coverage on pull-requests by setting the `test:coverage` label #64547

Security

• Upgrade to `cryptography==41.0.3` (and therefore `pyopenssl==23.2.0`) due to https://github.com/advisories/GHSA-jm77-qphf-c4w8

This only really impacts pip installs of Salt and the windows onedir since the linux and macOS onedir build every package dependency from source, not from pre-existing wheels.

Also resolves the following cryptography advisories:

Due to:

  – https://github.com/advisories/GHSA-5cpq-8wj7-hf2v
  – https://github.com/advisories/GHSA-x4qr-2fvf-3mr5
  – https://github.com/advisories/GHSA-w7pp-m8wf-vj6r #64595

• Bump to `aiohttp==3.8.5` due to https://github.com/advisories/GHSA-45c4-8wx5-qw6w #64687
• Bump to `certifi==2023.07.22` due to https://github.com/advisories/GHSA-xqr8-7jwr-rhp7 #64718
• Upgrade `relenv` to 0.13.2 and Python to 3.10.12

Addresses multiple CVEs in Python's dependencies: https://docs.python.org/release/3.10.12/whatsnew/changelog.html#python-3-10-12 #64719

• Update to `gitpython>=3.1.32` due to https://github.com/advisories/GHSA-pr76-5cm5-w9cj #64988

(release-3006.4)=

### 32.2.5 Salt 3006.4 release notes

Changelog

Security

• Fix CVE-2023-34049 by ensuring we do not use a predictable name for the script and correctly check returncode of scp command. This only impacts salt-ssh users using the pre-flight option. #cve-2023-34049
• Update to `gitpython>=3.1.35` due to https://github.com/advisories/GHSA-wfm5-v35h-vwf4 and https://github.com/advisories/GHSA-cwvm-v4w8-q58e #65163

32.2. Previous releases 4891
Salt Documentation, Release 3006.4

- Bump to cryptography==41.0.4 due to https://github.com/advisories/GHSA-v8gr-m533-ghj9 #65268
- Upgrade relenv to 0.13.12 to address CVE-2023-4807 #65316
- Bump to urllib3==1.26.17 or urllib3==2.0.6 due to https://github.com/advisories/GHSA-v845-jxx5-vc9f #65334
- Bump to gitpython==3.1.37 due to https://github.com/advisories/GHSA-cwvm-v4w8-q58c #65383

32.2.6 Salt 3005 release notes - Codename Phosphorus

Python 3.5 and 3.6 deprecation

This will be the last release we will support Python versions 3.5 and 3.6. In Salt release 3006, we will only support Python versions 3.7 and higher. Going forward, our policy will be to align with Python's supported versions.

OS support end of life

Debian and Raspbian 9 are now EOL, therefore we will no longer be building packages for these platforms.

Raspberry Pi

We will no longer build the Raspberry Pi packages after the 3005 release but will provide open sources project links in an updated announcement later. Please see the announcement for more details: https://saltproject.io/salt-project-announces-the-open-sourcing-of-several-saltstack-native-minions/

New packages available

With the release of Salt 3005, we are pleased to announce the new onedir packages using pyinstaller are now out of beta and ready for production. These new packages make the installation process easier. Onedir packages install Salt with one directory that includes all the executables Salt needs to run effectively, including the version of Python and the required dependencies that Salt needs. These packages make it easier to use Salt out of the box without installing Python first.

Going forward, any new OS platforms supported by the Salt Project from version 3005 can only be installed using onedir packages. For this release, this includes Redhat 9, Ubuntu 22.04, and Photon OS 3. The Salt Project will phase out the old ("classic") Salt package builds for currently supported operating systems by 3006. See Upgrade to onedir for more information.

On the day of the Phosphorus release, the onedir packages will be available on https://repo.saltproject.io for each platform. The instructions for installing onedir packages and the classic packages will be available on the new Salt Install Guide.

If you want to test out the packages today, you can install them from https://repo.saltproject.io/salt-dev/py3/ using the correct directory for your platform. If you find any issues with the packages, please open an issue on this repo: https://gitlab.com/saltstack/open/salt-pkg
Classic, non-onedir packaging support

The classic, non-onedir packaging system previously used for Salt will also be provided for platforms supported in previous Salt versions. The classic packaging will only be available for the 3005 release. The 3006 release and all releases going forward will only provide the onedir packages.

Platform package support

Note that the onedir paths above will not be available until the day of the Phosphorus release.

How do I migrate to the onedir packages?

The migration path from the classic, non-onedir packages to the onedir packages will include:

- Repo File: You need to update your repo file to point to the new repo paths for your platform. After the repo file is updated, upgrade your Salt packages.

- Pip packages: You need to ensure any 3rd party pip packages are installed in the correct onedir path. This can be accomplished in two ways:
  - `salt-pip install <package name>`
  - Using the `pip.installed` Salt state.
To install python packages into the system python environment, users must now provide the `pip_bin` or `bin_env` to the pip state module.

For example:

```yaml
lib-foo:
  pip.installed:
    - pip_bin: /usr/bin/pip3

lib-bar:
  pip.installed:
    - bin_env: /usr/bin/python3
```

**Known issues**

- To make use of Salt 3005 or later on a Salt master connected to SaltStack Config, you must use SaltStack Config version 8.9.0 or later.

  The root cause of the issue is a breaking change to `AsyncClient._proc_function()` in Salt, which is the function that the raas-master uses to run `salt-run` commands. As this is a private API, there's no expectation that the API should remain backward-compatible.

  It is recommended to upgrade SaltStack Config before upgrading your Salt masters. However, if a Salt master is upgraded to version 3005 before upgrading SaltStack Config, the upgrade can still be completed.

  After upgrading SaltStack Config, including the SSC plugin on each Salt master, restart the Salt masters.

- Salt does not currently support napalm 4. Users will need to install napalm 3.x to ensure they do not run into issue #62468

**Removed**

- Deprecating and removing salt-unity. (#56055)
- Removed support for macos mojave (#61130)
- Remove the `grains.get_or_set_hash` function. Please reference pillar and SDB documentation for secure ways to manage sensitive information. Grains are an insecure way to store secrets. (#61691)
- Removed the `telnet_port`, `serial_type` and `console` parameters in `salt/modules/virt.py`. Use the `serials` and `consoles` parameters instead. Use the `serials` parameter with a value like `{{{ 'type': 'tcp', 'protocol': 'telnet', 'port': {} }}}` instead and a similar `consoles` parameter. (#61693)
- Remove `remove_lock` in `zypperpkg.py` in favor of `unhold`. Remove `add_lock` in `zypperpkg.py` in favor of `hold`. (#61694)
- Removed support for old-style Windows Group Policy names Recommended policy names will be displayed in comments (#61696)
- Remove the feature flag `feature.enable_slsvars_fixes` and enable the fixes for `sls_path`, `tpl_file`, and `tpldir` by default. Enabling this behavior by default will fix the following: - `tpldir`: If your directory name and your SLS file name are the same `tpldir` used to return a ., now it returns the correct directory name. - `slspath,slsdotpath,slscolonpath,sls_path`: If an init.sls file is accessed by its explicit name `path.to.init` instead of `path.to`, init shows up as a directory for in various sls context parameters, now it will only show as a file. - `tplfile`: When using `tplfile` in a SLS file in the root directory of file roots it returns empty. Now it returns the filename. (#61697)
• Remove SaltMessageServer.shutdown in favor of close. Remove LoadBalancerWorker.stop in favor of close. (#61698)

• Removed the PyObjC dependency.

This addresses problems with building a one dir build for macOS. It became problematic because depending on the macOS version, it pulls different dependencies, and we would either have to build a macOS onedir for each macOS supported release, or ship a crippled onedir (because it would be tied to the macOS version where the onedir was built). Since it’s currently not being used, it’s removed. (#62432)

Deprecated

• In etcd_util, the recursive kwarg in the read and delete methods has been deprecated in favor of recurse for both client versions. In etcd_util, the index kwarg in the watch method has been deprecated in favor of start_revision for both client versions. In etcd_util, the waitIndex kwarg in the read method has been deprecated in favor of start_revision for both client versions. The etcd API v2 implementation has been deprecated in favor of etcd API v3. (#60325)

• Deprecated transport kwarg inside salt.utils.event.get_event (#61275)

• Deprecated netmiko_conn and pyeapi_conn in napalm_mod.py as these function should not be called from the CLI (#61566)

• Deprecate all Azure cloud modules (#62183)

• Deprecated defaults and preserve_context for salt.utils.functools.namespaced_function. Additionally, the behavior when preserve_namespace=True was passed is now the default in order not to require duplicating imports on the modules that are namespaces functions. (#62272)

• Added a pyinstaller hook that traverses the python used on the tiamat package to add all possible modules as hidden imports. (#62362)

• Fix use of random shuffle and sample functions as Jinja filters (#62372)

• All of the requirements provided in the requirements files are now included. The job of evaluating platform markers is not Salt’s it’s pip’s. (#62392)

• Update all platforms to use pycparser 2.21 or greater for Py 3.9 or higher, fixes fips fault with openssl v3.x (#62400)

• Due to changes in the Netmiko library for the exception paths, need to check the version of Netmiko python library and then import the exceptions from different locations depending on the result. (#62405)

• Deprecated the cassandra module in favor of the cassandra_cql module/returner. (#62327)

Changed

• alternatives: Do not access /var/lib/dpkg/alternatives directly (#58745)

• Enhance logging when there are errors at loading beacons (#60402)

• Updated mysql cache module to also store updated timestamp, making it consistent with default cache module. Users of mysql cache should ensure database size before updating, as ALTER TABLE will add the timestamp column. (#61081)

• Changed linux_shadow to test success of commands using cmd.retcode instead of cmd.run (#61932)

• zabbix.user_get returns full user info with groups and medias zabbix.user_addmedia returns error for Zabbix 4.0+ due to user.addmedia method removal zabbix.user_deletemedia returns error for Zabbix 4.0+ due to user.deletemedia method removal (#62012)
- "Sign before ending the testrun in x509.create_certificate" (#62100)

## Fixed

- Fix salt-ssh using sudo with a password (#8882)
- Fix SSH password regex to not search for content after password:. (#25721)
- Addressing a few issues when having keep_symlinks set to True with file.recurse. Also allow symlinks that are outside the salt fileserver root to be discoverable as symlinks when fileserver_followsymlinks is set to False. (#29562)
- Serialize to JSON only non string objects. (#35215)
- Fix archive.extracted doesn’t set user/group ownership correctly (#38605)
- Make sys.argspec work on functions with annotations (#48735)
- Fixed pdbedit.list_users with Samba 4.8 (#49648)
- Fixes a scenario where ipv6 is enabled but the master is configured as an ipv4 IP address. (#49835)
- Ensure that NOTIFY_SOCKET is not passed to child processes created with cmdmod unless it’s set explicitly for such call. (#50851)
- Remove escaping of dbname in mysql.alter_db function. (#51559)
- Fix runit module failing to find service if it is not symlinked. (#52759)
- Changed manage.versions to report minions offline if minion call fails. (#53513)
- Fixed events stream from /events endpoint not halting when auth token has expired. (#53742)
- Fixed user.present which was breaking when updating workphone,homephone, fullname and "other" fields in case int was passed instead of string (#53961)
- Fix error in webutil state module when attempting to grep a file that does not exist. (#53977)
- Fixed ability to modify the "Audit: Force audit policy subcategory settings..." policy (#54301)
- Fix timeout handling in netapi/saltnado. (#55394)
- Fixing REST auth so that we actually support using ACLs from the REST server like we said in the documentation. (#55654)
- Salt now correctly handles macOS after Py3.8 where python defaults to spawn instead of fork. (#55847)
- Factor out sum and sorting of permissions into separate functions. Additionally, the same logic was applied to the rest_cherrypy netapi (#56495)
- Display packages that are marked NoRemove in pkg.list_pkgs for Windows platforms (#56864)
- Attempt to fix 56957 by detecting the broken recursion and stopping it. (#56957)
- Fixed bytes vs. text issue when using sqlite for sdb backend. (#57133)
- Ensure test is added to opts when using the state module with salt-ssh. (#57144)
- Fixed RuntimeError OrderedDict mutated in network.managed for Debian systems. (#57721)
- Improved the multiprocessing classes to better handle spawning platforms (#57742)
- Config options are enforced according to config type (#57873)
- Fixed 57992 fix multi item kv v2 items read. (#57992)
• Fixed thread leak during FQDN lookup when DNS entries had malformed PTR records, or other similar issues. (#58141)
• Remove unnecessary dot in template that cause the bridge interface to fail on debian. Fixes #58195 (#58195)
• update salt.module.schedule to check the job_args and job_kwargs for valid formatting. (#58329)
• Allowe use of roster in salt.function state when using the SSH client. (#58662)
• Detect new and legacy styles of calling module.run and support them both. (#58763)
• Clean repo uri before checking if it's present, avoiding ghost change. (#58807)
• Fix error "'_opts__' is not defined" when using the boto v2 modules (#58934)
• hgfs: fix bytes vs str issues within hgfs. (#58963)
• Fixes salt-ssh error when targetting IPs or hostnames directly. (#59033)
• Allow for multiple configuration entries with keyword strict_config=False on yum-based systems (#59090)
• Fixed error when running legacy code in winrepo.update_git_repos (#59101)
• Clarify the persist argument in the scheduler module. Adding code in the list function to indicate if the schedule job is saved or not. (#59102)
• Swap ret["retcode"] for ret.get("retcode") in the event that there is no retcode, eg. when a function is not passed with a module. (#59331)
• Fix race condition when caching vault tokens (#59361)
• The ssh module now accepts all ssh public key types as of openssh server version 8.7. (#59429)
• Set default transport and port settings for Napalm NXOS, if not set. (#59448)
• Use __salt_system_encoding__ when retrieving keystore certificate SHA1 str (#59503)
• Fix error being thrown on empty flags list given to file.replace (#59554)
• Update url for ez_setup.py script in virtualenv_mod.py (#59604)
• Changed yumpkg module to normalize versions to strings when they were ambiguously floats (example version=3005.0). (#59705)
• Fix pillar_roots.write on subdirectories broken after CVE-2021-25282 patch. (#59935)
• Improved performance of zfs.filesystem_present and zfs.volume_present. When applying these states, only query specified ZFS properties rather than all properties. (#59970)
• Fixed highstate outputter not displaying with salt.function in orchestration when module returns a dictionary. (#60029)
• Update docs where python-dateutil is required for schedule. (#60070)
• Send un-parsed username to LookupAccountName function (#60076)
• Fix ability to set propagation on a folder to "this_folder_only" (#60103)
• Fix name attribute access error in spm. (#60106)
• Fix zeromq stream.send exception message (#60228)
• Exit gracefully on ctrl+c. (#60242)
• Corrected import statement for redis_cache in cluster mode. (#60272)
• loader: Fix loading grains with annotations (#60285)
• fix docker_network.present when com.docker.network.bridge.name is being used as the unixes can not have a bridge of the same name (#60316)

• Fix exception in yumpkg.remove for not installed package on calling pkg.remove or pkg.removed (#60356)

• Batch runs now return proper retcodes in a tuple of the form (result, retcode) (#60361)

• Fixed issue with ansible roster __virtual__ when ansible is not installed. (#60370)

• Fixed error being thrown when None was passed as src/defaults or dest to defaults.update and defaults.merge (#60431)

• Allow for additional options for xmit hash policy in mode 4 NIC bonding on Redhat (#60583)

• Properly detect VMware grains on Windows Server 2019+ (#60593)

• Allow for minion failure to respond to job sent in batch mode (#60724)

• The mac assistive execution module no longer shells out to change the database. (#60819)

• Fix regression in win_timezone.get_zone which failed to resolve specific timezones that begin or end with d/s/t/o/f/_ characters (#60829)

• The TCP transport resets it's unpacker on stream disconnects (#60831)

• Moving the call to the validate function earlier to ensure that beacons are in the right format before we attempt to do anything to the configuration. Adding a generic validation to ensure the beacon configuration is in the wrong format when a validation function does not exist. (#60838)

• Update the mac installer welcome and conclusion page, add docs for the salt-config tool (#60858)

• Fixed external node classifier not callable due to wrong parameter (#60872)

• Adjust Debian/Ubuntu package use of name 'ifenslave-2.6' to 'ifenslave' (#60876)

• Clear and update the Pillar Cache when running saltutil.refresh_pillar. This only affects users that have pillar_cache set to True. If you do not want to clear the cache you can pass the kwarg clean_cache=False to saltutil.refresh_pillar. (#60897)

• Handle the situation when apt repo lines have or do not have trailing slashes properly. (#60907)

• Fixed Python 2 syntax for Python 3, allow for view objects returned by dictionary keys() function (#60909)

• Fix REST CherryPY append the default permissions every request (#60955)

• Do not consider "skipped" targets as failed for "ansible.playbooks" states (#60983)

• Fix behavior for internal "_netlink_tool_remote_on" to filter results based on requested end (#61017)

• schedule.job_status module: Convert datetime objects into formatted strings (#61043)

• virt: don't crash if console doesn't have service or type attribute (#61054)

• Fixed conflict between importlib_metadata from Salt and importlib.metadata from Python 3.10 (#61062)

• sys.argspec now works with pillar.get, vault.read_secret, and vault.list_secrets (#61084)

• Set virtual grain on FreeBSD EC2 instances (#61094)

• Fixed v3004 windows minion failing to open log file at C:ProgramDataSalt ProjectSaltvarlogsaltminion (#61113)

• Correct returned result to False when an error exception occurs for pip.installed (#61117)

• fixed extend being too strict and wanting the system_type to exist when it is only needed for requisites. (#61121)

• Fixed bug where deserialization in script engine would throw an error after all output was read. (#61124)
• Adding missing import for salt.utils.beacons into beacons that were updated to use it. (#61135)
• added exception catch to salt.utils.vt.terminal.isalive(). (#61160)
• Re-factor transport to make them more plug-able (#61161)
• Remove max zeromq pinned version due to issues on FreeBSD (#61163)
• Fixing deltaproxycodetohandlethesituationwherethecontrolproxyisconfiguredtocontrolaproxyminion
whose pillar data could not be loaded. (#61172)
• Prevent get_tops from performing a Set operation on a List (#61176)
• Make "state.highstate" to acts on concurrent flag. Simplify "transactional_update" module to not use SSH
wrapper and allow more flexible execution (#61188)
• Fix a failure with salt.utils.vault.make_request when namespace is not defined in the connection. (#61191)
• Fix race condition in salt.utils.verify.verify_env and ignore directories starting with dot (#61192)
• LGPO: Search for policies in a case-sensitive manner first, then fall back to non case-sensitive names (#61198)
• Fixed state includes in dynamic environments (#61200)
• Minimize the number of network connections minions to the master (#61247)
• Fix salt-call event.event with pillar or grains (#61252)
• Fixed failing dcs.compile_config where a successful compile errored with AttributeError: 'list' object has no
attribute 'get'. (#61261)
• Make the salt.utils.win_dacl.get_name() function include the "NT Security" prefix for Virtual Accounts. Virtual
Accounts can only be added with the fully qualified name. (#61271)
• Fixed tracebacks and print helpful error message when proxy_return = True but no platform or primary_ip
set in NetBox pillar. (#61277)
• Ensure opts is included in pack for minion_mods and config loads opts from the named_context. (#61297)
• Added prefix length info for IPv6 addresses in Windows (#61316)
• Handle MariaDB 10.5+ SLAVE MONITOR grant (#61331)
• Fix secondary ip addresses being added to ip4_interfaces and ip6_interfaces at the same time (#61370)
• Do not block the deltaproxystartup. Wrap the call to the individual proxy initialization functions in a
try...except, catching the exception, logging an error and moving onto the next proxy minion. (#61377)
• show_instance of hetzner cloud provider should enforce an action like the other ones (#61392)
• Fix Hetzner Cloud config loading mechanism (#61399)
• Sets correctly the lvm grain even when lvm’s command execution outputs a WARNING (#61412)
• Use net instead of sc in salt cloud when restarting the salt service (#61413)
• Fix use_etag support in fileclient by removing case sensitivity of expected header (#61440)
• Expand environment variables in the root_dir registry key (#61445)
• Use salt.utils.path.readlink everywhere instead of os.readlink (#61458)
• Fix state_aggregate minion option not respected (#61478)
• Fixed wua.installed and wua.uptodate to return all changes, failures, and supersedences (#61479)
• When running with test=True and there are no changes, don’t show that there are changes. (#61483)
• Fix issue with certutil when there’s a space in the path to the certificate (#61494)
• Fix cmdmod not respecting config for saltenv (#61507)
• Convert Py 2’isms to Python 3, and add tests for set_filesystems on AIX (#61509)
• Fix tracebacks caused by missing block device type and wrong mode used for gzip.open while calling inspector.export (#61530)
• win_wua: Titles no longer limited to 40 characters (#61533)
• Fixed error when using network module on RHEL 8 due to the name of the service changing from "network" to "NetworkManager". (#61538)
• Allow symlink to be created even if source is missing on Windows (#61544)
• Print jinja error context on UndefinedError. Previously jinja2.exceptions.UndefinedError resulted in a SaltRenderError without source file context, unlike all of the other Jinja exceptions handled in salt/utils/templates.py. (#61553)
• Fix uptime on AIX systems when less than 24 hours (#61557)
• Fix issue with state.show_state_usage when a saltenv is not referenced in any topfile (#61614)
• Making the retry state system feature available when parallel is set to True. (#61630)
• modules/apt/pkg/SourceEntry: fix parsing lines with arbitrary comments in case HAS_APT=False (#61632)
• Fix file.comment incorrectly reports changes in test mode (#61662)
• Fix improper master caching of file listing in multiple dynamic environments (#61738)
• When configured beacons are empty write an empty beacon configuration file. (#61741)
• Fix file.replace updating mtime with no changes (#61743)
• Fixed etcd_return being out of sync with the underlying etcd_util. (#61756)
• Fixing items, values, and keys functions in the data module. (#61812)
• Ensure that salt:// URIs never contain backslashes, converting them to forward slashes instead. A specific situation to handle is caching files on Windows minions, where Jinja relative imports introduce a backslash into the path. (#61829)
• Do not raise a UnicodeDecodeError when pillar cache cannot decode binary data. (#61836)
• Don’t rely on importlib.metadata, even on Py3.10, use importlib_metadata instead. (#61839)
• Fix the reporting of errors for file.directory in test mode (#61846)
• Update Markup and contextfunction imports for jinja versions >=3.1. (#61848)
• Update states.chef for version 16.x and 17.x Chef Infra Client output. (#61891)
• Fixed some whitespace and pathlib.Path issues when not using the system aptsources package. (#61936)
• fixed error when using backslash literal in file.replace (#61944)
• Fix an issue where under spawning platforms, one could exhaust the available multiprocessing semaphores. (#61945)
• Fix salt-cloud sync_after_install functionality (#61946)
• Ensure that common_prefix matching only occurs if a directory name is identified (in the archive.list execution module function, which affects the archive.extracted state). (#61968)
• When states are running in parallel, ensure that the total run time produced by the highstate outitter takes that into account. (#61999)
- Temporary logging is now shutdown when logging has been configured. (#62005)
- modules/lxd/filesManager: fix memory leak through pylxd.modules.container.Container.FilesManager (#62006)
- utils/jinja.SaltCacheLoader: fix leaking SaltCacheLoader through atexit.register (#62007)
- Fixed errors on calling zabbix_user.admin_password_present state, due to changed error message in Zabbix 6.0
- Fixed zabbix.host_update not mapping group ids list to list of dicts in format ["groupid": groupid], ...
- Fixed zabbix.user_update not mapping usergroup id list to list of dicts in format ["usrgrpid": usrgrpid], ...
- Fixed errors on calling zabbix_user.admin_password_present state, due to changed error message in Zabbix 6.0
- Fixed zabbix.host_update not mapping group ids list to list of dicts in format ["groupid": groupid], ...
- Fixed zabbix.user_update not mapping usergroup id list to list of dicts in format ["usrgrpid": usrgrpid], ...
- Fixed errors on calling zabbix_user.admin_password_present state, due to changed error message in Zabbix 6.0
- Fixed zabbix.host_update not mapping group ids list to list of dicts in format ["groupid": groupid], ...
- Fixed zabbix.user_update not mapping usergroup id list to list of dicts in format ["usrgrpid": usrgrpid], ...
- Fixed errors on calling zabbix_user.admin_password_present state, due to changed error message in Zabbix 6.0
- Fixed zabbix.host_update not mapping group ids list to list of dicts in format ["groupid": groupid], ...
- Fixed zabbix.user_update not mapping usergroup id list to list of dicts in format ["usrgrpid": usrgrpid], ...

32.2. Previous releases

4901
Added

- Added ability to request VPC peering connections in different AWS regions (boto_vpc). (#50394)
- Added event return capability to Splunk returner (#50815)
- Added allow downgrades support to apt upgrade (#52977)
- added new grain for metadata to handle googles metadata differences (#53223)
- Added win_shortcutexecution and state module that does not prepend the current directory to paths. Use shortcut.create and shortcut.present instead of file.shortcut. (#53706)
- Add __env__ substitution inside file and pillar root paths (#55747)
- Added support cpu hot add/remove, memory hot add, and nested virtualization to VMware salt-cloud driver. (#56144)
- Add a consul state module with acl_present and acl_absent functions. (#58101)
- Added restconf module/states/proxy code for network device automation (#59006)
- Adds the ability to get version information from a file on Windows systems (#59702)
- Add aptkey=False kwarg option to the aptpkg.py module and pkgrepo state. Apt-key is on the path to be deprecated. This will allow users to not use apt-key to manage the repo keys. It will set aptkey=False automatically if it does not detect apt-key exists on the machine. (#59785)
- Added "Instant Clone" feature in the existing VMware Cloud module (#60004)
- Added support for etcd API v3 (#60325)
- Added pkg.held and pkg.unheld state functions for Zypper, YUM/DNF and APT. Improved zypperpkg.hold and zypperpkg.unhold functions. (#60432)
- Added suse_ip module allowing to manage network interfaces on SUSE based Linux systems (#60702)
- Support querying for JSON data in SQL external pillar (#60905)
- Added support for yum and dnf on AIX (#60912)
- Added percent success/failure of state runs in highstate summary output via new state_output_pct option (#60990)
- Add support for retrieve IP-address from qemu agent by Salt-cloud on Proxmox (#61146)
- Added new shortcut execution and state module to better handle UNC shortcuts and to test more thoroughly (#61170)
- added yamllint utils module and yaml execution modules (#61182)
- Add "--no-return-event" option to salt-call to prevent sending return event back to master. (#61188)
- Add Etag support for file.managed web sources (#61270)
- Adding the ability to add, delete, purge, and modify Salt scheduler jobs when the Salt minion is not running. (#61324)
- Added a force option to file.symlink to overwrite an existing symlink with the same name (#61326)
- gpg_decrypt_must_succeed config to prevent gpg renderer from failing silently (#61418)
- Do not load a private copy of __grains__ and __salt__ for the sentry log handler if it is disabled. (#61484)
- Add Jinja filters for itertools functions, flatten, and a state template workflow (#61502)
- Add feature to allow roll-up of duplicate IDs with different names in highstate output (#61549)
• Allow cp functions to derive saltenv from config if not explicitly set (#61562)
• Multiprocessing logging no longer uses multiprocessing queues which penalized performance.
  Instead, each new process configures the terminal and file logging, and also any external logging handlers
  configured. (#61629)
• Add a function to the freezer module for comparison of packages and repos in two frozen states (#61682)
• Add grains_refresh_pre_exec option to allow grains to be refreshed before any operation (#61708)
• Add possibility to pass extra parameters to salt-ssh pre flight script with ssh_pre_flight_args (#61715)
• Add Etag support for archive.extracted web sources (#61763)
• Add regex exclusions, full path matching, symlink following, and mtime/ctime comparison to file.tidied
  (#61823)
• Add better handling for unit abbreviations and large values to salt.utils.stringutils.human_to_bytes (#61831)
• Provide PyInstaller hooks that provide some runtime adjustments when Salt is running from a onedir (PyIn-
  staller) bundled package. (#61864)
• Add configurable onedir pip pypath location (#61937)
• Add CNAME record support to the dig exec module (#61991)
• Added support for changed user object in Zabbix 5.4+ Added compatibility with Zabbix 4.0+ for zab-
  bix.user_getmedia method Added support for setting medias in zabbix.user_update for Zabbix 3.4+ (#62012)
• Add ignore_missing parameter to file.comment state (#62044)
• General improvements on the "ansiblegate" module:  * Add "ansible.targets" method to gather Ansible inven-
  tory * Add "ansible.discover_playbooks" method to help collecting playbooks * Fix crash when running Ansible
  playbooks if ansible-playbook CLI output is not the expected JSON. * Fix issues when processing inventory
  and there are groups with no members. * Allow new types of targets for Ansible roster (#60056)
• Add sample and shuffle functions from random (#62225)
• Add "<tiamat> python" subcommand to allow execution or arbitrary scripts via bundled Python runtime
  (#62381)

(_release-3005-1)=

32.2.7 Salt 3005.1 Release Notes

Version 3005.1 is a bug fix release for 3005.

Changelog

32.2.8 Fixed

• Fix arch parsing issue in apt source files (#62247)
• Fixed parsing CDROM apt sources (#62474)
• Use str() method instead of repo_line for when python3-apt is installed or not in aptpkg.py. (#62546)
• Remove the connection_timeout from netmiko_connection_args before netmiko_connection_args is added to
  context["netmiko_device"] ["args"] which is passed along to the Netmiko library. (#62547)
• fixes #62553 by checking for disabled master_type before starting master connection and skipping it if set.
  (#62553)
• Fix runas with cmd module when using the onedir bundled packages (#62565)
• Fix the Pyinstaller hooks to preserve the environment if None is passed. (#62567, #62628)
• pkgrepo.managed sets wrong permissions on keys installed to /etc/apt/keyring (#62569)
• pkgrepo.managed creates zero byte gpg files when dearmoring contents to the same filename (#62570)
• Ensure default values for IPC Buffers are correct type (#62591)
• Fix a hang on salt-ssh when using sudo. (#62603)
• Renderers now have access to the correct set of salt functions. (#62610, #62620)
• Fix including Jinja template from absolute path (#62611)
• include jmespath in package requirements (#62613)
• Fix pkgrepo.managed signed-by in test=true mode (#62662)
• Ensure the status of the service is captured when the beacon function is called, even when the event is not being emitted. (#62675)
• The sub proxies controlled by Deltaproxy need to have their own req_channel otherwise there are timeout exceptions when the __master_req_channel_payload is fired and reacted on. (#62708)

32.2.9 Salt 3005.2 Release Notes

Version 3005.2 is a CVE security fix release for 3005.

Changed

• Additional required package upgrades
  – It's now pyzmq>=20.0.0 on all platforms, and <=22.0.3 just for windows.
  – Upgrade to pyopenssl==23.0.0 due to the cryptography upgrade. (#63757)

Security

• fix CVE-2023-20897 by catching exception instead of letting exception disrupt connection (cve-2023-20897)
• Fixed gitfs cachedir_basename to avoid hash collisions. Added MP Lock to gitfs. These changes should stop race conditions. (cve-2023-20898)
• Upgrade to requests==2.31.0
  Due to:
  – https://github.com/advisories/GHSA-j8r2-6x86-q33q (#64336)
• Upgrade to cryptography==41.0.3 (and therefor 'pyopenssl==23.2.0 due to https://github.com/advisories/GHSA-jm77-qphf-c4w8)
Also resolves the following cryptography advisories:
  Due to:
  – https://github.com/advisories/GHSA-5cpq-8wj7-hf2v
  – https://github.com/advisories/GHSA-x4qr-2fvf-3mr5
  – https://github.com/advisories/GHSA-w7pp-m8wf-vj6r
There is no security upgrade available for Py3.5 (#64595)

- Bump to certifi==2023.07.22 due to https://github.com/advisories/GHSA-xqr8-7jwr-rhp7
  Python 3.5 cannot get the updated requirements since certifi no longer supports this python version (#64720)

32.2.10 Salt 3005.3 Release Notes

Version 3005.3 is a Bug fix release for 3005.

Changed

- Fix __env__ and improve cache cleaning see more info at pull #65017. (#65002)

Security

- Update to gitpython>=3.1.35 due to https://github.com/advisories/GHSA-wfm5-v35h-vwf4 and https://github.com/advisories/GHSA-cwvm-v4w8-q58c (#65167)

32.2.11 Salt 3005.4 Release Notes

Version 3005.4 is a CVE security fix release for 3005.

Security

- Fix CVE-2023-34049 by ensuring we do not use a predictable name for the script and correctly check returncode of scp command. This only impacts salt-ssh users using the pre-flight option. (cve-2023-34049)
- Bump to cryptography==41.0.4 due to https://github.com/advisories/GHSA-v8gr-m533-ghj9 (#65267)
- Bump to urllib3==1.26.17 or urllib3==2.0.6 due to https://github.com/advisories/GHSA-v845-jxx5-vc9f (#65334)
- Bump to gitpython==3.1.37 due to https://github.com/advisories/GHSA-cwvm-v4w8-q58c (#65383)

32.2.12 Salt 3004 Release Notes - Codename Silicon

New Features

Transactional System Support (MicroOS)

A transactional system, like MicroOS, can present some challenges when the user decided to manage it via Salt.

MicroOS provide a read-only rootfs and a tool, transactional-update, that takes care of the management of the system (updating, upgrading, installation or reboot, among others) in an atomic way.

Atomicity is the main feature of MicroOS, and to guarantee this property, this model leverages snapper, zypper, btrfs and overlayfs to create snapshots that will be updated independently of the currently running system, and that are activated after the reboot. This implies, for example, that some changes made on the system are not visible until the next reboot, as those changes are living in a different snapshot of the file system.

Salt 3004 (Silicon) support this type of system via two new modules (transactional_update and rebootmgr) and a new executor (transactional_update).
The new modules will provide all the low level API for interacting with transactional systems, like defining a maintenance window where the system is free to reboot and activate the new state, or install new software in a new transaction. It will also provide high level of abstractions that will allows us to execute Salt module functions or applying states inside new transactions.

The execution module will help us to treat the transactional system transparently (like the traditional ones), using a mechanism that will delegate some Salt modules execution into the new `transactional_update` module.

**Removed**

- Removed the deprecated glance state and execution module in favor of the glance_image state module and the glanceng execution module. (#59079)
- Removed support for Ubuntu 16.04 (#59869)
- Removed the deprecated support for `gid_from_name` from the user state module (#60565)
- Removed deprecated `virt.migrate_non_shared`, `virt.migrate_non_shared_inc`, `ssh` from `virt.migrate`, and `python2/python3` args from `salt.utils.thin.gen_min` and `.gen_thin` (#60893)

**Deprecated**

- The `_ext_nodes` alias to the `master_tops` function was added back in 3004 to maintain backwards compatibility with older supported versions. This alias will now be removed in 3006. This change will break Master and Minion communication compatibility with Salt minions running versions 3003 and lower. (#60980)
- `utils/boto3_elasticsearch` is no longer needed (#59882)
- Changed "manufacture" grain to "manufacturer" for Solaris on SPARC to unify the name across all platforms. The old "manufacture" grain is now deprecated and will be removed in Sulfur (#60511)
- Deprecate `salt.payload.Serial` (#60953)

**Changed**

- Changed `nginx.version` to return version without `nginx/` prefix. (#57111)
- Updated Slack webhook returner to support event returns on salt-master (#57182)
- Parsing Epoch out of version during pkg remove, since yum can’t handle that in all of the cases. (#57881)
- Add extra onfail req check in the state engine to allow onfail to be used on onchanges and other reqs in the same state (#59026)
- Changed the default character set used by `utils.pycrypto.secure_password()` to include symbols and implemented arguments to control the used character set. (#59486)
Fixed

- Set default 'bootstrap_delay' to 0 (#61005)
- Fixed issue where multiple args to netapi were not preserved (#59182)
- Handle all repo formats in the aptpkg module. (#60971)
- Do not break master_tops for minion with version lower to 3003 This is going to be removed in Salt 3006 (Sulfur) (#60980)
- Reverting changes in PR #60150. Updating installed and removed functions to return changes when test=True. (#60995)
- Handle signals and properly exit, instead of raising exceptions. (#60391, #60963)
- Redirect imports of salt.ext.six to six (#60966)
- Surface strerror to user state instead of returning false (#20789)
- Fixing _get_envs() to preserve the order of pillar_roots. _get_envs() returned pillar_roots in a non-deterministic order. (#24501)
- Fixes salt-cloud KeyError that occurs when there exists any subnets with no tags when profiles use subnetname (#44330)
- Fixes postgres_local_cache by removing duplicate unicode encoding. (#46942)
- Fixing the state aggregation system to properly handle requisites. Fixing pkg state to exclude packages from aggregation if the hold attribute is in the state. (#47628)
- Fix issue that allows case sensitive files to be carried through (#47969)
- Allow GCE Salt Cloud to use previously created IP Addresses. (#48947)
- Fixing rabbitmq.list_user_permissions to ensure we are returning a permission list with three elements even when some values are empty. (#49115)
- Periodically restart the fileserver update process to avoid leaks (#50313)
- Fix default value to dictionary for mine_function (#50695)
- Allow user.present to work on Alpine Linux by fixing linux_shadow.info (#50979)
- Ensure that zypper is called with only one --no-refresh parameter (#51382)
- Fixed fileclient cachedir path switching from master to minion due to incorrect MasterMinion configuration (#52288)
- Fixed the container detection inside virtual machines (#53868)
- Fix invalid dnf command when obsoletes=True in pkg.update function (#54224)
- Jinja renderer resolves wrong relative paths when importing subdirectories (#55159)
- Fixed bug #55262 where salt.modules.iptables would call cmd.run and receive and interpret interspersed stdout and stderr output from subprocesses. (#55262)
- Updated pcs support to handle auth and setup for new syntax supporting version 0.10 (#56924)
- Reinstate ignore_cidr option in salt-cloud openstack driver (#57127)
- Fix for network.wolmatch runner displaying 'invalid arguments' error with valid arguments (#57473)
- Fixed bug 57490, which prevented package installation for Open Euler and Issabel PBX. Both Open Euler and Issabel PBX use Yum for package management, added them to yumpkg.py. (#57490)
- Better handling of bad RSA public keys from minions (#57733)
• Fixing various functions in the file state module that use user.info to get group information, certain hosts particularly proxy minions do not have the user.info function available. (#57786)
• Do not monkey patch yaml loaders: Prevent breaking Ansible filter modules (#57995)
• Fix --subset command line option, and support old 'sub' parameter name in cmd_subset for backwards compatibility (#58600)
• When calling salt.utils.http.query with a HEAD method to check for the existence of a source ensure that decode_body is False, so the file is not downloaded into memory when we don't need the contents. (#58881)
• Update the runsas user on freebsd for postgres versions >9.5, since freebsd will be removing the package on 2021-05-13. (#58915)
• Fix pip module linked requirements file parsing (#58944)
• Fix incorrect hostname quoting in /etc/sysconfig/networking on Red Hat family OS. (#58956)
• Fix Xen DomU virt detection in grains for long running machines. (#59001)
• add encoding when windows encoding is not defaulting to utf8 (#59063)
• Fix "aptpkg.normalize_name" in case the arch is "all" for DEB packages (#59269)
• Astra Linux now considered a Debian family distro (#59332)
• Reworking the mysql module and state so that passwordless does not try to use unix_socket until unix_socket is set to True. (#59337)
• Fixed the zabbix module to read the connection data from pillar. (#59338)
• Fix crash on "yumpkg" execution module when unexpected output at listing patches (#59354)
• Remove return that had left over py2 code from win_path.py (#59396)
• Don't create spicevmc channel for Xen virtual machines (#59416)
• Fix win_servermanager.install so it will reboot when restart=True is passed (#59424)
• Clear the cached network interface grains during minion init and grains refresh (#59490)
• Normalized grain output for LXC containers (#59573)
• Fix typo in 'salt/states/cmd.py' to use "comment" instead of "commnd". (#59581)
• add aliyun linux support and set alinux as redhat family (#59686)
• Don't fail updating network without netmask ip attribute (#59692)
• Fixed using reserved keyword 'set' as function argument in modules/ipset.py (#59714)
• Return empty changes when nothing has been done in virt.defined and virt.running states (#59739)
• Import salt.utils.azurearm instead of using __utils__ from loader in azure cloud. This fixes an issue where __utils__ would become unavailable when we are using the ThreadPool in azurearm. (#59744)
• Fix an issue with the LGPO module when the gpt.ini file contains unix style line endings (/n). This was happening on a Windows Server 2019 instance created in Google Cloud Platform (GCP). (#59769)
• The ansiblegate module now correctly passes keyword arguments to Ansible module calls (#59792)
• Make sure cmdmod_log_cmd handles tuples properly (#59793)
• Updating the add, delete, modify, enable_job, and disable_job functions to return appropriate changes. (#59844)
• Apply pre-commit changes to entire codebase. (#59847)
• Fix Hetzner cloud driver does not recognize machines when rolling out a map (#59864)
• Update Windows build deps & DLLs, Use Python 3.8, libsodium.dll 1.0.18, OpenSSL dlls to 1.1.1k (#59865)
• Salt api verifies proper log file path when providing `--log-file` from the cli (#59880)
• Detect Mendel Linux as Debian (#59892)
• Fixed compilation of requisite_ins by also checking state type along with name/id (#59922)
• Fix xen.get_vm() to not break silently when a VM and a template on XenServer have the same name. (#59932)
• Added missing space for nftables.build_rule when using saddr or daddr. (#59958)
• Add back support to load old entrypoints by iterating instead of type checking (#59961)
• Fixed interrupting salt-call in a pdb session. (#59966)
• Validate we can import map files in states (#60003)
• Update alter_db to return True or False depending on the success of failure of the alter. Update grant_exists to only use the full list of available privileges when the grant is on the global level, eg. database is ".". (#60031)
• Fixed firewalld.list_zones when any "rich rules" is set (#60033)
• IPCMessageSubscriber objects expose their connect method as a corotine so they can be wrapped by SyncWrapper. (#60049)
• Allow for Napalm dependency netmiko_mod to load correctly when used by Napalm with Cisco IOS (#60061)
• Ensure proper access to the created temporary file when runas is passed to cmd.exec_code_all (#60072)
• Fixed an IndexError in pkgng.latest_version when querying an unknown package. (#60105)
• Fixed pkgng.latest_version when querying by origin (e.g. "shells/bash"). (#60108)
• Gracefully handle errors in virt.vm_info (#60132)
• The LGPO Module now uses "Success and Failure" for normal audit settings and advanced audit settings (#60142)
• Fixing tests/pytests/unit/utils/scheduler/test_eval.py tests so the sleep happens before the status, so the job is given time before we check it. (#60149)
• Update the external ipaddress to the latest 3.9.5 version which has some security fixes. Updating the compat.p to use the vendored version if the python version is below 3.9.5 and only run the test_ipaddress.py tests if below 3.9.5. (#60168)
• Fixed ValueError exception in state.show_state_usage (#60179)
• Redact the username and password when something goes wrong when using an HTTP source and we raise an exception. (#60203)
• Inject the Ansible functions into Salt’s ansiblegate module which was broken on the 3001 release. (#60207)
• Figure out the available Python version inside containers when executing ”dockermod.call” function (#60229)
• Handle IPv6 route types such as anycast, multicast, etc when returned from IPv6 route table queries (#60232)
• Move the commonly used code that converts a list to a dictionary into salt.utils.beacons. Fixing inotify beacon close function to ensure the configuration is converted from the provided list format into a dictionary. (#60241)
• Set name of engine subprocesses (#60259)
• Properly discover block devices path in virt.running (#60296)
• Avoid exceptions when handling some exception cases. (#60330)
• Fixed faulty error message in npm.installed state. (#60339)
• Port option reinstated for Junos Proxy (accidentally removed) (#60340)
• Now hosts.rm_host can remove entries from /etc/hosts when this file have inline comments. (#60351)
• Fixes issue where the full same name is not used when making rights assignments with group policy (#60357)
• Fixed zabbix_host.present to not overwrite inventory_mode to "manual" every time inventory is updated. (#60382)
• Allowed zabbix_host.present to do partial updates of inventory, also don't erase everything if inventory is missing in state definition. (#60389)
• Fixing the mysql_cache module to handle binary inserting binary data into the database. Initially adding tests. (#60398)
• Fixed host_inventory_get to not throw an exception if host does not exist (#60418)
• Check for /dev/kvm to detect KVM hypervisor. (#60419)
• Fixing file.accumulated handling of dependencies when the state_id is used instead of {function: state_id} format. (#60426)
• Adding the ability for yumpkg.remove to handle package names with widdcards. (#60461)
• Pass emulator path to get guest capabilities from libvirt (#60491)
• virt.get_disks: properly report qemu-img errors (#60512)
• Make all platforms have psutils. This prevents a minion from starting if an instance is all ready running. (#60523)
• Ignore configuration for 'enable_fqdns_grains' for AIX, Solaris and Juniper, assume False (#60529)
• Remove check for TIAMAT_BUILD enforcing USE_STATIC_REQUIREMENTS, this is now controlled by Ti- mat v7.10.1 and above (#60559)
• Have the beacon call run through a try...except, catching any errors, logging and firing an event that includes the error. Fixing the swapusage beacon to ensure value is a string before we attempt to filter out the %. (#60585)
• Refactor loader into logical sub-modules (#60594)
• Clean up references to ZMQDefaultLoop (#60617)
• change dep warn from Silicon to Phosphorus for the cmd.show.system_info and add_config functions in the nxos module. (#60669)
• Fix bug 60602 where the hetzner cloud provider isn't recognized correctly (#60675)
• Fix the pwd.getpwnam caching issue on macOS user module (#60676)
• Fixing beacons that can include a value in their configuration that may or may not included a percentage. We want to handle the situation where the percentage sign is not included and the value is not handled as a string. (#60684)
• Fix RuntimeError in process manager (#60749)
• Ensure all data that is being passed along to LDAP is in an OrderedSet and contains bytes. (#60760)
• Update the AWS API version so VMs spun up by salt-cloud where the VPC has it enabled to assign ipv6 addresses by default, actually get ipv6 addresses assigned by default. (#60804)
• Remove un-needed singletons from tranports (#60851)
Added

- Add windows support for file.patch with patch.exe from git for windows optional packages (#44783)
- Added ability to pass exclude kwarg to salt.state inside orchestrate. (#49130)
- Added `success_stdout` and `success_stderr` arguments to `cmd.run`, to override default return code behavior. (#50597)
- The netbox pillar now been enhanced to add support for querying virtual machines (in addition to devices), as well as minion interfaces and associated IP addresses. (#51490)
- Add support for transactional systems, like openSUSE MicroOS (#58519)
- Added namespace headers to allow use of namespace from config to communicate with Vault Enterprise namespaces (#58585)
- `boto3mod` unit tests (#58713)
- New decorators `allow_one_of()` and `require_one_of()` (#58742)
- Added `nosync` switch to disable initial raid synchronization (#59193)
- Expanded the documentation for the netbox pillar. (#59398)
- Rocky Linux has been added to the RedHat os_family. (#59682)
- Add "poudriere -i -j jail_name" option to list jail information for poudriere (#59831)
- Added the grains.uuid on Windows platform (#59888)
- Add a `salt.util.platform` check to detect the AArch64 64-bit extension of the ARM architecture. (#59915)
- Adding support for Deltaproy controlled proxy minions into Salt Open. (#60090)
- Added functions to slsutil execution module to test if files exist in the state tree. Added function to slsutil execution module to search for a file by walking up the state tree (#60159)
- Allow `module_refresh` to also refresh available beacons, eg. following a Python library being installed and "refresh_modules" being passed as an argument in a state. (#60541)
- Add the `detect_remote_minions` and `remote_minions_port` options to allow the master to detect remote ports for connected minions. This will allow users to detect Heist-Salt minions the master is connected to over port 22 by default. (#60612)
- Add the python rpm-vercmp library in the `rpm_lowpkg.py` module. (#60814)
- Allow a user to use the `aptpkg.py` module without installing python-apt. (#60818)

32.2.13 Salt 3004.1 Release Notes

Version 3004.1 is a CVE security fix release for 3004.
Important notice about upgrading

Version 3004.1 is a security release. 3004.1 minions are not able to communicate with masters older than 3004.1. You must upgrade your masters before upgrading minions.

Minion authentication security

Authentication between masters and minions rely on public/private key encryption and message signing. To secure minion authentication before you must pre-seed the master’s public key on minions. To pre-seed the minions’ master key, place a copy of the master’s public key in the minion's pki directory as `minion_master.pub`.

Security

- Sign authentication replies to prevent MiTM (cve-2022-22935)
- Prevent job and fileserver replays (cve-2022-22936)
- Sign pillar data to prevent MiTM attacks. (cve-2202-22934)
- Fixed targeting bug, especially visible when using syndic and user auth. (CVE-2022-22941) (#60413)
- Fix denial of service in junos ifconfig output parsing.

32.2.14 Salt 3004.2 Release Notes

Version 3004.2 is a CVE security fix release for 3004.

Fixed

- Expand environment variables in the root_dir registry key (#61445)
- Update Markup and contextfunction imports for jinja versions >=3.1. (#61848)
- Fix bug in tcp transport (#61865)
- Make sure the correct key is being used when verifying or validating communication, eg. when a Salt syndic is involved use syndic_master.pub and when a Salt minion is involved use minion_master.pub. (#61868)

Security

- Fixed PAM auth to reject auth attempt if user account is locked. (cve-2022-22967)

32.2.15 Salt 3003 Release Notes - Codename Aluminium

New Features

SCRAM-SHA-256 support for PostgreSQL passwords

Support for SCRAM-SHA-256 password hashes has been added to the `postgres_user.present` and `postgres_group.present` states. This allows migration away from the insecure and deprecated previous storage methods.
Salt Documentation, Release 3006.4

Added

- Added "fips_mode" config option to master and minion configs. (#59427)
- Firewall groups support to Vultr Salt Cloud provider
- Adding the ability to clear and show the pillar cache enabled when pillar_cache is True. (#37080)
- SCRAM-SHA-256 support for PostgreSQL passwords. Pass encrypted=scram-sha-256 to the postgres_user.present (or postgres_group.present) state. (#51271)
- The yumpkg module has been updated to support VMWare's Photon OS, which uses tdnf (a C implementation of dnf). "VMware Photon OS" has been added to the "RedHat" os_family map as part of this change. (#51912)
- The pkgrepo state now supports VMware Photon OS. (#52550)
- Added firewallgroups to Vultr Salt Cloud provider (#53677)
- Added arbitrary kwarg support for tojson filter. (#56012)
- Add salt monitor beacon to execute salt execution module functions. (#56461)
- Allow the nameservers to be populated from systemd-resolve. (#57618)
- Adding reactor_niceness to the default minion configuration. (#57701)
- CPU model, topology and NUMA node tuning (#57880)
- Added pkg.services_need_restart which lists system services that should be restarted after package management operations. (#58261)
- Allow handling special first boot definition on virtual machine (#58589)
- Added vgcreate custom parameters to module call: addtag, alloc, autobackup, metadatatype, zero (#58747)
- Enhance console and serial support in virt module (#58844)
- Salt's versions report salt --versions-report now includes all installed salt extensions into its versions report. (#58938)
- Support loading entrypoints by passing a module instead of a function. (#58939)
- Added shadow.gen_password for BSD operating systems. (#59140)
- Add more network and PCI/USB host devices passthrough support to virt module and states (#59143)
- Add interface channels management support to rh_ip module. (#59147)
- Add new minion option return_retry_tries for dynamic return retry tries (#59236)
- Added salt-cloud support for Hetzner Cloud via the hcloud library of the provider. (#59301)
- "AlmaLinux" has been added to the "RedHat" os_family map (#59404)
- Added blocks and attachments params to the slack_notify.post_message function (#59428)
- Added tcp_reconnect_backoff minion config option for specifying reconnection backoff time for TCP transport (#59431)
- Added swapusage beacon to complement the existing memusage beacon. (#59460)
- The salt-run CLI now accepts --jid (#59527)
- Add bytes option for FreeBSD pkg-stats(8) module. (#59540)
• Adding mod_beacon function to pkg, service, and file state modules. This function will act similar to the mod_watch function. This will allow supported functions in those state modules to automatically add associated beacons to monitor for changes to the respective resources in the state file and fire events to the event bus when changes occur. (#59559)

• Add -B flag to FreeBSD pkgng.check() to regenerate the library dependency metadata for a package by extracting library requirement information from the binary ELF files in the package. (#59569)

**Changed**

• The pkg module now supports tdnf used by VMWare Photon OS. As part of this change, VMWare Photon OS's os_family grain will now resolve as RedHat. This may require changes to existing uses of grains.filter_by

• The salt-run CLI now accepts --jid which allows scripting against it.

• Change brew cask --list to brew list --cask (#58381)

• Store git sha in salt/_version.py when installing from a tag so it can be found if needed later. (#59137)

• Changed package manager detection in yumpkg module (#59201)

• Updating the pkg beacon to fire the events when there are upgrades to packages, but also when watched packages are installed or removed. Breaking out the logic for listing pkgs from context into a separate function to aid in testing. Updating tests to ensure context is not used when use_context option to list_pkgs is False. (#59463)

**Removed**

• Removed the deprecated glance state and execution module in favor of the glance_image state module and the glanceng execution module. (#59079)

• Removing the _ext_nodes deprecation warning and alias to the master_tops function. This change will break compatibility with a Salt master running versions 2017.7.8 and older and Salt minions running versions 3003 and newer. (#59804)

• removed the arg managed_private_key from 'salt.states.x509.certificate_managed' (#59247)

• Drop support for python 3.5 on Windows (#59479)

• Removed support for Ubuntu 16.04 (#59913)

**Deprecated**

• Added deprecation warning for grains.get_or_set_hash (#59425)

**Fixed**

• When instantiating the loader grab values of grains and pillars if they are NamedLoaderContext instances. (#59773)

• Fixed installation on Apple Silicon Macs by checking $HOMEBREW_PREFIX for libcrypto instead of assuming /usr/local. (#59808)

• The Google Cloud Engine salt-cloud provider now requires apache-libcloud>=2.5.0. Service account authentication is broken on older versions.

• Fix incorrect documentation for pillar_source_merging_strategy (#26396)
• Don't iterate through cloud map errors (#34033)
• Suppress noisy warnings when very old pyzmq is used. (#50327)
• Fixed glusterfs version parsing for pre-4.0 (#50707)
• Prevent traceback when trying to list reactors when none are configured. (#53334)
• Fixed zabbix_host.present to accept all Zabbix host properties (#53838)
• Binaries for the salt installer package for OSX are now signed and the installer package is notarized (#54513)
• Guard boto3_elasticsearch loading properly (#55848)
• Use a capitalized string version of the value of NodeState instead (#56589)
• Adding missing error case to the validation for service beacon. (#56623)
• The GCE cloud driver only works with apache-libcloud>=2.5.0, prior versions have authentication issues (#56862)
• zypperpkg add_lock and remove_lock examples do not work (#56922)
• Compare bytes to bytes so we don’t overwrite a correct value (#57212)
• Fixing expand_repo_def in aptpkg module to include the architecture in the line attribute when it is passed in. (#57600)
• When passing arguments pass them as keyword arguments so that we can be sure the right value is going where. (#58006, #58579, #59075)
• Improve module whitelist logic for file backends (#58041)
• Fix behavior for ”onlyif/unless” state conditionals when multiple declarations (#58085)
• Ensure data is a valid keyword argument for the event.wait function. (#58182)
• Do not raise ”StreamClosedError” traceback on the master logs but only log it (#58301)
• Fixed issue with win_timezone when dst is turned off. This was causing the minion not to start Use default timezone offset in scheduler when correct timezone cannot be determined (#58379)
• Pop!_OS 20.04 and 20.10 now support using pkg.* / aptpkg.* (#58395)
• Restoring functionality of the textfsm module when using textfsm_path argument (#58499)
• Invalidate file list cache when cache file has a future last modified time (#58529)
• Fix issue with setting permissions in combination with the win_perms_reset option (#58541)
• Adds support for Powershell 7. It is specified by passing shell=“pwsh”. Only valid if Powershell 7 is installed on the system. (#58598)
• Fixed the zabbix.host_create call on zabbix_host.present to include the optional parameter visible_name. Now working as documented. (#58602)
• Fixed some bugs to allow zabbix_host.present to update a host already existent on Zabbix server:
  – Added checks before ”pop” the elements ”bulk” and ”details” from hostinterfaces_get’s response. Without that, the interface comparison didn’t works with Zabbix >= 5.0
  – Fixed the ”inventory” comparison. It failed when both current and new inventory were missing.
  – Rewrote of the update_interfaces routine to really ”update” the interfaces and not trying to delete and recreate all interfaces, which almost always gives errors as interfaces with linked items can’t be deleted. (#58603)
- Added the "details" mandatory object with the properly default values when creating a SNMP hostinterface in Zabbix 5.0 (#58620)
- Fixing an issue preventing running pillar.get against pillar values with integers as pillar keys. (#58714)
- Adding a new option to pass client_flags to MySQL connections, for example passing the option to support multiple statements in queries. (#58718)
- Fixed two performance bugs in the sysctl.present state. Their impact is especially great on FreeBSD machines with large amounts of RAM. (#58732)
- Fixed an issue when pillar files are included in the top.sls and then later included in another pillar file. (#58736)
- Left over py2 code was causing windows encoding to misbehave (#58749)
- Return result=None from module.run state to indicate that changes would be made Return result=False from module.run state when called with no functions (#58752)
- Fix duplicate IP addresses in fqdn_ip4 and fqdn_ip6 grains (#58799)
- Rename salt.renderers.toml to salt.renderers.tomlmod which fixes the import error issues as described in #58822 Do note that, the renderer is still called toml. (#58822)
- Fixing unhold in yumpkg. Removing unnecessary code and relying on the code that handles dicts later. Adding tests when pkg.installed is called with hold=False. (#58883)
- Converts the given "grant" to upper case before compare to "ALL". This fixes a problem granting "all privileges" to a MySQL user. (#58933)
- Strip trailing "/" from repo.uri when comparing repos in "apktpkg.mod_repo" (#58962)
- When we are checking requisites, run reconcile_procs just on those requisite states not all running states. (#58976)
- Allow the gpg module to use export_key, delete_key and create_key without a passphrase in GnuPG >= 2.1 (#58980)
- Updated the documentation, handling and error messages for what size units are allowed by "size" parameter in lvm.lv_present (#58985)
- Fixing the two failing tests when running on Photon OS. Python 3 installed on Photon OS does not support MD4 hashing, so don't load pdbedit module and skip the test_generate_nt_hash test. Default un-mask for files and directories results in them having only user and group permissions so update the test_directory_max_depth test. (#58991)
- Fixes to netmiko module and proxy module to handle situations where the device is unreachable during the initial connection phase. (#59011)
- Correct comment when updating postgres users and groups. Errors reported when removing postgres groups. Partial group membership changes in postgres groups. (#59034)
- Fixed an error when running svn.latest in test mode and using the trust_failures option. (#59069)
- Fixes to storing schedule items in pillar, when refreshing pillar only update the schedule items if something has changed. (#59104)
- Fixed timezone module to work in Slackware Linux (#59130)
- Enforces pywinrm to be version 0.3.0 or higher and upgrade to latest (#59138)
- Fix a race condition in the ldx module which sometimes caused devices not to be created during container creation. (#59145)
- Fix issue where passed smb port was being passed to the smb connection when deploying Windows with salt-cloud (#59153)
• Fixed an error when running on CentOS Stream 8. (#59161)
• Fix event publish retry when using TCP transport (#59162)
• Fix docs for auth_timeout (#59175)
• virt.update doesn’t update the definition if efi=True and a loader is already set (#59188)
• Fixed salt.modules.solaris_shadow failing on bytes-like object is require, not ‘str’. (#59191)
• Added support for io2 volumes in ec2 cloud (#59218)
• When checking if the mode had changed in the file state module, only do so if the passed mode is not None. (#59276)
• Fixing _sanitze_comments to use sqlparse instead of re.sub. (#59336)
• Allow use of query parameters in cmd.script source url (#59362)
• Access user from global group if local group fails to find user. (#59412)
• Detect and fix grub.xen path (#59484)
• Stop raising StopIteration on generators (#59512)
• Fix minion race conditions handling SIGTERM signal when loading modules (#59524)
• Support new output of systemd systemctl list-unit-files in the following modules systemd_service.get_enabled, systemd_service.get_disabled and systemd_service.get_static (#59526)
• Fix pkg.upgrade with -U arg on FreeBSD, -L flag was deprecated long time. (#59565)
• Fixing the virtual function for the netimiko module to allow it to run outside of a proxy minion. Adding additional tests. (#59635)
• Allow ”extra_filerefs” as sanitized kwargs for SSH client. Fix regression on ”cmd.run” when passing tuples as cmd. (#59664)

32.2.16 Salt 3003.1 Release Notes

Version 3003.1 is a bug fix release for 3003.

Fixed

• Fixed race condition in batch logic. Added listen option to LocalClient to prevent event subscriber from purging cached events during batch iteration. (#56273)
• Fixed dependencies for Amazon Linux 2 on https://repo.saltproject.io since Amazon Linux 2 now provides some of the python libraries in their repos. (#59982)
• IPCMessageSubscriber objects expose their connect method as a coroutine so they can be wrapped by SyncWrapper. (#60049)
• Import salt.utils.azurearm instead of using __utils__ from loader in azure cloud. This fixes an issue where __utils__ would become unavailable when we are using the ThreadPool in azurearm. (#59744)
• Use contextvars library from site-packages if it is intalled. Fixes salt ssh for targets with python <=3.6 (#59942)
• Add back support to load old entrypoints by iterating instead of type checking (#59961)
• Pass the value of the __grains__ NamedContext to salt.pillar.get_pillar, instead of the NamedContext object itself. (#59975)
• Fix pillar serialization in jinja templates (#60083)
32.2.17 Salt 3003.2 Release Notes

Version 3003.2 is a bug fix release for 3003.

Fixed

- Periodically restart the fileserver update process to avoid leaks (#50313)
- Add ssh_timeout to kwargs in deploy_script (#59901)
- Update the external ipaddress to the latest 3.9.5 version which has some security fixes. Updating the compat.p to use the vendored version if the python version is below 3.9.5 and only run the test_ipaddress.py tests if below 3.9.5. (#60168)
- Use the right crypto library for salt.utils.crypt.reinit_crypto (#60215)
- Stop SSH from hanging if connection is lost. Also added args to customize grace period. (#60216)
- Improve reliability of Terminal class (#60504)
- Ignore configuration for 'enable_fqdns_grains' for AIX, Solaris and Juniper, assume False (#60529)

32.2.18 Salt 3003.3 (2021-08-20)

Version 3003.3 is a CVE security fix release for 3003.

Fixed

- Fix issue introduced in https://github.com/saltstack/salt/pull/59648 (#60046)

Security

- Verify the owner of an existing config before trusting it during install. If the owner cannot be verified, back it up and use defaults. (CVE-2021-22004)
- Ensure that sourced file is cached using its hash name (cve-2021-21996)

32.2.19 Salt 3003.4 (2022-02-25)

Version 3003.4 is a CVE security fix release for 3003.

Important notice about upgrading

Version 3003.4 is a security release. 3003.4 minions are not able to communicate with masters older than 3003.4. You must upgrade your masters before upgrading minions.
Minion authentication security

Authentication between masters and minions rely on public/private key encryption and message signing. To secure minion authentication before you must pre-seed the master's public key on minions. To pre-seed the minions' master key, place a copy of the master's public key in the minion's pki directory as `minion_master.pub`.

Security

- Sign authentication replies to prevent MiTM (cve-2022-22935)
- Prevent job and fileserver replays (cve-2022-22936)
- Sign pillar data to prevent MiTM attacks. (cve-2202-22934)
- Fixed targeting bug, especially visible when using syndic and user auth. (CVE-2022-22941) (#60413)
- Fix denial of service in junos ifconfig output parsing.

32.2.20 Salt 3003.5 (2022-07-05)

Version 3003.5 is a CVE security fix release for 3003.

Fixed

- Update Markup and contextfunction imports for jinja versions >=3.1. (#61848)
- Fix bug in tcp transport (#61865)
- Make sure the correct key is being used when verifying or validating communication, eg. when a Salt syndic is involved use syndic_master.pub and when a Salt minion is involved use minion_master.pub. (#61868)

Security

- Fixed PAM auth to reject auth attempt if user account is locked. (cve-2022-22967)

32.2.21 Salt 3002 Release Notes - Codename Magnesium

New Features

Network Teaming Support Added (RHEL/CentOS)

Support for two new interface types (`team` and `teamport`) has been added to the `network.managed` state. See the documentation for example usage.
Execution Module Changes

The `ip.get_bond` and `ip.build_bond` functions have been removed from the `ip` module for RHEL/CentOS. Configuring bonding opts in modprobe configurations has not been necessary since RHEL 4, and Salt was in fact redundantly both creating modprobe configurations and using the BONDING_OPTS interface configuration parameter.

Removed

- removed boto_vpc.describe_route_table please use boto_vpc.describe_route_tables (#58636)
- removed show_ipv4 arg from all functions in from salt.runners.manage (#58638)
- removed kwargs from mandrill.send if you use "async" please use "asynchronous" (#58640)
- removed salt/modules/mac_brew_pkg.__fix_cask_namespace (#58641)
- zfs.mount Passing `-a` as name is deprecated please just pass 'None' (#58642)
- Remove include_localhost kwarg for connected_ids method in salt/utils/minions.py (#58224)
- deprecated opts default argument of none and removed deprecation warnings (#58635)

Deprecated

- The `ssh` parameter of `virt.migrate` has been deprecated. Use a libvirt URI `target` value instead. Both `virt.migrate_non_shared` and `virt.migrate_non_shared_inc` have been deprecated. Use the `copy_storage` parameter with `virt.migrate` instead. (#57947)

Changed

- Allow specifying a custom port for Proxmox connection (#50620)
- Changed the lvm.lv_present state to accept a resizefs switch. So, when the logical volume is resized, the filesystem will be resized too. (#55265)
- Change the `enable_fqdns_grains` setting to default to `False` on proxy minions as it is generally not needed and just slows down start up time. (#57676)
- Adds network teaming support to `network.managed` state for RHEL-based distros. Removes `ip.get_bond` and `ip.build_bond` for the same, as is redundant and not needed for any current RHEL/CentOS/Fedora/etc. release. (#57775)
- The `serializer` argument has been added to the `file.serialize` state, as an alternative to `formatter`. This brings it more in line with the `serializer_opts` and `deserializer_opts` arguments. `formatter` is still supported, but using both `serializer` and `formatter` will cause the state to fail. (#57858)
Fixed

- `file.read` exec module function no longer fails on binary data. (#58033)
- Remove py2 support from winrepo execution module and runner (#58596)
- Create ini file if does not exist when using ini.options_present state module. (#34236)
- Added an bool "strict" argument to sdb.get module to force module to fail if the sdb uri is not correct. (#39163)
- Fixed issue with postgres.has_privilege breaking on ALL. (#48465)
- check for azurearm username in config before adding username and password to the virtual machine properties (#49063)
- Fixes service.status to return True/False instead of empty strings or PIDs of the service. This brings macOS into parity with the other service modules. (#49237)
- fix frequent rest_tornado non-fatal tracebacks (#49572)
- Do not use reverse DNS of the target used in salt-ssh. Use the target the user provides. (#49840)
- Fixes startup issue where it tried to load the kernalparams grain on Windows (#49901)
- Fixed error in nilrt_ip.get_interfaces_details when loading config. (#50416)
- Doesn’t remove underscore when sanitizing hostname in network salt util (#50527)
- permit the use of int/float type for the version in:
  - the state postgres_cluster.present
  - the state postgres_cluster.absent
  - the module postgres.cluster_create
  - the module postgres.cluster_remove (#50899)
- Cleaned up a trackback in lvm.pv_present when the disk doesn’t exist. (#52363)
- Fixed UnboundLocalError when using win_network.connect (#53371)
- Add accept_ra 2 option to modules.debian_ip (#54067)
- salt.runner test mode support (#54382)
- Fixed mkpart to allow the creation of a partition without filesystem (#54456)
- Fixes bogus warning message when an empty list is used for an environment in a topfile. This allows [] to be used as a placeholder in a topfile without needing to comment everything out as a workaround. (#54882)
- win_certutil state will no longer fail on non-English systems upon successful additions and deletions of a certificate. (#55024)
- Fixed file.directory state always showing mode change for symlinks. (#55878)
- check for a docker error that the swarm already exists when calling swarm.swarm_init on an existing docker swarm (#55949)
- Fixing stalekey engine so it deletes the keys when they are a list. (#55977)
- An invalid _schedule.conf configuration file is renamed to _schedule.confYAMLError. This avoids disabling the minion and busy polling the CPU on Windows. (#56216, #58177)
- Proper calculation of tpldir and related context parameters (#56410)
- Make gpg.encrypt examples work (#56646)
- Artifactory encoding of headers fixed for py3 (#56660)
• Fixed handling of extents extended attribute in file.managed state. (#57189)
• Remove buggy start parameter from virt.pool_running docstring (#57275)
• Fixed saltcheck rendering of map.jinja files from saltenv (#57327)
• Fix for virt.get_profiles resolves an error that appears due to new parameters introduced with _disk_profile() (#57431)
• Accept nested namespaces in spacewalk.api runner function. (#57442)
• virt.init fix the disk target names (#57477)
• Fix volume name for disk-typed pools in virt.defined (#57497)
• Fixes an issue with filesystems options ordering which kept already applied NFS fstab entries being updated. (#57520)
• Do not allow python2 to be added to salt-ssh tar since Salt deprecated Python 2. (#57647)
• Fixed exception on loading custom zipped modules. (#57674)
• corrected support for app_id or local vault configurations (#57705)
• Fix the registration of libvirt pool and nodedef events (#57746)
• Pass cmd.run state arguments to unless and onlyif when they exist (#57760)
• The 2004 release of Windows 10 introduced a bug in the InstallationBehavior COM object where you can no longer get properties from that object. Calls to this object are now wrapped in a try/except block with sane defaults when it fails to read attributes.

Additionally, some pre-flight checks have been added to the win_wua module to make sure Windows Update can actually run. (#57762)
• Changed get_repo in yumpkg.py to use "repo" as first parameter. This fixes #57778, a bug were every run of pkgrepo.managed state were marked as changed because the get_repo did fail to detect a previously applied run. (#57778)
• Raise SaltClientError in parse_host_port insted of ValueError so it is caught and handled properly when the minion is connecting to the master. (#57789)
• Fixed issue with the return dictionary from the workgroup() function in the salt.states.win_system module. This resulted in a windows-based minion logging an error and could also interfere with a highstate being applied. (#57790)
• Fixes broken block_device_mapping and block_device_mapping_v2 type checks in the OpenStack cloud driver. Salt was looking for a dict and the shade library was looking for a list of dicts. This made it impossible to use those params. (#57802)
• Fixed incorrect parsing of Set-Cookie response headers. (#57829)
• When using yumpkg, report stdout when stderr is redirected to stdout. (#57862)
• Fixes an issue on macOS where if you try and restart the macOS using servive.restart salt-minion it would fail because the service names are different on macOS. (#57878)
• Fixes an issue on macOS where salt would take extra time to run on a service.dead call and the service is missing. (#57907)
• Fixes an issue where a disabled macOS and Windows service would fail to start with service.running. (#57908)
• Use "use_bin_type" to differentiate between bytes and str when writing cache for pillar and grains. (#57918)
• Set the comment to "No minions responded" if salt.function fails to find any minions (#57920)
• Fix issue with __utils__ usage in the __virtual__ functions on a few of the execution modules. (#57948)
• remove encoding kwarg for both pack(b)/unpack(b) in msgpack for versions >=1.0.0 https://github.com/msgpack/msgpack-python/blob/master/ChangeLog.rst#100 (#57965)
• Replace deprecated cgi.escape() with html.escape() after it was removed from Python 3.8. (#57983)
• Fix btrfs state decorator, that produces exceptions when creating subvolumes. (#58012)
• Fix kubeadm token_list when the list of tokens is empty (#58116)
• Add a fix for the mac_service modules where it would fail to load in some new services and crash on Big Sur. (#58143)
• Fix blank tplfile context parameter when loading top level sls files (#58249)
• Do not include init directory in sls context parameters if explicitly specified (#58250)
• Fixing pillar caching when pillar environments are involved. (#58274)
• Make proxy_config read in the proxy specific configuration which is typically found in /etc/salt/proxy.d/minionid/. (#58307)
• Add timeout kwarg docs for service.running and service.dead (#58311)
• Return empty dict on win_pdh.get_counts rather than raising exception when no data are available (#58327)
• Leave boot parameters untouched if boot parameter is set to None in virt.update (#58331)
• Convert disks of volume type to file or block disks on Xen (#58333)
• Apparently Apple is using both "10.16" and "11" for versioning Big Sur, depending on where you look. The mac_softwareupdate module uses a different regex depending on OS version, and the determination was based on the osrelease_info grain. This results in a Big Sur machine not using the correct regex; osrelease_info[1] is 0 for Big Sur.
  This change simply adds an additional clause to the if statement to handle osmajorrelease > 10. (#58340)
• Fixed zmq salt-call hang!
  Some objects from the 3rd party module zmq fail to deconstruct if left to the GC when Python exits. This is because the objects get destroyed out of order. This only happens on some platforms like ubuntu 20.04 and some versions of FreeBSD. We fixed this hang by deconstructing all zmq objects in the right order before we exit salt-call. (#58364)
• Reactor runner functions will now ensure reactor system is available before attempting to run and error out if it is not available. (#58384)
• Fix enpoint typos (#58416)
• Make sure we repopulate __utils__ on Windows when a job is run from the scheduler. (#58437)
• Adding a check when a source is an HTTP or FTP URL to do a query to ensure the URL is valid before returning, then we know if we need to move onto the next source in the list or not. (#58441)
• Improved documentation for the LGPO state module (#58521)
• Remove old documented pending reboot key (#58530)
• On macOS, skip GUI dialog for Developer Command Line Tools when importing gitfs util. (#58575)
• Fixing a use case when multiple inotify beacons are defined but when notifications are fired the configuration from the first beacon are used. (#58655)
Added

- salt-api will now work on Windows platforms with limited support. You will be able to configure the rest_cherrypy module, without pam external authentication and without ssl support. (#49949)
- Added execution_timeout support to chocolatey.installed state (#50449)
- Add new verify_ssl option to file modules. This allows a user to not validate the server certificate for HTTPS source and source hash’s. (#52663)
- Added list target type support to the scan salt-ssh roster. (#52675)
- Added pvresize and lvextend to linux_lvm (#56089)
- Added COPR option to states.pkgrepo (#57258)
- Add "get_return" key for onlyif and unless requisites to parse deep module results (#57470)
- Allow setting VM boot devices order in virt.running and virt.defined states (#57544)
- Added grains to show the LVM Volume Groups and their Logical Volumes. (#57629)
- Memory Tuning Support which allows much greater control of memory allocation (#57639)
- Add output filter to saltcheck to only display test failures (#57788)
- Added an execution module for running idem exec modules
- Added a state module for running idem states (#57969)
- Added the ability for states to return sub_state_run's results from external state engines (#57993)
- Added salt-cloud support for Linode APIv4 via the api_version provider configuration parameter. (#58093)
- Added support to manage services in Slackware Linux. (#58206)
- Added list_sources to chocolatey module to have an overview of the repositories present on the minions. Added source_added to chocolatey state in order to add repositories to chocolatey. (#58588)
- Adding tests for changes to virtual function for netmiko module. Adding tests for netmiko proxy minion module. (#58609)
- Added features config option for feature flags. Added a feature flag enable_slsvars_fixes to enable fixes to tpldir, tplfile and sls_path. This flag will be deprecated in the Phosphorus release when this functionality becomes the default. (#58652)

### 32.2.22 Salt 3002.1 Release Notes

Version 3002.1 is a CVE fix release for 3002.

Fixed

- Prevent shell injections in netapi ssh client (cve-2020-16846)
- Prevent creating world readable private keys with the tls execution module. (cve-2020-17490)
- Properly validate eauth credentials and tokens along with their ACLs. Prior to this change eauth was not properly validated when calling Salt ssh via the salt-api. Any value for 'eauth' or 'token' would allow a user to bypass authentication and make calls to Salt ssh. (CVE-2020-25592)
32.2.23 Salt 3002.2 Release Notes

Version 3002.2 is a bugfix release for 3002.

Fixed

- Change dict check to isinstance instead of type() for key_values in file.keyvalue. (#57758)
- Fail when func_ret is False when using the new module.run syntax. (#57768)
- Fix comparison of certificate values (#58296)
- When using ssh_pre_flight if there is a failure, fail on retcode not stderr. (#58439)
- Fix use of unauthd cached vmware service instance (#58691)
- Removing use of undefined variable in utils/slack.py. (#58753)
- Restored the ability to specify the amount of extents for a Logical Volume as a percentage. (#58759)
- Ensuring that the version check function is run a second time in all the user related functions in case the user being managed is the connection user and the password has been updated. (#58773)
- Allow bytes in gpg renderer (#58794)
- Fix issue where win_wua module fails to load when BITS is set to Manual (#58848)
- Ensure that elasticsearch.index_exists is available before loading the elasticsearch returner. (#58851)
- Log a different object when debugging if we're using disk cache vs memory cache. The disk cache pillar class has the dict object but the cache pillar object which is used with the memory cache does not include _dict object because it is a dict already. (#58861)
- Do not generate grains for every job run on Windows minions. This makes Windows conform more to the way posix OSES work today. (#58904)
- Fixes salt-ssh authentication when using tty (#58922)
- Revert LazyLoader finalizer. Removed the weakref.finalizer code. On some occasions, the finalized would run when trying to load a new module, firing a race condition. (#58947)

32.2.24 Salt 3002.3 Release Notes

Version 3002.3 is a CVE fix release for 3002.

Fixed

- CVE-2020-28243 - Fix local privilege escalation in the restartcheck module.
- CVE-2020-28972 - Ensure authentication to vcenter, vsphere, and esxi server validates the SSL/TLS certificate by default. If you want to skip SSL verification you can use verify_ssl: False.
- CVE-2020-35662 - Ensure the asam runner, qingcloud, splunk returner, panos proxy, cimc proxy, zenoss module, esxi module, vsphere module, glassfish module, bigip module, and keystone module validate SSL by default. If you want to skip SSL verification you can use verify_ssl: False.
- CVE-2021-3148 - Fix a command injection in the Salt-API when using the Salt-SSH client.
- CVE-2021-3144 - Fix eauth tokens can be used once after expiration
- CVE-2021-25281 - Fix salt-api so it honors eauth credentials for the wheel_async client.
• CVE-2021-25282 - Fix the salt.wheel.pillar_roots.write method so it is not vulnerable to directory traversal.
• CVE-2021-25283 - Fix the jinja render to protect against server side template injection attacks.
• CVE-2021-25284 - Fix cmdmod so it will not log credentials to log levels info and error.
• CVE-2021-3197 - Fix ssh client to remove ProxyCommand from arguments provided by cli and netapi.

32.2.25 Salt 3002.4 Release Notes

Version 3002.4 is a bug fix release for 3002.

Fixed

• Fix runners that broke when patching for CVE-2021-25281
• Fix issue with runners in SSE

Known Issue

When using the Salt-API with the SSH client some of the SSH options are not working currently and will be fixed in an upcoming bug fix release. We are currently testing and fixing which options still need to be fixed, but have confirmed the following ones do not work in this release: extra-filerefs, pre-flight. This does not impact normal Salt-SSH usage on the cli.

32.2.26 Salt 3002.5 Release Notes

Version 3002.5 is a cve fix release for 3002.

Fixed

• Tests and fix for CVE-2021-25283

Known Issue

When using the Salt-API with the SSH client some of the SSH options are not working currently and will be fixed in an upcoming bug fix release. We are currently testing and fixing which options still need to be fixed, but have confirmed the following ones do not work in this release: extra-filerefs, pre-flight. This does not impact normal Salt-SSH usage on the cli.

32.2.27 Salt 3002.6 Release Notes

Version 3002.6 is a bug fix release for 3002.
Changed

- Store git sha in salt/_version.py when installing from a tag so it can be found if needed later. (#59137)

Fixed

- Fix argument injection bug in restartcheck.restartcheck. This change hardens the fix for CVE-2020-28243. (#200)
- Allow "extra_filerefs" as sanitized kwargs for SSH client. Fix regression on "cmd.run" when passing tuples as cmd. (#59664)
- Allow all ssh kwargs as sanitized kwargs for SSH client. (#59748)

32.2.28 Salt 3002.7 (2021-08-20)

Version 3002.7 is a CVE security fix release for 3002.

Fixed

- Verify the owner of an existing config before trusting it during install. If the owner cannot be verified, back it up and use defaults. (CVE-2021-22004)

Security

- Fix the CVE-2021-31607 vulnerability Additionally, an audit and a tool was put in place, bandit, to address similar issues throughout the code base, and prevent them. (CVE-2021-31607)
- Ensure that sourced file is cached using its hash name (cve-2021-21996)

32.2.29 Salt 3002.8 (2022-02-25)

Version 3002.8 is a CVE security fix release for 3002.

Important notice about upgrading

Version 3002.8 is a security release. 3002.8 minions are not able to communicate with masters older than 3002.8. You must upgrade your masters before upgrading minions.

Minion authentication security

Authentication between masters and minions rely on public/private key encryption and message signing. To secure minion authentication before you must pre-seed the master's public key on minions. To pre-seed the minions' master key, place a copy of the master's public key in the minion's pki directory as minion_master.pub.
Security

- Sign authentication replies to prevent MiTM (cve-2020-22935)
- Sign pillar data to prevent MiTM attacks. (cve-2022-22934)
- Prevent job and fileserver replays (cve-2022-22936)
- Fixed targeting bug, especially visible when using syndic and user auth. (CVE-2022-22941) (#60413)

32.2.30 Salt 3002.9 (2022-05-25)

Version 3002.9 is a CVE security fix release for 3002.

Fixed

- Fixed an error when running on CentOS Stream 8. (#59161)
- Fix bug in tcp transport (#61865)
- Make sure the correct key is being used when verifying or validating communication, eg. when a Salt syndic is involved use syndic_master.pub and when a Salt minion is involved use minion_master.pub. (#61868)

Security

- Fixed PAM auth to reject auth attempt if user account is locked. (cve-2022-22967)

32.2.31 Salt 3001 Release Notes - Codename Sodium

Python 2 Dropped

Python 2 support has been dropped in Salt 3001. See https://community.saltstack.com/blog/sunsetting-python-2-support/ for more info.

Salt mine updates

Syntax update

The syntax for defining salt functions in config or pillar files has changed to also support the syntax used in module.run. The old syntax for the mine_function - as a dict, or as a list with dicts that contain more than exactly one key - is still supported but discouraged in favor of the more uniform syntax of module.run.
State updates

The `creates` state requisite has been migrated from the `docker_container` and `cmd` states to become a global option. This acts similar to an equivalent `unless: test -f filename` but can also accept a list of filenames. This allows all states to take advantage of the enhanced functionality released in Neon, of allowing salt execution modules for requisite checks.

When using salt functions `onlyif` or `unless` requisites, a `get_return` key can now be used to specify a key to evaluate for truthiness. This can be used for execution modules which return status in a nested key.

```yaml
state
- name: foo
  onlyif:
    - fun: consul.get
      consul_url: http://127.0.0.1:8500
      key: not-existing
      get_return: res
```

State Execution Module

The `state.test` function can be used to test a state on a minion. This works by executing the `state.apply` function while forcing the `test` kwarg to `True` so that the `state.apply` function is not required to be called by the user directly. This also allows you to add the `state.test` function to a minion's `minion_blackout_whitelist` pillar if you wish to be able to test a state while a minion is in blackout.

New Grains

`systempath`

This grain provides the same information as the `path` grain, only formatted as a list of directories.

Salt-SSH updates

`ssh_pre_flight`

A new Salt-SSH roster option `ssh_pre_flight` has been added. This enables you to run a script before Salt-SSH tries to run any commands. You can set this option in the roster for a specific minion or use the `roster_defaults` to set it for all minions.

Example for setting `ssh_pre_flight` for specific host in roster file

```yaml
minion1:
  host: localhost
  user: root
  passwd: P@ssword
  ssh_pre_flight: /srv/salt/pre_flight.sh
```

Example for setting `ssh_pre_flight` using `roster_defaults`, so all minions run this script.

```yaml
roster_defaults:
  ssh_pre_flight: /srv/salt/pre_flight.sh
```
The `ssh_pre_flight` script will only run if the thin dir is not currently on the minion. If you want to force the script to run you have the following options:

- Wipe the thin dir on the targeted minion using the `-w` arg.
- Set `ssh_run_pre_flight` to `True` in the config.
- Run `salt-ssh` with the `--pre-flight` arg.

**set_path**

A new salt-ssh roster option `set_path` has been added. This allows you to set the path environment variable used to run the salt-ssh command on the target minion. You can set this setting in your roster file like so:

```
minion1:
  host: localhost
  user: root
  passwd: P@ssword
  set_path: '$PATH:/usr/local/bin/
```

**auto_detect**

You can now auto detect the dependencies to be packed into the salt thin when using the `ssh_ext_alternatives` feature.

```
ssh_ext_alternatives:
  2019.2:                 # Namespace, can be anything.
    py-version: [2, 7]    # Constraint to specific interpreter version
    path: /opt/2019.2/salt # Main Salt installation directory.
    auto_detect: True     # Auto detect dependencies
    py_bin: /usr/bin/python2.7 # Python binary path used to auto detect dependencies
```

This new `auto_detect` option needs to be set to `True` in your `ssh_ext_alternatives` configuration. Salt-ssh will attempt to auto detect the file paths required for the default dependencies to include in the thin. If you have a dependency already set in your configuration, it will not attempt to auto detect for that dependency.

You can also set the `py_bin` option to set the python binary to be used to auto detect the dependencies. If `py_bin` is not set, it will attempt to use the major Python version set in `py-version`. For example, if you set `py-version` to be `[2, 7]` it will attempt to find and use the `python2` binary.

**State Changes**

- Adding a new option for the State compiler, `disabled_requisites` will allow requisites to be disabled during State runs.
Salt Renderer updates

A new renderer for toml files has been added.

```plaintext
#!jinja|toml
{% set myvar = "sometext" %}

["some id"."test.nop"]
name = "{{ myvar }}"
["some id"."test.nop"]
txt = "hello"
["some id"."test.nop"]
"somekey" = "somevalue"
```

Execution Module updates

Vault Module

The vault module has been updated with the ability to cache generated tokens. By specifying uses and optionally ttl, the token generated on behalf of the minion will be allowed to persist and function for the defined time period or number of uses. Setting uses: 0 creates an unlimited use token, that is only constrained by the ttl.

```plaintext
vault:
  auth:
    uses: 25
```

This functionality is configured by default on the master and is thus shared behavior for all minion token generation. To delegate use count to individual minions, specify allow_minion_override: True in the master config, and define uses and ttl in the minion config as directed above.

```plaintext
vault:
  auth:
    method: token
    allow_minion_override: True
```

Additionally, the vault module now supports Vault secrets backend version 2. The appropriate secrets backend will be automatically detected, and cached in the same credentials file as long lived vault tokens mentioned above. For any configurations that worked around KV v2 handling by adding a manual data key to the end of vault lookups, `salt['vault'].read_secret('secret/my/secret')['data']`, these are automatically detected and will continue to function, but will generate a debug log message and can be removed.

The long lived token and secret metadata cache file can be cleared with the new `vault.clear_token_cache` execution function.
32.2.32 Salt 3001.1 Release Notes

Version 3001.1 is a bugfix release for 3001.

Changed

- Change the `enable_fqdns_grains` setting to default to `False` on Windows to address some issues with slowness. (#56296, #57529)
- Handle the UCRT libraries the same way they are handled in the Python 3 installer (#57594)
- Changes the 'SSDs' grain name to 'ssds' as all grains needs to be resolved in lowered case. (#57612)

Fixed

- When running scheduled jobs from a proxy minion with multiprocessing turned off (default) a recursive error occurs as `__pub_fun_args` is repeated over and over again in the `kwargs` element in the data dictionary. Now we make a copy of `data['kwargs']` instead of using a reference. (#57941)
- The `x509.certificate_managed` state no longer triggers a change because of sorting issues if the certificate being evaluated was previously generated under Python 2. (#56556)
- Added support to lo ip alias in network.managed state by checking if lo inet data from network.interfaces contains label with the name of managed interface. Return status True if match found. (#56901)
- Redact passwords in the return when setting credentials using `win_iis.container_setting` (#57285)
- Fixes issue with cmd.powershell. Some powershell commands do not return anything in stdout. This causes the JSON parser to fail because an empty string is not valid JSON. This changes an empty string to `{}` which is valid JSON and will not cause the JSON loader to stacktrace. (#57493)
- Improves performance. Profiling `test.ping` on Windows shows that 13 of 17 seconds are wasted when the esxi grain loads vsphere before noting that the OS is not a esxi host. (#57529)
- Fixed permissions issue with certain pip/virtualenv states/modules when configured for non-root user. (#57550)
- Allow running nox sessions either using our `nox-py2` fork or upstream nox. (#57583)
- Fixes issue with lgpo.get when there are unicode characters in the hostname (#57591)
- Fixes issue with virtual block devices, like loopbacks and LVMs, wrongly populating the "disks" or "ssds" grains. (#56121)
- Due to some optimization the `virtual` grain was never updated on illumos. Move the fallback in prtdiag output parsing outside the loop that now gets skipped due to the command exiting non-zero. (#57714)
- Grains module delkey and delval methods now support the force option. This is needed for deleting grains with complex (nested) values. (#57718)
- Moving import salt.modules.vsphere into `__virtual__` so we have access to test proxytype in opts, previously this was causing a traceback when run on proxy minion as `__opts__` does not exist outside of any functions. Introducing a new utils function, `is_proxytype`, to check that the device is a proxy minion and also that the proxy type matches. (#57743)
- Fixed fail_with_changes in the test state to use the comment argument when passed. (#57766)
- Adds a fix so salt can run on the latest macOS version Big Sur. (#57787)
- Fixes UnpackValueError when using GPG cache by using atomic open. (#57798)
• The gid_from_name argument was removed from the user.present state in version 3001, with no
deprecation path. It has been restored and put on a proper deprecation path. (#57843)
• Fixes dictionary being changed during iteration. (#57845)

Added

• Added docs demonstrating how to apply an MSI patch with winrepo (#32780)

32.2.33 Salt 3001.2 Release Notes

Version 3001.2 is a CVE fix release for 3001.

Fixed

• Prevent shell injections in netapi ssh client (cve-2020-16846)
• Prevent creating world readable private keys with the tls execution module. (cve-2020-17490)

32.2.34 Salt 3001.3 Release Notes

Version 3001.3 is a CVE fix release for 3001.

Fixed

• Properly validate eauth credentials and tokens along with their ACLs. Prior to this change eauth was not
properly validated when calling Salt ssh via the salt-api. Any value for ‘eauth’ or ‘token’ would allow a user to
bypass authentication and make calls to Salt ssh. (CVE-2020-25592)

32.2.35 Salt 3001.4 Release Notes

Version 3001.4 is a bugfix release for 3001.

Fixed

• Fixes salt-ssh authentication when using tty (#58922)

32.2.36 Salt 3001.5 Release Notes

Version 3001.5 is a CVE fix release for 3001.
Fixed

- CVE-2020-28243 - Fix local privilege escalation in the restartcheck module.
- CVE-2020-28972 - Ensure authentication to vcenter, vsphere, and esxi server validates the SSL/TLS certificate by default. If you want to skip SSL verification you can use `verify_ssl: False`.
- CVE-2020-35662 - Ensure the asam runner, qingcloud, splunk returner, panos proxy, cimc proxy, zenoss module, esxi module, vsphere module, glassfish module, bigip module, and keystone module validate SSL by default. If you want to skip SSL verification you can use `verify_ssl: False`.
- CVE-2021-3148 - Fix a command injection in the Salt-API when using the Salt-SSH client.
- CVE-2021-3144 - Fix eauth tokens can be used once after expiration
- CVE-2021-25281 - Fix salt-api so it honors eauth credentials for the wheel_async client.
- CVE-2021-25282 - Fix the salt.wheel.pillar_roots.write method so it is not vulnerable to directory traversal.
- CVE-2021-25283 - Fix the jinja render to protect against server side template injection attacks.
- CVE-2021-25284 - Fix cmdmod so it will not log credentials to log levels info and error.
- CVE-2021-3197 - Fix ssh client to remove ProxyCommand from arguments provided by cli and netapi.

32.2.37 Salt 3001.6 Release Notes

Version 3001.6 is a bug fix release for 3001.

Fixed

- Fix runners that broke when patching for CVE-2021-25281
- Fix issue with runners in SSE

Known Issue

When using the Salt-API with the SSH client some of the SSH options are not working currently and will be fixed in an upcoming bug fix release. We are currently testing and fixing which options still need to be fixed, but have confirmed the following ones do not work in this release: extra-filerefs, pre-flight. This does not impact normal Salt-SSH usage on the cli.

32.2.38 Salt 3001.7 Release Notes

Version 3001.7 is a bug fix release for 3001.
Fixed

- Allow "extra_filerefs" as sanitized kwargs for SSH client. Fix regression on "cmd.run" when passing tuples as cmd. (#59664)
- Allow all ssh kwargs as sanitized kwargs for SSH client. (#59748)
- Fix argument injection bug in restartcheck.restartcheck. This change hardens the fix for CVE-2020-28243.

32.2.39 Salt 3001.8 (2021-08-20)

Version 3001.8 is a CVE security fix release for 3001.

Fixed

- Verify the owner of an existing config before trusting it during install. If the owner cannot be verified, back it up and use defaults. (CVE-2021-22004)

Security

- Fix the CVE-2021-31607 vulnerability. Additionally, an audit and a tool was put in place, bandit, to address similar issues throughout the code base, and prevent them. (CVE-2021-31607)
- Ensure that sourced file is cached using its hash name (cve-2021-21996)

32.2.40 Salt 3000 Release Notes - Codename Neon

Security Advisory

For historical reasons, Salt requires PyCrypto as a "lowest common denominator". However, PyCrypto is unmaintained and best practice is to manually upgrade to use a more maintained library such as PyCryptodome. See Issue #52674 and Issue #54115 for more info

New Versioning

The neon release has removed the date versioning. Going forward we will use a non-date based version schema beginning at 3000. The version will be MAJOR.PATCH. For a planned release containing features and/or bug fixes the MAJOR version will be incremented. Please review the approved SEP for further details.

The new versioning scheme is PEP 440 compliant, but distutils.StrictVersion will result in an error invalid version number. If using StrictVersion to compare Salt's versions, please use LooseVersion. There is also the packaging library you can use to compare versions. Another alternative is using the salt version module.
Python 3.8 Not Supported

Please note that running Salt with Python 3.8 is currently not supported. It is recommended to not use a version higher than 3.7.

Vendored Tornado Code Base

The Tornado code base has been included as salt.ext.tornado. This was done to provide a consistent version of Tornado across all operating systems while we continue to work on upgrading Tornado to a recent version. New code that uses Tornado should import the module from salt.ext.tornado instead of importing the system version of Tornado.

Msgpack 1.0.0rc1 Incompatibility

Salt is currently incompatible with msgpack 1.0.0rc1. We recommend using versions < 1.0.0. This impacts the Salt Master's ability to run commands against minions. Please see Issue 56007 for more details and updates.

Pip Installing Salt On Windows

This release will not install correctly on windows when using pip to install salt. This issue is addressed in PR 56099. The workaround for this issue is:

```
pip install "pywin32==224" "WMI==1.4.9"
```

Those using the Salt Windows Installer are not affected by this issue.

Saltcheck Updates

Available since 2018.3, the saltcheck module has been enhanced to:

- Support saltenv environments
- Associate tests with states by naming convention
- Adds report_highstate_tests function
- Adds empty and notempty assertions
- Adds skip keyword
- Adds print_result keyword
- Adds assertion_section keyword
- Use saltcheck.state_apply to run state.apply for test setup or teardown
- Changes output to display test time
- Works with salt-ssh

Saltcheck provides unittest like functionality requiring only the knowledge of salt module execution and yaml. Saltcheck uses salt modules to return data, then runs an assertion against that return. This allows for testing with all the features included in salt modules.

In order to run state and highstate saltcheck tests, a sub-folder in the state directory must be created and named saltcheck-tests. Tests for a state should be created in files ending in *.tst and placed in the saltcheck-tests folder. tst files are run through the salt rendering system, enabling tests to be written in
yaml (or renderer of choice), and include jinja, as well as the usual grain and pillar information. Like states, multiple tests can be specified in a `tst` file. Multiple `tst` files can be created in the `saltcheck-tests` folder, and should be named the same as the associated state. The `id` of a test works in the same manner as in salt state files and should be unique and descriptive.

Usage

Example file system layout:

```
/srv/salt/apache/
  init.sls
  config.sls
  saltcheck-tests/
    init.tst
    config.tst
    deployment_validation.tst
```

Tests can be run for each state by name, for all `apache/saltcheck/*.tst` files, or for all states assigned to the minion in `top.sls`. Tests may also be created with no associated state. These tests will be run through the use of `saltcheck.run_state_tests`, but will not be automatically run by `saltcheck.run_highstate_tests`.

```
salt '*' saltcheck.run_state_tests apache,apache.config
salt '*' saltcheck.run_state_tests apache check_all=True
salt '*' saltcheck.run_highstate_tests
salt '*' saltcheck.run_state_tests apache.deployment_validation
```

Example Tests

```
#{ will run the common salt state before further testing #}
setup_test_environment:
  module_and_function: saltcheck.state_apply
  args:
    - common
  pillar-data:
    data: value

{% for package in ['apache2', 'openssh'] %}
#{ or another example #}
#{ for package in salt['pillar.get']('packages') #}
jinja_test_{{ package }}_latest:
  module_and_function: pkg.upgrade_available
  args:
    - {{ package }}
  assertion: assertFalse
{% endfor %}

validate_user_present_and_shell:
  module_and_function: user.info
  args:
    - root
```
assertion: assertEqual
expected-return: /bin/bash
assertion_section: shell
print_result: False

skip_test:
  module_and_function: pkg.upgrade_available
  args:
    - apache2
  assertion: assertFalse
  skip: True

Output Format Changes

Saltcheck output has been enhanced to display the time taken per test. This results in a change to the output format.

Previous Output:

```
local:
 |_          
   ntp:         
     ntp-client-installed: 
       Pass
     ntp-service-status: 
       Pass

 |_          
 TEST RESULTS:
          
 Failed:
  0
 Missing Tests:
  0
 Passed:
  2
```

New output:

```
local:
 |_          
   ntp:         
     ntp-client-installed: 
       duration: 1.0408
       status: Pass
```
Unless and onlyif Enhancements

The unless and onlyif requisites can now be operated with salt modules. The dictionary must contain an argument fun which is the module that is being run, and everything else must be passed in under the args key or will be passed as individual kwargs to the module function.

Note: Certain states have an unless/onlyif implementation that predates this feature, and may not work as expected:

- states.git
- states.cmd
- states.macpackage
- states.file
- states.docker_container

Examples:

```
check external ip address:
http.query:
  - name: https://icanhazip.com
  - status: 200
  - onlyif:
    - fun: file.file_exists
      path: /usr/local/bin/whatever
```

is equivalent to
check another ip address:
http.query:
  - name: https://icanhazip.com
  - status: 200
  - onlyif:
    - test -f /tmp/fnord.txt

Another example:

set mysql root password:
  debconf.set:
    - name: mysql-server-5.7
    - data:
      'mysql-server/root_password': {{'type': 'password', 'value': {{pillar['mysql.pass']}}}}
    - unless:
      - fun: pkg.version
      args:
        - mysql-server-5.7

Keystore State and Module

A new state and execution module for managing Java Keystore files is now included. It allows for adding/removing/listing as well as managing keystore files.

# salt-call keystore.list /path/to/keystore.jks changeit
local:
  |-
    |__________
    |          alias:
    |          hostname1
    |          expired:
    |          True
    |          sha1:
    |          type:
    |          TrustedCertEntry
    |          valid_start:
    |          August 22 2012
    |          valid_until:
    |          August 21 2017

define_keystore:
  keystore.managed:
    - name: /tmp/statestore.jks
    - passphrase: changeit
    - force_remove: True
    - entries:
      - alias: hostname1
      certificate: /tmp/testcert.crt
      - alias: remotehost
      certificate: /tmp/512.cert
      (continues on next page)
private_key: /tmp/512.key
- alias: stringhost
  certificate: |
      -----BEGIN CERTIFICATE-----
      MIICEjCCAX
      Hn+GmxZA
      -----END CERTIFICATE-----

XML Module

A new state and execution module for editing XML files is now included. Currently it allows for editing values from an xpath query, or editing XML IDs.

```bash
# salt-call xml.set_attribute /tmp/test.xml ".//actor[@id='3']" editedby "Jane Doe"
local: True
# salt-call xml.get_attribute /tmp/test.xml ".//actor[@id='3']"
local: 
  editedby: Jane Doe
  id: 3
# salt-call xml.get_value /tmp/test.xml ".//actor[@id='2']"
local: Liam Neeson
# salt-call xml.set_value /tmp/test.xml ".//actor[@id='2']" "Patrick Stewart"
local: True
# salt-call xml.get_value /tmp/test.xml ".//actor[@id='2']"
local: Patrick Stewart
```

```
ensure_value_true:
  xml.value_present:
    - name: /tmp/test.xml
    - xpath: ./actor[@id='1']
    - value: William Shatner
```

LGPO Execution Module

Multiple fixes were made to the `win_lgpo` to expand support for additional policies and improve performance. Issues with encoding and unsupported characters (smart-quotes, em-dash, etc) found in the ADML files as well as whitespace in some policies have been addressed.

Speed enhancements include:

- Caching the compiled xml from ADMX/ADML files in `__context__`
- Lowercasing all keys before compiling XML to remove an expensive XPath lookup
Additional functionality:

- Adds the `lgpo.get_policy` function that allows you to get the current settings for a single policy.
- Changes some policy names that were overly long

**LGPO State Module**

Multiple changes were made to the `win_lgpo` state to improve performance.

It now uses the `lgpo.get_policy` function instead of the `lgpo.get` to avoid reloading all settings on the machine at the beginning and end of each state run.

Supports the new shorter policy names but also attempts to resolve the older, longer policy names.

**Win_network Salt Util**

Now uses .NET libraries to obtain Interface information on Windows systems that support it. Unsupported systems fall back to the more expensive WMI calls. This is important as this data is gathered for grains and occurs each time a process is forked.

**Jinja enhancements**

**Troubleshooting Jinja map files**

A new `execution module` for `map.jinja` troubleshooting has been added.

Assuming the map is loaded in your formula SLS as follows:

```
{% from "myformula/map.jinja" import myformula with context %}
```

The following command can be used to load the map and check the results:

```
salt myminion jinja.load_map myformula/map.jinja myformula
```

The module can be also used to test `json` and `yaml` maps:

```
salt myminion jinja.import_yaml myformula/defaults.yaml
salt myminion jinja.import_json myformula/defaults.json
```

**json_query filter**

A port of Ansible `json_query` Jinja filter has been added. It allows making queries against JSON data using JMESPath language. Could be used to filter pillar data, `yaml` maps, and also useful with `http_query`.

Depends on the `jmespath` Python module.
Slot Syntax Updates

The slot syntax has been updated to support parsing dictionary responses and to append text.

demo dict parsing and append:
  test.configurable_test_state:
  - name: slot example
  - changes: False
  - comment: __slot__:salt:test.arg(shell="/bin/bash").kwargs.shell ~ / appended

local:
      ----------
      ID: demo dict parsing and append
      Function: test.configurable_test_state
      Name: slot example
      Result: True
      Comment: /bin/bash/appended
      Started: 09:59:58.623575
      Duration: 1.229 ms
      Changes: 

Also, slot parsing is now supported inside of nested state data structures (dicts, lists, unless/onlyif args):

demo slot parsing for nested elements:
  file.managed:
  - name: /tmp/slot.txt
  - source: salt://slot.j2
  - template: jinja
  - context:
      # Slot inside of the nested context dictionary
      variable: __slot__:salt:test.echo(a_value)
  - unless:
      - fun: file.search
      args:
        # Slot as unless argument
        - __slot__:salt:test.echo(/tmp/slot.txt)
        - "DO NOT OVERRIDE"
      ignore_if_missing: True

State Changes

- The file.symlink state was fixed to remove existing file system entries other than files, directories and symbolic links properly.
- The onchanges and prereq prerequisites now behave properly in test mode, due to removing pchanges.
- Added new ssh_auth.manage state to ensure only the specified ssh keys are present for the specified user.
- Added new saltutil state to use instead of module.run to more easily handle change.
Module Changes

- Added new `boto_ssm` module to set and query secrets in AWS SSM parameters.
- Added new `flatpak` module to work with flatpak packages.
- The `file.remove` module was fixed to remove file system entries other than files, directories and symbolic links properly.
- The `debian_ip` module used by the `network.managed` state has been heavily refactored. The order that options appear in inet/inet6 blocks may produce cosmetic changes. Many options without an 'ipvX' prefix will now be shared between inet and inet6 blocks. The options `enable_ipv4` and `enabled_ipv6` will now fully remove relevant inet/inet6 blocks. Overriding options by prefixing them with 'ipvX' will now work with most options (i.e. `dns` can be overridden by `ipv4dns` or `ipv6dns`). The `proto` option is now required.

Enhancements to Engines

Multiple copies of a particular Salt engine can be configured by including the `engine_module` parameter in the engine configuration.

```
engines:
  - production_logstash:
      host: production_log.my_network.com
      port: 5959
      proto: tcp
      engine_module: logstash
  - develop_logstash:
      host: develop_log.my_network.com
      port: 5959
      proto: tcp
      engine_module: logstash
```

- A new `fluent` engine has been added to export Salt events to fluentd.

```
engines:
  - fluent
      host: localhost
      port: 24224

<source>
  @type forward
  port 24224
</source>
<match saltstack.**>
  @type file
  path /var/log/td-agent/saltstack
</match>
```
Enhancements to Beacons

Multiple copies of a particular Salt beacon can be configured by including the `beacon_module` parameter in the beacon configuration.

```yaml
beacons:
  watch_importand_file:
    - files:
      /etc/important_file: {}
      - beacon_module: inotify
  watch_another_file:
    - files:
      /etc/another_file: {}
      - beacon_module: inotify
```

Enhancements to chroot

- New functions added to chroot `apply`, `sls`, and `highstate` that allow executing states in sls files or running `apply/highstate` inside of a chroot.

Minion-side ACL

Salt has had master-side ACL for the salt mine for some time, where the master configuration contained `mine_get` that specified which minions could request which functions. However, now you can specify which minions can access a function in the salt mine function definition itself (or when calling `mine.send`). This targeting works the same as the generic minion targeting as specified here. The parameters used are `allow_tgt` and `allow_tgt_type`. See also the documentation of the Salt Mine. Please note that if you want to use this new feature both your minion and masters will need to be on at least version 3000.

Deprecations

Raet Deprecated

- The Raet transport has been deprecated. Please use the supported transport protocols tcp or zeromq.

Module Deprecations

- The hipchat module has been removed due to the service being retired. Google Chat, MS Teams, or Slack may be suitable replacements.
- The `dockermod` module has been changed as follows:
  - Support for the `tags` kwarg has been removed from the `dockermod.resolve_tag` function.
  - Support for the `network_id` kwarg has been removed from the `dockermod.connect_container_to_network` function. Please use `net_id` instead.
  - Support for the `name` kwarg has been removed from the `dockermod.sls_build` function. Please use `repository` and `tag` instead.
  - Support for the `image` kwarg has been removed from the following functions. In all cases, please use both the `repository` and `tag` options instead:
* dockermod.build  
* dockermod.commit  
* dockermod.import  
* dockermod.load  
* dockermod.tag

- The heat module has removed the environment kwarg from the heat.create_stack and heat.update_stack functions due to a spelling error. Please use environment instead.

- The ssh execution module has been changed as follows:
  - Support for the ssh.get_known_host function has been removed. Please use the ssh.get_known_host_entries function instead.
  - Support for the ssh.recv_known_host function has been removed. Please use the ssh.recv_known_host_entries function instead.

- The `firewalld` module has been changed as follows:
  - The default setting for the force_masquerade option in the firewalld.add_port function has changed from True to False.
  - Support for the force_masquerade option in the firewalld.add_port_fwd function has been changed from True to False.

**State Deprecations**

- The hipchat state has been removed due to the service being retired. MS Teams or Slack may be suitable replacements.

- The cmd state module has removed the quiet kwarg from the cmd.run function. Please set output_loglevel to quiet instead.

- The heat state module has removed the environment kwarg from the heat.deployed function due to a spelling error. Please use environment instead.

- The `firewalld` state has been changed as follows:
  - The default setting for the prune_services option in the firewalld.present function has changed from True to False.

**Fileserver Deprecations**

- The hgfs fileserver had the following config options removed:
  - The hgfs_env_whitelist config option has been removed in favor of hgfs_saltenv_whitelist.
  - The hgfs_env_blacklist config option has been removed in favor of hgfs_saltenv_blacklist.

- The svnfs fileserver had the following config options removed:
  - The svnfs_env_whitelist config option has been removed in favor of svnfs_saltenv_whitelist.
  - The svnfs_env_blacklist config option has been removed in favor of svnfs_saltenv_blacklist.
• The gitfs fileserver had the following config options removed:
  - The `gitfs_env_whitelist` config option has been removed in favor of `gitfs_saltenv_whitelist`.
  - The `gitfs_env_blacklist` config option has been removed in favor of `gitfs_saltenv_blacklist`.

Engine Removal

• The hipchat engine has been removed due to the service being retired. For users migrating to Slack, the `slack` engine may be a suitable replacement.

Returner Removal

• The hipchat returner has been removed due to the service being retired. For users migrating to Slack, the `slack` returner may be a suitable replacement.

Grain Deprecations

For `smartos` some grains have been deprecated. These grains have been removed.
  • The `hypervisor_uuid` has been replaced with `mdata:sdc:server_uuid` grain.
  • The `datacenter` has been replaced with `mdata:sdc:datacenter_name` grain.

Cloud Deprecations

• The nova cloud driver has been removed in favor of the openstack cloud driver.

Jinja Filter Deprecations

• The following jinja filters are set to be removed in the 3003 release:
  - `json_decode_dict` in favor of `tojson`
  - `json_decode_list` in favor of `tojson`

Utils Deprecations

• All of the functions in `salt.utils.__init__.py` have been removed. These include:
  - `salt.utils.option`
  - `salt.utils.required_module_list`
  - `salt.utils.required_modules_error`
  - `salt.utils.get_accumulator_dir`. Please use `salt.state.get_accumulator_dir()` instead.
  - `salt.utils.fnmatch_multiple`. Please use `salt.utils.itertools.fnmatch_multiple()` instead.
  - `salt.utils.appendproctitle`. Please use `salt.utils.process.appendproctitle()` instead.
- `salt.utils.daemonize`. Please use `salt.utils.process.daemonize()` instead.
- `salt.utils.daemonize_if`. Please use `salt.utils.process.daemonize_if()` instead.
- `salt.utils.reinit_crypto`. Please use `salt.utils.crypt.reinit_crypto()` instead.
- `salt.utils.pem_finger`. Please use `salt.utils.crypt.pem_finger()` instead.
- `salt.utils.to_bytes`. Please use `salt.utils.stringutils.to_bytes()` instead.
- `salt.utils.to_str`. Please use `salt.utils.stringutils.to_str()` instead.
- `salt.utils.to_unicode`. Please use `salt.utils.stringutils.to_unicode()` instead.
- `salt.utils.str_to_num`. Please use `salt.utils.stringutils.to_num()` instead.
- `salt.utils.is_quoted`. Please use `salt.utils.stringutils.is_quoted()` instead.
- `salt.utils.dequote`. Please use `salt.utils.stringutils.dequote()` instead.
- `salt.utils.is_hex`. Please use `salt.utils.stringutils.is_hex()` instead.
- `salt.utils.is_bin_str`. Please use `salt.utils.stringutils.is_binary()` instead.
- `salt.utils.rand_string`. Please use `salt.utils.stringutils.random()` instead.
- `salt.utils.contains_whitespace`. Please use `salt.utils.stringutils.contains_whitespace()` instead.
- `salt.utils.build_whitespace_split_regex`. Please use `salt.utils.stringutils.build_whitespace_split_regex()` instead.
- `salt.utils.expr_match`. Please use `salt.utils.stringutils.expr_match()` instead.
- `salt.utils.check_whitelist_blacklist`. Please use `salt.utils.stringutils.check_whitelist_blacklist()` instead.
- `salt.utils.check_include_exclude`. Please use `salt.utils.stringutils.check_include_exclude()` instead.
- `salt.utils.print_cli`. Please use `salt.utils.stringutils.print_cli()` instead.
- `salt.utils.clean_kwargs`. Please use `salt.utils.args.clean_kwargs()` instead.
- `salt.utils.invalid_kwargs`. Please use `salt.utils.args.invalid_kwargs()` instead.
- `salt.utils.shlex_split`. Please use `salt.utils.args.shlex_split()` instead.
- `salt.utils.arg_lookup`. Please use `salt.utils.args.arg_lookup()` instead.
- `salt.utils.split_input`. Please use `salt.utils.args.split_input()` instead.
- `salt.utils.test_mode`. Please use `salt.utils.args.test_mode()` instead.
- `salt.utils.format_call`. Please use `salt.utils.args.format_call()` instead.
- `salt.utils.which`. Please use `salt.utils.path.which()` instead.
- `salt.utils.which_bin`. Please use `salt.utils.path.which_bin()` instead.
- `salt.utils.path_join`. Please use `salt.utils.path.join()` instead.
- `salt.utils.check_or_die`. Please use `salt.utils.path.check_or_die()` instead.
- `salt.utilssanitize_win_path_string`. Please use `salt.utils.path.sanitize_win_path_string()` instead.
- `salt.utils.rand_str`. Please use `salt.utils.hashutils.random_hash()` instead.
- `salt.utils.get_hash`. Please use `salt.utils.hashutils.get_hash()` instead.
- `salt.utils.is_windows`. Please use `salt.utils.platform.is_windows()` instead.
- `salt.utils.is_proxy`. Please use `salt.utils.platform.is_proxy()` instead.
- `salt.utils.is_linux`. Please use `salt.utils.platform.is_linux()` instead.
- `salt.utils.is_darwin`. Please use `salt.utils.platform.is_darwin()` instead.
- `salt.utils.is_sunos`. Please use `salt.utils.platform.is_sunos()` instead.
- `salt.utils.is_smartos`. Please use `salt.utils.platform.is_smartos()` instead.
- `salt.utils.is_smartos_globalzone`. Please use `salt.utils.platform.is_smartos_globalzone()` instead.
- `salt.utils.is_smartos_zone`. Please use `salt.utils.platform.is_smartos_zone()` instead.
- `salt.utils.is_freebsd`. Please use `salt.utils.platform.is_freebsd()` instead.
- `salt.utils.is_netbsd`. Please use `salt.utils.platform.is_netbsd()` instead.
- `salt.utils.is_openbsd`. Please use `salt.utils.platform.is_openbsd()` instead.
- `salt.utils.is_aix`. Please use `salt.utils.platform.is_aix()` instead.
- `salt.utils.safe_rm`. Please use `salt.utils.files.safe_rm()` instead.
- `salt.utils.is_empty`. Please use `salt.utils.files.is_empty()` instead.
- `salt.utils.fopen`. Please use `salt.utils.files.fopen()` instead.
- `salt.utils.flopen`. Please use `salt.utils.files.flopen()` instead.
- `salt.utils.fpopen`. Please use `salt.utils.files.fpopen()` instead.
- `salt.utils.rm_rf`. Please use `salt.utils.files.rm_rf()` instead.
- `salt.utils.mkstemp`. Please use `salt.utils.files.mkstemp()` instead.
- `salt.utils.istextfile`. Please use `salt.utils.files.is_text_file()` instead.
- `salt.utils.is_bin_file`. Please use `salt.utils.files.is_binary()` instead.
- `salt.utils.list_files`. Please use `salt.utils.files.list_files()` instead.
- `salt.utils.safe_walk`. Please use `salt.utils.files.safe_walk()` instead.
- `salt.utils.st_mode_to_octal`. Please use `salt.utils.files.st_mode_to_octal()` instead.
- `salt.utils.normalize_mode`. Please use `salt.utils.files.normalize_mode()` instead.
- `salt.utils.human_size_to_bytes`. Please use `salt.utils.files.human_size_to_bytes()` instead.
- `salt.utils.backup_minion`. Please use `salt.utils.files.backup_minion()` instead.
- `salt.utils.str_version_to_evr`. Please use `salt.utils.pkg.rpm.version_to_evr()` instead.
- `salt.utils.parse_docstring`. Please use `salt.utils.doc.parse_docstring()` instead.
- `salt.utils.compare_versions`. Please use `salt.utils.versions.compare()` instead.
- `salt.utils.version_cmp`. Please use `salt.utils.versions.version_cmp()` instead.
- `salt.utils.warn_until`. Please use `salt.utils.versions.warn_until()` instead.
- `salt.utils.kwargs_warn_until`. Please use `salt.utils.versions.kwargs_warn_until()` instead.

32.2. Previous releases
- `salt.utils.get_color_theme`. Please use `salt.utils.color.get_color_theme()` instead.
- `salt.utils.get_colors`. Please use `salt.utils.color.get_colors()` instead.
- `salt.utils.gen_state_tag`. Please use `salt.utils.state.gen_tag()` instead.
- `salt.utils.search_onfail_requisites`. Please use `salt.utils.state.search_onfail_requisites()` instead.
- `salt.utils.check_onfail_requisites`. Please use `salt.utils.state.check_onfail_requisites()` instead.
- `salt.utils.check_state_result`. Please use `salt.utils.state.check_result()` instead.
- `salt.utils.get_user`. Please use `salt.utils.user.get_user()` instead.
- `salt.utils.get_uid`. Please use `salt.utils.user.get_uid()` instead.
- `salt.utils.get_specific_user`. Please use `salt.utils.user.get_specific_user()` instead.
- `salt.utils.chugid`. Please use `salt.utils.user.chugid()` instead.
- `salt.utils.chugid_and_umask`. Please use `salt.utils.user.chugid_and_umask()` instead.
- `salt.utils.get_default_group`. Please use `salt.utils.user.get_default_group()` instead.
- `salt.utils.get_group_list`. Please use `salt.utils.user.get_group_list()` instead.
- `salt.utils.get_group_dict`. Please use `salt.utils.user.get_group_dict()` instead.
- `salt.utils.get_gid_list`. Please use `salt.utils.user.get_gid_list()` instead.
- `salt.utils.get_gid`. Please use `salt.utils.user.get_gid()` instead.
- `salt.utils.enable_ctrl_logoff_handler`. Please use `salt.utils.win_functions.enable_ctrl_logoff_handler()` instead.
- `salt.utils.traverse_dict`. Please use `salt.utils.data.traverse_dict()` instead.
- `salt.utils.traverse_dict_and_list`. Please use `salt.utils.data.traverse_dict_and_list()` instead.
- `salt.utils.filter_by`. Please use `salt.utils.data.filter_by()` instead.
- `salt.utils.subdict_match`. Please use `salt.utils.data.subdict_match()` instead.
- `salt.utils.substr_in_list`. Please use `salt.utils.data.substr_in_list()` instead.
- `salt.utils.is_dictlist`. Please use `salt.utils.data.is_dictlist()` instead.
- `salt.utils.repack_dictlist`. Please use `salt.utils.data.repack_dictlist()` instead.
- `salt.utils.compare_dicts`. Please use `salt.utils.data.compare_dicts()` instead.
- `salt.utils.compare_lists`. Please use `salt.utils.data.compare_lists()` instead.
- `salt.utils.decode_dict`. Please use `salt.utils.data.decode_dict()` instead.
- `salt.utils.decode_list`. Please use `salt.utils.data.decode_list()` instead.
- `salt.utils.exactly_n`. Please use `salt.utils.data.exactly_n()` instead.
- `salt.utils.exactly_one`. Please use `salt.utils.data.exactly_one()` instead.
- `salt.utils.is_list`. Please use `salt.utils.data.is_list()` instead.
- `salt.utils.is_iter`. Please use `salt.utils.data.is_iter()` instead.
- `salt.utils.isorted`. Please use `salt.utils.data.sorted_ignorecase()` instead.
- `salt.utils.is_true`. Please use `salt.utils.data.is_true()` instead.
- `salt.utils.mysql_to_dict`. Please use `salt.utils.data.mysql_to_dict()` instead.
- `salt.utils.simple_types_filter`. Please use `salt.utils.data.simple_types_filter()` instead.
- `salt.utils.ip_bracket`. Please use `salt.utils.zeromq.ip_bracket()` instead.
- `salt.utils.gen_mac`. Please use `salt.utils.network.gen_mac()` instead.
- `salt.utils.mac_str_to_bytes`. Please use `salt.utils.network.mac_str_to_bytes()` instead.
- `salt.utils.refresh_dns`. Please use `salt.utils.network.refresh_dns()` instead.
- `salt.utils.dns_check`. Please use `salt.utils.network.dns_check()` instead.
- `salt.utils.get_context`. Please use `salt.utils.stringutils.get_context()` instead.
- `salt.utils.get_master_key`. Please use `salt.utils.master.get_master_key()` instead.
- `salt.utils.date_cast`. Please use `salt.utils.dateutils.date_cast()` instead.
- `salt.utils.date_format`. Please use `salt.utils.dateutils.strftime()` instead.
- `salt.utils.total_seconds`. Please use `salt.utils.dateutils.total_seconds()` instead.
- `salt.utils.find_json`. Please use `salt.utils.json.find_json()` instead.
- `salt.utils.import_json`. Please use `salt.utils.json.import_json()` instead.
- `salt.utils.namespaced_function`. Please use `salt.utils.functools.namespaced_function()` instead.
- `salt.utils.alias_function`. Please use `salt.utils.functools.alias_function()` instead.
- `salt.utils.profile_func`. Please use `salt.utils.profile.profile_func()` instead.
- `salt.utils.activate_profile`. Please use `salt.utils.profile.activate_profile()` instead.
- `salt.utils.output_profile`. Please use `salt.utils.profile.output_profile()` instead.

**salt.auth.Authorize Class Removal**

- The `salt.auth.Authorize` Class inside of the `salt/auth/__init__.py` file has been removed and the any_auth method inside of the file `salt/utils/minions.py`. These method and classes were not being used inside of the salt code base.

### 32.2.41 Salt 3000.1 Release Notes

Version 3000.1 is a bugfix release for 3000.
Statistics

- Total Merges: 53
- Total Issue References: 15
- Total PR References: 54
- Contributors: 16 (Ch3LL, UtahDave, brycenl, cmcmarrow, dwoz, frogunder, garethgreenaway, lorengordon, mchugh19, oeufette, raddessi, s0undt3ch, sjorge, terminalmage, twangboy, waynew)

Changelog for v3000..v3000.1

Generated at: 2020-03-27 16:48:41 UTC

- PR #56455: (s0undt3ch) Fix gitpython windows requirement @ 2020-03-27 16:31:57 UTC
  - c5a700e01e Merge pull request #56455 from s0undt3ch/hotfix/gitpython
  - d9791c393f Revert and fix windows requirements
  - 4b573c1c94 Revert "Fix win deps"

- PR #56466: (frogunder) 3000.1 releasenotes updates @ 2020-03-24 20:28:23 UTC
  - 7ba36325d9 Merge pull request #56446 from frogunder/releasenotes_3000.1_updates
  - 6b47f474af 3000.1 releasenotes updates

- PR #56435: (twangboy) Update mac build scripts @ 2020-03-24 19:47:40 UTC
  - 4d2bc7004d Merge pull request #56435 from twangboy/update_mac_build_scripts
  - 5d244b0aa6 Merge branch 'master' into update_mac_build_scripts
  - 8fd52a243 Update gitpython to 2.1.15
  - afcedc5232 Remove --ignore-installed
  - e6cc2a6192 Separate pyobjc requirements
  - 262ad2e98a Compile static requirements
  - 22af72d0f2 Update noxfile and .precommit
  - 68a36f2e37 Add req_ext.txt
  - 5851a5c2cd Roll back changes, fix dependencies

- ISSUE #56433: (Ch3LL) integration.states.test_pip_state.PipStateTest.test_pip_installed_specific_env failing on MAC (refs: #56436)

- PR #56436: (Ch3LL) Fix #56433 - test_pip_installed_specific_env @ 2020-03-24 19:47:20 UTC
  - 8a8ae8ebe4 Merge pull request #56436 from Ch3LL/pip_custom_pypipi
  - 5565ff96c Merge branch 'master' into pip_custom_pypipi

- PR #56423: (Ch3LL) Update changelog with package fixes @ 2020-03-24 16:42:17 UTC
  - 3a993d73a9 Merge pull request #56423 from Ch3LL/changelog_again
  - 963c16e1a7 update pr number for mac build changes in changelog
  - 83e22b77c7 Update changelog with package fixes

- PR #56417: (twangboy) Update mac build scripts @ 2020-03-23 18:45:34 UTC
- d2a5bd8add Merge pull request #56417 from twangboy/update_mac_build_scripts
- 3bd8dd82 Update noxfile and pre-commit
- de58c52d66 Merge branch 'update_mac_build_scripts' of https://github.com/twangboy/salt into update_mac_build_scripts
  - e7f8d5349 Update static requirements
  - a53977de5b Merge branch 'update_mac_build_scripts' of github.com:twangboy/salt into update_mac_build_scripts
  - 04e5cde9dd pkg/osx/req_ext.txt no longer exists
  - be4a27d207 Update static requirements
- 02dfe4119c Add pyobjc in its own requirements file
- 6b2ac2be64 Remove pyobjc, enforce pip install location
- 30ca5d04ec Remove cryptography, it gets installed by pyopenssl
- fda8af448 Update static requirements
- 732ecc3c1 Update pre-commit config
- 1fa9864e3dc Don't set a version for pyopenssl
- 461b198978 Update dependencies, remove req_ext.txt

- **PR #56418**: (Ch3LL) Ensure version.py included before we install @ 2020-03-23 18:27:46 UTC
  - 74575a6993 Merge pull request #56418 from Ch3LL/egg_version
  - 85d7c784ef Fix integration setup egg test
  - a8a22a4040 Ensure version.py included before we install
  - 86fe450c82 Fix #56433 - test_pip_installed_specific_env

- **PR #56403**: (frogunder) update 3000.1 releasenotes @ 2020-03-17 23:50:21 UTC
  - 249367b462 Merge pull request #56403 from frogunder/update_releasenotes_3000.1
  - 9d972e96e8 update 3000.1 releasenotes

- **PR #56398**: (Ch3LL) Add additional PRs to 3000.1 changelog @ 2020-03-17 18:08:15 UTC
  - 0de5e1e136 Merge pull request #56398 from Ch3LL/change_3000.1
  - 79c337b3db Add additional PRs to 3000.1 changelog

- **PR #56376**: (twangboy) Fix win deps @ 2020-03-17 17:02:46 UTC
  - 5ac09dcb9 Merge pull request #56376 from twangboy/fix_win_deps
  - 6c83bee9e Fix win deps

- **PR #56378**: (Ch3LL) Include _version.py if building wheel @ 2020-03-17 17:01:33 UTC
  - e72a8d2cb3 Merge pull request #56378 from Ch3LL/wheel_version
  - 22cccd2107 Use virtualenv test helper that already exists and fix setup.py
  - 293b1fdd2 cleanup code
  - ddfb065bf7b add bdist_wheel test
  - fceff0287c ensure name is included in new version
  - 0cb6d3246 Ensure SaltStackVersion attributes in _version.py correct
- 39cfd5382d Include _version.py if building wheel

- **PR #56387**: (bryceml) update gpg key expiration date @ 2020-03-17 16:59:30 UTC
  - 6a9326fb70 Merge pull request #56387 from bryceml/update_gpg_key
  - b74b26cfc3 update gpg key expiration date

- **PR #55822**: (cmcmarrow) fix_indefinitely_code @ 2020-03-16 17:34:11 UTC
  - fceee692ca4 Merge pull request #55822 from cmcmarrow/win_task_repeat
  - e257fb2804 Merge branch ‘master’ into win_task_repeat
  - 07cad08f8f Merge branch ‘master’ into win_task_repeat
  - 4b80301338 Merge branch ‘master’ into win_task_repeat
  - 9df94569c4 Merge branch ‘master’ into win_task_repeat
  - 2a2d0b9ec Merge branch ‘master’ into win_task_repeat
  - dee9c134e7 Merge branch ‘master’ into win_task_repeat
  - beaf05d514 Update test_win_task.py
  - 6e923f75fc Merge branch ‘master’ into win_task_repeat
  - 5839da81ee add test
  - 2aa6338d0f fix indefinitely code

- **PR #56373**: (frogunder) update 3000.1 releasenotes @ 2020-03-13 18:58:43 UTC
  - c16e89220 Merge pull request #56373 from frogunder/releasenotes_3000.1
  - a5ca8b5277 Fix doc test errors
  - 47e483187e update 3000.1 releasenotes

- **PR #56365**: (Ch3LL) Update 3000.1 changelog @ 2020-03-13 17:21:02 UTC
  - 62857a9f0e Merge pull request #56365 from Ch3LL/changelog_3000.1
  - 851d78f7c7 Update 3000.1 changelog

- **PR #56360**: (Ch3LL) Use virtualenv 20.0.10 for macosx tests @ 2020-03-13 16:39:57 UTC
  - a66e969f2e Merge pull request #56360 from Ch3LL/mac_virtual
  - abda2508c3 Update static requirements files
  - dca3390c0c skip zcbuildout state test when virtualenv 20.0.0
  - fdeae1f0e1 Use virtualenv 20.0.10 for macosx tests

- **ISSUE #56324**: (kiemlicz) Cannot use Saltcheck module (refs: #56327)

- **PR #56327**: (mchugh19) keep cache_copied_files variable a list @ 2020-03-13 16:39:32 UTC
  - d8fc07274c Merge pull request #56327 from mchugh19/56324
  - e1e2df2b1d Merge branch ‘master’ into 56324
  - 6d7572706d use includes for saltcheck integration test
  - 5b7073b01d keep cache_copied_files variable a list

- **PR #56023**: (cmcmarrow) add fix for bin_env @ 2020-03-13 16:39:09 UTC
  - 2d31d61ab9 Merge pull request #56023 from cmcmarrow/binary_fix_pip_bin_env
- f780fd013e Merge branch 'master' into binary_fix_pip_bin_env
- d642c7c270 Merge branch 'master' into binary_fix_pip_bin_env
- 82b39d26f8 Merge branch 'binary_fix_pip_bin_env' of https://github.com/cmcmarrow/salt into binary_fix_pip_bin_env
  * a5fa22528a Merge branch 'master' into binary_fix_pip_bin_env
- 10ca0fa5d6 fix space
- 22ff6c180 fix _pip_bin_env
- d5425e6630 Merge branch 'master' into binary_fix_pip_bin_env
- ceda3fde00 add full support for when missing kwargs or args
- cf4ab215b5 add fix for bin_env

- **PR #56310**: (twangboy) Only process ADMX files when loading policies @ 2020-03-11 23:47:50 UTC
  - 19bb6aae0c Merge pull request #56310 from twangboy/fix_lgpo_admx
  - 4bc5b05586 Fix some lint
  - ce282f9754 Mark destructive test
  - 8af09c31ca Add test case
  - 547d35cf4c Only process ADMX files when loading policies

- **PR #56272**: (twangboy) Properly resolve the policy name @ 2020-03-11 22:11:02 UTC
  - 2d78931ef Merge pull request #56272 from twangboy/fix_lgpo_names
  - 233ed12472 Add comments to helper function
  - a7369e41d7 Remove redundant code... some more
  - 1db3052b94 Consolidate duplicate code
  - b25b56299d Fix failing PY2 tests
  - 36a24ac28f Only load adm1 data once
  - bc13be6850 Add some tests
  - 2e9b6e6461 Properly resolve the policy name

- **PR #56358**: (s0undt3ch) Fix version instantiation when minor is an empty string @ 2020-03-11 22:10:04 UTC
  - c6c6e23d9 Merge pull request #56358 from s0undt3ch/hotfix/version-parsing
  - cb2e78502 Fix version instantiation when minor is an empty string

- **PR #56160**: (twangboy) Fix issue with existing reg_dword entries @ 2020-03-11 22:09:21 UTC
  - b33047c574 Merge pull request #56160 from twangboy/fix_reg_dword
  - 80650c2a8c Make test more explicit
  - 67d1c18c7 Fix issue with existing reg_dword entries

- **PR #56337**: (twangboy) Handle Adapter Type 53 and Undefined Types @ 2020-03-11 22:08:19 UTC
  - 8f23706871 Merge pull request #56337 from twangboy/fix_win_network_type
  - 18a31a0b22 Merge branch 'master' into fix_win_network_type
  - d92914ad91 Merge branch 'master' into fix_win_network_type
224629bdeb Handle Adapter Type 53 and Undefined Types

- **PR #56060**: (twangboy) Fix regex string for "**Del and "**DelVals @ 2020-03-11 22:05:43 UTC
  - e551ff6a31 Merge pull request #56060 from twangboy/fix_lgpo_regex
  - ca260ef582 Use byte-strings in the test
  - 7c81874a5b Add some tests
  - 944b022f33 Fix regex string for "**Del and "**DelVals

- **ISSUE #56131**: (thusoy) Salt v3000 crashes with unless clause if pip is missing (refs: #56215)

- **PR #56215**: (dwoz) Fix for unless requisite when pip is not installed @ 2020-03-11 22:04:30 UTC
  - c9be9431c1 Merge pull request #56215 from dwoz/issue-56131
  - 5dd8f8eabe Fix linter
  - 7492c2f7c7 Remove crufty prints from test
  - 8ceaa6e6f3 Only remove pip related modules
  - 69b21e5e68 Add regression test for issue 56131
  - 9d23f55adc Fix for unless requisite when pip is not installed

- **PR #56339**: (twangboy) Fix win_dns_client when used with scheduler @ 2020-03-11 22:01:32 UTC
  - 74b67ea741 Merge pull request #56339 from twangboy/fix_win_dns_client
  - d6a4fbe85d Fix bad test (lint)
  - 47bd67373f Add some tests
  - 995975649a Add missing import, improve docs

- **ISSUE #56288**: (lorensgordon) win_lgpo: lgpo.set with secedit policy always generates KeyError: u'lgpo.secedit_data' (refs: #56290)

- **PR #56290**: (lorensgordon) Ensures popping lgpo.secedit_data does not throw KeyError @ 2020-03-11 17:27:04 UTC
  - 7701e8762d Merge pull request #56290 from lorensgordon/pop-secedata
  - 62453bb6ce Merge branch 'master' into pop-secedata
  - 95d5cea9ff Merge branch 'master' into pop-secedata
  - 2979158a8b Tests the if_secedits: logic path in lgpo.set_
  - d1f776178c Ensures popping lgpo.secedit_data does not throw KeyError

- **ISSUE #56119**: (finalduty) Release notes for v3000 do not mention changes to slspath variable (refs: #56341)

- **PR #56341**: (dwoz) Revert "Don't remove one directory level from slspath" @ 2020-03-11 17:03:33 UTC
  - 84c60708cd Merge pull request #56341 from dwoz/issue-56119
  - af6e684c36 Clarify slspath documentation
  - 6dfc098fd1 Add debug for test asserts
  - 9fa9dab8b2 Fix linter warts
  - fd702bdd44 Add regression test for #56119
  - 3d3b673cec Revert "Don't remove one directory level from slspath"

- **PR #56185**: (terminalmage) Fix regression in service states with reload argument @ 2020-03-11 16:45:58 UTC
- 4f19813a49c Merge pull request #56185 from terminalmage/issue56167
- 65b3f4c9a0 Merge branch 'master' into issue56167
- 7b41a00b4f Merge branch 'master' into issue56167
- 8f7034d946 Merge branch 'master' into issue56167
- e9b634e1 Skip on OSX for now
- 5996280241 Add __opts__ and __grains__ just in case
- af3e841d08 Fix failing test
- 586f21aede Add functional test
- 1af9c10f0 Fix regression in service states with reload argument

• PR #56068: (s0undt3ch) Update the bootstrap script to latest version, v2020.02.24 @ 2020-03-11 16:44:23 UTC
  - 74f8b2a926 Merge pull request #56068 from s0undt3ch/hotfix/update-bootstrap
  - ce83b190ed Merge branch 'master' into hotfix/update-bootstrap
  - ccd23d82d Merge branch 'master' into hotfix/update-bootstrap
  - 88a52f88ff Update the bootstrap script to latest version, v2020.02.24
  - 012fb5c44b Update the bootstrap script to latest version, v2020.02.04

• PR #56321: (oeuftete) Tidy up formatting in boto_secgroup docs @ 2020-03-11 08:14:48 UTC
  - 154257e2e9 Merge pull request #56321 from oeuftete/tidy-boto-secgroup-docs
  - 616f11b33e Merge branch 'master' into tidy-boto-secgroup-docs
  - 412bb4d62d Tidy up formatting in boto_secgroup docs

• PR #56336: (Ch3LL) Fix test_issue_2594_non_invalidated_cache test (update zope.interface) @ 2020-03-11 00:08:43 UTC
  - 11d33ec9d0 Merge pull request #56336 from Ch3LL/fix_56330
  - bbf3e090b Fix test_issue_2594_non_invalidated_cache test (update zope.interface)

• PR #56346: (frogunder) Update man pages to 3000.1 @ 2020-03-11 00:07:31 UTC
  - a640bd30fc Merge pull request #56346 from frogunder/man_pages_3000_1
  - 6d7c1b6482 Update man pages to 3000.1

• PR #56099: (s0undt3ch) Fix Windows and macOS requirements handling in setup.py @ 2020-03-11 00:04:37 UTC
  - 2f783d247e Merge pull request #56099 from s0undt3ch/hotfix/requirements
  - c19f4a3f8e Merge branch 'master' into hotfix/requirements
  - 1e78c08e6f Also take into account macOS requirements
  - 7eef14952c Also include req_win.txt

• PR #56218: (raddessi) Changed StrictVersion checking of setuptools to LooseVersion @ 2020-03-10 23:59:54 UTC
  - 7c4d879073 Merge pull request #56218 from raddessi/master.v3000-conda
  - 44556fd57 Merge branch 'master' into master.v3000-conda
  - 566c03b786 Merge branch 'master' into master.v3000-conda

32.2. Previous releases 4957
- 82773a9799 Removed now-unused StrictVersion import from setup.py
- 31bb0f7cd1 Changed StrictVersion checking of setuptools to LooseVersion

- **PR #56128**: (waynew) Update CHANGELOG with release date and unreleased. @ 2020-03-10 23:58:15 UTC
  - acbd3556e5 Merge pull request #56128 from waynew/master
  - e3216db3e5 Update CHANGELOG with release date and unreleased.

- **PR #55937**: (twangboy) Update windows build scripts @ 2020-03-10 23:55:55 UTC
  - 12140545ab Merge pull request #55937 from twangboy/updatedeps
  - f00a504a48 Add back the pylauncher
  - 30b9e32356 Revert changes to req and req_win
  - 98dc0e970c Fix some warts in the build_env scripts
  - 8404141f65 Update dependencies

- **PR #55906**: (sjorge) smartos.vm_present could not handle nics with vrrp_vrid property @ 2020-03-10 23:54:44 UTC
  - 485a47cfd1 Merge pull request #55906 from sjorge/smartos_vrrp
  - 5bd7dd009a Merge branch `master` into smartos_vrrp
  - f77719c179 smartos state should handle vrrp config

- **ISSUE #55185**: (sjorge) salt.modules.pdbedit doesn’t work on samba older than 4.8 (refs: #55894)

- **PR #55894**: (sjorge) #55185 pdbedit module should check for version 4.8.x or newer @ 2020-03-10 23:54:21 UTC
  - 1fa8555360 Merge pull request #55894 from sjorge/pdbedit_55185
  - 9dc7b71122 Merge branch `master` into pdbedit_55185

- **ISSUE #56195**: (lorentgordon) Windows: Using inline powershell in args with cmd.script and shell: powershell (refs: #56197)

- **PR #56197**: (lorentgordon) Allows use of inline powershell for cmd.script args @ 2020-03-10 23:52:47 UTC

  - 95d46d6cc8 #55185 pdbedit module should check for version 4.8.x or newer

### 32.2.42 Salt 3000.2 Release Notes

Version 3000.2 is a CVE-fix release for 3000.

**Security Fix**

**CVE-2020-11651**

An issue was discovered in SaltStack Salt before 2019.2.4 and 3000 before 3000.2. The salt-master process ClearFuncs class does not properly validate method calls. This allows a remote user to access some methods without authentication. These methods can be used to retrieve user tokens from the salt master and/or run arbitrary commands on salt minions.

**CVE-2020-11652**

An issue was discovered in SaltStack Salt before 2019.2.4 and 3000 before 3000.2. The salt-master process ClearFuncs class allows access to some methods that improperly sanitize paths. These methods allow arbitrary directory access to authenticated users.
Known Issue

Part of the fix for CVE-2020-11651 added better validation of the methods allowed to be called by remote clients. Both AESFuncs and ClearFuncs now have an explicit list of methods that can be called. The name of one of these whitelisted methods on AESFuncs had a typo. The _minion_runner method should be minion_runner (without the underscore prefix). This typo breaks the publish module’s runner method. Calling runners, for example:

```
salt minion publish.runner manage.down
```

Will not work, and you will receive and empty reply from the salt master.

This will be addressed in the 3001 release of Salt set for mid-June 2020.

32.2.43 Salt 3000.3 Release Notes

Version 3000.3 is a bug-fix release for 3000.

32.2.44 Salt 3000.4 Release Notes

Version 3000.4 is a CVE fix release for 3000.

Fixed

- Prevent shell injections in netapi ssh client (cve-2020-16846)
- Prevent creating world readable private keys with the tls execution module. (cve-2020-17490)

32.2. Previous releases
32.2.45 Salt 3000.5 Release Notes

Version 3000.5 is a CVE fix release for 3000.

Fixed

• Properly validate eauth credentials and tokens along with their ACLs. Prior to this change eauth was not properly validated when calling Salt ssh via the salt-api. Any value for 'eauth' or 'token' would allow a user to bypass authentication and make calls to Salt ssh. (CVE-2020-25592)

32.2.46 Salt 3000.6 Release Notes

Version 3000.6 is a bugfix release for 3000.

Fixed

• Fixes salt-ssh authentication when using tty (#58922)

32.2.47 Salt 3000.7 Release Notes

Version 3000.7 is a CVE fix release for 3000.

Fixed

• CVE-2020-28243 - Fix local privilege escalation in the restartcheck module.
• CVE-2020-28972 - Ensure authentication to vcenter, vsphere, and esxi server validates the SSL/TLS certificate by default. If you want to skip SSL verification you can use `verify_ssl: False`.
• CVE-2020-35662 - Ensure the asam runner, qingcloud, splunk returner, panos proxy, cimc proxy, zenoss module, esxi module, vsphere module, glassfish module, bigip module, and keystone module validate SSL by default. If you want to skip SSL verification you can use `verify_ssl: False`.
• CVE-2021-3148 - Fix a command injection in the Salt-API when using the Salt-SSH client.
• CVE-2021-3144 - Fix eauth tokens can be used once after expiration
• CVE-2021-25281 - Fix salt-api so it honors eauth credentials for the wheel_async client.
• CVE-2021-25282 - Fix the salt.wheel.pillar_roots.write method so it is not vulnerable to directory traversal.
• CVE-2021-25283 - Fix the jinja render to protect against server side template injection attacks.
• CVE-2021-25284 - Fix cmdmod so it will not log credentials to log levels info and error.
• CVE-2021-3197 - Fix ssh client to remove ProxyCommand from arguments provided by cli and netapi.
32.2.48 Salt 3000.8 Release Notes

Version 3000.8 is a bug fix release for 3000.

Fixed

• Fix runners that broke when patching for CVE-2021-25281
• Fix issue with runners in SSE

Known Issue

When using the Salt-API with the SSH client some of the SSH options are not working currently and will be fixed in an upcoming bug fix release. We are currently testing and fixing which options still need to be fixed, but have confirmed the following ones do not work in this release: extra-filerefs, pre-flight. This does not impact normal Salt-SSH usage on the cli.

32.2.49 Salt 3000.9 Release Notes

Version 3000.9 is a bug fix release for 3000.

Fixed

• Allow "extra_filerefs" as sanitized kwargs for SSH client. Fix regression on "cmd.run" when passing tuples as cmd. (#59664)
• Allow all ssh kwargs as sanitized kwargs for SSH client. (#59748)
• Fix argument injection bug in restartcheck.restartcheck. This change hardens the fix for CVE-2020-28243.

32.2.50 Salt 2019.2.0 Release Notes - Codename Fluorine

Python 2.7 Deprecation

In light of Python 2.7 reaching its End of Life (EOL) on Jan 1st 2020, Python 2 will be deprecated from SaltStack no earlier than the 3001 release, that is either the 3001 release or a later release. This decision is pending further community discussion.

Known Issues

The following are known issues for the 2019.2.0 release and will be fixed for 2019.2.1:

• #51699
Non-Backward-Compatible Change to YAML Renderer

In earlier releases, this was considered valid usage in Python 2, assuming that `data` was a list or dictionary containing keys/values which are `unicode` types:

```
/etc/foo.conf:
  file.managed:
    - source: salt://foo.conf.jinja
    - template: jinja
    - context:
      data: {{ data }}
```

One common use case for this is when using one of Salt's custom Jinja filters which return lists or dictionaries, such as the `ipv4` filter.

In Python 2, Jinja will render the `unicode` string types within the list/dictionary with the "u" prefix (e.g. `{u'foo': u'bar'}`). While not valid YAML, earlier releases would successfully load these values.

As of this release, the above SLS would result in an error message. To allow for a data structure to be dumped directly into your SLS file, use the `tojson` Jinja filter:

```
/etc/foo.conf:
  file.managed:
    - source: salt://foo.conf.jinja
    - template: jinja
    - context:
      data: {{ data|tojson }}
```

Another example where the new filter needs to be used is the following state example:

```
grafana_packages:
  pkg.installed:
    - names: {{ server.pkgs }}
```

This will fail when `pkgs` is a list or dictionary. You will need to update the state:

```
grafana_packages:
  pkg.installed:
    - names: {{ server.pkgs|tojson }}
```

This test case has also been tested with the `yaml` and `json` filters successfully.

Note: This filter was added in Jinja 2.9. However, fear not! The 2018.3.3 release added a `tojson` filter which will be used if this filter is not already present, making it available on platforms like RHEL 7 and Ubuntu 14.04 which provide older versions of Jinja.

Important: The `json_encode_dict` and `json_encode_list` filters do not actually dump the results to JSON. Since `tojson` accomplishes what those filters were designed to do, they are now deprecated and will be removed in the 3000 release. The `tojson` filter should be used in all cases where `json_encode_dict` and `json_encode_list` would have been used.
Ansible Playbook State and Execution Modules

Along with the including the ansible modules in the Oxygen release, running playbooks has been added in 2019.2.0 with the playbooks function. This also includes an ansible playbooks state module which can be used on a targeted host to run ansible playbooks, or used in an orchestration state runner.

```
install nginx:
  ansible.playbooks:
    - name: install.yml
    - git_repo: git://github.com/gtmanfred/playbook.git
    - git_kwargs:
      rev: master
```

The playbooks modules also includes the ability to specify a git repo to clone and use, or a specific directory can to used when running the playbook.

Network Automation

Beginning with this release, Salt provides much broader support for a variety of network operating systems, and features for configuration manipulation or operational command execution.

NetBox

Added in the previous release, 2018.3.0, the capabilities of the netbox Execution Module have been extended, with a much longer list of available features:

- netbox.create_circuit
- netbox.create_circuit_provider
- netbox.create_circuit_termination
- netbox.create_circuit_type
- netbox.create_device
- netbox.create_device_role
- netbox.create_device_type
- netbox.create_interface
- netbox.create_interface_connection
- netbox.create_inventory_item
- netbox.create_ipaddress
- netbox.create_manufacturer
- netbox.create_platform
- netbox.create_site
- netbox.delete_interface
- netbox.delete_inventory_item
- netbox.delete_ipaddress
- netbox.get_circuit_provider
• `netbox.get_interfaces`
• `netbox.get_ipaddresses`
• `netbox.make_interface_child`
• `netbox.make_interface_lag`
• `netbox.openconfig_interfaces`
• `netbox.openconfig_lacp`
• `netbox.update_device`
• `netbox.update_interface`

Besides this Execution Module, Salt users can load data directly from NetBox into the device Pillar, via the `netbox` External Pillar module.

Netmiko

Netmiko, the multi-vendor library to simplify Paramiko SSH connections to network devices, is now officially integrated into Salt. The network community can use it via the `netmiko` Proxy Module or directly from any Salt Minions, passing the connection credentials - see the documentation for the `netmiko` Execution Module.

Arista

Arista switches can now be managed running under the `pyeapi` Proxy Module, and execute RPC requests via the `pyeapi` Execution Module.

Cisco Nexus

While support for SSH-based operations has been added in the release codename Carbon (2016.11), the new `nxos_api` Proxy Module and `nxos_api` allow management of Cisco Nexus switches via the NX-API.

It is important to note that these modules don’t have third party dependencies, therefore they can be used straight away from any Salt Minion. This also means that the user may be able to install the regular Salt Minion on the Nexus switch directly and manage the network devices like a regular server.

General-purpose Modules

The new `ciscoconfparse` Execution Module can be used for basic configuration parsing, audit or validation for a variety of network platforms having Cisco IOS style configuration (one space indentation), as well as brace-delimited configuration style.

The `iosconfig` can be used for various configuration manipulation for Cisco IOS style configuration, such as: `configuration cleanup, tree representation of the config`, etc.
NAPALM

Commit At and Commit Confirmed

Beginning with this release, NAPALM users are able to execute scheduled commits (broadly known as “commit at”) and “commit confirmed” (revert the configuration change unless the user confirms by running another command). These features are available via the commit_in, commit_at, revert_in, or revert_at arguments for the net.load_config and net.load_template execution functions, or netconfig.managed.

The counterpart execution functions net.confirm_commit, or net.cancel_commit, as well as the State functions netconfig.commit_cancelled, or netconfig.commit_confirmed can be used to confirm or cancel a commit.

Please note that the commit confirmed and commit cancelled functionalities are available for any platform whether the network devices supports the features natively or not. However, be cautious and make sure you read and understand the caveats before using them in production.

Multiple Templates Rendered Simultaneously

The template_name argument of the net.load_template Execution and netconfig.managed State function now supports a list of templates. This is particularly useful when a very large Jinja template is split into multiple smaller and easier to read templates that can eventually be reused in other States. For example, the following syntax is not correct to manage the configuration of NTP and BGP simultaneously, using two different templates and changing the device configuration through one single commit:

```yaml
manage_bgp_and_ntp:
  netconfig.managed:
    - template_name:
      - salt://templates/bgp.jinja
      - salt://templates/ntp.jinja
    - context:
      bpg: {{ pillar.bgp }}
      ntp: {{ pillar.ntp }}
```

Connection Re-establishment on Demand

Beginning with this release, any NAPALM command executed when running under a NAPALM Proxy Minion supports the force_reconnect magic argument.

Proxy Minions generally establish a connection with the remote network device at the time of the Minion startup and that connection is going to be used forever.

If one would need to execute a command on the device but is connecting using different parameters (due to various causes, e.g., unable to authenticate the user specified in the Pillar as the authentication system - say TACACS+ is not available, or the DNS resolver is currently down and would like to temporarily use the IP address instead, etc.), it implies updating the Pillar data and restarting the Proxy Minion process restart. In particular cases like that, you can pass the force_reconnect=True keyword argument, together with the alternative connection details, to enforce the command to be executed over a separate connection.

For example, if the usual command is salt '*' net.arp, you can use the following to connect using a different username instead:

```
salt '*' net.arp username=my-alt-usr force_reconnect=True
```
The same goes with any of the other configuration arguments required for the NAPALM connection - see NAPALM proxy documentation.

**Configuration Replace Features**

To replace various configuration chunks, you can use the new `net.replace_pattern` execution function, or the `netconfig.replace_pattern` State function. For example, if you want to update your configuration and rename a BGP policy referenced in many places, you can do so by running:

```
salt '*' net.replace_pattern OLD-POLICY-CONFIG new-policy-config
```

Similarly, you can also replace entire configuration blocks using the `net.blockreplace` function.

**Configuration Save Features**

The `net.save_config` function can be used to save the configuration of the managed device into a file. For the State subsystem, the `netconfig.saved` function has been added which provides a complete list of facilities when managing the target file where the configuration of the network device can be saved.

For example, backup the running configuration of each device under its own directory tree:

```
/var/backups/{{ opts.id }}/running.cfg:
    netconfig.saved:
      - source: running
      - makedirs: true
```

All the new network automation modules mentioned above are directly exposed to the NAPALM users, without requiring any architectural changes, just eventually install some requirements:

**Junos**

The features from the existing junos Execution Module are available via the following functions:

- `napalm.junos_cli`: Execute a CLI command and return the output as text or Python dictionary.
- `napalm.junos_rpc`: Execute an RPC request on the remote Junos device, and return the result as a Python dictionary, easy to digest and manipulate.
- `napalm.junos_install_os`: Install the given image on the device.
- `napalm.junos_facts`: The complete list of Junos facts collected by the junos-eznc underlying library.

**Note:** To be able to use these features, you must ensure that you meet the requirements for the junos module. As junos-eznc is already a dependency of NAPALM, you will only have to install jxmlease.

Usage examples:

```
salt '*' napalm.junos_cli 'show arp' format=xml
salt '*' napalm.junos_rpc get-interface-information
```
Netmiko

The features from the newly added netmiko Execution Module are available as:

- **napalm.netmiko_commands**: Execute one or more commands to be execute on the remote device, via Netmiko, and return the output as a text.

- **napalm.netmiko_config**: Load a list of configuration command on the remote device, via Netmiko. The commands can equally be loaded from a local or remote path, and passed through Salt's template rendering pipeline (by default using Jinja as the template rendering engine).

Usage examples:

```bash
salt '*' napalm.netmiko_commands 'show version' 'show interfaces'
```

Arista pyeapi

For various operations and various extension modules, the following features have been added to gate functionality from the pyeapi module:

- **napalm.pyeapi_run_commands**: Execute a list of commands on the Arista switch, via the pyeapi library.

- **napalm.pyeapi_config**: Configure the Arista switch with the specified commands, via the pyeapi Python library. Similarly to napalm.netmiko_config, you can use both local and remote files, with or without templating.

Usage examples:

```bash
salt '*' napalm.pyeapi_run_commands 'show version' 'show interfaces'
salt '*' napalm.pyeapi_config config_file=salt://path/to/template.jinja
```

Cisco NX-API

In the exact same way as above, the user has absolute control by using the following primitives to manage Cisco Nexus switches via the NX-API:

- **napalm.nxos_api_show**: Execute one or more show (non-configuration) commands, and return the output as plain text or Python dictionary.

- **napalm.nxos_api_rpc**: Execute arbitrary RPC requests via the Nexus API.

- **napalm.nxos_api_config**: Configures the Nexus switch with the specified commands, via the NX-API. The commands can be loaded from the command line, or a local or remote file, eventually rendered using the templating engine of choice (default: jinja).

Usage examples:

```bash
salt '*' napalm.nxos_api_show 'show bgp sessions' 'show processes' raw_text=False
```
Ciscoconfparse

The following list of functions may be handy when manipulating Cisco IOS or Junos style configurations:

- `napalm.config_filter_lines`: Return a list of detailed matches, for the configuration blocks (parent-child relationship) whose parent and children respect the regular expressions provided.
- `napalm.config_find_lines`: Return the configuration lines that match the regular expression provided.
- `napalm.config_lines_w_child`: Return the configuration lines that match a regular expression, having child lines matching the child regular expression.
- `napalm.config_lines_wo_child`: Return the configuration lines that match a regular expression, that don’t have child lines matching the child regular expression.

**Note:** These functions require the `ciscoconfparse` Python library to be installed.

Usage example (find interfaces that are administratively shut down):

```
salt '*' napalm.config_lines_w_child 'interface' 'shutdown'
```

**IOSConfig**

For Cisco IOS style configuration, the following features have been added to the `napalm` Execution Module:

- `napalm.config_tree`: Transform Cisco IOS style configuration to structured Python dictionary, using the configuration of the interrogated network device.
- `napalm.config_merge_tree`: Return the merge tree of the configuration of the managed network device with a different configuration to be merged with (without actually loading any changes on the device).
- `napalm.config_merge_text`: Return the merge result (as text) of the configuration of the managed network device with a different configuration to be merged with.
- `napalm.config_merge_diff`: Return the merge diff after merging the configuration of the managed network device with a different configuration (without actually loading any changes on the device).

**SCP**

Reusing the already available connection credentials provided for NAPALM, the following features are now available:

- `napalm.scp_put`: Transfer files and directories to remote network device.
- `napalm.scp_get`: Transfer files and directories from remote network device to the localhost of the Minion.
PeeringDB

The `peeringdb` Execution Module is useful to gather information about other networks you can potentially peer with, and automatically establish BGP sessions, e.g., given just a specific AS number, the rest of the data (i.e., IP addresses, locations where the remote network is available, etc.) is retrieved from PeeringDB, and the session configuration is automated with minimal to no effort (typing the IP addresses manually can be both tedious and error prone).

New Docker Proxy Minion

Docker containers can now be treated as actual minions without installing salt in the container, using the new `docker proxy minion`.

This proxy minion uses the `docker executor` to pass commands to the docker container using `docker.call`. Any state module calls are passed through the corresponding function from the `docker` module.

```
proxy:
  proxtype: docker
  name: keen_proskuriakova
```

Terraform Salt-SSH Roster

You can now dynamically generate a Salt-SSH roster from the terraform resources defined with `terraform-provider-salt`.

This allows you to combine both terraform and Salt-SSH to provision and configure your hosts. See the `terraform roster` for an example on how to setup and use.

Grains Dictionary Passed into Custom Grains

Starting in this release, if a custom grains function accepts a variable named `grains`, the Grains dictionary of the already compiled grains will be passed in. Because of the non-deterministic order that grains are rendered in, the only grains that can be relied upon to be passed in are `core.py` grains, since those are compiled first.

More Precise `virtual` Grain

This release improves the accuracy of the `virtual` grain when running Salt in a nested virtualization environment (e.g. `systemd-nspawn` container inside a VM) and having `virt-what` installed.

Until now, the `virtual` grain was determined by matching against all output lines of `virt-what` instead of individual items which could lead to not quite precise results (e.g. reporting HyperV inside a `systemd-nspawn` container running within a Hyper-V-based VM).
Configurable Module Environment

Salt modules (states, execution modules, returners, etc.) now can have custom environment variables applied when running shell commands. This can be configured by setting a `system-environment` key either in Grains or Pillar. The syntax is as follows:

```yaml
system-environment:
  <type>
    <module>:
      # Namespace for all functions in the module
      _:
        <key>: <value>
      # Namespace only for particular function in the module
      <function>:
        <key>: <value>
```

- `<type>` would be the type of module (i.e. `states`, `modules`, etc.).
- `<module>` would be the module's name.

**Note:** The module name can be either the virtual name (e.g. `pkg`), or the physical name (e.g. `yumpkg`).

- `<function>` would be the function name within that module. To apply environment variables to all functions in a given module, use an underscore (i.e. `_`) as the function name. For example, to set the same environment variable for all package management functions, the following could be used:

```yaml
system-environment:
  modules:
    pkg:
      _:
        SOMETHING: for_all
```

To set an environment variable in `pkg.install` only:

```yaml
system-environment:
  modules:
    pkg:
      install:
        LC_ALL: en_GB.UTF-8
```

To set the same variable but only for SUSE minions (which use zypper for package management):

```yaml
system-environment:
  modules:
    zypper:
      install:
        LC_ALL: en_GB.UTF-8
```

**Note:** This is not supported throughout Salt; the module must explicitly support this feature (though this may change in the future). As of this release, the only modules which support this are the following `pkg` virtual modules:

- `aptpkg`
"Virtual Package" Support Dropped for APT

In APT, some packages have an associated list of packages which they provide. This allows one to do things like run `apt-get install foo` when the real package name is `foo1.0`, and get the right package installed.

Salt has traditionally designated as "virtual packages" those which are provided by an installed package, but for which there is no real package by that name installed. Given the above example, if one were to run a `pkg.installed` state for a package named `foo`, then `pkg.list_pkgs` would show a package version of simply `1` for package `foo`, denoting that it is a virtual package.

However, while this makes certain aspects of package management convenient, there are issues with this approach that make relying on "virtual packages" problematic. For instance, Ubuntu has four different mutually-conflicting packages for `nginx`:

- `nginx-core`
- `nginx-full`
- `nginx-light`
- `nginx-extras`

All four of these provide `nginx`. Yet there is an `nginx` package as well, which has no actual content and merely has dependencies on any one of the above four packages. If one used `nginx` in a `pkg.installed` state, and none of the above four packages were installed, then the `nginx` metapackage would be installed, which would pull in `nginx-core__`. Later, if `nginx` were used in a `pkg.removed` state, the `nginx` metapackage would be removed, leaving `nginx-core` installed. The result would be that, since `nginx-core__` provides `nginx__.`, Salt would now see `nginx` as an installed virtual package, and the `pkg.removed` state would fail. Moreover, `nginx would not actually have been removed`, since `nginx-core` would remain installed.

Starting with this release, Salt will no longer support using "virtual package" names in `pkg` states, and package names will need to be specified using the proper package name. The `pkg.list_repo_pkgs` function can be used to find matching package names in the repositories, given a package name (or glob):

```bash
# salt myminion pkg.list_repo_pkgs 'nginx*'
myminion:
---------
nginx:
    - 1.10.3-0ubuntu0.16.04.2
    - 1.9.15-0ubuntu1
nginx-common:
    - 1.10.3-0ubuntu0.16.04.2
    - 1.9.15-0ubuntu1
nginx-core:
    - 1.10.3-0ubuntu0.16.04.2
    - 1.9.15-0ubuntu1
nginx-core-debug:
    - 1.10.3-0ubuntu0.16.04.2
    - 1.9.15-0ubuntu1
nginx-doc:
    - 1.10.3-0ubuntu0.16.04.2
    - 1.9.15-0ubuntu1
```

(continues on next page)
nginx-extras:
  - 1.10.3-0ubuntu0.16.04.2
  - 1.9.15-0ubuntu1
nginx-extras-dbgl:
  - 1.10.3-0ubuntu0.16.04.2
  - 1.9.15-0ubuntu1
nginx-full:
  - 1.10.3-0ubuntu0.16.04.2
  - 1.9.15-0ubuntu1
nginx-full-dbgl:
  - 1.10.3-0ubuntu0.16.04.2
  - 1.9.15-0ubuntu1
nginx-light:
  - 1.10.3-0ubuntu0.16.04.2
  - 1.9.15-0ubuntu1
nginx-light-dbgl:
  - 1.10.3-0ubuntu0.16.04.2
  - 1.9.15-0ubuntu1

Alternatively, the newly-added `pkg.show` function can be used to get more detailed information about a given package and help determine what package name is correct:

```bash
# salt myminion pkg.show 'nginx*' filter=description,provides
```

```bash
myminion:

nginx:

    1.10.3-0ubuntu0.16.04.2:

Minion Startup Events

When a minion starts up it sends a notification on the event bus with a tag that looks like this: salt/minion/<minion_id>/start. For historical reasons the minion also sends a similar event with an event tag like this: minion_start. This duplication can cause a lot of clutter on the event bus when there are many minions. Set enable_legacy_startup_events: False in the minion config to ensure only the salt/minion/<minion_id>/start events are sent.

The new enable_legacy_startup_events minion config option defaults to True, but will be set to default to False beginning with the 3001 release of Salt.

The Salt Syndic currently sends an old style syndic_start event as well. The syndic respects enable_legacy_startup_events as well.

Failhard changes

It is now possible to override a global failhard setting with a state-level failhard setting. This is most useful in case where global failhard is set to True and you want the execution not to stop for a specific state that could fail, by setting the state level failhard to False. This also allows for the use of onfail*-requisites, which would previously be ignored when a global failhard was set to True. This is a deviation from previous behavior, where the global failhard setting always resulted in an immediate stop whenever any state failed (regardless of whether the failing state had a failhard setting of its own, or whether any onfail*-requisites were used).

Pass Through Options to file.serialize State

This allows for more granular control over the way in which the dataset is serialized. See the documentation for the new serializer_opts and deserializer_opts options in the file.serialize state for more information.

file.patch State Rewritten

The file.patch state has been rewritten with several new features:

- Patch sources can now be remote files instead of only salt:// URLs
- Multi-file patches are now supported
- Patch files can be templated

In addition, it is no longer necessary to specify what the hash of the patched file should be.

New no_proxy Minion Configuration

Pass a list of hosts using the no_proxy minion config option to bypass an HTTP proxy.

Note: This key does nothing unless proxy_host is configured and it does not support any kind of wildcards.

no_proxy: ['127.0.0.1', 'foo.tld']
Changes to **slack** Engine

The output returned to Slack from functions run using this engine is now formatted using that function’s proper outputter. Earlier releases would format the output in YAML for all functions except for when states were run.

**Enhancements to **wtmp** Beacon**

A new key, `action`, has been added to the events fired by this beacon, which will contain either the string `login` or `logout`. This will simplify reactors which use this beacon’s data, as it will no longer be necessary to check the integer value of the `type` key to know whether the event is a login or logout.

Additionally, in the event that your platform has a non-standard `utmp.h`, you can now configure which type numbers indicate a login and logout.

See the [wtmp beacon documentation](#) for more information.

**Deprecated and Removed Options**

**API Removed Arguments**

Support for `_LocalClient`’s `expr_form` argument has been removed. Please use `tgt_type` instead. This change was made due to numerous reports of confusion among community members, since the targeting method is published to minions as `tgt_type`, and appears as `tgt_type` in the job cache as well.

Those who are using the `_LocalClient` (either directly, or implicitly via a `netapi module`) need to update their code to use `tgt_type`.

```python
>>> import salt.client
>>> local = salt.client.LocalClient()
>>> local.cmd("*", "cmd.run", ["whoami"], tgt_type="glob")
{'jerry': 'root'}
```

**Minion Configuration Deprecated Option**

The `master_shuffle` configuration option is deprecated as of the 2019.2.0 release. Please use the `random_master` option instead.

**Module Removed Options**

- The `napalm_network` module has been changed as follows:
  - Support for the `template_path` has been removed from `net.load_template` function. This is because support for NAPALM native templates has been dropped.

- The `pip` module has been changed as follows:
  - Support for the `no_chown` option has been removed from `pip.install` function.

- The `trafficserver` module has been changed as follows:
  - The `trafficserver.match_var` function was removed. Please use `trafficserver.match_metric` instead.
- The `trafficserver.read_var` function was removed. Please use `trafficserver.read_config` instead.
- The `trafficserver.set_var` function was removed. Please use `trafficserver.set_config` instead.

- The `win_update` module has been removed. It has been replaced by `win_wua`.
- The `win_wua` module has been changed as follows:
  - The `win_wua.download_update` and `win_wua.download_updates` functions have been removed. Please use `win_wua.download` instead.
  - The `win_wua.install_update` and `win_wua.install_updates` functions have been removed. Please use `win_wua.install` instead.
  - The `win_wua.list_update` function has been removed. Please use functions have been removed. Please use `win_wua.get` instead.
  - The `win_wua.list_updates` function has been removed. Please use functions have been removed. Please use `win_wua.list` instead.

Pillar Removed Option

- The `vault` external pillar has been changed as follows:
  - Support for the `profile` argument was removed. Any options passed up until and following the first `path=` are discarded.

Roster Removed Option

- The `cache` roster has been changed as follows:
  - Support for `roster_order` as a list or tuple has been removed. As of the 2019.2.0 release, `roster_order` must be a dictionary.
  - The `roster_order` option now includes IPv6 in addition to IPv4 for the `private`, `public`, `global` or `local` settings. The syntax for these settings has changed to `ipv4-*` or `ipv6-*`, respectively.

State Removed Modules and Options

- The `docker` state module has been removed
  - In 2017.7.0, the states from this module were split into four separate state modules:
    * `docker_container`
    * `docker_image`
    * `docker_volume`
    * `docker_network`
  - The `docker` module remained, for backward-compatibility, but it has now been removed. Please update SLS files to use the new state names:
    * `docker.running` => `docker_container.running`
    * `docker.stopped` => `docker_container.stopped`
* docker.absent => docker_container.absent
* docker.network_present => docker_network.present
* docker.network_absent => docker_network.absent
* docker.image_present => docker_image.present
* docker.image_absent => docker_image.absent
* docker.volume_present => docker_volume.present
* docker.volume_absent => docker_volume.absent

- The `docker_network` state module has been changed as follows:
  - The `driver` option has been removed from `docker_network.absent`. It had no functionality, as the state simply deletes the specified network name if it exists.
- The deprecated `ref` option has been removed from the `git.detached` state. Please use `rev` instead.
- The `k8s` state module has been removed in favor of the `kubernetes` state module. Please update SLS files as follows:
  - In place of `k8s.label_present`, use `kubernetes.node_label_present`
  - In place of `k8s.label_absent`, use `kubernetes.node_label_absent`
  - In place of `k8s.label_folder_absent`, use `kubernetes.node_label_folder_absent`
- Support for the `template_path` option in the `netconfig.managed` `<salt.states.netconfig.managed()>` state has been removed. This is because support for NAPALM native templates has been dropped.
- Support for the `no_chown` option in the `pip.insalled` state has been removed.
- The `trafficserver.set_var` state module has been removed. Please use `trafficserver.config` instead.
- Support for the `no_chown` option in the `:py:func`virtualenv.managed `<salt.states.virtualenv.managed()>` function has been removed.
- The `win_update` state module has been removed. It has been replaced by `win_wua`.
- Support for virtual packages has been removed from the `py:mod:pkg state <salt.states.pkg>`.

**Utils Removed Options**

The `cloud` utils module had the following changes:
- Support for the `cache_nodes_ip` function in `salt utils` module has been removed. The function was incomplete and non-functional.

The `vault` utils module had the following changes:
- Support for specifying Vault connection data within a 'profile' has been removed. Please see the `vault execution module` documentation for details on the new configuration schema.
Dependency Deprecations

Salt-Cloud has been updated to use the pypexec Python library instead of the winexe executable. Both winexe and pypexec run remote commands against Windows OSes. Since winexe is not packaged for every system, it has been deprecated in favor of pypexec.

Salt-Cloud has deprecated the use impacket in favor of smbprotocol. This changes was made because impacket is not compatible with Python 3.

SaltSSH Major Updates

SaltSSH now works across different major Python versions. Python 2.7 - Python 3.x are now supported transparently. Requirement is, however, that the SaltMaster should have installed Salt, including all related dependencies for Python 2 and Python 3. Everything needs to be importable from the respective Python environment.

SaltSSH can bundle up an arbitrary version of Salt. If there would be an old box for example, running an outdated and unsupported Python 2.6, it is still possible from a SaltMaster with Python 3.5 or newer to access it. This feature requires an additional configuration in /etc/salt/master as follows:

```bash
ssh_ext_alternatives:
  2016.3:               # Namespace, can be actually anything.
    py-version: [2, 6]  # Constraint to specific interpreter version
    path: /opt/2016.3/salt # Main Salt installation
    dependencies:       # List of dependencies and their installation
      paths
        jinja2: /opt/jinja2
        yaml: /opt/yaml
        tornado: /opt/tornado
        msgpack: /opt/msgpack
        certifi: /opt/certifi
        singledispatch: /opt/singledispatch.py
        singledispatch_helpers: /opt/singledispatch_helpers.py
        markupsafe: /opt/markupsafe
        backports_abc: /opt/backports_abc.py
```

It is also possible to use several alternative versions of Salt. You can for instance generate a minimal tarball using runners and include that. But this is only possible, when such specific Salt version is also available on the Master machine, although does not need to be directly installed together with the older Python interpreter.

SaltSSH now support private key's passphrase. You can configure it by:

- `--priv-passwd` for salt-ssh cli
- `salt_priv_passwd` for salt master configure file
- `priv_passwd` for salt roster file
State Module Changes

salt State Module (used in orchestration)

The `test` option now defaults to None. A value of `True` or `False` set here is passed to the state being run and can be used to override a `test: True` option set in the minion's config file. In previous releases the minion's config option would take precedence and it would be impossible to run an orchestration on a minion with test mode set to True in the config file.

If a minion is not in permanent test mode due to the config file and the 'test' argument here is left as None then a value of `test=True` on the command-line is passed correctly to the minion to run an orchestration in test mode. At present it is not possible to pass `test=False` on the command-line to override a minion in permanent test mode and so the `test: False` option must still be set in the orchestration file.

event.send State

The `event.send` state does not know the results of the sent event, so returns changed every state run. It can now be set to return changed or unchanged.

influxdb_user.present Influxdb User Module State

The `password` parameter has been changed to `passwd` to remove the name collusion with the influxdb client configuration (`client_kwargs`) allowing management of users when authentication is enabled on the influxdb instance.

Old behavior:

```
influxdb_user.present:
  - name: exampleuser
  - password: exampleuserpassword
  - user: admin
  - password: adminpassword
```

New behavior:

```
influxdb_user.present:
  - name: exampleuser
  - passwd: exampleuserpassword
  - user: admin
  - password: adminpassword
```

winrepo_cache_expire_min Windows Package Definitions Caching

The `winrepo_cache_expire_min` has been changed from 0 to 1800 (30 minutes) For example if you run highstate the package definitions are normally updated, however now if the package definitions are younger than `winrepo_cache_expire_min` (30 minutes) the package definitions will not be refreshed, reducing the amount of time taken to run a 2nd highstate. To get the old behaviour change the value back to 0 in the minion configuration file. This also effects the behaviour of other functions which default to refresh. The `pkg.refresh_db` will always refresh the package definitions.
LDAP External Authentication

groupattribute support

Previously, if Salt was using external authentication against a freeipa LDAP system it could only search for users via the accountattributename field. This release adds an additional search using the groupattribute field as well. The original accountattributename search is done first then the groupattribute allowing for backward compatibility with previous Salt releases.

Jinja Include Relative Paths

When a jinja include template name begins with ./ or ../ then the import will be relative to the importing file. Prior practices required the following construct:

```
{% from tpldir ~ '/foo' import bar %}
```

A more "natural" construct is now supported:

```
{% from './foo' import bar %}
```

Comparatively when importing from a parent directory - prior practice:

```
{% from tpldir ~ '/../foo' import bar %}
```

New style for including from a parent directory:

```
{% from '../foo' import bar %}
```

salt-api

test

salt-api Windows support

Previously, salt-api was was not supported on the Microsoft Windows platforms. Now it is! salt-api provides a REST-ful interface to a running Salt system. It allows for viewing minions, runners, and jobs as well as running execution modules and runners of a running Salt system through a REST API that returns JSON. See Salt-API documentation.

多数 - Salt-API: https://docs.saltproject.io/en/latest/topics/netapi/index.html

Logging Changes

Include Job ID (JID) in Minion and Master Logs

The Job ID (JID) can now be optionally included in both the minion and master logs by including jid in either the log_fmt_console or log_fmt_logfile configuration option:

```
log_fmt_console: "[%(levelname)-8s] %(jid)s %(message)s"
```

This will cause the JID to be included in any log entries that are related to a particular Salt job. The JID will be included using the default format, [JID: %jids] but can be overridden with the log_fmt_jid configuration item.

```
log_fmt_jid: "[JID: %jids]"
```

32.2. Previous releases
Security

Windows runas changes

A password is no longer required with runas under normal circumstances. The password option is only needed if the minion process is run under a restricted (non-administrator) account. In the aforementioned case, a password is only required when using the runas argument to run command as a different user.

New Modules

Execution Modules

- salt.modules.ciscoconfparse_mod

- salt.modules.pyeapi

Pillar Modules

- netbox

Proxy Modules

- salt.proxy.netmiko
- salt.proxy.nxos_api
- salt.proxy.pyeapi

32.2.51 Salt 2019.2.1 Release Notes

Version 2019.2.1 is a bugfix release for 2019.2.0.
Known Issues

- **ISSUE #54751**: Proxy minion fails to start. Fix planned in 2019.2.2 release.
- **ISSUE #54762**: URIs with IPv6 addresses are broken, preventing master-minion communication in IPv6-only environments. Fix planned in 2019.2.2 release.
- **ISSUE #54776**: Minion fails to start when it contains `ping_interval` in minion configuration file. Fix planned in 2019.2.2 release.
- **ISSUE #54731**: Returners (except for default salt master returner) not loading properly in Py3. Fix planned in 2019.2.2 release.
- **ISSUE #54758**: `salt-call state.show_states` gives "Passed invalid arguments" error when a sls defined in top.sls file is missing. Fix planned in 2019.2.2 release.
- **ISSUE #54765**: Jinja from import is broken. Fix planned in 2019.2.2 release.
- **ISSUE #54771**: Affects only Debian 10. pkgrepo.managed does not work if used with proxy (configured at salt-minion). No fix date available yet.
- **ISSUE #54759**: Deprecation warnings for pyzmq. No fix date available yet.

Change to YAML Renderer

```
/etc/foo.conf:
  file.managed:
    - source: salt://foo.conf.jinja
    - template: jinja
    - context:
      data: {{ data }}
```

In 2019.2.0, the above SLS will result in an error message following changes to the YAML renderer that now require the new Jinja filter `tojson`.

```
/etc/foo.conf:
  file.managed:
    - source: salt://foo.conf.jinja
    - template: jinja
    - context:
      data: {{ data|tojson }}
```

In 2019.2.1, we introduce a new configuration option for both the Salt master and Salt minion configurations to be able to support the older YAML renderer. Using the option `use_yamloader_old` will allow the YAML renderer to function as before.

Changelog for v2019.2.0..v2019.2.1

Generated at: 2019-09-09 19:56:22 UTC

- ISSUE #54429: (frogunder) [2019.2.1] Sudo user error (refs: #54433)
- PR #54433: (dwoz) Re-gen executors with proper arguments @ 2019-09-09 19:14:05 UTC
  - 62fc61c Merge pull request #54433 from dwoz/sudo_minion
  - e08eb19 Merge branch '2019.2.1' into sudo_minion
- PR #54434: (frogunder) fix_docs @ 2019-09-09 18:55:28 UTC
  - 76fac57 Merge pull request #54434 from frogunder/fix_doc
  - 2d22d73 fix_docs error
  - a266a5c fix_docs
  - db546a4 Fix linter warts
  - 144a600 Re-gen executors with proper arguments
- PR #54424: (frogunder) remove in progress from release_notes 2019.2.1 @ 2019-09-05 23:11:03 UTC
  - 4071dcb Merge pull request #54424 from frogunder/releasenotes_201921_new
  - b66436f Update 2019.2.1.rst
  - bcfef11 remove in progress from release_notes 2019.2.1
- PR #54416: (frogunder) Update man_pages for 2019.2.1 @ 2019-09-05 22:48:51 UTC
  - c1587cc Merge pull request #54416 from frogunder/man_pages_201921
  - 6f7c4ee Update man_pages for 2019.2.1
- PR #54419: (frogunder) releasenotes 2019.2.1 @ 2019-09-05 22:48:42 UTC
  - 3118e2f Merge pull request #54419 from frogunder/release_notes_201921
  - 2caee96 Update doc/topics/releases/2019.2.1.rst
  - ffabde2 Update 2019.2.1.rst
  - dd6426d Update doc/topics/releases/2019.2.1.rst
  - 9d4239c Update doc/topics/releases/2019.2.1.rst
  - 8c60ae4 Update doc/topics/releases/2019.2.1.rst
  - 72cb24c releasenotes 2019.2.1
- PR #54409: (dwoz) Point salt-call to correct multi-master configs @ 2019-09-04 20:08:24 UTC
  - 04e28cf Merge pull request #54409 from dwoz/mm_log
  - e207de6 Point salt-call to correct multi-master configs
- PR #54396: (dwoz) Use different logging port for multimaster tests @ 2019-09-03 23:20:23 UTC
  - 2c281e0 Merge pull request #54396 from dwoz/multimaster_logging
  - 104e0a0 Use different logging port for multimaster tests
• ISSUE #54256: (sleminov-tc) Empty salt api token file breaks maintenance process. (refs: #54325, #54324, #54388, #54376)

• ISSUE #37945: (gstachowiak) Missing exception handling in salt.master.Maintenance. Process never completes. (refs: #54325, #54324, #54388, #54376)

• PR #54388: (dwoz) 54256 re fix empty api token 2019.2.1 @ 2019-09-03 23:19:20 UTC
  – PR #54325: (waynew) Delete bad API token files (refs: #54388)
  – PR #54324: (waynew) Delete bad API token files (refs: #54325, #54388)
  – 730a007 Merge pull request #54388 from dwoz/54256-re-fix-empty-api-token-2019.2.1
  – 80651d3 Fix linter
  – 982ed3d Delete bad API token files

• ISSUE #54256: (sleminov-tc) Empty salt api token file breaks maintenance process. (refs: #54325, #54324, #54388, #54376)

• ISSUE #37945: (gstachowiak) Missing exception handling in salt.master.Maintenance. Process never completes. (refs: #54325, #54324, #54388, #54376)

• PR #54376: (dwoz) Move tokens in place with an atomic operation @ 2019-09-03 20:40:50 UTC
  – 11016ce Merge pull request #54376 from dwoz/tmp_token
  – 0b28c60 Fix linter complaints
  – 8e33343 Move tokens in place with an atomic operation

• PR #54386: (twangboy) Fix unit.utils.test_win_dacl (2019.2.1) @ 2019-09-03 16:57:25 UTC
  – 5161203 Merge pull request #54386 from twangboy/fixed_test_win_dacl_2019.2.1
  – b8fa7d3 Sort the perms

• PR #54355: (s0undt3ch) [2019.2.1] [GitPillar Tests] Have the started processes log instead of just writing to stdout/stderr @ 2019-08-29 23:26:50 UTC
  – b4caaad Merge pull request #54355 from s0undt3ch/hotfix-test-daemons-2019.2.1
  – 561c0a2 Have the started processes log instead of just writing to stdout/stderr
  – c2a3115 Don't overwritethe stderr logger

• PR #54353: (cmcmarrow) adds @skipIf not windows @ 2019-08-29 19:33:11 UTC
  – ce5b109 Merge pull request #54353 from cmcmarrow/2019_win_system_skip
  – 8e28074 adds @skipIf not windows

• PR #54338: (dwoz) Log server closes completely during shutdown @ 2019-08-29 17:14:05 UTC
  – 94c03e5 Merge pull request #54338 from dwoz/logging_fixup
  – a3e227e Log server closes completely during shutdown

• PR #54327: (garethgreenaway) [2019.2.1] Catch the AccessDenied exception and continue when running under Py3. @ 2019-08-29 16:59:34 UTC
  – 490ee69 Merge pull request #54327 from garethgreenaway/more_test_program_fixes
  – 97b4d86 Catch the AccessDenied exception and continue when running under Py3.

• PR #54316: (Akm0d) Azure cleanup @ 2019-08-27 16:14:09 UTC
  – bb911c3 Merge pull request #54316 from Akm0d/azure-cleanup
- 2072773 pass longer timeout to msazure destroyinstance
- 34eb477 Merge branch '2019.2.1' of https://github.com/saltstack/salt into azure-cleanup
- 7ae48b1 Allow azure tests enough time to clean up interfaces
- b45ae74 Clean up azure instances properly

- **PR #54314:** (garethgreenaway) [2019.2.1] Do not raise the exception in testprogram.py @ 2019-08-26 23:59:37 UTC
  - 9334e4e Merge pull request #54314 from garethgreenaway/testprogram_access_denied_do_not_raise
  - a53bach Do not raise the exception if a process can not be access, just continue

- **PR #54305:** (dwoz) Fix wart in test_process tests on windows @ 2019-08-26 17:59:12 UTC
  - 71bf051 Merge pull request #54305 from dwoz/winfix
  - 4e68860 Fix wart in test_process tests on windows

- **PR #54303:** (dwoz) Fix wart in periodic callback interval @ 2019-08-24 20:04:35 UTC
  - 4d8df0a Merge pull request #54303 from dwoz/periodic_cb
  - b5f7de Fix wart in periodic callback interval

- **ISSUE #54219:** (KChandrashekhar) integration.shell.test_call.py and tests/integration/shell/test_proxy.py (refs: #54259)
- **ISSUE #54153:** (KChandrashekhar) Ubuntu 16.04 Proxy failures (refs: #54259)
- **PR #54259:** (dwoz) Call os.fork less to avoid race conditions @ 2019-08-24 02:12:42 UTC
  - 5838851 Merge pull request #54259 from dwoz/less_forking
  - bf4d0dd Fix process list tests on windows py3
  - 316ec78 Allow more time for slow test
  - 9ba86f Do not remove attributes from process class
  - e7b6aa8 Clean up cruft
  - ed7103a Attempt to fix integration.shell.test_call test
  - 659c805 Change noise log to debug
  - 0660b1a Clean up typos
  - 9f1fe42 Call os.fork less to avoid race conditions

- **ISSUE #50814:** (doesitblend) Minion continues trying down master (refs: #54239, #53417)
- **ISSUE #49680:** (doesitblend) Beacon events handled differently than event.send (refs: #53344, #54239)
- **ISSUE #49663:** (doesitblend) Beacon only fires to single random master in HA mode (refs: #53344, #54239)
- **PR #54247:** (DmitryKuzmenko) 2019.2.1 with multimaster bb fixes @ 2019-08-23 20:19:19 UTC
  - **PR #54239:** (DmitryKuzmenko) Multimaster tests with bb fixes (refs: #54247)
  - **PR #53848:** (DmitryKuzmenko) Features/multimaster tests (refs: #54239)
  - **PR #53417:** (DmitryKuzmenko) Multimaster minion hang on fire_master (refs: #54239, #53848)
  - **PR #53344:** (DmitryKuzmenko) Run beacons on the only one minion instance. Return to all masters. (refs: #54239, #53848)
  - 53f3aa Merge pull request #54247 from DSRCorporation/2019.2.1_with_multimaster_bb_fixes
- 62cd8cd Merge branch '2019.2.1' into 2019.2.1_with_multimaster_bb_fixes

- **PR #54235**: (github-abcde) Fix 46034 2019.2.1 @ 2019-08-22 22:32:09 UTC
  - 993c341 Merge pull request #54235 from ogd-software/fix_46034-2019.2.1
  - 93bd30d Add alternative fix for "!" stomping Apparently (after watching Jenkins tests fail), what yaml.safe_load returns depends not on the version of salt, but on some other external dependency. Because of this, fix both possible return values.
  - c95dd4d Add test for this specific bugfix
  - efc29d8 Prevent yamlify_arg from stomping "!

- **PR #54282**: (Akm0d) clean up renamed instances in the teardown @ 2019-08-22 22:13:51 UTC
  - 5d1a4d0 Merge pull request #54282 from Akm0d/clean-up-renamed
  - 11c1117 Removed redundant parenthesis
  - 802235d don't delete shutting down ec2 instances
  - 3602942 reversed the order in which an instance was renamed
  - 5500ede renamed _alt_name function
  - 23beab4 clean up renamed instances in the teardown

- **PR #54252**: (s0undt3ch) [2019.2.1] More control on spun test daemons on git pillar tests @ 2019-08-22 22:13:08 UTC
  - c181f5a Merge pull request #54252 from s0undt3ch/hotfix/git-pillar-2019.2.1
  - 4eb85fa Skip tests on RHEL family < 7
  - 64a1be8 Don't even go through the transport to get the system grains
  - d08e6fa Don't keep recreating the git repos. Restore from backup.
  - 6114e9d All prep work is done in setUpClass.
  - 5b030dd Daemons are now started/stopped on tests, not by salt
  - ed60f0d We don't actually need grains
  - 911446d Lock uwsgi requirement.
    - 805f0ac Merge branch '2019.2.1' into 2019.2.1_with_multimaster_bb_fixes

- **PR #54214**: (Ch3LL) Remove unnecessary logging from minion.py @ 2019-08-22 18:08:26 UTC
  - b40cdbf Merge pull request #54214 from Ch3LL/fix_logging
  - 8fd24cf Remove unnecessary logging from minion.py
    - 9d28098 Merge branch '2019.2.1' into 2019.2.1_with_multimaster_bb_fixes

- **PR #54277**: (dwoz) Win runas plus @ 2019-08-21 23:59:16 UTC
  - de77762 Merge pull request #54277 from dwoz/win_runas_plus
  - f719591 Update tests
  - d8749d9 Do not remove attributes from process class
  - ac5a2a4 Only close handle if it got created

- **PR #54278**: (Akm0d) Correctly detect when an ms_azure instance is deleted @ 2019-08-21 23:14:01 UTC
  - 93cf40a Merge pull request #54278 from Akm0d/cloud-test-logging
- 2dc1520 Merge branch '2019.2.1' into cloud-test-logging
- 3867448 Fixed incorrect arguments
- bdce5f4 Fix detecting msazure deletion with multiple tries

**PR #54263: (s0undt3ch) [2019.2.1] Exit test suite if test daemons fail to start @ 2019-08-21 22:06:52 UTC**
- 94f77a0 Merge pull request #54263 from s0undt3ch/test-daemons-2019.2.1
- 655efd6 Rearrange logging termination
- 28fa5d2 Prevent traceback on python interpreter shutdown
- 9035731 Write to stderr a message with the exit code
- 566ce20 Exit the test suite if one of the test daemons fails to start

**PR #54270: (s0undt3ch) [2019.2.1] Speedup testing helpers decorators @ 2019-08-21 20:33:25 UTC**
- 3b9fd44 Merge pull request #54270 from s0undt3ch/requires-system-grains-2019.2.1
- 9f99ff Speedup testing helpers decorators

**ISSUE #53931: (KChandrashekhar) integration.states.test_pip_state.PipStateTest.test_issue_6912_wrong_owner_requirements_file (refs: #54274)**

**PR #54274: (felippeb) #53931 never fail on codecov curls @ 2019-08-21 18:12:19 UTC**
- 2c4afa0 Merge pull request #54274 from felippeb/2019.2.1
- 9c0b216 #53931 never fail on codecov curls

**PR #54264: (dwoz) Fix unit utils jinja when run on their own @ 2019-08-21 17:22:10 UTC**
- b3c70c3 Merge pull request #54264 from dwoz/jinja_units
- 10a6d53 Fix unit utils jinja when run on their own

**PR #54266: (Akm0d) Fix incorrect types on failing cloud tests @ 2019-08-21 17:14:40 UTC**
- 308ba55 Merge pull request #54266 from Akm0d/cloud_test_ultimate_fix
- ff2125a Invert assertion to test for instance gone
- 82136a8 test for ec2 instance shutting down
- 283f631 run cloud --query if delete string is not available
- 33e6b6d changed deprecated assertEquals
- 41ebc8 Cloud tests run correctly everywhere
- 03a8b2c reverted literal_eval

**PR #54251: (Akm0d) reduced query calls to salt-cloud @ 2019-08-20 20:10:59 UTC**
- 25d0b52 Merge pull request #54251 from Akm0d/cloud_test_optimization
- 5f6bf4c Optimized salt-cloud queries
- 43418a4 Merge pull request #7 from Ch3LL/cloud_provider_files
- b93944b Remove joyent config cloud test files
- bd37849 Rename provider azure-config to azurearm-config
- c7c06cb Added longer delays for ec2 tests
- 5ceb47e Correctly check for GCE and EC2 deletion
- 52c178c Added pretty yaml formatting to cloud-test logs
- 4fc5e9e re-fixed simultaneous GCE tests
- 326e9f2 Merge pull request #6 from Ch3LL/cloud_provider_files
  * adb1464 fix pylint
  * 51ce819 Move provider config setup into Setup/Teardown class
- e58b40a Merge pull request #5 from Ch3LL/cloud_provider_files
  * ab8adec Only use the provider conf.d file we are testing
- 76609ad Merge branch ’2019.2.1’ into cloud_test_optimization
- f764bc0 Clean up expensive queries
- b3d02df reduced query calls to salt-cloud

- **PR #54240:** (Ch3LL) Fix TypeError python3 in get_image_id ec2 cloud @ 2019-08-20 20:10:01 UTC
  - ba81ca3 Merge pull request #54240 from Ch3LL/get_image_ec2
  - a3a39f3 Use ami variable instead in test
  - dc1ae52 Fix TypeError python3 in get_image_id
    * d6ad475 Merge branch ’2019.2.1’ into 2019.2.1_with_multimaster_bb_fixes

- **PR #54246:** (dwoz) Cut down on log noise @ 2019-08-19 17:20:03 UTC
  - 8404ec2 Merge pull request #54246 from dwoz/log_noise
  - e572711 Cut down on log noise

- **PR #54245:** (dwoz) Fix the sshd pid file @ 2019-08-19 17:19:32 UTC
  - 5b3e925 Merge pull request #54245 from dwoz/sshd_pid_file
  - df95347 Fix the sshd pid file

- **PR #54237:** (dwoz) Do not dup2 things without fileno @ 2019-08-18 17:13:29 UTC
  - 268803b Merge pull request #54237 from dwoz/dup2
  - 2ebd22b Fix linter
  - 63c616a Do not dup2 things without fileno
    * 0b33498 Workaround for beacons.list_available slowness.
    * b7a1058 Minor: Better support of named multimaster tests.
    * a5ccdf Minor: remove unneded logging
    * 314bbf3 Support tcp transport in multimaster tests. Minor beacon update.
    * fcb8ff0 Properly set HAS_IPTABLES from __virtual__ return.
    * a75db01 Multimaster related fixup: don’t run test engine on minions
    * 8a88542 Multimaster beacons fix: put list into a dict to fire on the bus
    * 790fb41 Inotify beacons test logging and cleanup update
    * d84c8851 Inotify beacon test fixes and improvements.
    * 472ff0 Give minion more time to handle beacon creation.
    * 17ceee0 Fixed Lint errors
• 0bcf53c Fixed the unicode and timing inotify test issues.
• f17bcf3 Improved assertion error diagnostic for master down test.
• db0bae8 Run multimaster as well tests when no specific group is set
• 723f363 Ignore the multimaster minion subgroup test in module names test.
• 612191c Fixed lint failures
• c1efa6 Multimaster test for events handling on master disconnect
• 1654fe8 Multimaster inotify beacons test
• 65dc47c Multimaster tests environment and test module test.
• 2c178b0 Moved annoying message to trace log level.
• 3e497c1 Handle minion events asynchronously.
• 909323a Tests fixes
• 6dad18f Cleanup event object
• 2bf55be Run beacons on the only one minion instance. Return to all masters.

- PR #54121: (Akm0d) Refactored cloud tests @ 2019-08-16 17:24:14 UTC
  - 27d89bd Merge pull request #54121 from Akm0d/gce_cloud_test
  - 48c57b3 Try multiple times to detect deletion of an instance
  - 74300eb return a valid set
  - 2d63b87 Wait for an instance to be fully created if necessary
  - 83ad8b3 Merge branch '2019.2.1' of github.com:SaltStack/salt into gce_cloud_test

- ISSUE #54174: (dwoz) SignalHandlingMultiprocessingProcess bugs (refs: #54204)

- PR #54204: (dwoz) Fix signal handling in subprocesses @ 2019-08-16 00:46:40 UTC
  - c5ee91c Merge pull request #54204 from dwoz/signal_proc
  - 09e5e49 Merge branch '2019.2.1' into signal_proc

- ISSUE #7745: (mgwilliams) yaml 'module' has no attribute 'Dumper' (refs: #54223)

- PR #54223: (dwoz) Test verify logs without a whole minion @ 2019-08-16 00:46:09 UTC
  - 99a8fc5 Merge pull request #54223 from dwoz/7754_test_removal
  - 4be711e Fix up linter warts
  - 7573826 Remove crufty un-needed tests
  - effa77d Test verify logs without a whole minion
    * b40f41f Revert fallback to default signals change
    * 1d83b10 Fix signal handling in subprocesses
      - f90fe66 Reverted foo/bar creds per #46265
      - 3f56bad Reduced the amount of informtaion in debuggings tatement
      - de53bf0 Merge branch '2019.2.1' of github.com:SaltStack/salt into gce_cloud_test

- PR #54203: (dwoz) Run transport test loops in single thread @ 2019-08-15 20:10:20 UTC
  - 8d440e0 Merge pull request #54203 from dwoz/transport_tests
- 22b9d38 Run transport test loops in single thread
  - f6180a6 Even better logging of errors
  - a15dc4b better formatting and error reporting
  - 51fbc2a better logging on instance create failure
  - 1f7dd52 removed hack fixes from gce
  - 31cdc7c WAR ROOM SKIP GCE TESTS
  - 7d603be hasattr cannot find parent properties starting with __
  - 686cab9 Separated assertInstanceDestroy and _destry_instance
  - 158a38c Revert "Removed subclass from cloud name"
  - b7cf43d Removed subclass from cloud name
  - 8c5eb18 fixed pylint error on format string
  - 59e20bc Merge branch '2019.2.1' of https://github.com/saltstack/salt into gce_cloud_test

- PR #54191: (garethgreenaway) [2019.2.1] Addition logging in testprogram used by integration.shell.test_minion.MinionTest.test_exit_status_correct_usage @ 2019-08-13 21:44:41 UTC
  - a05018e Merge pull request #54191 from garethgreenaway/test_program_test_mininion
  - 8463f84 Adding some additional logging when the call to "proc.cmdline = proc.cmdline()" results in a AccessDenied exception, so we can see what the process is and who the process is running as.

- PR #54202: (waynew) Only run one filter test @ 2019-08-13 21:33:32 UTC
  - e5e9299 Merge pull request #54202 from waynew/shorter-jinja-ssh-tests
  - c333ac8 Only run one filter test
    - 5912f24 Switched to Azurearm over msazure

- PR #54172: (Ch3LL) Migrate from azure to azurearm tests @ 2019-08-13 20:07:34 UTC
  - a13cb3e Merge pull request #54172 from Ch3LL/azurearm_tests
  - 465523f Migrate from azure to azurearm tests

- ISSUE #50535: (wyardley) salt errors with current azure-storage because of no version set (refs: #50567)

- PR #54173: (Ch3LL) Cherry Pick #50567 and #53238 into 2019.2.1 @ 2019-08-13 20:07:09 UTC
  - PR #53238: (nicholasmhughes) Azure: Fixed ability to pass SSH key to Linux VMs (refs: #54173)
  - PR #50567: (rombert) azurefs: gracefully handle AttributeError (refs: #54173)
  - 39d0e59 Merge pull request #54173 from Ch3LL/azure_fixes
  - 9052af reverting log string handling
  - a1a61ee fixed ability to pass ssh key to Linux VMs
  - 4a141a1 azurefs: gracefully handle AttributeError
    - 6fa28de fixed underscore
      - c35379a Moved finding installer into class
  - 95484f8 Moved finding installer into class
  - a86ae34 moved installer finder to SetUp method
  - 933964a removed default user/pass from profitbricks test file
• 2a2437d fixed dictionary access
• b9ee411 Fixed broken tests
• 80efd26 fixed misspelled provider information
• 511779b removed unused imports
• 1cd1c13 setUp all cloud tests the same way
• d322408 Got rid of unnecessary delay
• 98ba18c fixed pylint error
• c34c17e Merge branch '2019.2.1' of https://github.com/saltstack/salt into gce_cloud_test

• PR #54178: (dwoz) Fix flaky set_computer_name in mac_system module @ 2019-08-12 18:26:40 UTC
  – 19f4d5e Merge pull request #54178 from dwoz/mac_computer_name
  – e51100e Fix skip on non macos platforms
  – a3a9d92 Fix linter
  – c499d44 Revert unwanted flaky from non computer name tests
  – 941fcc8 Fix flaky set_computer_name in mac_system module
    – 90e8350 Merge branch '2019.2.1' of https://github.com/saltstack/salt into gce_cloud_test

• PR #54180: (dwoz) Point test-kitchen to my keepalive_maxcount branch @ 2019-08-12 18:18:26 UTC
  – 6fe6799 Merge pull request #54180 from dwoz/keepalive_maxcount
  – dc9ee21 Add reminder about kitchen version
  – 19a1f1b Point test-kitchen to my keepalive_maxcount branch
    – 60f8351 Fixed failing Ec2 Tests
    – e2f085c removed py3-only function call
    – 4406c57 fixed lint errors, more descriptive fails
    – 6840d5f assert instances exist in unified way
    – 03da233 skip EOL joyent tests, secure delete instances
    – 3123bb1 Merge branch '2019.2.1' of https://github.com/saltstack/salt into gce_cloud_test

• ISSUE #53306: (doesitblend) Fully Qualify CMD on Windows Minions (refs: #53311, #54033)

• PR #54033: (twangboy) Backport #53311 to 2019.2.1 @ 2019-08-09 16:46:36 UTC
  – PR #53311: (doesitblend) Add fully qualified cmd call (refs: #54033)
  – 9f5302d Merge pull request #54033 from twangboy/fix_win_service_2019.2.1
  – 2850fab Merge branch '2019.2.1' into fix_win_service_2019.2.1
  – 0e2a2b8 Merge branch '2019.2.1' into fix_win_service_2019.2.1
  – 16c704e Backport #53311 to 2019.2.1

• PR #53900: (twangboy) Fix inconsistent full names in LGPO @ 2019-08-09 09:15:41 UTC
  – c0e49d9 Merge pull request #53900 from twangboy/fix_lgpo
  – e05abdf Merge branch '2019.2.1' into fix_lgpo
  – e4e71cd Remove duplicate test
- 68c632b Add some tests
- 3c34075 Fall back to slower method if new method not available
- 0108bcd Avoid using the lowercase method in XPath
- fcc0405 Fix telemetry issue, add some timing logs

**PR #52818: (twangboy) Add watchdog as a bundled dependency on Windows @ 2019-08-09 04:26:54 UTC**
- 9eb2938 Merge pull request #52818 from twangboy/add_watchdog
- 2658634 pre-commit
- 35691f2 Add watchdog to Linux and OSX .in files
- 5ef5969 Remove opensuse 42 static files
- ec285d0 Remove watchdog from the rest of the .in files
- 86e64ae Remove unused import, remove Windows reference
- b934d53 Remove watchdog from windows.in
- cf3ee96 Fix and unify watchdog beacon tests for all OS's
- cc73204 Put Windows tests in their own class
- 6bf1a3 Remove unused import... lint
- 832a1db Fix windowsisms
- 4f47d50 Update static requirements
- 762fe3b Remove some fluff
- 946076c Add watchdog for tests
- 02248dc Fix modified test to account for OS variances
- 15ee479 Compile static requirements
- 78a5723 Add watchdog to Linux and OSX .in files
- 9a0f08a Update static requirements
- 5cad13b Remove opensuse 42 static files
- 1f0f5fe Remove watchdog from the rest of the .in files
- 121595a Remove unused import, remove Windows reference
- c410a4b Remove watchdog from windows.in
- 05a0845 Fix and unify watchdog beacon tests for all OS's
- 200e230 Put Windows tests in their own class
- 6cc8d96 Remove unused import... lint
- a4bb72 Fix windowsisms
- 005bed9 Update static requirements
- c1bc627 Remove some fluff
- 92c8d47 Add watchdog for tests
- 9544b24 Add watchdog as a bundled dependency on Windows

**PR #54143: (Akm0d) Don't call potentially missing shade library (#53734) @ 2019-08-09 01:05:26 UTC**
- **PR #53734**: (Akm0d) Don't call potentially missing shade library (refs: #54143)
- 5bef520 Merge pull request #54143 from Akm0d/openstack_fix
- 3f58885 Merge branch '2019.2.1' into openstack_fix
- 71f5f38 Don't call potentially missing shade library (#53734)
  * 29ee7ce removed print statements, optimized query
  * 14b7539 added back print statements for easy debug
  * 823b3b2 Removed print statements and broken re
  * 969ed9 experiment with subclass names
  * 2fa6157 more verbose instance names based on test
  * 2acb2df undercased non-const variable and added print statements
  * c5e875d Merge branch '2019.2.1' of https://github.com/saltstack/salt into gce_cloud_test

• **PR #54001**: (garethgreenaway) [2019.2.1] Porting metaproxy changes in #50183 to 2019.2.1 @ 2019-08-08 04:24:31 UTC
  - **PR #50183**: (cro) Allow proxy minion types to be dynamically loaded (refs: #54001)
  - 584e3f2 Merge pull request #54001 from garethgreenaway/add_metaproxy_2019_2_1
  - 8353467 Merge branch 'add_metaproxy_2019_2_1' of github.com:garethgreenaway/salt into add_metaproxy_2019_2_1
    * 1892d86 Merge branch '2019.2.1' into add_metaproxy_2019_2_1
  - ab72e1b Adding unit.test_proxy_minion to ignore list
  - 09f6fed Removing match tests, functionality does not exist in 2019.2.1
  - 4af95e4 Adding tests to ensure _metaproxy_call to called when ProxyMinion objects are created.
  - d162a88 Adding salt/metaproxy/proxy.py and tests/unit/modules/test_match.py
  - 51726b1 POrting metaproxy changes in #50183 to 2019.2.1

• **ISSUE #51008**: (cdalvaro) cwd option not working with cmd.run and runas (refs: #52632, #54079)

• **PR #54136**: (ScoreUnder) Fix cmd.run on MacOS (rebased) @ 2019-08-08 04:20:31 UTC
  - **PR #54079**: (ScoreUnder) Fix cmd.run on MacOS -- wrong environment variables (refs: #54136)
  - **PR #52632**: (cdalvaro) Prevent shell injection as root with cmd.run on macOS (refs: #54079)
  - **PR #47212**: (weswhet) fix macOS running as user. (refs: #54079)
  - bf863d0 Merge pull request #54136 from ScoreUnder/2019.2.1-patch-macos-cmd.run
  - 1182eb9 Add integration test justifying strange use of braces after cd in cmd.run
  - 733d2e7 Fixes to ITs
  - da38993 Add integration tests for cwd/runas changes on MacOS
  - ab8b39c Fix environment in cmd.run runas on MacOS
    * c9cb18f Don't call potentially missing shade library (#53734)
    * 5ef8414 Added more verbose logging to cloud tests
    * 2f3942f better logging and fail messages
    * 9454f4c Fixed pylint errors and temporary print statements
- fd13ce1 Further refactored cloud test code
- b03ec48 Assume the instance exists and needs to be deleted
- 0991ff5 fixed pylint errors and failed tests
- 55e502a Merge branch '2019.2.1' of https://github.com/saltstack/salt into gce_cloud_test

**PR #53974:** (Ch3LL) [2019.2.1] Add pygit2 requirement @ 2019-08-06 17:32:05 UTC
  - e268b95 Merge pull request #53974 from Ch3LL/add_pygit2
  - 11864a0 Merge branch '2019.2.1' into add_pygit2
  - d1b1452 Merge branch '2019.2.1' into add_pygit2
  - a5698cc Merge branch '2019.2.1' into add_pygit2
  - 7dd97a6 Merge branch '2019.2.1' into add_pygit2
  - 358974a Skip Pygit2 tests on windows
  - bc64961 Use accurate file:/// URI on windows for gitfs tests
  - 894f958 Fix GitFS support for pygit2 >= 0.28.0
  - 4580030 [2019.2.1] Add pygit2 requirement
    - 4009bb5 fixed pylint errors
    - 459b16d put cloudtest base in separate file so that only one change needs to be made
    - 8e72335 Merge branch 'gce_cloud_test' of github.com:Akm0d/salt into gce_cloud_test
      - 0e2621e Merge branch '2019.2.1' into gce_cloud_test
    - 9f98b16 finished merge

**PR #54108:** (dwoz) More robust azure instance deletion @ 2019-08-03 03:58:20 UTC
  - 46f5e2e Merge pull request #54108 from dwoz/azure_test
  - 754b719 Fix linter
  - 773235d Fix missing time import
  - 5a8f2ec More robust azure instance deletion

**PR #54017:** (dmurphy18) Allow for main thread having terminated pid, before ThreadPoolExecutor threads @ 2019-08-02 18:11:48 UTC
  - 2cb5a0b Merge pull request #54017 from dmurphy18/fix_deb9_build90_tests
  - 2866520 Skip process kill tests on Windows
  - 5577f14 Clean up lint errors
  - 4ca709e Merge branch '2019.2.1' into fix_deb9_build90_tests
  - 264c767 Merge pull request #1 from dwoz/fix_deb9_build90_tests
    - 9bb9466 Add unit tests for weird pid does not exist cases
    - 64d9752 Add warning messages to help determine why pids do not exist
  - 406d382 Adjusted for review comments
  - 2d20f8e Adjusted try/except statements on process checking
  - e189177 Removed typos

### 32.2. Previous releases

4997
– 2e3ca43 Updated for review comments
– 68c29af Allow for main thread having terminated pid, before ThreadPoolExecutor threads
  - e3158c8 refactored all cloud tests
  - 194e0c7 Refactored GCE cloud test
• PR #54080: (dmurphy18) Disabling random website tests till allow for quota usage @ 2019-07-31 21:16:54 UTC
  - 4e2efcd Merge pull request #54080 from dmurphy18/u1804_py3_random_skip
  - 06606e6 Disabling random website tests till allow for quota usage
• PR #54063: (twangboy) Make the skip apply to any system missing crypt @ 2019-07-30 19:22:07 UTC
  - dbbccc9 Merge pull request #54063 from twangboy/fix_test_pycrypto_2019.2.1
  - 6fcf035 Make the skip apply to any system missing crypt
• PR #54050: (cmcmarrow) fixes integration terminate error @ 2019-07-30 13:38:55 UTC
  - 4df6271 Merge pull request #54050 from cmcmarrow/integration_terminate_fix
  - ebb07f4 Merge branch ‘2019.2.1’ into integration_terminate_fix
• PR #54057: (dmurphy18) Added support for is_fedora and skip Minion test test_issue_7754 on Fedora @ 2019-07-29 22:41:25 UTC
  - 9d1bd63 Merge pull request #54057 from dmurphy18/fix_fedora30_test
  - 30f3bda Added support for is_fedora and skip Minion test test_issue_7754
  - b3293a9 Merge branch ‘2019.2.1’ into integration_terminate_fix
• ISSUE #53948: (KChandrashekhar) integration.shell.test_call.CallTest.test_issue_2731_masterless (refs: #54040)
• ISSUE #2731: (cwood) Masterless Broken in 0.10.5 (refs: #54040)
• PR #54040: (waynew) Remove dead test @ 2019-07-29 17:23:45 UTC
  - 5d3bcd7 Merge pull request #54040 from waynew/remove-dead-test
  - e9a5a57 Remove dead test
  - ba3e867 Merge branch ‘2019.2.1’ into integration_terminate_fix
• PR #54051: (twangboy) Skip get time test @ 2019-07-29 16:54:50 UTC
  - 70fcee Merge pull request #54051 from twangboy/fix_test_system
  - ceab05 Skip get time test
• PR #54038: (Ch3LL) Pyton3 digital ocean test fix: to_str on key @ 2019-07-29 16:54:19 UTC
  - 4aed833 Merge pull request #54038 from Ch3LL/do_py3_fix
  - f7346db Pyton3 digital ocean test fix: to_str on key
  - 05cd93f fixes integration terminate error
  - 69c3106 fixes integration terminate error
• PR #53735: (twangboy) Fix Windows tests in test_system @ 2019-07-26 22:38:28 UTC
  - 3cedac9 Merge pull request #53735 from twangboy/fix_test_system
  - a99f97 Add timeouts and account for those in assert
  - d3a160e Merge branch ‘2019.2.1’ into fix_test_system
- f95f0e7 Merge branch '2019.2.1' into fix_test_system
- 87e02b8 Use setUpClass
- 6a685bd Fix some tests in the Windows Class

• PR #53953: (Ch3LL) Send SIGTERM to webserver in teardown of gitfs tests @ 2019-07-25 21:12:42 UTC
  - cc1cda1 Merge pull request #53953 from Ch3LL/improve_git_test
  - 347ea1e Use Sigkill and add time.sleep before check
  - 637bf95 Merge branch '2019.2.1' into improve_git_test
  - c0be147 Send SIGTERM webserver during teardown of gitfs tests
  - b776c0c Check if gitfs server fails to setup for tests

• PR #53999: (Ch3LL) Generate new key each time for digital ocean key test @ 2019-07-25 21:07:45 UTC
  - 2324167 Merge pull request #53999 from Ch3LL/fix_digital_ocean
  - b066c3b Generate new key each time for digital ocean key test

• PR #53970: (garethgreenaway) [2019.2.1] Adding a WAR ROOM Skip for test_directory_clean_require_with_name @ 2019-07-25 21:03:49 UTC
  - 32fe66 Merge pull request #53970 from garethgreenaway/osx_skip_test_directory_clean_require_with_name
  - 362b84a Adding a WAR ROOM Skip for test_directory_clean_require_with_name

• PR #54003: (dwoz) War room skip for tcp build @ 2019-07-24 22:52:18 UTC
  - 213dff Merge pull request #54003 from dwoz/skip_test
  - 6cd8fa War room skip for tcp build

• PR #53897: (cmcmarrow) patches salt grains locale_info decode error @ 2019-07-23 13:19:00 UTC
  - 048c097 Merge pull request #53897 from cmcmarrow/timezone_fix
  - d9e40d Merge branch '2019.2.1' into timezone_fix

• PR #53920: (s0undt3ch) [2019.2.1] Update CI pipelines. Remove old jenkins cruft. @ 2019-07-20 12:33:01 UTC
  - 9a846b4 Merge pull request #53920 from s0undt3ch/hotfix/ci-pipelines-2019.2.1
  - b09963b Update CI pipelines. Remove old jenkins cruft.

• PR #53728: (garethgreenaway) [2019.2.1] Disabling test_get_set_computer_name on OS X and Py3 @ 2019-07-19 17:18:33 UTC
  - 15accee Merge pull request #53728 from garethgreenaway/2019_2_1_mac_system_disable_test_get_set_computer_name
  - a6d853e Merge branch '2019.2.1' into 2019_2_1_mac_system_disable_test_get_set_computer_name
  - 5d537ed Missing six import. Updating skip message.
  - ac6dcd Disabling test_get_set_computer_name on OS X and Py3.

• PR #53913: (garethgreenaway) [2019.2.1] skip test_issue_2594_non_invalidated_cache on MacOS @ 2019-07-19 17:17:36 UTC
  - a54ec89 Merge pull request #53913 from garethgreenaway/disable_test_issue_2594_non_invalidated_cache_macos
  - c65c5d5 Skip the test test_issue_2594_non_invalidated_cache on MacOS where it is flakey.

• PR #53902: (twangboy) Skip tests that modify date or time @ 2019-07-18 17:53:31 UTC
  - b091eb7 Merge pull request #53902 from twangboy/skip_dt
- 76cf936 Skip tests that modify date or time
- **PR #53901**: (s0undt3ch) [2019.2.1] Don't fail when combining coverage files @ 2019-07-18 17:46:32 UTC
  - 22b7b1a Merge pull request #53901 from s0undt3ch/hotfix/unwrap-coverage-combine
  - b459a48 Don't fail when combining coverage files
- **PR #53542**: (dwoz) Fix leak of SaltMessageClient instances when using tcp transport @ 2019-07-18 17:44:44 UTC
  - 84e798a Merge pull request #53542 from dwoz/tcp_leak
  - 3daeb4f Update TCP pipelines
  - 52f9556 Merge branch '2019.2.1' into tcp_leak
  - f3313fd Fix tcp message client test
  - 3419bf5 Merge branch '2019.2.1' into tcp_leak
  - 3125cd3 Merge branch '2019.2.1' into tcp_leak
  - 9a33582 Merge branch '2019.2.1' into tcp_leak
  - 7eb5d41 Merge branch '2019.2.1' into tcp_leak
  - 481372b Fix torando loop thread issue
  - aff15d4 Fix linter wart
  - 9606db7 Comment the tcp message client test better
  - dcf576f Add unit test for tcp message client close method
  - 4420556 Download artifacts for tcp jobs
  - e6a09dd Merge remote-tracking branch 'origin/tcp_leak' into tcp_leak
    - 481372c Merge branch '2019.2.1' into tcp_leak
  - 4a37234 Add tcp suffix to github notifications
  - 4a2848b Add transport PR tests
  - 9a4ba07 Fix leak of SaltMessageClient instances when using tcp transport
    - 592f3fe undo test
    - bc550ad wip pytest test david
    - 75571e4 fixes timezone decode error
    - d041660 fixes timezone decode error
    - 1ddd1a9 fixes timezone decode error
    - e75dafa patches timezone grain
    - eaca473 patches salt grains locale_info decode error
- **PR #53873**: (bryceml) increase sleep time between kitchen create failures to account for api limits @ 2019-07-16 23:46:09 UTC
  - 61e9e6d Merge pull request #53873 from bryceml/2019.2.1-increase-sleep
  - aae0bf6 increase sleep time between kitchen create failures to account for api limits
- **PR #53750**: (twangboy) Fix memory error when the test suite cleans up (2019.2.1) @ 2019-07-16 23:00:07 UTC
  - 317d9af Merge pull request #53750 from twangboy/fix_helpers
- fa0e9c3 Merge branch '2019.2.1' into fix_helpers

- **PR #53851**: (dwoz) Master stats revert @ 2019-07-16 16:05:38 UTC
  - 6c2b3a5 Merge pull request #53851 from dwoz/master_stats_revert
  - 0bc72e4 Revert "Merge pull request #53822 from dwoz/master_stats_test"
  - 4553ba7 Revert "Merge pull request #53829 from saltstack/fix_stats_2019.2.1"

- **PR #53829**: (dwoz) Fix stats on windows @ 2019-07-12 01:03:47 UTC
  - 5064027 Merge pull request #53829 from saltstack/fix_stats_2019.2.1
  - 9f2d20d Fix stats on windows

- **PR #53826**: (dmurphy18) WAR ROOM test skip till rewritten to allow for dnf on RHEL 8 and Fedora 30 @ 2019-07-12 00:39:11 UTC
  - 971eda3 Merge pull request #53826 from dmurphy18/fedora30_fixes
  - 34b261d WAR ROOM test skip till rewritten to allow for dnf on RHEL 8 and Fedora 30

- **PR #53822**: (dwoz) Enable master stats for tests @ 2019-07-11 23:37:55 UTC
  - ba33d76 Merge pull request #53822 from dwoz/master_stats_test
  - d2b8315 Enable master stats for tests
  - 3471422 Fix memory error when the test suite cleans up

- **PR #53591**: (twangboy) Fix whitelist errors in test_boto_* state tests on Windows @ 2019-07-07 05:45:21 UTC
  - 1756156 Merge pull request #53591 from twangboy/fixed_tests_tests
  - ba8ba26 Merge branch '2019.2.1' into fixed_tests_tests

- **ISSUE #53532**: (dafydd) win_lgpo.py: crash caused by empty presentation text element (refs: #53662)

- **PR #53688**: (twangboy) Merge Forward #53662 (2019.2.1) @ 2019-07-07 05:44:25 UTC
  - **PR #53662**: (lomeroe) Update win_lgpo (refs: #53688)
  - 46446ac Merge pull request #53688 from twangboy/mf_53688
  - c19de97 Merge branch '2019.2.1' into mf_53688

- **ISSUE #52391**: (rsmekala) Port Junos-related bug fixes from develop to 2019.2 (refs: #52401)

- **PR #52401**: (rsmekala) Port Junos-related bug fixes from develop to 2019.2 @ 2019-07-06 21:50:51 UTC
  - **PR #51164**: (rsmekala) Updates to salt-junos modules (refs: #52401)
  - 1a76e00 Merge pull request #52401 from rsmekala/2019.2.1
  - 345938d Merge branch '2019.2.1' into 2019.2.1
  - 3265f94 Merge branch '2019.2.1' into 2019.2.1
  - c11a004 Merge branch '2019.2.1' into 2019.2.1
  - 33b45d2 Merge branch '2019.2.1' into 2019.2.1
  - a66fac Merge branch '2019.2.1' into 2019.2.1
  - 211b169 Ported relevant fixes from unit.modules.test_junos from develop to 2019.2
  - 0c51bc9 Ported relevant fixes from states.junos from develop to 2019.2
  - a966ad1 Ported relevant fixes from proxy.junos from develop to 2019.2

• PR #53466: (dwoz) More robust beacon state test @ 2019-06-27 23:17:01 UTC

  - 75175bb Merge pull request #53466 from dwoz/test_pres_abs
  - a74580b Clean up cruf
  - 68958f5 Do not create duplicate minion ids
  - dc90b47 More robust beacon state test

• PR #53609: (s0undt3ch) CI Pipelines. Timeout after getting a node. Report exit code. @ 2019-06-27 16:09:54 UTC

  - 582ac5f Merge pull request #53609 from s0undt3ch/hotfix/fix-nox-bypass-2019.2.1
  - 024be84 CI Pipelines. Timeout after getting a node. Report exit code.

• PR #53574: (s0undt3ch) [2019.2.1] Minor fixes/adjustments to the new CI pipelines @ 2019-06-25 18:48:25 UTC

  - f568796 Merge pull request #53574 from s0undt3ch/hotfix/fix-nox-bypass-2019.2.1
  - e85e2f4 Minor fixes/adjustments to the new CI pipelines

• PR #53584: (dwoz) Add unit tests for recent SaltCacheLoader changes @ 2019-06-24 23:40:43 UTC

  - PR #53563: (twangboy) SaltCacheLoader does not create multiple FileClients (refs: #53584)
  - 77b7fc4 Merge pull request #53584 from dwoz/client_cache
• PR #53563: (twangboy) SaltCacheLoader does not create multiple FileClients (refs: #53584) @ 2019-06-22 23:23:03 UTC
  - 6ed6c31 Merge pull request #53563 from twangboy/py3_windows_hang
  - 369720e Allow the file_client to be overridden
  - f6e592c Don’t instantiate the file_client every time

• PR #53432: (garethgreenaway) [2019.2.1] Various fixes for 2019.2.1 to ensure tests pass on Mac OS X @ 2019-06-21 13:47:41 UTC
  - c606952 Merge pull request #53432 from garethgreenaway/2019_2_1_mac_fixes
  - 1974f11 Disabling a couple more tests in integration.modules.test_cp that hang on OS X and Py2.
  - 7721151 Fixing lint.
  - 1d4e228 Updating various skips for tests to only skip if OS is OS X and Python is Python2.
  - 01dafdc Skipping integration.modules.test_cp.CPModuleTest.test_get_file_str_https on OS X
  - c02db20 Disabling integration.modules.test_state.StateModuleTest.test_parallel_state_with_long_tag
  - 8788877 Skip integration.states.test_file.FileStateTest.test_filestate_11003 ImmutableLazyProxySum and integration.states.test_pip_state.PipStateTest.test_22359 pip_installed_unless_does_not_trigger_warnings when running on OS X.
  - cf76027 Removing wrong import of skipIf
  - b10e1e7 Moving the skipIf for OS X from the beacon state tests to therenderer state tests.
  - d2fe9a Disabling beacon state tests on OS X for the time being.
  - 1741bb0 Adding some timeouts to see if it helps the tests pass on OS X.
  - fd0ba0a Ensure the user and group used by @with_system_user_and_group are consistent.
  - e03ab81 Using salt.utils.path.which to find false, on OSX it lives under /usr/bin/
  - 353f9d4 Fixing the beacons.reset function. Once the reset has taken place in beacons/__init__.py we need to fire an event back to complete the loop and ensure that everything worked as expected.
  - ee3bc7 Fix to how the depends decorator works. Only run the dependency commands for the module we’re checking.
  - 8440176 Fixing a log issue that pops up after test_gen_thin_compression_fallback_py3 on “OS X, need to ensure that salt.utils.thin.os.close is mocked.
  - 9767ddd Format for the sqlite3 database used for the assistive information changed in Mojave, additional columns added.
  - 9c8a7e6 Fixing a bug when the roots fileserver and the location is a symlink to another location. This fix ensures that when fsroot is referenced we are using the real path and not the symlink path.

• PR #53526: (s0undt3ch) [2019.2.1] Update pipelines to work on old and new jenkins @ 2019-06-20 15:29:13 UTC
  - 59e2a1f Merge pull request #53526 from s0undt3ch/hotfix/fix-nox-bypass-2019.2.1
  - 24d6d09 Update pipelines to work on old and new jenkins

• PR #53210: (Ch3LL) Cherry-Pick #52787 into 2019.2.1 @ 2019-06-20 13:33:13 UTC
  - PR #52787: (garethgreenaway) [2018.3] Fixes to test_pip state sls files (refs: #53210)
  - f5f80af Merge pull request #53210 from Ch3LL/cp-52787
• PR #53467: (twangboy) Check valid username first (fixes failing symlink test) @ 2019-06-19 17:04:30 UTC
  - f27c434 Merge branch ’2019.2.1’ into cp-52787
  - fd6cb35 Merge pull request #53467 from twangboy/fix_test_win_file
  - 92950c5 Merge branch ’2019.2.1’ into fix_test_win_file
  - 6a21ed8 Merge branch ’2019.2.1’ into fix_test_win_file
  - 31ce1fb Fix some lint, skip some tests
  - 6de4db6 Monkeypatch in the class instead of globally
  - d663a1f Fix the failing BlockReplace test cases on Windows
  - 299f88f Update test_managed_contents
  - 81110e5 Fix test_file_copy_make_dirs that was failing on Linux
  - 8d0529d Fix some lint
  - 4a9c020 Fix issues with win_runas
  - bcefa1 Remove privs message
  - 54be0a6 Verify username early in win_runas

• PR #53475: (Ch3LL) Add pypsexec requirement for cloud tests @ 2019-06-19 13:30:25 UTC
  - 3230078 Merge pull request #53475 from Ch3LL/add_pypsexec

  - a1f4136 Merge pull request #53492 from dwoz/tcp_syndic_fix
  - 17c983b Fix linter
  - 9339425 Enable logging for test runs on py3
  - f1b65d1 Fix syndic connection when using tcp transport

• PR #53437: (twangboy) Fix failing symlink test @ 2019-06-12 22:53:32 UTC
  - e852596 Merge pull request #53437 from twangboy/fix_test_win_file
  - 8c30dbd Add priv info to error message
  - a7d41a8 Make them non-destructive tests
  - d8bede0 Remove duplicate test
  - 89aaf2e Remove duplicate test
  - 184ec4a Skip test on linux
  - c97ea99 Mark it a destructive test
  - 9da7090 Fix failing symlink test

• PR #53408: (s0undt3ch) [2019.2.1] Fix static requirements @ 2019-06-12 22:52:33 UTC
  - a92836b Merge pull request #53408 from s0undt3ch/hotfix/fix-pkg-reqs-2019.2.1
  - 19629a0 Fix unit.templates.test_jinja.TestCustomExtensions.test_http_query
  - 5ae99b Take into account the packaging requirements for OSX
  - b9618f6 Take into account the packaging requirements for windows
- ff63ae4 Stop compiling static TCP requirements.
  - 62e590b Update file.chattr

- **PR #53165**: (Ch3LL) Update ami's used for windows cloud tests @ 2019-06-11 15:54:41 UTC
  - ab9fe46 Merge pull request #53165 from Ch3LL/ami_window_cloud
  - 1d0b0a6 Merge branch '2019.2.1' into ami_window_cloud
  - a77a05c Merge branch '2019.2.1' into ami_window_cloud
  - a1204dc Merge branch '2019.2.1' into ami_window_cloud
  - d15c8f2 Merge branch '2019.2.1' into ami_window_cloud
  - 941778f Update ami's used for windows cloud tests

- **PR saltstack/salt#53332**: (s0undt3ch) Non optional full test runs for 2019.2.1 (refs: #53431)

- **PR #53431**: (dwoz) Revert "Non optional full test runs for 2019.2.1" @ 2019-06-10 21:44:30 UTC
  - d806b58 Merge pull request #53431 from saltstack/revert-53332-hotfix/full-test-run-2019.2.1
  - 701218c Revert "Non optional full test runs for 2019.2.1"

- **ISSUE #52174**: (amendlik) file.stat function not working under Python 3 (refs: #53430)
  - **PR #53430**: (Akm0d) Cherry-pick #52174 into 2019.2.1
    - 7811971 Merge branch '2019.2.1' into cp-52787

- **PR #53389**: (bryceml) only keep last 10 builds of every pr on jenkins to reduce disk usage @ 2019-06-10 17:18:48 UTC
  - 6b800a2 Merge pull request #53389 from bryceml/2019.2.1
  - 05368a1 Merge branch '2019.2.1' into 2019.2.1

- **PR #53332**: (s0undt3ch) Non optional full test runs for 2019.2.1 @ 2019-06-10 15:51:41 UTC
  - fe18c40 Merge pull request #53332 from s0undt3ch/hotfix/full-test-run-2019.2.1
  - 2372733 Merge branch '2019.2.1' into hotfix/full-test-run-2019.2.1
  - f8bd47b Merge branch '2019.2.1' into hotfix/full-test-run-2019.2.1
  - 45c3e06 Non optional full test runs for 2019.2.1
    - 928b05f only fetch pr target branch instead of all branches to save time and disk space
    - ccc6106 only keep last 10 builds of every pr on jenkins to reduce disk usage
      - b970bde Merge branch '2019.2.1' into cp-52787

- **PR #53287**: (twangboy) Fix win system @ 2019-06-06 23:35:47 UTC
  - d0810d7 Merge pull request #53287 from twangboy/fix_win_system
  - 0fc88fb Add TypeError
  - 5b4160d Try NumberOfEnabledCores
  - 49cbfd4 Add a note about skipping unavailable items
  - 044b56b Fix get_system_info for older versions of Windows

- **ISSUE #52173**: (amendlik) file.directory fails to check directory permissions correctly (refs: #53385)
  - **PR #53385**: (Akm0d) Check dir_mode recursively in file.directory
• PR #53386: (dwoz) Fix missing import @ 2019-06-06 20:45:59 UTC
  - c98b83 Merge pull request #53386 from dwoz/missing_import
  - a23d6d9 Fix missing import
• ISSUE #49559: (zyguy) Salt-cloud - proxmox driver - returns AttributeError: 'generator' object has no attribute 'next' (refs: #53240)
  - PR #53240: (FireGrace) change .next() to next() py2=>py3 leftover
• ISSUE #53274: (Ch3LL) integration.states.test_pkg failing on amazon 1 py2 (refs: #53323)
  - PR #53323: (dmurphy18) Fix for issue #53274, test on Amazon Linux 1 @ 2019-06-06 17:31:18 UTC
  - 18991f9 Merge pull request #53232 from dmurphy18/fix_53274
  - 6814852 Merge branch '2019.2.1' into fix_53274
  - bb6c97a Merge branch '2019.2.1' into fix_53274
  - b84833d Merge branch '2019.2.1' into fix_53274
  - 7085f36 Fixed pylint issue on PR not showing when run pylint locally
  - 1200031 Updated to use package bash-doc if Amazon Linux 1 after review comments
  - b2a4a5e Fix for issue #53274, test on Amazon Linux 1
  - PR #53356: (Akm0d) Updated paramiko to version 2.2.3 for python3.7 support
• ISSUE #53137: (bryceml) update doc pr's to be built using python3 and sphinx 2.0.1 (refs: #53273)
• PR #53273: (s0undt3ch) [2019.2.1] Switch docs building under Py3 @ 2019-06-05 10:01:03 UTC
  - 1cf57e9 Merge pull request #53273 from s0undt3ch/hotfix/py3-nox-docs-2019.2.1
  - 98653c0 Allow docs to be built on Python >= 3.5, not just Python 3.6
  - c54f06f Have sphinx turn errors into warnings
  - 07f4327 Switch docs building under Py3
• PR #53361: (s0undt3ch) [2019.2.1] Only make a new log record if it's a dictionary. @ 2019-06-05 09:56:15 UTC
  - dfd36a2 Merge pull request #53361 from s0undt3ch/hotfix/fix-mp-logging-2019.2.1
  - d70d61f Fully revert 962b11687
• ISSUE #53171: (twangboy) integration.states.test_network.NetworkTest.test_managed (refs: #53351)
• PR #53351: (waynew) Add checks for Amazon Linux to ip module @ 2019-06-04 19:25:58 UTC
  - 5efb670 Merge pull request #53351 from waynew/53171-fix-network-managed
  - e801afe Add checks for Amazon Linux to ip module
• PR #53242: (s0undt3ch) [2019.2.1] newer msgpack ipc fixes @ 2019-06-03 23:39:09 UTC
  - PR #52934: (twangboy) Update msgpack calls for newer msgpack (refs: #53242)
  - PR #52755: (dwoz) Fix non raw msg pack msg decoding (refs: #53242)
  - PR #52488: (terminalmage) Fix deprecation warning in msgpack >= 0.5.2 (2018.3) (refs: #52755)
  - PR #52487: (terminalmage) Fix deprecation warning in msgpack >= 0.5.2 (develop) (refs: #53242)
  - ce5d79a Merge pull request #53242 from s0undt3ch/hotfix/msgpack-ipc-2019.2.1
  - d27a524 Merge branch '2019.2.1' into hotfix/msgpack-ipc-2019.2.1

32.2. Previous releases
• **PR #53289**: (cmcmarrow) stops pylint E1120 from showing @ 2019-06-01 04:57:27 UTC
  - df448c2 Merge pull request #53289 from cmcmarrow/test_kubernetes_lint_failures_silenced
  - 03eacac Merge branch '2019.2.1' into test_kubernetes_lint_failures_silenced

• **PR #53304**: (s0undt3ch) [2019.2.1] Refactor Jenkins PR pipelines to download artifacts after timeout @ 2019-05-31 17:10:19 UTC
  - 6fac22b Merge pull request #53304 from s0undt3ch/hotfix/jenkins-pipelines-refactor-2019.2.1
  - 6e778ef Refactor Jenkins PR pipelines to download artifacts after timeout

• **PR #53297**: (s0undt3ch) [2019.2.1] The TCP transport needs the exact same requirements as the ZeroMQ one @ 2019-05-30 19:42:29 UTC
  - d359513 Merge pull request #53297 from s0undt3ch/hotfix/tcp-transport-tests
  - bec7fa5 The TCP transport needs the exact same requirements as the ZeroMQ one
  - f93e7d3 stops pylint E1120 from showing
  - cbe6423 stops pylint E1120 from showing
  - c5a5d43 test_kubernetes_lint_failures_silenced
  - b838395 test_kubernetes_lint_failures_silenced
  - 997daa8 stops pylint E1120 from showing
    - 5542fa8 Add the missing, and required, top pillar file.
    - 0ae2ef0 Under Py2 we still want raw to be set to True
    - 714d663 Re-submit #52934 fixed after being reverted in #52755
    - 243b512 Update msgpack calls for newer msgpack
      - 0f9077b Merge branch '2019.2.1' into cp-52787

• **PR #53264**: (s0undt3ch) [2019.2.1] Minion blackout tests - Add the missing, and required, top pillar file @ 2019-05-29 07:30:45 UTC
  - 50e31ec Merge pull request #53264 from s0undt3ch/2019.2.1
  - acabb70 Merge branch '2019.2.1' into 2019.2.1

• **PR #52966**: (s0undt3ch) Always run the full test suite on the 2019.2.1 release branch @ 2019-05-28 15:43:12 UTC
  - 749c626 Merge pull request #52966 from s0undt3ch/hotfix/full-test-run
  - 247c461 Always run the full test suite on the 2019.2.1 release branch

• **PR #53138**: (frogunder) vultr cloudtest fix @ 2019-05-28 14:34:22 UTC
  - a7af3d1 Merge pull request #53138 from frogunder/fixed_vultr_cloudtest
  - 9f4550c vultr cloudtest fix
    - 912b9b3 Add the missing, and required, top pillar file.
      - 9d21b75 Merge branch '2019.2.1' into cp-52787

• **PR #53258**: (s0undt3ch) [2019.2.1] Fix multiprocessing logging queue dict changing during iteration errors @ 2019-05-27 19:26:27 UTC
  - d011beb Merge pull request #53258 from s0undt3ch/2019.2.1
  - ad01dd2 More robust minion blackout tests
- a0346d1 Try harder to get the minion grains
- 36717bd Try and address the test flakyness
- ce07d8c Add more information when the assertion fails
- b99e914 Attempt to fix mine tests
- fca981c One more known to return None
- 951df48 One more known to return None
- eb5fd3e Fix `integration.modules.test_mine.MineTest.test_get` for sub_minion
- 26314f5 Fix multiprocessing logging queue dict changing during iteration errors

- **PR #53153:** (s0undt3ch) [2019.2.1] Add Amazon Linux 2018.3 and 2 static requirements @ 2019-05-27 12:02:20 UTC
  - b69e080 Merge pull request #53153 from s0undt3ch/2019.2.1
  - 166067c Use `currentBuild.resultIsBetterOrEqualTo` instead
  - cefdd90 Stop error messages about missing roster file on syndic master
  - 6bf8f46 Don’t complain when attempting to close sockets at this stage
  - e3f3ce9 Add Amazon Linux 2018.3 and 2 static requirements
  - 872acc0 Switch the ubuntu-14.04 exception with amzn-1
  - **PR saltstack/salt#52934:** (twangboy) Update msgpack calls for newer msgpack (refs: #53235)

- **PR #53235:** (s0undt3ch) Revert "Update msgpack calls for newer msgpack" @ 2019-05-24 13:35:20 UTC
  - 14ae6ee Merge pull request #53235 from saltstack/revert-52934-fix_msgpack
  - 32954ab Revert "Update msgpack calls for newer msgpack"

- **PR #53131:** (s0undt3ch) [2019.2.1] Update to salt-bootstrap v2019.05.20 @ 2019-05-24 07:45:57 UTC
  - 692347 Merge pull request #53131 from s0undt3ch/hotfix/update-bootstrap-2019.2.1
  - 4ce4f4 Merge branch '2019.2.1' into hotfix/update-bootstrap-2019.2.1
  - 6751ee1 Merge branch '2019.2.1' into hotfix/update-bootstrap-2019.2.1
  - 6988e07 Update to salt-bootstrap v2019.05.20

- **PR #52934:** (twangboy) Update msgpack calls for newer msgpack (refs: #53242) @ 2019-05-23 23:18:23 UTC
  - a61db20 Merge pull request #52934 from twangboy/fix_msgpack
  - f02a12e Merge branch '2019.2.1' into fix_msgpack
  - 7ed2cd3 Merge branch '2019.2.1' into fix_msgpack
  - bc9ce8e Merge branch '2019.2.1' into fix_msgpack
  - 0abd1ec Update msgpack calls for newer msgpack
    - 3366d59 update pylint exceptoin
    - 6c452b3 removing unwanted commits from this branch
    - e0b0ba8 Handling in flaky when maximum number of attempts raised and the exception should be raised. Different approaches depending on Py2 vs Py3.
    - 434dcd7a Disabling two tests when using Python 3 and OS X

32.2. Previous releases

5013
5784e80 Disabling integration.shell.test_minion.MinionTest.test_issue_7754 test on OS X because it hangs the test suite.

78ae61 Dropping the version check for InstallationError down to anything 1.0 or greater. Removing the test that simulates versions of pip below 1.0.

4ec90c2 Adding a jinja if statement to only the python parameter if the result from get_python_executable is a valid value. Maintaining backwards compatibility to run tests without Nox.

- **PR #53192**: (twangboy) Skip test_gen_hash test on Windows @ 2019-05-23 05:33:13 UTC
  - 8a57270 Merge pull request #53192 from twangboy/skip_test_gen_hash
  - 758d020 Skip test on Windows

- **PR #53157**: (twangboy) Fix unit.modules.test_win_file.WinFileTestCase.test_issue_52002_check_file_remove_symlink @ 2019-05-22 22:32:26 UTC
  - 446e70c Merge pull request #53157 from twangboy/fix_test_win_file_symlink
  - 5672076 Merge branch '2019.2.1' into fix_test_win_file_symlink

- **PR #53141**: (Ch3LL) Check for all non-word characters when calling secure_password @ 2019-05-22 17:24:54 UTC
  - 6fbe9aa Merge pull request #53141 from Ch3LL/shadow_fed_fix
  - a3c4066 Merge branch '2019.2.1' into shadow_fed_fix

- **PR #53161**: (Ch3LL) Add HAS_REQUIRED_CRYPTO var for m2crypto in joyent @ 2019-05-22 13:36:07 UTC
  - fb29512 Merge pull request #53161 from Ch3LL/joyent_m2crypto
  - 08d0e0 Add HAS_REQUIRED_CRYPTO var for m2crypto in joyent
  - 16ef3d2 Merge branch '2019.2.1' into shadow_fed_fix
  - 09f8867 Check for all non-word when calling secure_password
  - 334c93b Elevate token before creating symlink

- **PR #53073**: (Ch3LL) salt-ssh: python binary exists before version check @ 2019-05-20 22:36:34 UTC
  - 85e9b2f Merge pull request #53073 from Ch3LL/ssh_py3_log
  - 383e781 Improve logging in salt-ssh gen_thin
  - 4371434 salt-ssh: python binary exists before version check

- **PR #52957**: (Ch3LL) Set default_flow_style=None in yaml.dump calls @ 2019-05-16 19:42:35 UTC
  - bd02ea6 Merge pull request #52957 from Ch3LL/yaml_flow_style
  - 5f6581a Merge branch '2019.2.1' into yaml_flow_style

- **PR #53072**: (Ch3LL) Backport #52754 into 2019.2.1 @ 2019-05-16 19:29:22 UTC
  - **PR #52754**: (garethgreenaway) [2018.3] Fixes to multiprocessing queue when using MacOS (refs: #53072)
  - f410346 Merge pull request #52754 from Ch3LL/bp-52754-2019.2.1
  - 13e5e55 The maximum for the multiprocessing queue on MacOS is 32767, so if we running on MacOS then we use that maximum.

- **ISSUE #52817**: (waynew) unit.modules.test_telegram.TelegramModuleTest.test_post_message (refs: #52972)

- **PR #52972**: (garethgreenaway) [2019.2.1] Fix to unit.modules.test_telegram @ 2019-05-15 07:50:13 UTC
- 06fa91b Merge pull request #52972 from garethgreenaway/52817_unit_modules_test_telegram_telegrammoduletest_test_post_message
- cea7131 Removing global declaration.
- 5bf9a95 Fixing lint.
- 4d3c46d fixing broken unit.modules.test_telegram test.

- **PR #53025**: (Ch3LL) Change package name for suse pkg tests @ 2019-05-15 07:41:44 UTC
  - d340cbc Merge pull request #53025 from Ch3LL/suse15_pkg_test
  - 0a213ee Change package name for suse pkg tests

- **PR #53020**: (Ch3LL) Change ssh tops log message to debug @ 2019-05-14 16:56:42 UTC
  - c56bb0 Merge pull request #53020 from Ch3LL/ssh_tops
  - cbbc764 Merge branch '2019.2.1' into ssh_tops

- **PR #52973**: (twangboy) Fix integration.states.test_pip_state.PipStateTest.test_issue_2028_pip_installed_state on Windows @ 2019-05-13 20:56:28 UTC
  - ce099aa Merge pull request #52973 from twangboy/fix_test_pip_state
  - 218381a Merge branch '2019.2.1' into fix_test_pip_state

- **PR #52986**: (Ch3LL) Revert "Make sure --run-expensive runtests.py arg works" @ 2019-05-13 19:38:17 UTC
  - 055d374 Merge pull request #52986 from Ch3LL/expensive_revert
  - 368c012 Revert "Make sure --run-expensive runtests.py arg works"
  - cce263e Merge branch '2019.2.1' into fix_test_pip_state
  - 351d415 Return path to Python instead of None
    * c0538d2 Change ssh tops log message to debug
    * e317186 Merge branch '2019.2.1' into yaml_flow_style

- **PR #52968**: (s0undt3ch) [2019.2.1] Salt >= 2018.3.x supports Py3.7 @ 2019-05-12 21:44:57 UTC
  - ee05da5 Merge pull request #52968 from s0undt3ch/2019.2.1
  - 73c3726 Salt >= 2018.3.x supports Py3.7

- **ISSUE #50310**: (xuhcc) acme.cert falsely reports changes (refs: #50400)

- **PR #52796**: (Ch3LL) Backport #50400 and #50402 into 2019.2.1 @ 2019-05-10 19:30:12 UTC
  - **PR #50402**: (xuhcc) Fix typo in salt.modules.acme (refs: #52796)
  - **PR #50400**: (xuhcc) Fix incorrect change reporting in acme.cert (refs: #50402, #52796)
    - cae51c2 Merge pull request #52796 from Ch3LL/bp-50400
    - 0c2e5e7 Merge branch '2019.2.1' into bp-50400
    - 1268e3e Merge branch '2019.2.1' into bp-50400
    - 09fa9e3 Fix typo
    - 9be5c0c Fix incorrect change reporting in acme.cert
      * 9a27fb3 Merge branch '2019.2.1' into yaml_flow_style

- **PR #52770**: (twangboy) Fix test_file_managed_should_fall_back_to_binary on Windows @ 2019-05-09 20:35:02 UTC
  - 20cccd8 Merge pull request #52770 from twangboy/fix_test_file

32.2. Previous releases
- ac27e69 Merge branch '2019.2.1' into fix_test_file
- 30a5093 Merge branch '2019.2.1' into fix_test_file
- c08b10d Merge branch '2019.2.1' into fix_test_file
- 340ee23 Pass encoding to _validate_str_list
  - 0d0e354 Fix yamldumper test for both py2/py3
  - 20bc954 Update docs for yamldumper test
  - bf648e5 Update tests/unit/utils/test_yamldumper.py
  - 70d578a Set default_flow_style=None in yaml.dump calls

- **PR #52943**: (Ch3LL) Fix elasticsearch state module: allow user to define empty aliases @ 2019-05-09 15:46:38 UTC
  - 4437764 Merge pull request #52943 from Ch3LL/fix_elasticsearch
  - 451fb7e Merge branch '2019.2.1' into fix_elasticsearch
  - ebff9b9 Fix elasticsearch state module: allow user to define empty aliases

- **PR #52952**: (s0undt3ch) [2019.2.1] More nox changes and test fixes @ 2019-05-09 15:03:07 UTC
  - 9b290b6 Merge pull request #52952 from s0undt3ch/merge-forward/2018.3-to-2019.2.1-cherry
  - a06d7ce We need to call the decorator
  - 77185af Partial revert since this is a class method
  - f5c5771 Lint fixes
  - 3e43c87 Revert "fix compare_versions method"
  - 0e139bf Fix GOLDEN_IMAGES_CI_BRANCH value
  - 12a9408 Add Py3.7 static requirements
  - 8e505fb Move tests to existing test modules
  - 4681609 tests/unit/config/__init__/py -> tests/unit/config/test_config.py
  - b1dc7f6 Pin to moto<=1.3.7 because of https://github.com/spulec/moto/pull/1952
  - 0ffe7ca We no longer test againt Ubuntu 14.04 which reached EOL
  - 33743fc Don't traceback when trying to close a closed socket
  - da2e147 Always cleanup the changed environ
  - 087c74d No globals in tests, specially dictionaries!
  - a814fc0 Fix underscore wart (and linter)
  - 74b8f5f Fix deprecation warning in msgpack >= 0.5.2
  - 962b116 Try to address dict changing during iteration
  - c58af57 Tweak codeclimate settings for less noise
  - 5bb7869 fix linter
  - 0b81841 Cherry-pick test fix
  - 99f9e1c fix compare_versions method

- **PR #52853**: (s0undt3ch) [2019.2.1] Bring nox into 2019.2.1 @ 2019-05-09 09:52:42 UTC
- a510edf Merge pull request #52853 from s0undt3ch/merge-forward/2018.3-to-2019.2.1-cherry
- a8f7b46 Test is not destructive.
- 63663cf We no longer test against Ubuntu 14.04 which reached EOL
- 62574ee Typo
- e3e3761 Proper english in requirements comments
- e9f6a12 identical_signature_wrapper adds __wrapped__ to function globals
- 10283b4 Upload coverage reports on full test runs
- 6e0b61b Less flaky mine tests
- 3709ed7 msgpack returns string_types
- a36b15e Add regression test
- ce782ff Fix non raw msg pack msg decoding
- f193f0f Update Issue Template: questions removed
- 4417095 Fix underscore wart (and linter)
- e6c2ae4 Fix deprecation warning in msgpack >= 0.5.2
- 6375944 Add ubuntu1804 to pr tests
- 8fd04d SIGKILL is not always available use a local variable
- 4d6b8da Fix linter
- 759bccc Fix test_doc on windows by using grep yay!
- 0ce086d Fix remaining failures on ubuntu 1404 and add to PR tests
- fdf80fd Change py3 windows timeout from 6 to 8 hours
- b0aa287 Fix missing class wart
- 21ecb74 fix linter
- 62c0f9f Skip tests when no libcloud
- 1d92290 Fix unused import
- 72d09e9 Fix linter
- 238f0f Fix broken pip state
- 89533ba Fix NOX_ENV_NAME
- 7cfc9e8 Fix NOX_ENV_NAME
- 2087c91 Fix NOX_ENV_NAME
- 2f1aff5 Rename kitchen-centos6-py3 to kitchen-centos6-py2
- 1e9a9f0 Fix linter
- 52ca668 Skip tests when no libcloud
- 2cf4b98 Add centos-6-py2 and Debian 8,9 py2 and 3 to PR tests
- 522599d Don’t fail just because some random process died
- 34cef86 Ignore super not called
- b7ace9c Fix linter

32.2. Previous releases
- aceb6d3 Skip libcloud unit tests when no libcloud
- f73420b Install mock on Python < 3.6
- 28f8de1 Add _moto_ to the windows dependencies
- 8bce6c1 Pin kubernetes to <4.0
- 2a0b0f3 Make sure --run-expensive runtests.py arg works
- 22ca2ef Remove ref restricton from kitche-salt
- 67095df Add 'runFull' build parameter for PR tests
- 12d8d35 Stop w32time before and start after testing
- 7f1c22c Skip tests that fail on Windows
- f4ae97f Upgrade etcd to > 0.4.2
- 381f5fe Limit and reduce the amount of log records sent over the wire
- 0c94b5d More entries to ignore
- c3a21f5 As a script, not as a module
- 8948b69 Include _COVERAGE_FILE_ as an env variable.
- 0af56e1 Each generated script is now prepared for code coverage
- 294d6f4 Use the system's path separator
- e52ab87 Always combine and generate the XML coverage report
- 666ca9f Fix proxy minion startup issue on the test suite
- 783ace _impacket_ does not support Py3
- ba8d0fe Allow --install-only to gather the required information
- eed7d68 Create nox lint virtualenvs before running them
- e9e57cf Syndic roster not in 2017.7.9
- 111c63a4d Create the roster even when not running ssh
- 11c02a0 Fix unit.test_loader.LoaderGlobalsTest.test_states
- 8694db1 Fix windows tests
- 82e9ac5 Avoid race condition in even assertions
- 9443451 Revert part of 927219c since it is not a fix
- 5fee762 Fix timeout logic
- 51765f0 check timeout when queue empty
- 7c0a9af fix linter
- 961dc40 Ignore missing variable in six module
- 0f5a7f0 Fix typo
- 6c8c418 Do not limit event assert to first event
- 3042292 Wait longer for ping reaction
- 8c10f5f Fix xml block causing docs to fail
- 6e5768a Add a nox session for the Jenkins tornado jobs
- 43321e8 Add a cloud nox session for both runtests and pytest
- b6b4e95 Lint cleanup
- 0670614 Add tests for wraps
- 1670b5d Use functools.wraps with decorators
- 5ae263c Update static requirements for 2018.3 branch
- 3482c4d Disable code coverage uploads.
- 0e5bc67 Lint fixes
- 337c737 Update CI jobs to point to 2018.3
- 72e8603 Skip test if required crypto libs are not available
- e6bc9f8 Default to Cryptodome, fallback to PyCrypto
- b2b0764 Be aware of the different path separators
- 7e79b18 We need to make sure the virtualenv path entry is removed when searching
- ff6d3c6 We don't need to be root to run these tests
- 5965ab4 Disable progress bars on pip installs
- f86a44e Use the real python executable path when running within a virtualenv
- 3d407e8 Add a helper to return the path to the real python executable
- ea9d246 We must also provide \texttt{venv\_bin} when running within a virtualenv
- 31e91b0 Fix pip tests, in particular under windows
- 493f493 Don't fail if pkg\_resources is not importable
- a1eb400 Specify the SHA we need
- 0b01f21 Let's fully unload pip
- 0b6f848 Fix docker entries
- 870b899 Remove unused argument
- 1656cb4 Disable re-running failed tests for now
- 6db4141 Also ignore multiprocessing coverage files
- 83dc97d Actually write the lint reports.
- 5f97270 Try to make sure some pip internal functions are always present in \texttt{sys.modules} after reloads
- 0090c55 Try and address the fact that some python packages are only provided by the distro
- 4a072fe These tests aren't destructive
- 5c7a956 Don't fail the build if the issue was sending a slack notification
- 361ef6e Don't try to change ownership on non existing paths
- 7b17352 More insight(context) on failure reports
- 93b6b95 Lock supervisor to 3.3.5, last known working(passing tests) version
- 51114aa Watch out for too long shebang's
- d97fe82 The output is important to know why it failed.
- 9fef385 Strings and integers are not comparable under Python 3
- d308dce Be verbose in a CI context
- 8b7105e Fix failed tests re-run logic
- d68db1 Blacklist enum34 on Py>=3.4. Update requirements.
- 1cd00c0 Update PR CI jobs for nox
- 19a83d5 Blacklist pycrypto and install pycryptodome instead
- 91376b3 Ignore the generated docs archive
- 207b83a Update compiled requirements
- 535e7a7 Add TCP transport nox sessions
- 680b3e5 Compile requirements for the TCP transport
- 49a1ebe Throw error when running either on Py<2.7 or Py>=3.7
- 10528b9 Don’t repeat failed tests on missing/empty failed test files file
- 4886809 We currently only support running lint under Py2.7
- a76981b Remove dead code
- 7b2c1ce Don’t require six
- a27ed35 Add nox env to build docs
- e1b3f1d Lock docs python requirements
- c8de644 Fix lint issues under tests
- 0372718 Fix lint issues on salt
- 9eab9f4 Add nox session/env/target to run lint against Salt and its test suite
- 123f771 Lock lint requirements
- 8df33ad Back to +apache-libcloud==1.0.0 and skip windows for now
- 43e3ae6 Bump apache-libcloud requirement because 1.0.0 fails to install on windows
- d5f7813 Remove requiremens for platforms which aren’t tested under Py3
- 8f02ee9 Recompile requirements
- 66626f2 Remove pycryptodome from compiled requirements files
- 75693e5 Use pycryptodomex on windows and PyCrypto on the rest
- 4a9c19c Update(fix) requirements
- 33a3467 We don’t test OSX nor Windows under Py3.4
- fd44fca We want a more verbose pip-compile output
- c2ae2d5 We now compile requirements for each of the supported minor version
- 6ee1260 Static requirements are now placed on py<major>,<minor> subdirectories
- 3504804 The required crypto library is pulled in from zeromq.txt or raet.txt
- 3ffe03c PyZMQ is pulled in from zeromq.txt
- 7c2fe16 Instead of quoting session parameters, proxy nox sessions
- d3ae77b Add separate crypto sessions
- 0399620 Parametrize the transport
- d33fd03 Update/Generate static requirements to new layout
- 52ac533 Add pre-commit config to generate static requirements
- 3cfcb13 Be aware of the new static requirements layout
- dc7e16a Don't lock the docker requirement. It's not locked on the other platforms
- 5476ba2 Kubernetes 3.0.0 does include the requirements files. pip-compile chokes on that
- 79a8261 Previously generated requirements were py2 only
- 1e29666 IOFLO is pulled in from the raet requirements
- 4945e35 Fix pylint on 2017.7.9
- 036bf68 Rerun failed tests
- 03a9601 Ignore .nox directory
- 50cb630 We have long files
- db2392f Update CodeClimate settings
- 899c80e Fix integration.client.test_kwarg test timeouts

• ISSUE #52836: (Ch3LL) unit.utils.test_args.ArgsTestCase.test_argspec_report failing (refs: #52852)
• PR #52852: (garethgreenaway) [2019.2.1] Fixes to unit.utils.test_args.test_argspec_report @ 2019-05-07 19:25:48 UTC
  - 77355e2 Merge pull request #52852 from garethgreenaway/52836_test_argspec_report_failing
  - 3ee5a38 Merge branch '2019.2.1' into 52836_test_argspec_report_failing
• PR #52845: (Ch3LL) Backport #52780 into 2019.2.1 @ 2019-05-07 16:27:21 UTC
  - PR #52780: (sbrennan4) Handle ipv6 in _netlink_tool_remote_on (refs: #52845)
  - dcc5fde Merge pull request #52845 from Ch3LL/bp-52780
  - dff09b Merge branch '2019.2.1' into bp-52780
• PR #52851: (Ch3LL) Reload matcher loader when ext_pillar_first set @ 2019-05-07 13:12:07 UTC
  - 2e4f296 Merge pull request #52851 from Ch3LL/matcher_ext_pillar
  - bdcae5d Add docs for new reload kwarg
  - fc70884 Reload matcher loader when ext_pillar_first set
  - 8ac74e2 Merge branch '2019.2.1' into bp-52780
  - 226c7ce Merge branch '2019.2.1' into bp-52780
  - c1ea84 Add test
  - 69fe65b Use rsplit
    - 8fdec8c Removing create_autospec and having salt.utils.args.argspec_report run against the _test_spec function directly. Depending on the python version, create_autospec gives different results and cause the test to fail. The test is now more accurate at testing the arguments for the function.
• PR #52842: (s0undt3ch) libcrypto.OpenSSL_version_num might be a callable @ 2019-05-06 17:00:37 UTC
  - cc7a0d1 Merge pull request #52842 from s0undt3ch/2019.2.1
  - a944017 libcrypto.OpenSSL_version_num might be a callable
• PR #52839: (twangboy) Add support for EC2 @ 2019-05-04 17:28:54 UTC
  – b625a6a Merge pull request #52839 from twangboy/fix_test_grain
  – 1c9b372 Add support for EC2

• ISSUE #51982: (arsiesys) topic (minion_id) need to be encoded before being hash and sent using zeroMQ (refs: #51983)

• PR #52767: (Ch3LL) [2019.2.1] Add tests to PR #51983 @ 2019-05-03 08:35:27 UTC
  – PR #51983: (arsiesys) encode topic before using hashlib (refs: #52767)
  – 6002939 Merge pull request #52767 from Ch3LL/zmq_filter_test
  – 1ee8f37 Merge branch '2019.2.1' into zmq_filter_test
  – d74b6ee Merge branch '2019.2.1' into zmq_filter_test
  – 3210274 Fix linter warnings
  – e7ce9d6e increase timeout when gathering results
  – 784786d Add zmq_filter unit tests
  – 805c4ee encode topic before using hashlib

• PR #52827: (twangboy) Add pymssql dependency for Windows builds @ 2019-05-03 08:21:40 UTC
  – 5996932 Merge pull request #52827 from twangboy/add_pymssql
  – 6f08e2 Add pymssql dependency for Windows builds

• ISSUE #52717: (Ch3LL) debian9 tests segmentation fault (refs: #52797)

• PR #52797: (garethgreenaway) [2019.2.1] Only run the libcrypto init if less than OpenSSL 1.1.0 @ 2019-05-03 05:12:31 UTC
  – e3918e5 Merge pull request #52797 from garethgreenaway/52717_debian_tests_segmentation_fault
  – 7ab9061 Merge branch '52717_debian_tests_segmentation_fault' of github.com:garethgreenaway/salt into 52717_debian_tests_segmentation_fault

  - PR #52564: (DmitryKuzmenko) Simplify IPCClient and prevent corrupt messages (Turn 2) (refs: #52570)
  - PR #52445: (dwoz) Simplify IPCClient and prevent corrupt messages (refs: #52564)
  - PR #51963: (DmitryKuzmenko) Allow multiple instances of IPCMessageSubscriber in one process (refs: #52564)
  - e522ffe Merge pull request #52570 from DSRCorporation/bugs/revert_51963_2019.2
  - fabbcac A couple of race conditions fixes and a test update.
  - 9c85734 Drop singleton from IPCClient
  - 7cfd654 Revert "Support parallel work of multiple IPCMessageSubscribers in one process"
  - 726e676 Revert "Update doc conf with the new import tornado.queues"
  - 69e9416 Revert "Minor: Fix typo in docstring"
• **ISSUE #52449**: (Ch3LL) integration.cloud.clouds.test_gce.GCETest.test_instance_extra failure (refs: #52551)

• **PR #52551**: (garethgreenaway) [2019.2] Marking the two tests in test_gce as flaky @ 2019-04-17 14:00:39 UTC
  
  – b173406 Merge pull request #52551 from garethgreenaway/52449_test_gce_random_failures

  – 28af717 Marking the two tests in test_gce as flaky.

• **ISSUE #51842**: (mattLLVW) salt.auth.django docs use wrong model name (refs: #52553)

• **PR #52553**: (mattLLVW) fix: #51842 @ 2019-04-17 13:59:45 UTC
  
  – 8352362 Merge pull request #52553 from mattLLVW/fix_django_auth_docs

  – 3baedf fix: #51842

• **ISSUE #52134**: (sploenix) Regression: Include list of pillar files under different keys in 2019.2 (refs: #52490)

• **ISSUE #22063**: (jeanpralo) Wildcard inside top.sls file for pillar (refs: #52490)

• **PR #52490**: (dwoz) Fix pillar include regression @ 2019-04-17 13:54:39 UTC
  
  – 9faa49c Merge pull request #52490 from dwoz/issue_52134

  – 876dd18 Fix merge wart

  – 2ed650b Merge remote-tracking branch 'saltstack/2019.2' into issue_52134

  – b0af11f Run include tests when pillar source changes

  – 307c6c6 Fix pillar tests

  – 1a33bde import __future__.absolute_import

  – 5dc5de9 Use file encoding and add docstring

  – e84cd41 Fix pillar include wart

  – c79f496 Add pillar include tests

  – 7745242 Revert "Fix #22063: pillar wildcard support include"

• **PR #52552**: (twangboy) Bring 52170 into 2019.2 @ 2019-04-17 13:54:17 UTC

  – **PR #52170**: (twangboy) Fix issue when task doesn't have delay_random defined (refs: #52552)

  – b0c0237 Merge pull request #52552 from twangboy/fix_win_task_2019.2

  – fd19c6a Remove some warts in the docs

  – deb9b10 Fix some lint

  – a279d4f Final doc fixes

  – 580cd2 Fix docs... attempt 6

  – a66716e Fix docs... attempt 5

  – f6f3381 Fix docs... attempt 4

  – 18fc15 Fix docs... attempt 3

  – c691e0d More doc fixes

  – e01077b Fix docs issue... maybe...

  – b649495 Honor 80 character line limit

  – eba4507 Bring 52170 into 2019.2

• **PR #52528**: (Ch3LL) [2019.2] Merge forward from 2018.3 to 2019.2 @ 2019-04-17 13:53:46 UTC
- cc0cd5d Merge pull request #52528 from Ch3LL/merge-2019.2
- 87cf385 increase timeout on test_state for windows
- 3442202 Increase timeout for test_kwarg tests
- 2c3f2f Merge branch ’2019.2’ into merge-2019.2

**PR #52534:** (twangboy) Add TLS support up to TLS 1.2 @ 2019-04-13 22:56:41 UTC
- e91240b Merge pull request #52534 from twangboy/tls_support_2019.2
- 9ec54c4 Add TLS support up to TLS 1.2
  - 474efa1 Fix pylint and state test failure
  - 048a82e Merge branch ’2019.2’ into merge-2019.2

**PR #52536:** (twangboy) Bring #52191 into 2019.2 branch @ 2019-04-12 21:31:23 UTC
- 2c42e4d Merge pull request #52536 from twangboy/fix_choco_2019.2
- b394ad5 Bring #52191 into 2019.2 branch
- 795a7f6 Fix windows tests - increase timeout
- c70772c Fix linux state tests- add new comment
- 2941567 Merge branch ’2018.3’ into ’2019.2’
- 262516c Merge pull request #52209 from twangboy/fix_choco_retcode
  - 7aec2d3 Merge branch ’2018.3’ into fix_choco_retcode
  - bf6c47b Handle new enhanced retcode 2
- dd7a4ba Merge pull request #52046 from twangboy/use_reg_timezone
  - fc8e970 Merge branch ’2018.3’ into use_reg_timezone
  - d0987e6 Merge branch ’2018.3’ into use_reg_timezone
  - 1bf0b0c Merge branch ’2018.3’ into use_reg_timezone
  - b466f8a Merge branch ’2018.3’ into use_reg_timezone
  - 34bdae5 Merge branch ’2018.3’ into use_reg_timezone
  - 9a8afa6 Fix tests, add null byte test
  - 59b1d4f Revert back to using reg to get timezone
- 0d09608 Merge pull request #52396 from dmurphy18/fix_aix_ssh
  - 8bfa340 Correct typo
  - 6d98577 Altered code to support salt-ssh on AIX
- 576478e Merge pull request #52473 from Ch3LL/bp-49437
  - 781385f Merge branch ’2018.3’ into bp-49437
  - 3a3114d Fix merge conflict wart
  - bd6d412 Merge branch ’2018.3’ into bp-49437
  - 48ee82d Merge branch ’2018.3’ into bp-49437
  - f66d474 Add support to avoid calling refresh_db in opkg.del_repo
- d830bc6 Merge pull request #52493 from dwoz/ping_reaction_test
  - 8b05e77 Merge branch '2018.3' into ping_reaction_test
  - 7083d21 Merge branch '2018.3' into ping_reaction_test
  - 7c963c1 Merge branch '2018.3' into ping_reaction_test
  - 75 deb3 fix linter
  - e3e1d2e fix reactor ping test
- 9b7a0d1 Merge pull request #52505 from bloomberg/2018_zmq_uri
  - b682ec5 transport.zmq: fix bug introduced by b7df7e75cf2
- 452b4eb Merge pull request #52512 from dwoz/supervisord_2018.3
  - cd5cd7d The exit code matters.
- 53228ae Merge pull request #52475 from Ch3LL/bp-49464
  - a89fd3 Make opkg.del_repo be compatible with pkrepo state module
- 6e79e24 Merge pull request #52500 from terminalmage/invalid-archive-source
  - e9d71b5 Fix traceback when invalid source passed to archive.extracted
- 2df74ca Merge pull request #52476 from bloomberg/win_cmd_2018
  - 0e042e 2018 backport: modules.cmdmod: handle windows environ better
- 4dfb2f8 Merge pull request #52474 from Ch3LL/bp-49984
  - c8d547e Use prune option in Pygit2 provider when fetching
- d699485 Merge pull request #52393 from newnew/52087-mine-delete-test-enhancements
  - e3f5be3 Use uncommon item in mine delete test
- 89bd258 Merge pull request #52445 from dwoz/ipc_fixes_2018.3
  - 1bdaf29 Ensure exceptions in service future are handled
  - c7ad732 Use six.reraise for py3 compatibility
  - 29999b0 Close message service on subscriber close
  - 47203f7 Fix ipc unit tests
  - 2b35437 Fix linter issues
  - 503cdd2 Remove IPCClient singleton
  - b37403e Re-raise queued exceptions with traceback

• ISSUE #51879: whytewolf) 2019.2.0 binary pillar unicode error returns. (refs: #52334)

• PR #52334: waynew) 51879 fix binary pillar return error @ 2019-04-12 03:45:17 UTC
  - 6eb2bce Merge pull request #52334 from waynew/51879-fix-binary-pillar-return-error
  - ed856e Merge branch '2019.2' into 51879-fix-binary-pillar-return-error
  - 2aa971d lint cleanup
  - 28c2945 keep_pillar not needed
  - fb010c0 Add binary pillar to the docs
  - f2aebf9 Assume file contents are binary
- 2b8c782 Test gpg render with replace newlines
- c4b385b Allow binary pillar data
- 604b671 Return binary data from gpg renderer
- 32aa fab Ignore vscode and fix swap ignore

• ISSUE #52041: (arsiesys) 2019.2 influxdb_retention_policy.present broken when used extra arguments (refs: #52043)

• PR #52043: (arsiesys) fix missing client_args in influxdb module @ 2019-04-12 03:43:03 UTC
  - 2d59705 Merge pull request #52043 from arsiesys/fix_influxdb_state_rp
  - 617e5b Merge branch '2019.2' into fix_influxdb_state_rp
  - 7661860 fix missing client_args in influxdb module

• PR #52146: (twangboy) Add missing symlink test @ 2019-04-12 00:51:16 UTC
  - 1b969c3 Merge pull request #52146 from twangboy/fix_test_symlink_2019.2
  - 81e882 Merge branch '2019.2' into fix_test_symlink_2019.2
  - a429542 Merge branch '2019.2' into fix_test_symlink_2019.2
  - 701c253 Merge branch '2019.2' into fix_test_symlink_2019.2
  - cce6200 Fixing lint
  - c7e600 Merge branch '2019.2' into fix_test_symlink_2019.2
  - 3eae05a Merge branch '2019.2' into fix_test_symlink_2019.2
  - 83bed46 Add missing symlink test

• PR #52341: (cbosdo) virt.pool_running: fix pool start @ 2019-04-12 00:14:52 UTC
  - 7a1b8ca Merge pull request #52341 from cbosdo/virt-state-fixes
  - 89f0bd8 Merge branch '2019.2' into virt-state-fixes
  - 2599681 virt.pool_running: fix pool start
  - 3091d2 Remove unneeded kwargs in virt states
  - 0871e02 virt: allow defining the VM type and arch when creating it
  - 1c65d25 Updating running domains in virt.running
  - 13d7819 Add missing virt states unit tests
  - 0681d86 virt.running support for all virt.init options
  - c6a444b Add test case for virt.running
  - 2db7a98 Let virt running state provide errors

• ISSUE #52350: (Ch3LL) Re-Add Python 2 unicode string literals in YAML renderer (refs: #52427)

• PR #52427: (garethgreenaway) [2019.2] Support for old yaml render @ 2019-04-12 00:06:37 UTC
  - 6040282 Merge pull request #52427 from garethgreenaway/52350_readd_and_gate_unicode_string_literal_support
  - 82f010a Merge branch '2019.2' into 52350_readd_and_gate_unicode_string_literal_support
  - ae81fee Merge branch '2019.2' into 52350_readd_and_gate_unicode_string_literal_support
  - b618d44 Merge branch '2019.2' into 52350_readd_and_gate_unicode_string_literal_support
- b191bc0 Merge branch '2019.2' into 52350_readd_and_gate_unicode_string_literal_support
- 38a9818 Merge branch '2019.2' into 52350_readd_and_gate_unicode_string_literal_support
- 2767984 Removing logging entry
- 71cd303 Adding missing yamlloader_old.py
- f848aa4 Adding support back in with, a gated configuration option, for the old YAML Loader.

• Issue #51865: (magenbrot) salt.match.search_by resulting in 'None' since 2019.2 (refs: #52234)

• PR #52234: (garethgreenaway) [2019.2] Fixes to matchers when used in pillar @ 2019-04-12 00:05:48 UTC
  - 05ba7c5 Merge pull request #52234 from garethgreenaway/51865_match_search_by_master
  - 1760245 Merge branch '2019.2' into 51865_match_search_by_master
  - d50f011 Merge branch '2019.2' into 51865_match_search_by_master
  - b0cb60 Merge branch '2019.2' into 51865_match_search_by_master
  - 799a08b Merge branch '2019.2' into 51865_match_search_by_master
  - 21891d6 Merge branch '2019.2' into 51865_match_search_by_master
  - a2173d7 Fixing a typo where attempting to get a list from __opts__ instead of an individual item
  - 6a5b5b2 swapping out if...else approach for __opts__.get approach.
  - aa2c626 With the change/addition of the matcher subsystem in 2019.2, the match.search_by when used in pillar broke when targeting the minion that was also the salt master. This was caused by the id in __opts__ being used in all cases. This change updates the glob_match function to use the preserved minion_id of the master if it is available so that targeting works as expected.

• PR #52160: (cbosdo) Virt whitespace fix @ 2019-04-12 00:04:25 UTC
  - 80d7aea Merge pull request #52160 from cbosdo/virt-whitespace-fix
  - fd1f539 Merge branch '2019.2' into virt-whitespace-fix
  - b297e7d virt: handle whitespaces in VM names

• Issue #51832: (nocturo) pillar include stopped working (refs: #52008)

• PR #52008: (waynew) Allow / in pillar includes @ 2019-04-12 00:02:40 UTC
  - b551bbd Merge pull request #52008 from waynew/51832-re-allow-slash-includes
  - ee3115f Allow leading dots and / as pillar separators
  - 29c676d Ensure _closing exists
  - eb517e1 Swap '/' for 'i:' when matching

• Issue #51821: (OrangeDog) 'comment' is an invalid keyword argument for 'test.fail_without_changes' (refs: #51937)

• PR #51937: (garethgreenaway) [2019.2] Fix to test state functions to allow arguments that mod_watch uses @ 2019-04-11 23:57:44 UTC
  - d3159cb Merge pull request #51937 from garethgreenaway/51821_ensure_result_comment_changes_valid_arguments
  - 86c63b5 Merge branch '2019.2' into 51821_ensure_result_comment_changes_valid_arguments
  - 0966d61 Merge branch '2019.2' into 51821_ensure_result_comment_changes_valid_arguments
  - 5527df1 Ensure the comment, changes, and result are valid arguments for various test state functions as they are valid arguments for mod_watch.
• ISSUE #51818: (syphernl) salt.nacl.dec: expected str, bytearray, or unicode (refs: #51913)

**ISSUE #21927:** (jfindlay) network.traceroute intermittently stacktraces (refs: #52370)

**PR #52370:** (jfindlay) Fix network.traceroute exec module function @ 2019-04-03 16:39:20 UTC
  - c1063cf Merge pull request #52370 from jfindlay/traceroute
  - 2f49231 modules.network: update unit test
  - 5b64fc0 modules.network: log and skip problematic traceroute lines
  - e33f5c1 modules.network: standardize util check

**PR #52397:** (garethgreenaway) [2019.2] Merge forward from 2018.3 to 2019.2 @ 2019-04-02 22:12:45 UTC
  - 3675f1e Merge pull request #52397 from garethgreenaway/merge-2019.2
  - 28e76b1 Merge branch '2018.3' into merge-2019.2
  - 28f947e Merge pull request #52213 from garethgreenaway/beacon_state_dont_save_test_true
    - 7f83b4b Swapping out if state looking for test in opts for a __opts__.get
    - e1cf599 Merge branch '2018.3' into beacon_state_dont_save_test_true
    - b751122 Merge branch '2018.3' into beacon_state_dont_save_test_true
    - a901ec4 Don't save beacons when test=True
  - 10d041b Merge pull request #52344 from twangboy/os_release_embedded
    - 74ab4d3 Use old way to get osrelease if new way fails
  - e88d3ba Merge pull request #52345 from garethgreenaway/52197_incron_cannot_have_comments
    - 070837a Merge branch '2018.3' into 52197_incron_cannot_have_comments
    - 8461608 Updating the incron module, state module and tests to remove use of comments.
      - 855f31a Remove un-used file
      - affd9b8 Fix setup/teardown methods
      - 215bf93 Refresh after modifying tmp pillars
      - 95c3aba Add config for listener
      - 5d231f4 remove unused import
      - 8c1b1db Use tmp pillar for signing policies

- 7f83b4b Swapping out if state looking for test in opts for a __opts__.get
- e1cf599 Merge branch '2018.3' into beacon_state_dont_save_test_true
- b751122 Merge branch '2018.3' into beacon_state_dont_save_test_true
- a901ec4 Don't save beacons when test=True
- 10d041b Merge pull request #52344 from twangboy/os_release_embedded
  - 74ab4d3 Use old way to get osrelease if new way fails
- e88d3ba Merge pull request #52345 from garethgreenaway/52197_incron_cannot_have_comments
  - 070837a Merge branch '2018.3' into 52197_incron_cannot_have_comments
  - 8461608 Updating the incron module, state module and tests to remove use of comments.
    - 855f31a Remove un-used file
    - affd9b8 Fix setup/teardown methods
    - 215bf93 Refresh after modifying tmp pillars
    - 95c3aba Add config for listener
    - 5d231f4 remove unused import
    - 8c1b1db Use tmp pillar for signing policies
- a0e2458 fix unused import
- 7f5f7dd Fix requisite path
- 5630498 Fix signing policies path
- 0bd0826 Fix issue #51869 and add cert signing test

- PR #52347: (Ch3LL) [2019.2] Merge forward from 2018.3 to 2019.2 @ 2019-03-28 16:41:53 UTC
  - 27e6cbf Merge pull request #52347 from Ch3LL/merge-2019.2
  - 63962b5 Merge branch '2018.3' into '2019.2'
  - bda3ca2 Merge pull request #51749 from terminal-labs/salt-cloud-map-alt-update
    * 9ca0f72 Changed where to mention the map files compatibility for minion configuration options.
      This is a result of @Ch3LL suggestion on the PR itself for this doc change.
    * 364ef06 Added mention of map file alternative for minion configuration options.
  - a743fff Merge pull request #52113 from twangboy/fix_lgpo
    * bb4a704 Merge branch '2018.3' into fix_lgpo
    * 7186405 Merge branch '2018.3' into fix_lgpo
    * 7656331 Change default language from 1033 to en_US
  - 7040643 Merge pull request #52172 from garethgreenaway/51959_fix_acl_present_output
    * 8fe53890 Merge branch '2018.3' into 51959_fix_acl_present_output
    * 0bdde94 Merge branch '2018.3' into 51959_fix_acl_present_output
    * c5337e1 Merge branch '2018.3' into 51959_fix_acl_present_output
    * 889660f Fixing lint.
    * bfd669 Updating the reverse octal lookup dictionary. Updating tests.
    * 24e907b Adding additional permissions to the lookup.
    * 4b99afa Fixing the output when there are changes for the ACL state so the permissions are shown
      and not the octal number.
  - 45d6cad Merge pull request #52283 from dmurphy18/fix_cpe_name_amzn2
    * cbe5f7d Update to allow for malformed CPE_NAME from some OS's
  - 14a6b9d Merge pull request #52306 from terminal-labs/replace-ping-with-version
    * c04ba62 Changed a text artifact from the ping function to supporting text for the version function.
    * 0b1eb00 Replaced test.ping with test.version Result of issue #52277
  - 7b2b521 Merge pull request #51963 from DSRCorporation/bugs/49147_ipc_subscriber
    * 37aeb3a Minor: Fix typo in docstring
    * cc46e9c Merge branch '2018.3' into bugs/49147_ipc_subscriber
    * 23733bd Regression test for parallel IPCMessageSubscriber support
    * 2bc2a7d Merge branch '2018.3' into bugs/49147_ipc_subscriber
    * 684bf58 Update doc conf with the new import tornado.queues
    * 008cf49 Merge branch '2018.3' into bugs/49147_ipc_subscriber
    * 01e9a3d Merge branch '2018.3' into bugs/49147_ipc_subscriber
* 710ab50 Support parallel work of multiple IPCMessageSubscribers in one process

  - 87bb513 Fix failing symlink test (#52145)
  - 8255901 document `regex_replace` Jinja filter (#52326)
  - 3211397 Merge pull request #52310 from garethgreenaway/merge-2018.3

* 9324b83 Merge branch '2018.3' into merge-2018.3

* 71e9b66 Merge pull request #52312 from terminal-labs/zone-clarification

  - ae0e18f Merge branch '2018.3' into zone-clarification

  * e8c8dba Added in an explanation of the --zone flag approved in #52251

    - 4908ed3 Merge branch '2017.7' into merge-2018.3

    * b6a0161 Merge remote-tracking branch 'upstream/2017.7.9' into 2017.7

    * 1f99e28 Let’s not include raet by default

    * 4306779 Merge branch '2017.7.9' into 2017.7

    * 36ed50d Lock to unittest-xml-reporting 2.2.1

    * 3e6cb79 Merge branch '2017.7.9' into 2017.7

    * 57348ca Add static requirements for Arch linux

    * cc6fb46 Additionally ignore files in nox virtualenvs and CI artifacts directories

    * b7c55e Previously have setuptools-git installed if ioflo is to be installed

    * 973e1ca Merge remote-tracking branch 'upstream/2017.7.9' into 2017.7

    * 981335a Revert "Avoid a traceback on tornado.testing test classes"

    * f48ba6a Merge remote-tracking branch 'upstream/2017.7.9' into 2017.7

    * b039ccc Windows now has a static requirements file and no longer needs hacks

    * a86a2b Merge pull request #52226 from dwoz/jenkins_build

    * 8c0f46b Use windows state to bootstrap windows builds

    * 7263956 Lock coverage and xml-unitest-reporting versions

    * dce4f4f Avoid a traceback on tornado.testing test classes

* PR #52314: (twangboy) Add the ability to pass a timeout to beacons @ 2019-03-27 19:11:13 UTC

  - d3f4e9d Merge pull request #52314 from twangboy/fix_beacon_tests

  - a5fa99a Add missing **kwargs

  - 7e88d04 Add the ability to pass a timeout to beacons

* PR #52311: (garethgreenaway) [2019.2] Merge forward from 2018.3 to 2019.2 @ 2019-03-26 18:31:32 UTC

  - bad4e47 Merge pull request #52311 from garethgreenaway/merge-2019.2

  - 11d485 Merge branch '2018.3' into merge-2019.2

  - 582d306 Merge pull request #52307 from Akm0d/doc_fix

    * 4da0fd6 Fix x509 inconsistent file name in state example

  - 2c9f8e8 Merge pull request #52276 from terminal-labs/replace-github-dead-link

    * a2fbb60 Merge branch '2018.3' into replace-github-dead-link
- 8fa0e51 Merge pull request #52290 from Akm0d/doc_fix
  - ca00e4b Merge branch '2018.3' of github.com:saltstack/salt into doc_fix
  - 8e1ec15 Add missing master/minion docs for log_rotate
    - 08728cf Merge branch '2018.3' into replace-github-dead-link
- d2f84f Merge pull request #51724 from clinta/dockerc-create-with-ip
  - c933663 Merge branch '2018.3' into docker-create-with-ip
- 838a7aa Merge pull request #51753 from terminal-labs/docs-sphinx-ref-deadlink-fix
  - f2b6abd Merge branch '2018.3' into docs-sphinx-ref-deadlink-fix
  - 9857f53 Merge branch '2018.3' into docs-sphinx-ref-deadlink-fix
  - 8a11d27 Merge branch '2018.3' into docs-sphinx-ref-deadlink-fix
  - 842ec84 Merge branch '2018.3' into docs-sphinx-ref-deadlink-fix
  - 9275207 Merge branch '2017.7' into docs-sphinx-ref-deadlink-fix
  - 2330c2a makefile had an old sphinx-doc link, updated to new general front page of sphinx docs.
  - 8d70e3b Replaced all bad sphinx links with ones from the new sphinx doc site.
  - ebdf7c0d replaced two python sphinx deadlinks with sphinx new relevant documentation pages.
    - a4e3e34 Merge branch '2018.3' into docker-create-with-ip
- efb9ec0 Merge pull request #52215 from garethgreenaway/bp-52212
  - 65857ef Merge branch '2018.3' into bp-52212
  - a96bf24 Back-port PR #52212 to 2018.3
    - c6e553c add networking_config to container_create for custom network_mode
    - 5c99dbd add test to expose ip not added to custom network #51723
- 679c4b2 Merge pull request #52269 from garethgreenaway/merge-2018.3
  - ee58560 Merge branch '2018.3' into merge-2018.3
- 418e543 Merge pull request #52261 from dwoz/update_kitchen
  - a87c6e6a Use windows state to bootstrap windows builds
  - 1aa1bd8 Merge branch '2017.7' into merge-2018.3
  - 2962e94 Lock coverage and xml-unittest-reporting versions
  - 595303b Merge remote-tracking branch 'upstream/2017.7.9' into 2017.7
    - 55e150c Proper setup and teardown
    - b9b6009 Don't run distro on windows
    - 3cb5c82 Merge pull request #52208 from s0undt3ch/2017.7.9
    - b14dbca Merge branch '2017.7.9' into 2017.7
      - 6a789a1 Update static requirements
      - cee9480 Lock PyYAML to < 5.1
      - a4f241d The kitchen nox verifier already takes care of the single -v flag.
      - 0cb641e Fix static requirements search bad logic
- 45a3e4a *distro* reports Opensuse 15 as Opensuse Leap 15
- de7bb24 Ubuntu 18.04 locked requirements files
- bc08ec3c Ubuntu 16.04 locked requirements files
- 0d353d2 Ubuntu 14.04 locked requirements files
- 1186122 Opensuse 42 locked requirements files
- fa6888b Opensuse 15 locked requirements files
- b6578b8 Fedora 29 locked requirements files
- 777dbb0 Fedora 28 locked requirements files
- 4388fa9 Debian 9 locked requirements files
- 2f9030f Debian 8 locked requirements files
- 1b18ec5 CentOS 7 locked requirements files
- 6e9f0c0 CentOS 6 locked requirements files
- 7415846 Start handling static(and platform specific) requirements files
- ea4d370 Allow overriding some requirements based on distro information
- 17017a1 Merge pull request #51361 from olipovch/cloud-sync-after-install
- 8fde3a0 Merge branch '2017.7' into cloud-sync-after-install
- ab00151 Fix salt-cloud sync_after_install functionality
  * ff54f53 The kitchen nox verifier already takes care of the single `-v` flag.
  * a2aa708 Fix static requirements search bad logic
  * 621b047 *distro* reports Opensuse 15 as Opensuse Leap 15
  * bc00a26 Ubuntu 18.04 locked requirements files
  * d5ed9e1 Ubuntu 16.04 locked requirements files
  * 03879bf Ubuntu 14.04 locked requirements files
  * c3d7a18 Opensuse 42 locked requirements files
  * b29d986 Opensuse 15 locked requirements files
  * 73154d0 Fedora 29 locked requirements files
  * bf36cd4 Fedora 28 locked requirements files
  * 52cc5bb Debian 9 locked requirements files
  * cb4a823 Debian 8 locked requirements files
  * 2128a79 CentOS 7 locked requirements files
  * 4a29e93 CentOS 6 locked requirements files
  * 0d96e64 Start handling static(and platform specific) requirements files
  - 0fc82bd Merge pull request #52193 from Ch3LL/bp-47005
    * 1a54fd1 Merge branch '2018.3' into bp-47005
  - 0f3cd2a Merge pull request #52194 from Ch3LL/bp-52149
    * bff3f3c Merge branch '2018.3' into bp-52149
• 7e459a1 example names parameter in file.managed state
  • 6f8caa6 Merge branch '2018.3' into bp-47005
• 85be178 Merge pull request #52201 from max-arnold/rename-beacon-validate
  • e1e9a2b Merge branch '2018.3' into rename-beacon-validate
• 0383ac3 Merge pull request #52189 from Ch3LL/merge-2018.3
  • 9972980 Merge branch '2018.3' into merge-2018.3
  • 79962ab Merge branch '2017.7' into '2018.3'
  • fd6068e Allow overriding some requirements based on distro information
  • 659ec11 Merge remote-tracking branch 'upstream/2017.7.9' into 2017.7
  • 18bbbec We need to nest require req_win.txt
  • 956a84c Merge pull request #51995 from s0undt3ch/2017.7
  • 0bf9d62 Merge remote-tracking branch 'upstream/2017.7.9' into 2017.7
  • baf776b Merge pull request #51974 from s0undt3ch/features/nox-2017.7
  • ee4df3a Lint fixes
  • 56f841f Windows needs special treatment
  • c3cb447 Requirements fixes
  • 6a67531 We need a fixed winrm-fs so that dotfiles are also included
  • 15c6a53 use kitchen-salt from my fork for now
  • b745332 Merge pull request #51800 from dwoz/typo_fix
  • 5bbe5e0 Fix up docstring
  • 9f3c583 Fix typo in docstring
  • 75acce1 Rename obsolete beacon validation function
  • d1700f3 Merge branch '2018.3' into bp-47005
• 03f228d Merge pull request #52112 from Ch3LL/proxy_gs
  • 7ad4758 Update device names in proxy getting started docs
    • 25ae7c8 remove freebsd-upstream reference
    • b70c45c Remove salt FreeBSD repo which is now 2 years out of date
    • 62e5404 github issue tracker link and sends you to the url for listed issues.
    • ccf6a06 Replaced a dead link for github issue tracker with another github link for the issue tracker and added a link to show more options for closing issues in commit messages.

• PR #52190: (Ch3LL) [2019.2] Merge forward from 2018.3 to 2019.2 @ 2019-03-23 01:09:33 UTC

  - 58ef51d Merge branch '2018.3' into 51673_multiple_file_sections_with_excludes
  - 8c44b8d Merge branch '2018.3' into 51673_multiple_file_sections_with_excludes
  - b55a894 Fixing some code that was not working correctly with Python 3.
  - 63da8be Fixing a bug that caused excludes to not work as expected when multiple file options were in place, the excludes of the last file section were being used over any previous ones. Including a test to ensure excludes work as expected when multiple file sections are in place.

* 1bf3fc8 Merge pull request #51867 from Oloremo/mysql-module-fix-for-python3
  - dfcfebd Merge branch '2018.3' into mysql-module-fix-for-python3
  - b6d217c Merge branch '2018.3' into mysql-module-fix-for-python3
  - 9745b0a Fixed typo
  - 8149e9e Merge branch '2018.3' into mysql-module-fix-for-python3
  - 58d8a2e Merge branch '2018.3' into mysql-module-fix-for-python3
  - f964962 Added handling of empty server_version
  - 58791e9 Decode mysql_version for python3 compatibility

* 7f05abf Merge pull request #51908 from garethgreenaway/51862_icinga_fixes
  - 233dbaf Adding __salt__ to utils/icinga so cmd.run_all is available.
  - 1e7490c update kubernetesmod in index.rst
  - 1f3be1c fix import in test
8572c17 rename kubernetes module to kubernetesmod

- **PR #52032:** (Ch3LL) Add azure state and execution modules to doc index @ 2019-03-11 15:46:49 UTC
  - 7d6b53c Merge pull request #52032 from Ch3LL/fix_azure_docs
  - 8a8a5fa Add azure module ref pages and fix doc errors
  - 6a1d06a fix additional azure state module doc errors
  - 65d8f27 Update doc failures in azure modules
  - 92dbe2a Merge branch '2019.2' into fix_azure_docs

- **PR #52037:** (Ch3LL) Backport #51201 into 2019.2 @ 2019-03-07 19:45:18 UTC
  - **PR #51201:** (terminalmage) Lint: Fix str-format-in-logging, len-as-condition, etc. (2) (refs: #52037)
  - 96935c9 Merge pull request #52037 from Ch3LL/bp-51201
  - 1fb0697 Remove develop modules not needed in 2019.2
  - e3ad2cf Lint: Fix str-format-in-logging, len-as-condition, etc. (2)

- **PR #52034:** (terminalmage) fileclient: Fix traceback when template file cannot be cached @ 2019-03-07 19:41:24 UTC
  - 75398e4 Merge pull request #52034 from terminalmage/fix-get-template
  - 744dfd9 fileclient: Fix traceback when template file cannot be cached

- **PR #51984:** (Ch3LL) [2019.2] Merge forward from 2018.3 to 2019.2 @ 2019-03-07 17:58:42 UTC
  - 7af4f5c Merge pull request #51984 from Ch3LL/merge-2019.2
  - 54ea40a Merge branch '2019.2' into merge-2019.2
  - 227d3f3 Fix linter
  - a168913 Merge branch '2018.3' into '2019.2'
    - c68744a Merge pull request #51975 from s0undt3ch/features/nox-2018.3
      - af4ae91 Lint fixes
      - 33955c9 Windows needs special treatment
      - d4f899f Requirements fixes
      - e550c60 We need a fixed winrm-fs so that dotfiles are also included
      - ada1ef3 use kitchen-salt from my fork for now
    - a689177 Merge pull request #51807 from Ch3LL/2018.3.5_rn
      - 2c0b85c Add 2018.3.5 release notes
    - 6ae2c4 Merge pull request #51806 from twangboy/fix_beacon
      - 2bf6179 Fix some lint
      - 0f38eea Add lowercase test
      - 1459985 Make sure drive letter is uppercase for re compare
      - 7cdc660 Add some tests
      - 48ae8c6 Fix disk.usage beacon on Windows
    - da815ba Merge pull request #51966 from twangboy/use_winapi_com
• a38300b Use winapi.com instead of coinitialize
• 7673c69 Merge pull request #51920 from twangboy/add_zabbix
  • e2d496c Add zabbix to the Windows builds
• 77c2796 Merge pull request #51802 from garethgreenaway/merge-2018.3.4
  • 2e20939 Merge branch '2018.3' into merge-2018.3.4
  • 769f002 Merge branch '2018.3.4' into merge-2018.3.4
  • b53a843 Merge pull request #51713 from dwoz/gemstestagain_2018.3.4
  • f2c6631 Merge branch '2018.3.4' into gemstestagain_2018.3.4
  • 1c82d24 Fix ruby gems tests, again
• 496525d Merge pull request #51930 from Ch3LL/release_docs
  • 9a68136 Update release documentation
• a027c97 Merge pull request #51931 from Ch3LL/bp_51298
  • 873cabe Roll back some changes to _compat.py
  • 1fcb0ff Fix edge case when minion ID is a 16-character string
• 1fa2072 Merge pull request #51892 from twangboy/gate_zfs
  • fbc2c0c Gate zfs grain on Windows
• 89b0991 Merge pull request #51836 from stratusjerry/backport_49039_2018.3

• c1ab63d Merge pull request #51771 from Ch3LL/doc_conf_2018
  • e04f75e [2018.3] change build_type and release in doc/conf.py
  • 3efce5f Update release versions for the 2018.3 branch
• 98f1b03 Merge pull request #51775 from garethgreenaway/merge-2017.7
  • 92ffe03 fixing lint
  • 73b601f Merge branch '2017.7' into merge-2017.7
  • e04f735 Merge pull request #51502 from ogd-software/51501-states-boto3_route53.py-fails-to-validate-ALIAS-A-records
  • e69ce9d Merge branch '2017.7' into 51501-states-boto3_route53.py-fails-to-validate-ALIAS-A-records
  • 5093406 Implement PEP8 E711 styling fix
  • 7640e90 Ensure boto3_route53 correctly validates existing ALIAS records
  • ff63b30 Ensure boto3_route53 survives attempts to validate ALIAS records
  • 9e128aa Merge pull request #51732 from s0undt3ch/features/nox-2017.7
  • 328989d Add initial nox configuration. Tell tox'ers to use nox'.
  • 99cle48d Merge pull request #51712 from dwoz/gemstestagain
  • 0d3b227 Fix ruby gems tests, again
  • 18452c4 Merge pull request #51528 from twangboy/backport_51471
  • 8c79f02 Merge branch '2017.7' into backport_51471
· 20a7ee5 Backport 51471
· ee80ce3 Merge pull request #51655 from garethgreen-away/49661_starting_salt_master_openssl
· f647b95 Merge branch '2017.7' into 49661_starting_salt_master_openssl
· 1831e64 Removing options from libcrypto.OPENSSL_init_crypto so it will simply use the defaults.
· 8d0f801 removing salt.crypt from payload.py which is not used and causing salt-key to break.
· a5a54c4 Removing unused import which is causing salt-master to not start when using openssl 1.1.1-1.
· c9c082c Fix azurearm field list doc error
· af0537f Add azure state and execution modules to doc index

PR #52004: (chdamianos) Fixed comparison of None with constants (refs: #52030) @ 2019-03-06 17:41:52 UTC
  - 01bcff0 Merge pull request #52004 from chdamianos/fixed-constants-comparison
  - 6fd60af Fixed comparison of None with constants

PR #51981: (bryceml) Fix typo in 2019.2.0 release notes @ 2019-03-05 23:59:33 UTC
  - 8d6bb5d Merge pull request #51981 from bryceml/2019.2
  - ecf0ef0 Fix typo in 2019.2.0 release notes
    * a65e621 Adding an additional note warning that the file will not be changed because test=True, but could be changed by other states.
    * 6c0dcf2 Swapping pchanges for changes in file state.

ISSUE #51825: (OrangeDog) schedule.disable doesn't work in 2019.2.0 (refs: #51855)

PR #51855: (garethgreenaway) [2019.2] Global enable/disable was being ignored @ 2019-03-05 19:40:34 UTC
  - c3105df Merge pull request #51855 from garethgreenaway/51825_scheduled_global_enabled
  - 301e773 Merge branch '51825_scheduled_global_enabled' of github.com:garethgreenaway/salt into 51825_scheduled_global_enabled
    * ae7ab06 Merge branch '2019.2' into 51825_scheduled_global_enabled
    * ff13833 Merge branch '2019.2' into 51825_scheduled_global_enabled
  - 9e7e4ed Fixing broken add_job test.
  - 72466a5 Global enable/disable was being ignored

ISSUE #51745: (fayak) Systemd update 241 on archlinux breaks systemd.py version() function (refs: #51946)

PR #51946: (Ethyling) Fix retrieve systemd version using regex @ 2019-03-05 19:20:19 UTC
  - be28623 Merge pull request #51946 from Ethyling/fixed-systemd-version
  - b557707 Add test for systemd version from git describe
  - 94809d0 Fix retrieve systemd version using regex

ISSUE #51816: (jkrauz) pillar_ldap broken in 2019.2.0 (refs: #51964)

PR #51964: (dwoz) [2019.2] Make sure ldap attrs are string types on python 2 @ 2019-03-05 19:18:30 UTC
  - c310022 Merge pull request #51964 from dwoz/issue_51816
- a879140 Merge branch '2019.2' into issue_51816
- 0e61cf3 Fix linter errors/warnings
- 171217a Revert debug logging
- 8c641c6 make LDAP attr defaults string types on py2

- **PR #51976**: (s0undt3ch) [2019.2] Nox fixes @ 2019-03-05 18:56:49 UTC
  - cb817f1 Merge pull request #51976 from s0undt3ch/features/nux-2019.2
  - 0b4e68c Lint fixes
  - 257b3fc Windows needs special treatment
  - b298da0 Requirements fixes
  - 4f45a7e We need a fixed winrm-fs so that dotfiles are also included
  - fa70af2 use kitchen-salt from my fork for now

- **PR #51761**: (sdodsley) Add new module to release notes for 2019.2.0 @ 2019-03-05 09:44:56 UTC
  - PR #51681: (sdodsley) Add new module to release notes for 2019.2.0 (refs: #51761)
  - f867e6e Merge pull request #51761 from sdodsley/cheery_pick_fb_releasenotes
  - 80192c8 Add new module to release notes for 2019.2.0

- **PR #51799**: (s0undt3ch) Catch attribute error @ 2019-03-05 09:38:08 UTC
  - 08e3956 Merge pull request #51799 from s0undt3ch/2019.2
  - 342244a Merge branch '2019.2' into 2019.2
  - 3e8a17e Catch attribute error

- **PR #51810**: (Ch3LL) Add 2019.2.1 release notes @ 2019-03-05 09:26:47 UTC
  - ff5d7d6 Merge pull request #51810 from Ch3LL/2019.2.1_rn
  - aae5fa Add 2019.2.1 release notes

- **ISSUE #51824**: (OrangeDog) schedule.present state not idempotent in 2019.2.0 (refs: #51849)

- **PR #51849**: (garethgreenaway) [2019.2] Fix to schedule.list function to filter out attributes that are None @ 2019-03-01 19:56:17 UTC
  - PR #51647: (dwoz) [develop] increase batch test timeout on windows (refs: #51849)
  - 3732004 Merge pull request #51849 from garethgreenaway/51824_splay_breaking_schedule_present
  - a0af441 Merge branch '2019.2' into 51824_splay_breaking_schedule_present

- **PR #51878**: (Ch3LL) Add new terraform salt-ssh roster feature to release notes @ 2019-02-27 19:18:49 UTC
  - 3f6b564 Merge pull request #51878 from Ch3LL/terraform_rn
  - 502d197 fix spelling error in release notes
  - 4d53b41 Add new terraform salt-ssh roster feature to release notes

- **PR #51837**: (stratusjerry) Update win_pkg.py @ 2019-02-26 16:51:35 UTC
  - PR #49039: (stratusjerry) Update win_pkg.py (refs: #51836, #51837)
  - e63c872 Merge pull request #51837 from stratusjerry/backport_49039_2019.2
  - 531b23d Update win_pkg.py
- 39b5645 Splay defaulting to None internally, broke schedule.present causing it to always report differ-
ences when a state is run. Updating the schedule.list function to check if an attribute is None and remove
it.

- **PR #51772: (Ch3LL)** Update release versions for the 2019.2 branch @ 2019-02-25 14:16:40 UTC
  - 27dd9fb Merge pull request #51772 from Ch3LL/doc_conf_2019
  - f28ec9b [2019.2] change build_type and release in doc/conf.py
  - 4e670e2 Update release versions for the 2019.2 branch

  - 4542a4 Merge pull request #51776 from garethgreenaway/merge-2018.3
  - 186306a reverting change in release notes, adding change to doc/ref/modules/all/index.rst.
  - 1ef140a Fixing lint.
  - 6173578 Fixing lint errors
  - 38dcab9 fixing lint
  - e37fc20 Merge branch '2018.3' into merge-2018.3
  - 7e3e71c Merge pull request #51756 from twangboy/fix_case_sensitive
    - 4c55040 Fix failing py3 tests
    - 64f45f8 Make recurse and directory case sensitive
  - e75fc1c Merge pull request #51747 from ymasson/fix_mysql_grants
    - 61b4390 fix modulenames from virtualnames tests
  - b1f7e85 Merge pull request #51387 from chrillux/make-binarydata-output-possible
    - 010393e Make binary data output possible
  - 3475813 Merge pull request #51694 from assafShapira/2018.3
    - 895b97a Merge branch '2018.3' into 2018.3
    - bc2d27a fix minion bootstrapping issue "/usr/lib/python2.7/site-packages/salt/utils/cloud.py", line
      472 Configuration value u'provider' needs to be set
  - c7136cb Merge pull request #51738 from garethgreenaway/nftables_cleanup
    - 8201d1e Fixing lint.
    - d681064 Merge branch '2018.3' into nftables_cleanup
    - e37458e Fixing a couple tests.
    - 81b25c3 Additional cleanup. Adding additional documentation for state module.
    - dc4afbb More updates to nftables module, state modules, and unit tests.
    - 3ec96e3 initial work to cleanup the nftables module, state module, and the unit tests.
  - 2121049 Merge pull request #51733 from s0undt3ch/features/nox-2018.3
    - 97532c2 Add initial nox configuration. Tell tox'ers to use nox'.
  - f4adf33 Merge pull request #51728 from gtmanfred/virtualnames
    - 61b4390 fix modulenames from virtualnames tests
  - d681fb9 Merge pull request #51721 from dwoz/solarisipstests
* **3263d31** Merge remote-tracking branch 'saltstack/2018.3' into solarisipstests

  - PR #51383: (sjorge) imgadm module should deal with invalid images better (refs: #51679)
  - 2036c8a Merge pull request #51679 from Ch3LL/bp-51383
  - e4971fc imgadm module should deal with invalid images better
  - 58f2405 Merge branch '2019.2.0.rc1' into 2019.2
    - 6292f86 Revert "Remove custom grains module from 2018.3 branch"
    - 92bd6b9 Fix salt.utils.is_windows call
    - ffa2f5f Merge branch '2018.3' into '2019.2'
    - a8898f6 Merge pull request #51635 from lomeroe/lgpo_boolean_element_fix
      - b97c2b2 Merge branch '2018.3' into lgpo_boolean_element_fix
      - 5a98fb9 Merge branch '2018.3' into lgpo_boolean_element_fix
    - abd3760 Merge pull request #51610 from garethgreenaway/51266_schedule_enable_disable_break_save
      - fbac35 Merge branch '2018.3' into 51266_schedule_enable_disable_break_save
    - 6765eea Merge pull request #51649 from dwoz/increase_wait_2018.3
      - 9c964ef Merge branch '2018.3' into increase_wait_2018.3
    - 852a6be Merge pull request #51644 from dwoz/batch_exit_2018.3
      - 1087d10 increase batch test timeout on windows
      - 918030e Increase minion wait for slow boxes
      - 3d52b26 Merge branch '2018.3' into 51266_schedule_enable_disable_break_save
    - dadf414 Merge pull request #51637 from twangboy/backport_50887_2018.3
      - d8d2b86 backport #50887
    - a55e8f6 Merge pull request #51626 from twangboy/fix_lgpo_2018.3
      - b2c9c3b Use makedirs instead of mkdir
5050 Chapter 32. Release notes

- 2be2f4 Merge branch '2018.3' into 51266_schedule_enable_disable_break_save
- 0f1a41 Merge pull request #51187 from menglong81/fix-broken-thing
  - 298ad5 Merge branch '2018.3' into fix-broken-thing
  - d879d18 fix broken network.py
  - 76770f ss command replace to netstat command
  - 24170e ss command replace to netstat command
  - deeeef Merge branch '2018.3' into 51266_schedule_enable_disable_break_save
- 7ed518 Merge pull request #51613 from twangboy/fix_51566
  - 1206a9 Merge branch '2018.3' into fix_51566
- 8b06d0 Merge pull request #51630 from twangboy/add_tests_51534
  - ddc017 Merge branch '2018.3' into add_tests_51534
- c4bbe1 Merge pull request #51177 from nullify005/51069-ri-and-rdoc-removed
  - 6b1a20 Merge branch '2018.3' into 51069-ri-and-rdoc-removed
  - f33960 Merge branch '2018.3' into 51069-ri-and-rdoc-removed
  - e58637 Merge branch '2018.3' into 51069-ri-and-rdoc-removed
  - 13d328 Fix lint issues
  - 5de5e6 Update tests
  - 22eda1 Fix lint violations
  - 266252 Support rubygems 3 cli param changes
  - 9e3a01 Use existing file instead of tzutil
  - 30c183 Use tempfile to get temp dir
  - e3d3e5 Add tests for issue 51309
  - 116814 Add test for explicit lists
  - 84fd63 Merge branch '2018.3' into fix_51566
  - 7376cb Handle explicit lists properly
  - 28fc07 Merge branch '2018.3' into 51266_schedule_enable_disable_break_save
  - 076013 Adding integration.scheduler.test_helpers to various files to by pass the
test_module_name_source_match check.
  - 1552f Merge lint cleanup
  - 086006b Adding a test to ensure _get_schedule which is used by the save functionality works
when there is an enabled attribute.
  - 1c64f When looping through the schedule to remove hidden attributes, we should only
do that if the item in question is a dictionary. It could be the attribute that determines if the
entire schedule is enabled or disable.
  - 5ed8eb Properly create the value for a "True" boolean element item
- f1e29c Merge pull request #51548 from s0undt3ch/2018.3
  - 611065 Merge branch '2018.3' into 2018.3
* 00a6246 Merge pull request #51622 from brejoc/2018.3-empty-job-workaround
  - d263410 Prevents crash when there is no job entry
  - 5342305 Allow NOT to install pip dependencies
* fdb13a3 Merge pull request #51523 from lomeroe/solarisips_fixes
  - e8e91e3 Merge branch '2018.3' into solarisips_fixes
  - b7bfe17 lint fixes
  - cdaccf4 add tests to validate command being sent to cmd.run_all
  - eaa229d add unit test
  - 432428d Don’t assume that each item in "pkgs" is a dict (as packed by pkg.installed state).
* e3d5fbe Merge pull request #51577 from garethgreenaway/merge-2017.7
  - e060b97 Merge branch '2018.3' into merge-2017.7
  - 3eee038 Fixing a couple issues that did not merge properly.
  - 25b2ca6 Merge branch '2018.3' into merge-2017.7
  - c337fce Merge branch '2018.3' into merge-2017.7
  - f9d6828 Fixing missed merge.
  - a041775 Merge branch '2017.7' into merge-2017.7
  - 61889ba Merge pull request #51452 from terminalmage/bp-50963
  - 54d2e02 Merge branch '2017.7' into bp-50963
  - 0c989f0 Merge pull request #51437 from twangboy/fix_raise_2017.7
  - ecd1637 Merge branch '2017.7' into fix_raise_2017.7
  - f3c9cd4 Add missing raise statement
  - d06526c Allow for kwargs to be used in object initialization
  - 0e760b5 pip states: Use case-insensitive dictionaries for pip.list return
  - 5ca9f82 Add a CaseInsensitiveDict implementation
  - 2aaa9f9 pip.installed: Fix traceback when _find_key doesn’t return a match
  - 67b7d28 Merge pull request #51370 from dwoz/setup_py_req_fix
  - e1e06a0 Fix python 3 path for shell test cases
  - 09cd5fc Merge branch '2017.7' into setup_py_req_fix
  - 0de189d Handle pipenv like version restrictions
  - e9b3d94 Merge pull request #51367 from dwoz/cloud_config_2017
  - 3f4c5a3e Merge branch 'cloud_config_2017' of github.com:dwoz/salt into cloud_config_2017
  - 8bb8d41a Merge branch '2017.7' into cloud_config_2017
  - 7bb4c6b Fix python 3 path for shell test cases
  - a2bb6fd Fix linter issues
  - 004d9b8 Cloud provider and profile configs are merged
  - 3a21afa Coverage on windows chokes with the tox env var COVERAGE_PROCESS_START

---

32.2. Previous releases
5052 Chapter 32. Release notes

- 1c62e27 Switch required PyTest dependency
- b80320d Merge pull request #51402 from dwoz/win_test_fix
- 21359e6 Merge branch '2017.7' into win_test_fix
- 1199530 Merge pull request #51397 from dwoz/gemtest
- 43ac36e Use gems.github.com no longer exists, use gemcutter.org
- bac652f Add testing path to run_script commands
- f511ad2 Merge pull request #51227 from astronouth7303/doc-modules-additional-globals
- cbe1e17 Merge branch '2017.7' into doc-modules-additional-globals
- 2a9bf17 Merge pull request #51312 from s0undt3ch/features/tox-runtests
- 3840af8 "Tell" coverage to track subprocesses.
- f67a529 Remove unused imports
- 15ab061 Show objects on assertion failure
- 0281fc5 Don't fail the test because of order
- 9a31be7 Don't call .keys() on dictionaries
- 97ced3a Add pytest-salt-from-filenames to pytest requirements
- 8d2c4d2 Remove duplicate dependency
- 5ec144 Add .coveragerc
- aa108d5 Run tests from tox, whether runtests or pytest
- 80a3826 Update TODO
- 1945c30 Document the client-defined dunders

* 5bb9b32 Merge pull request #51393 from garethgreenaway/various_documentation_fixes
  - 8bb7535 Merge branch '2018.3' into various_documentation_fixes
  - c15406a Merge branch '2018.3' into various_documentation_fixes
  - 33bb4e4 Merge branch '2018.3' into various_documentation_fixes
  - 3582f6e Fixing the underline.
  - a8f42a0 Various documentation fixes.

* 884981f Merge pull request #51465 from ezh/50556
  - a3ee70c fix #50556 state.orchestrate_show_sls

* 231d6e2 Merge pull request #51541 from bdrung/silence-linux_distribution-deprecation-warning
  - c4feea1 Merge branch '2018.3' into silence-linux_distribution-deprecation-warning
  - e1dcb5b Silence linux_distribution deprecation warning

* f87d5ec Merge pull request #51558 from bdrung/test-zypp-plugin
  - c34967d Merge branch '2018.3' into test-zypp-plugin

* edb1093 Merge pull request #51609 from dwoz/wait_minions_2018.3
  - d794ed8 fix linter
  - d6720d2 Wait for minions to be pingable before starting tests
32.2. Previous releases

- 8d79359 Merge pull request #51599 from terminalmage/bp-51510
  - ed194c7 grains: assign os_family Debian to Debian derivative TurnKey Linux
- 24aa083 Merge pull request #51598 from terminalmage/add-grain-option-documentation
  - 4ee9440 Improve ec2 pillar documentation
  - 9c02104 Add link to metadata grain module docs
  - 997ce26 Add documentation for the metadata_server_grains config option
- d89c489 Merge pull request #51491 from terminalmage/issue51268
  - 550e9ab Don't log shell warning if output_loglevel is quiet
  - 7678c28 Do not load zyppnotify file on module import
- c6dfded Merge pull request #51588 from dwoz/script_fix_2018.3
  - cbac390 Use the code directory instead of cwd for python path
- PR #51658: (dwoz) [2019.2] Let memcpy make the null bytes, better py3 support @ 2019-02-15 05:42:37 UTC
  - PR #51586: (garethgreenaway) [2019.2] Merge forward from 2018.3 to 2019.2 (refs: #51658)
  - 1ea6f4b Merge pull request #51658 from dwoz/pip_test_fix
  - c811a70 Let memcpy make the null bytes, better py3 support
- PR #51560: (dwoz) [2019.2] Increase minion wait for slow boxes @ 2019-02-14 16:31:59 UTC
  - 22a04c1 Merge pull request #51650 from dwoz/increase_wait_2019.2
  - ad294f3 Merge branch '2019.2' into increase_wait_2019.2
- PR #51645: (dwoz) [2019.2] increase batch test timeout on windows @ 2019-02-14 16:29:26 UTC
  - a0982f7 Merge pull request #51645 from dwoz/batch_exit_2019.2
  - 1a882d7 Merge branch '2019.2' into batch_exit_2019.2
- PR #51586: (garethgreenaway) [2019.2] Merge forward from 2018.3 to 2019.2 (refs: #51586) @ 2019-02-14 16:25:29 UTC
  - 705a62d Merge pull request #51586 from garethgreenaway/merge-2018.3
  - 09fb3e7 Merge branch '2019.2' into merge-2018.3
  - 95c505a Merge branch '2019.2' into merge-2018.3
  - 4abd9d0 Merge branch '2019.2' into merge-2018.3
  - 6c99cb1 Merge branch '2018.3' into merge-2018.3
  - 41e25a6 Merge pull request #51580 from garethgreenaway/merge-2018.3.4
    - 84e15ce Fixing lint
    - e891b3f Merge branch '2018.3.4' into merge-2018.3.4
    - d0cad3e Merge pull request #51553 from twangboy/update_libsodium
    - 4177f64 Update url to libsodium for mac builds
    - 564a65a Merge pull request #51544 from twangboy/fix_test_ssh_2018.3.4
    - 7771632 Fix ssh on Windows
    - b4299a3 Merge pull request #51532 from frogunder/new_releasenotes
09faf0b Merge branch '2018.3.4' into new_releasenotes

c6bfe53 2018.3.4 releasenotes

c37dbd7 Merge pull request #51534 from twangboy/fix_51309

3ad95bc Convert data to string using salt util

5b41af3 Merge pull request #51530 from garethgreen-away/48204_mysql_module_handle_mariadb_versions

cdf5298 Later versions of MariaDB still support "ALL PRIVILEGES"

d31c902 Updating the mysql module to handle MariDB versions.

f3f345c Merge pull request #51529 from frogunder/releasenotes

fb678ee fix escaped asterisks

6a4f0da 2018.3.4 releasenotes

a37fb7d Merge pull request #51525 from twangboy/backport_51095_2018.3.4

b6acc92 Backport 51095

602ddc8 Merge pull request #51520 from frogunder/man_pages

0ce43f8 Update man pages for 2018.3.4

1f981c6 Merge pull request #51429 from yosnoop/replace-noclass-with-nocl-for-dig

5231e73 Merge branch '2018.3.4' into replace-noclass-with-nocl-for-dig

14e6b7 In case the test machine can't resolve

95e8a2f The +nocl is supported much wider than +noclass

5351e5c Add testing path to run_script commands

2d8a364 Fix linter issues

9b8718a Cloud provider and profile configs are merged

90a8682 Merge pull request #51458 from twangboy/add_py2_warning

05522c0 Merge branch '2018.3.4' into add_py2_warning

b492021 Merge pull request #51460 from twangboy/update_installer_mac_2018.3.4

3c92688 Merge branch '2018.3.4' into update_installer_mac_2018.3.4

892d98c Merge pull request #51471 from twangboy/fix_test_win_dns_client

c9f0b01 Merge branch '2018.3.4' into fix_test_win_dns_client

f47d7a6 Fix improper use of socket authentication in mysql.user_chpass

ed62a2f Fix insecure SQL queries in mysql.user_chpass

33922c9 Fix the failing dns test on Windows
- 48936c2 Merge pull request #51445 from terminalmage/fix-custom-grains-traceback
- 191235d Remove custom grains module from 2018.3 branch
- 72fd1a2 Roll back icon change
- 7dd1704 Add welcome_py2.rtf
- c93e9e3 Add Py2 Warning to installer package
- b658900 Add Py2 Warning for Py2 Installer
- a880e42 Merge pull request #51438 from twangboy/fix_raise_2018.3.4
- 5830fad Add missing raise statement
- 28b898c Merge pull request #51432 from Ch3LL/bp-51324
- bd41ff0 Fixing various bits in x509 module and unit test to ensure tests are passing on python2 & python3
- 01717d2 Merge pull request #51377 from twangboy/fix_auditpol_2018.3.4
- 19e5181 Fix issue when directory doesn't exist
- 43a9d2f Merge pull request #51338 from Ch3LL/bp-51207
- 345ae67 Backport PR# 50771 to 2018.3 branch
- 3dcd11d Merge pull request #51337 from Ch3LL/bp-51170
- 4e85505 Merge branch '2018.3.4' into bp-51170
- 7656aa5 Merge pull request #51340 from Ch3LL/bp-51252
- e74a6c6 Fix py3 managed.file test failure
- 6f2c7cf Remoe un-needed log statement
- 824950c Fix 50221 regression test on Windows
- 1840af9 preserve newlines from pillar data for file.managed
- e90ca1d Merge pull request #51290 from s0undt3ch/hotfix/fix-network
- da3aace Merge branch '2018.3.4' into hotfix/fix-network
- 04f16b8 Fix tests. We no longer get ipaddress instances back.
- c3fa82a Fix minion start issue
- c893dc4 Fix saltmod roster test
- b6185af Roster defines the roster system not a file
- 484bab4 Fix linter
- 5e2db2f Honor roster file for ssh orchestrations
- c8db7e3 Merge pull request #51317 from terminalmage/fix-pr-50417
- 4be2891 Merge branch '2018.3.4' into fix-pr-50417
- e246db Merge pull request #51311 from twangboy/fix_test_file.test_managed
- f4177e0 Remove mode parameter on Windows
- 4c4ded3 Fix regression in dynamic pillarenv
- 40b20126 Merge pull request #51292 from Ch3LL/bp-51226
Salt Documentation, Release 3006.4

- aba114e Merge branch '2018.3.4' into bp-51226
- fc0bec5 Merge pull request #51295 from Ch3LL/bp-51279
- 5c4a7a4 Merge branch '2018.3.4' into bp-51279
- dacd1ea Merge pull request #51293 from Ch3LL/bp-51233-2
- a155fd7 Accounting for when permissions are not returned from file.check_perms, eg. windows systems.
- 53ba068 When test=True and there are permissions changes, report it.
- d2eba77 Remove network.py patch
- d431c71 Add __context__ support
- de6c13d Handle spaces in fstab opts, similar fix to #39593
- 1abffb2 Merge pull request #51278 from dwoz/issue51248
- c614198 Use pillar roots validation method
- 0d2b0c6 Fix linter warnings
- 5b98895 Fix wart in pillar_roots validation
- f7d50b1 Merge pull request #50784 from sathieu/dynamic_file_roots
  - 7ca2aa4 Allow dynamic file_roots
- 5e840a5 Merge pull request #51527 from garethgreenaway/bp-51475
  - 801abf2 Fix Elasticsearch retuner
- 1f6da6a Merge pull request #50921 from terminalmage/issue49894
  - a35c023 Don’t use a decorator that assumes /etc/apt/sources.list.d exists
  - 6a62e79 Add integration test for architecture support
  - 67ae5a5 Add support for architectures for APT pkgrepo.managed states
- 3f17776 Actually, remove python-ldap. It needs system deps. Have salt-jenkins do it.
- afcb6bd Fix the ldap package name in requirements/tests.txt
- 588cb87 Merge pull request #51454 from terminalmage/fix-deprecation-warning
  - 529cc0 Fix deprecation warning in nested outputter
- 13de0b8 Merge pull request #50963 from terminalmage/issue50942
  - c84be3f Allow for kwargs to be used in object initialization
  - 2bf93fd pip states: Use case-insensitive dictionaries for pip.list return
  - 792f054 Add a CaseInsensitiveDict implementation
  - 1410164 pip.installed: Fix traceback when _find_key doesn’t return a match
- 60953b7 Merge pull request #51366 from dwoz/cloud_config_merge
  - ae351eb Fix python 3 path for shell test cases
  - 48062c8 Merge branch '2018.3' into cloud_config_merge
  - eeeea289 Add testing path to run_script commands
  - 542d857 Fix linter issues
- a8af3ba Cloud provider and profile configs are merged
- 9ab2ec6 Coverage on windows chokes with the tox env var `COVERAGE_PROCESS_START`
- 4994c38 Switch required PyTest dependency
- 89710a7 Merge pull request #51401 from dwoz/run_script_win
  - 77fd35 Add testing path to run_script commands
- 1438a62 Merge pull request #51389 from terminalmage/proxy-fixes
  - 3cee85e Normalize results if test proxy is enabled
- 8acd9e5 Merge pull request #51368 from s0undt3ch/hotfix/tests
  - f4e1692 Fix test
- ab60782 Merge pull request #51319 from terminalmage/issue51255
  - 04eb66b Merge branch '2018.3' into issue51255
- fdf2cf4 Merge pull request #51250 from yosnoop/fixed-salt-utils-dns-lookup
  - 0ddfad1 Merge branch '2018.3' into fixed-salt-utils-dns-lookup
  - 9f4abe4 Merge branch '2018.3' into fixed-salt-utils-dns-lookup
  - 67e4131 Merge branch '2018.3' into fixed-salt-utils-dns-lookup
  - 9a34bcd Unit test for lookup with servers option
  - 9498fde Fix `_lookup_host` to make it work when server specified
  - af867e1 Remove excessive whitespaces
  - 0d074a4 Fix a comment
  - 1363d2b Proper way to specify `_server_` to query with `_host_
  - 7b2facc Fix broken lookup in salt/utils/dns.py
- 73528a5 Merge pull request #51339 from dwoz/aws_role_backport
  - 156f532 Backport aws role support
- 7908875 Merge pull request #51341 from Ch3LL/bp-51299
  - e308f1 Add sleep before sending stop over UDP
- 326425c Merge pull request #51352 from garethgreenaway/fixing_service_beacon_documentation
  - 021fe85 Fixing the documentation for the service beacon. If no options are provided for the service then there needs to be an empty dictionary.
- 14a84e8 Merge pull request #51333 from Ch3LL/merge-2018.3
  - 27d7a89 Merge branch '2018.3' into merge-2018.3
- 31b921f Merge pull request #51304 from terminalmage/issue51270
  - 36673fb Merge branch '2018.3' into issue51270
- 2c3aef7 Merge pull request #51313 from s0undt3ch/features/tox-runtests-2018.3
  - 2eaf5e5 "Tell" coverage to track subprocesses.
  - f6babe8 Remove unused imports
  - ff6824c Don't fail the test because of order
• 4d12ccb Show objects on assertion failure
• ee2f10a Add `pytest-salt-from-filenames` to pytest requirements
• 4f4d019 Remove duplicate dependency
• 1d4b9f5 Add `.coveragerc`
• 78c6d68 Run tests from tox, whether runtests or pytest
• c02757d `gitfs`: Fix use of deprecated pygit2 function
• ae62ebc Merge branch `2017.7` into `2018.3`
• 9309639 Merge pull request #51305 from s0undt3ch/2017.7
• 09b20df Add 2017.7 `codecov` config
• 4fa2a02 Merge pull request #51267 from ethframe/fix-file-directory
• c108825 Fix missing file error in file.directory.
• ad17ac5 Fix mocks to reflect changes to git.latest state
• c817213 Don’t try to run `git.config_get_regexp` from nonexistent cwd
• f8c3e44 `git.latest`: add auth to merge/reset calls when LFS used with SSH auth
• 4b11d6b Increase batch test timeout on windows
• a5af9c5 Increase minion wait for slow boxes

• **PR #51549**: (s0undt3ch) [2019.2] Allow NOT to install pip dependencies @ 2019-02-13 18:16:52 UTC
  - e7ee04e Merge pull request #51549 from s0undt3ch/2019.2
  - d2125aa Allow NOT to install pip dependencies

• **PR #51595**: (mirceaulinic) Fix ipaddress imports @ 2019-02-13 17:33:08 UTC
  - c96464b Merge pull request #51595 from mirceaulinic/mircea/port-824e0e5
  - 91bcbf4 Merge branch `2019.2` into mircea/port-824e0e5
  - 84fc76d Fix ipaddress imports

• **PR #51517**: (damianosSemmle) Fixed string format index out of range error @ 2019-02-13 08:18:38 UTC
  - e3c9a3e Merge pull request #51517 from damianosSemmle/fix-string-format-index
  - c959e2 Merge branch `2019.2` into fix-string-format-index

• **PR #51581**: (garethgreenaway) [2019.2] Merge forward from 2019.2.0rc1 to 2019.2 @ 2019-02-13 04:11:15 UTC
  - 82506bb Merge pull request #51581 from garethgreenaway/merge-2019.2.0rc1
  - b00e7e8 Merge branch `2019.2` into merge-2019.2.0rc1

• **PR #51607**: (dwoz) [2019.2] Wait for minions to be pingable before starting tests @ 2019-02-13 00:48:47 UTC
  - edb5e94 Merge pull request #51607 from dwoz/wait_minions_2019.2
  - ab0a6a3 fix linter
  - f2e4a30 Wait for minions to be pingable before starting tests

• **PR #51584**: (dwoz) [2019.2] Use the code directory instead of cwd for python path @ 2019-02-12 18:43:46 UTC
  - 1e0275e Merge pull request #51584 from dwoz/script_fixes
  - dbf4356 Use the code directory instead of cwd for python path
- cd24006 Merge branch '2019.2' into merge-2019.2.0rc1
- 6e55164 Merge branch '2019.2.0.rc1' into merge-2019.2.0rc1
  * ac73745 Merge branch '2019.2' into fix-string-format-index
- **PR #51583: (dwoz) Add testing path to run_script commands** @ 2019-02-11 21:38:51 UTC
  - f446c52 Merge pull request #51583 from dwoz/scriptfix
  - e49ba86 Add testing path to run_script commands
  - 7887e0 Fixed string format index out of range error
- **PR #51405: (aplanas) Documentation: fix typo in "equivalent"** @ 2019-02-01 21:11:12 UTC
  - c3e27be Merge pull request #51405 from planas/backport_49669
  - 58279b4 Documentation: fix typo in "equivalent"
- **PR #51406: (aplanas) states_pt3: fix rST link format** @ 2019-02-01 21:10:43 UTC
  - 5c26652 Merge pull request #51406 from planas/backport_49670
  - 204432d Merge branch '2019.2' into backport_49670
- **PR #51426: (aplanas) mount: cache blkid information** @ 2019-02-01 21:09:51 UTC
  - fb70bd3 Merge pull request #51426 from planas/backport_51135
  - ac790a6 Merge branch '2019.2' into backport_51135
  - 66743d6 mount: cache blkid information
- **PR #51425: (aplanas) cmdmod: add sysfs into the chroot** @ 2019-02-01 21:09:00 UTC
  - 2e88f05 Merge pull request #51425 from planas/backport_51094
  - 9193106 cmdmod: add sysfs into the chroot
- **PR #51419: (aplanas) file: update attributes for lsattr and chattr** @ 2019-02-01 21:04:54 UTC
  - d7a47f0 Merge pull request #51419 from planas/backport_50607
  - ab8a8b8 file: update attributes for lsattr and chattr
- **PR #51414: (aplanas) service: SUSE is not based on sysvinit anymore** @ 2019-02-01 21:02:33 UTC
  - 7e020dd Merge pull request #51414 from planas/backport_50396
  - b5cff17 service: SUSE is not based on sysvinit anymore
- **PR #51408: (aplanas) parted: fix the ordering of list command** @ 2019-02-01 21:00:19 UTC
  - **PR #50473: (aplanas) parted: support variable length output for print** (refs: #51408)
  - **PR #49804: (aplanas) parted: fix the ordering of list command** (refs: #51408)
  - 9f87dda Merge pull request #51408 from planas/backport_49804
  - 467daf2 parted: support variable length output for print
  - da2e632 parted: fix the ordering of list command
- **ISSUE #50097: (aplanas) lowpkg.diff refers to a package name, but a package file is required** (refs: #51410)
- **PR #51410: (aplanas) Fix lowpkg.diff documentation and parameter name** @ 2019-02-01 20:57:50 UTC
  - 7e14499 Merge pull request #51410 from planas/backport_50126
  - d38622e Fix lowpkg.diff documentation and parameter name
* e61a077 states_pt3: fix rST link format

- **PR #51404**: (aplanas) blockdev: fix url from comment @ 2019-01-30 20:05:54 UTC
  - a16461b Merge pull request #51404 from aplanas/backport_49668
  - da2e30d blockdev: fix url from comment

- **PR #51407**: (aplanas) parted: fix _validate_partition_boundary @ 2019-01-30 20:05:02 UTC
  - 756c367 Merge pull request #51407 from aplanas/backport_49803
  - b004b33 parted: fix _validate_partition_boundary

- **PR #51435**: (damianosSemmle) Fixed not raised exceptions @ 2019-01-30 18:32:57 UTC
  - 1d45664 Merge pull request #51435 from damianosSemmle/fix-raise-exception
  - 7a9ff59 Fixed not raised exceptions

- **PR #51336**: (Ch3LL) [2019.2] Merge Forward from 2019.2.0.rc1 to 2019.2 @ 2019-01-27 23:55:08 UTC
  - d4b9093 Merge pull request #51336 from Ch3LL/merge-2019.2.0rc1
  - 62a20b1 Remove unused import
  - 2284ea5 Merge branch '2019.2.' into merge-2019.2.0rc1
  - 18bf236 Merge branch '2019.2.0.rc1' into 2019.2

- **PR #51334**: (Ch3LL) [2019.2] Merge forward from 2018.3 to 2019.2 @ 2019-01-27 23:49:32 UTC
  - 02b43a0 Merge pull request #51334 from Ch3LL/merge-2019.2
  - 25ec653 Merge branch '2018.3' into '2019.2'
    - f62cc11 Merge pull request #51324 from garethgreenaway/1257_something_something_bytes_argh_python2
      - bd7072f Merge branch '2018.3' into 1257_something_something_bytes_argh_python2
    - b44cd84 Merge pull request #51323 from garethgreenaway/network_dns_check_test
      - 055eadc Merge branch '2018.3' into network_dns_check_test
  - be57a0f Merge pull request #51321 from terminalmage/issue51256
    - d9c4462 Fix 500 error when using wheel_async
    - e847f54 Swap passed addr for string rather than ipaddress object.
    - 87f3972 removing another debugging log.
    - ad64efb Use MagicMock
    - 172ad2e removing debugging
    - 5812eae Adding a test to ensure dns_check works as expected.
    - 0e542c5 Fixing various bits in x509 module and unit test to ensure tests are passing on python2 & python3
  - 85e7ac6 Merge pull request #51306 from s0undt3ch/2018.3
    - 5f0f296 Add 2018.3 codecov config
  - 5a398a3 Merge pull request #51207 from twangboy/fix_test_pkg
    - d4ab6d8 Merge branch '2018.3' into fix_test_pkg
  - 7a97cb4 Merge pull request #51252 from dwoz/issue-50221
- f96828a Merge branch '2018.3' into issue-50221
  - 253f5e4 Merge pull request #51264 from gtmanfred/2018.3
    - f3ebd32 Merge branch '2018.3' into 2018.3
  - aacc047 Merge pull request #51274 from twangboy/fix_network
    - 344bf65 Fix tests. We no longer get ipaddress instances back.
    - 345aa5b Fix minion start issue
    - f553be7 tuples don't have pop
    - 55ea80e don't shadow builtin
    - 6148c50 an argument is not always needed to be passed to open a file
  - 8a89cb2 Merge pull request #51279 from twangboy/backport_lgpo
    - 06b1545 Remove network.py patch
    - 2356f25 Add __context__ support
    - a5255f0 Merge remote-tracking branch 'saltstack/2018.3' into issue-50221
  - 6796e65 Merge pull request #51276 from garethgreenaway/merge-2018.3
    - 44ddc43 Merge branch '2018.3' into merge-2018.3
  - 0adde9b Merge pull request #51220 from sathieu/artifactory-classifier-2018.3
    - a85f146 fixes #31179 by appyling the same logic as used in the nexus module
  - f6a7cad Merge pull request #51225 from astronouth7303/loader-docs-2018.3
    - 6e7da95 Add the tokens system.
    - 7e2838c Add reference to the execution module docs
    - f30f9e8 Remove search system
    - f0cc183 Fileserver modules can be loaded from the fileserver.
  - 1a2f680 Merge pull request #51239 from garethgreenaway/51208_file_manage_escaped_double_quotes
    - 4251c0c Merge branch '2018.3' into 51208_file_manage_escaped_double_quotes
    - 6a9daa7 Merge branch '2018.3' into 51208_file_manage_escaped_double_quotes
    - 0bf468c Fixing lint. Using a constant instead of looking for the condition in the string.
    - a233dbc Ensuring we can handle a string that contains single quote + an escaped double quote.
  - d614127 Merge pull request #51261 from OrangeDog/patch-2
    - d809b9b Avoid double-counting errors and ignore test runs
    - 6ca7deb Remove unused host parameter and average/disaster keys
    - 2d44527 Just let zabbix_sender use the config file
    - 6404e2c Fix fallback command so it's actually run
    - b79a55a Fix KeyError in Zabbix returner
    - 0971035 Merge branch '2018.3' into merge-2018.3
    - 243dc06 Merge branch '2017.7' into merge-2018.3

  - 2456aaa Porting PR #52948 to 2019.2.1
  - 94a1e3b Porting PR #52752 to 2019.2.1
  - c7b7474 modifying saltconf ads
  - d48057b add new saltconf ads
- PR #54858: (frogunder) remove in progress from releasenotes 2019.2.2 @ 2019-10-02 20:42:59 UTC
  - 4b06eca Merge pull request #54858 from frogunder/releasenotes_remove2019.2.2
  - a697abd remove in progress from releasenotes 2019.2.2
- PR #54854: (frogunder) releasenotes 2019.2.2 @ 2019-10-02 18:58:21 UTC
  - aaf2d1c Merge pull request #54854 from frogunder/release_notes_2019.2.2
• PR #54852: (frogunder) Update man pages for 2019.2.2 @ 2019-10-02 18:27:07 UTC
  - 10d433f Merge pull request #54852 from frogunder/man_pages_2019.2.2
  - 92bc4b2 Update man pages for 2019.2.2

• PR #54845: (s0undt3ch) Remove debug print @ 2019-10-02 17:38:21 UTC
  - 8ca6b20 Merge pull request #54845 from s0undt3ch/hotfix/event-return-fix-2019.2.1
  - 3937890 Remove debug print

• ISSUE #54755: (Reiner030) 2019.2.1/2019.2.0 pip failures even when not using pip (refs: #54826)

• PR #54826: (dwoz) Fix issue 54755 and add regression tests @ 2019-10-01 20:07:46 UTC
  - 9e3914a Merge pull request #54826 from dwoz/issue_54755
  - 0bad9cb Handle locals and globals separately
  - bcb9a2 Only purge pip when needed
  - d2f98ca Fix issue 54755 and add regression tests

• PR #54830: (frogunder) Add known issues to 2019.2.1 release notes @ 2019-10-01 16:23:30 UTC
  - ba569d0 Merge pull request #54830 from frogunder/update_relesenotes_2019.2.1
  - 8cdb27b Update 2019.2.1.rst
  - 14f955c Add known issues to 2019.2.1 release notes

• ISSUE #54521: (Oloremo) [Regression] Failhard, batch and retcodes (refs: #54806)

• PR #54806: (Oloremo) [Regression] Batch with failhard fix @ 2019-10-01 14:51:47 UTC
  - 433b6fa Merge pull request #54806 from Oloremo/failhard-batch-fix-2019.2.1
  - 6684793 Merge branch '2019.2.1' into failhard-batch-fix-2019.2.1
  - 3e0e928 Added tests for cli and runner
  - 2416516 Made batch work properly with failhard in cli and runner

• ISSUE #54820: (OrangeDog) schedule.present not idempotent when scheduler disabled (refs: #54828)

• PR #54828: (garethgreenaway) [2019.2.1] Fix global disabling code in scheduler @ 2019-10-01 09:27:49 UTC
  - ed94aa5 Merge pull request #54828 from garethgreenaway/54820_fix_schedule_disabled_job_enabled_bug
  - be15a28 Rework code that handles individual jobs being disabled and scheduler being globally being disabled. Previously disabling the schedule would result in individual jobs being disabled when they were run through eval. This change does not change schedule items.

• PR #54778: (Akm0d) fix broken salt-cloud openstack query @ 2019-10-01 09:23:27 UTC
  - 435b40c Merge pull request #54778 from Akm0d/master_openstack_query_fix
  - ba4ba2a fixed pylint errors in openstack test
  - d9a8517 Added openstack tests for openstack --query fix
  - 59214ad Fallback to image id if we don't have an image name
  - 3a42a4d fixed pylint error
  - 0074d18 created unit tests for openstack
- 4255e3e Merge branch '2019.2.1' of https://github.com/saltstack/salt into HEAD
- 1c2821b Return a configured provider, not a bool
- c585550 fix broken salt-cloud openstack query

**ISSUE #54762**: (margau) 2019.2.1: Breaks Minion-Master Communication (refs: #54823, #54784, #54807)

**PR #54823**: (dhiltonp) ip_bracket can now accept ipv6 addresses with brackets @ 2019-10-01 01:13:34 UTC
  - 93b1c4d Merge pull request #54823 from dhiltonp/maybe-bracket
  - faa1d98 ip_bracket can now accept ipv6 addresses with brackets

**ISSUE #54762**: (margau) 2019.2.1: Breaks Minion-Master Communication (refs: #54823, #54784, #54807)

**PR #54807**: (dwoz) Fix pip state pip >=10.0 and <=18.0 @ 2019-09-30 09:20:14 UTC
  - PR #54772: (OrlandoArcapix) Fix import of pip modules (refs: #54807)
  - b61b30d Merge pull request #54807 from dwoz/patch-2
  - 664806b Add unit test for pip state fix
  - e637658 Revert change to pip version query
  - 42810a2 Fix import of pip modules

**ISSUE #54741**: (kjkeane) Schedulers Fail to Run (refs: #54799)

**PR #54799**: (garethgreenaway) Fix to scheduler when job without a time element is run with schedule.run_job @ 2019-09-30 00:19:43 UTC
  - 4ee1ff6 Merge pull request #54799 from garethgreenaway/54741_run_job_fails_without_time_element
  - 44caa81 Merge branch '54741_run_job_fails_without_time_element' of github.com:garethgreenaway/salt into 54741_run_job_fails_without_time_element
    - 3ae4f75 Merge branch '2019.2.1' into 54741_run_job_fails_without_time_element
  - 8afdf88 Removing extra, unnecessary code.
  - 549cfb8 Fixing test_run_job test to ensure the right data is being asserted. Updating unit/test_module_names.py to include integration.scheduler.test_run_job.
  - 7d716d6 Fixing lint.
  - ec68591 Fixing test_run_job test to ensure the right data is being asserted. Updating unit/test_module_names.py to include integration.scheduler.test_run_job.

**ISSUE #54768**: (paul-palmer) 2019.2.1 Some Jinja imports not found (refs: #54780)

**ISSUE #54765**: (awerner) 2019.2.1: Jinja from import broken (refs: #54780)

**PR #54780**: (dwoz) Fix masterless jinja imports @ 2019-09-29 22:12:48 UTC
  - b9459e6 Merge pull request #54780 from dwoz/fix-masterless-jinja-imports
  - 5d873cc Merge branch '2019.2.1' into fix-masterless-jinja-imports
  - e901a83 Add regression tests for jinja import bug
• ISSUE #54776: (javierbertoli) Setting ping_interval in salt-minion's config (version 2019.2.1) prevents it from starting (refs: #54777)

• PR #54777: (javierbertoli) Fix minion's remove_periodic_callback() @ 2019-09-29 21:33:53 UTC
  - 4c240e5 Merge pull request #54777 from netmanagers/2019.2.1
  - 459c790 Merge branch '2019.2.1' into 2019.2.1

• PR #54805: (bryceml) improve lint job @ 2019-09-29 21:24:05 UTC
  - 83f8f5c Merge pull request #54805 from bryceml/2019.2.1_update_lint_salt
  - ffa4ed6 improve lint job
  - fa1a767 Merge branch '2019.2.1' into 2019.2.1

• ISSUE #54751: (jnmatlock) NXOS_API Proxy Minions Error KeyError: 'proxy.post_master_init' after upgrading to 2019.2.1 (refs: #54778, #54783)

• PR #54805: (garethgreenaway) Ensure metaproxy directory is included in sdist @ 2019-09-29 02:17:23 UTC
  - 6b43f8e Merge pull request #54805 from garethgreenaway/54751_fixing_missing_metaproxy_directory
  - 67d9938 Merge branch '2019.2.1' into 54751_fixing_missing_metaproxy_directory
  - a35e609 Adding __init__.py to metaproxy directory so that metaproxy is included when running setup.py.

• ISSUE #54762: (margau) 2019.2.1: Breaks Minion-Master Communication (refs: #54823, #54784, #54807)

• PR #54784: (dhiltonp) fix dns_check to return uri-compatible ipv6 addresses, add tests @ 2019-09-28 08:36:51 UTC
  - 7912b67 Merge pull request #54784 from dhiltonp/ipv46
  - 042a101 Merge branch '2019.2.1' into ipv46

• PR #54779: (frogunder) Add 2019.2.2 release notes @ 2019-09-27 17:45:46 UTC
  - 2f94b44 Merge pull request #54779 from frogunder/releasenotes_2019.2.2
  - 67f564b Add 2019.2.2 release notes
  - ac6b54f Merge branch '2019.2.1' into ipv46
  - 93ebd09 update mock (py2) from 2.0.0 to 3.0.5
  - 37bb4c4 fix dns_check to return uri-compatible ipv6 addresses, add tests
    - dd86c46 Merge pull request #1 from waynew/pull/54777-callback-typo
      - a57f7d0 Add tests
    - c19d0b0 Fix minion's remove_periodic_callback()

• PR #54731: (pizzapanther) Fix returners not loading properly @ 2019-09-26 17:24:27 UTC
  - 46b3e3c Merge pull request #54731 from pizzapanther/not-so-__new__-and-shiny
  - bdf24f4 Make sure we tests salt-master's event_return setting
  - 5499518 remove unnecessary import
  - 38a382 fix module import
  - 0746aa7 remove __new__ method since it was removed from parent class
32.2.53 Salt 2019.2.3 Release Notes

Version 2019.2.3 is a CVE-fix release for 2019.2.0.

Security Fix

CVE-2019-17361

With the Salt NetAPI enabled in addition to having a SSH roster defined, unauthenticated access is possible when specifying the client as SSH. Additionally, when the raw_shell option is specified any arbitrary command may be run on the Salt master when specifying SSH options.

32.2.54 Salt 2019.2.4 Release Notes

Version 2019.2.4 is a CVE-fix release for 2019.2.0.

Security Fix

CVE-2020-11651

An issue was discovered in SaltStack Salt before 2019.2.4 and 3000 before 3000.2. The salt-master process ClearFuncs class does not properly validate method calls. This allows a remote user to access some methods without authentication. These methods can be used to retrieve user tokens from the salt master and/or run arbitrary commands on salt minions.

CVE-2020-11652

An issue was discovered in SaltStack Salt before 2019.2.4 and 3000 before 3000.2. The salt-master process ClearFuncs class allows access to some methods that improperly sanitize paths. These methods allow arbitrary directory access to authenticated users.

Known Issue

Part of the fix for CVE-2020-11651 added better validation of the methods allowed to be called by remote clients. Both AESFuncs and ClearFuncs now have an explicit list of methods that can be called. The name of one of these whitelisted methods on AESFuncs had a typo. The _minion_runner method should be minion_runner (without the underscore prefix). This typo breaks the publish module’s runner method. Calling runners, for example:

```
salt minion publish.runner manage.down
```

Will not work, and you will receive an empty reply from the salt master.

This will be addressed in the 3001 release of Salt set for mid-June 2020.
32.2.55 Salt 2019.2.5 Release Notes

Version 2019.2.5 is a bug-fix release for 2019.2.0.

Statistics

- Total Merges: 2
- Total Issue References: 2
- Total PR References: 2
- Contributors: 2 (dwoz, frogunder)

Changelog for v2019.2.4..v2019.2.5

Generated at: 2020-05-05 22:43:12 UTC

- PR #57096: (frogunder) Update man_pages 2019.2.5 @ 2020-05-05 22:10:46 UTC
  - 6877b7259a Merge pull request #57096 from frogunder/man_pages_2019.2.5
  - 58ea351a59 Update man_pages 2019.2.5

- ISSUE #57027: (ecarson) [BUG] Master running 2019.2.4 or 3000.2 unable to synchronize files using saltutil.sync_all to 2017.7.1 minion due to CVE fix (refs: #57090)

- ISSUE #57016: (idontwanttosignin) [BUG] Requested method not exposed: minion_runner (refs: #57090)

- PR #57090: (dwoz) Address Issues in CVE Release @ 2020-05-05 22:09:25 UTC
  - 8fe0f66f94 Merge pull request #57090 from dwoz/bugs_n_stuff
  - f3e8590bac Describe SEPs
  - aa1a9d340d Update hardening doc to mention 4505/4506
  - ca303f7c0c Add link to salt-announce to documentation
  - c63253ef9c Address issues in cve release

32.2.56 Salt 2019.2.6 Release Notes

Version 2019.2.6 is a CVE fix release for 2019.2.0.

Fixed

- Prevent shell injections in netapi ssh client (cve-2020-16846)
- Prevent creating world readable private keys with the tls execution module. (cve-2020-17490)
32.2.57 Salt 2019.2.7 Release Notes

Version 2019.2.7 is a CVE fix release for 2019.2.0.

Fixed

- Properly validate eauth credentials and tokens along with their ACLs. Prior to this change eauth was not properly validated when calling Salt ssh via the salt-api. Any value for 'eauth' or 'token' would allow a user to bypass authentication and make calls to Salt ssh. (CVE-2020-25592)

32.2.58 Salt 2019.2.8 Release Notes

Version 2019.2.8 is a bugfix release for 2019.2.0.

Fixed

- Fixes salt-ssh authentication when using tty (#58922)

32.2.59 Salt 2018.3.0 Release Notes - Codename Oxygen

**Warning:** If you are using Jinja to dump lists or dictionaries in your SLS files, this will now cause errors in Python 2 since Jinja does not produce YAML-compatible output when strings in the data structures contain unicode types. The dictionary must be passed through a Jinja filter to produce YAML-compatible strings.

The below is an example of invalid SLS:

```
/etc/foo.conf:
  file.manged:
    - source: salt://foo.conf
    - template: jinja
    - defaults: {{ mydict }}
```

To make it valid, use either one of Salt's own `json` or `yaml` filters:

```
/etc/foo.conf:
  file.manged:
    - source: salt://foo.conf
    - template: jinja
    - defaults: {{ mydict | json }}
```
Unicode/Python 3 Compatibility Improvements

This release fixes a number of nagging issues with Unicode strings in Salt under Python 2 (ex. 'ascii' codec can't decode byte 0xd0). For best results, use a UTF-8 locale (such as by setting the LANG environment variable to one which supports UTF-8. For example en_US.UTF-8, de_DE.UTF-8, ru_RU.UTF-8, C.UTF-8).

Additionally, a number of Python 3 compatibility fixes have been made, many of them having to do with file I/O and str/bytes mismatches.

We continue to work toward improving both Unicode and Python 3 compatibility and welcome any feedback.

Lots of Docker Improvements

Much Improved Support for Docker Networking

The `docker_network.present` state has undergone a full rewrite, which includes the following improvements:

Full API Support for Network Management

The improvements made to input handling in the `docker_container.running` state for 2017.7.0 have now been expanded to `docker_network.present`. This brings with it full support for all tunable configuration arguments.

Custom Subnets

Custom subnets can now be configured. Both IPv4 and mixed IPv4/IPv6 networks are supported. See here for more information.

Network Configuration in `docker_container.running` States

A long-requested feature has finally been added! It is now possible to configure static IPv4/IPv6 addresses, as well as links and labels. See here for more information.

Note: While the `containers` argument to `docker_network.present` will continue to be supported, it will no longer be the recommended way of ensuring that a container is attached to a network.

Improved Handling of Images from Custom Registries

Rather than attempting to parse the tag from the passed image name, Salt will now resolve that tag down to an image ID and use that ID instead.

Important: Due to this change, there are some backward-incompatible changes to image management. See below for a full list of these changes.
Backward-incompatible Changes to Docker Image Management

Passing image names to the following functions must now be done using separate repository and tag arguments:

- `docker.build`
- `docker.commit`
- `docker.import`
- `docker.load`
- `docker.tag`
- `docker.sls_build`

Additionally, the `tag` argument must now be explicitly passed to the `docker_image.present` state, unless the image is being pulled from a docker registry.

State and Execution Module Support for `docker run` Functionality

The `docker_container.running` state is good for containers which run services, but it is not as useful for cases in which the container only needs to run once. The `start` argument to `docker_container.running` can be set to `False` to prevent the container from being started again on a subsequent run, but for many use cases this is not sufficient. Therefore, the `docker.run_container` remote-execution function was added. When used on the Salt CLI, it will return information about the container, such as its name, ID, exit code, and any output it produces.

State support has also been added via the `docker_container.run` state. This state is modeled after the `cmd.run` state, and includes arguments like `onlyif`, `unless`, and `creates` to control whether or not the container is run.

Full API Support for `docker.logs`

This function now supports all of the functions that its Docker API counterpart does, allowing you to do things like include timestamps, and also suppress stdout/stderr, etc. in the return.

`start` Argument Added to `docker.create` Function

This removes the need to run `docker.start` separately when creating containers on the Salt CLI.

```
salt myminion docker.create image=foo/bar:baz command=/path/to/command  
   → start=True
```
Use SaltSSH Minions like regular Master-Minions

The Master process can now also call SSH minions as if they were connected to the master using ZeroMQ. By setting `enable_ssh_minions: True` in the master config file, the master will create a Salt SSH client process which connects to the minion and returns the output for the `salt` CLI to use like a regular minion. This can be used anywhere the LocalClient is used.

Exceptions Raised for Authentication/Authorization Errors

When sending `publish` commands via `master.py` and `masterapi.py` and an authorization or authentication problem is encountered, Salt will now raise the appropriate exceptions instead of returning an empty string: `'}'. The reasoning behind this change is to make it easier to debug various scenarios surrounding authentication and authorization issues more effectively.

Comparison Operators in Package Installation

Salt now supports using comparison operators (e.g. `>=1.2.3`) when installing packages on minions which use `yum/dnf or apt`. This is supported both in the `pkg.installed` state and in the `pkg.install` remote execution function.

Master Tops Changes

When both `Master Tops` and a `Top File` produce SLS matches for a given minion, the matches were being merged in an unpredictable manner which did not preserve ordering. This has been changed. The top file matches now execute in the expected order, followed by any master tops matches that are not matched via a top file.

To make master tops matches execute first, followed by top file matches, set the new `master_tops_first` minion config option to `True`.

Several Jinja Filters Renamed

The following Jinja filters (originally added in 2017.7.0) have been renamed due to the fact that they were inaccurately named when initially added. The original names will be supported until the 3000 release of Salt.

- `rand_str` renamed to `random_hash`
- `jinja_decode_dict` renamed to `jinja_encode_dict`
- `jinja_decode_list` renamed to `jinja_encode_list`

Return Codes for Runner/Wheel Functions

When using `orchestration`, runner and wheel functions used to report a `True` result if the function ran to completion without raising an exception. It is now possible to set a return code in the `__context__` dictionary, allowing runner and wheel functions to report that they failed. Here's some example pseudocode:

```python
def myrunner():
    ...
    # do stuff
    ...
    if some_error_condition:
```

(continues on next page)
Variable Update Intervals for Fileserver Backends

Prior to this release, file servers would be updated as part of a dedicated "maintenance" process, in which various routine maintenance tasks were performed. This tied the update interval to the `loop_interval` config option, and also forced all file servers to update at the same interval.

2018.3.0 adds the following configuration options for the various file server backends:

- `roots_update_interval`
- `azurefs_update_interval`
- `gitfs_update_interval`
- `hgfs_update_interval`
- `minionfs_update_interval`
- `s3fs_update_interval`
- `svnfs_update_interval`

These allow for update intervals to be set for each individual backend. The default value for each of these is 60 seconds.

In addition, for GitFS it is also possible to apply intervals to individual remotes. See here for examples.

Note: `git_pillar` does not yet support variable update intervals, this is targeted for the next feature release (2019.2.0).

LDAP via External Authentication Changes

In this release of Salt, if LDAP Bind Credentials are supplied, then these credentials will be used for all LDAP access except the first authentication when a job is submitted. The first authentication will use the user's credentials as passed on the CLI. This behavior is to accommodate certain two-factor authentication schemes where the authentication token can only be used once.

In previous releases the bind credentials would only be used to determine the LDAP user's existence and group membership. The user's LDAP credentials were used from then on.

Stormpath External Authentication Removed

Per Stormpath's announcement, their API will be shutting down on 8/17/2017 at noon PST so the Stormpath external authentication module has been removed.

https://stormpath.com/oktaplusstormpath
New (Proxy) Minion Configuration Options

To be able to connect the Minion to the Master using a certain source IP address or port, the following options have been added:

- `source_interface_name`
- `source_address`
- `source_ret_port`
- `source_publish_port`

**environment config option renamed to saltenv**

The `environment` config option predates referring to a salt fileserver environment as a `saltenv`. To pin a minion to a single environment for running states, one would use `environment`, but overriding that environment would be done with the `saltenv` argument. For consistency, `environment` is now simply referred to as `saltenv`. There are no plans to deprecate or remove `environment`, if used it will log a warning and its value will be used as `saltenv`.

**lock_saltenv config option added**

If set to `True`, this option will prevent a minion from allowing the `saltenv` argument to override the value set in `saltenv` when running states.

**Failed Minions for State/Function Orchestration Jobs Added to Changes Dictionary**

For orchestration jobs which run states (or run remote execution functions and also use a `fail` function to indicate success or failure), minions which have `False` results were previously included as a formatted string in the comment field of the return for that orchestration job. This made the failed returns difficult to parse programmatically. The failed returns in these cases are now included in the changes dictionary, making for much easier parsing.

**Grains**

- `fc_wwn` - Show all fibre channel world wide port names for a host, must be enabled with `fibre_channel_grains`
- `iscsi_iqn` - Show the iSCSI IQN name for a host
- `swap_total` - Show the configured swap_total for Linux, "BSD, OS X and Solaris/SunOS
- `virtual`:
  - identifies reports KVM and VMM hypervisors when running an OpenBSD guest
  - for detecting Solaris Logical Domains (LDOMs) running on T-Series SPARC hardware. The `virtual_subtype` grain is populated as a list of domain roles.
Salt Minion Auto-discovery

Using auto-discovery, the Salt Minion now no longer needs to be configured against a specific DNS name or IP address of a Master.

For this feature Salt Master now requires port 4520 for UDP broadcast packets to be opened and the Salt Minion be able to send UDP packets to the same port.

Configuration

By default, automatic discovery is disabled.

Warning: Due to the current limitations that will be changing in a future release, before you turn on auto-discovery, make sure your network is secured and trusted.

Auto-discovery is configured on Master and Minion. Both of them are configured via the discovery option as follows:

Master configuration

To use the default configuration, which accepts any minion, simply set discovery to True:

```
 discovery: true
```

A sub-option called mapping allows auto-discovery to help find the proper Master. The mapping contains an arbitrary set of key/value pairs, which the Minion configuration can target. By default, no mappings are set.

Example:

```
 discovery: 
    mapping: 
      description: SES 5.0
      node: 1
```

It is also possible to change the port used from the default of 4520, by setting a port option under the Master's discovery configuration:

```
 discovery: 
    port: 4567
```

Note: When using a port number other than the default, the Minion's discovery configuration must also have a port specified, otherwise the Minion will still attempt to contact the Master on port 4520.

Minion configuration

In addition to the mapping and port options, the following additional options are available to Minions:

- attempts - This option specifies how many broadcast requests should be sent to the network, waiting for any Master response. Each attempt takes a couple of seconds, so raising this value may result in a slower Minion startup. Note that, on a properly-configured network, autodiscovery should succeed on the first attempt. By default, this value is set to 3.

- match - This option can be set to either all or any, and it determines how the values configured in mapping are matched. If set to all, then all of the key/value pairs in the Minion's mapping must match a given Master. If set to any (the default), then any match to a key/value mapping will constitute a match.
- **pause** - The interval in seconds between attempts (default: 5).
- **fibre_channel_grains** - Enables the fc_wwn grain. (Default: False)
- **iscsi_grains** - Enables the iscsi_iqn grain. (Default: False)

**Connection to a type instead of DNS**

By now each Minion was connecting to a Master by DNS or IP address. From now on it is possible also to connect to a _type_ of a Master. For example, in a network there are three different Masters, each corresponds for a particular niche or environment or specific role etc. The Minion is supposed to connect only to one of those Masters that is described appropriately.

To achieve such an effect, each `/etc/salt/master` configuration should have a `discovery` option, which should have a `mapping` element with arbitrary key/value pairs. The same configuration should be on the Minion, so then when mapping matches, Minion recognises Master as its connection target.

Example for Master configuration (`/etc/salt/master`):

```
{discovery: 
  mapping: 
    description: SES 5.0
    node: 1
}
```

The example above describes a system that is running a particular product, where `description` is an arbitrary key and SES 5.0 is just a string. In order to match exactly this Master, the following configuration at Minion should be present:

```
{discovery: 
  match: all  # Can be "all" or "any"
  mapping: 
    description: SES 5.0
    node: 1
}
```

Notice `match` criteria is set to `all`. This would mean that from all found Masters select only that, which `description` is set to SES 5.0 _and_ `node` is set to 1. All other Masters will be ignored.

**Limitations**

This feature has a couple of _temporary_ limitations that are subject to change in the future:

- Only one Master on the network is supported. Currently the Minion cannot select which Master out of few the same to choose. This will change to choosing the Master that is least loaded.

- Minions will accept _any_ master that matches connection criteria without any particular security applied (priv/pub key check, signature, fingerprint etc). That implies that administrator is expected to know his network and make sure it is clean.
New Modules

- `salt.modules.purefa`

New NaCl Renderer

A new renderer has been added for encrypted data.

New support for Cisco UCS Chassis

The salt proxy minion now allows for control of Cisco USC chassis. See the `cimc` modules for details.

New support for Cassandra v3

The `cassandra_cql` module now supports Cassandra v3 which has changed its internal schema to define keyspaces and columns.

New salt-ssh roster

A new roster has been added that allows users to pull in a list of hosts for salt-ssh targeting from a `~/.ssh` configuration. For full details, please see the `sshconfig` roster.

New GitFS Features

Two new features which affect how GitFS maps branches/tags to fileserver environments (i.e. saltenvs) have been added:

1. It is now possible to completely turn off Salt's default mapping logic (aside from the mapping of the base saltenv). This can be triggered using the new `gitfs_disable_saltenv_mapping` config option.

   **Note:** When this is disabled, only the base saltenv and any configured using per-saltenv configuration parameters will be available.

2. The types of refs which Salt will use as saltenvs can now be controlled. In previous releases, branches and tags were both mapped as environments, and individual commit SHAs could be specified as saltenvs in states (and when caching files using `cp.cache_file`). Using the new `gitfs_ref_types` config option, the types of refs which are used as saltenvs can be restricted. This makes it possible to ignore all tags and use branches only, and also to keep SHAs from being made available as saltenvs.

Additional output modes

The `state_output` parameter now supports `full_id`, `changes_id` and `terse_id`. Just like `mixed_id`, these use the state ID as name in the highstate output. For more information on these output modes, see the docs for the `Highstate Outputter`.

32.2. Previous releases
Windows

Python Version

Python 2 Windows API was designed when Windows did not support Unicode. Windows now supports Unicode however to keep backwards compatibility Python 2 Windows API has not been changed. Python 3 Windows API supports Unicode. Salt Python 3 installer is the recommend choice for users who need characters other than Non-ASCII (7bit) characters.

pkg Execution module changes

Significant changes have been made to the win_pkg execution module. Users should test this release against their existing package sls definition files. These changes are also in 2016.11.9 & 2017.7.3.

- pkg.list_available no longer defaults to refreshing the winrepo meta database.
- pkg.install without a version parameter no longer upgrades software if the software is already installed. Use pkg.install version=latest or in a state use pkg.latest to get the old behavior.
- pkg.list_pkgs now returns multiple versions if software installed more than once.
- pkg.list_pkgs now returns 'Not Found' when the version is not found instead of '(value not set)' which matches the contents of the sls definitions.
- pkg.remove() will wait up to 3 seconds (normally about a second) to detect changes in the registry after removing software, improving reporting of version changes.
- pkg.remove() can remove latest software, if latest is defined in sls definition.
- Documentation was update for the execution module to match the style in new versions, some corrections as well.
- All install/remove commands are prefix with cmd.exe shell and cmdmod is called with a command line string instead of a list. Some sls files in saltstack/salt-winrepo-ng expected the commands to be prefixed with cmd.exe (i.e. the use of &).
- Some execution module functions results, now behave more like their Unix/Linux versions.

Installer

Changes to config handling

Behavior with existing configuration has changed. With previous windows installers the existing config was used and the master and minion id could be modified via the installer. It was problematic in that it didn't account for configuration that may be defined in the minion.d directory. This change gives you the option via a drop-down list to use one of the following:

- Default Config: Use the config that comes with the installer
- Existing Config: Use the current config without changes
- Custom Config: Select a custom config using the file picker

The existing config option will only be available if the installer detects an existing config. If there is an existing config, and you choose Default or Custom, the existing config will be deleted, including the minion.d directory, and replaced by your selection.
The Default Config and Custom Config options will allow you to modify the Master and the Minion ID. Existing Config will leave the existing configuration unchanged.

These settings can be defined on the command line using the following switches:

- /default-config
- /custom-config=C:\Path\To\Custom\Config\minion

If neither option is passed and there is an existing config, the default is to use the existing config. If there is no existing config (new install) the default config will be used.

Multi-master configuration

The installer now has the ability to apply a multi-master configuration either from the GUI or the command line. The master field in the GUI can accept either a single master or a comma-separated list of masters. The command-line switch (/master=) can accept the same.

Command-line help

The Windows installer will now display command-line help when a help switch (/?) is passed.

New utils module salt.utils.pkg.win

A new utils module has been added, which gathers information about windows installed software. This is currently not used by any salt execution module or state at this time. Users are encouraged to run this and report any issues. Running the command with the detail option will be useful for anyone developing windows package definitions. With salt installed in the default location the following command will print the help message.

```
chcp 65001
c:\salt\bin\python.exe c:\salt\bin\lib\site-packages\salt\utils\pkg\win.py
c:\salt\bin\python.exe c:\salt\bin\lib\site-packages\salt\utils\pkg\win.py  --detail system
```

Salt Cloud Features

OpenStack Revamp

The OpenStack Driver has been rewritten mostly from scratch. Salt is now using the shade driver <https://docs.openstack.org/shade/latest/>.

With this, the nova driver is being deprecated.

openstack driver

There have also been several new modules and states added for managing OpenStack setups using shade as well.

keystone   keystone role grant   keystone group   keystone role   keystone service
keystone user   keystone domain   keystone project   keystone endpoint   glance
glance_image   neutron   neutron subnet   neutron secgroup   neutron secgroup rule
neutron network

32.2. Previous releases 5085
Pre-Flight Commands

Support has been added for specified "preflight commands" to run on a VM before the deploy script is run. These must be defined as a list in a cloud configuration file. For example:

```
my-cloud-profile:
    provider: linode-config
    image: Ubuntu 16.04 LTS
    size: Linode 2048
    preflight_cmds:
      - whoami
      - echo 'hello world!'
```

These commands will run in sequence before the bootstrap script is executed.

New salt-cloud Grains

When salt-cloud creates a new minion, it will now add grain information to the minion configuration file, identifying the resources originally used to create it.

The generated grain information will appear similar to:

```
grains:
    salt-cloud:
        driver: ec2
        provider: my_ec2:ec2
        profile: ec2-web
```

The generation of salt-cloud grains can be suppressed by the option `enable_cloud_grains: 'False'` in the cloud configuration file.

Upgraded Saltify Driver

The salt-cloud Saltify driver is used to provision machines which are not controlled by a dedicated cloud supervisor (such as typical hardware machines) by pushing a salt-bootstrap command to them and accepting them on the salt master. Creation of a node has been its only function and no other salt-cloud commands were implemented.

With this upgrade, it can use the salt-api to provide advanced control, such as rebooting a machine, querying it along with conventional cloud minions, and, ultimately, disconnecting it from its master.

After disconnection from ("destroying" on) one master, a machine can be re-purposed by connecting to ("creating" on) a subsequent master.

New Vagrant Driver

The salt-cloud Vagrant driver brings virtual machines running in a limited environment, such as a programmer's workstation, under salt-cloud control. This can be useful for experimentation, instruction, or testing salt configurations.

Using salt-api on the master, and a salt-minion running on the host computer, the Vagrant driver can create (vagrant up), restart (vagrant reload), and destroy (vagrant destroy) VMs, as controlled by salt-cloud profiles which designate a Vagrantfile on the host machine.

The master can be a very limited machine, such as a Raspberry Pi, or a small VagrantBox VM.
Python PyWinRM Module

Versions of `pywinrm>=0.2.1` are finally able to disable validation of self signed certificates. [Here](http://reclass.pantsfullofunix.net/) for more information.

DigitalOcean

The DigitalOcean driver has been renamed to conform to the company name. The new driver name is `digitalocean`. The old name `digital_ocean` and a short one do will still be supported through virtual aliases, this is mostly cosmetic.

Azure Cloud

The azure sdk used for the `azurearm` cloud driver now depends on `azure-cli>=2.0.12`

New saltclass pillar/master_tops modules

This module clones the behaviour of reclass ([http://reclass.pantsfullofunix.net/](http://reclass.pantsfullofunix.net/)), without the need of an external app, and add several features to improve flexibility. Saltclass lets you define your nodes from simple yaml files (.yml) through hierarchical class inheritance with the possibility to override pillars down the tree.

Features

- Define your nodes through hierarchical class inheritance
- Reuse your reclass data with minimal modifications
  - applications => states
  - parameters => pillars
- Use Jinja templating in your yaml definitions
- Access to the following Salt objects in Jinja
  - `__opts__`
  - `__salt__`
  - `__grains__`
  - `__pillars__`
  - `minion_id`
- Chose how to merge or override your lists using `^` character (see examples)
- Expand variables `_${}` with possibility to escape them if needed `_${}` (see examples)
- Ignores missing node/class and will simply return empty without breaking the pillar module completely - will be logged

An example subset of data is available here: [https://git.mauras.ch/salt/saltclass/src/branch/master/examples](https://git.mauras.ch/salt/saltclass/src/branch/master/examples)
### Terms usable in yaml files

<table>
<thead>
<tr>
<th>Terms usable in yaml files</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>classes</td>
<td>A list of classes that will be processed in order</td>
</tr>
<tr>
<td>states</td>
<td>A list of states that will be returned by master_tops function</td>
</tr>
<tr>
<td>pillars</td>
<td>A yaml dictionary that will be returned by the ext_pillar function</td>
</tr>
<tr>
<td>environment</td>
<td>Node saltenv that will be used by master_tops</td>
</tr>
</tbody>
</table>

A class consists of:

- zero or more parent classes
- zero or more states
- any number of pillars

A child class can override pillars from a parent class. A node definition is a class in itself with an added `environment` parameter for saltenv definition.

#### Class Names

Class names mimic salt way of defining states and pillar files. This means that `default.users` class name will correspond to one of these:

- `<saltclass_path>/classes/default/users.yml`
- `<saltclass_path>/classes/default/users/init.yml`

#### Saltclass Tree

A saltclass tree would look like this:

```plaintext
<saltclass_path>
  ├── classes
  │   ├── app
  │   │   └── ssh
  │   │       └── server.yml
  │   └── default
  │       ├── init.yml
  │       └── motd.yml
  │           └── users.yml
  │   └── roles
  │       ├── app.yml
  │       └── nginx
  │           └── init.yml
  │               └── server.yml
  └── subsidiaries
      ├── gnv.yml
      ├── qls.yml
      └── zrh.yml
  └── nodes
      ├── geneva
      │   └── gnv.node1.yml
      └── lausanne
```

(continues on next page)
Examples

<saltclass_path>/nodes/lausanne/qls.node1.yml

environment: base

classes:
{\% for class in ['default'] \%}
  - {{ class }}
{\% endfor \%}
  - subsidiaries.{{ __grains__[\'id\'].split(\'\')[0] }}

<saltclass_path>/classes/default/init.yml

classes:
  - default.users
  - default.motd

states:
  - openssh

pillars:
  default:
    network:
      dns:
        srv1: 192.168.0.1
        srv2: 192.168.0.2
      domain: example.com
    ntp:
      srv1: 192.168.10.10
      srv2: 192.168.10.20

<saltclass_path>/classes/subsidiaries/gnv.yml

pillars:
  default:
    network:
      sub: Geneva
      dns:
        srv1: 10.20.0.1
        srv2: 10.20.0.2
        srv3: 192.168.1.1
      domain: gnv.example.com
    users:
adm1:
  uid: 1210
  gid: 1210
  gecos: 'Super user admin1'
  homedir: /srv/app/adm1

adm3:
  uid: 1203
  gid: 1203
  gecos: 'Super user adm

Variable expansions:

Escaped variables are rendered as is - `${test}`

Missing variables are rendered as is - `${net:dns:srv2}`

```
pillars:
  app:
    config:
      dns:
        srv1: ${default:network:dns:srv1}
        srv2: ${net:dns:srv2}
        uri: https://application.domain/call?\${test}
    prod_parameters:
      - p1
      - p2
      - p3
  pkg:
    - app-core
    - app-backend
```

List override:

Not using `^` as the first entry will simply merge the lists

```
pillars:
  app:
    pkg:
      ^
      - app-frontend
```

Known limitation

Currently you can't have both a variable and an escaped variable in the same string as the escaped one will not be correctly rendered - `$xx` will stay as is instead of being rendered as `${xx}`
Lists of comments in state returns

State functions can now return a list of strings for the `comment` field, as opposed to only a single string. This is meant to ease writing states with multiple or multi-part comments.

Beacon configuration changes

In order to remain consistent and to align with other Salt components such as states, support for configuring beacons using dictionary based configuration has been deprecated in favor of list based configuration. All beacons have a validation function which will check the configuration for the correct format and only load if the validation passes.

**avahi_announce**

Old behavior:

```yaml
beacons:
  avahi_announce:
    run_once: True
    servicetype: _demo._tcp
    port: 1234
    txt:
      ProdName: grains.productname
      SerialNo: grains.serialnumber
      Comments: 'this is a test'
```

New behavior:

```yaml
beacons:
  avahi_announce:
    - run_once: True

```

**bonjour_announce**

Old behavior:

```yaml
beacons:
  bonjour_announce:
    run_once: True
    servicetype: _demo._tcp
    port: 1234
    txt:
      ProdName: grains.productname
      SerialNo: grains.serialnumber
      Comments: 'this is a test'
```

32.2. Previous releases

5091
New behavior:

```
beacons:
    bonjour_announce:
        - run_once: True
        - servicetype: _demo._tcp
        - port: 1234
        - txt:
            ProdName: grains.productname
            SerialNo: grains.serialnumber
            Comments: 'this is a test'
```

btmp

Old behavior:

```
beacons:
    btmp: {}
```

New behavior:

```
beacons:
    btmp: []
```

glxinfo

Old behavior:

```
beacons:
    glxinfo:
        user: frank
        screen_event: True
```

New behavior:

```
beacons:
    glxinfo:
        - user: frank
        - screen_event: True
```

haproxy

Old behavior:

```
beacons:
    haproxy:
        - www-backend:
            threshold: 45
            servers:
                - web1
```

(continues on next page)
New behavior:

```
beacons:
  haproxy:
    - backends:
      www-backend:
        threshold: 45
        servers:
          - web1
          - web2
        - interval: 120
```

inotify

Old behavior:

```
beacons:
  inotify:
    /path/to/file/or/dir:
      mask:
        - open
        - create
        - close_write
      recurse: True
      auto_add: True
      exclude:
        - /path/to/file/or/dir/exclude1
        - /path/to/file/or/dir/exclude2
        - /path/to/file/or/dir/regex[a-m]*$:
          regex: True
      coalesce: True
```

New behavior:

```
beacons:
  inotify:
    - files:
      /path/to/file/or/dir:
        mask:
          - open
          - create
          - close_write
        recurse: True
        auto_add: True
        exclude:
          - /path/to/file/or/dir/exclude1
          - /path/to/file/or/dir/exclude2
          - /path/to/file/or/dir/regex[a-m]*$:
```

(continues on next page)
regex: True
- coalesce: True

journald

Old behavior:

```yaml
beacons:
  journald:
    sshd:
      SYSLOG_IDENTIFIER: sshd
      PRIORITY: 6
```

New behavior:

```yaml
beacons:
  journald:
    services:
      sshd:
        SYSLOG_IDENTIFIER: sshd
        PRIORITY: 6
```

load

Old behavior:

```yaml
beacons:
  load:
    1m:
      - 0.0
      - 2.0
    5m:
      - 0.0
      - 1.5
    15m:
      - 0.1
      - 1.0
    emitatstartup: True
    onchangeonly: False
```

New behavior:

```yaml
beacons:
  load:
    averages:
      1m:
        - 0.0
        - 2.0
      5m:
        - 0.0
      ```
log

Old behavior:

```
beacons:
  log:
    file: <path>
    tags:
      regex: <pattern>
```

New behavior:

```
beacons:
  log:
    file: <path>
    tags:
      regex: <pattern>
```

network_info

Old behavior:

```
beacons:
  network_info:
    eth0:
      type: equal
      bytes_sent: 100000
      bytes_recv: 100000
      packets_sent: 100000
      packets_recv: 100000
      errin: 100
      errout: 100
      dropin: 100
      dropout: 100
```

New behavior:

```
beacons:
  network_info:
    interfaces:
      eth0:
        type: equal
```

(continues on next page)
network_settings

Old behavior:

```yaml
beacons:
  network_settings:
    eth0:
      ipaddr:
      promiscuity:
        onvalue: 1
    eth1:
      linkmode:
```

New behavior:

```yaml
beacons:
  network_settings:
    - interfaces:
      - eth0:
        ipaddr:
        promiscuity:
          onvalue: 1
      - eth1:
        linkmode:
```

proxy_example

Old behavior:

```yaml
beacons:
  proxy_example:
    endpoint: beacon
```

New behavior:

```yaml
beacons:
  proxy_example:
    - endpoint: beacon
```
ps

Old behavior:

```yaml
beacons:
  ps:
    - salt-master: running
    - mysql: stopped
```

New behavior:

```yaml
beacons:
  ps:
    - processes:
      salt-master: running
      mysql: stopped
```

salt_proxy

Old behavior:

```yaml
beacons:
  salt_proxy:
    - p8000: {}
    - p8001: {}
```

New behavior:

```yaml
beacons:
  salt_proxy:
    - proxies:
      p8000: {}
      p8001: {}
```

sensehat

Old behavior:

```yaml
beacons:
  sensehat:
    humidity: 70%
    temperature: [20, 40]
    temperature_from_pressure: 40
    pressure: 1500
```

New behavior:

```yaml
beacons:
  sensehat:
    - sensors:
      humidity: 70%
```

(continues on next page)
temperature: [20, 40]
temperature_from_pressure: 40
pressure: 1500

service

Old behavior:

```
beacons:
  service:
    salt-master:
    mysql:
```

New behavior:

```
beacons:
  service:
    - services:
      nginx:
        onchangeonly: True
        delay: 30
        uncleanshutdown: /run/nginx.pid
```

sh

Old behavior:

```
beacons:
  sh: {}
```

New behavior:

```
beacons:
  sh: []
```

status

Old behavior:

```
beacons:
  status: {}
```

New behavior:

```
beacons:
  status: []
```
telegram_bot_msg

Old behavior:

```yaml
beacons:
  telegram_bot_msg:
    token: "<bot access token>
    accept_from:
      - "<valid username>
    interval: 10
```

New behavior:

```yaml
beacons:
  telegram_bot_msg:
    - token: "<bot access token>
    - accept_from:
      - "<valid username>
    - interval: 10
```

twilio_txt_msg

Old behavior:

```yaml
beacons:
  twilio_txt_msg:
    account_sid: "<account sid>
    auth_token: "<auth token>
    twilio_number: +15555555555
    interval: 10
```

New behavior:

```yaml
beacons:
  twilio_txt_msg:
    - account_sid: "<account sid>
    - auth_token: "<auth token>
    - twilio_number: +15555555555
    - interval: 10
```

wtmp

Old behavior:

```yaml
beacons:
  wtmp: {}
```

New behavior:

```yaml
beacons:
  wtmp: []
```
New requisites available in state compiler

require_any

The use of require_any demands that one of the required states executes before the dependent state. The state containing the require_any requisite is defined as the dependent state. The states specified in the require_any statement are defined as the required states. If at least one of the required state's execution succeeds, the dependent state will then execute. If all of the executions by the required states fail, the dependent state will not execute.

watch_any

The state containing the watch_any requisite is defined as the watching state. The states specified in the watch_any statement are defined as the watched states. When the watched states execute, they will return a dictionary containing a key named "changes".

If the "result" of any of the watched states is True, the watching state will execute normally, and if all of them are False, the watching state will never run. This part of watch mirrors the functionality of the require requisite.

If the "result" of any of the watched states is True and the "changes" key contains a populated dictionary (changes occurred in the watched state), then the watch requisite can add additional behavior. This additional behavior is defined by the mod_watch function within the watching state module. If the mod_watch function exists in the watching state module, it will be called in addition to the normal watching state. The return data from the mod_watch function is what will be returned to the master in this case; the return data from the main watching function is discarded.

If the "changes" key contains an empty dictionary, the watch requisite acts exactly like the require requisite (the watching state will execute if "result" is True, and fail if "result" is False in the watched state).

onchanges_any

The onchanges_any requisite makes a state only apply one of the required states generates changes, and if one of the watched state's "result" is True. This can be a useful way to execute a post hook after changing aspects of a system.

onfail_any

The onfail_any requisite allows for reactions to happen strictly as a response to the failure of at least one other state. This can be used in a number of ways, such as executing a second attempt to set up a service or begin to execute a separate thread of states because of a failure.

The onfail_any requisite is applied in the same way as require_any and watch_any.

Basic Slots support in state compiler

Slots extend the state syntax and allows you to do things right before the state function is executed. So you can make a decision in the last moment right before a state is executed.

Slot syntax looks close to the simple python function call. Here is a simple example:

```
copy-some-file:
    file.copy:
```
- name: __slot__:salt:test.echo(text=/tmp/some_file)
- source: __slot__:salt:test.echo(/etc/hosts)

Read more here.

**Cryptographic layer changes**

M2Crypto is coming back. We are making the crypto backend modular but in this release M2Crypto is enabled if it's importable by Python. If not Cryptodome or PyCrypto is used as it was in the previous releases. M2Crypto is used in the same way as PyCrypto so there would be no compatibility issues, different nodes could use different backends.

**NaCL Module and Runner changes**

In addition to argument changes in both the NaCL module and runner for future removal in the 3000 release, the default "box_type" has changed from secretbox to sealedbox. SecretBox is data encrypted using private key sk and Sealedbox is encrypted using public key pk.

**utils functions reorganized into separate modules**

The Salt utility functions from salt.utils (typically used by those developing extension modules for Salt) have been moved into different modules, grouped logically based on their functionality. The old function names will continue to work until the 3000 release of Salt (due around Q1 2019).

The renamed functions are:

- salt.utils.appendproctitle: use salt.utils.process.appendproctitle instead.
- salt.utils.daemonize: use salt.utils.process.daemonize instead.
- salt.utils.daemonize_if: use salt.utils.process.daemonize_if instead.
- salt.utils.reinit_crypto: use salt.utils.crypt.reinit_crypto instead.
- salt.utils.to_bytes: use salt.utils.stringutils.to_bytes instead.
- salt.utils.to_str: use salt.utils.stringutils.to_str instead.
- salt.utils.to_unicode: use salt.utils.stringutils.to_unicode instead.
- salt.utils.str_to_num: use salt.utils.stringutils.to_num instead.
- salt.utils.is_quoted: use salt.utils.stringutils.is_quoted instead.
- salt.utils.dequote: use salt.utils.stringutils.dequote instead.
- salt.utils.is_hex: use salt.utils.stringutils.is_hex instead.
- salt.utils.is_bin_str: use salt.utils.stringutils.is_bin_str instead.
- salt.utils.rand_string: use salt.utils.stringutils.random instead.
- salt.utils.contains_whitespace: use salt.utils.stringutils.contains_whitespace instead.
- salt.utils.build_whitespace_split_regex: use salt.utils.stringutils.build_whitespace_split_regex instead.
- salt.utils.expr_match: use salt.utils.stringutils.expr_match instead.
- `salt.utils.check_whitelist_blacklist`: use `salt.utils.stringutils.check_whitelist_blacklist` instead.
- `salt.utils.check_include_exclude`: use `salt.utils.stringutils.check_include_exclude` instead.
- `salt.utils.print_cli`: use `salt.utils.stringutils.print_cli` instead.
- `salt.utils.clean_kwargs`: use `salt.utils.args.clean_kwargs` instead.
- `salt.utils.invalid_kwargs`: use `salt.utils.args.invalid_kwargs` instead.
- `salt.utils.shlex_split`: use `salt.utils.args.shlex_split` instead.
- `salt.utils.split_input`: use `salt.utils.args.split_input` instead.
- `salt.utils.test_mode`: use `salt.utils.args.test_mode` instead.
- `salt.utils.format_call`: use `salt.utils.args.format_call` instead.
- `salt.utils.which`: use `salt.utils.path.which` instead.
- `salt.utils.which_bin`: use `salt.utils.path.which_bin` instead.
- `salt.utils.check_or_die`: use `salt.utils.path.check_or_die` instead.
- `salt.utilssanitize_win_path_string`: use `salt.utils.path.sanitize_win_path_string` instead.
- `salt.utils.rand_str`: use `salt.utils.hashutils.random_hash` instead.
- `salt.utils.get_hash`: use `salt.utils.hashutils.get_hash` instead.
- `salt.utils.is_windows`: use `salt.utils.platform.is_windows` instead.
- `salt.utils.is_proxy`: use `salt.utils.platform.is_proxy` instead.
- `salt.utils.is_linux`: use `salt.utils.platform.is_linux` instead.
- `salt.utils.is_darwin`: use `salt.utils.platform.is_darwin` instead.
- `salt.utils.is_sunos`: use `salt.utils.platform.is_sunos` instead.
- `salt.utils.is_smartos`: use `salt.utils.platform.is_smartos` instead.
- `salt.utils.is_smartos_globalzone`: use `salt.utils.platform.is_smartos_globalzone` instead.
- `salt.utils.is_smartos_zone`: use `salt.utils.platform.is_smartos_zone` instead.
- `salt.utils.is_freebsd`: use `salt.utils.platform.is_freebsd` instead.
- `salt.utils.is_netbsd`: use `salt.utils.platform.is_netbsd` instead.
- `salt.utils.is_openbsd`: use `salt.utils.platform.is_openbsd` instead.
- `salt.utils.is_aix`: use `salt.utils.platform.is_aix` instead.
- `salt.utils.safe_rm`: use `salt.utils.files.safe_rm` instead.
- `salt.utils.is_empty`: use `salt.utils.files.is_empty` instead.
- `salt.utils.fopen`: use `salt.utils.files.fopen` instead.
- `salt.utils.flopen`: use `salt.utils.files.flopen` instead.
- `salt.utils.fpopen`: use `salt.utils.files.fpopen` instead.
- `salt.utils.rm_rf`: use `salt.utils.files.rm_rf` instead.
- `salt.utils.mkstemp`: use `salt.utils.files.mkstemp` instead.
- `salt.utils.istextfile`: use `salt.utils.files.is_text_file` instead.
- `salt.utils.is_bin_file`: use `salt.utils.files.is_binary` instead.
- `salt.utils.list_files`: use `salt.utils.files.list_files` instead.
- `salt.utils.safe_walk`: use `salt.utils.files.safe_walk` instead.
- `salt.utils.st_mode_to_octal`: use `salt.utils.files.st_mode_to_octal` instead.
- `salt.utils.normalize_mode`: use `salt.utils.files.normalize_mode` instead.
- `salt.utils.human_size_to_bytes`: use `salt.utils.files.human_size_to_bytes` instead.
- `salt.utils.backup_minion`: use `salt.utils.files.backup_minion` instead.
- `salt.utils.str_version_to_evr`: use `salt.utils.pkg.rpm.version_to_evr` instead.
- `salt.utils.parse_docstring`: use `salt.utils.doc.parse_docstring` instead.
- `salt.utils.compare_versions`: use `salt.utils.versions.compare` instead.
- `salt.utils.version_cmp`: use `salt.utils.versions.version_cmp` instead.
- `salt.utils.warn_until`: use `salt.utils.versions.warn_until` instead.
- `salt.utils.kwvars_warn_until`: use `salt.utils.versions.kwargs_warn_until` instead.
- `salt.utils.get_color_theme`: use `salt.utils.color.get_color_theme` instead.
- `salt.utils.get_colors`: use `salt.utils.color.get_colors` instead.
- `salt.utils.gen_state_tag`: use `salt.utils.state.gen_tag` instead.
- `salt.utils.search_onfail_requisites`: use `salt.utils.state.search_onfail_requisites` instead.
- `salt.utils.check_state_result`: use `salt.utils.state.check_result` instead.
- `salt.utils.get_user`: use `salt.utils.user.get_user` instead.
- `salt.utils.get_uid`: use `salt.utils.user.get_uid` instead.
- `salt.utils.get_specific_user`: use `salt.utils.user.get_specific_user` instead.
- `salt.utils.chugid`: use `salt.utils.user.chugid` instead.
- `salt.utils.chugid_and_umask`: use `salt.utils.user.chugid_and_umask` instead.
- `salt.utils.get_default_group`: use `salt.utils.user.get_default_group` instead.
- `salt.utils.get_group_list`: use `salt.utils.user.get_group_list` instead.
- `salt.utils.get_group_dict`: use `salt.utils.user.get_group_dict` instead.
- `salt.utils.get_gid_list`: use `salt.utils.user.get_gid_list` instead.
- `salt.utils.get_gid`: use `salt.utils.user.get_gid` instead.
- `salt.utils.enable_ctrl_logoff_handler`: use `salt.utils.win_functions.enable_ctrl_logoff_handler` instead.
- salt.utils.traverse_dict: use salt.utils.data.traverse_dict instead.
- salt.utils.traverse_dict_and_list: use salt.utils.data.traverse_dict_and_list instead.
- salt.utils.filter_by: use salt.utils.data.filter_by instead.
- salt.utils.subdict_match: use salt.utils.data.subdict_match instead.
- salt.utils.substr_in_list: use salt.utils.data.substr_in_list instead.
- salt.utils.is_dictlist: use salt.utils.data.is_dictlist.
- salt.utils.repack_dictlist: use salt.utils.data.repack_dictlist instead.
- salt.utils.compare_dicts: use salt.utils.data.compare_dicts instead.
- salt.utils.compare_lists: use salt.utils.data.compare_lists instead.
- salt.utils.decode_dict: use salt.utils.data.encode_dict instead.
- salt.utils.decode_list: use salt.utils.data.encode_list instead.
- salt.utils.exactly_n: use salt.utils.data.exactly_n instead.
- salt.utils.exactly_one: use salt.utils.data.exactly_one instead.
- salt.utils.is_list: use salt.utils.data.is_list instead.
- salt.utils.is_iter: use salt.utils.data.is_iter instead.
- salt.utils.isorted: use salt.utils.data.sorted_ignorecase instead.
- salt.utils.is_true: use salt.utils.data.is_true instead.
- salt.utils.mysql_to_dict: use salt.utils.data.mysql_to_dict instead.
- salt.utils.simple_types_filter: use salt.utils.data.simple_types_filter instead.
- salt.utils.ip_bracket: use salt.utils.zeromq.ip_bracket instead.
- salt.utils.mac_str_to_bytes: use salt.utils.network.mac_str_to_bytes instead.
- salt.utils.refresh_dns: use salt.utils.network.refresh_dns instead.
- salt.utils.dns_check: use salt.utils.network.dns_check instead.
- salt.utils.get_context: use salt.utils.stringutils.get_context instead.
- salt.utils.get_master_key: use salt.utils.master.get_master_key instead.
- salt.utils.date_cast: use salt.utils.dateutils.date_cast instead.
- salt.utils.date_format: use salt.utils.dateutils.strftime instead.
- salt.utils.total_seconds: use salt.utils.dateutils.total_seconds instead.
- salt.utils.find_json: use salt.utils.json.find_json instead.
- salt.utils.import_json: use salt.utils.json.import_json instead.
- salt.utils.namespaced_function: use salt.utils.functools.namespaced_function instead.
- salt.utils.alias_function: use salt.utils.functools.alias_function instead.
• salt.utils.profile_func: use salt.utils.profile.profile_func instead.
• salt.utils.activate_profile: use salt.utils.profile.activate_profile instead.
• salt.utils.output_profile: use salt.utils.profile.output_profile instead.

Deprecations

Configuration Option Deprecations

• The requests_lib configuration option has been removed. Please use backend instead.

Profitbricks Cloud Updated Dependency

The minimum version of the profitbrick python package for the profitbricks cloud driver has changed from 3.0.0 to 3.1.0.

Execution Module Deprecations

• The blockdev execution module has been removed. Its functions were merged with the disk module.
• The lxc execution module has been changed as follows:
  – The dnsservers option to lxc.cloud_init_interface no longer defaults to 4.4.4.4 and 8.8.8.8.
  – The dns_via_dhcp option to lxc.cloud_init_interface now defaults to True instead of False.
• The win_psget module has been changed as follows:
  – The psget.psversion function was removed. Please use cmd.shell_info instead.
• The win_service module (which provides the service module on Windows platforms) has been changed as follows:
  – The config function was removed. Please use service.modify instead.
  – The following arguments to the service.create function have been renamed:
    * binpath has been renamed to bin_path
    * depend has been renamed to dependencies
    * DisplayName has been renamed to display_name
    * error has been renamed to error_control
    * group has been renamed to load_order_group
    * obj has been renamed to account_name
    * password has been renamed to account_password
    * start has been renamed to start_type
    * type has been renamed to service_type
• The nacl module has been changed as follows:
  – The following arguments have been renamed in the nacl.keygen, nacl.enc, and nacl.dec:
• key_file has been renamed to sk_file
• key has been renamed to sk

Runner Deprecations

• The manage runner has been changed as follows:
  – root_user argument was removed from the manage.bootstrap function. Please use salt-ssh roster entries for the host instead.
• The nacl runner has been changed as follows:
  – The following arguments have been renamed in the nacl.keygen, nacl.enc, and nacl.dec:
    • key_file has been renamed to sk_file
    • key has been renamed to sk

State Deprecations

• In the archive state, the tar_options and zip_options options were removed. Please use options instead.
• The cmd state had the following changes:
  – The user and group options were removed from the following functions (please use runas instead):
    • cmd.run
    • cmd.script
    • cmd.wait
    • cmd.wait_script
• In the file states, the show_diff option was removed in all states where it was previously supported. Please use show_changes instead.

Grain Deprecations

• For smartos, some grains have been deprecated. These grains will be removed in 3000:
  – The hypervisor_uuid grain has been replaced with mdata:sdc:server_uuid
  – The datacenter grain has been replaced with mdata:sdc:datacenter_name

Pillar Deprecations

The legacy configuration for git_pillar has been removed. Please use the new configuration for git_pillar which was added in 2015.8.0, which is documented here.
Utilities Deprecations

- In `salt.utils.cloud`, the `fire_event` function now requires a `sock_dir` argument. It was previously optional.

Other Miscellaneous Deprecations

- In `version.py`, the `rc_info` function was removed. Please use `pre_info` instead.
- Warnings for moving away from the `env` option were removed. `saltenv` should be used instead. The removal of these warnings does not have a behavior change. Only the warning text was removed.

Minion Blackout

During a blackout, minions will not execute any remote execution commands, except for `saltutil.refresh_pillar`. Previously, support was added so that blackouts are enabled using a special pillar key, `minion_blackout` set to `True` and an optional pillar key `minion_blackout_whitelist` to specify additional functions that are permitted during blackout. This release adds support for using this feature in the grains as well, by using special grains keys `minion_blackout` and `minion_blackout_whitelist`.

Sentry Log Handler

Configuring sentry raven python client via `project, servers, public_key` and `secret_key` is deprecated and won't work with sentry clients > 3.0. Instead, the `dsn` config param must be used.

RAET transport

We haven’t been doing development on RAET for quite some time and decided that 2018.3.0 is the time to announce the deprecation. RAET support will be removed in 3000. Please consider to move to `zeromq` or `tcp` transport instead of `raet`.

32.2.60 Salt 2018.3.1 Release Notes

Version 2018.3.1 is a bugfix release for 2018.3.0.

Statistics

- Total Merges: 525
- Total Issue References: 74
- Total PR References: 255
- Contributors: 55 (Ch3LL, DmitryKuzmenko, Giandom, Kimol, L4rS6, LukeCarrier, OrlandoArcapix, TamCore, The-Loeki, UtahDave, aesposito91, bbinet, bdrung, boltronics, bosatsu, clan, corywright, damon-atkins, dincamihai, dmurphy18, dnAbic, douglasjreynolds, dwoz, edgan, ejparker12, esell, ezh, femnad, folti, garethgreenaway, gtimanfred, isbm, jasperla, johnj, mateiw, mcalmer, mirceaulinic, morganwillcock, opdude, pcn, pruiz, psagers, psyer, rallytime, robinro, s0undt3ch, samodid, shengis, skjaro, tankywoo, terminalmage, twangboy, vutny, yannj-fr, zmedico)
Warning: If you are using Jinja to dump lists or dictionaries in your SLS files, this will now cause errors in Python 2 since Jinja does not produce YAML-compatible output when strings in the data structures contain unicode types. The dictionary must be passed through a Jinja filter to produce YAML-compatible strings.

The below is an example of invalid SLS:

```
/etc/foo.conf:
  file.mangaged:
    - source: salt://foo.conf
    - template: jinja
    - defaults: {{ mydict }}
```

To make it valid, use either one of Salt's own `json` or `yaml` filters:

```
/etc/foo.conf:
  file.mangaged:
    - source: salt://foo.conf
    - template: jinja
    - defaults: {{ mydict | json }}
```

Tornado 5.0 Support for Python 2 Only

Tornado 5.0 moves to using asyncio for all python3 versions. Because of this and changes in asyncio between python 3.4 and 3.5 to only be able to use one ioloop, which requires some rearchitecting, support for tornado 5.0 and python3 versions of salt has been delayed to a later release.

For now, to use tornado 5.0, the python 2 version of salt must be used.

Changes to Slack Engine pillars

When using `groups_pillar_name` for the slack engine, the engine should be used as part of a salt-minion process running on the master. This will allow the minion to have pillars assigned to it, and will still allow the engine to create a LocalClient connection to the master ipc sockets to control environments.

Changes to Automatically Updating the Roster File

In 2018.3.0 salt-ssh was configured to automatically update the flat roster file if a minion was not found for salt-ssh. This was decided to be undesirable as a default. The `--skip-roster` flag has been removed and replaced with `--update-roster`, which will enable salt-ssh to add minions to the flat roster file. This behavior can also be enabled by setting `ssh_update_roster: True` in the master config file.

Changes to file.blockreplace State

The `append_newline` argument was added to this state. Additionally, to improve idempotence, if the string represented by `marker_end` is found in the middle of the line, the content preceding the marker will be removed when the block is replaced. This allows one to remove `append_newline: False` from the SLS and have the block properly replaced if the end of the content block is immediately followed by the `marker_end` (i.e. no newline before the marker).
Note: This will require changes to your SLS if your marker_end does not include the very beginning of the content you want to keep.

See the file.blockreplace state documentation for further information.

Changelog for v2018.3.0..v2018.3.1

Generated at: 2018-06-06 17:43:01 UTC

• ISSUE #47955: (frogunder) 2018.3.1 Creating Windows machine in Amazon using salt-cloud fails. (refs: #47989)

• PR #47998: (rallytime) Back-port #47989 to 2018.3.1 @ 2018-06-06 17:08:04 UTC
  – PR #47989: (dwoz) Properly decode password from aws using m2crypto (refs: #47998)
  – 605463ca0d Merge pull request #47998 from rallytime/bp-47989
  – 1b7e9ac2d3 Lint fixes
  – 054512dd Properly decode password from aws using m2crypto

• PR #47965: (Ch3LL) Add PR 47924 from 2018.3 branch @ 2018-06-06 13:54:09 UTC
  – dbc798ac68 Merge pull request #47965 from Ch3LL/gitpy_mac_3.1
  – b6f60ab4d4 Catch all exceptions in git import for salt.utils.gitfs

• PR #47973: (terminalmage) salt.modules.testinframod: fix TypeError invoking types.FunctionType @ 2018-06-06 13:53:46 UTC
  – 864d640633 Merge pull request #47973 from terminalmage/fix-testinfra
  – 4518e89484 Lint: Remove unused six import
  – c6816b2149 salt.modules.testinframod: fix TypeError invoking types.FunctionType

• ISSUE #47236: (MorphBonehunter) x509.private_key_managed broken after upgrade to 2018.3.0 (refs: #47957)

• PR #47967: (rallytime) Back-port #47957 to 2018.3.1 @ 2018-06-06 13:53:28 UTC
  – PR #47957: (garethgreenaway) [2018.8] Ensure x509 passphrase is a string (refs: #47967)
  – 5ddcfff420 Merge pull request #47967 from rallytime/bp-47957
  – 9a55579af1 removing unnecessary change
  – 329b2e5956 Ensuring that when a passphrase is passed in, it is returned as a string from the passphrase callback.

• PR #47902: (Ch3LL) Remove In Progress for 2018.3.1 Release Notes @ 2018-05-30 18:26:49 UTC
  – 9e964f4bce Merge pull request #47902 from Ch3LL/rn_in_progress
  – f560a151cd Remove In Progress for 2018.3.1 Release Notes

• PR #47897: (Ch3LL) Add changelog to 2018.3.1 release notes @ 2018-05-30 15:04:42 UTC
  – ea7b4fdd90 Merge pull request #47897 from Ch3LL/rn_2018
  – e27e273a7 Add == line to changelog line for release notes
  – 61e65d275d Add changelog to 2018.3.1 release notes

• ISSUE #47784: (jpsv) win_lgpo.py line 5368; AttributeError: 'OrderedDict' object has no attribute 'lower' (refs: #47848)
- **PR #47848**: (twangboy) Fix some major issues with the LGPO module @ 2018-05-30 13:37:32 UTC
  - f15e636d5e Merge pull request #47848 from twangboy/fix_47784
  - 98f4b3f4c8 Remove log.debug statement in __virtual__
  - f037fa40fe44 Fix some major issues with the LGPO module
- **PR #47881**: (gtmanfred) quote python_version in requirements.txt @ 2018-05-29 21:12:05 UTC
  - 92b8c408 Merge pull request #47881 from gtmanfred/2018.3.1
  - 3d847b5529 quote python_version in requirements.txt
- **PR #47874**: (gtmanfred) Tornado 5.0 is only supported on python 2 for now @ 2018-05-29 19:45:44 UTC
  - 705bf8172d Merge pull request #47874 from gtmanfred/2018.3.1
  - 13f920415a add tornado5 note to 2018.3.1
  - 98facf8dc8 Remove log.debug statement in __virtual__
- **PR #47820**: (Ch3LL) Remove output_loglevel in mac_system module @ 2018-05-25 13:10:36 UTC
  - 09e8c5f0c0 Merge pull request #47820 from Ch3LL/mac_system
  - 36241453b Remove output_loglevel in mac_system module
- **PR #47798**: (rallytime) Back-port #47776 to 2018.3.1 @ 2018-05-23 15:10:43 UTC
  - PR #47776: (garethgreenaway) [2018.3] Fixes to failing _before_connect tests (refs: #47798)
  - 7e314c26c8 Merge pull request #47798 from rallytime/bp-47776
  - ae8154b2d Fixing unit.test_minion.MinionTestCase.test_beacons_before_connect and unit.test_minion.MinionTestCase.test_scheduled_before_connect.
- **PR #47782**: (rallytime) Back-port #47775 to 2018.3.1 @ 2018-05-22 20:56:37 UTC
  - PR #47775: (gtmanfred) catch UnsupportedOperation with AssertionError (refs: #47782)
  - 9c610dc0bc Merge pull request #47782 from rallytime/bp-47775
  - bab9c665ca catch UnsupportedOperation with AssertionError
- **PR #47770**: (rallytime) Back-port #47769 to 2018.3.1 @ 2018-05-22 17:27:20 UTC
  - PR #47769: (gtmanfred) skip test that breaks test suite (refs: #47770)
  - 4c60da0bc Merge pull request #47770 from rallytime/bp-47769
  - 3c9c7bec skip test that breaks test suite
- **PR #47724**: (terminalmage) 2 master_tops/ext_nodes fixes @ 2018-05-21 15:59:04 UTC
  - bbe8e62a98 Merge pull request #47724 from terminalmage/master_tops_fixes
  - 48b8c5a1d1 Merge branch ’2018.3.1’ into master_tops_fixes
  - 89b3070d4c Change deprecation warning to debug logging
  - ceb610b87 Fix spurious "Malformed request" error
- **ISSUE #47484**: (whytewolf) Windows: pkg.latest state not updating packages. (refs: #47702)
- **PR #47739**: (rallytime) Back-port #47702 to 2018.3.1 @ 2018-05-21 15:37:03 UTC
  - PR #47702: (damon-atkins) State pkg.latest called win pkg.install with list of pkgs and the required versions (refs: #47739)
  - 97d6fe7434 Merge pull request #47739 from rallytime/bp-47702
- f79da64bb0 Update is_windows path to use platform
- f04b19b5b6 Ensure targeted_pkgs always contains value for non-windows.
- 14659f9cad Adjusted based on feedback.
- 9f18f7cd5f Whitespace lint issues
- 2a92b28ee6 pkg.install execution module on windows ensures the software package is installed when no version is specified, it does not upgrade the software to the latest. This is per the design. pkg.latest must provide the versions to install to pkg.install

- **PR #47730**: (rallytime) Back-port #47700 to 2018.3.1 @ 2018-05-21 15:36:16 UTC
  - PR #47700: (yannj-fr) fix roots modification time check (refs: #47730)
  - cbe0ba73e Merge pull request #47730 from rallytime/bp-47700
  - 9bc35b88ea fix roots modification time check

- **PR #47727**: (Ch3LL) Fix salt.utils.versions.warn_until spelling @ 2018-05-21 13:41:00 UTC
  - 36143d83a Merge pull request #47727 from Ch3LL/spelling
  - 47a8de5b73 Fix salt.utils.versions.warn_until spelling

- **PR #47736**: (Ch3LL) mac_utils test: patch __salt__['cmd.run*'] @ 2018-05-21 13:38:59 UTC
  - bb45cda0e Merge pull request #47736 from Ch3LL/fx_util_mac_test
  - ee90c779a8 mac_utils test: patch __salt__['cmd.run*']

- **PR #47641**: (gtmanfred) fix _create_stream and tornado 5.0 @ 2018-05-18 14:25:36 UTC
  - 43930f88ac Merge pull request #47641 from gtmanfred/2018.3.1
  - 037fd92f59 fix pylint
  - 75d42d8963 Fix last test for tornado
  - a046512287 allow using tornado 5.0
  - 05e651038 fix _create_stream and tornado 5.0

- **ISSUE #47532**: (edgan) roster auto-add feature in salt-ssh-2018.3.0 (refs: #47541)

- **PR #47541**: (gtmanfred) switch skip-roster to update-roster @ 2018-05-18 13:29:50 UTC
  - 9f926bcd1a Merge pull request #47541 from gtmanfred/2018.3
  - 8c5c780792 switch skip-roster to update-roster

- **PR #47719**: (rallytime) Back-port #47692 to 2018.3.1 @ 2018-05-18 13:22:02 UTC
  - PR #47692: (dwoz) Default windows to m1.small for ec2-classic (refs: #47719)
  - a963f1b558 Merge pull request #47719 from rallytime/bp-47692
  - 1df247f787 Default windows to m1.small for ec2-classic

- **PR #47706**: (Ch3LL) Add cmd._run_all_quiet to mac_utils and __utils__ in mac_service @ 2018-05-18 01:11:46 UTC
  - c910893ab Merge pull request #47706 from Ch3LL/mac_service_util
  - 3611a6f99f remove added space
  - 9921ca1a43 fix pylint
  - 317e41d3c0 use cmd._run_quiet and cmd._run_all_quiet instead of importing minion_mods in __salt__
- a78652515a Add __salt__ to mac_utils and __utils__ in mac_service

- **PR #4764: (rallytime)** Back-port **#47645** to 2018.3.1 @ 2018-05-15 18:25:27 UTC
  - PR #47645: (Ch3LL) query the pip path for test test_issue_2087_missing_pip (refs: #47664)
  - fb3b1ff3e Merge pull request #47644 from rallytime/bp-47645
  - 0a732d8e66 query the pip path for test test_issue_2087_missing_pip

- **PR #47647: (rallytime)** Back-port **#47601** and **#47643** to 2018.3.1 @ 2018-05-15 14:07:54 UTC
  - PR #47643: (dwoz) Remove unwanted file (refs: #47647)
  - PR #47601: (dwoz) Skip tests when we can not use runas (refs: #47647)
  - 9039fee104 Merge pull request #47664 from rallytime/bp-47601-and-47643-2018.3.1
  - 7214fe17c8 Fix typo
  - 506deeed17 Remove unwanted file
  - b6a21dfda3 use ignore-undefined-variable
  - 2429f9fe8a Ignore pylint WindowsError
  - 2d6362fe9a Better doc string
  - ec2adff699 Skip tests when we can not use runas

- **PR #47596: (rallytime)** Back-port **#47568** to 2018.3.1 @ 2018-05-10 22:09:09 UTC
  - PR #47568: (terminalmage) salt.serializers.yaml/yamlex: remove invalid multi_constructor (refs: #47596)
  - 17b5265d95 Merge pull request #47596 from rallytime/bp-47568
  - ecf5dc8b9f Add exception logging on serialize/deserialize exceptions
  - 9659b19819 salt.serializers.yaml/yamlex: remove invalid multi_constructor

- **PR #47599: (rallytime)** Back-port **#47570** to 2018.3.1 @ 2018-05-10 22:06:44 UTC
  - PR #47570: (gtmanfred) Update dependency to msgpack (refs: #47599)
  - ec7de14be0 Merge pull request #47599 from rallytime/bp-47570
  - 9334c03da9 Update dependency to msgpack

- **PR #47571: (rallytime)** [2018.3.1] Update man pages @ 2018-05-10 16:21:57 UTC
  - 2a10d92669 Merge pull request #47571 from rallytime/man-pages
  - ade5e6f664 [2018.3.1] Update man pages

- **PR #47550: (pcn)** Fixes a bad deletion I did that only surfaced in 2018.3 @ 2018-05-09 13:36:33 UTC
  - 85284caaf9 Merge pull request #47550 from pcn/fix-disable-term-protect-in-2018.3
  - d58a56877c Fixes a bad deletion I did that only surfaced in 2018.3
• ISSUE #47553: (douglasreynolds) Unicode version error in lxc (refs: #47554)

• PR #47554: (douglasreynolds) Converted unicode str version to a LooseVersion; matching line 2080. @ 2018-05-09 13:34:13 UTC
  - f9083ff77e Merge pull request #47554 from douglasreynolds/lxc_unicode_fix
  - e6bc581c6 Converted unicode str version to _LooseVersion to match line 2080.

• PR #47518: (Ch3LL) Fix 47364: ensure we are not caching zfs.is_supported @ 2018-05-09 13:29:07 UTC
  - fe4e79f1de Merge pull request #47518 from Ch3LL/zfs_support
  - d19f6f963e remove unnecessary patch in zfs.is_supported test
  - 58c4f2906 Fix 47364: ensure we are not caching zfs.is_supported

• PR #47159: (terminalmage) Fix for whitelist/blacklist checking for non-list iterables @ 2018-05-08 20:43:51 UTC
  - 332e9f13a6 Merge pull request #47159 from terminalmage/whitelist_blacklist-iter-fix
  - ca936de372 Treat empty whitelist/blacklist as no whitelist/blacklist
  - bcccaf2621 Raise a TypeError when invalid input passed to check_whitelist_blacklist
  - 2ae510ff2b Fix comment in test
  - 17398efc7 Fix for whitelist/blacklist checking for non-list iterables

• PR #47514: (rallytime) [2018.3] Merge forward from 2017.7 to 2018.3 @ 2018-05-05 18:36:54 UTC
  - 21809ddc02 Merge pull request #47514 from rallytime/merge-2018.3
  - e261b605f Update the pip tests to use the parsing syntax generated in PR #47196
  - b13b59791f Remove double instance of adding --format=json in pip module
  - 2ad60c7e81 Lint: remove duplicate function in helpers.py
  - 75480158b3 Lint: cur_version should just be pip_version
  - 5565d5e9b1 Update old util paths with new util paths
  - 786076ac03 Merge branch ’2017.7’ into ’2018.3’
    • 611ca1fc03 Merge pull request #47476 from gtmanfred/2017.7
      • 1f91a85587 specify cache dir for pip install
      • 99e150e09c check for kitchen-vagrant gem before loading windows tests
    • 7c3f2c56da Merge pull request #47412 from twangboy/fix_47125
      • c9bab0b8e3 Merge branch ’2017.7’ into fix_47125
      • 2600e404d5 Fix overly long line
      • 5c8db05769 Fix issue where the cwd was being removed
    • 4846e957c4 Merge pull request #47467 from twangboy/cleanup_settings
      • 9d498299b1 Remove unused settings, update NSIS
    • da9871d36b Merge pull request #47196 from twangboy/fix_47024
      • 14ee5337b9 Add @with_tempdir helper
      • 6c3b5fa6fa Fix typo
      • f031710af2 Merge branch ’2017.7’ into fix_47024
• 7c46d9d0d4 Fix integration.modules.test_pip
• 22ac81df63 Fix integration.modules.test_pip
• 57d98224d4 Merge pull request #9 from terminalmage/twangboy/fix_47024
• 3e6e524eca Fix some tests``
• c94f0f20e4 Fix lint error
• fd47b21530 Fix merge conflict
  * e8c4524bae Merge pull request #47555 from Ch3LL/unreleased_rn
    * b6d0cc2ab7 Add In Progress Warning for 2017.7.6 Release Notes
  * 2c7a4b6179 Merge pull request #47459 from gtmanfred/2017.7
    * d228e72477 update ubuntu-rolling to 18.04
  * 64a64c0ed7 Merge pull request #47462 from terminalmage/docs
    * 6d7803ece0 Fix docs build on Sphinx 1.7+
  * 6cd0d31c03 Merge pull request #47438 from lomeroe double_admx_test
    * 4902f1e2ba check if a policy has either an enabled value or enabled list entry or a disabled value or disabled list entry when determining the state of the policy
  * ed69821d19 Merge pull request #47433 from s0undt3ch/2017.7
    * 5abadf25d6 Add missing requirements files not committed in #47106

  • ISSUE #47443: (skylerberg) Input validation does not raise SaltInvocationError in win_dsc.py (refs: #47505)
  • PR #47516: (rallytime) Back-port #47505 to 2018.3 @ 2018-05-08 13:32:33 UTC
    * PR #47505: (dwoz) Raise proper invocation errors (refs: #47516)

    * 7c60e4071e Raise proper invocation errors

  • ISSUE #47502: (psagers) service.enable (and .disable) destroys /etc/rc.conf on FreeBSD (refs: #47503)
  • PR #47515: (rallytime) Back-port #47503 to 2018.3 @ 2018-05-08 13:32:03 UTC
    * PR #47503: (psagers) Fix #47502: Remove an extraneous (accidentally introduced?) call to rstrip() (refs: #47515)
    * bf79ac8c8 Merge pull request #47515 from rallytime/bp-47503
    * 821dbb88a0 Fix #47502: Remove an extraneous (accidentally introduced?) call to rstrip.

  • ISSUE #47511: (joesusecom) sshconfig salt-ssh roster is missing in the documentation (refs: #47531)
  • PR #47531: (gtmanfred) add ssh config doc for rosters @ 2018-05-07 22:26:30 UTC
    * 779b3ed056 Merge pull request #47531 from gtmanfred/2018.3
    * 92ded7162c add ssh config doc for rosters

  • PR #47520: (rallytime) Cleanup weird spaces @ 2018-05-07 19:50:36 UTC
Salt Documentation, Release 3006.4

- 95b2f9db30 Merge pull request #47520 from rallytime/cleanup-spaces
- e9cb080a00 Cleanup weird spaces

- **PR #47495**: (dwoz) Fix crufty nssm.exe reference @ 2018-05-07 19:12:49 UTC
  - 05fc52f124 Merge pull request #47495 from dwoz/uninstall_wart
  - cca36c9064 Merge branch '2018.3' into uninstall_wart

- **ISSUE #47322**: (masau) lxc clone not working (refs: #47494)

- **PR #47494**: (ejpark12) Fixed lxc.clone unhandled exception in salt/modules/lxc.py @ 2018-05-07 19:03:58 UTC
  - 3cc7d3ae7c Merge pull request #47494 from ejpark12/lxc-clone
  - e0e2c9782d Fixed lxc.clone unhandled exception in salt/modules/lxc.py

- **ISSUE #47496**: (mateiw) salt-ssh --extra-filerefs doesn't include any files if no refs in state files (refs: #47497)

- **PR #47497**: (mateiw) Fix salt-ssh --extra-filerefs to include files even if no refs in states to apply @ 2018-05-07 19:02:50 UTC
  - adde83f639 Merge pull request #47497 from mateiw/2018.3-fix-ssh-extra-files-refs-issue-47496
  - d67239aae7 --extra-filerefs include files even if no refs in states to apply

- **ISSUE #47404**: (shengis) Localized version of yum breaks pkg.install (refs: #47441)

- **PR #47441**: (shengis) Fix _run to reset LANGUAGE env variable @ 2018-05-07 18:29:25 UTC
  - 34b1b1ee53 Merge pull request #47441 from shengis/fix-run-env-reset
  - 62fc16b721 Merge branch '2018.3' into fix-run-env-reset
  - 3b02b0bdc1 Merge branch '2018.3' into fix-run-env-reset
  - ee2ab38c8c Fix _run to reset LANGUAGE env variable

- **ISSUE #47479**: (whytwolf) win_task.info on py3 throwing error, but works in py2 (refs: #47507)

- **PR #47507**: (gtmanfred) fix win_task for py3 @ 2018-05-07 17:41:21 UTC
  - 17cfdf4f7f Merge pull request #47507 from gtmanfred/2018.3
  - 19db3f402 fix win_task for py3

- **PR #47472**: (terminalmage) salt.utils.hashutils: Fix UnicodeEncodeError in several funcs @ 2018-05-07 13:31:07 UTC
  - a4c2df8f62 Merge pull request #47472 from terminalmage/hashutils
  - 7266c9984d salt.utils.hashutils: Fix UnicodeEncodeError in several funcs

- **PR #47485**: (gtmanfred) add openstack modules to doc index.rst @ 2018-05-07 13:11:42 UTC
  - 8b0a370189 Merge pull request #47485 from gtmanfred/2018.3
  - c86163d79f add openstack modules to doc index.rst
  - 3557fc5fa6 Fix crufty nssm.exe reference

- **PR #47482**: (gtmanfred) add all autodoc for new salt openstack modules @ 2018-05-04 21:03:38 UTC
  - 8df37f734a Merge pull request #47482 from gtmanfred/2018.3
  - 1f65dc5b73 add all autodoc for new salt openstack modules

- **PR #47447**: (dwoz) Fix failing test due to windows console encoding @ 2018-05-04 16:41:29 UTC
  - d20ca15c5d Merge pull request #47447 from dwoz/strv

32.2. Previous releases
- 8c01773833 Use the same non decodable bytes for all tests
- 983881a2a1 Add bytes that will not decode using cp1252

- **PR #47466**: (dwoz) bytes file that decodes the same utf-8 and cp1252 @ 2018-05-04 15:54:24 UTC
  - 8c5b30b541 Merge pull request #47466 from dwoz/randbytes
  - fd9bc06aabb bytes file that decodes the same utf-8 and cp1252

- **ISSUE #46660**: (mruepp) top file merging same does produce conflicting ids with gitfs (refs: #47354, #46751)

- **PR #47465**: (rallytime) Back-port #47354 to 2018.3 @ 2018-05-04 13:06:04 UTC
  - **PR #47354**: (folti) fix forward port of #46751 (refs: #47465)
  - **PR #46751**: (folti) top file merging strategy 'same' works again (refs: #47354)
  - 3658604c43 Merge pull request #47465 from rallytime/bp-47354
  - 3df6fa7990 fix forward port of #46751

- **PR #47435**: (rallytime) [2018.3] Merge forward from 2017.7 to 2018.3 @ 2018-05-04 13:05:32 UTC
  - fa293f8fac Merge pull request #47435 from rallytime/merge-2018.3
  - be0731da5f Add skipIfs back in for rest_tornado tests
  - fd98ee3dc1 Lint: Add missing blank line
  - 561718b20b Update old is_windows util path to new util path
  - a94cd8a0d Merge branch '2017.7' into '2018.3'
    * 7ae3497b0c Merge pull request #47429 from gtmanfred/2017.7
      - 8ae32033cc server_list_min should use state, not status
    * 2f5fe4cc5 Merge pull request #47399 from isbm/isbm-zeromq17-deprecationwarning-2017.7.2-v2
      - a36e49fd27 fix pylint
      - 98b5629b36 Fix imports
      - d94c0f0152 Remove unnecessary variable
      - 8e377b5653 Lintfix: E0203 and attribute access
      - 2a9b70b1b8 Install ZMQ handler if <15 version
      - 296c589f4b Use ZMQ switch utility in the integration tests
      - ab5fa34d7c Use ZMQ VERSION_INFO constant everywhere
      - 43b5558b82 Add trace logging on ZMQ sockets communication
      - 16420a49fe Remove duplicate code for ZMQ monitor handling
      - 834b1e4ff0 Remove obsolete ZMQIOLoop direct instance
      - 1c90cd6b3c Remove an empty line
      - ef20e0d66 Add logging on ZMQ socket exception
      - 38ceed371d Lintfix: ident
      - 1ece6a5f52 Lintfix: line too long
      - 4e650c0b44 Remove code duplicate by reusing utilities functions
      - 57da54b676 Fix imports
- 948368e9a1 Add libzmq version info builder
- 0b4a17b859 Update log exception message
- 116e1809fc Put a message alongside the exception to the logs
- 4bc43124b7 Remove unnecessary ZMQ import and check for its presence
- 05f4d40269 Use utility for ZMQ import handling in SSH client
- 457ef7d9a5 Use utility for ZMQ import handling in flo/zero
- 08de6e5bd Use utility for ZMQ import handling
- e2a353c9b0 Remove unnecessary ZMQ extra-check for cache utils
- c8f2cc271d Remove unnecessary ZMQ extra-check for master utils
- 3940667bb9 Remove old ZMQ import handling
- f34a53e029 Use ZMQ utility for version check
- cbb26dcb28 Use ZMQ installer for master
- 453e83210a Add ZMQ version build
- af9601e21d Use ZMQ importer utility in async
- d50b2b2023 Incorporate tornado-5 fixes
- 1fd9a0655 Add ZMQ backward-compatibility tornado installer for older versions
- ad4b4015c Add one place for handling various ZMQ versions and IOLoop classes

* b14e974b5f Merge pull request #47343 from Ch3LL/win_srv_test
  - 2173b6549 ensure we are enabling/disabling before test
  - d58be06751 Add additional service module integration tests and enable for windows

* b03f3b577f Merge pull request #47375 from terminalmage/issue47310
  - fa2bea52bb Remove extra blank line to appease linter
  - f8ab2be81c Add debug logging if we fail to detect virtual packages
  - 67c4fc56ac Warn on use of virtual packages in pkg.installed state

* 56235032f4 Merge pull request #47415 from kstreee/fix-local-client-tgt-bug
  - b8d37e01a1e To add a test case for the syndic environment, copies the test case which was written by @mattp- that was already merged into develop branch, related pr is #46692.
  - 4627bad1fd Realizes 'tgt' field into actual minions using ckminions to subscribe results of the minions before publishing a payload.

* d65ceaaee03 Merge pull request #47286 from baniobloom/vpc_peering_connection_name_fix
  - a968965087 Merge branch '2017.7' into vpc_peering_connection_name_fix

* 8a5d4437bb Merge pull request #47270 from meaksh/2017.7-fix-retcode-on-schedule-utils
  - d299cf3385 Merge branch '2017.7' into 2017.7-fix-retcode-on-schedule-utils
  - b6da600ff Initialize __context__ retcode for functions handled via schedule util module

* 5b51075384 Merge pull request #47371 from rallytime/fix-47264
  - a4348b49c Fix "of pass" typo in grains.delval docs: change to "or pass"

* a86e53be66 Merge pull request #47389 from dwoz/moregittestfix
Chapter 32. Release notes

- 67745c1362 Older GitPython versions will not have close
- a5367eaf63 Merge pull request #47388 from dwoz/test_pip_fix
  - eb26321e8b Fix missing import
- 9b59b991c2 Merge pull request #47380 from gtmanfred/2017.7
  - 93d1445ec1 add io_loop handling to runtests engine
- 3782c0cb8c Merge pull request #47384 from dwoz/test_pip_fix
  - a37a9da1fb Fix py2 version of pip test
- eefd9673e2 Merge pull request #47382 from dwoz/gitfs_tests
  - 1570708fac Close the repo and fix multiple tests
- 57c75ff660 Merge pull request #47369 from terminalmage/ldap_pillar
  - 085883ae2d Return an empty dict if no search_order in ldap ext_pillar config file
- bcc66dd9bf Merge pull request #47384 from dwoz/test_pip_fix
  - 3f7b93a23c Tornado5.0: Future.exc_info is dropped
- bce34f7e1 Merge pull request #47334 from terminalmage/ldap_pillar
  - 0175a8687c pillar_ldap: Fix cryptic errors when config file fails to load
  - 65c3ba7ff1 Remove useless documentation
  - 5d67cb27de Remove unnecessary commented line
  - 8de3d41adb fixed vpc_peering_connection_name option

- **PR #47464**: (dwoz) Skip tests not applicable to windows @ 2018-05-04 13:04:38 UTC
  - 51d21af4df Merge pull request #47464 from dwoz/skip_syslog_tests
  - ca9393b7fb Skip tests not applicable to windows
- **PR #47456**: (dwoz) Sysname returns text type @ 2018-05-04 02:57:50 UTC
  - 3219430dcc Merge pull request #47456 from dwoz/sysname
  - 559ee1961f Sysname returns text type
- **PR #47458**: (Ch3LL) Add In Progress Warning for 2018.3.1 Release Notes @ 2018-05-03 20:40:46 UTC
  - 3918514a7 Merge pull request #47458 from Ch3LL/unreleased_en_2018
  - 6a261e5e3a Add In Progress Warning for 2018.3.1 Release Notes
- **PR #47448**: (dwoz) Fix missing import in test suite @ 2018-05-03 14:30:23 UTC
  - 9bdce994 Merge pull request #47448 from dwoz/transport_import
  - 7e04eb82e1 Fix missing import in test suite
- **ISSUE #47260**: (mew1033) disable_saltenv_mapping not working as expected (refs: #47410)
- **PR #47410**: (terminalmage) gitfs: Fix identification of base env when saltenv mapping is disabled @ 2018-05-03 14:12:27 UTC
  - 157a32a77f Merge pull request #47410 from terminalmage/issue47260
  - 3ab332ad0e Update tests to reflect bugfix
  - 7b8127f336 gitfs: Fix identification of base env when saltenv mapping is disabled
• **PR #47413**: (dmurphy18) Repobuild improvements for Ubuntu 18.04 lack of gpg2 and better error checking @ 2018-05-02 16:21:31 UTC
  - 091e4cf9a6 Merge pull request #47413 from saltstack/reobuild_improv
  - c064032110 Removed extra spaces for pylint
  - 20c50b3331 Minor cleanup due to review comments
  - c143b359e9 Update for Ubuntu 18.04 lack of gpg2 and enhanced error checking

• **PR #47216**: (twangboy) Reg docs @ 2018-05-02 13:33:27 UTC
  - 5e5774fd37 Merge pull request #47216 from twangboy/reg_docs
  - 0beeb58b16 Fix lint, add bytes
  - bad441f8dc Fix some lint'
  - af5139c2ff Add additional examples
  - 24df6ec1b7 Additional docs formatting
  - ff46b27a60 Update reg docs, fix formatting issues

• **PR #47417**: (gtmanfred) revert instantiating a Caller Client in the engine @ 2018-05-01 18:58:06 UTC
  - 63ba4c4f8 Merge pull request #47417 from gtmanfred/slack
  - 5c8ea7f506 Update slack.py
  - ee8a5eeb10 revert instantiating a Caller Client in the engine

• **ISSUE #45790**: (bdarnell) Test with Tornado 5.0b1 (refs: #46002, #47106, #47368, #47443)

• **PR #47368**: (rallytime) [2018.3] Merge forward from 2017.7 to 2018.3 @ 2018-05-01 18:56:20 UTC
  - PR #47106: (DmitryKuzmenko) Tornado50 compatibility fixes (refs: #47374, #47368, #47433)
  - PR #46002: (isbm) Pyzmq 17.0.0 proper handling (refs: #47374, #47368)
  - 0bd6aa5ffe Merge pull request #47368 from rallytime/merge-2018.3
  - 4680e5959b Update test assertion comment for pip pkgs
  - d9d24de49e Lint: Add missing import
  - 31db8ca7ad Merge pull request #47347 from dwoz/test_mysql_fix_again
    - add78f6b18 Fix linter warnings
    - 2644cc7553 Fix linter nits
    - 799c601184 Proper fix for mysql tests
  - fefc0cc3ca Update old utils paths to use new utils paths
  - e573236848 Merge pull request #47359 from gtmanfred/2017.7
    - 6214ed8133 add mention of the formulas channel to the formulas docs
  - 629503b2a8 Merge pull request #47317 from dwoz/threadshutdown
    - 6db2a0e4d3 Log exceptions at exception level
    - d4ac787595 Do not join a thread that is stopped
Salt Documentation, Release 3006.4

- aacd5cefe3 Merge pull request #47304 from cachedout/test_cli_timeout_arg
  - 85025af83c Pass timeout to salt CLI for tests
- 55534fb659 Merge pull request #47311 from Ch3LL/firewall_windows
  - 4e16c18c16 Add firewall module windows tests to whitelist
  - 4b2fc4ec66 Add windows firewall execution modules integration tests
- 1667375a80 Merge pull request #47348 from dwoz/no_symlinks
  - 94a70e847a Ignore gif5 tests when symlinks not enabled
- dac04261b5 Merge pull request #47342 from dwoz/test_mysql_fix
  - 7496f4e5a8 Fix mysql test cases
- 34e78ef564 Merge pull request #47341 from dwoz/inet_pton_fix
  - 85451f48d4 Fix python 3 support for inet_pton function
- e4779f3246 Merge pull request #47339 from dwoz/ssh_key_test_fix
  - e37a93a1ca Remove redundant close call
  - b2ae5889b7 Close the temporary file handle
  - 9f7f83a975 Use salt.utils.fopen for line ending consistency
- b221860151 Merge pull request #47335 from dwoz/pip_test_fix
  - dcb6a22c00 Remove un-needed string-escape
- 1c527bf63a Merge pull request #47331 from dwoz/py3_wingroup_fix
  - cc154ef857 Do not encode usernames
- 708078b152 Merge pull request #47329 from cachedout/frank_credit
  - 33c064ac4 Credit Frank Spierings
- a545e55543 Merge pull request #47281 from Ch3LL/system_test
  - c9181a75a6 Add destructivetest decorator on tests
    - 0d0c8987fc Add win_system integration module tests
- b64d930df0 Merge pull request #47283 from Ch3LL/ntp_test
  - ced7f86546 Add windows ntp integration module tests
- 910aff910f Merge pull request #47314 from Ch3LL/net_mac_test
  - 67beb1451c Skip netstat test on macosx as its not supported
- 0549ef7c16 Merge pull request #47307 from rallytime/bp-47257
  - 6c5bf929bc Role is not a list but a dictionary
- d6ff4689fe Merge pull request #47312 from rallytime/update-bootstrap-release
  - 765cee06a2 Update bootstrap script to latest release: 2018.04.25
- e0765f5719 Merge pull request #47279 from dwoz/py3_build_fix
  - 21dc1bab91 Pep-8 line endings
  - 717abedaf7 Fix comman wart
  - 4100dcd64c Close might get called more than once
- db671f943 Stop socket before queue on delete
- 9587f5c69e Silence pylint import-error for six.moves
- 4b0c7d3b34 Fix typo
- 05ad7c2b1 Use six.moves for queue import
- fe340778fa Gracefully shutdown worker threads

* 44f19b2f94 Merge pull request #47113 from jfindlay/iptables_state
  - 8bd0801ee modules,states.iptables support proto for policy ext
* b7a6206330 Merge pull request #47302 from Ch3LL/dead_code
  - daa68b4877 Add virtual grains test for core grains
  - a59dd2785d Remove dead code in core grains file for virt-what
* e29362acfc Merge pull request #47303 from baniobloom/bug_fix_doc
  - b97c9df5f3 added clarity on how to figure out what is the oldest supported main release branch
* 0d9d55e013 Merge pull request #47106 from DSRCorporation/bugs/tornado50
  - 39e403b18d Merge branch ‘2017.7’ into bugs/tornado50
  - 6706b3a2d1 Run off of a temporary config
  - d6873800d5 Allow running pytest>=3.5.0
  - 2d3983740 Tornado 5.0 compatibility fixes
* 2e014f4746 Merge pull request #47271 from gtmanfred/amazon
  - 8a53908908 Do not load rh_service module when booted with systemd
  - e4d1d5bf11 Revert ”support amazon linux 2 for service module”
* 599b0ed1e9 Merge pull request #47246 from cloudflare/fix-44847-2017.7
  - ad80028104 This way, we can pass flags such as debug into the state, but also test.
* 4e2e1f0719 Merge pull request #47220 from benediktwerner/fix-pip-2017.7
  - 0197c3e973 Fix pip test
  - 34bf66c90f Fix pip.installed with pip>=10.0.0
* 92e606251f Merge pull request #47272 from rallytime/reg-windows-codeowners
  - 9445af0185 Add windows tests and reg module/state to CODEOWNERS file for team-windows
* 9dca5c0221 Merge pull request #47252 from rallytime/codeowners-fixes
  - 204b6af92b Fix the matching patterns in the CODEOWNERS file to use fnmatch patterns
* 3de1bb49c8 Merge pull request #47177 from fpicot/fix_47173_pkg_normalize
  - 149f846f34 fix normalize parameter in pkg.installed
* 10e30515dc Merge pull request #47251 from Ch3LL/pub_fix_rn
  - fa4c2e6575 Update Docs to remove unnecessary + sign
* bb7850a431 Merge pull request #47249 from Ch3LL/pub_fix_rn
  - 24dea24b7e Add CVE number to 2016.3.6 Release
* 56933eb0b2 Merge pull request #47227 from pruiz/pruiz/zfs-dataset-present-slow-2017.7
  - fded61f19b Fix issue #47225: avoid zfs.filesystem_present slowdown when dataset has lots of snapshots
* 9825065048 Merge pull request #47167 from smitty42/vbox-skd-fix
  - 5de53139cd Merge branch '2017.7' into vbox-skd-fix
* 976f031170 Merge pull request #47213 from dwoz/py3win
  - ad9c7f63f0 Fix coverate on py3 windows builds
  - 91252bac95 Adding updates for python3 compatibility and new virtualbox SDK version support.
* cebcd6d069 Merge pull request #47197 from dwoz/testfix
  - 25803c9176 Move process target to top level module namespace
* d4269c2b70 Merge pull request #47193 from Ch3LL/network_test
  - bbf9987c19 Add network module integration tests
* c777248a78 Merge pull request #47189 from Ch3LL/autoruns
  - 6a88bedb7a Add autoruns to windows whitelist
  - e9e4d4af70 Add autoruns.list integration test for Windows

- **PR #47403**: (rallytime) Back-port #47356 to 2018.3 @ 2018-05-01 15:19:06 UTC
  - **PR #47356**: (robinro) Fix sysctl translate (refs: #47403)
  - 4e6870305c Merge pull request #47403 from rallytime/bp-47356
  - 9b682bc48e Fix sysctl translate

- **PR #47407**: (terminalmage) Reduce severity of missing X_update_interval key @ 2018-05-01 15:18:46 UTC
  - 7e0cdd6145 Merge pull request #47407 from terminalmage/update-interval-log
  - abc592bfff Reduce severity of missing X_update_interval key

- **ISSUE #47042**: (valentin2105) [ERROR] Unable to manage file: 'utf8' codec can't decode byte (refs: #47061)

- **PR #47405**: (terminalmage) Fix file.get_diff regression in 2018.3 branch @ 2018-05-01 15:16:46 UTC
  - **PR #47061**: (terminalmage) Fix diffing binary files in file.get_diff (refs: #47405)
  - 1377942bcc Merge pull request #47405 from terminalmage/binary-diff
  - 89dd5b08026 Use a lambda instead of defining a one-line function
  - b79ff04fda Remove no-longer-used enumerate
  - e03b865359 Add unit test for file.get_diff
  - 5bdc9e9b35 Fix UnboundLocalError in file.get_diff

- **ISSUE #47325**: (robertodocampo) docker_container.running creates containers using the image ID as the image name (refs: #47367)

- **PR #47367**: (terminalmage) Start docker containers with image name instead of ID @ 2018-04-30 18:46:13 UTC
  - c267e6083e Merge pull request #47367 from terminalmage/issue47325
  - 798134aca3 Add regression test for creating images with image name insead of ID
  - 4ed47e839c Start docker containers with image name instead of ID
• ISSUE #47006: (cedwards) marathon & fx2 grain modules cause master and minion failure (refs: #47401)

• PR #47401: (gtmanfred) fix proxy virtual checks for marathon and fx2 @ 2018-04-30 18:44:46 UTC
  – 3bb00cb55 Merge pull request #47401 from gtmanfred/proxy
  – 99f231759 fix proxy virtual checks for marathon and fx2

• PR #47397: (rallytime) Add 2018.3.1 Release Notes @ 2018-04-30 14:44:38 UTC
  – c160fe36ce Merge pull request #47397 from rallytime/2018.3.1-release-notes
  – 3b40cda2a Add 2018.3.1 Release Notes

• ISSUE #45790: (bdarnell) Test with Tornado 5.0b1 (refs: #47433)

• PR #47374: (DmitryKuzmenko) tornado50 merge forward for 2018.3 @ 2018-04-29 16:29:12 UTC
  – PR #47106: (DmitryKuzmenko) Tornado50 compatibility fixes (refs: #47374, #47368, #47433)
  – PR #46002: (isbm) Pyzmq 17.0.0 proper handling (refs: #47374, #47368)
  – 3400f829c4 Merge pull request #47374 from DSRCorporation/bugs/tornado50-2018.3
  – 400999c54f fix pylint
  – 47b6d409d1 add io_loop handling to runtests engine
  – fd074f6b7d use salt.utils.zeromq
  – 4ae33c5d0a Run off of a temporary config
  – 7938b4906e Allow running pytest>=3.5.0
  – 34058c181e Tornado 5.0 compatibility fixes

• ISSUE #47124: (mchugh19) Vault module problem in 2018.3.0 (refs: #47379)

• PR #47379: (dwoz) Properly encode messages when creating/validating signatures with m2crypto @ 2018-04-28 08:38:23 UTC
  – 2afe4bee95 Merge pull request #47379 from dwoz/m2crypto_regression
  – 068f2d430d Always sign and verify bytes
  – 7810ebaba9 Add sign regression tests
  – f4441c3a1c Adding regression test for 47124

• PR #47277: (morganwillcock) Fix minion crash on NetBSD @ 2018-04-27 15:02:21 UTC
  – 7390b72808 Merge pull request #47277 from morganwillcock/netbsdswap
  – 0bcb1a079a Merge branch '2018.3' into netbsdswap
  – 30478e728c Use swapctl for NetBSD

• PR #47320: (twangboy) Change from NSSM to SSM @ 2018-04-27 14:37:50 UTC
  – 2b7c7e7f04 Merge pull request #47320 from twangboy/win_ssm
  – 5549d83aae Use ssm instead of nssm

• PR #47308: (rallytime) Back-port #47287 to 2018.3 @ 2018-04-27 13:50:49 UTC
  – PR #47287: (esell) convert unicode ssh pass to str for azure (refs: #47308)
  – b6df5ace Merge pull request #47308 from rallytime/bp-47287
  – 5f392a23fe convert unicode ssh pass to str for azure

32.2. Previous releases
• **ISSUE #47324** (rlschilperoort) archive.extracted keep and/or keep_source not working (refs: #47332)

• **PR #47332** (garethgreenaway) [2018.3] Removing duplicate code from state/archive.py @ 2018-04-27 13:12:51 UTC
  - efa3aab80 Merge pull request #47332 from garethgreenaway/47324_archive_extracted_keep_keep_source
  - cc10bfc6b Removing redundant code which is preventing keep & keep_source from being set.

• **PR #47326** (The-Loeki) Some Redis fixes @ 2018-04-26 17:12:47 UTC
  - 245d62ca16 Merge pull request #47326 from The-Loeki/redis-cache-sockets
  - d86be5bd6 redis_return: add unix_socket_path to docs
  - ee9f533765 redis_cache: document UNIX socket access
  - 5337558a5a redis_return: Let redis handle pool creation, add UNIX socket support
  - c90f3b0b9f redis_return: cluster_mode default to False in __virtual__ to prevent KeyError stacktraces
  - 71e3286829 redis_return: Fix code blocks in docs
  - e6605f1c78 redis_cache fix code block in docs
  - 40e67747ea redis_cache: add socket to options

• **PR #47319** (dwoz) Skip unix group tests on windows. @ 2018-04-26 15:59:35 UTC
  - 27a438f0ff Merge pull request #47319 from dwoz/skip_tests
  - d9442d043 Skip tests not applicable to windows

• **PR #47293** (dwoz) The grp module is not available on windows @ 2018-04-25 20:22:34 UTC
  - 057f668788 Merge pull request #47293 from dwoz/win_build_fix
  - 0386216005 Fix sneaky indentation
  - 082b8d0b3d Use salt.utils.platform
  - cc2538e08f The grp modules is not available on windows

• **ISSUE #46862** (kivoli) Setting locale.system fails in 2018.3 (refs: #47280, #46869)

• **PR #47280** (gtmanfred) make sure not to send invalid information @ 2018-04-25 17:46:45 UTC
  - fff48c1a5 Merge pull request #47280 from gtmanfred/localectl
  - 7c212cbb2d fix pylint
  - 6754787e8e update localemod tests
  - 9075070573 make sure not to send invalid information

• **ISSUE #46977** (gtmanfred) [2018.3.0] Backwards compatibility breaking change in 2018.3.0 (refs: #47038)

• **PR #47038** (garethgreenaway) [2018.3] fix to fileclient.py @ 2018-04-25 14:57:04 UTC
  - 205701dcbe Merge pull request #47038 from garethgreenaway/46977_fixing_fileclient_forward_compatibility
  - ba01dd2133a Updating version.py to include Magnesium.
  - 10c823dd79 The _ext_nodes master function has been renamed to _master_tops. To ensure compatibility when using older Salt masters we continue to pass the function as _ext_nodes until the Magnesium release.

• **ISSUE #47059** (OrlandoAracipix) Some states incorrectly return None instead of an empty dict when there are no changes (refs: #47060)
• ISSUE #46985: (OrlandoArcapix) grafana4_user.present and grafana4_org.present states not working in 2018.3.0 (refs: #47048)

• PR #47060: (OrlandoArcapix) Return an empty dict for 'changes' instead of 'None' @ 2018-04-25 14:55:24 UTC
  - PR #47048: (OrlandoArcapix) ISSUE#46985 fix grafana4 state (refs: #47060)
  - 89daf4fdcf Merge pull request #47060 from OrlandoArcapix/Issue47059-return_dict_from_state
  - 5378e4fd07 Update grafana_datasourcetest to check for empty dict being returned on no changes, rather than None
  - f115452653 Return an empty dict for 'changes' instead of 'None'

• ISSUE #47089: (syphernl) UnicodeDecodeError: 'ascii' codec can't decode byte 0xc3 in position 404: ordinal not in range(128) (refs: #47153)

• PR #47153: (terminalmage) salt.modules.ssh: properly encode/decode I/O @ 2018-04-25 14:53:51 UTC
  - 10cc0d312b Merge pull request #47153 from terminalmage/issue47089
  - bdb52797f8 salt.modules.ssh: properly encode/decode I/O

• ISSUE #47199: (tkaehn) Targeting by list (-L) broken for minions behind syndic? (refs: #47275)

• PR #47275: (terminalmage) Fix false failure events sent when using syndic @ 2018-04-25 13:56:47 UTC
  - b5d64f1a70 Merge pull request #47275 from terminalmage/issue47199
  - 8012ad12f8 Fix false failure events sent when using syndic

• ISSUE #47267: (skjaro) Problem with beacon diskusage on windows platform in 2018.3 (refs: #47284)

• PR #47248: (skjaro) Fix beacon diskusage documentation for the new behaviour mentioned in issue #47267 @ 2018-04-25 13:52:30 UTC
  - 6215a995d8 Merge pull request #47248 from skjaro/beacon_diskusage_doc_fix
  - fcc042aa5f Fix beacon documentation for the new behaviour mentioned in issue #47267

• PR #47291: (bosatsu) Fix proxy minion beacon doc @ 2018-04-25 13:42:36 UTC
  - 3ef4fe6ed2 Merge pull request #47291 from bosatsu/fix-proxy-minion-beacon-doc
  - 01980b4c43 Fix topics/releases/2018.3.0.rst to include correct example of proxy_example beacon yaml configuration.
  - 9682e26ee5 Fix topics/proxyminion/beacon.rst to include correct example of salt_proxy beacon yaml configuration.

• ISSUE #47239: (bosatsu) Unable to load salt_proxy beacon on minion in 2018.3.0 (refs: #47255)

• PR #47255: (garethgreenaway) [2018.3] Fixes to salt_proxy beacon and beacon tests @ 2018-04-25 13:41:51 UTC
  - ea2d68b865 Merge pull request #47255 from garethgreenaway/47239_fixes_to_salt_proxy_beacon
  - a2a8d78cb0 Fixing status beacon tests.
  - c87d6ace23 Ensure the salt_proxy is returning the correct tuple when the configuration is valid. Update various beacon unit tests to ensure they are testing the results of the validate function for a True result.

• PR #47292: (dwoz) Fix decorator wart @ 2018-04-25 04:25:23 UTC
  - PR #47290: (dwoz) Run cache_master test in tmp dir (refs: #47292)
  - 19f9e8258f Merge pull request #47292 from dwoz/cp_fix_again
  - 7d045eb235 Fix decorator wart
• **PR #47285**: (dwoz) Fix reg grains test @ 2018-04-25 00:16:56 UTC

  - da532aa1ac Merge pull request #47285 from dwoz/core_test_fix
  - 884f4c1829 Fix extra space
  - 8a9027c0c9 Fix reg grains test

• **PR #47290**: (dwoz) Run cache_master test in tmp dir (refs: #47292) @ 2018-04-24 23:37:21 UTC

  - f591ccf643 Merge pull request #47290 from dwoz/test_cp_fix
  - 8a9027c0c9 Fix reg grains test

• **ISSUE #47092**: (syphernl) [2018.3.0] pkg.installed breaks with virtual packages (refs: #47250)

• **ISSUE #38838**: (Zorlin) Failing to remove nginx (refs: #44455)

• **PR #47250**: (terminalmage) Fix virtual package detection @ 2018-04-24 19:22:24 UTC

  - PR #44455: (samodid) Fix for #38838 (refs: #47250)
  - 6d323aa8f0 Merge pull request #47250 from terminalmage/issue47092
  - b8630a70be Fix virtual package detection

• **ISSUE #47225**: (pruiz) zfs.filesystem_present takes forever on a dataset with lots (10k+) of snapshots (refs: #47228, #47227, #47226)

• **PR #47228**: (pruiz) Fix issue #47225: avoid zfs.filesystem_present slowdown when dataset has lots of snapshots (2018.3 branch) @ 2018-04-24 13:35:21 UTC

  - PR #47226: (pruiz) Fix issue #47225: avoid zfs.filesystem_present slowdown when dataset has lots of snapshots (refs: #47228, #47227)
  - 428e9156a Merge pull request #47228 from pruiz/pruiz/zfs-dataset-present-slow-2018.3
  - cbf136ab2 Fix issue #47225: avoid zfs.filesystem_present slowdown when dataset has lots of snapshots

• **ISSUE #46943**: (Auha) Slack.Engine could not start (refs: #47262, #47109)

• **PR #47262**: (garethgreenaway) [2018.3] Fixes to targeting in Slack engine @ 2018-04-24 13:18:36 UTC

  - 0b836106b9 Merge pull request #47262 from garethgreenaway/slack_engine_target_fix
  - b8630a70be Fix virtual package detection
  - bcdef641e8 Removing target and tgt_type from the cmdlinethat is passed along to Salt, the target is used elsewhere and including it in the cmdlinemakes problem when it is passed along. Adding an additional test to ensure we are getting the right target.

• **ISSUE #47047**: (Giandom) Pillars aren’t evaluated when alias is passed in Slack Engine (refs: #47142)

• **PR #47142**: (garethgreenaway) [2018.3] pillar and output formatting fixes to Slack engine @ 2018-04-23 19:55:07 UTC

  - 2ed4b38b02 Merge pull request #47142 from garethgreenaway/47047_passing Pillar_to_Slack_Aliases
  - 6f183e1d80 Initial commit for unit/engines/test_slack_engine
  - a2840fc230 Only include the rest of the cmdlinethat the cmd is an alias.
  - e846d7409 Fixing a bug when passing pillar values to aliases for the Slack engine. Cleaned up the formatting of the results, color codes don’t translate well into Slack output. For any state runs, eg. highstate. apply, sls, we run the output through the highstate formater. For anything else run it though the yaml outputer. Running it though highstate causes errors when the output does match what the highstate output is expecting.

• **PR #47245**: (terminalmage) Ensure we pass hexid as bytes when zmq_filtering enabled @ 2018-04-23 16:54:57 UTC

---

Chapter 32. Release notes
- 42a0e655dc Merge pull request #47245 from terminalmage/zeromq-bytes
- a7acc0548 Ensure we pass hexid as bytes when zmq_filtering enabled

- **PR #47242:** (aesposito91) PY3 fix for zmq setsockopt @ 2018-04-23 16:38:09 UTC
  - 73525d1460 Merge pull request #47242 from aesposito91/2018.3
  - b225351e6d Update napalm_syslog.py

- **ISSUE #47117:** (prashanthhtuttu) Napalm / Capirca Issue (refs: #47241)

- **PR #47241:** (mirceaaulinic) Fix the imports into the netac1 execution and state modules @ 2018-04-23 14:56:32 UTC
  - b78295ae9 Merge pull request #47241 from cloudflare/fix-47117
  - 26c5583264 #47117: fix the napalm imports in the netac1 execution module
  - 48396467c1 #47117: fix the napalm imports in the netac1 state module

- **PR #47219:** (garethgreenaway) [2018.3] Fixing a backward compatibility issue with vault module & runner @ 2018-04-23 14:10:19 UTC
  - 88557a991 Merge pull request #47219 from garethgreenaway/vault_backward_compatibility
  - 1758081ffe When using the vault module on a 2018.3 minion against a 2017.7 master, the 2018.3 minion is expecting a verify element in the results from the Salt runner on the master. The runner in 2017.7 did not include a verify element, which results in an error. This change accounts for this by using the default in 2018.3 which is not to verify if not configured.

- **PR #47186:** (dmurphy18) backport of issue 46933, updated ZFS handling to Salt 2018.3.x @ 2018-04-23 14:07:06 UTC
  - 370feadb2 Merge pull request #47186 from dmurphy18/zfs_backport_46933
  - 283359d315 Corrected typo in comma-seprated and 2018.3.0 -> 2018.3.1
  - b7f8d5a22f Replace use of Fluorine with 2018.3.0 for comma-separated warnings
  - 3f30a626d1 ZFS backport of 46933 to 2018.3.1

- **PR #47217:** (twangboy) Remove installation of pywin32 from setup.py @ 2018-04-23 13:32:54 UTC
  - b3a67d11b Merge pull request #47217 from twangboy/fix_setup
  - eb3d4bb08 Remove installation of pywin32 from setup.py

- **PR #47195:** (rallytime) [2018.3] Merge forward from 2017.7 to 2018.3 @ 2018-04-20 19:25:30 UTC
  - 8e21705f13 Merge pull request #47195 from rallytime/merge-2018.3
  - f90f8c663 Test fix: file strings must be unicode in master config
  - b6e4948df1 Lint: use full path for event utils function
  - 120c5446b7 Update old utils paths to new utils paths
  - 4718d31e53 Merge branch '2017.7' into '2018.3'
    * 65f344e371 Merge pull request #47184 from Ch3LL/status_test
      * 25a8428bb8 Add status module integration modules tests for Windows
    * 965600ad6c Merge pull request #47163 from rallytime/jenkins-autodoc
      * 003939017 Update jenkins module autodocs to use jenkinsmod name instead
    * 0a43d265fc Merge pull request #47185 from twangboy/add_tests
- 345daa0423 Add additional integration tests to whitelist
  - 1a600bb9a4 Merge pull request #47172 from dwoz/cover_without_admin
    - cadd759727 Use warnings to warn user
    - 144c68e214 Allow non admin name based runs on windows
  - d5997d2301 Merge pull request #47110 from kstreee/fix-misusing-of-timeout
    - 0624ae06ed Fixes misusing of the timeout option.
- 87ca2b4003 Merge pull request #40961 from terminalmage/issue40948
  - 6ba66ca41 Fix incorrect logic in exception check
  - fed5041c5f Make error more specific to aid in troubleshooting
  - 8c67ab53b4 Fix path in log message
  - 3198ca8b19 Make error more explicit when PKI dir not present for salt-call
- f563584d4 Merge pull request #47134 from Ch3LL/user_win_test
  - e7c9e4038 Add user integration tests for windows OS
- da2f6a3fac Merge pull request #47131 from gtmanfred/cli
  - 1b1c29bf62 add __cli for master processes
- 9b86ff8bec Merge pull request #47129 from rallytime/bp-47121
  - 11da526b21 add ImportError
  - bd023396c fix pip.req import error in pip 10.0.0
- eb5ac51a48 Merge pull request #47102 from gtmanfred/2017.7
  - 3dc93b310b fix tests
  - 8497e08f8e fix pip module for 10.0.0
  - 4c07a3de9 fix other tests
  - b71e3da0d don’t allow using no_use_wheel for pip 10.0.0 or newer
- c1dc4e67e Merge pull request #47037 from twangboy/fix_dev_scripts
  - 990a24de7ed Fix build_env scripts

- ISSUE #46906: (whytwolf) Windows failure with PR 46541 (refs: #47168)
- PR #47168: (gtmanfred) fix metadata grain for py3 and windows @ 2018-04-20 19:07:50 UTC
  - a56eb7e05d Merge pull request #47168 from gtmanfred/metadata
  - 396f7906e3 fix metadata grain for py3 and windows
- ISSUE #46918: (AmbicaY) napalm/capirca issue (refs: #47202)
- PR #47202: (mirceaulinic) Fix #46918: add the TTL field @ 2018-04-20 14:34:09 UTC
  - 6135b76c2c Merge pull request #47202 from cloudflare/fix-46918
  - 1e74141cc0 Fix #46918

- ISSUE #47150: (srkunze) [Regression] ip_to_host and SSH_expand_target require missing reverse-lookup (refs: #47191)
- PR #47191: (terminalmage) salt-ssh: Do not attempt to match host/ip to minion ID if reverse lookup fails @ 2018-04-20 14:20:05 UTC
- 7f1115e611 Merge pull request #47191 from terminalmage/issue47150
- 95a6f075cb Add debug logging when ip_to_host fails
- 4569e622b salt-ssh: Do not attempt to match host/ip to minion ID if reverse lookup fails
- **PR #47122: (rallytime) [2018.3]** Merge forward from 2017.7 to 2018.3 @ 2018-04-19 20:44:18 UTC
  - 1947ffddf6 Merge pull request #47122 from rallytime/merge-2018.3
  - 878fa06134 Test fix: remove tornado testing lib from class
  - a40f007962 lint: get_context is in stringutils.py now
  - 3416e398c6 Update old utils paths references to use new paths
  - 94c2a12be6 Merge branch '2017.7' into '2018.3'
    - 6a4c0b8a1a Merge pull request #47108 from dwoz/async_test_fix
      - 3d85e30ce5 AsyncTestCase is required for AsyncEventPublisher
    - 03892eaf0b Merge pull request #47068 from cachedout/catch_value_error_socket_test
      - 7db5625632 Catch an operation on a closed socket in a test
    - 1ea2885ec2 Merge pull request #47065 from dwoz/jinja_test_fix
      - 673cd31c65 Merge branch '2017.7' into jinja_test_fix
    - 5293b5b5ca Merge pull request #47077 from dwoz/test_state_fix
      - 444da3f893 Fix py3 wart (chr vs bytesstring)
      - e8acc01c2 Fix failing state test by normalizing line endings
    - ca967de5da Merge pull request #47067 from gtmanfred/2017.7
      - f913a7859c use the recommended opennebula lookup method
    - 7fddad6c9 Merge pull request #47064 from dwoz/roots_tests_fix
      - 25fd7c0694 fix py3 wart, encode os.linesep
      - d79f1a1961 Fix fileserver roots tests
    - 977c6939c4 Merge pull request #47069 from cachedout/match_timeout_arg
      - b8990f5258 Pass the timeout variable to the CLI when calling salt in tests
    - 2c4c19c622 Merge pull request #47074 from dwoz/ignore_artifacts
      - c3941efad0 Kitchn should ignore artifacts directory
    - c484c0bd71 Merge pull request #47055 from bloomberg/GH-47000
      - 8af3f5b874 GH-47000: add proper handling of full_return in cmd_subset
    - f3496030cc Merge pull request #47039 from twangboy/win_fix_winrm_script
      - 6635b9003f Fix winrm powershell script
      - 46fa2c04de Fix py3 os.linesep wart
      - 3c565d7e54 Use salt.utils.fopen
      - a966530ff1 Clean up cruft
      - efc9866580 Jinja test fixes
- **PR #47162: (terminalmage) Partial backport of #47161 to 2018.3 branch @ 2018-04-19 19:28:47 UTC**
- PR #47161: (terminalmage) Fix failing pillar unit test (refs: #47162)
- 291cca7ed8 Merge pull request #47162 from terminalmage/bp-47161
- d185f97a47 mocked file_roots and pillar_roots should be dicts

• ISSUE #47081: (sjorge) file.directory with recursion fails if there are non-ascii characters in the path (refs: #47165)

• PR #47165: (terminalmage) Make sure a str type is passed to os.walk @ 2018-04-19 14:59:16 UTC
  - 2ee8006da3 Merge pull request #47165 from terminalmage/issue47081
  - 9e29ac677 Make sure a str type is passed to os.walk

• PR #47070: (terminalmage) Use decorators for temp files/dirs in test suite @ 2018-04-19 14:01:48 UTC
  - 6257862bbb Merge pull request #47070 from terminalmage/with_tmpdir
  - 048728d2b7 Remove unused imports
  - 879e557264 Use decorators for temp files/dirs in test suite

• PR #47155: (mcalmer) Fix patchinstall for yumpkg @ 2018-04-18 19:24:17 UTC
  - b4636614b Merge pull request #47155 from mcalmer/fix-patchinstall
  - 382afaa457 fix invalid string compare
  - 81c19368938 provide kwargs to pkg_resource.parse_targets required to detect advisory type

• ISSUE #47042: (valentin2105) [ERROR] Unable to manage file: 'utf8' codec can't decode byte (refs: #47061)

• PR #47061: (terminalmage) Fix diffing binary files in file.get_diff (refs: #47405) @ 2018-04-18 18:52:10 UTC
  - 13ae1a2413 Merge pull request #47061 from terminalmage/issue47042
  - 87f6ce6e3 Rewrite flaky utf8 state to make it easier to troubleshoot
  - df6e535f05 Fix diffing binary files in file.get_diff

• PR #47058: (terminalmage) Fix calls to file.lsattr when lsattr is not installed @ 2018-04-18 16:30:12 UTC
  - cb0f13cd9 Merge pull request #47058 from terminalmage/lsattr
  - eeb0b7e910 Fix calls to file.lsattr when lsattr is not installed

• ISSUE #46929: (noelmcloughlin) 2018.3 regression file.managed.context parsing (refs: #47104)

• PR #47104: (terminalmage) yamlloader: Properly handle colons in inline dicts @ 2018-04-18 16:22:47 UTC
  - b96ce23b3f Merge pull request #47104 from terminalmage/issue46929
  - 33bf643cd Add additional test for plain scalars
  - 508659b682 yamlloader: Properly handle colons in inline dicts

• ISSUE #46887: (julientravelaer) ldap.managed broken with 2018.3.0 (refs: #47029)

• ISSUE #46859: (cheribral) pillar_ldap causing TypeError exceptions in python-ldap with unicode objects (refs: #47029)

• PR #47076: (terminalmage) pillar_ldap: Load config options as str types @ 2018-04-18 16:16:22 UTC
  - PR #47029: (terminalmage) ldapmod.py/ldap3.py: Force modlist for search/modify/etc. to be str types (refs: #47076)
  - c1269b173 Merge pull request #47076 from terminalmage/issue46859
  - c06c859caf pillar_ldap: Load config options as str types
• **PR #47107**: (twangboy) Fix issues with reg state, add tests @ 2018-04-18 15:53:02 UTC
  - 50bd885ec7 Merge pull request #47107 from twangboy/fix_46932
  - ae8ab2a1b1a Fix tests for py3, enable tearDown
  - 3cf4ac1475 Add integration tests for reg state
  - cc259b146f Cast vdata to appropriate type in reg state

• **ISSUE #46909**: (epelc) Binary contents_pillar with file.managed raises UnicodeDecodeError (refs: #47041)

• **PR #47041**: (terminalmage) Force null bytes to be str types @ 2018-04-18 14:08:25 UTC
  - d6c59696be Merge pull request #47041 from terminalmage/issue46909
  - e4182715be Special check specifically for bytes types
  - ee90dd5d95 Merge branch '2018.3' into issue46909
  - 0e9934a7f Use the same way of defining contents in both file.managed states
  - 5741d287b5 Move back to using null byte check for contents
  - 8e214c9fa9 file.managed: Add test to ensure binary contents work
  - 7b7dc94610 Use salt.utils.stringutils.is_binary to check if contents are binary
  - e3c969da81 PY3: Ensure binary contents work with file.managed
  - 5d98a8bedd Make salt.utils.stringutils.to_binary work for bytestrings
  - 102400369 Force null bytes to be str types

• **PR #47007**: (twangboy) Fix some issues with the win_servermanager module @ 2018-04-17 20:57:04 UTC
  - 9a9f6524f8 Merge pull request #47007 from twangboy/fix_46968
  - 432db7c6ec lint: Remove unused import
  - 10341e8f8b Remove erroneous pop statement
  - 56582f93a Remove redundant try/except block from state`
  - 6ad2427279 Remove unnecessary try/except blocks
  - 92eeaa51bd Put some error checking in the shell command

• **ISSUE #46943**: (Auha) Slack.Engine could not start (refs: #47262, #47109)

• **PR #47109**: (garethgreenaway) [2018.3] fixes to Slack engine @ 2018-04-17 13:56:27 UTC
  - a52137ee36 Merge pull request #47109 from garethgreenaway/46943_slack_engine_fixes
  - 02b9a76595 Fixing a bug that occurred when a comment was added to a message sent to Slack by Salt.
    Also making slack_engine:groups_pillar optional.

• **PR #47045**: (tankywoo) Fix ba7d00f5 for gentoo pkg.installed method @ 2018-04-17 13:55:45 UTC
  - 6c16a34c44 Merge pull request #47045 from tankywoo/fix-gentoo-pkg-installed
  - 551f6e10cf Fix ba7d00f5 for gentoo pkg.installed

• **PR #47053**: (clan) handle jinja error in <module> level @ 2018-04-16 22:47:54 UTC
  - 86c7cefe56 Merge pull request #47053 from clan/jinja-error
  - a847466946 handle jinja error in <module> level

• **PR #47062**: (rallytime) [2018.3] Merge forward from 2017.7 to 2018.3 @ 2018-04-16 19:58:32 UTC

32.2. Previous releases
- 7bfa608e9f Merge pull request #47062 from rallytime/merge-2018.3
- 5f95880e72 lint fix
- 1ddf8c584b Update old utils files to new new utils files path
- 28a79ebb4 Merge branch '2017.7' into '2018.3'
  * 1700a10eb3 Merge pull request #46326 from kstreee/fix-client-local
    - 0f358a9ce9 Fixes a timing bug of saltnado's client local.
  * c3c00316c5 Merge pull request #46913 from lomeroe/2017_7-fix46877
    - 369a0645ed move exception for clarity
    - 32ce5bfaa5 Use configparser serializer object to read psscript.ini and script.ini startup/shutdown script files.
  * 9e37cf9d6 Merge pull request #47025 from terminalmage/fix-server_id-windows
    - cb0cf89ed3 Fix server_id grain in PY3 on Windows
  * 2e193cfb45 Merge pull request #47027 from rallytime/bp-44508
    - 8e72f3e2f4 Add priority field to support the latest capirca.
    - 112f92baab Add priority field to support the latest capirca.
  * 385fe2bc1e Merge pull request #47020 from rallytime/bp-46970
    - 9373df52b Update test_pkgrepo.py
    - 13cf9eb5b1 Removing debugging.
    - a61a8593e5 Removing suse from pkgrepo comments tests. the pkgrepo functions in SUSE pkg module do not support comments.
- **PR #47066:** (terminalmage) Fix regression in handling of environment/saltenv @ 2018-04-16 19:57:12 UTC
  - fa2764a33 Merge pull request #47066 from terminalmage/issue46979
  - 5c4c04e6ad Fix regression in handling of environment/saltenv
- **PR #47051:** (rallytime) Simplify LooseVersion check in __virtual__ check in mac_assistive module @ 2018-04-13 19:43:33 UTC
  - 8761b81a69 Merge pull request #47051 from rallytime/fx-lint
  - d52b3689d9 Simplify LooseVersion check in __virtual__ check in mac_assistive module
- **PR #47057:** (corywright) Fix copy/paste typo in minionfs tutorial @ 2018-04-13 19:43:01 UTC
  - 1b8018b55 Merge pull request #47057 from corywright/fx-minionfs-whitelist-docs
  - 9b7e97d12 Fix copy/paste typo in minionfs tutorial
- **ISSUE #46931:** (anlutro) file.managed diff is switched when using template in salt-ssh 2018.3 (refs: #47046)
- **PR #47046:** (clan) switch order of file to be diffed @ 2018-04-13 13:40:13 UTC
  - d5afa42e5 Merge pull request #47046 from clan/file_diff
  - bb58650c54 switch order of file to be diffed
- **ISSUE #46985:** (OrlandoArcapix) grafana4_user.present and grafana4_org.present states not working in 2018.3.0 (refs: #47048)
- **PR #47048:** (OrlandoArcapix) Issue46985 fix grafana4 state (refs: #47060) @ 2018-04-13 13:34:29 UTC
- ec9251cd3 Merge pull request #47048 from OrlandoArcapix/Issue46985-fix-grafana4-state
- 259d747414 Remove accidentally added copy of a file
- 6c8c3da74d Return an empty dict instead of 'None' from grafana4 states

• PR #47017: (opdude) Don’t encode a unicode string @ 2018-04-13 13:31:33 UTC
  - d8c4ec221cf Merge pull request #47017 from Unity-Technologies/hotfix/pip_windows
  - 838670f626 Don’t encode a unicode string

• ISSUE #46917: (boltronics) mysql_grants.present broken with database: somedatabase.* (refs: #46919)

• PR #47019: (rallytime) Back-port #46919 to 2018.3 @ 2018-04-12 19:43:01 UTC
  - PR #46919: (boltronics) Replace failing is and is not tests with == and != (refs: #47019)
  - 5b7544ea0 Merge pull request #47019 from rallytime/bp-46919
  - 6837d6c138 Replace failing is and is not tests with == and !=

• ISSUE #46887: (julientravelaer) ldap.managed broken with 2018.3.0 (refs: #47029)

• ISSUE #46859: (cheribral) pillar_ldap causing TypeError exceptions in python-ldap with unicode objects (refs: #47029)

• PR #47029: (terminalmage) ldapmod.py/ldap3.py: Force modlist for search/modify/etc. to be str types (refs: #47076) @ 2018-04-12 19:41:29 UTC
  - ac2d54d78a Merge pull request #47029 from terminalmage/issue46859
  - ab6314247b ldapmod.py/ldap3.py: Force modlist for search/modify/etc. to be str types
  - 7691dee4ed Add to_str option to decode funcs

• ISSUE #46868: (tjyang) 2017.7.4 to 2018.3.0 upgrade issue: Salt request timed out. The master is not responding (refs: #46930)

• PR #46930: (dwoz) Clean up bad public key headers @ 2018-04-12 18:57:37 UTC
  - e6e07720fa Merge pull request #46930 from dwoz/crptodomekeyfix
  - f2e484ed54 Merge branch `2018.3` into crptodomekeyfix
  - e1995a92ee Fix verify signature test
  - 0ba32118d9 Add test for bad public key without m2crypto
  - a44c356233 Clean up bad public key headers

• ISSUE #46951: (Giandom) Slack engine error using aliases: TypeError unhashable type (refs: #47008)

• PR #47008: (garethgreenaway) [2018.3] Fixing aliases in slack engine @ 2018-04-12 15:24:40 UTC
  - 0e43becc12 Merge pull request #47008 from garethgreenaway/46951_fixing_slack_engine_aliases
  - dc2a72d44f Fixing aliases in slack engine

• ISSUE #46947: (Giandom) Slack engine groups error (refs: #47009)

• PR #47009: (garethgreenaway) [2018.3] fixes to slack engine documentation @ 2018-04-12 15:20:54 UTC
  - c33de7c82d Merge pull request #47009 from garethgreenaway/46947_slack_documentation_update catch_non_dicts
  - 78fadb44ce Fixing indentation for slack documentation. Updating try..except to ensure we catch when groups aren’t dicts.

• PR #47023: (rallytime) Back-port #46997 to 2018.3 @ 2018-04-12 15:05:24 UTC
- **PR #46997**: (LukeCarrier) Fix repository (=> repository) typo in sls_build (refs: #47023)
- **PR #44638**: (terminalmage) Many improvements to docker network and container states (refs: #46997)
  - 68d17c71f1 Merge pull request #47023 from rallytime/bp-46997
  - c2c60f4ffc Fix repository (=> repository) typo in sls_build
- **PR #47026**: (rallytime) [2018.3] Merge forward from 2017.7 to 2018.3 @ 2018-04-12 14:39:41 UTC
  - 9cf3c6406a Merge pull request #47026 from rallytime/merge-2018.3
  - ba70df9d62 Use msgpack utils for loads call, import msgpack for UnpackValueError
  - 34a478df5 Update old fopen path with new utils files path
  - 590c7fc13f Merge branch '2017.7' into '2018.3'
    - 8f994e7cf9 Merge pull request #46539 from jfoboss/patch-1
      - 6890122e41 Merge pull request #1 from twangboy/pull_46539
      - 19c3faddbe5 Fix unit test for win_ntp
      - 826a8d3099 Fixing #46504
    - 74d70e95a5 Merge pull request #46999 from gtmanfred/2017.7
      - 791a8f6ce switch pip test package
    - 8ada7f526 Merge pull request #46023 from bloomberg/parallel-orch
      - 0ac0b3ca29 Merge branch '2017.7' into parallel-orch
    - 39d65a39cf Merge pull request #46613 from myinitialsarepm/fix_puppet.fact_and_puppet.facts
      - 44ecd13abc Update tests to use cmd.run_all
      - 7d7d40f541 Merge branch '2017.7' into fix_puppet.fact_and_puppet.facts
      - 0ce1520bd0 Merge branch '2017.7' into fix_puppet.fact_and_puppet.facts
      - 69e1f6f681 Fix puppet.fact and puppet.facts to use stdout.
      - 3d5e69600b address lint issues raised by @isbm
      - a9866c7a03 fix parallel mode py3 compatibility
      - 6d7730864a removing prereq from test orch
      - 6c8a25778f add integration test to runners/test_state to exercise parallel
      - 2c86f16b39 cherry-pick cdata KeyError prevention from #39832
      - 26a9e8933 record start/stop duration for parallel processes separately
      - e4844bdf2b revisit previous join() behavior in check_requisites
      - f00a359cdf join() parallel process instead of a recursive sleep
      - 6c7007a4dc add parallel support for orchestrations
- **PR #47021**: (garethgreenaway) [2018.3] Fixing integration.modules.test_state_jinja_filters.StateModuleJinjaFiltersTest.test_path_which @ 2018-04-12 13:12:39 UTC
  - d3be82869e Merge pull request #47021 from garethgreenaway/920_state_module_jinja_filters_test_test_path_which
  - 2ccf2c5fe0 Fixing test_path_which to check that the filter is available rather than results.
- **PR #47022**: (corywright) Add auth.file module to auth documentation page @ 2018-04-11 21:11:10 UTC
- 66e8445b82 Merge pull request #47022 from corywright/add-auth-file-module-to-docs
- bd0918fc40 Add auth.file module to auth documentation page

- **PR #45774:** (twangboy) Fix __virtual__ issue in mac_system.py @ 2018-04-11 14:26:13 UTC
  - 12ecfddec9 Merge pull request #45774 from twangboy/mac_add_service_util
  - 5796696617 Fix tests for Py3
  - 7b40218790 Fix lint, remove sentence from docstring
  - 781880f0fc Add _available_services function for testing
  - 6080633613 Add assert_called_with
  - 1bf70b2033 Add more tests for available_services
  - b429fe3e74 Add tests for mac_utils
  - b5fe7130cc Used *args and **kwargs
  - ed061617a2 Fix unicode_literal issue in mac_assistive
  - 82e17e5fc8 Fix args/kwargs
  - 455146500a Move some functions into mac_utils
  - 125586264b Add utilsmac_service.py

- **ISSUE #46953:** (cskowronnek) salt-cloud azurearm [ERROR ] There was a profile error: Parameter 'subscription_id' must be str. (refs: #47012)

- **PR #47012:** (terminalmage) Azure: ensure subscription_id is a str type @ 2018-04-11 13:57:08 UTC
  - 79347f108a Merge pull request #47012 from terminalmage/issue46953
  - 5192622a32 Azure: ensure subscription_id is a str type

- **PR #46526:** (Ch3LL) Add tests for new source_* minion options @ 2018-04-10 19:56:45 UTC
  - 6503b8dafa Merge pull request #46526 from Ch3LL/ip_conf
  - c01180ff47 Patch ZMQ versions for master_uri test
  - da38f332a5 Change comment and salt.utils.network import
  - e972e6b7f1a Add for new source_* minion options

- **PR #46993:** (L4rS6) Fix: tuple instead of string @ 2018-04-10 17:07:59 UTC
  - 03907d3f1c Merge pull request #46993 from L4rS6/fix-broken-keystone-auth/2018.3
  - e33ba1b3d5 Fix: tuple instead of string

- **PR #46990:** (rallytime) [2018.3] Merge forward from 2017.7 to 2018.3 @ 2018-04-10 17:07:33 UTC
  - ffaee26540 Merge pull request #46990 from rallytime/merge-2018.3
  - cce5bad2df Merge branch '2017.7' into merge-2018.3
    - ba5421d988 Merge pull request #46991 from gtmanfred/windows
      - 98588c1dc5 use saltstack salt-jenkins
    - 2f1cf3e511 Merge branch '2017.7' into '2018.3'
      - 00c4067585 Merge pull request #46975 from gtmanfred/windows
        - 1f69c0d7f8 make sure windows outputs xml junit files
- a2ec1bb3 support new versions of winrm-fs
- b9efec8526 remove libnacl on windows
- 2edd5eaf9e fix path
- b03e272e44 windows work
- 3cf2353e41 Merge pull request #46945 from vutny/doc-faq-fix-jinja
  - bdfd54e61d [DOC] Fix Jinja block in FAQ page
- fc2f728665 Merge pull request #46925 from terminalmage/fix-file.patch-docstring
  - 9769657f0 Remove reference to directory support in file.patch state
- eef6c518e1 Merge pull request #46900 from rallytime/bp-46801
  - 6a41e8b457 rename jenkins to jenkinsmod
- 71839b0303 Merge pull request #46899 from rallytime/bp-45116
- b92f908da4 fix adding parameters to http.query from sdb yaml

- **PR #46339:** (DmitryKuzmenko) SSH State test failures @ 2018-04-10 17:06:51 UTC
  - a34b92ae82 Merge pull request #46339 from DSRCorporation/bugs/ssh_state_test_failures
  - bd98c49dc7 Merge branch '2018.3' into bugs/ssh_state_test_failures
  - 6f8c458a7f Increase timeout for run_run in ShellCase
  - 8e60c0cdfb Give background task more chance to start.
  - e0b6878fac One more useful assert for better test results.
  - 92a6c43c73 More logging and assertion fixes. Extended ssh ops timeout.
  - 6ebdd17ac4 Advanced logging in the failing SSH State tests.

- **PR #46989:** (Ch3LL) Fix redis cache log debug line @ 2018-04-10 16:35:12 UTC
  - 9924100c44 Merge pull request #46989 from Ch3LL/redis_log
  - 6160bc06c6 Fix redis cache log debug line

- **ISSUE #46834:** (oeuftete) strftime filter not found in 2018.3.0 (refs: #46848)

- **ISSUE #46668:** (anlutro) Jinja2 filter strftime stopped working in salt-ssh 2018.3 (refs: #46848, #46744)

- **PR #46848:** (garethgreenaway) [2018.8] salt-ssh jinja filters tests @ 2018-04-10 16:19:51 UTC
  - c6431936cb Merge pull request #46848 from garethgreenaway/testing_jinja_filters_available_via_salt_ssh
  - 5feda3e888 Merge branch '2018.3' into testing_jinja_filters_available_via_salt_ssh
  - 0adfeeb911 Updating a couple tests. Fixing check_whitelist_blacklist to work with PY3 when non-iterables are passed. Adding warning about list_avg results being wrong and future updates in Neon.
  - f3f42146ca Removing expected from strftime and hashsum tests since the results are always different and we are only concerned about the filter being available.
  - 860234c045 Fixing lint.
  - 0891c6b580 fixing docstring
  - c8945e4b2e cleaning up some imports.
  - 0599759e5b cleaning up some test doc strings.
- dceda5eb88 Moving all jinja filter tests into support/jinja_filters.py. Updating integration/ssh/test_jinja_filters.py to use those tests. Adding integration/modules/test_state_jinja_filters.py to also use the common jinja filter tests.
- 07d7e3ea01 Adding a new integration test and corresponding state files to test availability of jinja filters when using salt-ssh.

- **ISSUE #46880**: (liquidgecka) rabbitmq_policy broken in 2018.3.0 (refs: #46973)
- **PR #46973**: (rallytime) New "apply_to" kwarg in rabbitmq module should be added at the end @ 2018-04-10 14:42:32 UTC
  - **PR #41233**: (dnABic) added parameter apply_to for rabbitmq policy (refs: #46973)
  - fbcb7584c Merge pull request #46973 from rallytime/fix-46880
  - 8ce2f982c New "apply_to" kwarg in rabbitmq module should be added at the end

- **ISSUE #46934**: (d601) GPG encrypted binary data in pillars breaks in 2018.3.0 (refs: #46966)
- **PR #46966**: (terminalmage) Fix traceback when attempting to decode binary data to unicode @ 2018-04-10 14:08:35 UTC
  - 58f59cbff Merge pull request #46966 from terminalmage/issue46934
  - df43fbd8f salt.payload.Serial: fix traceback when unpacking binary blob
  - 40a99358c9 gpg renderer: fix traceback when decrypted ciphertext contains binary data
  - 17a88f6a71 Include exc_info in pillar render errors to aid in troubleshooting

- **ISSUE #46881**: (SynPrime) Cron.file - source file not found (refs: #46944)
- **PR #46944**: (garethgreenaway) [2018.3] cron.file with salt source URL @ 2018-04-10 13:34:03 UTC
  - e33e792e2a Merge pull request #46944 from garethgreenaway/46881_Cron_file_source_file_not_found
  - 438a0afeb03 Adding kwargs to calls into file module functions
  - 14d12b16db Remove unused imports. Gating tests so they do not run on Windows
  - 623d96f2a1 Adding dummy cron file for integration/states/test_cron
  - c8e01871d6 Adding an integration test to test cron.file.
  - ddc568b9fb Fixing bug that made cron.file unable to use a file via a Salt URL.

- **PR #46937**: (gtmanfred) enable_ssh_minions does not work with subset yet @ 2018-04-07 02:54:56 UTC
  - 08e8782f76 Merge pull request #46937 from gtmanfred/2018.3
  - 3fb7e903c enable_ssh_minions does not work with subset yet

- **PR #46936**: (gtmanfred) don't copy __pycache__ or .pyc files for kitchen @ 2018-04-06 19:15:46 UTC
  - ac4e7cd73f Merge pull request #46936 from gtmanfred/2018.3
  - 91474878a don't copy __pycache__ or .pyc files for kitchen

- **ISSUE #46659**: (stamak) [salt-cloud] [new oxygen openstack driver] no public_ips and floating_ips in salt-cloud output (refs: #46912)

- **PR #46912**: (gtmanfred) pull latest vm data after building for openstack shade driver @ 2018-04-06 13:46:42 UTC
  - 8105fd9715 Merge pull request #46912 from gtmanfred/openstack
  - 5ef538f8ad pull latest vm data after building for openstack shade driver
• PR #46908: (rallytime) [2018.3] Merge forward from 2017.7 to 2018.3 @ 2018-04-05 21:27:03 UTC
  - 735ea12960 Merge pull request #46908 from rallytime/merge-2018.3
  - 102e966512 Remove redundant section in log setup
  - 177c686b52 Update old utils paths to new utils paths
  - 0a297e7319 Merge branch ’2017.7′ into ’2018.3′
    * d0f5b43753 Merge pull request #44926 from frogunder/whitelisted_acl
      - 18e460fc30 Merge branch ’2017.7′ into whitelisted_acl
      - 1ad4d7d988 fix assert errors
      - e6a56016df update test
      - 19a2244cb7 whitelist_acl_test
    * 7d822f9cecc Merge pull request #46464 from gtmanfred/orchestration
      - 637cd6b7f fix pylint
      - 0151013dbd document cli option for cmd_subset
      - 4a3ed6607d add test for subset in orchestration
      - 3112359dd6 fix salt subset in orchestrator
    * 805ed1e964 Merge pull request #46879 from dwoz/cloudtestfix
      - dc54fc53c3 Fix multiple typos causing tests to fail
    * f70fde282 Merge pull request #46647 from twangboy/win_fix_test_grains
      - c179388b0e Fix the tear down function in integration.modules.test_grains.GrainsAppendTestCase
    * 91c078ce12 Merge pull request #46756 from nages13/bugfix-grain-virtual_subtype
      - 781f5030a4 Merge branch 'bugfix-grain-virtual_subtype' of https://github.com/nages13/salt into bugfix-grain-virtual_subtype
      - cd1ac4b7f9 Merge branch '2017.7′ into bugfix-grain-virtual_subtype
      - 0ace76c0e7 Merge branch ’2017.7′ into bugfix-grain-virtual_subtype
      - 9eb65e5d0 Merge branch ’2017.7′ into bugfix-grain-virtual_subtype
      - 73d69d365 Merge branch ’2017.7′ into bugfix-grain-virtual_subtype
      - a4a17eb6a Merge branch ’2017.7′ into bugfix-grain-virtual_subtype
      - bf5034dbd Merge branch ’2017.7′ into bugfix-grain-virtual_subtype
      - 8d12770951 Merge branch ”2017.7” into bugfix-grain-virtual_subtype
      - 7e704c0e81 Moved down container check code below hypervisors to validate container type running in virtual environment. Fixes #46754 & #43405
      - 710f74ca46 fix grains[’virtual_subtype’] to show Docker on xen kernels
    * 058bed221 Merge pull request #46799 from garethgreenaway/46762_prereq_shenanigans_tests
      - 13875e78cf Fixing documentation string for test.
      - 3d288c44d4 Fixing test documentation
      - 6cff602ef6a Adding tests for #46788
• d9770bf3f8 Merge pull request #46867 from terminalmage/unicode-logging-normalization
  - 7652688e83 Backport string arg normalization to 2017.7 branch
• 9eb98b1f6e Merge pull request #46770 from twangboy/fix_46433
  - 89a0fa6222 Merge branch '2017.7' into fix_46433
  - 67b4697578 Remove unused import (ling)
  - 9302fa5ab0 Clean up code comments
  - b383b9b330 Change the order of SID Lookup
• 9c776cffb7 Merge pull request #46839 from gtmanfred/tupletarget
  - 3b7208ce27 match tuple for targets as well
• 7db251dc11 Merge pull request #46845 from rallytime/bp-46817
  - 36a0f6d8ca address filehandle/event leak in async run_job invocations
• e3d17ab7bc Merge pull request #46847 from dwoz/missing-strdup
  - 55845f4846 strdup from libc is not available on windows

  - edc1059ee0 fix shrinking list in for loop bug
• PR #46853: (terminalmage) Add back date_format filter @ 2018-04-05 20:33:50 UTC
  - 9a47afc33b Merge pull request #46853 from terminalmage/date_format_filter
  - 266d13a665 Add back date_format filter
• PR #46882: (jasperla) Backport #46280 #46849 #46852 to 2018.3 @ 2018-04-05 14:29:12 UTC
  - PR #46852: (jasperla) fix creating a nic tag on a link with double 0 in the MAC (refs: #46882)
  - PR #46849: (jasperla) Unbreak creating etherstubs on SmartOS (refs: #46882)
  - PR #46280: (jasperla) Remove unneeded checks for binaries in SmartOS modules (refs: #46882)
  - a064a3e695 Merge pull request #46882 from jasperla/smartos/backports
  - 47a66975ff fix creating a nic tag on a link with double 0 in the MAC
  - a3c0b57e56 Unbreak creating etherstubs on SmartOS
  - e703254990 Remove unneeded checks for binaries in SmartOS modules
• PR #46873: (terminalmage) Attempt UTF-8 first when decoding/encoding @ 2018-04-05 14:16:28 UTC
  - 4e5e291c99 Merge pull request #46873 from terminalmage/utf8-first
  - cf2beb770a Don't log command when output_loglevel == 'quiet'
  - f59kee28db Remove hacky workarounds to get encode/decode tests to pass on Windows
  - 76e5d811bb4 Remove hacky workaround to get Windows to decode deserialized data properly
  - 0b5729e58a Remove hacky workaround to get git state/exec module to work properly on Windows
  - 22ff48518f Attempt UTF-8 first when decoding/encoding
• ISSUE #43499: (tyeapple) zmq setsockopt need to adapt python3 (refs: #46874)
• PR #46878: (terminalmage) Backport #46874 to 2018.3 @ 2018-04-05 13:26:04 UTC
- **PR #46874**: (johnj) Use bytestrings for PY3 compatibility when running setsockopt for zmq.SUBSCRIBE (refs: #46878)
  - 1518762465 Merge pull request #46878 from terminalmage/bp-46874
  - d9511d04d4 #43499, zmq setsockopt need to adapt python3

- **ISSUE #46862**: (kivoli) Setting locale.system fails in 2018.3 (refs: #47280, #46869)

- **PR #46869**: (gtmanfred) Always return dictionary for _localectl_status @ 2018-04-05 13:25:14 UTC
  - 67894e3ee9 Merge pull request #46869 from gtmanfred/2018.3
  - 1946e985f7 fix pylint
  - 75425dfd20 fix tests for localemod
  - 2d7c7b5e33 Always return dictionary for _localectl_status

- **PR #46870**: (mireceaulinic) Correct the documentation for two new proxy modules @ 2018-04-04 21:48:41 UTC
  - 58c8ff18e2 Merge pull request #46870 from cloudflare/proxy-doc
  - f4b6184476 Corect and add the cimc proxy module to autodoc
  - a99bc20b9 Correct & add Panos to autodoc

- **PR #46729**: (terminalmage) Performance improvement/error catching in expr_match @ 2018-04-04 20:25:57 UTC
  - d7e4b9d755 Merge pull request #46729 from terminalmage/expr_match
  - 70cfae299 Add test case
  - 250039b11f Restore original variable name
  - ae0f112a49 Log an exception when non-string val/expr passed to expr_match
  - dac42a672b Performance improvement/error catching in expr_match

- **PR #46872**: (terminalmage) Backport #46863 to 2018.3 @ 2018-04-04 19:04:40 UTC
  - PR #46863: (TamCore) fixed top function which was broken since commit 002aa88a97e (refs: #46872)
  - e0b383ad5 Merge pull request #46863 from terminalmage/bp-46863
  - be284e5b99 Add skipIf when older mock present
  - db8faae56 Add unit tests for ext_nodes master_tops module
  - ee4377cbf fixed top function which was broken since commit 002aa88a97e

- **PR #46850**: (rallytime) [2018.3] Merge forward from 2017.7 to 2018.3 @ 2018-04-04 18:07:44 UTC
  - 5c76d98d1a Merge pull request #46850 from rallytime/merge-2018.3
  - a0fcd5c053 Fix test_cp failure: forgot to add tgt to test when @with_tempfile is present
  - d0202cab72 Resolve bad merge: there should only be one test_get_file_from_env_in_url test
  - e28f71b418 Lint: use full salt utils path
  - 4ad50bbdee Update old utils paths to new paths
  - 893196d3e6 Merge branch ’2017.7′ into ’2018.3′
    - 1941426218 Merge pull request #46838 from gtmanfred/npm
      - bff61dd291 use http registry for npm
    - e544254e7b Merge pull request #46823 from rallytime/fixed-42312
* dafa820f93 Improve __virtual__ checks in sensehat module

- 3a7cc44ade Add python3 support for byte encoded markers
- 09048139c7 Do not show whole env in error
- ed94700255 fix missing raise statement
- 15868be88c Fixes stdout user environment corruption

* ac2a6616a7 Merge pull request #46432 from twangboy/win_locales_utf8
  - affa35c30d Revert passing encoding
  - a0ab27ef15 Merge remote-tracking branch 'dw/win_locales_utf8' into win_locales_utf8
  - 9f95c50061 Use default SLS encoding, fall back to system encoding
  - 6548d550d0 Use salt.utils.to_unicode
  - 8c0164fb63 Add ability to specify encoding in sdecode
  - 2e7985a81c Default to utf-8 on Windows
  - 8017860dcc Use salt.utils.to_unicode
  - c10ed26ebab Add ability to specify encoding in sdecode
  - 8d7e2d0058 Default to utf-8 on Windows

* fadc5e4ba4 Merge pull request #46669 from terminalmage/pillar-merge-order
  - b4a1d34b47 Add option to return to pre-2017.7.3 pillar include merge order

* b90f0d1364 Merge pull request #46711 from terminalmage/wildcard-versions-info
  - fc7d16f1fa Add performance reminder for wildcard versions

* 6c80d90bb6 Merge pull request #46693 from dwoz/test_smtp_return
  - 5bf850c67f File and Pillar roots are dictionaries

* 9a6bc1418c Merge pull request #46543 from dafenko/fix-add-saltenv-pillarenv-to-pillar-item
  - 6d5b2068aa Merge branch '2017.7' into fix-add-saltenv-pillarenv-to-pillar-item
  - 5219377313 Merge branch '2017.7' into fix-add-saltenv-pillarenv-to-pillar-item
  - b7d39caa86 Merge branch '2017.7' into fix-add-saltenv-pillarenv-to-pillar-item
  - 25f1074a85 Add docstring for added parameters
  - 973bc13955 Merge branch '2017.7' into fix-add-saltenv-pillarenv-to-pillar-item
  - 164314a859 Merge branch '2017.7' into fix-add-saltenv-pillarenv-to-pillar-item
  - 267ae9f633 Fix missing saltenv and pillarenv in pillar.item

* f776040e25 Merge pull request #46679 from vutny/doc-state-pkg
  - 4a730383bf [DOC] Correct examples in pkg state module

* 47409ea4e6 Merge pull request #46646 from twangboy/win_fix_test_local_cache
  - 8d93156604 Fix unit.returners.test_local_cache for Windows

* 0c2dce0416 Merge pull request #46649 from terminalmage/issue46595
  - e82a1aa1e1c Make server_id consistent on Python 3

* 4e7466a21c Merge pull request #46588 from UtahDave/no_crash_winshell

32.2. Previous releases
* b7842a1777 Update error message.
* 95dfdb91ca Don't stacktrace when salt-ssh w/o saltwinshell

* 33af3cfc7c Merge pull request #46631 from rallytime/update-pillar-unit-tests
  
  - 0f728186aa Fix pillar unit test failures: file_roots and pillar_roots environments should be lists

* d329e7af78 Merge pull request #46640 from terminalimage/file.copy-docs
  
  - 480c5f8faa Clarify the docs for the file.copy state

* ff40590c06 Merge pull request #46642 from vutny/doc-cloud-index
  
  - 51e6aa54a1 [DOC] Unify cloud modules index header

* 83ed40c06a Merge pull request #46619 from rallytime/merge-2017.7
  
  - bcbddf5d07 Merge branch '2017.7.5' into '2017.7'
  - 19bb725698 Merge pull request #46612 from Ch3LL/7.5_rn
  - 6076bfa2ee Add changelog to 2017.7.5 release
  - 31c78ae11 Merge pull request #46572 from dmurphy18/update_xxxbuild
  - c87511570d Merge branch '2017.7.5' into update_xxxbuild
  - cdd768fa4d Merge pull request #46577 from gtmanfred/2017.7.5
  - 78cbf7b5cd Fix npm issue
  - c76f7eb028 enable debug logging on the minionlog
  - ee682cc660c Merge pull request #46551 from terminalimage/salt-jenkins-885
  - 703b5e7e65 Change versionadded to show that 2018.3.0 will not have this function
  - 010d260d06 Rewrite failing Suse pkg integration test
  - f3f5dec239 zypper.py: fix version argument being ignored
  - 214f2d6ad3 Add pkg.list_repo_pkgs to zypper.py
  - 0a541613f2 Additon of -sa flag to allow for revision numbers other than -0 or -1
  - bd62699ccb Merge pull request #46563 from gtmanfred/2017.7.5
  - 8d5ab72983 virtualenv version too old for python3.6
  - 2916708124 Merge pull request #46561 from gtmanfred/2017.7.5
  - 2c39ac6dfe disable verbose
  - ee3bf65e32 Merge pull request #46537 from rallytime/bp-46529
  - 289c7a228f retry if there is a segfault
  - 1271536a89 Merge pull request #46519 from rallytime/man-pages-2017.7.5
  - 782a5584f5 Update man pages for 2017.7.5

* df12135439 Merge pull request #46584 from twangboy/lgpo-46568
  
  - 661017104b Detect disabled reg_multi_sz elements properly

* fd3d3aa487c Merge pull request #46624 from twangboy/win_fix_installer
  
  - fa0b0efe46 Fix some installer script inconsistencies
• f038e3c452 Merge pull request #46571 from garethgreenaway/46552_onfail_and_require
  • 152c43e843 Accounting for a case when multiple onfails are used along with requires. Previously if you have multiple states using ‘onfail’ and two of those states using a ‘require’ against the first one state, the last two will run even if the ‘onfail’ isn’t met because the ‘require’ is met because the first state returns true even though it didn’t execute. This change adds an additional hidden variable that is used when checking requisites to determine if the state actually ran.
• 2677330e19 Merge pull request #46520 from gtmanfred/2017.7
  • caefedc095 make sure utils is empty for pickling for windows
  • 2883548e6b pass utils to the scheduler for reloading in modules
• 7bc3c2e588 Merge pull request #46531 from terminalmage/issue44299
  • b70c3389da Fix case where no comments specified
  • ce391c53f4 Add regression test for #44299
  • c3e36a6c94 Fix regression in yumpkg._parse_repo_file()
  • f0c79e3da3 Slight modification to salt.utils.pkg.rpm.combine_comments()
• b80ed9d5c6 Merge pull request #46567 from dwoz/runtest-n-wart
  • 3b6901e19d Honor named tests when running integration suites
• 1dcd22e767 Merge pull request #46580 from twangboy/win_update_docs_dism
  • d52b99d7a3 Clarify some issues with msu files in win_dism.py
• 0a68c22332 Merge pull request #46541 from gtmanfred/metadata
  • 19bd1d9db5 handle user-data for metadata grains

• ISSUE #46668: (anlutro) Jinja2 filter strftime stopped working in salt-ssh 2018.3 (refs: #46848, #46744)
• PR #46744: (garethgreenaway) [2018.3] Ensure salt.utils.dateutils is available for templates via salt-ssh @ 2018-03-28 21:09:46 UTC
  • ef68df7f3a Merge pull request #46744 from garethgreenaway/46668_jinja2_filter_strftime_unavailable
  • 0b30955c00 Including salt.utils.dateutils so various jinja filters are available when using salt-ssh.
• ISSUE #46334: (sjorge) [2018.3.0rc1] Stacktrace on call to nacl.dec (refs: #46639, #46720)
• PR #46426: (garethgreenaway) [2018.3.0rc1] fixes to nacl module & runner (refs: #46639, #46720)
  • 65bb37ef6d Merge pull request #46720 from rallytime/bump-nacl-deprecation
  • 5102c0301c Bump deprecation notices in nacl module & runner to Neon
• PR #46733: (rallytime) [2018.3] Merge forward from 2018.3.0rc1 to 2018.3 @ 2018-03-27 21:15:46 UTC
  • c83d9e66fe Merge pull request #46733 from rallytime/merge-2018.3
  • 00d4eb26f3 Merge branch '2018.3.0rc1' into '2018.3'
• PR #46565: (twangboy) Create reg salt util (2018.3) @ 2018-03-26 22:03:33 UTC
  • 0faced1d54 Merge pull request #46565 from twangboy/win_fix_cmd_powershell_2018.3
  • 5ee64e9b0e Fix lint (spelling error)
  • 0de54ed953 Additional tests
– fc9ecd75e2 Skip unit.state.test_reg unless on Windows
– aa98bd2f50 Fix some lint
– e0d201a96f Make sure the docs are correct for the tests
– f15f92318d Add tests for salt.utils.win_reg
– f7112b19a2 Submit #46527 against 2018.3

**ISSUE #46334:** (sjorge) [2018.3.0rc1] Stacktrace on call to nacl.dec (refs: #46426)

**PR #46639:** (terminalmage) Use the correct path for nacl certificates in Windows @ 2018-03-26 19:20:10 UTC
– PR #4626: (garethgreenaway) [2018.3.0rc1] fixes to nacl module & runner (refs: #46639, #46720)
– dd52368f90 Merge pull request #46639 from terminalmage/nacl-default-path
– 2f7660fc35 Use the correct path for nacl certificates in Windows

**PR #46416:** (dincamihai) Fix cp.push empty file @ 2018-03-26 17:52:47 UTC
– 2efef52a3e Merge pull request #46416 from dincamihai/fix-cp.push-empty-file
– 536b0a1a4e Fix cp.push empty file

**PR #46643:** (mcalmer) fix docker return @ 2018-03-26 15:52:31 UTC
– 84579e7652 Merge pull request #46643 from mcalmer/fix-docker-return
– 3ceb63f607 fix checking test results
– af64632bf3 add unit test for failed login
– 0fc7989236 make it possible to use login, pull and push from module.run and detect errors

**PR #46650:** (Ch3LL) Mirror libnacl imports in test from the nacl module @ 2018-03-26 14:48:40 UTC
– c67afbeb36 Merge pull request #46650 from Ch3LL/nacl_test
– 9fe88bc431 Mirror libnacl imports in test from the nacl runner
– f11d58a8e9 Mirror libnacl imports in test from the nacl module

**PR #46645:** (terminalmage) Add Unicode / Python 3 update to 2018.3.0 release notes @ 2018-03-26 14:43:53 UTC
– 03b58a01cf Merge pull request #46645 from terminalmage/release-notes
– 986c7bdc4cf Rewrite unicode/py3 section
– 064bc83276 Add Unicode / Python 3 update to 2018.3.0 release notes

**ISSUE #46150:** (whytewolf) With chocolately.version some packages don't work with check_remote=True (refs: #46661)

**PR #46661:** (Kimol) Chocolatey - Lowered name of local and remote packages before comparing versions. @ 2018-03-26 14:35:39 UTC
– 308c9ddfc3 Merge pull request #46661 from Kimol/2018.3-fix_chocolatey_check_remote_packages
– 52581e7918 Removed trailing whitespace
– 123a86947c Chocolatey - Added lowering local packages for unifing both local and remote names to lowercase for comparison.
– 4be1a991c2 Lowered name of available packages before comparing with local packages

**PR #4659:** (rallytime) [2018.3] Merge forward from 2017.7 to 2018.3 (refs: #46631) @ 2018-03-21 20:57:04 UTC
– 2e1f7c37f7 Merge pull request #4659 from rallytime/merge-2018.3
- 46ba72fb1c Fix pillar unit test failures: file_roots and pillar_roots environments should be lists
- fe2d46dd0c Better merge conflict resolution for setup.py windows changes
- 8886b61576 Update old util paths to new paths
- 8d1e1e79f4 Merge branch '2017.7' into '2018.3'
  - 048b2ba3f6 Merge pull request #46547 from garethgreenaway/46427_service_module_cumulus
    - edd0b11447 Merge branch '2017.7' into 46427_service_module_cumulus
    - ea3c16080e Disable the service module on Cumulus since it is using systemd.
- 98e3260b9a Merge pull request #46548 from Ch3LL/profit_test
  - db96c4e72e check for foo,bar username,password set in profitbrick config
- 79f2a76609 Merge pull request #46549 from Ch3LL/dimension_test
  - bb338c464c Fix dimensionsdata test random_name call
- 083846fe0e Merge pull request #46529 from gtmanfred/kitchen
  - 50d6e2c7be retry if there is a segfault
- 5cc11129f1 Merge pull request #46511 from rallytime/bp-45769
  - a8ffceda53 Suppress boto WARNING during decode, reference: https://github.com/boto/boto/issues/2965
- 0e90c8a6f Merge pull request #46493 from terminalmage/issue46207
  - f06ff68f10 salt-call: don't re-use initial pillar if CLI overrides passed
- b11a8fc8e0 Merge pull request #46450 from gtmanfred/salt_runner
  - 7974ff7264 load grains for salt.cmd runner
- 22d753364b Merge pull request #46337 from gtmanfred/2017.7
  - d6d9e36359 add tests for names and listen/listen_in
  - 3f8e0db572 let listen_in work with names
  - 7161f4d4df fix listen to be able to handle names
- b7191b8782 Merge pull request #46413 from meaksh/2017.7-explore-result-in-depth
  - 885751634e Add new unit test to check state.apply within module.run
  - 9f19ad5264 Rename and fix recursive method
  - 1476ace558 Fix Python3 and pylint issue
  - 726ca3044d Explore 'module.run' response to catch the 'result' in depth
- 02a79a2014 Merge pull request #46496 from gtmanfred/kitchen
  - da002f78d0 include virtualenv path for py3 windows
  - fe2e03ea remove duplicate setup
- 5c4c182d75 Merge pull request #46330 from bdrung/fix_kubernetes_test_create_deployments
  - 5008c53c44 Fix ValueError for template in AppsV1beta1DeploymentSpec
- c7e05d3ff4 Merge pull request #46482 from rongshengfang/fix-keyerror-in-instance_present
  - ed8c83e89a Fix KeyErr in salt/states/boto_ec2.py when an EIP is being associated to an existing instance with the instance_present state.
573d51afec Merge pull request #46463 from terminalmage/mock-2.0
  - b958b4699c Update requirements files to depend on mock>=2.0.0
a154d35fc7 Merge pull request #46422 from rallytime/bp-46300
  - 829dfde8e8 Change stringutils path to old utils path for 2017.7
  - 91db2e0782 Python 3 support
2afaca17a1 Merge pull request #46320 from mcalmer/warn-kubernetes
  - c493ced415 add warning about future config option change
c7f95581e3 Merge pull request #46449 from bdrung/make-doc-theme-configurable
  - 4a5da2d144 Make documentation theme configurable
10ce0e9e20 Merge pull request #46162 from rallytime/team-suse-zypper-owner
  - 13a295a3b7 Add pkg and snapper to team-suse
  - 35c7b7b0d3 Add btrfs, xfs, yumpkg, and kubernetes file to team-suse
  - 485d777ac0 Add team-suse to CODEOWNERS file for zypper files
cac096b311 Merge pull request #46434 from gtmanfred/highstate_return
  - d18f1a55a7 fix pylint
  - 9e2c3f7991 split return key value correctly
7dd71101ce Merge pull request #46455 from whytewolf/Issue_44452_unicode_cloud
  - 5fe474b1a8 .format remove fix for #44452
4c8d9026d3 Merge pull request #46428 from twangboy/win_fix_reqs
  - e7ab97cc17 Remove six as a hard dep for Salt
  - cc67e5c2ef Set six to 1.11.0
e834d9a63b Merge pull request #46454 from gtmanfred/kitchen
  - b8ab8434a5 fix windows for kitchen
2886dca88f Merge pull request #46452 from gtmanfred/spm_cache_dir
  - 169cf7a4e2 make spm cache_dir instead of all cachedirs
a188984cd9 Merge pull request #46446 from bdrung/fix-typos
  - 7e6e80be87 heat: Fix spelling mistake of environment
  - a3c54b50f6 Fix various spelling mistakes
e35fc5263c Merge pull request #46309 from bdrung/dynamic-pillarenv
  - 584b451fd1 Support dynamic pillar_root environment
35fe9827fe Merge pull request #46430 from terminalmage/issue44032
  - f9f187e915 Improve reliability/idempotence of file.blockreplace state
2bad0a21c0 Merge pull request #46429 from twangboy/win_fix_snmp
  - 8995a9b8de Fix problem with __virtual__ in win_snmp
93a572f229 Merge pull request #46100 from jfindlay/resolv_scope
  - d5561bedaf tests.unit.grains.core add scoped IPv6 nameserver
• 4e2e62d508 salt.utils.dns parse scope param for ipv6 servers
• 5acc1d5e54 Merge pull request #46420 from bdrung/2017.7
  • e48c13d9e0 Fix SSH client exception if SSH is not found
• ca6a76e317 Merge pull request #46379 from angeloudy/2017.7
  • 3acb59c74c Merge branch '2017.7' into 2017.7
  • d971e0c08b Fix indent
  • 269514683f Update http.py
  • 908c040ac3 Update http.py
  • 51baa3c135b Update http.py
  • 14aba21111 fix bytes-object required error in python 3
• 73f9233557 Merge pull request #46404 from gtmanfred/kitchen
  • c56ba95a8 clone .git for the version tests
  • 3620611b5b fix unhold package for debian
  • 5219f72baa fix minion log path
• ca28cf4e64 Merge pull request #46310 from twangboy/win_update_installer_build
  • bc8f19566 Update the installer build
• deccb3ca3 Merge pull request #46316 from twangboy/win_fix_dsc
• 2042d33d59 Fix issues with the DSC module

• PR #46620: (rallytime) [2018.3] Merge 2018.3.0rc1 into 2018.3 @ 2018-03-20 22:45:00 UTC
  • 8cd56b9dc Merge pull request #46620 from rallytime/merge-2018.3.0rc1-into-2018.3
  • b036a3cea Merge branch '2018.3.0rc1' into '2018.3'
• PR #46606: (Ch3LL) add autodoc topics for infoblox state modules @ 2018-03-19 21:35:46 UTC
  • 2d2fe22ae2 Merge pull request #46606 from Ch3LL/infoblox_docs
  • 6eaba7dc4 add autodoc topics for infoblox state modules
• PR #46540: (s0undt3ch) Some missing `isinstance` checks. @ 2018-03-15 16:17:19 UTC
  • 1191d5b379 Merge pull request #46540 from s0undt3ch/2018.3
  • fa1d68774 Some missing `isinstance` checks. Committed again through a PR.
• PR #46513: (rallytime) [2018.3] Merge forward from 2018.3.0rc1 to 2018.3 @ 2018-03-15 15:58:59 UTC
  • 542943e4b Merge pull request #46513 from rallytime/merge-2018.3
  • aa760334a1 Merge branch '2018.3.0rc1' into '2018.3'
• ISSUE #43208: (mitar) Prevent user.present to change uid and gid of existing user (refs: #46502)
• PR #46502: (terminalmage) user.present: don't change uid/gid unless explicitly told to @ 2018-03-13 14:25:20 UTC
  • 3e073c7e8a Merge pull request #46502 from terminalmage/issue43208
  • 4106840deb user.present: don't change uid/gid unless explicitly told to
• PR #46398: (rallytime) [2018.3] Merge forward from 2017.7 to 2018.3 @ 2018-03-12 20:25:19 UTC
– 7cdb00ca9c Merge pull request #46398 from rallytime/merge-2018.3
– d22e5ba442 Merge fix: return back wb+ mode in crypt.gen_keys.
– c7ddaf8ce Lint: Use log variable, not logger.
– ca1860cd91 Use new get_umask function in mask calls in virt.py
– 19ec7b6de1 Update old utils paths with new utils paths
– d83727fd9 Merge branch '2017.7' into '2018.3'

  * 95586678c3 Merge pull request #46394 from Ch3LL/mac_doc
    * 158add6661 change oxdownload to oxdownload-[python_version]
    * 21aa848c89 Add mac py2 and py3 packages to mac installation docs
  * 075b5d09ac1 Merge pull request #46338 from rallytime/fix-44831
    * 90771da999 Remove cmd.wait deprecation reference in docs
  * 3849e7a085 Merge pull request #46333 from danlgiga/issue-42438
    * 3b13f37b44 Revert changes in the code and change docs instead
    * 38114a65d8 Fixes color parameter mismatch and handles 204 responses correctly

32.2.61 Salt 2018.3.2 Release Notes

Version 2018.3.2 is a bugfix release for 2018.3.0.

The 2018.3.2 release contains only a small number of fixes, which are detailed below.

This release fixes two critical issues.

The first is Issue #48038, which is a critical bug that occurs in a multi-syndic setup where the same job is run multiple times on a minion.

The second issue is #48130. This bug appears in certain setups where the Master reports a Minion time-out, even though the job is still running on the Minion.

Both of these issues have been fixed with this release.

- Total PR References: 10
- Contributors: 4 (cro, garethgreenaway, gtmanfred, rallytime)

Warning: If you are using Jinja to dump lists or dictionaries in your SLS files, this will now cause errors in Python 2 since Jinja does not produce YAML-compatible output when strings in the data structures contain unicode types. The dictionary must be passed through a Jinja filter to produce YAML-compatible strings.

The below is an example of invalid SLS:

```yaml
/etc/foo.conf:
  file.managed:
    - source: salt://foo.conf
    - template: jinja
    - defaults: {{ mydict }}
```

To make it valid, use either one of Salt's own `json` or `yaml` filters:

```yaml
/etc/foo.conf:
  file.managed:
    - source: salt://foo.conf
    - template: jinja
    - defaults: {{ mydict | json }}
```

Changelog for v2018.3.1..v2018.3.2

Generated at: 2018-06-17 19:17:16 UTC

- **PR #48129**: (rallytime) Add release notes for 2018.3.2 @ 2018-06-14 15:48:36 UTC
  - 21aa1fcb4 Merge pull request #48129 from rallytime/release-notes-2018.3.2
  - 0b13be0111 Add release notes for 2018.3.2
- **PR #48100**: (rallytime) Back-port #48014 to 2018.3.2 @ 2018-06-14 12:54:52 UTC
- PR #48014: (cro) Find job pause (refs: #48100)
- 36b99ae80a Merge pull request #48100 from rallytime/bp-48014
- 77fecc5c4 Lint: Add blank line
- 159b052962 One more case where returner doesn't respond
- 91b45b4cc4 Catch two cases when a returner is not able to be contacted--these would throw a stacktrace.

- PR #48099: (rallytime) Back-port #47915 to 2018.3.2 @ 2018-06-14 12:54:23 UTC
  - PR #47915: (garethgreenaway) [2018.3] state runner pause resume kill (refs: #48099)
  - 40c1bfdec9 Merge pull request #48099 from rallytime/bp-47915
  - 3556850058 fixing typo in alias_function call.
  - 4b0ff496fa Some fixes to the set_pause and rm_pause function in the state runner, renaming to in line with the functions in the state module. Including aliases to previous names for back-ward compatibility. Including a soft_kill function to kill running orchestration states. A new test to test soft_kill functionality.

- ISSUE #48038: (austinpapp) jobs are not dedup'ing minion side (refs: #48075)

- PR #48097: (rallytime) Back-port #48075 to 2018.3.2 @ 2018-06-14 12:52:44 UTC
  - PR #48075: (garethgreenaway) [2017.7] Ensure that the shared list of jids is passed (refs: #48097)
  - 074a97dcfa Merge pull request #48097 from rallytime/bp-48075
  - e4c719b55f Ensure that the shared list of jids is passed when creating the Minion. Fixes an issue when minions are pointed at multiple syndics.

32.2.62 Salt 2018.3.3 Release Notes

Version 2018.3.3 is a security and bugfix release for 2018.3.0.

Statistics

- Total Merges: 548
- Total Issue References: 69
- Total PR References: 341
- Contributors: 55 (Ch3LL, FedericoCeratto, KaiSforza, L4rS6, Lutseslav, The-Loeki, Vaelatern, admld, aesposito91, asenci, astorath, azelezni, babs, bbczeuz, bbinet, brejoc, cro, daa, dmurphy18, dubb-b, dwoz, eliasp, ezh, garethgreenaway, gtmanfred, isbm, jeduardo, kt97679, kuetrzi, linopl1, lomeroe, lusche, mateiw, maxarnold, maxim-sermin, meaksh, mmulqueen, morganwillcock, mtorromeo, nullify005, paulcollinsii, pritarbaral, rallytime, rares-pop, rmarchei, rosscdh, sizgiyaev, sjorge, t0fik, terminalmage, travispaull, twangboy, vinian, weswhet, zerthimon)

Warning: If you are using Jinja to dump lists or dictionaries in your SLS files, this will now cause errors in Python 2 since Jinja does not produce YAML-compatible output when strings in the data structures contain unicode types. The dictionary must be passed through a Jinja filter to produce YAML-compatible strings.

The below is an example of invalid SLS:
Security Fix

CVE-2018-15751 Remote command execution and incorrect access control when using salt-api.
CVE-2018-15750 Directory traversal vulnerability when using salt-api. Allows an attacker to determine what files exist on a server when querying /run or /events.

Credit and thanks for discovery and responsible disclosure: nullbr4in, xcuter, koreedge, loupos, blackcon, Naver Business Platform

Changes to win_timezone

Improves timezone detection by using the pytz module.

timezone.get_offset and timezone.get_zonecode now work properly.

Adds timezone.list to list supported timezones in either Windows or Unix format.

New Jinja Filter

The tojson filter (from Jinja 2.9 and later) has been ported to Salt, and will be used when this filter is not available. This allows older LTS releases such as CentOS 7 and Ubuntu 14.04 to use this filter.

You can use this filter any time you wish to dump a list or dictionary into an SLS file, to ensure that the result is able to be loaded by the YAML renderer. For example:

```
foo:
  bar.baz:
    - some_arg: {{ mydict | tojson }}
```
MacOSX escape characters with runas

You are now required to escape quotes when using the runas argument with the cmd module on macosx.

Example:

```python
cmd.run 'echo "h="baz"" runas=macuser
```
- 180692cee Disable various boto tests when run under python 3.7 because of //github.com/spulec/moto/issues/1706. which was causing the test suite to hang on unit tests. This PR is disabling the tests in the test_boto_vpc state tests.

- **PR #49542**: (twangboy) Update openssl @ 2018-09-06 16:11:34 UTC
  - cae2d61568 Merge pull request #49542 from twangboy/fix_osx_build_3
  - fe02b276f Add 1.0.2p shasum file
  - 5f06dc2762 Fix issues with osx build scripts on 2018.3.3

- **PR #49536**: (rallytime) Back-port #49524 to 2018.3.3 @ 2018-09-06 16:00:00 UTC
  - **PR #49524**: (garethgreenaway) [2018.3] Disable boto tests under 3.7 (refs: #49536)
  - d9f09da5d9 Merge pull request #49536 from rallytime/bp-49524
  - 9e7203e08a Disable various boto tests when run under python 3.7 because of //github.com/spulec/moto/issues/1706. which was causing the test suite to hang on unit tests.

- **PR #49535**: (Ch3LL) Skip test_virt and pip_state requirements tests on macosx @ 2018-09-06 15:59:38 UTC
  - cb934b06b Merge pull request #49535 from Ch3LL/skip_pip_mac
  - 50237e9daf Skip test_virt and pip_state requirements tests on macosx

- **PR #49499**: (rallytime) Pin CherryPy version to < 18.0.0 in requirements files for PY2 @ 2018-09-04 18:52:44 UTC
  - 87d3dfe085 Merge pull request #49499 from rallytime/pin-cherrypy-2018.3.3
  - 9e274335a3 Pin CherryPy version to < 18.0.0 in requirements files for PY2

- **ISSUE saltstack/salt-jenkins#1075**: (Ch3LL) [2018.3.3] arch python3 tests do not finish (refs: #49303, #49451)

- **PR #49467**: (rallytime) Back-port #49451 to 2018.3.3 @ 2018-08-31 17:38:09 UTC
  - **PR #49451**: (gtmanfred) Handle thread shutdown on system exit (refs: #49467)
  - 39fda4434 Merge pull request #49467 from rallytime/bp-49451
  - b891a0a8d3 add lock for proxy minion process too
  - 72519878c0 start thread in try block
  - b87f01662 use finally instead of catching baseexception
  - de98be093 use rlock so blocking can be passed in py2
  - d346b42332 import Callable from collections.abc for python3.7
  - d7a41007a Handle thread shutdown on system exit

- **PR #49468**: (rallytime) Back-port #49291 and #49331 to 2018.3.3 @ 2018-08-31 17:37:30 UTC
  - **PR #49331**: (dwoz) Use salt.utils to ensure string type (refs: #49468)
  - **PR #49291**: (dwoz) Add dedent that sets line endings (refs: #49468)
  - 37d1455d69 Merge pull request #49468 from rallytime/bp-49291-and-49331
  - 944f8e96c8 Use salt.utils to ensure string type
  - 6c92ed2021 Fix review nits
  - 0e18b157e3 Re-factor dedent to fix warts
  - b503406f8 Use salt.utils.to_* functions

PR #49449: (rallytime) Mark status test as flaky @ 2018-08-30 18:10:44 UTC
- PR #49449: (rallytime) Mark status test as flaky

PR #49444: (rallytime) Back-port #49299 to 2018.3.3 @ 2018-08-30 18:10:21 UTC
- PR #49444: (rallytime) Back-port #49299 to 2018.3.3

PR #49448: (rallytime) Back-port #49400 to 2018.3.3 @ 2018-08-30 18:04:29 UTC
- PR #49448: (rallytime) Back-port #49400 to 2018.3.3

PR #49446: (rallytime) Back-port #49356 to 2018.3.3 @ 2018-08-30 18:04:01 UTC
- PR #49446: (rallytime) Back-port #49356 to 2018.3.3

PR #49445: (rallytime) Back-port #49192 to 2018.3.3 @ 2018-08-30 18:03:44 UTC
- PR #49445: (rallytime) Back-port #49192 to 2018.3.3

PR #49443: (rallytime) Back-port #49180 and related fixes to 2018.3.3 @ 2018-08-30 18:02:54 UTC
- PR #49443: (rallytime) Back-port #49180 and related fixes to 2018.3.3

6399d035a4 Add dedent that sets line endings

5170 Chapter 32. Release notes
- f4b7101a35 Simplify dict keys lookup
- 942b68bfc8 Fix remaining file state integration tests (py3)

- **PR #49441**: (rallytime) Back-port #49240 to 2018.3.3 @ 2018-08-30 18:02:40 UTC
  - PR #49240: (dwoz) file state test fixes (refs: #49362, #49441)
  - 1f4906346a Merge pull request #49441 from rallytime/bp-49240
  - 22ed452479 Work around listdir encoding issues on py2 windows
  - 5fbe275835 file state test fixes

- **PR #49440**: (rallytime) Back-port #49258 to 2018.3.3 @ 2018-08-30 18:02:25 UTC
  - PR #49258: (gtmanfred) flaky tests are flaky (refs: #49440)
  - cc27b67a37 Merge pull request #49440 from rallytime/bp-49258
  - 0191af1423 flaky tests are flaky yo
  - 720b671dda mark orchestration state tests as flaky

- **ISSUE #48880**: (damntoken) Can’t run cmd.run with UTF-8 chars as arguments / parameters. With custom module. (refs: #49322)

- **PR #49368**: (rallytime) Back-port #49322 to 2018.3.3 @ 2018-08-28 17:15:15 UTC
  - PR #49322: (dwoz) Encode shell commands explicitly. (refs: #49368)
  - af80e64569 Merge pull request #49368 from rallytime/bp-49322
  - 238853b9ec Encode shell commands explicitly.

- **PR #49365**: (rallytime) Back-port #49270 to 2018.3.3 @ 2018-08-28 17:00:25 UTC
  - PR #49270: (dwoz) file state test fixes (refs: #49365, #49441)
  - b4a1e1d365 Merge pull request #49441 from rallytime/bp-49270
  - 2ed452479 Work around listdir encoding issues on py2 windows
  - 5fbe275835 file state test fixes

- **PR #49364**: (rallytime) Back-port #49244 to 2018.3.3 @ 2018-08-28 17:12:58 UTC
  - PR #49244: (dwoz) Test fixes: unit.fileserver.test_gitfs (refs: #49364)
  - dbcd2fc72e Merge pull request #49364 from rallytime/bp-49244
  - e0909d3a25 Simplify by using to_unicode helper
  - 4723cc9092 Older GitPython version do not have a close method
  - d5f9eafa7c Fix up fileservet.test_gitfs tests on windows
  - 4b6886347 Remove unicode filenames on windows python 2

- **PR #49362**: (rallytime) Back-port #49240 to 2018.3.3 @ 2018-08-28 17:00:25 UTC
  - PR #49240: (dwoz) file state test fixes (refs: #49362, #49441)
  - b4a1e1d365 Merge pull request #49362 from rallytime/bp-49240
  - 16ca5b9694 Work around listdir encoding issues on py2 windows
  - 7650208dbc file state test fixes

- **PR #49365**: (rallytime) Back-port #49270 to 2018.3.3 @ 2018-08-28 16:56:23 UTC

32.2. Previous releases

---

5171
- PR #49270: (dwoz) Add async helper to test_sock_path_len (refs: #49365)
- 9ca9a775ff Merge pull request #49365 from rallytime/bp-49270
- 1b3f75a8b8 Add async helper to test_sock_path_len

- PR #49364: (rallytime) Back-port #49243 to 2018.3.3 @ 2018-08-28 16:55:55 UTC
  - PR #49243: (dwoz) Revert newline translation change (refs: #49364)
  - bbff57da16 Merge pull request #49364 from rallytime/bp-49243
  - 5db77c6229 Revert newline translation change

- PR #49347: (Ch3LL) [2018.3.3] Backport #49345 @ 2018-08-28 01:54:00 UTC
  - PR #49345: (gtmanfred) upgrade including linux kernels (refs: #49347)
  - 74b78835b3 Merge pull request #49347 from Ch3LL/bp_49345_2018.3.3
  - 7bf5ba83c8 upgrade including linux kernels

- PR #49323: (Ch3LL) Skip nonexistent branch test for git versions <1.7.10 @ 2018-08-25 19:52:48 UTC
  - be66914b5b Merge pull request #49323 from Ch3LL/skip_branch
  - ee3d3274e Skip nonexistent branch for git versions <1.7.10

- ISSUE #32737: (Lothiraldan) No support for compound matcher in external auth configuration (refs: #49236)

- PR #49313: (rallytime) Back-port #49236 to 2018.3.3 @ 2018-08-24 20:59:16 UTC
  - PR #49236: (terminalmage) Allow compound matching in eauth config expressions (refs: #49313)
  - 64d7b0e4c6 Merge pull request #49313 from rallytime/bp-49236
  - 1a5e9f99b3 Add 'minion_data_cache: True' to mocked opts for minions unit tests
  - 549f5d5a86 Allow compound matching in eauth config expressions

- ISSUE saltstack/salt-jenkins#1075: (Ch3LL) [2018.3.3] arch python3 tests do not finish (refs: #49303, #49451)

- PR #49311: (rallytime) Back-port #49303 to 2018.3.3 @ 2018-08-24 17:48:23 UTC
  - PR #49303: (gtmanfred) use os._exit instead of sys.exit when daemonizing (refs: #49311)
  - 7a89a4c8aa Merge pull request #49311 from rallytime/bp-49303
  - 3fd1387571 use os._exit instead of sys.exit when daemonizing

- PR #49294: (Ch3LL) Move run_function call from __init__ to setup @ 2018-08-24 12:41:35 UTC
  - 7bb35fd1f1e Merge pull request #49294 from Ch3LL/fed_28_tests
  - 0ad44a3db Move run_function call from __init__ to setup

- PR #49302: (twangboy) Fix installer 2018.3.3 @ 2018-08-24 12:41:14 UTC
  - a607f9332f Merge pull request #49302 from twangboy/fix_installer_2018.3.3
  - 68fd37575e Fix erroneous NSSM reference
  - 103f2c289e Remove delete vcredist line
  - 007a16638e Bring installer updates from 2017.7.8 to 2018.3.3

- PR #49241: (terminalmage) Don’t silently catch SystemExit @ 2018-08-22 12:57:58 UTC
  - bc0b4ac513 Merge pull request #49241 from terminalmage/salt-jenkins-1078
  - 08d144f2c7 Don’t silently catch SystemExit
- c0fd818f7 Don’t use a bare except!

- PR #49239: (Ch3LL) Use yaml's safe_dump in windows ec2 tests @ 2018-08-22 08:48:13 UTC
  - 0fb9cc60a Merge pull request #49239 from Ch3LL/win_yaml_test
  - 5fb42dbb24 import salt.utils.yaml
  - 67290eaf7 Use yaml's safe_dump in windows ec2 tests

- PR #49182: (terminalmage) Fix hanging syndic test @ 2018-08-18 12:10:32 UTC
  - 13af125b96 Merge pull request #49182 from terminalmage/salt-jenkins-1078
  - a2d2d573b Fix hanging syndic test

- PR #49172: (Ch3LL) [2018.3.3] cherry pick #49118 @ 2018-08-17 20:54:05 UTC
  - PR #49118: (dwoz) Multiple fixes for integration.states.test_file (refs: #49172)
  - PR #49088: (dwoz) Multiple file state test fixes (refs: #49118)
  - PR #49087: (dwoz) Filter out scheme's that are not valid (refs: #49118)
  - b3a247bbf8 Merge pull request #49172 from Ch3LL/bp-49118
  - ce5e17b80d update is_windows salt.utils to correct path
  - 3f6112409 Multiple fixes for integration.states.test_file

- PR #49173: (Ch3LL) [2018.3.3] cherry pick #49167 @ 2018-08-17 20:30:27 UTC
  - PR #49167: (dwoz) Fix remaining file state integration tests (py3) (refs: #49173, #49442)
  - 85ff8dbb87 Merge pull request #49173 from Ch3LL/bp-49167
  - a1a298a13c Simplify dict keys lookup
  - 3d26aff909 Fix remaining file state integration tests (py3)

- PR #49171: (Ch3LL) [2018.3.3] cherry pick #49103 @ 2018-08-17 20:23:32 UTC
  - PR #49103: (dwoz) Install the launcher so we can execute py files (refs: #49171)
  - ee54ea5f73 Merge pull request #49171 from Ch3LL/bp-49103
  - 05a2b91f52 Install the launcher so we can execute py files

- PR #49132: (Ch3LL) [2018.3.3] backport PR #49062 @ 2018-08-17 14:51:50 UTC
  - PR #49062: (weswheat) fix memoize on available macOS services (refs: #49132)
  - 58034c9dc3 Merge pull request #49132 from Ch3LL/bp-49062
  - 990fd6a52 decorator link fix, updating context names, as well as updating macutils tests for latest changes
  - 3ab5d28be fixing an issue with memoize on macOS services, switching to using __context__ instead

- PR #49142: (Ch3LL) Remove -Z script_arg for cloud tests @ 2018-08-16 16:12:59 UTC
  - 01f883cf0 Merge pull request #49142 from Ch3LL/rm_z_arg
  - a1ef8a86e Remove -Z script_arg for cloud tests

- PR #49137: (Ch3LL) [2018.3.3] Update bootstrap script to latest release (2018.08.15) @ 2018-08-15 19:49:22 UTC
  - a0382884b Merge pull request #49137 from Ch3LL/bootstrap_2018.3.3
  - eb9a61206e Update bootstrap script to latest release (2018.08.15)
• **PR #49110** (rallytime) [2018.3] Merge forward from 2017.7 to 2018.3 @ 2018-08-14 17:11:25 UTC
  - b412bfe534 Merge pull request #49110 from rallytime/merge-2018.3
  - 4649f60209 Update old utils paths with new paths
  - 49c2a784bb Merge branch '2017.7' into '2018.3'
    * d46e23f4c2 Merge pull request #49109 from rallytime/merge-2017.7
    * 3c5527f300 Merge branch '2017.7.8' into '2017.7'
      * 01cf2c71ff Merge pull request #49051 from rallytime/bp-49046
      * fc0817cb35 The osfullname grain differs when using Python2 vs Python3, swapping this out for the "OS" grain which is consistent.
  * 8954dd269f Merge pull request #49090 from dwoz/file_line_fix
    * 0dca634e3c Search for (but do not include) CRLF line ending
  * b99edc3dce Merge pull request #49088 from dwoz/file_hash_diffs
    * 054af88197 Multiple file state test fixes
  * 274977b6e4 Merge pull request #49087 from dwoz/url_file_test Fixes
    * 632b65f975 Filter out scheme's that are not valid
  * db5fb3232a Merge pull request #49086 from rallytime/new-doc-img
    * 90954203cb Update the DOCBANNER image for saltconf
  * af6ec1dce2 Merge pull request #49045 from twangboy/fix_43164
    * 589456d08f Fix lint errors
    * e79243566d Add rallytime's suggestions
    * d1ae6b3d6d Fix docs for the registry module and state
  * a840fe1a1a Merge pull request #49083 from rallytime/bootstrap-2017.7
    * 358e14dacc [2017.7] Update bootstrap script to latest release
  * 9db6cd5654 Merge pull request #49059 from twangboy/fix_37984
    * 7ed45b5b00 Remove import
    * 7fb1eb4f69 Fix docs to clarify uptime output on Windows
  * f9db72f00c Merge pull request #49061 from saltstack/revert-48982-new_logo_2017.7
    * 98a8da728b Revert "New logo 2017.7 (WIP)"
  * bbcd1899e2 Merge pull request #48982 from newwebash/new_logo_2017.7
    * 5c1c311f77 Update Salt Conf ad
    * 72de63c426 Merge branch '2017.7' of https://github.com/saltstack/salt into new_logo_2017.7
    * 9f4e78ab79 Revert "Update saltconf ad"
    * 3ab8c8b882 Update saltconf ad
  • **ISSUE #48665** (dgengtek) salt-api auth ldap generates a valid token when using bindpw and an invalid request (refs: #48901)
  • **PR #48901** (garethgreenaway) [2018.3] fix to auth/ldap.py @ 2018-08-14 16:10:19 UTC
    * e78fc2e0eb Merge pull request #48901 from garethgreenaway/48665_auth_ldap_valid_token_failed_auth
- d4e4f2e803 Fixing a typo in a comment.
- 2eb167ea42 Fixing issue when a valid token is generated even when invalid user credentials are passed. This change verifies that the binddn credentials are valid, then verifies that the username & password (if not None) are also valid.

- **ISSUE #49081**: (frogunder) Fluorine - I see error/traceback when running minion in debug mode (refs: #49085)

- **PR #49099**: (rallytime) Back-port #49085 to 2018.3 @ 2018-08-14 12:42:51 UTC
  - **PR #49085**: (gtmanfred) fix async call to process manager (refs: #49099)
  - 484c1e0123 Merge pull request #49099 from rallytime/bp-49085
  - 024d9cb843 fix async call to process manager

- **ISSUE #49018**: (Ch3LL) add MasterPillarUtil tests (refs: #49034)

- **PR #49071**: (rallytime) Back-port #49034 to 2018.3 @ 2018-08-13 20:15:31 UTC
  - **PR #49034**: (garethgreenaway) [fluorine] Adding tests for MasterPillarUtil (refs: #49071)
  - bc033da677 Merge pull request #49071 from rallytime/bp-49034
  - 8108a4d31a Adding some tests for the grains, pillar and mine functions in the cache runner. These will also ensure that the relevant functions in salt.utils.master.MasterPillarUtil are functioning properly.

- **PR #49077**: (rallytime) Back-port #49075 to 2018.3 @ 2018-08-13 20:00:00 UTC
  - **PR #49075**: (gtmanfred) fix last async issue (refs: #49077)
  - 90c2f026b3 Merge pull request #49077 from rallytime/bp-49075
  - 5e0b78306b fix last async issue

- **PR #49096**: (rallytime) Update the DOCBANNER image for saltconf @ 2018-08-13 19:59:39 UTC
  - 6942ef1102 Merge pull request #49096 from rallytime/new-doc-img-2018.3
  - 75080705ce Update the DOCBANNER image for saltconf

- **PR #49055**: (rallytime) [2018.3] Merge forward from 2017.7 to 2018.3 @ 2018-08-13 19:20:11 UTC
  - 0e1ed7b923 Merge pull request #49055 from rallytime/merge-2018.3
  - 83a15cb623 Add optimization_order config to mocked opts
  - ea6883ee55 Update old utils paths to new utils paths
  - 201031fa8a Merge branch '2017.7' into '2018.3'
    - 0d2a495378 Merge pull request #49050 from rallytime/merge-2017.7
      - edf8b739 Merge branch '2017.7.8' into '2017.7'
      - 189e28691f Merge pull request #49044 from Ch3LL/vultr_test
      - 0dedfa44d1 increase timeout on vultr cloud integration test
      - c606a32cf2 Merge pull request #49042 from rallytime/flaky-jinja-test
      - a43db4ba6 Mark a jinja template test as flaky
      - 6415b6f73b Merge pull request #49041 from Ch3LL/ec2_fix
      - cf7f2459b8 [2017.7.8] backport PR #48212
      - 1db036406b Merge pull request #49030 from rallytime/update-client-tests
      - f08ee6c6ae Update netapi client tests
70be9ac9b1 Merge pull request #49046 from garethgreen-away/1022_fixing_test_failing_py3_Debian_test
  - fa2339bb91 The osfullname grain differs when using Python2 vs Python3, swapping this out for the "OS" grain which is consistent.

69c9b0af8b Merge pull request #49036 from cspeidel/doc-fix-netyang
  - f7ac085eb5 minor doc fix in netyang.py

ca5f3d6bb2 Merge pull request #48997 from AVeenstra/patch-1
  - 0e535f2c8c Unpacking dict with the six iterator
  - 5e82685b89 Python 3 related fix in highstate_return.py

69c9b0af8b Merge pull request #49021 from rallytime/merge-2017.7
  - ca82b3d57a Merge branch '2017.7.8' into merge-2017.7
  - f73ba21bc7 Merge pull request #49024 from rallytime/fix-deb-test
  - a9c16d9137 Fix test error in test_compiler jinja check
  - c6f8429e41 Merge branch '2017.7.8' into '2017.7'
  - 6b6d8c615 Merge pull request #49020 from rallytime/fix-grains-test
  - f72a3ac0be Make grains integration test more robust
  - 92d6c25c7f Merge pull request #49002 from rallytime/skip-jinja-deep-error-test
  - 23b66f88bb Skip test_jinja_deep_error on Debian 8
  - 41df911be3 Merge pull request #48999 from rallytime/fix-boto-test
  - d0136b1be5 Update expected return value in boto test

2d09b6391a Merge pull request #49010 from Ch3LL/univention
  - c09bce9afe Add univention OS to debian os_family mapping

41bd3e82e Merge pull request #48636 from terminalmage/loader-fixes
  - 0441cd56ef Add optimization_order to mocking
  - 2256fad320 Process pycache files after .py files
  - a78663a301 Lint
  - 0728b508b6 Add note about Python 3.5+ only support for optimization_order
  - 764969ce08 Add a test to confirm that .py files are still loaded correctly
  - 0f60be6b66 Fix bad copypasta
  - fbd1472e2e Add configuration docs for optimization_order config option
  - 8af2d580f3 Only compile the suffix_order/map once per LazyLoader instance
  - 4b95e5f313 Don't put __pycache__ dir in the file list
  - e7c10196da Quiet the byte compiling for PY2
  - 9338370477 Add unit tests for loader optimization levels
  - c362293c1 PY3: Support different optimization levels
  - 6fc8da5bab Add optimization_order config option with default value
  - dfe423a1e0 Remove commented-out log message
• **PR #49084**: (rallytime) [2018.3] Update bootstrap script to latest release @ 2018-08-13 18:14:42 UTC
  - db7ec46875 Merge pull request #49084 from rallytime/bootstrap-2018.3
  - 28dc8ce954 [2017.7] Update bootstrap script to latest release

• **PR #49052**: (isbm) Python 3.7 support (backport 2018.3) @ 2018-08-13 13:06:51 UTC
  - b0d5acbe0d Merge pull request #49052 from isbm/isbm-python37-support-2018.3
  - 4386a9ca1f Merge branch '2018.3' into isbm-python37-support-2018.3
  - bc85a5fa98 Fix configuration setting
  - 47078a300f Remove async keyword, moving it into the kwargs.
  - 31dccc4dfdf fix unicode literals
  - 990936992c Keep runner API unchanged
  - 46bafcafe Fix nag-message
  - 5c887ac2ae Support original API
  - 2c22e79d4d Use kwargs instead of directly named parameters
  - 7d095491d9 Update docstring
  - 9807e8dbb7 Add 'async' backward compatibility
  - e8608aa9be Revert api call: it is about "functionname_async" suffix.
  - 0543578336 Deprecate 'async' parameter in Mandrill API
  - 1107de0dec Lintfix: PEP8 requires two empty lines
  - 2a18e335af Fix function signatures in Cassandra module
  - 603f94e2a3 Cleanup docstrings at module level
  - b9718d3a09 Fix log error/info/warning and exception messages
  - 6e77aff69a Fix local opts from CLI
  - 493e48dd5 Remove internal variables/properties with the reserved words
  - be07f64bc4 Change internal function signatures to avoid reserved word
  - 7d095e0b26 Rename async function to asynchronous
  - 35eabbb8a4 Fix docstrings
  - 7a597f19b5 Fix comments
  - 69920366ae Fix CLI config
  - 173f3d7aa8 Fix docstring typo
  - b7da571624 Fix imports
  - 7ec3954bef Rename module to full wording

• **ISSUE #48557**: (whytewolf) file.line in python3 on windows 2012 r2 is adding extra CR line endings. (refs: #49026)

• **PR #49026**: (dwoz) Fix file.line line endings @ 2018-08-13 13:05:43 UTC
  - 338ecb70ef Merge pull request #49026 from dwoz/issue_48557
  - 4ad22fda2f Merge remote-tracking branch 'origin/issue_48557' into issue_48557

32.2. Previous releases 5177
- 702e76cf9 Merge branch '2018.3' into issue_48557
  - 6cf93e8fc4 Skip newline in binary mode
  - 2cf80c1595 Fix linter errors
  - baf291b4c8 Fix file.line line endings
- **PR #49038:** (gtmanfred) disable enable_ssh_minions to see if it is slowing down 2018.3 tests @ 2018-08-10 18:07:59 UTC
  - 602fed7806 Merge pull request #49038 from gtmanfred/slowtest
  - 6bc44c91c4 remove localhost from tests
  - 7b168a5aac disable enable_ssh_minions to see if it is slowing down 2018.3 tests
- **ISSUE #48996:** (jils2013) file.get_diff not work on version:2018.3.2 (refs: #49033)
- **PR #49033:** (terminalmage) Fix file.get_diff for remote files @ 2018-08-09 21:06:53 UTC
  - 4eeb75f028 Merge pull request #49033 from terminalmage/issue48996
  - 163aea71c8 Lint
  - d6e5038022 Fix file.get_diff for remote files
- **ISSUE #48856:** (travispaul) Salt fails to start on NetBSD 8 (refs: #48926)
- **PR #48926:** (travispaul) Handle ifconfig output differently for NetBSD >= 8.0 @ 2018-08-09 20:07:44 UTC
  - b24c96a929 Merge pull request #48926 from travispaul/fix-netbsd-8-new-ifconfig
  - d9b6d8269 Add unit test for NetBSD 8 ifconfig changes
  - 80f8a667d1 Handle ifconfig output differently for NetBSD >= 8.0
- **PR #48803:** (dmurphy18) Support for execution modules and states mount on AIX @ 2018-08-09 17:51:55 UTC
  - 7dd6b9ed0a5 Merge pull request #48803 from dmurphy18/aixfilesystems
  - 92818f816b Fixes for testing
  - 77d7a1743 Adjust unit tests
  - eadb33cdce Updated for review comments and adjusted locking when writing files
  - 5bf9e6085b Update due to review comments
  - 9fb5641dc7 Mount unit tests for modules and states for AIX
  - b28f427432 Save off work after laptop issue
  - ec5274f7c7 module and states mount support for AIX
  - b701e16ad0 Further updates to support for mount on AIX
  - 210076276f Initial support for handling /etc/filesystems on AIX
- **ISSUE #48496:** (icy) Salt-key unable to delete the certificate Test=True (refs: #48929)
- **PR #48929:** (terminalmage) 2 salt-key fixes @ 2018-08-09 17:50:07 UTC
  - 2a38905a8a Merge pull request #48929 from terminalmage/issue48496
  - 7ac10f9eac 2 salt-key fixes
- **ISSUE #47481:** (whytewolf) Oxygen: task.add_trigger with start_date stating strptime needs a string not int. (refs: #49022)
- **PR #49022:** (dwoz) Document time format idiosyncrasies @ 2018-08-09 17:47:12 UTC
- bb9d23bfa1 Merge pull request #49022 from dwoz/47481_docs
- 313a3d93d6 Document time format idiosyncrasies

- **PR #48932**: (twangboy) Fix pkg.install when pkg already installed @ 2018-08-09 17:45:51 UTC
  - 9b6a9f4f1 Merge pull request #48932 from twangboy/fix_win_repo
  - 075ea29d29 remove .lower(), fix debug messages
  - d7c2f476ac Remove current: version for latest as well
  - 522ac26459 Fix typo in code comment
  - 47b2898a85 return empty dict on no changes
  - 6532706d2f Make the tests run on Linux
  - cfe55a391a Add tests for pkg.install output
  - 8ec058f498 Clarify code comment
  - 8af2cfd54a Fix issues where current is not returned

- **PR #49011**: (rallytime) [2018.3] Merge forward from 2017.7 to 2018.3 @ 2018-08-09 17:34:18 UTC
  - d7b7a92ef6 Merge pull request #49011 from rallytime/merge-2018.3
  - 02670969d0 Apply fix to ssh init file that was there before merge
  - 7e1f7915e4 Revert "Allow for not being prompted to supply a password to deploy keys to a minion with salt-ssh"
  - 00416d54d1 Revert "add key-deploy test"
  - c26fa0d6c4 Mark orchestration test as expensive
  - fceb6d8d6f Update old utils paths to use new paths
  - 3e6445a9d6 Merge branch '2017.7' into '2018.3'
    - b49eeca6e9 Merge pull request #49003 from rallytime/boto-test-2017.7
      - 1a23bb23f Update expected return value in boto test
    - 51eed1df8 Merge pull request #48988 from rallytime/merge-2017.7
      - df869ee2e7 Merge branch '2017.7.8' into '2017.7'
      - a1e54634dc Merge pull request #48976 from rallytime/tornado
      - 0bd838ab6c Skip unreliable tornado tests
      - 22713be9c1 Merge pull request #48979 from rallytime/bp-4959
      - 03aa0e49b0 Merge pull request #48970 from Ch3LL/back_48962
      - 3ce1b8a3c9 Update the elif block to only be true for versions below Debian 9.
      - e6cea5e3c7 Merge pull request #48968 from rallytime/man-pages
      - 64fe3be41a Update man pages for 2017.7.8 release
    - 10fd4661ff Merge pull request #48978 from gtmanfred/2017.7
      - 610836f82 clean up gemfile
    - 5b2423e527 Merge pull request #48959 from rallytime/flaky-tests
      - aaf986d728 Mark one grains test as flaky & convert to pytest notation
- e7e5abc4f8 Mark 2 matcher tests as flaky
- 79994ecab4 Merge pull request #48962 from garethgreen-away/1022_test_service_disable_debian_part_deux
  - 9e71551b3e Update the elif block to only be true for versions below Debian 9.
- 1a1bda00cb Merge pull request #48960 from dwoz/block_replace_tests
  - 94ac2b4fc7 Multiple block replace test fixes
- 93b862f350 Merge pull request #48957 from whytewolf/beacons_log_doc_change
  - a77fd16869 Update salt.beacons.log to reflect that re module is used for matching.
- 0245c3f7b0 Merge pull request #48955 from terminalmage/service-systemd
  - 23f87bd536 Don't load service.py if minion is running a non-sysvinit init system
- 848d583438 Merge pull request #48950 from KaiSforza/kitchenfix-2017.7
  - 5242cb143a Added a quote to kitchen Jenkinsfiles
- 928d688d65 Merge pull request #48943 from rallytime/flaky-tests
  - 668da57ab9 Mark some shell and runner integration tests as flaky
- cd42510d3a Merge pull request #48940 from rallytime/bp-48852
  - fa4e92e79 Record all the artifacts from the build
- 43649a68be Merge pull request #48935 from garethgreen-away/1045_test_pkg_015_installed_held_centos
  - 0bb10107b6 Merge branch '2017.7' into 1045_test_pkg_015_installed_held_centos
  - 24d5e6a22f Fixing the test_pkg_015_installed_held test to be able to successfully run on CentOS
- 2421ea570 Merge pull request #47100 from gtmanfred/ssh
  - 5b443af7ae add key-deploy test
  - a1319beeb Allow for not being prompted to supply a password to deploy keys to a minion with salt-ssh
- d541bd6446 Merge pull request #48891 from damon-atkins/2017.7_win_pkg.list_pkgs_not_found
  - a4af1fb5b1 Fix win_pkg issues introduced Jan 2018. If DisplayVersion does not exist it should return version as "Not Found"
- 5f6a56f5dc Merge pull request #48896 from rallytime/bp-48730
  - 57aa204c9d Merge branch '2017.7' into bp-48730
  - 4995922584 Forgot variable in signature
  - 0503bc18b6 Fix batch install using pkgng
- 0c64bb8d65 Merge pull request #48933 from garethgreenaway/1022_debian_8_failing_service-test
  - 280d1d2ad2 Fixing failing test, integration.modules.test_service.ServiceModuleTest.test_service_disable_does not exist on Debian 8 and higher.
- 0c3d2ca09 Merge pull request #48922 from rallytime/cache-doc-error
  - 8ca89d7e8 Update backticks on job_cache docs
- 8d1fc4f8e5 Merge pull request #48866 from Ch3LL/cmd_win_tests
905da13653 Merge branch '2017.7' into cmd_win_tests
57d58e7541 Merge pull request #48920 from rallytime/bp-48904-2017.7
  a55f92954a No rehashing in parallel
  3be11e06fe Add docs for new escape kwarg
  391bb8a411 use a specific path for just the cmd._run call
  62c66ba489 make sure we lower the check on shell
  9312a993a5 Add cmd module integration tests for windows and fix space in path issue

**ISSUE #48123:** (c-wicklein) file.directory with recurse fails when it encounters a broken symbolic link (refs: #48985)

**PR #48985:** (garethgreenaway) [2018.3] Fix to salt/modules/file.py @ 2018-08-09 15:03:09 UTC
  - 3325bd4d0c Merge pull request #48985 from garethgreenaway/48123_file_directory_recurse_fails_broken_symlink
  - 104eca206 Merge branch '2018.3' into 48123_file_directory_recurse_fails_broken_symlink
  - a404cc030f Fixing the issue when using the file.directory state with recurse if the directory contains a broken symbolic link. This fix adds an additional conditional, is_link, before running lsattr since lsattr does not work on symlinks and causes issues when that symlink is broken.

**ISSUE #47695:** (AmbicaY) Continuous error in the proxy minion logs (refs: #49019)

**PR #49019:** (garethgreenaway) [2018.3] Fix to scheduler when global enabled key is present @ 2018-08-09 13:06:26 UTC
  - d353c02a8c Merge pull request #49019 from garethgreenaway/47695_fixing_scheduler_bug_when_enabled_is_present
  - aff1b8f6d4 Lint.
  - 8935e08141 Fixing a bug that occurs if the "enabled" key is present in the scheduler items dictionary. Adding a test to ensure scheduler runs as expected when that key is present.

**PR #49023:** (The-Loeki) Salt SSH appends IdentityFile=agent-forwarding @ 2018-08-09 12:55:59 UTC
  - a56bc7fb9 Merge pull request #49023 from The-Loeki/patch-1
  - 8b53571c70 Salt SSH appends IdentityFile=agent-forwarding

**PR #48981:** (Ch3LL) Add warning to mac runas docs about escaping characters @ 2018-08-08 19:43:43 UTC
  - 459049b50 Merge pull request #48981 from Ch3LL/mac_runas_quote
  - 8269b55b84 remove unnecessary spaces in cmdmod.py docs
  - 757daf7d7e add runas macosx warning in 2018.3.3 release notes
  - 4e9e985b14 Add warning to mac runas docs about escaping characters

**PR #49004:** (rallytime) Port #48999 to 2018.3 @ 2018-08-08 15:32:46 UTC
  - **PR #48999:** (rallytime) Update expected return value in boto test (refs: #49004, #49003)
  - b87bf905c2 Merge pull request #49004 from rallytime/boto-test-2018.3
  - 9f0ba1073 Update expected return value in boto test

**PR #48987:** (twangboy) Fix issue with win_iis.create_cert_binding @ 2018-08-08 13:29:06 UTC
  - 630f61e625 Merge pull request #48987 from twangboy/fix_48786
  - 86d0836f90 Fix issue with iterating over None

**ISSUE #48777:** (jonasgit) file.recurse fails on file contents encoding not utf-8 (refs: #48934)
• PR #48934: (terminalmage) Properly handle latin-1 encoding in file diffs @ 2018-08-07 21:02:24 UTC
  – ab1a713bc3 Merge pull request #48934 from terminalmage/issue48777
  – 52c64e4d51 Fix to_unicode test
  – e2d19f40b6 Only try latin-1 from get_diff instead of by default
  – d39fa889f3 Add stringutils.get_diff to mocks
  – 5b191c9120 Fix incorrect use of __salt__ when __utils__ is needed
  – 53ba10ad5f Skip pylint false-positives
  – f14f4dae22 Add unit test for latin-1 fallback, multi-encoding
  – 90664a80f PY3 scoping fix
  – 726dd4331f Add integration test for latin-1 file diffs
  – 2dd1f31d23 Use BASE_FILES instead of redundant STATE_DIR
  – 612ff5fe8 Use new get_diff helper in file module
  – c63265802 Make to_unicode/to_str/to_bytes helpers attempt latin-1
  – 2a0cb49b01 Add get_diff to salt.utils.stringutils

• ISSUE #47766: (zerthimon) salt-cloud: openstack driver: crash on instance creation (refs: #48956)

• PR #48956: (gtmanfred) if booted from volume, use string from image @ 2018-08-07 16:39:45 UTC
  – bad995462c Merge pull request #48956 from gtmanfred/openstack
  – 4cb1636c4b if booted from volume, use string from image

• ISSUE #48306: (davidscholberg) Documentation update for custom returners used for master job cache (refs: #48319)

• PR #48319: (gtmanfred) don’t break older returners right now @ 2018-08-06 13:19:43 UTC
  – 71f587edd7 Merge pull request #48319 from gtmanfred/jid
  – 084e7f0ef4 Merge branch ‘2018.3’ into jid
  – 60661b4cd0 document minions required on save_load
  – a8c243071d document passing in minions
  – d49381c0b6 don’t break save_load backwards compat
  – cfca953a don’t break older returners right now

• PR #48941: (rallytime) Back-port #48912 to 2018.3 @ 2018-08-06 13:09:38 UTC
  – PR #48912: (maxim-sermin) make jboss7.py compatible with 2018.3.0 and later (refs: #48941)
  – 1623e53e4f Merge pull request #48941 from rallytime/bp-48912
  – 3f55b2f89e make jboss7.py compatible with 2018.3.0 and later

• PR #48897: (rallytime) Back-port #48863 to 2018.3 @ 2018-08-05 19:15:51 UTC
  – PR #48863: (admd) Decode file contents for python2 as well (refs: #48897)
  – 070af9d925 Merge pull request #48897 from rallytime/bp-48863
  – 0ee1940232 Merge branch ‘2018.3’ into bp-48863
  – f40b966d99 decode file contents for python2 as well
• PR #48928: (Ch3LL) fix test_runas integration test for macosx @ 2018-08-05 14:24:13 UTC
  - abd7f1312d Merge pull request #48928 from Ch3LL/mac_runas
  - 3d6455dbcd remove unnecessary comment in setup
  - 8e30db0217 move destructivetest to testname
  - 708dec8740 add destructivetest to setup and teardown for runas test
  - c0730ff968 fix test_runas integration test for macox

• PR #48899: (Ch3LL) remove base_top_file file in teardown and add sleep @ 2018-08-05 14:23:42 UTC
  - dbd300ff70 Merge pull request #48899 from Ch3LL/unit_state
  - 0272cadff8 Merge branch '2018.3' into unit_state
  - 5896c7f36 remove base_top_file file in teardown and add sleep

• PR #48898: (rallytime) [2018.3] Merge forward from 2017.7 to 2018.3 @ 2018-08-05 14:23:19 UTC
  - ffa1f6c6b2 Merge pull request #48898 from rallytime/merge-2018.3
  - 1f093cfe4a Merge branch '2018.3' into merge-2018.3
  - b3a5aa49d7 Merge branch '2017.7' into '2018.3'
    - e79cc35b1 Merge pull request #48876 from Vaelatern/make-network-learning-optional
      - a4905b0e5d Make IP_LEARNING optional
    - f8bfb4ff9f Merge pull request #48890 from Ch3LL/cmd_test
      - acda4ed9ab add sleep in test_cmd integration test
    - 5272f66c58e Merge pull request #48885 from rallytime/flaky-tests-shadow
      - da871a2d57 Mark shadow module integration test as flaky
    - bf0895656e Merge pull request #48884 from rallytime/flaky-tests-matchers
      - 38d9e537 Merge branch '2017.7' into flaky-tests-matchers
    - a567666938 Merge pull request #48868 from terminalmage/fix-loader-race
      - 5f1169b9a2 Fix race when SIGTERM/SIGINT received while lazyloading a module
    - 0ca0b62f22 Merge pull request #48883 from terminalmage/salt-jenkins-1023
      - c61f75b50 Fix failing git worktree tests
      - 3660dfe13c Separate compound matcher tests into individual tests
    - a84f5155a1 Merge pull request #48869 from Ch3LL/mac_shell_tests
      - 3734b1ec89 Catch socket.error exception in testprogram
    - 7f56b8bf44 Merge pull request #48867 from rallytime/skip-tornado-test
      - 7320a9104 Skip unreliable tornado test.

• PR #48893: (Ch3LL) handle when ca_certs is None in utils.http @ 2018-08-03 20:30:48 UTC
  - 848e26ed0b Merge pull request #48893 from Ch3LL/http_tests
  - 16d251ff7f Merge branch '2018.3' into http_tests
  - 5674dddb2a handle when ca_certs is None in utils.http

• PR #48903: (Vaelatern) Wrap ElementTree.tostring to make strs, not bytes @ 2018-08-03 19:12:34 UTC

32.2. Previous releases
- PR #48877: (Vaelatern) Wrap ElementTree.tostring to make strs, not bytes (refs: #48903)
- f1adf56017 Merge pull request #48903 from Vaelatern/improve-salt-cloud-python3-virt
- c454f7e60b Wrap ElementTree.tostring to make strs, not bytes

- PR #48900: (Ch3LL) skip getpwnam check on mac in unit test cmdmod @ 2018-08-03 16:38:51 UTC
- d23471262d Merge pull request #48900 from Ch3LL/cmd_unit
- b82dd708be skip getpwnam check on mac in unit test cmdmod

- PR #48921: (rallytime) Back-port #48904 to 2018.3 @ 2018-08-03 15:17:15 UTC
  - PR #48904: (KaiSforza) No rehashing in parallel (refs: #48921, #48920)
  - d622a49b58 Merge pull request #48921 from rallytime/bp-48904
  - b504625f61 No rehashing in parallel

- PR #48877: (Vaelatern) Wrap ElementTree.tostring to make strs, not bytes (refs: #48903) @ 2018-08-02 19:28:56 UTC
  - 1e150923aa Merge pull request #48877 from Vaelatern/improve-salt-cloud-libvirt-python3-libvirt
  - fb7885315c Wrap ElementTree.tostring to make strs, not bytes

- PR #48824: (rallytime) Bump depreciation in win_servermanager state to Neon @ 2018-08-02 18:01:34 UTC
  - 1fb7d9431b Merge pull request #48824 from rallytime/win_servermanager_deprecations
  - 6ef54a52bc Bump depreciation in win_servermanager state to Neon

- ISSUE #37512: (ChristianBeer) What's the precedence if multiple master configurations are specified? (refs: #48888)

- PR #48888: (terminalmage) Explicitly document the configuration override priority @ 2018-08-02 16:57:18 UTC
  - ec8e07e8ce Merge pull request #48888 from terminalmage/issue37512
  - 7d8c7d8e14 Explicitly document the configuration override priority

- PR #48871: (dwoz) Remove unicode key pairs from environ after test @ 2018-08-01 22:33:41 UTC
  - d4bb3a0963 Merge pull request #48871 from dwoz/test_cleanup
  - f2e15e7f1d Do not re-define tearDown
  - 4f8a191a69 Remove unicode key pairs from environ after test

- PR #48843: (isbm) Prevent u'something' to appear in help info. @ 2018-08-01 20:38:58 UTC
  - bec79e83a8 Merge pull request #48843 from isbm/isbm-log-level-names-fix-2
  - a63686180d Merge branch '2018.3' into isbm-log-level-names-fix-2
  - 783e96ae72 Prevent u'something' to appear in help info.

- PR #48855: (rallytime) [2018.3] Merge forward from 2017.7 to 2018.3 @ 2018-08-01 17:44:59 UTC
  - a8376b537a Merge pull request #48855 from rallytime/merge-2018.3
  - 44998e208e Lint: Fix undefined logger variable
  - 92c9317a25 Update old utils paths to use new paths
  - 15b6ba7143 Merge branch '2017.7' into '2018.3'
    - 0f2d65de3 Merge pull request #48853 from rallytime/bp-48850
      - 3c33ee554a Skip tests in integration.shell.test_master
8a1285239a Merge pull request #48426 from garethgreen-away/46689_fixing_pkg_held_when_package_is_installed
  - 9b0f5dd212 Fixing indentation, removing some unnecessary conditionals.
  - 727964ab55 One last cleanup.
  - 11cb86e6eb General cleanup in pkg state, reducing duplicate code. Fixing the requires_salt_modules decorator, sys.doc was returning too much information for the event to handle. This change specifically calls sys.doc with the module name.
  - 16fb6ae635 Make sure pkg.hold and pkg.unhold are available before running the test.
  - 998651102d Fixing a situation when a package is already installed via salt or manually and a state attempts to set that package to be held. Previously the holding/unholding logic was only being run against packages that were being installed. This change moves the holding logic outside and runs it against all desired packages. Adding a new test to test holding logic.

c8e69431ff Merge pull request #47734 from OrlandoArcapix/Issue47689-pip-state-performance
  - 662bd17f80 Merge branch '2017.7' into Issue47689-pip-state-performance
  - 66936b4f41 Changed string comparison in pip test to match new confirmation string - ref PR #47734.
  - bb5939d6ef Merge branch '2017.7' into Issue47689-pip-state-performance
  - d6a49ae41c Merge branch '2017.7' into Issue47689-pip-state-performance
  - d4083cf9d1 Merge branch 'Issue47689-pip-state-performance' of github.com:OrlandoArcapix/salt into Issue47689-pip-state-performance
  - 779b5fa785 Merge branch '2017.7' into Issue47689-pip-state-performance
  - f365349ab Removed whitespaces at end of added comments lines
  - db11f2ff4b Merge branch '2017.7' into Issue47689-pip-state-performance
  - eac0178de2 Ref: #47689 - document additional kwarg passed to pip._check_if_installed function
  - 0d19803106 Merge branch '2017.7' into Issue47689-pip-state-performance
  - d3678bf2f3 #47689 fix lint errors
  - 4fec868b精力 #47698 improve run-speed of pip package state checks by only loading the current package list once when checking multiple packages

83a5b3cc47 Merge pull request #48844 from AVeenstra/fix-python3-incompatibility
  - f238779a62 Merge branch '2017.7' into fix-python3-incompatibility
  - 6b1805afc6 Fixed Python 3 incompatibility in methods in nilrt_ip and debian_ip.

136ff6735a Merge pull request #48662 from slaws/fix-retention-schedule-48637
  - 3ce8f5f53d pylint fix
  - 5539eff39e Excluding relative dirs in state.file.retention_schedule

1fc04f281b Merge pull request #48840 from gtmanfred/docs
  - 8d2d268c4a fix links in pkg doc.

0a19f845ea Merge pull request #48834 from gtmanfred/slsutil
  - f9441d2bef read output of stringio if it is readable
• 2e00939a6e Merge pull request #48788 from Ch3LL/timezone_windows
  • de95a6a215 add unused import to timezone test file
  • 22e424859e add unused import to import
  • 0840fc3117 disable pylint import error
  • f09d1a2c7e Add timezone windows integration tests and fix get_zone

• ISSUE #48659: (dstoliker) file.grep with glob (*) in path produces file not found error (refs: #48830)

• PR #48830: (garethgreenaway) [2018.3] Fixes to file.grep @ 2018-07-31 21:30:04 UTC
  – e23ba01cd2 Merge pull request #48830 from garethgreenaway/48659_file_grep_glob_fix
  – 0791b0a03c FileGrepTestCase tests back to 2018.3
  – 2e01c55e7e Fixing a bug that prevents specifying wildcards for filenames.

  - c20977e3bc Merge branch '2018.3' into fix_38310_pygit2_checkout_ext_pillar_remote_using_tag
  - b0157c215b Fix ext_pillar remote checkout using tag (pygit2)

- **PR #48838**: (sizgiyaev) Fixed: added additional return code 200 for succeeded vault api request @ 2018-07-31 16:14:22 UTC
  - 5e14e36195 Merge pull request #48838 from sizgiyaev/fix-vault-policy-state
  - 02d9c6281 Fixed: added additional return code 200 for succeeded api request

- **PR #48714**: (dwoz) Always transfer bytes from fileserver roots @ 2018-07-30 22:37:13 UTC
  - 69f81214d1 Merge pull request #48714 from dwoz/state_echo_fix
  - ce3ed3dab Always use unix line endings
  - d5e60090bc Merge pull request #2 from terminalmage/state_echo_fix
    - 52fc1c955d Simplify file contents in roots fileserver test
    - b6f73e8e57 Remove trailing whitespace on what should be a blank line
  - 95329acbae Fileserver transfers bytes
  - aa34a80997 Always transfer bytes from fileserver roots

- **PR #48822**: (Ch3LL) Fix salt-ssh state.sls_id TypeError key must be a string @ 2018-07-30 20:29:29 UTC
  - 16c4ec2eb Merge pull request #48822 from Ch3LL/ssh_2018_id
  - 01f6a15da0 Fix salt-ssh state.sls_id TypeError key must be a string

- **ISSUE #47999**: (arthurlogilab) Carbon returner failing when run through scheduler on log.trace (refs: #48757)

- **PR #48791**: (rallytime) Back-port #48757 to 2018.3 @ 2018-07-27 21:30:44 UTC
  - PR #48757: (kuetrzi) Update carbon_return.py (refs: #48791)
  - 4886f716d4 Merge pull request #48791 from rallytime/bp-48757
  - f440eb91f Update carbon_return.py

- **PR #48799**: (rallytime) [2018.3] Merge forward from 2017.7 to 2018.3 @ 2018-07-27 21:30:13 UTC
  - fae29f4257 Merge pull request #48799 from rallytime/merge-2018.3
  - 487458ad4b Update old utils paths to use new utils paths
  - 436510796f Merge branch '2017.7' into '2018.3'
    - 8e61f3dce0 Merge pull request #48742 from frogunder/45014
      - f08058b043 Merge branch '45014' of https://github.com/frogunder/salt into 45014
      - 757fde70c6 Merge branch '2017.7' into 45014
      - 33c20c1ec0 fix tests
      - a7a914060d add windows integration tests for states.file

32.2. Previous releases
Chapter 32. Release notes

- d74f47b340 Merge pull request #48795 from rallytime/fix-48417
  - 5123b17ff6 Update linting docs to contain .testing.pylintrc use
- bbea9ae936 Merge pull request #48789 from rallytime/bp-48783
  - 682a05bebe Threshold was wrong
  - d4ca0e3a97 test: except for OSError only
  - 4547231909 Only run lint checks against changed files
- 41464d4b39 Merge pull request #48731 from zer0def/virt-runner-init-args
  - a1fa081ad0 Documentation to missing parameters in virt.init runner.
  - 365ebdf539 Fixed enable_vnc runner arg being passed into seed_cmd module arg in virt.init.
- 169afe1a6a Merge pull request #48749 from Ch3LL/logo_docs
  - 73b1f3c200 Update Saltstack Logo banner on docs.saltproject.io

- ISSUE #48020: (calvinhp) mine.get not returning data in a state.orchestrate sls (refs: #48765)
- PR #48765: (FedericoCeratto) [2018.3] Fix mine.get not returning data @ 2018-07-27 18:01:06 UTC
  - bd67d2a805 Merge pull request #48765 from FedericoCeratto/fixed_mine.get_not_returning_data
  - 7183a6e0e8 Workaround for #48020
- PR #48747: (rallytime) [2018.3] Merge forward from 2017.7 to 2018.3 @ 2018-07-26 18:14:34 UTC
  - 6978ce5d1d Merge pull request #48747 from rallytime/merge-2018.3
  - 41224d4b5 Merge branch '2017.7' into '2018.3'
    - 781c6a6c36 Merge pull request #48743 from rallytime/saltconf-ad-2017.7
      - 6df8f8d852 Update DOCBANNER with new SaltConf18 image
    - ce4e22224e Merge pull request #48720 from Ch3LL/mac_file_path
      - 01d25fae19 Fix test_managed_source_hash_indifferent_case on macosx to correct tmp path
    - 4bf037d43 Merge pull request #48719 from Ch3LL/service_mac_state
      - f4a2fe349 Enable service if disabled before running state service tests
    - b2431eb10 Merge pull request #48715 from rallytime/flaky-tests
      - 7332c3e567 [2017.7] Mark some tornado tests as flaky
    - 801eae3b8d Merge pull request #48672 from frogunder/45012
      - 074772e58a add service enabled test

- ISSUE #48676: (djneades) salt-ssh should not target wrong minion from roster file as a result of reverse-DNS lookups (refs: #48771)
- PR #48771: (gtmanfred) only do reverse dns lookup on ips for salt-ssh @ 2018-07-26 15:41:40 UTC
  - 5ea43817ab Merge pull request #48771 from gtmanfred/2018.3
  - 535fb8e8f7 only do reverse dns lookup on ips for salt-ssh
- PR #48752: (garethgreenaway) [2018.3] Fix when state file is integers @ 2018-07-25 15:03:02 UTC
  - f2ef2d3ef6 Merge pull request #48752 from garethgreenaway/fix_state_file_all_integers
  - 790801c67e Fixing a case where the state module would fail if the state file being passed was all integers. Added a new tests for this edge case.
- **ISSUE #46896**: (Poil) Proxy + file.managed => Comment: Failed to cache xxx invalid arguments to setopt (refs: #48754)
- **PR #48754**: (lomeroe) send proxy/ca_cert parameters as strings (not unicode) to tornado httpclient @ 2018-07-25 14:55:42 UTC
  - 030c921914 Merge pull request #48754 from lomeroe/fixed-tornado-proxy
  - d3f35704a1b pass proxy_user, proxy_password, proxy_host, and ca_certs through salt.utils.stringutils.to_str()
- **PR #48769**: (Ch3LL) Update Saltstack Logo banner on docs.saltproject.io @ 2018-07-25 14:47:19 UTC
  - 1cee4b136b Merge pull request #48769 from Ch3LL/e2018.3
  - 0cb4b2fd98 Merge pull request #48769 from Ch3LL/update_doc_2018.3
- **PR #48760**: (dwoz) Multiple windows test fixes @ 2018-07-25 11:55:27 UTC
  - 19af3b023 Merge pull request #48760 from dwoz/test_file_fixes
  - a89019e956 Multiple windows test fixes
- **PR #48753**: (dwoz) Finally fix prepend for real @ 2018-07-25 00:07:15 UTC
  - e6dace3959 Merge pull request #48753 from dwoz/fix_prepend
  - 0d1e8ab3f8 Merge branch '2018.3' into fix_prepend
- **PR #48756**: (dwoz) os.uname is not available on py2 windows @ 2018-07-24 23:38:32 UTC
  - 8aef6d9960 Merge pull request #48756 from dwoz/core_grains_fix
  - b7a37ecf11 os.uname is not available on py2 windows
- **ISSUE #48536**: (whytewolf) diskusage beacon does not recognize tmpfs disks in linux. (refs: #48718)
- **PR #48718**: (garethgreenaway) [2018.3] beacon diskusage fixes @ 2018-07-24 17:45:26 UTC
  - 062fe7cccfa Merge pull request #48718 from garethgreenaway/48536_beacon_diskusage_fixes
  - 38a68e8f8b3 Fixing test_diskusage_nomatch and test_diskusage_match_regex
  - 6ecca166ff Updating psutil.disk_partitions to pull in all mounts not just the physical ones. Check to see if the mount point from the configuration ends with a $ (regular expression end of line) if not we add one in to ensure that a simple / does not end up matching all mount points. Updating tests accordingly.
- **PR #48711**: (rallytime) [2018.3] Merge forward from 2017.7 to 2018.3 @ 2018-07-24 17:38:58 UTC
  - e873621009 Merge pull request #48711 from rallytime/merge-2018.3
  - ea5e63237 Update old utils paths to use new paths
  - e740d3b208 Merge branch '2017.7' into '2018.3'
    - 689c231d2b Merge pull request #48691 from Ch3LL/win_repo_pkg_test
      - 4b7d6d80c5 Remove unnecessary jinja in curl.sls file
      - 2bedadadb Add windows pkg module integration tests
    - 83e4bb9a16 Merge pull request #48635 from nbraud/acme
      - 3673ae9de modules/acme: explicitly ignore the perms return value
      - 1800a231e8 Fixup some schema expectations
      - 8c718c9417 acme: Make the private key mode configurable
      - 917de6761 modules/acme: Use file.check_perms re-morphing powers

32.2. Previous releases
· d2241ceb2d module/acme: Do not exit early when the certificate already exists
· 98af0db826 modules/acme: Set the private key filemode to 0640
* 85991680c8 Merge pull request #48345 from twangboy/fix_48169
  · ead19725b6 Merge branch '2017.7' into fix_48169
  · 653fbc383 Fix some docs errata
  · 8898e5ff11 Add warn_until Fluorine
  · 707906ac15 Fix unit.state.test_powercfg
  · 32c5014eb6 Fix unit tests
  · 0d9c56e540 Add some more logging
  · b20453de9f Use minutes to set
  · 7dc7eb11c2 Fix documentation to denote seconds when setting
* 96447ce541 Merge pull request #48656 from Ch3LL/windows_ip_mod
  · 90c3f56b1 Add windows ip module integration tests
* 0c5ff3dc8 Merge pull request #48638 from twangboy/fix_vcredist
  · e30d17099d Use goto instead of if statement
  · e1042fa084 Remove vcredist for Py3
* 1ebd96d909 Merge pull request #48664 from Ch3LL/srv_disable_mac
  · f1fbfad387 move the disable call up in try block
  · f60d21bda4 reverse assertion order for service disable test
  · 3727d1b3b9 switch try/except to match 2018.3
  · fb953c2369 [2017.7] Fix service.disabled test for macosx
* 3da3cf23f Merge pull request #48625 from Ch3LL/ssh_state
  · f590eb2b02 Update state.py
  · 9790ee3d0d Follow up to PR #48555
* 33812f8f1 Merge pull request #48673 from Ch3LL/mac_port
  · 87dd85a220 Use different pub and ret ports for testprogram integration tests
* 5f6a7c4d89 Merge pull request #48675 from Ch3LL/mac_disable
  · c78efab828 Fix mac service.disable tests
* 93d2f51d2b Merge pull request #48658 from wyardley/wyardley-npm-json-output-2017
  · 7ff3e9c5ff Improve handling of npm json output (#43138)
* 2e293b0513 Merge pull request #48678 from OrlandoArcapix/fix-npm-dryrun-test
  · 851a404f6b Fix for issue #48677 - return True when no changes are to be made with npm.bootstrap with test=true
* 07af6520f Merge pull request #48580 from rallytime/fix-46884
  · 736b382e91 Don't error on retcode 0 in libcrypto.OPENSSL_init_crypto call
* 9874429741 Merge pull request #48628 from terminalmage/testinfra
32.2. Previous releases

- 5ace9f01ec Fix NameError in testinfra module
- 0d4c80205f Merge pull request #48651 from gtmanfred/pylint-2017.7
  - b6ee52f859 handle pyzmq for python3.4
- 160ae29fc2 Merge pull request #48647 from gtmanfred/pylint-2017.7
  - ff818c4ca2 disable checks on pylint
- 47b1032efa Merge pull request #48593 from pritambaral/fix/2017.7-importlib-pyc-loading-order
  - add7894dee loader: Fix suffix order when importlib is used
- 9da7b2ec8d Merge pull request #48630 from dubb-b/pipeline-updates
  - 8594a8dd05 Adding PY_COLORS=1 as PY_COLORS = 1 instead
  - 314b0c3599 Adding PY_COLORS=1 for python programs to use ANSI Colors
  - b705e8f7a5 Adding correct spacing to options section
  - 9d8a7e07db Adding options to Jenkins pipeline builds
- a8ae2ad6f6 Merge pull request #48633 from saltstack/revert-48610-2017.7
  - bab4a769d4 Revert "only run pylint on files that change"
- 6e32bb7f74 Merge pull request #48614 from rallytime/bp-48562
  - cb654bb2c Add timeouts to all s3 queries
- 1b66388f8d Merge pull request #48588 from garethgreenaway/48415_event_send_multi_master
  - fab25af1a9 Adding some quick documentation about why we are setting ret=True following the channel.send.
  - b7f8f4b188 If the channel send is successful and does not raise an exception, we set ret to True, in case a previous exception from a previous channel send to another master has sent it to False.
  - 8d1551c5fb When using Salt multi-master, if we encounter a salt master that has not accepted the minion key yet we should not exit right away, rather continue on and try the next salt master available in the list.
- 24ffda49ba Merge pull request #48610 from gtmanfred/2017.7
  - 779d1a3dcb only run pylint on files that change
- 5391dd0a8d Merge pull request #48584 from Ch3LL/mac_user_grp
  - 585e9d9b90 Fix grp import for mac in test_user integration test
- 61572b6780 Merge pull request #48555 from Ch3LL/ssh_id
  - f69932f506 fix pylint
  - 70e36764ee Add more tests for salt-ssh state.sls_id
  - dab80e805c Fix state.sls_id to run on ssh minion and not master
- aa6dcf39e8 Merge pull request #48583 from Ch3LL/mac_flaky_tests
  - 4ba2299a87 import flaky decorator on mac tests
  - 811220b41e Add flaky decorator to mac_system and mac_timezone tests
- 6973152057 Merge pull request #48534 from xetix/fix-zypper-latest_version
  - 9985f0b4c1 Lint: remove extra blank line
PR #48744: (rallytime) [2018.3] Update DOCBANNER with new SaltConf18 image @ 2018-07-24 17:15:40 UTC
  - 6c7f1e549d Merge pull request #48744 from rallytime/saltconf-ad-2018.3
  - dbc1f8b772 Update DOCBANNER with new SaltConf18 image
PR #48726: (dwoz) Skip test when syslog not available @ 2018-07-24 16:12:44 UTC
  - 04ab17a4d6 Merge pull request #48726 from dwoz/syslogtest
  - 00f04cfdf9 Skip test when syslog not available
PR #48727: (dwoz) Windows compatible cp test @ 2018-07-24 14:41:34 UTC
  - af837424aa Merge pull request #48727 from dwoz/file_cp_test_fix
  - 6e7824266b Windows compatible cp test
ISSUE #40004: (te-af-github) svn changes report (refs: #47510)
ISSUE #21025: (RobertFach) svn.export reports invalid change data (2014.7.x) (refs: #47510)
PR #48710: (rallytime) Back-port #47510 to 2018.3 @ 2018-07-23 21:11:18 UTC
  - PR #47510: (daa) Fix svn export invalid changes data (refs: #48710)
  - 04125b077d Merge pull request #48710 from rallytime/bp-47510
- ebd3b1c6b fixed test for svn.export
- e79f4aa5cc put name under "new" key in changes dictionary to be in line with svn.latest
- 163f99089c made svn.export changes data dictionary, fixes #21025, #40004
  - 3a941055c1 Use salt.utils.platform.is_windows
  - 33e48f7ad7 Finally fix prepend for real
- PR #48699: (terminalmage) Add missing release notes mention of file.blockreplace changes @ 2018-07-23 13:34:32 UTC
  - e1dd10be70 Merge pull request #48699 from terminalmage/issue48695
  - 7ad832c901 Add missing release notes mention of file.blockreplace changes
- PR #48700: (dwoz) Call sync_modules to fix Windows test case @ 2018-07-22 22:23:48 UTC
  - ab44a05fe4 Merge pull request #48700 from dwoz/ext_mod_test
  - d731e6bf8e Call sync_all to fix Windows test case
- PR #48653: (terminalmage) docker_container.running: Fix regression in test mode @ 2018-07-20 19:15:47 UTC
  - 6a494205f2 Merge pull request #48653 from terminalmage/docker-unboundlocal
  - b0440871a0 Merge branch '2018.3' into docker-unboundlocal
  - 9515d17ff docker_container.running: Fix regression in test mode
- ISSUE #47059: (OrlandoArcapix) Some states incorrectly return None instead of an empty dict when there are no changes (refs: #48685)
- ISSUE #46985: (OrlandoArcapix) grafana4_user.present and grafana4_org.present states not working in 2018.3.0 (refs: #48685)
- PR #48685: (bbinet) Use empty dict for 'changes' instead of None @ 2018-07-20 17:12:43 UTC
  - PR #48671: (bbinet) Few fixes to the grafana module and states (refs: #48685)
  - 266c6f250e Merge pull request #48670 from bbinet/none-changes
  - 842eb3da24 Use empty dict for 'changes' instead of None
- PR #48670: (bbinet) Add the "traverse" jinja filter @ 2018-07-20 16:36:21 UTC
  - 5a67a085c Merge pull request #48670 from bbinet/traverse
  - 32b6d22cf2 Fix RST syntax issue in doc
  - 37a41226d5 Add the "traverse" jinja filter
- PR #48594: (pritambaral) Backport 48418 @ 2018-07-20 14:57:19 UTC
  - PR #48418: (pritambaral) Fix multi-sls salt.state orchestration in masterless systems (refs: #48594)
  - ff11763fd3 Merge pull request #48594 from pritambaral/bp-48418
  - adeec28b84 Fix multi-sls salt.state orchestration in masterless systems
- ISSUE #48184: (mmulqueen) Invalid DMI prevents salt-minion from running (refs: #48440)
- PR #48440: (mmulqueen) Make core.py tolerant of invalid chars in DMI data @ 2018-07-20 14:48:07 UTC
  - PR #48216: (Ch3LL) Fix UnicodeDecodeError when reading file to determine virtual grain (refs: #48440)
  - 1119085519 Merge pull request #48440 from mmulqueen/patch-1
  - 5b3bdc74cd Make core.py tolerant of invalid chars in DMI data

32.2. Previous releases
• **PR #48663**: (Ch3LL) [2018.3] Fix service.disabled test for macosx @ 2018-07-20 14:32:22 UTC
  - 4e77b242f2 Merge pull request #48663 from Ch3LL/srv_disable_mac_2018
  - bddfd75d2 reverse assertion order for service disable test
  - 2bfa7e89 Fix service.disabled test for macosx

• **PR #48304**: (Ch3LL) Fix macosx grains when swapusage returns comma @ 2018-07-20 14:30:59 UTC
  - dfe1582475 Merge pull request #48304 from Ch3LL/swap_mac
  - 5d6135e1e2 Fix macosx grains when swapusage returns comma

• **PR #48671**: (bbinet) Few fixes to the grafana module and states (refs: #48685) @ 2018-07-20 13:58:02 UTC
  - 9d7eabcd24e Merge pull request #48671 from bbinet/grafana-fixes
  - 3c5083f550 Add support for dry run (test=True) of grafana states
  - 7e7ae8ace7 influxdb: fix conflicts in function arg names with client_args
  - 73a24b774a Ignore readOnly option when diffing
  - 81f0f8a3f Add missing profile argument to grafana4.get_user_data

• **PR #48650**: (gtmanfred) [2018.3] handle pyzmq for python3.4 @ 2018-07-18 17:34:37 UTC
  - e828167114 Merge pull request #48650 from gtmanfred/pylint-2018.3
  - 3c188207e handle pyzmq for python3.4

• **PR #48648**: (gtmanfred) [2018.3] disable checks on pylint @ 2018-07-18 16:21:37 UTC
  - a6f8acfc4dc Merge pull request #48648 from gtmanfred/pylint-2018.3
  - 7c34c2965e disable checks on pylint

• **PR #48634**: (dwoz) Sync modules for state tests @ 2018-07-17 20:33:06 UTC
  - 01ec9ec59a97 Merge pull request #48634 from dwoz/state-module-test-fix
  - 9df2ae392 Sync modules for state tests

• **PR #48585**: (astorath) replaced meta tag @ 2018-07-16 14:11:02 UTC
  - fb7bfc757c Merge pull request #48585 from astorath/fx-vault-meta
  - 42f4d5f67f replaced meta tag

• **PR #48579**: (Ch3LL) Fix python2 syslog returner expecting string bytes not unicode @ 2018-07-13 19:58:16 UTC
  - 4b16537a29 Merge pull request #48579 from Ch3LL/fx_syslog
  - d828a0ff add unicode type for syslog test for tag
  - 17e69382d5 Fix python2 syslog returner expecting string bytes not unicode

• **ISSUE #48542**: (calvinhp) Missing state git.cloned is listed in the docs as new for 2018.3.2 (refs: #48547)

• **PR #48547**: (gtmanfred) fix git.cloned doc versionadded @ 2018-07-13 18:46:25 UTC
  - 3549ce408d Merge pull request #48547 from gtmanfred/git.cloned
  - b596a945ea Merge branch '2018.3' into git.cloned
  - 8f1f4922a0 fix git.cloned doc versionadded

• **ISSUE #48110**: (whytewolf) file.line on windows not treating unix line endings correctly. (refs: #48503)

• **PR #48503**: (rallytime) Back-port #46291 to 2018.3 @ 2018-07-13 17:14:47 UTC
- **PR #48380**: (twangboy) Detect and preserve line endings (refs: #48503)
- **PR #46291**: (10fik) Line mixed line ends (refs: #48503)
- **PR #45498**: (10fik) Added support for mixed line ending in file (refs: #46291)
- ee257a1f91 Merge pull request #48503 from rallytime/bp-46291
- 8bc71688ea Remove /sr.* pattern from test
- 5e2e2a63fa Update file unit tests to handle “writelines” change
- 5d38a8b333 Update file.line to use writelines instead of joining
- d0b6e82ecb Add ‘name’ as the passed in filepath for test_line_insert_ensure_before_first_line test
- d8920cb61f Update test_line_insert_ensure_before_first_line to use new mock_open methodologies
- 475f075d8e Handle list of lines instead of strings in file.line func
- b9ddd53b04 Added comments
- f3517a1852 List comprehension replaced
- adfa3aed0d Empty match on delete or replace not causing IndexError exception
- 5169b1f7fd Comprehensions converting to unicode replaced by salt.utils.data.decode_list
- d3e8679e05 Removed regex compilation
- f29815b49b Fixed file permissions
- d2af81e9c7 Make integration green. Added test for mode ensure insert before first line
- 9b7df671a5 file.line function refactored
- 3af551ebe1 /sr.* pattern should raise exception
- 935a9b9d56 test_line_insert_end fixed
- 7d6e3ad2e2 Make tests green
- 75a7e368a6 Setting end of line
- 489e381100 Added _set_line_eol and _get_eol functions
- aacbb8c0e2 line function refactored to work on list
- de668166f9 _regex_to_static refactored to work on lists
- 464ee6fe1 _get_line_indent renamed to _set_line_indent

- **ISSUE #48507**: (emersonveenstra) mysql_grants.present escape option incorrectly reports failure (refs: #48561)
- **PR #48561**: (garethgreenaway) [2018.3] fixes to grants in mysql module @ 2018-07-13 14:24:58 UTC
  - 2d923f2943 Merge pull request #48561 from garethgreenaway/48507_mysql_grants_incorrect_failure
  - 14c59da72c Following a successful grant application in the MySQL module, the new grant and the desired grant are mismatched because the new grant from Mysql included hashmarks. This change adds the replace which is included for other items such as database name and username.

- **PR #48529**: (rallytime) [2018.3] Merge forward from 2017.7 to 2018.3 @ 2018-07-12 17:59:35 UTC
  - 5b5a930449 Merge pull request #48529 from rallytime/merge-2018.3
  - f9b8c4b257 Use () when using with_tempfile decorator in tests
  - d3190ca0c0 Update old utils paths to new utils paths
  - 29b05ffdd1 Merge branch ’2017.7’ into ’2018.3’
• 0c0c05c2bc Merge pull request #48527 from saltstack/revert-48525-2017.7
  • 18d06c1a93 Revert "add kazoo for testing zookeeper."
• 05bad3e71c Merge pull request #48526 from twangboy/rollback_certifi-win32
  • 361b3dc2f Rollback python-certifi-win32
• db066effe4 Merge pull request #48521 from Martin819/2017.7
  • d5d01f6698 Fix for GlusterFS 4.0 and above
• ed0bd2bbec Merge pull request #48525 from gtmanfred/2017.7
  • d7a6bff2b2 add kazoo for testing zookeeper.
• ad5a959ab9 Merge pull request #48388 from garethgreenaway/48277_2017_7_file_roots_wrong
  • 6f11da35a7 Fixing a few things in the new test.
  • cf747b14ec Fixing lint issue
  • 16d36c79c8 When pillar items are compiled a new render is instantiated but the file_roots is the pillar_roots. This change forces the __opts__['file_roots'] to be set to what is set in actual_file_roots for all renderers once compile_pillar has finished. Adding a test when this situation is run via a orchestration runner.
• 38df812257 Merge pull request #48512 from gtmanfred/npm
  • 9ba0f6b3a0 pin pm and grunt packages for npm tests
• 04ba31147f Merge pull request #48513 from rallytime/merge-2017.7
  • a466a4880f Merge branch '2017.7.7' into '2017.7'
  • cfd21ed22c Merge pull request #48172 from rallytime/2017.7.7-release-notes
  • a0ad794132 Update release notes for 2017.7.7
  • 8af4452134 Merge pull request #48157 from gtmanfred/2017.7.7
  • d8209e8a40 always listen when gathering job info
  • b98c52ee51 Merge pull request #48140 from rallytime/man-pages-2017.7.7

  • PR #48399: (garethgreenaway) [2017.7] fixes to module/file.py (refs: #48508)
  • PR #48398: (garethgreenaway) [2018.3] fixes to module/file.py (refs: #48508)
  • 70e5fcb8a5 Merge pull request #48508 from rallytime/fix-file-bug
  • 0747eb5476 Move comment string join and test/changes check to bottom of file.check_perms
  • aefa1dbf21 Fix up bad merge - remove extra section of "mode" changes
• ISSUE #48277: (dvenckus) init.sls with included states fails with more than one, 'Template was specified incorrectly: False' (refs: #48388, #48389)
• ISSUE #46986: (github-abcde) opts file_roots gets overwritten with pillar_roots in orchestration run (refs: #48388, #48389)
• **PR #48389: (garethgreenaway)** [2018.3] reset file_roots for renderers after compile_pillar @ 2018-07-11 13:13:33 UTC
  - 5a0b274bf1 Merge pull request #48389 from garethgreenaway/48277_2018.3_file_roots_wrong
  - 4b492fa633 Removing unused start_time variable from test_orchestration_with_pillar_dot_items test.
  - 30c5855d20 Fixing a few things in the new test.
  - 36b7253f18 Fixing lint issue
  - ab6abfad31 When pillar items are compiled a new render is instantiated but the file_roots is the pillar_roots. This change forces the __opts__['file_roots'] to be set to what is set in actual_file_roots for all renderers once compile_pillar has finished. Adding a test when this situation is run via a orchestration runner.

• **ISSUE #48342: (jeffclay)** UnicodeDecodeError when using cache mysql (refs: #48495)

• **PR #48495: (garethgreenaway)** [2018.3] Fix to mysql cache module @ 2018-07-10 12:54:10 UTC
  - f9fd1a889a Merge pull request #48495 from garethgreenaway/48342_mysql_cache_unicode
  - 0029f19033 Ensure the query_string is a bytestring, otherwise an attempt will be made to convert the msgpack data to unicode which will result in a UnicodeDecodeError error.

• **PR #48487: (rallytime)** [2018.3] Merge forward from 2017.7 to 2018.3 @ 2018-07-09 18:38:00 UTC
  - fc3ee6eb3 Merge pull request #48487 from rallytime/merge-2018.3
  - 54341d1a8d Update old utils paths to use new utils paths
  - 68aab0f0c Merge branch '2017.7' into '2018.3'
  - 22cd4206c4 Merge pull request #48472 from gtmanfred/2017.7
    - c7a3a7d8bd update jenkins tests to use tox for lint
    - 44aaac1d33 use tox to run pylint
  - 27ea8f35ea Merge pull request #48476 from twangboy/fix_dependencies
    - b0087d425c Add license info
    - 935f9b560c Fix dependencies
  - acf4c2d64a4 Merge pull request #48399 from garethgreenaway/48336_2017._7_ensure_chmod_setuid_with_chown
    - 8e6d3320f Normalize the mode before we compare it.
    - 8f94f0e6b8 Setting the mode with setuid or setgid bits in addition to setting the owner and group will force the setuid & setgid bits to reset. This change ensures that we set the mode after setting the owner & group.
  - 6166f6b78 Merge pull request #48471 from gtmanfred/2017.7
    - 392ab4e51f Add some configurations to tox
  - 6234d9b15d Merge pull request #48433 from discogestalt/fix-redis.hmset
    - 65817ac74d Use clean_kwarg method instead
    - f7fa7f57c6 Found another issue with redismod.hmset
    - 562486f86 Fix issue with redismod.hmset method
  - aacccfe2c Merge pull request #48428 from terminalmage/fix-jobs.lookup_jid
    - 6509aa9089 Fix outputter detection in jobs.lookup_jid runner
− a7e52f0de2 Merge pull request #48429 from rallytime/bp-4684
  * 8b4486248d Added ignore_retcode to mock unit tests
  * f8beab71dd Regression to ignore retcodes on crontab calls
− 4576ef20bc Merge pull request #48432 from dwoz/file-prepend-again
  * 349a2b279e Prepend test needs file.touch method

**PR #48481:** (terminalmage) Improve the slack engine docs @ 2018-07-09 13:41:15 UTC
− 4d4d2acce Merge pull request #48481 from terminalmage/slack-engine
− 56e8a1eb93 Improve the slack engine docs
− dde9c0640d Add information on creating bot users
− 513c6af975 Fix inaccurate docs

**PR #48348:** (dwoz) Fix multiple git module tests @ 2018-07-06 20:35:58 UTC
− 491b5b077c Merge pull request #48348 from dwoz/test_git
− 5ca5e060b3 Merge branch ’2018.3’ into test_git

**PR #48454:** (terminalmage) Improve error message when ext_pillar is incorrectly formatted @ 2018-07-06 18:03:44 UTC
− dd6aa97c5 Merge pull request #48454 from terminalmage/issue48107
− 269dbab7f6 Improve error message when ext_pillar is incorrectly formatted

**ISSUE #48336:** (JuanManuelVizcainoAbad) file.directory (refs: #48399, #48398)

**PR #48398:** (garethgreenaway) [2018.3] fixes to module/file.py (refs: #48508) @ 2018-07-06 18:02:43 UTC
− a9dc758e73 Merge pull request #48398 from garethgreenaway/48336_ensure_chmodd_setuid_with_chown
− 2454652914 Normalize the mode before we compare it.
− 08ad5665de Fixing test to ensure it works under py3
− 2b25d8c95b Setting the mode with setuid or setgid bits in addition to setting the owner and group will force the setuid & setgid bits to reset. This change ensures that we set the mode after setting the owner & group.

**PR #48431:** (rallytime) [2018.3] Merge forward from 2017.7 to 2018.3 @ 2018-07-05 17:23:00 UTC
− 2bba7f189f Merge pull request #48431 from rallytime/merge-2018.3
− 3e59dda0b1 Merge branch ’2017.7’ into ’2018.3’
  * 422441505d Merge pull request #48422 from rallytime/fix-48230
    * a6abf85621 Allow file.managed to work with uppercase source_hash in test=true mode
    * 4ce691ac57a Add regression test for Issue #48230
  * 83e387c951 Merge pull request #48410 from dwoz/service_dead_test_fix
    * 5c0923448d Fix service dead test on windows
  * d3ba345da5 Merge pull request #48413 from twangboy/fix_47811
    * c5aad04140 handle unc paths
  * 827ef2aac4 Merge pull request #48416 from dwoz/service_integration_fix
    * c43f150dcd Fix service integration test (py3)
• 10fe7d2b9b Merge pull request #48385 from Ch3LL/update_version_doc_2017.7

• PR #48310: (mtrorromeo) Backport ini_manage fixes to 2018.3 @ 2018-07-05 16:27:19 UTC
  - 432cbb5ee Merge pull request #48310 from mtrorromeo/ini-manage-backports
  - 88f80f6f77 Fixed pylint useless-super-delegation warning.
  - e20f4cad4 Uniformed reports between ini.options_absent and ini.options_present
  - 2c3ae06c9 pylint cosmetics.
  - 0c0d10d18f Fixes dry run false positive when option value is a number.
  - 70144b9cb0 Fixes dry run in ini_manage + Fixes related bug - when working with options which are not in section. + Fixes related tests + Fixes pylint warnings
• ISSUE #48402: (elsmorian) Running SaltStack master with no init system repeatedly logs "could not determine init system." (refs: #48441)

• PR #48441: (terminalmage) Switch init system log message to debug @ 2018-07-05 14:43:25 UTC
  - 84fd3d2784 Merge pull request #48441 from terminalmage/issue48402
  - d758995763 Switch init system log message to debug

• PR #48386: (Ch3LL) Update release versions for the 2018.3 branch @ 2018-07-03 13:37:32 UTC
  - 871c9e3b98 Merge pull request #48386 from Ch3LL/update_version_doc_2018.3
  - 84a1994110 Update release versions for the 2018.3 branch

• PR #48404: (Ch3LL) [2018.3] Remove In Progress Warning on 2017.7.7 @ 2018-07-03 13:33:18 UTC
  - ddb83ad4ce Merge pull request #48404 from Ch3LL/rm_inprog_2018.3
  - ef288f2a74 [2018.3] Remove In Progress Warning on 2017.7.7

• PR #48339: (terminalmage) Backport tojson filter from #48309 to 2018.3 @ 2018-07-02 17:52:53 UTC
  - PR #48309: (terminalmage) Drop support for Python 2 unicode string literals in YAML renderer (refs: #48339)
  - 5b38019ca0 Merge pull request #48339 from terminalmage/backport-tojson-filter
  - 4433bec891 Add release notes for tojson jinja filter
  - ac36998801 Tweak docs to reflect backported filter
  - c636b18cf0 Add unit test for tojson filter
  - e34e39f0e2 Document filter deprecation
  - b94af288b2 Deprecate json_encode_dict and json_encode_list jinja filters
  - 3896e3468c Use upstream tojson filter, if present
- 1499c6abcf Implement tojson jinja filter for those using Jinja < 2.9

- **ISSUE #48274**: (ipmb) s3.get signature failure with + in the object name (refs: #48328)

- **PR #48328**: (garethgreenaway) [2018.3] Fixes to utils/s3.py @ 2018-07-02 13:22:31 UTC
  - 222c1d65db Merge pull request #48328 from garethgreenaway/48274_s3_get_signature_fail
  - 22cafe8334 fixing lint issue
  - 13148203e Need to pass the URL path through quote to ensure any special characters are being quoted properly. if we include local_file for a PUT, read the file into data before passing it along to requests.requests.

- **PR #48358**: (Ch3LL) Fix corrupt public key with m2crypto python3 @ 2018-07-02 13:10:32 UTC
  - d3c658bdfc Merge pull request #48358 from Ch3LL/m2crypto_fix
  - 8fd3d4d430 m2crypto open file in rb mode for pub key
  - a964db4663 Fix corrupt public key with m2crypto python3

- **ISSUE #48367**: (asenci) salt.proxy.fx2: dictionary changed size during iteration (refs: #48368)

- **ISSUE #46765**: (roskens) pkg.mod_repo fails with a python error when removing a dictionary key (refs: #46776)

- **PR #48384**: (rallytime) Back-port #48368 to 2018.3 @ 2018-07-01 04:19:10 UTC
  - PR #48368: (asenci) Fix issue #48367 using the same approach as PR #46776 (refs: #48384)
  - PR #46776: (gtmanfred) fix shrinking list in for loop bug (refs: #48368)
  - 2fd63d66dc Merge pull request #48384 from rallytime/bp-48368
  - 430c462f34 Fix issue #48367 using the same approach as PR #46776

- **PR #48394**: (rallytime) [2018.3] Merge forward from 2017.7 to 2018.3 @ 2018-07-01 04:13:03 UTC
  - 3b53e2d206 Merge pull request #48394 from rallytime/merge-2018.3
  - 047f5b5f39 Update old utils paths to new utils paths
  - c4fd2a0930 Merge branch '2017.7' into '2018.3'
  - 7e25f26837 Merge pull request #48362 from twangboy/fix_48276
    - 77629f640a Fix module unit tests
    - b5ca560b73 Fix lint error
    - 210e280ecf Use explicit parameter names
    - 776db98a5c Handle missing registry entries
  - 80222b6b7c Merge pull request #48383 from rallytime/bp-48379
    - 9fc7815594 Clean up the workspaces at the end for every job
  - aa68a774a Merge pull request #48382 from rallytime/bp-48346
    - 6a70ba22e Use the right ssh key to destroy kitchen
  - 9519f640e7 Merge pull request #48381 from rallytime/bp-48330
    - 6857bedcc2 Add warnings plugin to replace violations
  - 14db0aa35d Merge pull request #48363 from dubb-b/2017.7
    - c0b962e28d Changing debug to info for logging
  - 5b29ed326f Merge pull request #48352 from Ch3LL/wheel_doc

---

**32.2. Previous releases**

Salt Documentation, Release 3006.4

- e8362ad71 fopen does not support encoding
- 487161ba8f Fix file encoding on windows
- fc760685ee Fix multiple git module tests

- **PR #47975**: (terminalmage) Add a new git.cloned state @ 2018-06-27 20:53:42 UTC
  - 67303d7901 Merge pull request #47975 from terminalmage/issue47937
  - 34b24bb7fa Merge branch '2018.3' into issue47937

- **PR #48323**: (Ch3LL) Update release versions for the 2018.3 branch @ 2018-06-27 13:44:58 UTC
  - 5b8d55428f Merge pull request #48323 from Ch3LL/update_version_doc_2018.3
  - b4548aca5d Update release versions for the 2018.3 branch

- **PR #48326**: (Ch3LL) Remove In Progress Warning for 2018.3.2 Release @ 2018-06-27 13:43:16 UTC
  - 7cf403e313 Merge pull request #48326 from Ch3LL/rn_remove_in_prog
  - dfce1ad5ed Remove In Progress Warning for 2018.3.2 Release

- **PR #48301**: (terminalmage) Fix typos in new mock_open docs @ 2018-06-25 19:08:14 UTC
  - 60ffad512f Merge pull request #48301 from terminalmage/docs
  - 6c33345f05 Fix typos in new mock_open docs

- **PR #48292**: (rallytime) Back-port #48288 to 2018.3 @ 2018-06-25 19:07:11 UTC
  - **PR #48288**: (rmarchei) fix lsattr.get in file.check_perms (refs: #48292)
  - 476087153 Merge pull request #48292 from rallytime/bp-48288
  - d6620573bb fix lsattr.get in file.check_perms

- **PR #48296**: (rallytime) Back-port #48258 to 2018.3 @ 2018-06-25 19:04:41 UTC
  - **PR #48258**: (nullify005) preserve tuples for ldap modification operations (refs: #48296)
  - 27207fc510 Merge pull request #48296 from rallytime/bp-48258
  - 8b7f36f264 preserve tuples for ldap modification operations

- **ISSUE #48204**: (zerthimon) State mysql_user.present Exception with mysql 8.0.11 (refs: #48275, #48228)

- **PR #48275**: (garethgreenaway) [2018.3] Follow up fix to MySQL user for password management @ 2018-06-25 13:23:35 UTC
  - d5265da945 Merge pull request #48275 from garethgreenaway/mysql_fix_followup
  - bb024b9115 Removing unnecessary code.
  - 8b542e1745 With MySQL versions 8.0.11 and beyond, since the PASSWORD function has been removed
  we need to hash the password string before comparing when checking if the user exists.

- **PR #48286**: (terminalmage) Don’t load the grains again when printing them via salt-call -g @ 2018-06-25 13:19:18 UTC
  - 1f306525a7 Merge pull request #48286 from terminalmage/caller-print_grains
  - caa62c051f Don’t load the grains again when printing them via salt-call -g

- **PR #48279**: (terminalmage) Add documentation/further enhancements to rewritten mock_open @ 2018-06-25 13:12:30 UTC
  - 27a0e95174 Merge pull request #48279 from terminalmage/mock_open-docs
- 65c575ae9c Fix spelling error
- 830a624ce8 Ignore IOError when tearing down filehandles not opened for reading
- 3b6356f4b0 Raise TypeError when trying to read from filehandles not opened for reading
- 09aae0c82b Add more examples and information on strict string types
- 8c069d105d Add some mock_open docs
- a13d1fe1a0 Update mock_open usage to reflect read_data type enforcement
- 374a8ce31f Add more mock_open tests
- 0f06adb008 Improve code-reuse in mock_open tests
- 0e8c83bac6 2 MockFH enhancements:
  - ISSUE #48141: (zerthimon) salt-api request causes exception (refs: #48236)
  - PR #48236: (garethgreenaway) [2018.3] Fix to cmd_batch @ 2018-06-25 12:58:49 UTC
    - 6ee856631b Merge pull request #48236 from garethgreenaway/48141_salt_api_local_batch
    - aea4f7ae14 Fixing test_local_batch
    - ce3e1eaf2c Removing sort.
    - 83accf3b20 Fixing test_local_batch
    - ff14b99752 Fixing a typo in the comment.
    - 85cef126e0 Adding note about why salt.utils.versions is being re-imported. Adding a test for local_batch.
    - 808805fd3d Fixing cmd_batch to work correctly when called via salt-api.
  - ISSUE #48204: (zerthimon) State mysql_user.present Exception with mysql 8.0.11 (refs: #48275, #48228)
  - PR #48228: (garethgreenaway) [2018.3] Fixes to mysql module @ 2018-06-22 15:44:00 UTC
    - 09b036c26e Merge pull request #48228 from garethgreenaway/48204_mysql_user_password_exception
    - 1b2ffcef1d Updating the mysql module to not use the PASSWORD when MySQL is version 8.0.11 or higher, where the PASSWORD function has been removed.
  - PR #48252: (rallytime) [2018.3] Merge forward from 2017.7 to 2018.3 @ 2018-06-22 15:13:42 UTC
    - 67cb5563ef Merge pull request #48252 from rallytime/merge-2018.3
    - 84ec655c24 Merge branch '2017.7' into '2018.3'
      * a172f9de84 Merge pull request #48226 from terminalmage/fixed-alias-docstring
        - fb237272f5 Don't display "None" in SaltInvocationError when Salt installed using -OO
        - 90c90f5d5c Fix docstring construction in alias_function when Salt installed using -OO
      * c6a0207cae Merge pull request #48227 from Ch3LL/fix_win_tests
        - 236773e3e9 Skip new sha256 files on repo.saltstack.com/windows
      * 6929423528 Merge pull request #48131 from bowmanjd-lms/fixed-apk-python3
        - f5d2835299 Merge branch '2017.7' into fix-apk-python3
        - 022f9c6ba5 Fix py3-incompatible dict.keys()[] call in apk.py
      * 868c17377f Merge pull request #48185 from DSRCorporation/bugs/47901_future_done_exception
        - 5f63316311 Merge branch '2017.7' into bugs/47901_future_done_exception

32.2. Previous releases 5205
- 9f2dbf94cb Don’t call .exception() on future unless it’s done.

- 80a3e37c2e Merge pull request #48192 from twangboy/fix_pip_version_2017.7
  
  - 59ae2cc5fc Use --disable-pip-version-check for build_env_.ps1

- 12e28882a Merge pull request #48201 from zer0def/lxc-bootstrap-fixes
  
  - 6fd3d40d4 Take lxcpath into account when bootstrapping new containers. Version comparison fixes.

- e079f9ce38d Merge pull request #48190 from terminalmage/fix-vfstab-test
  
  - 8d70d14362 Fix mount.vfstab unit test

- c8b9ee986 Merge pull request #48115 from KaiSforza/pr-lint-2017
  
  - 49472ab39 Add docs, kitchen tests
  
  - 31702bb20 Move .jenkins to .ci for future

- ddec313ce3e Make it parallel so we don’t fail right away
  
  - cd13426726 Add a .jenkins file to run pylint

- fc172b721 Merge pull request #48174 from terminalmage/docker-update-mine
  
  - 9af09e0127 Mock config.get due to changes in _refresh_mine_cache
  
  - c5802ad465 Fix the version number in versionadded
  
  - d403ae58d7 Add unit test for docker.update_mine
  
  - 44c275698a Actually it’s more than just add/remove that updates the mine
  
  - 0cb5996b07 Add release notes mention of docker.update_mine config option
  
  - de05097b20 Add docs for new config option
  
  - 04c59a9178 Add note in mine.get_docker docstring about new config item
  
  - 4e456255c0 Allow mine update to be disabled using new config option

- **ISSUE #48029**: (vinian) syndic failed to auth when restart salt-master on syndic master (refs: #48034)

- **PR #48034**: (vinian) restart salt-syndic when salt-master restart @ 2018-06-21 20:12:37 UTC
  
  - 9f0bd90c5b Merge pull request #48034 from vinian/restart-salt-syndic-when-salt-master-retart
  
  - f7652d8c8b restart salt-syndic when salt-master restart

- **PR #48250**: (rallytime) Update release notes for 2018.3.2 @ 2018-06-21 18:30:21 UTC
  
  - ab2ba942ad Merge pull request #48250 from rallytime/2018.3.2-release-notes-update
  
  - 19c104b6cd Update release notes for 2018.3.2

- **PR #48166**: (terminalmage) Add trace logging and optimize file handling in grains.core.os_data @ 2018-06-21 18:02:33 UTC
  
  - 51928f0050 Merge pull request #48166 from terminalmage/salt-jenkins-1000
  
  - b73df0ab00 Change call_args to call.args to reflect changes to MockFH
  
  - 0c2cc07704 remove unused import
  
  - b8c0a55cf3 Add test for tell()
  
  - 1cbe89feee Implement tell() for filehandle iteration
  
  - efb8f49d42 Add tests for read_data being a list, and containing unicode or bytestrings
- 38df912fa6 Operate on a copy of the read_data
- 71eeae1240 Update mount module unit tests to reflect changes in mock_open
- 16c414e120 Update nfs3 module tests to reflect changes in mock_open
- b7eab25d6c Update grub_legacy module tests to reflect changes in mock_open
- cc002b8fd7 Update new network unit test to reflect changes in mock_open
- a8f11594f1 Update new core grains tests to reflect changes in mock_open
- 84ce18d956 Update crypt unit tests to reflect changes in mock_open
- 67c036dc2d Add MockCall to tests.support.mock to track calls
- 2556a1e13d Remove unused import
- fd9d700157 Add additional docs to MockOpen class
- 6acb4c83ec Update newly added test to reflect renaming of handles attribute
- 77e5288d42 Update fibre_channel grains tests to reflect changes in mock_open
- ed40371a06 Update timezone module tests to reflect changes in mock_open
- fc0aa9934f Track call_count in MockOpen
- 2598d2453a Update snapper module tests to reflect changes in mock_open
- 51b3fa7b4 Add support for passing multiple strings for a given match in read_data
- 55487c175c Fix mock_open call to use new multofile syntax
- 7f516ef73a Update puppet module tests to reflect changes in mock_open
- 33a97c4ecc Update btmp beacon tests to reflect changes in mock_open
- bc027ca94 Update wtmp beacon tests to reflect changes in mock_open
- f5823252bb Track call args/kwargs in MockFH
- 335591ca90 Mock the seek function in MockFH
- 7eb4b1ae1c Update cp.push test to reflect changes to mock_open
- 2be19cfa89 Report correct location when reading using explicit size and EOF reached
- 5ec95ba5ca On second thought, actually implement tell()
- 19022eb9e5 Add tell mock to MockFH
- 4b5a393445 Update junos tests to reflect changes to mock_open
- 278a222b09 Update dnsutil tests to reflect changes to mock_open
- 4e67955572 Replace the rest of mock_open with a class
- 75307a47c5 Update linux_sysctl tests to reflect changes to mock_open
- 05c68fd5d9 Use explicit config file and fix remaining mac_sysctl tests
- 836fde9a30 Allow Python 2 to accept an exception as read_data
- 543385fd02 Add writelines_calls property
- 42fa84245e Make read funcs mocks so their calls can be tracked
- 675f03c58f Update mac_sysctl tests to reflect new mock_open behavior
- 3d2c41d395 Update file module tests to reflect new mock_open behavior
- b9200dbc3e add a dict containing the handles to the mock_open return object
- 852ba4b982 Add mocked close() function to MockFH
- f6b46bc608 Remove unused import
- 20f60a769b Add blank lines to appease linter
- 48d7cfa6d3 Add multfile tests for mock_open
- 1861e9b944 mock_open: rewrite multi-file support
- 5e6b539770 Use function for empty string
- cb2620ad2b Update core grains tests to reflect EAFP changes
- 5d09b178d7 Separate mocked file contents per filename, not glob
- 875102f538 Modify mock_open to support multiple file paths
- 096ace74df Move lsb_release parsing into its own function
- 6a0828beed Add unit tests for mock_open
- 8ba6cadac7 More mock_open bugfixes
- 329dea218e Add a bunch of logging for linux os_data core grains
- 2c64b270df Add timestamp to the minion's log_fmt_console

• PR #48216: (Ch3LL) Fix UnicodeDecodeError when reading file to determine virtual grain (refs: #48440) @ 2018-06-20 16:53:41 UTC
  - 6072d1ef9c Merge pull request #48216 from Ch3LL/grains_unicode
  - c4334f3f14 Fix UnicodeDecodeError when reading file to determine virtual grain

• PR #48212: (Ch3LL) Fix python3 ec2 salt-cloud TypeError when installing salt (refs: #49041) @ 2018-06-20 16:00:21 UTC
  - 77a75ebdcf Merge pull request #48212 from Ch3LL/py3_ec2
  - b0d75f459a Fix python3 ec2 salt-cloud TypeError when installing salt

• ISSUE #47984: (jeduardo) x509 module/state writing wrong certificate serial number to CRL (refs: #47986, #48080)

• PR #48209: (rallytime) Back-port #47986 to 2018.3 @ 2018-06-20 13:44:17 UTC
  - PR #48080: (lusche) Bugfix #47984 messed up cert serial (refs: #48209)
  - PR #47986: (jeduardo) Fix serial number writing into CRL files with the x509 module (refs: #48209)
  - de61d31f5 Merge pull request #48209 from rallytime/bp-47986
  - f4b3bd5d2c Changed salt.utils.fopen to salt.utils.files.fopen
  - 8686872909 Fixed typos, removed repeated unit tests, and applied code fixes suggested by linter.
  - 382df48a72 Removed useless new line
  - 5aa99d14c4 Added unit tests for CRL creation and certificate revocation with CRL
  - cc12844922 Fixed a problem where the OpenSSL bindings refuse to consume unicode strings.
  - 399c0f8860 Stopped converting the certificate hexadecimal serial number to an integer in order to avoid breaking CRLs.

• PR #48210: (rallytime) [2018.3] Merge forward from 2018.3.1 to 2018.3 @ 2018-06-20 13:43:19 UTC
- 1f88df6e89 Merge pull request #48210 from rallytime/merge-2018.3
- dae65da256 Merge branch '2018.3.1' into '2018.3'

- **PR #48186**: (rallytime) Add autodoc module for saltcheck.py @ 2018-06-19 19:03:55 UTC
  - 5b4897f050 Merge pull request #48186 from rallytime/saltcheck-docs
  - 314fc2d889 Clean up some doc references
  - da7603d879 Add autodoc module for saltcheck.py

- **PR #48191**: (twangboy) Use the --disable-pip-version-check option @ 2018-06-19 18:13:44 UTC
  - 7274a33c80 Merge pull request #48191 from twangboy/fix_pip_check
  - 5c00f6e6b7 Use the --disable-pip-version-check option

- **ISSUE #48122**: (pasmon) Salt minion 2017.7.6 disregards "bin_env" in pip state (refs: #48189)

- **PR #48189**: (gtmanfred) If pip binary is passed to bin_env, use that pip binary (refs: #48207) @ 2018-06-19 18:08:13 UTC
  - 96f79b0674 Merge pull request #48189 from gtmanfred/pip
  - 96c59f3d93 If pip binary is passed to bin_env, use that pip binary

- **PR #48165**: (terminalmage) Fix regression with top_file_merging_strategy=same @ 2018-06-19 18:03:07 UTC
  - 71e385501b Merge pull request #48165 from terminalmage/issue48144
  - 92ac2a26da Remove unused imports
  - 15a44d5dd4 Remove redundant top file merging tests
  - 12100d9bd3 Add more top file merging tests
  - 0ed6e86cb3f Add unit test for show_top with "same" merging strategy
  - 35e5492fb7 Revert 7058f10 / 3df6fa7

- **ISSUE #46806**: (ezh) Lack of debug messages on authentication fail. (refs: #46807, #48179)

- **PR #48179**: (ezh) 2018.3 auth @ 2018-06-19 14:16:40 UTC
  - PR #46807: (ezh) Reduce initial authentication setup complexity (refs: #48179)
  - 2a8e1c6539 Merge pull request #48179 from ezh/2018.3-auth
  - 9ed2d2ec55 Fix integration.shell.test_key and integration.shell.test_runner
  - 26a6f79730 Fix integration tests test_list_acc_wrong_eauth, test_salt_run_with_wrong_eauth
  - b84c4321c4 Add more verbose debug messages for auth subsystem

- **PR #48188**: (gtmanfred) allow virtual aliases to be used for the driver name @ 2018-06-18 21:49:16 UTC
  - 0231008cf8 Merge pull request #48188 from gtmanfred/2018.3
  - 45249d5e10 allow virtual aliases to be used for the driver name

- **PR #48116**: (KaiSforza) Add jenkinsfiles to define tests in 2018 @ 2018-06-18 21:27:10 UTC
  - 0f95238dca Merge pull request #48116 from KaiSforza/pr-lint-2018
  - f158bed5bd Add docs, kitchen tests
  - 904a70c187 Move .jenkins to .ci for future
  - 365fa0e51f Make it parallel so we don’t fail right away
e594979745 Add a .jenkins file to run pylint

- **ISSUE #48146**: (rmarchei) mysql_query.run: exception on 2018.3 (refs: #48164)
- **PR #48164**: (garethgreenaway) [2018.3] Fixes to mysql state @ 2018-06-18 13:10:20 UTC
  - 60c9490bdc Merge pull request #48164 from garethgreenaway/48146_mysql_output_to_file
  - a040643a82 Accounting for certain situations when the query result is not a string, but actually a dictionary.
- **ISSUE #48113**: (gaetanquentin) state file.line has error and erase file content completely, while with mode test=true it is ok (refs: #48156)
- **PR #48156**: (garethgreenaway) [2018.3] Unicode fixes for file.line @ 2018-06-17 19:34:08 UTC
  - 85ebcbdf32 Merge pull request #48156 from garethgreenaway/48113_ensure_writing_strings_with_file_dot_line
  - 5a9ef0d1ae Unless we’re using py2 and Windows, ensure we’re writing out a string when using file.line.
- **PR #48161**: (rallytime) [2018.3] Merge forward from 2017.7 to 2018.3 @ 2018-06-17 19:33:29 UTC
  - 33400e792d Merge pull request #48161 from rallytime/merge-2018.3
  - 0733fa1b02 Update utils path for which function to new path
  - 398cc78224 Merge branch '2017.7' into '2018.3'
  - df2a156338 Merge pull request #48061 from garethgreenaway/port_47049_2017_7
    - 7c472fed51 Fixing failing test_set_hwclock_aix test.
    - ccb0acc958 Porting #47049 to 2017.7.
  - 5ec3cf2dd4 Merge pull request #48143 from Ch3LL/fixed_long_job
    - 48b5d2e9d3 Add timeout argument to run_salt for ShellCase
  - ac9dabbf9a Merge pull request #48105 from rallytime/merge-2017.7
    - 377e466d1f8 Merge pull request #48135 from rallytime/release-notes-2017.7
      - 7a97f157b3 Add missing v for tag reference
      - 2f2b69ed37 Add "in progress" notation to 2017.7.7 release notes
      - 85b2862ce Move 2017.7.7 release notes to 2017.7.8
      - cdb45874de Merge branch '2017.7.6' into '2017.7'
        - 16916d6bd2 Merge pull request #47880 from gtmanfred/2017.7.6
        - 987ae6358b quote python_version in requirements.txt
        - 27670168ea Merge pull request #47875 from rallytime/release-notes-dot-six
        - 58dee4c829 Remove sentence about the release being in progress
        - b3dcb7330e Remove "in progress" too
        - 99e1df7823 Update 2017.7.6 release notes: remove "unreleased" text
        - 1f0bada07c Merge pull request #47873 from gtmanfred/2017.7.6
        - a1c1b5b5cf allow tornado 5.0 to be installed only for python2
      - 2da56a69d9 Merge pull request #48101 from rallytime/update-doc-refs-2017.7
        - 7ba60f3b36 Update 2017.7.7 reference to 2017.7.8
- 5a0e3d46e7 Merge pull request #48091 from terminalmage/fix-file_roots-monkeypatching
  - 6fe711ad76 Reverse monkeypatching after test_symlink_list finishes
- 053b019a8f Merge pull request #48088 from rallytime/update_version_doc_2017.7
  - 1b8d1c936b Remove "in progress" info for 2017.7.6 release notes
  - 9a0f4d190a Update release versions for the 2017.7 branch
- d6d2c5ee18 Merge pull request #48075 from garethgreenaway/48038_jobs_are_not_deduping_minion_side
  - c537b3275b Ensure that the shared list of jids is passed when creating the Minion. Fixes an issue when minions are pointed at multiple syndics.
- aa33c0b0c Merge pull request #48071 from terminalmage/gitfs-docs
  - 24545204b3 Fix inaccurate gitfs_saltenv example in GitFS Walkthrough
- fb4ceacb88 Merge pull request #48053 from rallytime/bp-48040
  - 265b2b194 states/github.py fix for incorrect positional argument
- f37dcaac6d Merge pull request #48024 from gtmanfred/2017.7
  - 56b074ab27 allow specifying a different state to run on converge
  - cc9c4b4d5a add pytest coverage and xml junits

• ISSUE #48145: (max-arnold) Failed to load ext_pillar saltclass: can only assign an iterable (refs: #48155)

• PR #48155: (max-arnold) Do not fail on empty saltclass classes (fix for #48145) @ 2018-06-15 20:21:28 UTC
  - 9aa9a83b10 Merge pull request #48155 from max-arnold/2018.3
  - 63ab02c648 Do not fail on empty saltclass classes declaration #48145
  - 3d4fcbe3aa Add test for issue #48145

• PR #48104: (twangboy) Fix unit.modules.test_win_status @ 2018-06-15 17:05:34 UTC
  - 152c09cc0c Merge pull request #48104 from twangboy/fixed_test_win_status
  - 1ec3f3a36ee Fix test_error_logged_if_process_get_owner_fails

• PR #48147: (brejoc) Fix for sorting of multi-version packages @ 2018-06-15 17:03:18 UTC
  - 8cf03110d4 Merge pull request #48147 from brejoc/2018.3-multi-version-fix
  - 90ed25447d Switching to salt.utils.versions like linter suggested
  - ed09574073 Fix for sorting of multi-version packages (bsc#1097174 and bsc#1097413)

• PR #47956: (dmurphy18) Improved support for mount on AIX @ 2018-06-15 13:40:01 UTC
  - 2ede5f5442 Merge pull request #47956 from dmurphy18/aix_mount_support
  - f2a3e321db Improved support for mount on AIX

• ISSUE #48012: (Timandes) Found UnicodeDecodeError when trying to start Salt Master (refs: #48081)

• PR #48081: (terminalmage) Fix UnicodeDecodeError when parsing hosts file with non-ascii @ 2018-06-15 12:41:13 UTC
  - c05e176782 Merge pull request #48081 from terminalmage/issue48012
  - 8d2f0bf25 Fix cp.push test
  - e230a7223f Fix definition of test data for wtmp/btmp beacon tests
  - 82874a8c10 Import six like we do everywhere else
- 54f9a2ab54 Remove unused import
- 767cc7e87f fix tabs
- db19636f56 Get rid of additional newline append
- 7427e192ba Fix more crappy mocking
- 4eaa5789ce Fix crappy mocking
- 248467edac Add regression test for _generate_minion_id()
- 5e62d6d45f Fix UnicodeDecodeError when parsing hosts file with non-ascii
- e6a4744f85 Use errno instead of hard-coding error 2
- ff63f36932 Fixes / enhancements for mock_open

**PR #48133**: (rallytime) Updates the 2018.3.2 and 2018.3.3 release notes files @ 2018-06-14 21:21:15 UTC
- PR #48129: (rallytime) Add release notes for 2018.3.2 (refs: #48133)
- 5d92e2763a Merge pull request #48133 from rallytime/release-notes-2018.3
- afe1e91972 Add "in progress" notation to 2018.3.2 release notes
- 3e4272ac09 Add release notes for 2018.3.2
- 88c584cb0d Move 2018.3.2 release notes to 2018.3.3

**PR #48103**: (terminalmage) Fix for gitfs base env being pinned to commit ID @ 2018-06-14 16:29:24 UTC
- 0e3f846836 Merge pull request #48103 from terminalmage/gitfs-base-pinned-to-commit
- 31ab2fe8de Fix for gitfs base env being pinned to commit ID

**PR #48077**: (twangboy) Fix issue with salt.utils.parsers on Windows @ 2018-06-14 16:22:57 UTC
- 4bf1c7f75 Merge pull request #48077 from twangboy/fixed_parsers
- 0f7d7691a2 Call logger in each case
- 0e9dd741c Fix logic for non-root
- 2d253a688 Fix parsers for Windows, fix tests

**PR #48096**: (twangboy) Fix unit.utils.test_which on Windows @ 2018-06-14 13:15:14 UTC
- 80332b32a7 Merge pull request #48096 from twangboy/fixed_test_which
- d26fc56f13 Use os.sep for paths

**PR #48102**: (rallytime) [2018.3] Update 2018.3.2 references to 2018.3.3 @ 2018-06-14 13:14:26 UTC
- 66b2200913 Merge pull request #48102 from rallytime/update-doc-refs-2018.3
- 1c9bce3d8 Update 2018.3.2 references to 2018.3.3

**PR #48109**: (rallytime) Back-port #47851 to 2018.3 @ 2018-06-14 13:09:04 UTC
- PR #47851: (rares-pop) Fixup! add master.py:FilesServerUpdate **kwargs (refs: #48109)
- 2902eebf14 Merge pull request #48109 from rallytime/bp-47851
- e9dc30bf8e Fixup! add master.py:FilesServerUpdate **kwargs

**ISSUE #47925**: (JonGriggs) GitFS looking for files in the master branch only (refs: #47943)

**PR #47943**: (terminalmage) Make sure we set the effective environment when lock_saltenv is True @ 2018-06-13 20:02:00 UTC
- 2529292568 Merge pull request #47943 from terminalmage/issue47925
- 534e1a7100 Merge branch ’2018.3’ into issue47925

**PR #48089**: (rallytime) Update release versions for the 2018.3 branch @ 2018-06-13 14:03:44 UTC
- 9e1d0040e4 Merge pull request #48089 from rallytime/update_version_doc_2018.3
- fada6a991e Remove "in progress" info for 2018.3.1 release notes
- a3b3b0a0e1 Remove "in progress" info for 2017.7.6 release notes
- f9be1b9125 Update release versions for the 2018.3 branch

**PR #48054**: (rallytime) [2018.3] Merge forward from 2017.7 to 2018.3 @ 2018-06-13 12:58:46 UTC
- b10b7355a0 Merge pull request #48054 from rallytime/merge-2018.3
- 508d70fabf Update old utils paths to use new paths
- 3d2ea16c3a Merge branch ’2017.7’ into ’2018.3’
  * fbee3576ec Merge pull request #48044 from twangboy/wua_add_fail_code
    - d41d0c25eb Add fail code for WinHTTP send/receive error
  * 871a910fcfb Merge pull request #48009 from dwoz/winswarmfix
    - 5027c7bb84 minionswarm runs on windows
  * 0dcaead36d Merge pull request #47968 from gtmanfred/2017.7
    - ae1b0d28bb pass LANG and HOME into tox commands
    - 81bd0f15af add tests.txt for running tests with tox requirements
    - 556a2067fc fix masterapi test to use testing directory for configs
    - 5a41f484ef add EXPENSIVE_TESTS
    - 055cd5a6ba set DESTRUCTIVE_TESTS environment variable for pytest
  * 42dd6b83eb Merge pull request #47978 from twangboy/fix_test_pkg
    - 8bb36b3a4b Add try/finally, fix typo in 7zip def file
  * a67b21ef3d Merge pull request #47959 from twangboy/fix_test_service
    - 0cd47aa81e Remove unused import
    - d4b42540e3 Fix failing test when service doesn’t exist
  * b81d482067 Merge pull request #47983 from garethgreenaway/backport_47843_2017_7
    - 7b7fb1f5d5 Adding missing test sls file.
    - 54e51bc627 Backporting #47843 to 2017.7, updating test for 2017.7.
  * d56dad22c Merge pull request #47533 from twangboy/fix_47178
    - 24717bc21 Change version added to 2017.7.7
    - 0592f1bac2 Fix issues with functions that user makedirs on Windows
  * 5c56b8c755 Merge pull request #47827 from twangboy/fix_47791
    - fbbd91f09e Add more descriptive debug message

32.2. Previous releases 5213
• 365f81651b Fix deprecated exception handling
• 8dd6710b93 Use local instead of network
• 980d99d74b Fix issue when archive is on mapped drive

• PR #48060: (gtmanfred) mark test as expensive @ 2018-06-13 12:58:21 UTC
  – c83818e4f9 Merge pull request #48060 from gtmanfred/2018.3
  – 914935c4d4 Merge branch `2018.3` into 2018.3

• PR #48057: (terminalmage) Fix link without target in 2018.3.0 release notes @ 2018-06-11 18:50:17 UTC
  – a4eb41623d Merge pull request #48057 from terminalmage/docs-2018.3
  – 20f71ff6f6 Fix link without target in 2018.3.0 release notes
  – d8c035e5e5 mark test as expensive

• PR #48042: (terminalmage) Switch to trace level logging for further test failure troubleshooting @ 2018-06-11 14:03:48 UTC
  – 0f9a3122df Merge pull request #48042 from terminalmage/salt-jenkins-1000
  – b33ab5eaa Switch to trace level logging for further test failure troubleshooting

• PR #48041: (terminalmage) salt.utils.hashutils: Only decode to utf-8 on Windows @ 2018-06-11 13:31:41 UTC
  – 6c5389189a Merge pull request #48041 from terminalmage/hashutils-fix-windows
  – 58c7cd33d7 salt.utils.hashutils: Only decode to utf-8 on Windows

• PR #48014: (cro) Find job pause @ 2018-06-08 13:48:45 UTC
  – dcae209951 Merge pull request #48014 from cro/find_job_pause
  – 440aa67c4f Lint: Add blank line
  – 7b0e99a511 One more case where returner doesn’t respond
  – 5abeddf882 Catch two cases when a returner is not able to be contacted--these would throw a stacktrace.

• PR #47915: (garethgreenaway) [2018.3] state runner pause resume kill @ 2018-06-07 16:08:30 UTC
  – ea85f882bc Merge pull request #47915 from garethgreenaway/state_runner_pause_resume_kill
  – 2ecbe9c034 fixing typo in alias_function call.
  – 4377e0cc08 Some fixes to the set_pause and rm_pause function in the state runner, renaming to in line with the functions in the state module. Including aliases to previous names for back-ward compatibility. Including a soft_kill function to kill running orchestration states. A new test to test soft_kill functionality.

• PR #48002: (rallytime) Back-port #47923 to 2018.3 @ 2018-06-07 15:25:39 UTC
  – PR #47923: (ismb) Prevent crash if files in file.recurse (refs: #48002)
  – 5c11fcd60 Merge pull request #48002 from rallytime/bp-47923
  – 9465e5f1e9 Use to_unicode from stringutils avoid deprecation warning
  – 73d33cbfc3 Prevent crash if files in file.recurse

• PR #48003: (rallytime) [2018.3] Merge forward from 2017.7 to 2018.3 @ 2018-06-07 15:25:19 UTC
  – 3da0a87c71 Merge pull request #48003 from rallytime/merge-2018.3
  – a6533a9332 Merge branch `2017.7` into `2018.3`
* 998a1c13d5 Merge pull request #47966 from mbunkus/fix-postfix-prefix-free-key-names-assumption
  - 0ae40d1b5 Fix postfix.set_main’s assumption of prefix-free key names
* df50ce7b1b Merge pull request #47824 from twangboy/fix_setup.py
  - 4538b3abb3 Remove 'len-as-condition' disablement
  - d4efcc3c8b Skip lint errors
  - 1b39778d4 Remove m2crypto download for Windows
* 3e91a31134 Merge pull request #47922 from damon-atkins/2017.7_win_pkg_keys_fix
  - 7129203b1b Merge branch ‘2017.7’ into 2017.7_win_pkg_keys_fix
* 8008fca2f6 Merge pull request #47933 from terminalmage/add-pillar.get-docs
  - 4eb022b675 Clarify pillar.get docs
  - 3e91a31134 Merge pull request #47944 from terminalmage/fix-git.detached-docs
    - 1d082b4389 Replace use of deprecated argument name in git.detached docstring
    - 6257939cb6 Merge branch ‘2017.7’ into 2017.7_win_pkg_keys_fix
    - 4ce0fe6546 win_pkg under py3 keys returns a view instead of a list, wrap keys in list()

- **PR #48022:** (morganwillcock) win_wua state: fix function name in examples @ 2018-06-07 15:03:52 UTC
  - 0a05212f60 Merge pull request #48022 from morganwillcock/patch-1
  - 443f4d6f21 win_wua state: fix function name in examples

- **ISSUE #47546:** (ender8282) archive.extracted fails when archive includes files with non-ascii names with 2018.3.0 (refs: #48015, #47572)

- **PR #48015:** (garethgreenaway) [2018.3] more unicode nonsense in archive module @ 2018-06-07 14:44:55 UTC
  - 406efb161e Merge pull request #48015 from garethgreenaway/47546_more_unicode_nonsense
  - f457f9cb84 Adding a test to ensure archive.list returns the right results when a tar file contains a file with unicode in its name.
  - 9af49bc595 Ensure member names are decoded before adding to various lists.

- **ISSUE #47955:** (frogunder) 2018.3.1 Creating Windows machine in Amazon using salt-cloud fails. (refs: #47989)

- **PR #47989:** (dwoz) Properly decode password from aws using m2crypto @ 2018-06-06 20:44:28 UTC
  - 1ce7d6c38a Merge pull request #47989 from dwoz/awscloud
  - 23ab272be Fix linter errors
  - 6c8daa2b85 Properly decode password from aws using m2crypto

- **PR #47976:** (terminalmage) Capture and log output of processes that timed out and were killed @ 2018-06-06 19:17:08 UTC
  - 76068c83f5 Merge pull request #47976 from terminalmage/salt-jenkins-1000
  - 41e5a75027 Add catch_timeout to run_script
  - 551ada8e4d Capture and log output of processes that timed out and were killed

- **PR #47990:** (terminalmage) Docs fixes in 2018.3 release branch @ 2018-06-06 17:15:17 UTC
  - f12a52736e Merge pull request #47990 from terminalmage/2018.3-docs
- f89d2ccd30 Clean up Sphinx warnings
- f5fc936865 Add clarifying comment so that we don’t break this
- 94849780ac fix docs build error due to IndexError
  
  • **PR #47982:** (twangboy) Fix `unit.modules.test_win_dns_client` tests @ 2018-06-06 15:02:10 UTC
    - 9d56af3cad Merge pull request #47982 from twangboy/fix_test_win_dns_client
    - 2dcd6788f6 Force string to ModuleType
  
  • **PR #47985:** (twangboy) Fix `unit.states.test_reg` test failure @ 2018-06-06 14:56:03 UTC
    - 1b4c72345b Merge pull request #47985 from twangboy/fix_test_reg
    - 4ce551811f Remove the unnecessary `to_unicode` stuff
    - 863ded39fa Mock `reg.cast_vdata`
  
  • **ISSUE #47236:** (MorphBonehunter) `x509.private_key_managed` broken after upgrade to 2018.3.0 (refs: #47957)
  
  • **PR #47957:** (garethgreenaway) [2018.8] Ensure `x509` passphrase is a string @ 2018-06-05 13:27:33 UTC
    - 84100570f7 Merge pull request #47957 from garethgreenaway/47236_ensure_passphrase_is_a_string
    - 99bad3ca6 removing unnecessary change
    - 8ed88473d Ensuring that when a passphrase is passed in, it is returned as a string from the passphrase callback.
      - d0cf06a24d Make sure we set the effective environment when lock_saltenv is True
        - 8da6ce45dc Finish the docstring for `git.cloned` state
        - 4a8260a5e5 Add tests for `git.cloned` state
        - 311179da05 Add `git.cloned` state
  
  • **PR #47926:** (dmurphy18) Backport of PR 47808 to 2018.3, improved grains support for AIX @ 2018-06-04 19:31:24 UTC
    - **PR #47808:** (dmurphy18) Updated AIX support for grains reported (refs: #47926)
    - c355da9e0d Merge pull request #47926 from dmurphy18/backport_pr47808
    - ac15d2093a Backport of PR 47808 to 2018.3, improved grains support for AIX
  
  • **PR #47927:** (rallytime) [2018.3] Merge forward from 2017.7 to 2018.3 @ 2018-06-04 18:55:12 UTC
    - a46e42ab11 Merge pull request #47927 from rallytime/merge-2018.3
    - 5bab66f4b Lint: Whitespace fix
    - 7e1d278d19 Update old utils paths to use new utils paths
    - 3273bdaf7 Merge branch ‘2017.7’ into ‘2018.3’
      - a2b588299b Merge pull request #47860 from terminalmage/state-writing-docs
        - 8cb33d3dec Quiet the linter
        - af51e16f23 Use more elegant RST syntax
        - 91cd571de0 Update mocking to reflect changes in service module
        - b9ace5a859 Fix crappy mocking
        - bc9e3aced9 Lint fixes
        - d37f7e4f04 Add 2017.7.6 release notes
9dddeeefab Improve documentation on syncing states
f465fa3ca7 Add best practices docs for writing states
93ee5ee2b0 Fix all Sphinx warnings
64b94d0b8 Clarify that name would override the id declaration

d2f3377b5b Merge pull request #47877 from dwoz/sleep_audit
ebc7cde9cb Revert job chunk wait time change
735e92093e Merge pull request #47917 from dwoz/winsuite
118601ebd6 Fix windows tests suite breakage
63eb76d51 Merge pull request #47822 from Ch3LL/win_user_test
3a691b405f add user_home path for both windows and linux
788abf771e Add user state integration tests to windows
b9da4f1221 Merge pull request #47876 from doesitblend/add-file-read-windows
3f7e7ec327 Add file.read function to Windows module
cbe2eca68 Merge pull request #47882 from frogunder/45013
38d114a2d2 add whoami test

PR #47931: (rallytime) Back-port #47913 to 2018.3 @ 2018-06-04 14:39:16 UTC
  PR #47913: (rares-pop) Fixup! beacons/avahi_announce.py finding grains (refs: #47931)
  4db1f8c603 Merge pull request #47931 from rallytime/bp-47913
  c51e732f4d Fixup! beacons/avahi_announce.py finding grains

PR #47930: (rallytime) Back-port #47725 to 2018.3 @ 2018-06-04 14:38:58 UTC
  PR #47725: (bbceuz) network_settings beacon: Update example to follow new cfg convention (refs: #47930)
  d05a6c70d3 Merge pull request #47930 from rallytime/bp-47725
  5c666409f3 Spelling fix
  cfe0a5bb42 network_settings: Fix doc using new list/dict syntax

PR #47557: (L4rS6) fix broken rabbitmq list policies in rabbitmq version 3.7 @ 2018-06-04 13:25:07 UTC
  484d83014b Merge pull request #47557 from L4rS6/fix-broken-rabbitmq-list-policies
  6d7ef27557 Merge branch '2018.3' into fix-broken-rabbitmq-list-policies
  e043ea2833 refactored list_policies code and added more tests
  eea81fe7b7 fix broken rabbitmq list policies in rabbitmq version 3.7

PR #47949: (terminalmage) Continued troubleshooting on salt-jenkins 1000 @ 2018-06-04 13:17:14 UTC
  866a2fb5fe Merge pull request #47949 from terminalmage/salt-jenkins-1000
  9c369c6a88 Remove temp logging from test
  af02d5ba7b Add result logging to run_script, make returns DRY

PR #47941: (terminalmage) Update test logging for salt-jenkins @ 2018-06-03 02:40:56 UTC
  0b85d1273f Merge pull request #47941 from terminalmage/salt-jenkins-1000
- fb66368af9 Update test logging for salt-jenkins 1000

- **PR #47924**: (Ch3LL) Catch all exceptions in git import for salt.utils.gitfs @ 2018-06-01 21:06:58 UTC
  - 58b5f2b4dd Merge pull request #47924 from Ch3LL/mac_gitpy
  - 75c51ad69b Catch all exceptions in git import for salt.utils.gitfs

- **ISSUE #47269**: (isdig) Reopen Windows Minion That Has IAM Role Cannot Access to S3 (refs: #47879)

- **PR #47879**: (dwoz) Fix ami role usage warts #47269 @ 2018-06-01 14:11:55 UTC
  - b88ec5258d Merge pull request #47879 from dwoz/ami_role_fix
  - 3884c2cf5f Fix ami role usage warts #47269

- **PR #47788**: (twangboy) Use pytz to calculate timezones @ 2018-05-31 18:33:20 UTC
  - b09596982b Merge pull request #47788 from twangboy/fix_47559
  - 0d229c6182 Merge branch '2018.3' into fix_47559
  - 9e612ec9e7 Fix markup in release notes
  - 60499d18f0 Skip test if pytz not present
  - 72cc361c7b Move pytz to 3rd party import, add to __virtual__
  - b8a6488688 Update __virtual__ function
  - 9923176b68 Use __utils__, fix unit tests
  - 73e033f555 Return offset in the same format as Unix
  - 5656183c5e Add timezone.list, add 2018.3.2 release notes
  - 9866ec9b2a Use pytz to calculate timezones

- **PR #47899**: (terminalmage) salt-jenkins issue 1000 @ 2018-05-31 18:24:49 UTC
  - ae73cb3947 Merge pull request #47899 from terminalmage/salt-jenkins-1000
  - 25af9932f7 WIP salt-jenkins issue 1000

- **PR #47753**: (Ch3LL) Add stderr launchctl helper class and fix service mac tests @ 2018-05-31 18:16:57 UTC
  - 8f78e3ae6f Merge pull request #47753 from Ch3LL/service_mac
  - 185c9e9ae2 only stop service if its running
  - e15e674955 Add stderr launchctl helper class and fix service mac tests

- **PR #47908**: (meaksh) Align SUSE salt-master.service 'LimitNOFILES' limit with upstream Salt @ 2018-05-31 18:13:27 UTC
  - 828bf39695 Merge pull request #47908 from meaksh/2018.3-align-suse-salt-master-service
  - efe308013a Align SUSE salt-master.service 'LimitNOFILES' limit with upstream Salt

- **PR #47868**: (rallytime) [2018.3] Merge forward from 2017.7 to 2018.3 @ 2018-05-30 21:20:38 UTC
  - b4bac9b41b Merge pull request #47868 from rallytime/merge-2018.3
  - e5d386e91c Update solaris core grains test
  - 267f09c1a0 Lint: Remove unused import
  - 120ce16b70 Replace old utils paths with new utils paths
  - dc32b67c03 Merge branch '2017.7' into '2018.3'
32.2. Previous releases

- 4b28e510f1 Merge pull request #47853 from dwoz/py3-cloud-test
  - c2f8ae7c5 Fix for py3 ec2 cloud tests
- 215eaf6b73 Merge pull request #47847 from garethgreen-away/reactor_runner_documentation
  - 03676712de Adding some addition documentation to the reactor runner indicating that the reactor system must be active prior to using it.
- 0bf651b470 Merge pull request #47846 from Ch3LL/p_refresh_test
  - 019edad8e4 Fix flaky refresh pillar integration test
- 799f9e979d Merge pull request #47552 from twangboy/fix_46981
  - cffc9b7806 Merge branch '2017.7' into fix_46981
  - 81308a4a44 Add release notes for 2017.7.7
  - 008afac66 Fix unit tests
  - 87097eebf6 Add comments about how get is returning data
  - f1f1bce5c1 Show GPO settings, raise error if trying to set gpo managed settings
- ffc2ebc373 Merge pull request #47691 from lomeroe/solaris_product_grains
  - 6889be6f6c Merge branch '2017.7' into solaris_product_grains
  - 49053bc106 lint fix
  - 6f185c9179 another lint fix
  - dbffba6876 fix tons of errors in my tests
  - 8c9355d34c Lint fix
  - b29ec75da7 Update regexes in core grains for detecting the 'product' grain on Solaris Sparc systems. Additionally, copy the 'product' grain to 'productname' to be consistent with other OSes.
- 96b70cc7b6 Merge pull request #47778 from Ch3LL/win_state_pkg
  - e178de6b0 Merge branch '2017.7' into win_state_pkg
  - f8c467d3e6 Fix text editor error
  - 872e162137 Add test_pkg integration state tests to windows
- 6f934c2259 Merge pull request #47823 from Ch3LL/win_dns_test
  - 7848114d6a Add win_dns module integration tests for windows
- e63e0460d2 Merge pull request #47838 from rallytime/bp-47810
  - bd2b62fa66 better debug message
  - 83565c55df Address PR feedback
  - 50bce3a2f3 make decode_linode_plan_label a private function
  - 2ba4fc4ec8a fix raising when a 'GB' format invalid plan is supplied
  - 3af5d5a2c slight cleanup
  - 319fbd3406 match quotation mark types properly
  - 95e0202223 more consistent use of parens in logged warning
- f52926ca87 log a warning when the user supplied a label we could decode but was not in the proper format
- 121303d827 reduce complexity of get_plan_id by moving decoding of the user-supplied label to its own function
- cf534c7314 Fix Linode plan selection
  - 9ef6e60617 Merge pull request #47805 from twangboy/add_sign.bat
    - 66d8b0331a Add sign.bat script for signing packages
  - 93420950d3 Merge pull request #47500 from dwoz/winuser
    - 0ca5224cbf Merge branch '2017.7' into winuser
    - e5948902af Use salt utils method for this_user
    - a056a293f1 Centralize test username lookup
    - 6a6ab69722 Get the current username on windows
  - 552526f309 Merge pull request #47802 from rallytime/bp-40892
    - bb357da084 add minion function to reload beacon #35960
  - c9ccf53b9 Merge pull request #47816 from Ch3LL/disable_windows
    - 2509d36888 Add windows to service disable ERROR check in tests
  - 2cb6634c6b Merge pull request #47773 from frogunder/45011
    - 7c9b0bd8a33 add win_servermanager.list_available test
  - e65dece202 Merge pull request #47807 from dwoz/winrmtests
    - 1f1cc1357a Increase instance size for cloud tests
    - be8dcd21f1 Try an even bigger timeout

- **PR #47900**: (rallytime) [2018.3] Merge forward from 2018.3.1 to 2018.3 @ 2018-05-30 18:09:41 UTC
  - 21550dbd2d Merge pull request #47900 from rallytime/merge-2018.3.1-to-2018.3
  - 2801eeb26 Merge branch '2018.3.1' into '2018.3'

- **ISSUE #30367**: (paulfanelli) salt-run orchestration via state.sls always successful; it is ignoring state return value (refs: #47843)

- **PR #47843**: (garethgreenaway) [2018.3] orchestration results False when function is False (refs: #47983) @ 2018-05-30 17:21:54 UTC
  - a0bf565741 Merge pull request #47843 from garethgreenaway/30367_orch_return_false_when_function_fails
  - 09242697b8 Merge branch '2018.3' into 30367_orch_return_false_when_function_fails

- **PR #47866**: (rallytime) Back-port #47814 to 2018.3 @ 2018-05-29 19:55:24 UTC
  - **PR #47814**: (travispaul) Bugfixes and unit tests for pkgin module (refs: #47866)
  - da6f7a5538 Merge pull request #47866 from rallytime/bp-47814
  - d50c0ab96b Lint test_pkgin.py
  - 4dac0ba431 pkgin latest_version bugfix
  - 4ae0313797 Bugfixes and unit tests for pkgin module

- **PR #47865**: (rallytime) Back-port #47600 to 2018.3 @ 2018-05-29 19:54:44 UTC
- **PR #47600**: ([travispaul](https://github.com/travispaul)) Prevent crash on NetBSD and OpenBSD when no swap is configured. (refs: #47865)
- d9e7f2b5b1 Merge pull request #47865 from rallytime/bp-47600
- f9f464fa51 Prevent crash on NetBSD and OpenBSD when no swap is configured.

- **PR #47221**: ([azelezni](https://github.com/azelezni)) Fix boto_ec2 unused parameter "network_interfaces" @ 2018-05-29 14:41:35 UTC
  - 61561a8279 Merge pull request #47221 from azelezni/fix-boto_ec2-network_interfaces
  - 03ee0023eb Fix unused network_interfaces parameter
  - 1ece61ddf4 Fix unused network_interfaces parameter
  - 3e074be9c3 Fixing lint
  - 02609b6e61 Adding state files for new test.
  - 377e34c689 Updating function in saltmod to ensure that the result is a failure if the function being run returns as False.

- **PR #47850**: ([rallytime](https://github.com/rallytime)) Fix autodoc for new swarm module @ 2018-05-26 01:53:16 UTC
  - c4d828c986 Merge pull request #47850 from rallytime/swarm-autodoc
  - 467c8fa45c Fix autodoc for new swarm module

- **PR #47800**: ([rallytime](https://github.com/rallytime)) [2018.3] Merge forward from 2017.7 to 2018.3 @ 2018-05-26 01:17:40 UTC
  - 30b31c5db5 Merge pull request #47800 from rallytime/merge-2018.3
  - 9e3ce39e8c Typo: test_type --> text_type
  - 8877489386 Fix bad merge caught by test in zpool state
  - c328450be2 Update old utils paths to new paths
  - 4abfd26e86 Merge branch '2017.7' into '2018.3'
    - 46618d2ce7 Merge pull request #47765 from meaksh/2017.7-fix-zypper-error-reading-repo
      - 4475ba19b8 Prevent zypper from parsing repo configuration from not .repo files
    - 0e87559ee3 Merge pull request #47781 from rallytime/update-linode-sizes
      - a90c1b760e Update cloud test profile and docs to use new Linode size labels
    - 3ddc56cb9b Merge pull request #47748 from rallytime/merge-2017.7
      - b75f5ae38e Merge branch '2017.7.6' into '2017.7'
      - edf94c915e Merge pull request #47775 from gtmanfred/2017.7.6
      - 548f65d056 catch UnsupportedOperation with AssertionError
      - 1759f03025 Merge branch '2017.7.6' into '2017.7'
      - 8c388ecdf5 Merge pull request #47769 from gtmanfred/2017.7.6
      - 3f6c0fa82 skip test that breaks test suite
      - e458f4a031 Merge branch '2017.7.6' into '2017.7'
      - 0d5b473ce2 Merge pull request #47747 from Ch3LL/rn_2017.7.6
      - d4aa83b92d Add changelog to 2017.7.6 release notes
      - 8a5b34f7d9 Merge pull request #47702 from damon-atkins/2017.7.6_fix_pkg.latest_state
      - adcc094e0c Merge branch '2017.7.6' into 2017.7.6_fix_pkg.latest_state
Chapter 32. Release notes

- d610c192d9 Merge pull request #47700 from yannj-fr/2017.7.6
- 961c1ef61e fix roots modification time check
- 2a73e905df Merge branch '2017.7.6' into 2017.7.6
- 266749420f Merge pull request #47632 from gtmanfred/2017.7.6
- 2c50c0d2f5 fix pylint
- 4a29057b16 Fix last test for tornado
- 550ef2e272 allow using tornado 5.0
- 62e46848b handle new _create_stream in tornado 5.0
- 2643e356af Merge pull request #47720 from rallytime/bp-47692-2017.7.6
- 6e5cb36839 Default windows to m1.small for ec2-classic
- 20d9785244 fix roots modification time check
- aef37dd1ce fix roots modification time check
- d51662e053 Ensure targeted_pkgs always contains value for non-windows.
- 83b4224cf8 Adjusted based on feed back.
- 12f983ce9f Whitespace lint issues
- 075d3d3c49 pkg.install execution module on windows ensures the software package is installed when no version is specified, it does not upgrade the software to the latest. This is per the design. pkg.latest must provide the versions to install to pkg.install
* 0ddc864f90 Merge pull request #47779 from dwoz/winrmtests
  - d5eafe9d53 Use common timeout variable
  - 7e948eb540 Increase ec2 cloud timeouts to 1000
* 17c4e8443c Merge pull request #47430 from baniobloom/vpc_association_not_found
  - 0f1d007f91 added catch for VPCAssociationNotFound
* 9c5ddee144 Merge pull request #47525 from baniobloom/duplicate_sec_group_rule
  - d553df489 if we are trying to add the same rule then we are already in the desired state, return true
* 536ec2fa42 Merge pull request #47772 from gtmanfred/2017.7
  - 67756a50fd lock down dependencies for kitchen-salt
* 12b330f049 Merge pull request #47749 from terminalmage/issue47717
  - cd484be6f9 Fix "dnf list upgrades" parsing
* 5cd18b9e70 Merge pull request #47755 from dwoz/winrmtests
  - 57dd89e6c3 Default to ec2 classic compatible images
  - f89668920a Be explicit about winrm setting
* f45a96ba1d Merge pull request #47668 from Ch3LL/win_pkg_test
  - a8981024de Add pkg.latest_version windows test
* 7b12444d0fa Merge pull request #47750 from dwoz/cloudtest
  - 63b722ba21 Allow ssh_interface to default to public_ips
- 27fbb42210 Merge pull request #47737 from dwoz/win_timeout
  - e88833a07d Cloud test fixup
- 1a93f060fb Merge pull request #47729 from UtahDave/fix_get_info_doc
  - 443a2d72a2 fix cli example to match function name
- 00a13761c7 Merge pull request #47682 from terminalmage/issue47182
  - d0243e8f23 Suppress spurious lint failure
  - 3b449f11fc Add regression test for excludes issue
  - 28a7d2b81c Skip __exclude__ in find_sls_ids
- 518f7bccc6 Merge pull request #47708 from darkpixel/47696-do-not-enumerate-none
  - 54e9bf9ec9 Merge branch '2017.7' into 47696-do-not-enumerate-none
- cad062ea7 Merge pull request #47681 from rallytime/merge-2017.7
  - 6c06cb3ae3 Merge branch '2017.7.6' into '2017.7'
- fd2d45d9c2 Merge pull request #47683 from Ch3LL/mac_user_test
  - 5a1b25b9c7 Remove unnecessary setUp in states.test_user test for mac
- f323799c42 Merge pull request #47692 from dwoz/win_instance_type
  - 20b6070d54 Default windows to m1.small for ec2-classic
- 990ece5cd5 Merge pull request #47665 from gtmanfred/cloud
  - fd8a02decb use dictupdate to update the providers dictionary and merge lists
- a2ed8cb7f Merge pull request #47151 from zer0def/configparser-defaultsect
  - a8f2ad977e Merge branch '2017.7' into configparser-defaultsect
  - cca2a806c9 Made interaction with [DEFAULT] section in ConfigParser as sane as upstream permits.
- e6fb8342ef Merge pull request #47673 from terminalmage/bp-45808
  - 454291ad62 Fix errors when attempting to cache files with long names or URLs
- b0446aab07 Merge pull request #47670 from gtmanfred/2017.7
  - dfd5a8715f add a pytest.ini and update a dependency for kitchen
- 0d06da944 Merge pull request #47626 from gtmanfred/2017.7
  - 418364a533 make dev_python27.txt have the same message as dev_python34.txt
  - d53b44d10f remove lock file
  - 493ed7f93d use the toml dict format
  - e0f7cc1447 add proxy tests decorator to pytest conftest
  - 0a621dd0ec add Pipfile for managing dependencies in salt
  - f78b81db94 simplify dev and base.txt to single files
- a07a8906a0 Merge pull request #47578 from Ch3LL/mac_service_disabled
  - 6032a01f55 change disable check for upstart service on ubuntu14
  - 33b4cfbc5b Change service assertion check for systemd platforms
- 14896f9743 change codeauthor and class name
- 502c5bdff5 Ensure mac_service.disabled is correctly querying services

95d4488f01 Merge branch '2017.7.6' into 47696-do-not-enumerate-none
16c2153385 Merge pull request #47667 from Ch3LL/mac_user_enable
ba40d3d1a1 Update test_mac_user_enable_auto_login to test both py2 and py3
a4921e86c9 Merge pull request #47645 from Ch3LL/py3_rm_pip
225d90ad4c query the pip path for test test_issue_2087_missing_pip
e4417733ac1 Merge pull request #47646 from rallytime/bp-47601-and-47643
9e1d1a5ef8 Fix typo
4e94609136 Remove unwanted file
0109249c78 use ignore-undefined-variable
37caeb7f4 Ignore pylint WindowsError
c1135d90c7 Better doc string
e53d69ed9 Skip tests when we can not use runas
041e4c6dbb Wrap properties loop with a check for None. Closes GH-47696

- **PR #47581**: (twangboy) Add get_encoding salt util @ 2018-05-25 20:40:07 UTC
  - da9eaa1825 Merge pull request #47581 from twangboy/fix_47274
  - ff660f25e Merge branch '2018.3' into fix_47274
  - 6e0f847b Add suggested changes
  - e27e9fd1e7 Fix tests on Py3
  - f398cb2da Use os.linesep.join instead of textwrap.dedent
  - 771392e299 Fix unit tests, add newline="" to io.open
  - c0f735dde3 Remove comment
  - 6d77bb4b9 Add comment
  - 9f369d3f22 Remove to_encoding, create get_encoding
  - 68be0f9ed2 Add is_encoding salt util

- **ISSUE #47694**: (thuhak) utils/boto and utils/boto3 load error (refs: #47726)

- **PR #47772**: (gtmanfred) rename boto to botomod @ 2018-05-25 20:37:37 UTC
  - b860d95b2c Merge pull request #47772 from gtmanfred/2018.3
  - 43997a466e fix tests
  - 59180e09a8 switch all salt.utils.boto* calls to __utils__ calls
  - 7e30f459e9 rename boto to botomod

- **ISSUE #47701**: (babs) elasticsearch.index_template_present state with check_definition: True fails. (refs: #47703)

- **PR #47803**: (rallytime) Back-port #47703 to 2018.3 @ 2018-05-23 20:12:30 UTC
- **PR #47703:** (babs) Fix elasticsearch.index_template_present with check_definition (refs: #47803)
- 2a270162d0 Merge pull request #47803 from rallytime/bp-47703
- 8f6c0c562d Fix elasticsearch with check_definition

- **PR #47804:** (rallytime) Back-port #47761 to 2018.3 @ 2018-05-23 20:11:55 UTC
  - **PR #47761:** (zerthimon) Fix userdata in openstack instances (refs: #47804)
  - 780043e6fd Merge pull request #47804 from rallytime/bp-47761
  - b7bc306333 Fix userdata in openstack instances

- **PR #47776:** (garethgreenaway) [2018.3] Fixes to failing _before_connect tests @ 2018-05-23 15:10:35 UTC
  - 1efe891c42 Merge pull request #47776 from garethgreenaway/970_two_minion_unit_tests_failing
  - a0011b49ab Merge branch '2018.3' into 970_two_minion_unit_tests_failing
  - ef2f72169 Fixing unit.test_minion.MinionTestCase.test_beacons_before_connect and unit.test_minion.MinionTestCase.test_scheduler_before_connect.

- **PR #47783:** (rallytime) [2018.3] Merge forward from 2018.3.1 to 2018.3 @ 2018-05-23 14:51:56 UTC
  - 4acc6a7883 Merge pull request #47783 from rallytime/merge-2018.3
  - 1adb8ea7f Merge branch '2018.3.1' into '2018.3'

- **PR #47149:** (meaksh) [2018.3] Strip trailing commas on Linux user's GECOS fields @ 2018-05-22 21:18:49 UTC
  - 8f8a85d28 Merge pull request #47149 from meaksh/2018.3-remove-trailing-commas-on-linux-user-gecos-fields
  - 60ec3230db Merge branch '2018.3' into 2018.3-remove-trailing-commas-on-linux-user-gecos-fields

- **ISSUE #46938:** (racooper) Beacons documentation update for 2018.3 (refs: #47740)

- **PR #47740:** (garethgreenaway) [2018.3] Updating Beacon topic to include list based configuration for Beacons @ 2018-05-21 13:58:01 UTC
  - 19f4137b63 Merge pull request #47740 from garethgreenaway/46938_beacons_documentation
  - 5d23ef4dd8 Updating Beacon topic to include list based configuration for Beacons

- **PR #47710:** (terminalmage) salt.loader: add error logging when whitelist lookup fails @ 2018-05-18 16:56:18 UTC
  - 22807ac756 Merge pull request #47710 from terminalmage/fix-loader-whitelist
  - 6192391b7b Add additional missing modules to whitelist
  - 7192e38f66 Change key -> function to make log message more clear
  - 91f9d38fd Fix loader whitelists in unit tests
  - d4f2662e5b Add error logging when whitelist lookup fails

- **PR #47680:** (rallytime) [2018.3] Merge forward from 2018.3.1 to 2018.3 @ 2018-05-17 21:30:27 UTC
  - b91c0f5647 Merge pull request #47680 from rallytime/merge-2018.3
  - 9b1773a763 Merge branch '2018.3.1' into '2018.3'

- **PR #47545:** (dmurphy18) Fix non-root build and signing for rpm packages @ 2018-05-17 21:20:10 UTC
  - dbf12f9be2 Merge pull request #47545 from dmurphy18/fix_nonroot_build
  - 220f887fa6 Fixed review comment, changed file.chown to file.makedirs_perms
- b15a1652b5 Changed version added from 2018.3.1 to 2018.3.2, to reflect when change should be accepted
- 90eb03e375 Additional error checking and minor cleanup
- 40d77e03d2 Correct building rpms with non-root user

**ISSUE #47546: (ender8282) archive.extracted fails when archive includes files with non-ascii names with 2018.3.0 (refs: #48015, #47572)

**PR #47572: (garethgreenaway) [2018.3] archive module, filenames with Unicode characters @ 2018-05-17 20:41:11 UTC
- 69056e5b67 Merge pull request #47572 from garethgreenaway/47546_archive_non_ascii_filenames
- 5e97b8b44a Updating with requested changes.
- cc1aa75a2f only convert to bytes when using Python 2
- 0fe32f4066 Updating integration/modules/test_archive to include filenames with unicode characters.
- 5a9cadd125 Accounting for when files in an archive contain non-ascii characters

**PR #47661: (rallytime) [2018.3] Merge forward from 2017.7 to 2018.3 @ 2018-05-16 15:53:36 UTC

  - PR #47224: (sjorge) Zpool zol fixes (refs: #47563)
  - e3ee7053fb Merge pull request #47563 from rallytime/bp-47224
  - 1d191445a7 FIX #38671 - zpool.get should support older zfs version
  - 23705b12cb zpool.scub docs should mention pause is not always available
  - d73885aa5c Make sure the docs mention that createboot is only available on illumos
- PR #47569: (Ch3LL) Update salt.utils.path mock in virtual core test @ 2018-05-10 15:18:31 UTC
  - 8e26624db3 Merge pull request #47569 from Ch3LL/core_virt
- PR #47576: (rallytime) [2018.3] Small Documentation Fixes @ 2018-05-10 14:08:11 UTC
  - fc93715eea Merge pull request #47576 from rallytime/doc-updates
  - ca927fc14b Add extra lines that are needed for proper code-block formatting
  - b330d763a4 Remove infoblox state autodoc file

32.2.63 Salt 2018.3.4 Release Notes

Version 2018.3.4 is a bugfix release for 2018.3.0.

State Changes

- The host.present state can now remove the specified hostname from IPs not specified in the state. This can be done by setting the newly-added clean argument to True.

Statistics

Changelog for v2018.3.3..v2018.3.4

Generated at: 2019-02-06 20:56:17 UTC

- **PR #51525**: (twangboy) Backport 51095 to 2018.3.4 @ 2019-02-06 20:20:37 UTC
  - a37fb7d Merge pull request #51525 from twangboy/backport_51095_2018.3.4
  - b6ace92 Backport 51095

- **PR #51520**: (frogunder) Update man pages for 2018.3.4 @ 2019-02-06 18:42:13 UTC
  - 602ddc8 Merge pull request #51520 from frogunder/man_pages
  - 0cbe3f8 Update man pages for 2018.3.4

- **ISSUE #51428**: (yosnoop) salt.utils.dns.lookup fails with dig method on EL7 (refs: #51429)

- **PR #51429**: (yosnoop) The +nocl is supported much wider than +noclass @ 2019-02-06 17:48:48 UTC
  - 1f981c6 Merge pull request #51429 from yosnoop/replace-noclass-with-nocl-for-dig
  - 5231e73 Merge branch '2018.3.4' into replace-noclass-with-nocl-for-dig
  - 14e6fb7 In case the test machine can't resolve
  - 95e8a2f The +nocl is supported much wider than +noclass
  - a0d708 Test dig options for salt.utils.dns.lookup

- **ISSUE #49226**: (defanator) salt-cloud grains inheritance from provider to profile (2018 vs 2016) (refs: #51366)

- **PR #51441**: (Ch3LL) Backport #51366 into 2018.3.4 @ 2019-02-06 17:42:19 UTC
  - PR #51366: (dwoz) Cloud provider and profile configs are merged [2018.3] (refs: #51441)
  - 209ef32 Merge pull request #51441 from Ch3LL/bp-51366
  - 5bc466e Fix python 3 path for shell test cases
  - 5351e5c Add testing path to run_script commands
  - 2d8a364 Fix linter issues
  - 9b8718a Cloud provider and profile configs are merged

- **PR #51458**: (twangboy) Add Py2 Warning for Py2 Installer @ 2019-02-06 17:33:02 UTC
  - 90a8682 Merge pull request #51458 from twangboy/add_py2_warning
  - 05522c0 Merge branch '2018.3.4' into add_py2_warning

- **PR #51460**: (twangboy) Update installer mac 2018.3.4 @ 2019-02-06 17:31:18 UTC
  - b492021 Merge pull request #51460 from twangboy/update_installer_mac_2018.3.4
  - 3c92688 Merge branch '2018.3.4' into update_installer_mac_2018.3.4

- **PR #51471**: (twangboy) Fix the failing dns test on Windows @ 2019-02-03 22:03:34 UTC
  - 892d98c Merge pull request #51471 from twangboy/fixed_test_win_dns_client
  - c9f6b01 Merge branch '2018.3.4' into fixed_test_win_dns_client

- **PR #51462**: (ShantonRU) Fix insecure SQL queries in MySQL module @ 2019-02-01 21:19:20 UTC
  - a05305d Merge pull request #51462 from ShantonRU/fixed-insecure-sql-queries-in-mysql-module-1
  - d3ef2cb Merge branch '2018.3.4' into fixed-insecure-sql-queries-in-mysql-module-1
  - f47dda6 Fix improper use of socket authentication in mysql.user_chpass
- ed62a2f Fix insecure SQL queries in mysql.user_chpass
  * 33922c9 Fix the failing dns test on Windows
- **PR #51445**: (terminalmage) Remove custom grains module from 2018.3 branch @ 2019-02-01 16:48:13 UTC
  - 48936c2 Merge pull request #51445 from terminalmage/fixed-custom-grains-traceback
  - 191235d Remove custom grains module from 2018.3 branch
  - 72fd1a2 Roll back icon change
  - 7dd1704 Add welcome_py2.rtf
  - e93e9e3 Add Py2 Warning to installer package
  - b658900 Add Py2 Warning for Py2 Installer
- **PR #51438**: (twangboy) Add missing raise statement @ 2019-01-30 20:04:05 UTC
  - 5830fad Merge pull request #51438 from twangboy/fix_raise_2018.3.4
- **PR #51432**: (Ch3LL) Backport #51324 into 2018.3.4 @ 2019-01-30 17:51:50 UTC
  - PR #51324: (garethgreenaway) [2018.3] Fixes to x509 module and test (refs: #51432)
  - 28b898c Merge pull request #51432 from Ch3LL/bp-51324
  - bd41ff0 Fixing various bits in x509 module and unit test to ensure tests are passing on python2 & python3
- **PR #51377**: (twangboy) Fix issue when directory doesn’t exist in LGPO module (2018.3.4) @ 2019-01-29 17:33:25 UTC
  - 01717d2 Merge pull request #51377 from twangboy/fix_auditpol_2018.3.4
  - 19e5181 Fix issue when directory doesn’t exist
- **PR #51338**: (Ch3LL) Backport #51324 into 2018.3.4 @ 2019-01-27 23:44:24 UTC
  - PR #51207: (twangboy) Backport 50771 to 2018.3 (refs: #51338)
  - PR #50771: (terminalmage) Fix failing opensuse tests (refs: #51337)
  - 43a9d2f Merge pull request #51338 from Ch3LL/bp-51207
  - 345ae67 Backport PR# 50771 to 2018.3 branch
- **ISSUE #51158**: (AndreiPashkin) saltmod.state doesn’t respect "roster" argument (refs: #51170)
- **PR #51337**: (Ch3LL) Backport #51170 into 2018.3.4 @ 2019-01-27 23:44:24 UTC
  - PR #51170: (dwoz) Honor roster system for ssh orchestrations (refs: #51337)
  - 3dcd11d Merge pull request #51337 from Ch3LL/bp-51170
  - 7656aa5 Merge branch '2018.3.4' into bp-51170
- **ISSUE #50221**: (tkaehn) file.managed: contents_pillar and pillar.file_tree with keep_newline is broken in 2018.3.3 (refs: #51252)
- **PR #51340**: (Ch3LL) Backport #51252 into 2018.3.4 @ 2019-01-27 23:42:49 UTC
  - PR #51252: (dwoz) Preserve newlines from pillar data for file.managed [2018.3] (refs: #51340)
  - 7656aa5 Merge pull request #51340 from Ch3LL/bp-51252
  - 6f2c7cf Remove un-needed log statement
- 824950c Fix 50221 regression test on Windows
- 1840af9 preserve newlines from pillar data for file.managed

- **PR #51290**: (s0undt3ch) [2018.3.4] Fix minion start @ 2019-01-25 15:14:47 UTC
  - e90ca1d Merge pull request #51290 from s0undt3ch/hotfix/fix-network
  - da3aace Merge branch '2018.3.4' into hotfix/fix-network
  - 04f16b8 Fix tests. We no longer get ipaddress instances back.
  - c3fa82a Fix minion start issue
    - c893dc4 Fix saltmod roster test
    - b61854f Roster defines the roster system not a file
    - 484bab4 Fix linter
    - 5e2db2f Honor roster file for ssh orchestrations

- **PR #51317**: (terminalmage) Fix regression in dynamic pillarenv @ 2019-01-25 09:29:44 UTC
  - c8db7e3 Merge pull request #51317 from terminalmage/fix-pr-50417
  - 4be2891 Merge branch '2018.3.4' into fix-pr-50417

- **PR #51311**: (twangboy) Fix failing test *unit.states.test_file.TestFileState.test_managed* on Windows @ 2019-01-24 21:09:35 UTC
  - e246f6b Merge pull request #51311 from twangboy/fix_test_file.test_managed
  - f4177e0 Remove mode parameter on Windows
  - 4c4ded3 Fix regression in dynamic pillarenv

- **ISSUE #51195**: (littleski) fstab improperly escaped when spaces are used in options (refs: #51226)
- **ISSUE #27160**: (martinadolfi) salt.states.mount persistence error using spaces in route (refs: #39593)

- **PR #51292**: (Ch3LL) Backport #51226 into 2018.3.4 @ 2019-01-24 11:11:34 UTC
  - PR #51226: (garethgreenaway) [2018.3] Handle spaces in fstab opts, similar fix to #39593 (refs: #51292)
  - PR #39593: (zwo-bot) Fix issue #27160 - escape whitespaces in fstab entry in module mount when persist=True (refs: #51226)
  - 40b20126 Merge pull request #51292 from Ch3LL/bp-51226
    - aba114e Merge branch '2018.3.4' into bp-51226

- **PR #51295**: (Ch3LL) Backport #51279 into 2018.3.4 @ 2019-01-24 11:10:19 UTC
  - PR #51279: (twangboy) Backport __context__ support from develop (refs: #51295)
  - fc0bec5 Merge pull request #51295 from Ch3LL/bp-51279
  - 5c4a7a4 Merge branch '2018.3.4' into bp-51279

- **PR #51293**: (Ch3LL) Backport #51233 into 2018.3.4 @ 2019-01-24 09:17:49 UTC
  - PR #51233: (Ch3LL) Backport #51105 to 2018.3 (refs: #51293)
  - PR #51105: (garethgreenaway) [develop] Report permission changes in test mode (refs: #51233)
  - dacd1ea Merge pull request #51293 from Ch3LL/bp-51233-2
  - a155fd7 Accounting for when permissions are not returned from file.check_perms, eg. windows systems.
  - 53ba068 When test=True and there are permissions changes, report it.
Salt Documentation, Release 3006.4

- d2eba77 Remove network.py patch
- d431c71 Add __context__ support
  * de6c13d Handle spaces in fstab opts, similar fix to #39593

- **ISSUE #51248**: (johnnybubonic) "[WARNING ] The file_roots parameter is not properly formatted, using defaults" (refs: #51278)

- **PR #51278**: (dwoz) Warn about proper validation option @ 2019-01-22 22:13:13 UTC
  - 1abffb2 Merge pull request #51278 from dwoz/issue51248
  - c614198 Use pillar roots validation method
  - 0d2b0c6 Fix linter warnings
  - 5b98895 Fix wart in pillar_roots validation

- **PR #51230**: (Ch3LL) [2018.3] Merge forward from 2017.7 to 2018.3 @ 2019-01-18 19:50:10 UTC
  - e53e9b1 Merge pull request #51230 from Ch3LL/merge-2018.3
  - 0ef7675 Merge branch '2017.7' into '2018.3'
  - 4a12c5f Merge pull request #50852 from mirceaulinic/fix-capirca
    * fa91267 Merge branch '2017.7' into fix-capirca
    * 71913ff Merge branch '2017.7' into fix-capirca
    * 6fc3484 Lint?
    * 3d56750 Extra newline for lint
    * 5176cd8 Improve the Capirca and related modules for ACL config generation
  - 3f4759b Merge pull request #50923 from astronouth7303/patch-2
    * 4f631a6 Document {% include %}
  - 210e817 Merge pull request #51111 from s0undt3ch/2017.7
    * 08e0ae7 Update to salt-bootstrap v2019.01.08

- **ISSUE #51211**: (sathieu) file_roots envs with slash leads to "No such file or directory: '/var/cache/salt/master/file_lists/roots/.foo/bar.w' (refs: #51212)

- **ISSUE #48132**: (BenjaminSchiborr) Dynamic File Roots (refs: #51212)

- **PR #51212**: (sathieu) Allow slashes in file_roots envs. @ 2019-01-17 17:29:18 UTC
  - 26008ef Merge pull request #51212 from sathieu/file_roots_slash
  - b769f18 Allow slash in file_roots envs
  - f9437e2 Test for file_roots envs with slash leads to "No such file or directory"

- **PR #51209**: (garethgreenaway) [2018.3] Back-port PR #51124 to 2018.3 @ 2019-01-17 13:28:32 UTC
  - **PR #51124**: (Ch3LL) Handle encoding when opening file for both py2/py3 (refs: #51209)
  - 5916282 Merge pull request #51209 from garethgreenaway/bp-51124
  - 82acec4 Handle encoding when opening file for both py2/py3

- **PR #51184**: (twangboy) Fix win_lgpo_audithpol salt util on Windows @ 2019-01-16 18:08:01 UTC
  - 094bd33 Merge pull request #51184 from twangboy/fix_audithpol
  - 2e68d35 directly call cmd.run_all
• **PR #51191**: (Ch3LL) Backport #50918 into 2018.3 @ 2019-01-16 18:02:19 UTC
  - **PR #50918**: (twangboy) Fix `test_debian_ip` on Windows (refs: #51191)
  - ac71922 Merge pull request #51191 from Ch3LL/bp-50918
  - 7300d84 Skip debian tests on Windows
  - 4622433 Fix `test_debian_ip` on Windows

• **ISSUE #49883**: (kiemlicz) salt-cloud azurearm is not working (refs: #51144)

• **PR #51144**: (jgleissner) 2018.3 azurearm py3 @ 2019-01-15 16:46:35 UTC
  - e7f53a3 Merge pull request #51144 from jgleissner/2018.3-azurearm-py3
  - 3178f1a msazure.py: remove unused imports
  - 99a4b9d azurearm: fix list_locations
  - aeb34b azurearm: fix show_instance function
  - d80669f msazure: fix object_to_dict for python 3

• **PR #51171**: (twangboy) Add random sleep time to avoid overloading Windows @ 2019-01-15 16:45:33 UTC
  - 1206f92 Merge pull request #51171 from twangboy/fix_crypt
  - 6ca993b Add random sleep time to avoid overloading Windows

• **PR #51174**: (jpsv) Update OpsGenie to use their V2 API (2018.3) @ 2019-01-15 16:44:54 UTC
  - a96deed Merge pull request #51174 from jpsv/2018.3
  - 055823e Update opsgenie.py
  - 501c8df Merge branch '2018.3' into 2018.3
  - 220aa8a Update opsgenie.py
  - 5dc21cc Update to from V1 API to V2
  - f93ce7c Update to V2 API

• **ISSUE #42280**: (michaelgibson) make ldap eauth 2 factor compatible (refs: #42426, #45347)

• **PR #51010**: (amendlik) Allow unauthenticated bind for listing LDAP groups @ 2019-01-15 16:43:42 UTC
  - **PR #45811**: (gtmanfred) Fix ldap eauth (refs: #51010)
  - **PR #45347**: (amendlik) LDAP group membership (refs: #51010)
  - **PR #42426**: (michaelgibson) adding 2-factor auth capability to ldap eauth module - #42280 (refs: #45347)
  - 563d487 Merge pull request #51010 from amendlik/ldap-groups
  - cd336ed Merge branch '2018.3' into ldap-groups
  - 94f8ee4 Update unit tests for auth.ldap
  - 08e36d0 Allow unauthenticated bind for listing LDAP groups

• **PR #51112**: (s0undt3ch) [2018.3] Update to salt-bootstrap v2019.01.08 @ 2019-01-15 16:42:09 UTC
  - 6dc3752 Merge pull request #51112 from s0undt3ch/2018.3
  - 4f41d864 Update to salt-bootstrap v2019.01.08

• **PR #51097**: (terminalmage) Fix improper exception raises (2018.3) @ 2019-01-15 16:38:25 UTC
  - b19e990 Merge pull request #51097 from terminalmage/fix-keyerror-raise
- a3c0b49 Fix poorly-written test
- c0ff7b1 Fix more incorrect exception raises
- f11dbc0 Fix improper KeyError raise

**PR #51169:** (twangboy) More descriptive error when missing GitPython or PyGit2 @ *2019-01-15 16:37:44 UTC*
- 8920a86 Merge pull request #51169 from twangboy/fix_git_state
- f2d1180 More descriptive error when missing GitPython or PyGit2

**ISSUE #51160:** (amendlik) Minion crashes with long hostname under Python 3 (refs: #51173, #51161)

**PR #51173:** (dwoz) Avoid exceptions by passing bytes to idna @ *2019-01-15 16:32:31 UTC*
- PR #51161: (amendlik) Ignore exceptions when generating the minion ID (refs: #51173)
- 58eed6 Merge pull request #51173 from dwoz/issue51160
- 11cc7b3 Remove un-needed test
- 0f87812 Merge develop, Revert exception handling
- 7365a1a Pass bytes to idna

**PR #51147:** (Ch3LL) [2018.3] Merge forward from 2017.7 to 2018.3 @ *2019-01-15 02:05:51 UTC*
- 06854cf Merge pull request #51147 from Ch3LL/merge-2018.3
- d39d8b7 Merge branch '2018.3' into merge-2018.3

**ISSUE #51160:** (amendlik) Minion crashes with long hostname under Python 3 (refs: #51173, #51161)

**PR #51161:** (amendlik) Ignore exceptions when generating the minion ID (refs: #51173) @ *2019-01-14 22:47:54 UTC*
- b79c09e Merge pull request #51161 from amendlik/long-hostname
- 6fc4ad Merge branch '2018.3' into long-hostname

**ISSUE #51067:** (rkrieger) KeyError u'manufacturer' causes salt-minion crash on start with OpenBSD arm64 system (refs: #51159)

**ISSUE #3:** (thatch45) libvirt module (refs: #51159)

**PR #51159:** (rkrieger) Prevent crash by testing for 'manufacturer' in osdata on OpenBSD @ *2019-01-14 18:08:22 UTC*
- 1424734 Merge pull request #51159 from rkrieger/fix-issue-51067
- 1440ccf Prevent crash by testing for 'manufacturer' in osdata on OpenBSD
- 1a4e307 Ignore exceptions when generating the minion ID

**PR #51146:** (terminalmage) Fix invalid assignment in vsphere module @ *2019-01-12 21:44:33 UTC*
- 5e37326 Merge pull request #51146 from terminalmage/fix-vsphere-tuple-issue
- 5d60022 Fix invalid assignment in vsphere module

**PR #51154:** (twangboy) Add support for Advanced Audit policies @ *2019-01-12 21:43:27 UTC*
- fad8621 Merge pull request #51154 from twangboy/auditpol
- 9064376 Add support for Advanced Audit policies

**PR #51151:** (Ch3LL) Backport #51061 to 2018.3 @ *2019-01-12 03:18:44 UTC*
- PR #51061: (garethgreenaway) [fluorine] fix to salt.utils.vt.Terminal (refs: #51151)
- f7a100c Merge pull request #51151 from Ch3LL/bp_51061
- ffdae27 When writing output to stdout we want to ensure that the data is a string not bytes. Under py2 the salt.utils.data.encode function results in a string but under py3 the result is a bytestring. Swapping out salt.utils.data.encode for salt.utils.stringutils.to_str.

- PR #51150: (Ch3LL) Back-port #49508 to 2018.3 @ 2019-01-12 03:18:19 UTC
  - PR #49508: (bergmanni) Fix X509 remote signing on python3 (refs: #51150)
  - 3a50a57 Merge pull request #51150 from Ch3LL/bp-49508
  - 7ae533ad Do not silently ignore errors.
  - deb0134 Convert to string before sending via 'publish'.
  - 651c551 Use to_str salt.utils when writing to a file.

- ISSUE #50433: (zerthimon) Wildcard grant fails in mysql_grants.present in mysql 8.x (refs: #51152)

- PR #51152: (garethgreenaway) [2018.3] Fixes to mysql module to handle ALL PRIVILEGES grant @ 2019-01-12 03:17:15 UTC
  - 8b8b58d Merge pull request #51152 from garethgreenaway/50433_handle_grants_better
  - f7caa4d Fixing lint
  - e8c8c0f Adding some tests to ensure "ALL PRIVILEGES" is handled correctly in 8.0 and 5.6
  - b4bf00f Add additional grants. Adding logic to handle when ALL or ALL PRIVILEGES is passed for the grant, including some logic to handle the fact that the grants are split when show grants is run for a particular user.

  - 74edfd9 Fix pylint
  - 81a3d47 Merge branch '2017.7' into '2018.3'
  - 8a76a19 Merge pull request #50858 from garethgreenaway/50433_handle_grants_better

      - 3395a3d Merge branch '2017.7' into bugfix-2017.7/ubuntu-networking-searchdomain

      - 69d25aa update debian_ip test

      - a6b896c get searchdomain in Ubuntu 12+

- ISSUE #50849: (SuperShoot) MySQL version needs to be decoded (refs: #51133)

- PR #51133: (SuperShoot) Fixes mysql server version comparison. @ 2019-01-10 16:45:38 UTC
  - dda1eb8 Merge pull request #51133 from SuperShoot/issue-#50849
  - ec14e13 Fixes mysql server version comparison.

- PR #50878: (max-arnold) Fix profile outputter docs @ 2019-01-08 18:32:40 UTC
  - 9d4321d Merge pull request #50878 from max-arnold/output-docs
  - d7403da Fix profile outputter docs

- PR #51076: (OrangeDog) Typos in index_template_present documentation @ 2019-01-08 18:25:20 UTC
  - ce87504 Merge pull request #51076 from OrangeDog/patch-1
  - 568e46b Revert add --> check
  - 4d7ebe7 Typos in index_template_present documentation

- PR #51081: (garethgreenaway) [2018.3] Merge forward from 2017.7 to 2018.3 @ 2019-01-07 20:34:16 UTC
- d08abf4 Merge pull request #51081 from garethgreenaway/merge-2018.3
- 027804a Merge branch '2018.3' into merge-2018.3

**ISSUE #50966:** (klafkoff) 2018.3.3 missing a patch to salt/modules/nxos.py (refs: #51080)

**PR #51080:** (garethgreenaway) [2018.3] Fix to nxos module @ 2019-01-07 18:07:25 UTC
- 335088b Merge pull request #51080 from garethgreenaway/50966_nxosEnsureKwargsList
- 230a66b Merge branch '2018.3' into 50966_nxosEnsureKwargsList
- 629dc25 Ensure kwargs is a list before we attempt to loop through. Similar fix to https://github.com/rallytime/salt/commit/430c462f34eb4eedf238e06fbee8dc19b8026f6 in the proxy module.
  - a20791b Merge branch '2018.3' into merge-2018.3

**PR #51079:** (terminalmage) Fix shadow.set_date/shadow.set_expire on F28 @ 2019-01-07 16:28:36 UTC
- c47b646 Merge pull request #51079 from terminalmage/salt-jenkins-1238
- ccd5c15 Fix shadow.set_date/shadow.set_expire on F28

**ISSUE #47043:** (xBytez) lsattr slowing down archive.extracted (refs: #51044)

**PR #51044:** (terminalmage) archive.extracted: Don’t run lsattr when enforcing user/group ownership @ 2019-01-03 19:26:03 UTC
- aeeb047 Merge pull request #51044 from terminalmage/issue47043
- 787b79a archive.extracted: Don’t run lsattr when enforcing user/group ownership

**ISSUE #50964:** (gtmanfred) Add a long description to setup.py for the new pypi.org (refs: #51031)

**PR #51034:** (garethgreenaway) Back-port PR #51031 to 2018.3 @ 2019-01-03 15:42:22 UTC
- PR #51031: (waynew) Set long_description (refs: #51034)
- 04fdae5 Merge pull request #51034 from garethgreenaway/bp-51031
- cd310c2 Set long_description

**ISSUE #50634:** (marek-obuchowicz) Debian pkg.managed gpg/tty issue (refs: #50972)

**PR #50972:** (pirogoeth) Use gpg's --batch in apt-key adv during repo key add @ 2019-01-03 02:34:13 UTC
- 4685e0e Merge pull request #50972 from pirogoeth/sjohn/2018.3-apt-key-batch
- cd3d755 Merge branch '2018.3' into sjohn/2018.3-apt-key-batch

**PR #51028:** (whytwewolf) AIX lsattr fix for file module. @ 2019-01-03 01:52:33 UTC
- 44bc862 Merge pull request #51028 from whytwewolf/aix_lsatr_fix
- 1b7336c Set lsattr functions to return None if salt.utils.platform.is_aix returns true.
- 7410008 Merge branch '2018.3' into sjohn/2018.3-apt-key-batch

**PR #51018:** (garethgreenaway) [fluorine] Merge forward from 2017.7 to 2018.3 @ 2019-01-01 23:11:02 UTC
- b4774a8 Merge pull request #51018 from garethgreenaway/merge-2018.3
  - 773bf31 Use gpg's --batch in apt-key adv during repo key add
    - 9386aab Merge branch '2017.7' into merge-2018.3
    - 998fe4a Merge pull request #51030 from terminalmage/issue38502
    - 6db881f Add unit test to ensure we don't diff bare repos
- 12f7583 Merge branch '2017.7' into merge-2018.3
− 4529150 Merge pull request #50977 from rallytime/config-docs
  * 43c39e7 Add documentation to master config docs for job_cache_store_endtime
  * 887cd07 Add some salt-api options to the master config docs
  * 0d49746 Fix some formatting in master config docs
− 409594b Merge pull request #50991 from twangboy/requests_2017.7

    − 0d4b799 Upgrade requests to 2.20.1
  • PR #51004: (twangboy) Add tests for the win_wusa state and module @ 2018-12-31 20:03:30 UTC
    − ceced10 Merge pull request #51004 from twangboy/win_wusa
    − 0e92528 Merge branch '2018.3' into win_wusa
    − c0d2495 Fix lint, add test docs
    − 1750270 Add state tests for win_wusa
    − 6285b64 Update win_wusa and add tests
  • PR #51014: (madrisan) ssh module: missing space in error message @ 2018-12-31 19:59:19 UTC
    − 3e0515b Merge pull request #51014 from madrisan/patch-1
    − ab980fb ssh module: missing space in error message
  • PR #50883: (terminalmage) Backport #49622 to 2018.3 branch @ 2018-12-31 19:58:11 UTC
    − PR #49622: (angeloudy) fix command line options (refs: #50883)
    − 582d6b4 Merge pull request #50883 from terminalmage/bp-49622
    − c93dfba Update archive.py
    − 925a9c9 Update archive.py
    − ed2bed3 fix command line options
  • PR #50945: (garethgreenaway) [2018.3] Merge forward from 2017.7 to 2018.8 @ 2018-12-30 00:05:47 UTC
    − fd9711b Merge pull request #50945 from garethgreenaway/merge-2017.7
    − 43b3fa4 Merge branch '2018.3' into merge-2017.7
  • ISSUE #50854: (Ch3LL) [fluorine] windows stops when cannot connect to master (refs: #50855)
- **PR #51006**: (dwoz) Let minions try to connect to master indefinitely @ 2018-12-28 21:10:39 UTC
  - PR #50855: (dwoz) Let minions try to connect to master indefinitely (refs: #51006)
  - b8615e1 Merge pull request #51006 from dwoz/backport_50855
  - 5563631 Let minions try to connect to master indefinitely
- **ISSUE #50989**: (mpx8701) SLS error (An exception occurred in this state: Traceback) (refs: #51005)
- **PR #51005**: (garethgreenaway) [2018.3] Fixes to junos state module @ 2018-12-28 20:51:31 UTC
  - cfed697 Merge pull request #51005 from garethgreenaway/50989_fixing_junos_state_arguments
  - d4ac180 Fixing the arguments accepted by cli function in the junos state module which are passed along to the cli function in junos module, so they align.
  - 3cfca8e Merge branch '2018.3' into merge-2017.7
- **PR #50982**: (twangboy) Fix issue with LGPO when returning empty dict (2018.3) @ 2018-12-26 19:58:12 UTC
  - daa591b Merge pull request #50982 from twangboy/fix_lgpo_2018.3
  - d942934 Get rid of requests import (CaseInsensitiveDict)
    - 6170fa5 Merge branch '2018.3' into merge-2017.7
- **ISSUE #46886**: (bbh-kmd) Unable to get salt-minion to call salt-call with alternate configuration (refs: #50959)
- **PR #50984**: (garethgreenaway) Back-port PR #50959 to 2018.3 @ 2018-12-26 19:29:54 UTC
  - PR #50959: (bbh-kmd) #46886: Use correct path to config_dir when running salt from alternate placement. (refs: #50984)
  - 110bc66 Merge pull request #50984 from garethgreenaway/bp-50959
  - 20fa5e9 Update sudo.py
- **PR #50958**: (bdrung) Fix twilio version checking @ 2018-12-25 10:46:15 UTC
  - 8fc89a0 Merge pull request #50958 from bdrung/fixed-twilio
  - df8d7b9 Fix twilio version checking
    - d89c9b5 Merge branch '2018.3' into merge-2017.7
- **ISSUE #50947**: (cachedout) Log full of IPv6 warnings (refs: #50962)
- **PR #50962**: (terminalmage) Remove redundant overrides for ip_address/ip_interface @ 2018-12-21 22:04:34 UTC
  - bb87822 Merge pull request #50962 from terminalmage/ipv6-warnings
  - 773b983 Merge branch '2018.3' into ipv6-warnings
  - f3b1254 Remove redundant overrides for ip_address/ip_interface
    - cce01e7 Updating valigdate_tgt to ensure tests pass.
    - 676a12a Fix compound matching in eauth
* 07fca64 Merge pull request #50909 from damon-atkins/jenkins_pylint
  - da1fc32 change params.CHANGE_BRANCH to env.CHANGE_BRANCH
* e7f0ab6 Merge pull request #50873 from Ch3LL/bp-50740
  - 5fd9ed9 Merge branch '2017.7' into bp-50740
* 2f77b2d Merge pull request #50869 from garethgreenaway/50848_mysql_exception_test
  - 3767d4f Merge branch '2017.7' into 50848_mysql_exception_test
  - af3e145 Cleanup.
  - b85c5bf Adding a test to ensure exception handling is correct.
  - 4242e64 Merge branch '2017.7' into bp-50740
* a5caab7 Merge pull request #50872 from Ch3LL/bp-50864
  - fc9c64b fix typo in file.managed documentation
  - fd73f86 Catch UnicodeDecodeErrors in id verification

- **PR #50937**: (Ch3LL) Fix external_pillars documentation @ 2018-12-20 19:15:20 UTC
  - 49f2a35 Merge pull request #50937 from Ch3LL/pillar_doc
  - 1f01489 Fix external_pillars documentation

- **ISSUE #50919**: (dpkirchner) state.apply test documentation unclear (refs: #50940)

- **PR #50940**: (terminalmage) Fix confusing state module documentation @ 2018-12-20 18:29:26 UTC
  - 4213527 Merge pull request #50940 from terminalmage/issue50919
  - 3318927 Fix confusing state module documentation

- **PR #50929**: (twangboy) Fix unit.utils.test_lgpo_netsh on Windows for Py3 (2018.3) @ 2018-12-20 17:50:37 UTC
  - 421e4f4 Merge pull request #50929 from twangboy/fix_test_lgpo_netsh_2018.3
  - 01f9beb Fix failing lgpo netsh tests

- **PR #50917**: (dwoz) Cherry pick test fixes from fluorine @ 2018-12-19 17:56:19 UTC
  - b08b7e1 Merge pull request #50917 from dwoz/test_fixes
  - 16d10fb Fix linter warnings
  - b22f827 Increase and standardize ShellCase timeouts
  - a5c8c18 Do not pass unicode in environment

- **PR #50913**: (bdrung) Fix documentation build @ 2018-12-19 16:03:55 UTC
  - 59df6b4 Merge pull request #50913 from bdrung/fix-doc-build
  - ecdb452 doc: Indroduce MOCK_MODULES_MAPPING
  - cf64824 doc: Move mock_decorator_with_params up
  - 08ef669 doc: Address pylint issues in conf.py
  - 67a3e37 doc: Mark preamble variable as raw string
  - b1e6080 doc: Fix reference to salt executors
  - e48b324 doc: Replace xa0 (non-breaking space) by spaces
  - b973e7a doc: Fix iterating over the Mock object in Python 3
- bb29948 doc: Do not mock non-existing __mro_entries__ attribute
- e6cf3c4 Do not mock json when building the documentation
- 4cafa45 Fix sphynx error about tornado.version_info

**ISSUE #50892:** (cruscio) archive.extracted source_hash is case sensitive (refs: #50906)

**PR #50906:** (garethgreenaway) [2018.3] Ensure source_hash returned from get_source_sum is lowercase. @ 2018-12-19 04:22:23 UTC
- f4e6b88 Merge pull request #50906 from garethgreenaway/50892_archive_extracted_source_hash_case_sensitive
- bcf8f06 fixing lint
- 543ec7b Ensure source_hash returned from get_source_sum is lowercase.

**PR #50867:** (Ch3LL) [2018.3] Merge forward from 2017.7 to 2018.3 @ 2018-12-14 21:32:23 UTC
- b95b44f Merge pull request #50867 from Ch3LL/merge-2018.3
- 512293f Remove dunder_dictionaries.rst. Was added to modules/developing.rst
- 89b4e09 Merge branch '2017.7' into '2018.3'
- 858cfac Merge pull request #50863 from super5hoot/fixed-license-50848
  * e90d201 Unpack exception args in python3 compatible way.
- e28b2ba Merge pull request #50752 from kstreee/fixed-memory-leak
  * 98cc63a Fixes a memory leak un-cleared stream connections.
- 1f57602 Merge pull request #50837 from Ch3LL/pyren_doc
  * a873019 Clarify py render docs when data context is available
- fddf675 Merge pull request #50844 from twangboy/fixed_grains
  * 473f4d7 Fix some unrelated lint
  * fd1a072 Fix grains for future windows releases
- 32dfaba Merge pull request #50816 from dubb-b/2017.7
  * dc7ff48 Pinning bootstrap to the tagged version of salt.
- b1e5f3f Merge pull request #50709 from mattLLVW/service_unmask
  * b199255 Merge branch '2017.7' into service_unmask
  * 38add1 salt style guideline
  * 823e4ad Implement umask in states.services
  * 91a6bf5 Functional unmask, must add tests
- e4e9563 Merge pull request #50633 from astronouth7303/loader-docs
  * 03e3168 whitelist_modules is linked via enable_whitelist_modules for some reason? idk
  * 5ca1f8e Typos
  * 7cb1a87 Add a quick index of loader-related settings
  * 318ca48 Make a note to not import modules
  * 6294658 Merge remote-tracking branch 'origin/2017.7' into loader-docs
  * 678958e Editing
• 9d59629 Merge branch '2017.7' into loader-docs
• 374d0e9 Finish the last sections
• 98da110 Migrate Dynamic Module Distribution to Modular Systems.
• 1bdd49d Add more links and write some system summaries
• bd3796a Update TOC
• 3a9ab1b Merge dunders into developing, expand to cover all dunders.
• d06739a Add short writeups for a bunch of systems.
• 705e7e4 Add a bunch of cross linking
• 40f9b16 Add missing module type sections
• 172d8c2 Refactor headings
• 53154a0 Oops, missed that
• 0dcd341 Possible horrific use of toctrees? maybe
• bed3509 Refactor, add a TOC
• f647c1d Fill in some missing modules
• 9d4b596 Merge branch '2017.7' into loader-docs
• 26468df Add missing blank line
• 205fea9 Some more revising
• d4a8f7e Remove some code from some links
• 65e4199 I feel like it should be up there
• d44f5ce Rephrase footnote
• 125e46e Add section on how modules get loaded, including giant table of names
• 5bfc6c6 Update reference to modules/index
• 4b096c1 Move all the module-development documentation into a single folder
  – dcd9b2 Merge pull request #50750 from bewing/pepa12
  – 9931a41 Fix last key detection in pepa key_value_to_tree
  – cb85d5d Merge pull request #50733 from marmarek/patch-3
    – 1011421 Report salt-call exit code from ssh_py_shim.py

  – 216fa14 Merge pull request #50859 from garethgreenaway/50850_python_key_cache_file_binary
  – ebc9a01 When reading and writing the key cache file, when using Python3, ensuring the file is read & written in binary mode.
• PR #50828: (twangboy) Fix issues with lgpo state and util @ 2018-12-13 16:37:33 UTC
  – 6b45aad Merge pull request #50828 from twangboy/fix_lgpo

32.2. Previous releases
- 05baa95 Merge branch '2018.3' into fix_lgpo

- **PR #50843**: (bdrung) Fix RemoveCapacityFromDiskgroupTestCase require pyvmomi @ 2018-12-12 20:36:32 UTC
  - 6ea059d Merge pull request #50843 from bdrung/fix-tests
  - 0d00a4e Fix RemoveCapacityFromDiskgroupTestCase require pyvmomi

- **ISSUE #50829**: (ghost) process.absent UnicodeDecodeError (refs: #50839)

- **PR #50839**: (terminalmage) Fix UnicodeDecodeError in ps module @ 2018-12-12 19:59:12 UTC
  - 14d7d1d Merge pull request #50839 from terminalmage/issue50829
  - 3a3d9b7 Ensure that unicode types returned from compatibility funcs
  - 1a00abc Add unit test for _get_proc_cmdline
  - 9ea2a2d Remove extraneous comments

- **ISSUE saltstack/salt#49393**: (Poil) file.directory recurse not always changing perms (refs: #50653)

- **PR #50653**: (lexvella) Check file_mode in file.directory and _check_directory @ 2018-12-12 16:30:52 UTC
  - 264a042 Merge pull request #50653 from lexvella/2018.3
  - 4ea9386 Merge branch '2018.3' into 2018.3
  - 42e4ab3 Merge branch '2018.3' into 2018.3
  - 79f6b42 Check file_mode in file.directory and _check_directory
    - 1233e2b Fix some lint
    - 56c0e55 Fix issues with lgpo state and util

- **ISSUE #45026**: (angeloudy) bytes error in mysql module (refs: #50823)

- **PR #50823**: (terminalmage) salt.modules.mysql: Decode fetch results before making string comparisons @ 2018-12-11 21:04:41 UTC
  - a8ad17a Merge pull request #50823 from terminalmage/issue45026
  - ec8e116 Decode fetch results before making string comparisons

- **PR #50817**: (dubb-b) Adding git 'v' to the bootstrap options @ 2018-12-11 17:28:10 UTC
  - e31e731 Merge pull request #50817 from dubb-b/2018.3
  - 48fc01f Adding git 'v' to the bootstrap options

- **PR #50780**: (twangboy) Add netsh mechanism in the LGPO module @ 2018-12-10 22:09:20 UTC
  - 9b6b39e Merge pull request #50780 from twangboy/lgpo_netsh
  - 5eea728 Fix some lint
  - f077783 Add some tests
  - 2dde12a Fix one more lint item
  - c55b7b4 Fix some lint
  - 1247598 Add more policies
  - b2b9795 Fix overly long lines
  - f18d1aa Add additional policies that use netsh
  - cb50648 Add versionadded tags
- 00cbf26 Add the netsh mechanism to the lgpo module

- PR #50783: (sathieu) gifs/git_pillar: Fix UnicodeDecodeError while cleaning stale refs @ 2018-12-10 20:34:53 UTC
  - 0351296 Merge pull request #50783 from sathieu/gitfs_stalerefs_unicode
  - ef160a6 gifs/git_pillar: Fix UnicodeDecodeError while cleaning stale refs

- ISSUE #45867: (Nick2253) Icinga2 Module uses incorrect paths (refs: #50615)

- PR #50765: (ClaudiuPID) Fix icinga2 cert path @ 2018-12-10 18:10:24 UTC
  - PR #50615: (ClaudiuPID) Fixes icinga2 certs path for newer versions 2.8+ (refs: #50765)
  - deadf9c Merge pull request #50765 from ClaudiuPID/fix-icinga2-cert-path
  - ce1842e Merge branch '2018.3' into fix-icinga2-cert-path
  - 31878d5 Pylint fixes
  - 47bfaa1 Migrated to cmd.run_all and tested on working srv
  - a1ddc3e Fixes icinga2 certs path for newer versions 2.8+

- PR #50692: (terminalmage) Update a couple test modules to use with_tempdir/with_tempfile decorators @ 2018-12-10 17:24:02 UTC
  - 9f8289b Merge pull request #50692 from terminalmage/update-tests
  - 36a4a1a Merge branch '2018.3' into update-tests
  - be14517 Make x509 tests use tempfiles instead of hard-coding them
  - a394cd7 Update file integration tests to use decorator for tempdirs

- ISSUE #32245: (tkwilliams) git_pillar should permit automatic mapping of environment to branch a-la gitfs (refs: #50768)

- PR #50768: (sathieu) git_pillar: Add support for all_saltenvs parameter @ 2018-12-10 16:39:37 UTC
  - 3a71567 Merge pull request #50768 from sathieu/git_pillar_all_saltenvs
  - e971412 git_pillar: Add support for all_saltenvs parameter

- ISSUE #48801: (dstoliker) salt.states.user.present - mindays, warndays, and inactdays won’t return to salt’s default values (refs: #50796)

- PR #50796: (dwoz) Fix #48801 min, max, inact, and warn changes @ 2018-12-10 16:30:14 UTC
  - 12a8447 Merge pull request #50796 from dwoz/issue48801
  - 6b95223 fix linter errors
  - 87a04df Fix #48801 min, max, inact, and warn changes

- ISSUE #46388: (dynek) IPv4 & v6 network configuration on Debian (refs: #49355)

- ISSUE #40262: (pjediny) Salt enforces configuration from /etc/network/interfaces.d/* to /etc/network/interface (refs: #49355)

- ISSUE #38672: (valentin2105) IPv6 Network states is incomplete (refs: #49355)

- PR #50804: (Ch3LL) Back-port #49355 to 2018.3 @ 2018-12-10 16:21:31 UTC
  - PR #49355: (MTecknology) Improve management of interfaces in debian-based distributions (refs: #50804)
  - PR #46980: (MTecknology) Fix broken rendering debian_eth.jinja. (refs: #49355)
– b266e8b Merge pull request #50804 from Ch3LL/bp-49355
– d34ead Use a temp file instead of /etc/network/interfaces for unit tests.
– 622c354 Support reading multiple addresses from interface files.
– 15c34fe Support unicode in space-delimited list; fixes unit tests in py2.
– 0b59561 Added documentation about debian interfaces.d/*. (Fixes: #40262)
– 1b096fb Removed python lint.
– 6e41225 Finished adding support for multiple IP addresses.
– 4c7df5f Cleaned up documentation/examples in states.network:
– 601f434 Added support for -ipaddr and -ipv6ipaddr to modules.debian_ip().
– 638f899 Added support for loopback devices to modules.debian_ip(). (Fixes: #38672)
– cf61c8d Added a bunch of unit tests for modules.debian_ip.build_interface().
– b905c6f Added support for dns_[nameservers,search] being a list or string.

• PR #50767: (dwoz) Make sure ldap passwords are honored @ 2018-12-05 22:59:17 UTC
  – dc9414c Merge pull request #50767 from dwoz/ldap_no_pass
  – 67aa591 Fix linter errors
  – be3945a Remove crufty import
  – 91f50a4 Add more ldap auth tests for ZD-2993
  – 055a8d5 Make sure ldap passwords are honored

• ISSUE #50364: (sathieu) git_pillar mountpoint ignores the root parameter (refs: #50626)

• PR #50626: (sathieu) git_pillar: Allow root and mountpoint parameters together @ 2018-12-05 17:46:59 UTC
  – 60a0d5 Merge pull request #50626 from sathieu/git_pillar_mountpoint_and_root
  – 5423c27 git_pillar: Allow root and mountpoint parameters together

• PR #50745: (bbinet) Fix grafana dashboard updating when nothing has changed @ 2018-12-04 19:26:32 UTC
  – c02387e Merge pull request #50745 from bbinet/fix-grafana-dashboard-update
  – 7019d47 Fix grafana dashboard updating when nothing has changed

• PR #50737: (garethgreenaway) [develop] Merge forward from 2017.7 to 2018.8 @ 2018-12-04 16:02:13 UTC
  – ae81498 Merge pull request #50737 from garethgreenaway/merge-2017.7
  – fde8db5 Merge branch '2017.7' into merge-2017.7
  – 246c055 Merge pull request #50718 from dwoz/run_run_timeout
    * ecd8486 Honor run_run timeout for shell tests
  – 979b3aa Merge pull request #50702 from damon-atkins/jenkins_pylint
    * 5936066 ensure archiveArtifacts are always collected. Use CHANGE_BRANCH to detect merge-forward
  – 22acaaa Merge pull request #50632 from astronouth7303/loader-exception-handler
    * 0f72815 Merge branch '2017.7' into loader-exception-handler
  – d95e7be1 Merge pull request #50670 from damon-atkins/jenkins_pylint
* b6d1605 ci/lint corrected filenames and test condition on full lint Also fix CODEOWNER team name
  * 194801a Merge branch 'loader-exception-handler' of github.com:astronouth7303/salt into loader-exception-handler
  * dadeb0d Merge branch '2017.7' into loader-exception-handler
  * 8697744 Use single quotes per style guide
  * 07868f1 Improve logging output
  * fb05bd5 Eat an exception from an entry point instead of letting it kill the system.

* PR #50685: (Ch3LL) [2018.3] Merge forward from 2017.7 to 2018.3 @ 2018-11-30 18:46:07 UTC
  - edaa9fe Merge pull request #50685 from Ch3LL/merge_2018.3
  - d46aff0 Merge branch 2017.7 into 2018.3
    * 6dc3afc Merge pull request #50672 from garethgreenaway/49691_file_replace_search_only_return_false
      * 7e7df06 lint
      * 6b73c76 When using file.replace, with the search_only option, if the pattern does not exist in the file then we should return False.
    * 1236b51 Merge pull request #50659 from garethgreenaway/49954_gem_installed_less_than_greater_than_support
      * 0ec8bcf When using the gem installed state, when passing a version that includes greater than or less than symbols, ensure that the installed versions meets that requirement.
    * 6317f3a Merge pull request #50583 from damon-atkins/jenkins_pylint
      * 2d1f51c Fix lint only changes, full lint on merge forwards - lint only changes previous diff picked up out of data files, when the branch was out of date. - full limit on merge forward to pick up changes in the lint checks between versions. - update CODEOWNERS for .ci/*
    * 15bf09a Merge pull request #50605 from Oloremo/fix-supervisord-dead-state-idempotency
      * ba3f281 Merge branch '2017.7' into fix-supervisord-dead-state-idempotency
      * cf9ab84 Merge branch '2017.7' into fix-supervisord-dead-state-idempotency
      * af386a2 Fixed the supervisord.dead state idempotency

* ISSUE #50016: (abednark) State augeas.change do not update config file (refs: #50690)

* PR #50690: (garethgreenaway) [2018.3] fixes to augeas_cfg module @ 2018-11-30 18:44:42 UTC
  - 7cb2405 Merge pull request #50690 from garethgreenaway/50016_ensure_path_is_str
  - cec7cb4 Older versions of python-augeas need the path passed to aug.match to be a string.

* ISSUE #49392: (Poil) hosts not replacing existing entry (refs: #50657)

* PR #50657: (terminalmage) Rewrite host.present state to allow for removal of entries not matching IP @ 2018-11-29 17:58:40 UTC
  - a5c7639 Merge pull request #50657 from terminalmage/issue49392
  - 2dda587 Add release notes for new "clean" option
  - e4946f9 Rename "remove" argument to "clean"
  - 7fd3bce Add remove parameter to host.present state
  - 2671a30 Add unit tests for host.present state
– 30f1b85 Remove non-matching IPs from hosts file
– ec297a0 Performance improvements in hosts module
– d1c2038 Add generic ip address validation function
– 9f54720 Add ignore ability to process_read_exception

• ISSUE #48759: (MyIgel) acme.cert: Fail to update certificate after adding aliases / missing --expand (refs: #50683)

• PR #50683: (garethgreenaway) [2018.3] Fixes to acme module when adding aliases to existing certificate @ 2018-11-29 17:46:54 UTC
  – b604785 Merge pull request #50683 from garethgreenaway/48759_adding_aliases_include_expand
  – 3940a0f When adding aliases to an existing Certbot certificate, if we see a message about expanding in the stderr returned from cmd.run_all we should rerun the cmd with --expand included.

• ISSUE #50406: (glkappe) salt-ssh can't use Mongo returner (refs: #50664)

• PR #50664: (garethgreenaway) [2018.3] Fix to logic for configuring returners @ 2018-11-28 05:24:30 UTC
  – 15f9ae4 Merge pull request #50664 from garethgreenaway/50406_salt_ssh_returner_configuration
  – 3525411 When pulling values out of the available configuration for returners we should always default to using keys for those returners, eg. mongo.user for the username. Otherwise in certain situations, eg. when using salt-ssh we will end up with the wrong value for the user.

• PR #50652: (twangboy) Fix unit.utils.test_mac_utils on Windows @ 2018-11-27 20:45:41 UTC
  – abcf03 Merge pull request #50652 from twangboy/fix_test_mac_utils
  – c4cb729 Fix path issues with the tests

• PR #50640: (garethgreenaway) [2018.3] Merge forward from 2017.7 to 2018.3 @ 2018-11-26 22:33:22 UTC
  – 61a824f Merge pull request #50640 from garethgreenaway/merge-2017
  – 409c98f Merge branch '2018.3' into merge-2017

• ISSUE #50403: (prometheanfire) tornado 5.1.1 is not co-installable with salt on python2.7 (refs: #50639)

• PR #50639: (dwoz) Handle pipenv like version restrictions @ 2018-11-26 19:42:11 UTC
  – 20a2de3 Merge pull request #50639 from dwoz/pipfix
  – 9c6f653 Handle pipenv like version restrictions
    * fced78b lint
    * 45a1aa3 Merge branch '2017.7' into merge-2017
    * b2cf134 Merge pull request #50463 from dwoz/zmqpubserv
      * a289e3c Merge branch '2017.7' into zmqpubserv
    * 6679242 Merge pull request #50590 from garethgreenaway/bp-50333
      * 1f5aa48 pkg.installed currently fails when sources is used along with hold: True. This was due to a change in #48426 that swapped out sending the pkgs variable for the desired variable instead. This caused problems with pkg.hold because desired and sources are always populated, and pkg.hold can only include one or the other. This change just includes desired in the call to pkg.hold since desired has the same value for sources.
      * 39e811b Add issue url to tests
      * c4d7a43 Add debug log when connecting
- Set subscribe via sockopt for better compatibility
- More reliable pub server publishing

**ISSUE #49957**: (whythewolf) salt-master scheduled items ignore maxrunning. (refs: #50130)

**PR #50130**: (garethgreenaway) [2018.3] Fixes to schedule maxrunning on master @ 2018-11-26 18:35:35 UTC
- Merge pull request #50130 from garethgreenaway/49957_master_schedule_ignoring_maxrunning
- Updating test_maxrunning_master to Mock get_running_jobs.
- Reverting changes to doc/conf.py.
- Adding integration.scheduler.test_maxrunning to ignore list.
- Adding integration.scheduler.test_maxrunning to filename_map.yml
- Fixing lint
- Removing unused cache_jobs function from utils/master.py
- Adding some logging when the cache files are unable to be removed.
- Ensure minion tests using minion options.
- Fixing lint

**ISSUE #50542**: (doug-stratoscale) mysql.user_exists doesn't work with Mysql 8.0.13 (refs: #50551)

**PR #50551**: (garethgreenaway) [2018.3] Fixes to verify_login in mysql module @ 2018-11-26 17:44:25 UTC
- Merge pull request #50551 from garethgreenaway/50542_mysql_ensure_verify_login_uses_connection_host
- Adding some master specific functions to utils/masters.py to determine if a Salt process is running. Updating utils/schedule.py to use the appropriate running function either from utils/master.py or utils/minion.py depending on where the scheduled job is running. Adding tests to test maxrunning in scheduled jobs for both the minion and master.
- Swapping manual mocking to autodoc_mock_imports

**ISSUE #50562**: (soostdijck) scheduled highstate ignores blackout (refs: #50586)

**PR #50562**: (garethgreenaway) [2018.3] minion_blackout for scheduled jobs @ 2018-11-23 11:15:38 UTC
- Merge pull request #50586 from garethgreenaway/50562_minion_blackout_scheduler
- Adding some defaults for minion_blackout code when pillar & grains are not available in opts.
- Removing some debugging code.
• PR #50576: (garethgreenaway) Back-port PR #50549 to 2018.3 @ 2018-11-21 14:39:55 UTC
  - PR #50549: (cachedout) Add security credits to release notes (refs: #50576)
  - 5c28179 Merge pull request #50576 from garethgreenaway/bp-50549
  - 807068d Typo fix

  - 9272f7b Fix more sphinx build errors
  - 18a8104 Late import to fix docs build errors
  - d457132 Fix sphinx build warnings in 2018.3 branch

- **ISSUE #50227**: (sheagcraig) mac_utils _available_services will fail with malformed launchd plists present (refs: #50228)

- **PR #50492**: (rallytime) Back-port #50228 and #50443 to 2018.3 @ 2018-11-13 16:59:15 UTC
  - **PR #50443**: (weswhet) fix when checking for service Label on macOS (refs: #50492)
  - **PR #50228**: (sheagcraig) Fix 50227 malformed plists (refs: #50492, #50443)
  - 6b272c1 Merge pull request #50492 from rallytime/bp-50228-and-50443
  - 7879a2d Fix logging format
  - f578392 Lint Fix: add mock_open import
  - e5b999b add try/except when checking for service Label
  - 3c36b2d Fix linting errors.
  - fab57de Write tests to handle invalid launchd plist XML.
  - bb429b0 Condense service result assertions, add a binary plist test.
  - a809fed Factor out another helper function, implement broken symlink test.
  - 2167ef Update testing for mac_utils services.
  - 89d8267 Fix trailing-slash bug in User LaunchAgent appending.
  - 0e23b6e Handle bad plists by ignoring them, with py2 and py3 specific approaches
  - fa44148 Avoid AttributeError when checking for exception types.
  - fd62b33 Add secondary exception handler for malformed plists.
  - ae6f4b9 Make test correctly generate a double exception.

- **PR #50486**: (twangboy) Back port lgpo from Fluorine @ 2018-11-13 09:40:17 UTC
• ISSUE #50218: (ata-sql) git.latest with unless command fails after upgrade to 2018.3.3 (refs: #50456)

• PR #50456: (terminalmage) Two bugfixes @ 2018-11-13 06:06:52 UTC
  - 7dd3438 Merge pull request #50456 from terminalmage/issue50218
  - 6143408 Add unit test for TimedProc regression
  - e234abd Add support for list of commands in git states' onlyif/unless
  - cbf05c8 TimedProc: Don’t assume args is a string
  - 87de250 Exit gracefully when mod_run_check raises exception

• PR #50455: (dubb-b) Adding the released version as the bootstrap minion. @ 2018-11-12 22:52:53 UTC
  - d8514e6 Merge pull request #50455 from dubb-b/2018.3
  - fb61482 adding git
  - 181b8a4 removing stable
  - fc93ad6 Adding the released version as the bootstrap minion.

• PR #50483: (rallytime) Back-port #50272 to 2018.3 @ 2018-11-12 22:45:05 UTC
  - PR #50272: (yurudal) Fix out of order docker Env comparison (refs: #50483)
  - cfb3351 Merge pull request #50483 from rallytime/bp-50272
  - 0f02da7 Remove unnecessary u prefix from string literals
  - fc26ae8 Add unit test for comparing containers with the same env vars
  - cf7cb4b extra blank line after function definition(pylint)
  - 1de9ce3 Compare sorted docker environment

• PR #50481: (rallytime) [2018.3] Merge forward from 2017.7 to 2018.3 @ 2018-11-12 22:44:15 UTC
  - 360ae6a Merge pull request #50481 from rallytime/merge-2018.3
  - 1517bb3 Update old utils paths to use new paths
  - d8e7c47 Merge branch '2017.7' into '2018.3'
  - e5f97cd Merge pull request #50467 from dwoz/test_kitchen_up
    * 8c5e93e Use patched version of test-kitchen until next release
  - b16ff9c Merge pull request #50469 from dwoz/minion_timeout_test
    * 57f702d Fix linter warning
    * 686153a Fix up integration.minion.test_timeout
  - 45b438e Merge pull request #50470 from dwoz/set_time_flaky
    * 794ba17 Reset date and time after changing
  - c85561e Merge pull request #50442 from rallytime/replace-docbanner
    * 193325d Update docbanner hyperlink
  - 7200568 Merge pull request #50439 from rallytime/bootstrap-contributing-docs
    * d2158aa Add bootstrap section to contributing docs
• ISSUE #50461: (absolutejam) elementaryOS 'pkg' __virtual__ returned false (refs: #50468)

• PR #50468: (garethgreenaway) [2018.3] Adding elementary override to grains/core.py @ 2018-11-12 16:41:57 UTC
  - 3aaad17 Merge pull request #50468 from garethgreenaway/50461_fix_elementary_os_family_grain
  - 77e8dcc On later versions of elementary, the os_family is being populated as elementary. In order for the aptpkg module to function, we need to override is to be Debian.

• ISSUE #50311: (marek-obuchowicz) pkg.installed state fails even though it succeeded (refs: #50590, #50333)

• ISSUE #46689: (mxork) pkg.installed: hold: True not applied to a package which is already installed. (refs: #48426)

• PR #50333: (garethgreenaway) [2018.3] Fix to pkg.installed for sources and hold: True (refs: #50590) @ 2018-11-08 18:02:33 UTC
  - PR #48426: (garethgreenaway) [2017.7] fixes to states/pkg.py (refs: #50333)
  - d9179fb Merge pull request #50333 from garethgreenaway/50311_pkg_installed_fails_sources_hold
  - 7bc9b3d Merge branch '2018.3' into 50311_pkg_installed_fails_sources_hold
  - 6e96728 pkg.installed currently fails when sources is used along with hold: True. This was due to a change in #48426 that swapped out sending the pkgs variable for the desired variable instead. This caused problems with pkg.hold because desired and sources are always populated, and pkg.hold can only include one or the other. This change just includes desired in the call to pkg.hold since desired has the same value for sources.

• PR #50434: (rallytime) [2018.3] Merge forward from 2017.7 to 2018.3 @ 2018-11-08 17:40:39 UTC
  - 193c80a Merge pull request #50434 from rallytime/merge-2018.3
  - 83d0b2 Merge branch '2018.3' into '2018.3'
    - ef4509e Merge pull request #50370 from dwoz/pubd_msg_logs
      - 58ced12 log jid to payload size
      - 3c537b5 Log message flow to publish daemon

• PR #50417: (meaksh) Get the right target when using "__env__" on git_ext_pillar to avoid merging problems @ 2018-11-08 17:07:03 UTC
  - 73ce80 Merge pull request #50417 from meaksh/2018.3-fix-gitpillar__env__-solving-for-merging
  - 71af32d Remove unicode references
  - b7af5e5 Test git_ext_pillar across multiple repos using __env__
  - 59894e2 Resolve target branch when using __env__

• ISSUE #50292: (dstoliker) sysctl test=True mode results in [ERROR ] Could not open sysctl file (refs: #50423)

• PR #50423: (garethgreenaway) [2018.3] Fixes to sysctl modules and state @ 2018-11-08 14:13:00 UTC
- e9464c9 Merge pull request #50423 from garethgreenaway/50292_no_error_log_test_true
- 95a7f12 Adding file check and empty list return to freebsd_sysctl.py
- 469c090 Adding a check to see if the config file exists, if not then return an empty list so we get the would be changes. Adding a test for this functionality.

- **ISSUE #50420**: (weswhet) mac_system virtual function fails to load on 2018.3.3 (refs: #50421)
- **PR #50421**: (weswhet) fixing an issue on mac_system where the virtual function wouldnt load on 2018-11-07 21:57:44 UTC
  - fcc875 Merge pull request #50421 from weswhet/fix-mac_system-loader
  - 042445d fixing an issue on mac_system where the virtual function wouldnt load
- **PR #50409**: (casselt) Fix test mode for mount state if device_name_regex is used. @ 2018-11-07 16:04:45 UTC
  - d2fc910 Merge pull request #50409 from casselt/mount-device_name_regex-test-mode-fix
  - 56d5a32 Fix test mode for mount state if device_name_regex is used.
- **PR #50383**: (rallytime) [2018.3] Merge forward from 2017.7 to 2018.3 @ 2018-11-06 15:51:53 UTC
  - c2fda9d Merge pull request #50383 from rallytime/merge-2018.3
  - e993692 Merge branch '2017.7' into '2018.3'
    - cd7c95f Merge pull request #50128 from mgomersbach/fix-py3-reload-compat
      - e453e82 Satisfy pylint, use naming instead of W or E classification
      - d20581c Merge branch 'fix-py3-reload-compat' of github.com:mgomersbach/salt into fix-py3-reload-compat
      - 48c6a4f Merge branch '2017.7' into fix-py3-reload-compat
      - 5cd9741 Satisfy pylint
      - a2838db Satisfy pylint checks
      - 05c898c Fix import error by utilizing six and strict version spec
      - 95174e6 Merge branch '2017.7' into fix-py3-reload-compat
      - aa8b5b4 Update workaround to root of file
      - 37a1b1f8 Update workaround to root of file
      - 253ab11 Workaroud for py2 builtin, =<3.3 imp and >=3.4 libimport quirks, solves #50127
    - aa6b149 Merge pull request #50354 from rallytime/version_num_docs
      - 0621f7d Add a few more feature release codenames to the version_numbers doc
  - 6472100 Merge pull request #50359 from dwoz/clitest
    - 18b5d43 Increase cli batch test timeout for increased reliability
  - 99c8f35 Merge pull request #50345 from dwoz/pub_d_logging
    - fd58253 Fix linter warnings
    - 5e1db3c Fix ZMQ PubServer daemon logging works on winndows
    - 8899832 Configure logging for ZMQ PubServer daemon
  - 44f7af4 Merge pull request #50350 from dubb-b/2017.7
    - 346a831 Updating the AMI's and sizes for the test run.
- b947a18 Merge pull request #50274 from rallytime/bp-41472
  - 0a1e607 When the minion key is denied by the master then exit status 77 (permission denied)
- 4725acd Merge pull request #50195 from damon-atkins/jenkins_pylint
  - eb13407 capture some extra info
- ab8e845 Merge pull request #50329 from twangboy/fix_cloud_winrm
  - cf5fb04 Check WinRM port before initiating connection
- e535b38 Merge pull request #50252 from dwoz/backport_fs_fix
  - 59ac284 Do not allow age to be a negative number

- **ISSUE #49523**: (MTecknology) [salt-cloud] Non-ascii chars cause an exception in salt-cloud (refs: #50146, #50236)
  - PR saltstack/salt#50174: (rallytime) Back-port #50146 to 2018.3 (refs: #50231)
- **PR #50236**: (rallytime) Fix salt-cloud UnicodeEncodeError when writing to stdout @ 2018-11-05 22:04:18 UTC
  - PR #50235: (rallytime) Don’t encode the return values in utils/vt.py (refs: #50236)
  - PR #50231: (rallytime) Revert "Back-port #50146 to 2018.3" (refs: #50236)
  - PR #50230: (rallytime) Add various ssh tests to the filemap for salt/utils/vt.py changes (refs: #50291, #50235)
  - PR #50174: (rallytime) Back-port #50146 to 2018.3 (refs: #50236)
  - PR #50146: (MTecknology) Improve handling of non-ascii characters in terminal output. (Fixes: #49523) (refs: #50235, #saltstack/salt#50174, #50174, #50231, #50236)
  - 46cd6c2d Merge pull request #50236 from rallytime/fx-cloud-vt
  - c1984ec9 Fix salt-cloud UnicodeEncodeError when writing to stdout

- **ISSUE #50062**: (whytwolf) max_event_size does not always trim large events. (refs: #50382)
- **PR #50382**: (garethgreenaway) [2018.3] Fix to utils/dicttrim.py to honor max_event_size with nested dictionaries @ 2018-11-05 20:04:06 UTC
  - ed4fa87 Merge pull request #50382 from garethgreenaway/50062_max_event_size_does_not_always_trim_large_events
  - 039f3d1 Increase limit for trimming.
  - 7f77bfe Adding test for utils/dicttrim.py
  - 9b55ac7 Adding _trim_dict_in_dict to utils/dicttrim.py to be called from trim_dict when data contains a nested dictionary. This will ensure that values will still be trimmed correctly.

- **PR #50387**: (rallytime) Back-port #50339 to 2018.3 @ 2018-11-05 20:03:15 UTC
  - PR #50339: (bartlaarhoven) The driver requires dependency, not the other way around. (refs: #50387)
  - 493d653 Merge pull request #50387 from rallytime/bp-50339
  - a3f264d Lint: Add extra blank line
  - bd18412 The driver requires dependency, not the other way around.

- **ISSUE #41342**: (githubcdr) beacons.state does not save as list (refs: #50347)
- **PR #50347**: (garethgreenaway) [2018.3] Fixes to beacon state module @ 2018-11-05 14:19:41 UTC
  - 3022b7d Merge pull request #50347 from garethgreenaway/41342_beacon_state_module_fixes
  - 8885d1f Merge branch '2018.3' into 41342_beacon_state_module_fixes

---

### 32.2. Previous releases

---

5257
- c2354a9 Fixing beacon state test. Adding a reset function to beacon module to clear out beacon configuration. Useful for tests runs to ensure bits are left over between runs.
- 2390f47 Adding SaltReturnAssertsMixin back in
- 677d090 Remove zookeeper reference.
- f3dee43 Updating the beacon state module to ensure that the format of the beacon data that is being sent along to the beacon execution module is in the right format.

**ISSUE #41583**: (seanjnkns) mount.swap for swap file test=True results wrong (refs: #50358)

**PR #50358**: (garethgreenaway) [2018.3] fixes to function mount.swap in mount state @ 2018-11-05 14:16:50 UTC
- 929525a Merge pull request #50358 from garethgreenaway/41583_mount_swap_test_true_wrong_results
- b8ded8b Updating the swap function in the mount.swap function also check the device name when checking the fstab data. Updating tests to reflect new behavior.
  * d07c84d reordering ret dictionary in load test to ascending order
  * f704128 fixing type in load beacon module and adding option validators to config check function along with mock default values in test, fixes #48343
  * 4114a4f fixing type in load beacon module and adding option validators to config check function along with mock default values in test

**ISSUE #49225**: (onnodb) [win-lgpo] lgpo_set always reports failure; Registry.pol corruption (refs: #50006)

**ISSUE #48782**: (mike2523) [win-lgpo] Causes corrupt Registry.pol file (refs: #50006)

**PR #50006**: (lomeroe) Correct more issues in lgpo @ 2018-11-02 16:32:29 UTC
- 3ffa392 Merge pull request #50006 from lomeroe/issue48782_2018.3
- dc58252 update to use a single line if statement when dealing with prepended text
- 0e011ad add runTest method to class for PY2
- 377e09 add a test for #47784
- 0a14505 change backslashes in comment string to fix lint error
- 02181d3 add fix/test for #50079
- 05f2951 more lint fixes
- 94b3335 lint fixes in test
- 2a79626 update test to actually work
- 42840ec add missing comma in function call
- c283f50 Log a warning message instead of an exception when a SID cannot be converted to a username (for user rights assignments)
- 271bd70 capture and print exception information
- bc94b8e update method for creating size field of **delvals items for py3 compatibility
- d9fe28a fix clobbering of admx_search_results which was keeping some policies from being properly detected

**PR #50340**: (garethgreenaway) [2018.3] Backporting #48087 to 2018.3 @ 2018-11-01 18:15:37 UTC
- PR #48087: (mat813) Fix patching sysctl.conf on FreeBSD. (refs: #50340)
- 12de4b9 Merge pull request #50340 from garethgreenaway/backport_48087_to_2018_3
- 56c87ff Backporting #48087 to 2018.3

- **PR #50275**: (rallytime) Back-port #49752 to 2018.3 @ 2018-11-01 16:50:17 UTC
  - PR #49752: (jodok) add support for clonenum parameter (refs: #50275)
  - 5e46434 Merge pull request #50275 from rallytime/bp-49752
  - e463d99 Merge branch '2018.3' into bp-49752
  - 1e10c6e add support for clonenum parameter

- **ISSUE #47425**: (raddessi) states/netyang.managed ignores models when passed as a kwarg (refs: #50301)

- **PR #50316**: (rallytime) Back-port #50301 to 2018.3 @ 2018-11-01 16:32:04 UTC
  - PR #50301: (tonybaloney) Fixes issues raised in #47425 for states.netyang (refs: #50316)
  - 51e333a Merge pull request #50316 from rallytime/bp-50301
  - 367b689 Merge pull request #32 from tonybaloney/bp50301
    - 529687a update test assertions
    - ba526ad remove unused import
    - 220e57f create 2 simple unit tests for the netyang state module and fix issue in #47425
    - 20bf306 reproduce bug in 47425

- **PR #50290**: (twangboy) Fix test_state for Windows @ 2018-10-31 19:28:34 UTC
  - af1075b Merge pull request #50290 from twangboy/fix_test_state
  - 69c02fc Fix some lint and some typos
  - d184013 Fix typo
  - 92b5ea0 Create salt util that copies file security info

- **ISSUE #50050**: (terminalmage) Backport runtests.py's --from-filenames functionality to 2018.3 branch (refs: #50308, #50291)

- **PR #50291**: (rallytime) Back-port #50230 to 2018.3 @ 2018-10-31 19:22:25 UTC
  - PR #50230: (rallytime) Add various ssh tests to the filemap for salt/utils/vt.py changes (refs: #50291, #50235)
  - 045d81c Merge pull request #50291 from rallytime/bp-50230
  - 1aae681 Merge branch '2018.3' into bp-50230
  - 1ef712a Add various ssh tests to the filemap for salt/utils/vt.py changes

- **PR #50315**: (rallytime) [2018.3] Merge forward from 2018.3.3 to 2018.3 @ 2018-10-31 14:16:34 UTC
  - 00437aa Merge pull request #50315 from rallytime/merge-2018.3
  - 422465e Merge branch '2018.3.3' into '2018.3'
  - 4d9e2a0 Merge pull request #50088 from vulnbe/fix-incorrect-id-handling-2018-3-3
  - 619f2f2 Fix incorrect id handling in file state

- **PR #50309**: (rallytime) [2018.3] Merge forward from 2017.7 to 2018.3 @ 2018-10-30 16:07:25 UTC
  - 84ee7a3 Merge pull request #50309 from rallytime/merge-2018.3
  - 381a59d Merge branch '2017.7' into '2018.3'
  - 11fa33e Merge pull request #50295 from dubb-b/remove-cloud-change

---

### 32.2. Previous releases

5259
- 80982ad Removing an un needed change and maybe fixing the lint error
- e00e507 Merge pull request #50287 from whytewolf/boto_vpc
- 5a39644 minor correction to boto_vpc.route_table_present example, subnet_names was on wrong indent level
- 37ae06c Merge pull request #50280 from gtmanfred/2017.7
- 5808074 fix InstallRequirement.from_line for pip 18.1

**ISSUE #50050: (terminalmage) Backport runtests.py's --from-filenames functionality to 2018.3 branch (refs: #50308, #50291)**

**PR #50308: (rallytime) Fix matcher grain file @ 2018-10-30 15:27:47 UTC**

- PR #50182: (terminalmage) Backport runtests.py modifications from develop to 2018.3 (refs: #50308)
- b805bab Merge pull request #50308 from rallytime/test-fixes
- f238522 Fix matcher grain file

**PR #50270: (terrible-broom) apt: speedup installing packages with '>=' or '<=' and reduced memory consumption @ 2018-10-30 13:24:36 UTC**

- 57fe6cd Merge pull request #50270 from terrible-broom/feature/apt-cache-show-instead-of-dump
- 6c1b05a Lint: add extra blank line
- a4df706 fix review notes
- d059edd apt: speedup installing packages with '>=' or '<=' and reduced memory consumption

**PR #50293: (gtmanfred) update jenkins version for 2018.3 @ 2018-10-29 23:39:34 UTC**

- 6a65402 Merge pull request #50293 from saltstack/jenkins
- fe6bc4 update jenkins version for 2018.3
- PR saltstack/salt-jenkins#1182: (gtmanfred) clean up salt.utils for using 2018.3.3 (refs: #50289)

**PR #50276: (rallytime) [2018.3] Merge forward from 2017.7 to 2018.3 @ 2018-10-29 19:05:15 UTC**

- 10ba8b4 Merge pull request #50276 from rallytime/merge-2018.3
- f05abb0 Merge branch '2017.7' into '2018.3'
  - 6ae8a33 Merge pull request #50281 from dubb-b/add_subnet
    - 4fdcf7c Lint: Add extra blank line
    - cebf8a Fixing lint error
    - 0da6301 Merge branch '2017.7' of https://github.com/saltstack/salt into add_subnet
      - 2df6115 Adding subnetID so it knows the right VPC to build the node in.
  - a0cfbdc Merge branch '2017.7' into '2018.3'
  - b94a43b Merge pull request #50184 from ethanculler/fix-minion-return-exception-with-return
- 283d41c Merge branch '2017.7' into fix-minion-return-exception-with-return
- a4e54d7 Added handling for minion return exceptions containing the word "return"
  - 6b009b4 Merge pull request #50258 from dubb-b/fix_cloud_ec2
  - 6a1e9f0 Adding securitygroupname as the config instead of securitygroup
  - 3e1aac9 Merge pull request #50251 from gtmanfred/2017.7
    - 061e599 bump salt version to 2017.7.8
  - fe9bc81 Merge pull request #50233 from Ch3LL/bp-50232
    - f83460d change order of search engine ids
    - bf3f217 Update search engine IDs for releases

- PR #50282: (twangboy) Fix `unit.beacons.test_diskusage` on Windows @ 2018-10-29 18:37:13 UTC
  - 0f1dc08 Merge pull request #50282 from twangboy/fix_test_diskusage
  - fd369dd Mock is_windows = False

- PR #50182: (terminalmage) Backport runtests.py modifications from develop to 2018.3 (refs: #50308) @ 2018-10-29 16:25:07 UTC
  - f7c2f04 Merge pull request #50182 from terminalmage/issue50050
  - 113d76e Revert "Move jinja templating tests alongside salt/utils/jinja.py's tests"
  - 3057ca4 Lint fix: add extra blank line in core.py
  - 8968f9d Revert "Rename test_map_conf test file to respect naming convention"
  - 85a9395 Remove saltclass pillar unit test for list expansion
  - 3d95673 Use get_config_dir() instead of self.config_dir
  - e8b3a62 Add init file back in for unit/client pkg
  - d527dd2 Rename states/test_libvirt.py into states/test_virt.py
  - ab4a670 Remove pgjsonb returner unit tests
  - 68ab3ee Remove "test_custom" from grains section of filename_map
  - 6814698 Remove test_error from scheduler tests
  - c55dfc0 Add init file back in for integration/cloud/clouds pkg
  - f485b4a enable testing only filemaps
  - dfa05b9 Remove test files for beacons that don't exist in 2018.3
  - 85612cf runtests.py: Fix IndexError in --from-filenames
  - 25097f9 Make sure from-filenames intersect with names-file
  - ed864ce runtests.py: Accept modified file list from a text file
  - 059754c Add some doc tests to the filemap that should run on every PR
  - b1ee2e5 Set a default value for the filename map path
  - 5ea1024 Add documentation explaining naming convention for test files
  - 8f790c0 Fix conflicting dict key in filename map
  - f2e5512 Evan Moar Lint
- 65fe9a Moar Lint
- 39c2455 Lint
- dd20f12 Make sure we always run the module names test
- 2ac939e Add test to check test module names and make sure they match the naming convention
- 785d298 Add integration.netapi.rest_tornado.test_app to filename map
- 662ca0d Rename files to match naming convention
- 186d333 Add test to check test module names and make sure they match the naming convention
- 2ac939e Add test to check test module names and make sure they match the naming convention
- 785d298 Add integration.netapi.rest_tornado.test_app to filename map
- 662ca0d Rename files to match naming convention
- 84749dd Consolidate and move salt-ssh unit tests to proper location
- 71825a5 Consolidate and move loader tests to test/unit/test_loader.py
- 8326a09 Rename test_map_conf test file to respect naming convention
- 6d9c2eb Move jinja templating tests alongside salt/utils/jinja.py's tests
- 1ef43a3 Add additional paths to the filename map
- 75e6731 Use the new helper to get the test mods
- c3dc8ec Add function to get all of the test modules
- c5593bc Rename custom_grains.py so it's not identified as a test module
- 330c211 Consolidate saltclass pillar unit tests into single module
- a642619 Rename test_pgjsonb returner test file to match naming convention
- 6433c48 Don't import old module name
- a97e032 Move helper outside of for loop
- 3f1b6fd Add more unit test mapping
- ac3406d Fill out the filename map a bit
- 07d6f2a Enhancements to --from-filenames, --filename-map options
- b851a41 Don't run unit or integration tests unnecessarily
- 569276b Add an initial filename_map
- 44199b1 Add --from-filenames and --filename-map options to parser

• PR #50267: (m03) Fix missing aptly config paths @ 2018-10-29 13:27:23 UTC
  - 1e8b092 Merge pull request #50267 from m03/fix-aptly-config-paths-20183
  - 319bb31 Fix missing aptly config paths

• PR #50232: (Ch3LL) Update search engine IDs for releases (refs: #50233) @ 2018-10-25 20:15:08 UTC
  - ab0b022 Merge pull request #50232 from Ch3LL/search_latest
  - 3452d9b change order of search engine ids

  - 02e0ea0 lint fix
  - 819c46c fix lint errors and code factorization
  - 8aa3598 Fix lint error
  - 9092c4e Adding support for XCP-ng
  - c516c5 Adding XCP-ng to os family map
• PR #50063: (twangboy) Use long when setting REG_QWORD @ 2018-10-25 13:45:03 UTC
  - 9ad43f2 Merge pull request #50063 from twangboy/fix_50039
  - 5fd6a7d Disable lint error
  - 84b8dd6 Add tests
  - 464bb6 Use long when setting REG_QWORD
• ISSUE #49965: (nkrishnakishor) Beacon: Usage in windows (refs: #50188)
• PR #50188: (garethgreenaway) [2018.3] fixes to diskusage beacon @ 2018-10-25 13:41:19 UTC
  - 01b083e Merge pull request #50188 from garethgreenaway/49965_beacon_diskusage_windows
  - f65fa57 Fixing a bug in the diskusage beacon that prevented it from working on Windows. Adding a couple tests to test functionality on Windows.
• PR #50214: (rallytime) [2018.3] Merge forward from 2017.7 to 2018.3 @ 2018-10-25 13:38:40 UTC
  - 9ea51c0 Merge pull request #50214 from rallytime/merge-2018.3
  - 897145c Merge branch '2017.7' into '2018.3'
    • 017d394 Merge pull request #50202 from Ch3LL/_2017.7.8
      • d520f9a Add tests with filename in token data
      • d45f6c7 Add empty token salt-api integration tests
      • 652f9d6 Ensure that tokens are hex to avoid hanging/errors in cherrypy
    • f28a4fa Merge pull request #50211 from channias/fix-spm-modules-install
• 9b203d5 Fix broken install of additional modules in SPM packages
  • 6b4e07b Merge pull request #50212 from dwoz/test_no_fail
    • 7f613ac Do not fail if process already ended
  • 85e22d2 Merge pull request #50207 from Ch3LL/2update_version_doc_2017.7
    • 198d25c Add 2017.7.8 previous release
    • d4e26ac Update release versions for the 2017.7 branch
  • d035695 Merge pull request #50205 from Ch3LL/rn_2017.7.8
    • 71ee68b [2017.7.8] remove in progress and add security details
  • ce341f2 Merge pull request #50180 from max-arnold/2017.7
    • 881a521 Revert curly braces example for nested dictionaries
  • 622bb51 Merge pull request #50026 from damon-atkins/jenkins_pylint
    • aebce88 Merge branch ‘2017.7’ into jenkins_pylint
    • 5f708fa use awk to create the other files, so git does not need to search again
    • 6b96a24 Adjust jenkins linting process, only run stage if required, use git diff to find files, instead of find, report on status, changed and deleted files, lint only changed files.
  • aa66d1b Merge pull request #50158 from vutny/doc/2017.7/fix-http-tutorial
    • fe2d70d [DOC] Fix JSON payload example in HTTP tutorial

• ISSUE #50162: (rbthomp) Scheduled job runs in endless loop when using when: and splay: together. (refs: #50216)

• PR #50216: (garethgreenaway) [2018.3] Fixes to scheduler, list of whens plus splay @ 2018-10-25 13:31:26 UTC
  • 51b3fa4 Merge pull request #50216 from garethgreenaway/50162_when_plus_splay_endless_loop
  • 685509f Fixing an issue when a combination of the when parameter as a list plus using the splay parameter would cause the schedule to continuously run jobs in an endless loop, regardless of if their scheduled time had been reccehed. Also fixing a related issue where scheduled jobs that rely on _next_fire_time were not being run as the corrected splayed time but rather running at the original scheduled time. Adding new tests.

• PR #50190: (dwoz) Fix test_managed_file_with_grains_data on Windows @ 2018-10-24 22:43:35 UTC
  • 43303fb Merge pull request #50190 from dwoz/grains_template_test
  • b77db48 Fix test_managed_file_with_grains_data on Windows

• PR #50187: (garethgreenaway) [2018.3] Adding fixes to scheduler tests to 2018.3 @ 2018-10-24 19:45:32 UTC
  • PR #49871: (garethgreenaway) [fluorine] Updating scheduler tests for OS X (refs: #50187)
  • 462314b Merge pull request #50187 from garethgreenaway/port_49871_to_2018_3
  • 25e7cb6 Merge branch ‘2018.3’ into port_49871_to_2018_3
  • d232dfb Update test_eval.py
  • d8d8559 Fixing lint
  • 76e6232 Removing unnecessary debugging lines
  • d2d622 Back porting #49871 to 2018.3. Adding some additional changes to ensure they are passing on OS X.
• PR #50201: (Ch3LL) [2018.3] Ensure that tokens are hex to avoid hanging/errors in cherrypy @ 2018-10-24 19:44:23 UTC
  - 8ad9a1b Merge pull request #50201 from Ch3LL/_2018.3.3
• PR #50208: (Ch3LL) Update release versions for the 2018.3 branch @ 2018-10-24 15:52:19 UTC
  - 88673ad Merge pull request #50208 from Ch3LL/2update_version_doc_2018.3
  - cdbf493 Add 2017.7.8 previous release
  - 6f775e7 Update release versions for the 2018.3 branch
• PR #50206: (Ch3LL) [2018.3.3] remove in progress and add security details @ 2018-10-24 15:50:50 UTC
  - db8ef1e Merge pull request #50206 from Ch3LL/rn_2018.3.3

  - PR #50143: (m03) Fix #50142, stringutils.to_none (refs: #50173)
    - PR #45429: (terminalmage) [PY3] Add unicode_literals to salt.utils modules (R-S) (refs: #50143)
      - 1cd0339 Merge pull request #50173 from rallytime/bp-50143
      - f5d6080 Add test_to_none
      - c0ce36b Fix #50142, stringutils.to_none
• PR #50171: (terminalmage) Fix invalid RST link in docker_network docs @ 2018-10-23 13:40:36 UTC
  - 9331f1e Merge pull request #50171 from terminalmage/docs
  - 7ea1d6c Fix invalid RST link in docker_network docs
• PR #50161: (rmarcinik) Add a missing result for task.info @ 2018-10-23 13:31:43 UTC
  - 16eece3 Merge pull request #50161 from rmarcinik/patch-1
  - 9848f06 Add a missing result for task.info

32.2. Previous releases
• **PR #50136**: (terminalmage) Add some debug logging before and after states gather pillar data @ 2018-10-22 14:40:38 UTC
  - 28bc5e3 Merge pull request #50136 from terminalmage/debug-logging
  - 8592a0b Add some debug logging before and after states gather pillar data

• **ISSUE #50129**: (kmatsoukas) Call to network.get_route fails when interface name contains a dash (refs: #50147)

• **PR #50147**: (garethgreenaway) [2018.3] Fix to modules/network.py @ 2018-10-22 14:31:03 UTC
  - 593c7ff Merge pull request #50147 from garethgreenaway/50129_network_get_route_fails_dash_in_name
  - 8fa87e3 Update test_network.py
  - 3117969 Fixing scenario where the interface for the default route has a dash in it, regular expression used in get_route currently doesn’t not account for this. Adding some additional tests for network.get_route.

• **PR #50156**: (rallytime) [2018.3] Merge forward from 2017.7 to 2018.3 @ 2018-10-22 14:24:39 UTC
  - 5c7a7d9 Merge pull request #50156 from rallytime/merge-2018.3
  - 87e20fd Merge branch '2017.7' into '2018.3'
  - 1a90c4f Merge pull request #50144 from dwoz/winrm_fs_release
    * 0951d85 Use newest winrm-fs release
  - e096560 Merge pull request #50113 from rallytime/bp-49989
    * 27c7ae9 Increase centos7-py2 kitchen pr timeout to 8 hours

• **PR #50148**: (MTecknology) Proxmox fixups @ 2018-10-22 11:55:10 UTC
  - ce375f4 Merge pull request #50148 from MTecknology/proxmox-fixups
  - 4959947 Race condition still exists at one second timeout.
  - 3a62f74 Add support for setting root ssh pubkey to proxmox containers.

• **PR #50085**: (dwoz) Fix test_win_pkg yet again @ 2018-10-19 18:16:16 UTC
  - 0ece06e Merge pull request #50085 from dwoz/win_pkg_redux
  - f22630e Merge branch '2018.3' into win_pkg_redux
  - 0b033a6 Do not allow age to be a negative number
  - a24d8b8 Debug file list cache
  - 9f5722a The test is not a flush problem
  - 071f8a0 Add cache file name to list cache log
  - 128c2c5 Flush and sync file contents
  - 7d361d8 Add debug log when file list is returned from cache

• **PR #49980**: (twangboy) Add support for AddPrinterDrivers @ 2018-10-19 13:19:41 UTC
  - 0609e06 Merge pull request #49980 from twangboy/lgpo_add_printer_drivers
  - 76c9301 Add support for AddPrinterDrivers

• **PR #50114**: (rallytime) Back-port #50061 to 2018.3 @ 2018-10-19 11:46:03 UTC
  - PR #50061: (rongzeng54) pkg.install bugfix (refs: #50114)
  - de23c83 Merge pull request #50114 from rallytime/bp-50061
  - 1f09104 Add unit test for pkg.install with epoch
- af253c6 pkg.install bugfix

- **ISSUE #50074**: (bigpick) Arista EOS Salt Minion - Debug Log Flooded with Repeated Message (refs: #50115)

- **PR #50115**: (garethgreenaway) [2018.3] Apply scheduler fixes and tests from #49104 to 2018.3 @ 2018-10-19 11:45:31 UTC
  - PR #49104: (garethgreenaway) [fluorine] Fixes to scheduler for jobs with seconds, minutes, etc. (refs: #50115)
  - 9188bec Merge pull request #50115 from garethgreenaway/apply_49104_to_2018_3
  - adb1e79 Apply scheduler fixes and tests from #49104 to 2018.3

- **PR #50119**: (terminalmage) Squelch spurious errors logged in unit tests @ 2018-10-19 11:42:31 UTC
  - e892042 Merge pull request #50119 from terminalmage/boto-tests
  - 91812ff Squelch spurious errors logged in unit tests

- **PR #50120**: (terminalmage) Fix bad merge conflict resolution @ 2018-10-19 11:38:35 UTC
  - 35499b4 Merge pull request #50120 from terminalmage/salt-jenkins-1137
  - 1ddfd26 Fix bad merge conflict resolution

- **PR #50013**: (Giandom) Passed kwargs to db_exists in db_remove method @ 2018-10-18 11:28:30 UTC
  - 5123488 Merge pull request #50013 from Giandom/2018.3
  - 9e91fd3 Merge branch '2018.3' into 2018.3
  - 06bb245 Merge branch '2018.3' into 2018.3
  - 04a99e0 Passed kwargs to db_remove

- **PR #50092**: (rallytime) [2018.3] Merge forward from 2017.7 to 2018.3 @ 2018-10-17 19:57:07 UTC
  - aa94f60 Merge pull request #50092 from rallytime/merge-2018.3
  - 8609064 Update old utils paths to use new paths
  - a984ad8 Merge branch '2017.7' into '2018.3'
    * 7ec3840 Merge pull request #49794 from twangboy/fix_groupadd_test
      * 3d3b67d Gate for Windows
      * decfa52 Check value of result instead of entire dict
    * e562838 Merge pull request #50028 from basseed/fix-windows-virtual-grain
      * 8129ac6 removed whitespaces
      * 82fa866 Fix #50015, Windows grain defaults to physical as unix grain

- **ISSUE #50073**: (jorotenev) boto_cloudfront update distribution fails (refs: #50082)

- **PR #50082**: (garethgreenaway) [2018.3] Fixing a typo in the boto_cloudfront @ 2018-10-17 19:35:00 UTC
  - d1f2c5d Merge pull request #50082 from garethgreenaway/50073_fixing_typo_boto_cloudfront
  - b5b90a1 Fixing a typo in the boto_cloudfront.

- **PR #50090**: (garethgreenaway) [2018.3] Fix to utils/vault.py @ 2018-10-17 13:57:30 UTC
  - 05bd2a0 Merge pull request #50090 from garethgreenaway/fix_vault_sdb_runner_test
  - 444a4e5 Merge branch '2018.3' into fix_vault_sdb_runner_test
• **ISSUE #49275**: (dgengtek) execution module cp.cache_file fails with error 'invalid arguments to setopt' (refs: #50080)

• **PR #50080**: (terminalmage) Ensure all string kwargs passed to Tornado’s httpclient are str types @ 2018-10-16 21:01:41 UTC
  - 7092879 Merge pull request #50080 from terminalmage/issue49275
  - 4a6c327 Ensure all string kwargs passed to Tornado’s httpclient are str types

• **ISSUE #44979**: (hunkeelin) Firewalld state cause horrid performance during saltrun. (refs: #49811)

• **PR #49811**: (nhavens) Optimize firewalld state @ 2018-10-16 11:26:46 UTC
  - 45b6da3 Merge pull request #49811 from nhavens/optimize-firewalld-state
  - 7d6e628 Merge branch '2018.3' into optimize-firewalld-state
  - a718b0c Merge branch '2018.3' into optimize-firewalld-state
  - f7299b9 Merge branch '2018.3' into optimize-firewalld-state
  - f289618 Merge branch '2018.3' into optimize-firewalld-state
  - 41af513 Merge branch '2018.3' into optimize-firewalld-state
  - 7ceb4 Merge branch '2018.3' into optimize-firewalld-state
  - c88bb7d Merge branch '2018.3' into optimize-firewalld-state

  - 0ec1f82 Merge branch '2018.3' into optimize-firewalld-state
  - db6b23b Merge branch '2018.3' into optimize-firewalld-state
  - 4ca7e12 Merge branch '2018.3' into optimize-firewalld-state
  - 4f7c914 fix invalid icmp type handling in firewalld state
  - 2d2e2eb resolve lint error in firewalld state
  - 08142ad resolve indentation issues in updates to firewalld state
  - c92c4fe optimize firewalld.present rich rule handling
  - 25d1daf optimize firewalld.present source handling
  - 5f62c14 optimize firewalld.present interface handling
  - 69f2c6c optimize firewalld.present service handling
  - 71ec8e7 optimize firewalld.present port forward handling
  - f18e09e optimize firewalld.present open port handling
  - 35193dc clean up firewalld.present masquerade code (DRY)
  - 8c88784 optimize firewalld.present icmp block handling

• **PR #50055**: (rallytime) Back-port #50024 to 2018.3 @ 2018-10-16 09:14:06 UTC
  - **PR #50024**: (rwaweber) docs: Correct napalm topic spelling mistake and smooth out sentence (refs: #50055)
  - b94e0a0 Merge pull request #50055 from rallytime/bp-50024
  - 1ea72a0 docs: Correct spelling mistake and smooth out sentence

• **PR #50056**: (rallytime) Back-port #50029 to 2018.3 @ 2018-10-16 09:12:59 UTC
- **PR #50029**: (thebluesnevrdie) Expose docs for Ansible modules (refs: #50056)
- **14f3fac** Merge pull request #50056 from rallytime/bp-50029
- **2e46a78** Expose docs for Ansible modules

- **PR #50064**: (rallytime) Back-port #50022 to 2018.3 @ 2018-10-16 09:09:47 UTC
  - **PR #50022**: (bluesliverx) Make check_pillar more lenient (refs: #50064)
  - **f3fe4b6** Merge pull request #50064 from rallytime/bp-50022
  - **40da3ce** Make check_pillar more lenient

- **ISSUE #49988**: (whytwolf) currently http error logging of urls contains full URL including passwords. (refs: #50066)

- **PR #50066**: (garethgreenaway) [2018.3] Redact any passwords from source paths @ 2018-10-16 09:08:25 UTC
  - **c2a46ce** Merge pull request #50066 from garethgreenaway/49988_redact_passwords_in_source
  - **27ef1e0** Redact any passwords that are in http/https based source paths.

- **PR #50068**: (garethgreenaway) [2018.3] Updating salt.utils.mac_utils @ 2018-10-16 09:07:10 UTC
  - **ab2cb51** Merge pull request #50068 from garethgreenaway/1140_mac_system_tests_2018_3_failing
  - **eedeacb** Update tests to reflect behavior changes
  - **58f5fde** Make Pillar no longer munge file_roots

- **PR #49987**: (terminalmage) Make Pillar no longer munge file_roots @ 2018-10-15 21:58:08 UTC
  - **4c4bb5a** Merge pull request #49987 from terminalmage/pillar_roots
  - **f59506d** Update tests to reflect behavior changes
  - **58f5fde** Make Pillar no longer munge file_roots

- **PR #50065**: (rallytime) Back-port #50044 to 2018.3 @ 2018-10-15 21:32:37 UTC
  - **PR #50044**: (mchugh19) add saltclass info from release notes to docs (refs: #50065)
  - **1e377ac** Merge pull request #50044 from rallytime/bp-50044
  - **6ac26b6** add saltclass docs from release notes

- **PR #50038**: (s0undt3ch) Don’t squash the traceback @ 2018-10-15 20:36:55 UTC
  - **8a6b435** Merge pull request #50038 from s0undt3ch/2018.3
  - **852257a** Don’t squash the traceback

- **PR #50054**: (rallytime) Back-port #50004 to 2018.3 @ 2018-10-15 20:36:03 UTC
  - **PR #50004**: (kiemlicz) https://github.com/saltstack/salt/issues/49883 (refs: #50054)
  - **dbdf7ee** Merge pull request #50054 from rallytime/bp-50004
  - **88e3202** https://github.com/saltstack/salt/issues/49883

### 32.2. Previous releases
• **PR #50057**: (rallytime) [2018.3] Merge forward from 2017.7 to 2018.3 @ 2018-10-15 20:35:46 UTC
  - a9e9974 Merge pull request #50057 from rallytime/merge-2018.3
  - 1b5b018 Merge branch '2017.7' into '2018.3'
    * 9eb17ea Merge pull request #50047 from rallytime/bp-49605
      * e3a0f7b Add gce fix to 2017.7.9 release notes
      * e6d8fc document GCE instance credentials configuration
      * c3a0d1b allow empty service_account_private_key in GCE driver
    * 6cdd390 Merge pull request #50017 from gtmanfred/iptables
      * e5524d4 Use parse_known_args when checking iptables rules
    * a6a66b9 Merge pull request #50012 from dwoz/norm_log
      * f96b29d Use normal log formatting and add jid
    * 15f86b2 Merge pull request #50001 from kyentei/doc-fix-gpg
      * 3deee3e Fix gpg state Documentation
    * 7a235d7 Merge pull request #50000 from kyentei/doc-fix-lvm
      * c2f3d87 Fix LVM state documentation
    * 4edd094 Merge pull request #49999 from kyentei/doc-fix-proxy
      * a180ed7 Fix proxy documentation
    * 58d2302 Merge pull request #49998 from kyentei/doc-fix-process
      * edd4f40 Fix documentation on process.py
    * 411635b Merge pull request #49997 from kyentei/doc-fix-mysql
      * 01059cc Fix documentation for mysql processlist
  • **PR #50060**: (rallytime) [2018.3] Fix some pylint issues that have popped up recently @ 2018-10-15 20:35:22 UTC
    - f1bcb1f Merge pull request #50060 from rallytime/fix-lint
    - a8f4f39 Merge branch '2018.3' into fix-lint
  • **ISSUE #49927**: (thetaurean) File Tree external pillar fails to render templates in python 3 (refs: #49943)
  • **PR #50052**: (rallytime) Back-port #49943 to 2018.3 @ 2018-10-15 20:06:20 UTC
    - PR #49943: (thetaurean) Coerce string when calling compile_template_str (refs: #50052)
    - b26b21c Merge pull request #50052 from rallytime/bp-49943
    - d336dec Handle non-ASCII chars during template data decode
    - 435af7 Adjusted import to expose stringutils namespace
    - 958c630 Coerce string when calling compile_template_str
    - e73f13d [2018.3] Fix some pylint issues that have popped up recently
  • **PR #49809**: (Ch3LL) Add additional asserts to help investigate test_win_pkg failure @ 2018-10-13 18:00:09 UTC
    - fef7669 Merge pull request #49809 from Ch3LL/win_pkg_flaky
    - 795b60 Merge pull request #7 from dwoz/win_pkg_flaky
      * beaab2a Fix win_pkg test
- 75809b4 Merge pull request #6 from dwoz/win_pkg_flaky
  * e5ea3f1 Try running fsync to avoid fs caching race condition
- fd5e842 Merge pull request #5 from dwoz/win_pkg_flaky
  * c386826 Log results of cache_dir for now
- 2cd4058 Merge pull request #4 from dwoz/win_pkg_flaky
  * 1005b91 Debug win_pkg
- 9dce5cc Fix the assertion message order
- 18e9a28 Add additional asserts to help investigate test_win_pkg failure

- PR #49983: (rallytime) [2018.3] Merge forward from 2017.7 to 2018.3 @ 2018-10-11 13:27:34 UTC
  - 8949873 Merge pull request #49983 from rallytime/merge-2018.3
  - f8e73e8 Merge branch '2017.7' into '2018.3'
    * a8a3811 Merge pull request #49972 from rallytime/release-notes-2017.7.9
      6c00003 Add 2017.7.9 release notes file
    * 8de58d6 Merge pull request #49974 from rallytime/bp-49940
      a70358a Update mod_watch() description for all states.
      bf3d064 Another attempt to clean up service.mod_watch description.
      165b799 Clean up documentation/language in service state. (Fixes #40819)
    * d68e5d3 Merge pull request #49978 from whytwolf/inotify_doc_change
      b4d9523 using an exclude list that does not list every operating system leaves open the possability that it would work on those not listed
    * 89cbb6 Merge pull request #49934 from rallytime/fixed-49925
      216fd64 Remove event_publisher_pub_hwm and salt_event_publisher_hwm from documentation

- PR #49979: (cachedout) Update license date and include NOTICE @ 2018-10-11 12:57:21 UTC
  - c7d2482 Merge pull request #49979 from cachedout/license_update
  - b4f148e Break out support and contributing docs into separate files
  - 1dd0e34 Update license date and include NOTICE

- PR #49973: (rallytime) Add 2018.3.4 release notes file @ 2018-10-10 17:46:04 UTC
  - ef61fc6 Merge pull request #49973 from rallytime/release-notes-2018.3.4
  - 32e79d0 Add 2018.3.4 release notes file

- PR #49975: (rallytime) Back-port #49958 to 2018.3 @ 2018-10-10 17:44:56 UTC
  - PR #49958: (garethgreenaway) [fluorine] Fixes to mac_system.py (refs: #49975)
  - 7d8f10c Merge pull request #49975 from rallytime/bp-49958
  - a229a50 Swap the call for mac_utils.available_services to use __utils__ so mac_utils.available_services has access to __context__

- PR #49946: (isbm) osversion/osversion_info/osmajorrelease grains fixes @ 2018-10-10 14:01:05 UTC
  - c912d3a Merge pull request #49946 from isbm/isbm-osversion_info-fixes
  - a17ba35 Fix proper part name in the string-bound CPE
- 9d49607 Expand unit test to verify part name
- a6b7d01 Remove linebreak
- 5376886 Keep CPE_NAME only for opensuse series
- 8af3904 Add part parsing
- e202b41 Prevent possible crash if CPE_NAME is wrongly written in the distro
- 712083d Add unit test for broken CPE_NAME
- 1306ddb Add unit test for v2.3 of CPE format
- 04b61d3 Add unit test for WFN format of CPE_NAME
- 035690f Override VERSION_ID from os-release, if CPE_NAME is given
- 08e235b Remove unnecessary linebreak
- 853e163 Add CPE_NAME parsing

**ISSUE #48204** (zerthimon) State mysql_user.present Exception with mysql 8.0.11 (refs: #49918)

**PR #49918:** (garethgreenaway) [2018.3] Fixes to MySQL module @ 2018-10-10 14:00:11 UTC
- 18fb5df Merge pull request #49918 from garethgreenaway/48204_mysql_user_password_exception_part_deux
- 92c0680 Merge branch '2018.3' into 48204_mysql_user_password_exception_part_deux
- 71e53a3 Cleanup of debugging.
- dd96c13 Fixing lint.
- ac7da89 Tweaking a couple tests to account for new scenarios with later versions.
- 4320c43 Removing __mysql_hash_password, no longer needed.
- 0475acf Removing unnecessary empty line.
- 9265195 Updating the mysql update to handle changes in version 8.0.11 where PASSWORD was removed. Updating unit tests.

**PR #49961:** (dmurphy18) Fix aix grains test for prtconf present @ 2018-10-10 13:38:02 UTC
- 1c2e5be Merge pull request #49961 from dmurphy18/fix_aix_grains
- f38d543 Correct test for AIX grains prtconf

**ISSUE #49205:** (ereslibre) Compound targeting includes unexpected targets in the result (refs: #49897, #49907)

**PR #49907:** (brejoc) 2018.3 fix for list compound targeting @ 2018-10-10 13:33:40 UTC
- PR #49897: (brejoc) 2017.7 fix for list compound targeting (refs: #49907)
- PR #49435: (brejoc) No longer passes missing in list compound engine (refs: #49897, #49907)
- e427306 Merge pull request #49907 from brejoc/2018.3-fix-for-list-compound-targeting
- 1bcadb9 Merge branch '2018.3' into 2018.3-fix-for-list-compound-targeting
- 649c46c Adds check for engine before adding the additional engine argument
- 0d64716 Ignore missing minions only when excluding them with 'not'
- 6a5f3cd No longer passes missing in list compound engine

**ISSUE #48599:** (angeloudy) module ldap3 'TypeError: ('expected a byte string in the list'' (refs: #48666)
• PR #49947: (rallytime) Back-port #48666 to 2018.3 @ 2018-10-09 17:48:20 UTC
  - PR #48666: (angeloudy) values need to be bytes when writing back to ldap (refs: #49947)
  - 143c723 Merge pull request #49947 from rallytime/bp-48666
  - 5166917 Update ldap3.py
  - 05e55bd values need to be bytes when writing to ldap
  - 0d749e6 values need to be bytes when writing back to ldap
• PR #49948: (rallytime) Skip pillar refresh test @ 2018-10-09 15:20:52 UTC
  - dbf994e Merge pull request #49948 from rallytime/skip-flaky-test
  - df11c39 Skip pillar refresh test
• PR #49938: (s0undt3ch) Handle missing pkg_resources package @ 2018-10-09 13:41:09 UTC
  - 614d172 Merge pull request #49938 from s0undt3ch/2018.3
  - b1c2928 Handle missing pkg_resources package
• PR #49942: (rallytime) [2018.3] Merge forward from 2017.7 to 2018.3 @ 2018-10-09 13:38:04 UTC
  - bce12c3 Merge pull request #49942 from rallytime/merge-2018.3
  - 91534ee Merge branch '2017.7' into '2018.3'
    - 327796e Merge pull request #49911 from dubb-b/slack-pr
      - 57e630c Adding failure messages for PR.
    - cf1df79 Merge pull request #49900 from dwoz/presence_wart
      - 7bd34f6 Connect before processing presence
    - 8c4707d Merge pull request #49899 from twangboy/fix_49892
      - a66765f Remove arrInstalled artifact
• PR #49930: (isbm) Get os_family for RPM distros from the RPM macros @ 2018-10-09 13:31:52 UTC
  - a30c053 Merge pull request #49930 from isbm/isbm-osarch-bugfix
  - f8a75f1 Fix imports
  - 70d3de0 Strip and stringify the return for the osarch
  - a248371 Get os_family for RPM distros from the RPM macros.
• PR #49868: (dwoz) windows shell tests @ 2018-10-08 17:32:20 UTC
  - 99c5dba Merge pull request #49868 from dwoz/shelltests
  - 9997f45 Merge branch '2018.3' into shelltests
• PR #49875: (dwoz) Add spm tests to Windows suite @ 2018-10-05 18:13:07 UTC
  - eee82d3 Merge pull request #49875 from dwoz/win_spm_tests
  - e76a751 Use os.path.split for more consistency
  - bc54d15 Fix wart in spm on windows
  - df5e271 Add spm tests for windows
• PR #49872: (twangboy) Fix issues with windows file permissions when using reset=True @ 2018-10-05 13:52:07 UTC
• ISSUE #49582: (UtahDave) lgpo doesn’t seem to allow for unsetting a gpo setting (refs: #49902)
• ISSUE #48661: (mike2523) win_lgpo: User Rights Assignment policies (refs: #49902)
• PR #49902: (lomeroe) lgpo better comments on user right assignments @ 2018-10-05 13:41:16 UTC
  - d3a909f Merge pull request #49902 from lomeroe/issue48661_2018.3
  - 760d8f4 Merge branch ‘2018.3’ into issue48661_2018.3
  - f72ca81 add comments on user right assignment policies when they are already set and note if cumulative_rights_assignment is True that the particular user is already granted the right
    • 75dd5ab Merge branch ‘2018.3’ into shelltests
• PR #49896: (rallytime) [2018.3] Merge forward from 2017.7 to 2018.3 @ 2018-10-04 21:00:24 UTC
  - 4eb43af Merge pull request #49896 from rallytime/merge-2018.3
  - 41c8b31 Merge branch ‘2017.7’ into ‘2018.3’
  - b959033 Merge pull request #49739 from twangboy/fix_49660
    • f3400ad Merge branch ‘2017.7’ into fix_49660
    • 0a4f5fc Merge branch ‘2017.7’ into fix_49660
    • f3999e1 Move vagrant to its own group
  - 71669bd Merge pull request #49885 from dwoz/gemfile
    • 791e3ff Use dwoz/winrm-fs for chunked downloads
    • f3999e1 Move vagrant to its own group
  - 0662e37 Merge pull request #49870 from KaiSforza/ci_actually_fail
    • 9ef9206 Actually catch the exception when we fail
      • 19072f0 Use os.path.split for more consistency
      • 6c22459 Merge remote-tracking branch ‘origin/shelltests’ into shelltests
      • 43b292f Merge branch ‘2018.3’ into shelltests
      • 876c040 Fix wart in test_cp module
      • 9e6ff11 Add syndic tests to whitelist.txt for Windows
      • 9cab293 Fix wart in spm on windows
      • 58e9d1b Add spm tests to whitelist.txt for Windows
      • 7393610 Add more shell integration tests to whitelist
      • ce85d60 Add shell.test_key to whitelist and fix wart
      • 6fbadd7 Skip tests not valid on windows
- 9debf29 Add shell cp tests and fix them
- 8bfa634 Fix warts in integration.shell.test_matcher
- 45d2142 Fix wart in test_cp module
- 0e4bc5 Add syndic tests to whitelist.txt for Windows
- f72ad01 Fix wart in spm on windows
- 4141cc8 Add spm tests to whitelist.txt for Windows
- 02ad722 Add more shell integration tests to whitelist
- 48275c0 Add shell.test_key to whitelist and fix wart
- e5edff4 Skip tests not valid on windows
- a389729 Add shell cp tests and fix them

- ISSUE #49744: (MTecknology) Group state cannot force empty group membership (refs: #49745)
- PR #49745: (MTecknology) Remove all users from group when members list is empty. @ 2018-10-03 13:48:40 UTC
  - 85478cd Merge pull request #49745 from MTecknology/fix-49744
  - 61afb5d Merge branch '2018.3' into fix-49744
  - 269bde2 Merge branch '2018.3' into fix-49744
  - 0b5d916 Modify if structure, as requested.
  - f57ce67 Remove all users from group when members list is empty. (Fixes #49744)
- PR #49867: (rallytime) [2018.3] Merge forward from 2017.7 to 2018.3 @ 2018-10-03 13:23:35 UTC
  - 05cd56b Merge pull request #49867 from rallytime/merge-2018.3
  - b53c3e6 Update old utils paths to use new utils paths
  - a65c60d Merge branch '2017.7' into '2018.3'
    - 7fa2043 Merge pull request #49858 from Paulo-Nunes/fix-requisite-doc
      - fb6f818 Edit requisite documentation
    - 0587fbc Merge pull request #49828 from dwoz/testslogencoding
      - 2b323df Merge branch '2017.7' into testslogencoding
      - 7ce1b64 Use utf-8 encoding for salt-runtests.log
    - 15ccfffd Merge pull request #49848 from terminalmage/fix-version-rst-2017.7
      - af2dddb Fix badly formatted versionadded directive
    - 297031b Merge pull request #49777 from terminalmage/issue49738
      - 8a9945e Update test docstring to reflect switch to using SHA1
      - 7ddf72 Switch from base64 encoding to sha1 digest for unique cache filename
      - 0e26dc6 Explicitly import salt.utils.hashutils
      - dca90d7 Skip parallel states test on Windows until we can get it to work
      - 5a11067 Add additional info to the assert to aid in troubleshooting
      - cb19086 Remove/replace unnecessary setUp/tearDown

32.2. Previous releases
- b3e9678 Fix parallel states with long ID dec or name
  - 98c9372 Merge pull request #49763 from twangboy/fix_49730
    - 99bc8f1 Merge branch '2017.7' into fix_49730
    - 7a9278b Fix broken tests, add new tests
    - 2cd1509 Merge branch '2017.7' into fix_49730
    - defba1c Merge branch '2017.7' into fix_49730
    - a1fed1c Add/fix tests
- 5005a4d Only clear dns entries if you pass []
- 048561e Add ability to clear DNS entries on static DNS

- PR #49876: (KaiSforza) Actually catch the exception when we fail @ 2018-10-03 12:26:58 UTC
  - 42b540b Merge pull request #49876 from KaiSforza/ci_actually_fail_2018
  - c88a81d Actually catch the exception when we fail
- PR #49852: (terminalmage) Rename logstash engine filename to make it work with the loader @ 2018-10-02 17:42:10 UTC
  - 1c8def9 Merge pull request #49852 from terminalmage/issue49627
  - 559c61b Rename logstash engine filename to make it work with the loader
- PR #49850: (rallytime) Back-port #49798 to 2018.3 @ 2018-10-02 17:40:29 UTC
  - PR #49798: (mattp-) saltnado: teach runner about full_return (refs: #49850)
  - 675df25 Merge pull request #49850 from rallytime/bp-49798
  - 4bdced7 saltnado: teach runner about full_return
- ISSU #49204: (mchugh19) file.directory state fails if directory contains an invalid symlink (refs: #49209, #49827)

  - ec97806 Merge pull request #49764 from garethgreenaway/49520_multimaster_dns_issue_fix
  - 30ccc5e Merge branch '2018.3' into 49520_multimaster_dns_issue_fix
  - 741928b Fixes per request from @rallytime.
  - 04c5983 Moving the check for an empty self.minions into a io_loop.call_later call.
  - 44ee2ec Updating default for retry_dns_count
  - 75f64a6 Removing unnecessary code.
- e66dc18 Updating the resolve_dns function in minion.py to include a new minion configuration option which will control how many attempts will be made when the master hostname is unable to be resolved before giving up.

**PR #49847:** (terminalmage) Fix badly formatted versionadded directive (2018.3 branch) @ 2018-10-01 14:04:27 UTC

- abdab68 Merge pull request #49847 from terminalmage/fix-version-rst-2018.3
- a127548 Fix badly formatted versionadded directive

**ISSUE #49043:** (awerner) Unicode broken with file.blockreplace on Python2 (refs: #49782)

**PR #49782:** (dwoz) Fix issue 49043 @ 2018-10-01 13:43:02 UTC

- aca87ab Merge pull request #49782 from dwoz/issue-49043
- b7d904f Merge branch '2018.3' into issue-49043
- ed35633 Revert diff newline change
- 2a901e9 Fix issue 49043

**ISSUE #49671:** (mchugh19) Vault execution module broken in pillar lookups (refs: #49820)

**PR #49820:** (garethgreenaway) [2018.3] Fixing vault when being used from Pillar @ 2018-10-01 13:40:25 UTC

- 1a41d1b Merge pull request #49820 from garethgreenaway/49671_fixing_vault_pillar
- a57872f Merge branch '2018.3' into 49671_fixing_vault_pillar
- 5f13219 Merge branch '2018.3' into 49671_fixing_vault_pillar
- b0ba2ec Fixing the scenario when vault values are used in Pillar, but due to a previous change the minion was not being granted token based access.

**PR #49842:** (rallytime) [2018.3] Merge forward from 2018.3.3 to 2018.3 @ 2018-10-01 13:21:42 UTC

- bf9c175 Merge pull request #49842 from rallytime/merge-2018.3
- 81b0aa7 Add "in progress" notation back to the 2018.3.3 release notes
- 0e76103 Merge branch '2018.3.3' into '2018.3'

**PR #49839:** (rallytime) [2018.3] Merge forward from 2017.7 to 2018.3 @ 2018-09-30 16:32:53 UTC

- e6382cb Merge pull request #49839 from rallytime/merge-2018.3
- 179e4b1 Merge branch '2017.7' into '2018.3'
- fd46d35 Merge pull request #49823 from dubb-b/timeout_addition
  - b25ac9f Adding some changes for the status
  - f6d9679 Updating syntax to be better and with new lines
  - 85ffe6 Adding timeout to all pipelines so that the build aborts

**PR #49815:** (isbm) Bugfix/rework: IPv6 scope errors (hp) @ 2018-09-28 19:44:59 UTC

- fccc08c Merge pull request #49815 from isbm/isbm-ipv6-scope-errors-2018.3
- c14f26f Reverse skipping tests: if no ipaddress
- bb37ba0 Add IPv6 scoped test
- facb34a Add additional check
- 615b09a Lintfix: W0611
- 3ce265e Remove unnecessary manipulation with IPv6 scope outside of the IPv6Address object instance
- c314e1c Revert method remapping with pylint updates
- 0a86112 Lintfix refactor: remove duplicate returns as not needed
- 5932a0d Lintfix
- f52ea0b Add Py3.4 old implementation's fix
- 1c02a31 Fix wrong type swap
- 54233ca Do not use introspection for method swap
- 12038ea Simplify checking clause
- 7f2208b Fix py2 case where the same class cannot initialise itself on Python2 via super.
- cefb16b Add extra detection for hexadecimal packed bytes on Python2. This cannot be detected with type comparison, because bytes == str and at the same time bytes != str if compatibility is not around
- 379ead4 Lintfix: mute not called constructors
- 66ec29c Add scope on str
- f564bf Add logging to the ip_interface
- 8bb5438 Add real exception message
- 693e4d4 Move docstrings to their native places
- 77f1c4 Remove duplicated code
- d05999e Remove multiple returns
- 3fde850 Remove unnecessary operator
- deb0b4e Remove duplicated code
- 8e6263 Remove unnecessary variable for import detection
- 7a6ea3b Remove multiple returns and add check for address syntax
- b40e1e Add debugging to the ip_address method (py2 and py3)
- cab5f62 Add logging
- eeb9f2 Isolate Py2 and Py3 mode
- 49b32b7 Check version via object
- 1ae94f1 Override standard IPv6Address class
- 5e970ea Fix unicode imports in compat
- bbeec4d Fix ipaddress import
- 561c99e Remove unused import
- 0498e94 Fix ipaddress imports
- b4f1a72 Add missing docstrings

**PR #49784: (rallytime) [2018.3] Merge forward from 2017.7 to 2018.3 @ 2018-09-28 17:29:30 UTC**
- 804d52c Merge pull request #49784 from rallytime/merge-2018.3
- c6b9d18 Merge branch '2018.3' into merge-2018.3
26461f9 Add helper import comments
22f055c Merge branch '2017.7' into '2018.3'
  * d2a193b Merge pull request #49792 from KaiSforza/fixscriptedpipes
    5b16996 Fix the new pipelines
  * dd27d80 Merge branch '2017.7' into '2018.3'
    * 8a71a43 Merge pull request #49774 from KaiSforza/declarativeToScripted
      cae88f2 Move all pipelines to be fully scripted
    * 8fe8aac Merge pull request #49736 from mattLLVW/fix-file-touch
      1d9f34 Fix test opts in append, prepend states/file.py

- PR #49790: (weswhet) fixing an issue where sentry logger would fail to get tags from grain... @ 2018-09-28 13:39:04 UTC
  d191b08 Merge pull request #49790 from weswhet/fixing-sentry-logger-2018.3
  201697d fixing an issue where sentry logger would fail to get tags from grains and some other lint fixes for this file

- ISSUE #49626: (PabloLemos) target grains ip_interface no return received (refs: #49791)

- PR #49791: (terminalmage) Fix 3 bugs in subdict matching @ 2018-09-28 13:38:34 UTC
  4d9fc7c Merge pull request #49791 from terminalmage/issue49626
  6795472 Add clarifying comment
  ac0f800 Fix 3 bugs in subdict matching

- PR #49806: (isbm) Bugfix: zypper ZYPPER_EXIT_NO_REPOS exit code @ 2018-09-28 13:20:36 UTC
  52b0472 Merge pull request #49806 from isbm/isbm-zypper-errcode-6-bp
  756ef77 Update error list for zypper
  5b02548 Add error logging

- ISSUE saltstack/salt-jenkins#1121: (rallytime) [2018.3] 4 related tests failing on 2018.3 Python 3 (refs: #49795)

- PR #49795: (gtmanfred) fix test_managed_file_with_grains_data @ 2018-09-26 22:48:36 UTC
  fee6701 Merge pull request #49795 from gtmanfred/tests
  cf5c179 fix test_managed_file_with_grains_data

- PR #49786: (rallytime) Back-port #49759 to 2018.3 @ 2018-09-26 18:22:01 UTC
  PR #49759: (mattp-) runners.state.orch: generate jid if missing (refs: #49786)
  04e5869 Merge pull request #49786 from rallytime/bp-49759
  df3791c state.orch: generate jid if missing

- PR #49770: (rallytime) [2018.3] Merge forward from 2017.7 to 2018.3 @ 2018-09-25 19:03:25 UTC
  4138683 Merge pull request #49770 from rallytime/merge-2018.3
  d9ed59b Merge branch '2017.7' into '2018.3'
  f664515 Merge pull request #49760 from Ch3LL/raid_docs
    * 0eb90c1 Add mdadm as dependency in mdadm state docs
  d5a75bf Merge pull request #49749 from erwindon/docufix

32.2. Previous releases
• baee678 fixed link in documentation
  – 5ef2def Merge pull request #49703 from twangboy/fix_49675_2017.7
  – 9127222 Merge branch '2017.7' into fix_49675_2017.7
  – 4f54422 Fix reboot needed detection
  – b5726d2 Merge pull request #49718 from vutny/doc/2017.7/add-missing-mock-kwarg
    – 3e19176 [DOC] Add missing mock argument for state.apply

• PR #49757: (bbinet) Fix influxdb_user state when test=True @ 2018-09-24 19:14:22 UTC
  – db668a Merge pull request #49757 from bbinet/fix-influxdb_user-test
  – 0d9e46b Fix influxdb_user state when test=True

• PR #49679: (dwoz) Add more tests to whitelist @ 2018-09-22 17:46:50 UTC
  – ec2386e Merge pull request #49679 from dwoz/whitelist
  – 0a3d95f Fix linter issues
  – 4c457c9 Close handles only if they exist
  – a44b37a Merge remote-tracking branch 'saltstack/2018.3' into whitelist

• PR #49722: (meaksh) Fixes some issues on the Zyper module @ 2018-09-21 13:38:03 UTC
  – 6a3e127 Merge pull request #49722 from meaksh/2018.3-fix-zyper-issue-on-python3
  – bb9cb6e Fix wrong queryformat for zypper list_provides
  – db40c034 Fix index error when running on Python 3

• PR #49720: (cstarke) Separate prlctl and prlsrvctl checks into each requiring function @ 2018-09-21 13:32:46 UTC
  – e7bb83 Merge pull request #49720 from cstarke/2018.3
  – b0be6aa Add documentation for prlctl and prlsrvctl binary requirement
  – 4f8476b Fix tests; add test for CommandExecutionError
  – 3e96edd2 Fix tests for parallels module
  – 9034e4e Add import for CommandExecutionError
  – 752b6f8 Separate prlctl and prlsrvctl checks into each requiring function

• PR #49615: (terminalmage) ping_interval: use service.restart instead of signaling @ 2018-09-21 13:26:41 UTC
  – f745e43 Merge pull request #49615 from terminalmage/ping-interval
  – b49b018 Move service name logic to a separate function
  – 2fd8b3 ping_interval: use service.restart instead of signaling

• PR #49731: (terminalmage) Add warning about using jinja filters to dump dicts in Jinja @ 2018-09-21 13:16:04 UTC
  – 0a53d2 Merge pull request #49731 from terminalmage/jinja-filter-warning
  – 8393560 Add warning about using jinja filters to dump dicts in Jinja

• PR #49696: (jgleissner) loosen azure sdk dependencies in azurearm cloud driver @ 2018-09-20 19:17:15 UTC
  – 91acb82 Merge pull request #49696 from jgleissner/2018.3-azurearm-deps
  – 467e017 remove unused import from azurearm driver
- bad28b6 loosen azure sdk dependencies in azurearm cloud driver

**PR #49684**: (twangboy) Detect when system needs reboot after domain join @ 2018-09-20 16:17:50 UTC
- d434e36 Merge pull request #49684 from twangboy/fix_49675
- 3600467 Fix some try/except blocks, mark a lazy test
- 871c11a Fix other functions in the same manner
- 1b5bc66 Merge branch '2018.3' into fix_49675
- 95e6f54 Detect when system needs reboot after domain join
  * 9048970 Add some debug info to assert
  * 536fcee6 Increase function timeout
  * ed4de63 Fix file serialize test
  * 5ac3738 Merge remote-tracking branch 'saltstack/2018.3' into whitelist

**PR #49710**: (rallytime) [2018.3] Merge forward from 2017.7 to 2018.3 @ 2018-09-19 18:05:50 UTC
- 936ca5 Merge pull request #49710 from rallytime/merge-2018.3
- d19e67f Merge branch '2017.7' into '2018.3'
- 6bd85b5 Merge pull request #49706 from garethgreenaway/1120_remove_mock_os_path_join
  * f4ccc75 Removing mocking of os.path.join from two tests, one of which was failing when used with coverage argument. No reason we should be mocking os.path.join.
- c38dc61 Merge pull request #49692 from rallytime/bp-49688
  * fde7575 Order the runtests suites
    - 1f60753 Do not use close_fds on Windows OS
    - 4a54c7c Fix file serialize test
    - 0ec1e1e Increase timeout on flaky test
    - 6ae924b Skip test that is not applicable on windows
    - 5980200 Increase timeout on flaky test
    - 1757edd Increase ModuleTest.run_function timeout
    - 7c7353c Add more tests to whitelist

**PR #49708**: (rallytime) Back-port #49555 to 2018.3 @ 2018-09-19 13:12:12 UTC
- PR #49555: (bergmanni) Change StringIO and BytesIO imports (refs: #49708)
- b082f79 Merge pull request #49708 from rallytime/bp-49555
- ed25416 Change StringIO import in python2 to import the class.

**PR #49707**: (rallytime) Back-port #49702 to 2018.3 @ 2018-09-19 13:09:10 UTC
- PR #49702: (rallytime) Mark orchestration test as expensive (refs: #49707)
- 0e97d9e Merge pull request #49707 from rallytime/bp-49702
- 7ff24e5 Mark orchestration test as expensive

**PR #49693**: (rallytime) [2018.3] Merge forward from 2017.7 to 2018.3 @ 2018-09-18 20:05:28 UTC
- 0c4005d Merge pull request #49693 from rallytime/merge-2018.3
- b39dac Merge branch '2017.7' into '2018.3'
- 37cbd27 Merge pull request #49685 from rallytime/pillar-headings
  * 02b2d54 Split intro docs for cmd_yamlex pillar into shorter lines.
  * c4cbe5b Fix heading line-lengths
- 9bad295 Merge pull request #49689 from terminalmage/2017.7-docs
  * 7e5bab7 Fix docs build errors (2017.7 branch)

**PR #49674: (rallytime) [2018.3] Merge forward from 2018.3.3 to 2018.3 @ 2018-09-18 13:37:00 UTC**
- a12176d Merge pull request #49674 from rallytime/merge-2018.3
- 7bc6b09 Merge pull request #31 from dwoz/merge-2018.3
  * cb35ebb Account for filename changes
- f3b122f Merge branch '2018.3.3' into '2018.3'

**PR #49593: (dwoz) Add more tests to whitelist for Windows @ 2018-09-17 14:57:44 UTC**
- e636dac Merge pull request #49593 from dwoz/add_whitelist
- 2e1bf13 Merge branch '2018.3' into add_whitelist
- 2340a58 Fix runner returns test on Windows
- f908cde Merge branch '2018.3' into add_whitelist
- be5fcbf Fix linter - blank lines
- e51b0f8 Fix binary file manage test
- 9e3b44d Fix linter issues
- ca1b05e Fix multiple issues in x509 module and state
- e603e7a Fix encoding issues in file and x509 states
- 7f93c7f Fix map file loading on windows
- 2959da0 Add some runners test files to whitelist
- bee2902 Make windows file remove return like others
- 5770b05 Fix hitelist file order
- 10ec8be Fix linter issues
- cc6b55 Add more tests to whitelist for Windows

**PR #49639: (ismb) Retire MD5 checksum for pkg mgmt plugins @ 2018-09-17 14:51:54 UTC**
- 7823839 Merge pull request #49639 from isbm/ismb-yumnotify-md5
- 11a94ca Remove an empty line
- adb8324 Use SHA256 algorithm for zyppnotify plugin
- 27001cf Use SHA256 algorithm for yumnotify plugin

**PR #49652: (rallytime) [2018.3] Merge forwrad from 2018.3.3 to 2018.3 @ 2018-09-14 21:20:39 UTC**
- aecbe12 Merge pull request #49652 from rallytime/merge-2018.3
- a8a3820 Merge branch '2018.3.3' into '2018.3'

**PR #49646: (rallytime) [2018.3] Merge forward from 2017.7 to 2018.3 @ 2018-09-14 13:30:22 UTC**
- 530e281 Merge pull request #49646 from rallytime/merge-2018.3
- 186f57e Merge branch '2017.7' into '2018.3'
- 3c8ec8a Merge pull request #49644 from rallytime/mark-flaky-test
  * be8a187 Mark grains test as flaky
- 8ac66f1 Merge pull request #49643 from rallytime/bp-49642
  * accef8c Skip some unreliable tests
- 7a75d5e Merge pull request #49597 from rallytime/bp-47232
  * c477b70 Fixed usage of ipaddress
- 2f6cdd9 Merge pull request #49614 from rallytime/bp-49546
  * 0f3881a Skip flaky test on Python 3

- **PR #49642**: (rallytime) Skip some unreliable tests (refs: #49643) @ 2018-09-13 18:24:43 UTC
  * bb1dcd Merge pull request #49642 from rallytime/flaky-tests
  * 8e74d1c Skip some unreliable tests

- **PR #49629**: (rallytime) [2018.3] Merge forward from 2018.3.3 to 2018.3 @ 2018-09-13 14:00:08 UTC
  * e319ecc Merge pull request #49629 from rallytime/merge-2018.3
  * b628ad Merge branch '2018.3.3' into '2018.3'

- **PR #49632**: (garethgreenaway) [2018.3] Fixing integration.states.test_file.FileTest.test_directory_max_depth @ 2018-09-13 13:51:56 UTC
  * 93d43fa Merge pull request #49632 from garethgreenaway/fixing_failing_test_python_3_7
  * 5887f44 Fixing failing test under python 3.7 caused by changes to how os.makedirs sets initial permissions.

- **PR #49580**: (garethgreenaway) [2018.3] Fixing tests for Python 3.7 @ 2018-09-12 16:33:35 UTC
  * 7042fc0 Merge pull request #49580 from garethgreenaway/fixing_failing_test_python_3_7
  * b6afda8 Fixing lint.
  * d2fb68c Fixes various tests that were failing under python 3.7.

- **PR #49606**: (rallytime) [2018.3] Merge forward from 2017.7 to 2018.3 @ 2018-09-12 14:26:33 UTC
  * ab19082 Merge pull request #49606 from rallytime/merge-2018.3
  * c168268 Update old utils paths to use new paths
  * 19598d8 Merge branch '2017.7' into '2018.3'
    * aa560c5 Merge pull request #49595 from rallytime/merge-2017.7
      * 09247a3 Merge branch '2017.7.8' into '2017.7'
      * 4d85b4 Merge pull request #49560 from rallytime/pkgng-fix
      * f3e1534 [2017.7.8] Use correct path for is_true function
      * 92369f0 Merge pull request #49541 from twangboy/fix_osx_build_2
      * 750d3fa Remove trusted host switches
      * 397296f Merge pull request #49539 from twangboy/fix_osx_build_2
      * 6b42e73 Fix issues with build script on OSX
- e8171de Merge pull request #49596 from terminalmage/kill-bare-excepts-with-fire
  - 729dc08 Kill bare excepts with fire
- 63b6643 Merge pull request #49578 from twangboy/fixed_49566
  - 6a5a69c Merge branch '2017.7' into fixed_49566
- f9a01b7 Merge pull request #49584 from terminalmage/squelch-varstack-error
  - c79a823 Squelch error logging when varstack is not installed
- d4d2b36 Merge pull request #49579 from dwoz(flaky_test
  - dbe40df Increase timeout for flaky git test
- 5cbe60b Merge pull request #49570 from rallytime/doc-fixes
  - 6105ebb Use setup.py clean --all

- PR #49620: (dwoz) Adding passing windows nacl runner tests to whitelist @ 2018-09-12 14:19:11 UTC
  - 0ce91d6 Merge pull request #49620 from dwoz/nacltest
  - 51500ac Adding passing windows nacl runner tests to whitelist

- PR #49532: (meaksh) Fix wrong 'recurse' behavior on for linux_acl.present/absent states @ 2018-09-12 14:16:15 UTC
  - c1f97c4 Merge pull request #49532 from meaksh/2018.3-fix-linux_acl-recursive-problems
  - cf27069 Fix some pylint issues
  - a0ed59d Fix recursive cases on linux_acl.absent state
  - 4a01849 Add unit tests to cover recursive cases of linux_acl states
  - f739b6f Fix typo on variable name
  - d6cd1d7 Fix wrong recurse behavior on for linux_acl.present state

- ISSUE #49027: (lachlanmunro) x509.certificate_managed certificate is mangled on process under py3 m2crypto (refs: #49561)

- ISSUE #49008: (lachlanmunro) x509.certificate_managed state fails under py3 m2crypto with "int too large" (refs: #49561)

- PR #49561: (dwoz) x509 module and state bug fixes @ 2018-09-11 14:01:43 UTC
  - 283e7d7 Merge pull request #49561 from dwoz/m2crypto_test
  - 5e591ea Merge branch '2018.3' into m2crypto_test

- PR #49592: (dwoz) Fix binary file manage test @ 2018-09-10 23:03:18 UTC
  - 4478a4a Merge pull request #49592 from dwoz/bin_file_fix
  - 8556c3d Fix binary file manage test

- PR #49571: (rallytime) [2018.3] Merge forward from 2017.7 to 2018.3 @ 2018-09-10 12:58:15 UTC
  - 9004422 Merge pull request #49571 from rallytime/merge-2018.3
  - a00aba9 Merge branch '2017.7' into '2018.3'
  - 5d267a2 Merge pull request #49547 from rallytime/bp-49518
4bb09f7 Skip service module integration tests on CentOS 7
4948071 Merge pull request #49549 from rallytime/codeowners-duplicate
4b257d2 Remove duplicate comment in CODEOWNERS file
faafe74 Merge branch '2018.3' into m2crypto_test

**PR #49577:** (dwoz) Multiple unitest fixes for 2018.3 Python 3 Windows @ 2018-09-08 05:53:38 UTC
   - 4669a9a Merge pull request #49577 from dwoz/unit_test Fixes
   - aa07b3f Multiple unittest fixes for 2018.3 Python 3 Windows

**PR #49533:** (silenius) [cherry-pick] Optimize postgres groups management @ 2018-09-07 18:58:57 UTC
   - 8b971e5 Merge pull request #49533 from silenius/2018.3.3
   - 7eb8d6c Postgress module unit test fix.
   - b56ae6c Optimize postgres groups management

**PR #49543:** (rallytime) [2018.3] Merge forward from 2017.7 to 2018.3 @ 2018-09-07 18:19:32 UTC
   - 1a41b47 Merge pull request #49543 from rallytime/merge-2018.3
   - cf508a4 Merge branch '2017.7' into '2018.3'
   - 75a3b52 Merge pull request #49527 from terminalmage/remove-special-envs-handling
     - 1478a76 Remove special handling for file_envs fileserver func
   - 13f1d26 Merge pull request #49512 from rallytime/merge-2017.7
     - de7ef3d Add "in process" notation back to 2017.7.8 release notes
     - edad2dc Merge branch '2017.7.8' into '2017.7'
     - d24c96f Merge pull request #49505 from Ch3LL/rn_7.8_2
     - d40b644 Update 2017.7.8 ChangeLog with new fixes
     - 0d7b173 Merge pull request #49498 from rallytime/pin-cherrypy-2017.7.8
     - 81a6155 Pin CherryPy version to < 18.0.0 in requirements files for PY2
     - 52ab2c0 Merge pull request #49466 from rallytime/bp-49461
     - 5842800 Revert "Allow for not being prompted to supply a password to deploy keys to a..."
     - 1bbe7df Merge pull request #49284 from twangboy/fix_installer_osx
     - a112eaa Fix path to libodium tarball
     - e0e8779 Merge pull request #49272 from twangboy/fix_installer_more
     - a8f054b Add 64bit binaries for KB2999226 to the x86 installer
     - 0eb6ddf Merge pull request #49218 from twangboy/fix_installer
     - e8a1d2f Add more descriptive error when KB not found
     - 71737ea Suppress all ui on vcredist installation
     - 7daee9bb Fix Windows and OSX installers
     - e48f26 Merge pull request #49116 from twangboy/fix_installer
     - 1227095 Add nonfatal switch to VCRedist
     - 0b9f2f8 Merge pull request #49113 from Ch3LL/rn_7.8
Salt Documentation, Release 3006.4

- f6b70bb Add changelog to 2017.7.8 release notes
- 208cf66 Merge pull request #49515 from rallytime/update-codeowners
  - 1faab8b Add some files to the CODEOWNERS files for team-core to own
- 34e5174 Merge pull request #49327 from twangboy/fix_win_service
  - 74e944b Mark test_service_status_running as flaky
  - c69560c Merge branch '2017.7' into fix_win_service
  - 53e2e05 Merge branch '2017.7' into fix_win_service
  - cf3d287 Merge branch '2017.7' into fix_win_service
  - 1641851 Fix the name of the _cmd_quote test
  - 97567af Skip tests on Linux systems
  - 0ca9cd1 Fix some lint
  - 3800966 Add tests
  - b0d646d Add more details to the functioning of _cmd_quote
  - a9856c2 Fix issues with win_service

- **ISSUE #49452**: (gtmanfred) [python3.7] remove usage of collections.abc stuff from the collections shim (refs: #49487)

- **PR #49487**: (garethgreenaway) [2018.3] Swapping out collections imports @ 2018-09-07 15:36:04 UTC
  - baaf6e6 Merge pull request #49487 from garethgreenaway/49452_collections_abc
  - 2fb3ef7 Merge branch '2018.3' into 49452_collections_abc
  - ebfd7f9 Merge branch '2018.3' into 49452_collections_abc
  - b27e86b Swapping out the version check for a try...except on the import from collections.abc with a fallback to importing from collections.
  - d118a9f Updating various imports that have been moved from collections to collections.abc, and will be deprecated in collections beginning in 3.8.
    - abc9c1a Fix linter issues
    - 8e42384 Fix multiple issues in x509 module and state
    - 2a52158 Fix encoding issues in file and x509 states
    - 49a6da7 Fix map file loading on windows

- **PR #49528**: (dwoz) Fix merge wart @ 2018-09-06 23:12:39 UTC
  - 06935e9 Merge pull request #49528 from dwoz/mergetests
  - 6a4f823 Merge fix merge wart

- **PR #49548**: (garethgreenaway) [2018.3] Disabling State boto tests for Python 3.7+ @ 2018-09-06 21:50:10 UTC
  - 3298e70 Merge pull request #49548 from garethgreenaway/1075_disable_boto_tests_part_deux
  - 0f5191e Disable various boto tests when run under python 3.7 because of //github.com/spulec/moto/issues/1706. which was causing the test suite to hang on unit tests. This PR is disabling the tests in the test_boto_vpc state tests.

- **PR #49521**: (terminalmage) Fix _get_hash in splay executor @ 2018-09-06 14:06:54 UTC
  - c346825 Merge pull request #49521 from terminalmage/fix-splay-executor
- bbb8fe8 Fix _get_hash in splay executor

**PR #49526:** (terminalmage) Prevent lookup error when trying to lookup fileserver function from LazyDict @ 2018-09-06 14:01:30 UTC

- 3f7c89c Merge pull request #49526 from terminalmage/fix-backends-error-logging
- 1f0288e Prevent lookup error when trying to lookup fileserver function from LazyDict

**PR #49524:** (garethgreenaway) [2018.3] Disable boto tests under 3.7 @ 2018-09-06 13:35:18 UTC

- bf939f9 Merge pull request #49524 from garethgreenaway/1075_disable_boto_tests
- 5ec5578 Disable various boto tests when run under python 3.7 because of //github.com/spulec/moto/issues/1706. which was causing the test suite to hang on unit tests.

**PR #49511:** (rallytime) [2018.3] Merge forward from 2018.3.3 to 2018.3 @ 2018-09-05 19:52:25 UTC

- f73f2e5 Merge pull request #49511 from rallytime/merge-2018.3
- 3ff6c2e Merge branch '2018.3.3' into '2018.3'

**PR #49500:** (rallytime) [2018.3] Merge forward from 2017.7 to 2018.3 @ 2018-09-04 19:02:31 UTC

- 81a49a8 Merge pull request #49500 from rallytime/merge-2018.3
- 2317b5e Merge branch '2017.7' into '2018.3'
  - 1cdae2 Merge pull request #49475 from dwoz/flaky_tests
    - f214929 Fix a flaky test and mark another as flaky
  - 4ac4305 Merge pull request #49457 from rallytime/labels-docs
    - d1e51a Remove references to unused milestones in docs
  - 41d0c3f Merge pull request #49461 from saltstack/revert-47100-ssh
    - 0d7180 Revert "Allow for not being prompted to supply a password to deploy keys to a..."

**PR #49497:** (rallytime) Back-port #49473 to 2018.3 @ 2018-09-04 12:44:25 UTC

- PR #49473: (rallytime) Use correct and explicit paths for salt utils libs (refs: #49497)
  - 16ca360 Merge pull request #49497 from rallytime/bp-49473
  - 1aa3935 Lint: Add range import from six
  - d068a5 Use correct and explicit paths for salt utils libs

**PR #49474:** (dwoz) Work around git-python resource leaks @ 2018-09-02 19:42:32 UTC

- 93df5c4 Merge pull request #49474 from dwoz/gitfs_unit
  - 560d569e Merge branch '2018.3' into gitfs_unit
- e697d1c Work around git-python resource leaks

**PR #49471:** (Ch3LL) Remove string conversion on frame object in sigusr1 handler @ 2018-09-02 18:05:13 UTC

- 43ead5d Merge pull request #49471 from Ch3LL/debug_sigusr1
- 1631b2f Merge branch '2018.3' into sigusr1_handler

**PR #49454:** (rallytime) [2018.3] Merge forward from 2017.7 to 2018.3 @ 2018-08-31 21:36:34 UTC

- 764b816 Merge pull request #49454 from rallytime/merge-2018.3
- a97ab70 Fix lint and test failures caused by bad merge
- f7226f4 Merge branch '2017.7' into '2018.3'
- 7a166bc Merge pull request #49376 from twangboy/fix_48608
  - bf32e0c Merge branch 'fix_48608' of https://github.com/twangboy/salt into fix_48608
  - 9766f0d Merge branch '2017.7' into fix_48608
  - fb97b00 Fix broken path to libodium tarball
  - 535d83e Fix test for list_users
  - 40d3f2e Use dscl to get list of users
  - e426459 Use a set to avoid duplicates
- 03d9750 Merge pull request #49434 from dwoz/cleanup_exception_handling
  - 9daa992 Fix group remove test logic
  - 9daa992 Fix group remove test logic
  - d74fab7 Clean up exception handling on py3
- 7099164 Merge pull request #49389 from gtmanfred/2017.7
  - 6c01662 remove cmd key from load
  - bd3df3 add cli example
  - 251f321 pass load on
  - bc7041 add test
  - 0ace5c1 make file envs compatible with transport format
- 24faa5e Merge pull request #49408 from terminalmage/issue49269
  - d02ec34 Allow our custom yaml dumper to NamespacedDictWrapper objects
- 5746fc8 Merge pull request #49402 from rallytime/bp-49321
  - 7dec9fc Add flaky decorator to serializer test
- 5c723b0 Merge pull request #49375 from terminalmage/revert-49185
  - aaea274 Merge branch '2017.7' into revert-49185
  - 7372e9d Add minion documentation for enable_gpu_grains
  - ea1b53c Fix incorrect master docs for enable_gpu_grains
  - 638210a Add validation type and default minion value for enable_gpu_grains
  - 49ed156 Add enable_gpu_grains to the minion config stub
  - d1b7fb4 Revert "Update documentation to correctly state enable_gpu_grains default"
- 11d87e4 Merge pull request #49387 from twangboy/fix_win_repo
  - 2bf7eda Import GLOBAL_ONLY
- 651631d Merge pull request #49390 from dwoz/archive_module
  - b332beb Fix archive tests for py3
- c591d2b Merge pull request #49385 from dwoz/sonofa
  - f9d7dbd The autoruns module has not been renamed
- 5d2c9b6 Merge pull request #49371 from rallytime/bp-49064
  - bc52f7c Stop running lint on all files when no changes
- f1c904e Merge pull request #49380 from twangboy/doc_48758
32.2. Previous releases

- 6cefbdf Add docs from a comment on issue 48758
- b22a43d Merge pull request #49324 from dwoz/windows_pr_builds
  - 7abd9cd Merge branch '2017.7' into windows_pr_builds
- b2e4121 Merge pull request #49379 from dwoz/whitelistagain
  - 56ea4ee Account for more tests that are not in 2017.7
- 7fa9120 Merge pull request #49366 from rallytime/bp-49232
  - 74b05ef fix HTTP method for acl_info
  - b9fa7db Merge branch '2017.7' into windows_pr_builds
  - 77f5fd3 Merge branch '2017.7' into windows_pr_builds
  - 7cdba27 Add ci scripts for windows PR builds

- **PR #49025:** (twangboy) Fix several issues with LGPO @ 2018-08-31 18:25:34 UTC
  - 4ea22e5 Merge pull request #49025 from twangboy/fix_48661
  - c27fd18 Merge branch '2018.3' into fix_48661
  - 222c503 Fix several issues with LGPO

- **ISSUE #49281:** (aarnaud) etcd_cache : Not working for mine (refs: #49283)

- **PR #49283:** (aarnaud) Fix #49281 etcd_cache with mine cache @ 2018-08-31 18:24:23 UTC
  - dd9ec94 Merge pull request #49283 from aarnaud/fix-etcd-cache
  - 13e1a17 Merge branch '2018.3' into fix-etcd-cache
  - 6c0fb9c Fix #49281 etcd_cache with mine cache

- **PR #49459:** (dwoz) Batch test fix cherry-pick @ 2018-08-30 23:02:12 UTC
  - 64227f9 Merge pull request #49459 from dwoz/batch_fix
  - fc39dcf Simplify cli test fixes

- **PR #49453:** (dwoz) Fix up py3 git config tests @ 2018-08-30 22:00:19 UTC
  - 75285a3 Merge pull request #49453 from dwoz/conffix
  - ac3c379 Fix up py3 git config tests

- **PR #49411:** (terminalmage) Allow our custom yaml dumper to NamespacedDictWrapper objects (2018.3 branch) @ 2018-08-30 13:05:37 UTC
  - a962efc Merge pull request #49411 from terminalmage/issue49269-2018.3
  - a4cb35b Remove support for overriding the class name
  - 82a8b73 Allow our custom yaml dumper to NamespacedDictWrapper objects

- **PR #49407:** (rallytime) Mark pkg module tests and flaky @ 2018-08-30 13:01:31 UTC
  - 8022a3b Merge pull request #49407 from rallytime/pkg-flaky
  - 1609e11 Mark pkg module tests and flaky

- **PR #49406:** (rallytime) [2018.3] Merge forward from 2018.3.3 to 2018.3 @ 2018-08-30 13:00:34 UTC
  - 7f8c38a Merge pull request #49406 from rallytime/merge-2018.3
  - 4939ee3 Merge branch '2018.3.3' into '2018.3'
• PR #49401: (rallytime) Mark output file permissions test as flaky @ 2018-08-29 18:13:12 UTC
  - 68d630f Merge pull request #49401 from rallytime/flaky-output-test
  - e13216b Mark output file permissions test as flaky

• PR #49400: (rallytime) Mark pillar refresh test as flaky @ 2018-08-29 18:12:51 UTC
  - 23610ed Merge pull request #49400 from rallytime/flaky-pillar-test
  - fb62af6 Mark pillar refresh test as flaky

• ISSUE #49150: (sunyq) hosts.rm_host changes /etc/hosts file with odd characters (refs: #49394)

• PR #49394: (sunyq) fix issue`#49150`_ hosts.rm_host changes /etc/hosts with odd characters @ 2018-08-29 13:33:49 UTC
  - 502e91c Merge pull request #49394 from sunyq/2018.3
  - 76ba5b6 fix issue`#49150`_ hosts.rm_host changes /etc/hosts with odd characters

• PR #49386: (dwoz) Cherry-pick whitelist fix. @ 2018-08-29 01:11:05 UTC
  - 2cf2e62 Merge pull request #49386 from dwoz/whitelistfix
  - 2b08cf1 Account for more tests that are not in 2017.7

• PR #49372: (rallytime) [2018.3] Merge forward from 2017.7 to 2018.3 @ 2018-08-28 19:03:53 UTC
  - ec04282 Merge pull request #49372 from rallytime/merge-2018.3
  - ab6cc1c Update old utils paths to use new paths
  - ac406c4 Merge branch '2017.7' into '2018.3'
  - dfa3861 Merge pull request #49354 from dwoz/fix_whitelist
    * aeb0fa3 custom_grains tests do not exist
  - 14b8094 Merge pull request #49346 from Ch3LL/bp-49345
    * ce2733e upgrade including linux kernels
  - d8f2945 Merge pull request #49344 from cachedout/test_matcher_flaky
    * a34ef2e Matcher test marked flaky
  - f08e720 Merge pull request #49353 from dwoz/boto_fix
    * 376019f Do not raise exception if passed bytes
  - 4690ad0 Merge pull request #49339 from dwoz/more_tests
    * d50324b Merge branch '2017.7' into more_tests
  - e371ad9 Merge pull request #49341 from terminallmage/issue48717
    * 1971d09 Update dynamic git_pillar docs to enclose env name in quotes
  - 00b58ee Merge pull request #49337 from dwoz/win_service_test_fix
    * 1c1727e Fix broken service stop test
  - 81428ed Merge pull request #49291 from dwoz/dedent
    * 1991198 Fix review nits
    * 6abc2da Re-factor dedent to fix warts
    * 75b2e3d Use salt.utils.to_* functions
\* fa78a7b Add dedent that sets line endings
  \* cd6706e Fix merge wart
  \* b9c344b Fix module.archive tests for win py3
  \* ac60fb8 Comment strange code
  \* 5fefd6f Simplify cli test fixes
  \* 1765d53 Fix archive tests on Windows platform
  \* 06f271f Add archive module tests to whitelist.txt
  \* 9cb8fe2 Add more tests to whitelist for windows
  \* b8af238 Fix indent wart
  \* bc971e4 add doc tests
  \* 8899a5e Add more client tests to whitelist
  \* 14cd7b48 Add cli tests to whitelist
  \* 3e55d10 Platform module doesn't exist in 2017.7
  \* 2733c02 Use double quotes on windows commands
  \* 0394ece The set command does not work like inline env vars
  \* 1fd5cf1 Merge pull request #49320 from rallytime/fix-48694
    \* 0964b5e Update documentation for #48694 and add deprecation warning
  \* c323096 Merge pull request #49314 from rallytime/bp-49277
    \* 6d691b2 Prepend current directory when path is just filename
  \* c7bae5e Merge pull request #49290 from rallytime/bp-44504
    \* 6224f7b calling range is going up to the upper limit but not including it
  \* 7a44e59 Merge pull request #49289 from rallytime/bp-49170
    \* 4c29c17 forcing mine update in the proxy minion as well
    \* b1d581a force mine update on minion start
  \* 221ea22 Merge pull request #49278 from rallytime/bp-49253
    \* b331b5c skip ID 7 for vmware hard drives
  \* PR #49356: (dwoz) Fix tests that use timed_subprocess for py3 @ 2018-08-28 13:30:08 UTC
    \* 1fa6a7 Merge pull request #49356 from dwoz/cmdmod
    \* 6feaae Fix tests that use timed_subprocess for py3
  \* ISSUE #48299: (dosercz) git.latest reports deleted tags in remote repo as new_tags in changes (refs: #49305)
  \* PR #49336: (terminalmage) Fix half-baked comment @ 2018-08-27 00:07:55 UTC
    \* PR #49305: (terminalmage) Allow git.latest to remove local tags which have been removed remotely (refs: #49336)
    \* 2d8055e Merge pull request #49336 from terminalmage/issue48299
    \* 175e161 Fix half-baked comment
  \* PR #49331: (dwoz) Use salt.utils to ensure string type @ 2018-08-26 01:42:08 UTC
- a2e7033 Merge pull request #49331 from dwoz/strfix
- 7513474 Use salt.utils to ensure string type

**PR #49312:** (Ch3LL) Fix keyerror in manage.bootstrap @ 2018-08-25 19:55:44 UTC
- d70eda8 Merge pull request #49312 from Ch3LL/ssh_list_hosts
- da71c97 Fix keyerror in manage.bootstrap

**PR #49316:** (rallytime) [2018.3] Merge forward from 2018.3.3 to 2018.3 @ 2018-08-25 19:53:04 UTC
- 6b2eba7 Merge pull request #49316 from rallytime/merge-2018.3
- 39c442c Merge branch '2018.3.3' into '2018.3'

**ISSUE #48880:** (damntoken) Can't run cmd.run with UTF-8 chars as arguments / parameters. With custom module. (refs: #49322)

**PR #49322:** (dwoz) Encode shell commands explicitly. @ 2018-08-25 04:43:26 UTC
- 5766e98 Merge pull request #49322 from dwoz/state_module_test_fix
- 1f7d50d Encode shell commands explicitly.

**PR #49299:** (dwoz) Work around cmd.run unicode issues in test for now @ 2018-08-25 04:43:03 UTC
- b47da0a Merge pull request #49299 from dwoz/test_fix
- f4bd644 Fix string formatting wart in file state tests
- e846e08 Fix wart in file state test
- 71d4465 Work around cmd.run unicode issues in test for now

**ISSUE #48299:** (dosercz) git.latest reports deleted tags in remote repo as new_tags in changes (refs: #49305)

**PR #49305:** (terminalmage) Allow git.latest to remove local tags which have been removed remotely (refs: #49336) @ 2018-08-24 17:29:03 UTC
- b65890c Merge pull request #49305 from terminalmage/issue48299
- 4a093d9 lint
- ed7b994 Gate tag manipulation behind a sync_tags argument
- 29de855 Add test for a removed tag
- eb9a459 Properly handle tags deleted from remote repository
- 916c15a Add git.tag function

**ISSUE #49009:** (msciciel) file_ignore_regex / file_ignore_glob not working properly (refs: #49308)

**PR #49308:** (terminalmage) Don't include ignored paths in mtime map @ 2018-08-24 17:28:41 UTC
- 459354a Merge pull request #49308 from terminalmage/issue49009
- 2bad7f Don't include ignored paths in mtime map

**PR #49282:** (rallytime) [2018.3] Merge forward from 2017.7 to 2018.3 @ 2018-08-24 16:45:50 UTC
- 914bb09 Merge pull request #49282 from rallytime/merge-2018.3
- 21a51c9 Add 'minion_data_cache: True' to mocked opts for minions unit tests
- 196ce3f Call the with_tempfile decorator correctly for 2018.3
- 37f24fd Fix unit test for file state
- 6fa158 Update old utils paths with new paths
c3ecefc Merge branch '2017.7' into '2018.3'
  * 879c3ad Merge pull request #49262 from bloomberg/short-circuit
      - a3594db extend #488588 to cover SyncAuth class
  * 1900aff Merge pull request #49144 from twangboy/fix_48163
      - f5ec86 Work with seconds
      - 7264058 Fix some lint (remove whitespace)
      - 4f9973d Improve timeout in delete
      - a6ecb75 Remove testing debug stuff
      - 7dd7953 Fix start/stop functions
      - fa06a6 Merge pull request #10 from damon-atkins/push-1
      - 57c4b9f 2017_win_service_damon
      - d44eaa6 Add timeout support to the state
      - d579b3e Add timeout parameter
  * 395bae6 Merge pull request #49259 from gtmanfred/flaky-2017.7
      - 93a576e flaky tests are flaky yo
      - f518bd3 mark orchestration state tests as flaky
  * 62cc0df Merge pull request #49231 from minusf/mount-check-name
      - eb5cab3 fix some underhanging indent while here...
      - ec2a091 check for mandatory parameters to avoid false positives
  * d55484 Merge pull request #49242 from dwoz/blockreplace_better_fix
      - 72c3727 Use six to make sure content is unicode
      - 1bf0b18 Better blockfix replace
      - dd4fcd3 Revert "Multiple block replace test fixes"
      - d335842 Use os.linesep.join instead of textwrap.dedent
  * 85f6d36 Merge pull request #49236 from terminalmage/issue32737
      - 23bbbae Allow compound matching in eauth config expressions
  * 5ba7f60 Merge pull request #49187 from erwindon/py27fixnumberformat
      - 12261a5 trailing whitespace removal
      - 2149e22 Fix for #45620: "Salt CLI is rounding floats to 2 decimal places" (actually: Salt CLI is using only 12 digits for precision)
  * f8c55b8 Merge pull request #49184 from ralish/external_nodes_docs
      - 4fe38dc Merge branch '2017.7' into external_nodes_docs
      - 2e29b29 Remove obsolete documentation on external_nodes setting
  * 65205a4 Merge pull request #49185 from ralish/enable_gpus_grains_doc
      - 2fe675c Update documentation to correctly state enable_gpus_grains default
  * 5aa282e Merge pull request #48032 from zer0def/parted-naming
• 563ad25 Merge branch '2017.7' into parted-naming
  • 07f8631 Fixed partition names with spaces effectively containing only the first word.
  • 0157eac Merge pull request #49164 from terminalmage/issue49154
  • c2aba7a Merge branch '2017.7' into(issue49154
  • b4544d7 Add keep_source integration tests
  • 82638c6 Fix bug in keep_source for non-templated salt:// file sources
  • b510441 Merge pull request #49179 from dwoz/test_unit_states_file
    • 913ea5e Fix directory unit test
    • 3363238 Account for normalized dirs in unit tests
  • 7486fd5 Merge pull request #49162 from erwindon/wheel_error_error
    • ca5df04 Merge branch '2017.7' into wheel_error_error
    • 4335c5c Must have 2 lines between imports and code
    • ec1f013 Improved solution as per @dwoz's suggestion
    • 20f134e Fixed unknown 'exceptions' under Python3 (#49152)
  • 7043286 Merge pull request #49143 from Ch3LL/bp-49142
    • d2e73cc Remove -Z script_arg for cloud tests
  • 8ab55f5 Merge pull request #49167 from dwoz/filefix
    • b5ba073 Simplify dict keys lookup
    • 6844251 Fix remaining file state integration tests (py3)
  • 90bd560 Merge pull request #49163 from dwoz/tmp_dir
    • 3384864 add Exception type
    • 9da79dd0 Allow test suite to finish if tmp dir removal fails
  • aa01a67 Merge pull request #49136 from Ch3LL/bootstrap_2017.7
    • de40dfb [2017.7] Update bootstrap script to latest release (2018.08.15)
  • 29fccc8 Merge pull request #49118 from dwoz/test_file_fixes
    • c6b781e Multiple fixes for integration.states.test_file
    • 133e400 Merge pull request #49103 from dwoz/cmd_test_fix
  • 566a4ea Install the launcher so we can execute py files

• ISSUE saltstack/salt-jenkins#1075: (Ch3LL) [2018.3.3] arch python3 tests do not finish (refs: #49303)
• PR #49303: (gtmanfred) use os._exit instead of sys.exit when daemonizing @ 2018-08-24 14:15:54 UTC
  • 4c81c2e Merge pull request #49303 from gtmanfred/forking
  • e06ce49 use os._exit instead of sys.exit when daemonizing
• PR #49276: (terminalmage) Fix paths to moved functions @ 2018-08-23 16:38:55 UTC
  • 158c1ca Merge pull request #49276 from terminalmage/fix-moved-funcs
  • 322a988 Fix paths to moved functions
• PR #49270: (dwoz) Add async helper to test_sock_path_len @ 2018-08-23 16:17:54 UTC
- ef39f85 Merge pull request #49270 from dwoz/test_event_fix
- 51bf79a Add async helper to test_sock_path_len

- **PR #49199**: (jacobweinstock) Fix typeerror unicode @ 2018-08-23 14:38:17 UTC
  - 5daa43a Merge pull request #49199 from jacobweinstock/fixed-typeerror-unicode
  - 25608ef Merge branch '2018.3' into fix-typeerror-unicode
  - 11ad11c add unicode_literals back to handle logging and other things.
  - 6944baf add salt.utils.stringutils.to_bytes. add comment on unicode_literals.

- **ISSUE #49174**: (rbthomp) Beacon diskusage reporting incorrect diskusage value. (refs: #49264)

- **PR #49264**: (gtmanfred) fix diskusage beacon @ 2018-08-23 14:36:07 UTC
  - e28f8f1 Merge pull request #49264 from gtmanfred/diskusage
  - 15857c2c fix diskusage

- **PR #49253**: (gtmanfred) skip ID 7 for vmware hard drives (refs: #49278) @ 2018-08-23 14:35:31 UTC
  - 6f62b93 Merge pull request #49253 from gtmanfred/vmware
  - 6e776ca skip ID 7 for vmware hard drives

- **ISSUE #49159**: (wenxin-wang) incorrect default value of minion's 'ipv6' option (refs: #49263)

- **PR #49263**: (terminalmage) Revert default value for ipv6 to None @ 2018-08-23 13:02:13 UTC
  - 2a2bd48 Merge pull request #49263 from terminalmage/issue49159
  - bf5d907 Revert default value for ipv6 to None

- **PR #49244**: (dwoz) Test fixes: unit.fileserver.test_gitfs @ 2018-08-22 20:19:42 UTC
  - ec32428 Merge pull request #49244 from dwoz/gitfs_fixes
  - b533fa1 Simplify by using to_unicode helper
  - 5a0cda5 Older GitPython version do not have a close method
  - 7452715 Fix up fileserver.test_gitfs tests on windows
  - 800aa25 Remove unicode filenames on windows python 2

- **PR #49265**: (terminalmage) Fix failing unit file module unit tests @ 2018-08-22 19:35:07 UTC
  - 2d7f846 Merge pull request #49265 from terminalmage/fix-failing-file-tests
  - 6b51f71 Fix failing unit file module unit tests

- **PR #49240**: (dwoz) file state test fixes @ 2018-08-22 18:16:42 UTC
  - 4634752 Merge pull request #49240 from dwoz/state_tests
  - 1679a19 Work around listdir encoding issues on py2 windows
  - 07ed841 file state test fixes

- **PR #49260**: (gtmanfred) [2018.3] flaky tests @ 2018-08-22 16:40:39 UTC
  - 55ded9f Merge pull request #49260 from gtmanfred/flaky-2018.3
  - 419f7bb flaky tests are flaky yo
  - c92f1b mark orchestration state tests as flaky

- **PR #49245**: (dwoz) Skip grep unit tests on windows @ 2018-08-22 15:18:08 UTC
6d023ca Merge pull request #49245 from dwoz/skip_grep_windows
  e305891 Skip grep unit tests on windows

• PR #49243: (dwoz) Revert newline translation change @ 2018-08-22 15:12:26 UTC
  75beede Merge pull request #49243 from dwoz/fileserver_tests
  86e3c46 Revert newline translation change

• PR #48545: (bbinet) Fix unreachable ssh-id-wrapper template when root_dir is relative @ 2018-08-21 15:12:01 UTC
  60605f0 Merge pull request #48545 from bbinet/fix-unreacheable-ssh-id-wrapper
  284def7 Fix unreachable ssh-id-wrapper template when root_dir is relative

• ISSUE #49204: (mchugh19) file.directory state fails if directory contains an invalid symlink (refs: #49209, #49827)

• PR #49209: (gtmanfred) don’t blow up check_perms if lsattr file doesn’t exist @ 2018-08-20 19:02:42 UTC
  4ac51a9 Merge pull request #49209 from gtmanfred/lsattr
  ab918ca don’t blow up check_perms if lsattr file doesn’t exist

• ISSUE #49060: (The-Loeki) On Py3, redis job cache throws TypeError bytes / str (refs: #49190)

• PR #49190: (The-Loeki) decode_reponses=True on all Redis API interfaces @ 2018-08-20 18:57:26 UTC
  d29af00 Merge pull request #49190 from The-Loeki/redis-fix
  d126318 Merge branch '2018.3' into redis-fix
  7ff72eb redis cache no utf8 of course
  bdaef39 decode_reponses=True on all Redis API interfaces

• PR #49197: (dwoz) File state line ending fixes @ 2018-08-20 18:45:04 UTC
  644ba3d Merge pull request #49197 from dwoz/test_fix
  a7cfe35 File state line ending fixes

• PR #49192: (dwoz) Test fixes flaky test and unicode environment key/value @ 2018-08-19 10:48:03 UTC
  aaa9e37 Merge pull request #49192 from dwoz/git_test_fix_ng
  8ea89e9 Test fixes

• PR #49191: (The-Loeki) Make salt.utils.vault._get_connection publicly available @ 2018-08-19 10:39:35 UTC
  63cc737 Merge pull request #49191 from The-Loeki/vault_publ_conn
  cab4192 publicize salt.utils.get_vault_connection()

• PR #49189: (dwoz) Merge pull request #49171 from Ch3LL/bp-49103 @ 2018-08-18 20:51:59 UTC
  PR #49171: (Ch3LL) [2018.3.3] cherry pick #49103 (refs: #49189)
  PR #49103: (dwoz) Install the launcher so we can execute py files (refs: #49189, #49171)
  1d843d4 Merge pull request #49189 from dwoz/cmd_test_fix
  8fd0c38 Merge pull request #49171 from Ch3LL/bp-49103

• PR #49188: (cachedout) Fix bug in test_pkg @ 2018-08-18 17:36:22 UTC
  5f905d7 Merge pull request #49188 from cachedout/fix_test_pkg
  2cd6519 Fix bug in test_pkg
- **PR #49056**: (Ch3LL) Add orch runner with mine.get integration tests @ 2018-08-18 12:54:48 UTC
  - 6fb8d4a Merge pull request #49056 from Ch3LL/test_mine
  - 3a8fed5 Handle race condition when running mine.update in orch mine test
  - b4e421c Add orch runner with mine.get integration tests

- **PR #49126**: (The-Loeki) TLS cert_info fixes @ 2018-08-18 12:19:33 UTC
  - **PR #49123**: (The-Loeki) Fix return of tls.cert_info extensions (refs: #49126)
  - 0d0e11d Merge pull request #49126 from The-Loeki/tls-impr
  - 22240c0 Merge branch '2018.3' into tls-impr
  - 3ce23e tls.cert_info: strip newlines/spaces from extensions
  - d522d01 tls alt_names fix
  - d435dbc Fix bytes-return of tls.cert_info extensions
  - 9c7d3ea TLS cert_info: Accept IP Addresses as valid alt_names
  - 7d6eacf tls.check_info: Allow PEM as string input

- **PR #49186**: (dwoz) Fix typo in #49180 @ 2018-08-18 12:07:00 UTC
  - **PR #49180**: (dwoz) Cherry-pick test fixes (refs: #49186)
  - 7dd70eb Merge pull request #49186 from dwoz/test_fixes
  - 95efc51 Fix typo

- **PR #49180**: (dwoz) Cherry-pick test fixes (refs: #49186) @ 2018-08-18 04:08:17 UTC
  - 6d57ac1 Merge pull request #49180 from dwoz/test_fixes
  - 3c49544 Account for file renames
  - acc144d Fix directory unit test
  - a7ee07a Fix is_windows checks
  - 74b197f Account for normalized dirs in unit tests
  - a18d937 Merge pull request #49167 from dwoz/filefix

- **PR #49091**: (terminalmage) Rename/re-organize test files in 2018.3 branch @ 2018-08-17 12:26:44 UTC
  - **PR #47337**: (terminalmage) Modify runtests.py to run a subset of tests based on filenames (refs: #49091)
  - 8bd7e5 Merge pull request #49091 from terminalmage/restore-test-files
  - 3d8523b Fix import for moved module
  - 613f061 Lint
  - 81f272f Rename outputter tests to match naming convention
  - fba0336 Rename venafi test module to bring it closer to the naming convention
  - 9c14500 Rename exec module integration test files to respect naming convention
  - 91f0a9e Rename providers to clouds to respect naming convention
  - d56dce4 Rename "providers" dir to "clouds" to respect naming convention
  - f1b7d54 Rename virtualenv state test module to respect naming convention
  - c1f94db Split ssh state tests into separate modules to respect naming convention
- 9c8ba4a Split mysql database tests into two modules to respect naming convention
- d51748e Rename some files to avoid them being identified as test modules
- 1fc9c7f Rename acl unit test module to confirm to naming convention
- 160223d Consolidate/move fileclient/fileserver tests to conform to naming convention
- 1aacf77 Rename/consolidate salt.utils unit tests to conform to naming convention
- 5a0990b Rename pillar unit test modules to reflect naming convention
- 516594b Consolidate netapi tests and move them to reflect naming convention
- 8f5e6f5 Consolidate and move salt-ssh unit tests to proper location
- 9801ce3 Consolidate and move loader tests to test/unit/test_loader.py
- f72bfc5 Rename beacon unit test modules to conform with naming convention
- fa7ecb6 Move inspectlib tests to conform with naming convention
- 81e3823 Move shared kernalpkg test cases to tests/support/
- e0d95b6 Consolidate misplaced tests into tests/unit/test_config.py
- 3a1ec12 Rename slack engine test file to respect naming convention
- c9c9d20 Rename test_map_conf test file to respect naming convention
- 5c936c0 Rename the aptpkg state module to respect naming convention
- ac50eb8 Remove redundant "test" from filename
- b03a563 Move jinja templating tests alongside salt/utils/jinja.py's tests
- b49d8df Fix bad copypasta in docstring
- 069102b Rename sentry returner test to match naming convention
- 2398083 Use tests.support.paths instead of deprecated integration module
- ff842d Move salt.utils.context tests to their proper location
- d69069b Move context cache tests to their proper location

**PR #49062:** (weswhet) fix memoize on available macOS services @ 2018-08-15 15:34:25 UTC
- c8510a6 Merge pull request #49062 from weswhet/fix-mac-available-services
- f1b40c4 decorator link fix, updating context names, as well as updating macutils tests for latest changes
- 1e4497d fixing an issue with memoize on macOS services, switching to useing __context__ instead

**ISSUE #49100:** (pruiz) salt.utils.yamldumper.dump/safe_dump incorrectly return 'str' instead of unicode on python2.7 (centos) (refs: #49125)

**PR #49125:** (terminalmage) Ensure that we don't feed jinja2Markup() a str type @ 2018-08-15 04:02:30 UTC
- 21435be Merge pull request #49125 from terminalmage/issue49100
- ec258e2 Add integration tests for yaml and json filters
- 5f16cf Ensure that we don't feed jinja2Markup() a str type
32.2.64 Salt 2018.3.5 Release Notes

Version 2018.3.5 is a CVE-fix release for 2018.3.0.

Security Fix

CVE-2019-17361

With the Salt NetAPI enabled in addition to having a SSH roster defined, unauthenticated access is possible when specifying the client as SSH. Additionally, when the raw_shell option is specified any arbitrary command may be run on the Salt master when specifying SSH options.

32.2.65 Salt 2017.7.0 Release Notes - Codename Nitrogen

32.2.66 Python 3

The 2017.7 Salt Release adds initial Python 3 support.

The default Python version of Salt will remain Python 2, although Python 3 packages will be supplied for users who want to help test this new feature.

32.2.67 Python 2.6 Deprecation

Salt will no longer support Python 2.6. We will provide python2.7 packages on our repo for RedHat and CentOS 6 to ensure users can still run Salt on these platforms.

As this will impact the installation of additional dependencies for salt modules please use pip packages if there is not a package available in a repository. You will need to install the python27-pip package to get access to the correct pip27 executable:

```
yum install python27-pip
```

32.2.68 Known Issues

The following salt-cloud drivers have known issues running with Python 3. These drivers will not work with Python 3, and Python 2.7 should be used instead:

- Joyent
  - When running under Python 3, users who require Unicode support should ensure that a locale is set on their machines. Users using the C locale are advised to switch to a UTF-aware locale to ensure proper functionality with Salt with Python 3.

Remember to update the Salt Master first

Salt's policy has always been that when upgrading, the minion should never be on a newer version than the master. Specifically with this update, because of changes in the fileclient, the 2017.7 minion requires a 2017.7 master.

Backwards compatibility is still maintained, so older minions can still be used.

More information can be found in the Salt FAQ
States Added for Management of systemd Unit Masking

The `service.masked` and `service.umasked` states have been added to allow Salt to manage masking of systemd units.

Additionally, the following functions in the `systemd` execution module have changed to accommodate the fact that indefinite and runtime masks can co-exist for the same unit:

- `service.masked` - The return from this function has changed from previous releases. Before, `False` would be returned if the unit was not masked, and the output of `systemctl is-enabled <unit name>` would be returned if the unit was masked. However, since indefinite and runtime masks can exist for the same unit at the same time, this function has been altered to accept a `runtime` argument. If `True`, the minion will be checked for a runtime mask assigned to the named unit. If `False`, then the minion will be checked for an indefinite mask. If one is found, `True` will be returned. If not, then `False` will be returned.

- `service.masked` - This function used to just run `systemctl is-enabled <unit name>` and based on the return from this function the corresponding mask type would be removed. However, if both runtime and indefinite masks are set for the same unit, then `systemctl is-enabled <unit name>` would show just the indefinite mask. The indefinite mask would be removed, but the runtime mask would remain. The function has been modified to accept a `runtime` argument, and will attempt to remove a runtime mask if that argument is set to `True`. If set to `False`, it will attempt to remove an indefinite mask.

These new `runtime` arguments default to `False`.

Pillar Encryption

Beginning in 2016.3.0 the CLI pillar data passed to several functions could conditionally be passed through a renderer to be decrypted. This functionality has now been extended to pillar SLS files as well. See [here](#) for detailed documentation on this feature.

Grains Changes

- The `osmajorrelease` grain has been changed from a string to an integer. State files, especially those using a templating language like Jinja, may need to be adjusted to account for this change.

- Add ability to specify disk backing mode in the VMWare salt cloud profile.

State Module Changes

- The `service.running` and `service.dead` states now support a `no_block` argument which, when set to `True` on systemd minions, will start/stop the service using the `--no-block` flag in the `systemctl` command. On non-systemd minions, a warning will be issued.

- The `module.run` state has dropped its previous syntax with `m_` prefix for reserved keywords. Additionally, it allows running several functions in a batch.

Note: It is necessary to explicitly turn on the new behavior (see below)

```bash
# Before
run_something:
  module.run:
    - name: mymodule.something
    - m_name: 'some name'
```

(continues on next page)
- **kwargs**: 
  
  ```
  first_arg: 'one',
  second_arg: 'two',
  do_stuff: 'True'
  ```

# After
```python
run_something:
  module.run:
    - mymodule.something:
      - name: some name
      - first_arg: one
      - second_arg: two
      - do_stuff: True
```

Since a lot of users are already using `module.run` states, this new behavior must currently be explicitly turned on, to allow users to take their time updating their SLS files. However, please keep in mind that the new syntax will take effect in the next feature release of Salt (Oxygen) and the old usage will no longer be supported at that time.

Another feature of the new `module.run` is that it allows calling many functions in a single batch, such as:

```python
run_something:
  module.run:
    - mymodule.function_without_parameters:
    - mymodule.another_function:
      - myparam
      - my_other_param
```

In a rare case that you have a function that needs to be called several times but with the different parameters, an additional feature of “tagging” is to the rescue. In order to tag a function, use a colon delimiter. For example:

```python
run_something:
  module.run:
    - mymodule.same_function:1:
    - mymodule.same_function:2:
      - myparam
      - my_other_param
    - mymodule.same_function:3:
      - foo: bar
```

The example above will run `mymodule.same_function` three times with the different parameters.

To enable the new behavior for `module.run`, add the following to the minion config file:

```text
use_superseded:
  - module.run
```

- The default for the `fingerprint_hash_type` option used in the present function in the `ssh` state changed from `md5` to `sha256`. 
Execution Module Changes

- Several functions in the systemd execution module have gained a no_block argument, which when set to True will use --no-block in the systemctl command.

- In the solarisips pkg module, the default value for the refresh argument to the list_upgrades function has been changed from False to True. This makes the function more consistent with all of the other pkg modules (The other pkg.list_upgrades functions all defaulted to True).

- The functions which handle masking in the systemd module have changed. These changes are described above alongside the information on the new states which have been added to manage masking of systemd units.

- The pkg.list_repo_pkgs function for yum/dnf-based distros has had its default output format changed. In prior releases, results would be organized by repository. Now, the default for each package will be a simple list of versions. To get the old behavior, pass byrepo=True to the function.

- A pkg.list_repo_pkgs function has been added for both Debian/Ubuntu and Arch Linux-based distros.

- The system module changed its return format from "HH:MM AM/PM" to "HH:MM:SS AM/PM" for get_system_time.

- The default for the fingerprint_hash_type option used in the ssh execution module changed from md5 to sha256.

Proxy Module Changes

The proxy_merge_grains_in_module configuration variable introduced in 2016.3, has been changed, defaulting to True.

The connection with the remote device is kept alive by default, when the module implements the alive function and proxy_keep_alive is set to True. The polling interval is set using the proxy_keep_alive_interval option which defaults to 1 minute.

The developers are also able to use the proxy_always_alive, when designing a proxy module flexible enough to open the connection with the remote device only when required.

Wildcard Versions in pkg.installed States

- The pkg.installed state now supports wildcards in package versions, for the following platforms:
  - SUSE/openSUSE Leap/Thumbleweed
  - Debian/Ubuntu
  - RHEL/CentOS
  - Arch Linux

This support also extends to any derivatives of these distros, which use the aptpkg, yumpkg, or pacman providers for the pkg virtual module.

Using wildcards can be useful for packages where the release name is built into the version in some way, such as for RHEL/CentOS which typically has version numbers like 1.2.34-5.el7. An example of the usage for this would be:
mypkg:
    pkg.installed:
        - version: '1.2.34*'

Master Configuration Additions

- **syndic_forward_all_events** - Option on multi-syndic or single when connected to multiple masters to be able to send events to all connected masters.

- **eauth_acl_module** - In case external auth is enabled master can get authenticate and get the authorization list from different auth modules.

- **keep_acl_in_token** - Option that allows master to build ACL once for each user being authenticated and keep it in the token.

Minion Configuration Additions

- **pillarenv_from_saltenv** - When set to True (default is False), the pillarenv option will take the same value as the effective saltenv when running states. This would allow a user to run `salt '*' state.apply mysls saltenv=dev`, and the SLS for both the state and pillar data would be sourced from the dev environment, essentially the equivalent of running `salt '*' state.apply mysls saltenv=dev pillarenv=dev`. Note that if pillarenv is set in the minion config file, or if pillarenv is provided on the CLI, it will override this option.

salt-api Changes

The `rest_cherrypy` netapi module has received a few minor improvements:

- A CORS bugfix.
- A new /token convenience endpoint to generate Salt eauth tokens.
- A proof-of-concept JavaScript single-page application intended to demonstrate how to use the Server-Sent Events stream in an application. It is available in a default install by visiting the /app URL in a browser.

Python API Changes

**expr_form** Deprecation

The `LocalClient`'s `expr_form` argument has been deprecated and renamed to `tgt_type`. This change was made due to numerous reports of confusion among community members, since the targeting method is published to minions as `tgt_type`, and appears as `tgt_type` in the job cache as well.

While `expr_form` will continue to be supported until the 2019.2.0 release cycle (two major releases after this one), those who are using the `LocalClient` (either directly, or implicitly via a netapi module) are encouraged to update their code to use `tgt_type`.

32.2. Previous releases
**full_return Argument in LocalClient and RunnerClient**

An full_return argument has been added to the cmd and cmd_sync methods in LocalClient and RunnerClient which causes the return data structure to include job meta data such as `retcode`.

This is useful at the Python API:

```python
>>> import salt.client
>>> client = salt.client.LocalClient()
>>> client.cmd("*", "cmd.run", ["return 1"], full_return=True)
{'jerry': {'jid': '20170520151213898053', 'ret': '', 'retcode': 1}}
```

As well as from salt-api:

```bash
% curl -b /tmp/cookies.txt -sS http://localhost:8000 \
   -H 'Content-type: application/json' \
   -d '[[
      "client": "local",
      "tgt": "*",
      "fun": "cmd.run",
      "arg": ["return 1"],
      "full_return": true
   ]]

{"return": [["jerry": {"jid": "2017052015131079653", "retcode": 1, "ret": ""}]}}
```

**Jinja**

**Filters**

New filters in 2017.7.0:

- `to_bool`
- `exactly_n_true`
- `exactly_one_true`
- `quote`
- `regex_search`
- `regex_match`
- `uuid`
- `is_list`
- `is_iter`
- `min`
- `max`
- `avg`
- `union`
- `intersect`
- difference
- symmetric_difference
- is_sorted
- compare_lists
- compare_dicts
- is_hex
- contains_whitespace
- substring_in_list
- check_whitelist_blacklist
- date_format
- str_to_num
- to_bytes
- json_decode_list
- json_decode_dict
- rand_str
- md5
- sha256
- sha512
- base64_encode
- base64_decode
- hmac
- http_query
- is_ip
- is_ipv4
- is_ipv6
- ipaddr
- ipv4
- ipv6
- network_hosts
- network_size
- gen_mac
- mac_str_to_bytes
- dns_check
- is_text_file
- is_binary_file
- is_empty_file
Logs

Another new feature - although not limited to Jinja only - is being able to log debug messages directly from the template:

```{-% do salt.log.error('logging from jinja') -%}
```

See the logs paragraph.

Network Automation

NAPALM

Introduced in 2016.11, the modules for cross-vendor network automation have been improved, enhanced and widened in scope:

- Manage network devices like servers: the NAPALM modules have been transformed so they can run in both proxy and regular minions. That means, if the operating system allows, the salt-minion package can be installed directly on the network gear. Examples of such devices (also covered by NAPALM) include: Arista, Cumulus, Cisco IOS-XR or Cisco Nexus.

- Not always alive: in certain less dynamic environments, maintaining the remote connection permanently open with the network device is not always beneficial. In those particular cases, the user can select to initialize the connection only when needed, by specifying the field `always_alive: false` in the `proxy configuration` or using the `proxy_always_alive` option.

- Proxy keepalive: due to external factors, the connection with the remote device can be dropped, e.g.: packet loss, idle time (no commands issued within a couple of minutes or seconds), or simply the device decides to kill the process. In 2017.7.0 we have introduced the functionality to re-establish the connection. One can disable this feature through the `proxy_keep_alive` option and adjust the polling frequency specifying a custom value for `proxy_keep_alive_interval`, in minutes.

New modules:

- **Netconfig state module** - Manage the configuration of network devices using arbitrary templates and the Salt-specific advanced templating methodologies.

- **Network ACL execution module** - Generate and load ACL (firewall) configuration on network devices.

- **Network ACL state** - Manage the firewall configuration. It only requires writing the pillar structure correctly!

- **NAPALM YANG execution module** - Parse, generate and load native device configuration in a standard way, using the OpenConfig/IETF models. This module contains also helpers for the states.

- **NAPALM YANG state module** - Manage the network device configuration according to the YANG models (OpenConfig or IETF).
• **NET finder** - Runner to find details easily and fast. It’s smart enough to know what you are looking for. It will search in the details of the network interfaces, IP addresses, MAC address tables, ARP tables and LLDP neighbors.

• **BGP finder** - Runner to search BGP neighbors details.

• **NAPALM syslog** - Engine to import events from the napalm-logs library into the Salt event bus. The events are based on the syslog messages from the network devices and structured following the OpenConfig/IETF YANG models.

• **NAPALM Helpers** - Generic helpers for NAPALM-related operations. For example, the Compliance report function can be used inside the state modules to compare the expected and the existing configuration.

New functions:

• **Configuration getter** - Return the whole configuration of the network device.

• **Optics getter** - Fetches the power usage on the various transceivers installed on the network device (in dBm).

New grains: *Host, Host DNS, Username* and *Optional args*.

**Custom Refspecs in GitFS / git_pillar / winrepo**

It is now possible to specify the refspecs to use when fetching from remote repositories for GitFS, git_pillar, and winrepo. More information on how this feature works can be found here in the GitFS Walkthrough. The git_pillar and winrepo versions of this feature work the same as their GitFS counterpart.

**git_pillar "mountpoints" Feature Added**

See here for detailed documentation.

**Big Improvements to Docker Support**

The old docker state and execution modules have been moved to salt-contrib. The dokerng execution module has been renamed to docker and now serves as Salt’s official Docker execution module.

The old dokerng state module has been split into 4 state modules:

• **docker_container** - States to manage Docker containers

• **docker_image** - States to manage Docker images

• **docker_volume** - States to manage Docker volumes

• **docker_network** - States to manage Docker networks

The reason for this change was to make states and requisites more clear. For example, imagine this SLS:

```yaml
myuser/appimage:
  docker.image_present:
    - sls: docker.images.appimage

myapp:
  docker.running:
    - image: myuser/appimage
```

(continues on next page)
require:
- docker: myuser/appimage

The new syntax would be:

```
myuser/appimage:
  docker_image.present:
    - sls: docker.images.appimage

myapp:
  docker_container.running:
    - image: myuser/appimage
    - require:
      - docker_image: myuser/appimage
```

This is similar to how Salt handles MySQL, MongoDB, Zabbix, and other cases where the same execution module is used to manage several different kinds of objects (users, databases, roles, etc).

**Note:** With the Moby announcement coming at this year's DockerCon, Salt's `docker` execution module (as well as the state modules) work interchangeably when `docker` is replaced with `moby` (e.g. `moby_container.running`, `moby_image.present`, `moby.inspect_container`, etc).

The old syntax will continue to work until the 2019.2.0 release of Salt. The old `docker` naming will also continue to work until that release, so no immediate changes need to be made to your SLS files (unless you were still using the old docker states that have been moved to `salt-contrib`).

The `docker_container.running` state has undergone a significant change in how it determines whether or not a container needs to be replaced. Rather than comparing individual arguments to their corresponding values in the named container, a temporary container is created (but not started) using the passed arguments. The two containers are then compared to each other to determine whether or not there are changes, and if so, the old container is stopped and destroyed, and the temporary container is renamed and started.

Salt still needs to translate arguments into the format which docker-py expects, but if it does not properly do so, the `skip_translate` argument can be used to skip input translation on an argument-by-argument basis, and you can then format your SLS file to pass the data in the format that the docker-py expects. This allows you to work around any changes in Docker's API or issues with the input translation, and continue to manage your Docker containers using Salt. Read the documentation for `skip_translate` for more information.

**Note:** When running the `docker_container.running` state for the first time after upgrading to 2017.7.0, your container(s) may be replaced. The changes may show diffs for certain parameters which say that the old value was an empty string, and the new value is `None`. This is due to the fact that in prior releases Salt was passing empty strings for these values when creating the container if they were undefined in the SLS file, where now Salt simply does not pass any arguments not explicitly defined in the SLS file. Subsequent runs of the state should not replace the container if the configuration remains unchanged.
New SSH Cache Roster

The SSH cache Roster has been rewritten from scratch to increase its usefulness. The new roster supports all minion matchers, so it is now possible to target minions identically through salt and salt-ssh.

Using the new roster_order configuration syntax it’s now possible to compose a roster out of any combination of grains, pillar and mine data and even Salt SDB URLs. The new release is also fully IPv4 and IPv6 enabled and even has support for CIDR ranges.

Salt-SSH Default Options

Defaults for rosters can now be set, so that they don’t have to be set on every entry in a roster or specified from the commandline.

The new option is roster_defaults and is specified in the master config file:

```
roster_defaults:
  user: daniel
  sudo: True
  priv: /root/.ssh/id_rsa
  tty: True
```

Blacklist or Whitelist Extmod Sync

The modules that are synced to minions can now be limited.

The following configuration options have been added for the master:

- extmod_whitelist
- extmod_blacklist

and for the minion:

- extmod_whitelist
- extmod_blacklist

Additional Features

- The mine.update function has a new optional argument mine_functions that can be used to refresh mine functions at a more specific interval than scheduled using the mine_interval option. However, this argument can be used by explicit schedule. For example, if we need the mines for net.lldp to be refreshed every 12 hours:

  ```
  schedule:
  lldp_mine_update:
    function: mine.update
    kwargs:
      mine_functions:
        net.lldp: []
    hours: 12
  ```

- The salt runner has a new function: salt.execute. It is mainly a shortcut to facilitate the execution of various functions from other runners, e.g.:
ret1 = __salt__['salt.execute']("*", "mod.fun")

New Modules

Beacons

- salt.beacons.log

Cache

- salt.cache.redis_cache

Engines

- salt.engines.stalekey
- salt.engines.junos_syslog
- salt.engines.napalm_syslog

Execution modules

- salt.modules.apk
- salt.modules.at_solaris
- salt.modules.boto_kinesis
- salt.modules.boto3_elasticache
- salt.modules.boto3_route53
- salt.modules.capirca_acl
- salt.modules.freebsd_update
- salt.modules.grafana4
- salt.modules.heat
- salt.modules.icinga2
- salt.modules.kubernetesmod
- salt.modules.logmod
- salt.modules.mattermost
- salt.modules.namecheap_dns
- salt.modules.namecheap_domains
- salt.modules.namecheap_ns
- salt.modules.namecheap_users
- salt.modules.namecheap_ssl
- salt.modules.napalm
• `salt.modules.napalm_acl`
• `salt.modules.napalm_yang_mod`
• `salt.modules.pdbedit`
• `salt.modules.solrcloud`
• `salt.modules.statuspage`
• `salt.modules.zonecfg`
• `salt.modules.zoneadm`

Grains

• `salt.grains.metadata`
• `salt.grains.mdata`

Outputters

• `salt.output.table_out`

Pillar

• `salt.pillar.postgres`
• `salt.pillar.vmware_pillar`

Returners

• `salt.returners.mattermost_returner`
• `salt.returners.highstate_return`

Roster

• `salt.roster.cache`

Runners

• `salt.runners.bgp`
• `salt.runners.mattermost`
• `salt.runners.net`
SDB

- salt.sdb.yaml
- salt.sdb.tism
- salt.sdb.cache

States

- salt.states.boto_kinesis
- salt.states.boto_efs
- salt.states.boto3_elasticache
- salt.states.boto3_route53
- salt.states.docker_container
- salt.states.docker_image
- salt.states.docker_network
- salt.states.docker_volume
- salt.states.elasticsearch
- salt.states.grafana4_dashboard
- salt.states.grafana4_datasource
- salt.states.grafana4_org
- salt.states.grafana4_user
- salt.states.heat
- salt.states.icinga2
- salt.states.influxdb_continuous_query
- salt.states.influxdb_retention_policy
- salt.states.kubernetes
- salt.states.logadm
- salt.states.logrotate
- salt.states.msteams
- salt.states.netacl
- salt.states.netconfig
- salt.states.netyang
- salt.states.nix
- salt.states.pdbedit
- salt.states.solrcloud
- salt.states.statuspage
- salt.states.vault
• `salt.states.win_wua`
• `salt.states.zone`

**Deprecations**

**General Deprecations**

• Removed support for aliasing `cmd.run` to `cmd.shell`.
• Removed support for Dulwich from `GitFS`.
• Beacon configurations should be lists instead of dictionaries.
• The `PidfileMixin` has been removed. Please use `DaemonMixIn` instead.
• The `use_pending` argument was removed from the `salt.utils.event.get_event` function.
• The `pending_tags` argument was removed from the `salt.utils.event.get_event` function.

**Configuration Option Deprecations**

• The `client_acl` configuration option has been removed. Please use `publisher_acl` instead.
• The `client_acl_blacklist` configuration option has been removed. Please use `publisher_acl_blacklist` instead.
• The `win_gitrepos` configuration option has been removed. Please use `winrepo_remotes` option instead.
• The `win_repo` configuration option has been removed. Please use `winrepo_dir` instead.
• The `win_repo_mastercachefile` configuration option has been removed. Please use the `winrepo_cachefile` option instead.

**Module Deprecations**

The `git` execution module had the following changes:
• The `fmt` argument was removed from the `archive` function. Please use `format` instead.
• The `repository` argument was removed from the `clone` function. Please use `url` instead.
• The `is_global` argument was removed from the `config_set` function. Please use `global` instead.
• The `branch` argument was removed from the `merge` function. Please use `rev` instead.
• The `branch` argument was removed from the `push` function. Please use `rev` instead.

The `glusterfs` execution module had the following functions removed:
• `create`: Please use `create_volume` instead.
• `delete`: Please use `delete_volume` instead.
• `list_peers`: Please use `peer_status` instead.

The `htpasswd` execution module had the following function removed:
• `useradd_all`: Please use `useradd` instead.
The `img` execution module has been removed. All of its associated functions were marked for removal in the 2017.7.0 release. The functions removed in this module are mapped as follows:

- `mount_image/mnt_image`: Please use `mount.mount` instead.
- `umount_image`: Please use `mount.umount` instead.
- `bootstrap`: Please use `genesis.bootstrap` instead.

The `smartos_virt` execution module had the following functions removed:

- `create`: Please use `start` instead.
- `destroy`: Please use `stop` instead.
- `list_vms`: Please use `list_domains` instead.

The `virt` execution module had the following functions removed:

- `create`: Please use `start` instead.
- `destroy`: Please use `stop` instead.
- `list_vms`: Please use `list_domains` instead.

The `virtualenv_mod` execution module had the following changes:

- The `package_or_requirement` argument was removed from both the `get_resource_path` and the `get_resource_content` functions. Please use `package` instead.
- The `resource_name` argument was removed from both the `get_resource_path` and `get_resource_content` functions. Please use `resource` instead.

The `win_repo` execution module had the following changes:

- The `win_repo_source_dir` option was removed from the `win_repo` module. Please use `winrepo_source_dir` instead.

The `xapi` execution module had the following functions removed:

- `create`: Please use `start` instead.
- `destroy`: Please use `stop` instead.
- `list_vms`: Please use `list_domains` instead.

The `zypper` execution module had the following function removed:

- `info`: Please use `info_available` instead.

**Pillar Deprecations**

- Support for the `raw_data` argument for the `file_tree` ext_pillar has been removed. Please use `keep_newline` instead.
- SQLite3 database connection configuration previously had keys under pillar. This legacy compatibility has been removed.
Proxy Minion Deprecations

- The \texttt{proxy\_merge\_grains\_in\_module} default has been switched from \texttt{False} to \texttt{True}.

Salt-API Deprecations

- The \texttt{SaltAPI.run()} function has been removed. Please use the \texttt{SaltAPI.start()} function instead.

Salt-Cloud Deprecations

- Support for using the keyword \texttt{provider} in salt-cloud provider config files has been removed. Please use \texttt{driver} instead. The \texttt{provider} keyword should now only be used in cloud profile config files.

Salt-SSH Deprecations

- The \texttt{wipe\_ssh} option for \texttt{salt\_ssh} has been removed. Please use the \texttt{ssh\_wipe} option instead.

State Deprecations

The \texttt{apache\_conf} state had the following functions removed:
- \texttt{disable}: Please use \texttt{disabled} instead.
- \texttt{enable}: Please use \texttt{enabled} instead.

The \texttt{apache\_module} state had the following functions removed:
- \texttt{disable}: Please use \texttt{disabled} instead.
- \texttt{enable}: Please use \texttt{enabled} instead.

The \texttt{apache\_site} state had the following functions removed:
- \texttt{disable}: Please use \texttt{disabled} instead.
- \texttt{enable}: Please use \texttt{enabled} instead.

The \texttt{chocolatey} state had the following functions removed:
- \texttt{install}: Please use \texttt{installed} instead.
- \texttt{uninstall}: Please use \texttt{uninstalled} instead.

The \texttt{git} state had the following changes:
- The \texttt{config} function was removed. Please use \texttt{config\_set} instead.
- The \texttt{is\_global} option was removed from the \texttt{config\_set} function. Please use \texttt{global} instead.
- The \texttt{always\_fetch} option was removed from the \texttt{latest} function, as it no longer has any effect. Please see the 2015.8.0 release notes for more information.
- The \texttt{force} option was removed from the \texttt{latest} function. Please use \texttt{force\_clone} instead.
- The \texttt{remote\_name} option was removed from the \texttt{latest} function. Please use \texttt{remote} instead.

The \texttt{glusterfs} state had the following function removed:
- \texttt{created}: Please use \texttt{volume\_present} instead.
The `openvswitch_port` state had the following change:

- The `type` option was removed from the `present` function. Please use `tunnel_type` instead.

**Build Notes**

**Windows Installer Packages**

Windows Installer packages have been patched with the following PR: 42347

### 32.2.69 Salt 2017.7.1 Release Notes

Version 2017.7.1 is a bugfix release for 2017.7.0.

**Statistics**

- Total Merges: 16
- Total Issue References: 12
- Total PR References: 31
- Contributors: 11 (Ch3LL, TiteiKo, garethgreenaway, gtmanfred, llua, rallytime, seedickcode, skizunov, terminalmage, twangboy, whiteinge)

**Security Fix**

CVE-2017-12791 Maliciously crafted minion IDs can cause unwanted directory traversals on the Salt-master

Correct a flaw in minion id validation which could allow certain minions to authenticate to a master despite not having the correct credentials. To exploit the vulnerability, an attacker must create a salt-minion with an ID containing characters that will cause a directory traversal. Credit for discovering the security flaw goes to: Vernhk@qq.com

**Changelog for v2017.7.0..v2017.7.1**

Generated at: 2018-05-26 20:28:44 UTC

- **ISSUE** saltstack/salt-jenkins#460: (Ch3LL) decorator tests failing on python3 (refs: #42548)
- **PR** #42595: (gtmanfred) make sure to pass arg as well @ 2017-07-28 16:21:58 UTC
  - **PR** #42548: (gtmanfred) pass in empty kwarg for reactor (refs: #42595)
  - a50fe5433a Merge pull request #42595 from gtmanfred/2017.7.1
  - 8f73804b24 Make sure to pass arg as well
- **PR** #42597: (rallytime) Back-port #42590 to 2017.7.1 @ 2017-07-28 00:20:01 UTC
  - **PR** #42590: (TiteiKo) Fix missing tornado import (refs: #42597)
  - 3b583330de Merge pull request #42597 from rallytime/bp-42590
  - 8818b06f22 Fix missing tornado import
- **ISSUE** #42404: (gabekahen) [2017.7] file.managed with cmd_check "No such file or directory" (refs: #42411)
- **ISSUE** #33708: (pepinje) visudo check command leaves cache file in /tmp (refs: #38063, #42411)
- PR #42598: (rallytime) Back-port #42411 to 2017.7.1 @ 2017-07-28 00:19:13 UTC
  - PR #42411: (seedickcode) Fix file.managed check_cmd file not found - Issue #42404 (refs: #42598)
  - PR #38063: (lua) tmp file clean up in file.manage - fix for #33708 (refs: #42411)
  - 76f1e53e10 Merge pull request #42598 from rallytime/bp-42411
  - 190cdb8693 Fix file.managed check_cmd file not found - Issue #42404
- PR #42564: (rallytime) Back-port #42555 to 2017.7.1 @ 2017-07-26 17:32:02 UTC
  - PR #42555: (Ch3LL) add changelog to 2017.7.1 release notes (refs: #42564)
  - 76f1e53e10 Merge pull request #42555 from rallytime/bp-42555
- ISSUE saltstack/salt-jenkins#460: (Ch3LL) decorator tests failing on python3 (refs: #42548)
- PR #42548: (gtmanfred) pass in empty kwarg for reactor (refs: #42595) @ 2017-07-26 00:41:20 UTC
  - 711b742c54 Merge pull request #42548 from gtmanfred/2017.7.1
  - 0257c1dc32 pass in empty kwarg for reactor
  - b948e980d2 update chunk, not kwarg in chunk
- ISSUE #42519: (suhec) Error when installing package from file under Arch Linux (refs: #42522)
- PR #42522: (gtmanfred) pacman wildcard is only for repository installs @ 2017-07-24 20:51:05 UTC
  - 50c1635dce Merge pull request #42522 from gtmanfred/2017.7.1
  - 7787fb9e1b pacman wildcard is only for repository installs
- PR #42508: (rallytime) Back-port #42474 to 2017.7.1 @ 2017-07-24 20:49:51 UTC
  - PR #42474: (whiteinge) Cmd arg kwarg parsing test (refs: #42508)
  - PR #39646: (terminalmage) Handle deprecation of passing string args to load_args_and_kwargs (refs: #42474)
  - 05c07ac049 Merge pull request #42508 from rallytime/bp-42474
  - 6246f3648e Lint fixes
  - d246a5fc61 Add back support for string kwargs
  - 854e098aa0 Add LocalClient.cmd test for arg/kwarg parsing
- ISSUE #42427: (grichmond-salt) Issue Passing Variables created from load_json as Inline Pillar Between States (refs: #42435)
- PR #42472: (rallytime) Back-port #42435 to 2017.7.1 @ 2017-07-24 15:11:13 UTC
  - PR #42435: (terminalmage) Modify our custom YAML loader to treat unicode literals as unicode strings (refs: #42472)
  - 95fe2558e4 Merge pull request #42472 from rallytime/bp-42435
  - 5c47af5b98 Modify our custom YAML loader to treat unicode literals as unicode strings
- ISSUE #42374: (tyhunt99) [2017.7.0] salt-run manage.versions throws exception if minion is offline or unresponsive (refs: #42436)
• PR #42473: (rallytime) Back-port #42436 to 2017.7.1 @ 2017-07-24 15:10:29 UTC
  - PR #42436: (garethgreenaway) Fixes to versions function in manage runner (refs: #42473)
  - 5b99d45f54 Merge pull request #42473 from rallytime/bp-42436
  - 82ed919803 Updating the versions function inside the manage runner to account for when a minion is offline and we are unable to determine its version.

• ISSUE #42381: (zebooka) Git.detached broken in 2017.7.0 (refs: #42399)

• ISSUE #38878: (tomlaredo) [Naming consistency] git.latest "rev" option VS git.detached "ref" option (refs: #38898)

• PR #42471: (rallytime) Back-port #42399 to 2017.7.1 @ 2017-07-24 15:09:50 UTC
  - PR #42399: (rallytime) Update old "ref" references to "rev" in git.detached state (refs: #42471)
  - 3d1a2d3f9f Merge pull request #42471 from rallytime/bp-42399
  - b9a466f5ea Update old "ref" references to "rev" in git.detached state

• ISSUE #42400: (Enquier) Conflict in execution of passing pillar data to orch/reactor event executions 2017.7.0 (refs: #42031)

• PR #42470: (rallytime) Back-port #42031 to 2017.7.1 @ 2017-07-24 15:09:30 UTC
  - PR #42031: (skizunov) Fix: Reactor emits critical error (refs: #42470)
  - 09766bcbce Merge pull request #42031 from rallytime/bp-42031
  - 0a0c6287a4 Fix: Reactor emits critical error

• ISSUE #41949: (jrporcaro) Event returner doesn't work with Windows Master (refs: #42027)

• PR #42469: (rallytime) Back-port #42027 to 2017.7.1 @ 2017-07-21 22:41:02 UTC
  - PR #42027: (gtmanfred) import salt.minion for EventReturn for Windows (refs: #42469)
  - d7b172a15b Merge pull request #42469 from rallytime/bp-42027
  - c10196f8e7 import salt.minion for EventReturn for Windows

• PR #42466: (rallytime) Back-port #42452 to 2017.7.1 @ 2017-07-21 19:41:24 UTC
  - PR #42452: (Ch3LL) update windows urls to new py2/py3 naming scheme (refs: #42466)
  - 8777b1a825 Merge pull request #42466 from rallytime/bp-42452
  - c10196f8e7 update windows urls to new py2/py3 naming scheme

• PR #42439: (rallytime) Back-port #42409 to 2017.7.1 @ 2017-07-21 17:38:10 UTC
  - PR #42409: (twangboy) Add Scripts to build Py3 on Mac (refs: #42439)
  - fc8aaf41d0 Merge pull request #42439 from rallytime/bp-42409
  - 81769648b1 Remove build and dist, sign pkgs
  - 2c14d92a07 Fix hard coded pip path
  - 82f6d7c2e1 Add support for Py3
  - 247847246 Update Python and other reqs

• ISSUE #42403: (astronouth7303) [2017.7] Pillar empty when state is applied from orchestrate (refs: #42433)

• PR #42441: (rallytime) Back-port #42433 to 2017.7.1 @ 2017-07-21 17:37:01 UTC
- PR #42433: (terminalmage) Only force saltenv/pillarenv to be a string when not None (refs: #42441)
- 660400560b Merge pull request #42441 from rallytime/bp-42433
- 17f347123a Only force saltenv/pillarenv to be a string when not None

32.2.70 Salt 2017.7.2 Release Notes

Version 2017.7.2 is a bugfix release for 2017.7.0.

Statistics

- Total Merges: 329
- Total Issue References: 73
- Total PR References: 236
- Contributors: 47 (Ch3LL, CorvinM, DmitryKuzmenko, Giandom, Mapel88, Mareo, SuperPommeDeTerre, TheLoeki, abulford, amendlik, blarghmatey, brejoc, cachedout, carsonoid, cro, damon-atkins, darcoli, dmurphy18, frankiexyz, garethgreenaway, gtmanfred, hibbert, isbm, ixs, jettero, jmarinaro, justinbeard, kkoppel, llua, lomero, m03, mcalmer, mirceaulnic, morganwillcock, nhavens, pabloh007, rallytime, seedickcode, shengis, skizunov, terminalmage, the-glu, thusoy, twangboy, vitaliyf, vutny, whiteinge)

Security Fix

CVE-2017-14695 Directory traversal vulnerability in minion id validation in SaltStack. Allows remote minions with incorrect credentials to authenticate to a master via a crafted minion ID. Credit for discovering the security flaw goes to: Julian Brost (julian@0x4a42.net)

CVE-2017-14696 Remote Denial of Service with a specially crafted authentication request. Credit for discovering the security flaw goes to: Julian Brost (julian@0x4a42.net)

Changelog for v2017.7.1..v2017.7.2

Generated at: 2018-05-26 21:06:12 UTC

- PR #43868: (rallytime) Back-port #43847 to 2017.7.2 @ 2017-10-03 12:00:52 UTC
  - PR #43847: (cachedout) Fix to module.run (refs: #43868)
  - dd0b3388cf Merge pull request #43868 from rallytime/bp-43847
  - e21d8e9583 Use six.iterkeys() instead of dict.keys()
  - c297ae5557 Improve failures for module.run states
  - 782ec67c199 Lint
  - a6c2d78518 Fix typo found by @s0undt3ch
  - 0cac15e502 Fix to module.run [WIP]

- PR #43871: (rallytime) Add updated release notes to 2017.7.2 branch @ 2017-10-03 11:59:29 UTC
  - 47af4ae38a Merge pull request #43871 from rallytime/update-release-notes
  - 2337904656 Add updated release notes to 2017.7.2 branch

- PR #43756: (gtmanfred) split build and install for pkg osx @ 2017-09-26 20:51:28 UTC
• ISSUE #43077: (Manoj2087) Issue with deleting key via wheel (refs: #43330)
• PR #43585: (rallytime) Back-port #43330 to 2017.7.2 @ 2017-09-19 17:33:34 UTC
  • PR #43330: (terminalmage) Fix reactor regression + unify reactor config schema (refs: #43585)
  • 89f629233f Merge pull request #43585 from rallytime/bp-43330
  • c4f693bae8 Merge branch '2017.7.2' into bp-43330
• ISSUE #43447: (UtahDave) When using Syndic with Multi Master the top level master doesn't reliably get
  returns from lower minion. (refs: #43526)
• PR #43586: (rallytime) Back-port #43526 to 2017.7.2 @ 2017-09-19 15:36:27 UTC
  • PR #43526: (DmitryKuzmenko) Forward events to all masters syndic connected to (refs: #43586)
  • abb7fe4422 Merge pull request #43586 from rallytime/bp-43526
  • e076e9b634 Forward events to all masters syndic connected to.
  • 7abd07fa07 Simplify client logic
  • b5f10696c2 Improve the reactor documentation
  • 7a2f12b96a Include a better example for reactor in master conf file
  • 531cac610e Rewrite the reactor unit tests
  • 2a35abf7f3 Unify reactor configuration, fix caller reactors
  • 4afbf179bad Un-deprecate passing kwargs outside of 'kwarg' param
• PR #43551: (twangboy) Fix preinstall script on OSX for 2017.7.2 @ 2017-09-18 18:35:35 UTC
  • 3d3b09302d Merge pull request #43551 from twangboy/osx_fix_preinstall_2017.7.2
  • c3d9fb63f0 Merge branch '2017.7.2' into osx_fix_preinstall_2017.7.2
• PR #43509: (rallytime) Back-port #43333 to 2017.7.2 @ 2017-09-15 21:21:40 UTC
  • PR #43333: (damon-atkins) Docs are wrong cache_dir (bool) and cache_file (str) cannot be passed as
    params + 1 bug (refs: #43509)
  • 24691da888 Merge pull request #43509 from rallytime/bp-43333-2017.7.2
  • b3dbab03f5 Update doco
  • 5c85f9428 Update win_pkg.py
  • c3e16661c3 Docs are wrong cache_dir (bool) and cache_file (str) cannot be passed on the cli (#2)
  • f33395f1ee Fix logic in /etc/paths.d/salt detection
• PR #43440: (rallytime) Back-port #43421 to 2017.7.2 @ 2017-09-11 20:59:53 UTC
  • PR #43421: (gtmanfred) Revert "Reduce fileclient.get_file latency by merging _file_find and ... (refs:
    #43440)
  • 8964acbf8 Merge pull request #43440 from rallytime/bp-43421
  • ea6661755 Revert "Reduce fileclient.get_file latency by merging _file_find and _file_hash"
• PR #43377: (rallytime) Back-port #43193 to 2017.7.2 @ 2017-09-11 15:32:23 UTC
  • PR #43193: (jettero) Prevent spurious "Template does not exist" error (refs: #43377)
- PR #39516: (jettero) Prevent spurious "Template does not exist" error (refs: #43193)
- 7fda186b18 Merge pull request #43377 from rallytime/bp-43193
- 842b07fd25 Prevent spurious "Template does not exist" error

• ISSUE #42459: (iavael) Broken ldap groups retrieval in salt.auth.ldap after upgrade to 2017.7 (refs: #43283)

• PR #43315: (rallytime) Back-port #43283 to 2017.7.2 @ 2017-09-05 20:04:25 UTC
  - PR #43283: (DmitryKuzmenko) Fix ldap token groups auth. (refs: #43315)
  - 85db1a8e98 Merge pull request #43315 from rallytime/bp-43283
  - f295b0c9ce Fix for tests: don't require 'groups' in the eauth token.
  - 56938d5b2f Fix ldap token groups auth.

• ISSUE #43259: (mahesh21) NameError: global name '__opts__' is not defined (refs: #43266)

• PR #43266: (gtmanfred) switch virtualbox cloud driver to use __utils__ @ 2017-08-30 18:36:20 UTC
  - 26ff8088cb Merge pull request #43266 from gtmanfred/virtualbox
  - 382b929e7d switch virtualbox cloud driver to use __utils__

• ISSUE #42936: (Mapel88) bug in win_iis module & state - container_setting (refs: #43073)

• PR #43073: (Mapel88) Fix bug #42936 - win_iis module container settings @ 2017-08-30 18:34:37 UTC
  - ee209144 Merge pull request #43073 from Mapel88/patch-2
  - b1a3d15b28 Remove trailing whitespace for linter
  - 25c8190e48 Fix pylint errors
  - 1eba8c48e8 Fix pylint errors
  - 290d7b54af Fix plint errors
  - f4f32421af Fix plint errors
  - ec20e4a9af Fix bug #43110 - win_iis module
  - 009ef6686b Fix dictionary keys from string to int
  - dc793f9a05 Fix bug #42936 - win_iis state
  - 1340447b5 Fix bug #42936 - win_iis module

• PR #43254: (twangboy) Fix unit.modules.test_inspect_collector on Windows @ 2017-08-30 15:46:07 UTC
  - ec1bedc64 Merge pull request #43254 from twangboy/win_fix_test_inspect_collector
  - b4013406c Fix unit.modules.test_inspect_collector on Windows

• ISSUE #43241: (mirceaulinic) Error whilst collecting napalm grains (refs: #43255)

• PR #43255: (gtmanfred) always return a dict object @ 2017-08-30 14:47:15 UTC
  - 1f77307735 Merge pull request #43255 from gtmanfred/2017.7
  - 83b0bab34b opt_args needs to be a dict

• PR #43229: (twangboy) Bring changes from #43228 to 2017.7 @ 2017-08-30 14:26:55 UTC
  - PR #43228: (twangboy) Win fix pkg.install (refs: #43229)
  - fa904ee225 Merge pull request #43229 from twangboy/win_fix_pkg.install-2017.7
  - e007a1c26e Fix regex, add .

32.2. Previous releases
- 23ec47c74c Add _ to regex search
- b1788b1e5f Bring changes from #43228 to 2017.7

**PR #43251**: (twangboy) Skips `unit.modules.test_groupadd` on Windows @ 2017-08-30 13:56:36 UTC
- 2566ef88f7 Merge pull request #43251 from twangboy/win_skip_test_groupadd
- 5185071d5a Skips `unit.modules.test_groupadd` on Windows

**PR #43256**: (twangboy) Skip mac tests for user and group @ 2017-08-30 13:18:13 UTC
- a8e09629b2 Merge pull request #43256 from twangboy/win_skip_mac_tests
- cec627a60b Skip mac tests for user and group

**ISSUE #42279**: (dAFyddj) win_lgpo matches multiple policies due to startswith() (refs: #43116, #43156, #43166, #43226)

**PR #43226**: (lomeroe) Fixes for issues in PR #43166 @ 2017-08-29 19:05:39 UTC
- PR #43166: (lomeroe) Backport #43116 to 2017.7 (refs: #43226)
- PR #43156: (lomeroe) Backport #43116 to 2017.7 (refs: #43166)
- PR #43116: (lomeroe) Fix 42279 in develop (refs: #43166, #43156)
- PR #39773: (twangboy) Make win_file use the win_dacl salt util (refs: #43226)
- ac2189c870 Merge pull request #43226 from lomeroe/fix_43166
- 0c424dc4a3 Merge branch '2017.7' into fix_43166
- 324cf8d1e correcting bad format statement in search for policy to be disabled (fix for #43166) verify that file exists before attempting to remove (fix for commits from #39773)

**PR #43227**: (twangboy) Fix `unit.fileserver.test_gitfs` for Windows @ 2017-08-29 19:03:36 UTC
- 6199fb46dc Merge pull request #43227 from twangboy/win_fix_unit_test_gitfs
- c956d24283 Fix is_windows detection when USERNAME missing
- 869e8cc603 Fix `unit.fileserver.test_gitfs` for Windows

**PR #43217**: (rallytime) [2017.7] Merge forward from 2016.11 to 2017.7 @ 2017-08-28 16:36:28 UTC
- 6adcd3e4b4 Merge pull request #43217 from rallytime/merge-2017.7
- 3911df2f4b Merge branch '2016.11' into '2017.7'
- 5308c27f9f Merge pull request #43202 from garethgreenaway/42642_2016_11_augeas_module_revert_fix
  
  * e7e93eb3f Reverting this change due to it breaking other uses.

  * f16b7246e4 Merge pull request #43103 from aogier/43011-genesis-bootstrap
    
    * db94f3bb1c better formatting
    * e5cc667762 tests: fix a leftover and simplify some parts
    * 13e5997457 lint
    * 216ced69e5 allow comma-separated pkgs lists, quote args, test deb behaviour
    * d861a2ae06 fix debootstrap and enhance packages selection/deletion via cmdline
  

- 4863771428 Merge pull request #42663 from StreetHawkInc/fix_git_tag_check
  
  * 2b5af5b59d Remove refs/tags prefix from remote tags
  
  * 3f2e96e561 Convert set to list for serializer
• PR #43201: (rallytime) [2017.7] Merge forward from 2016.11 to 2017.7 @ 2017-08-25 22:56:46 UTC
  - a563a9422a Merge pull request #43201 from rallytime/merge-2017.7
  - d40eba6b37 Merge branch '2016.11' into '2017.7'
    * 4193e7f0a2 Merge pull request #43199 from corywright/disk-format-alias
     * f00d3a9dcd Add disk.format alias for disk.format_
    * 5471f9fe0c Merge pull request #43196 from gtmanfred/2016.11
     * ccd2241777 Pin request install to version
    * ace2715c60 Merge pull request #43178 from terminalmage/issue43143
     * 2640833400 git.detached: Fix traceback when rev is a SHA and is not present locally
    * 12e9507b9e Merge pull request #43179 from terminalmage/old-deprecation
     * 3ad8ad04b Fix missed deprecation
    * b595440d90 Merge pull request #43171 from terminalmage/salt-utils-warning
     * 7b5943a31a Add warning about adding new functions to salt/utils/__init__.py
     * 4f273ca4cf Merge pull request #43173 from Ch3LL/add_branch_docs
     * 1b2424bd3 Add New Release Branch Strategy to Contribution Docs

• PR #42997: (twangboy) Fix unit.test.test_module_names for Windows @ 2017-08-25 21:19:11 UTC
  - ce04ab4286 Merge pull request #42997 from twangboy/win_fix_test_module_names
  - 2722e9521d Use os.path.join to create paths

• ISSUE #26995: (jbouse) Issue with artifactory.downloaded and snapshot artifacts (refs: #43006)
• PR #43006: (SuperPommeDeTerre) Try to fix #26995 @ 2017-08-25 21:16:07 UTC
  - c0279e491e Merge pull request #43006 from SuperPommeDeTerre/SuperPommeDeTerre-patch-26995
  - 3dd65f5120 Merge remote-tracking branch 'upstream/2017.7' into SuperPommeDeTerre-patch-26995
    * 50e3d5682 Merge remote-tracking branch 'remotes/origin/2017.7' into SuperPommeDeTerre-patch-26995
    * 0b666e100b Fix typo.
    * 1b8729b3e7 Fix for #26995
  - e31402978 Fix typo.
  - db11e1985b Fix for #26995

• ISSUE #43162: (MorphBonehunter) docker_container.running interference with restart_policy (refs: #43184)
• PR #43184: (terminalmage) docker.compare_container: Perform boolean comparison when one side’s value is null/None @ 2017-08-25 18:42:11 UTC
  - b6c5314fe9 Merge pull request #43184 from terminalmage/issue43162
- PR #43165: (mirceaulinic) Improve napalm state output in debug mode @ 2017-08-24 23:05:37 UTC
  - 688125bb4f Merge pull request #43165 from cloudflare/fix-napalm-ret
  - c10717dc89 Lint and fix
  - 1cd33cbaa9 Simplify the loaded_ret logic
  - 0bbaa6b04c Document the new compliance_report arg
  - 3a906109bd Include compliance reports
  - 3634055e34 Improve napalm state output in debug mode

- PR #43155: (terminalmage) Resolve image ID during container comparison @ 2017-08-24 22:09:47 UTC
  - a6a327b1e5 Merge pull request #43155 from terminalmage/issue43001
  - 0186835ebf Fix docstring in test
  - a0b6654e46 Fixing lint issues
  - d5b20bfae8 Resolve image ID during container comparison

- PR #43170: (rallytime) [2017.7] Merge forward from 2016.11 to 2017.7 @ 2017-08-24 19:22:26 UTC
  - c071fd44c8 Merge pull request #43170 from rallytime/merge-2017.7
  - 3dada53a2d Merge branch '2016.11' into '2017.7'
    - 669b376abf Merge pull request #43151 from ushmodin/2016.11
      - c58412ade state.sls hangs on file.recurse with clean: True on windows

- ISSUE #43040: (darcoli) gitFS ext_pillar with branch name __env__ results in empty pillars (refs: #43041)
- PR #43168: (rallytime) Back-port #43041 to 2017.7 @ 2017-08-24 19:07:23 UTC
  - PR #43041: (darcoli) Do not try to match pillarenv with __env__ (refs: #43168)
  - 034c25a009 Merge pull request #43168 from rallytime/bp-43041
  - d010b74b87 Do not try to match pillarenv with __env__

- PR #43172: (rallytime) Move new utils/__init__.py funcs to utils.files.py @ 2017-08-24 19:05:30 UTC
  - PR #43056: (damon-atkins) safe_filename_leaf(file_basename) and safe_filepath(file_path_name) (refs: #43172)
  - d489376abf4 Merge pull request #43172 from rallytime/move-utils-funcs
  - 5385c7901e Move new utils/__init__.py funcs to utils.files.py

- ISSUE #43043: (pabloh007) docker.save and docker.load problem (refs: #43061)
- PR #43061: (pabloh007) Have docker.save use the image name when valid if not use image id, i... @ 2017-08-24 16:32:02 UTC
  - e60f586442 Merge pull request #43061 from pabloh007/fix-save-image-name-id
  - 0ffcf7d1df Have docker.save use the image name when valid if not use image id, issue when loading and image is savid with id issue #43043

- ISSUE #42279: (dafyddj) win_lgpo matches multiple policies due to startswith() (refs: #43116, #43156, #43166, #43226)

- PR #43166: (lomeroe) Backport #43116 to 2017.7 (refs: #43226) @ 2017-08-24 15:01:23 UTC
- **PR #43156**: (lomero) Backport #43116 to 2017.7 (refs: #43166)
- **PR #43116**: (lomero) Fix 42279 in develop (refs: #43166, #43156)
- 9da57543f8 Merge pull request #43166 from lomero/bp-43116-2017.7
- af181b3257 correct fopen calls from salt.utils for 2017.7
- 7f4480f11e lint fix
- ecd446fd55 track xml namespace to ensure policies w/duplicate IDs or Names do not conflict
- 9f3047c42d add additional checks for ADM policies that have the same ADMX policy ID (#42279)

- **PR #43056**: (damon-atkins) safe_filename_leaf(file_basename) and safe_filepath(file_path_name) (refs: #43172) @ 2017-08-23 17:35:02 UTC
  - 44b3caead1 Merge pull request #43056 from damon-atkins/2017.7
  - 08ded1546e more lint
  - 6e9c0957fb fix typo
  - ee4117c9f lint fixes
  - 8c86f02c7 fix missing imports
  - 964ceb954 safe_filename_leaf(file_basename) and safe_filepath(file_path_name)

- **PR #43146**: (rallytime) [2017.7] Merge forward from 2016.11 to 2017.7 @ 2017-08-23 16:56:10 UTC
  - 6ca9131a23 Merge pull request #43146 from rallytime/merge-2017.7
  - bcbe180fbc Merge branch '2016.11' into '2017.7'
    - ae9d2b7985 Merge pull request #42986 from renner/systemd-notify
      - 79c53f3f81 Fallback to systemd_notify_call() in case of socket.error
      - f1765472dd Notify systemd synchronously (via NOTIFY_SOCKET)
    - b420fbe618 Merge pull request #43037 from mcarlton00/fix-bhyve-grains
      - 73315f0cf0 Issue #43036 Bhyve virtual grain in Linux VMs
    - 0a86f2d884 Merge pull request #43100 from vutny/doc-add-missing-utils-ext
      - af743ff6c3 [DOCS] Add missing utils sub-dir listed for extension_modules

- **PR #43123**: (twangboy) Fix unit.utils.test_which for Windows @ 2017-08-23 16:01:39 UTC
  - 03f652159f Merge pull request #43123 from twangboy/win_fix_test_which
  - ed97c9f5f6 Fix unit.utils.test_which for Windows

- **ISSUE #42505**: (ikogan) selinux.fcontext_policy_present exception looking for selinux.filetype_id_to_string (refs: #43068)

- **PR #43142**: (rallytime) Back-port #43068 to 2017.7 @ 2017-08-23 15:56:48 UTC
  - **PR #43068**: (ixs) Mark selinux_.filetype_id_to_string as public function (refs: #43142)
  - 5a4fc07863 Merge pull request #43142 from rallytime/bp-43068
  - efc18c506 Mark selinux_.filetype_id_to_string as public function

- **PR #43038**: (twangboy) Fix unit.utils.test_url for Windows @ 2017-08-23 13:35:25 UTC
  - 0467a0e3bf Merge pull request #43038 from twangboy/win_unit_utils_test_url
  - 7f5ee55f57 Fix unit.utils.test_url for Windows

32.2. Previous releases
- **PR #43097**: (twangboy) Fix `group.present` for Windows @ 2017-08-23 13:19:56 UTC
  - e9cca61d2 Merge pull request #43097 from twangboy/win_fix_group
  - 43b0360763 Fix lint
  - 9ffe315d7d Add kwargs
  - 4f4e34c79f Fix group state for Windows

- **PR #43115**: (rallytime) Back-port #42067 to 2017.7 @ 2017-08-22 20:09:52 UTC
  - PR #42067: (vitaliyf) Removed several uses of `name.split('.')[0]` in SoftLayer driver. (refs: #43115)
  - 8140855627 Merge pull request #43115 from rallytime/bp-42067
  - 8a6ad0a9cf Fixed typo.
  - 9a5ae2ba1 Removed several uses of `name.split('.')[0]` in SoftLayer driver.

- **PR #42962**: (twangboy) Fix `unit.test_doc` test for Windows @ 2017-08-22 18:06:23 UTC
  - 1e1a81036c Merge pull request #42962 from twangboy/win_unit_test_doc
  - 201ceae4c4 Fix lint, remove debug statement
  - 37029c1a16 Fix `unit.test_doc` test

- **PR #42995**: (twangboy) Fix malformed requisite for Windows @ 2017-08-22 16:50:01 UTC
  - d347d1e68f Merge pull request #42995 from twangboy/win_fix_invalid_requisite
  - 9390de88b Fix malformed requisite for Windows

- **PR #43108**: (rallytime) Back-port #42988 to 2017.7 @ 2017-08-22 16:49:27 UTC
  - PR #42988: (thusoy) Fix broken negation in iptables (refs: #43108)
  - 1c7992a832 Merge pull request #43108 from rallytime/bp-42988
  - 1a987cb948 Fix broken negation in iptables

- **PR #43107**: (rallytime) [2017.7] Merge forward from 2016.11 to 2017.7 @ 2017-08-22 16:11:25 UTC
  - c6993f4a84 Merge pull request #43107 from rallytime/merge-2017.7
  - 328dd6aa23 Merge branch '2016.11' into '2017.7'
  - e2bf2f4f8e Merge pull request #42985 from DSRCorporation/bugs/15171_recursion_limit
    - 651b1bab09 Properly handle `prereq` having lost requisites.
  - e51333306c Merge pull request #43092 from mitodl/2016.11
    - 4d1b113acdf Fixed issue with silently passing all tests in Testinfra module
  - 77a443ce8e Merge pull request #43060 from twangboy/osx_update_pkg_scripts
    - ef8a14cd9 Remove `/opt/salt` instead of `/opt/salt/bin`
    - 2dd62aa1da Add more information to the description
    - f44f5b70dc Only stop services if they are running
    - 3b629953c Remove salt from the path
    - ebdca3a055 Update pkg-scripts
  - 1b1b6da803 Merge pull request #43064 from terminalmage/issue42869
    - 093c0c2f77 Fix race condition in git.latest
- 96e8e836d1 Merge pull request #43054 from lorengordon/fix/yumpkg/config-parser
  - 3b2cb81a72 fix typo in salt.modules.yumpkg
  - 38add0e4a2 break if leading comments are all fetched
  - d7f65dc7a7 fix configparser import & log if error was raised
  - ca1b1bb633 use configparser to parse yum repo file

- **PR #42996**: (twangboy) Fix unit.test_stateconf for Windows @ 2017-08-21 22:43:58 UTC
  - f9b4976c02 Merge pull request #42996 from twangboy/win_fix_test_stateconf
  - 92dc3c0ec Use os.sep for path

- **PR #43024**: (twangboy) Fix unit.utils.test_find for Windows @ 2017-08-21 22:38:10 UTC
  - 19fc644c9b Merge pull request #43024 from twangboy/win_unit_utils_test_find
  - fbe54c9a33 Remove unused import six (lint)
  - b04d1a2f18 Fix unit.utils.test_find for Windows

- **PR #43088**: (gtmanfred) allow docker util to be reloaded with reload_modules @ 2017-08-21 22:14:37 UTC
  - 1a531169fc Merge pull request #43088 from gtmanfred/2017.7
  - 373a90be4 allow docker util to be reloaded with reload_modules

- **PR #43091**: (blarghmatey) Fixed issue with silently passing all tests in Testinfra module @ 2017-08-21 22:06:22 UTC
  - 83e528f0b3 Merge pull request #43091 from mitodl/2017.7
  - b502560e61 Fixed issue with silently passing all tests in Testinfra module

- **PR #41994**: (twangboy) Fix unit.modules.test_cmdmod on Windows @ 2017-08-21 21:53:01 UTC
  - 5482524270 Merge pull request #41994 from twangboy/win_unit_test_cmdmod
  - a5f7288ad9 Skip test that uses pwd, not available on Windows

- **ISSUE #42873**: (TheVakman) osquery Data Empty Upon Return / Reporting Not Installed (refs: #42933)

- **PR #42933**: (garethgreenaway) Fixes to osquery module @ 2017-08-21 20:48:31 UTC
  - b33c4abc15 Merge pull request #42933 from garethgreenaway/2017.7_osquery_fix
  - 8915e62bd9 Removing an import that is not needed.
  - 74bc377eb4 Updating the other function that uses cmd.run_all
  - e6a4619ec1 Better approach without using python_shell=True.
  - 5ac41f496d When running osquery commands through cmd.run we should pass python_shell=True to ensure everything is formatted right. #42873

- **PR #43093**: (gtmanfred) Fix ec2 list_nodes_full to work on 2017.7 @ 2017-08-21 20:21:21 UTC
  - 53c2115769 Merge pull request #43093 from gtmanfred/ec2
  - c7ff5b5a04 This block isn't necessary
  - b7283bcc6_vm_provider_driver isn't needed anymore

- **ISSUE #43085**: (brejoc) Patch for Kubernetes module missing from 2017.7 and 2017.7.1 (refs: #43087)

- **PR #43087**: (rallytime) Back-port #42174 to 2017.7 @ 2017-08-21 18:40:18 UTC
  - **PR #42174**: (mcalmer) kubernetes: provide client certificate authentication (refs: #43087)
- 32f9ade4db Merge pull request #43087 from rallytime/bp-42174
- cf6563645b add support for certificate authentication to kubernetes module

• **PR #43029:** (terminalmage) Normalize the salt caching API @ 2017-08-21 16:54:58 UTC
  - 882fcd846f Merge pull request #43029 from terminalmage/fix-func-alias
  - f8f74a310c Update localfs cache tests to reflect changes to func naming
  - c4ae79b229 Rename other refs to cache.ls with cache.list
  - ee59d127e8 Normalize the salt caching API

• **ISSUE #42843:** (brejoc) Kubernetes module won’t work with Kubernetes Python client > 1.0.2 (refs: #42845)

• **PR #43039:** (gtmanfred) catch ImportError for kubernetes.client import @ 2017-08-21 14:32:38 UTC
  - PR #42845: (brejoc) API changes for Kubernetes version 2.0.0 (refs: #43039)
  - db7e735f6e Merge pull request #43039 from gtmanfred/kube
  - 7e269cb368 catch ImportError for kubernetes.client import

• **PR #43058:** (rallytime) Update release version number for jenkins.run function @ 2017-08-21 14:13:34 UTC
  - c56a8499b3 Merge pull request #43058 from rallytime/fix-release-num
  - d7ee8f0d0 Update release version number for jenkins.run function

• **PR #43051:** (rallytime) [2017.7] Merge forward from 2016.11 to 2017.7 @ 2017-08-18 17:05:57 UTC
  - 7b0c94768a Merge pull request #43051 from rallytime/merge-2017.7
  - 153a463b86 Lint: Add missing blank line
  - 84829a6f8c Merge branch '2016.11' into '2017.7'
  - 43aa46f512 Merge pull request #43048 from rallytime/bp-43031
    - 35e45049e2 use a ruby gem that doesn’t have dependencies
  - ad89ff3104 Merge pull request #43023 from terminalmage/fix-jenkins-xml-caching
    - 33fd8ff939 Update jenkins.py
    - fc306fc8c3 Add missing colon in if statement
    - 822eabcc81 Catch exceptions raised when making changes to jenkins
    - 91b583b493 Improve and correct exception raising
    - f096917a0e Raise an exception if we fail to cache the config xml
  - 2957467ed7 Merge pull request #43026 from rallytime/bp-43020
    - 0e8141f67 test with gem that appears to be abandoned
  - 4150b094fe Merge pull request #43033 from rallytime/bp-42760
    - 3e3f7f58d8e Catch TypeError thrown by m2crypto when parsing missing subjects in certificate files.
  - b124d3667e Merge pull request #43032 from rallytime/bp-42547
    - ea4d7f4176 Updated testinfra modules to work with more recent versions
  - a8838ad44 Merge pull request #43027 from pabloh007/fixedocker-save-push-2016-11
    - d0fd949f85 Fixes ignore push flag for docker.push module issue #42992
  - 51d168d4bb Merge pull request #42890 from DSRCorporation/bugs/42627_salt-cp
• cfddbf1c75 Apply code review: update the doc
• afedd3b654 Typos and version fixes in the doc.
• 9fedf6012e Fixed 'test_valid_docs' test.
• 999388680c Make chunked mode in salt-cp optional (disabled by default).
  • b3c253edfa Merge pull request #43009 from rallytime/merge-2016.11
  • 566ba4fe76 Merge branch '2016.3' into '2016.11'
    • 13b8637d53 Merge pull request #42942 from Ch3LL/2016.3.6_follow_up
    • f281e1795f move additional minion config options to 2016.3.8 release notes
    • 168604ba6b remove merge conflict
    • 8a07d95212 update release notes with cve number
    • 149633fdca Add release notes for 2016.3.7 release
    • 7a4cddcd95 Add clean_id function to salt.utils.verify.py
    • bbb1b29cccb Merge pull request #42954 from Ch3LL/latest_2016.3
    • b551e66744 [2016.3] Bump latest and previous versions
    • 5d5ed54b7 Merge pull request #42949 from Ch3LL/2016.3.7_docs
    • d75d3741f8 Add Security Notice to 2016.3.7 Release Notes
  • 37c63e7cf2 Merge pull request #43021 from terminalmage/fix-network-test
    • 4089b7b1bc Use socket.AF_INET6 to get the correct value instead of doing an OS check
  • 8f6423247c Merge pull request #43019 from rallytime/bootstrap_2017.08.17
    • 2f762b3a17 Update bootstrap script to latest stable: v2017.08.17
  • ff1caee68 Merge pull request #43014 from Ch3LL/fix_network_mac
    • b8ee4401e Change AF_INET6 family for mac in test_host_to_ips
• PR #43035: (rallytime) [2017.7] Merge forward from 2017.7.1 to 2017.7 @ 2017-08-18 12:58:17 UTC
  • PR #42948: (Ch3LL) [2017.7.1] Add clean_id function to salt.utils.verify.py (refs: #43035)
  • PR #42945: (Ch3LL) [2017.7] Add clean_id function to salt.utils.verify.py (refs: #43035)
  • d15b0ca937 Merge pull request #43035 from rallytime/merge-2017.7

    • ab1b099730 Merge pull request #42948 from Ch3LL/2017.7.0_follow_up
• ISSUE #42989: (blbradley) GitFS GitPython performance regression in 2017.7.1 (refs: #43002)
• PR #43034: (rallytime) Back-port #43002 to 2017.7 @ 2017-08-17 23:18:16 UTC
  • PR #43002: (the-glu) Try to fix #42989 (refs: #43034)
  • bcb977a71 Merge pull request #43034 from rallytime/bp-43002
  • 350c0767dc Try to fix #42989 by doing sslVerify and respecs for origin remote only if there is no remotes
• ISSUE #42375: (dragonpaw) salt.modules."__virtualname__" doesn't work as documented. (refs: #42523, #42958)
• PR #42958: (gtmanfred) runit module should also be loaded as runit @ 2017-08-17 22:30:23 UTC

32.2. Previous releases
- 9182f55bbb Merge pull request #42958 from gtmanfred/2017.7
- fd6874668b runit module should also be loaded as runit

- **PR #43031:** (gtmanfred) use a ruby gem that doesn't have dependencies (refs: #43048) @ 2017-08-17 22:26:25 UTC
  - 5985cc4e8e Merge pull request #43031 from gtmanfred/test_gem
  - ba80a7d4b5 use a ruby gem that doesn't have dependencies

- **PR #43030:** (rallytime) Small cleanup to dockermod.save @ 2017-08-17 22:26:00 UTC
  - 246176b1a6 Merge pull request #43030 from rallytime/dockermod-minor-change
  - d6a5e85632 Small cleanup to dockermod.save

- **ISSUE #42992:** (pabloh007) docker.save flag push does is ignored (refs: #42993, #43027)

- **PR #42993:** (pabloh007) Fixes ignored push flag for docker.push module issue #42992 @ 2017-08-17 18:50:37 UTC
  - 160001120b Merge pull request #42993 from pabloh007/fixedocker-save-push
  - fe7554cfe6 Fixes ignored push flag for docker.push module issue #42992

- **ISSUE #42941:** (danlsgiga) pkg.installed fails on installing from HTTPS rpm source (refs: #42967)

- **PR #42967:** (terminalmage) Fix bug in on_header callback when no Content-Type is found in headers @ 2017-08-17 18:48:52 UTC
  - 9009a971b1 Merge pull request #42967 from terminalmage/issue42941
  - b838460816 Fix bug in on_header callback when no Content-Type is found in headers

- **ISSUE #43008:** (evelineraine) states.service.running always succeeds when watched state has changes (refs: #43016)

- **PR #43016:** (gtmanfred) service should return false on exception @ 2017-08-17 18:08:05 UTC
  - 58f070d7a7 Merge pull request #43016 from gtmanfred/service
  - 21c264fe55 service should return false on exception

- **PR #43020:** (gtmanfred) test with gem that appears to be abandoned (refs: #43026) @ 2017-08-17 16:40:41 UTC
  - 973d288eca Merge pull request #43020 from gtmanfred/test_gem
  - 0a1f40a664 test with gem that appears to be abandoned

- **PR #42999:** (garethgreenaway) Fixes to slack engine @ 2017-08-17 15:46:24 UTC
  - 9cd0607fd4 Merge pull request #42999 from garethgreenaway/slack_engine_allow_editing_messages
  - 0ece2a8f0c Fixing a bug that prevented editing Slack messages and having the commands resent to the Slack engine.

- **PR #43010:** (rallytime) [2017.7] Merge forward from 2016.11 to 2017.7 @ 2017-08-17 15:10:29 UTC
  - 31627a9163 Merge pull request #43010 from rallytime/merge-2017.7
  - 8a0f948e4a Merge branch '2016.11' into '2017.7'
  - 1ee9499d38 Merge pull request #42968 from vutny/doc-salt-cloud-ref
    - 44ed53b1df [DOCS] Fix link to Salt Cloud Feature Matrix
  - 923f9741fe Merge pull request #42291 from vutny/fixed-38839
    - 5f8f98a01f Fix #38839: remove state from Reactor runner kwags
- c20bc7d515 Merge pull request #42940 from gtmanfred/2016.11
  * 253e216a8d fix IP address spelling
  * bd63074e7a create new ip address before checking list of allocated ips
- d6496eca72 Merge pull request #42959 from rallytime/bp-42883
  * c6b9ca4bb8e Lint fix: add missing space
  * 5597b1a30e Skip 2 failing tests in Python 3 due to upstream bugs
  * a0b19bd27 Update account id value in boto_secgroup module unit test
  * 60b406e088 @mock_elb needs to be changed to @mock_elb_deprecated as well
  * 6ae111295 Replace @mock_ec2 calls with @mock_ec2_deprecated calls
- 6366e05dd0 Merge pull request #42944 from Ch3LL/2016.11.6_follow_up
  * 7e0a20afca Add release notes for 2016.11.7 release
  * 63823f8c3e Add clean_id function to salt.utils.verify.py
- 49d339e976 Merge pull request #42952 from Ch3LL/latest_2016.11
  * 74e7055d54 [2016.11] Bump latest and previous versions
- b0d2e05a79 Merge pull request #42950 from Ch3LL/2016.11.7_docs
  * a6902db40 Add Security Notice to 2016.11.77 Release Notes
- c0ff69f88c Merge pull request #42836 from lyft/backport-utils.versions-to-2016.11
  * 86ce7004a2 Backport salt.utils.versions from develop to 2016.11
- 65a79dd5ac Merge pull request #42919 from rallytime/bp-42871
  * 4e46c96866 Update joyent.rst
- bea8ec1098 Merge pull request #42918 from rallytime/bp-42848
  * cdb48126f7 Make lint happier.
  * 62eca9b00b Execute fire_master asynchronously in the main minion thread.
- 52bce329cb Merge pull request #42861 from twangboy/win_pkg_install_salt
  * 0d3789f0c6 Fix pkg.install salt-minion using salt-call
- b9f4f87aa5 Merge pull request #42798 from s-sebastian/2016.11
  * 1cc86592ed Update return data before calling returners

- ISSUE #42842: (Giandom) retrieve kwargs passed with slack engine (refs: #42884)
- PR #42884: (Giandom) Convert to dict type the pillar string value passed from slack @ 2017-08-16 22:30:43 UTC
  - 82be9dceb6 Merge pull request #42884 from Giandom/2017.7.1-fix-slack-engine-pillar-args
  - 80fd733c99 Update slack.py
- PR #42963: (twangboy) Fix unit.test_fileclient for Windows @ 2017-08-16 14:18:18 UTC
  - 42bd553b98 Merge pull request #42963 from twangboy/win_unit_test_fileclient
  - e9febe4893 Fix unit.test_fileclient
- PR #42964: (twangboy) Fix salt.utils.recursive_copy for Windows @ 2017-08-16 14:17:27 UTC
  - 7dddeee8a8d Merge pull request #42964 from twangboy/win_fix_recursive_copy
- 121cd4ef81 Fix `salt.utils.recursive_copy` for Windows

- **PR #42946**: (mirceaulinic) `extension_modules` should default to `$CACHE_DIR/proxy/extmods` @ 2017-08-15 21:26:36 UTC
  - 6daa4d1d95e Merge pull request #42946 from cloudflare/px_extmods_42943
  - 73f9135340 `extension_modules` should default to `/proxy/extmods`

- **PR #42945**: (Ch3LL) [2017.7] Add `clean_id` function to salt.utils.verify.py (refs: #43035) @ 2017-08-15 18:04:20 UTC
  - 95645d49f9 Merge pull request #42945 from Ch3LL/2017.7.0_follow_up
  - dcd92042e3 remove extra doc
  - 693a504ef0 update release notes with cve number

- **ISSUE #42427**: (grichmond-salt) Issue Passing Variables created from load_json as Inline Pillar Between States (refs: #42435)

- **PR #42812**: (terminalmage) Update custom YAML loader tests to properly test unicode literals @ 2017-08-15 17:50:22 UTC
  - **PR #42435**: (terminalmage) Modify our custom YAML loader to treat unicode literals as unicode strings (refs: #42812)
  - 47ff9d5627 Merge pull request #42812 from terminalmage/yaml-loader-tests
  - 9d8486a894 Add test for custom YAML loader with unicode literal strings
  - a0118bcece Remove bytestrings and use textwrap.dedent for readability

- **PR #42953**: (Ch3LL) [2017.7] Bump latest and previous versions @ 2017-08-15 17:23:28 UTC
  - 5d0c2198ac Merge pull request #42953 from Ch3LL/latest_2017.7
  - cbecf65823 [2017.7] Bump latest and previous versions

- **PR #42951**: (Ch3LL) Add Security Notice to 2017.7.1 Release Notes @ 2017-08-15 16:49:56 UTC
  - 730e71db17 Merge pull request #42951 from Ch3LL/2017.7.1_docs
  - 1d8f827c58 Add Security Notice to 2017.7.1 Release Notes

- **PR #42868**: (carsonoid) Stub out required functions in redis_cache @ 2017-08-15 14:33:54 UTC
  - c1c8cb9bfa Merge pull request #42868 from carsonoid/redisjobcachefix
  - 885bee2a7d Stub out required functions for redis cache

- **PR #42810**: (amendlik) Ignore error values when listing Windows SNMP community strings @ 2017-08-15 03:55:15 UTC
  - e192d6e0af Merge pull request #42810 from amendlik/win-snmp-community
  - dc20e4651b Ignore error values when listing Windows SNMP community strings

- **PR #42920**: (cachedout) pid_race @ 2017-08-15 03:49:10 UTC
  - a1817fdde3 Merge pull request #42920 from cachedout/pid_race
  - 5e930b8cbd If we catch the pid file in a transitory state, return None

- **PR #42925**: (terminalmage) Add debug logging to troubleshoot test failures @ 2017-08-15 03:47:51 UTC
- 11a33fe692 Merge pull request #42925 from terminalmage/f26-debug-logging
- 8165f46165 Add debug logging to troubleshoot test failures

- **PR #42913**: (twangboy) Change service shutdown timeouts for salt-minion service (Windows) @ 2017-08-14 20:55:24 UTC
  - a537197030 Merge pull request #42913 from twangboy/win_change_timeout
  - ff23fbe47 Remove the line that wipes out the cache
  - a3becf8342 Change service shutdown timeouts

- **PR #42800**: (skizunov) Fix exception when master_type=disable @ 2017-08-14 20:53:38 UTC
  - ca0555f616 Merge pull request #42800 from skizunov/develop6
  - fa5822009f Fix exception when master_type=disable

- **PR #42679**: (mirceaulinic) Add multiprocessing option for NAPALM proxy @ 2017-08-14 20:45:06 UTC
  - 3af264b664 Merge pull request #42679 from cloudflare/napalm-multiprocessing
  - 9c4566db0c multiprocessing option tagged for 2017.7.2
  - 37bca1b902 Add multiprocessing option for NAPALM proxy
  - a2565bae5 Add new napalm option: multiprocessing

- **ISSUE #42611**: (nhavens) selinux.boolean state does not return changes (refs: #42612)

- **PR #42657**: (nhavens) back-port #42612 to 2017.7 @ 2017-08-14 19:42:26 UTC
  - PR #42612: (nhavens) fix for issue #42611 (refs: #42657)
  - 4fcdab3ae9 Merge pull request #42657 from nhavens/2017.7
  - d73c4b55b7 back-port #42612 to 2017.7

- **PR #42709**: (whiteinge) Add token_expire_user_override link to auth runner docstring @ 2017-08-14 19:03:06 UTC
  - d2b6ce527a Merge pull request #42709 from whiteinge/doc-token_expire_user_override
  - c7ea631558 Add more docs on the token_expire param
  - 4a9f6ba44f Add token_expire_user_override link to auth runner docstring

- **ISSUE #42803**: (gmcwhistler) master_type: str, not working as expected, parent salt-minion process dies. (refs: #42848)

- **ISSUE #42753**: (grichmond-salt) SaltReqTimeout Error on Some Minions when One Master in a Multi-Master Configuration is Unavailable (refs: #42848)

- **PR #42848**: (DmitryKuzmenko) Execute fire_master asynchronously in the main minion thread. (refs: #42918) @ 2017-08-14 18:28:38 UTC
  - c6a7b0f02e9 Merge pull request #42848 from DSRCorporation/bugs/42753_mmaster_timeout
  - 7f5412c19e Make lint happier.
  - ff66b7aaf0 Execute fire_master asynchronously in the main minion thread.

- **PR #42911**: (gtmanfred) cloud driver isn't a provider @ 2017-08-14 17:47:16 UTC
  - 6a3279ea50 Merge pull request #42911 from gtmanfred/2017.7
  - 99046b441f cloud driver isn't a provider

- **PR #42860**: (skizunov) hash_and_stat_file should return a 2-tuple @ 2017-08-14 15:44:54 UTC
- 4456f7383d Merge pull request #42860 from skizunov/develop7
- 5f85a03636 hash_and_stat_file should return a 2-tuple

• PR #42889: (rallytime) [2017.7] Merge forward from 2016.11 to 2017.7 @ 2017-08-14 14:16:20 UTC
  - c6ca7d639f Merge pull request #42889 from rallytime/merge-2017.7
  - fb711f22ac Use salt.utils.versioning.LooseVersion instead of distutils
  - 29ff19c587 Merge branch '2016.11' into '2017.7'
    - c15d0034fe Merge pull request #41977 from redmatter/fix-dockerng-network-ignores-test
      - 1cc2aa503a Fix dockerng.network_* ignoring of tests=True
    - 3b9c3c5671 Merge pull request #42886 from sarcasticadmin/adding_docs_salt_outputs
      - 744bf954ff Adding missing output flags to salt cli
    - e5b98c8a88 Merge pull request #42882 from gtmanfred/2016.11
      - da3402a53d make sure cmd is not run when npm isn't installed
    - 5962c958b8 Merge pull request #42788 from amendlik/saltify-timeout
      - 928b523797 Remove waits and retries from Saltify deployment
    - 227ecddd13 Merge pull request #42877 from terminalmage/add-cron-state-virtual
      - f1de196740 Add virtual func for cron state module
      - ab9f6cef33 Merge pull request #42859 from terminalmage/gitpython-git-cli-note
      - 35e05c9515 Add note about git CLI requirement for GitPython to GitFS tutorial
    - 682b4a8d14 Merge pull request #42856 from gtmanfred/2016.11
      - b458b89fb8 skip cache_clean test if npm version is >= 5.0.0
    - 01ea854029 Merge pull request #42864 from whiteinge/syndic-log-root_dir
      - 4b1f55da9c Make syndic_log_file respect root_dir setting

• PR #42898: (mirceaaulinic) Minor eos doc correction @ 2017-08-14 13:42:21 UTC
  - 4b6fe2ee59 Merge pull request #42898 from mirceaaulinic/patch-11
  - 93be79a135 Index eos under the installation instructions list
  - f903e7bc39 Minor eos doc correction

• PR #42883: (rallytime) Fix failing boto tests (refs: #42959) @ 2017-08-11 20:29:12 UTC
  - 1764878754 Merge pull request #42883 from rallytime/fx-boto-tests
  - 6a7bf99848 Lint fix: add missing space
  - 43643227c6 Skip 2 failing tests in Python 3 due to upstream bugs
  - 7f46603e9c Update account id value in boto_secgroup module unit test
  - 7c1d493fdd @mock_elb needs to be changed to @mock_elb_deprecated as well
  - 3055e17ed5 Replace @mock_ec2 calls with @mock_ec2_deprecated calls

• PR #42885: (terminalmage) Move weird tearDown test to an actual tearDown @ 2017-08-11 19:14:42 UTC
  - b21778efac Merge pull request #42885 from terminalmage/fix-f26-tests
  - 462d653082 Move weird tearDown test to an actual tearDown

---

Chapter 32. Release notes
• ISSUE #42870: (boltronics) webutil.useradd marked as deprecated:: 2016.3.0 by mistake? (refs: #42887)
• PR #42887: (rallytime) Remove extraneous "deprecated" notation @ 2017-08-11 18:34:25 UTC
  – 9868ab6f3b Merge pull request #42887 from rallytime/fix-42870
  – 71e7581a2d Remove extraneous "deprecated" notation
• PR #42881: (gtmanfred) fix vmware for python 3.4.2 in salt.utils.vmware @ 2017-08-11 17:52:29 UTC
  – da71f2a11b Merge pull request #42881 from gtmanfred/vmware
  – 05cc6a68d fix vmware for python 3.4.2 in salt.utils.vmware
• ISSUE #42843: (brejoc) Kubernetes module won’t work with Kubernetes Python client > 1.0.2 (refs: #42845)
• PR #42845: (brejoc) API changes for Kubernetes version 2.0.0 (refs: #43039) @ 2017-08-11 14:04:30 UTC
  – c7750d5717 Merge pull request #42845 from brejoc/updates-for-kubernetes-2.0.0
  – 81674aa88a Version info in :optdepends: not needed anymore
  – 71995505bc Not depending on specific K8s version anymore
  – d8f7d7a7c0 API changes for Kubernetes version 2.0.0
• PR #42678: (frankiexyz) Add eos.rst in the installation guide @ 2017-08-11 13:58:37 UTC
  – 459f6edc67 Merge pull request #42678 from frankiexyz/2017.7
  – 1598571f52 Add eos.rst in the installation guide
• ISSUE #42646: (gmacon) SPM fails to install multiple packages (refs: #42778)
• PR #42778: (gtmanfred) make sure to use the correct out_file @ 2017-08-11 13:44:48 UTC
  – 4ce96eb1a1 Merge pull request #42778 from gtmanfred/spm
  – 7ef691e8da make sure to use the correct out_file
• ISSUE saltstack/salt-jenkins#480: (rallytime) [2017.7] PY3 Debian 8 has several vmware unit tests failing (refs: #42857)
• PR #42857: (gtmanfred) use older name if _create_unverified_context is unavailable @ 2017-08-11 13:37:59 UTC
  – 3d05d89e09 Merge pull request #42857 from gtmanfred/vmware
  – c1f673eca4 use older name if _create_unverified_context is unavailable
• PR #42866: (twangboy) Change to GitPython version 2.1.1 @ 2017-08-11 13:23:52 UTC
  – 7e8c3ff21c Merge pull request #42866 from twangboy/osx_downgrade_gitpython
  – 28053a84a6 Change GitPython version to 2.1.1
• PR #42855: (rallytime) [2017.7] Merge forward from 2016.11 to 2017.7 @ 2017-08-10 21:40:39 UTC
  – 2d5e1f77e9 Merge pull request #42851 from terminalmage/bp-42651
    • a3da86ee8a fix syntax
    • 6ecdbcc1d make sure names are correct
    • f83b553d6e add py3 for versionlock
    • 21934f61bb python2- prefix for fedora 26 packages

32.2. Previous releases 5335
- c746f79a3a Merge pull request #42806 from rallytime/fix-42683
  * 8c8640d6b8 Update doc references in glusterfs.volume_present
- 27a8a2695a Merge pull request #42829 from twangboy/win_pkg_fix_install
  * 83b9b230cd Add winrepo to docs about supporting versions in pkgs
  * 81f6a6e6f7 Add ability to pass version in pkgs list
- 3c3ac6ae2b Merge pull request #42838 from twangboy/win_doc_pki
  * f0a1d06bb4 Standardize PKI Client
  * 7de687a557 Document requirements for win_pki
- b3e2ae43c3 Merge pull request #42805 from rallytime/bp-42552
  * 5a91c1f2d1 update consul module following this documentation https://www.consul.io/api/acl/acl.html
- d2ee7934ed Merge pull request #42804 from rallytime/bp-42784
  * dbd29e4aaa only read file if it is not a string
- 4cf8057bb3 Merge pull request #42826 from terminalmage/fix-spelling
  * 00f314e2a4 Fix misspelling of "versions"
- de997ed90 Merge pull request #42786 from Ch3LL/fix_typo
  * 90a2f66a2 Fix typo for template_dict in http docs
- bf6153ebe5 Merge pull request #42795 from lomero/bp-42744/201611
  * 67f5b6ac4a fix #42600 in develop
- 61fad97286 Merge pull request #42748 from whiteinge/save-before-output
  * de60b77c82 Workaround Orchestrate problem that highstate outputter mutates data
- a4e3e7e786 Merge pull request #42764 from amendlik/cloud-win-loop
  * f3dcfca4e0 Fix infinite loops on failed Windows deployments
- da85326a4d Merge pull request #42694 from gtmanfred/2016.11
  * 1a0457a51 allow adding extra remotes to a repository

• ISSUE #42774: (rossengeorgiev) pkg.installed succeeds, but fails when you specify package version (refs: #42808)

• PR #42808: (terminalmage) Fix regression in yum/dnf version specification @ 2017-08-10 15:59:22 UTC
  - f954f4f33a Merge pull request #42808 from terminalmage/issue42774
  - c69f17dd18 Add integration test for #42774
  - 78d826dd14 Fix regression in yum/dnf version specification

• ISSUE #42639: (amnonbc) k8s module needs a way to manage configmaps (refs: #42807)

• PR #42807: (rallytime) Update modules --> states in kubernetes doc module @ 2017-08-10 14:10:40 UTC
  - d9b0f44885 Merge pull request #42807 from rallytime/fix-42639
  - 152eb88d9f Update modules --> states in kubernetes doc module

• ISSUE #42818: (Mapel88) Bug in win_iis module - "create_cert_binding" (refs: #42841)

• PR #42841: (Mapel88) Fix bug #42818 in win_iis module @ 2017-08-10 13:44:21 UTC
- b8c7bda68d Merge pull request #42841 from Mapel88/patch-1
- 497241fcb Fix bug #42818 in win_iis module

**ISSUE #42697**: (Ch3LL) [Python3] NameError when running salt-run manage.versions (refs: #42782)

**PR #42782**: (rallytime) Add a cmp compatibility function utility @ 2017-08-09 22:37:29 UTC
- 135f9522d0 Merge pull request #42782 from rallytime/fix-42697
- d70f94863 Update all other calls to "cmp" function
- 5605104285 Add a cmp compatibility function utility

**PR #42784**: (gtmanfred) only read file if ret is not a string in http.query (refs: #42804) @ 2017-08-08 17:20:13 UTC
- ac752223ad Merge pull request #42784 from gtmanfred/http
- d397c90e92 only read file if it is not a string

**ISSUE #42600**: (twangboy) Unable to set 'Not Configured' using win_lgpo execution module (refs: #42744, #42794, #42795)

**PR #42794**: (lomeroe) Backport #42744 to 2017.7 @ 2017-08-08 17:16:31 UTC
- 4499b1abf Merge pull request #42794 from lomeroe/bp-42744
- 0acff6df5 fix #42600 in develop

**ISSUE #42707**: (cro) Service module and state fails on FreeBSD (refs: #42708)

**PR #42708**: (cro) Do not change the arguments of the function when memoizing @ 2017-08-08 13:47:01 UTC
- dcf474c47c Merge pull request #42708 from cro/dont_change_args_during_memoize
- a260e913b5 Do not change the arguments of the function when memoizing

**PR #42783**: (rallytime) Sort lists before comparing them in python 3 unit test @ 2017-08-08 13:25:15 UTC
- PR #42206: (rallytime) [PY3] Fix test that is flaky in Python 3 (refs: #42783)
- ddb671b8fe Merge pull request #42783 from rallytime/fix-flaky-py3-test
- 998834fhab Sort lists before comparing them in python 3 unit test

**PR #42721**: (hibbert) Allow no ip sg @ 2017-08-07 22:07:18 UTC
- d69822fe93 Merge pull request #42721 fromhibbert/allow_no_ip_sg
- f58256802a allow_no_ip_sg: Allow user to not supply ipaddress or securitygroups when running boto_efs.create_mount_target

**ISSUE #42538**: (marnovdm) docker_container.running issue since 2017.7.0: passing domainname gives Error 500: json: cannot unmarshal array into Go value of type string (refs: #42769)

**PR #42769**: (terminalmage) Fix domainname parameter input translation @ 2017-08-07 20:46:07 UTC
- bf7938fbeb Merge pull request #42769 fromterminalmage/issue42538
- 665de2d1f9 Fix domainname parameter input translation

**PR #42388**: (The-Loeki) pillar.items pillar_env & pillar_override are never used @ 2017-08-07 17:51:48 UTC
- 7bf2c0b363 Merge pull request #42388 from The-Loeki/patch-1
- 664f4b577b pillar.items pillar_env & pillar_override are never used
• **PR #42770**: (rallytime) [2017.7] Merge forward from 2017.7.1 to 2017.7 @ 2017-08-07 16:21:45 UTC
  - 9a8c9ebffcc Merge pull request #42770 from rallytime/merge-2017.7.1-into-2017.7
  - 6d17c9d227 Merge branch '2017.7.1' into '2017.7'
• **PR #42768**: (rallytime) [2017.7] Merge forward from 2016.11 to 2017.7 @ 2017-08-07 16:21:17 UTC
  - c765e528d0 Merge pull request #42768 from rallytime/merge-2017.7
  - 0f7542c37 Merge branch '2016.11' into '2017.7'
  - 7b2119ffee Merge pull request #42669 from garethgreenaway/42642_2016_11_augeas_module_fix
    - 24413084e2 Updating the call to shlex_split to pass the posix=False argument so that quotes are preserved.
  - 30725769ed Merge pull request #42629 from xiaoanyunfei/tornadoapi
    - 1e13383bb9 tornado api
  - f0f00cece1 Merge pull request #42655 from whiteinge/rest_cherrypy-reenable-stats
    - deb6316d67 Fix lint errors
    - 6bd91ce8b03 Reenable cpstats for rest_cherrypy
  - 21cf15f9c3 Merge pull request #42695 from gilbsgilbs/fix-rabbitmq-tags
    - 78fecd7e2 Cast to list in case tags is a tuple.
    - 287b575c5 Fix RabbitMQ tags not properly set.
  - f2b0c9b4fa Merge pull request #42574 from sbojarski/boto-cfn-error-reporting
    - 5c945f10c2 Fix debug message in "boto_cfn._validate" function.
    - 181a1beec0 Fixed error reporting in "boto_cfn.present" function.
  - bc1effc4f2 Merge pull request #42623 from terminalmage/fix-unicode-constructor
    - fc45889dd Fix unicode constructor in custom YAML loader
• **PR #42651**: (gtmanfred) python2- prefix for fedora 26 packages (refs: #42851) @ 2017-08-07 14:35:04 UTC
  - 3f5827f61e Merge pull request #42651 from gtmanfred/2017.7
  - 8784999942 fix syntax
  - 178cc1bd81 make sure names are correct
  - f179b79b52 add py3 for versionlock
  - 1958d18634 python2- prefix for fedora 26 packages
• **ISSUE #42688**: (hibbert) salt.modules.boto_efs module Invalid type for parameter Tags - type: <type 'dict'>, valid types: <type 'list'>, <type 'tuple'> (refs: #42689)
• **PR #42689**: (hibbert) boto_efs_fix_tags: Fix #42688 invalid type for parameter tags @ 2017-08-06 17:47:07 UTC
  - 791248e398 Merge pull request #42689 from hibbert/boto_efs_fix_tags
  - 157f28851 boto_efs_fix_tags: Fix #42688 invalid type for parameter tags
• **ISSUE #42705**: (hbruch) salt.states.docker_container.running replaces container on subsequent runs if oom_kill_disable unsupported (refs: #42745)
• **PR #42745**: (terminalmage) docker.compare_container: treat null oom_kill_disable as False @ 2017-08-05 15:28:20 UTC
- 1b3407649b Merge pull request #42745 from terminalmage/issue42705
- 710bdf6115 docker.compare_container: treat null oom_kill_disable as False

- ISSUE #42649: (tehsu) local_batch no longer working in 2017.7.0, 500 error (refs: #42704)

- PR #42704: (whiteinge) Add import to work around likely multiprocessing scoping bug @ 2017-08-04 23:03:13 UTC
  - 5d5b22021b Merge pull request #42704 from whiteinge/expr_form-warn-scope-bug
  - 03b675a618 Add import to work around likely multiprocessing scoping bug

- ISSUE #42741: (kkoppel) docker_container.running keeps re-creating containers with links to other containers (refs: #42743)

- PR #42743: (kkoppel) Fix docker.compare_container for containers with links @ 2017-08-04 16:00:33 UTC
  - 888e954e73 Merge pull request #42743 from kkoppel/fix-issue-42741
  - de6d3cc0cf Update dockermid.py
  - 58b997c67f Added a helper function that removes container names from container HostConfig:Links values to enable compare_container() to make the correct decision about differences in links.

- ISSUE #42668: (UtahDave) Minions under syndics don't respond to MoM (refs: #42710)

- ISSUE #42545: (paul-mulvihill) Salt-api failing to return results for minions connected via syndics. (refs: #42710)

- PR #42710: (gtmanfred) use subtraction instead of or @ 2017-08-04 15:14:14 UTC
  - 03a7f9bbe Merge pull request #42710 from gtmanfred/syndic
  - 683561a711 use subtraction instead of or

- PR #42670: (gtmanfred) render kubernetes docs @ 2017-08-03 20:30:56 UTC
  - 005182b6a1 Merge pull request #42670 from gtmanfred/kube
  - bca17902f5 add version added info
  - 4bb6c7f5ae render kubernetes docs

- PR #42712: (twangboy) Remove master config file from minion-only installer @ 2017-08-03 20:25:02 UTC
  - df354ddabf Merge pull request #42712 from twangboy/win_build_pkg
  - 8604312a7b Remove master conf in minion install

- PR #42714: (cachedout) Set fact gathering style to 'old' for test_junos @ 2017-08-03 13:39:40 UTC
  - bb1df4a42 Merge pull request #42714 from cachedout/workaround_jnpr_test_bug
  - 834dc605e Set fact gathering style to 'old' for test_junos

- PR #42481: (twangboy) Fix unit.test_crypt for Windows @ 2017-08-01 18:10:50 UTC
  - 4c1d931654 Merge pull request #42481 from twangboy/win_unit_test_crypt
  - 102509029e Remove chown mock, fix path seps

- PR #42654: (morganwillcock) Disable ZFS in the core grain for NetBSD @ 2017-08-01 17:52:36 UTC
  - 8bcefb5e67 Merge pull request #42654 from morganwillcock/zfsgrain
  - 49023deb94 Disable ZFS grain on NetBSD

- ISSUE #42421: (bfilipek) archive.extracted on Windows failed when dir not exist (refs: #42453)
• PR #42453: (gtmanfred) don't pass user to makedirs on windows @ 2017-07-31 19:57:57 UTC
  - 5baf2650fc Merge pull request #42453 from gtmanfred/makedirs
  - 559d432930 fix tests
  - afa7a13ce5 use logic from file.directory for makedirs

• PR #42603: (twangboy) Add runas_passwd as a global for states @ 2017-07-31 19:49:49 UTC
  - fb81e78f71 Merge pull request #42603 from twangboy/win_fix_runas
  - 0c9e40012b Remove deprecation, add logic to state.py
  - 464ec34713 Fix another instance of runas_password
  - 18d6ce4d55 Add global vars to cmd.call
  - 6c71ab6f80 Remove runas and runas_password after state run
  - 4ea264e3db Change to runas_password in docs
  - 61aba35718 Deprecate password, make runas_password a named arg
  - 41f075a06 Add new var to list, change to runas_password
  - b9e91eb60 Add runas_passwd as a global for states

• PR #42541: (Mareo) Avoid confusing warning when using file.line @ 2017-07-31 19:41:58 UTC
  - 75ba23c253 Merge pull request #42541 from epita/fix-file-line-warning
  - 2fd1172e0b Avoid confusing warning when using file.line

• PR #42625: (twangboy) Fix the list function in the win_wua execution module @ 2017-07-31 19:27:16 UTC
  - 3d328eba80 Merge pull request #42625 from twangboy/fix_win_wua
  - 1340c15ce7 Add general usage instructions
  - 19f34bda55 Fix docs, formatting
  - b17495e9c8 Fix problem with list when install=True

• ISSUE #42514: (rickh563) module.run does not work as expected in 2017.7.0 (refs: #42602)

• PR #42602: (garethgreenaway) Use superseded and deprecated configuration from pillar @ 2017-07-31 18:53:06 UTC
  - 25094ad9b1 Merge pull request #42602 from garethgreenaway/42514_2017_7_superseded_deprecated_from_pillar
  - 2e132daa73 Slight update to formatting
  - 74bae13939 Small update to something I missed in the first commit. Updating tests to also test for pillar values.
  - 928a4808dd Updating the superseded and deprecated decorators to work when specified as pillar values.

• PR #42621: (rallytime) [2017.7] Merge forward from 2016.11 to 2017.7 @ 2017-07-28 19:45:51 UTC
  - b7dc30d3ee Merge pull request #42621 from rallytime/merge-2017.7
  - 58dc658a47 Merge branch '2016.11' into '2017.7'
    * cbf752cd73 Merge pull request #42515 from gtmanfred/backslash
      * cc4e45656d Allow not interpreting backslashes in the repl
    * 549495831f Merge pull request #42586 from gdubroeucq/2016.11
      * 9c0b5cc1d6 Remove extra newline
• d2ef4483e4 yumpkg.py: clean
• a96f7c09e0 yumpkg.py: add option to the command "check-update"

  • d42f781c64 Add trace logging of docker.networks result
  • 8c006c63b55 Fix dockerng.network_ name matching

• ISSUE #12587: (Katafalkas) salt-cloud custom functions/actions (refs: #42616)

• PR #42616: (amendlik) Sync cloud modules @ 2017-07-28 15:40:36 UTC
  • ee8ae1496 Merge pull request #42616 from amendlik/sync-clouds
  • ab21bd9b5b Sync cloud modules when saltutil.sync_all is run

• PR #42601: (rallytime) [2017.7] Merge forward from 2016.11 to 2017.7 @ 2017-07-27 22:32:07 UTC
  • e2dd443002 Merge pull request #42601 from rallytime/merge-2017.7
  • 36a1bcf8c5 Merge branch '2016.11' into '2017.7'
    • 4b16109122 Merge pull request #42339 from isbm/isbm-jobs-scheduled-in-a-future-bsc1036125

32.2. Previous releases
- bba84ce2d Bugfix: Jobs scheduled to run at a future time stay pending for Salt minions (bsc#1036125)
- 6c5a7c604a Merge pull request #42077 from vutny/fix-jobs-scheduled-with-whens
  - b1960cea44 Fix scheduled job run on Master if when parameter is a list
- f9c536589 Merge pull request #42414 from vutny/unify-hash-params-format
  - d1f2a93368 DOCS: unify hash sum with hash type format
- 535c922511 Merge pull request #42523 from rallytime/fixed-42375
  - 685c2cced6 Add information about returning a tuple with an error message
  - fa466519c4 Add a mention of the True/False returns with __virtual__()
- 0df0e7e749 Merge pull request #42527 from twangboy/win_wua
  - 0373791f2a Correct capitalization
  - af3bce927b Document changes to Windows Update in 10/2016
- 69b06586da Merge pull request #42551 from binocvlar/fix-lack-of-align-check-output
  - c4faa192 Remove `-s` (--script) argument to parted within align_check function
- 9e0b4e9af Merge pull request #42753 from rallytime/bp-42433
  - 0293429e24 Only force saltenv/pillarenv to be a string when not None
- e931ed2517 Merge pull request #42571 from twangboy/win_add_pythonpath
  - d5aa4dd1a Avoid loading user site packages
  - 9af1eb2741 Ignore any PYTHON* environment vars already on the system
  - 4e2f0b3a95 Add pythonpath to batch files and service
- de2f397041 Merge pull request #42387 from DSRCorporation/bugs/42371_KeyError_WeakValueDict
  - e721c7ee2 Don't use key in weakvalue_dict because it could lie.
- 641a9d7e9d Merge pull request #41968 from root360-AndreasUlm/fixed-rabbitmqctl-output-handler
  - 76fd941d91 added tests for rabbitmq 3.6.10 output handler
  - 3602af1e1b Fix rabbitmqctl output handler for 3.6.10
- 66fede378a Merge pull request #42479 from gtmanfred/interface
  - c32c1b2803 fix pylint
  - 99ec634c6b validate ssh_interface for ec2
- a925c7029a Merge pull request #42516 from rallytime/fixed-42405
  - e3a6717e7a Add info about top file to pillar walk-through example to include edit.vim

- ISSUE #42148: (sjorge) [2017.7.0rc1] use_superseded and module.run changes from release notes do nothing? (refs: #42270)
- PR #42290: (isbm) Backport of #42270 @ 2017-07-27 22:30:05 UTC
  - PR #42270: (The-Loeki) State module.run/wait misses args when looking for kwargs (refs: #42290)
  - 22ee389fa Merge pull request #42290 from isbm/isbm-module_run_parambug_42270_217
  - e38d432f90 Fix docs
- 1e8a56eda5 Describe function tagging
- 1d7233224b Describe function batching
- 1391a05d5e Bugfix: syntax error in the example
- 8c71257a4b Call unnamed parameters properly
- 94c97a8f25 Update and correct the error message
- ea8351362c Bugfix: args gets ignored alongside named parameters
- 74689e3462 Add ability to use tagged functions in the same set

- **PR #42251:** (twangboy) Fix `unit.modules.test_win_ip` for Windows @ 2017-07-27 19:22:03 UTC
  - 4c20f1cfbb Merge pull request #42251 from twangboy/unit_win_test_win_ip
  - 97261bfe69 Fix `win_inet_pton` check for malformed ip addresses

- **PR #42255:** (twangboy) Fix `unit.modules.test_win_system` for Windows @ 2017-07-27 19:12:42 UTC
  - 2985e4c0e6 Merge pull request #42255 from twangboy/unit_win_test_win_system
  - acc0345bc8 Fix unit tests

- **PR #42528:** (twangboy) Namespace `cmp_to_key` in the pkg state for Windows @ 2017-07-27 18:30:23 UTC
  - a573386260 Merge pull request #42528 from twangboy/win_fix_pkg_state
  - a04043fa1 Move `functools` import inside `pylint` escapes
  - 118d5134e2 Remove namespaced function `cmp_to_key`
  - a02c91adda Namespace `cmp_to_key` in the pkg state for Windows

- **ISSUE #42521:** (rickh563) `chocolatey.installed` broken on 2017.7.0 (refs: #42534)

- **PR #42534:** (jmarinaro) Fixes `AttributeError` thrown by `chocolatey` state @ 2017-07-27 17:59:50 UTC
  - 62ae12bcd9 Merge pull request #42534 from jmarinaro/2017.7
  - b242d2d6b5 Fixes `AttributeError` thrown by `chocolatey` state Fixes #42521

- **ISSUE #40354:** (exc414) CentOS 6.8 Init Script - Sed unterminated address regex (refs: #42557)

- **ISSUE #37312:** (gtmanfred) CLI flags should take overload settings in the config files (refs: #42557)

- **PR #42557:** (justincbeard) Fixing output so --force-color and --no-color override master and minion config color value @ 2017-07-27 17:07:33 UTC
  - 52605c249d Merge pull request #42557 from justincbeard/bugfix_37312
  - ee3bc6eb10 Fixing output so --force-color and --no-color override master and minion config color value

- **PR #42567:** (skizunov) Fix disable_<tag-name> config option @ 2017-07-27 17:05:00 UTC
  - ab33517eb8 Merge pull request #42567 from skizunov/develop3
  - 0f0be3e0a Fix disable_<tag-name> config option

- **PR #42577:** (twangboy) Compile scripts with -E -s params for Salt on Mac @ 2017-07-26 22:44:37 UTC
  - 30bb941179 Merge pull request #42577 from twangboy/mac_scripts
  - 69d5973651 Compile scripts with -E -s params for python

- **PR #42524:** (rallytime) [2017.7] Merge forward from 2016.11 to 2017.7 @ 2017-07-26 22:41:06 UTC
  - 60cd078164 Merge pull request #42524 from rallytime/merge-2017.7
− 14d8d795f6 Merge branch '2016.11' into '2017.7'
  * 1bd5bbccc2 Merge pull request #42509 from clem-compilatio/fix-42417
    − 72924b0b68 Fix _assign_floating_ips in openstack.py
  * 4bf35a74de Merge pull request #42464 from garethgreenaway/2016_11_remove_tmp_identity_file
    − ff24102d51 Uncomment the line that removes the temporary identity file.
  * e2120dbd0e Merge pull request #42443 from garethgreenaway/42357_pass_args_kwargs_correctly
    − 635810b3e3 Updating the slack engine in 2016.11 to pass the args and kwargs correctly to LocalClient
  * 8262cc9054 Merge pull request #42200 from shengis/sqlite3 Fix _row_absent_2016.11
    − 407b8f6bb3 Fix #42198 If where_args is not set, not using it in the delete request.
  * d9df97e5a3 Merge pull request #42424 from goten4/2016.11
    − 1c0574d05e Fix error message when tornado or pycurl is not installed

• PR #42575: (rallytime) [2017.7] Merge forward from 2017.7.1 to 2017.7 @ 2017-07-26 22:39:10 UTC
  − 2acde837df Merge pull request #42575 from rallytime/merge-2017.7.1-into-2017.7
  − 63bb0f2c43 pass in empty kwarg for reactor
  − 2868061ee4 update chunk, not kwarg in chunk
  − 46715e9d94 Merge branch '2017.7.1' into '2017.7'

• PR #42555: (Ch3LL) add changelog to 2017.7.1 release notes @ 2017-07-26 14:57:43 UTC
  − 1d93e92194 Merge pull request #42555 from Ch3LL/7.1_add_changelog
  − 6b69e71093 add changelog to 2017.7.1 release notes

• PR #42266: (twangboy) Fix unit.states.test_file for Windows @ 2017-07-25 20:26:32 UTC
  − 07c2793e86 Merge pull request #42266 from twangboy/win_unit_states_test_file
  − 669aaee10d Mock file exists properly
  − a4231c9827 Fix ret mock for linux
  − 0c484f8979 Fix unit tests on Windows

• PR #42484: (shengis) Fix a potential Exception with an explicit error message @ 2017-07-25 18:34:12 UTC
  − df417eae17 Merge pull request #42484 from shengis/fix-explicit-error-msg-x509-sign-remote
  − 0b548c72e1 Fix a potential Exception with an explicit error message

• ISSUE saltstack/salt-jenkins#396: (Ch3LL) Python3 Fix Test: JoyentTest.test_instance (refs: #42529)

• ISSUE #41720: (rallytime) [Py3] Some salt-cloud drivers do not work using Python 3 (refs: #42529)

• PR #42529: (gtmanfred) Fix joyent for python3 @ 2017-07-25 16:37:48 UTC
  − 0f25e76f9 Merge pull request #42529 from gtmanfred/2017.7
  − b7ebb4d81a these drivers do not actually have an issue.
  − e90ca7a114 use salt encoding for joyent on 2017.7

• PR #42465: (garethgreenaway) [2017.7] Small fix to modules/git.py @ 2017-07-24 17:24:55 UTC
  − 488457c5a0 Merge pull request #42465 from garethgreenaway/2017_7_remove_tmp_identity_file
• ISSUE #23516: (dkiser) BUG: cron job scheduler sporadically works (refs: #42077)
• PR #42107: (vutny) [2017.7] Fix scheduled jobs if *when* parameter is a list @ 2017-07-24 17:04:12 UTC
  - PR #42077: (vutny) Fix scheduled job run on Master if *when* parameter is a list (refs: #42107)
  - PR #41973: (vutny) Fix Master/Minion scheduled jobs based on Cron expressions (refs: #42077)
• 4f044999fa Merge pull request #42107 from vutny/2017.7-fix-jobs-scheduled-with-whens
• 905be493d4 [2017.7] Fix scheduled jobs if *when* parameter is a list
  - PR #42506: (terminalmage) Add PER_REMOTE_ONLY to init_remotes call in git_pillar runner @ 2017-07-24 16:59:21 UTC
    - 6ea0763e1 Merge pull request #42506 from terminalmage/fix-git-pillar-runner
    - 6352f447ce Add PER_REMOTE_ONLY to init_remotes call in git_pillar runner
• PR #42502: (shengis) Fix azurerm query to show IPs @ 2017-07-24 15:54:45 UTC
  - b88e645f10 Merge pull request #42502 from shengis/fix_azurerm_request_ips
  - 92f1890701 Fix azurerm query to show IPs
• PR #42180: (twangboy) Fix *unit.modules.test_timezone* for Windows @ 2017-07-24 14:46:16 UTC
  - c793d83d26 Merge pull request #42180 from twangboy/win_unit_test_timezone
  - 832a3d86dd Skip tests that use os.symlink on Windows
• PR #42474: (whiteinge) Cmd arg kwarg parsing test @ 2017-07-24 14:13:30 UTC
  - PR #39646: (terminalmage) Handle deprecation of passing string args to load_args_and_kwargs (refs: #42474)
    - 083ff00410 Merge pull request #42474 from whiteinge/cmd-arg-kwarg-parsing-test
    - 0cc0c0967a Lint fixes
    - 66093738c8 Add back support for string kwargs
    - 622ff5be40 Add LocalClient.cmd test for arg/kwarg parsing
    - 9f4eb80d90 Add a test.arg variant that cleans the pub kwargs by default
• PR #42425: (rallytime) [2017.7] Merge forward from 2016.11 to 2017.7 @ 2017-07-21 22:43:41 UTC
  - c91a5e539e Merge pull request #42425 from rallytime/merge-2017.7
  - ea457aaa0a5 Remove ALIASES block from template util
  - c673b64583 Merge branch ’2016.11’ into ’2017.7’
    - 42bb1a64ca Merge pull request #42350 from twangboy/win_fix_ver_grains_2016.11
      - 8048403d7 Detect Server OS with a desktop release name
    - 0a72e56f6b Merge pull request #42356 from meaksh/2016.11-AliasesLoader-wrapper-fix
      - 915d94219e Allow checking whether a function is available on the AliasesLoader wrapper
    - 10eb7b7a79 Merge pull request #42368 from twangboy/win_fix_build_2016.11
      - a7c910c31e Remove build and dist directories before install
    - 016189f62f Merge pull request #42370 from rallytime/merge-2016.11
      - 0aa5de1de Merge branch ’2016.3’ into ’2016.11’
- e9b0f20f8a Merge pull request #42359 from Ch3LL/doc-update-2016.3
- dc85b5edbe [2016.3] Update version numbers in doc config for 2017.7.0 release
  - f06af1796 Merge pull request #42360 from Ch3LL/doc-update-2016.11
  - b90b7a7506 [2016.11] Update version numbers in doc config for 2017.7.0 release
  - e0595b0a0f Merge pull request #42319 from rallytime/config-docs
  - b40f980632 Add more documentation for config options that are missing from master/minion docs
  - 78940400e3 Merge pull request #42352 from CorvinM/issue42333
  - 526b6ee14d Multiple documentation fixes
- ISSUE #42357: (Giandom) Salt pillarenv problem with slack engine (refs: #42443, #42444)
- PR #42444: (garethgreenaway) [2017.7] Fix to slack engine @ 2017-07-21 22:03:48 UTC
  - 10e4d9234b Merge pull request #42444 from garethgreenaway/42357_2017_7_pass_args_kwargs_correctly
  - f411cfec2a9 Updating the slack engine in 2017.7 to pass the args and kwargs correctly to LocalClient
- PR #42461: (rallytime) Bump warning version from Oxygen to Fluorine in roster cache @ 2017-07-21 21:33:25 UTC
  - 723be49fac Merge pull request #42461 from rallytime/bump-roster-cache-deprecations
  - c0df0137f5 Bump warning version from Oxygen to Fluorine in roster cache
- ISSUE #42374: (tyhunt99) [2017.7.0] salt-run manage.versions throws exception if minion is offline or unresponsive (refs: #42436)
- PR #42436: (garethgreenaway) Fixes to versions function in manage runner @ 2017-07-21 19:41:07 UTC
  - 09521602c1 Merge pull request #42436 from garethgreenaway/42374_manage_runner_minion_offline
  - 0fd39498e0 Updating the versions function inside the manage runner to account for when a minion is offline and we are unable to determine its version.
- ISSUE #42427: (grichmond-salt) Issue Passing Variables created from load_json as Inline Pillar Between States (refs: #42435)
- PR #42435: (terminalmage) Modify our custom YAML loader to treat unicode literals as unicode strings (refs: #42812) @ 2017-07-21 19:40:34 UTC
  - 54193ea543 Merge pull request #42435 from terminalmage/issue42427
  - 31273c7ec1 Modify our custom YAML loader to treat unicode literals as unicode strings
- ISSUE #42431: (zebooka) Git.detached broken in 2017.7.0 (refs: #42399)
- ISSUE #38878: (tomlaredo) [Naming consistency] git.latest "rev" option VS git.detached "ref" option (refs: #38898)
- PR #42399: (rallytime) Update old "ref" references to "rev" in git.detached state @ 2017-07-21 19:38:59 UTC
  - PR #38898: (terminalmage) git.detached: rename ref to rev for consistency (refs: #42399)
  - 0bd379135c Merge pull request #42399 from rallytime/fixed-42381
  - d9d9fe02f Update old "ref" references to "rev" in git.detached state
- ISSUE #42400: (Enquier) Conflict in execution of passing pillar data to orch/reactor event executions 2017.7.0 (refs: #42031)
- PR #42031: (skizunov) Fix: Reactor emits critical error @ 2017-07-21 19:38:34 UTC
- bd4adb483d Merge pull request #42031 from skizunov/develop3
- 540977b4b1 Fix: Reactor emits critical error

- ISSUE #41949: (jrporcaro) Event returner doesn't work with Windows Master (refs: #42027)
- PR #42027: (gtmanfred) import salt.minion for EventReturn for Windows @ 2017-07-21 19:37:03 UTC
  - 3abf7ad7d7 Merge pull request #42027 from gtmanfred/2017.7
  - fd4458b6c7 import salt.minion for EventReturn for Windows
- PR #42454: (terminalmage) Document future renaming of new rand_str jinja filter @ 2017-07-21 18:47:51 UTC
  - 994d3dc74a Merge pull request #42454 from terminalmage/jinja-docs-2017.7
  - 98b661406e Document future renaming of new rand_str jinja filter
- PR #42452: (Ch3LL) update windows urls to new py2/py3 naming scheme @ 2017-07-21 17:20:47 UTC
  - 4480075129 Merge pull request #42452 from Ch3LL/fix_url_windows
  - 3fa918f73 update windows urls to new py2/py3 naming scheme
- ISSUE #42404: (gabekahen) [2017.7] file.managed with cmd_check "No such file or directory" (refs: #42411)
- ISSUE #33708: (pepinje) visudo check command leaves cache file in /tmp (refs: #42411, #38063)
- PR #42411: (seedickcode) Fix file.managed check_cmd file not found - Issue #42404 @ 2017-07-20 21:59:17 UTC
  - PR #38063: (lua) tmp file clean up in file.manage - fix for #33708 (refs: #42411)
  - 33ee90be1fe Merge pull request #42411 from seedickcode/check_cmd_fix
  - 4ae3911f01 Fix file.managed check_cmd file not found - Issue #42404
- PR #42409: (twangboy) Add Scripts to build Py3 on Mac @ 2017-07-20 21:36:34 UTC
  - edde31376a Merge pull request #42409 from twangboy/mac_py3_scripts
  - ac0e04af72 Remove build and dist, sign pkgs
  - 9d66e273c4 Fix hard coded pip path
  - 7bd86cbbd2 Add support for Py3
  - aa4eed93c8 Update Python and other reqs
- ISSUE #42403: (astronouth7303) [2017.7] Pillar empty when state is applied from orchestrate (refs: #42433)
- PR #42433: (terminalmage) Only force saltenv/pillarenv to be a string when not None (refs: #42573) @ 2017-07-20 21:32:24 UTC
  - 82982f940d Merge pull request #42433 from terminalmage/issue42403
- PR #42408: (CorvinM) Fix documentation misformat in salt.states.file.replace @ 2017-07-20 00:45:43 UTC
  - a71938cefe Merge pull request #42408 from CorvinM/file-replace-doc-fix
  - 246a2b3e74 Fix documentation misformat in salt.states.file.replace
- PR #42347: (twangboy) Fixes problem with Version and OS Release related grains on certain versions of Python @ 2017-07-19 17:05:43 UTC
  - d385df19d Merge pull request #42347 from twangboy/win_fix_ver_grains
  - ef1f663fc9 Detect server OS with a desktop release name
- PR #42366: (twangboy) Remove build and dist directories before install @ 2017-07-19 16:37:41 UTC
  - eb9e4206c9 Merge pull request #42366 from twangboy/win_fix_build

32.2. Previous releases 5347
- 0946002713 Add blank line after delete
- f7c0bbf4f6 Remove build and dist directories before install

- **PR #42373**: (Ch3LL) Add initial 2017.7.1 Release Notes File @ 2017-07-19 16:28:46 UTC
  - a7f820f25d Merge pull request #42373 from Ch3LL/add_2017.7.1
  - ce1c1b6d28 Add initial 2017.7.1 Release Notes File

- **PR #42150**: (twangboy) Fix `unit.modules.test_pip` for Windows @ 2017-07-19 16:01:17 UTC
  - 59e012b485 Merge pull request #42150 from twangboy/win_unit_test_pip
  - 4ee24202fc Fix unit tests for test_pip

- **PR #42154**: (twangboy) Fix `unit.modules.test_reg_win` for Windows @ 2017-07-19 16:00:38 UTC
  - ade256bb34 Merge pull request #42154 from twangboy/win_unit_test_reg
  - 00d9a52802 Fix problem with handling REG_QWORD in list values

- **PR #42182**: (twangboy) Fix `unit.modules.test_useradd` for Windows @ 2017-07-19 15:55:33 UTC
  - 07593675e2 Merge pull request #42182 from twangboy/win_unit_test_useradd
  - 8260a71c07 Disable tests that require pwd in Windows

- **PR #42364**: (twangboy) Windows Package notes for 2017.7.0 @ 2017-07-18 19:24:45 UTC
  - a175c40c1d Merge pull request #42364 from twangboy/release_notes_2017.7.0
  - 96517d1355 Add note about patched windows packages

- **PR #42361**: (Ch3LL) [2017.7] Update version numbers in doc config for 2017.7.0 release @ 2017-07-18 19:23:22 UTC
  - 4dfe50e558 Merge pull request #42361 from Ch3LL/doc-update-2017.7
  - dc5bb301f7 [2017.7] Update version numbers in doc config for 2017.7.0 release

- **PR #42363**: (rallytime) [2017.7] Merge forward from 2016.11 to 2017.7 @ 2017-07-18 18:40:48 UTC
  - 587138d771 Merge pull request #42363 from rallytime/merge-2017.7
  - 7aa31ff030 Merge branch '2016.11' into '2017.7'
    - b256001760 Merge pull request #42353 from terminalmage/fixed-git-test
      - 14cf6ce322 is_windows is a function, not a property/attribute
    - 866a1fbeb4 Merge pull request #42264 from rallytime/fixed-41116
      - bd63888e3 Add mono-spacing to salt-minion reference for consistency
      - 30d62f43da Update minion restart section in FAQ doc for windows
    - 9a707088ad Merge pull request #42275 from terminalmage/issue42194
      - 663874908a pkg.installed: pack name/version into pkgs argument
    - e588f235e0 Merge pull request #42269 from rallytime/fixed-41721
      - f2250d474a Add a note about using different styles of quotes.
      - 38d9b3d553 Add some clarity to "multiple quotes" section of yaml docs
    - 5aaa214a75 Merge pull request #42282 from rallytime/fixed-42152
      - f032223843 Handle libcloud objects that throw RepresenterErrors with --out=yaml
* fb5697a4bc Merge pull request #42308 from lubyou/42295-fix-file-absent-windows
  - 026ccf401a Force file removal on Windows. Fixes #42295
* da2a8a518f Merge pull request #42314 from rallytime/fixed-42267
  - c406046940 Add clarification to salt ssh docs about key auto-generation.
* acadd54013 Merge pull request #41945 from garethgreen-away/41936_allow_identity_files_with_user
  - 44841c5626 Moving the call to cp.get_file inside the with block to ensure the umask is preserved when we grab the file.
  - f9ba68eed8 Merge pull request #1 from terminalmage/pr-41945
  - 1b6026177c Restrict set_umask to mkstemp call only
  - 68549f3496 Fixing umask to we can set files as executable.
  - 4949bf3f3 Updating to swap on the new salt.utils.files.set_umask context_manager
  - 8faa9f6d92 Updating PR with requested changes.
  - 49476e939 Updating the git module to allow an identity file to be used when passing the user parameter
* f90e04a2bc Merge pull request #42289 from CorvinM/bp-41543
  - 357dc22f05 Fix user creation with empty password
* a91a3f81b1 Merge pull request #42123 from vtuny/fixed-master-utils-import
  - 6bb88b998c Add missing doc for utils_dirs Minion config option
  - f1bc5f6d5 Util: add example of module import
* e2aa5114e4 Merge pull request #42261 from rallytime/minor-doc-fix
  - 8c76bb53d Some minor doc fixes for dnsutil module so they'll render correctly
* e9dfbc9cc Merge pull request #42262 from rallytime/bp-42224
  - c31ded341c Remove duplicate instruction in Openstack Rackspace config example
* 7780579c36 Merge pull request #42181 from garethgreenaway/42137_backport_fix_from_2017_7
  - a34970b45b Back porting the fix for 2017.7 that ensures the order of the names parameter.
* 7253786a6 Merge pull request #42253 from gtmanfred/2016.11
  - 53e25760be Only use unassociated ips when unable to allocate
* b2a4698b5d Merge pull request #42252 from UtahDave/2016.11local
  - e6a9563d47 simple doc updates
* 781fe13be7 Merge pull request #42235 from astronouth7303/patch-1-2016.3
  - 4cb51bd03a Make note of dig partial requirement.
  - 08e7d8351a Abolish references to dig in examples.
* 83cbd76f16 Merge pull request #42215 from twangboy/win_iis_docs
  - c07e22041a Add missing config to example
* 274946ab00 Merge pull request #42211 from terminalmage/issue40928
  - 22a18fa2ed Only pass a saltenv in orchestration if one was explicitly passed (2016.11)
• 89261cf06c Merge pull request #42173 from rallytime/bp-37424
  • 01addb6053 Avoid Early Convert ret[‘comment’] to String
• 3b17fb7f83 Merge pull request #42175 from rallytime/bp-39366
  • 53f7b987e8 Pass sig to service.status in after_toggle

  - PR #42086: (abulford) Make result=true if Docker volume already exists (refs: #42087)
  - 8dbb93851d Merge pull request #42087 from redmatter/fix-dockerng-volume-present-result-2017.7
  - 2e1dc95500 Make result=true if Docker volume already exists

• ISSUE #42166: (sjorge) [2017.7.0rc1] jinja filter network_hosts fails on large IPv6 networks (refs: #42186)

• PR #42186: (rallytime) Use long_range function for IPv6Network hosts() function @ 2017-07-17 18:39:35 UTC
  - c84d6db548 Merge pull request #42186 from rallytime/fix-42166
  - b8b0c0d599 Add note to various network_hosts docs about long_run for IPv6 networks
  - 11862743c2 Use long_range function for IPv6Network hosts() function

• PR #42210: (terminalmage) Only pass a saltenv in orchestration if one was explicitly passed (2017.7) @ 2017-07-17 18:22:39 UTC
  - e7b79e0fd2 Merge pull request #42210 from terminalmage/issue40928-2017.7
  - 771ade5d73 Only pass a saltenv in orchestration if one was explicitly passed (2017.7)

• PR #42236: (mirceaullinic) New option for napalm proxy/minion: provider @ 2017-07-17 18:19:56 UTC
  - 0e49021b0e Merge pull request #42236 from cloudflare/napalm-provider
  - 1ac69bd373 Document the provider option and rearrange the doc
  - 4bf4b14161 New option for napalm proxy/minion: provider

• PR #42257: (twangboy) Fix unit.pillar.test_git for Windows @ 2017-07-17 17:51:42 UTC
  - 3ec5bb1c2f Merge pull request #42257 from twangboy/win_unit_pillar_test_git
  - 45be32666a Add error-handling function to shutil.rmtree

• PR #42258: (twangboy) Fix unit.states.test_environ for Windows @ 2017-07-17 17:50:38 UTC
  - 36395625c2 Merge pull request #42258 from twangboy/win_unit_states_tests_environ
  - 55b278c478 Mock the reg.read_value function

• PR #42265: (rallytime) Gate boto_elb tests if proper version of moto isn't installed @ 2017-07-17 17:47:52 UTC
  - 894bdd2b19 Merge pull request #42265 from rallytime/gate-moto-version
  - 78cede61d5 Gate boto_elb tests if proper version of moto isn't installed

• PR #42277: (twangboy) Fix unit.states.test_winrepo for Windows @ 2017-07-17 17:37:07 UTC

32.2. Previous releases
• PR #42309: (terminalmage) Change "TBD" in versionadded to "2017.7.0" @ 2017-07-17 17:11:45 UTC
  - be6b211683 Merge pull request #42309 from terminalmage/fix-versionadded
  - 603f5b7de6 Change "TBD" in versionadded to "2017.7.0"
• PR #42206: (rallytime) [PY3] Fix test that is flaky in Python 3 (refs: #42783) @ 2017-07-17 17:09:53 UTC
  - acd29fb38 Merge pull request #42206 from rallytime/fixed-flaky-test
  - 2be4865f48 [PY3] Fix test that is flaky in Python 3
• PR #42126: (rallytime) [2017.7] Merge forward from 2016.11 to 2017.7 @ 2017-07-17 17:07:19 UTC
  - 8f1cb287cf Merge pull request #42126 from rallytime/merge-2017.7
• PR #42078: (damon-atkins) pkg.install and pkg.remove fix version number input. @ 2017-07-05 06:04:57 UTC
  - 4780d7830a Merge pull request #42078 from damon-atkins/fix_convert_flt_str_version_on_cmd_line
  - 09d37dd892 Fix comment typo
  - 7167549425 Handle version=None when converted to a string it becomes 'None' parm should default to empty string rather than None, it would fix better with existing code.
  - 4fb2bb1856 Fix typo
  - c55c3361c pkg.install and pkg.remove on the command line take number version numbers, store them within a float. However version is a string, to support versions numbers like 1.3.4
• PR #42105: (Ch3LL) Update releasecandidate doc with new 2017.7.0rc1 Release @ 2017-07-04 03:14:42 UTC
  - 46d575acbc Merge pull request #42105 from Ch3LL/update_rc
• ISSUE #41885: (astronouth7303) Recommended pip installation outdated? (refs: #42099)
• PR #42099: (rallytime) Remove references in docs to pip install salt-cloud @ 2017-07-03 22:13:44 UTC
  - d38548bbbd Merge pull request #42099 from rallytime/fixed-41885
  - 81d606a8cb Merge pull request #42099 from rallytime/fix-41885
• ISSUE #42076: (abulford) dockerng.volume_present test looks as though it would cause a change (refs: #42087, #42086)
• PR #42086: (abulford) Make result=true if Docker volume already exists (refs: #42087) @ 2017-07-03 15:48:33 UTC
  - 8d549685a7 Make result=true if Docker volume already exists
• ISSUE #25842: (shikhartanwar) Running salt-minion as non-root user to execute sudo commands always returns an error (refs: #42021)
• PR #42021: (gtmanfred) Set concurrent to True when running states with sudo @ 2017-06-30 21:02:15 UTC
  - 7160697123 Merge pull request #42021 from gtmanfred/2016.11
  - 2bebeeb0a5 Set concurrent to True when running states with sudo
• PR #42029: (terminalmage) Mock socket.getaddrinfo in unit.utils.network_test.NetworkTestCase.test_host_to_ips @ 2017-06-30 20:58:56 UTC
Salt Documentation, Release 3006.4

- b784fbbd8 Merge pull request #42029 from terminalmage/host_to_ips
- 26f848e111 Mock socket.getaddrinfo in unit.utils.network_test.NetworkTestCase.test_host_to_ips

**PR #42055**: (dmurphy18) Upgrade support for gnupg v2.1 and higher @ 2017-06-30 20:54:02 UTC
- e067020b9 Merge pull request #42055 from dmurphy18/handle_gnupgv21
- e20cea6350 Upgrade support for gnupg v2.1 and higher

**PR #42048**: (Ch3LL) Add initial 2016.11.7 Release Notes @ 2017-06-30 16:00:05 UTC
- 74ba2abc48 Merge pull request #42048 from Ch3LL/add_11.7
- 1de5e008a0 Add initial 2016.11.7 Release Notes

### 32.2.71 Salt 2017.7.3 Release Notes

Version 2017.7.3 is a bugfix release for 2017.7.0.

**Statistics**

**Windows Changes**

**pkg Execution Module**

Significant changes (PR #43708 & #45390, damon-atkins) have been made to the pkg execution module. Users should test this release against their existing package sls definition files.

- **pkg.list_available** no longer defaults to refreshing the winrepo meta database.
- **pkg.install** without a **version** parameter no longer upgrades software if the software is already installed. Use **pkg.install version=latest** (or simply use a **pkg.latest** state to get the old behavior.
- **pkg.list_pkgs** now returns multiple versions if software installed more than once.
- **pkg.list_pkgs** now returns **Not Found** when the version is not found instead of (**value not set**) which matches the contents of the sls definitions.
- **pkg.remove** will wait up to 3 seconds (normally about a second) to detect changes in the registry after removing software, improving reporting of version changes.

32.2. Previous releases 5353
pkg.remove can remove latest software, if latest is defined in sls definition.

Documentation was update for the execution module to match the style in new versions, some corrections as well.

All install/remove commands are prefix with cmd.exe shell and cmdmod is called with a command line string instead of a list. Some sls files in saltstack/salt-winrepo-ng expected the commands to be prefixed with cmd.exe (i.e. the use of &).

Some execution module functions results, now behave more like their Unix/Linux versions.

cmd Execution Module

Due to a difference in how Python’s subprocess.Popen() spawns processes on Windows, passing the command as a list of arguments can result in problems. This is because Windows’ CreateProcess requires the command to be passed as a single string. Therefore, subprocess will attempt to re-assemble the list of arguments into as string. Some escaped characters and quotes can cause the resulting string to be incorrectly-assembled, resulting in a failure to execute the command.

Salt now deals with these cases by joining the list of arguments correctly and ensuring that the command is passed to subprocess.Popen() as a string.

Changelog for v2017.7.2..v2017.7.3

- PR #45606: (terminalmage) Fix bug affecting salt-ssh when root_dir differs from the default (refs: #45645)
- f37a5b6d8d Merge pull request #45645 from rallytime/bp-45606
- d52d96f30a Fix bug affecting salt-ssh when root_dir differs from the default

PR #45641: (rallytime) Back-port #45508 to 2017.7.3 @ 2018-01-23 21:18:39 UTC
- PR #45508: (frogunder) fix test_archive test for mac on 2017.7 branch (refs: #45641)
- e659793c09 Merge pull request #45508 from rallytime/bp-45508
- e6917a291e fix test_archive test for mac on 2017.7 branch

PR #45604: (rallytime) Back-port #45582 to 2017.7.3 @ 2018-01-22 16:54:15 UTC
- PR #45582: (terminalmage) Two salt-ssh fixes (refs: #45604)
- ced3269ae8 Merge pull request #45604 from rallytime/bp-45582
- bc8a450c7 Remove state.py utils file from thin list
- 629e6c9674 Further fixes to for salt-ssh test under heavy load
Salt Documentation, Release 3006.4

- 0dff59b59 Add salt/utils/state.py to thin tarball
- a61afda100 Pass on OSError if thin tarball already removed

**PR #45591: (gtmanfred) mark minion_blackout tests as flaky @ 2018-01-22 00:14:31 UTC**
- 4672baac68 Merge pull request #45591 from gtmanfred/2017.7.3
- f7fd35fe4a test updating the minion blackout timeout to 10 seconds

**PR #45585: (rallytime) Back-port #45579 to 2017.7.3 @ 2018-01-22 00:13:59 UTC**
- PR #45579: (terminalmage) Test suite stability fixes (refs: #45585)
- 2a992f9017 Merge pull request #45585 from rallytime/bp-45579
- 0292c8345b Lint fix: use six’s map
- 108d8ce6ef Use correct utils path for 2017.7
- a38f4cb6d6 Restrict pyzmq optimizations to pyzmq >= 14.3.0
- 58ad558346 Fix event unpack

**PR #45573: (gtmanfred) update 2017.7.3 tests @ 2018-01-20 20:05:13 UTC**
- 19cd97ed3b Merge pull request #45573 from gtmanfred/2017.7.3
- bd3cb47fa7 fix mock for opensuse
- 808e26e69a test simple website

**PR #45570: (gtmanfred) Fix tests for 2017.7.3 @ 2018-01-20 15:01:21 UTC**
- e72d81ef22 Merge pull request #45570 from gtmanfred/2017.7.3
- 1f71f301ba specify checking man page path
- 2ddbc45c1 fix pkg_resources for usage with testing pip
- 0ba39a7108 switch systemd-journald for sshd for arch service test

**PR #45538: (gtmanfred) Backport test fixes to 2017.7.3 @ 2018-01-19 14:39:44 UTC**
- 7bc60c56d4 Merge pull request #45538 from gtmanfred/2017.7.3
- 801e639b6 Merge branch '2017.7.3' into 2017.7.3

**PR #45533: (rallytime) Back-port #45529 to 2017.7.3 @ 2018-01-18 22:52:29 UTC**
- PR #45529: (Ch3LL) Fix UnboundLocalError for pacman pkg installs (refs: #45533)
- 8ad65e3359 Merge pull request #45533 from rallytime/bp-45529
- 6d56e64d88 Fix UnboundLocalError for pacman pkg installs
  - 8d907ee1a0 fix moto version
  - 1241ab5fc6 fix test boto imports
  - 2d96367cf9 fix fedora pkg test

**ISSUE #45394: (dmurphy18) git.latest fails when "depth" is used with a non-default branch (refs: #45399)**

**PR #45442: (rallytime) Back-port #45399 to 2017.7.3 @ 2018-01-17 17:20:48 UTC**
- PR #45399: (terminalmage) Fix git.latest failure when rev is not the default branch (refs: #45442)
- 7379f9e3e5 Merge pull request #45442 from rallytime/bp-45399
- 590a6db626 Lint: use support TMP path instead of integration TMP path

5356 Chapter 32. Release notes
- c081b2c62c Fix git.latest failure when rev is not the default branch
- **PR #45468**: (twangboy) Fix some issues with reg.py @ 2018-01-16 22:23:47 UTC
  - ee5090f69b Merge pull request #45468 from twangboy/win_reg
  - a0d21c6354 Fix some issues with reg.py
- **ISSUE #44913**: (ari) FreeBSD packaging install performance regression (refs: #45174)
- **PR #45434**: (rallytime) Back-port #45174 to 2017.7.3 @ 2018-01-14 12:43:16 UTC
  - **PR #45174**: (eradman) Do not force pkg reinstall on FreeBSD (refs: #45434)
  - ef7a896eb6 Merge pull request #45434 from rallytime/bp-45174
  - b310ff7ab8 Do not force pkg reinstall on FreeBSD
- **PR #45395**: (rallytime) Back-port #45380 to 2017.7.3 @ 2018-01-12 18:49:20 UTC
  - **PR #45380**: (twangboy) Backport changes from #45308 (refs: #45395)
  - c3fd1dcd4 Merge pull request #45395 from rallytime/bp-45380
  - 0356b3d56f Backport changes from #45308
- **ISSUE #44107**: (anlutro) salt-ssh 2017.7 doesn't work with Python 3, missing backports_abc (refs: #45294)
- **PR #45294**: (gtmanfred) include backports_abc @ 2018-01-11 18:18:16 UTC
  - f7da716d32 Merge pull request #45294 from gtmanfred/2017.7
  - 3633ceea7 Merge branch '2017.7' into 2017.7
  - 29806e4496 ignore salt.ext in pylint
  - 8b597a4890 include backports_abc
- **ISSUE #43130**: (boltronics) module.run documentation issues (refs: #45381)
- **PR #45381**: (gtmanfred) fix module.run docs @ 2018-01-11 18:02:38 UTC
  - f77a3e9cd4 Merge pull request #45381 from gtmanfred/module.run
  - 230e899192 fix module.run docs
- **ISSUE #43995**: (dragonpaw) Using zmq built with --enable-draft breaks Salt (refs: #45368)
- **PR #45368**: (DmitryKuzmenko) Fixes to work with pyzmq with --enable-drafts @ 2018-01-11 17:53:16 UTC
  - 8efd29f4d9 Merge pull request #45368 from DSRCorporation/bugs/zmq_draft
  - 7622e355cf Minor: removed a stale comment.
  - 00f31bf9b5 Fixes to work with pyzmq with --enable-drafts
- **PR #45371**: (rallytime) Back-port #45158 to 2017.7 @ 2018-01-11 17:51:38 UTC
  - **PR #45158**: (terminalmage) Fix integration.modules.test_state.StateModuleTest.test_exclude (refs: #45371)
  - 22ce5fda06 Merge pull request #45371 from rallytime/bp-45158
  - 3565bc2bf2 Don't use include-test SLS in orch tests
  - 8bc1e0d7a Fix integration.modules.test_state.StateModuleTest.test_exclude
- **PR #45387**: (renner) Set SHELL environment variable @ 2018-01-11 16:23:21 UTC
• PR #40630: (mateiw) develop: SUSE specific changes to salt-api.service (refs: #45387)
  - 3a0e2de995 Merge pull request #45387 from renner/patch-2
  - 530dd2d29 Set SHELL environment variable

• PR #40620: (mateiw) SUSE specific changes to salt-api.service (refs: #45387, #40630)
  - dc9f8a2260 Merge pull request #45388 from terminalmage/fix-test-loader-error
  - 5473c085d9 Fix loader error in 2017.7 tests

• PR #45388: (terminalmage) Fix loader error in 2017.7 tests @ 2018-01-11 16:13:53 UTC
  - dcf98a2260 Merge pull request #45388 from terminalmage/fix-test-loader-error

• PR #45382: (terminalmage) Skip flaky test on 2017.7 branch @ 2018-01-11 14:23:05 UTC
  - d15f9e1020 Merge pull request #45382 from terminalmage/salt-jenkins-686
  - ff3039db6c Skip flaky test on 2017.7 branch

• PR #45369: (rallytime) [2017.7] Merge forward from 2016.11 to 2017.7 @ 2018-01-10 22:14:05 UTC
  - dbe21b2c0d Merge pull request #45369 from rallytime/merge-2017.7
  - f65e091d8f Merge branch '2016.11' into '2017.7'
    - 0959ae3a3 Merge pull request #45327 from lomeroe/bp-44861_2016.11
      - 784139f734 Check for values other than 0 or 1
    - a6dbf09f50 Merge pull request #45268 from damon-atkins/2016.11_win_pkg_pkg_install_latest
      - 325a90f666 Update 2016.11.9.rst
      - 4da9200b9c Update 2016.11.9.rst
      - 126ae36ac Update 2016.11.9.rst
      - 1c01967943 Update 2016.11.9.rst
      - a0d89882b8 Fix pkg.install packagename version=latest i.e. if on an old version upgrade to the latest

• PR #45379: (rhoths) Minor spelling/grammar fixes in the highstate returner documentation @ 2018-01-10 20:09:52 UTC
  - 55979b3a48 Merge pull request #45379 from rhoths/rhoths-doc-highstate-1
  - afbbd492cd Minor spelling/grammar fixes in highstate returner

• PR #45358: (UtahDave) gate the minion data cache refresh events. @ 2018-01-10 17:21:05 UTC
  - PR #45299: (garethgreenaway) [2017.7] config gate auth_events (refs: #45358)
  - 541e59fa75 Merge pull request #45358 from UtahDave/gate_data_cache_refresh
  - 379b6c2d3e should be self, not salt
  - a82e158f2d gate the minion data cache refresh events.

• PR #45297: (Ch3LL) Allow macosx service state tests to check for pid return @ 2018-01-09 20:47:24 UTC
  - fb87010461 Merge pull request #45297 from Ch3LL/mac_service_state
  - 4e569b5802 Allow macosx service state tests to check for pid return

• PR #45351: (dmurphy18) Update debbuild to explicitly include source code for Debian, Ubuntu @ 2018-01-09 17:21:51 UTC
  - beedd6e815 Merge pull request #45351 from dmurphy18/upd_debbuild
Salt Documentation, Release 3006.4

- 478dc70092 Update debbuild flags

- **PR #45299:** [garethgreenaway] [2017.7] config gate auth_events (refs: #45358) @ 2018-01-09 15:00:30 UTC
  - 66da9b47bc Merge pull request #45299 from garethgreenaway/config_gate_auth_events
  - 9a15ec3430 Updating versionadded string. Fixing typo.
  - edfc3de078 Adding in documentation for auth_events configuration option
  - 3ee4eabf8d Fixing small typo
  - 6a28b0ddc9 Adding some code to config gate if auth_events are sent

- **PR #44856:** [Ch3LL] Add state.running ssh integration test @ 2018-01-08 21:40:50 UTC
  - 8d04c2b3d4 Merge pull request #44856 from Ch3LL/running_test
  - 9a35a73711 add time limit to while loop
  - aeb5f4e248 Add state.running ssh integration test

- **ISSUE saltstack/salt-jenkins#675:** [rallytime] [2017.7] unit.states.test_file.TestFileState.test_directory is failing on Fedora 27 and CentOS 6 (refs: #45295)

- **PR #45295:** [gtmanfred] test directory that doesn’t exist @ 2018-01-08 20:59:53 UTC
  - d0e5e70277 Merge pull request #45295 from gtmanfred/test_directory
  - e6178fe6d4 Merge branch '2017.7' into test_directory
  - 24114e91c1 test was different slightly on 2017.7
  - d20f93625 test directory that doesn’t exist

- **ISSUE saltstack/salt-jenkins#678:** [rallytime] [2017.7] Proxy Minion Tests for Py3 are failing (refs: #45302)

- **PR #45302:** [gtmanfred] fix proxy tests for py3 on 2017.7 @ 2018-01-08 17:41:58 UTC
  - f49b204b75 Merge pull request #45302 from gtmanfred/proxyp3
  - b295ec0429 make dummy proxy module py3 compatible
  - 8736e21f65 fix starting proxy minion on py3
  - e2824a7253 fix py3 tests

- **PR #45279:** [rallytime] [2017.7] Merge forward from 2016.11 to 2017.7 @ 2018-01-08 17:26:49 UTC
  - eea71588e2 Merge pull request #45279 from rallytime/merge-2017.7
  - 8025b14584 Merge branch '2016.11' into '2017.7'
    - 1c5e905b61 Merge pull request #45256 from rallytime/bp-45034
      - 68f971b38f Apply test fixes from #45034 to parsers_test.py
      - 9454236694 Fix for pidfile removal logging

- **PR #44853:** [gtmanfred] remove not from vault utils @ 2018-01-05 17:43:18 UTC
  - dab4a8cf3 Merge pull request #44853 from gtmanfred/vault
  - bfee1ceda set role for loading minion config
  - c5af2e5048 if utils is not loaded, load it
  - 6a5e0f9ac1 remove not from vault utils

- **PR #45277:** [rallytime] Back-port #45025 to 2017.7 @ 2018-01-05 15:35:53 UTC

32.2. Previous releases
- PR #45025: (steverweber) Fix pillar include merge order (refs: #45277)
- f09d0e5fd6 Merge pull request #45277 from rallytime/bp-45025
- 942c14bb29 pillar body overrides includes
- 115220f6dc fix pillar includes from merging over the current sls defines

- PR #45276: (rallytime) Back-port #45260 to 2017.7 @ 2018-01-05 14:45:40 UTC
- PR #45260: (gtmanfred) Make some kitchen-salt tests blue (refs: #45276)
- fc84f1104f Merge pull request #45276 from rallytime/bp-45260
- 9ab1af738f switch kitchen-salt to use rsync transport to preserve symlinks
- cf98ed472e fix up symlinks

- ISSUE #43340: (syphernl) Upgrading Salt via Salt results in dying minions and broken dpkg (refs: #45255)

- PR #45255: (rallytime) Back-port #44427 to 2017.7 @ 2018-01-04 21:46:17 UTC
- PR #44427: (samodid) use KillMode=process for salt-minion.service (refs: #45255)
- f9880c498 Merge pull request #45255 from rallytime/bp-44427
- 6caeffb3a use KillMode=process for salt-minion.service

- ISSUE #23454: (HontoNoRoger) SLS rendering error with Salt-SSH (pydsl) (refs: #45251)

- PR #45251: (forksaber) Fix #23454 : make pydsl work with salt-ssh @ 2018-01-04 21:33:09 UTC
- e715eb603 Merge pull request #45251 from forksaber/salt-ssh-pydsl
- b3660d190 make pydsl work with salt-ssh

- PR #45254: (Ch3LL) Add darwin value for ssh grain items tests on MacOSX @ 2018-01-04 21:31:35 UTC
- 2934b60d53 Merge pull request #45254 from Ch3LL/fixed_grain_ssh
- b4b59b89cd remove platform from salt.utils call for 2017.7
- 85e853a63d Add darwin value for ssh grain items tests on MacOSX

- PR #45135: (twangboy) Fix win_dacl problems with SIDs @ 2018-01-04 21:01:48 UTC
- af2d880303 Merge pull request #45135 from twangboy/win_fix_dacl
- b31e08946a Merge branch '2017.7' into win_fix_dacl
- 35a417f510 Fix win_dacl problems with SIDs

- ISSUE #43806: (Ch3LL) Add spm man Test to Auto Test Suite (refs: #44930)

- PR #44930: (frogunder) man_spm_test @ 2018-01-04 20:58:02 UTC
- d0a3770035 Merge pull request #44930 from frogunder/man_spm

  - 71f9c7ee49 Merge pull request #45068 from rallytime/bp-44976
  - 0ca0f37805 44303 - resolves #44303

• ISSUE #44961: (golmaal) The archive tar function fails to untar file when dest argument is passed (refs: #44983)

• PR #45099: (rallytime) Back-port #44983 to 2017.7 @ 2017-12-20 14:41:22 UTC
  - PR #44983: (golmaal) Ref:44961 - Modified archive.tar to add dest at the end of the tar cmd (refs: #45099)
  - 54a33c0e1d Merge pull request #45099 from rallytime/bp-44983
  - 23361de8a2 Ref:44961 - Modified archive.tar to add dest argument at the end of the tar cmd.

• ISSUE #43533: (Ch3LL) Add status.pid Test to Auto Test Suite (refs: #44650)

• PR #44650: (frogunder) add status.pid test @ 2017-12-19 16:21:09 UTC
  - e0d7b330fa Merge pull request #44650 from frogunder/status
  - 904c0da893 Merge branch '2017.7' into status
  - 619bd2be1e fix lint error
  - d406cb07a3 add status.pid test

• ISSUE #44516: (doesitblend) Windows PY3 Minion Returns UTF16 UnicodeError (refs: #45161, #44944)

• PR #44944: (lomeroe) win_lgpo registry.pol encoding updates (refs: #45161) @ 2017-12-19 14:42:49 UTC
  - 422d8b8f1b Merge pull request #44944 from lomeroe/update_regpol_encoding
  - 07d04c7bc7 lint fixes for static regexes
  - d17c46ce41 lint fixes
  - ab8e431729 do not decode registry.pol file wholesale, but instead decode individual elements of the file

• PR #44938: (The-Loeki) Libcloud dns fixes @ 2017-12-18 15:47:18 UTC
  - d9a4b9681e Merge pull request #44938 from The-Loeki/libcloud_dns_fixes
  - 276e8828ae libcloud_dns: pylint fix
  - c994423286 Merge branch '2017.7' into libcloud_dns_fixes

• PR #44951: (rallytime) [2017.7] Merge forward from 2016.11 to 2017.7 @ 2017-12-16 13:16:24 UTC
  - 5137be01ec Merge pull request #44951 from rallytime/merge-2017.7
  - a0d2dd2069 Lint fix
  - 9db4179462 Merge branch '2016.11' into '2017.7'
    * 68d901b12c Merge pull request #44770 from cruscio/2016.11
      - e2682bf441 Fix minion ping_interval documentation
    * d4ab55ec47 Merge pull request #44335 from gtmanfred/2016.11
      - 3f1268d67f fix patching for python 2.6
      - 1d0bd5bb32 Merge branch '2016.11' into 2016.11
      - f02b02032d Merge pull request #4 from terminalmage/pr-44335

32.2. Previous releases 5365
- b4eb1527a6 Add test for PR 44335
- a30af3252e add docker-ce to docker subtype grains check

- **PR #44995:** (twangboy) Fix *unit.modules.test_file* for Windows @ 2017-12-15 17:05:49 UTC
  - 698b04779e Merge pull request #44995 from twangboy/win_fix_atomicfile
  - 8316481944 Comment the salt import
  - fe340c877 Set owner properly on Windows

- **ISSUE #44934:** (vernondcole) *http.wait_for_successful_query* does not pause for documented intervals (refs: #44968)

- **PR #44968:** (gtmanfred) fix *http wait for state* @ 2017-12-14 20:06:01 UTC
  - 2e1a57b9bc Merge pull request #44968 from gtmanfred/http
  - ca6936f6eb fix http wait for state
    - c72db283d5 *libcloud_dns*: Further fixes to state output, pylint fixes
    - e9bbcf2b11 Merge branch '2017.7' into *libcloud_dns_fixes*

- **ISSUE #44811:** (xuhcc) *rbenv.installed* fails when rbenv installed globally (refs: #44900)

- **PR #44900:** (xuhcc) Fix *TypeError* during rbenv ruby installation when rbenv is not found @ 2017-12-14 17:37:14 UTC
  - c4f0894689 Merge pull request #44900 from xuhcc/rbenv-ret-fix
  - fdd8310c31 Merge branch '2017.7' into rbenv-ret-fix
  - b6f0972d25 Fix *TypeError* during rbenv ruby installation when rbenv is not found

- **PR #44974:** (twangboy) Skip *test_log_created* on Windows @ 2017-12-14 13:59:25 UTC
  - f0c2ef3ec Merge pull request #44974 from twangboy/win_skip_test_parsers
  - 40665d7b08 Skip test_log_created on Windows

- **ISSUE #44820:** (msteed) *Custom returner breaks manage runner* (refs: #44958)

- **PR #44958:** (terminalmage) Fix a race condition in manage runner (refs: #44972) @ 2017-12-13 15:20:36 UTC
  - dad2d723ea Merge pull request #44958 from terminalmage/issue44820
  - ef749abf6c No need to manually do connect_pub, use listen=True in run_job
  - 2ac70cfab5 Fix a race condition in manage runner

- **PR #44956:** (terminalmage) Avoid *traceback* when bogus value in pidfile @ 2017-12-13 14:30:12 UTC
  - db58345abb Merge pull request #44956 from terminalmage/fix-get_pidfile
  - d66f3a98d7 Avoid traceback when bogus value in pidfile

- **ISSUE #44932:** (knine) *ACLs Not Completely Verified* (refs: #44945)

- **PR #44945:** (gtmanfred) Fix handling of effective acls @ 2017-12-12 21:49:34 UTC
  - e8e3b3c8ff Merge pull request #44945 from gtmanfred/2017.7
  - 66b755751 add test for effective acls
  - 0ff52a93dd use last entry in acl

- **PR #44942:** (rallytime) Update README with SaltConf18 info @ 2017-12-12 21:47:23 UTC
  - 47dc7b7af Merge pull request #44942 from rallytime/readme-saltconf-update
- d1317c44e2 Update README with SaltConf18 info

- **ISSUE #44665**: (mvivaldi) Documentation of salt renders jinja (refs: #44943, #44895)

  - 7572982419 Merge pull request #44943 from mvivaldi/filters-doc
  - d23ac4eabc Fix for the jinja documentation

- **ISSUE #43176**: (damon-atkins) win_pkg: pkg.install and pkg.remove general issues (refs: #44832, #43708)
- **PR #44832**: (damon-atkins) win_pkg: Merge full copy of 2016.11 with many fixes and improvements to 2017.7 @ 2017-12-12 18:30:06 UTC
  - 465cacad83 Merge pull request #44832 from damon-atkins/2017.7_replace_with_newer_2016.11_win_pkg
  - a4f0b41ba2 Should be a smaller change set since recent update from 2016.11
  - 69334b201 Merge branch '2017.7_replace_with_newer_2016.11_win_pkg' of github.com:damon-atkins/salt into 2017.7_replace_with_newer_2016.11_win_pkg
    - 843e204582 Merge branch '2017.7' into 2017.7_replace_with_newer_2016.11_win_pkg
  - 4b60b1ec84 Merge remote branch 'refs/remotes/upstream/2017.7' into 2017.7_replace_with_newer_2016.11_win_pkg
  - b46f818a57 Raise a PR to fix 2016 issues committed here, fixed issues with merge.
  - 32e1e12ae Merge branch '2017.7' into 2017.7_replace_with_newer_2016.11_win_pkg
  - 494835e3f2 I backported develop and applied a long list of fixes to 2016.11 this brings these fixes into 2017.7 - Software was not always being removed, general if & was in the string or msi was downloaded to uninstall the software - pkg.list_upgrades failed. Added support for 'latest' and 'Not Found' for version_cmp() to fix this. - output fixes - pkg.list_available no longer forces a pkg.refresh_db this is no longer required, as by default it will update if older than 6 hours - cmd /s/c is prefixed for all commands i.e. installs and removes. - cmd are now strings, instead of a list when using cmd.run. As windows only supports strings. And the " were being broken

- **PR #44754**: (twangboy) Fix inet_pton for Windows on Py3 @ 2017-12-12 14:04:20 UTC
  - a811a92b17 Merge pull request #44754 from twangboy/win_fix_inet_pton
  - 25a20109fe Merge branch '2017.7' into win_fix_inet_pton
  - 849b99eb34 Merge branch '2017.7' into win_fix_inet_pton
  - df1e6a202b Use salt.ext.six
  - 5ac8112585 Use six to ensure unicode value
  - 9b58bc421b Handle unicode values

- **PR #44931**: (pkruk) add missing parenthesis to keep integration with python3 @ 2017-12-12 13:49:39 UTC
  - 53b34e24cd Merge pull request #44931 from pkruk/fix-missing-parenthesis
  - b1ed739b44 Merge branch '2017.7' into fix-missing-parenthesis
  - 4f1bf1f2d2 Merge branch 'fix-missing-parenthesis' of https://github.com/pkruk/salt into fix-missing-parenthesis
    - 3475d3fa01 add missing parenthesis to keep integration with python3
    - adf38cacf6 add missing parenthesis to keep integration with python3
      - ad55e33f57 libcloud_dns: fix state output
• a68d594e3a libcloud_dns: copy args before deleting from them

• **PR #44891**: (twangboy) Fix issue with unsafe path in Windows jenkins tests @ 2017-12-11 21:10:43 UTC
  
  – ba6146250a Merge pull request #44891 from twangboy/win_fix_verify
  
  – 7232579167 Allow test suite file_roots as a safe path

• **PR #44921**: (Ch3LL) Add test to ensure log files are created @ 2017-12-11 18:24:16 UTC
  
  – 85160fd297 Merge pull request #44921 from Ch3LL/log_test
  
  – 3bb58fb577 skip salt-key log creation test
  
  – 6a379195bc Add test to ensure log files are created

• **PR #44787**: (rallytime) GroupAdd test: Add destructive test decorator to entire class @ 2017-12-11 18:14:18 UTC
  
  – 54d29a61cb Merge pull request #44787 from rallytime/groupadd-destructive-clean
  
  – 817ac002b0 Add destructive test decorator to test class

• **ISSUE #44665**: (mvivaldi) Documentation of salt renders jinja (refs: #44943, #44895)

• **PR #44895**: (mvivaldi) Jinja Filters doc @ 2017-12-11 15:32:07 UTC
  
  – 0292e3612a Merge pull request #44895 from mvivaldi/filters-doc
  
  – 62409d608a Added Escape Filters and Set Theory Filters in jinja documentation

• **PR #44879**: (rallytime) [2017.7] Merge forward from 2016.11 to 2017.7 @ 2017-12-10 16:53:44 UTC
  
  – **PR #44855**: (rallytime) [2017.7] Merge forward from 2016.11 to 2017.7 (refs: #44879)
  
  – df28f312ac Merge pull request #44879 from rallytime/merge-2017.7
  
  – 23c5a4ca3e Merge branch '2016.11' into '2017.7'
    
    – bb1f8dceaf Merge pull request #44579 from roaldnefs/fix-cron-identifier
      
      – df73a4c051 Merge branch '2016.11' into fix-cron-identifier
    
    – af0131fa1f Merge pull request #44852 from damon-atkins/2016.11_win_pkg_typo_n_fix
      
      – 0e7c19084f Lint: Remove extra whitespace
      
      – 7c7e21f9ad Fix spelling typo, and fix backwards compatible minion option for repo location
    
    – 88c0d6684e Merge pull request #44794 from terminalmage/issue44365
      
      – 3bb8f25e6 Remove debugging line
      
      – 153bf45b03 Fix regression in file.managed when source_hash used with local file
    
    – c8bb9dfbba Merge pull request #44738 from rallytime/bump-oxygen-warnings
      
      – ead3c569e1 Bump deprecation warnings from Oxygen to Fluorine
    
    – 88e3aab00d Merge pull request #44741 from gtmanfred/rhip
      
      – 439dc8dce6 if gateway is not specified use iface
      
      – 3ec4329307 Merge branch '2016.11' into fix-cron-identifier
      
      – 99fa05a45e Fix for bug in cron state
      
      – 97328faeac Fix for bug in cron module

• **PR #44880**: (UtahDave) Determine windows hardware arch correctly @ 2017-12-08 22:24:09 UTC
  
  – 8e14bc3941 Merge pull request #44880 from UtahDave/2017.7/local
- 6e3c7ac1ac Merge branch '2017.7' into 2017.7local

- **PR #44621: (isbm) Bugfix: errors in external pillar causes crash, instead of report of them @ 2017-12-08 18:46:56 UTC**
  - 5a143f8c5 Merge pull request #44621 from isbm/isbm-bsc106846-2017.7
  - 0d2675c4f Use variable, instead of direct value
  - 1ddc47da0a Add unit test for _get_pillar_errors when external pillar is clean and internal contains errors
  - 68480d5dc9 Add unit test for _get_pillar_errors when both external and internal pillars contains errors
  - 218a59e93b Add unit test for _get_pillar_errors when external pillar has errors and internal is clean
  - 3ce19556c2 Add unit test for _get_pillar_errors when external and internal pillars are clean
  - 67034139d9 Fix unit test: wrong error types in side effect
  - d9359bca13 Bugfix: unit test mistakenly expects pillar errors as a string, while it is a list
  - 8c2bdc696b Bugfix: do not pull '_errors' from unchecked objects
  - d5e30999c7 Remove unused variable (no exception, within the try/finally block)
  - aad668559 Fix and clarify docstring.
  - c2c47e4e71 Rename function from ambiguous name
  - 265de8e61c Bugfix the logic according to the exact described purpose of the function.
    - dae9c6aa5c Determine windows hardware arch correctly

- **PR #43379: (twangboy) Fix file.managed on Windows with test=True @ 2017-12-07 21:10:43 UTC**
  - abe089ad54 Merge pull request #43379 from twangboy/win_fix_file.managed
  - edcd581ca5 Merge branch '2017.7' into win_fix_file.managed
  - a27bb6993a Fix py3 error
  - 0ff9fa498a Fix test_directory
  - 187bc1e61e Add back the try/finally blocks
  - d7241d004f Fix 2 more tests
  - d5dd42aebe Fix integration tests for Windows
  - d56bc9aae9 Fix typo
  - af565859e Use file functions for symlink and remove
  - 72ac59c991 Fix some more integration tests for Linux
  - 3f0499cb4 Fix some integration tests
  - a24b964ea5 Fix unit test to handle new Exception
  - e3c3845f73 Raise CommandExecutionError when file doesn't exist
  - 4602f499a2 Remove loader module mixin, add linux paths
  - 99b27c037f Add tests to avoid future regression
- 5c215ed8c2 Fix documentation formatting
- 6a4e77e4b9 Return empty or unmodified dict on file not found

• ISSUE #44565: (arthurlogilab) NameError: global name '__jid_event__' is not defined when running a runner in the scheduler (refs: #44570)

• PR #44570: (gtmanfred) Include client mixin globals in scheduler for runner modules @ 2017-12-07 20:23:33 UTC
  - cf4bcd340 Merge pull request #44570 from gtmanfred/2017.7
  - 7b17f9f63c Merge branch '2017.7' into 2017.7

• PR #44494: (skizunov) Fix broken beacons_before_connect feature @ 2017-12-07 18:24:49 UTC
  - PR #38289: (skizunov) Add config options for running beacons/scheduler before connect (refs: #44494)
  - febb913743 Merge pull request #44494 from skizunov/develop2
  - 7adcfb8ec Merge branch '2017.7' into develop2

• ISSUE #44298: (skjaro) ipset state check problem (refs: #44356)

• ISSUE #39552: (Xiami2012) ipset.check new implementation by @lingonl has countless critical bugs (refs: #44356)

• PR #44512: (rallytime) Back-port #44356 to 2017.7 @ 2017-12-07 14:44:50 UTC
  - PR #44356: (skjaro) Fix ipset state with multiple entries and subtypes separated with comma (refs: #44512)
  - 284a817565 Merge pull request #44512 from rallytime/bp-44356
  - 6f92c71834 Merge branch '2017.7' into bp-44356
  - 9a325146df Fix lint violation
  - 5ac729855 Fix check multiple entries with subtypes separated with comma

• PR #44748: (twangboy) Fix auto login support for OSX @ 2017-12-07 14:22:23 UTC
  - 74ee7ce541 Merge pull request #44748 from twangboy/osx_fix_auto_login
  - 068e463870 Fix lint, add integration tests
  - 3df886df75 Fix lint, add gtmanfreds change
  - 16cb24614f Add kcpassword functionality

• PR #44842: (twangboy) Win fix lgpo unicode on Py3 issue @ 2017-12-07 14:21:14 UTC
  - b60cca174c Merge pull request #44842 from twangboy/win_fix_lgpo
  - efe77999d1 Gate log.debug statement behind successful pop
  - 1c0ec79cd1 Fix py3 issue

• PR #44843: (twangboy) Fix 2 typos in lgpo module @ 2017-12-06 17:56:44 UTC
  - bb58e2fec0 Merge pull request #44843 from twangboy/win_fix_lgpo_typo
  - c8f9e6edd7 Fix 2 types, shorten line lengths for spellchecking

• PR #44827: (mz-bmcqueen) add more clone options to virtualbox and add better dhcp handling @ 2017-12-06 15:02:23 UTC
  - d6c37ea19c Merge pull request #44827 from mz-bmcqueen/2017.7
  - 4ead3014b7 Merge branch '2017.7' into 2017.7

Chapter 32. Release notes
- b7ce154014 Merge branch '2017.7' of https://github.com/mz-bmcqueen/salt into 2017.7
  - 2f80f431b3 Merge branch '2017.7' into 2017.7
- c2018c9021 fix pylint complaints
- c38f74261 add more clone options to virtualbox and add better dhcp handling

**PR #44824:** (Ch3LL) Add spm -y and -f arg integration tests @ 2017-12-05 21:49:32 UTC
- 019169ed61 Merge pull request #44824 from Ch3LL/spm_args
- d8f81d2e4d fix pylint
- 61ac5c157 Add spm -y and -f arg integration tests

**PR #44742:** (Ch3LL) Add salt-cloud action rename integration test @ 2017-12-05 17:44:50 UTC
- 59b930668c Merge pull request #44742 from Ch3LL/cloud_action_test
- 951d09ea2f remove unnecessary try/except block
- c329ced7ee Add salt-cloud action rename integration test

**ISSUE #42676:** (mind-code) Changes in Pillar defined Beacons only apply after Minion restart (refs: #44771)

**PR #44771:** (garethgreenaway) [2017.7] Back porting #44071 @ 2017-12-05 17:16:06 UTC
- PR #44071: (garethgreenaway) [develop] Various fixes to beacons (refs: #44771)
- 10442d9211 Merge pull request #44771 from garethgreenaway/42676_backport_44071
- ec2a8b2032 Merge branch '2017.7' into 42676_backport_44071
- 180971203e Updating minion to respond to list_available events for beacons
- db6cfe6e62 Adding list_available which is used by the add function to verify that a becaon exists.
- e9e0318bc6 Backporting fixes related to having beacons in pillar from #44071

**PR #44784:** (rallytime) [2017.7] Merge forward from 2016.11 to 2017.7 @ 2017-12-05 17:13:49 UTC
- PR #44732: (rallytime) [2017.7] Merge forward from 2016.11 to 2017.7 (refs: #44784)
- 23d151b40a Merge pull request #44784 from rallytime/merge-2017.7-1
- 3d9aefc4bd Lint: Remove extra empty lines at end of files
- 239f3511bf Merge branch '2016.11' into '2017.7'
  - 97e0cf569c Merge pull request #44699 from jfindlay/attr_file
    - 9e5a40ea7c Merge branch '2016.11' into attr_file
    - 5c34607f6c utils/files remove temp file upon move failure
  - 7434e0afdf Merge pull request #44714 from rallytime/fix-44556
    - 1bbe1abeb2 Allow --static option to display state runs with highstate output
  - 998d714ee7 Merge pull request #44517 from whytewolf/publish_port_doc_missing
    - 4b5855283a missed one place where i didn't chanbge master_port from my copy to publish_port
    - e4610baea5 update doc to have publish port
  - 6169b52749 Merge pull request #41279 from Ch3LL/add_grain_tests
    - 1b64f15692 Merge branch '2016.11' into add_grain_tests
* dc6de050a9 Merge pull request #44563 from creideiki/pgjsonb-timestamps-44544
  - 231e412ca4 Merge branch '2016.11' into pgjsonb-timestamps-44544
* 4369df020b Merge pull request #44602 from rallytime/fix-44601
  - f303fd060 Handle timeout_monitor/TimeoutError issues for new versions of CherryPy
* 4a4756fc37 Merge pull request #44604 from lorengordon/doc-exclude
  - c4a6c40eb3 Documents the exclude argument in state execution module
  - 15c445e6b9 Send Unix timestamps to database in pgjsonb
  - 095f1b7d7a Merge branch '2016.11' into add_grain_tests
* 91d46d4fcfc Merge pull request #44434 from whytwolf/1837
  - d148e39dda change from md to rst for code reference
  - 955e305bda fix bad english, as requested by cachedout
  - 7256fcc1c9 update note to take into account grains_cache
  - 7a2981585e Merge branch '2016.11' into 1837
  - aca0405b26 add a note that describes grain rebuilding on restart and refresh
  - 9ea4db4224 mock socket.getaddrinfo
  - 78a07e30f4 add more fqdn tests and remove some of the mocking
  - 5dbf4144ce add ipv6 in opts
  - eabc1bf9c Add fqdn and dns core grain tests
* a3bd99317f Merge pull request #44321 from gvengel/fix-file-line-diff-output
  - 69a50204a6 Add newline for lint.
  - ef7b6bbb81 Fixed issue with file.line on Windows running Python 2.
  - 8f89c99fa5 Fix FileModuleTest setUp and tearDown to work on Windows.
  - 3ac5391f5f Namespace missing functions for file.line on Windows.
  - b2b8f075b9 Fixed test to work on Windows.
  - 5a5a2dd026 Added integration test for issue #41474
  - 24d7315f1a Fix file.line diff formatting.
* 9ca563718d Merge pull request #43708 from damon-atkins/2016.11_43417_Backport_and_Fixes
  - 04d03ea6b8 Updated comment
  - 1dd565e585 Merge remote branch 'upstream/2016.11' into 2016.11_43417_Backport_and_Fixes
  - dd48ba2616 Merge remote branch 'upstream/2016.11' into 2016.11_43417_Backport_and_Fixes
  - a0d08598bf dco fix
  - 9467899fc6 Merge remote branch 'upstream/2016.11' into 2016.11_43417_Backport_and_Fixes
  - 6dc180fd0e dco fixes
  - 2496a42ea4 lint fix
- 2c937fbe19 Merge remote branch ‘upstream/2016.11’ into 2016.11_43417_Backport_and_Fixes
- c9c8c48a4d all remove/install commands are passed to cmd.exe /s /c and commands are passed as strings to cmdmod
- 350244bd93 typo in comments and doc strings.
- ec315fa9bd 2017.11/develop version() was ignoring saltenv setting.
- b314549a32 Backport of devlop to 2016.11 with additional bug fixes
  * 68ea22188e Merge pull request #44477 from rallytime/bp-44424
    - 4a9f8dce96 Fix #44423: Handle index=None and index=0 distinctly
  * 2c89050a24 Merge pull request #44483 from terminalmage/issue44034
    - a9db8beceea salt-call: account for instances where __pillar__ is empty
  * b5c2028680 Merge pull request #44489 from whytwolf/1956_log-granular-levels
    - 9cdeb4e903 update log-granular-levels to describe what they are filtering on
  * ea07f9c5c4 Merge pull request #44193 from twangboy/win_fix_reg
    - 44d6d9f46d Remove unused import (lint)
    - f7502436bd Fix various issues
    - 221e6e3b91 make salt.utils.to_unicode return none when passed none
    - ce41acc788 Fix many issues with reg.py
    - 4a19df1f7f Use six.text_type instead of str
    - 1b12acd303 Check type before casting
    - 03fa37b445 Cast vdata to its proper type
  * ed8da2450b Merge pull request #43863 from nicholasmhughes/fix-atomicfile-permission-copy
    - ea852ec5d3 remove index use with stat module attributes
    - dbeeb9e917 fixes #38452 atomicfile only copies mode and not user/group perms

- PR #44788: (kris-anderson) Example yaml of influxdb_user state @ 2017-12-04 14:28:45 UTC
  - 4643a112e7 Merge pull request #44788 from kris-anderson/example-yaml-of-influxdb-user-state
  - afd23d058c converted yaml example to use 2 spaces
  - 29e410c1ea added a code-block example of how the yaml should be formatted

- ISSUE #42713: (boltronics) 2017.7.0 master upgrade breaks mine data on non-glob matching on minions (refs: #44735)

- PR #44735: (gracinet) Backported issue #42713 to 2017.7 @ 2017-12-04 01:43:23 UTC
  - 4ebac09f60 Merge pull request #44735 from gracinet/42713_backport_2017.7
  - 6806d3314 Merge branch ‘2017.7’ into 42713_backport_2017.7
  - fb586c6dce Backported issue #42713 to 2017.7

- PR #44766: (twangboy) Fix unit.utils.test_process for Windows @ 2017-12-02 13:15:53 UTC
  - 06ce7b7328 Merge pull request #44766 from twangboy/win_fix_test_process
  - a5737e8fc3 Fix lint errors
- be96de09cc Fix pickling error by decorating

- **ISSUE #44083**: (ari) timezone.system fails when /etc/localtime is missing on FreeBSD (refs: #44605)

- **PR #44716**: (rallytime) Back-port #44605 to 2017.7 @ 2017-12-01 23:12:24 UTC
  - **PR #44605**: (campbellmc) Add handling for FreeBSD in timezone.zone_compare (refs: #44716)
  - f8b8a9966d Merge pull request #44716 from rallytime/bp-44605
  - 9d43221422 Correct indentation
  - d6e28bed1 Add handling for FreeBSD in method zone_compare to avoid exception when /etc/localtime file does is absent. This is valid configuration on FreeBSD and represents UTC.

- **ISSUE #41869**: (mirceaulinic) Thorium: unable to execute runners (refs: #44781)

- **PR #44781**: (mirceaulinic) Correct the thorium runner @ 2017-12-01 22:55:52 UTC
  - 8ed6287762 Merge pull request #44781 from cloudflare/thorium-fix-41869
  - 83c73a69cb Instance the Runner class instead of the RunnerClient as we're running on the Master
  - b72b7c5402 Correct the thorium runner

- **PR #44466**: (twangboy) Fix `unit.modules.test_disk` for Windows @ 2017-12-01 22:31:42 UTC
  - 52596be102 Merge pull request #44466 from twangboy/win_fix_test_disk
  - 5615862f23 Fix some lint
  - 627d5ab0c9 Mock `salt.utils.which`
  - e5a96fe00f Skip test_fstype on Windows

- **ISSUE #42763**: (xuhcc) acme.cert state falsely reports about renewed certificate (refs: #44667)

- **PR #44719**: (rallytime) Back-port #44667 to 2017.7 @ 2017-12-01 15:20:49 UTC
  - 9d43221422 Correct indentation
  - 3d85a260c4 Merge pull request #44719 from rallytime/bp-44667
  - 911411ed8f add unit test
  - eefcfc719c use a copy so roster_defaults doesn't mangle

- **ISSUE #44744**: (brmzkw) roster_defaults breaks salt-ssh globbing (refs: #44747)

- **PR #44747**: (gtmanfred) use a copy so roster_defaults doesn't mangle @ 2017-12-01 15:13:48 UTC
  - d23192c492 Merge pull request #44747 from gtmanfred/roster_defaults
  - 911411ed8f add unit test
  - eefcfc719c use a copy so roster_defaults doesn't mangle

- **ISSUE #44694**: (thuhak) state module at.absent doesn't work (refs: #44717)

- **PR #44717**: (garethgreenaway) [2017.7] Fixes to at module @ 2017-12-01 14:37:05 UTC
  - d23192c492 Merge pull request #44717 from garethgreenaway/44694_at_absent_failing_to_find_jobs
  - 911411ed8f add unit test
  - eefcfc719c use a copy so roster_defaults doesn't mangle

- **ISSUE #44136**: (dupsatou) KeyError: 'runas' after updating to latest salt in yum repo. (refs: #44695)
• PR #44695: (gtmanfred) pop None for runas and runas_password @ 2017-12-01 14:35:01 UTC
  – 6e61aa787f Merge pull request #44695 from gtmanfred/pop
  – 0efb90b6f7 Merge branch '2017.7' into pop
• PR #44725: (whytewolf) document note suggesting systemd-run --scope with cmd.run_bg @ 2017-11-30 19:18:06 UTC
  – 20391c54c0 Merge pull request #44725 from whytwolf/1919_cmd.run_no_daemons
  – 4b11f8d66d add quick documentation suggesting systemd-run --scope if using cmd.run_bg with systemd
• ISSUE #42300: (mirceaulinic) Grains state doesn't work (fine) with proxy minions (refs: #44760)
• ISSUE #42074: (mirceaulinic) How to configure static grains for proxy minions (refs: #44549)
• PR #44760: (mirceaulinic) Fix the grains.setvals execution function when working with proxy minions @ 2017-11-30 18:27:02 UTC
  – PR #44549: (mirceaulinic) Allow proxy minions to load static grains (refs: #44760)
  – 85451ae977 Merge pull request #44760 from cloudflare/px-grains-set-42300
  – 655139d01c Different path to the static grains file when running under a proxy minion
  – 3ee8d6cb63 Dummy proxy: catch EOFError instead of IOError
• ISSUE #44583: (creideiki) Using splay in cron schedule throws exception "unsupported operand type(s) for +: 'NoneType' and 'int'" (refs: #44640)
• PR #44640: (vutny) Fix #44583: splay with cron-like scheduled jobs @ 2017-11-30 15:30:41 UTC
  – 06b80b69c Merge pull request #44640 from vutny/fixed-cron-schedule-splay
  – d1f247e49e Add basic unit tests for schedule util eval func
  – 6ff8e75ac6 Fix #44583: splay with cron-like scheduled jobs
• PR #44712: (Ch3LL) Add pillar ssh integration tests @ 2017-11-30 15:29:33 UTC
  – e5a1401b82 Merge pull request #44712 from Ch3LL/ssh_pillar_items
  – 97ec066ea0 Merge branch '2017.7' into ssh_pillar_items
  – c7f5af1274 Add pillar ssh integration tests
• PR #44763: (mirceaulinic) Just a small improvement to the Thorium documentation @ 2017-11-30 14:38:03 UTC
  – 2e1c946990 Merge pull request #44763 from cloudflare/thorium-doc
  – f8d69dd0ba Add thorium_root configuration example
  – 4610fb4e62 thorium_roots not thorium_roots_dir
• PR #44531: (mirceaulinic) Add deprecation notes for the NAPALM native templates @ 2017-11-30 14:18:56 UTC
  – 8ba2df1ea0 Merge pull request #44531 from cloudflare/deprecate-napalm-tpl
  – b462776d8b Add deprecation notes for the NAPALM native templates
• PR #44737: (twangboy) Skip unit.transport.test_ipc for Windows @ 2017-11-29 19:18:21 UTC
  – 7bde48282e Merge pull request #44737 from twangboy/win_skip_test_ipc
  – 4e0359b603 Skip IPC transport tests in Windows, not supported
• PR #44629: (Ch3LL) Add masterless state.highstate integration test @ 2017-11-29 19:05:23 UTC
  – c5206113ce Merge pull request #44629 from Ch3LL/high_masterless
- 9b7421b261 Change check to the state id
- 9cc853e3d5 Add masterless state.highstate integration test

- **PR #44613**: (Ch3LL) Add pillar.items test for masterless @ 2017-11-29 14:43:11 UTC
  - 2dc3e5c42a Merge pull request #44613 from Ch3LL/pillar_masterless
  - 2c2e1e2332 Merge branch '2017.7' into pillar_masterless
  - 69134e83ca Change order of local kwarg in run_call method
  - b3b5ecc6ff Add pillar.items test for masterless

- **PR #44659**: (Ch3LL) Add state.sls_id to ssh wrapper and tests @ 2017-11-29 14:41:47 UTC
  - cc05481026 Merge pull request #44659 from Ch3LL/ssh_sls_id
  - 04ba3dd4fe Add state.sls_id to ssh wrapper and tests

- **PR #44698**: (Ch3LL) Add salt-ssh mine.get integration test @ 2017-11-28 22:15:29 UTC
  - 642eed11e1 Merge pull request #44698 from Ch3LL/mines_ssh
  - 6a72afce3 Merge branch '2017.7' into mines_ssh
  - 9e67baf85 Add teardown to remove ssh dir
  - f90bf7653 Add salt-ssh mine.get integration test

- **PR #44697**: (Ch3LL) Sort the show_top results for test_state_show_top test @ 2017-11-28 20:35:41 UTC
  - 5d82df5667 Merge pull request #44697 from Ch3LL/show_top_test
  - 974db59dc1 convert the assert to a union set instead
  - add434e9fe Sort the show_top results for test_state_show_top test

- **PR #44608**: (Ch3LL) Add jinja to ssh sls test file @ 2017-11-27 22:00:28 UTC
  - f2f6817e86 Merge pull request #44608 from Ch3LL/ssh_jinja
  - df669851b1 Merge branch '2017.7' into ssh_jinja
  - ca97517795 Add jinja to ssh sls test file

- **ISSUE #33957**: (ghost) grains.setval doesn't setval if set in /etc/salt/minion (refs: #44663)

- **PR #44663**: (whytwolf) Update notes around grains topic, and salt.modules.grains and salt.state.grains @ 2017-11-27 21:33:38 UTC
  - 04b97bcfad Merge pull request #44663 from whytwolf/ZD1777_ensure_understanding_of_minion_config_over_grains_file
  - c912e4b85 fixed pylint error, and updated description on at the top the the module and state.
  - 7fb208b5ad Update note in topics/grains to reflect that not all grains are ignored. only those set in the
    minion config

- **PR #44332**: (mirceaulinic) Improve the net.load_config execution function @ 2017-11-27 21:22:18 UTC
  - 364dee66ac Merge pull request #44332 from cloudflare/improve-net-load
  - cd0bac87e6 Merge branch '2017.7' into improve-net-load
  - 6d861f9a74 Disable pylint warning
  - 3a0945c3e3d Merge pull request #11 from tonybaloney/gh_44332_clone
    * 88ef9f18fc ignore lint error on import
    * 25427d845e convert key iterator to list as python 3 won't index an iterator
- bce50154e5 Merge branch '2017.7' into improve-net-load
- ba4a62769c Fix trailing spaces
- 0a47a7acbf Merge pull request #10 from tonybaloney/gh_44332_clone
  - ba0280e727 linting updates
  - 78b90f3d06 add remaining tests
  - 386c4e5791 add tests for all the getters
- f3d2d1aaa Merge pull request #9 from tonybaloney/gh_44332_clone
  - c63222358b update tests with correct assertions and mock methods on device instance
  - b69c559c52 fix kwargs typo
- edea763f3f Improve the net.load_config function

- **PR #44664**: (mvivaldi) Patch 1 @ 2017-11-27 21:17:20 UTC
  - b6a1ed6b8 Merge pull request #44664 from mvivaldi/patch-1
  - 4551999ec7 Update jinja.py
  - ae1357307 Update file.py

- **ISSUE #42074**: (mirceaulinic) How to configure static grains for proxy minions (refs: #44549)

- **PR #44549**: (mirceaulinic) Allow proxy minions to load static grains (refs: #44760) @ 2017-11-27 20:57:09 UTC
  - 9ea4ee1479 Merge pull request #44549 from cloudflare/fix-proxy-grains
  - 7b03574ab6 Merge branch '2017.7' into fix-proxy-grains
  - 0320174ea4 Add doc note regarding static grains on proxy minions
  - 509d1af832 Allow proxy minions to load static grains

- **PR #44572**: (Ch3LL) Add watch_in integration test @ 2017-11-27 20:52:31 UTC
  - 5ec7ea0bb5 Merge pull request #44572 from Ch3LL/watchin_test
  - 0a54584d0b Merge branch '2017.7' into watchin_test
  - 898c28e6d9 Merge branch '2017.7' into watchin_test
  - 3df7036f3e remove iter for watch_in failure test
  - ac437ddf90 add order check and remove iter
  - 5f2b4f434e Add watch_in integration test
    - c6733ac1ee pop None

- **PR #44616**: (Ch3LL) Add Non Base Environment salt:// source integration test @ 2017-11-22 16:13:54 UTC
  - d6ccf4bb30 Merge pull request #44616 from Ch3LL/nonbase_test
  - 80b71652e3 Merge branch '2017.7' into nonbase_test
  - c9ba3343e2 Add Non Base Environment salt:// source integration test

- **PR #44617**: (Ch3LL) Add ssh thin_dir integration test @ 2017-11-22 16:12:51 UTC
  - 3ace504c8e Merge pull request #44617 from Ch3LL/thindir_ssh
  - 071a1bd65b Merge branch '2017.7' into thindir_ssh

- **PR #44625**: (Ch3LL) Add salt-key -d integration test @ 2017-11-22 03:15:23 UTC
ISSUE #44601: (rallytime) CherryPy 12.0 removed support for "engine.timeout_monitor.on" config option (refs: #44602)

PR #44614: (rallytime) [2017.7] Move PR #44602 forward to 2017.7 @ 2017-11-21 21:21:06 UTC

PR #44602: (rallytime) Handle timeout_monitor attribute error for new versions of CherryPy (refs: #44614)

PR #44614 from rallytime/44602-2017.7

628f015c1b Move TimeoutError check lower down in exception list

d26d9ff5e4 Handle timeout_monitor/TimeoutError issues for new versions of CherryPy

359a59dd64 Add salt-key -d integration test

74ededa7 Add ssh thin_dir integration test

4d0806e28c Merge branch '2017.7' into develop2

4d0d023115 Fix broken beacons_before_connect feature

98536110d9 Merge branch '2017.7' into 2017.7

PR #44571: (rallytime) Back-port #43822 to 2017.7 @ 2017-11-20 19:01:26 UTC

PR #43822: (chnrxn) check_result: Correctly check the __extend__ state. (refs: #44571)

136b9e3bc4 Merge pull request #44571 from rallytime/bp-43822

f81bb61f2d check_result: Correctly check the __extend__ state.

PR #44588: (rallytime) Add documentation about logging before modules are loaded @ 2017-11-20 18:43:18 UTC

PR #44576: (rallytime) Remove logging from top of napalm util file (refs: #44588)

PR #44439: (mirceautilnic) Adapt napalm modules to the new library structure (refs: #44576)

bea7f65291 Merge pull request #44588 from rallytime/logging-in-virtual-funcs

90d1cb221d Add documentation about logging before modules are loaded

PR #44513: (rallytime) Back-port #44472 to 2017.7 @ 2017-11-20 16:09:02 UTC

PR #44472: (mephi42) nova: fix endpoint URL determination in __v3_setup() (refs: #44513)

a8044b73c3 Merge pull request #44472 from rallytime/bp-44472

6e00e415d3 nova: fix endpoint URL determination in __v3_setup()

PR #44596: (roaldnefs) Fixed Mattermost module documentation @ 2017-11-19 23:30:53 UTC

f55b9daa63 Merge pull request #44596 from roaldnefs/fixed-mattermost-doc

549f4086cc Fixed documentation in Mattermost module

PR #44528: (tkwilliams) INFRA-5978 - fix for https://github.com/saltstack/salt/issues/44290 @ 2017-11-17 17:35:44 UTC

f84a2b5ab1 Merge pull request #44528 from bodhi-space/infra5978

ba1d57f5eb Merge branch '2017.7' into infra5978

021692b6c9 INFRA-5978 - pylint / whitespace fix
- c2210aaf7c INFRA-5978 - fix for https://github.com/saltstack/salt/issues/44290

- **PR #44537**: (Ch3LL) Add multiple salt-ssh state integration tests @ 2017-11-17 17:17:48 UTC
  - 7f2dd0382c Merge pull request #44537 from Ch3LL/ssh_highlow
  - b98d6d6e24 Add known_hosts_file to salt-ssh opts_pkg in wfuncs
  - 913eed699 Add multiple salt-ssh state integration tests

- **PR #44576**: (rallytime) Remove logging from top of napalm util file (refs: #44588) @ 2017-11-17 14:55:13 UTC
  - PR #4439: (mirceaulinic) Adapt napalm modules to the new library structure (refs: #44576)
  - 1975f41bc Merge pull request #44576 from rallytime/remove-napalm-logging
  - eb91af99e Remove logging from top of napalm util file

- **PR #44575**: (Ch3LL) Add service.running integration state test @ 2017-11-16 22:27:57 UTC
  - c2c3048f46 Merge pull request #44575 from Ch3LL/ser_run_test
  - 7536150567 Add service.running integration state test

- **PR #44518**: (twangboy) Pass root_dir to the win_verify_env function @ 2017-11-16 20:57:49 UTC
  - 24b1d7a3f3 Merge pull request #44518 from twangboy/win_fix_verify_env
  - 47114f6b30 Pass root_dirs to the win_verify_env function
    - 3385f7fa3 fix pylint
    - a2a3cb857 Include client mixin globals in scheduler for runner modules

- **PR #44551**: (mirceaulinic) Removes proxy minions false alarms and security risks @ 2017-11-16 15:09:14 UTC
  - 1643bb7fda Merge pull request #44551 from cloudfare/annoying-tmpnam
  - ce188294d Use salt.utils.files.mkstemp() instead
  - 6689bd5b2d Don't use dangerous os.tmpnam
  - 2d6176b0bc Fx2 proxy minion: clean return, like all the other modules

- **ISSUE #30454**: (favoretti) Using yaml serializer inside jinja template results in unicode being prepended by '!!python/unicode' (refs: #30481, #42064, #38554)

- **PR #44541**: (terminalmage) Fix test to reflect changes in YAML dumper @ 2017-11-15 13:23:58 UTC
  - PR #42064: (The-Loeki) utils.jinja: use utils.yaml_dumper for safe yaml dumping (refs: #44541)
  - PR #38554: (multani) Fix YAML deserialization of unicode (refs: #42064)
  - PR #30481: (basepi) Add yaml_safe jinja filter (refs: #38554)
  - 60083ac27b Merge pull request #44541 from terminalmage/infix-yaml-test
  - 5b85f4084d Merge branch '2017.7' into fix-yaml-test

- **PR #44538**: (gtmanfred) Fix up some test kitchen stuff @ 2017-11-14 20:36:56 UTC
  - 5c123eb551 Merge pull request #44538 from gtmanfred/kitchen
  - 3e04d2d44c use kitchen-sync for copying files
  - 9bc70fd31b back up to 2017.7.1 for kitchen tests
  - 3b93ea058b ubuntu 14 and centos 6 should not have py3 tests
  - 958e1aeb8d Fix test to reflect changes in YAML dumper
• ISSUE #30454: (favoretti) Using yaml serializer inside jinja template results in unicode being prepended by '!python/unicode' (refs: #30481, #42064, #38554)

**PR #44439:** (mirceaaulinic) Adapt napalm modules to the new library structure (refs: #44576) @ 2017-11-13 17:43:24 UTC
  - 32fc952000 Merge pull request #44439 from cloudflare/fix-napalm
  - f45378af04 Lint: remove extra spaces
  - c6a38258a3 Add napalm>2.0.0 note and update URLs
  - 52f73835b8 Adapt napalm modules to the new library structure

**PR #44457:** (twangboy) Remove wmi monkeypatching @ 2017-11-13 17:38:52 UTC
  - ebbe5949ea Merge pull request #44457 from twangboy/win_remove_wmi_monkeypatching
  - 6c872e95e6 Add back the setup_loader_modules function
  - 20273e3697 No need for setup_loader_modules since we're actually importing wmi
  - 8c107873cd Remove wmi monkeypatching

**PR #44490:** (Ch3LL) Enable test_deploy ssh test @ 2017-11-13 17:12:48 UTC
  - 1da1a97d7d Merge pull request #44490 from Ch3LL/ssh_ping
  - e952d6712 Enable test_deploy ssh test

**PR #44491:** (Ch3LL) Add salt-ssh raw integration tests @ 2017-11-13 15:47:12 UTC
  - 18624d6798 Merge pull request #44491 from Ch3LL/ssh_raw
  - 3de8673417 change class name to raw
  - 308596ac8d Add salt-ssh raw integration tests

**PR #44492:** (twangboy) Fix unit.utils.test_cloud for Windows @ 2017-11-13 15:44:31 UTC
  - aa17ba8e7 Merge pull request #44492 from twangboy/win_skip_mode_check
  - 2f30ad93b1 Skips mode check in Windows

**PR #44484:** (Ch3LL) Add orchestration tests when target exists or not @ 2017-11-10 19:24:22 UTC
  - 5b95495e75 Merge pull request #44484 from Ch3LL/orch_test
  - f3e6df76e Add orchestration tests when target exists or not

**PR #44480:** (Ch3LL) Add integration pillar command line test @ 2017-11-10 19:14:31 UTC
  - 62c42ca6e9b Merge pull request #44480 from Ch3LL/override_pillar
  - 12fed1b4d8 Add integration pillar command line test

**PR #44317:** (Ch3LL) Add state tests and state request system to salt-ssh @ 2017-11-10 18:28:43 UTC
  - cc08ad2edc Merge pull request #44317 from Ch3LL/ssh_test
  - 46b3e9bd5e add additional parser argument for ssh integration tests
  - e923430b5 remove logic similar to cloud/proxy tests
  - c731eb8ea6 add ssh dir to test runner when --ssh-tests set

32.2. Previous releases 5381
- 8089a885c2 add wipe function to other run_ssh method
- 200b12ae6a change version
- e3ebb5e9b3 fix comment and variables
- fae088a8a7 Add state tests and state request system to salt-ssh

**PR #44478: (rallytime)** [2017.7] Merge forward from 2016.11 to 2017.7 @ 2017-11-10 18:00:56 UTC
- 6669035a30 Merge pull request #44478 from rallytime/merge-2017.7
- 9fcc2a70b5 Merge branch '2016.11' into '2017.7'
  * a66cd67d15 Merge pull request #44260 from seanjnkns/issue-39901
    - ed8cccf457 #39901: Fix pylint
    - 43c81dfde6 #39901: Add unit tests
    - 613d50876 Merge branch '2016.11' into issue-39901
    - b97e8046ca Utilize salt.utils.validate.net.* and _raise_error_iface
    - 6818f3631d Fixes #39901 for RH/CentOS 7

**PR #44444: (twangboy) LGPO: Issue with Maximum Password Age @ 2017-11-10 17:26:53 UTC**
- 60719d0683 Merge pull request #44444 from twangboy/win_lgpo_non_zero
- 6e6b394445 Remove unneeded functions
- ee0914f7e9 Fix some lint, remove unnecessary function
- d52a7c12db Fix typo in PasswordComplexity policy
- 44f843812 Fix problem where 0 isn't 0

**PR #44467: (twangboy)** Fix unit.test_doc for Windows @ 2017-11-10 15:21:58 UTC
- 4f3a79df07 Merge pull request #44467 from twangboy/win_fix_test_doc
- 0a9e862bf4 Use regex to split

**PR #44443: (Ch3LL) Add salt-ssh grains.items test @ 2017-11-09 00:42:11 UTC**
- ff4f13877f Merge pull request #44443 from Ch3LL/ssh_grains
- 5d1a9a4b5 Add salt-ssh grains.items test

**PR #44429: (Ch3LL)** Fix orch doc from pillat.get to pillar.get @ 2017-11-07 23:06:38 UTC
- dcdcf2d4c90 Merge pull request #44429 from Ch3LL/orch_doc
- 38ca5520f0 Fix orch doc from pillat.get to pillar.get

**ISSUE #42568: (clallen)** Orchestration runner doesn’t populate __pillar__ based on pillarenv (refs: #43817)

**PR #43817: (The-Loeki)** Orchestrate runner forces pillarenv and saltenv to None @ 2017-11-07 06:08:16 UTC
- 62c4addef8 Merge pull request #43817 from The-Loeki/orch-pillarenv
- 3fd652623c orchestrate runner: retain default envs

**PR #44408: (rallytime)** [2017.7] Merge forward from 2016.11 to 2017.7 @ 2017-11-06 15:53:00 UTC
- 9e4708b7b9 Merge pull request #44408 from rallytime/merge-2017.7
- edbbd5fc2b Merge branch '2016.11' into '2017.7'
- 5e289f42ba Merge pull request #44383 from gtmanfred/2016kitchen
• b65f4ea4ea switch salt-jenkins over to saltstack
  • cab54e34b5 Merge pull request #44173 from twangboy/win_system_docs
  • 8e111b413d Fix some of the wording and grammar errors
  • a12b5ae41 Use google style docstrings
  • 7aaea1d179 Merge pull request #44304 from jfindlay/cron_id
  • cc038c5bce states.cron identifier defaults to name
  • e4dbbde734 Merge pull request #44322 from rossengeorgiev/saltssh-docs-update
  • b18f2e5a6d fix program name and description for --static
  • 5b10918f02 updated CLI docs for salt-ssh
  • PR #44358: (The-Loeki) Kubernetes client certificate file usage fix @ 2017-11-03 21:51:27 UTC
    • b11da0d2da Merge pull request #44358 from The-Loeki/kube-client-cert-file
    • 35a8b0bb38 Kubernetes client certificate file usage fix
  • PR #44437: (rallytime) [2017.7] Merge forward from 2016.11 to 2017.7 @ 2017-11-03 21:48:21 UTC
    • 1974e52c06 Merge pull request #44437 from rallytime/merge-2017.7
    • 9bad04b94b Merge branch ‘2016.11’ into ‘2017.7’
      • 4e6f09e3eb Merge pull request #44435 from gtmanfred/2016kitchen
        • 79b8b2d0bf remove binding
      • 209847e8c2 Merge pull request #44342 from gtmanfred/2016kitchen
        • c50508f0b7 render template files platforms.yml and driver.yml
      • 1be65224cb Merge pull request #44339 from corywright/issue-44336-fix-archive-tar-docs-2016-11
        • 9c1c35a59f Remove leading dash (-) from options in archive.tar documentation
      • bebc33dafa5 Merge pull request #44295 from HeinleinSupport/issue44272
        • f972715a45 fixes issue #44272
      • e7ca9f8407 Merge pull request #44286 from gtmanfred/2016.11
        • 193e715e37 use our git repo for kitchen-salt
  • PR #44364: (Ch3LL) Include disk size check for test_spm_build_big_file test @ 2017-11-01 13:57:24 UTC
    • aea9f4a115 Merge pull request #44364 from Ch3LL/fix_size_test
    • 952c6bfe4d Include file size check for test_spm_build_big_file test
  • ISSUE #44239: (boltronics) --progress fails when hosts routed via syndic (refs: #44273)
  • PR #44273: (DmitryKuzmenko) Workaround progressbar failure if minion is behind syndic. @ 2017-10-31 17:07:17 UTC
    • 609de9367a Merge pull request #44273 from DSRCorporation/bugs/44239_syndic_progress
    • e1a7605623 Workaround progressbar failure if minion is behind syndic.
  • PR #44350: (gtmanfred) update salt-jenkins repo to 2017.7 @ 2017-10-30 21:31:30 UTC
    • eef6dba58 Merge pull request #44350 from gtmanfred/2017.7
    • cf71e3d9f2 update salt-jenkins repo to 2017.7
• PR #44346: (gtmanfred) remove binding from erb template rendering (2017.7) @ 2017-10-30 20:57:19 UTC
  - d586b3bf97 Merge pull request #44346 from gtmanfred/2017.7
  - bf577c3d8b remove binding
• PR #44343: (gtmanfred) render template files platforms.yml and driver.yml (2017.7) @ 2017-10-30 20:04:22 UTC
  - 547aac6658 Merge pull request #44343 from gtmanfred/2017.7
  - ec24feb0c2 render template files platforms.yml and driver.yml
• ISSUE #44336: (corywright) Docs for archive.tar should not use leading dash for tar options (refs: #44339, #44338)
• PR #44338: (corywright) Remove leading dash from options in archive.tar docs (2017.7 and develop) @ 2017-10-30 18:59:33 UTC
  - 6e2a74c18b Merge pull request #44338 from corywright/issue-44336-fix-archive-tar-docs-2017-7-and-newer
  - 49b0abc284 Remove leading dash (-) from options in archive.tar documentation
• PR #44265: (Ch3LL) Add service.status integration test @ 2017-10-30 15:00:12 UTC
  - 71923ed97 Merge pull request #44265 from Ch3LL/service_test
  - 716aabc0bf Merge branch '2017.7' into service_test
  - dd5c823210 remove skipIf import
  - ff92f31cbe remove skipif for docker
  - c13f37ee4 change service name depending on os
  - 980c43ebc9 change skip message check to docker
  - 3955537609 change skip if check to docker
  - aa8875a0e2 change service name to docker
  - 654071028b change service to crond
  - 7911b4b3eb Add service.status integration test
• PR #44294: (nasenbaer13) Boto asg fixes, Backport of #43858 @ 2017-10-30 14:48:52 UTC
  - PR #43858: (nasenbaer13) Boto_ASG fixes for scaling policy rate limiting and tag conversion (refs: #44294)
  - 8ae9769bfb Merge pull request #44294 from eyj/boto_asg
  - f5ad6aeb70 Debug log added when throttled by API
  - c05d9acced Encode tags as utf-8, retry policy readout
• PR #44312: (rallytime) Back-port #44287 to 2017.7 @ 2017-10-30 14:25:56 UTC
  - PR #44287: (jf) Fix utils.files.guess_archive_type to recognize the "tbz" extension as well (refs: #44312)
  - 68a9beb9f9 Merge pull request #44312 from rallytime/bp-44287
  - 4d02e61f97 Merge branch '2017.7' into bp-44287
  - ba0eaaa95e Fix utils.files.guess_archive_type to recognize the "tbz" extension as well (also tidy up list of extensions)
• ISSUE #44258: (oarmstrong) docker_container.running recreates containers with multiple links (refs: #44262)
• PR #44311: (rallytime) Back-port #44262 to 2017.7 @ 2017-10-30 14:25:35 UTC
- **PR #44262**: (oarmstrong) docker_container.running sort list of links (refs: #44311)
  - b8854e27c0 Merge pull request #44311 from rallytime/bp-44262
  - 72d617c6be Merge branch '2017.7' into bp-44262
  - ae34a15503 docker_container.running sort list of links
- **PR #44314**: (gtmanfred) update .kitchen.yml to run py3 tests too @ 2017-10-30 14:23:15 UTC
  - 48df79e7f7 Merge pull request #44314 from gtmanfred/2017.7
  - 542657669c Merge branch '2017.7' into 2017.7
- **PR #44316**: (rallytime) Fix lint failure on 2017.7 branch @ 2017-10-27 18:36:08 UTC
  - dbc5e224e9 Merge pull request #44316 from rallytime/fix-lint
  - 6d2490f6a0 Fix lint failure on 2017.7 branch
  - 39262b625e update .kitchen.yml to run py3 tests too
- **PR #44279**: (rallytime) [2017.7] Merge forward from 2016.11 to 2017.7 @ 2017-10-27 16:17:19 UTC
  - b2b0c770a4 Merge pull request #44279 from rallytime/merge-2017.7
  - 8237f45a46 Add print_function to __future__ import list
  - 05b0701de Lint fix from sloppy merge conflict resolution
  - 1c3cb5c6a4 Merge branch '2016.11' into '2017.7'
    * 8a1ea165af Merge pull request #44259 from gtmanfred/2016.11
      - 56a3ad8f68 fix pylint comments
      - 4add666db1 add comment to Gemfile and move copyartifacts
      - b4c8f7eb57 fix pylint
      - 392fd4f837 try newest salttesting
      - 79251287d0 add logging
      - 38963d5a82 use transport if not set in state_file
      - 10e309a64f which vagrant should go to stderr
      - 9307564de0 fix output columns
      - 2da22f87e1 test opennebula
      - 9f38f16905 add opennebula to Gemfile
      - 7465f9b27a add script for copying back artifacts
      - 255118cfd7 run tests with kitchen
    * 9d6bc8509b Merge pull request #44268 from twangboy/win_fix_lgpo_typo
      - a6a4c10a77 Fix typo
    * 0beb65a283 Merge pull request #44269 from terminalmage/fix-log-message
      - bc9cd65496 Fix log message in salt.utils.gitfs
    * 304dd2529d Merge pull request #44160 from gtmanfred/directory
      - a7d3d668f4 missed removing changes in the next test
      - ac0b5ec440 fix test
• d3d00c3e62 add changes to test return
  • e10395483d Merge pull request #44205 from rallytime/bp-44177
  • b9940f8521 Fixing default redis.host in documentation

• PR #44291: (Ch3LL) add saltutil.refresh_pillar test @ 2017-10-27 15:19:43 UTC
  • bd5b9dd0aa Merge pull request #44291 from Ch3LL/pillar_test
  • 34e2955445 add saltutil.refresh_pillar test

• PR #44267: (twangboy) Fix type and Py3 issues in LGPO module @ 2017-10-27 14:27:50 UTC
  • ba17a14d0 Merge pull request #44267 from twangboy/win_fix_lgpo
  • 5d22d34cacf Use unicode_literals
  • 40636397d8 Fix set for Py3
  • 8f8c706426 Fix typo

• PR #44285: (Ch3LL) add spm integration tests for remove and build @ 2017-10-26 21:20:10 UTC
  • e16707c403 Merge pull request #44285 from Ch3LL/all_spm
  • 1f77f36e6a3 add skipif logic for fallocate cmd
  • 03b54bc6d add spm integration tests for remove and build

• PR #44301: (twangboy) Fix test_pydsl on Windows @ 2017-10-26 21:14:21 UTC
  • 6392896a22 Merge pull request #44301 from twangboy/win_fix_test_pydsl
  • 6db23757bc Fix test_pydsl on Windows

• PR #44293: (UtahDave) Fix documentation grammar and spelling errors @ 2017-10-26 13:05:31 UTC
  • 8787d02688 Merge pull request #44293 from UtahDave/fix_unittest_docs
  • c919648ab4 Fix documentation grammar and spelling errors

• PR #44248: (Ch3LL) SPM tests: use _spm_build_files method during test_build setup @ 2017-10-25 19:45:03 UTC
  • 6e3374c1a Merge pull request #44248 from Ch3LL/spm_create_repo
  • 0a387c2ecd fix pylint
  • f38305a93 Add SPM create_repo integration test

• PR #44253: (Ch3LL) Add multiple spm integration tests @ 2017-10-25 13:36:03 UTC
  • bd75be4ca Merge pull request #44253 from Ch3LL/spm_install
  • 9ee2785034 add spm tests to test runner
  • 4729cc32b Add multiple spm integration tests

• PR #44254: (twangboy) Fix unit.modules.test_win_groupadd for Windows @ 2017-10-25 13:33:40 UTC
  • 75ee1ebc50 Merge pull request #44254 from twangboy/win_fix_test_win_groupadd
  • 609361bf48 Fix some lint errors
  • 1f44d85e6 Document helper functions
  • b0caec320e Move _get_all_groups up to the top
  • 7a3ff9387d Mock the rest of the tests
- 5ce14df82c Change how members are retrieved in win_groupadd
- 6ab82394be Set up mocking

- **PR #44266**: (Ch3LL) Add state, grains and service proxy tests @ 2017-10-25 13:08:50 UTC
  - 4e23fa63bb Merge pull request #44266 from Ch3LL/proxy_tests
  - e5701b472d Add state, grains and service proxy tests

- **ISSUE #43187**: (mirceaulinic) How to point from an execution module that a certain function failed (refs: #44244)

- **PR #44244**: (mirceaulinic) Add explicit non-zero retcode to napalm config functions @ 2017-10-24 09:23:40 UTC
  - c849f350ba Merge pull request #44244 from cloudflare/add-retcode
  - a1f27c9f00 Add explicit non-zero retcode to napalm config functions

- **ISSUE #44227**: (rklaren) salt-cloud leaves a broken vm around when the salt bootstrap fails (refs: #44228)

- **PR #44228**: (rklaren) Fixes #44227, make salt-cloud/libvirt cleanup after errors more robust @ 2017-10-23 17:09:35 UTC
  - 195b225540 Merge pull request #44228 from rklaren/fx-salt-cloud-libvirt-cleanup-after-errors
  - 7917d1e61e Incorporate review comments.
  - 3a10b6ae1f Fixes #44227, make salt-cloud/libvirt cleanup after errors more robust

- **ISSUE #19532**: (stolendog) salt-ssh running git clone with not root user (refs: #43769)

- **ISSUE #10582**: (mtorromeo) Git ssh helper may be unable run (refs: #43769)

- **PR #44008**: (mtorromeo) Backport #43769 to 2017.7 @ 2017-10-23 14:19:57 UTC
  - **PR #43769**: (mtorromeo) Copy git ssh-id-wrapper to /tmp only if necessary (Fixes #10582, #19532) (refs: #44008)
  - 01e7bab990 Merge pull request #44008 from mtorromeo/git-noexec-fix
  - a7a841d9d2 Merge branch '2017.7' into git-noexec-fix
  - d177240cfc Merge branch '2017.7' into git-noexec-fix
  - a63e6ca963 Copy git ssh-id-wrapper to /tmp only if necessary (Fixes #10582, Fixes #19532)

- **PR #44202**: (rallytime) [2017.7] Merge forward from 2016.11 to 2017.7 @ 2017-10-23 14:18:30 UTC
  - 85c0ef493f Merge pull request #44202 from rallytime/merge-2017.7
  - 99ff7a5c12 Merge branch '2016.11' into '2017.7'
    - 09ddfd0c08 Merge pull request #44167 from garethgreenaway/44140_debian_ip_fixes
      - 5f7555846f When looping through the various pre, post, up and down commands put them into the interface dict using the right internet family variable.
    - 9f9e936b52 Merge pull request #43830 from rallytime/bp-43644
      - 12845ae802 Several fixes for RDS DB parameter group management
    - 07db6a3d8b Merge pull request #43994 from oeuftete/fix-manage-runner-presence
      - f3980d7d83 Fix manage.present to show lost minions
    - a07537e258 Merge pull request #44188 from terminalmage/issue44150
      - 0692f442db yumpkg: Check pkgname instead of name to see if it is a kernel pkg

32.2. Previous releases 5387

  - d5bec99126 Fix some lint
  - b96186d60d Fix INSTALL_LANGUAGE
  - 5471bd521f Fix problem with file handle
  - 5ec58c6200 Use System Install Language as default fallback
  - f9ad446019 Fix win_lgpo execution module
- PR #44080: (twangboy) Fix a regression in group.present in Windows @ 2017-10-19 20:10:44 UTC
  - 98356b86af Merge pull request #44080 from twangboy/win_fix_group.present
  - 29bc80f87 Improve get_record_name
  - ef759a3875 Fix example in function docs for get_record_name
- 43740c5fed Document 15 character limit
- 83f36cc2ef Account for 15 character limit in hostname
- aa278966de Remove *args, pass gid as a keyword
- 5230ecd7e1 Accept *args

- **PR #44171:** (Ch3LL) Add SPM Build Integration Tests @ 2017-10-19 19:49:14 UTC
  - 5ef124bf2d Merge pull request #44171 from Ch3LL/spm_int
  - cd79e9444e remove unneded kwarg
  - 1541376c4f Add spm build test

- **PR #44157:** (benediktwerner) Added 'versionadded' tags to sensehat modules @ 2017-10-19 14:13:31 UTC
  - 34a843252d Merge pull request #44157 from benediktwerner/2017.7
  - bd825b51cc Changed sensehat versionadded from 2017.7 to 2017.7.0
  - f1d3c5bbcf Added 'versionadded' tags to sensehat modules

- **PR #44164:** (terminalmage) Fix examples in docker_container.{stopped,absent} docstrings @ 2017-10-19 14:12:37 UTC
  - 1427c7e1e Merge pull request #44164 from terminalmage/fix-docker-docstring
  - 7b46489e33 Fix examples in docker_container.{stopped,absent} docstrings

- **PR #44168:** (twangboy) Fix unit.test_auth for Windows @ 2017-10-19 14:12:22 UTC
  - 77969c4161 Merge pull request #44168 from twangboy/win_skip_pam_eath
  - bb1d2eb85b Skip tests that are failing on PAM eauth

- **PR #44151:** (rallytime) [2017.7] Merge forward from 2016.11 to 2017.7 @ 2017-10-18 16:52:30 UTC
  - 88a776d9d2 Merge pull request #44151 from rallytime/merge-2017.7
  - 6aa8f03a4a Merge branch '2016.11' into '2017.7'
    - 0cd493b691 Merge pull request #44131 from rallytime/bp-44029
      - bebf301976 fixed test addressing issue #43307, disk.format_ to disk.format
      - b4ba7ae2fc addresses issue #43307, disk.format_ to disk.format
    - 3a68e356f8 Merge pull request #44093 from gtmanfred/fix-44087
      - 5455c5053b fix pylint
      - f749cafa25 don't filter if return is not a dict
    - c785d7a847 Merge pull request #44122 from cachedout/gpg_pr_template
      - e41e3d76be Typo fix
      - 37c7980880 Add note about GPG signing to PR template
    - bf90eaf51 Merge pull request #44124 from rallytime/merge-2016.11
      - 59861291c8 Merge branch '2016.11.8' into '2016.11'
      - 57623e2abe Merge pull request #44028 from rallytime/bp-44011
      - 89e084bda3 Do not allow IDs with null bytes in decoded payloads
      - 206ae23f15 Don’t allow path separators in minion ID
- 13f3ffa83a Merge pull request #44097 from gtmanfred/openneb
  - c29655b2c2 Merge branch '2016.11' into openneb
  - bd2490b149 OpenNebula does not require the template_id to be specified
- ac3e4df964 Merge pull request #44110 from roaldnefs/fix-doc-local-returner
  - efd58f7594 Merge branch '2016.11' into fix-doc-local-returner
  - 881f1822f2 Format fix code example local returner doc

- ISSUE #43918: (mwerickso) subset argument does not work with saltmod.state (refs: #43933)
- PR #43933: (gtmanfred) if expect_minions is passed use that instead @ 2017-10-18 16:43:39 UTC
  - 0b47eb7242 Merge pull request #43933 from gtmanfred/2017.7
  - 272dcc6ba5 add inline comment about popping expect_minions
  - b615ce1762 if expect_minions is passed use that instead
- PR #44081: (skizunov) Windows: Fix usage of pkgrepo state @ 2017-10-18 16:16:46 UTC
  - 36da1a7fac Merge pull request #44081 from skizunov/develop3
  - 351d16840b Move strip_uri to salt/utils/pkg/deb.py
  - f54c7a6f01 Windows: Fix usage of pkgrepo state
- PR #43913: (twangboy) Fix unit.templates.test_jinja for Windows @ 2017-10-17 21:09:05 UTC
  - afcaca0c591 Merge pull request #43913 from twangboy/win_fix_test_jinja
  - a4e2d8059d Fix unit.templates.test_jinja for Windows
- PR #43917: (twangboy) Fix unit.test_pillar for Windows @ 2017-10-17 21:06:46 UTC
  - fc5754c6a1 Merge pull request #43917 from twangboy/win_unit_test_pillar
  - 00dbba5712 Fix unit.test_pillar for Windows
- PR #44133: (cachedout) Fix typos in parallel states docs @ 2017-10-17 15:24:19 UTC
  - 6252f82f58 Merge pull request #44133 from cachedout/fix_parallel_docs
  - 8d1c1e21f0 Fix typos in parallel states docs
- PR #44135: (timfreund) Insert missing verb in gitfs walkthrough @ 2017-10-17 14:32:13 UTC
  - 0d3f5db867 Merge pull request #44135 from timfreund/insert_missingVerb
  - 9557504b75 Insert missing verb in gitfs walkthrough
- PR #44055: (nasenbaer13) Activate jid_queue also for SingleMinions to workaround (Backport) @ 2017-10-16 20:14:52 UTC
  - PR #43860: (nasenbaer13) Activate jid_queue also for SingleMinions (occurs on reconnect) (refs: #44055)
  - a9700f6061 Merge pull request #44055 from eyj/jid_queue
  - 4bddd5b6b6 Merge branch '2017.7' into jid_queue
  - facef2227d Merge branch '2017.7' into jid_queue
  - 2fedee68bb Merge branch '2017.7' into jid_queue
  - 255aa94c64 Activate jid_queue also for SingleMinions to workaround 0mq reconnection issues
- PR #44125: (rallytime) [2017.7] Merge forward from 2017.7.2 to 2017.7 @ 2017-10-16 20:02:25 UTC
- 2fba45cd3f Merge pull request #44125 from rallytime/merge-2017.7
- c4ae4a6b50 Merge branch '2017.7.2' into '2017.7'
  * 5d719a2219 Merge pull request #44027 from rallytime/bp-44012
  * f782e41f3 Don't allow path separators in minion ID
  * 44060dc9c1 Do not allow IDs with null bytes in decoded payloads
- **ISSUE #43307:** (marek-knappe) Filesystem creation is failing on newly created LV (refs: #44029)
- **PR #44029:** (msummers42) addresses issue #43307, disk.format_ to disk.format (refs: #44131) @ 2017-10-16 19:59:20 UTC
  - 68974aa74d Merge pull request #44029 from msummers42/2017.7
  - 16e1c1d8c58 fixed test addressing issue #43307, disk.format_ to disk.format
  - 3d597db51c Merge branch '2017.7' into 2017.7
  - 18fb0be96a addresses issue #43307, disk.format_ to disk.format
- **PR #44079:** (skizunov) opkg: Fix usage with pkgrepo.managed @ 2017-10-16 19:58:13 UTC
  - d0bbe65af6 Merge pull request #44079 from skizunov/develop2
  - 0614d1af30 Merge branch '2017.7' into develop2
  - b6b12fe495 opkg: Fix usage with pkgrepo.managed
- **PR #44090:** (pratik705) Fix create_attach_volumes salt-cloud action for gcp @ 2017-10-16 19:04:22 UTC
  - 22a8253595 Merge pull request #44090 from pratik705/fixed-create_attach_volumes_salt-cloud_action-GCP
  - 3eefd334c5 Fixed "create_attach_volumes" salt-cloud action for GCP
- **PR #44121:** (benediktwerner) Fixed code snippet in unit testing documentation @ 2017-10-16 18:28:36 UTC
  - 888e5f51a2 Merge pull request #44121 from benediktwerner/2017.7
  - 1319c822bd Fixed code snippet in unit testing doc
- **PR #44098:** (twangboy) Return multiprocessing queue in LogSetupMock class @ 2017-10-16 18:14:30 UTC
  - 9fe94d7843 Merge pull request #44098 from twangboy/win_mock_test_parsers
  - cc43ca27af Return multiprocessing queue in LogSetupMock class
- **PR #44118:** (rallytime) [2017.7] Merge forward from 2016.11 to 2017.7 @ 2017-10-16 17:01:38 UTC
  - 0ee04eaf1d Merge pull request #44118 from rallytime/merge-2017.7
  - bb4c47afbc Merge branch '2016.11' into '2017.7'
    * c960ca32c2 Merge pull request #44092 from techhat/awsunicode
      - bb9db44d00 One more encoding
      - 0e8b32566f Apparently __salt_system_encoding__ is a thing
      - 1e7211838d Use system encoding
      - 1af21b6e5e Made sure that unicoded data is sent to sha256()
  - d89c317d96 Merge pull request #44021 from whiteinge/cpstats-attribute-error
    - b14e5f578 Also catch cpstats AttributeError for bad CherryPy release ~5.6.0
  - bbdabe242a Merge pull request #44025 from dayid/lover_typo

32.2. Previous releases
- 385980c21a Merge branch '2016.11' of https://github.com/saltstack/salt into lover_typo
- 266dc00a23 Typo correction of lover to lower
  - d8f3891a5e Merge pull request #44030 from rallytime/merge-2016.11
    - 53ea9d75c Merge branch '2016.3' into '2016.11'
    - 64fd839377 Merge pull request #44010 from Ch3LL/2016.3.7_follow_up
    - 9a00302cd8 fix 2016.3.7 release notes merge conflict
    - 63da1214db Do not allow IDs with null bytes in decoded payloads
    - ee792581fc Don't allow path separators in minion ID
    - 8aab65c718 fix 2016.3.7 release notes merge conflict
    - bd73dcb02c Merge pull request #43977 from Ch3LL/3.8_sec
    - 5fb3f5f6b1 Add Security Notes to 2016.3.8 Release Notes
- **PR #44099**: (twangboy) Skip Master, Minion, and Syndic parser tests @ 2017-10-16 16:07:00 UTC
  - 28fa997b9b Merge pull request #44099 from twangboy/win_skip_test_parser
  - caf086c05a Skip Master, Minion, and Syndic parser tests
- **PR #44106**: (roaldnefs) Fix mattermost returner documentation @ 2017-10-16 13:12:23 UTC
  - dbf112ead7 Merge pull request #44106 from roaldnefs/fix-doc-mattermost_returner
  - b3761a0401 Fix doc indentation in mattermost_returner
- **PR #44054**: (nasenbaer13) Backport of missing delete_on_termination @ 2017-10-13 15:45:25 UTC
  - PR #43859: (nasenbaer13) Add missing delete_on_termination passsthrough. Adapt docs. (refs: #44054)
    - fd2c51b76c Merge pull request #44054 from eyj/boto_lc
    - 34d4629a64 Merge branch '2017.7' into boto_lc
    - 9ef663526a Adapted documentation of delete_on_termination parameter
    - eb2bf0d47b Add missing delete_on_termination passsthrough. Adapt docs.
- **PR #44076**: (Ch3LL) Add spm shell tests @ 2017-10-13 14:32:19 UTC
  - b61ed66268 Merge pull request #44076 from Ch3LL/spm_test
  - d2e91333bd Add spm shell tests
- **PR #44051**: (twangboy) Fix some documentation formatting issues in the win_dacl state @ 2017-10-12 15:40:17 UTC
  - c38f313ac0 Merge pull request #44051 from twangboy/win_fix_docs_dacl
  - 377d6b6171 Fix some docs in the win_dacl state module
- **PR #44066**: (Ch3LL) Add Known CherryPy Issue to 2017.7.2 Release Notes @ 2017-10-12 15:18:25 UTC
  - a85837d72b Merge pull request #44066 from Ch3LL/cherry_release
  - 8e597f0ce9 Add Known CherryPy Issue to 2017.7.2 Release Notes
- **ISSUE #43643**: (doublez13) salt-ssh: multiple targets fails after upgrade to 2017.7 (refs: #43889)
- **ISSUE #43449**: (ecgg) salt-ssh -L with hosts down or unreachable returns wrong results (refs: #43889)
- **PR #43889**: (CorvinM) Fix issue with using roster_defaults with flat or cloud rosters. @ 2017-10-11 23:22:11 UTC
• PR #44031: (rallytime) [2017.7] Merge forward from 2016.11 to 2017.7 @ 2017-10-11 22:03:31 UTC
  - 3ad1c6d1d9 Merge pull request #44031 from rallytime/merge-2017.7
  - 1d4a6c3949 Lint: Fixup undefined variable errors
  - 788ad0609a Merge branch '2016.11' into '2017.7'
    • 0dbf41e79e Merge pull request #44011 from Ch3LL/2016.11._follow_up
      - c0149101c0 Do not allow IDs with null bytes in decoded payloads
      - 19481423dd Don't allow path separators in minion ID
    • d61300df20 Merge pull request #44023 from Ch3LL/11.9rn
      - 7f9015eb41 Add 2016.11.9 Release Note File
    • 9ff3b6f63a Merge pull request #44019 from benediktwerner/2016.11.
      - bc53598027 Fixed spelling mistake in salt_bootstrap tutorial
      - 6c30344824 Added missing tutorial docs to the tutorial index
    • 364523f5f8 Merge pull request #43955 from meaksh/2016.11-fix-2291
      - a81b78381b Merge branch '2016.11' into 2016.11-fix-2291
      - 44bc91bb98 Enable '--with-salt-version' parameter for setup.py script
    • fec714b91d Merge pull request #3962 from bobrik/kmod-built-in
      - 95ab901553 Report built-in modules in kmod.available, fixes #3945
    • e434c39c4e Merge pull request #43960 from cro/ldap_nopw_bind2
      - 962a20cf4b Require that bindpw be non-empty if auth.ldap.anonymous=False
      - 9df3d91d8f Release notes blurb for change to bindpw requirements
    • e9dfda2177 Merge pull request #3991 from Ch3LL/3.8_sec_2
      - 1977df8462 Add Security Notes to 2016.3.8 Release Notes
    • 2346d2691e Merge pull request #43968 from rossengeorgiev/to-fix-zenoss-prod_state
      - e6d31c1ea6 fix zenoss state module not respecting test=true
    • 8d56a5ac45 Merge pull request #43776 from Ch3LL/2016.11.8_docs
      - f72bc00000 [2016.11] Bump latest and previous versions
    • 21bf71c3f5 Merge pull request #43976 from Ch3LL/11.8_sec
      - f0c3184288 Add Security Notes to 2016.11.8 Release Notes
    • 1d5397ab5b Merge pull request #43973 from terminalmage/to-fix-grains.has_value
      - bf45ae6e6a Fix grains.has_value when value is False
    • 9ac3f2ea7b Merge pull request #43888 from rallytime/bp-43841
      - 87d676f08a add -n with netstat so we don't resolve
    • f880ac4c08 Merge pull request #43916 from dereckson/to-fix-typo-cloud-scaleway
- 15b8b8a9f4 Fix typo in salt-cloud scaleway documentation

- **PR #44045**: (isbm) Bugfix: always return a string "list" on unknown job target type. @ 2017-10-11 21:58:12 UTC
  - 5db1e8c6ca Merge pull request #44045 from isbm/isbm-tgttype-fix-2017-port
  - 471f35e2f Bugfix: always return a string "list" on unknown job target type.

- **ISSUE #43949**: (arthurllogilab) [logger] [sentry] KeyError: 'SENTRY_PROJECT' (refs: #43950)

- **PR #44026**: (rallytime) Back-port #43950 to 2017.7 @ 2017-10-11 15:27:49 UTC
  - PR #43950: (arthurllogilab) [log/sentry] avoid KeyError: 'SENTRY_PROJECT' (refs: #44026)
  - 6c8f7df5ec Merge pull request #44026 from rallytime/bp-43950
  - a37e0bad62 [log/sentry] avoid KeyError: 'SENTRY_PROJECT'

- **PR #44012**: (Ch3LL) Security Fixes for 2017.7.2 (refs: #44027) @ 2017-10-10 20:03:12 UTC
  - 369ee8a132 Merge pull request #44012 from Ch3LL/2017.7.1_follow_up
  - 92e095cf1c0 Don't allow path separators in minion ID
  - 70133aa305 Do not allow IDs with null bytes in decoded payloads

- **PR #44024**: (Ch3LL) Add 2017.7.3 Release Note File @ 2017-10-10 20:03:12 UTC
  - 4fe029a0ab Merge pull request #44024 from Ch3LL/7.3rn
  - 027f509368 Add 2017.7.3 Release Note File

- **ISSUE #43997**: (unthought) gce cloud provider breaks for make_master: True (refs: #43998)

- **PR #43998**: (unthought) Fix gce make_master @ 2017-10-10 20:01:25 UTC
  - e484d16817 Merge pull request #43998 from unthought/fix-gce-make_master
  - 6e9f0fa24e Fix GCE provider: #create returns bootstrap result

- **ISSUE #44013**: (DenisBY) pkgrepo.managed broken in 2017.7.2 (refs: #44016)

- **PR #44016**: (terminalmage) Fix on_header callback when not redirecting and no Content-Type present @ 2017-10-10 19:59:24 UTC
  - 82b92d54b3 Merge pull request #44016 from terminalmage/issue44013
  - d594b95f92 No need to set a specific encoding if one hasn't been provided via the headers
  - 425ede4b84 Fix on_header callback when not redirecting and no Content-Type present

- **PR #43952**: (t0fik) add requisites to stateconf (backport #43920) @ 2017-10-10 13:03:31 UTC
  - PR #43920: (t0fik) Added missing requisites to stateconf renderer (refs: #43952)
  - bd879eb66e Merge pull request #43952 from jdsieci/2017.7_add_requisites_to_stateconf
  - 9994c64670 Merge branch '2017.7' into 2017.7_add_requisites_to_stateconf

- **PR #43777**: (Ch3LL) [2017.7] Bump latest and previous versions @ 2017-10-09 17:21:57 UTC
  - a4358dafa36 Merge pull request #43777 from Ch3LL/2017.7.2_docs
  - 410c624f7a [2017.7] Bump latest and previous versions

- **PR #43978**: (Ch3LL) Add Security Notes to 2017.7.2 Release Notes @ 2017-10-09 17:20:04 UTC
  - 2a064c1a72 Merge pull request #43978 from Ch3LL/7.2_sec
  - 57fd67bcb Add Security Notes to 2017.7.2 Release Notes
- **PR #43932**: (techhat) Don’t try to modify dict while looping through it @ 2017-10-06 21:20:54 UTC
  - d9530e3c52 Merge pull request #43932 from techhat/moddict
  - 4a77560646 Don’t try to modify dict while looping through it
- **PR #43956**: (terminalmage) Fix fileclient’s get_url when redirecting to a redirect @ 2017-10-06 21:19:41 UTC
  - 39b93a1dab Merge pull request #43956 from terminalmage/get_url-redirects
  - 9a4f6a260f Fix fileclient’s get_url when redirecting to a redirect
- **PR #43943**: (twangboy) Fix `unit.utils.test_utils` for Windows @ 2017-10-06 19:35:24 UTC
  - 1ba286719 Merge pull request #43943 from twangboy/win_unit_test_utils
  - 254dac7723 Fix `unit.utils.test_utils` for Windows
  - 89200ff28e rebase from 2017.7.2
- **PR #43939**: (terminalmage) Fix typo in log message @ 2017-10-05 23:20:04 UTC
  - a8f1750323 Merge pull request #43939 from terminalmage/fix-typo
  - 29d85f426 Fix typo in log message
- **ISSUE #43909**: (frogunder) state.highstate not working on py3 setup (refs: #43910)
- **ISSUE #43605**: (cruscio) Module.Run: Passed invalid arguments to state.apply: can’t serialize dict.keys([‘task.create_task’]) (refs: #43910)
- **PR #43910**: (terminalmage) Don’t put unserializable dict.keys() into state return @ 2017-10-05 20:33:47 UTC
  - 1a71be1ed Merge pull request #43910 from terminalmage/issue43605
  - 042e92ac8 Don’t put unserializable dict.keys() into state return
- **ISSUE #41894**: (DR3EVR8u8c) Salt-cloud can’t resize root volume with public ami images (refs: #43907)
- **ISSUE #39257**: (aig787) Using del_root_vol_on_destroy option in salt-cloud gives IndexError (refs: #43907)
- **PR #43927**: (rallytime) Back-port #43907 to 2017.7 @ 2017-10-05 20:10:16 UTC
  - PR #43907: (richardsimko) Make sure EBS volume exists before querying (refs: #43927)
  - PR #33115: (rbjorklin) Fix override of ec2 volumetype (refs: #43907)
  - a7a59868c8 Merge pull request #43927 from rallytime/bp-43907
  - f62e8ca8f7 Make sure volume exists before querying
- **PR #43934**: (rallytime) [2017.7] Merge forward from 2016.11 to 2017.7 @ 2017-10-05 20:07:36 UTC
  - 4fcd4709ea Merge pull request #43934 from rallytime/merge-2017.7
  - eaca3291e2 Merge branch ‘2016.11’ into ‘2017.7’
    - 2ab7549d48 Merge pull request #43884 from UtahDave/2016.11local
    - e3b2857285 Merge branch ‘2016.11’ into 2016.11local
    - 4b882d4272 Merge pull request #43869 from terminalmage/issue43522
    - fe28b0d40b Only join cmd if it’s not a string
    - 8c671fd0c1 Update SaltConf banner per Rhett’s request
    - a2161efda3 Merge pull request #43707 from terminalmage/issue43373
      - 3ebde1895e Merge branch ‘2016.11’ into issue43373
• e580ed4caa Merge branch '2016.11' into issue43373
• 5b3be6e8af Fix failing unit test
• f73764481b Add missing support for use/use_in requisites to state.sls_id

• ISSUE #43658: (kvnaveen) KeyError: 'as_dict' [DEBUG ] LazyLoaded nested.output (refs: #43886)
• PR #43886: (techhat) Fix object_to_dict in azure @ 2017-10-05 19:33:56 UTC
  – 7d174172a0 Merge pull request #43886 from techhat/azuredict
  – 223a1eea83 Fix object_to_dict in azure
• PR #43899: (gtmanfred) enable tox for tests @ 2017-10-04 15:08:16 UTC
  – 7038248820 Merge pull request #43899 from gtmanfred/2017.7
  – 51e1a16bd enable tox for tests
• PR #43828: (rallytime) [2017.7] Merge forward from 2016.11 to 2017.7 @ 2017-10-04 13:10:13 UTC
  – a5abe33e1c Merge pull request #43828 from rallytime/merge-2017.7
  – 2ff02e42b0 Merge branch '2016.11' into '2017.7'
    • 85b3aa332a Merge pull request #43807 from terminalimage/issue43522
    • d8708b6f98 cmdmod: Don't list-ify string commands on Windows
    • ea8d273c2b Merge pull request #43768 from vutny/fix-pylint-deprecation-warnings
      • f8b3fa9da1 Merge branch '2016.11' into fix-pylint-deprecation-warnings
    – 651ed16ad3 Fix Pylint deprecated option warnings
• PR #43854: (keesbos) Map __env__ in git_pillar before sanity checks @ 2017-10-02 20:44:53 UTC
  – PR #43656: (keesbos) Git pillar fixes (refs: #43854)
  – 36b0b1174b Merge pull request #43854 from keesbos/2017.7
  – fba9ca935 Map __env__ in git_pillar before sanity checks
• PR #43847: (cachedout) Fix to module.run @ 2017-10-02 19:25:03 UTC
  – c81e8457b8 Merge pull request #43847 from cachedout/module_run_compare
  – b11f8c8f29 Merge pull request #17 from terminalimage/pr-43847
    • 93eaba7c54 Use six.iterkeys() instead of dict.keys()
    • 5d56a03a67 Improve failures for module.run states
  – 71780beb5a Merge branch '2017.7' into module_run_compare
• ISSUE #43819: (mephi42) archive.extracted shows the http password in the comment field on failure (refs: #43844)
• PR #43844: (garethgreenaway) [2017.7] Changes to states/file.py and states/archived.py @ 2017-10-01 09:08:48 UTC
  – dd01e0ce67 Merge pull request #43844 from garethgreenaway/43819_redact_url_additions
  – c58c72af9 When using URLs in archive.extracted, on failure the username & password is in the exception. Calling salt.utils.url.redact_http_basic_auth to ensure the credentials are redacted.
    • f0b985cbbe Merge branch 'module_run_compare' of ssh://github.com/cachedout/salt into module_run_compare
· aefc773c2f Merge branch '2017.7' into module_run_compare

- **PR #43840**: (twangboy) Fix `unit.states.test_augeas` for Windows @ 2017-09-29 21:53:21 UTC
  - 1f52546ebab Merge pull request #43840 from twangboy/win_fix_test_augeas
  - fd1d3c1de Fix `unit.states.test_augeas` for Windows

- **ISSUE #43553**: (dafyddj) Vagrant setup (Windows guest) broken on upgrade to 2017.7 (refs: #43801)

- **PR #43801**: (terminalmage) Properly handle UNC paths in `salt.utils.path.readlink()` @ 2017-09-29 09:58:02 UTC
  - c6fd2cd452 Merge pull request #43801 from terminalmage/issue43553
  - 66e6e89dc7 Properly handle UNC paths in `salt.utils.path.readlink()`

- **PR #43800**: (Ch3LL) Add note to nitrogen release notes about pip for cent6 @ 2017-09-28 17:36:49 UTC
  - 7304907db6 Merge pull request #43800 from Ch3LL/update_7.0
  - 5079c3b1c Add note to nitrogen release notes about pip for cent6

- **PR #43779**: (twangboy) Fix `unit.modules.test_state` for Windows @ 2017-09-28 14:27:03 UTC
  - 6f687fdcff Merge pull request #43779 from twangboy/win_fix_test_state
  - a64fe75816 Use os agnostic paths

- **PR #43782**: (twangboy) Fix `unit.modules.test_virt` for Windows @ 2017-09-28 14:25:16 UTC
  - db0f569f7a Merge pull request #43782 from twangboy/win_fix_test_virt
  - 7192332758 Fix `unit.modules.test_virt` for Windows

- **PR #43723**: (nicholasmhughes) Fix ini_manage error and change handling @ 2017-09-28 09:52:09 UTC
  - dd4fc52f1e Merge pull request #43723 from nicholasmhughes/ini_manage-error-handling
  - d68c5c4be0 prevent exception when test=True
  - cfe37916c3 handling changes per section
  - 1c4846fad5 prevent exception when test=True

- **PR #43781**: (twangboy) Fix `unit.modules.test_status` for Windows @ 2017-09-28 09:06:19 UTC
  - 5e29507c21 Merge pull request #43781 from twangboy/win_fix_test_status
  - 16a8253c1 Mock which, use os.linesep for cmd.run return

- **PR #43785**: (twangboy) Fix `unit.modules.test_znc` for Windows @ 2017-09-28 08:56:11 UTC
  - 05c78ae649 Merge pull request #43785 from twangboy/win_fix_test_znc
  - 7d90721f6b Merge branch '2017.7' into win_fix_test_znc
  - 228e74c8e3 Fix `unit.modules.test_znc` for Windows

- **PR #43786**: (twangboy) Fix `unit.modules.test_zypper` for Windows @ 2017-09-28 08:51:59 UTC
  - 10db8491c Merge pull request #43786 from twangboy/win_fix_test_zypper
  - 1c05e37a66 Merge branch '2017.7' into win_fix_test_zypper
  - aaefc7ab0e Fix `unit.modules.test_zypper` for Windows

- **PR #43773**: (rallytime) [2017.7] Merge forward from 2016.11 to 2017.7 @ 2017-09-28 08:48:39 UTC
  - 9615ca32d5 Merge pull request #43773 from rallytime/merge-2017.7
  - f7035ed7da Merge branch '2017.7' into merge-2017.7

---

### 32.2. Previous releases

5397
Chapter 32. Release notes

- dfe4a722c Merge branch '2016.11' into '2017.7'
  - 1a8cc60bb4 Merge pull request #43772 from gtmanfred/2016.11
    - 0194e60960 don't print Minion not responding with quiet
  - 9dee896b9 Merge pull request #43747 from rallytime/gpg-verification
    - 7a70de19f4 Merge branch '2016.11' into gpg-verification
    - 23bb4a5d6 Add GPG Verification section to Contributing Docs

- PR #43784: (twangboy) Fix unit.modules.test_win_service @ 2017-09-28 03:14:39 UTC
  - 9a9c69d55 Merge pull request #43784 from twangboy/win_fix_test_win_service
  - 058e50e530 Fix unit.modules.test_win_service

- PR #43774: (The-Loeki) typo fix aka what is a 'masterarpi' @ 2017-09-27 18:52:19 UTC
  - 1254da1df5 Merge pull request #43774 from The-Loeki/patch-1
  - 84bbee85e60 typo fix aka what is a 'masterarpi'

- PR #43732: (twangboy) Skip unit.stats.test_mac_packages on Windows @ 2017-09-27 14:48:08 UTC
  - 3f888753d4 Merge pull request #43732 from twangboy/win_skip_mac_pkg_tests
  - 1c01e06097 Only skip test on Windows
  - ec99a3ce3c Fix lint error
  - 61f8a27f7 Skip mac specific tests

- PR #43761: (Ch3LL) Release Notes for 2017.7.2 @ 2017-09-27 14:34:52 UTC
  - fb86935d99 Merge pull request #43761 from Ch3LL/release_2017.7.2
  - caf5795856 add mac patch notes
  - 3d5fce0955 Add 2017.7.2 Release Notes

- PR #43767: (twangboy) Skip unit.modules.test_snapper on Windows @ 2017-09-27 14:10:27 UTC
  - 5ea603cf16 Merge pull request #43767 from twangboy/win_skip_test_snapper
  - b41b9c8378 Skip snapper tests on Windows

- PR #43759: (rallytime) [2017.7] Merge forward from 2016.11 to 2017.7 @ 2017-09-27 13:30:38 UTC
  - 77c2c7cbf7 Merge pull request #43759 from rallytime/merge-2017.7
  - 120f49f2c4 Merge branch '2016.11' into '2017.7'
    - 1cc3ad1c8d Merge pull request #43733 from terminalmage/issue43729
      - 6e5c99bda0 Allow docker_events engine to work with newer docker-py
    - 5d38be4ff7 Merge pull request #43458 from terminalmage/issue42082
      - 5f90812b12 Fix missing PER_REMOTE_ONLY in cache.clear_git_lock runner
    - 023a563657 Merge pull request #43727 from rallytime/fixed-43650
      - babad1d2d3 Revise “Contributing” docs: merge-forwards/release branches explained!

- ISSUE #43737: (syedaali) salt.loaded.int.module.boto_kinesis.__virtual__() is wrongly returning None. It should either return True, False or a new name. If you're the developer of the module `boto_kinesis`, please fix this. (refs: #43748)
• PR #43748: (rallytime) Add message to boto_kinesis modules if boto libs are missing @ 2017-09-27 13:19:33 UTC
  - 5c203df056 Merge pull request #43748 from rallytime/fix-43737
  - 5a2593dbd3 Add message to boto_kinesis modules if boto libs are missing
• PR #43731: (twangboy) Fix unit.beacons.test_status for Windows @ 2017-09-26 16:25:12 UTC
  - 2581098595 Merge pull request #43731 from twangboy/win_unit_beacons_test_status
  - dc1b36b7e2 Change expected return for Windows
• PR #43724: (brejoc) Improved delete_deployment test for kubernetes module @ 2017-09-26 16:19:31 UTC
  - 10fd4d7498 Merge pull request #43724 from brejoc/2017.7.kubernetes_delete_test
  - 85b0a8c401 Improved delete_deployment test for kubernetes module
• PR #43734: (twangboy) Fix unit.modules.test_poudriere for Windows @ 2017-09-26 14:13:47 UTC
  - 13cc27bdab Merge pull request #43734 from twangboy/win_unit_test_poudriere
  - 922e60fa67 Add os agnostic paths
• PR #43742: (terminalmage) Fix incorrect value in docstring @ 2017-09-26 13:55:00 UTC
  - 41aeec7ac8 Merge pull request #43742 from terminalmage/fi docstring
  - 553335b1c9 Fix incorrect value in docstring
• PR #41998: (twangboy) Fix unit.modules.test_environ for Windows @ 2017-09-26 12:25:48 UTC
  - d78b9a3294 Merge pull request #41998 from twangboy/win_unit_test_environ
  - d73ef44cf6 Mock with uppercase KEY
  - 048e16883f Use uppercase KEY
• PR #42036: (twangboy) Fix unit.modules.test_file for Windows @ 2017-09-26 12:23:10 UTC
  - 7fbbea3806 Merge pull request #42036 from twangboy/win_unit_test_file
  - 056f3bb4c0 Use with to open temp file
  - 352fe69e35 Clarify the purpose of the for loop
  - b55172d5dc Split by Windows and Linux style line endings
  - e20aa5c39b Fix line, use os.sep instead of os.linesep
  - d5f27901e3 Fix additional bytestring issue
  - 716e99c453 Fix py3 bytesting problems
  - 543610570c Fix bytesting issues, fix errored tests
  - 9fe83a344a5 Remove old variable declaration
  - c5cf5e92c1 Fix many tests
• PR #43557: (clan) disable modify yaml constructor @ 2017-09-25 14:03:47 UTC
  - a81d4b88d8 Merge pull request #43557 from clan/yaml
  - 485471c8a7 Merge branch '2017.7' into yaml
  - da15658304 remove modify yaml constructor
• PR #43566: (damon-atkins) 2017.7 update salt.utils.files.safe_filepath func @ 2017-09-25 13:58:29 UTC
• ISSUE #43711: (wedge-jarrad) fcontext_get_policy emits command error if policy doesn’t exist (refs: #43712)
• PR #43712: (wedge-jarrad) Ignore retcode on call to grep in selinux.py module @ 2017-09-25 13:56:17 UTC
  - 3bb337cf6a Merge pull request #43712 from wedge-jarrad/fix-43711
  - 96c1f48e6 Ignore retcode on call to grep in selinux.py module
• ISSUE #43659: (gaborn57) unable to retrieve pillar data in postgres db (refs: #43716)
• PR #43716: (gaborn57) Corrected custom port handling @ 2017-09-25 13:44:58 UTC
  - 70c1944294 Merge pull request #43716 from gaborn57/2017.7
• PR #43700: (rklaren) Ensure salt-cloud with libvirt provider does not write low level errors to stderr @ 2017-09-25 01:47:25 UTC
  - PR #43684: (rklaren) salt-cloud libvirt updates (refs: #43700)
  - 6bb50c453 Merge pull request #43700 from rklaren/fix-libvirt-stderr-spam
  - 88530c4cb6 Lint fixes
  - 235bec492e salt-cloud + libvirt: Mention Fedora 26 support
  - 9acef5847 Remove stderr spam when using salt-cloud with libvirt
• PR #43702: (rallytime) [2017.7] Merge forward from 2016.11 to 2017.7 @ 2017-09-25 01:26:20 UTC
  - 437ac03801 Merge pull request #43702 from rallytime/merge-2017.7
  - 132b1b343b Merge branch '2017.7' into merge-2017.7
• ISSUE #38971: (morganwillcock) archive.extracted: lots of unnecessary file transferring, copying, and hashing (refs: #43681, #43518)
• PR #43681: (terminalmage) Backport the non-fileclient changes from PR 43518 to 2017.7 @ 2017-09-22 19:27:25 UTC
  - PR #43518: (terminalmage) Reduce unnecessary file downloading in archive/file states (refs: #43681)
  - 47cd8723c6 Merge pull request #43681 from terminalmage/issue38971-2017.7
  - 91edf865e2 Merge branch '2017.7' into issue38971-2017.7
  - 84f43c93be Backport the non-fileclient changes from PR 43518 to 2017.7
• ISSUE #43396: (mkurtak) yumpkg pkg.installed slowed down due to wildcard namig support (refs: #43687)
• PR #43687: (mkurtak) yumpkg.py: install calls list_repo_pkgs only if wildcard is used in pkg name @ 2017-09-22 19:23:18 UTC
  - 0a1c5185f5 Merge pull request #43687 from mkurtak/fix-43396
  - b1e64b11fb yumpkg.py: install calls list_repo_pkgs only if wildcard in pkg name is used
• ISSUE #43124: (UtahDave) publisher_acl with regex on username not working and has no documentation (refs: #43467)

• PR #43467: (DmitryKuzmenko) Bugs/43124 users regex @ 2017-09-22 19:21:09 UTC
  - 3a79549af4 Merge pull request #43467 from DSRCorporation/bugs/43124_users_regex
  - 14bf2dd8f Support regex in publisher_acl.
  - 9fc3f8b6e Regex support for user names in external_auth config.

• ISSUE #43381: (V3XATI0N) Sharing minion data cache causes false errors in returns (refs: #43670)

• PR #43670: (DmitryKuzmenko) Fix for list and contains redis cache logic. @ 2017-09-22 17:56:58 UTC
  - 0e86266b93 Merge pull request #43670 from DSRCorporation/bugs/43381_redis_cache_fix
  - 1c979d5809 Update redis cache contains logic to use more efficient sismember.
  - 039d236948 Fixed list and contains redis cache logic.
    * 6e5cf65d65 Merge branch '2016.11' into '2017.7'
    * f46c858f25 Merge pull request #43648 from rallytime/handle-boto-vpc-errors
      * 54842b5012 Handle VPC/Subnet ID not found errors in boto_vpc module

• PR #43697: (rallytime) [2017.7] Merge forward from 2016.11 to 2017.7 @ 2017-09-22 17:31:09 UTC
  - aa47da35dd Merge pull request #43697 from rallytime/merge-2017.7
  - cbae45bec4 Lint: Remove extra line at end of file
  - fca4e5563a Merge branch '2016.11' into '2017.7'
  - 9dba34aa06 Merge pull request #43575 from akissa/fix-csr-not-recreated-if-key-changes
    * b1b4dafd39 Fix CSR not recreated if key changes
  - 1d4fa48209 Merge pull request #43672 from rallytime/bp-43415
    * 3fb42bc238 Fix env_order in state.py
  - ff832ee607 Merge pull request #43673 from rallytime/bp-43652
    * d91c47c6f0 Salt Repo has Deb 9 and 8
  - 365cb9fba8 Merge pull request #43677 from terminalmage/runners-docs-2016.11
    * 2fd88e94fa Fix RST headers for runners (2016.11 branch)
  - be38239e5d Merge pull request #43534 from twangboy/win_fix_pkg.install_2016.11
    * 1546c1ca04 Add posix=False to call to salt.utils.shlex_split
  - 0d3fd3d374 Merge pull request #43661 from moio/2016.11-multiprocessing-doc-fix
    * 625ebbb83f multiprocessing minion option: documentation fixes
  - 6b4516c025 Merge pull request #43646 from brejoc/2016.11.4-pidfile-tests
    * 96f39a420b Fixed linting
    * 08fba98735 Fixed several issues with the test
    * 3a089e450f Added tests for pid-file deletion in DaemonMixIn
  - cfb1625741 Merge pull request #43591 from rallytime/merge-2016.11
    * 57b9d642c2 Merge branch '2016.11.8' into '2016.11'
5402  Chapter 32.  Release notes

- e83421694f Merge pull request #43550 from twangboy/osx_fix_preinstall_2016.11.8
- 1b0a4d39d2 Fix logic in /etc/paths.d/salt detection
- a648f75949 Merge pull request #43508 from rallytime/hp-43333
- d4981a2717 Update doco
- a7c8b9e048 Update win_pkg.py
- 1d6d6f6b72 Docs are wrong cache_dir (bool) and cache_file (str) cannot be passed on the cli (#2)
- e7009877bc Merge pull request #43434 from rallytime/2016.11.8-release-notes
- 68f529ee5e Add 2016.11.8 release notes
- 8671b91f62 Merge pull request #43572 from vutny/fx-salt-cloud-list-min-instance-set
  - 21966e7ce8 cloud.action: list_nodes_min returns all instances
- PR #43314: (twangboy) Fix unit.utils.test_verify for Windows @ 2017-09-21 22:26:13 UTC
  - e6dc4d64df Merge pull request #43314 from twangboy/win_fix_unit.utils.test_verify
  - 9ada7f626c Merge branch '2017.7' into win_fix_unit.utils.test_verify
  - c0dcf73ef Use sys.platform instead of salt.utils to detect Windows
  - e496d28cbf Fix unit.utils.test_verify for Windows
- ISSUE #43599: (vernondcole) Incorrect default for salt.cache.Cache() if opts does not define "cache" (refs: #43680)
- PR #43680: (vernondcole) correct default value for salt.cache.Cache @ 2017-09-21 20:09:36 UTC
  - ec34df2c27 Merge pull request #43680 from vernondcole/fx-salt.cache.Cache-default
  - 292f8c79b8 correct default value for salt.cache.Cache
- PR #43530: (twangboy) Fixes removal of double-quotes by shlex_split in winrepo @ 2017-09-21 18:04:48 UTC
  - 99d9d784b1 Merge pull request #43530 from twangboy/win_fix_pkg.install
  - 7f59119f95 Merge branch '2017.7' into win_fix_pkg.install
  - f146399f7a Use posix=False for shlex.split
- PR #43671: (rallytime) [2017.7] Merge forward from 2017.7.2 to 2017.7 @ 2017-09-21 16:39:49 UTC
  - 12b5e62d81 Merge pull request #43671 from rallytime/merge-2017.7
  - a40166db5 Merge branch '2017.7.2' into '2017.7'
- PR #43676: (terminalmage) Fix RST headers for runners (2017.7 branch) @ 2017-09-21 16:36:21 UTC
  - e3a2fbc2a3 Merge pull request #43676 from terminalmage/runners-docs-2017.7
  - 9b74634b23 Fix badly-formatted RST in mattermost runner docstring
  - c0a79c70a4 Fix RST headers for runners (2017.7 branch)
- PR #43235: (brejoc) Improve delete_deployment handling @ 2017-09-20 21:33:33 UTC
  - d02953ce6a Merge pull request #43235 from brejoc/improve-async-operation-handling-in-kubernetes-module
  - 4e8da3045f Fixed logic for windows fallback
  - 3b1cb884b9 Merge branch '2017.7' into improve-async-operation-handling-in-kubernetes-module
Salt Documentation, Release 3006.4

- d1b5ec098c Merge branch '2017.7' into improve-async-operation-handling-in-kubernetes-module
- 35cf69bc50 Moved exception Salt core
- 7431ec64e3 Removed unused sys import
- 0c71da95f6 Using salt method to identify MS Windows, single instead of double quotes
- 20619b24c4 Fixed test for delete_deployment
- 91076bafaf Merge branch '2017.7' into improve-async-operation-handling-in-kubernetes-module
- 7b600e2832 Added pylint-disable statements and import for salt.ext.six.moves.range
- 99fe138325 Code styling and added log message for timeout
- dcd8d4f639 Merge branch '2017.7' into improve-async-operation-handling-in-kubernetes-module
- 702a058c38 Fixed linting
- 3fe623778e Added Windows fallback
- 52b1c8147 Compatibility with Python3.6
- 767af9bb4f Added timeout for checking the deployment
- 32d7d34fe5 First simple draft for the deletion verification

- PR #43554: (twangboy) Win fix chocolatey @ 2017-09-20 16:06:18 UTC
  - 73c9bc27b5 Merge pull request #43554 from twangboy/win_fix_chocolatey
  - e04ac6b216 Merge branch '2017.7' into win_fix_chocolatey
  - 56be5c35eb Improve logic for handling chocolatey states
  - bcbf74e68 Add logic for test=True

- ISSUE #43598: (davidvon) Passed invalid arguments to mysql.file_query: unsupported operand type(s) for +_=': 'int' and 'tuple' (refs: #43625)

- PR #43625: (gtmanfred) results and columns are lists for mysql returns @ 2017-09-20 15:42:59 UTC
  - ed7eaaab Merge pull request #43625 from gtmanfred/2017.7
  - 84b50a06b results and columns are lists for mysql returns

- ISSUE #43560: (smitelli) salt.states.linux_acl requires setfacl/getacl binaries but this is not obvious (refs: #43587, #43580)

- PR #43587: (rallytime) Add reason to linux_acl state loading failure @ 2017-09-19 16:26:51 UTC
  - PR #43580: (garethgreenaway) Updating ACL module and state module documentation (refs: #4357)
    - 1bda4832ef Merge pull request #43587 from rallytime/fix-virtual
    - e5297e3869 Add reason to linux_acl state loading failure

- PR #43584: (cachedout) Enhance engines docs @ 2017-09-18 20:40:57 UTC
  - 2e19533e3c Merge pull request #43584 from cachedout/engines_doc_clarification
  - 634536b0ff Merge branch '2017.7' into engines_doc_clarification
  - 1a619708c1 Enhance engines docs

- PR #43519: (terminalmage) Fix incorrect handling of pkg virtual and os_family grain @ 2017-09-18 20:35:01 UTC
  - 50b134ef4c Merge pull request #43519 from terminalmage/fix-aptpkg

32.2. Previous releases

5403
- 0e3c447567 Fix incorrect handling of pkg virtual and os_family grain

- **PR #43520:** (clan) _search_name is " if acl type is other @ 2017-09-18 20:33:51 UTC
  - dd953f36ae Merge pull request #43520 from clan/acl
  - 5421677c1 _search_name is " if acl type is other

- **PR #43561:** (wedge-jarrad) Clean up doc formatting in selinux state & module @ 2017-09-18 20:28:47 UTC
  - ad9663a7fe Merge pull request #43561 from wedge-jarrad/selinux-doc-cleanup
  - 1bd263cd51 Clean up doc formatting in selinux state & module

- **ISSUE #43560:** (smitelli) salt.states.linux_acl requires setfacl/getacl binaries but this is not obvious (refs: #43587, #43580)
  - **PR #43580:** (garethgreenaway) Updating ACL module and state module documentation (refs: #43587) @ 2017-09-18 20:11:26 UTC
    - cc3d9c1a01 Merge pull request #43580 from garethgreenaway/43560_update_linux_acl_documentation
    - e63fae4c91 Merge branch '2017.7' into 43560_update_linux_acl_documentation

- **PR #43523:** (skizunov) Add back lost logic for multifunc_ordered @ 2017-09-18 17:46:16 UTC
  - **PR #38168:** (skizunov) Add support for a multi-func job using same func more than once (refs: #43523)
  - bf7b23316f Merge pull request #43523 from skizunov/develop2
  - fb579321a9 Add back lost logic for multifunc_ordered
    - 117a0dadb8 Updating the documentation to call out the requirement for the getfacl and setfacl binaries
      - 49f25b9f19 Lint
      - 31d17c0124 Fix typo found by @s0undt3ch
      - 5db8d2cb Fix to module.run [WIP]

- **ISSUE #43447:** (UtahDave) When using Syndic with Multi Master the top level master doesn’t reliably get returns from lower minion. (refs: #43526)
  - **PR #43526:** (DmitryKuzmenko) Forward events to all masters syndic connected to @ 2017-09-18 16:54:46 UTC
    - e29efec4f Merge pull request #43526 from DSRCorporation/bugs/43447_syndic_events_forwarding
    - 64d6109654 Merge branch '2017.7' into bugs/43447_syndic_events_forwarding
    - 3b2a529385 Merge branch '2017.7' into bugs/43447_syndic_events_forwarding
    - 0e4a74ad95 Forward events to all masters syndic connected to.

- **ISSUE #43077:** (Manoj2087) Issue with deleting key via wheel (refs: #43330)
  - **PR #43330:** (terminalmage) Fix reactor regression + unify reactor config schema @ 2017-09-18 16:46:11 UTC
    - 56b671e087 Merge pull request #43330 from terminalmage/issue43077
    - a7b4e1f782 Simplify client logic
    - b85c8510c7 Improve the reactor documentation
    - 20f6f3ce39 Include a better example for reactor in master conf file
    - 4243a221d Rewrite the reactor unit tests
    - 9db3f5ae6d Unify reactor configuration, fix caller reactors
- 34b6c3b65f Un-deprecate passing kwargs outside of 'kwarg' param

- ISSUE #33793: (mstarostik) states.ssh_auth adds bogus newline before newly added keys (refs: #43483)

- PR #43505: (rallytime) Back-port #43483 to 2017.7 @ 2017-09-15 21:22:12 UTC
  - PR #43483: (sadd3287) Handle bogus newline before newly added keys (refs: #43505)
  - 078d5d17de Merge pull request #43505 from rallytime/bp-43483
  - c68dd5b8a4 Lint: fix spacing
  - 406f61ac9a Fix indentation from tabs to spaces
  - 923ec62771 Copy paste typo
  - 6f6619242f Fix checking for newline on end of file by properly checking the last byte of the file if the file is non empty.

- ISSUE #43464: (psagers) acme.cert state: IOError on failure to create a new certificate (refs: #43465)

- PR #43491: (rallytime) Back-port #43465 to 2017.7 @ 2017-09-15 18:24:47 UTC
  - PR #43465: (psagers) acme.cert: avoid IOError on failure. (refs: #43491)
  - a6df5f2acc Merge pull request #43491 from rallytime/bp-43465
  - 3118faca0a acme.cert: avoid IOError on failure.

- PR #43492: (rallytime) [2017.7] Merge forward from 2016.11 to 2017.7 @ 2017-09-15 18:23:49 UTC
  - 3620c15c9a Merge pull request #43492 from rallytime/merge-2017.7
  - 4251ce5a27 Merge branch '2016.11' into '2017.7'
    - f2b86faa2db Merge pull request #43461 from twangboy/win_norestart
      - 2d26d6a176 Change all comment markers to '#'
      - d80a416cb Handle ErrorCode returned by VCRedist installer
      - fb31e9a530 Add /norestart switch to vcredist install
    - 90e8ca9c36 Merge pull request #43366 from brejoc/2016.11.pidfile-fix
      - 6e3eb76c79 Removed unused format argument
      - daf494884d Catching error when PIDfile cannot be deleted
    - a6c4586a77 Merge pull request #43442 from garethgreen- away/43386_2016_11_schedule_kwargs_pub
      - e637ecb86 Merge branch '2016.11' into 43386_2016_11_schedule_kwargs_pub
      - 6114df8dc3 Adding a small check to ensure we do not continue to populate kwargs with __pub_ items from the kwargs item.
    - 3c429299f9 Merge pull request #43456 from rallytime/43445_follow_up
      - 35c1d8898d Add Neon to version list
    - 6db7a721c0 Merge pull request #43441 from meaksh/2016.11-salt-bash-completion-fix
      - be4f26ab21 Use $HOME to get the user home directory instead using '~' char
    - 05ff4a450 Merge pull request #43445 from rallytime/bump-deprecation-warning
      - c91cd1c6d9 Bump deprecation warning for boto_vpc.describe_route_table
    - c57dc5f6be0 Merge pull request #43432 from rallytime/bp-43419
- c471a29527 make cache dirs when spm starts

- **ISSUE #43749**: (haam3r) Mattermost runner failing to retrieve config values due to unavailable config runner (refs: #43513)

- **PR #43513**: (haam3r) Issue #43749 No runners.config in 2017.7 branch @ 2017-09-15 14:58:27 UTC
  - 8a90e7059b Merge pull request #43513 from haam3r/2017.7
  - 58f7d051e9 Issue #43749 No runners.config in 2017.7 branch

- **ISSUE #42926**: (nixjdm) network.system not setting hostname in hosts file, preventing sudo. (refs: #43431)

- **PR #43431**: (mattLLWV) Fix /etc/hosts not being modified when hostname is changed @ 2017-09-13 18:35:55 UTC
  - c3d9e2d9b2 Merge pull request #43431 from mattLLWV/fix-hosts-deb
  - c6320b1dff Merge branch ‘2017.7’ into fix-hosts-deb
  - a3b2e19149 Fix /etc/hosts not being modified when hostname is changed

- **PR #43403**: (twangboy) Proper timestamp conversion in redis.lastsave @ 2017-09-12 21:18:06 UTC
  - a09f28f9bb Merge pull request #43403 from twangboy/win_fix_redismod
  - f6da23e1aa Properly handle timestamp conversion

- **PR #43463**: (twangboy) Add /norestart switch to vcredist installer @ 2017-09-12 20:29:27 UTC
  - 0eaaa5ac72 Merge pull request #43463 from twangboy/win_norestart_2017.7
  - 6984b8fd60 Add /norestart to vcredist installer

- **ISSUE #43386**: (rajvidhimar) Scheduler’s job_kwargs not working as expected. (refs: #43443, #43442)

- **PR #43443**: (garethgreenaway) [2017.7] Fixes to scheduler __pub values in kwargs @ 2017-09-12 18:14:46 UTC
  - 2fc237a806 Merge pull request #43443 from garethgreenaway/43386_2017_7_schedule_kwarg_pub
  - a29a9855a6 Fixing typo.
  - 2681b73fa Merge branch ‘2017.7’ into 43386_2017_7_schedule_kwarg_pub

- **ISSUE #39775**: (mirceaulinic) Proxy mine_interval config ignored (refs: #41547)

- **PR #41547**: (mirceaulinic) Override proxy minion opts with pillar data @ 2017-09-11 21:47:51 UTC
  - 5378ac7756 Merge pull request #41547 from cloudflare/px_merge_pillar_opts
  - aad39ba665 Document the new opts
  - cdc0d9674a Allow disabling the mines details merge
  - 7326b3b0b9 Merge mine details whenever possible
  - 96b31d5643 Override proxy opts with pillar data when required
  - fd49987f9 Define new proxy merge pillar in opts… opts
  - abab6fd91c Override minion opts with pillar data

- **PR #41943**: (twangboy) Fix unit.returners.test_local_cache for Windows @ 2017-09-11 21:34:03 UTC
  - 08d102c869 Merge pull request #41943 from twangboy/win_unit_test_local_cache
  - 377b34572 Merge branch ‘2017.7’ into win_unit_test_local_cache
  - 35b79ecde6 Remove cur variable, use time.time() in comparison
  - 9b61533b09 Get more accurate current time in local_cache
- 844e3f65bc Fix unit tests for Windows

- **PR #43424**: (twangboy) Fix `unit.modules.test_hosts` for Windows @ 2017-09-11 21:28:41 UTC
  - 50ab790fc8 Merge pull request #43424 from twangboy/win_unit_test_hosts
  - 90dfc8287c Fix `unit.modules.test_hosts` for Windows

- **PR #42652**: (skizunov) Fix loader.py's `raw_mod()` to look in all module dirs @ 2017-09-11 19:43:48 UTC
  - 0f9ed5a093 Merge pull request #42652 from skizunov/develop3
  - d82e406f15 Fix loader.py's `raw_mod()` to look in all module dirs

- **PR #43438**: (rallytime) [2017.7] Merge forward from 2016.11 to 2017.7 @ 2017-09-11 18:33:39 UTC
  - ca091bc8a4 Merge pull request #43438 from rallytime/merge-2017.7
  - ef7b4242c3 Merge branch '2016.11' into '2017.7'
    - 57cccd75d0 Merge pull request #43390 from aogier/43387-genesis-qemu
      - 496f14a7e7 forgot to mock the proper one
      - 51c7a1ba00 only check if `static_qemu` is executable()
      - 70642e495d better `qemu_static` parameter mangle in debootstrap management, tests
    - 606ae6c996 Merge pull request #43356 from gtmanfred/2016.11
      - 3f19b247f3 Add handler.messages back in for test comparison
      - 9911b04208 fix test
      - 3c6ae9a77 never-download got readded
    - e638fac54e Merge pull request #43325 from doesitblend/salt-mine-doc-fix
      - 1e94d0ac3a Lint: Remove trailing whitespace
      - 51af8f8757 Fix mine_interval phrasing in default file
      - ba01cd4536 Fix phrasing for mine_interval description
      - 9ff03c2d43 Update Salt Mine documentation to show that the mine_interval option is configured in minutes.
    - fc587f784a Merge pull request #43105 from aogier/43086-no-member
      - 5111cf8bad Merge branch '2016.11' into 43086-no-member
    - d97a680372 Merge pull request #43333 from damon-atkins/2016.11
      - 92de2bbf498 Update dco
      - fc9c6d1d12e Update `win_pkr.py`
      - c91fc14704 Merge branch '2016.11' into 2016.11
      - cb3af2bbbd Docs are wrong cache_dir (bool) and cache_file (str) cannot be passed on the cli (#2)
      - 42a118ff56 fixed cmd composition and unified his making across module
      - 3fd59ed369 Adding a small check to ensure we do not continue to populate kwargs with `__pub_` items from the kwargs item.

- **PR #43320**: (twangboy) Fix `unit.modules.test_alternatives` for Windows @ 2017-09-11 17:28:00 UTC
  - a9592dd3e2 Merge pull request #43320 from twangboy/win_fix_alternatives
Salt Documentation, Release 3006.4

- a909813fa5 Remove unused import (lint)
- 3e8d714cb Fix unit tests to mock salt.utils.path.readlink
- c0d81a1ce Use salt.utils.path.readlink
- 7c4460164b Fix alternatives for Windows

• PR #43363: (twangboy) Fix unit.modules.test_ini_manage for Windows @ 2017-09-11 17:10:31 UTC
  - 9b89e49846 Merge pull request #43363 from twangboy/scratch_ini_tests
  - a94319a082 Make sure formatting of TEST_FILE_CONTENT matches original
  - 6263be8983 Remove print statement
  - 79cd3831ae Fix empty value preserved test
  - 85997391f1 Is this handled the same on Linux and Windows

• PR #43421: (gtmanfred) Revert "Reduce fileclient.get_file latency by merging _file_find and ... @ 2017-09-11 17:07:18 UTC
  - 673ce387c1 Merge pull request #43421 from gtmanfred/compat
  - f85b8c18f Revert "Reduce fileclient.get_file latency by merging _file_find and _file_hash"

• ISSUE #42165: (arount) top_file_merging_strategy: merge does not works (refs: #43415)

• PR #43415: (mattLLVW) Fix env_order in state.py (refs: #43672) @ 2017-09-11 15:18:08 UTC
  - 47fd982fd37 Merge pull request #43415 from mattLLVW/fix-env-order
  - f6313a1b2c Merge branch '2017.7' into fix-env-order
  - e93a962980 Fix env_order in state.py

• PR #43422: (twangboy) Fix unit.cloud.clouds.test_ec2 for Windows @ 2017-09-11 15:17:20 UTC
  - e89e23a32e Merge pull request #43422 from twangboy/win_unit_cloud_ec2
  - 1379627334 Fix unit.cloud.clouds.test_ec2 for Windows

• PR #43423: (twangboy) Fix unit.modules.test_gem for Windows @ 2017-09-11 15:15:28 UTC
  - 54f833ac59 Merge pull request #43423 from twangboy/win_unit_test_gem
  - b2cea18d13 Fix unit.modules.test_gem for Windows

• PR #43419: (gtmanfred) make cache dirs when spm starts (refs: #43432) @ 2017-09-11 13:42:50 UTC
  - b3116109e5 Merge pull request #43419 from gtmanfred/2017.7
  - 58378866e5 make cache dirs when spm starts

• PR #43371: (rallytime) [2017.7] Merge forward from 2016.11 to 2017.7 @ 2017-09-08 15:39:12 UTC
  - 9b27475763 Merge pull request #43371 from rallytime/merge-2017.7
  - 7b07b58396 Merge branch '2016.11' into '2017.7'
    • 0c986f5eba Merge pull request #43361 from rallytime/bp-43329
      - b09e5b4379 Fix #43295, better handling of consul initialization issues
    • 22287439e6 Merge pull request #42903 from junovitch/issue-35840-fix-preserve-minion-cache-2016.11
      - c9d4fbd45 Merge branch '2016.11' into issue-35840-fix-preserve-minion-cache-2016.11
      - 93a68e32a5 Merge branch '2016.11' into issue-35840-fix-preserve-minion-cache-2016.11

5408 Chapter 32. Release notes
079f097985 Fix `preserve_minion_cache: True` functionality (fixes #35840)
4860e10757 Merge pull request #43360 from terminalmage/sj-496
  · 433bca14b1 Fix KeyError in yumpkg configparser code on Python 3
  · f6c16935d8 Move --showduplicates before repository-packages
4ba2dbe41e Merge pull request #43244 from rallytime/release-branch-clarifications
  · 0d5a46dbaa Update release branch section with a few more details
1a012eb3d7 Merge pull request #43359 from gtmanfred/ipaddr
  · 23d9abb560 ipaddr_start ipaddr_end for el7
8f88111be8 Merge pull request #43247 from rallytime/mentionbot-backports
  · 2b85757d73 Always notify tkwilliams when changes occur on boto files
  · 40b5a29f90 Add basepi to userBlacklist for mention bot
  · bad8f56969 Always notify ryan-lane when changes occur on boto files

• PR #43398: (twangboy) Fix unit.modules.test_mount for Windows @ 2017-09-08 13:39:29 UTC
  – 97f05ff603 Merge pull request #43398 from twangboy/win_fix_test_mount
  – 4a8d7e522c Fix tests, Use full path to salt.utils.which

• PR #43399: (twangboy) Fix unit.modules.test_pam for Windows @ 2017-09-08 13:37:50 UTC
  – 6a4cc5c1b0 Merge pull request #43399 from twangboy/win_fix_test_pam
  – 6257aa964a Fix unit.modules.test_pam for Windows

• PR #43400: (twangboy) Fix unit.modules.test_parted for Windows @ 2017-09-08 13:37:00 UTC
  – 2b5cfae3f8 Merge pull request #43400 from twangboy/win_unit_test_parted
  – 8e3e897ee2 Fix unit.modules.test_parted for Windows

• PR #43401: (twangboy) Fix unit.modules.test_pw_group for Windows @ 2017-09-08 13:35:45 UTC
  – 332deeb013 Merge pull request #43401 from twangboy/win_unit_test_pw_group
  – 78e39a1b9d Fix unit.modules.test_pw_group for Windows

• PR #43402: (twangboy) Fix unit.modules.test_qemu_nbd for Windows @ 2017-09-08 13:34:58 UTC
  – c0f5b8ef1 Merge pull request #43402 from twangboy/win_unit_test_qemu_nbd
  – 531ce8022b Fix unit.modules.test_qemu_nbd for Windows

• PR #43404: (twangboy) Fix unit.modules.test_seed for Windows @ 2017-09-08 13:32:41 UTC
  – be88fbb45f Merge pull request #43404 from twangboy/win_unit_test_seed
  – 6ce8b95a84 Use os.path.join for paths

• PR #43301: (twangboy) Fix unit.test_spm for Windows @ 2017-09-08 13:24:35 UTC
  – 612c6a8756 Merge pull request #43301 from twangboy/win_fix_unit_test_spm
  – 8608a6b303 Merge branch '2017.7' into win_fix_unit_test_spm
  – b8da0c40d4d Add Mike's changes
  – f3e6fb6ea7 Fix unit.test_spm for Windows

• PR #43372: (skizunov) Fix system.set_system_time when no hw clock is present @ 2017-09-07 17:45:33 UTC
- f959113694 Merge pull request #43372 from skizunov/develop5
- 281e471853 Fix system.set_system_time when no hw clock is present

- **PR #43193**: (jettero) Prevent spurious "Template does not exist" error @ 2017-09-06 20:16:58 UTC
  - PR #39516: (jettero) Prevent spurious "Template does not exist" error (refs: #43193)
  - 6d13535ed0 Merge pull request #43193 from jettero/template-dne-again
  - cde8ad2cf Merge branch '2017.7' into template-dne-again

- **ISSUE #42706**: (blarghmatey) Parallel Cache Failure (refs: #43018, #43159)

- **PR #43159**: (jubrad) Bp 43018 @ 2017-09-05 22:29:16 UTC
  - PR #43056: (damon-atkins) safe_filename_leaf(file_basename) and safe_filepath(file_path_name) (refs: #43159, #43172)
  - PR #43018: (jubrad) Update state.py (refs: #43159, #43727)
  - 015c5c57d9 Merge pull request #43159 from jubrad/bp-43018
  - 25419a56db Merge branch '2017.7' into bp-43018
  - 971b4c0890 Merge branch '2017.7' into bp-43018
  - 4f8e6c65e5 access safe_filename_leaf through utils.files, changed in #43172
  - 42064883ea state.py remove unused urllib import
  - 4957268b37 update state.py to use safe_filename_leaf
  - b8ead879ed Fixing lint issues
  - 44657d017 Swapping from import
  - fb80e17400 state.py: fix import and utf8 encode before quote
  - 1dcf167bb7 Update state.py

- **PR #43232**: (terminalmage) Improve inheritance in salt.utils.gitfs @ 2017-09-05 20:37:06 UTC
  - 6e1b541b46 Merge pull request #43232 from terminalmage/gitfs-inheritance
  - 53bd3a3e23 Improve inheritance in salt.utils.gitfs

- **PR #43238**: (s0undt3ch) Include the line number by default on the log file format @ 2017-09-05 20:31:54 UTC
  - 086b220091 Merge pull request #43238 from s0undt3ch/2017.7
  - 630a1db3ab Include the line number by default on the log file format

- **PR #43294**: (twangboy) Win build scripts @ 2017-09-05 20:12:54 UTC
  - 09dc8a78ce5 Merge pull request #43294 from twangboy/win_build_scripts
  - 9979cc6b613 Remove Py2 and Py3 in the same run
  - a5d9f85db6 Modifications to build scripts

- **PR #43322**: (rallytime) [2017.7] Merge forward from 2016.11 to 2017.7 @ 2017-09-05 18:21:26 UTC
  - 21ab30e6f4 Merge pull request #43322 from rallytime/merge-2017.7
  - b10628fc15 Merge branch '2016.11' into '2017.7'
    - 02867f6cd2 Merge pull request #43277 from rallytime/owners-file
      - 2b4da0f0e7 Add CODEOWNERS file
- 1c1c484479 Merge pull request #43312 from lordcirth/fix-cron-docs
  - ec94a13750 cron docs: Remind user to use quotes for special strings
- 0d1ed4b750 Merge pull request #43290 from lordcirth/fix-file-path-docs
  - 14a4591854 file.py docs: correct group and mode
  - d4214ca283 file.py docs: specify absolute paths
- 26ff89539e Merge pull request #43274 from terminalmage/fix-int-types
  - d533877743 Use six.integer_types instead of int
- cf21f91fb2 Merge pull request #43271 from twangboy/win_fix_pkg.install
  - 91b062f564 Fix formatting issue, spaces surrounding +

- PR #43324: (twangboy) Fix unit.modules.test_chef for Windows @ 2017-09-05 16:40:11 UTC
  - 62429c547d Merge pull request #43324 from twangboy/fix_unit.modules.test_chef
  - 5bd5ea042a Fix unit.modules.test_chef for Windows

- PR #43268: (rallytime) Back-port #43237 to 2017.7 @ 2017-09-01 18:17:13 UTC
  - PR #43237: (timka).utils.aws.get_location() expects a dict (refs: #43268)
  - 367668a0a3 Merge pull request #43268 from rallytime/bp-43237
  - 047ad07da4 .utils.aws.get_location() expects a dict

- PR #43270: (rallytime) [2017.7] Merge forward from 2016.11 to 2017.7 @ 2017-09-01 18:09:46 UTC
  - 02504dd363 Merge pull request #43270 from rallytime/merge-2017.7
  - 8fb025f6dc Merge branch '2016.11' into '2017.7'
  - 3a0b02f3ae Merge pull request #43228 from twangboy/win_fix_pkg.install
    - 13dfabb1ce Fix regex statement, add .
    - 31ff69f0ad Add underscore to regex search
    - 3cf2b6575c Fix spelling
    - ed050a35a5 Use regex to detect salt-minion install
    - 5daf495a Fix pkg.install
  - b4c689df5 Merge pull request #43191 from viktorkrivak/fix-apache-config-multi-entity
    - c15bcbe1cc Merge remote-tracking branch 'upstream/2016.11' into fix-apache-config-multi-entity
    - 4164047951 Fix apache.config with multiple statement At this moment when you post more than one statement in config only last is used. Also file is rewritten multiple times until last statement is written. Example: salt '*' apache.config /etc/httpd/conf.d/ports.conf config="[{'Listen': '8080'}, {'Proxy': "Something"}]" Ends only with Proxy Something and ignore Listen 8080, This patch fix this issue.
  - b90e59ede9 Merge pull request #43154 from lomeroe/bp-43116-2016.11
  - 85f93b0b02 verify that files exist before trying to remove them, win_file.remove raises an exception if the file does not exist
  - 33a30bac06 correcting bad format statement in search for policy to be disabled
  - acc3d7ac82 correct fopen calls from salt.utils for 2016.11's utils function
  - 2da1edd109 lint fix
– 61bd12c0de track xml namespace to ensure policies w/duplicate IDs or Names do not conflict
– f232bed9f add additional checks for ADM policies that have the same ADMX policy ID (#42279)

• ISSUE #42459: (javael) Broken ldap groups retrieval in salt.auth.ldap after upgrade to 2017.7 (refs: #43283)
• PR #43283: (DmitryKuzmenko) Fix ldap token groups auth. @ 2017-09-01 17:49:46 UTC
  – ece0e93ef Merge pull request #43283 from DSRCorporation/bugs/42459_broken_ldap_groups
  – 3ad6911210 Fix for tests: don't require 'groups' in the eauth token.
  – 1f104cf85b Fix ldap token groups auth.
• PR #43149: (BenoitKnecht) Fix iptables.get_rules when rules contain --nfmask or --ctmask @ 2017-09-01 15:57:05 UTC
  – 4f023c4cb6 Merge pull request #43149 from BenoitKnecht/2017.7.1
  – 3c1d99bde modules: iptables: correctly parse --nfmask/--ctmask
• ISSUE #43258: (nomeelnoj) metadata_server_grains problems (refs: #43265)
• PR #43265: (gtmanfred) make sure meta-data grains work on ec2 @ 2017-09-01 15:31:12 UTC
  – cf2b75b88 Merge pull request #43265 from gtmanfred/2017.7
  – 04edd8edeb make sure meta-data grains work on ec2
• PR #43299: (twangboy) Fix unit.netapi.rest_cherrypy.test_tools for Windows @ 2017-09-01 15:13:43 UTC
  – 618b221895 Merge pull request #43299 from twangboy/win_fix_netapi_cherrypy
  – fd74ac603 Merge branch '2017.7' into win_fix_netapi_cherrypy
• PR #43300: (twangboy) Fix unit.netapi.rest_tornado.test_handlers for Windows @ 2017-09-01 13:10:11 UTC
  – aee654da92 Merge pull request #43300 from twangboy/win_fix_netapi_rest_tornado
  – c93d2ed386 Use os.sep instead of '/'

• ISSUE #43259: (mahesh21) NameError: global name '__opts__' is not defined (refs: #43266)
• PR #43278: (gtmanfred) bootstrap can come from dunders @ 2017-08-31 13:31:20 UTC
  – PR #43266: (gtmanfred) switch virtualbox cloud driver to use __utils__ (refs: #43278)
  – aed297e06ac Merge pull request #43278 from gtmanfred/virtualbox
  – c4ae2de30f bootstrap can come from dunders
• PR #42975: (brejoc) Added unit tests for Kubernetes module @ 2017-08-30 20:30:16 UTC
  – 479e0e06ac Merge pull request #42975 from brejoc/tests-for-kubernetes-module
  – fdad9177b5 Merge branch '2017.7' into tests-for-kubernetes-module
  – c227cb25ad Skipping test on ImportError
  – bd6a870ce Dunder vars are now defined via setup_loader_modules
  – 3c99e61637 Renamed test to match new convention
  – caf78d206d Fixed imports for pytest
  – c8e98c8d8a Added unit tests for Kubernetes module
• ISSUE #42935: (BenjaminSchubert) docker_image.present always ends up failing even on correct result. (refs: #43176)
• **PR #43176**: (terminalmage) docker_image states: Handle Hub images prefixed with "docker.io/" @ 2017-08-30 20:08:13 UTC
  - ca7df1d4cf Merge pull request #43176 from terminalmage/issue42935
  - df18a89836 Lint: Remove unused import
  - 7279f98e92 docker_image states: Handle Hub images prefixed with "docker.io/"
  - f7c945f6e4 Prevent spurious "Template does not exist" error

### 32.2.72 Salt 2017.7.4 Release Notes

Version 2017.7.4 is a bugfix release for 2017.7.0.

**Statistics**

- Total Merges: 8
- Total Issue References: 4
- Total PR References: 11
- Contributors: 6 (Ch3LL, garethgreenaway, gtmanfred, marccardinal, rallytime, terminalmage)

**Changelog for v2017.7.3..v2017.7.4**

*Generated at: 2018-05-26 21:48:28 UTC*

- **PR #46074**: (Ch3LL) Update 2017.7.4 Release Notes with new fixes @ 2018-02-16 16:47:56 UTC
  - b5b083fd26 Merge pull request #46074 from Ch3LL/update-7.4
  - 8d0eeeb059 Update 2017.7.4 Release Notes with new fixes

- **ISSUE #45790**: (bdarnell) Test with Tornado 5.0b1 (refs: #46066)

- **PR #46066**: (rallytime) Pin tornado version in requirements file @ 2018-02-16 16:40:05 UTC
  - 32f3d00e44 Merge pull request #46066 from rallytime/pin-tornado
  - 6dc1a3b9dc Pin tornado version in requirements file

- **PR #46036**: (terminalmage) git.latest: Fix regression with identity file usage @ 2018-02-16 13:57:23 UTC
  - 85761ee650 Merge pull request #46036 from terminalmage/issue43769
  - e2140d9a84 Mock the ssh.key_is_encrypted utils func
  - 169924b3fe Move ssh.key_is_encrypted to a utils module temporarily
  - 5f043531e1b Keep ssh state and execution modules in the installer
  - f2b69f703d git.latest: Fix regression with identity file usage

- **PR #46009**: (Ch3LL) Add 2017.7.4 Release Notes with PRs @ 2018-02-16 16:40:30 UTC
  - 6d534c6e7e Merge pull request #46009 from Ch3LL/rn_7.4
  - ac0ba4b34 Add 2017.7.4 Release Notes with PRs

- **ISSUE #45976**: (ghost) 6a5e0f9 introduces regression that breaks Vault module for salt masterless (refs: #45981)
• PR #45981: (gtmanfred) use local config for vault when masterless @ 2018-02-13 15:22:01 UTC
  – ca76a0b328 Merge pull request #45981 from gtmanfred/2017.7.3
  – 0d448457dc apparently local is not set by default
  – 2a92f4bc16 use local config for vault when masterless
• ISSUE #45915: (MatthiasKuehneEllerhold) 2017.7.3: Salt-SSH & Vault Pillar: Permission denied "minion.pem" (refs: #45928)
• PR #45953: (rallytime) Back-port #45928 to 2017.7.3 @ 2018-02-09 22:29:10 UTC
  – PR #45928: (garethgreenaway) [2017.7] Fixing vault when used with pillar over salt-ssh (refs: #45953)
  – 6530649dbc Merge pull request #45953 from rallytime/bp-45928-2017.7.3
  – 85363189d1 Fixing vault when used with pillar over salt-ssh
• ISSUE #45893: (CrackerJackMack) archive.extracted ValueError "No path specified" in 2017.7.3 (refs: #45902)
• PR #45934: (rallytime) Back-port #45902 to 2017.7.3 @ 2018-02-09 16:31:08 UTC
  – PR #45902: (terminalmage) Check the effective saltenv for cached archive (refs: #45934)
  – fb378cebb0 Merge pull request #45934 from rallytime/bp-45902
  – bb83eb345 Add regression test for issue 45893
  – cdda66d759 Remove duplicated section in docstring and fix example
  – 4b6351eda6 Check the effective saltenv for cached archive
• PR #45935: (rallytime) Back-port #45742 to 2017.7.3 @ 2018-02-09 14:02:26 UTC
  – PR #45742: (marccardinal) list.copy() is not compatible with python 2.7 (refs: #45935)
  – 0d74151c71 Merge pull request #45935 from rallytime/bp-45742
  – 0a0b5f7af3 Removed the chained copy
  – ad1150fad4 list.copy() is not compatible with python 2.7

32.2.73 Salt 2017.7.5 Release Notes

Version 2017.7.5 is a bugfix release for 2017.7.0.

Statistics

• Total Merges: 213
• Total Issue References: 58
• Total PR References: 202
• Contributors: 52 (Ch3LL, DmitryKuzmenko, GwiYeong, L4rS6, SteffenKockel, The-Loeki, amendlik, andreasc, angeloudy, aphor, bdrung, cebe, ciiqr, damon-atkins, danlsiga, ddoh94, dmurphy18, dwoz, eliasp, frogunder, garethgreenaway, gclinch, gtmanfred, jfindlay, kstreee, marccardinal, mcalmer, mchugh19, meaksh, michelsen, nullify005, oarmstrong, oeuftete, philpep, racker-markh, rallytime, redbaron4, roaldnefs, rongshengfang, rongzeng54, rrroo, samlaine, samodid, skizunov, terminalmage, tintoy, twangboy, viktordaniel, vutny, while0pass, whytewolf, zer0def)
Changes to file.blockreplace State

The append newline argument was added to this state. Additionally, to improve idempotence, if the string represented by marker_end is found in the middle of the line, the content preceding the marker will be removed when the block is replaced. This allows one to remove append newline: False from the SLS and have the block properly replaced if the end of the content block is immediately followed by the marker_end (i.e. no newline before the marker).

Note: This will require changes to your SLS if your marker_end does not include the very beginning of the content you want to keep.

See the file.blockreplace state documentation for further information.

Changelog for v2017.7.4..v2017.7.5

Generated at: 2018-05-26 21:50:00 UTC

- PR #46612: (Ch3LL) Add changelog to 2017.7.5 release notes @ 2018-03-19 20:47:38 UTC
  - 19bb725698 Merge pull request #46612 from Ch3LL/7.5_rn
  - 6076bfa2ee Add changelog to 2017.7.5 release
- PR #46572: (dmurphy18) Addition of -sa flag to allow for revision numbers other than -0 or -1 @ 2018-03-19 20:07:26 UTC
  - 31c78ae11 Merge pull request #46572 from dmurphy18/update_xxxbuild
  - c87511570d Merge branch '2017.7.5' into update_xxxbuild
- ISSUE saltstack/salt-jenkins#884: (gtmanfred) [2017.7.5][Fedora 27][py2/py3] integration.states.test_npm.NpmStateTest.test_npm_install_url_referenced_package (refs: #46577)
- PR #46577: (gtmanfred) Fix npm issue @ 2018-03-19 11:51:04 UTC
  - cdd768fa4d Merge pull request #46577 from gtmanfred/2017.7.5
  - 78cb7b5cd Fix npm issue
  - c76f7eb028 enable debug logging on the minionlog
- PR #46551: (terminalmage) Fix failing pkg integration test on OpenSUSE @ 2018-03-19 11:50:12 UTC
  - e6682c660c Merge pull request #46551 from terminalmage/salt-jenkins-885
  - 703b5e7e65 Change versionadded to show that 2018.3.0 will not have this function
  - 010d2d0d06 Rewrite failing Suse pkg integration test
  - f3f5dec239 zypper.py: fix version argument being ignored
  - 214f2d6ad3 Add pkg.list_repo_pkgs to zypper.py
    * 0a541613f2 Additon of -sa flag to allow for revision numbers other than -0 or -1
- ISSUE saltstack/salt-jenkins#886: (gtmanfred) [2017.7.5][Fedora 26/Ubuntu 17.10][py3] integration.states.test_pip.PipStateTest.test_46127_pip_env_vars (refs: #46563)
- PR #46563: (gtmanfred) virtualenv version too old for python3.6 @ 2018-03-15 20:17:16 UTC
  - bd62699c9b Merge pull request #46563 from gtmanfred/2017.7.5
  - 8d5ab72983 virtualenv version too old for python3.6
• PR #46561: (gtmanfred) disable verbose @ 2018-03-15 16:36:41 UTC
  - 2916708124 Merge pull request #46561 from gtmanfred/2017.7.5
  - 2c39ac6d6b disable verbose
• PR #46537: (rallytime) Back-port #46529 to 2017.7.5 @ 2018-03-14 14:47:28 UTC
  - PR #46529: (gtmanfred) retry if there is a segfault (refs: #46537)
  - ee3bf0e32 Merge pull request #46537 from rallytime/bp-46529
  - 289c7a228f retry if there is a segfault
• PR #46519: (rallytime) Update man pages for 2017.7.5 @ 2018-03-13 20:00:51 UTC
  - 1271536a89 Merge pull request #46519 from rallytime/man-pages-2017.7.5
  - 782a5584f5 Update man pages for 2017.7.5
• ISSUE #46207: (seanjnkns) Issue #44034 still unresolved (refs: #46493)
• ISSUE #44034: (seanjnkns) salt-call pillar overrides broken in 2016.11.8 and 2017.7.2 (refs: #44483)
• PR #46493: (terminalmage) salt-call: don't re-use initial pillar if CLI overrides passed @ 2018-03-12 20:41:52 UTC
  - PR #44483: (terminalmage) salt-call: account for instances where __pillar__ is empty (refs: #46493)
  - 0e90c8ca6f Merge pull request #46493 from terminalmage/issue46207
  - f06ff8f10 salt-call: don't re-use initial pillar if CLI overrides passed
• PR #46450: (gtmanfred) load grains for salt.cmd runner @ 2018-03-12 18:52:22 UTC
  - b11a8fc8e0 Merge pull request #46450 from gtmanfred/salt_runner
  - 7974f7264 load grains for salt.cmd runner
• ISSUE #30115: (gtmanfred) [BUG] listen does not appear to respect the special names directive (refs: #46337)
• PR #46337: (gtmanfred) Fix using names with listen and listen_in @ 2018-03-12 18:50:00 UTC
  - 22d753364b Merge pull request #46337 from gtmanfred/2017.7
  - d6d9e3639 add tests for names and listen/listen_in
  - 3f8e0db572 let listen_in work with names
  - 716f4d4df fix listen to be able to handle names
• PR #46413: (meaksh) Explore 'module.run' state module output in depth to catch "result" properly @ 2018-03-12 18:49:07 UTC
  - 8b7191b878 Merge pull request #46413 from meaksh/2017.7-explore-result-in-depth
  - 885751634e Add new unit test to check state.apply within module.run
  - 9f19ad5264 Rename and fix recursive method
  - 1476ace558 Fix Python3 and pylint issue
  - 726ca3044d Explore 'module.run' response to catch the 'result' in depth
• PR #46496: (gtmanfred) more test kitchen clean up @ 2018-03-12 18:28:34 UTC
  - 02a79a2014 Merge pull request #46496 from gtmanfred/kitchen
  - da002f78d0 include virtualenv path for py3 windows
  - fe2efe03ea remove duplicate setup
• ISSUE #46329: (bdrung) test_create_deployments fails with python-kubernetes 4.0.0 (refs: #46330)

• PR #46330: (bdrung) Fix ValueError for template in AppsV1beta1DeploymentSpec @ 2018-03-12 16:56:18 UTC
  - 5c4c182d75 Merge pull request #46330 from bdrung/fix_kubernetes_test_create_deployments
  - 5008c53e44 Fix ValueError for template in AppsV1beta1DeploymentSpec

• ISSUE #46479: (rongshengfang) boto_ec2.instance_present throwing KeyError exception when associating EIP to an existing instance (refs: #46482)

• PR #46482: (rongshengfang) Fix KeyError in salt/states/boto_ec2.py @ 2018-03-12 15:13:13 UTC
  - c7e05d3ff4 Merge pull request #46482 from rongshengfang/fix-keyerror-in-instance_present
  - ed8c83e89a Fix KeyError in salt/states/boto_ec2.py when an EIP is being associated to an existing instance with the instance_present state.

• PR #46463: (terminalmage) Update requirements files to depend on mock>=2.0.0 @ 2018-03-09 19:24:41 UTC
  - 573d51afec Merge pull request #46463 from terminalmage/mock-2.0
  - b958b499c Update requirements files to depend on mock>=2.0.0

• ISSUE #46299: (gclinch) debconf module fails on Python 3 (refs: #46300)

• PR #46422: (rallytime) Back-port #46300 to 2017.7 @ 2018-03-09 19:19:25 UTC
  - PR #46300: (gclinch) Python 3 support for debconfmod (fixes #46299) (refs: #46422)
  - a154d35fc7 Merge pull request #46422 from rallytime/bp-46300
  - 829dfde8e8 Change stringutils path to old utils path for 2017.7
  - 91db2e0782 Python 3 support

• PR #46320: (mcalmer) add warning about future config option change @ 2018-03-09 17:48:29 UTC
  - 2afa17a1 Merge pull request #46320 from mcalmer/warn-kubernetes
  - c493ed415 add warning about future config option change

• PR #46449: (bdrung) Make documentation theme configurable @ 2018-03-09 17:47:15 UTC
  - c7f95581e3 Merge pull request #46449 from bdrung/make-doc-theme-configurable
  - 4a5da2d144 Make documentation theme configurable

• PR #46162: (rallytime) Add team-suse to CODEOWNERS file for zypper files @ 2018-03-09 17:46:13 UTC
  - 10ce9e9e20 Merge pull request #46162 from rallytime/team-suse-zypper-owner
  - 13a295a3b7 Add pkg and snapper to team-suse
  - 35c7b7b0d3 Add btrfs, xfs, yumpkg, and kubernetes file to team-suse
  - 485d777ac0 Add team-suse to CODEOWNERS file for zypper files

• PR #46434: (gtmanfred) split return key value correctly @ 2018-03-09 17:45:21 UTC
  - cac096b311 Merge pull request #46434 from gtmanfred/highstate_return
  - d18f1a55a7 fix pylint
  - 9e2c3f7991 split return key value correctly

• ISSUE #44452: (konstest) salt-cloud can't create snapshots, because there is a bug in the Unicode name of the virtual machine (refs: #44455)

• PR #44455: (whytwolf) .format remove fix for #44452 @ 2018-03-09 17:37:19 UTC
- 7dd71101ce Merge pull request #46455 from whytewolf/Issue_44452_unicode_cloud
- 5fe474b1a8 .format remove fix for #44452

- **PR #46428**: (twangboy) Fix issue with dev env install on Windows @ 2018-03-09 14:52:46 UTC
  - 4c8d9026d3 Merge pull request #46428 from twangboy/win_fix_reqs
  - e7ab97cc17 Remove six as a hard dep for Salt
  - cc67e5c2ef Set six to 1.11.0

- **PR #46454**: (gtmanfred) fix windows for kitchen @ 2018-03-08 21:19:31 UTC
  - e834d9a63b Merge pull request #46454 from gtmanfred/kitchen
  - b8ab843a5 fix windows for kitchen

- **ISSUE #46451**: (gmacon) SPM fails to start with customized cache location (refs: #46452)

- **PR #46452**: (gtmanfred) make spm cache_dir instead of all cachedirs @ 2018-03-08 21:12:20 UTC
  - 2886dca88f Merge pull request #46452 from gtmanfred/spm_cache_dir
  - 169cf7a4e2 make spm cache_dir instead of all cachedirs

- **PR #46466**: (bdrung) Fix various typos @ 2018-03-08 21:11:47 UTC
  - a188984cd9 Merge pull request #46466 from bdrung/fx-typos
  - 7e6e80be87 heat: Fix spelling mistake of environment
  - a3c4b50f6 Fix various spelling mistakes

- **ISSUE #20581**: (notpeter) Many environments: one pillar_root (all your envs are belong to base) (refs: #46309)

- **PR #46309**: (bdrung) Support dynamic pillar_root environment @ 2018-03-08 19:15:35 UTC
  - e35fc5263c Merge pull request #46309 from bdrung/dynamic-pillarenv
  - 584b451fd1 Support dynamic pillar_root environment

- **ISSUE #44032**: (PhilippeAB) blockreplace marker_end isn’t applied with newline (refs: #46430)

- **PR #46430**: (terminalmage) Improve reliability/idempotence of file.blockreplace state @ 2018-03-08 15:41:38 UTC
  - 35fe9827fe Merge pull request #46430 from terminalmage/issue44032
  - f9f187e915 Improve reliability/idempotence of file.blockreplace state

- **PR #46429**: (twangboy) Fix problem with __virtual__ in win_snmp @ 2018-03-07 23:26:46 UTC
  - 2bad0a21c0 Merge pull request #46429 from twangboy/win_fix_snmp
  - 8995a9b8de Fix problem with __virtual__ in win_snmp

- **PR #46100**: (jfindlay) Handle IPv6 scope parameter in resolv.conf @ 2018-03-07 19:51:20 UTC
  - 93a572f229 Merge pull request #46100 from jfindlay/resolv_scope
  - d5561bedaf tests.unit.grains.core add scoped IPv6 nameserver
  - 4e2e62d508 salt.utils.dns parse scope param for ipv6 servers

- **PR #46420**: (bdrung) Fix SSH client exception if SSH is not found @ 2018-03-07 17:49:00 UTC
  - 5acc1d5c54 Merge pull request #46420 from bdrung/2017.7
  - e48c13d9e0 Fix SSH client exception if SSH is not found
• **PR #46379**: (angeloudy) TypeError: a bytes-like object is required, not 'str' @ 2018-03-07 15:00:47 UTC
  
  - ca6a76e317 Merge pull request #46379 from angeloudy/2017.7
  
  - 3acb59c74c Merge branch '2017.7' into 2017.7
  
  - d971e0c08b Fix indent

  - 269514683f Update http.py
  
  - 908c040ac3 Update http.py
  
  - 51ba3c135b Update http.py

  - 14aba24111 fix bytes-object required error in python 3

• **PR #46404**: (gtmanfred) get 2017.7 ready to switch over to the new jenkins @ 2018-03-07 14:29:30 UTC
  
  - 73f9233557 Merge pull request #46404 from gtmanfred/kitchen
  
  - c56ba95a8 clone .git for the version tests

  - 3620611b5b fix unhold package for debian

  - 5219f7d2ba fix minion log path

• **ISSUE #46192**: (asymetrixx) salt-log-setup: AttributeError 'NoneType' object has no attribute 'flush' (refs: #46310)

• **PR #46310**: (twangboy) Update the Windows installer build scripts @ 2018-03-06 20:21:58 UTC

  - ca28cfd4e4 Merge pull request #46310 from twangboy/win_update_installer_build

  - bcf8b19566 Update the installer build

• **PR #46316**: (twangboy) Fix issues with the DSC module @ 2018-03-06 20:16:18 UTC

  - deccbc8ac3 Merge pull request #46316 from twangboy/win_fix_dsc

  - 2042d33d59 Fix issues with the DSC module

• **PR #46394**: (Ch3LL) Add mac py2 and py3 packages to mac installation docs @ 2018-03-06 16:45:30 UTC

  - 95586678c3 Merge pull request #46394 from Ch3LL/mac_doc

  - 158add6661 change oxdownload to oxdownload-\{python_version\}

  - 21aa848c89 Add mac py2 and py3 packages to mac installation docs

• **ISSUE #44831**: (kivoli) cmd.wait deprecated but cannot replicate conditional execution with onchanges (refs: #46338)

• **PR #46338**: (rallytime) Remove cmd.wait deprecation reference in docs @ 2018-03-05 21:48:52 UTC

  - 07b5d09ac1 Merge pull request #46338 from rallytime/fix-44831

  - 90771da999 Remove cmd.wait deprecation reference in docs

• **ISSUE #42438**: (ajoaugustine) Failed to send message: hipchat-message (refs: #46333)

• **PR #46333**: (danlsgiga) Fixes color parameter mismatch and handles 204 responses correctly @ 2018-03-05 19:42:26 UTC

  - 3849e7a085 Merge pull request #46333 from danlsgiga/issue-42438

  - 3b13f7b444 Revert changes in the code and change docs instead

  - 38114a65d8 Fixes color parameter mismatch and handles 204 responses correctly

• **ISSUE #44935**: (grinapo) module.file.replace string seems to be mutated into arrays (refs: #46322)
• **PR #46322**: (terminalmage) yamlify_arg: don’t treat leading dashes as lists @ 2018-03-05 15:40:17 UTC
  - a8f2f1b063 Merge pull request #46322 from terminalmage/issue44935
  - 85ac6a9893 yamlify_arg: don’t treat leading dashes as lists

• **PR #46327**: (samilaine) Modify the way a FQDN is handled in the vmware cloud provider. @ 2018-03-05 15:35:37 UTC
  - da5c282cb2 Merge pull request #46327 from samilaine/fix-vmware-cloud-fqdn
  - 4b8dfb326f Modify the way a FQDN is handled in the vmware cloud provider.

• **PR #46318**: (terminalmage) Skip type-checking for several gitfs/git_pillar/winrepo params @ 2018-03-05 15:04:27 UTC
  - 78c45d3786 Merge pull request #46318 from terminalmage/squelch-warnings
  - 5889b36646 Skip type-checking for several gitfs/git_pillar/winrepo params

• **ISSUE #45535**: (whytewolf) module_dirs left out salt-ssh, leaving custom ext_pillars and modules out of salt-ssh (refs: #46312)

• **PR #46312**: (gtmanfred) add module_dirs to salt ssh thin tarball @ 2018-03-05 15:00:48 UTC
  - bb0d6fc263 Merge pull request #46312 from gtmanfred/2017.7
  - 749ae580ed add module_dirs to salt ssh thin tarball

• **ISSUE #46127**: (redbaron4) pip.installed does not pass env_vars when calling freeze to check if package is already installed (refs: #46242)

• **PR #46242**: (redbaron4) Pass env_vars to pip.freeze @ 2018-03-05 14:53:13 UTC
  - 88b5f7383d Merge pull request #46242 from redbaron4/fix-46127
  - 06db51617 Make changes from review
  - 727ebe1056 Merge branch '2017.7' into fix-46127
  - 08d1ee8baf Fix Python3 test errors
  - aa9d709015 Pass env_vars to pip.freeze

• **PR #46265**: (Ch3LL) Add username/password to profitbricks conf for cloud tests @ 2018-03-02 21:40:22 UTC
  - a0716643e4 Merge pull request #46265 from Ch3LL/profit_cloud
  - d4893eab4c Add username/password to profitbricks conf for cloud tests

• **PR #46306**: (rallytime) Back-port #46256 to 2017.7 @ 2018-03-02 21:37:26 UTC
  - PR #46256: (rallytime) Don't install msgpack 0.5.5 (refs: #46306)
  - ed7bfa7e0 Merge pull request #46306 from rallytime/bp-46256
  - 6439bce4a8 Don't install msgpack 0.5.5

• **PR #46208**: (terminalmage) Blacklist os.umask @ 2018-03-02 18:46:07 UTC
  - 8c2c4e3316 Merge pull request #46208 from terminalmage/audit-umask-usage
  - 9c92aadce8 Disable blacklisted-function check for legitimate uses
  - 58a11aa26 Disable pylint check in salt-ssh shim
  - ecad67659 Blacklist os.umask
  - 31bd98fcb Replace direct use of os.umask with use of existing context manager
- 82ce546e18 Prevent failed os.makedirs from leaving modified umask in place

**PR #46293**: (eliasp) Fix Python3 comparison `TypeError` in `salt.modules.upstart` @ 2018-03-02 16:36:10 UTC
- **PR #44624**: (eliasp) Fix Traceback when using the `service.enabled` state on non-booted systems (refs: #46293)
- 978e869490 Merge pull request #46293 from eliasp/2017.7-44624-py3-compat
- 2e0b0d9c8 Fix Python3 comparison `TypeError` in `salt.modules.upstart`

**ISSUE #46128**: (Boulet-) Mountpoint in `git_pillar` (refs: #46264)

- **PR #46264**: (terminalmage) Fix incorrect merge conflict resolution @ 2018-03-02 14:21:13 UTC
  - bce4a66d0c Merge pull request #46264 from terminalmage/issue46128
  - 68000b7211 Fix incorrect merge conflict resolution

- **PR #46296**: (vutny) [DOC] Add missing params to `pillar.get` docstring @ 2018-03-02 14:19:41 UTC
  - 1e0b3aa348 Merge pull request #46296 from vutny/doc-pillar-get
  - 1faa8331e1 [DOC] Add missing params to `pillar.get` docstring

- **PR #45874**: (GwiYeong) fix for local client timeout bug @ 2018-03-01 19:39:35 UTC
  - c490a50452 Merge pull request #45874 from GwiYeong/2017.7-local-client-hotfix
  - 949ae82b Merge branch '2017.7' into 2017.7-local-client-hotfix
  - 45d663f435 fix for local client timeout bug

- **PR #46261**: (rallytime) [2017.7] Merge forward from 2016.11 to 2017.7 @ 2018-03-01 17:55:23 UTC
  - 8e8a3a2897 Merge pull request #46261 from rallytime/merge-2017.7
  - 8256ae5ee5 Merge branch '2016.11' into '2017.7'
    - 140ef4d6b9 Merge pull request #46253 from rallytime/doc-banners
      - 07ed8c7db3 Update docbanner for SaltConf18
    - 9fe863e520 Merge pull request #46179 from wedge-jarrad/cifs-remount-fix
      - 9ca25e4313 Add credentials and secretfile to mount.mounted mount_invisible_keys

- **ISSUE #44046**: (12b) docker_container.running states fail if the argument ulimits is set and a watch requisite is triggered (refs: #46276)

- **PR #46276**: (terminalmage) `salt.utils.docker.translate_input`: operate on deepcopy of kwargs @ 2018-03-01 15:37:44 UTC
  - 88a3166589 Merge pull request #46276 from terminalmage/issue44046
  - a14ddaf8c salt.utils.docker.translate_input: operate on deepcopy of kwargs

- **ISSUE #46182**: (oeuftete) docker_container.running is sensitive to HostConfig Ulimits ordering (refs: #46183)

- **PR #46183**: (oeuftete) Fix docker_container.running HostConfig Ulimits comparison @ 2018-02-28 22:22:11 UTC
  - da60399bf Merge pull request #46183 from oeuftete/fix-docker-container-running-host-config-ulimits
  - 5b09644429 Sort lists from Ulimits before comparing
  - 0b80f2226 Update old dockerng doc ref

- **ISSUE #46259**: (terminalmage) `git_pillar_branch` overrides branch defined in `git_pillar` configuration (refs: #46260)
• **ISSUE #46258**: (terminalmage) `git_pillar_base` doesn't work for values when PyYAML loads them as int/float (refs: #46260)

• **PR #46260**: (terminalmage) Normalize global `git_pillar/winrepo` config items @ 2018-02-28 22:05:26 UTC
  - 509429f08c Merge pull request #46260 from terminalmage/git_pillar
  - b1ce2501fd Normalize global `git_pillar/winrepo` config items

• **PR #46101**: (jfindlay) In OpenRC exec module, make sure to ignore retcode on status @ 2018-02-28 20:01:37 UTC
  - a97a3e6fb0 Merge pull request #46101 from jfindlay/openrc_ret
  - 2ee6c6dab6 tests.unit.modules.gentoo_service add retcode arg
  - 81e66f8dbb modules.gentoo_service handle stopped retcode

• **PR #46254**: (terminalmage) Add documentation to the fileserver runner @ 2018-02-28 19:54:03 UTC
  - 1a17593c05 Merge pull request #46254 from terminalmage/runner-docs
  - 5e5ce3defd Update enterprise banner

• **ISSUE #46215**: (racker-markh) `salt-cloud` will only intermittently build rackspace cloud instances with purely private networks (refs: #46243)

• **PR #46243**: (racker-markh) Don't ignore 'private_ips' unnecessarily @ 2018-02-28 15:28:29 UTC
  - 53067c4a3 Merge pull request #46243 from racker-markh/fix-openstack-private-network-issue
  - 50c1e140f0 Don't check deny private_ips already in the original list of private_ips

• **ISSUE #46109**: (rombert) `archive.extracted` takes a long time (> 4 minutes) even though directory exists (refs: #46239)

• **PR #46239**: (terminalmage) `archive.extracted`: don't check source file when if_missing path exists @ 2018-02-28 15:01:36 UTC
  - 15405c8760 Merge pull request #46239 from terminalmage/issue46109
  - 586d8b0dfc `archive.extracted`: don't check source file when if_missing path exists

• **PR #46221**: (rallytime) Fix hanging tests in integration suite @ 2018-02-27 21:32:25 UTC
  - 633e1208e4 Merge pull request #46221 from terminalmage/salt-jenkins-854
  - 0eb012659c Fix hanging tests in integration suite

• **PR #46214**: (vutny) [DOC] Replace note rST block for GitHub @ 2018-02-27 17:42:37 UTC
  - 7917277345 Merge pull request #46214 from vutny/formulas-readme-formatting
  - d702846961 [DOC] Replace note rST block for GitHub

• **PR #46203**: (Ch3LL) Add 2017.7.5 Release Notes File @ 2018-02-26 21:17:48 UTC
  - a2e099b744 Merge pull request #46203 from Ch3LL/7.5_release
  - 6ddf3246ce Add 2017.7.5 Release Notes File

• **PR #46201**: (rallytime) [2017.7] Merge forward from 2016.11 to 2017.7 @ 2018-02-26 18:56:47 UTC
  - 973b227818 Merge pull request #46201 from rallytime/merge-2017.7
9ac2101baa Merge branch '2016.11' into '2017.7'
a4c5417d23 Merge pull request #46132 from rallytime/2016.11_update_version_doc
d2196b6df3 Update release versions for the 2016.11 branch

- ISSUE #34423: (bdrung) oscodename wrong on Debian 8 (jessie) (refs: #46139)
- PR #46139: (bdrung) Add os grains test cases for Debian/Ubuntu and fix oscodename on Ubuntu @ 2018-02-26 16:44:04 UTC
  - 89cf2e5061 Merge pull request #46139 from bdrung/os-grains
  - 0b445f2a37 tests: Add unit tests for _parse_os_release()
  - f606977ed Fix osfinger grain on Debian
  - 8dde55a761 tests: Add os_grains test cases for Debian
  - ff02ab9937 tests: Add Ubuntu 17.10 (artful) os_grains test case
  - 77d5356aba Fix incorrect oscodename grain on Ubuntu
  - 7e62de9fd2 tests: Support reading os-release files from disk
  - a92ec0db1b Make _parse_os_release() always callable
  - eee1fe5b38 tests: Dissolve _run_ubuntu_os_grains_tests
  - 1d6ef731fe tests: Deduplicate _run_os_grains_tests()

- PR #46133: (rallytime) Update release versions for the 2017.7 branch @ 2018-02-26 16:42:43 UTC
  - c8e71e75ca Merge pull request #46133 from rallytime/2017.7_update_version_doc
  - 0ed338e643 Update release versions for the 2017.7 branch

- ISSUE #46124: (moremo) GitFS saltenv ref won't pick up multiple of the same ref (refs: #46185)
- PR #46185: (terminalmage) gitfs: Fix detection of base env when its ref is also mapped to a different env @ 2018-02-26 14:52:16 UTC
  - 390d592aa6 Merge pull request #46185 from terminalmage/issue46124
  - 3b58dd0da0 gitfs: Fix detection of base env when its ref is also mapped to a different env

- PR #46148: (rallytime) [2017.7] Merge forward from 2017.7.3 to 2017.7 @ 2018-02-23 19:21:38 UTC
  - 705ca88cca Merge pull request #46148 from rallytime/merge-2017.7
  - 25deeb7a6 Merge branch '2017.7.3' into '2017.7'

- PR #46137: (damon-atkins) [2017.7] update ec2 pillar arguments with better names @ 2018-02-23 13:32:04 UTC
  - PR #45878: (damon-atkins) ec2_pillar update to fix finding instance-id (refs: #46137)
  - 10a47d6cb4 Merge pull request #46137 from damon-atkins/2017.7_fix_ec2_pillar2
  - 99e7f6a7d3 update ec2 pillar arguments with better names

- ISSUE #46004: (github-abcede) opts file_roots gets overwritten with pillar_roots in orchestration run (refs: #46145)
- PR #46145: (terminalmage) 3 small fixes for runners/orchestration @ 2018-02-22 22:11:11 UTC
  - d74cb14557 Merge pull request #46145 from terminalmage/issue46004
  - 467ff841cd pillarenv argument should default to None and not the value from opts
  - 2a185855ea Better solution for fixing the opts munging in pillar.show_pillar runner

32.2. Previous releases
- e2c470e0c Update tests to reflect changes to the SaltCacheLoader
- f9301f334 Document behavior when orchestration runner invoked with non-orch states
- 9644579cd0 Instantiate the SaltCacheLoader's fileclient in the __init__
- f9a6c86e21 salt.runners.pillar.show_pillar: don't modify master opts
- e094a9cf4 Properly detect use of the state.orch alias and add orch jid to kwargs

- **PR #46135**: (rallytime) Back-port #46088 to 2017.7 @ 2018-02-22 15:11:14 UTC
  - **PR #46088**: (rongzeng54) fix kernel subpackages install bug (refs: #46135)
  - 0398ce0482 Merge pull request #46135 from rallytime/bp-46088
  - 57a6o62a3 fix kernel subpackages install bug

- **ISSUE #45837**: (johje349) Salt Cloud does not recognise all Digitalocean sizes (refs: #46115)

- **PR #46136**: (rallytime) Back-port #46115 to 2017.7 @ 2018-02-21 19:17:23 UTC
  - **PR #46115**: (samodid) update digitalocean salt-cloud driver (refs: #46136)
  - f1cbbd1602 Merge pull request #46136 from rallytime/bp-46115
  - 0a481d707f update digitalocean salt-cloud driver

- **PR #45911**: (twangboy) LGPO Module: Convert reg values to unicode for debug @ 2018-02-21 19:02:17 UTC
  - 11e5e8eb86 Merge pull request #45911 from twangboy/win_fix_lgpo_unicode
  - bcde5cc625 Update log statement
  - e9fa53d3b7 Change the Invalid Data Message
  - e8184d791 Convert reg values to unicode for debug

- **ISSUE #46085**: (zmedico) 2017.7.3 salt master with "open_mode: True" becomes unresponsive if minion submits empty public key (refs: #46123)

- **PR #46123**: (gtmanfred) If no pubkey is passed in openmode fail @ 2018-02-21 19:01:47 UTC
  - 52a64a7e20 Merge pull request #46123 from gtmanfred/2017.7
  - 8d36730e7f If no pubkey is passed in openmode fail

- **PR #46131**: (vutny) [DOC] Fix code-blocks for reStructuredText @ 2018-02-21 15:47:05 UTC
  - e48fa58012 Merge pull request #46131 from vutny/doc-formula-formatting
  - d8fb051e44 [DOC] Fix code-blocks for reStructuredText

- **ISSUE #42763**: (xuhcc) acme.cert state falsely reports about renewed certificate (refs: #44603)

- **ISSUE #40208**: (bewing) Inconsistent state return when test=True (refs: #44603)

- **PR #46118**: (rallytime) Back-port #46403 to 2017.7 @ 2018-02-21 15:21:42 UTC
  - **PR #46403**: (oarmstrong) Fix acme state to correctly return on test (refs: #46118)
  - 6cea44ee95 Merge pull request #46403 from rallytime/bp-44603
  - 2a2c236e6b Fix acme state to correctly return on test

- **PR #46121**: (rallytime) [2017.7] Merge forward from 2016.11 to 2017.7 @ 2018-02-21 10:07:18 UTC
  - 16c382b5e5 Merge pull request #46121 from rallytime/merge-2017.7
  - 4c2f504a85 Merge branch '2016.11' into '2017.7'
• e197a0fbc5 Merge pull request #46076 from rallytime/bp-46066
  - b94d73e53e Pin tornado version in requirements file
• c72c1bd5f Merge pull request #46093 from wedge-jarrad/contributing-doc-typo
  - 5a0fe1047 Fix contributing doc typo
• 3cb83ea87e Merge pull request #45992 from bggridley/fix-routes-present-state
  - 679787699c Add vpc_peering_connection_id to describe_route_tables route_keys
• 8a6063d5a0 Merge pull request #46000 from terminalmage/issue45910
  - 8cf13325ee salt.states.reg.present: Prevent traceback when reg data is binary
• 1f44e285dc Merge pull request #46011 from terminalmage/fix-solaris-runas
  - 8ee0a328b Move Solaris USER workaround up a bit
  - 13cdb52690 cmdmod.py: runs workarounds for platforms that don't set a USER env var
• 30fb87be0 Merge pull request #45467 from twangboy/win_exclude_hidden
  - ea41215646 Make the regex pattern less greedy
  - 6d223cfa7 Add tip about passing bogus saltenv
  - 1282ae393 Skip hidden first
  - 437a457911 Skip hidden dirs in genrepo
  - 87dc554dc3 Add final updates to docs
  - 3646d5ec97 Fix some docs formatting, add some warnings
  - 35c81fa5a Log the source_dir when caching the files
  - 91c3da8df6 Improve docs for pkg.refresh_db
  - 4803d92707 Add some documentation
  - 08b82e0875 Fix lint error, use raw
  - 2f712691cf Exclude hidden directories in pkg.refresh_db
• ISSUE #46106: (amendlik) yumpkg.refresh_db hangs (refs: #46107)
• PR #46107: (amendlik) Add --assumeyes on YUM/DNF commands @ 2018-02-20 22:52:06 UTC
  - b92346d45b Merge pull request #46107 from amendlik/yumpkg-assumeyes
  - 8da9a32fb2 Add --assumeyes to yum/dnf commands in yumpkg.refresh_db
• PR #46094: (kstreee) Fix memory leak @ 2018-02-20 21:36:02 UTC
  - 14fe42e06c Merge pull request #46094 from kstreee/fix-memory-leak
  - 480801abae Fixes memory leak, saltclients should be cleaned after used.
  - aba0805f5f Adds set_close_callback function to removes stream instance after closed from a set streams.
• ISSUE #13: (thatch45) Expand the stats module (refs: #46097)
• PR #46097: (vutny) [DOC] Put https link to the formulas doc page @ 2018-02-20 17:07:39 UTC
  - 320c2037e1 Merge pull request #46097 from vutny/fix-https-link
  - 206f05e5c [DOC] Put https link to the formulas doc page
• PR #46103: (bdrung) Fix skipping Kubernetes tests if client is not installed @ 2018-02-20 16:33:42 UTC
- 0eb137fb4 Merge pull request #46103 from bdrung/2017.7
- dd3f936557 Fix skipping Kubernetes tests if client is not installed

- **PR #46070**: (Ch3LL) add required arg to dns_check jinja doc example @ 2018-02-16 20:00:44 UTC
  - c3a938e994 Merge pull request #46070 from Ch3LL/fixed-doc
  - 2a5d855d97 add required arg to dns_check jinja doc example

- **PR #46067**: (rallytime) Back-port #45994 to 2017.7 @ 2018-02-16 19:55:27 UTC
  - PR #45994: (nullify005) Fix hosted zone Comment updates & quote TXT entries correctly (refs: #46067)
  - 0104e9d77 Merge pull request #46067 from rallytime/bp-45994
  - a07bb48726 Correct formatting for lint
  - e8678f633d Fix Comment being None not " and inject quotes into the TXT ChangeRecords

- **ISSUE #42932**: (bobrik) cmd.run with bg: true doesn't fail properly (refs: #45932)

- **PR #45932**: (The-Loeki) Fix cmd run_all bg error @ 2018-02-16 14:53:15 UTC
  - PR #39980: (vutny) [2016.3] Allow using bg kwarg for cmd.run state function (refs: #45932)
  - 5e0e2a30e2 Merge pull request #45932 from The-Loeki/fix_cmd_run_all_bg
  - f83da27ca5 Merge branch '2017.7' into fix_cmd_run_all_bg
  - 77175f8bca Merge branch '2017.7' into fix_cmd_run_all_bg
  - c54f0792a4d cmd: move separate DRY logging blocks into _run, prevent logging on bg=True, don't use_vt on bg
  - ebb1819e9b cmd run: when running in bg, force ignore_retcode=True

- **PR #46062**: (vutny) Fix typo in postgres_user.present state function @ 2018-02-16 14:44:29 UTC
  - 45ace39961 Merge pull request #46062 from vutny/pg-user-state-fix-typo
  - a5be4e95e Fix typo in postgres_user.present state function

- **PR #45763**: (twangboy) Fix rehash function in win_path.py @ 2018-02-15 20:05:16 UTC
  - edcb64de76 Merge pull request #45763 from twangboy/win_fix_path_rehash
  - b9a2bc7b29 Fix hyperlinks
  - 29912adc15 Move the test_rehash test to test_win_functions
  - adc594c183 Remove duplicate link
  - e84628c1eb Add some comments to the code
  - d505f582f Add additional info to docs for broadcast_setting_change
  - 3a5ae09cd9 Rename setting to message
  - a3f9e99bc0 Change to a generic function to broadcast change
  - 79299361c3 Create refresh_environment salt util
  - 967b63940c Fix rehash function

- **PR #46042**: (jfindlay) Revise file_tree pillar module documentation @ 2018-02-15 19:29:52 UTC
  - PR #46027: (jfindlay) Revise file_tree pillar module documentation (refs: #46042)
  - a46fbc546c Merge pull request #46042 from jfindlay/file_tree_doc
- 0ba4954a4b salt.pillar.file_tree revise module documentation
- 3c6a5bf967 salt.pillar.file_tree provide better debug info
- bb1c4d51e salt.pillar.file_tree no stack trace when nodegroups undefined

- **PR #46013**: (rallytime) Back-port #45598 to 2017.7 @ 2018-02-15 16:11:05 UTC
  - **PR #45598**: (nullify005) Patch around ResourceRecords needing to be present for AliasTarget (refs: #46013)
  - de86126dd8 Merge pull request #46013 from rallytime/bp-45598
  - 2ea3ef543 No lazy logging
  - f427b0febc Change formatting style of logging lines per review
  - ebb244396b Patch around ResourceRecords needing to be present for AliasTarget entries to work

- **ISSUE #45825**: (philpep) selinux.fcontext_policy_present doesn’t work on Centos 6 with filetype = all files (refs: #45826)

- **PR #46016**: (rallytime) Back-port #45826 to 2017.7 @ 2018-02-14 18:16:24 UTC
  - **PR #45826**: (philpep) Fix selinux.fcontext_policy_present for Centos 6 (refs: #46016)
  - 07e5735471 Merge pull request #46016 from rallytime/bp-45826
  - 1916e5c4a4 Fix selinux.fcontext_policy_present for Centos 6

- **ISSUE #45784**: (oarmstrong) SELinux module fcontext_get_policy fails with long regex (refs: #45785)

- **PR #46015**: (rallytime) Back-port #45785 to 2017.7 @ 2018-02-14 18:16:09 UTC
  - **PR #45785**: (oarmstrong) m/selinux.fcontext_get_policy allow long filespecs (refs: #46015)
  - a1f4092811 Merge pull request #46015 from rallytime/bp-45785
  - ef6fb1492 Resolve linting errors
  - 8047066c46 Remove unused import
  - 8f7c45935a Add tests for salt.modules.selinux.fcontext_get_policy
  - 8f7c45935a baf7b46e Ensure parsed fields are stripped
  - a8304e6819 m/selinux.fcontext_get_policy allow long filespecs

- **PR #46012**: (rallytime) Back-port #45462 to 2017.7 @ 2018-02-14 18:14:56 UTC
  - **PR #45462**: (aphor) emit port cli version, variants as separate args (refs: #46012)
  - 96097c037e Merge pull request #46012 from rallytime/bp-45462
  - 9f76836a6c emit port cli version, variants as separate args

- **PR #45991**: (terminalmage) yumpkg: Fix a couple issues with _get_extra_opts @ 2018-02-14 16:48:28 UTC
  - 12799245f5 Merge pull request #45991 from terminalmage/fix-duplicate-extra-opts
  - 916766f651 yumpkg: Fix a couple issues with _get_extra_opts

- **PR #46017**: (rallytime) [2017.7] Merge forward from 2017.7.3 to 2017.7 @ 2018-02-13 21:43:15 UTC
  - 8b9ad258e Merge pull request #46017 from rallytime/merge-2017.7
  - a06e45ce71 Merge branch '2017.7.3' into '2017.7'

- **ISSUE #45796**: (LArS6) aliases module doesn’t follow symlinks (refs: #45797)

- **PR #45988**: (rallytime) Back-port #45797 to 2017.7 @ 2018-02-13 17:49:02 UTC
• PR #45797: (L4rS6) follow symlinks in aliases module (close #45796) (refs: #45988)
  - d20ff89414 Merge pull request #45988 from rallytime/bp-45797
  - 953a400d79 follow symlinks

• PR #45711: (bdrung) Fix Unicode tests when run with LC_ALL=POSIX @ 2018-02-13 17:42:07 UTC
  - b18087cee0 Merge pull request #45711 from bdrung/fix-unicode-tests
  - b6181b5ed6 Fix Unicode tests when run with LC_ALL=POSIX

• PR #45878: (damon-atkins) ec2_pillar update to fix finding instance-id (refs: #46137) @ 2018-02-13 17:34:14 UTC
  - 5271fb1d40 Merge pull request #45878 from damon-atkins/2017.7_fix_ec2_pillar
  - 0e74025714 Merge branch '2017.7' into 2017.7_fix_ec2_pillar
  - b4d0b23891 py3 fix
  - 75d9e20d8a Add ignoring 'terminated', 'stopped' instances, to improve changes of a single match
  - 0093472a37 added tag_key_list and tag_key_sep to create ec2_tags_list
  - afb3968a7 ec2_pillar could not find instance-id, resolved. add support to use any tag to compare minion id against.

• PR #45942: (terminalmage) Fix incorrect translation of docker port_bindings -> ports (2017.7 branch) @ 2018-02-13 16:10:03 UTC
  - cf367dbd04 Merge pull request #45942 from terminalmage/issue45679-2017.7
  - 89cb7d2a0d Don't try to sort ports when translating docker input
  - 9cd47b39dd Fix incorrect translation of docker port_bindings -> ports

• PR #45959: (rallytime) A couple of grammar updates for the state compiler docs @ 2018-02-12 22:17:49 UTC
  - dae41de7a8 Merge pull request #45959 from rallytime/state-doc-update
  - 6f781cb95d A couple of grammar updates for the state compiler docs

• ISSUE saltstack/salt#45884: (tintoy) "TypeError: can’t serialize <NodeImage" when calling salt-cloud with the dimensiondata driver (refs: #45908)

• ISSUE #45884: (tintoy) "TypeError: can’t serialize <NodeImage" when calling salt-cloud with the dimensiondata driver (refs: #45908)

• PR #45908: (tintoy) Fix for #45884 ("TypeError: can’t serialize <NodeImage" when calling salt-cloud with the dimensiondata driver) @ 2018-02-12 22:05:29 UTC
  - 007214f7bf Merge pull request #45908 from DimensionDataResearch/fix/issue/45884
  - 1a75786b5a Fix linter warnings.
  - 82ec0b589c Revert to using salt.utils.cloud.is_public_ip.
  - 9b6b01873b Fix violations reported by flake8.
  - a2bc15c7c3 Use __utils__['cloud.'] instead of salt.cloud.utils.
  - 98907a32cb Ensure 'auth' parameter is correctly passed to dimensiondata driver.
  - de26b05e2c Fix copy/paste bug in dimensiondata provider integration test.
  - 6b1be427 Add integration tests for dimensiondata cloud provider.
  - f6ea9fed7d Ensure that event data provided by the dimensiondata driver is serialisable.
• PR #45985: (garethgreenaway) [2017.7] Backport #45894 - Missing format in the call to write. @ 2018-02-12 20:22:31 UTC
  - PR #45894: (while0pass) Fix inconsistencies in param description (refs: #45985)

    - 746280cde6 Merge pull request #45842 from rallytime/bp-45827
    - c631598a87 Fix traceback in disks grains when /sys/block not available
• ISSUE #44978: (doesitblend) State duration not always calculated (refs: #45721)

• PR #45721: (garethgreenaway) [2017.7] Ensure duration and start time exist @ 2018-02-05 14:59:33 UTC
  – 900aadcd67 Merge pull request #45721 from garethgreenaway/44978_show_duration_when_no_state_run
  – 359265869f Adding a couple tests to ensure that duration is included in state run results even when states
do not run.
  – 912347abc3 Include the duration when a state does not run, for example when the onchanges requisite
   is not met.

• PR #45517: (kstreee) Fixes base dir making logic to ensure not raising the exception when base directory
  already exists. @ 2018-02-05 14:56:23 UTC
  – 80a2d009b4 Merge pull request #45517 from kstreee/fix-mkdir
  – 24df4f2451 Fixes base dir making logic to ensure not raising the exception when base directory
   already exists.

• PR #45835: (kstreee) Adds a missing return statement. @ 2018-02-02 22:51:41 UTC
  – 7a4b1b2e77 Merge pull request #45835 from kstreee/fix-missing-return-statement
  – 68c7f3dcb9 Adds a missing return statement.

• PR #45840: (rallytime) Back-port #45603 to 2017.7 @ 2018-02-02 20:17:32 UTC
  – PR #45603: (andreaspe) Fix for duplicate entries with pkrepo.managed (refs: #45840)
  – 0a04f118c2 Merge pull request #45840 from rallytime/bp-45603
  – 965336131b Fix for duplicate entries with pkrepo.managed

• ISSUE #44315: (whytewolf) cmd.* cwd does not escape spaces. 2017.7.2 (refs: #45134)

• PR #45716: (ciiqr) fixed quoting of script path in cmd.script @ 2018-02-02 14:36:49 UTC
  – PR #45134: (garethgreenaway) [2017.7] fix to cmd.script for cwd with space (refs: #45716)
  – bd2178ed5f Merge pull request #45716 from ciiqr/fix_cmd_script_quoting
  – 217791079b some code cleanup (lint errors and escape_argument as _cmd_quote)
  – 1c29b5a3d fixed quoting of script path in cmd.script

• ISSUE #45684: (bdrung) salt documentation fails to build with Python 3 version of sphinx (refs: #45719)

• PR #45719: (bdrung) Fix python3 sphinx build @ 2018-02-02 14:20:37 UTC
  – 272f912c7c Merge pull request #45719 from bdrung/fix-python3-sphinx-build
  – 179e8f6be73 doc: Do not mock non-existing __qualname__ attribute
  – 971e9ebe2b Drop enforcing new-style object for SaltYamlSafeLoader

• PR #45764: (mchugh19) support amazon linux 2 for service module @ 2018-02-02 14:12:07 UTC
  – PR #45756: (mchugh19) support amazon linux 2 for service module (refs: #45764)
  – fc04336c3b Merge pull request #45764 from mchugh19/2017.7
  – 0a7f1a4d75 English better
  – 37e067c7b5 support amazon linux 2 for service module

• PR #45756: (roaldnefs) Fix Grafana4 states documentation @ 2018-01-31 19:01:33 UTC
  – f234bf52f4 Merge pull request #45756 from roaldnefs/fix-grafana4-documentation

32.2. Previous releases
- 92979c0b57 Fix grafana4 states documentation

**PR #45801**: (rallytime) [2017.7] Merge forward from 2016.11 to 2017.7 @ 2018-01-31 18:55:52 UTC
- 685b683db5 Merge pull request #45801 from rallytime/merge-2017.7
- 26ec992e011 Merge branch '2016.11' into '2017.7'
  - 746386d04e Merge pull request #45794 from vutny/doc-file-state-examples
    - ddfae6a29 [DOC] Fix code-block rST directive in file state module
  - abc9ee214 Merge pull request #45780 from vutny/doc-pkgrepo-zypper
    - f80c7d6d69 [DOC] Add missing gpgautoimport for pkgrepo.managed

**PR #45802**: (rallytime) [2017.7] Merge forward from 2017.7.3 to 2017.7 @ 2018-01-31 18:55:35 UTC
- c7d319f3bc Merge pull request #45802 from rallytime/merge-2017.7-from-2017.7.3
- eb48513ba0 Merge branch '2017.7.3' into '2017.7'

**ISSUE #45738**: (UtahCampusD) minion cache overwritten for scheduled jobs (refs: #45761)

**PR #45761**: (gtmanfred) generate a jid for cache_jobs on the minion @ 2018-01-31 18:01:53 UTC
- 96e9232cc2 Merge pull request #45761 from gtmanfred/2017.7
- 280767ed57 generate a jid for cache_jobs on the minion

**ISSUE #45301**: (twangboy) Ctl+C causes stack trace on Windows (refs: #45707)

**PR #45707**: (skizunov) Fix exception when shutting down logging listener @ 2018-01-30 13:28:10 UTC
- 38ed46a61a Merge pull request #45707 from skizunov/develop2
- e84801a381 Ensure we have at least one logging root handler
- 3da9b8dd33 Fix exception when shutting down logging listener

**PR #45773**: (terminalmage) Fix misspellings @ 2018-01-30 13:24:52 UTC
- 53008ffec7 Merge pull request #45773 from terminalmage/fix-misspelling
- 0a45f998fe Fix misspellings

**ISSUE #45489**: (ipmb) cache.grains runner returns all minions when match is not found (refs: #45588)

**PR #45751**: (rallytime) Back-port #45588 to 2017.7 @ 2018-01-29 17:12:25 UTC
- **PR #45588**: (samodid) update MasterPillarUtil get_minion_grains method (refs: #45751)
- 454ed2f562 Merge pull request #45751 from rallytime/bp-45588
- aa149a0e7a fix typo
- 3e794a043d fix copy-paste error in get_minion_grains method doc string
- 1fb94a08e0 update MasterPillarUtil

**PR #45753**: (rallytime) [2017.7] Merge pull forward from 2016.11 to 2017.7 @ 2018-01-29 17:11:11 UTC
- 860e21955c Merge pull request #45753 from rallytime/merge-2017.7
- cb50cece181 Merge branch '2016.11' into '2017.7'
- d7e09e2649 Merge pull request #45749 from vutny/fix-typo
  - e80bfb20c6 The zypper.mod_repo: fix typo in the docstring
- cb6ce378ea Merge pull request #45459 from vutny/salt-cloud-fix-loading-utf-cache
- b370796e9d Salt Cloud: write/read cached data in UTF-8 explicitly
- cd999201be [2016.11] Salt Cloud: fix loading UTF-8 cached data

- **ISSUE #40173**: (gtmanfred) Document the Open File limit issue better (refs: #45688)
- **PR #45688**: (bdrung) Raise LimitNOFILE to default max open files @ 2018-01-29 14:26:57 UTC
  - 9fb4d4a528 Merge pull request #45688 from bdrung/raise-max-open-files
  - bbedec756 Raise LimitNOFILE to default max open files
- **PR #45686**: (bdrung) Use dbus-run-session instead of dbus-launch @ 2018-01-29 14:24:11 UTC
  - 79da49ec8b Merge pull request #45686 from bdrung/2017.7
  - f49d0a0ee Use dbus-run-session instead of dbus-launch
- **PR #45740**: (terminalmage) Fix incorrect attempt at version comparison. @ 2018-01-29 14:12:05 UTC
  - 7fb6666c02 Merge pull request #45740 from terminalmage/fixed-incorrect-version-comparison
  - 1e0b38dca Fix incorrect attempt at version comparison.
- **PR #45747**: (SteffenKockel) Fix typos @ 2018-01-29 13:53:27 UTC
  - fe636f53f8 Merge pull request #45747 from SteffenKockel/2017.7
  - 319b513183 Fix typos
- **PR #45744**: (bdrung) Decode git call output in Python 3 @ 2018-01-29 02:03:21 UTC
  - 9eb91ae8b6 Merge pull request #45744 from bdrung/decode-git-call-output
  - 7516bf08ff Decode git call output in Python 3
- **ISSUE #44449**: (brianthelion) salt-ssh + salt-cloud: cloud roster not working and/or `update_cachedir` is broken (refs: #45720)
- **PR #45720**: (dwoz) Salt cloud adds newly created instances to cache @ 2018-01-26 22:45:43 UTC
  - 91b848deeb Merge pull request #45720 from dwoz/issue-44449-prod-fix
  - 4a4bd6119d Salt cloud adds newly created instances to cache
- **PR #45724**: (eliasp) Typo (Hellium → Helium) @ 2018-01-26 13:35:56 UTC
  - 7666db0c02 Merge pull request #45724 from eliasp/2017.7 typo fix
  - 966ad07452 Fix traceback in CLI output when value is trimmed
- **PR #45712**: (bdrung) Decode git call output in Python 3 @ 2018-01-26 02:03:21 UTC
  - 7516bf08ff Merge pull request #45712 from bdrung/decode-git-call-output
  - 217183405a Decode git call output in Python 3
- **ISSUE #44449**: (brianthelion) salt-ssh + salt-cloud: cloud roster not working and/or `update_cachedir` is broken (refs: #45720)
- **PR #45720**: (dwoz) Salt cloud adds newly created instances to cache @ 2018-01-26 22:45:43 UTC
  - 91b848deeb Merge pull request #45720 from dwoz/issue-44449-prod-fix
  - 4a4bd6119d Salt cloud adds newly created instances to cache
- **PR #45724**: (eliasp) Typo (Hellium → Helium) @ 2018-01-26 22:37:44 UTC
  - 831698f966 Merge pull request #45724 from eliasp/2017.7 typo fix
  - bcc78276f3 Replace left-over mistyped codename reference (Hellium → 2014.7.0)
- **PR #45722**: (rallytime) [2017.7] Merge forward from 2016.11 to 2017.7 @ 2018-01-26 22:15:40 UTC
  - cdb21a0186 Merge pull request #45722 from rallytime/merge-2017.7
  - 8e3a2e25fe Merge branch '2016.11' into '2017.7'
  - e4047a1234 Merge pull request #45511 from twangboy/win_fix_git
    - 160dd7c6ce Pull the first item in the list
    - 52d6d78150 Only keep ssh.py in the Windows installer
    - 54eb0d2c4 Keep ssh state and execution modules in the installer
* 0fa801a329 Add additional path to find ssh.exe
  - a550e8d25d Merge pull request #45694 from twangboy/win_reg_add_keys
    * 8f53cd2d68 Add new keys to subkey_slash_check
    * 62050c711c Add support for additional reg keys
  - 7ceebf62f0 Merge pull request #45577 from zer0def/fix-detached-31363
    * a924b971ef Applied PR #40524 to git.detached state module function. (refs #31363)

- **PR #45718:** (rallytime) [2017.7] Merge forward from 2017.7.3 to 2017.7 @ 2018-01-26 16:49:44 UTC
  - 3a413e96c5 Merge pull request #45718 from rallytime/merge-2017.7
  - f10c7ee92d Merge branch '2017.7.3' into '2017.7'

- **PR #45690:** (rallytime) [2017.7] Merge forward from 2016.11 to 2017.7 @ 2018-01-26 14:41:44 UTC
  - d0955519cf Merge pull request #45690 from rallytime/merge-2017.7
  - d4dac9f7cc Merge branch '2016.11' into '2017.7'
    * 3a6837e232 Merge pull request #45675 from Ch3LL/rn_2016.11.9
      - 7b5bed36d9 Add new commits to 2016.11.9 release notes
    * 915e259bad Merge pull request #45663 from rallytime/bp-45452-2016.11
      - ae94f61d9 opkg.py: make owner function return value, instead of iterator
    * ecd75c137f Merge pull request #45651 from rallytime/merge-2016.11
      - 1583e1edbe Merge branch '2016.11.9' into '2016.11'
      - 10812969f0 Merge pull request #45638 from twangboy/win_fix_shell_info
      - 872da3ffba Only convert text types in the list_values function
      - 0e41535cdb Fix reg.py to only convert text types to unicode
      - 357953a5e5 Fix issue with detecting powershell
      - 2d1dd54d6e Merge pull request #45564 from Ch3LL/r-notes-2016
      - 28e4398150 Merge pull request #45563 from Ch3LL/man_2016
    * 22bcd3d110 Merge pull request #45600 from vutny/doc-fix-references
      - 35675fe6b3 [DOC] Fix references on Salt Formulas page
    * 0d622f92a9 Merge pull request #45542 from UtahDave/doc_mixed_transports
      - b5b5054ec2 capitalize masters and minions
      - f542bd566 Add warning about using mixed transports
    * c70b9dc20b Merge pull request #45655 from Ch3LL/r-notes-2016
      - 32f4cbcdca Add PR changes to 2016.11.9 Release Notes
    * d8526062c1 Merge pull request #45562 from Ch3LL/man_2016
      - 529bc0c680 update release number for salt-call man page 2016.11.9
      - 11b7222148 Update man pages for 2016.11.9

- **PR #45710:** (michelsen) Added source argument to function call @ 2018-01-26 14:30:48 UTC
  - 9c92e93834 Merge pull request #45710 from michelsen/fix-chocolatey-state-bug
- 8accc0ce5c Added source argument to function call

- **PR #45667**: (gtmanfred) default to upgrading when refreshing on archlinux @ 2018-01-25 14:05:24 UTC
  - 693f72d5a7 Merge pull request #45667 from gtmanfred/syu
  - 44c061102a we should default to upgrading when refreshing on archlinux

- **PR #45674**: (rallytime) [2017.7] Merge forward from 2017.7.3 to 2017.7 @ 2018-01-24 22:46:31 UTC
  - bec946b080 Merge pull request #45674 from rallytime/merge-2017.7
  - 9f78e534b Merge branch '2017.7.3' into '2017.7'

- **ISSUE #45590**: (viq) webhook engine does not work with tornado 4.5.2 (refs: #45589)
  - **PR #45589**: (gtmanfred) change webhook headers to dict @ 2018-01-24 22:32:37 UTC
    - 50de47191 Merge pull request #45589 from gtmanfred/2017.7
    - 395d65c91 change webhook headers to dict

- **ISSUE #45072**: (vernondcole) cannot build documentation on Ubuntu 17.10 (refs: #45662)

- **PR #45662**: (bdrung) Fix documentation generation @ 2018-01-24 17:14:22 UTC
  - e21088ca1 Merge pull request #45662 from bdrung/2017.7
  - 71076afbcc doc: Define fake version for msgpack and psutil
  - 6b65b745b1 doc: Mock keyring module import

- **PR #45650**: (rallytime) Back-port #45555 to 2017.7 @ 2018-01-24 14:47:54 UTC
  - **PR #45555**: (ddoh94) update winrepo_source_dir document (refs: #45650)
    - da28f190d2 Merge pull request #45650 from rallytime/bp-45555
    - e474d0416b update winrepo_source_dir document

- **PR #45611**: (terminalmage) Fix unnecessary/incorrect usage of six.binary_type @ 2018-01-23 22:53:20 UTC
  - 799e240c7 Merge pull request #45611 from terminalmage/tests-log-level
  - 69a865c54 Fix unnecessary/incorrect usage of six.binary_type

- **PR #45652**: (rallytime) [2017.7] Merge forward from 2017.7.3 to 2017.7 @ 2018-01-23 22:45:22 UTC
  - 634d8bdc0 Merge pull request #45652 from rallytime/merge-2017.7
  - 4e9d7c8b4 Merge branch '2017.7.3' into '2017.7'

- **ISSUE #45627**: (bdrung) Failing unit tests in Debian package build (refs: #45630)

- **PR #45630**: (bdrung) Fix tests @ 2018-01-23 21:50:46 UTC
  - dbf8230 Merge pull request #45630 from bdrung/2017.7
  - 76d44e9490 Fix skipping test when boto is not installed
  - 2bbf262357 Fix unit.modules.test_cmdmod.CMDMODTestCase.test_run

- **PR #45619**: (garethgreenaway) [2017.7] Fixing test_mac_user_enable_auto_login @ 2018-01-23 21:56:03 UTC
  - 5d3c9d91e8 Merge pull request #45619 from garethgreenaway/2017_7_test_mac_user_enable_auto_login
  - f5b03e1e6c Fixing integration.modules.test_mac_user.MacUserModuleTest.test_mac_user_disable_auto_login

- **PR #45644**: (twangboy) Add missing space to deprecation warning @ 2018-01-23 21:55:11 UTC
  - 8a95fc4257 Merge pull request #45644 from twangboy/win_fix_dep_warns
- de9bc384cc Add missing space to deprecation warning
- **PR #45634**: (Ch3LL) Add different service name for Mac 10.13 test @ 2018-01-23 21:51:56 UTC
  - c290b6320b Merge pull request #45634 from Ch3LL/mac-service
  - 31b712e27d Add different service name for Mac 10.13 test
- **PR #45606**: (terminalmage) Fix bug affecting salt-ssh when root_dir differs from the default @ 2018-01-23 20:03:49 UTC
  - c28151f5f7 Merge pull request #45606 from terminalmage/salt-ssh-root-dir-fix
  - 3f9309521b Fix bug affecting salt-ssh when root_dir differs from the default
- **PR #45636**: (Ch3LL) Fix mac service and pkg tests for 10.13 @ 2018-01-23 18:44:56 UTC
  - 0931b6417d Merge pull request #45636 from Ch3LL/mac-tests
- **PR #45609**: (rallytime) [2017.7] Merge forward from 2017.7.3 to 2017.7 @ 2018-01-22 20:24:36 UTC
  - 63a294f498 Merge pull request #45609 from rallytime/merge-2017.7
  - a5fc3b3363 Merge branch '2017.7.3' into '2017.7'
- **ISSUE #45431**: (zer0def) boto3_route53.hosted_zone_present state can fail due to related execution module function's typo (refs: #45576)
- **PR #45576**: (zer0def) Fixed boto3_route53 execution module function signature diSassociate_vpc_from_hosted_zone typo. (refs #45431) @ 2018-01-22 19:37:13 UTC
  - 59329957ca Merge pull request #45576 from zer0def/boto3-route53-typo
  - 21e1e9e226 Fixed boto3_route53 execution module function signature diSassociate_vpc_from_hosted_zone typo. (refs #45431)
- **PR #45552**: (rallytime) [2017.7] Merge forward from 2017.7.3 to 2017.7 @ 2018-01-19 19:12:49 UTC
  - 42b0d27f71 Merge pull request #45552 from rallytime/merge-2017.7-from-.3
  - dba7410b80 Merge branch '2017.7.3' into '2017.7'
- **PR #45551**: (rallytime) [2017.7] Merge forward from 2016.11 to 2017.7 @ 2018-01-19 18:21:27 UTC
  - 879cfc8b89 Merge pull request #45551 from rallytime/merge-2017.7
  - e0ffa32b49 Merge branch '2016.11' into '2017.7'
  - 18e814a7bb Merge pull request #45540 from rallytime/merge-2016.11
    - 441f819b7b Merge branch '2016.11.9' into '2016.11'
    - 654df0f526 Merge pull request #45532 from gtmanfred/2016.11.9
      - 6c26025664 fix mock for opensuse
  - 4f3b9b57fa Merge pull request #45522 from rallytime/merge-2016.11
    - 36c038c92a Merge branch '2016.11.9' into '2016.11'
    - 571c33aa39 Merge pull request #45518 from gtmanfred/2016.11.9
      - 5455d2de66 fix centos 6 pip test
      - 40255194b0 fix fedora pkg test
  - 0638638h9 Merge pull request #45504 from rallytime/merge-2016.11
    - d72fc74e8c Merge branch '2016.11.9' into '2016.11'
- 4e0a0eec1f Merge pull request #45443 from rallytime/bp-45399-2016.11.9
- 919e92c911 Fix git.latest failure when rev is not the default branch
- eb4db6b8 Merge pull request #45493 from damon-atkins/2016.11_fix_sls_defintion_wrong_type
- af108440df win_pkg lint space after ,
- c6e922a236 win_pkg lint issues
- f4627d7a80 fix quote i.e. change ` to '
- 69384c099 pkg.refresh_db report an issue if a sls pkg definition id not a dict instead of aborting.

- 5a2a31bfff Merge pull request #45495 from vutny/doc-rhel-pygit2-compat
  * 0d79b9eaff [DOC] Suggest to upgrade pygit2 and deps
- 9c4fb42e5f Merge pull request #45481 from twangboy/fix_aptpkg
  * fd67b0864 Fix if statement in __init__()

- ISSUE #42626: (UtahDave) new args and kwargs options for publisher_acl are not documented at all and very little for external_auth (refs: #45389)
- PR #45389: (DmitryKuzmenko) Docs update for function args limit in pub acl. @ 2018-01-18 22:56:10 UTC
  - 28554ca935 Merge pull request #45389 from DSRCorporation/bugs/42626_pub_acl_doc
  - f33ebcada0 Doc note about user names regex matching in pub acl and eauth.
  - e29c0ff19e Docs update for function args limit in pub acl.
- PR #45483: (rallytime) [2017.7] Merge forward from 2016.11 to 2017.7 @ 2018-01-18 22:54:12 UTC
  - b3dc758ab0 Merge pull request #45483 from rallytime/merge-2017.7
  - de6d85959a Lint fix
  - 9f547a31f0 Merge branch '2016.11' into '2017.7'
    * b756760415 Merge pull request #45482 from rallytime/merge-2016.11
      * 3b38c77159 Merge branch '2016.11.9' into '2016.11'
      * 7322e9ba92 Merge pull request #45446 from rallytime/bp-45390
    * 96ae237d37 Merge pull request #45448 from rallytime/merge-2016.11.9
      * 646379d981 Merge branch '2016.11' into '2016.11.9'
  - 1ed323a3ee Merge pull request #45437 from terminalmage/fixedocstring
    * c11b16dc29 Fix incorrect wording in jboss7 docstrings
  * 600fa3993f Merge pull request #45390 from damon-atkins/2016.11_win_pkg_remove_final_fixes
    * 69f045ea24 lint too-many-blank-lines
    * 10a7501ede Update release notes
    * 6f2affe01c fix pkg.remove, pkg.list_pkgs
  * 057df444a4 Merge pull request #45399 from terminalmage/fixed-git.latest-depth
  * 0b6b677b7 Fix git.latest failure when rev is not the default branch
  * b0ece9f4d4 Merge pull request #45424 from twangboy/win_reg
* 30f0620f7 Fix some issues with reg.py

- **PR #45529**: (Ch3LL) Fix UnboundLocalError for pacman pkg installs @ 2018-01-18 19:01:49 UTC
  - 5e26282843 Merge pull request #45529 from Ch3LL/pacman-sources
  - e619d49ef3 Fix UnboundLocalError for pacman pkg installs

- **PR #45508**: (frogunder) fix test_archive test for mac on 2017.7 branch @ 2018-01-18 16:04:36 UTC
  - 840c97417d Merge pull request #45508 from frogunder/fixed_mac_archive_tests_2017.7_branch
  - cc606d626e fix test_archive test for mac on 2017.7 branch

- **PR #45444**: (rallytime) Back-port #45434 to 2017.7 @ 2018-01-17 17:17:59 UTC
  - **PR #45343**: (rrroo) Support expr_form for manage.up, manage.down (refs: #45444)
  - e1403b6813 Merge pull request #45444 from rallytime/bp-45434
  - c7d2081390 Support expr_form for manage.up, manage.down

- **PR #45465**: (terminalmage) Backport #45095 to 2017.7 branch @ 2018-01-17 15:13:05 UTC
  - **PR #45095**: (terminalmage) PY3: Make loader ignore .pyc files not in __pycache__ (refs: #45465)
  - 4b2c88e2e6 Merge pull request #45465 from terminalmage/bp-45095
  - 2f63a6dbf4 Optimization: don’t allocate a new list to concatenate
  - 507471130 EAFP
  - 85dbdc6a39 PY3: Make loader ignore .pyc files not in __pycache__

- **PR #45365**: (meaksh) Return an error when “gid_from_name” is set but group does not exist @ 2018-01-16 18:31:50 UTC
  - 5f58a87e84 Merge pull request #45365 from meaksh/2017.7-issue-45345
  - da23067f80 Refactor to prevent logical bug when gid is 0
  - 9fd980d5e9 Update documentation for 'gid_from_name' parameter
  - 52f9c06908 Fix integration tests for 'user.present' state.
  - e2c232dc6dc Make pylint happy
  - a18db0e0c11 Return error when gid_from_name and group does not exist.
  - ce8b1fbaf Ensure empty string gid is set to None

- **ISSUE #43535**: (Ch3LL) Add pkg.latest_version Test to Auto Test Suite (refs: #44822)

- **PR #44822**: (frogunder) add pkg_latest_version test @ 2018-01-16 14:16:54 UTC
  - de080983ed Merge pull request #44822 from frogunder/pkg_latestversion
  - 086440a290 skip if mac
  - dfb68f32d2 fix if statements and string
  - 3504083849 add pkg_latest_version test

- **ISSUE saltstack/salt-jenkins#603**: (rallytime) [oxygen] CentOS 7 is failing several boto tests with module import failures (refs: #45401)

- **PR #45435**: (rallytime) Back-port #45401 to 2017.7 @ 2018-01-14 12:43:48 UTC
  - **PR #45401**: (gtmanfred) fix boto import failures (refs: #45435)
  - cb3e0c8fb3 Merge pull request #45435 from rallytime/bp-45401
- b9761971c2 fix moto version
- 0cd95d1cc6 fix test boto imports
- **PR #45380**: (twangboy) Backport changes from #45308 @ 2018-01-11 19:45:21 UTC
  - **PR #45308**: (twangboy) Fix integration.modules.test_state for Windows (refs: #45380)
  - 2340f0b487 Merge pull request #45380 from twangboy/backport_45308
  - 419be8a9b5 Backport changes from #45308

### 32.2.74 Salt 2017.7.6 Release Notes

Version 2017.7.6 is a bugfix release for 2017.7.0.

#### Statistics

- **Total Merges**: 182
- **Total Issue References**: 60
- **Total PR References**: 217
- **Contributors**: 47 (Ch3LL, DmitryKuzmenko, GwiYeong, Quarky9, RichardW42, UtahDave, amaclean199, arif-ali, baniobloom, bdrung, benediktwermer, bmiguel-teixeira, cachedout, dafenko, damon-atkins, dwoz, ezh, folti, fpicot, frogunder, garethgreenaway, gtmanfred, isbm, jeroennijhof, jfindlay, jfoboss, kstreee, lomeroe, mattp-, meaksh, mirceaulinic, myinitialsarepm, mzbroch, nages13, paclat, pcjeff, pruiz, psyer, rallytime, soundt3ch, skizunov, smitty42, terminalmage, twangboy, vutny, yagnik, yannj-fr)

#### Tornado 5.0 Support for Python 2 Only

Tornado 5.0 moves to using asyncio for all python3 versions. Because of this and changes in asyncio between python 3.4 and 3.5 to only be able to use one ioloop, which requires some rearchitecting, support for tornado 5.0 and python3 versions of salt has been delayed to a later release.

For now, to use tornado 5.0, the python 2 version of salt must be used.

#### Tornado 5.0 Support for Python 2 Only

Tornado 5.0 moves to using asyncio for all python3 versions. Because of this and changes in asyncio between python 3.4 and 3.5 to only be able to use one ioloop, which requires some rearchitecting, support for tornado 5.0 and python3 versions of salt has been delayed to a later release.

For now, to use tornado 5.0, the python 2 version of salt must be used.
Option to Return to Previous Pillar Include Behavior

Prior to version 2017.7.3, keys from pillar includes would be merged on top of the pillar SLS. Since 2017.7.3, the includes are merged together and then the pillar SLS is merged on top of that.

The pillar_includes_override_sls option has been added allow users to switch back to the pre-2017.7.3 behavior.

Changelog for v2017.7.5..v2017.7.6

Generated at: 2018-05-29 14:05:53 UTC

- PR #47775: (gtmanfred) catch UnsupportedOperation with AssertionError @ 2018-05-22 19:04:13 UTC
  - edf94c915e Merge pull request #47775 from gtmanfred/2017.7.6
  - 548f65d056 catch UnsupportedOperation with AssertionError
- PR #47769: (gtmanfred) skip test that breaks test suite @ 2018-05-22 15:12:54 UTC
  - 8c38ec7d7f Merge pull request #47769 from gtmanfred/2017.7.6
  - 3dfc0f8a82 skip test that breaks test suite
- PR #47747: (Ch3LL) Add changelog to 2017.7.6 release notes @ 2018-05-21 14:25:00 UTC
  - 0d5b473e62 Merge pull request #47747 from Ch3LL/rn_2017.7.6
  - d4a83b92d Add changelog to 2017.7.6 release notes
- ISSUE #47484: (whytewolf) Windows: pkg.latest state not updating packages. (refs: #47702)
- PR #47702: (damon-atkins) State pkg.latest called win pkg.install with list of pkgs and the required versions @ 2018-05-19 11:21:23 UTC
  - 8a5b34f7d9 Merge pull request #47702 from damon-atkins/2017.7.6
  - adcc094e08 Merge branch '2017.7.6' into 2017.7.6_fix_pkg.latest_state
- PR #47700: (yannj-fr) fix roots modification time check @ 2018-05-18 18:42:17 UTC
  - 6d10c192d9 Merge pull request #47700 from yannj-fr/2017.7.6
  - 961c2f61e fix roots modification time check
  - 2a73e905df Merge branch '2017.7.6' into 2017.7.6
- PR #47632: (gtmanfred) handle new _create_stream in tornado 5.0 @ 2018-05-18 14:25:17 UTC
  - 266749420f Merge pull request #47632 from gtmanfred/2017.7.6
  - 4c50c0d2f5 fix pylint
  - 4a29057b16 Fix last test for tornado
  - 550e2e2727 allow using tornado 5.0
  - 62e4e68448b handle new _create_stream in tornado 5.0
- PR #47720: (rallytime) Back-port #47692 to 2017.7.6 @ 2018-05-18 13:23:03 UTC
  - PR #47692: (dwoz) Default windows to m1.small for ec2-classic (refs: #47720)
  - 2643c356a6 Merge pull request #47720 from rallytime/bp-47692-2017.7.6
  - 6e5cb3683e5 Default windows to m1.small for ec2-classic
  - 20d9785244 fix roots modification time check
- aef37dd1ce fix roots modification time check
- d51662e053 Ensure targeted_pkgs always contains value for non-windows.
- 83b4224cf8 Adjusted based on feedback.
- 12f983ce9f Whitespace lint issues
- 075d3d3c49 pkg.install execution module on windows ensures the software package is installed when no version is specified, it does not upgrade the software to the latest. This is per the design. pkg.latest must provide the versions to install to pkg.install

- PR #47667: (Ch3LL) Update test_mac_user_enable_auto_login to test both py2 and py3 @ 2018-05-16 15:54:49 UTC
  - 16c2153385 Merge pull request #47667 from Ch3LL/mac_user_enable
  - ba40d3d1a1 Update test_mac_user_enable_auto_login to test both py2 and py3

- PR #47645: (Ch3LL) query the pip path for test test_issue_2087_missing_pip @ 2018-05-15 17:16:10 UTC
  - a4921e86c9 Merge pull request #47645 from Ch3LL/py3_rm_pip
  - 225d90ad4c query the pip path for test test_issue_2087_missing_pip

- PR #47646: (rallytime) Back-port #47601 and #47643 to 2017.7.6 @ 2018-05-15 14:04:45 UTC
  - PR #47643: (dwoz) Remove unwanted file (refs: #47646)
  - PR #47601: (dwoz) Skip tests when we can not use runas (refs: #47646)
  - e441733ac1 Merge pull request #47646 from rallytime/bp-47601-and-47643
  - 9e1d1a5ef8 Fix typo
  - 4e3677f11f Remove unwanted file
  - 0109249c78 use ignore-undefined-variable
  - 37caeb7f4 Ignore pylint WindowsError
  - c1135d90c7 Better doc string
  - e55d6b9ed9 Skip tests when we can not use runas

- PR #47570: (gtmanfred) Update dependency to msgpack @ 2018-05-10 13:23:09 UTC
  - 6f178ca908 Merge pull request #47570 from gtmanfred/2017.7.6
  - 84a034e03 Update dependency to msgpack

- PR #47523: (rallytime) [2017.7.6] Update man pages @ 2018-05-05 13:31:19 UTC
  - 98bd598701 Merge pull request #47523 from rallytime/man-pages
  - 48ecb78dec [2017.7.6] Update man pages

- ISSUE #47443: (skylerberg) Input validation does not raise SaltInvocationError in win_dsc.py (refs: #47505)

- PR #47517: (rallytime) Back-port #47505 to 2017.7.6 @ 2018-05-07 19:42:37 UTC
  - PR #47505: (dwoz) Raise proper invocation errors (refs: #47517)
  - e608ea9617 Merge pull request #47517 from rallytime/bp-47505-2017.7.6
  - 0734578533 Raise proper invocation errors

- PR #47476: (gtmanfred) Specify the cache directory for newer virtualenv modules @ 2018-05-04 19:20:45 UTC
  - 611ca1fc03 Merge pull request #47476 from gtmanfred/2017.7
- 1f91a85587 specify cache dir for pip install
- 99e150e09c check for kitchen-vagrant gem before loading windows tests

- **PR #47412**: (twangboy) Fix issue where the cwd was being removed @ 2018-05-04 17:28:11 UTC
  - 7c3f2c56da Merge pull request #47412 from twangboy/fix_47125
  - c9bab0b8e3 Merge branch '2017.7' into fix_47125
  - 2600e404d5 Fix overly long line
  - 5c8db05769 Fix issue where the cwd was being removed

- **PR #47467**: (twangboy) Remove unused settings, update NSIS @ 2018-05-04 17:11:37 UTC
  - 4846e957c4 Merge pull request #47467 from twangboy/cleanup_settings
  - 9d498293b1 Remove unused settings, update NSIS

- **PR #47196**: (twangboy) Fix issues with pip @ 2018-05-04 14:23:04 UTC
  - da9871d36b Merge pull request #47196 from twangboy/fix_47024
  - 14ee5537b9 Add @with_tempdir helper
  - 6c3b5a6fa Fix typo
  - f0317f0a2 Merge branch '2017.7' into fix_47024
  - 7c46d9d0d4 Fix integration.modules.test_pip
  - 22ac81df63 Fix integration.modules.test_pip
  - 57d98224d4 Merge pull request #9 from terminalmage/twangboy/fix_47024
    * 37a13d8004 Update pip unit tests to reflect changes
    * 7f86779be0 Lint fix
  - c48d6f4f61 DRY and other fixes in pip module
  - b1117f96a0 Change from global variable to __context__
  - 3e6e524eca Fix some tests`
  - c94f0f20e4 Fix lint error
  - fd47b21530 Fix merge conflict

- **PR #47455**: (Ch3LL) Add In Progress Warning for 2017.7.6 Release Notes @ 2018-05-04 13:44:54 UTC
  - e84524bab Merge pull request #47455 from Ch3LL/unreleased_rn
  - b6d0cc2ab7 Add In Progress Warning for 2017.7.6 Release Notes

- **PR #47459**: (gtmanfred) update ubuntu-rolling to 18.04 @ 2018-05-03 20:39:20 UTC
  - 2c7a4b6179 Merge pull request #47459 from gtmanfred/2017.7
  - d228e72477 update ubuntu-rolling to 18.04

- **PR #47462**: (terminalmage) Fix docs build on Sphinx 1.7+ @ 2018-05-03 20:06:57 UTC
  - 64a64c0ed7 Merge pull request #47462 from terminalmage/docs
  - 6d7803e0e0 Fix docs build on Sphinx 1.7+

- **ISSUE #47436**: (lomeroe) Some Administrative Template policies are not properly set by lgpo (refs: #47438)

- **ISSUE #44516**: (doesitblend) Windows PY3 Minion Returns UTF16 UnicodeError (refs: #44944)
• PR #47438: (lomeroe) lgpo fix for issue #47436 @ 2018-05-03 14:40:27 UTC
  - PR #44944: (lomeroe) win_lgpo registry.pol encoding updates (refs: #46913, #47438)
  - 6cd0d31c03 Merge pull request #47438 from lomeroe/double ADMX Test
  - 4902f1e2ba check if a policy has either an enabled value or enabled list entry or a disabled value or
disabled list entry when determining the state of the policy

• ISSUE #45790: (bdarnell) Test with Tornado 5.0b1 (refs: #47106, #47433)

• PR #47433: (s0undt3ch) Add missing requirements files not committed in #47106 @ 2018-05-02 20:57:14 UTC
  - PR #47106: (DmitryKuzmenko) Tornado50 compatibility fixes (refs: #47433)
  - ed69821d19 Merge pull request #47433 from s0undt3ch/2017.7
  - 5abdf25d6 Add missing requirements files not committed in #47106

• ISSUE #47424: (bcharron) "salt-cloud -m" fails with nova driver: ”There was a query error: u'state" (refs:
  #47429)

• PR #47429: (gtmanfred) server_list_min should use state, not status @ 2018-05-02 16:27:56 UTC
  - 7ae3497b0c Merge pull request #47429 from gtmanfred/2017.7
  - 8ae32033cc server_list_min should use state, not status

• PR #47399: (isbm) zeromq 17 deprecation warning backport from 2018.3 + tornado 5 fixes @ 2018-05-02 15:11:16
  UTC
  - 2f5fc4ec5 Merge pull request #47399 from isbm/isbm-zeromq17-deprecationwarning-2017.7.2-v2
  - a36e49fd27 fix pylint
  - 98b5629b36 Fix imports
  - d94c0f0152 Remove unnecessary variable
  - 8e377b5653 Lintfix: E0203 and attribute access
  - 2ab70b1b8 Install ZMQ handler if <15 version
  - 296c589f4b Use ZMQ switch utility in the integration tests
  - ab5fa3d7c Use ZMQ_VERSION_INFO constant everywhere
  - 43b5558b82 Add trace logging on ZMQ sockets communication
  - 164204a9fe Remove duplicate code for ZMQ monitor handling
  - 834b1e4ff0 Remove obsolete ZMQIOLoop direct instance
  - 1c90cbdb3c Remove an empty line
  - ef2e0acd6 Add logging on ZMQ socket exception
  - 38ceed371d Lintfix: ident
  - 1ecea6f5f2 Lintfix: line too long
  - e6e50c0b44 Remove code duplicate by reusing utilities functions
  - 57da54b676 Fix imports
  - 948368e9a1 Add libzmq version info builder
  - 0b4a17b859 Update log exception message
  - 116e1809fc Put a message alongside the exception to the logs

32.2. Previous releases

5443
- 4bc43124b7 Remove unnecessary ZMQ import and check for its presence
- 05f4d40269 Use utility for ZMQ import handling in SSH client
- 457ef7d9a5 Use utility for ZMQ import handling in flo/zero
- 08dee65bd Use utility for ZMQ import handling
- e2a353c6b0 Remove unnecessary ZMQ extra-check for cache utils
- c8f2cc271d Remove unnecessary ZMQ extra-check for master utils
- 3940667bb9 Remove old ZMQ import handling
- f34a53e029 Use ZMQ utility for version check
- cbb26deb28 Use ZMQ installer for master
- 453e83210a Add ZMQ version build
- a9601e21d Use ZMQ importer utility in async
- d50b2b2023 Incorporate tornado-5 fixes
- 1fd9af6655 Add ZMQ backward-compatibility tornado installer for older versions
- ad4b0415c Add one place for handling various ZMQ versions and IOLoop classes

• **PR #47343:** *(Ch3LL)* Add additional service module integration tests and enable for windows @ 2018-05-02 13:39:46 UTC
  - b14e974b5f Merge pull request #47343 from Ch3LL/win_srv_test
  - 2173b6f549 ensure we are enabling/disabling before test
  - d58be6751 Add additional service module integration tests and enable for windows

• **PR #47375:** *(terminalmage)* Warn on use of virtual packages in pkg.installed state @ 2018-05-01 21:12:18 UTC
  - b0f3bb571f Merge pull request #47375 from terminalmage/issue47310
  - fa2baa52bb Remove extra blank line to appease linter
  - f8ab2be81c Add debug logging if we fail to detect virtual packages
  - 67c4f656ac Warn on use of virtual packages in pkg.installed state

• **PR #47415:** *(kstreee)* Fixes a bug of rest_tornado's 'local' client, complement fix of #46326 @ 2018-05-01 21:11:25 UTC
  - PR #47200: *(kstreee)* Resolve a conflict with syndic timeout and bug fixes of the local client in rest_tornado (refs: #47415)
  - PR #47123: *(rallytime)* [develop] Merge forward from 2018.3 to develop (refs: #47200)
  - PR #47110: *(kstreee)* Fixes misusing of the timeout option. (refs: #47200)
  - PR #46692: *(mattp-)* saltndo bugfixes for ldap & syndics (refs: #47123, #47200)
  - PR #46326: *(kstreee)* Fixes a timing bug of saltndo's client local. (refs: #47110, #47123, #47200, #47415)
  - PR #45874: *(GwiYeong)* fix for local client timeout bug (refs: #46326)
  - 56235032f4 Merge pull request #47415 from kstreee/fix-local-client-tgt-bug
  - b8d37e0a1e To add a test case for the syndic environment, copies the test case which was written by @mattp- that was already merged into develop branch, related pr is #46692.
  - 4627bad1ff Realizes 'tgt' field into actual minions using ckminions to subscribe results of the minions before publishing a payload.
- PR #47286: (baniobloom) fixed vpc_peering_connection_name option @ 2018-05-01 19:02:10 UTC
  - d65ceae03 Merge pull request #47286 from baniobloom/vpc_peering_connection_name_fix
  - a968965087 Merge branch '2017.7' into vpc_peering_connection_name_fix
- PR #47270: (meaksh) Fix minion scheduler to return 'retcode' from executed functions @ 2018-04-30 18:21:55 UTC
  - 8a5d4437bb Merge pull request #47270 from meaksh/2017.7-fix-retcode-on-schedule-utils
  - d299cf3385 Merge branch '2017.7' into 2017.7-fix-retcode-on-schedule-utils
  - b6da600ff Initialize __context__ retcode for functions handled via schedule util module
- ISSUE #47264: (jf) doc: https://docs.saltproject.io/en/latest/ref/modules/all/salt.modules.grains.html#salt.modules.grains.delval of pass/or pass/ (refs: #47371)
- PR #47371: (rallytime) Fix "of pass" typo in grains.delval docs: change to "or pass" @ 2018-04-30 18:18:46 UTC
  - 5b51075384 Merge pull request #47371 from rallytime/fix-47264
  - a43485b49c Fix "of pass" typo in grains.delval docs: change to "or pass"
- PR #47389: (dwoz) Older GitPython versions will not have close @ 2018-04-29 16:42:06 UTC
  - a86e53be66 Merge pull request #47389 from dwoz/moregittestfix
  - 67745c1362 Older GitPython versions will not have close
- PR #47388: (dwoz) Fix missing import @ 2018-04-28 18:33:14 UTC
  - a5367eaf63 Merge pull request #47388 from dwoz/test_pip_fix
  - eb26321e8b Fix missing import
- PR #47380: (gtmanfred) add io_loop handling to runtests engine @ 2018-04-28 17:25:28 UTC
  - 9b59b991c2 Merge pull request #47380 from gtmanfred/2017.7
  - 93d1445ec1 add io_loop handling to runtests engine
- PR #47384: (dwoz) Fix py2 version of pip test @ 2018-04-28 15:13:28 UTC
  - 37822c0ebb Merge pull request #47384 from dwoz/test_pip_fix
  - a37a9da1fb Fix py2 version of pip test
- PR #47382: (dwoz) Close the repo and fix multiple tests @ 2018-04-28 15:09:17 UTC
  - eef96732e Merge pull request #47382 from dwoz/gitfs_tests
  - 1570708fac Close the repo and fix multiple tests
- PR #47369: (terminalmage) Return an empty dict if no search_order in ldap ext_pillar config file @ 2018-04-27 20:58:52 UTC
  - 57c75ff660 Merge pull request #47369 from terminalmage/ldap_pillar
  - 085883ae2d Return an empty dict if no search_order in ldap ext_pillar config file
- PR #47363: (DmitryKuzmenko) Tornado5.0: Future.exc_info is dropped @ 2018-04-27 18:30:18 UTC
  - bcc66dd9bf Merge pull request #47363 from DSRCorporation/bugs/replace_exc_info_with_exception
  - 3fb7b93a23c Tornado5.0: Future.exc_info is dropped
- PR #47334: (terminalmage) pillar_ldap: Fix cryptic errors when config file fails to load @ 2018-04-27 17:53:51 UTC
- bcef3f7e1 Merge pull request #47334 from terminalmage/ldap_pillar
- 0175a8687c pillar_ldap: Fix cryptic errors when config file fails to load
- 65c3ba7ff1 Remove useless documentation
- 5d67cb27de Remove unnecessary commented line

- PR #47347: (dwoz) Proper fix for mysql tests @ 2018-04-27 17:27:53 UTC
  - 31db8ca7ad Merge pull request #47347 from dwoz/test_mysql_fix_again
  - add78b618 Fix linter warnings
  - 2644cc7553 Fix linter nits
  - 7996c0118d Proper fix for mysql tests

- PR #47359: (gtmanfred) add mention of the formulas channel to the formulas docs @ 2018-04-27 16:56:13 UTC
  - e573236848 Merge pull request #47359 from gtmanfred/2017.7
  - 6214ed8133 add mention of the formulas channel to the formulas docs

- PR #47317: (dwoz) Do not join a thread that is stopped @ 2018-04-27 13:15:09 UTC
  - PR #47279: (dwoz) Gracefully shutdown worker threads (refs: #47317)
  - 629503b2a8 Merge pull request #47317 from dwoz/threadshutdown
  - 6db2a0e4d3 Log exceptions at exception level
  - d4ae787595 Do not join a thread that is stopped

- PR #47304: (cachedout) Pass timeout to salt CLI for tests @ 2018-04-27 13:11:58 UTC
  - aacd5cefe3 Merge pull request #47304 from cachedout/test_cli_timeout_arg
  - 85025af83c Pass timeout to salt CLI for tests

- PR #47311: (Ch3LL) Add firewall execution modules tests for windows @ 2018-04-27 13:10:54 UTC
  - 5553f6b659 Merge pull request #47311 from Ch3LL/firewall_windows
  - 4e16c18c16 Add firewall module windows tests to whitelist
  - 4b2fc4ec66 Add windows firewall execution modules integration tests

- PR #47348: (dwoz) Ignore gifs tests when symlinks not enabled @ 2018-04-27 13:08:27 UTC
  - 1667375a80 Merge pull request #47348 from dwoz/no_symlinks
  - 94a70e847a Ignore gifs tests when symlinks not enabled

- PR #47342: (dwoz) Fix mysql test cases @ 2018-04-27 00:50:53 UTC
  - dac04261b5 Merge pull request #47342 from dwoz/test_mysql_fix
  - 7496f4c5a8 Fix mysql test cases

- PR #47341: (dwoz) Fix python 3 support for inet_pton function @ 2018-04-26 23:35:45 UTC
  - 34e78f564 Merge pull request #47341 from dwoz/inet_pton_fix
  - 85451f48d4 Fix python 3 support for inet_pton function

- PR #47339: (dwoz) Use salt.utils.fopen for line ending consistency @ 2018-04-26 22:39:56 UTC
  - e47793246 Merge pull request #47339 from dwoz/ssh_key_test_fix
  - e37a93a1ca Remove redundant close call
- b2ae5889b7 Close the temporary file handle
- 9f7f83a975 Use salt.utils.fopen for line ending consistency

- **PR #47335:** (dwoz) Remove un-needed string-escape @ 2018-04-26 21:49:27 UTC
  - b21860151 Merge pull request #47335 from dwoz/pip_test_fix
  - dc6a22c00 Remove un-needed string-escape

- **PR #47331:** (dwoz) Do not encode usernames @ 2018-04-26 19:57:28 UTC
  - 1c527bdf3a Merge pull request #47331 from dwoz/py3_wingroup_fix
  - cc154ef857 Do not encode usernames

- **PR #47329:** (cachedout) Credit Frank Spierings @ 2018-04-26 16:37:59 UTC
  - 708078b152 Merge pull request #47329 from cachedout/frank_credit
  - 33c0644ac4 Credit Frank Spierings

- **PR #47281:** (Ch3LL) Add win_system integration module tests @ 2018-04-26 16:07:41 UTC
  - a545e55543 Merge pull request #47281 from Ch3LL/system_test
  - c9181a75a6 Add destructivetest decorator on tests
  - 0d0c8987fc Add win_system integration module tests

- **PR #47283:** (Ch3LL) Add windows ntp integration module tests @ 2018-04-26 16:04:44 UTC
  - b64d930df0 Merge pull request #47283 from Ch3LL/ntp_test
  - ced7f86546 Add windows ntp integration module tests

- **PR #47314:** (Ch3LL) Skip netstat test on macosx as its not supported @ 2018-04-26 16:00:37 UTC
  - 910aff910f Merge pull request #47314 from Ch3LL/net_mac_test
  - 67beb1451c Skip netstat test on macosx as its not supported

- **PR #47307:** (rallytime) Back-port #47257 to 2017.7 @ 2018-04-26 15:16:23 UTC
  - PR #47257: (jeroennijhof) Role is not a list but a dictionary (refs: #47307)
  - 0549ef7c16 Merge pull request #47307 from rallytime/bp-47257
  - 6c5b2f92bc Role is not a list but a dictionary

- **PR #47312:** (rallytime) Update bootstrap script to latest release: 2018.04.25 @ 2018-04-26 15:15:13 UTC
  - d6ff4689f6 Merge pull request #47312 from rallytime/update-bootstrap-release
  - 765ce06a42 Update bootstrap script to latest release: 2018.04.25

- **PR #47279:** (dwoz) Gracefully shutdown worker threads (refs: #47317) @ 2018-04-25 21:15:43 UTC
  - e0765f5719 Merge pull request #47279 from dwoz/py3_build_fix
  - 21dc1bab91 Pep-8 line endings
  - 71abedaf7 Fix comman wart
  - 4100dcd64c Close might get called more than once
  - dbe671f943 Stop socket before queue on delete
  - 9587f5c69e Silence pylint import-error for six.moves
  - 4b0c7d3b34 Fix typo
- 05adf7c2b1 Use six.moves for queue import
- fe340778fa Gracefully shutdown worker threads

- **PR #47113**: (jfindlay) Support proto for IPSec policy extension in iptables state @ 2018-04-25 18:01:19 UTC
  - 44f19b2f94 Merge pull request #47113 from jfindlay/iptables_state
  - 8bd0801ee modules,states.iptables support proto for policy ext

- **PR #47302**: (Ch3LL) Remove unnecessary code from core grains and add test @ 2018-04-25 17:58:48 UTC
  - b7a6206330 Merge pull request #47302 from Ch3LL/dead_code
  - daa68b4877 Add virtual grains test for core grains
  - a59dd2785d Remove dead code in core grains file for virt-what

- **PR #47303**: (baniobloom) Added clarity on oldest supported main release branch @ 2018-04-25 17:52:39 UTC
  - e29362acfc Merge pull request #47303 from baniobloom/bug_fix_doc
  - b97c9df5f3 added clarity on how to figure out what is the oldest supported main release branch

- **ISSUE #45790**: (bdarnell) Test with Tornado 5.0b1 (refs: #47106, #47433)

- **ISSUE #47258**: (drewmat) service state no longer working after kernel upgrade (refs: #47271)

- **PR #47271**: (gtmanfred) load rh_service for amazon linux not booted with systemd @ 2018-04-25 14:47:06 UTC
  - 2e014f4746 Merge pull request #47271 from gtmanfred/amazon
  - 8a53908908 Do not load rh_service module when booted with systemd
  - e4d1d5bf11 Revert "support amazon linux 2 for service module"

- **ISSUE #44847**: (malbertus) netconfig.managed state.apply unexpected behaviour of test & debug variables (refs: #47246)

- **ISSUE #47285**: (drewmat) service state no longer working after kernel upgrade (refs: #47271)

- **PR #47106**: (DmitryKuzmenko) Tornado50 compatibility fixes (refs: #47433) @ 2018-04-25 15:32:37 UTC
  - 0d9d55e013 Merge pull request #47106 from DSRCorporation/bugs/tornado50
  - 39e403b18d Merge branch '2017.7' into bugs/tornado50
  - 6706b3a2d1 Run off of a temporary config
  - d6873800d5 Allow running pytest>=3.5.0
  - 2da3983740 Tornado 5.0 compatibility fixes

- **ISSUE #47258**: (drewmat) service state no longer working after kernel upgrade (refs: #47271)

- **PR #47271**: (gtmanfred) load rh_service for amazon linux not booted with systemd @ 2018-04-25 14:47:06 UTC
  - 2e014f4746 Merge pull request #47271 from gtmanfred/amazon
  - 8a53908908 Do not load rh_service module when booted with systemd
  - e4d1d5bf11 Revert "support amazon linux 2 for service module"

- **ISSUE #44847**: (malbertus) netconfig.managed state.apply unexpected behaviour of test & debug variables (refs: #47246)

- **PR #47246**: (mirceaaulinic) Attempting to fix #44847: allow a different way to get the test and debug flags into the netconfig state @ 2018-04-25 14:44:02 UTC
  - 599b0ed1e9 Merge pull request #47246 from cloudflare/fix-44847-2017.7
  - ad80028104 This way, we can pass flags such as debug into the state, but also test.

- **PR #47220**: (benediktwerner) Fix pip.installed when no changes occurred with pip >= 1.0.0 @ 2018-04-25 14:23:50 UTC
  - **PR #47207**: (benediktwerner) Fix pip_state with pip3 if no changes occurred (refs: #47220)
  - **PR #47102**: (gtmanfred) don't allow using no_use_wheel for pip 10.0.0 or newer (refs: #47220)
  - 4e2ef0719 Merge pull request #47220 from benediktwerner/fixed-pip-2017.7
  - 0197c3e973 Fix pip test
  - 34bf66c09f Fix pip.installed with pip>=10.0.0
• **PR #47272**: (rallytime) Add windows tests and reg module/state to CODEOWNERS file for team-windows @ 2018-04-25 13:25:29 UTC
  - 92e606251f Merge pull request #47272 from rallytime/reg-windows-codeowners
  - 9445af0185 Add windows tests and reg module/state to CODEOWNERS file for team-windows
    - 8de3d41adb fixed vpc_peering_connection_name option

• **PR #47252**: (rallytime) Fix the matching patterns in the CODEOWNERS file to use fnmatch patterns @ 2018-04-24 14:10:42 UTC
  - 9dca5c0221 Merge pull request #47252 from rallytime/codeowners-fixes
  - 204b6a923 Fix the matching patterns in the CODEOWNERS file to use fnmatch patterns

• **ISSUE #47173**: (fpicot) pkg.installed ignores normalize parameter (refs: #47177)

• **PR #47177**: (fpicot) fix normalize parameter in pkg.installed @ 2018-04-24 13:37:54 UTC
  - 3de1bb49c8 Merge pull request #47177 from fpicot/fix_47173_pkg normalize
  - 149f846f34 fix normalize parameter in pkg.installed

• **PR #47251**: (Ch3LL) Update Docs to remove unnecessary + sign @ 2018-04-23 19:37:04 UTC
  - 10e30515dc Merge pull request #47251 from Ch3LL/pub_fix_rn
  - fa4c2e6575 Update Docs to remove unnecessary + sign

• **PR #47249**: (Ch3LL) Add CVE number to 2016.3.6 Release @ 2018-04-23 19:05:42 UTC
  - bb7850a431 Merge pull request #47249 from Ch3LL/pub_fix_rn
  - 24dea24b7e Add CVE number to 2016.3.6 Release

• **ISSUE #47225**: (pruiz) zfs.filesystem_present takes forever on a dataset with lots (10k+) of snapshots (refs: #47226, #47227)

• **PR #47227**: (pruiz) Fix issue #47225: avoid zfs.filesystem_present slowdown when dataset has lots of snapshots (2017.7 branch) @ 2018-04-20 15:41:06 UTC
  - 5693e0b02 Merge pull request #47227 from pruiz/pruiz/zfs-dataset-present-slow-2017.7
  - fded61f19b Fix issue #47225: avoid zfs.filesystem_present slowdown when dataset has lots of snapshots

• **PR #47167**: (smitty42) Adding updates for python3 compatibility and new virtualbox SDK version... @ 2018-04-23 13:20:42 UTC
  - 9825065048 Merge pull request #47167 from smitty42/vbox-skd-fix
  - 5de5319cd Merge branch '2017.7' into vbox-skd-fix

• **PR #47213**: (dwoz) Fix coverage on py3 windows builds @ 2018-04-20 22:09:57 UTC
  - 976f031170 Merge pull request #47213 from dwoz/py3win
  - ad9c7f63f0 Fix coverate on py3 windows builds
  - 91252bac95 Adding updates for python3 compatibility and new virtualbox SDK version support.

• **PR #47197**: (dwoz) Move process target to top level module namespace @ 2018-04-20 15:41:06 UTC
  - cebcd6d069 Merge pull request #47197 from dwoz/testfix
  - 25803c9176 Move process target to top level module namespace
Chapter 32. Release notes

- **PR #47193**: (Ch3LL) Add network module integration tests @ 2018-04-20 13:37:19 UTC
  - d4269c2b70 Merge pull request #47193 from Ch3LL/network_test
  - bbff987c19 Add network module integration tests

- **PR #47189**: (Ch3LL) Add autoruns.list integration test for Windows @ 2018-04-19 21:16:34 UTC
  - c77248a78 Merge pull request #47189 from Ch3LL/autoruns
  - 6a88bedb7a Add autoruns to windows whitelist
  - e9e4d4af70 Add autoruns.list integration test for Windows

- **PR #47184**: (Ch3LL) Add status module integration modules tests for Windows @ 2018-04-19 19:38:56 UTC
  - 65f344e371 Merge pull request #47184 from Ch3LL/status_test
  - 25a84428b8 Add status module integration modules tests for Windows

- **PR #47163**: (rallytime) Updage jenkins module autodocs to use jenkinsmod name instead @ 2018-04-19 19:35:00 UTC
  - PR #46801: (yagnik) rename jenkins to jenkinsmod (refs: #46900, #47163)
  - 965600ad6c Merge pull request #47163 from rallytime/jenkins-autodoc
  - 0039395017 Updage jenkins module autodocs to use jenkinsmod name instead

- **PR #47185**: (twangboy) Add additional integration tests to whitelist @ 2018-04-19 18:20:25 UTC
  - 0a43dde5fc Merge pull request #47185 from twangboy/add_tests
  - 345daa0423 Add additional integration tests to whitelist

- **PR #47172**: (dwoz) Allow non admin name based runs on windows @ 2018-04-19 17:26:42 UTC
  - 1a606bb9a4 Merge pull request #47172 from dwoz/cover_without_admin
  - cad759727 Use warnings to warn user
  - 144c68e214 Allow non admin name based runs on windows

- **PR #47110**: (kstreee) Fixes misusing of the timeout option. (refs: #47200) @ 2018-04-18 17:16:20 UTC
  - PR #46326: (kstreee) Fixes a timing bug of saltnado's client local. (refs: #47110, #47123, #47200, #47415)
  - PR #45874: (GwiYeong) fix for local client timeout bug (refs: #46326)
  - d5997d2301 Merge pull request #47110 from kstreee/fix-misusing-of-timeout
  - 0624aee0ed Fixes misusing of the timeout option.

- **ISSUE #40948**: (ScoreUnder) salt-call falsely reports a master as down if it does not have PKI directories created (refs: #40961)

- **PR #40961**: (terminalmage) Make error more explicit when PKI dir not present for salt-call @ 2018-04-18 16:08:17 UTC
  - 87ca2b4003 Merge pull request #40961 from terminalmage/issue40948
  - 6ba66cca41 Fix incorrect logic in exception check
  - fed5041c5f Make error more specific to aid in troubleshooting
  - 8c67ab53b4 Fix path in log message
  - 31984a8b19 Make error more explicit when PKI dir not present for salt-call

- **PR #47134**: (Ch3LL) Add user integration tests for windows OS @ 2018-04-18 14:29:40 UTC
- f5e63584d4 Merge pull request #47134 from Ch3LL/user_win_test
- e7c9bc4038 Add user integration tests for windows OS

- PR #47131: (gtmanfred) add __cli opts variable for master processes @ 2018-04-17 21:33:57 UTC
  - da26a3fac Merge pull request #47131 from gtmanfred/cli
  - 1b1c29b62 Add __cli for master processes

- ISSUE #47116: (pcjeff) pip 10.0.0 can not import pip.req (refs: #47121)

- PR #47129: (rallytime) Back-port #47121 to 2017.7 @ 2018-04-17 20:45:11 UTC
  - PR #47121: (pcjeff) fix pip import error in pip 10.0.0 (refs: #47129)
  - 9b8e6ff8c Merge pull request #47129 from rallytime/bp-47121
  - 11da526b21 add ImportError
  - bd0c23396c fix pip.req import error in pip 10.0.0

- PR #47102: (gtmanfred) don't allow using no_use_wheel for pip 10.0.0 or newer (refs: #47220) @ 2018-04-17 20:44:58 UTC
  - eb5ace51a48 Merge pull request #47102 from gtmanfred/2017.7
  - 3dc9b310b fix tests
  - 8497e08f8e fix pip module for 10.0.0
  - 4c07a3d1e9 fix other tests
  - b71e3d8a04 don't allow using no_use_wheel for pip 10.0.0 or newer

- PR #47037: (twangboy) Fix build_env scripts @ 2018-04-17 18:54:17 UTC
  - c1dc42e67e Merge pull request #47037 from twangboy/fix_dev_scripts
  - 990a24d7ed Fix build_env scripts

- PR #47068: (cachedout) Catch an operation on a closed socket in a test @ 2018-04-16 19:56:03 UTC
  - 03892ea90b Merge pull request #47068 from cachedout/catch_value_error_socket_test
  - 7db5625632 Catch an operation on a closed socket in a test

- PR #47065: (dwoz) Jinja test fix @ 2018-04-16 16:16:42 UTC
  - 1ea2885ec2 Merge pull request #47065 from dwoz/jinja_test_fix
  - 673cd31c65 Merge branch '2017.7' into jinja_test_fix

- PR #47077: (dwoz) Fix failing state test by normalizing line endings @ 2018-04-16 15:48:39 UTC
  - 5293b5b5ca Merge pull request #47077 from dwoz/test_state_fix
  - 444da3f893 Fix py3 wart (chr vs bytesstring)
  - e8acc901c2 Fix failing state test by normalizing line endings

- ISSUE #46538: (HenriWahl) salt-cloud gives "FutureWarning: The behavior of this method will change in future versions." (refs: #47067)
- **PR #47067**: (gtmanfred) use the recommended opennebula lookup method @ 2018-04-16 15:48:15 UTC
  - ca967de5da Merge pull request #47067 from gtmanfred/2017.7
  - f913a7859c use the recommended opennebula lookup method
- **PR #47064**: (dwoz) Fix fileserver roots tests @ 2018-04-14 21:30:23 UTC
  - 7fddad6cd9 Merge pull request #47064 from dwoz/roots_tests_fix
  - 25fd7c0694 fix py3 wart, encode os.linesep
  - d79f1a1961 Fix fileserver roots tests
- **PR #47069**: (cachedout) Pass the timeout variable to the CLI when calling salt in tests @ 2018-04-14 15:20:25 UTC
  - 977c6939c4 Merge pull request #47069 from cachedout/match_timeout_arg
  - b8990f5258 Pass the timeout variable to the CLI when calling salt in tests
- **PR #47074**: (dwoz) Kitchn should ignore artifacts directory @ 2018-04-14 13:06:19 UTC
  - 2c4c19c622 Merge pull request #47074 from dwoz/ignore_artifacts
  - c941eaf0d0 Kitchn should ignore artifacts directory
- **ISSUE #47000**: (invintila) Client API: full_return parameter missing from cmd_subset function (refs: #47055)
- **PR #47055**: (mattp-) #47000 - add proper handling of full_return in cmd_subset @ 2018-04-13 20:17:10 UTC
  - c484c0bd71 Merge pull request #47055 from bloomberg/GH-47000
  - 8af3f5b874 GH-47000: add proper handling of full_return in cmd_subset
- **PR #47039**: (twangboy) Fix winrm powershell script @ 2018-04-13 18:09:56 UTC
  - f3496030cc Merge pull request #47039 from twangboy/win_fix_winrm_script
  - 6635b9003f Fix winrm powershell script
    - 46fa2c04de Fix py3 os.linesep wart
    - 3c565d7e54 Use salt.utils.fopen
    - aa965310f1 Clean up cruft
    - efc986580o Jinja test fixes
- **PR #46326**: (kstreee) Fixes a timing bug of saltnado's client local. (refs: #47110, #47123, #47200, #47415) @ 2018-04-13 13:59:28 UTC
  - PR #45874: (GwiYeong) fix for local client timeout bug (refs: #46326)
  - 1700a10ebe Merge pull request #46326 from kstreee/fixed-client-local
  - 0f358a9c9e Fixes a timing bug of saltando's client local.
- **ISSUE #46877**: (trudesea) Unable to apply GPO (Windows 2016) (refs: #46913)
- **ISSUE #44516**: (doesitblend) Windows PY3 Minion Returns UTF16 UnicodeError (refs: #44944)
- **PR #46913**: (lomeroe) 2017.7 Fix #46877 -- win_lgpo start/shutdown script reading @ 2018-04-12 15:10:50 UTC
  - PR #44944: (lomeroe) win_lgpo registry.pol encoding updates (refs: #46913, #47438)
  - c3e00316c5 Merge pull request #46913 from lomeroe/2017.7-fix46877
  - 369a0645ed move exception for clarity
- 32ce5bda5 Use configparser serializer object to read psscript.ini and script.ini startup/shutdown script files.

- **PR #47025**: (terminalmage) Fix server_id grain in PY3 on Windows @ 2018-04-12 15:08:00 UTC
  - 9e37cf9d6 Merge pull request #47025 from terminalmage/fix-server_id-windows
  - cb0cf89ed3 Fix server_id grain in PY3 on Windows

- **PR #47027**: (rallytime) Back-port #44508 to 2017.7 @ 2018-04-12 15:05:51 UTC
  - PR #44508: (mzbroch) Capirca integration (refs: #47027)
  - 2e193cfb45 Merge pull request #47027 from rallytime/bp-44508
  - 8e72f362f4 Add priority field to support the latest capirca.
  - 112f92baab Add priority field to support the latest capirca.

- **PR #47020**: (rallytime) Back-port #46970 to 2017.7 @ 2018-04-11 21:48:25 UTC
  - PR #46970: (garethgreenaway) [2017.7] fix to pkgrepo comments test (refs: #47020)
  - 385fe2bc1e Merge pull request #47020 from rallytime/bp-46970
  - 9373dff52b Update test_pkgrepo.py
  - 13cf9eb5b1 Removing debugging.
  - a61a8593e5 Removing suse from pkgrepo comments tests. the pkgrepo functions in SUSE pkg module do not support comments.

- **ISSUE #46504**: (jfoboss) ntp.managed fails on non-english systems (refs: #46539)

- **PR #46539**: (jfoboss) #46504 Fix @ 2018-04-11 14:13:24 UTC
  - 8f994e7cf9 Merge pull request #46539 from jfoboss/patch-1
  - 6890122e41 Merge pull request #1 from twangboy/pull_46539
    * 19c3fadbe5 Fix unit test for win_ntp
  - 826a8d3099 Fixing #46504

- **PR #46999**: (gtmanfred) switch pip test package @ 2018-04-10 21:18:33 UTC
  - 74d70e95a5 Merge pull request #46999 from gtmanfred/2017.7
  - 791af8f6ce switch pip test package

- **PR #46023**: (mattp-) add parallel support for orchestrations @ 2018-04-10 19:26:04 UTC
  - 8ada771e5 Merge pull request #46023 from bloomberg/parallel-orch
  - 0ac0b3e6a9 Merge branch '2017.7' into parallel-orch

- **ISSUE #46581**: (qcpeter) puppet_fact tries to parse output to stderr (refs: #46613)

- **PR #46613**: (myinitialsarepm) Fix puppet_fact and puppet_facts to use stdout. @ 2018-04-10 15:18:07 UTC
  - 39d65a39cf Merge pull request #46613 from myinitialsarepm/fix_puppet_fact_and_puppet_facts
  - 44ecd13abc Update tests to use cmd.run_all
  - 7d7d40541 Merge branch '2017.7' into fix_puppet_fact_and_puppet_facts
  - 0ce1520bd0 Merge branch '2017.7' into fix_puppet_fact_and_puppet_facts
  - 69e1f6f681 Fix puppet_fact and puppet_facts to use stdout.

- **PR #46991**: (gtmanfred) use saltstack salt-jenkins @ 2018-04-10 14:19:00 UTC
- ba5421d988 Merge pull request #46991 from gtmanfred/windows
- 98588c1dc5 use saltstack salt-jenkins

**PR #46975:** (gtmanfred) Make windows work for test runs in jenkinsci @ 2018-04-10 13:41:18 UTC
- 00c4067585 Merge pull request #46975 from gtmanfred/windows
- 1f69c0d7f8 make sure windows outputs xml junit files
- 4a2ec1bb3 support new versions of winrm-fs
- b9efec8526 remove libnacl on windows
- 2edd5eaf9e fix path
- b03e272e44 windows work

**PR #46945:** (vutny) [DOC] Fix Jinja block in FAQ page @ 2018-04-09 13:05:28 UTC
- 3cf2353e41 Merge pull request #46945 from vutny/doc-faq-fix-jinja
- bfd54e61d [DOC] Fix Jinja block in FAQ page

**PR #46925:** (terminalmage) Remove reference to directory support in file.patch state @ 2018-04-06 13:54:47 UTC
- fc2f728665 Merge pull request #46925 from terminalmage/fix-file.patch-docstring
- 97695657f0 Remove reference to directory support in file.patch state

**PR #46900:** (rallytime) Back-port #46801 to 2017.7 @ 2018-04-06 13:47:44 UTC
- PR #46801: (yagnik) rename jenkins to jenkinsmod (refs: #46900, #47163)
- eef6c518e1 Merge pull request #46900 from rallytime/bp-46801
- 6a41e8b457 rename jenkins to jenkinsmod

**PR #46899:** (rallytime) Back-port #45116 to 2017.7 @ 2018-04-06 13:47:17 UTC
- PR #45116: (arif-ali) fix adding parameters to http.query from sdb yaml (refs: #46899)
- 71839b0303 Merge pull request #46899 from rallytime/bp-45116
- b92f908da4 fix adding parameters to http.query from sdb yaml
  * 3d5e6960b0 address lint issues raised by @isbm
  * a9866c7a03 fix parallel mode py3 compatibility
  * 6d7730864a removing prereq from test orch
  * 6ca25778f add integration test to runners/test_state to exercise parallel
  * 2c86f16b39 cherry-pick cdata KeyError prevention from #39832
  * 26a96e8933 record start/stop duration for parallel processes separately
  * e484bdff2b revisit previous join() behavior in check_requisites
  * f00a359cdf join() parallel process instead of a recursive sleep
  * 6b7007a44dc add parallel support for orchestrations

**ISSUE #43529:** (Ch3LL) Add publisher_acl Test to Auto Test Suite (refs: #44926)

**PR #44926:** (frogunder) whitelist_acl_test @ 2018-04-05 15:09:26 UTC
- d05b43753 Merge pull request #44926 from frogunder/whitelisted_acl
- 18e460fc30 Merge branch '2017.7' into whitelisted_acl
- 1ad4d7d988 fix assert errors
- e6a56016df update test
- 19a2244cb7 whitelist_acl_test

- **ISSUE #46456**: (vitaliyf) "ValueError" when running orch with "subset" (refs: #46464)
- **PR #46464**: (gtmanfred) fix salt subset in orchestrator @ 2018-04-05 14:52:01 UTC
  - 7d8229cece Merge pull request #46464 from gtmanfred/orchestrator
  - 637c6db7b fix pylint
  - 0151013ddb document cli option for cmd_subset
  - 4a3ed607d add test for subset in orchestration
  - 311235dd6 fix salt subset in orchestrator

- **ISSUE #46523**: (dwoz) Add a test to the cloud suite for Windows minion on EC2 (refs: #46879)
- **PR #46879**: (dwoz) Fix multiple typos causing tests to fail @ 2018-04-05 13:59:28 UTC
  - 80561c964 Merge pull request #46879 from dwoz/cloudtestfix
  - dc54fc3c3 Fix multiple typos causing tests to fail

- **PR #46647**: (twangboy) Fix the tear down function in integration.modules.test_grains @ 2018-04-04 21:14:06 UTC
  - f70f6ba28 Merge pull request #46647 from twangboy/win_fix_test_grains
  - c17938bb0e Fix the tear down function in integration.modules.test_grains.GrainAppendTestCase

- **ISSUE #46754**: (nages13) grain item virtual_subtype shows 'XenPV DomU' on Docker containers (refs: #46756)
- **ISSUE #43405**: (kfix) LXD-created LXC container is detected as a Xen domU (refs: #46756)
- **PR #46756**: (nages13) fix grains['virtual_subtype'] to show Docker on xen kernels @ 2018-04-04 20:53:49 UTC
  - 91c078ce12 Merge pull request #46756 from nages13/bugfix-grain-virtual_subtype
  - 781f503a04 Merge branch 'bugfix-grain-virtual_subtype' of https://github.com/nages13/salt into bugfix-grain-virtual_subtype
    - cd1ac4b7f9 Merge branch '2017.7' into bugfix-grain-virtual_subtype
    - 0ace76c0e7 Merge branch '2017.7' into bugfix-grain-virtual_subtype
    - 9eb6f5c0d0 Merge branch '2017.7' into bugfix-grain-virtual_subtype
    - 736d9d365 Merge branch '2017.7' into bugfix-grain-virtual_subtype
    - a417e86a6a Merge branch '2017.7' into bugfix-grain-virtual_subtype
    - bf5034dbdb Merge branch '2017.7' into bugfix-grain-virtual_subtype
    - 8d12770951 Merge branch '2017.7' into bugfix-grain-virtual_subtype
  - 7e704c0e81 Moved down container check code below hypervisors to validate containers type running in virtual environment. Fixes #46754 & #43405
  - 710f74c44a fix grains["virtual_subtype"] to show Docker on xen kernels

- **ISSUE #46762**: (ScoreUnder) prereq stack overflow (refs: #46788, #46799)
- **PR #46799**: (garethgreenaway) [2017.7] Adding test for PR #46788 @ 2018-04-04 20:41:23 UTC
Salt Documentation, Release 3006.4

- PR #46788: (garethgreenaway) [2017.7] Ensure failed tags are added to self.pre (refs: #46799)
- 058bbbed221 Merge pull request #46799 from garethgreenaway/46762_prereq_shenanigans_tests
- 13875e78cf Fixing documentation string for test.
- 3d288c44d4 Fixing test documentation
- 6cfff02ef6a Adding tests for #46788

- PR #46867: (terminalmage) Backport string arg normalization to 2017.7 branch @ 2018-04-04 18:06:57 UTC
  - d9770bf3f8 Merge pull request #46867 from terminalmage/unicode-logging-normalization
  - 7652688e83 Backport string arg normalization to 2017.7 branch

- PR #46770: (twangboy) Change the order of SID Lookup @ 2018-04-04 17:33:10 UTC
  - 9eb9b1f6e Merge pull request #46770 from twangboy/fix_46433
  - 89a0a6222 Merge branch '2017.7' into fix_46433
  - 67b4697578 Remove unused import (ling)
  - 9302fa5ab0 Clean up code comments
  - b383b9b330 Change the order of SID Lookup

- ISSUE #46826: (robgott) grain modules using tuples affect targeting (refs: #46839)

- PR #46839: (gtmanfred) match tuple for targets as well @ 2018-04-04 14:07:12 UTC
  - 9c776ccfb7 Merge pull request #46839 from gtmanfred/tupletarget
  - 3b7208ce27 match tuple for targets as well

- ISSUE #40245: (czhong111) salt-api automatically restart caused by “opening too many files” (refs: #46817)

- ISSUE #36374: (szjur) Descriptor leaks in multithreaded environment (refs: #46817)

- ISSUE #20639: (GrizzlyV) salt.client.LocalClient leaks connections to local salt master (refs: #46817)

- PR #46845: (rallytime) Back-port #46817 to 2017.7 @ 2018-04-03 19:52:29 UTC
  - PR #46817: (mattp-) address filehandle/event leak in async run_job invocations (refs: #46845)
  - PR #32145: (paclat) fixes 29817 (refs: #46817)
  - 7db251dc11 Merge pull request #46845 from rallytime/bp-46817
  - 36a0f6d8ca address filehandle/event leak in async run_job invocations

- PR #46847: (dwoz) strdup from libc is not available on windows @ 2018-04-03 19:51:33 UTC
  - e3d17ab7bc Merge pull request #46847 from dwoz/missing-strdup
  - 55845f4846 strdup from libc is not available on windows

- ISSUE #46765: (roskens) pkg.mod_repo fails with a python error when removing a dictionary key (refs: #46776)

- PR #46776: (gtmanfred) fix shrinking list in for loop bug @ 2018-04-03 17:32:16 UTC
  - f2dd79f9c4 Merge pull request #46776 from gtmanfred/2017.7
  - edc1059ee0 fix shrinking list in for loop bug

- PR #46838: (gtmanfred) use http registry for npm @ 2018-04-03 17:02:32 UTC
  - 1941426218 Merge pull request #46838 from gtmanfred/npm
  - bff61dd291 use http registry for npm
• **ISSUE #42312**: (frogunder) salt-call --local sys.doc none gives error/traceback in raspberry pi (refs: #46823)

• **PR #46823**: (rallytime) Improve __virtual__ checks in sensehat module @ 2018-04-03 16:56:08 UTC
  
  e544254e7b Merge pull request #46823 from rallytime/fix-42312
  
  dafa820f93 Improve __virtual__ checks in sensehat module

• **PR #46641**: (skizunov) Make LazyLoader thread safe @ 2018-04-03 16:09:17 UTC
  
  37fd2de35 Merge pull request #46641 from skizunov/develop3
  
  c624aa827f Make LazyLoader thread safe

• **PR #46837**: (rallytime) [2017.7] Merge forward from 2016.11 to 2017.7 @ 2018-04-03 14:54:10 UTC
  
  989508b100 Merge pull request #46837 from rallytime/merge-2017.7
  
  8522c1d634 Merge branch '2016.11' into '2017.7'
  
  3e844ed1df Merge pull request #46739 from rallytime/2016.11_update_version_doc
  
  4d965cc0f0 Update release versions for the 2016.11 branch

• **PR #46740**: (twangboy) Fix network.managed test=True on Windows @ 2018-04-03 12:54:56 UTC
  
  ebf5dd276f Merge pull request #46783 from twangboy/fix_46680
  
  da5ce25e3f Fix unit tests on Linux
  
  b7f4f377cd Add space I removed
  
  f1c68a09b5 Fix network.managed test=True on Windows

• **PR #46821**: (rallytime) Fix the new test failures from the mantest changes @ 2018-04-03 12:40:51 UTC
  
  PR #46778: (terminalmage) Replace flaky SPM man test (refs: #46821)
  
  f652f25cc1 Merge pull request #46821 from rallytime/fix-mantest-failures
  
  209a8029c3 Fix the new test failures from the mantest changes

• **ISSUE #46627**: (vangourd) Win_LGPO fails on writing Administrative Template for Remote Assistance (refs: #46800)

• **PR #46800**: (lomeroe) fix win_lgpo to correctly create valuenames of list item types @ 2018-04-03 12:38:45 UTC
  
  c6f06e2081 Merge pull request #46800 from lomeroe/2017_7-46627
  
  2bee3d3e9d correct create list item value names if the valuePrefix attribute does not exist on the list item, the value is the value name, other wise, the valuename a number with the valuePrefix prepended to it

• **ISSUE #46347**: (twangboy) Build 449: unit.modules.test_inspect_collector (refs: #46675)

• **PR #46675**: (dwoz) Skip test when git symlinks are not configured @ 2018-04-03 12:19:19 UTC
  
  d26f264f1e Merge pull request #46675 from dwoz/inspectlib-tests
  
  d39f4852d8 Handle non-zero status exception
  
  83c005802b Handle cases where git can not be found
  
  628b87d5c4 Skip test when git symlinks are not configured
• ISSUE #46808: (ezh) Sharedsecret authentication is broken (refs: #46809)

• PR #46815: (terminalmage) Backport #46809 to 2017.7 @ 2018-04-02 20:05:15 UTC
  - PR #46809: (ezh) Fix sharedsecret authentication (refs: #46815)
  - 4083e7c460 Merge pull request #46815 from terminalmage/bp-46809
  - 71d5601507 Fix sharedsecret authentication

• PR #46769: (dwoz) Adding windows minion tests for salt cloud @ 2018-04-02 18:51:49 UTC
  - 3bac9717f4 Merge pull request #46769 from dwoz/wincloustdtest
  - eabc234e5d Fix config override name
  - 5c22a0f88d Use absolute imports
  - 810042710d Set default cloud test timeout back to 500 seconds
  - 5ac89ad307 Use winrm_verify_ssl option causing tests to pass
  - 71858a709c allow not verifying ssl winrm saltcloud
  - ba5f11476c Adding windows minion tests for salt cloud

• PR #46786: (twangboy) Return int(-1) when pidfile contains invalid data @ 2018-04-02 18:42:12 UTC
  - f1be939763 Merge pull request #46786 from twangboy/fix_46757
  - b0053250ff Remove int(), just return -1
  - 7d56126d74 Fixes some lint
  - 49b3e937da Return int(-1) when pidfile contains invalid data

• PR #46814: (terminalmage) Backport #46772 to 2017.7 @ 2018-04-02 18:39:37 UTC
  - PR #46772: (bmiguel-teixeira) fix container removal if auto_remove was enabled (refs: #46814)
  - 89bf24b15c Merge pull request #46814 from terminalmage/bp-46772
  - a9f26f2ab8 avoid breaking if AutoRemove is not found
  - 97779c965d fix container removal if auto_remove was enabled

• PR #46778: (terminalmage) Replace flaky SPM man test (refs: #46821) @ 2018-03-30 17:55:14 UTC
  - 69d450db84 Merge pull request #46778 from terminalmage/salt-jenkins-906
  - bbfd35d3ea Replace flaky SPM man test

• ISSUE #46762: (ScoreUnder) prereq stack overflow (refs: #46788, #46799)

  - f70b0fe46 Fix some installer script inconsistencies

- **ISSUE #46552**: (JeffLee123) State with requisite executes despite onfail requisite on another state. (refs: #46571)

- **PR #46571**: (garethgreenaway) [2017.7] fixes to state.py @ 2018-03-20 13:40:04 UTC
  - f038e3c452 Merge pull request #46571 from garethgreenaway/46552_onfail_and_require
  - 152c43c843 Accounting for a case when multiple onfails are used along with requires. Previously if you have multiple states using 'onfail' and two of those states using a 'require' against the first one state, the last two will run even if the 'onfail' isn't met because the 'require' is met because the first state returns true even though it didn't execute. This change adds an additional hidden variable that is used when checking requisities to determine if the state actually ran.

- **ISSUE #46512**: (blarghmatey) git.pull failing when run from the salt scheduler (refs: #46520)

32.2.75 Salt 2017.7.7 Release Notes

Version 2017.7.7 is a bugfix release for 2017.7.0.

The 2017.7.7 release contains only a small number of fixes, which are detailed below.

This release fixes two critical issues.

The first is Issue #48038, which is a critical bug that occurs in a multi-syndic setup where the same job is run multiple times on a minion.

The second issue is #48130. This bug appears in certain setups where the Master reports a Minion time-out, even though the job is still running on the Minion.
Both of these issues have been fixed with this release.

  - b0ba084f4d9 Merge pull request #48134 from rallytime/release-notes-2017.7.7
  - 21705b8f1 Add missing v for tag reference
  - e4e62e8b3a Add release notes file for 2017.7.7
- ISSUE #48038: (austinpapp) jobs are not dedup'ing minion side (refs: #48075)
- PR #48098: (rallytime) Back-port #48075 to 2017.7.7 @ 2018-06-14 12:53:42 UTC
  - PR #48075: (garethgreenaway) [2017.7] Ensure that the shared list of jids is passed (refs: #48098)
  - 084de927fe Merge pull request #48098 from rallytime/bp-48075-2017.7.7
  - e4e62e8b3a Ensure that the shared list of jids is passed when creating the Minion. Fixes an issue when minions are pointed at multiple syndics.
32.2.76 Salt 2017.7.8 Release Notes

Version 2017.7.8 is a security and bugfix release for 2017.7.0.

Statistics

- Total Merges: 237
- Total Issue References: 48
- Total PR References: 279
- Contributors: 52 (AVeenstra, Ch3LL, Circuitsoft, DmitryKuzmenko, KaiSforza, Martin819, OrlandoAr-capix, UtahDave, Vaelatern, abednarik, asnell, b1naryth1ef, baniobloom, basepi, bdrung, beornf, bmcorser, bowmanjd-1ms, darkpixel, discogestalt, doesitblend, dqminh, dubb-b, dwoz, frankiexyz, froguner, fzipi, garethgreenaway, gr0krecurson, gtmanfred, jacksontj, jagguli, lejambon, lomeroe, lordcirth, lusche, mbunkus, meaksh, mirceaulinic, nbraud, pritambaral, ralex, rallytime, rmcintosh, slaws, terminalmage, twangboy, twellspring, wyardley, xetix, zer0def)

Security Fix

CVE-2018-15751 Remote command execution and incorrect access control when using salt-api.

CVE-2018-15750 Directory traversal vulnerability when using salt-api. Allows an attacker to determine what files exist on a server when querying /run or /events.

Credit and thanks for discovery and responsible disclosure: nullbr4in, xcuter, koredge, louplos, blackcon, Naver Business Platform

New win_snmp behavior

- `win_snmp.get_community_names` now returns the SNMP settings actually in effect on the box. If settings are managed via GroupPolicy, those settings will be returned. Otherwise, normal settings are returned.

- `win_snmp.set_community_names` now raises an error when SNMP settings are being managed by GroupPolicy.

Option Added to Disable Docker Mine Updates

When a docker container is added, removed, started, stopped, etc., the results of a `docker.ps verbose=True all=True host=True` are sent to the `mine`, to be used by `mine.get_docker`.

A new config option (`docker.update_mine`) has been added. When set to `False`, Salt will not send this information to the mine. This is useful in cases where sensitive information is stored in the container's environment.
Changelog for v2017.7.7..v2017.7.8

Generated at: 2018-09-04 21:09:41 UTC

  - 52ab2c0574 Merge pull request #49466 from rallytime/bp-49461
  - 58428003b1 Revert "Allow for not being prompted to supply a password to deploy keys to a...
- **PR #49284**: (twangboy) Fix path to libsodium tarball @ 2018-08-23 17:19:24 UTC
  - 1bbe7df6c4 Merge pull request #49284 from twangboy/fix_installer_osx
  - a112eaa597 Fix path to libsodium tarball
- **PR #49272**: (twangboy) Add 64 bit binaries for KB2999226 to the x86 installer @ 2018-08-23 14:27:09 UTC
  - e0e8779985 Merge pull request #49272 from twangboy/fix_installer_more
  - a8f054b2d2 Add 64bit binaries for KB2999226 to the x86 installer
- **PR #49218**: (twangboy) Fix Windows and OSX installers @ 2018-08-21 01:10:30 UTC
  - 0eb6df0e8 Merge pull request #49218 from twangboy/fix_installer
  - e8a1d2f772 Add more descriptive error when KB not found
  - 71737ea687 Suppress all ui on vcredist installation
  - 7daeb9ba2a1 Fix Windows and OSX installers
- **PR #49116**: (twangboy) Fix windows installer script @ 2018-08-14 17:09:35 UTC
  - e484f261ee Merge pull request #49116 from twangboy/fix_installer
  - 122095c5d Add nonfatal switch to VCre dist
- **PR #49113**: (Ch3LL) Add changelog to 2017.7.8 release notes @ 2018-08-14 15:03:16 UTC
  - 0b9f2f8884 Merge pull request #49113 from Ch3LL/rn_7.8
  - f6b70bb653 Add changelog to 2017.7.8 release notes
- **PR #49051**: (rallytime) Back-port #49046 to 2017.7.8 @ 2018-08-10 17:19:18 UTC
  - PR #49046: (garethgreenaway) [2017.7] Another fix to tests/integration/modules/test_service.py (refs: #49051)
  - 01cf2c71ff Merge pull request #49051 from rallytime/bp-49046
  - fc0817cb35 The osfullname grain differs when using Python2 vs Python3, swapping this out for the "OS" grain which is consistent.

32.2. Previous releases 5467
- **PR #49044**: (Ch3LL) increase timeout on vultr cloud integration test @ 2018-08-10 01:28:17 UTC
  - 189e28691f Merge pull request #49044 from Ch3LL/vultr_test
  - 0d6d9e4d1 increase timeout on vultr cloud integration test

- **PR #49042**: (rallytime) Mark a jinja template test as flaky @ 2018-08-09 21:05:54 UTC
  - c606a32cf2 Merge pull request #49042 from rallytime/flaky-jinja-test
  - a439b4ba6 Mark a jinja template test as flaky

- **PR #49041**: (Ch3LL) [2017.7.8] backport PR #48212 @ 2018-08-09 21:05:27 UTC
  - PR #48212: (Ch3LL) Fix python3 ec2 salt-cloud TypeError when installing salt (refs: #49041)
  - 6415b6f73b Merge pull request #49041 from Ch3LL/ec2_fix
  - cf7f2459b8 [2017.7.8] backport PR #48212

- **PR #49030**: (rallytime) Update netapi client tests @ 2018-08-09 17:11:14 UTC
  - 1db036406b Merge pull request #49030 from rallytime/update-client-tests
  - f08e6c6ae Update netapi client tests

- **PR #49024**: (rallytime) Fix test error in test_compiler jinja check @ 2018-08-09 12:43:23 UTC
  - PR #4902: (rallytime) Skip test_jinja_deep_error on Debian 8 (refs: #49024)
  - f7ba21bc7 Merge pull request #49024 from rallytime/fx-deb-test
  - a9c16d9137 Fix test error in test_compiler jinja check

- **PR #49020**: (rallytime) Make grains integration test more robust @ 2018-08-08 20:59:18 UTC
  - 666d68c615 Merge pull request #49020 from rallytime/fx-grains-test
  - f72a3ac6be Make grains integration test more robust

- **PR #49002**: (rallytime) Skip test_jinja_deep_error on Debian 8 (refs: #49024) @ 2018-08-08 19:18:39 UTC
  - PR #49002: (rallytime) Skip test_jinja_deep_error on Debian 8 (refs: #49024)
  - 23b66e8bb Skip test_jinja_deep_error on Debian 8

- **PR #48999**: (rallytime) Update expected return value in boto test @ 2018-08-08 14:42:15 UTC
  - 41d9f1eb3 Merge pull request #48999 from rallytime/fx-boto-test
  - d0136b1be5 Update expected return value in boto test

- **PR #48976**: (rallytime) Skip unreliable tornado tests @ 2018-08-07 18:55:25 UTC
  - a1e54634dc Merge pull request #48976 from rallytime/tornado
  - 0bd83a6b6c Skip unreliable tornado tests

- **PR #48979**: (rallytime) Back-port #48959 to 2017.7.8 @ 2018-08-08 17:41:53 UTC
  - PR #48959: (rallytime) Mark some more tests as flaky (refs: #48979)
  - 22713be9c1 Merge pull request #48979 from rallytime/bp-48959
  - aaf986d728 Mark one grains test as flaky & convert to pytest notation
  - e7f25e4b6 Mark 2 matcher tests as flaky

- **PR #48970**: (Ch3LL) [2017.7.8] Backport #48962 @ 2018-08-07 15:01:57 UTC
  - PR #48962: (garethgreenaway) [2017.7] Fixing tests/integration/modules/test_service.py (refs: #48970)
- 03aa0e49b0 Merge pull request #48970 from Ch3LL/back_48962
- 3ce1b8a3e9 Update the elif block to only be true for versions below Debian 9.

- **PR #48968:** (rallytime) Update man pages for 2017.7.8 release @ 2018-08-07 14:29:08 UTC
  - 66ee4e5e3c Merge pull request #48968 from rallytime/man-pages
  - 64fe3be41a Update man pages for 2017.7.8 release

- **PR #48950:** (KaiSforza) Added a quote to kitchen Jenkinsfiles @ 2018-08-06 14:29:08 UTC
  - 848d583438 Merge pull request #48950 from KaiSforza/kitchenfix-2017.7
  - 5242cb143a Added a quote to kitchen Jenkinsfiles

- **PR #48943:** (rallytime) Mark some shell and runner integration tests as flaky @ 2018-08-06 13:08:14 UTC
  - 928da88d65 Merge pull request #48943 from rallytime/flaky-tests
  - 668da57ab9 Mark some shell and runner integration tests as flaky

- **PR #48940:** (rallytime) Back-port #48852 to 2017.7 @ 2018-08-05 21:32:26 UTC
  - **PR #48852:** (KaiSforza) Record all the artifacts from the build (refs: #48940)
  - cd42510d3a Merge pull request #48852 from rallytime/bp-48852
  - faef92e79 Record all the artifacts from the build

- **PR #48935:** (garethgreenaway) [2017.7] Fix to test_pkg.test_pkg_015_installed_held @ 2018-08-05 19:47:39 UTC
  - 43649a68be Merge pull request #48935 from garethgreenaway/1045_test_pkg_015_installed_held_centos
  - 0bb10107b6 Merge branch '2017.7' into 1045_test_pkg_015_installed_held_centos
  - 24df5e62ff Fixing the test_pkg_015_installed_held test to be able to successfully run on CentOS

- **ISSUE #47087:** (darkpixel) How do I stop the prompt "Permission denied for host <hostname>, do you want to deploy the salt-ssh key? (password required):"? (refs: #47100)

- **PR #47100:** (gtmanfred) Allow for not being prompted to supply a password to deploy keys to a... @ 2018-08-05 19:12:58 UTC
  - 2421e2a570 Merge pull request #47100 from gtmanfred/ssh
  - 5b443af7ae add key-deploy test
  - a131c9eeb Allow for not being prompted to supply a password to deploy keys to a minion with salt-ssh

- **ISSUE #48865:** (mts-avco) Windows packages are hidden in pkg.list_pkgs if they have no DisplayVersion (refs: #48891)

- **PR #48891:** (damon-atkins) win_pkg: Fix issue introduced in Jan 2018 DisplayVersion missing should result... @ 2018-08-05 18:53:47 UTC
  - d541bd446 Merge pull request #48891 from damon-atkins/2017.7_win_pkg.list_pkgs_not_found
  - a4af1dbfb1 Fix win_pkg issues introduced Jan 2018. If DisplayVersion does not exist it should return version as "Not Found"

- **ISSUE #27056:** (oogali) pkgng provider on FreeBSD does not do BATCH=yes (refs: #48730, #29909)

- **PR #48896:** (rallytime) Back-port #48730 to 2017.7 @ 2018-08-05 18:20:40 UTC
  - **PR #48730:** (fzipi) Fix batch install on FreeBSD using pkgng (refs: #48896)
  - **PR #29909:** (abednarik) FreeBSD pkgng fix for non-interactive install. (refs: #48730)
  - **PR #29907:** (bmcorser) Presumably what was meant (refs: #48730)
- 5f6a56f5dc Merge pull request #48896 from rallytime/bp-48730
- 57aa204c9d Merge branch '2017.7' into bp-48730
- 4995922584 Forgot variable in signature
- 0503bc18b6 Fix batch install using pkgng

- PR #48933: (garethgreenaway) [2017.7] Fix to test_service_disable_doesnot_exist @ 2018-08-05 14:29:43 UTC
  - 0c64bba865 Merge pull request #48933 from garethgreenaway/1022_debian_8_failing_service-test
  - 280d1d2ad2 Fixing failing test, integration.modules.test_service.ServiceModuleTest.test_service_disable_doesnot_exist, on Debian 8 and higher.

- PR #48922: (rallytime) Update backticks on job_cache docs @ 2018-08-03 21:05:46 UTC
  - 0c3d2c6a09 Merge pull request #48922 from rallytime/cache-doc-error
  - 8ca89df7e8 Update backticks on job_cache docs

- PR #48866: (Ch3LL) Add cmd module integration tests for windows and fix space in path issue @ 2018-08-03 21:03:33 UTC
  - 8d1fc4f8e5 Merge pull request #48866 from Ch3LL/cmd_win_tests
  - 905da13653 Merge branch '2017.7' into cmd_win_tests

- PR #48920: (rallytime) Back-port #48904 to 2017.7.7 @ 2018-08-03 15:17:07 UTC
  - PR #48904: (KaiSforza) No rehashing in parallel (refs: #48920)
  - 57d58e7541 Merge pull request #48920 from rallytime/bp-48904-2017.7
  - a55f92954a No rehashing in parallel

- PR #48876: (Vaelatern) Make IP_LEARNING optional @ 2018-08-02 19:30:24 UTC
  - e79cb35b1 Merge pull request #48876 from Vaelatern/make-network-learning-optional
  - a490b0e5d Make IP_LEARNING optional

- PR #48890: (Ch3LL) add sleep in test_cmd integration test @ 2018-08-02 19:15:08 UTC
  - f8bfab4f9f Merge pull request #48890 from Ch3LL/cmd_test
  - acda4ed9ab add sleep in test_cmd integration test

- PR #48885: (rallytime) Mark shadow module integration test as flaky @ 2018-08-02 19:04:35 UTC
  - 527226ded Merge pull request #48885 from rallytime/flaky-tests-shadow
  - da871a2d57 Mark shadow module integration test as flaky

- PR #48884: (rallytime) Separate compound matcher tests into individual tests @ 2018-08-02 19:04:03 UTC
  - bf0895656e Merge pull request #48884 from rallytime/flaky-tests-matchers
  - 38d9ae537 Merge branch '2017.7' into flaky-tests-matchers

- PR #48868: (terminalmage) Fix race when SIGTERM/SIGINT received while lazyloading a module @ 2018-08-02 17:13:34 UTC
  - a567666938 Merge pull request #48868 from terminalmage/fix-loader-race
  - 5f1169b9a2 Fix race when SIGTERM/SIGINT received while lazyloading a module

- PR #48883: (terminalmage) Fix failing git worktree tests @ 2018-08-02 16:51:40 UTC
  - 0ca0b6f2f2 Merge pull request #48883 from terminalmage/salt-jenkins-1023
- c61f75cb50 Fix failing git worktree tests
  - 3660dff13c Separate compound matcher tests into individual tests
- **PR #48869:** (Ch3LL) Catch socket.error exception in testprogram @ 2018-08-02 14:19:22 UTC
  - a84f5155a1 Merge pull request #48869 from Ch3LL/mac_shell_tests
  - 3734b1ec89 Catch socket.error exception in testprogram
- **PR #48867:** (rallytime) Skip unreliable tornado test. @ 2018-08-01 21:07:07 UTC
  - 7f56b8bf44 Merge pull request #48867 from rallytime/skip-tornado-test
  - 7320aa9104 Skip unreliable tornado test.
  - 3be11e06fe Add docs for new escape kwarg
  - 391bb8a411 use a specific path for just the cmd._run call
  - 62c66ba489 make sure we lower the check on shell
  - 9312a993a5 Add cmd module integration tests for windows and fix space in path issue
- **PR #48853:** (rallytime) Back-port #48850 to 2017.7 @ 2018-07-31 20:21:49 UTC
  - **PR #48850:** (rallytime) Skip tests in integration.shell.test_master (refs: #48853)
  - 05f2d65de3 Merge pull request #48853 from rallytime/bp-48850
  - 3c33ee554a Skip tests in integration.shell.test_master
- **ISSUE #46689:** (mxork) pkg.installed: hold: True not applied to a package which is already installed. (refs: #48426)
- **PR #48426:** (garethgreenaway) [2017.7] fixes to states/pkg.py @ 2018-07-31 20:18:05 UTC
  - 8a1285239a Merge pull request #48426 from garethgreenaway/46689_fixing_pkg_held_when_package_is_installed
  - 9b0f5dd212 Fixing indentation, removing some unnecessary conditionals.
  - 727964ab55 One last cleanup.
  - 11cb8e6e6b General cleanup in pkg state, reducing duplicate code. Fixing the requires_salt_modules decorator, sys.doc was returning too much information for the event to handle. This change specifically calls sys.doc with the module name.
  - 16f6a6e635 Make sure pkg.hold and pkg.unhold are available before running the test.
  - 998651102d Fixing a situation when a package is already installed via salt or manually and a state attempts to set that package to be held. Previously the holding/unholding logic was only being run against packages that were being installed. This change moves the holding logic outside and runs it against all desired packages. Adding a new test to test holding logic.
- **ISSUE #47689:** (OrlandoArcapix) Poor performance of pip.installed when given a list of packages (refs: #47734)
- **PR #47734:** (OrlandoArcapix) #47689 improve run-speed of pip package state @ 2018-07-31 19:15:35 UTC
  - c8e69431ff Merge pull request #47734 from OrlandoArcapix/Issue47689-pip-state-performance
  - 662bd1f780 Merge branch '2017.7' into Issue47689-pip-state-performance
  - 66936b4f41 Changed string comparison in pip test to match new confirmation string - ref PR #47734.
  - bb5939d6ef Merge branch '2017.7' into Issue47689-pip-state-performance
  - d6a49ae41c Merge branch '2017.7' into Issue47689-pip-state-performance

---

**32.2. Previous releases**

---

5471
Chapter 32. Release notes

- d4083fc9d1 Merge branch 'Issue47689-pip-state-performance' of github.com:OrlandoArcapix/salt into Issue47689-pip-state-performance
  - 779b5fa785 Merge branch '2017.7' into Issue47689-pip-state-performance
- f3653349ab Removed whitespaces at end of added comments lines
- db11f2ff4b Merge branch '2017.7' into Issue47689-pip-state-performance
- eac0178de2 Ref: #47689 - document additional kwarg passed to pip._check_if_installed function
- 0d19803106 Merge branch '2017.7' into Issue47689-pip-state-performance
- d3678bf2f3 #47689 fix lint errors
- 4fec8f6bcc #47698 improve run-speed of pip package state checks by only loading the current package list once when checking multiple packages

- **PR #48844**: (AVeenstra) Fixed Python 3 incompatibility in methods in nilrt_ip and debian_ip. @ 2018-07-31 17:20:27 UTC
  - 83a5b3cc47 Merge pull request #48844 from AVeenstra/fix-python3-incompatibility
  - f238779a62 Merge branch '2017.7' into fix-python3-incompatibility
  - 6b1805afc6 Fixed Python 3 incompatibility in methods in nilrt_ip and debian_ip.
- **ISSUE #48637**: (slaws) state.file.retention_schedule does not ignore relative directory when using getmtime() (refs: #48662)
- **PR #48662**: (slaws) Excluding relative dirs in state.file.retention_schedule @ 2018-07-31 16:15:09 UTC
  - 136ff6735a Merge pull request #48662 from slaws/fix-retention-schedule-48637
  - 3c8f5b3d3 pylint fix
  - 5539eff39e Excluding relative dirs in state.file.retention_schedule
- **ISSUE #48818**: (guettli) Broken Link in Docs (refs: #48840)
- **PR #48840**: (gtmanfred) fix links in pkg doc. @ 2018-07-31 16:13:00 UTC
  - 1fc04f281b Merge pull request #48840 from gtmanfred/docs
  - 8dd268c4a fix links in pkg doc.
- **PR #48834**: (gtmanfred) read output of stringio if it is readable @ 2018-07-31 13:40:48 UTC
  - 0a19f845ea Merge pull request #48834 from gtmanfred/slsutil
  - f94412dbef read output of stringio if it is readable
- **PR #48788**: (Ch3LL) Add timzeone windows integration tests and fix get_zone @ 2018-07-27 20:14:30 UTC
  - 2e00939a6e Merge pull request #48788 from Ch3LL/timezone_windows
  - de95a6a215 add unused import to timezone test file
  - 22e424859e add unused import to import
  - 0840fc3117 disable pylint import error
  - f09d1a2c7e Add timzeon windows integration tests and fix get_zone
- **PR #48742**: (frogunder) add windows integration tests for states.file @ 2018-07-27 13:57:27 UTC
  - 8e61f3dce0 Merge pull request #48742 from frogunder/45014
  - f08058b043 Merge branch '45014' of https://github.com/frogunder/salt into 45014
• 757fde70c6 Merge branch '2017.7' into 45014
  - 33c20c1ec0 fix tests
  - a7a914060d add windows integration tests for states.file
• ISSUE #48417: (samilaine) Contribution Documentation Refers to Incorrect Pylintrc (refs: #48795)
• PR #48795: (rallytime) Update linting docs to contain .testing.pylintrc use @ 2018-07-27 13:34:13 UTC
  - d74f47b340 Merge pull request #48795 from rallytime/fix-48417
  - 5123b17ff6 Update linting docs to contain .testing.pylintrc use
• PR #48789: (rallytime) Back-port #48783 to 2017.7 @ 2018-07-26 21:47:49 UTC
  - PR #48783: (KaiSforza) Only run lint checks against changed files (refs: #48789)
  - PR #48610: (gtmanfred) only run pylintrc on files that change (refs: #48783)
  - bbea9ae936 Merge pull request #48789 from rallytime/bp-48783
  - d4ca03a97 test: except for OSError only
  - 4547231909 Only run lint checks against changed files
• PR #48731: (zer0def) Fixed enable_vnc runner arg being passed into seed_cmd module arg in virt.init. @ 2018-07-26 21:35:19 UTC
  - 41464d4b39 Merge pull request #48731 from zer0def/virt-runner-init-args
  - a1fa081ad0 Documentation to missing parameters in virt.init runner.
  - 365ebd539 Fixed enable_vnc runner arg being passed into seed_cmd module arg in virt.init.
• PR #48749: (Ch3LL) Update Saltstack Logo banner on docs.saltproject.io @ 2018-07-25 13:05:04 UTC
  - 169afea16a Merge pull request #48749 from Ch3LL/logo_docs
  - 73b1fc29f0 Update Saltstack Logo banner on docs.saltproject.io
• PR #48743: (rallytime) Update DOCBANNER with new SaltConf18 image @ 2018-07-24 16:46:19 UTC
  - 781c666c3b Merge pull request #48743 from rallytime/saltconf-ad-2017.7
  - 6df8fd8652 Update DOCBANNER with new SaltConf18 image
• PR #48720: (Ch3LL) Fix test_managed_source_hash_indifferent_case on macosx to correct tmp path @ 2018-07-23 22:32:56 UTC
  - ce4e22224e Merge pull request #48720 from Ch3LL/mac_file_path
  - 01d25fae19 Fix test_managed_source_hash_indifferent_case on macosx to correct tmp path
• PR #48719: (Ch3LL) Enable service if disabled before running state service tests @ 2018-07-23 21:01:14 UTC
  - 4b9f037d43 Merge pull request #48719 from Ch3LL/service_mac_state
  - f442a2fc349 Enable service if disabled before running state service tests
• PR #48715: (rallytime) [2017.7] Mark some tornado tests as flaky @ 2018-07-23 17:27:13 UTC
  - b2431eb10 Merge pull request #48715 from rallytime/flaky-tests
  - 7332ce6567 [2017.7] Mark some tornado tests as flaky
• PR #48672: (frogunder) add service enabled test @ 2018-07-23 15:38:49 UTC
  - 801ae3b88d Merge pull request #48672 from frogunder/45012
- 0747f2e58a add service enabled test

- **PR #48691**: (Ch3LL) Add windows pkg module integration tests @ 2018-07-22 20:01:30 UTC
  - 689c231d2b Merge pull request #48691 from Ch3LL/win_repo_pkg_test
  - 4b76d80c5 Remove unnecessary jinja in curl.sls file
  - 2bedadfa Add windows pkg module integration tests

- **ISSUE #48627**: (nbraud) acme module's group parameter is non-functional (refs: #48635)

- **ISSUE #48626**: (nbraud) acme module fails to set file permissions if the certificate is already present (refs: #48635)

- **PR #48635**: (nbraud) Bug fixes in the acme module & state @ 2018-07-22 19:53:49 UTC
  - 83e4ba916 Merge pull request #48635 from nbraud/acme
  - 3673b9e9de modules/acme: explicitly ignore the *perms* return value
  - 1800a231e8 Fixup some schema expectations
  - 8c718cb417 acme: Make the private key mode configurable
  - 917dea6761 modules/acme: Use file.check_perms ret-morphing powers
  - d2241ce6b2d module/acme: Do not exit early when the certificate already exists
  - 98af0db826 modules/acme: Set the private key filemode to 0640

- **PR #48345**: (twangboy) Fix behavior of powercfg module and state @ 2018-07-20 17:37:13 UTC
  - 85991680c8 Merge pull request #48345 from twangboy/fix_48169
  - ead19725b6 Merge branch '2017.7' into fix_48169
  - 653fbc383 Fix some docs errata
  - 8898e5ff11 Add warnUntil Fluorine
  - 707906ac15 Fix unit.state.test_powercfg
  - 32c5014eb6 Fix unit tests
  - 0d9c56e540 Add some more logging
  - b20453de9f Use minutes to set
  - 7dc7eb11c2 Fix documentation to denote seconds when setting

- **PR #48656**: (Ch3LL) Add windows ip module integration tests @ 2018-07-20 14:57:45 UTC
  - 96447ce541 Merge pull request #48656 from Ch3LL/windows_ip_mod
  - 90c3f568b1 Add windows ip module integration tests

- **PR #48638**: (twangboy) Remove vcredist 2015 from Py3 installer @ 2018-07-20 14:56:40 UTC
  - 0c5ff3dc8 Merge pull request #48638 from twangboy/fix_vcredist
  - e30d17099d Use goto instead of if statement
  - e1042f084 Remove vcredist for Py3

- **PR #48664**: (Ch3LL) [2017.7] Fix service.disabled test for macosx @ 2018-07-20 14:32:56 UTC
  - 1ebd96d909 Merge pull request #48664 from Ch3LL/srv_disable_mac
  - f1fbfad387 move the disable call up in try block
- f60d21bda4 reverse assertion order for service disable test
- 3727d1b3b9 switch try/except to match 2018.3
- fb953c2369 [2017.7] Fix service.disabled test for macosx

- PR #48625: (Ch3LL) Follow up to PR #48555 @ 2018-07-20 14:27:55 UTC
  - PR #48555: (Ch3LL) Fix state.sls_id not running on ssh minion (refs: #48625)
  - 3da3cf2f3f Merge pull request #48625 from Ch3LL/ssh_state
  - f590eb2b02 Update state.py
  - 9790ee3d0d Follow up to PR #48555

- PR #48673: (Ch3LL) Use different pub and ret ports for testprogram integration tests @ 2018-07-20 14:11:51 UTC
  - 33812f78f1 Merge pull request #48673 from Ch3LL/mac_port
  - 87dd85a220 Use different pub and ret ports for testprogram integration tests

- PR #48675: (Ch3LL) Fix mac service.disable tests @ 2018-07-20 14:09:41 UTC
  - 5f6a7c4d89 Merge pull request #48675 from Ch3LL/mac_disable
  - c78efab828 Fix mac service.disable tests

- ISSUE #43138: (F30) npm.installedmistakenly throws error for packages which are "installed via remote" (refs: #48492, #48658)

- PR #48658: (wyardley) Improve handling of json output (#43138) @ 2018-07-20 14:08:34 UTC
  - PR #48492: (wyardley) Improve identifying json out in npm module (#43138) (refs: #48658)
  - 93d2f51d2b Merge pull request #48658 from wyardley/wyardley-npm-json-output-2017
  - 7ff3c9c5ff Improve handling of npm json output (#43138)

- ISSUE #48677: (OrlandoArcapix) npm.bootstrap does not return True (clean) with test=true and no changes (refs: #48678)

- PR #48678: (OrlandoArcapix) Fix for issue #48677 - return clean npm.bootstrap on no changes @ 2018-07-20 14:07:22 UTC
  - 3e293b0513 Merge pull request #48678 from OrlandoArcapix/fix-npm-dryrun-test
  - 851a40f6b Fix for issue #48677 - return True when no changes are to be made with npm.bootstrap with test=true

- ISSUE #46884: (alexandergraul) salt.utils.rsax931._init_libcrypto() fails to initialize libopenssl1_1-1.1.0h (refs: #48580)

- PR #48580: (rallytime) Don't error on retcode 0 in libcrypto.OPENSSL_init_crypto call @ 2018-07-19 19:21:13 UTC
  - PR #37772: (bdrung) Support initializing OpenSSL 1.1 (refs: #48580)
  - 07a1f6520f Merge pull request #48580 from rallytime/fx-46884
  - 736b38e91 Don't error on retcode 0 in libcrypto.OPENSSL_init_crypto call

- PR #48628: (terminalmage) Fix NameError in testinfra module @ 2018-07-18 21:34:03 UTC
  - 9874429741 Merge pull request #48628 from terminalmage/testinfra
  - 5ace9f01ec Fix NameError in testinfra module
• PR #48651: (gtmanfred) [2017.7] handle pyzmq for python3.4 @ 2018-07-18 17:34:41 UTC
  - 0d4c80205f Merge pull request #48651 from gtmanfred/pylint-2017.7
  - b6ee52f859 handle pyzmq for python3.4
• PR #48647: (gtmanfred) [2017.7] disable checks on pylint @ 2018-07-18 16:21:22 UTC
  - 160ae29cf2 Merge pull request #48647 from gtmanfred/pylint-2017.7
  - ff8184ca2 disable checks on pylint

• ISSUE #4924: (chschmitt) Stale custom roster from __pycache__ executed instead of changed .py file (refs: #48593)

• PR #45893: (pritambaral) Fix importlib pyc loading order @ 2018-07-17 21:06:28 UTC
  - 47b1032ef0 Merge pull request #45893 from pritambaral/fix/2017.7-importlib-pyc-loading-order
  - ad7894be58 Fix suffix order when importlib is used
• PR #48630: (dubb-b) Adding options to Jenkins pipeline builds @ 2018-07-17 20:16:23 UTC
  - 9da7b2ec8d Merge pull request #48630 from dubb-b/pipeline-updates
  - 859a8dd05 Adding PY_COLORS=1 as PY_COLORS = 1 instead
  - 314b0e3599 Adding PY_COLORS=1 for python programs to use ANSI Colors
  - b705e8f7a5 Adding correct spacing to options section
  - 9da8a7e077 Adding options to Jenkins pipeline builds
  - PR saltstack/salt#48610: (gtmanfred) only run pylint on files that change (refs: #48633)

• PR #48633: (gtmanfred) Revert "only run pylint on files that change" @ 2018-07-17 18:44:03 UTC
  - a8ae2ad6f4 Merge pull request #48633 from saltstack/revert-48610-2017.7
  - bab4a769d4 Revert "only run pylint on files that change"

• PR #48614: (rallytime) Back-port #48562 to 2017.7 @ 2018-07-17 15:04:04 UTC
  - 6e32bb1f74 Merge pull request #48614 from rallytime/bp-48562
  - cb654bb2c Add timeouts to all s3 queries

• ISSUE #48415: (doesitblend) Event.send short-circuiting in multi-master mode (refs: #48588)

• PR #48588: (garethgreenaway) [2017.7] event send multi master @ 2018-07-17 10:31:20 UTC
  - 1b6e38888f Merge pull request #48588 from garethgreenaway/48415_event_send_multi_master
  - fab25af1a9 Adding some quick documentation about why we are setting ret=True following the channel.send.
  - bf784b1f88 If the channel send is successful and does not raise an exception, we set ret to True, in case a previous exception from a previous channel send to another master has sent it to False.
  - 8d1551cf5b When using Salt multi-master, if we encounter a salt master that has not accepted the minion key yet we should not exit right away, rather continue on and try the next salt master available in the list.

• PR #48610: (gtmanfred) only run pylint on files that change (refs: #48783) @ 2018-07-17 01:36:50 UTC
  - 24fda49ba Merge pull request #48610 from gtmanfred/2017.7
  - 779d1a3dcb only run pylint on files that change
• **PR #48584:** (Ch3LL) Fix grp import for mac in test_user integration test @ 2018-07-16 19:28:13 UTC
  - 5391dd0a8d Merge pull request #48584 from Ch3LL/mac_user_grp
  - 585ee9db90 Fix grp import for mac in test_user integration test

• **PR #48555:** (Ch3LL) Fix state.sls_id not running on ssh minion (refs: #48625) @ 2018-07-16 13:24:41 UTC
  - 61572b6780 Merge pull request #48555 from Ch3LL/ssh_id
  - f69932f506 fix pylint
  - 70e36764ee Add more tests for salt-ssh state.sls_id
  - dab80e805c Fix state.sls_id to run on ssh minion and not master

• **PR #48583:** (Ch3LL) Add flaky decorator to mac_system and mac_timezone tests @ 2018-07-13 19:56:40 UTC
  - aa6def39e8 Merge pull request #48583 from Ch3LL/mac_flaky_tests
  - 4ba2299a87 import flaky decorator on mac tests
  - 811220b41e Add flaky decorator to mac_system and mac_timezone tests

• **PR #48534:** (xetix) Fix behaviour of function latest_version in zypper module when multip... @ 2018-07-13 19:56:05 UTC
  - 6973152057 Merge pull request #48534 from xetix/fix-zypper-latest_version
  - 9985f0b4c1 Lint: remove extra blank line
  - 5f8ed8a36 Merge branch '2017.7' into fix-zypper-latest_version
  - 56ac449271 Merge branch 'fix-zypper-latest_version' of https://github.com/xetix/salt into fix-zypper-latest_version
    - 44e87f5a0f Adding testcase for this fix.
    - b354c6863c Fix behaviour of function latest_version in zypper module when multiple packages are passed to function. Function now properly return dict with empty string as version if latest packages is already installed, and multiple packages are passed to function
  - db35d0c1e1 Adding testcase for this fix.
  - d2513757ed Fix behaviour of function latest_version in zypper module when multiple packages are passed to function. Function now properly return dict with empty string as version if latest packages is already installed, and multiple packages are passed to function

• **PR #48582:** (dwoz) Finally fix prepend for real @ 2018-07-13 18:45:35 UTC
  - 10124034cb Merge pull request #48582 from dwoz/test_prepend_fix
  - f37571e0bd Merge branch '2017.7' into test_prepend_fix

• **PR #48564:** (dwoz) Fix failing prepend test @ 2018-07-13 14:12:47 UTC
  - 13f67335f3 Merge pull request #48564 from dwoz/test_prepend_fix
    - 136df55f54 Finally fix prepend for real
  - 66b25e65bf Fix failing prepend test

• **PR #48558:** (dwoz) Remove which mock to get the test passing @ 2018-07-12 19:04:12 UTC
  - b8ce27729f Merge pull request #48558 from dwoz/test_file_fix
  - c85bf477f Remove which mock to get the test passing

• **PR #48552:** (KaiSforza) Set up junit in jenkins @ 2018-07-12 16:23:33 UTC

32.2. Previous releases
Salt Documentation, Release 3006.4

- a15c65202d Merge pull request #48552 from KaiSforza/jenkins-junit-2017
- 72b1830974 Set up junit in jenkins

**PR #48550:** (gtmanfred) add posargs to tox pylint @ 2018-07-12 14:34:25 UTC
- f73108026e Merge pull request #48550 from gtmanfred/2017.7
- d5c60d39b6 add posargs to tox pylint

**PR #48535:** (asnell) Update manage_file helptext @ 2018-07-12 13:34:47 UTC
- 113b0426f8 Merge pull request #48535 from asnell/asnell-patch-2
- d328f6e43d Update manage_file helptext
- PR saltstack/salt#48525: (gtmanfred) add kazoo for testing zookeeper. (refs: #48527)

**PR #48527:** (gtmanfred) Revert "add kazoo for testing zookeeper." @ 2018-07-11 17:29:16 UTC
- 0c0c05c2bc Merge pull request #48527 from saltstack/revert-48525-2017.7
- 18d06c1a93 Revert "add kazoo for testing zookeeper."

**PR #48526:** (twangboy) Rollback python-certifi-win32 @ 2018-07-11 17:26:56 UTC
- 05bad3e71c Merge pull request #48526 from twangboy/rollback_certifi-win32
- 361b3dc2f Rollback python-certifi-win32

**PR #48521:** (Martin819) Back-port #48222 to 2017.7 @ 2018-07-11 16:42:51 UTC
- PR #48222: (Martin819) Fix GlusterFS module for version 4.0 and above (refs: #48521)
- db066e6f4e Merge pull request #48521 from Martin819/2017.7
- d5d01f6f89 Fix for GlusterFS 4.0 and above

**PR #48525:** (gtmanfred) add kazoo for testing zookeeper. @ 2018-07-11 16:09:40 UTC
- ed0bd2b2bc Merge pull request #48525 from gtmanfred/2017.7
- d7a6bffb2b add kazoo for testing zookeeper.

**ISSUE #48277:** (dvenckus) init.sls with included states fails with more than one, 'Template was specified incorrectly: False' (refs: #48388)

**ISSUE #46986:** (github-abcde) opts file_roots gets overwritten with pillar_roots in orchestration run (refs: #48388)

**PR #48388:** (garethgreenaway) [2017.7] reset file_roots for renderers after compile_pillar @ 2018-07-11 13:13:45 UTC
- ad5a959ab9 Merge pull request #48388 from garethgreenaway/48277_2017_7_file_roots_wrong
- 6f11da35a7 Fixing a few things in the new test.
- cf74b74ec Fixing lint issue
- 16d36c79c8 When pillar items are compiled a new render is instantiated but the file_roots is the pillar_roots. This change forces the _opts_['file_roots'] to be set to what is set in actual_file_roots for all renderers once compile_pillar has finished. Adding a test when this situation is run via a orchestration runner.

**PR #48512:** (gtmanfred) pin pm and grunt packages for npm tests @ 2018-07-11 13:06:06 UTC
- 38d812257 Merge pull request #48512 from gtmanfred/npm
- 9ba0f6b3a0 pin pm and grunt packages for npm tests
• PR #48513: (rallytime) [2017.7] Merge forward from 2017.7.7 to 2017.7 @ 2018-07-11 13:04:01 UTC
  – 04ba31147f Merge pull request #48513 from rallytime/merge-2017.7
  – a466a4880f Merge branch '2017.7.7' into '2017.7'
• PR #48514: (gtmanfred) upgrade dependencies for pytest tests @ 2018-07-10 20:53:55 UTC
  – f0352ea95a Merge pull request #48514 from gtmanfred/2017.7
  – 739bf92599 upgrade dependencies for pytest tests
• PR #48491: (grokrecursion) Group gid fixed as integer @ 2018-07-10 19:31:40 UTC
  – 5372b60137 Merge pull request #48491 from grokrecursion/group-fix-v2
  – 1556b37221 fixed pylint errors
  – 6fd9177dab fixed indentation for pep8
  – b9556bf923 v2 try of gid converted to integer
• PR #48375: (Ch3LL) Add user and group to makedirs cmd in file.copy @ 2018-07-10 12:35:10 UTC
  – 16d3daab3c Merge pull request #48375 from Ch3LL/file_copy
  – d16a790775 Add mode to _makedirs call in file.copy
  – 2cbcb4fd26 Add user and group to makedirs cmd in file.copy
• PR #48490: (KaiSforza) Cifixes @ 2018-07-09 15:20:46 UTC
  – d38951b1b3 Merge pull request #48490 from KaiSforza/cifixes
  – 9fe7f190af5 Mark failed if anything is found
  – 6749a6bf19 Stop archiving the docs
• PR #48472: (gtmanfred) use tox to run pylint @ 2018-07-07 02:46:46 UTC
  – 22cd4206c4 Merge pull request #48472 from gtmanfred/2017.7
  – c7a3a7d8bd update jenkins tests to use tox for lint
  – 44aaac1d33 use tox to run pylint
• PR #48476: (twangboy) Fix dependencies @ 2018-07-06 23:43:26 UTC
  – 27ea8f35ea Merge pull request #48476 from twangboy/fix_dependencies
  – b0087d425c Add license info
  – 935f9b560c Fix dependencies
• ISSUE #48336: (JuanManuelVizcainoAbad) file.directory (refs: #48399)
• PR #48399: (garethgreenaway) [2017.7] fixes to module/file.py @ 2018-07-06 18:02:29 UTC
  – acf42864aa Merge pull request #48399 from garethgreenaway/48336_2017_7_ensure_chmod_setuid_with_chown
  – 8efd33320f Normalize the mode before we compare it.
  – f894f0ecb8 Setting the mode with setuid or setgid bits in addition to setting the owner and group will force the setuid & setgid bits to reset. This change ensures that we set the mode after setting the owner & group.
• PR #48471: (gtmanfred) Add some configurations to tox @ 2018-07-06 17:45:55 UTC
  – 6166ff6b78 Merge pull request #48471 from gtmanfred/2017.7
  – 392ab4e51f Add some configurations to tox

  - 6857bedcc2 Add warnings plugin to replace violations
- PR #48363: (dubb-b) Changing debug to info for logging @ 2018-06-28 20:45:17 UTC
  - 14db0aa35d Merge pull request #48363 from dubb-b/2017.7
  - c0b962e28d Changing debug to info for logging
- PR #48352: (Ch3LL) Add missing key to accept_dict function in wheel docs @ 2018-06-28 13:54:37 UTC
  - 5b29d326f Merge pull request #48352 from Ch3LL/wheel_doc
  - 89ada68165 Add missing key to accept_dict function in wheel docs
- PR #48329: (rallytime) Trigger review requests for team-ssh for roster files @ 2018-06-28 13:53:42 UTC
  - 02cf19ee3b Merge pull request #48329 from rallytime/codeowners-roster-files
  - 5e56615e00 Trigger review requests for team-ssh for roster files
• ISSUE #48316: (ralex) Wrong init system used in virtual module "service" on Manjaro (refs: #48349)

• PR #48349: (ralex) Disable the "service" module on Manjaro since it is using systemd @ 2018-06-28 13:32:37 UTC
  - 53cf1794be Merge pull request #48349 from ralex/fix-manjaro-service-behaviour
  - 6caee547e Disable the service module on Manjaro since it is using systemd

• PR #48324: (Ch3LL) Update release versions for the 2017.7 branch @ 2018-06-27 13:44:22 UTC
  - 89dfc30a4e Merge pull request #48324 from Ch3LL/update_version_doc_2017.7
  - 47845ba810 Update release versions for the 2017.7 branch

• PR #48331: (rallytime) Back-port #48215 to 2017.7 @ 2018-06-27 13:12:35 UTC
  - PR #48215: (KaiSforza) Notify during tests using different credentials (refs: #48331)
  - ece4c30a4e Merge pull request #48331 from rallytime/bp-48215
  - 9d6ba3e247 Set jobs to pending when they come in
  - 727d2b4ffe Use proper creds with githubNotify
  - d355861c5c Test using different credentials

• PR #48332: (rallytime) Back-port #48321 to 2017.7 @ 2018-06-27 13:12:15 UTC
  - PR #48321: (KaiSforza) Jenkins needs the / to get the directory (refs: #48332)
  - ab05e00d8c Merge pull request #48321 from rallytime/bp-48321
  - d72af6ab4e Jenkins needs the / to get the directory

• ISSUE #42659: (szin2012) rest_tornado is not able to return normal result (refs: #48193, #48295)

• PR #48295: (rallytime) Back-port #48193 to 2017.7 @ 2018-06-26 23:42:18 UTC
  - PR #48193: (jacksontj) Properly wait on returns in saltnado (refs: #48295)
  - 21ed5b97ce Merge pull request #48295 from rallytime/bp-48193
  - 352fe3fd6 Separate set_result() to a new line apart from Future() call
  - c0180ff3d Properly configure syndic in test case
  - d09853a9 Properly wait on returns in saltnado

• ISSUE #48122: (pasmon) Salt minion 2017.7.6 disregards "bin_env" in pip state (refs: #48189)

• PR #48117: (twangboy) service.disabled on Windows @ 2018-06-26 23:35:59 UTC
  - 9aa4687ab9 Merge pull request #48117 from twangboy/fix_48026
  - dd3f8fbc2 Disable services that are set to manual

• ISSUE #48112: (pasmon) Salt minion 2017.7.6 disregards "bin_env" in pip state (refs: #48189)

• PR #48207: (rallytime) Back-port #48189 to 2017.7 @ 2018-06-25 19:26:56 UTC
  - PR #48189: (gtmanfred) If pip binary is passed to bin_env, use that pip binary (refs: #48207)
  - caf630487e Merge pull request #48207 from rallytime/bp-48189
  - 9d90e0375 Use old is_windows utils path on 2017.7
  - b965d6c9b3 If pip binary is passed to bin_env, use that pip binary

• ISSUE #45383: (jodok) RabbitMQ commands fail due to wrong locale (refs: #47453)

• PR #48293: (rallytime) Back-port #47453 to 2017.7 @ 2018-06-25 19:06:42 UTC
- **PR #47453**: (dqminh) don't reset system locale when running rabbitmqctl commands (refs: #48293)
  
  - 06a20c5d63 Merge pull request #48293 from rallytime/bp-47453
  
  - e96ba6778e don't reset system locale when running rabbitmqctl commands

- **PR #48219**: (zer0def) Fix: LXC legacy configuration key warnings falsely report errors during state change @ 2018-06-25 13:46:07 UTC
  
  - 95ef006e00 Merge pull request #48219 from zer0def/lxc-bootstrap-fixes
  
  - c77058560b Merge branch '2017.7' into lxc-bootstrap-fixes
  
  - d63cf3f072 Fixes another case of legacy configuration key usage warning getting in the way of changing container's state.

- **ISSUE #46507**: (akv16786) Failed to return clean data (refs: #48234)

- **PR #48234**: (dwoz) Fix: py2 thin dir issues @ 2018-06-25 13:33:02 UTC
  
  - 3327181507 Merge pull request #48234 from dwoz/thin_dir
  
  - 70c630451b Fix py2 thin dir issues

- **ISSUE #47984**: (jeduardo) x509 module/state writing wrong certificate serial number to CRL (refs: #48080)

- **PR #48080**: (lusche) Bugfix: messed up cert serial @ 2018-06-22 18:00:14 UTC
  
  - 83d7d286c4 Merge pull request #48080 from lusche/2017.7
  
  - 917dc9f85c remove the line completely
  
  - ba12ee947b Merge branch '2017.7' of https://github.com/saltstack/salt into 2017.7
  
  - db135d5051 Bugfix: messed up cert serial

- **PR #48232**: (gtmanfred) do not expand kwargs for cloud.action @ 2018-06-22 15:49:21 UTC
  
  - bcc414d146 Merge pull request #48232 from gtmanfred/cloud
  
  - d108112e1a do not expand kwargs for cloud.action

- **PR #48238**: (mirceaulinic) SDB cache module: AttributeError: 'Cache' object has no attribute 'set' @ 2018-06-22 15:37:22 UTC
  
  - 05f64f3663 Merge pull request #48238 from mirceaulinic/fix-sdb-cache
  
  - 516568ba1d SDB cache module: AttributeError: 'Cache' object has no attribute 'set'

- **ISSUE #48025**: (onmeac) Autoloading Utility Modules? (refs: #48037)

- **PR #48037**: (terminalmage) Add "sync_mods" argument to state.apply/state.sls @ 2018-06-21 19:57:03 UTC
  
  - 731ec00a11 Merge pull request #48037 from terminalmage/fix-custom-types-sync-docs
  
  - 052a83c4b Update versionchanged
  
  - 8b1bd0eda2 Update test to reflect changed argument name
  
  - 5e7596198 Change 2018.3.2 to 2018.3.3
  
  - c53ad603f3 Rename sync -> sync_mods per review suggestion
  
  - e4d67c5fd8 Update docs to include references to new "sync" argument
  
  - cb86e9f9b8 Remove redundant mocking
  
  - bc3ad795e9 Add test for sync argument to state.sls
  
  - f81ccd1fdd Add sync option to state.apply/state.sls
5484 Chapter 32. Release notes

- 8289b07e24 Fix documentation on when custom types are synced

  - PR #48249: (rallytime) Update release notes for 2017.7.7 @ 2018-06-21 18:30:39 UTC
    - 0bae927048 Merge pull request #48249 from rallytime/2017.7.7-release-notes-update
    - 360328ee87 Update release notes for 2017.7

  - PR #48242: (asnell) Add sample list data via command line pillar @ 2018-06-21 18:27:41 UTC
    - 8e06471817 Merge pull request #48242 from asnell/asnell-patch-1
    - f66bf60073 Add sample list data via command line pillar

  - PR #48226: (terminalmage) 2 fixes for when Salt is installed using -OO @ 2018-06-20 20:12:34 UTC
    - a172f9de84 Merge pull request #48226 from terminalmage/fix-alias-docstring
    - fb237272f5 Don't display "None" in SaltInvocationError when Salt installed using -OO
    - 90c90f5d5c Fix docstring construction in alias_function when Salt installed using -OO

  - PR #48227: (Ch3LL) Skip new sha256 files on repo.saltstack.com/windows @ 2018-06-20 20:12:09 UTC
    - c6a0207cae Merge pull request #48227 from Ch3LL/fix_win_tests
    - 236773e3e9 Skip new sha256 files on repo.saltstack.com/windows

  - ISSUE #48128: (bowmanjd-lms) apk.py Python 3 compatibility (refs: #48131)

  - PR #48131: (bowmanjd-lms) Fix py3-incompatible dict.keys()[x] call in apk.py @ 2018-06-19 18:19:02 UTC
    - 6929423528 Merge pull request #48131 from bowmanjd-lms/fixed-apk-python3
    - f5d2835299 Merge branch '2017.7' into fix-apk-python3
    - 0229f9cb50 Fix py3-incompatible dict.keys()[x] call in apk.py

  - ISSUE #47901: (frogunder) 2017.7.6 - Exiting command with CTRL-C gives Error/Traceback (refs: #48185)

  - PR #48185: (DmitryKuzmenko) Don't call .exception() on future unless it's done. @ 2018-06-19 18:16:27 UTC
    - 868c17377f Merge pull request #48185 from DSRCorporation/bugs/47901_future_done_exception
    - 5f63316311 Merge branch '2017.7' into bugs/47901_future_done_exception
    - 9f2dbf94cb Don't call .exception() on future unless it's done.

  - PR #48192: (twangboy) Use the --disable-pip-version-check option (2017.7) @ 2018-06-19 18:13:12 UTC
    - 80a3e37c2e Merge pull request #48192 from twangboy/fix_pip_version_2017.7
    - 59a2cc5fc Use --disable-pip-version-check for build_env_.ps1

  - PR #48201: (zer0def) Fixes to LXC bootstrap when alternate lxcpath is provided. @ 2018-06-19 12:56:40 UTC
    - 12e2b8882a Merge pull request #48201 from zer0def/lxc-bootstrap-fixes
    - 6f6d3d40d4 Take lxcpath into account when bootstrapping new containers. Version comparison fixes.

  - PR #48190: (terminalmage) Fix mount.vfstab unit test @ 2018-06-18 21:47:54 UTC
    - e079f5ed38d Merge pull request #48190 from terminalmage/fix-vfstab-test
    - 8d70d414362 Fix mount.vfstab unit test

  - PR #48115: (KaiSforza) Add jenkinsfiles to define tests in 2017 @ 2018-06-18 21:27:40 UTC
    - c8b9ce9c86 Merge pull request #48115 from KaiSforza/pr-lint-2017
    - 494727ab39 Add docs, kitchen tests
- 317023bb20 Move .jenkins to .ci for future
- dedc313cee Make it parallel so we don't fail right away
- cd13426726 Add a .jenkins file to run pylint

**PR #48174:** (terminalmage) Add docker.update_mine config option @ 2018-06-18 19:04:54 UTC
  - fc1752b721 Merge pull request #48174 from terminalmage/docker-update-mine
  - 9af09e0127 Mock config.get due to changes in _refresh_mine_cache
  - c5802ad465 Fix the version number in versionadded
  - d403ae58d7 Add unit test for docker.update_mine
  - 44c275698a Actually it's more than just add/remove that updates the mine
  - 0cb6996b07 Add release notes mention of docker.update_mine config option
  - de05097b20 Add docs for new config option
  - 04c55a9178 Add note in mine.get_docker docstring about new config item
  - 4e456255c0 Allow mine update to be disabled using new config option

**ISSUE #47031:** (lejambon) Cannot set hwclock on UTC on CentOS 7 (refs: #47049, #48061)

**PR #48061:** (garethgreenaway) [2017.7] Porting #47049 to 2017.7. @ 2018-06-15 17:15:50 UTC
  - PR #47049: (lejambon) Centos set utc hwclock (refs: #48061)
  - df2a156338 Merge pull request #48061 from garethgreenaway/port_47049_2017_7
  - 7c472fed51 Fixing failing test_set_hwclock_aix test.
  - ccb0acc958 Porting #47049 to 2017.7.

**PR #48143:** (Ch3LL) Add timeout argument to run_salt for ShellCase @ 2018-06-15 17:04:57 UTC
  - 5ec3cf2dd4 Merge pull request #48143 from Ch3LL/fix_long_job
  - 48b5d2e9d3 Add timeout argument to run_salt for ShellCase

**PR #48135:** (rallytime) Update the 2017.7.7 and 2017.7.8 release notes @ 2018-06-14 21:22:06 UTC
  - PR #48134: (rallytime) Add release notes file for 2017.7.7 (refs: #48135)
  - e1e566d1f8 Merge pull request #48135 from rallytime/release-notes-2017.7
  - 7a97f157b3 Add missing v for tag reference
  - 2f2b69ed37 Add "in progress" notation to 2017.7.7 release notes
  - 06a1151a63 Add release notes file for 2017.7
  - 885b2862ce Move 2017.7.7 release notes to 2017.7.8

**PR #48105:** (rallytime) [2017.7] Merge forward from 2017.7.6 to 2017.7 @ 2018-06-14 17:00:09 UTC
  - ac9dabfbaf Merge pull request #48105 from rallytime/merge-2017.7
  - cdb45874de Merge branch '2017.7.6' into '2017.7'

**PR #48101:** (rallytime) [2017.7] Update 2017.7.7 reference to 2017.7.8 @ 2018-06-14 13:14:09 UTC
  - 2da56a69d9 Merge pull request #48101 from rallytime/update-doc-ref-2017.7
  - 7ba6f5f3b6 Update 2017.7.7 reference to 2017.7.8
• **PR #48091**: (terminalmage) Reverse monkeypatching after test_symlink_list finishes @ 2018-06-13 18:02:53 UTC
  - 5a0e3d46e7 Merge pull request #48091 from terminalmage/fix-file_roots-monkeypatching
  - 6fe711ad76 Reverse monkeypatching after test_symlink_list finishes

• **PR #48088**: (rallytime) Update release versions for the 2017.7 branch @ 2018-06-13 14:03:03 UTC
  - 053b019a8f Merge pull request #48088 from rallytime/update_version_doc_2017.7
  - 1b8d1c936b Remove "in progress" info for 2017.7.6 release notes
  - 9a0f4d190a Update release versions for the 2017.7 branch

• **ISSUE #48038**: (austinpapp) jobs are not dedup'ing minion side (refs: #48075)

• **PR #48075**: (garethgreenaway) [2017.7] Ensure that the shared list of jids is passed @ 2018-06-13 13:25:35 UTC
  - d6d2c5ee18 Merge pull request #48075 from garethgreenaway/48038_jobs_are_not_deduping_minion_side
  - c537b3275b Ensure that the shared list of jids is passed when creating the Minion. Fixes an issue when minions are pointed at multiple syndics.

• **PR #48071**: (terminalmage) Fix inaccurate gitfs_saltenv example in GitFS Walkthrough @ 2018-06-12 20:34:13 UTC
  - aa33cc0b0c Merge pull request #48071 from terminalmage/gitfs-docs
  - 24545204b3 Fix inaccurate gitfs_saltenv example in GitFS Walkthrough

• **ISSUE #48039**: (twellspring) github.repo_present returns stacktrace, got multiple values for keyword argument profile (refs: #48040)

• **PR #48053**: (rallytime) Back-port #48040 to 2017.7 @ 2018-06-12 14:46:12 UTC
  - PR #48040: (twellspring) states/github.py fix for incorrect positional argument (refs: #48053)
  - fb4ceacb88 Merge pull request #48053 from rallytime/bp-48040
  - 265b22b194 states/github.py fix for incorrect positional argument

• **PR #48024**: (gtmanfred) add pytest coverage and xml junits @ 2018-06-12 14:03:26 UTC
  - f37dcaac6d Merge pull request #48024 from gtmanfred/2017.7
  - 56b074ab27 allow specifying a different state to run on converge
  - cc9c4b4d5a add pytest coverage and xml junits

• **PR #48044**: (twangboy) Add fail code for WinHTTP send/receive error @ 2018-06-11 13:49:29 UTC
  - ffee3576ec Merge pull request #48044 from twangboy/wua_add_fail_code
  - d4d10c25eb Add fail code for WinHTTP send/receive error

• **PR #48009**: (dwoz) minionswarm runs on windows @ 2018-06-08 13:52:36 UTC
  - 871a910fcb Merge pull request #48009 from dwoz/winswarmfix
  - 5027cb8b84 minionswarm runs on windows

• **PR #47968**: (gtmanfred) Clean up tox + pytest @ 2018-06-06 21:23:52 UTC
  - 0dcaead36d Merge pull request #47968 from gtmanfred/2017.7
  - ae1b0d28bb pass LANG and HOME into tox commands
  - 8d15b93d00 remove tox virtualenvs from doc tests
- e1872e2036 simplify tox.ini
- 81bd01f5af add tests.txt for running tests with tox requirements
- 556a2067fc fix masterapi test to use testing directory for configs
- 5a4f484ef add EXPENSIVE_TESTS
- 055cd5a6ba set DESTRUCTIVE_TESTS environment variable for pytest

• **PR #47978:** (twangboy) Add try/finally, fix typo in 7zip def file @ 2018-06-06 19:06:04 UTC
  - 42dd6b383eb Merge pull request #47978 from twangboy/fix_test_pkg
  - 8bb36b34ab Add try/finally, fix typo in 7zip def file

• **PR #47959:** (twangboy) Fix failing test when service doesn’t exist @ 2018-06-06 19:05:43 UTC
  - a67b21ef3d Merge pull request #47959 from twangboy/fix_test_service
  - 0cd47aa81e Remove unused import
  - d4b42540e3 Fix failing test when service doesn’t exist

• **ISSUE #30367:** (paulfanelli) salt-run orchestration via state.sls always successful; it is ignoring state return value (refs: #47843)

• **PR #47983:** (garethgreenaway) [2017.7] Backporting #47843 @ 2018-06-06 19:03:15 UTC
  - PR #47843: (garethgreenaway) [2018.3] orchestration results False when function is False (refs: #47884)
  - b81d482067 Merge pull request #47884 from garethgreenaway/backport_47843_2017_7
  - 7b7fb15fd5 Adding missing test sls file.
  - 54e51bc627 Backporting #47843 to 2017.7, updating test for 2017.7.

• **PR #47533:** (twangboy) Fix issues with functions that use makedirs on Windows @ 2018-06-06 17:20:51 UTC
  - d56ddad22c Merge pull request #47533 from twangboy/fix_47178
  - 24717cbc21 Change version added to 2017.7.7
  - 0592f1ac2f Fix issues with functions that user makedirs on Windows

• **PR #47827:** (twangboy) Fix issue when archive is on mapped drive @ 2018-06-06 17:18:00 UTC
  - 5c56ba755 Merge pull request #47827 from twangboy/fix_47791
  - fbdb9f109e Add more descriptive debug message
  - 365f81651b Fix deprecated exception handling
  - 8dd6710b93 Use local instead of network
  - 980d99d74b Fix issue when archive is on mapped drive

• **ISSUE #47888:** (mbunkus) postfix.set_main overwrites wrong keys (refs: #47966)

• **PR #47966:** (mbunkus) Fix postfix.set_main’s assumption of prefix-free key names @ 2018-06-06 15:43:24 UTC
  - 998a1c13d5 Merge pull request #47966 from mbunkus/fix-postfix-prefix-free-key-names-assumption
  - 0ae402db5 Fix postfix.set_main’s assumption of prefix-free key names

• **PR #47824:** (twangboy) Fix issues with setup.py in Windows @ 2018-06-05 17:39:53 UTC
  - df50ec7b11b Merge pull request #47824 from twangboy/fix_setup.py
  - 4538b3abb3 Remove ‘len-as-condition’ disablement
- d4efcc3c8b Skip lint errors
- 1b39778d4 Remove m2crypto download for Windows

**PR #47922**: (damon-atkins) win_pkg: pkg.refresh_db verbose=True PY3 compatibility fix @ 2018-06-05 13:31:49 UTC

- 3e91a31134 Merge pull request #47922 from damon-atkins/2017.7_win_pkg_keys_fix
- 7129203b1b Merge branch '2017.7' into 2017.7_win_pkg_keys_fix

**PR #47933**: (terminalmage) Clarify pillar.get docs @ 2018-06-04 14:07:58 UTC

- 8008fca2f6 Merge pull request #47933 from terminalmage/add-pillar.get-docs
- 4eb022b675 Clarify pillar.get docs

**PR #47944**: (terminalmage) Replace use of deprecated argument name in git.detached docstring @ 2018-06-04 13:53:34 UTC

- ab56bfaa3 Merge pull request #47944 from terminalmage/fix-git.detached-docs
- 1d082b4389 Replace use of deprecated argument name in git.detached docstring
- 6253793c6b Merge branch '2017.7' into 2017.7_win_pkg_keys_fix

**PR #47860**: (terminalmage) Clean up doc build warnings, add best practices for writing states @ 2018-06-01 14:42:55 UTC

- a2b588299b Merge pull request #47860 from terminalmage/state-writing-docs
- 8cb33d3dec Quiet the linter
- af51e16f23 Use more elegant RST syntax
- 91cd57d1e0 Update mocking to reflect changes in service module
- b9ace5a859 Fix crappy mocking
- bc9e3ace3f Lint fixes
- d37f7e4f04 Add 2017.7.6 release notes
- 9ddeeefab Improve documentation on syncing states
- f465fa3ca7 Add best practices docs for writing states
- 93ee5ee2b0 Fix all Sphinx warnings
- 64b9b4d0b8 Clarify that name would override the id declaration

**PR #47877**: (dwoz) Revert job chunk wait time change @ 2018-06-01 14:11:46 UTC

- d2f3377b5b Merge pull request #47877 from dwoz/sleep_audit
- ebc7cde9cb Revert job chunk wait time change
  - 4ce0fe6546 win_pkg under py3 keys returns a view instead of a list, wrap keys in list()

**PR #47917**: (dwoz) Fix windows tests suite breakage @ 2018-06-01 11:42:15 UTC

- PR #47500: (dwoz) Get the current username on windows (refs: #47917)
- 735e92093e Merge pull request #47917 from dwoz/winsuite
- 118601ebd6 Fix windows tests suite breakage

**PR #47822**: (Ch3LL) Add user state integration tests to windows @ 2018-05-30 21:13:07 UTC

- 63efb76d51 Merge pull request #47822 from Ch3LL/win_user_test
- 3a691b405f add user_home path for both windows and linux
- 788abf771e Add user state integration tests to windows

- **PR #47876**: (doesitblend) Add file read windows @ 2018-05-30 14:03:55 UTC
  - b9daf1221 Merge pull request #47876 from doesitblend/add-file-read-windows
  - 3f7e7ec327 Add file.read function to Windows module

- **PR #47882**: (frogunder) add whoami test @ 2018-05-30 13:47:13 UTC
  - cbe2cfae8 Merge pull request #47882 from frogunder/45013
  - 38d114a2d2 add whoami test

- **PR #47853**: (dwoz) Fix for py3 ec2 cloud tests @ 2018-05-28 23:08:09 UTC
  - 4b28e510f1 Merge pull request #47853 from dwoz/py3-cloud-test
  - c2f8ae7c5 Fix for py3 ec2 cloud tests

- **ISSUE #47833**: (blefeuvr) reactor.add | list | delete -> python exception (refs: #47847)

- **PR #47847**: (garethgreenaway) [2017.7] reactor runner documentation @ 2018-05-25 23:23:31 UTC
  - 215efa6b73 Merge pull request #47847 from garethgreenaway/47833_reactor_runner_documentation
  - 03676712de Adding some addition documentation to the reactor runner indicating that the reactor system must be active prior to using it.

- **PR #47846**: (Ch3LL) Fix flaky refresh pillar integration test @ 2018-05-25 20:50:48 UTC
  - 0bf651b470 Merge pull request #47846 from Ch3LL/p_refresh_test
  - 019edad8e Fix flaky refresh pillar integration test

- **PR #47552**: (twangboy) Show GPO settings, raise error if trying to set gpo managed settings @ 2018-05-25 20:41:22 UTC
  - 799fceb97d Merge pull request #47552 from twangboy/fix_46981
  - cffce9b7806 Merge branch '2017.7' into fix_46981
  - 81308a4a44 Add release notes for 2017.7.7
  - 008a0ac6b Fix unit tests
  - 87097eeb6 Add comments about how get is returning data
  - f1f1f5c5c1 Show GPO settings, raise error if trying to set gpo managed settings

- **ISSUE #47690**: (lomeroe) productname grain missing on Solaris (refs: #47691)

- **PR #47691**: (lomeroe) Update regexes for Solaris 'product' grain and copy to 'productname' grain @ 2018-05-25 20:38:18 UTC
  - ffc2ebc373 Merge pull request #47691 from lomeroe/solaris_product_grains
  - 6889bf6c6b Merge branch '2017.7' into solaris_product_grains
  - 49053bc106 lint fix
  - 6f185c9179 another lint fix
  - dbffba6876 fix tons of errors in my tests
  - 8e9355d34c Lint fix
- b29ec75da7 Update regexes in core grains for detecting the 'product' grain on Solaris Sparc systems. Additionally, copy the 'product' grain to 'productname' to be consistent with other OSes.

- **PR #47778:** (Ch3LL) Add test_pkg integration state tests to windows @ 2018-05-25 20:36:47 UTC
  - 96b7c0cc76 Merge pull request #47778 from Ch3LL/win_state_pkg
  - e1786de6b0 Merge branch '2017.7' into win_state_pkg
  - f8c467d3e6 Fix text editor error
  - 872e162137 Add test_pkg integration state tests to windows

- **PR #47823:** (Ch3LL) Add win_dns module integration tests for windows @ 2018-05-25 20:34:03 UTC
  - 6f934c2259 Merge pull request #47823 from Ch3LL/win_dns_test
  - 784811d6a Add win_dns module integration tests for windows

- **PR #47838:** (rallytime) Back-port #47810 to 2017.7 @ 2018-05-25 20:33:44 UTC
  - PR #47810: (rmcintosh) Fix Linode plan selection (refs: #47838)
  - e63e04602d Merge pull request #47838 from rallytime/bp-47810
  - bd26f6a66 better debug message
  - 83565c55df Address PR feedback
  - 50bce3a2f3 make decode_linode_plan_label a private function
  - 2ba4fc4ce fix raising when a 'GB' format invalid plan is supplied
  - 3af50d5a2 slight cleanup
  - 319bd3406 match quotation mark types properly
  - 95e0202223 more consistent use of parens in logged warning
  - f52926ca87 log a warning when the user supplied a label we could decode but was not in the proper format
  - 121303d827 reduce complexity of get_plan_id by moving decoding of the user-supplied label to its own function
  - cf534c7314 Fix Linode plan selection

- **PR #47805:** (twangboy) Add sign.bat script for signing packages @ 2018-05-25 13:53:58 UTC
  - 9ef6660617 Merge pull request #47805 from twangboy/add_sign.bat
  - 66d8b0331a Add sign.bat script for signing packages

- **PR #47500:** (dwoz) Get the current username on windows (refs: #47917) @ 2018-05-24 19:14:07 UTC
  - 9342050d3 Merge pull request #47500 from dwoz/winuser
  - 0ca5224c9f Merge branch '2017.7' into winuser
  - e594802af Use salt utils method for this_user
  - a056a293f1 Centralize test username lookup
  - 6a6ab69722 Get the current username on windows

- **ISSUE #35960:** (basepi) Beacons cannot be reloaded/refreshed without minion restart (refs: #40892)

- **PR #47802:** (rallytime) Back-port #40892 to 2017.7 @ 2018-05-24 16:34:35 UTC
  - PR #40892: (jagguli) add minion function to reload beacon #35960 (refs: #47802)
- 552526f309 Merge pull request #47802 from rallytime/bp-40892
- bb357da084 add minion function to reload beacon #35960

- **PR #47816**: (Ch3LL) Add windows to service disable ERROR check in tests @ 2018-05-24 15:31:36 UTC
  - c9ccf53b9 Merge pull request #47816 from Ch3LL/disable_windows
  - 2509d36888 Add windows to service disable ERROR check in tests

- **PR #47773**: (frogunder) add win_servermanager.list_available test @ 2018-05-23 19:44:14 UTC
  - 2cb66346cb Merge pull request #47773 from frogunder/45011
  - 7c9b0bda33 add win_servermanager.list_available test

- **PR #47807**: (dwoz) Try an even bigger timeout @ 2018-05-23 19:38:21 UTC
  - e65dece202 Merge pull request #47807 from dwoz/winrmtests
  - 1f1cc1357a Increase instance size for cloud tests
  - be8dc21f1 Try an even bigger timeout

- **PR #47765**: (meaksh) Prevent zypper from parsing repo configuration from not .repo files @ 2018-05-23 14:45:04 UTC
  - 46618d2ce7 Merge pull request #47765 from meaksh/2017.7-fix-zypper-error-reading-repo
  - 4475ba19b8 Prevent zypper from parsing repo configuration from not .repo files

- **PR #47781**: (rallytime) Update cloud test profile and docs to use new Linode size labels @ 2018-05-23 13:09:13 UTC
  - 0e87559ee3 Merge pull request #47781 from rallytime/update-linode-sizes
  - a90c1b766e Update cloud test profile and docs to use new Linode size labels

- **PR #47748**: (rallytime) [2017.7] Merge forward from 2017.7.6 to 2017.7 @ 2018-05-22 20:53:02 UTC
  - 3ddc56cb9b Merge pull request #47748 from rallytime/merge-2017.7
  - b75f5ae38e Merge branch '2017.7.6' into '2017.7'
  - 17596f3025 Merge branch '2017.7.6' into '2017.7'
  - e458fa031 Merge branch '2017.7.6' into '2017.7'

- **PR #47779**: (dwoz) Increase ec2 cloud timeouts to 1000 @ 2018-05-22 20:35:45 UTC
  - 0ddc864f90 Merge pull request #47779 from dwoz/winrmtests
  - d5eafe9d53 Use common timeout variable
  - 7e948eb540 Increase ec2 cloud timeouts to 1000

- **PR #47430**: (baniobloom) Add catch for VPCAssociationNotFound @ 2018-05-22 14:54:01 UTC
  - 17e4c8443c Merge pull request #47430 from baniobloom/vpc_association_not_found
  - 0f1d007f91 added catch for VPCAssociationNotFound

- **PR #47525**: (baniobloom) Trying to add a duplicate sec group rule true @ 2018-05-22 14:51:09 UTC
  - 9c5de1449 Merge pull request #47525 from baniobloom/duplicate_sec_group_rule
  - dcc35d489 if we are trying to add the same rule then we are already in the desired state, return true

- **PR #47772**: (gtmanfred) lock down dependencies for kitchen-salt @ 2018-05-22 14:21:49 UTC
  - 536ce2fa42 Merge pull request #47772 from gtmanfred/2017.7

32.2. Previous releases
- lock down dependencies for kitchen-salt

- **ISSUE #47717:** (server-monitoring) Invalid output of pkg.list_upgrades on Fedora 27 Server (refs: #47749)

- **PR #47749:** (terminalmage) Fix "dnf list upgrades" parsing @ 2018-05-22 12:51:29 UTC
  - 12b330f049 Merge pull request #47749 from terminalmage/issue47717
  - cd484bef69 Fix "dnf list upgrades" parsing

- **PR #47755:** (dwoz) Be explicit about winrm setting @ 2018-05-21 22:39:24 UTC
  - 5cd18b9e70 Merge pull request #47755 from dwoz/winrmtests
  - 57dd89e6c3 Default to ec2 classic compatible images
  - f89668920a Be explicit about winrm setting

- **PR #47668:** (Ch3LL) Add pkg.latest_version windows test @ 2018-05-21 20:26:45 UTC
  - f45a96ba1d Merge pull request #47668 from Ch3LL/win_pkg_test
  - a8981024de Add pkg.latest_version windows test

- **PR #47750:** (dwoz) Allow ssh_interface to default to public_ips @ 2018-05-21 17:14:11 UTC
  - 7b12444d7a Merge pull request #47750 from dwoz/cloudtest
  - 63b722ba21 Allow ssh_interface to default to public_ips

- **PR #47737:** (dwoz) Cloud test fixup @ 2018-05-21 14:19:49 UTC
  - 27fbb42210 Merge pull request #47737 from dwoz/win_timeout
  - e88833a07d Cloud test fixup

- **PR #47729:** (UtahDave) fix cli example to match function name @ 2018-05-19 11:31:21 UTC
  - a9930f606b Merge pull request #47729 from UtahDave/fix_get_info_doc
  - 44ca2729ca fix cli example to match function name

- **ISSUE #47182:** (MartinEmrich) state.highstate error with require_in: sls: (refs: #47682)

- **PR #47682:** (terminalmage) Fix traceback when excludes are present in an included SLS file @ 2018-05-18 16:47:47 UTC
  - 00a1376d7c Merge pull request #47682 from terminalmage/issue47182
  - d0243e8f29 Suppress spurious lint failure
  - 3b449f11c3 Add regression test for excludes issue
  - 28a7d2b81c Skip __exclude__ in find_sls_ids

- **ISSUE #47696:** (darkpixel) 2017.7.5 zpool.present does not check for properties=None before attempting to enumerate properties (refs: #47708)

- **PR #47708:** (darkpixel) Wrap properties loop with a check for None. Closes GH-47696 @ 2018-05-18 15:25:44 UTC
  - 51d77bce62 Merge pull request #47708 from darkpixel/47696-do-not-enumerate-none
  - 5c49b9e9c9 Merge branch '2017.7' into 47696-do-not-enumerate-none

- **PR #47681:** (rallytime) [2017.7] Merge forward from 2017.7.6 to 2017.7 @ 2018-05-17 21:30:02 UTC
  - cad06ee2a7 Merge pull request #47681 from rallytime/merge-2017.7
  - 6c06cb3ae3 Merge branch '2017.7.6' into '2017.7'
- **PR #47683**: (Ch3LL) Remove unnecessary setUp in states.test_user test for mac @ 2018-05-17 21:28:26 UTC
  - fd2d45d9c2 Merge pull request #47683 from Ch3LL/mac_user_test
  - 5a1b25b9c7 Remove unnecessary setUp in states.test_user test for mac
- **PR #47692**: (dwoz) Default windows to m1.small for ec2-classic @ 2018-05-17 14:44:10 UTC
  - f323799c42 Merge pull request #47692 from dwoz/win_instance_type
  - 20b6070d54 Default windows to m1.small for ec2-classic
- **ISSUE #45125**: (wes-novack) salt-cloud no longer picking up master setting from provider file (refs: #47665)
- **PR #47665**: (gtmanfred) use dictupdate to update the providers dictionary and merge lists @ 2018-05-16 15:59:17 UTC
  - 990ece5cd5 Merge pull request #47665 from gtmanfred/cloud
  - fd8a02decb use dictupdate to update the providers dictionary and merge lists
- **PR #47151**: (zer0def) Allow interaction with default section in ConfigParser serializer @ 2018-05-16 13:53:44 UTC
  - a2ed8cbf7f Merge pull request #47151 from zer0def/configparser-defaultsect
  - a8f2ad977e Merge branch '2017.7' into configparser-defaultsect
  - cca2a806c9 Made interaction with [DEFAULT] section in ConfigParser as sane as upstream permits.
- **ISSUE #40846**: (ghost) file.managed fails for long URLs (refs: #45808)
- **PR #47673**: (terminalmage) Backport #45808 to 2017.7 @ 2018-05-16 13:52:06 UTC
  - PR #45808: (b1naryth1ef) [bugfix] Fix for oversized filenames in fileclient (refs: #47673)
  - e6fb8342ef Merge pull request #47673 from terminalmage/bp-45808
  - 454291ad62 Fix errors when attempting to cache files with long names or URLs
- **PR #47670**: (gtmanfred) add a pytest.ini and update a dependency for kitchen @ 2018-05-16 01:56:17 UTC
  - b0446aab07 Merge pull request #47670 from gtmanfred/2017.7
  - d5d5a8715f add a pytest.ini and update a dependency for kitchen
- **PR #47626**: (gtmanfred) Implement Pipfile and remove extra requirements.txt files @ 2018-05-16 00:03:12 UTC
  - 0d06da6944 Merge pull request #47626 from gtmanfred/2017.7
  - 418364a533 make dev_python27.txt have the same message as dev_python34.txt
  - d53b44d10f remove lock file
  - 493ed7f93d use the toml dict format
  - e0f7cc1447 add proxy tests decorator to pytest conftest
  - 0a621dd0ec add Pipfile for managing dependencies in salt
  - f78b81db94 simplify dev and base.txt to single files
- **PR #47578**: (Ch3LL) Ensure mac_service.disabled is correctly querying services @ 2018-05-15 18:26:37 UTC
  - a07a8906a0 Merge pull request #47578 from Ch3LL/mac_service_disabled
  - 6032a01f55 change disable check for upstart service on ubuntu14
  - 33b4cfbc5b Change service assertion check for systemd platforms
  - 14896f9743 change codeauthor and class name

32.2. Previous releases 5493
- 502c5bdf5 Ensure mac_service.disabled is correctly querying services

- **PR #47639**: (rallytime) [2017.7] Merge forward from 2017.7.6 to 2017.7 @ 2018-05-14 17:58:25 UTC
  - f63d30185 Merge pull request #47639 from rallytime/merge-2017.7
  - 1503f1020 Merge branch ’2017.7.6’ into ’2017.7’

- **PR #47643**: (dwoz) Remove unwanted file @ 2018-05-14 17:53:57 UTC
  - db0ee3e8b Merge pull request #47643 from dwoz/runas_detect
  - 8c5e54b8b3 Fix typo
  - 69bc88f1c6 Remove unwanted file

- **PR #47601**: (dwoz) Skip tests when we can not use runas @ 2018-05-14 15:26:36 UTC
  - 6dd3ab9f06 Merge pull request #47601 from dwoz/runas_detect
  - 3235ac08cb use ignore-undefined-variable
  - 58911d510a Ignore pylint WindowsError
  - 17987d3c5a Better doc string
  - a48ac26573 Skip tests when we can not use runas

- **PR #47611**: (Ch3LL) Update debian install docs to reflect new latest debian releases @ 2018-05-11 16:32:53 UTC
  - 6f11cae627 Merge pull request #47611 from Ch3LL/deb_doc
  - 6d2ddd05f One more grammar fixup
  - 2d5ff01261 Grammar fix
  - 138847c9c4 Update debian install docs to reflect new latest debian releases

- **PR #47598**: (rallytime) Back-port #47568 to 2017.7 @ 2018-05-10 22:06:20 UTC
  - **PR #47568**: (terminalmage) salt.serializers.yaml/yamlex: remove invalid multi_constructor (refs: #47598)
    - 9e2fe284e4 Merge pull request #47598 from rallytime/bp-47568-2017.7
    - 094586c65f Add exception logging on serialize/deserialize exceptions
    - c62c855f9c salt.serializers.yaml/yamlex: remove invalid multi_constructor

- **PR #47548**: (Ch3LL) Catch Sysloghandler errors when log file does not exist @ 2018-05-10 20:23:25 UTC
  - 8a7913ccc3 Merge pull request #47548 from Ch3LL/syslog
  - 31f13a4197 sysloghandler: check for 3.5.4 python version
  - a02035203 Catch Sysloghandler errors when log file does not exist

- **ISSUE #47491**: (doc987) mysql_query.run_file Doesn’t Work when query_file = salt:///... (refs: #47508)

- **PR #47508**: (gtmanfred) allow pulling the mysql_query.run_file to pull from the fileserver @ 2018-05-10 18:12:28 UTC
  - 82fb6ba366 Merge pull request #47508 from gtmanfred/2017.7
  - 1a87e7455f allow pulling the mysql_query.run_file to pull from the fileserver

- **ISSUE #47203**: (aesposito91) NAPALM grains not updating (refs: #47513)

  - 041e4c6d8b Wrap properties loop with a check for None. Closes GH-47696

32.2.77 In Progress: Salt 2017.7.9 Release Notes

Version 2017.7.9 is an unreleased bugfix release for 2017.7.0. This release is still in progress and has not been released yet.

Salt Cloud Features

GCE Driver

The GCE salt cloud driver can now be used with GCE instance credentials by setting the configuration parameters service_account_private_key and service_account_private_email to an empty string.
32.2.78 Salt 2016.11.0 Release Notes - Codename Carbon

New Features

Docker Introspection and Configuration

Major additions have been made to the Docker support in 2016.11.0. The new addition allows Salt to be executed within a Docker container without a minion running or installed in the container. This allows states to be run inside a container, but also all of Salt’s remote execution commands to be run inside docker containers as well. This makes container introspection simple and powerful. See the tutorial on using this new feature here: See Salt in Docker Containers.

Advanced Ceph Control

Our friends over at SUSE have delivered a powerful new tool to make the deployment of Ceph storage systems using Salt very easy. These new Ceph tools allow for a storage system to be easily defined using the new ceph.quorum state.

Thorium Additions and Improvements

The Thorium advanced reactor has undergone extensive testing and updates. These updates include many more Thorium states, a system for automating key management, the ability to use Thorium to easily replace old reactors and a great deal of stability and bug fixes.

State Rollback Using Snapper

Rollback has been one of the most prevalent requests for Salt. We have researched it extensively and concluded that the only way to accomplish truly reliable rollback would be to execute it at the filesystem layer. To accomplish this we have introduced Snapper integration into Salt States.

Snapper is a tool which allows for simple and reliable snapshots of the filesystem to be made. With the new snapshot_states option set to True in the minion config a snapshot will be made before and after every Salt State run.

These snapshots can be viewed, managed and rolled back to via the snapper execution module.

Preserve File Perms in File States

This feature has been requested for years, the ability to set a flag and use the same file permissions for files deployed to a minion as the permissions set to the file on the master. Just set the keep_mode option on any file management state to True.
Ponies!

We all agreed that cowsay was just not good enough, install the `ponysay` command and the new `pony` outputter will work. Fun for the whole family!

Additional Features

• Minions can run in stand-alone mode to use beacons and engines without having to connect to a master. (Thanks @adelcast!)

• Added a `salt` runner to allow running salt modules via `salt-run`.

```
salt-run salt.cmd test.ping
  # call functions with arguments and keyword arguments
salt-run salt.cmd test.arg 1 2 3 a=1
```

• Added SSL support to Cassandra CQL returner. SSL can be enabled by setting `ssl_options` for the returner. Also added support for specifying `protocol_version` when establishing cluster connection.

• The `mode` parameter in the `file.managed` state, and the `file_mode` parameter in the `file.recurse` state, can both now be set to `keep` and the minion will keep the mode of the file from the Salt fileserver. This works only with files coming from sources prefixed with `salt://`, or files local to the minion (i.e. those which are absolute paths, or are prefixed with `file://`). For example:

```
/etc/myapp/myapp.conf:
  file.managed:
    - source: salt://conf/myapp/myapp.conf
    - mode: keep

/var/www/myapp:
  file.recurse:
    - source: salt://path/to/myapp
    - dir_mode: 755
    - file_mode: keep
```

• The `junos` state module is now available. It has all the functions that are present in the `junos` execution module.

• The `junos` state module is now available. It has all the functions that are present in the `junos` execution module.

• The minion data cache is a pluggable data store now. It's configurable with `cache` option. Default is `localfs`.

• User names in `client_acl` support glob matching now.
New Top File Merging Strategy for States

A new strategy called `merge_all` has been added to provide a new way of merging top file matches when executing a `highstate`. See the `top_file_merging_strategy` documentation for further information.

In addition, the `same` merging strategy was not functioning as documented. This has now been corrected. While this is technically a bugfix, we decided to hold a change in top file merging until a feature release to minimize user impact.

Improved Archive Extraction Support

The `archive.extracted` state has been overhauled. Notable changes include the following:

- When enforcing ownership (with the `user` and/or `group` arguments), the `if_missing` argument no longer has any connection to which path(s) have ownership enforced. Instead, the paths are determined using the either the newly-added `archive.list` function, or the newly-added `enforce_ownership_on` argument.
- `if_missing` also is no longer required to skip extraction, as Salt is now able to tell which paths would be present if the archive were extracted. It should, in most cases, only be necessary in cases where a semaphore file is used to conditionally skip extraction of the archive.
- Password-protected ZIP archives are now detected before extraction, and the state fails without attempting to extract the archive if no password was specified.
- By default, a single top-level directory is enforced, to guard against 'tar-bombs'. This enforcement can be disabled by setting `enforce_toplevel` to `False`.
- The `tar_options` and `zip_options` arguments have been deprecated in favor of a single `options` argument.
- The `archive_format` argument is now optional. The ending of the `source` argument is used to guess whether it is a tar, zip or rar file. If the `archive_format` cannot be guessed, then it will need to be specified, but in many cases it can now be omitted.
- Ownership enforcement is now performed irrespective of whether or not the archive needed to be extracted. This means that the state can be re-run after the archive has been fully extracted to repair changes to ownership.

A number of new arguments were also added. See the docs `docs for the archive.extracted state <salt.states.archive.extracted>` for more information.

Additionally, the following changes have been made to the `archive` execution module:

- A new function (`archive.list`) has been added. This function lists the files/directories in an archive file, and supports a `verbose` argument that gives a more detailed breakdown of which paths are files, which are directories, and which paths are at the top level of the archive.
- A new function (`archive.is_encrypted`) has been added. This function will return `True` if the archive is a password-protected ZIP file, `False` if not. If the archive is not a ZIP file, an error will be raised.
- `archive.cmd_unzip` now supports passing a password, bringing it to feature parity with `archive.unzip`. Note that this is still not considered to be secure, and `archive.unzip` is recommended for dealing with password-protected ZIP archives.
- The default value for the `extract_perms` argument to `archive.unzip` has been changed to `True`. 
**Improved Checksum Handling in** file.managed, archive.extracted States

When the `source_hash` argument for these states refers to a file containing checksums, Salt now looks for checksums matching the name of the source URI, as well as the file being managed. Prior releases only looked for checksums matching the filename being managed. Additionally, a new argument (`source_hash_name`) has been added, which allows the user to disambiguate ambiguous matches when more than one matching checksum is found in the `source_hash` file.

A more detailed explanation of this functionality can be found in the file.managed documentation, in the section for the new `source_hash_name` argument.

**Note:** This improved functionality is also available in the 2016.3 (Boron) release cycle, starting with the 2016.3.5 release.

**Config Changes**

The following default config values were changed:

- `gitfs_ssl_verify`: Changed from False to True
- `git_pillar_ssl_verify`: Changed from False to True
- `winrepo_ssl_verify`: Changed from False to True

**Grains Changes**

- All core grains containing VMWare have been changed to VMware, which is the official capitalization. Additionally, all references to VMWare in the documentation have been changed to VMware issue 30807. Environments using versions of Salt before and after Salt 2016.11.0 should employ case-insensitive grain matching on these grains.

```python
{% set on_vmware = grains['virtual'].lower() == 'vmware' %}
```

- On Windows the `cpu_model` grain has been changed to provide the actual cpu model name and not the cpu family.

  Old behavior:

```bash
root@master:~# salt 'testwin200' grains.item cpu_model
```

```plaintext
testwin200:
    -------
    cpu_model:
        Intel64 Family 6 Model 58 Stepping 9, GenuineIntel
```

New behavior:

```bash
root@master:~# salt 'testwin200' grains.item cpu_model
```

```plaintext
testwin200:
    -------
    cpu_model:
        Intel(R) Core(TM) i7-3520M CPU @ 2.90GHz
```
Beacons Changes

- The `loadavg` beacon now outputs averages as integers instead of strings. (Via issue 31124.)

Runner Changes

- Runners can now call out to utility modules via `__utils__`.
- ref: Utility modules `<writing-utility-modules>` (placed in `salt://__utils__) are now able to be synced to the master, making it easier to use them in custom runners. A `saltutil.sync_utils` function has been added to the `saltutil runner` to facilitate the syncing of utility modules to the master.

Pillar Changes

- Thanks to the new `saltutil.sync_utils` runner, it is now easier to get ref: utility modules `<writing-utility-modules>` synced to the correct location on the Master so that they are available in execution modules called from Pillar SLS files.

Junos Module Changes

- The following new functionalities were added to the junos module
  - facts - Displays the facts gathered during the connection.
  - shutdown - Shut down or reboot a device running Junos OS.
  - install_config - Modify the configuration of a Junos device.
  - install_os - Install Junos OS software package.
  - zeroize - Remove all configuration information on the Routing Engines and reset all key values on a device.
  - file_copy - Copy file from proxy to the Junos device.

Network Automation: NAPALM

Beginning with 2016.11.0, network automation is included by default in the core of Salt. It is based on a the NAPALM library and provides facilities to manage the configuration and retrieve data from network devices running widely used operating systems such: JunOS, IOS-XR, eOS, IOS, NX-OS etc.

- see the complete list of supported devices.

The connection is established via the NAPALM proxy.

In the current release, the following modules were included:

- NAPALM grains - Select network devices based on their characteristics
- NET execution module - Networking basic features
- NTP execution module
- BGP execution module
- Routes execution module
- SNMP execution module
- Users execution module

32.2. Previous releases
- Probes execution module
- NTP peers management state
- SNMP configuration management state
- Users management state

Cisco NXOS Proxy Minion

Beginning with 2016.11.0, there is a proxy minion that can be used to configure nxos cisco devices over ssh.

- Proxy Minion
- Execution Module
- State Module

Cisco Network Services Orchestrator Proxy Minion

Beginning with 2016.11.0, there is a proxy minion to use the Cisco Network Services Orchestrator as a proxy minion.

- Proxy Minion
- Execution Module
- State Module

Junos Module Changes

- The following new functionalities were added to the junos module
  - facts - Displays the facts gathered during the connection.
  - shutdown - Shut down or reboot a device running Junos OS.
  - install_config - Modify the configuration of a Junos device.
  - install_os - Install Junos OS software package.
  - zeroize - Remove all configuration information on the Routing Engines and reset all key values on a device.
  - file_copy - Copy file from proxy to the Junos device.

Returner Changes

- Any returner which implements a save_load function is now required to accept a minions keyword argument. All returners which ship with Salt have been modified to do so.
**Renderer Changes**

Added the ability to restrict allowed renderers. Two new config parameters, `renderer_whitelist` and `renderer_blacklist` are introduced for this purpose.

**eAuth Changes**

- External auth modules' `auth` method can return an ACL list for the given username instead of `True`. This list should be in the same format as described in the eAuth documentation. It will be used for the user instead of one set in master config.

  Example of the `auth` method return that allows a user to execute functions in the `test` and `network` modules on the minions that match the `web*` target and allow access to `wheel` and `runner` modules:

  ```
  [{"web*": ["test.*", "network.*"], "@wheel", "@runner"]}
  ```

- External auth is supported by `salt-run` and `salt-key` now. Note that master must be started to use them with eAuth.

**External Module Packaging**

Modules may now be packaged via entry-points in setuptools. See external module packaging tutorial for more information.

**Functionality Changes**

- The `onfail` requisite now uses OR logic instead of AND logic. issue 22370
- The consul external pillar now strips leading and trailing whitespace. issue 31165
- The `win_system.py` state is now case sensitive for computer names. Previously computer names set with a state were converted to all caps. If you have a state setting computer names with lower case letters in the name that has been applied, the computer name will be changed again to apply the case sensitive name.
- The `mac_user.list_groups` function in the `mac_user` execution module now lists all groups for the specified user, including groups beginning with an underscore. In previous releases, groups beginning with an underscore were excluded from the list of groups.
- The `junos.call_rpc` function in the `junos` execution module can now be used to call any valid rpc. Earlier it used to call only "get_software_information".
- A new option for minions called `master_tries` has been added. This specifies the number of times a minion should attempt to contact a master to attempt a connection. This allows better handling of occasional master downtime in a multi-master topology.
- The default hash_type is now sha256 instead of md5. You will need to make sure both your master and minion share the same hash_type.
- Nodegroups consisting of a simple list of minion IDs can now also be declared as a yaml list. The below two examples are equivalent:

  ```
  # Traditional way
  nodegroups:
    - group1: L@host1,host2,host3
  ```

(continues on next page)
# New way (optional)

```yaml
nodegroups:
  - group1:
    - host1
    - host2
    - host3
```

## New Azure ARM Cloud Driver

A new cloud driver has been added for Azure ARM, aka, the Azure Resource Manager. The older Azure driver is still required to work with the older Azure API. This new driver works with the newer ARM API, which is managed via the newer Azure Portal website.

## New Modules

### Beacons

- `salt.beacons.avahi_announce`
- `salt.beacons.bonjour_announce`
- `salt.beacons.haproxy`
- `salt.beacons.status`

### Clouds

- `salt.cloud.clouds.azurearm`

### Engines

- `salt.engines.hipchat`
- `salt.engines.http_logstash`

### Modules

- `salt.modules.boto_cloudwatch_event`
- `salt.modules.celery`
- `salt.modules.ceph`
- `salt.modules.influx08`
- `salt.modules.inspectlib.entities`
- `salt.modules.inspectlib.fsdb`
- `salt.modules.inspectlib.kiwiproc`
- `salt.modules.inspector`
- `salt.modules.libcloud_dns`
- `salt.modules.openstack_mng`
- `salt.modules.servicenow`
- `salt.modules.testinfra_mod`
- `salt.modules.win_lgpo`
- `salt.modules.win_pki`
- `salt.modules.win_psget`
- `salt.modules.win_snmp`
- `salt.modules.xbpspkg`

**Outputters**

- `salt.output.pony`

**Pillar**

- `salt.pillar.csvpillar`
- `salt.pillar.http_json`
- `salt.pillar.makostack`

**Returners**

- `salt.returners.zabbix_return`

**Runners**

- `salt.runners.auth`
- `salt.runners.event`
- `salt.runners.smartos_vmadm`
- `salt.runners.vistara`

**SDB**

- `salt.sdb.env`
States

- `salt.states.boto_cloudwatch_event`
- `salt.states.csf`
- `salt.states.ethtool`
- `salt.states.influxdb08_database`
- `salt.states.influxdb08_user`
- `salt.states.libcloud_dns`
- `salt.states.snapper`
- `salt.states.testinframod`
- `salt.states.win_lgpo`
- `salt.states.win_pki`
- `salt.states.win_snmp`

Thorium

- `salt.thorium.calc`
- `salt.thorium.key`
- `salt.thorium.runner`
- `salt.thorium.status`
- `salt.thorium.wheel`

Deprecations

General Deprecations

- **env** to **saltenv**
  
  All occurrences of `env` and some occurrences of `__env__` marked for deprecation in Salt 2016.11.0 have been removed. The new way to use the salt environment setting is with a variable called `saltenv`:

  ```python
  def fcn(msg="", env="base", refresh=True, saltenv="base", **kwargs):
      ...
  ```

  has been changed to

  ```python
  def fcn(msg="", refresh=True, saltenv="base", **kwargs):
      ...
  ```

- If `env` (or `__env__`) is supplied as a keyword argument to a function that also accepts arbitrary keyword arguments, then a new warning informs the user that `env` is no longer used if it is found. This new warning will be removed in Salt 2017.7.0.

  ```python
  def fcn(msg="", refresh=True, saltenv="base", **kwargs):
      ...
  ```
### Salt Documentation, Release 3006.4

# will result in a warning log message
```python
def fcn(msg="add more salt", env="prod", refresh=False):
    ...
```

- If env (or `__env__`) is supplied as a keyword argument to a function that does not accept arbitrary keyword arguments, then python will issue an error.

```python
# will result in a python TypeError
fcn(msg="add more salt", env="prod", refresh=False)
```

- If env (or `__env__`) is supplied as a positional argument to a function, then undefined behavior will occur, as the removal of env and `__env__` from the function's argument list changes the function's signature.

```python
# will result in refresh evaluating to True and saltenv likely not being a string at all
fcn("add more salt", "prod", False)
```

- **Deprecations in minion.py:**
  - The `salt.minion.parse_args_and_kwargs` function has been removed. Please use the `salt.minion.load_args_and_kwargs` function instead.

**Cloud Deprecations**

- The `vsphere` cloud driver has been removed. Please use the `vmware` cloud driver instead.
- The `private_ip` option in the `linode` cloud driver is deprecated and has been removed. Use the `assign_private_ip` option instead.
- The `create_dns_record` and `delete_dns_record` functions are depreciated and have been removed from the `digital_ocean` driver. Use the `post_dns_record` function instead.

**Execution Module Deprecations**

- The `blockdev` execution module had four functions removed:
  - `dump`
  - `tune`
  - `resize2fs`
  - `wipe`
  
  The `disk` module should be used instead with the same function names.
- The `boto_vpc` execution module had two functions removed, `boto_vpc.associate_new_dhcp_options_to_vpc` and `boto_vpc.associate_new_network_acl_to_subnet` in favor of more concise function names, `boto_vpc.create_dhcp_options` and `boto_vpc.create_network_acl`, respectively.
• The data execution module had getval and getvals functions removed in favor of one function, get, which combines the functionality of the removed functions.

• File module deprecations:
  – The contains_regex_multiline function was removed. Use file.search instead.
  – Additional command line options for file.grep should be passed one at a time. Please do not pass more than one in a single argument.

• The lxc execution module has the following changes:
  – The run_cmd function was removed. Use lxc.run instead.
  – The nic argument was removed from the lxc.init function. Use network_profile instead.
  – The clone argument was removed from the lxc.init function. Use clone_from instead.
  – passwords passed to the lxc.init function will be assumed to be hashed, unless password_encrypted=False.
  – The restart argument for lxc.start was removed. Use lxc.restart instead.
  – The old style of defining lxc containers has been removed. Please use keys under which LXC profiles should be configured such as lxc.container_profile.profile_name.

• The env and activate keyword arguments have been removed from the install function in the pip execution module. The use of bin_env replaces both of these options.

• reg execution module
  Functions in the reg execution module had misleading and confusing names for dealing with the Windows registry. They failed to clearly differentiate between hives, keys, and name/value pairs. Keys were treated like value names. There was no way to delete a key.

  New functions were added in 2015.5 to properly work with the registry. They also made it possible to edit key default values as well as delete an entire key tree recursively. With the new functions in place, the following functions have been deprecated:
  – read_key
  – set_key
  – create_key
  – delete_key

  Use the following functions instead:
  – for read_key use read_value
  – for set_key use set_value
  – for create_key use set_value with no vname and no vdata
  – for delete_key use delete_key_recursive. To delete a value, use delete_value.

• The hash_hostname option was removed from the salt.modules.ssh execution module. The hash_known_hosts option should be used instead.

• The human_readable option was removed from the uptime function in the status execution module. The function was also updated in 2015.8.9 to return a more complete offering of uptime information, formatted as an easy-to-read dictionary. This updated function replaces the need for the human_readable option.

• The persist kwarg was removed from the win_useradd execution module. This option is no longer supported for Windows. persist is only supported as part of user management in UNIX/Linux.
• The `zpool_list` function in the `zpool` execution module was removed. Use `list` instead.

**Outputter Module Deprecations**

• The `compact` outputter has been removed. Set `state_verbose` to `False` instead.

**Runner Module Deprecations**

• The `grains.cache` runner no longer accepts `outputter` or `minion` as keyword arguments. Users will need to specify an outputter using the `--out` option. `tgt` is replacing the `minion` kwarg.

• The `filesrv` runner no longer accepts the `outputter` keyword argument. Users will need to specify an outputter using the `--out` option.

• The `jobs` runner no longer accepts the `outputter` keyword argument. Users will need to specify an outputter using the `--out` option.

• `virt` runner module:
  - The `hyper` kwarg was removed from the `init`, `list`, and `query` functions. Use the `host` option instead.
  - The `next_hyper` function was removed. Use the `next_host` function instead.
  - The `hyper_info` function was removed. Use the `host_info` function instead.

**State Module Deprecations**

• The `env` and `activate` keyword arguments were removed from the `installed` function in the `pip` state module. The use of `bin_env` replaces both of these options.

• `reg` state module
  
The `reg` state module was modified to work with the new functions in the execution module. Some logic was left in the `reg.present` and `reg.absent` functions to handle existing state files that used the final key in the name as the value name. That logic has been removed so you now must specify value name (`vname`) and, if needed, value data (`vdata`).

For example, a state file that adds the version value/data pair to the `Software\Salt` key in the `HKEY_LOCAL_MACHINE` hive used to look like this:

```plaintext
HKEY_LOCAL_MACHINE\Software\Salt\version:
  reg.present:
    - value: 2016.3.1
```

Now it should look like this:

```plaintext
HKEY_LOCAL_MACHINE\Software\Salt
  reg.present:
    - vname: version
    - vdata: 2016.3.1
```

A state file for removing the same value added above would have looked like this:

```plaintext
HKEY_LOCAL_MACHINE\Software\Salt\version:
  reg.absent:
```
Now it should look like this:

```plaintext
HKEY_LOCAL_MACHINE\Software\Salt
reg.absent:
    - vname: version
```

This new structure is important as it allows salt to deal with key default values which was not possible before. If vname is not passed, salt will work with the default value for that hivekey.

Additionally, since you could only delete a value from a the state module, a new function (key_absent) has been added to allow you to delete a registry key and all subkeys and name/value pairs recursively. It uses the new delete_key_recursive function.

For additional information see the documentation for the reg execution and state modules.

- lxc state module: The following functions were removed from the lxc state module:
  - created: replaced by the present state.
  - started: replaced by the running state.
  - cloned: replaced by the present state. Use the clone_from argument to set the name of the clone source.

- The hash_hostname option was removed from the salt.states.ssh_known_hosts state. The hash_known_hosts option should be used instead.

- The always kwarg used in the built function of the pkgbuild state module was removed. Use force instead.

**Utils Module Deprecations**

- The use of jid_dir and jid_load were removed from the salt.utils.jid.jid_dir functionality for job_cache management was moved to the local_cache returner. jid_load data is now retrieved from the master_job_cache.

- ip_in_subnet function in salt.utils.network.py has been removed. Use the in_subnet function instead.

- The iam utils module had two functions removed: salt.utils.iam.get_iam_region and salt.utils.iam.get_iam_metadata in favor of the aws utils functions salt.utils.aws.get_region_from_metadata and salt.utils.aws.creds, respectively.

**32.2.79 Salt 2016.11.1 Release Notes**

Version 2016.11.1 is a bugfix release for 2016.11.0.

Changelog for v2016.11.0..v2016.11.1

Generated at: 2018-05-27 14:25:03 UTC

- PR #38186: (Ch3LL) add 2016.11.1 changelog to release notes
- PR #38182: (rallytime) [2016.11] Merge forward from 2016.3 to 2016.11 @ 2016-12-09 21:25:47 UTC
  - 23c039347e Merge pull request #38182 from rallytime/merge-2016.11
  - 627242ab5d Merge branch '2016.3' into '2016.11'
    - 65b2ad7b14 Merge pull request #38163 from Ch3LL/enabled_ec2_cloud
      - be74c45463 enabled ec2 cloud tests
    - b63f74e034 Merge pull request #38177 from vutny/fix-cp-get-file-str
      - a449980672 Correct cp.get_file_str docstring and add integration tests
    - 7596313be0 Merge pull request #38153 from vutny/master-includes-error-tolerance
      - cd0154ee93 Master config includes may contain errors and be safely skipped
- ISSUE #38094: (bfilipek) TypeError: object of type 'float' has no len() in grains.filter_by (refs: #38158)
- PR #38158: (cachedout) Fix type problem in grains.filter_by @ 2016-12-09 21:24:40 UTC
  - 8355adc535 Merge pull request #38158 from cachedout/issue_38094
  - e81962ec2c2 Lint, remove set literal
  - 9f46b3c18 Fix type problem in grains.filter_by
- ISSUE #38090: (jf) pkg.installed does not seem to refresh the repo database, no matter what (refs: #38113, #38156)
- PR #38156: (terminalmage) Remove rtag when windows minion refreshes early in state @ 2016-12-09 21:15:01 UTC
  - 31a157d902 Merge pull request #38156 from terminalmage/fix-windows-refresh
  - 258bd4c2aa Remove rtag when windows minion refreshes early in state
- ISSUE #37981: (tazaki) Salt-cloud ec2 vpc securitygroupid always returning default (refs: #38183)
- PR #38183: (cro) Fix bad set operations when setting up securitygroups in AWS. @ 2016-12-09 21:12:10 UTC
  - c638952684 Merge pull request #38183 from cro/fix_37891
  - 0527d6f25e Fix bad set operations when setting up securitygroups in AWS. Fixes #37891.
  - PR #38181: (rallytime) Reset socket default timeout to None (fixes daemons_tests failures)
Chapter 32. Release notes

- PR #38118: (whiteinge) Remove ssh_async from NetapiClient clients; it is not implemented @ 2016-12-09 18:49:42 UTC
  - 7ccbedd2c Merge pull request #38118 from whiteinge/no-ssh-async-client
  - cb58cd4795 Remove ssh_async from NetapiClient clients; it is not implemented
- PR #38160: (terminalmage) Update information about xz-utils in archive state/module docs @ 2016-12-09 18:34:03 UTC
  - 8d4e194400 Merge pull request #38160 from terminalmage/update-archive-docs
  - 8e4a3d3c83 Update information about xz-utils in archive state/module docs
- ISSUE #38024: (Ch3LL) 2016.11.0 release notes missing azure arm reference (refs: #38164)
- PR #38164: (techhat) Add Azure ARM docs for 2016.11.0 @ 2016-12-09 18:00:22 UTC
  - 05136f0d8c Merge pull request #38164 from techhat/azuredocs
  - 71b787eb50 Add Azure ARM docs for 2016.11.0
- PR #38173: (rallytime) Bump some win* module deprecations from Nitrogen to Oxygen @ 2016-12-09 16:57:29 UTC
  - e3c8858cc28 Merge pull request #38173 from rallytime/update-win-deprecation-versions
  - 09a50b25e7 Bump some win* module deprecations from Nitrogen to Oxygen
- PR #38036: (terminalmage) archive.extracted: fix problems with overwrite arg @ 2016-12-08 19:08:41 UTC
  - PR #37889: (isbm) Allow overwrite archives extraction (refs: #38036)
  - 827bf59999 Merge pull request #38036 from terminalmage/archive-extracted-override
  - a1c70c7b95 archive.extracted: fix problems with overwrite arg
- PR #38133: (terminalmage) Fix edge case in creation of trans tar for salt-thin @ 2016-12-08 17:47:26 UTC
  - 50773a5f96 Merge pull request #38133 from terminalmage/zd1067
  - 71e0bd023f Fix edge case in creation of trans tar for salt-thin
- PR #38138: (rallytime) [2016.11] Merge forward from 2016.3 to 2016.11 @ 2016-12-07 20:15:56 UTC
  - 6026cb23b2 Merge pull request #38138 from rallytime/merge-2016.11
  - 28b56ea3b4 Merge branch '2016.3' into '2016.11'
  - 86091db647 Skip daemon unit tests when running on Python 2.6 (#38134)
- PR #38130: (rallytime) [2016.11] Merge forward from 2016.3 to 2016.11 @ 2016-12-07 20:11:19 UTC
  - 90478ef25e Merge pull request #38130 from rallytime/merge-2016.11
  - 4d7d9abb41 Merge branch '2016.3' into '2016.11'
    - d3d98fd4eb Merge pull request #38102 from rallytime/fixed-38091
      - 4f79da0d1 Add False + msg tuple return if requests is missing for zenoss module
    - 8c8bc2734 Merge pull request #38104 from rallytime/bp-36794
      - c906ca0d5 Pylint fixes
      - da3ebf836 FreeBSD sysctl module now handles config_file parameter in show method
- PR #38129: (Ch3LL) Fix beacon index
- PR #38127: (rallytime) Add versionadded tags for network module funcs
• ISSUE #38042: (MTecknology) [2016.11.0] Invalid interfaces file produced by debian_ip module (refs: #38043)

• PR #38043: (MTecknology) Debian networking fix @ 2016-12-07 17:32:18 UTC
  - fd06bab673 Merge pull request #38043 from MTecknology/2016.11
  - 6d5e132e44 Removing trailing whitespace from previous commit
  - f882674acf Adding some options that are valid for inet6 blocks.
  - 81cb68d4c Better check for dual stack.
  - 525c746274 May Cthulhu take mercy on my soul for this commit.
  - 300ca6047e I guess this makes the previous commit a bit redundant, but I'm not sure if I want to remove it.
  - 6e7fc39c68 This now seems absurdly obvious, but I'm not ruling out that I'll break everything.
  - 82d2bb9e0c Rolling back unit test.
  - b3ebdbdf05 Adding larger and more complete debian_ip unit test.
  - 3afd7b6cf4 Adding the valid/documented 'slaves' option.
  - b6b1ad9091 Typo: missing closing parenthesis
  - 756e41cafe2 Fixing a typo; line should not be commented
  - 32a1374748 Corrects expected return value
  - 88f9d9f22c Mostly whitespace & comment changes
  - 41fbd8d805 Removing redundant line
  - 3a8168667b Ensure iface_dict not being populated will not produce a stacktrace
  - 4de2cb2805 Corrects regression in debian_ip/debian_eth.jinja

• PR #38107: (cachedout) Status beacon should raise proper exception @ 2016-12-07 17:21:49 UTC
  - PR #38088: (dmurphy18) Updated to match formulas and allow for missing functions (refs: #38107)
  - 4b9a7f2295 Merge pull request #38107 from cachedout/supercede_38088
  - 73d724845d Change to log.debug per Tom
  - da135b159 Fix docs
  - 792b422dc2 Pylint fix
  - 88e03bba6d Fix typo
  - a8ce153252 Status beacon should raise proper exception

• PR #38101: (lorenogordon) Clarifies file.replace behavior on symlinks @ 2016-12-07 13:27:11 UTC
  - PR #38101: (lorenogordon) Clarifies file.replace behavior on symlinks
  - da8f5ac0c6 Merge pull request #38101 from lorenogordon/file-replace-note
  - 345990f2b0 Clarifies file.replace behavior on symlinks

• ISSUE #38090: (jf) pkg.installed does not seem to refresh the repo database, no matter what (refs: #38113, #38156)

• PR #38113: (terminalmage) Revert changes to refresh tag for pkg states @ 2016-12-07 13:11:14 UTC
  - d47761f349 Merge pull request #38113 from terminalmage/issue38090
  - 9f347df012 Revert changes to refresh tag for pkg states

• ISSUE #37976: (t0nyhays) Error when status beacon fires (2016.11.0) (refs: #38120)

32.2. Previous releases
• PR #38120: (Da-Juan) Fix status beacon config default values @ 2016-12-07 13:08:33 UTC
  - d4c34ea0a58 Merge pull request #38120 from Da-Juan/2016.11
  - 7e4a3e8ad Fix status beacon config default values

• PR #38114: (rallytime) [2016.11] Merge forward from 2016.3 to 2016.11 @ 2016-12-07 12:45:04 UTC
  - 68e6809a87 Merge pull request #38114 from rallytime/merge-2016.11
  - fce923a Merge branch '2016.3' into '2016.11'
    * fb87769b9 Merge pull request #38083 from twangboy/fix_refresh_db
      - 978af6d83c Remove only .sls files from the cached winrepo-ng
    * 9dcf6e6b Merge pull request #38059 from rallytime/daemons-test-fix
      - eb372bd78 Add missing "not" statement: The last syndic test should assertFalse()
      - 4e10f8e018 Call exec_test for the Syndic daemon in tests.unit.daemons_test.py
    * 9cd42b9b3 Merge pull request #38039 from rallytime/fix-37939
      - 1da7acbf8 Update unit tests to account for additional file.search call
      - 8a6858b82 Check to see if a line is already commented before moving on
      - f2c045520d Write an integration test demonstrating the issue
    * a34a76384 Merge pull request #38045 from terminalmage/issue38037
      - 65289503d9 Simplify logic for matching desired pkg arch with actual pkg arch
      - 3babbc9a9 yumpkg.py: don’t include non-upgrade versions found by "yum list available"

• PR #38109: (gtmanfred) mode needs to be an integer @ 2016-12-07 11:58:24 UTC
  - b9920e54ee Merge pull request #38109 from gtmanfred/2016.11
  - 7546760eb3 mode needs to be an integer

• PR #38103: (rallytime) Back-port #37283 to 2016.11 @ 2016-12-06 23:12:59 UTC
  - PR #37283: (jeanpralo) Handle docker-compose up to version 1.9.0 (refs: #38103)
  - PR #37215: (mschneider82) removed version check (refs: #37283)
  - fd77dcbdd Merge pull request #38103 from rallytime/bp-37283
  - 11944df69b handle up to version 1.9.0

• PR #38057: (rallytime) [2016.11] Merge forward from 2016.3 to 2016.11 (refs: #38059) @ 2016-12-06 23:11:41 UTC
  - 5d96b9280 Merge pull request #38057 from rallytime/merge-2016.11
  - 342884018b Fix SaltKeyOptionParserTestCase test failures
  - 186e20d0d Don’t allow libcloud mock module injection in unit/states/libcloud_dns_test.py either
  - d513a60189 Do not allow libcloud to be injected as a mock value in the libcloud_dns_test
  - 74a417e527 Update the mocked cloud configs to also include master configs
  - f2c8e18d0 Better merge conflict resolution from the initial merge
  - 8fd53a4808 Merge branch '2016.3' into '2016.11'
    * 6724fe4871 Modify daemons test to use multiprocessing (#38034)
• 6942d5d95b Merge pull request #37995 from rallytime/merge-2016.3
  • b44e17921c Merge branch '2015.8' into '2016.3'
  • 7a7e36728f Merge pull request #37978 from terminalmage/ext_pillar_first-docs
  • 61ed9a8657 Add clarifying language to ext_pillar_first docs
• cd6ec179cb fix broken yaml code block (#38002)
• 3dd45fbef5 Merge pull request #37912 from attiasr/fix_aws_response_encoding
  • ba4ec4e7f1 use Requests result encoding to encode the text
  • abe4eb39f8 fix encoding problem aws responses
• 69a74a4dd2 Merge pull request #37950 from vutny/fix-starting-up-syndic
  • 7d9bc9abce syndic_master: correct default value, documentation and example config
  • 92a7c7ed1b Set default Salt Master address for a Syndic (like for a Minion)
• 7f269bc7f9 Add clarification on expr_form usage and future deprecation (#37964)
• 1001987fe4 Catch possible exception from lsb_release (#37962)
• 330021cd8b Handle empty tokens safely (#37961)
• ea466399ce Merge pull request #37272 from vutny/fix-getting-default-logging-opts
  • e5ce52388a Fix description in the Salt Syndic usage info
  • 518a3dd7ee Add unit tests for Salt parsers processing logging options
  • 83da64254 Add ssh_log_file option to master config and documentation
  • c8a0915460 Fix configuration example and documentation for syndic_log_file option
  • e64dd3eddb Correct default attributes for various parser classes
  • 82a2e216b3 Fix default usage string for Salt command line programs
  • 45dffa29df Fix readding and updating logfile and pidfile config options for Salt API
  • f47253c21b Fix reading and applying Salt Cloud default configuration
  • fad5bec936 Work with a copy of default opts dictionaries
  • b7c24811e5 Fix log_level_logfile config value type
  • 1bd76a1d96 Fix setting temporary log level if CLI option omitted
  • 121848cc77 Fix obtaining log_granular_levels config setting
  • 44cf07feca2 Make CLI options take precedence for setting up logfile_logger
  • 61aaf1792 Fix setting option attributes when processing log_level and log_file
  • 3c60e2388e Fix processing of log_level_logfile config setting
  • 55a0af5b9d Use attribute functions for getting/setting options and config values
  • c2f2d091e Fix getting Salt API default logfile option
  • f2422373c1 Remove processing of unused and undocumented cli_*_log_* config options
  • 2065e8311c Get default logging level and file from default opts dict
• f2f957da6c Merge pull request #37925 from kontrolld/add-ipv6-centos-network
  • ac2b477412 Adding IPv6 functionality for CentOS /etc/sysconfig/network

32.2. Previous releases

5515
• c07ad11279 Merge pull request #37899 from DSRCorporation/bugs/37059_schedule_task_hang
  9497748546 Clear functions context in schedule tasks for ZeroMQ.
• a55519db40 Merge pull request #37928 from techhat/issue37737
  a09a60e89b Don't modify self.opts directly
• 9d17f1ce90 Merge pull request #37929 from gtmanfred/2016.3
  c7d2c73503 add list_nodes_min to nova driver
• 3bb743b59f Merge pull request #37926 from kontrolld/fix-ipv6-centos-network
  3ed42e5b44 updated
  3b3bc4f239 Fixes no IPv6 functionality in /etc/sysconfig/network
• 271170a9f3 Merge pull request #37921 from rallytime/merge-2016.3
  523a67c422 Merge branch '2015.8' into '2016.3'
  4cd6cf5ec Update earlier release channels' docs with Carbon release notes (#37914)
  d31491a7fe [2015.8] Update version numbers in doc config for 2016.11.0 release (#37918)
• 6cd6429ac0 Merge pull request #37924 from cachedout/fix_gem_states
  894cca3427 Update test for new gem ver

  • PR #38112: (rallytime) Account for case where vim install already exists and is at an older version
• ISSUE #19502: (kt97679) salt-ssh fails to run state.highstate with custom master_tops (refs: #38021)
• PR #38021: (mateiw) Add master_tops support in salt-ssh @ 2016-12-06 14:26:22 UTC
  86c67a9598 Merge pull request #38021 from mateiw/salt-ssh_master_tops
  65a0f102fd Add/remove newlines
  7037fa116d Add master_tops support in salt-ssh

  • PR #38084: (rallytime) Start release notes file for 2016.11.1 release
• PR #37878: (kstreee) Makes threads avoid blocking waiting while communicating using ZeroMQ. @ 2016-12-05 19:50:46 UTC
  78295516e7 Merge pull request #37878 from kstreee/2016.11
  9103878c4f Fixes blocking waiting through implementing a socket pool class.
• PR #37987: (rbjorklin) consul_pillar support for limiting pillar exposure via minion targeting @ 2016-12-05 19:48:20 UTC
  • PR #37985: (rbjorklin) consul_pillar support for limiting pillar exposure via minion targeting (refs: #37987)
  8089cc4d29 Merge pull request #37987 from rbjorklin/consul-pillar-target
  5d0445a7ca Ignore W1401 (anomalous-backslash-in-string)
  2e929a5ecc Linting fixes
  171cab1726 Fixed possible incorrect behavior if target wasn't on start/end of str
  7440582ce8 consul_pillar support for limiting pillar exposure via minion targeting

• ISSUE #38062: (UtahDave) archive execution module not loading on Windows in 2016.11.0 (refs: #38067)
• PR #38067: (terminalmage) Remove virtual func for archive state/module @ 2016-12-05 16:37:23 UTC
• ISSUE #38001: (tomlaredo) Regression on postgres_group.present ('postgres_group' __virtual__ returned False) (refs: #38023)
• ISSUE #37986: (marek-obuchowicz) Module postgres - wrong docs, doesn't work with debian 8.5 (refs: #38023)
• ISSUE #37935: (ipmb) Postgres module regression on 2016.11 (refs: #37946, #37993, #38023, #38058)
• PR #38058: (rallytime) Remove initdb dependency in postgres module @ 2016-12-04 04:19:02 UTC
  - PR #38023: (gtmanfred) Expand error message for postgres states (refs: #38058)
  - PR #37993: (ticosax) Remove initdb dependency to consume postgres module. (refs: #38058)
  - c9933670f9 Merge pull request #38058 from rallytime/remove-init-db-dep
• ISSUE #37969: (lordcirth) Archive.extracted fails if -user: root is specified (refs: #38004)
• PR #38004: (terminalmage) Fix regression in user/group mgmt for archive.extracted @ 2016-12-02 18:28:49 UTC
  - 1ac53e5196 Merge pull request #38004 from terminalmage/issue37969
  - 23bb90a7ce Add integration test for archive.extracted with user/group set to root
  - e5ee721696 Don’t use simple boolean check on uid/gid
• ISSUE #37941: (L4rS6) Outdated documentation for 2016.11.x (refs: #38051)
• PR #38051: (Ch3LL) add docs for hash_type change to sha256 @ 2016-12-02 18:11:36 UTC
  - e90cbbe08 Merge pull request #38051 from Ch3LL/fix_hash_docs
  - e95f88b83 add docs for hash_type change to sha256
• ISSUE #38000: (morganwillcock) 2016.11.0: saltutil.runner returns a different dict structure and breaks template rendering (refs: #38028)

• ISSUE #37935: (ipmb) Postgres module regression on 2016.11 (refs: #37946, #37993, #38023, #38058)
• PR #37946: (scott-w) Updated the bins_dir to default to pg_bin @ 2016-11-29 16:48:27 UTC
- 36f91408c5 Merge pull request #37946 from scott-w/37935-fix-bin-dir
- d33d403969 Restored missing initdb #37935
- a041b9fe8e Use Salt deprecation warning #37935
- a9678935f9 Updated the bins_dir to default to pg_bin #37935

- **PR #37889:** (ismb) Allow overwrite archives extraction (refs: #38036) @ 2016-11-29 16:18:57 UTC
  - d8650c5474 Merge pull request #37889 from isbm/isbm-states-archive-fix
  - e67706bd29 Document the behaviour.
  - 1970814111 Prevent crash during externally changed archive permissions
  - 91b42578b2 Add overwrite option so the extraction of the archive can be always performed.
  - e6958f7f15 Remove nonsense comment and react on generally absent path name

- **PR #37869:** (ismb) Input sanitation (16.11) @ 2016-11-29 16:17:16 UTC
  - e2b9e58d30 Merge pull request #37869 from isbm/isbm-input-sanitation-16.11
  - f9ec5d68af Use six instead of builtins
  - 203dfcb238 Use American spelling instead
  - 91ed307af9 Sanitise input for the keys and IDs
  - 86623f913d Add a stub for ID sanitiser (at the moment same as hostname)
  - 637144c841 Rename "general.py" to "sanitisers.py"
  - f2571fc8bf Add hostname sanitiser
  - 3ae086af4 Add filename sanitiser
  - 816b1d1977 Add general sanitisers

- **PR #37884:** (ismb) Do not include "gpg-pubkey" packages, filtering by their name @ 2016-11-28 21:11:37 UTC
  - e539a94a56 Merge pull request #37884 from isbm/isbm-zypper-gpgkey-pkg-filter
  - 038374a586 Do not include "gpg-pubkey" packages, filtering by their name

- **PR #37882:** (attiasr) multiple issues in boto_rds state and module @ 2016-11-28 21:09:11 UTC
  - eb3d81a1de Merge pull request #37882 from attiasr/fix_missing_tags
  - 73b3c5fa1a Add newline
  - 166c42bc51 fix boto_rds.describe
  - ddd88ba047 fix boto_rds.describe parameters and subnetgroup_present
  - bfe7f92cb4 fix missing tags in call to boto_rds.exists
- **PR #37931:** (rallytime) Remove release candidate doc ref from 2016.11.0 release notes

- **PR #37930:** (cachedout) Remove dictionary comprehension in netusers @ 2016-11-28 20:27:06 UTC
  - 3d2dabc7b7 Merge pull request #37930 from cachedout/fix_comp
  - 670e83200b Remove dictionary comprehension in netusers

- **PR #37923:** (rallytime) [2016.11] Merge forward from 2016.3 to 2016.11 @ 2016-11-28 19:55:03 UTC
  - 0f8b187d15 Merge pull request #37923 from rallytime/merge-2016.11
  - da7f5518eb Don’t let 2016.3 doc config changes overwrite the 2016.11 changes
- dfeedd1185a Merge branch '2016.3' into '2016.11'
  * c35ba1f390 Merge pull request #37916 from rallytime/doc-update-2016.3
    - bd40592289 [2016.3] Update version numbers in doc config for 2016.11.0 release
  * e13a2488e8 Merge pull request #37785 from Cloudtek/ddns-respect-trailing-dot
    - 262e3b3697 respect trailing dot in ddns name parameter
  * c03b389422 Merge pull request #37895 from fj40crawler/fix-augeas-return-for-test
    - ddc238df36 Fixed augeas_test.py to match True v.s. None for test_change_in_test_mode
    - ef75c459c0 Merge branch '2016.3' of github.com:saltstack/salt into fix-augeas-return-for-test
    - b0fe0cd256 Change return value for salt/states/augeas.py to be True instead of None for cases where salt is run with test=True. Fixes #37870
  * fdabc31e8d8 Merge pull request #37907 from Talkless/patch-2
    - 072a319490 Fix server trust in test run of svn.latest
  * f396fd443f Merge pull request #37896 from toanju/2016.3
    - c95304188e rh networking: add missing values

  - 27703c54bc Merge pull request #37811 from rallytime/bp-37789
    
    * ba3fe48e1 fix comment
    * a021f76a9b issue: 37751 Add documentation for option privileged
Salt Documentation, Release 3006.4

5522 Chapter 32. Release notes

- adac9d7c0c Merge pull request #37810 from rallytime/bp-37775
  - 2bed91437b Document python argument in salt.states.virtualenv_mod
- PR #37794: (sjorge) network.routes should not raise exception if no interface

- PR #37815: (rallytime) [2016.11] Merge forward from 2016.3 to 2016.11 @ 2016-11-21 20:22:49 UTC
  - 628c4a3d27 Merge pull request #37815 from rallytime/merge-2016.11
  - c6b5fd3715 Merge branch '2016.3' into '2016.11'
    - 7de784411d Add nodegroup check to cminions (#37763)
    - d674369efc Fix ip/port issue with salt-call (#37766)

- ISSUE #37449: (thatch45) Allow TLS connections in the Tornado TCP transport (refs: #37776, #37859)

- PR #37776: (DmitryKuzumenko) Full TLS/SSL options support as provided by Tornado TCPServer. (refs: #37849) @ 2016-11-21 20:11:52 UTC
  - 0b30b93dbb Merge pull request #37776 from DSRCorporation/features/37449_tls
  - 6857b9b8b1 Documented new TLS/SSL settings.
  - e42898f2e3 Full TLS/SSL options support as provided by Tornado TCPServer.

- PR #37773: (rallytime) [2016.11] Merge forward from 2016.3 to 2016.11 @ 2016-11-18 19:18:42 UTC
  - 3835f91d99 Merge pull request #37773 from rallytime/merge-2016.11
  - c859f9ec1 Merge branch '2016.3' into '2016.11'
  - c62fd6b023 Add thorium path to syspaths (#37767)
  - bff949f4e9 Merge pull request #37760 from hu-dabao/fix_cb_returner
    - de372f27e 1. returner no need to check whether the jid exists for external job cache setup 2. add full_ret to return doc so that the document will be informative 3. make ttl as a config attribute because salt-minion does not have keep_jobs attribute 4. add password into config attribute 5. update the documents accordingly
  - 1f976ac212 Merge pull request #37738 from terminalmage/issue36629
    - da46678c51 Allow pillar.get to retrieve fresh pillar data when saltenv passed
  - 7aee7fc63c Switch default filter tag for ONE resources from user only to all resources (#37745)

- PR #37764: (mirceaulinic) Doc fixes and replace feature @ 2016-11-18 03:15:31 UTC
  - 6f0f70c9a3 Merge pull request #37764 from cloudflare/NET-UPDATE
  - c3f0202fdd Replace feature and doc fixes

32.2.80 Salt 2016.11.10 Release Notes

Version 2016.11.10 is a security release for 2016.11.0.
Changes for v2016.11.9..v2016.11.10

Security Fix

CVE-2018-15751 Remote command execution and incorrect access control when using salt-api.
CVE-2018-15750 Directory traversal vulnerability when using salt-api. Allows an attacker to determine what files exist on a server when querying /run or /events.

Credit and thanks for discovery and responsible disclosure: nullbr4in, xcuter, koredge, loupos, blackcon, Naver Business Platform

32.2.81 Salt 2016.11.2 Release Notes

Version 2016.11.2 is a bugfix release for 2016.11.0.

Statistics

- Total Merges: 157
- Total Issue References: 34
- Total PR References: 116
- Contributors: 45 (Ch3LL, Cybolic, DmitryKuzmenko, UtahDave, Vaelatern, alex-zel, alxwr, amendlik, alnuro, aosagie, basdusee, bbinet, benediktwerner, cachedout, clinta, cro, dereckson, disaster123, ewapptus, ezh, folti, gmacon, ggunhned, gtmanfred, kkoppel, lorengordon, martintamare, mcalmer, meaksh, mirceaulinic, mostafahussein, mvdwalle, rallytime, rbjorklin, scthi, sorge, techhat, terminalmage, tsaridas, twangboy, vutny, wolfpackmars2, yhekma, yopito, yue9944882)

Security Fixes

CVE-2017-5192 local_batch client external authentication not respected

The LocalClient.cmd_batch() method client does not accept external_auth credentials and so access to it from salt-api has been removed for now. This vulnerability allows code execution for already-authenticated users and is only in effect when running salt-api as the root user.

CVE-2017-5200 Salt-api allows arbitrary command execution on a salt-master via Salt’s ssh_client

Users of Salt-API and salt-ssh could execute a command on the salt master via a hole when both systems were enabled.

We recommend everyone upgrade to 2016.11.2 as soon as possible.

Changelog for v2016.11.1..v2016.11.2

- PR #38859: (alxwr) fix parsing of sockstat -4 @ 2017-01-23 16:47:22 UTC
  - ec59ae67c8 Merge pull request #38859 from alxwr/2016.11
  - 30fe5641c7 fix parsing of sockstat -4

- PR #38850: (techhat) Strip .p from cache file names @ 2017-01-23 16:28:46 UTC
  - 5fe6db6201 Merge pull request #38850 from techhat/stripcache
- 109cb62e76 Remove .p from test
- 534aa3f527 Strip .p from cache file names
- PR #38848: (Ch3LL) add 2016.11.2 changelog to release notes

- PR #38819: (twangboy) Remove Users from c:salt [DO NOT MERGE FORWARD] @ 2017-01-20 20:17:35 UTC
  - 4913c4f90c Merge pull request #38819 from twangboy/salt_perms_2016.11
  - eb04ed7eef Remove User from c:salt

- PR #38815: (rallytime) [2016.11] Merge forward from 2016.3 to 2016.11 @ 2017-01-20 18:53:01 UTC
  - a275b9714e Merge pull request #38815 from rallytime/merge-2016.11
  - ce6d1b103d Make sure we're using the opts dict mocking in parsers_test
  - 315b2c8712 Merge branch '2016.3' into '2016.11'
    * d14f0c64eb Merge pull request #38812 from rallytime/pyobjects-test
      * f3e84c1ab7 Update pyobjects test to be a list
    * 50f03f8057 Merge pull request #38813 from gtmanfred/2016.3
      * ce3472ccc2 catch SIGPIPE in vmware connection
    * 23b8b47258 Merge pull request #38809 from twangboy/fixed_hostname_2016.3
      * d57a51f9f9 Fix tests for get_hostname
      * 7ca3fd7b84 Fix get_hostname to handle longer computer names
    * 1033bbd0e8 Merge pull request #38808 from vutny/fixed-38388
      * 9bd203f3ce Fix #38388
    * f3ae3c5c8e Merge pull request #38668 from terminalmage/issue38604
      * 0ea97cdad9 Merge pull request #10 from cachedout/pr-38668
      * db81af035 Munge retcode into return data for batching
      * a642a995dc Return the ret data from batch execution instead of raw data
    * c6a9a9e5a Merge pull request #38789 from rallytime/fixed-38622
      * af41fe06e6 Update some saltenv refs to environment in salt.modules.state docs
    * e0bf700020 Merge pull request #38790 from cachedout/fixed_pyobjects_test_type
      * a66af5b0ff Fix typo in pyobjects test
    * 6e9785e6ea Merge pull request #38792 from rallytime/fixed-38629
      * 1e125e2844 Update pillar tutorial language regarding pillar_opts settings

- PR #38832: (terminalmage) archive.extracted: Identify symlinks when checking for incorrect types @ 2017-01-20 18:36:15 UTC
  - efe1bf10e8 Merge pull request #38832 from terminalmage/issue38711
  - d10c068e25 Update archive state unit tests to reflect symlinks in archive.list
  - d6adfb6d12 Identify symlinks when looking for incorrect types
  - 09b9e9f7c archive.list: organize symlinks separately from files in verbose mode
  - e6483f096d Support removing symlinks in salt.utils.rm_rf
• PR #38726: (twangboy) Add VC Redist 2008 SP1 MFC to installer @ 2017-01-19 19:13:42 UTC
  – 10a3d8b8dd Merge pull request #38726 from twangboy/vcredist
  – f0a65355d change extensions .ext to .exe
  – 98c40e278c Add VC Redist 2008 SP1 MFC to installer

• PR #38810: (UtahDave) Fix beacon doc @ 2017-01-18 21:37:21 UTC
  – d5f2d92a4e Merge pull request #38810 from UtahDave/fix_beacon_doc_zd1035
  – dbe9ed806 fix reactor example.

• PR #38811: (techhat) Show a lot less data when requesting a VM @ 2017-01-18 21:08:03 UTC
  – 88af08a71 Merge pull request #38811 from techhat/sanvm
  – 47c19325cf Show a lot less data when requesting a VM

• PR #38807: (Ch3LL) refine the os detection in archive test

• PR #38799: (aosagie) Parse ansible dynamic inventory output correctly @ 2017-01-18 15:32:47 UTC
  – e3ca6881c8 Merge pull request #38799 from aosagie/fix-ansible-dynamic-roster
  – 26d6f699a7 Parse ansible dynamic inventory output correctly

• PR #38787: (rallytime) [2016.11] Merge forward from 2016.3 to 2016.11 @ 2017-01-18 08:39:08 UTC
  – 76d6043f3 Merge pull request #38787 from rallytime/merge-2016.11
  – 2aad54c49f Merge branch '2016.3' into '2016.11'
    – 3417ad6c17 Merge pull request #38796 from saltstack/revert-38707-root_dir_fix-gh
      – cb08f3b9be Revert "Fixed prepending of root_dir override to the other paths"
  – 64d866f7ab Merge branch '2016.3' into '2016.11'
  – bab3479a3c Merge pull request #38585 from rallytime/follow-up-38527
    – 05587201b6 Pylint fix: add line at end of file
    – fa01367599 Keep a copy of the DEFAULT_API_OPTS and restore them after the test run
    – 2ad07634d9 Test clean up
    – fd2ee7db30 Add some simple unit tests for salt.config.api_config function
    – 3d2f8ec83b Make sure the pidfile and log_file values are overridden by api opts
    – 1f6b540e3e Make sure the pidfile and log_file values are overridden by api opts
    – 04d307f917 salt-api no longer forces the default timeout
  – 0fb6bb77 Merge pull request #38707 from alexbleotu/root_dir_fix-gh
    – 0bac8c8be3 Fixed prepending of root_dir override to the other paths
  – 96c9dc10f7 Merge pull request #38774 from vutny/dev-test-docs
    – 4620dc4afa DOCS: add C++ compiler installation on RHEL required for bundled 0mq
  – aedfb7a43 Merge pull request #38749 from vutny/pkg-build-better-exception-msg
    – 53f2be5b21 pkg build modules throw better exception message if keyid wasn't found

• PR #38660: (techhat) Don't force salt.cache to use cachedir from opts @ 2017-01-17 18:38:35 UTC
  – 4e6146f65f Merge pull request #38660 from techhat/cachedir

32.2. Previous releases
• ISSUE #37948: (djacobs2016) ssh_known_hosts.present is failing when checking key/host (refs: #37982)
• ISSUE #33932: (folti) ssh_known_hosts.present: hashing global known hosts file makes it readable by root only (refs: #33933)
• PR #38667: (rallytime) Back-port #37982 to 2016.11 @ 2017-01-17 15:42:13 UTC
  - PR #37982: (wolfpackmars2) Update ssh.py (refs: #38667)
  - PR #33933: (folti) ssh: keep original permissions, when hashing known_hosts (refs: #38667)
  - 89dc86e2bc Merge pull request #38667 from rallytime/bp-37982
  - be91e46a93 Update ssh.py
• PR #38759: (rallytime) [2016.11] Merge forward from 2016.3 to 2016.11 @ 2017-01-17 15:22:01 UTC
  - 751e14c523 Merge pull request #38759 from rallytime/merge-2016.11
  - 30e8a66fb0 Merge branch '2016.3' into '2016.11'
    • 8466b34e82 Merge pull request #38743 from rallytime/merge-2016.3
      - d24776f5e9 Merge branch '2015.8' into '2016.3'
      - 6869621ed1 Merge pull request #38731 from rallytime/merge-2015.8
      - 9eb191b6ac Pylint fix
      - b910499dfe Various follow up fixes
      - e8309a6bbf Add release notes for 2015.8.13
      - f881f366b7 Merge pull request #20 from rallytime/2015.8.12_follow_up-batch-tests
      - 34282322c0 Clean up tests and docs for batch execution
      - c80b20b957 Merge pull request #19 from whiteinge/batchclient
      - 3d8f3d18f6 Remove batch execution from NetapiClient and Saltnado
      - 97b0f64923 Lintfix
      - d1516664f7 Add explanation comment
      - 62f2c87080 Add docstring
      - 9b0a786aeb Explain what it is about and how to configure that
      - 5ea3579e10 Pick up a specified roster file from the configured locations
      - 3a8614e5df Disable custom rosters in API
      - c0e5a1171d Add roster disable flag
· e9c59e9b8f Merge pull request #38602 from terminalmage/fix-boto-test
  · 3424a108ac Fix failing unit.states.boto_vpc_test.BotoVpcRouteTableTestCase.test_present_with_routes
    · a642cdef79 Merge pull request #38723 from rallytime/fix-38674
      · 706c885f55 Remove "event_publisher_pub_hwm" and "salt_event_pub_hwm" from config/__init__.py

    · a4d6598f1e preserve detailed change reports
    · d0ad251778 combine private key and cert management
    · 3d1474d911 cross call file.managed to get permissions options
  · PR #38682: (mirceaulinic) [2016.11.2/napalm] Better error message when NotImplementedError raised @ 2017-01-15 18:34:25 UTC
    · bf6d74c98e Merge pull request #38682 from cloudflare/NotImplementedError-MSG
    · f847639dee Better error message when NotImplemented Error raised
• ISSUE #37996: (stefan-as) influxdb_user.present does not pass client_args (refs: #38695)

• PR #38695: (rallytime) Pass in client_args when calling influxdb execution module funcs @ 2017-01-15 18:33:48 UTC
  – df12e49d80 Merge pull request #38695 from rallytime/fix-37996
  – 05b0975888 Pass in client_args when calling influxdb execution module funcs

• ISSUE #38521: (vladvasiliu) State cloud.present on AWS: TypeError: 'NoneType' object is not iterable (refs: #38651)

• ISSUE #37981: (tazaki) Salt-cloud ec2 vpc securitygroupid always returning default (refs: #38183)

• PR #38651: (rallytime) Don't lose the set reference for ec2 securitygroup ids @ 2017-01-15 18:06:25 UTC
  – PR #38183: (cro) Fix bad set operations when setting up securitygroups in AWS. (refs: #38651)
  – 834e5469fc Merge pull request #38651 from rallytime/fix-38521
  – 830c03cc6c Don't lose the set reference for ec2 securitygroup ids

• ISSUE #38216: (pgrishin) salt-run: can’t get cache.grains (refs: #38659)

• PR #38659: (techhat) Turn None into an empty string (for minion matching) @ 2017-01-15 18:02:03 UTC
  – 8b38fca8a8 Merge pull request #38659 from techhat/issue38216
  – 4073c91584 Turn None into an empty string (for minion matching)

• PR #38703: (yhekma) The test option is only valid for the minion, not the master @ 2017-01-15 17:56:22 UTC
  – 0ad5d22ad4 Merge pull request #38703 from yhekma/docfix
  – 57df3bf148 The test option is only valid for the minion, not the master

• PR #38718: (terminalmage) Fix for dynamic git_pillar when pillarenv is used @ 2017-01-15 14:37:30 UTC
  – 8c1222e7db Merge pull request #38718 from terminalmage/zd909
  – 12bba5a24 Fix for dynamic git_pillar when pillarenv is used

• ISSUE #38677: (yhekma) consul cache backend broken (refs: #38676)

• PR #38676: (yhekma) Removed overloading of list() @ 2017-01-15 05:42:13 UTC
  – aac8b54860 Merge pull request #38676 from yhekma/2016.11
  – 3237d23e1c Localfs should also be changed of course
  – 9d9de67219 We do not want to overload the list() type because if we do, we turn this function into a recursive one, which results in an exception because set() cannot be concatenated with str (/)

• ISSUE #38684: (rukender) 2016.11.1 :[ERROR][11182] Failed to import beacons avahi_announce (refs: #38713)

• PR #38713: (rallytime) Add NameError to exception in avahi_announce beacon @ 2017-01-15 05:33:04 UTC
  – c246ab41c5 Merge pull request #38713 from rallytime/fix-38684
  – db60bed24c Add NameError to exception in avahi_announce beacon

• PR #38729: (rallytime) [2016.11] Merge forward from 2016.3 to 2016.11 @ 2017-01-15 23:15:33 UTC
  – 6c14774c04 Merge pull request #38729 from rallytime/merge-2016.11
  – 4e1e45d640 Merge branch '2016.3' into '2016.11'
  – 7b850d472d Merge pull request #38647 from gtmanfred/nova
    – 5be9b60851 add documentation about using keystoneauth for v3
* 7b657ca4ae add the ability to use keystone v2 and v3
  * 5646ae1b34 add ability to use keystonauth to authenticate in nova driver
* 383768d838 Merge pull request #38650 from rallytime/remove-ubuntu-ppa-docs
  * 30429b2e44 Remove the installation instructions for out-of-date community ppa
* 7d9f56e3b5 Merge pull request #38657 from DSRCorporation/bugs/38087 Syndic_event_format_fix
  * 594c33f396 Publish the 'data' field content for Syndic events
* 83987511fd Merge pull request #38649 from Ch3LL/test_apply_template
  * 47f8b68e0b fix unit.modules.file_test

** ISSUE #38631: (doitian) In Orchestration, kwargs are not passed to state.sls in masterless mode (refs: #38635)**

** PR #38635: (lorenagordon) Sends pass-through params to state module @ 2017-01-10 20:01:59 UTC**
  * cf82d1631 Merge pull request #38635 from lorenagordon/issue-38631
  * 14666138b9 Sends pass-through params to state module

** PR #38640: (mirceaulinic) Import napalm_base instead of napalm @ 2017-01-10 19:58:01 UTC**
  * 017094a207 Merge pull request #38640 from cloudflare/NAPALM-IMPORTS
  * 8f13f63880 Import napalm_base instead of napalm

** PR #38641: (techhat) Add sane cache defaults for minion and cloud @ 2017-01-10 19:55:15 UTC**
  * 79663132dd Merge pull request #38661 from techhat/sanedefault
  * aee40648ec Add a sane cache default for cloud
  * c9e01a36e7 Add a sane cache default for minions

** PR #38645: (rallytime) [2016.11] Merge forward from 2016.3 to 2016.11 @ 2017-01-10 19:54:06 UTC**
  * b0ed91ce2d Merge pull request #38645 from rallytime/merge-2016.11
  * 7a668e9749 Merge branch '2016.3' into '2016.11'
  * 74ddc71be3 Merge pull request #38626 from saltstack/revert-37358-2016.3.3_issue37355
    * e912ac99c2 Revert "Fix/workaround for issue #37355"
  * 5e8b32934 Merge pull request #37358 from Firewire2002/2016.3.3_issue37355
    * 910da18bfd fixed typo
    * 4fbc5dd06 fixed wrong renamed variable and spaces
    * 92366e646c issue #37355
    * 7dc87ab7b8 issue #37355
    * 2878180405 issue #37355
  * 6c2fe615aa Merge pull request #35390 from alexandr-orlov/2016.3
    * cd5ae17e8d fxd missed proper grains dictionary
  * 2579cfa42d Merge pull request #38618 from rallytime/bp-38579
    * 2052eece2c Add copy import
    * c2f8d2f04 ticket 38558: add unit test, deepcopy() only if necessary
• 30ae0a1958 added deepcopy of default if merge=True

• PR #38627: (cachedout) Pr 38476 @ 2017-01-06 22:05:45 UTC
  - PR #38476: (amendlik) Key fingerprints (refs: #38627)
  - d67f6937d7 Merge pull request #38627 from cachedout/pr-38476
  - 2a423fedd Add changes to raetkey
  - 55ad9d6c6c Add hash_type argument to MultiKeyCLI.finger_all function
  - e8681269a4 Add hash_type argument to key module fingerprint functions
  - d0f4c300b7 Add hash_type argument to wheel fingerprint functions

  - d6b7019df6 Merge pull request #38599 from terminalmage/archive-results-handling
  - 9aceb8186d archive.extracted: Prevent traceback when state.single cannot be run

- **ISSUE #38517:** (basdusee) Slack.py engine 100% CPU load due to missing time.sleep(1) (refs: #38520)

- **PR #38520:** (basdusee) Fix issue #38517, added time.sleep(1) at line 227 in slack.py @ 2017-01-05 20:35:08 UTC
  - d486b42ce8 Merge pull request #38520 from basdusee/fixed-issue-38517
  - e3a883c915 Small fix on the fix regarding indentation
  - 8adeae6f81 Fix issue #38517, added time.sleep(1) at line 227 in slack.py engine.

- **ISSUE #38485:** (wasabi222) bgp.config not working (refs: #38499)

- **PR #38577:** (mirceaulinic) Fix function headers as per #38499 @ 2017-01-05 18:41:33 UTC
  - PR #38499: (mirceaulinic) Fix #38485 (refs: #38577)
  - 0706cde626 Merge pull request #38577 from cloudflare/PREP-2016.11.2
  - 62bee3c793 Fix function headers as per #38499

- **PR #38578:** (mirceaulinic) [2016.11] Port 5123f11 from develop into 2016.11.2 @ 2017-01-05 18:11:12 UTC
  - 55d1747792 Merge pull request #38578 from cloudflare/PORT-5123f1
  - dea7866d57 Update net.load_template doc: 2016.11.2

- **ISSUE #38462:** (g-shockfx) Can’t add beacon memusage on Windows (refs: #38584)

- **PR #38584:** (rallytime) Allow memusage beacon to load on Windows @ 2017-01-05 18:08:30 UTC
  - be69baf6e6 Merge pull request #38584 from rallytime/fixed-38462
  - 1f6e945df5e Allow memusage beacon to load on Windows

- **PR #38570:** (rallytime) [2016.11] Merge forward from 2016.3 to 2016.11 (refs: #38585) @ 2017-01-05 14:28:38 UTC
  - 14b643fd48 Merge pull request #38570 from rallytime/merge-2016.11
  - 30f14d15df Merge branch '2016.3' into '2016.11'
  - 7b74436d13 Merge pull request #38562 from rallytime/arch-install-docs
  - * 8b1897ace9 Update arch installation docs with correct package name
  - 01860702cb Merge pull request #38560 from Ch3LL/fixed_api_log
  - * 1b45e9670b fix api logfile
  - 0056620a53 Merge pull request #38531 from rallytime/bp-33601
5532 Chapter 32. Release notes

- c36cb39825 remove the unnecessary double trigger
- 38414493bf fix spacing lint error
- 8c1defc710 Remove unnecessary type from alias commands. Deduplicate alias handling to autodetect function selection. Add error reporting to slack connectivty problems. Cleanup slack's unicode conversion
- c2f23bc45e Fix slack engine to run on python2.6
- 50242c7f17 Merge pull request #38541 from techhat/issue38187
  * eae3a435dd Strip user:pass from cached URLs
- 325dc56e59 Merge pull request #38554 from multani/fix/30454
  * 2e7f743371 yaml: support unicode serialization/deserialization
  * df76113c5c jinja: test the "yaml" filter with ordered dicts
  * f7712d417f Revert "Add yaml_safe filter"
- 4ddbc2ecaaa add note about pyVmomi locale workaround (#38536)
- 1c951d152b fix gce image bug (#38542)
- PR #38509: (mostafahussein) Stop request from being processed if bad ip @ 2017-01-04 20:05:44 UTC
  - 9a1550d336 Merge pull request #38509 from mostafahussein/2016.11
  - 8847289c3e remove commented code
  - 428917a963 Stop request from being processed if bad ip
- ISSUE #38518: (kkoppel) slack_notify.call_hook returns tracebacks (refs: #38522)
- PR #38522: (kkoppel) Fix usage of salt.utils.http.query in slack_notify.call_hook @ 2017-01-04 20:04:57 UTC
  - bc07d420e9 Merge pull request #38522 from kkoppel/fix-issue38518
  - ff1e7f0c71 Fix usage of salt.utils.http.query in slack_notify.call_hook
- ISSUE #38524: (rbjorklin) salt-api seems to ignore rest_timeout since 2016.11.0 (refs: #38585, #38527)
- PR #38527: (rbjorklin) salt-api no longer forces the default timeout (refs: #38585) @ 2017-01-04 17:10:15 UTC
  - 42f0270ee Merge pull request #38527 from rbjorklin/api-timeout-fix
  - 0202f68820 salt-api no longer forces the default timeout
- PR #38529: (rallytime) [2016.11] Merge forward from 2016.3 to 2016.11 @ 2017-01-04 17:06:57 UTC
  - 1895eb7533 Merge pull request #38529 from rallytime/merge-2016.11
  - 85f470207c Merge branch '2016.3' into '2016.11'
    * ec60f9c721 Merge pull request #38487 from gtmanfred/2016.3
      - 048b9f6b9d add test
      - c480c11528 allow spaces in cron env
      - c529ec8c34 allow crons to have multiple spaces
    * c5ba11b5e0 Merge pull request #38491 from gtmanfred/timing
      - 79368c7528 Use UTC for timing in case timezone changes
    * 86f0aa6bb3 Merge pull request #38503 from jinm/issue_38472_jinm
      - 0cd9df299f Hash type fallback for file management
* ed2ba4bd1b Merge pull request #38457 from bshelton229/git-latest-head-bug
  - 558e7a771a Stops git.latest checking for local changes in a bare repo
* 36e21b22cb Merge pull request #38385 from dragon788/2016.3-double-dash
  - 86c4b56f47 Newline for lint compat
  - 9d9b686057 Address review comments, consistency of quotes
  - df9bd5e7f9 Use unambiguous long names with double dashes
* 59f2560d88 Merge pull request #38474 from cachedout/key_loop
  - de504538e1 Allow an existing ioloop to be passed to salt-key
* 3d0c752acd Merge pull request #38467 from gtmanfred/2016.3
  - 7b7c6b3878 file.line fail with mode=delete
* 940025d5c4 Merge pull request #38434 from slinn0/issue_38433 Fixes for
  - 22af87a3fc Fixes for https://github.com/saltstack/salt/issues/38433
  - e5eb51255b Update deprecation notices to the correct version (#38421)
  - 9ce53318df file.managed: Fix failure when filename contains unicode chars (#38415)
  - 2cdb59d055 Merge pull request #38419 from Ch3LL/fix_doc_scsi
  - 234043b8bb fix scsci docs example

• PR #38539: (twangboy) Fix DSC LCM Config int checks @ 2017-01-04 16:56:27 UTC
  - ec4f118ca2 Merge pull request #38539 from twangboy/dsc_int_checks
  - 5657fd1956 Add repr flag for str
  - aea4219502 Fix DSC LCM Config int checks

• PR #38549: (meaksh) Adding multiple SUBVOLUME support and some fixes to the Snapper module @ 2017-01-04 15:32:30 UTC
  - 53449c89a5 Merge pull request #38549 from meaksh/2016.11-snapper-multiple-subvolumen-support
  - ef26e93b7 Some fixes and pylint
  - 1e6ba45db4 Fixes pre/post snapshot order to get the inverse status
  - 68d5475c1f Fixing Snapper unit tests for SUBVOLUME support
  - e9919a913f Removing possible double "/' from the file paths
  - 8b4f87f226 Updating and fixing the documentation
  - edea45272a Raises "CommandExecutionError" if snapper command fails
  - 3841e1143b Only include diff in the state response if include_diff is True
  - 7803e7716c Adds multiple SUBVOLUME support to the Snapper module
  - PR #38545: (rallytime) Move boto_vpc.describe_route_table deprecation version to Oxygen

• PR #38471: (twangboy) Fix Problem with win_service module @ 2017-01-01 20:30:21 UTC
  - 5e80104a70 Merge pull request #38471 from twangboy/fix_win_service
  - 810471b9cd Fix problem with some services getting access denied

• ISSUE #38485: (wasabi222) bgp.config not working (refs: #38499)
• PR #38499: (mirceaulinic) Fix #38485 (refs: #38577) @ 2017-01-01 17:42:15 UTC
  - 0a09049a2d Merge pull request #38499 from cloudflare/FIX-38485
  - 18018139f3 Fix #38485

• PR #38501: (mvdwalle) Do not assume every object is a server @ 2017-01-01 17:37:57 UTC
  - 13f0b809df Merge pull request #38501 from mvdwalle/fix-gogrid-list-password
  - bd7dee9a10 Do not assume every object is a server

• PR #38461: (anlutro) Improvements/fixes to kapacitor task change detection @ 2016-12-29 17:08:47 UTC
  - aa0c843553 Merge pull request #38461 from alprs/fix-kapacitor_changes
  - 52721e97d6 clean up and fix tests
  - 8648775c2a if task is not defined, it’s not up to date
  - c3ab954c6e improvements/fixes to kapacitor task change detection

• PR #38473: (twangboy) Change OSX/OS X to macOS where possible @ 2016-12-29 16:35:11 UTC
  - 2c51eb9d16 Merge pull request #38473 from twangboy/osx_to_macos
  - e96bfe8fa2 Change OSX/OS X to macOS where possible

• PR #38412: (bbinet) Update PillarStack stack.py to latest upstream version @ 2016-12-28 19:28:40 UTC
  - 24971b547e Merge pull request #38412 from bbinet/pillarstack-updates
  - b66b4bd060 Fix lint violations in stack.py
  - 6a30fe6aeb Update PillarStack stack.py to latest upstream version

• PR #38456: (twangboy) Gate Windows Specific Salt Utils @ 2016-12-28 18:44:33 UTC
  - 5395d3210a Merge pull request #38456 from twangboy/gate_win_utils
  - d34d110a84 Fix lint, fix boto module
  - c20111142f Gate Windows Utils

• PR #38428: (gqgunhed) fixed typo: lq command-line syntax @ 2016-12-27 15:42:02 UTC
  - 7c7799162b Merge pull request #38428 from gqgunhed/lq_typo
  - d79d682e8b fixed typo: lq command-line syntax

• ISSUE #38433: (lorengordon) 2016.11 breaks file.managed on Windows (refs: #38444)

• ISSUE #34101: (windoverwater) archive.extracted breakage due to 2016.3.0 upgrade from 2015.8.10 (refs: #37368)

• PR #38444: (lorengordon) Adds new import required for extract_hash @ 2016-12-27 15:37:20 UTC
  - PR #37368: (terminalmage) Overhaul archive.extracted state (refs: #38444)
  - f5984d0f81 Merge pull request #38444 from lorengordon/issue-38443
  - b2925ad7b7 Adds new import required for extract_hash

• ISSUE #38071: (luochun-95) remote execute is very slow (refs: #38167)

• PR #38167: (cachedout) Kill pkg_resources for CLI tools [DO NOT MERGE] @ 2016-12-22 22:11:22 UTC
  - 4c4f07ca4c Merge pull request #38167 from cachedout/no_pkg_resources
  - ec6901720a Remove debugging
- f28e33b9b6 Remove from all but salt cli
- bb3af72317 Remove from salt-call
- c676846066 Kill pkg_resources for CLI tools

- PR #38417: (rallytime) [2016.11] Merge forward from 2016.3 to 2016.11 @ 2016-12-22 19:00:44 UTC
  - 2fc8c154af Merge pull request #38417 from rallytime/merge-2016.11
  - efb8a8dd5 Merge branch '2016.3' into '2016.11'
  - 27253522c8 Improve pillar documentation (#38407)
  - 423b1fdff Merge pull request #38398 from terminalmage/issue38372
    * c80dbaa914 Fix call to file.get_managed in cron.file state
  - 5a33d1e697 Fix http.query when result has no text (#38382)
  - b74b5c7d38 Merge pull request #38390 from meaksh/2016.3-fix-try-restart-for-autorestarting-on-SUSE-systems
    * de6ec05ec0 add try-restart to fix autorestarting on SUSE systems
  - 2ca3a9760a Merge pull request #38221 from UtahDave/fix_default_returner
    * 385640765b remove a blank line to satisfy linter
    * 9c248aa14c validate return opt, remove default.
    * 8bb37f9fe7 specify allowed types and default for "returner"
    * 11863a4bfe add examples of default minion returners
    * e7c6012655 add support for default returners using return

- PR #38342: (scthi) Bug fix ext pillar nodegroups @ 2016-12-22 16:47:42 UTC
  - bbc149ce67f Merge pull request #38342 from scthi/bugfix-ext-pillar-nodegroups
    - dba315c4b6 ext-pillar nodegroups works for all minions now.

- PR #38403: (terminalmage) git_pillar: Document the transition from env to saltenv in the jinja context @ 2016-12-22 16:34:48 UTC
  - 453476d982 Merge pull request #38403 from terminalmage/document-saltenv
    - 0a72e0f0be git_pillar: Document the transition from env to saltenv in the jinja context

- ISSUE #38253: (gmacon) There was no error installing package 'setuptools' although it does not show when calling 'pip.freeze'. (refs: #38354)

- PR #38354: (gmacon) Use --all when calling pip.py @ 2016-12-20 20:40:21 UTC
  - 12436efb54 Merge pull request #38354 from gmacon/pip-freeze-all
    - dca24b270e Use --all when calling pip.py

- PR #38348: (rallytime) Update autodoc topics for new modules added in 2016.11 @ 2016-12-20 20:36:20 UTC
  - 68430b1fa6 Merge pull request #38348 from rallytime/mod-docs-2016.11
    - b31c2412ca Add __iter__ and next options to doc/conf.py
    - b8c16094c4 Revert "Move import/error messaging logic for snapper module into __virtual__()"
    - 640db5b5ac Move import/error messaging logic for snapper module into __virtual__()
    - 366271f459 Add snapper to state index doc module list

32.2. Previous releases 5535
- 135d254c80 Remove netapi autodoc files: they should not be added as their doc structure is different
- 0006139aca Update autodoc topics for new modules added in 2016.11

**PR #38377:** (DmitryKuzmenko) Implementation and docs for Consul key-value store plugin for minion data cache. @ 2016-12-20 20:36:02 UTC

- 6ee7b2bae7 Merge pull request #38377 from DSRCorporation/features/consul_cache
- 6fb4430ae3 Configuration options and documentation for Consul data cache plugin.
- dad748f57a Data cache plugin configuration documentation.
- c7209cd90c Consul data cache plugin.

**PR #38373:** (rallytime) Back-port #38212 to 2016.11 @ 2016-12-20 20:35:09 UTC

- **PR #38212:** (disaster123) ZMQ: add an option for zmq.BACKLOG to salt master (zmq_backlog) (refs: #38373)
- f6d1b559bc Merge pull request #38373 from rallytime/bp-38212
- 52fc6daac0 ZMQ: add an option for zmq.BACKLOG to salt master (zmq_backlog)

**PR #38374:** (mirceaulinic) NAPALM proxy module: Fix optional_args key issue @ 2016-12-20 20:34:59 UTC

- 69c3f19fc1 Merge pull request #38374 from cloudflare/FIX-NAPALM-PROXY
- 44169315d8 Fix optional_args key issue

**ISSUE #38048:** (ezh) [2016.11.0] Salt-cloud throws TypeError exception (refs: #38073)

**PR #38073:** (ezh) 2016.11 @ 2016-12-20 14:51:11 UTC

- 530f95955 Merge pull request #38073 from doublescoring/2016.11
- 42d3d26f28 [38073] Fix test assertion
- 9b37ead913 Fix broken os.write without string.encode

**PR #38344:** (bbinet) Fix influxdb_database.present state @ 2016-12-20 13:57:45 UTC

- 67908d5aba Merge pull request #38344 from bbinet/fixed-influx-createdb
- c6b075d6f4 Fix influxdb_database.present state

**PR #38358:** (rallytime) [2016.11] Merge forward from 2016.3 to 2016.11 @ 2016-12-20 00:11:48 UTC

- 04d6898958 Merge pull request #38358 from rallytime/merge-2016.11
- c6e191ad0d Remove doc markup references from 2016.11 branch
- 51058945c Merge branch '2016.3' into '2016.11'
- 09d9eff992 Merge pull request #38288 from terminalimage/archive-extracted-local-source-2016.3
  - 845e3d0e75 Update tests to reflect change in cache behavior
  - 5a08d7c70a archive.extracted: don't try to cache local sources (2016.3 branch)
- bf376678a Merge pull request #38312 from cro/proxy_config_in_cfg
  - 2006c4000e Typo
  - 689d95b10f Backport feature allowing proxy config to live in pillar OR /etc/salt/proxy.
- c83db5a785 Merge pull request #38320 from rallytime/cleanup-doc.refs
  - 62978cb7a0 Don't check the doc/conf.py file for doc markup refs
  - 770e732d76 Add a unit test to search for new doc markup refs
• PR #38285: (terminalmage) archive.extracted: don’t try to cache local sources
  
• PR #37947: (vutny) Fix salt-minion initscript for RHEL5 (SysV) to pick up proper python version @ 2016-12-19 21:03:50 UTC
  
  – 13414949e3 Merge pull request #37947 from vutny/fix-rhel5-minion-init
  
  – c94e798b8a SysV init script for rpm: get and show unique PIDs only
  
  – 8ff6c4128 Fix initscript for RHEL5 (SysV) to pick up proper python version

• PR #38106: (techhat) "test" is not necessarily in opts, for thorium @ 2016-12-19 14:40:32 UTC
  
  – 4d072ca689 Merge pull request #38106 from techhat/stateget
  
  – 5edc16f606 "test" is not necessarily in opts, for thorium

• PR #38333: (amendlik) Suppress errors when checking if an alternative exists @ 2016-12-19 13:40:49 UTC
  
  – a01fade604 Merge pull request #38333 from amendlik/states-alternatives
  
  – 8bfc5bdc5 Adjust alternatives test for updated error message
  
  – 09dee3611 Suppress errors when checking if an alternative exists

• PR #38340: (ewapptus) Backport PR #38251: Fixed nested orchestrate not respecting failures @ 2016-12-19 13:31:16 UTC
  
  – PR #38251: (ewapptus) Fixed nested orchestrate not respecting failures (refs: #38340)
  
  – 15d3b476e9 Merge pull request #38251 from ewapptus/bp-38251
  
  – 266e0a465c Fixed nested orchestrate not respecting failures

• PR #38229: (mcalmer) provide kwargs of sls_build to dockerng.create @ 2016-12-18 13:13:10 UTC
  
  – ecd441d090 Merge pull request #38229 from mcalmer/dockerng-sls_build-kwargs
  
  – e7292fabb7 make it explicit that we want to delete these keys
  
  – 4c710139b5 use default values for pop() to prevent KeyError raised
  
  – 455c18325c provide kwargs to dockerng.create to provide all features to sls_build as well

• ISSUE #36204: (stanvarlamov) Salt-Cloud: salt.runners.cloud.create exits with True on Python process (ec2.py) exception (refs: #37333)

• PR #38309: (ewapptus) Backport PR #37333: Fixed state.salt.runner() reporting success on exceptions @ 2016-12-18 12:39:53 UTC
  
  – PR #37333: (benediktwerner) Fixed state.salt.runner() reporting success on exceptions (refs: #38309)
  
  – d2ce9c3e71 Merge pull request #38309 from ewapptus/bp-37333
  
  – a2b1259671 Fixed display of errors
  
  – 14a39f914e Fixed state.salt.runner return value on exceptions

• PR #38323: (rallytime) Update the Cloud Provider Specifics links in cloud docs @ 2016-12-18 12:30:49 UTC

32.2. Previous releases
- ebb9f6cbbbc Merge pull request #38323 from rallytime/update-cloud-provider-links
- 022caf23e9 Update the Cloud Provider Specifics links in cloud docs

**PR #38324:** (rallytime) [2016.11] Merge forward from 2016.3 to 2016.11 @ 2016-12-18 12:30:26 UTC
- 5bd7471e30 Merge pull request #38324 from rallytime/merge-2016.11
- 5940db5b3f Merge branch '2016.3' into '2016.11'
  - 6367ca7d2a Add nick to args for create_multi (#38281)
  - 235682b1e6 Merge pull request #38313 from dragon788/2016.3-chocolatey-fix
    - 1f5fc17551 Use machine readable output for list
    - cdbd2fe3c Added limit-output to eliminate false packages
  - 9e78dce80e Merge pull request #38279 from rallytime/fix-38174
    - 4a62d01577 Add docs for syndic_wait setting

**ISSUE #38246:** (martintamare) Windows Minion unable to start via nssm (refs: #38247)

**PR #38325:** (rallytime) Back-port #38247 to 2016.11 @ 2016-12-18 12:28:41 UTC
- PR #38247: (martintamare) fix(win_function): handle other language (refs: #38325)
- 83523d2f73 Merge pull request #38325 from rallytime/bp-38247
- 4b6c5438e3 fix(win_functions): syntax
- e602f17e3d fix(win_function): handle other language

**ISSUE #30195:** (Vaelatern) Add Void Linux support in Salt (refs: #31262, #38326)

**PR #38326:** (yopito) fix runit init support (grain init) in 2016.11 @ 2016-12-18 12:07:25 UTC
- PR #31262: (Vaelatern) Add support for Void Linux (refs: #38326)
- 54a2bb95de Merge pull request #38326 from yopito/fix-runit-init-support
- 25b91bb686 fix detection of runit as init system (grain init)
- PR #38322: (rallytime) Add azurearm module to doc index

**PR #38305:** (dereckson) Avoid normalization call for normalized mode value @ 2016-12-16 17:31:25 UTC
- 1ef299e7d Merge pull request #38305 from dereckson/fix-mode-extraneous-normalization
- 573ac3565e Avoid normalization call for normalized mode value
- PR #38291: (terminalmage) Improve documentation for archive.extracted in 2016.11

**ISSUE #37966:** (Cybolic) salt-cloud EC2 instance can’t be initiated (refs: #37967)

**PR #38298:** (rallytime) Back-port #37967 to 2016.11 @ 2016-12-16 15:20:04 UTC
- PR #37967: (Cybolic) Fixed faulty logic preventing instance initialisation. (refs: #38298)
- 3cf0135d50 Merge pull request #38298 from rallytime/bp-37967
- 42d367f39d Fixed faulty logic preventing instance initialisation.

**ISSUE #38070:** (ezh) [2016.11.0] Salt-cloud throws UnicodeDecodeError exception (refs: #38076)

**PR #38076:** (ezh) Fix decoding of broken string from remote sources @ 2016-12-15 19:05:25 UTC
- f4f0036f30 Merge pull request #38076 from doublescoring/fix-2016.11-38070
- 70c8db5489 Fix decoding of broken string from remote sources
- **PR #38278**: (rallytime) Back-port #38207 to 2016.11 @ 2016-12-15 18:09:27 UTC
  - **PR #38207**: (tsaridas) remove empty strings from list but not ones with one empty space char (refs: #38278)
  - **PR #38188**: (tsaridas) fix for push_dir in different OS (refs: #38203, #38207)
  - 2cac22c19 Merge pull request #38278 from rallytime/bp-38207
  - 5e8bf571d8 python3 compatibility and fix pylint
  - e0df047000 remove empty strings from list but not ones with one empty space char
- **PR #38277**: (rallytime) [2016.11] Merge forward from 2016.3 to 2016.11 @ 2016-12-15 18:09:10 UTC
  - a74be842a8 Merge pull request #38277 from rallytime/merge-2016.11
  - 49a3355915 Merge branch '2016.3' into '2016.11'
  - fc9e1df35 Merge pull request #38248 from meaksh/salt-api-successfully-close-child-processes
    * ee6eae9855 Successfully exit of salt-api child processes when SIGTERM.
  - 3c718ed35e Merge pull request #38254 from terminalmage/check-pillarenv
    * fa9ad311c6 Also check if pillarenv is in opts
  - 6b9060c38f [2016.3] Bump latest release version to 2016.11.1 (#38256)
- **ISSUE #38231**: (tjuup) Typo: salt-key deleted (refs: #38232)
- **PR #38232**: (rallytime) Strip final 'e' in key cmd to correct "deleted" misspelling @ 2016-12-15 10:38:49 UTC
  - 0af343e71f Merge pull request #38232 from rallytime/fx-38231
  - 26e1ee3650 Strip final 'e' in key cmd to correct "deleted" misspelling
- **ISSUE #38200**: (sebw) selinux.mode doesn't return any output and doesn't persist (refs: #38236)
- **PR #38236**: (gtmanfred) SELINUXTYPE should not be changed @ 2016-12-15 10:37:06 UTC
  - 6c1ca9dae7 Merge pull request #38236 from gtmanfred/2016.11
  - d1b070c894 clean up selinux unit test
  - 96eabd4939 SELINUXTYPE should not be changed
- **ISSUE #38228**: (vquiering) archive.extracted with options and user/group (refs: #38262)
- **PR #38262**: (terminalmage) Fix archive.extracted when --strip or --strip-components is in the options @ 2016-12-15 08:57:18 UTC
  - fd32dc34e9b Merge pull request #38262 from terminalmage/issue38228
  - 6442f8a7b5 Add tests for --strip/--strip-components
  - e502e68f12 Detect --strip/--strip-components in tar options and handle properly
  - e9577059ad Add strip_components arg to archive.list
- **PR #38264**: (mirceaulinic) Port #37862 into 2016.11 @ 2016-12-15 08:51:20 UTC
  - **PR #37862**: (mirceaulinic) [2016.11.1] Docstring fixes and new features for napalm_network (refs: #38264)
  - b232db65ce8 Merge pull request #38264 from cloudflare/PORT-37862
  - 28bb73151 Import from napalm_base instead of napalm
  - 0a675afc40 Vice-versa docstring

Changelog for v2016.11.2..v2016.11.3

Generated at: 2018-05-27 19:39:56 UTC

- **PR #39536**: (twangboy) Namespace 'status' functions in 'win_status' @ 2017-02-21 23:45:31 UTC
  - **PR #39005**: (cro) Ungate the status.py module and raise unsupported errors in functions not executable on Windows. (refs: #39536)
  - 40f72db53e Merge pull request #39536 from twangboy/fix_win_status
  - d5453e2f9e Remove unused import (lint)
  - 837c32e673 Remove list2cmdline
  - c258cb3f73 Streamline wmic command returns for easier parsing
  - 6d2cf8171e Fix 'ping_master' function
  - d946d105970 Namescpe 'status' functions in 'win_status'

- **PR #39534**: (rallytime) Fix breakage in aptpkg and dpkg execution modules @ 2017-02-21 20:31:15 UTC
  - **PR #39418**: (anlutro) Allow aptpkg.info_installed on package names that aren't installed (refs: #39534)
  - dc8f578447 Merge pull request #39534 from rallytime/fix-pkg-function-specs
  - d34a8fe9dc Fix breakage in aptpkg and dpkg execution modules

- **ISSUE #34712**: (richardscollin) Salt Test Suite Error - develop (refs: #37366)
  - **PR #39521**: (vutny) Upgrade SaltTesting to run test suite for 2016.11 and add SaltPyLint
  - **PR #37366**: (eradman) dev_python*.txt: use current SaltTesting and SaltPyLint modules (refs: #39521)

- **PR #39370**: (twangboy) Gate win_osinfo and winservice @ 2017-02-17 23:53:58 UTC
  - e4c71683d9 Merge pull request #39370 from twangboy/gate_win_utils
  - 167cd63447 Gate windows specific imports, add __virtual__
  - e67387deb7 Add option to return a Non instantiated class
  - 315b0c1c15 Clarify return value for win_osinfo
  - 994314ed3d Fix more docs
- 2bbe3cbf49 Fix some docs
- 4103563ee1 Merge branch 'gate_win_utils' of https://github.com/twangboy/salt into gate_win_utils
  - 24c1bd079d Remove extra newlines
- 82a86cd55 Add helper function for winservice
- 0051b5a5e2 Put the win_osinfo classes in a helper function
- 4e08534777 Gate win_osinfo and winservice better

- **PR #39486:** (twangboy) Remove orphaned function list_configurable_policies @ 2017-02-17 22:21:50 UTC
  - a3e71b6ce Merge pull request #39486 from twangboy/win_remove_orphaned
  - 1328055c4d Remove orphaned function list_configurable_policies

- **PR #39418:** (anlutro) Allow aptpkg.info_installed on package names that aren't installed (refs: #39534) @ 2017-02-17 18:34:19 UTC
  - 87b269fc80 Merge pull request #39418 from alprs/fix-aptpkg_info_nonexistent_pkg
  - 246bf1e938 add failhard argument to various apt pkg functions

- **PR #39438:** (mirceaulinic) file.get_managed: refetch source when file hashsum is changed @ 2017-02-17 17:58:29 UTC
  - e81ed6c23e Merge pull request #39438 from cloudflare/fix_39422
  - 845380639 file.get_managed: refetch cached file when hashsum chnaged

- **ISSUE #39203:** (dmaziuk) salt.users gecos field (refs: #39432)

- **PR #39432:** (dmaziuk) Quick and dirty fix for GECOS fields with more than 3 commas @ 2017-02-17 17:57:30 UTC
  - a5fe8f0fa6 Merge pull request #39432 from dmaziuk/issue39203
  - 41c046308c Remove #
  - 4f877c6b6f Quick and dirty fix for GECOS fields with more than 3 commas

- **PR #39484:** (corywright) The Reactor docs should use pillar='{}' instead of 'pillar={'} @ 2017-02-17 17:50:57 UTC
  - 3665229a5a Merge pull request #39484 from corywright/fix-reactor-docs-pillar-keyword-args
  - cc90d0d53f The Reactor docs should use pillar='{}' instead of 'pillar={'}

- **PR #39456:** (twangboy) Add salt icon to buildenv directory @ 2017-02-16 22:47:58 UTC
  - 2e3a9c5e58 Merge pull request #39456 from twangboy/win_fix_icon
  - 8dd915daa4 Add salt icon to buildenv directory

- **PR #39462:** (twangboy) Use url_path instead of url_data.path @ 2017-02-16 22:44:18 UTC
  - 63adc03484 Merge pull request #39462 from twangboy/win_fix_fileclient
  - a96bc13133 Use url_path instead of url_data.path

- **PR #39458:** (rallytime) Fix more warnings in doc build @ 2017-02-16 21:45:52 UTC
  - e9b034f02f Merge pull request #39458 from rallytime/fixup-more-doc-build-warnings
  - e698bc3508 Fix more warnings in doc build

- **PR #39437:** (sakateka) Fixes about saltfile @ 2017-02-16 20:32:15 UTC
  - e4f8c2bfb0 Merge pull request #39437 from sakateka/fixtures_about_saltfile
- ab68524d7a less pylint: salt/utils/parsers.py
- 9e7d9dce78 Revert "pylint: salt/utils/parsers.py"
- f3f120c8f1 document ~/.salt/Saltfile
- 33f364b1e pylint: salt/utils/parsers.py
- 0f36e1de7d expand config_dir and ‘~/.salt/Saltfile’ as last resort
- PR #39451: (Ch3LL) add 2016.11.3 changelog to release notes

• ISSUE #38032: (meggiebot) Add missing Carbon docs (refs: #39448)
• PR #39448: (gtmanfred) Add release notes for cisco proxy minions added in Carbon @ 2017-02-16 17:29:48 UTC
  - 8e2c62d297 Merge pull request #39448 from gtmanfred/2016.11
  - 3172e88700 Add release notes for cisco proxy minions added in Carbon
• PR #39428: (rallytime) [2016.11] Merge forward from 2016.3 to 2016.11 @ 2017-02-16 00:01:15 UTC
  - 070904b719 Merge pull request #39428 from rallytime/merge-2016.11
  - 2ac188ac9 Change path value from a tuple to a list
  - 6d78adf08 Merge branch ’2016.3’ into ’2016.11’
    - 4ff13ac8b salt.fileserver.roots: Fix regression in symlink_list (#39409)
    - 8b8ab8ef8e Merge pull request #39362 from dincamihai/cp-push-test-2016.3
      - 91383eb19 Add cp.push test
    - 4b726f955b Merge pull request #39380 from jonas-nd/quote-numeric-usernames
      - c2edf4d9f4 Quote numeric user names so pwd.getpwnam handles them properly
    - 1116d32df9 Merge pull request #39400 from meaksh/2016.3-fix-local-cache-issue
      - e7e559ef5c Prevents 'OSError' exception in case path doesn't exist
    - 6c852da1d4 Merge pull request #39300 from terminalmage/loader-optimization
      - d3e5d1525e Replace more usage of str.format in the loader
    - 528665f1b Merge pull request #39337 from terminalmage/issue34428
      - a7d2135dc2 Don't re-walk the roots fileserver in symlink_list()
    - ce701dee56 Merge pull request #39339 from cro/pillar_filetree_doc
      - 40810ce4b2 Clarification on external pillar usage.
      - fa3014393c Document the upstream RedHat bug with their pygit2 package (#39316)
• ISSUE #39360: (bbinet) file.symlink should not try to set ownership to root:root (refs: #39364)
• PR #39429: (rallytime) Back-port #39364 to 2016.11 @ 2017-02-15 21:27:21 UTC
  - PR #39364: (gtmanfred) set default user variable to the user cmd runs as (refs: #39429)
    - 54e572e50c Merge pull request #39429 from rallytime/bp-39364
    - 157f4dcd9 set default user variable to the user cmd runs as
• PR #39424: (twangboy) Fix problem with too many connection attempts in Windows @ 2017-02-15 18:51:35 UTC
  - 881eb2e93 Merge pull request #39424 from twangboy/win_fix_dos
- d3f7dd7f50 Add sleep to eval_master

• ISSUE #30561: (jfindlay) salt-ssh fails with IPv6 address (refs: #39419, #38831)
• ISSUE #22984: (tomasfejfar) salt-ssh problem possibly related to ipv6 (refs: #39419, #38831)
• PR #39419: (The-Loeki) Backport Salt-SSH IPv6 fixes to 2016.11 @ 2017-02-15 17:33:13 UTC
  - PR #38877: (The-Loeki) Salt-SSH client: Don't overwrite self.host w/IPV6 brackets (refs: #39419)
  - PR #38831: (The-Loeki) Salt-SSH deal with raw IPV6 addresses (refs: #39419, #38877)
  - 47872355a8 Merge pull request #39419 from The-Loeki/bp-ssh-ipv6
  - 4fc5626f16 Don't overwrite self.host w/IPV6 brackets
  - dd1223468b Salt-SSH deal with raw IPV6 addresses
• PR #39379: (terminalmage) win_pkg: remove all installed versions when no explicit version passed @ 2017-02-14 18:41:28 UTC
  - 878946df08 Merge pull request #39379 from terminalmage/issue34821
  - fd9ab8e4e3 Remove extra newline
  - 5871825b9e win_pkg: remove all installed versions when no explicit version passed
• PR #39392: (anlutro) Make sure OrderedDict order is preserved in nested output @ 2017-02-14 17:50:15 UTC
  - caffef88cf Merge pull request #39392 from anlutro/fix-nested_output_ordered_dict
  - 625a770a23 make sure OrderedDict order is preserved in output
• PR #39378: (dmurphy18) Update make_repo in debbuild.py execution module to utilize timeout @ 2017-02-14 17:10:15 UTC
  - f2459e3ce8 Merge pull request #39378 from dmurphy18/fix_nickel
  - 4bd47cc1a Updated all make_repo loops to use timeout value for retries
• ISSUE #39358: (Kimamisa) Backport the RDS fix in Carbon (refs: #39369)
• PR #39369: (rallytime) Back-port #37338 to 2016.11 @ 2017-02-13 21:41:19 UTC
  - PR #37338: (bailsman) Fix wait_status in boto_rds.create() (refs: #39369)
  - 99554d9d72 Merge pull request #39369 from rallytime/bp-37338
  - 2e7f6e8e37 Fix wait_status in boto_rds.create()
• PR #39303: (kstreee) Removes a redundant test case after removed 'batch' in 'netapi'. @ 2017-02-13 19:55:46 UTC
  - 03ab81b5a Merge pull request #39303 from kstreee/fx-testcase-rm-batch-in-netapi
  - 51972d0724 Removes a redundant test case after removed 'batch' in 'netapi'.
• PR #39315: (Ch3LL) improve salt-run salt.cmd test @ 2017-02-13 19:00:14 UTC
  - 60640f77d7 Merge pull request #39315 from Ch3LL/fx_run_salt_test
  - b3ec5a408 improve salt-run salt.cmd test
• ISSUE #39243: (morganwillcock) win_system.reboot: can return True without rebooting (refs: #39311)
• PR #39311: (morganwillcock) win_system: return False from a skipped reboot @ 2017-02-13 18:59:11 UTC
  - 2ca63a93cd Merge pull request #39311 from morganwillcock/skip-reboot
  - 0f3abb613d Clarify success for shutdown function
- dcb4d05275 win_system: return False from a skipped reboot

- **PR #39346**: (joe-niland) Ignore non-HTTP IIS bindings @ 2017-02-13 18:18:36 UTC
  - 082105fa84 Merge pull request #39346 from joe-niland/handle-iis-bindings
  - 8d5afdb0ae win_iis module: list_sites - when retrieving bindings, ignore bindings whose protocols do not have host headers

- **ISSUE #39321**: (mgresser) Grain matching failing where grain value is an INT (refs: #39361)

- **PR #39361**: (gtmanfred) make sure both variables are strings. @ 2017-02-13 17:20:17 UTC
  - a3a9a8e1ed Merge pull request #39361 from gtmanfred/2016.11
  - ee2275ad67 make sure both variables are strings.
  - **PR #39341**: (eliasp) Add creation/configuration of Salt PKI dirs to hacking docs

- **PR #39317**: (rallytime) [2016.11] Merge forward from 2016.3 to 2016.11 @ 2017-02-10 23:07:32 UTC
  - ce1f01f81a Merge pull request #39317 from rallytime/merge-2016.11
  - c1df46b7a Merge branch '2016.3' into '2016.11'
  - 9de559ff4e Merge pull request #39313 from rallytime/merge-2016.3
    - 0b8dddf12b Merge branch '2015.8' into '2016.3'
    - fc551bc5d Merge pull request #39293 from sergeizv/grammar-fix
      - 70f2b586d3 Rewrap paragraph
      - e6ab5178ea Grammar fix
    - 8a1b45632a Merge pull request #39295 from sergeizv/typo-fix
      - 5d9f36d58d Fix typo
    - cfaafece34 Merge pull request #39296 from sergeizv/whitespace-fix
      - 1d4c1dc140 Whitespace fix in docs Makefile
    - 0b4df4a47 Merge pull request #39294 from sergeizv/fix-link
      - 04bde6eed2 Fix link in proxyminion guide

- **ISSUE #38451**: (ezh) 2016.11 file.replace has multiple errors under python 3 (refs: #38464)

- **PR #38464**: (ezh) [38451] Fix file.replace 2016.11 @ 2017-02-09 23:07:49 UTC

---

32.2. Previous releases
- c3c621aab0 Merge pull request #38464 from doublescoring/fix-2016.11-38451
- 81f0337338 [38451] Fix few bugs after review
- 1bdab253ad [38451] Fix pylint W1699(incompatible-py3-code)
- 3bc6f547da [38451] Fix file.replace to make it suitable to python 3

- PR #39291: (terminalmage) Add note about using saltenv jinja var in pillar top files @ 2017-02-09 21:43:50 UTC
  - 6365211a6f Merge pull request #39291 from terminalmage/pillar-docs
  - fbd551e069 Add note about using saltenv jinja var in pillar top files

- PR #39281: (twangboy) Require VCRedist on 2008R2 and below instead of 2008 @ 2017-02-09 17:59:57 UTC
  - a496ec2a16 Merge pull request #39281 from twangboy/win_installer
  - ef5078729a Capitalize the ‘r’ for 2008R2
  - 1b6bd634ac Require VCRedist on 2008R2 and below instead of 2008

- PR #39264: (rallytime) [2016.11] Merge forward from 2016.3 to 2016.11 @ 2017-02-09 17:10:14 UTC
  - db6140aa83 Merge pull request #39264 from rallytime/merge-2016.11
  - a9c2e106c1 Pylint fix
  - f6aad99db2 Merge branch ’2016.3’ into ’2016.11’
    - 1b9217d636 Update jsonschema tests to reflect change in jsonschema 2.6.0 (#39260)
    - c1d16cc3d0 Better handling of enabled/disabled arguments in pkgrepo.managed (#39251)

      - c750662946 Loader optimization
    - bc89b297f8 Merge pull request #39228 from gtmanfred/2016.3
      - afee047b08 default to utf8 encoding if not specified
    - d9b0671dbd Merge pull request #39231 from terminalmage/clarify-jenkins-depends
      - ad1b125f2 Add clarification for jenkins execution module
    - ddfb89a84 Merge pull request #39232 from terminalmage/issue21342
      - c88896c277 Avoid recursion in s3/svn ext_pillars
    - ef4e437bb8 Fix the win_ip_test failures (#39230)
    - df5f934c34 Merge pull request #39199 from rallytime/bp-39170
      - c129905310 Added missing source_hash_name argument in get_managed function Additional fix to #33187 Customer was still seeing errors, this should now work. Tested with 2015.8.13 and 2016.11.2
    - 2621c119fd Merge pull request #39206 from cachedout/issue_issue_37174
      - be31e0559c Ignore empty dicts in highstate outputer
    - dd44052ea Merge pull request #39209 from terminalmage/sorted-envs
      - e6dda4a625 Sort the return list from the fileserver.envs runner
    - 7bed68743e [2016.3] Pylint fix (#39202)
    - ab76054127 Merge pull request #39197 from cachedout/pr-38793
      - f3d35fb5c6 Lint fixes
• 624f25b78d Fix for #38697

• ISSUE #39269: (alexharrington) Remount forced with lizardfs fuse filesystem due to device mismatch (refs: #39276)

• ISSUE #39106: (carsten-AEI) CVMFS fuse mount gets remounted every time (refs: #39276)

• PR #39276: (gtmanfred) _device_mismatch_ignored will never be True @ 2017-02-09 17:05:28 UTC
  - 304eb19b18 Merge pull request #39276 from gtmanfred/2016.11
  - 6635a9fd3b _device_mismatch_ignored will never be True

• PR #39238: (dmurphy18) Update disk fstype, inodeusage, percent and mount.active functions for AIX support @ 2017-02-08 21:53:32 UTC
  - 761168474 Merge pull request #39238 from dmurphy18/fix_aix_disk_mount
  - a8a519c493 Removed space for pylint
  - 8fa0ff4a27 Updates due to code review comments
  - 97c59a8d1c Updated mount functionality for active on AIX
  - 1a32b2c899 Updated disk functionality for fstype, inodeusage and percent on AIX

• PR #39233: (rallytime) Various doc updates to fix warnings in doc build @ 2017-02-08 19:29:53 UTC
  - 99bfa74b93 Merge pull request #39233 from rallytime/fixup-more-doc-build-warnings
  - 2f74df6885 Various doc updates to fix warnings in doc build

• PR #39237: (axmetishe) fix rds subnet group creation @ 2017-02-08 19:04:31 UTC
  - 59e927b520 Merge pull request #39237 from axmetishe/2016.11
  - 6f4be8b69c fix rds subnet group creation
  - PR #39234: (rallytime) [2016.11] Merge forward from 2016.3 to 2016.11
  - PR #39225: (terminalmage) Put legacy git_pillar on a deprecation path for Oxygen

• ISSUE #39078: (morganwillcock) setup.py: cannot install without setting global options (refs: #39180)

• PR #39180: (morganwillcock) setup.py: Remove global options from install command @ 2017-02-07 16:20:49 UTC
  - 19c3d90a32 Merge pull request #39180 from morganwillcock/setup
  - d7e05091a2 Remove global options from Install

• PR #38863: (hujunya) fix django auth not work @ 2017-02-07 15:43:00 UTC
  - a0907b861 Merge pull request #38863 from hujunya/fix_django_auth
  - 2a99ff46d3 check if django_auth_path has been in sys.path
  - 933ebf15d7 fix pylint violations
  - 6b5a7f4b64 fix django auth not work

• PR #39198: (rallytime) [2016.11] Merge forward from 2016.3 to 2016.11 @ 2017-02-06 21:01:56 UTC
  - c3e541e0a2 Merge pull request #39198 from rallytime/merge-2016.11
  - 7ea5f7f82f Merge branch '2016.3' into '2016.11'
    * fa45cbe359 Merge pull request #39166 from Ch3LL/fix_boto_ec2_docs
      - 90af696331 fix boto ec2 module create_image doc

32.2. Previous releases
* a40cb46249 Merge pull request #39173 from rallytime/restore-community-docs
  - 5aeddf42a0 Restore "Salt Community" doc section

- ISSUE #39059: (mirceaulinic) KeyError: 'multiprocessing' in the master logs (proxy minions) (refs: #39063)
- PR #39063: (mirceaulinic) Avoid KeyError: 'multiprocessing' in the master logs @ 2017-02-06 19:37:35 UTC
  - 2a85d73f59 Merge pull request #39063 from cloudflare/ISS-39059
  - 7118e0f034 Avoid KeyError: 'multiprocessing'

- ISSUE #38782: (lomeroe) win_lgpo unable to find some Administrative Template policies (refs: #38783, #39083, #39090)
- ISSUE #38761: (DaveOHenry) Cannot apply state that contains lgpo.set (refs: #39083, #39088)
- ISSUE #38689: (lomeroe) win_lgpo state fails to set single policy due to case sensitive check (refs: #39083, #39084, #38690)
- ISSUE #38100: (skjaro) Problem with win_lgpo.py in salt 2016.11.0 (refs: #39083, #39089, #38779)
- ISSUE #21485: (lorendgordon) Feature Request: Manage Windows Local Security Policy Settings (refs: #36336)

- PR #39083: (lomeroe) Backport #36336 to 2016.11 @ 2017-02-06 18:50:52 UTC
  - PR #36336: (lomeroe) add additional static policies to computer configuration policy class (refs: #39083)
  - 91c25bd651 Merge pull request #39083 from lomeroe/bp-36336
  - 03e5319124 Merge branch '2016.11' into bp-36336
  - 981ec89a4d update command line example to correct policy name
  - e2574da0b8 Fix/Add documentation, 80 char line lengths
  - 5e94a30a34 add additional static policies to computer configuration policy class duplicate code cleanup/misc code efficiencies

- PR #39153: (nicholasmhughes) Fix selinux.mode state config file handling @ 2017-02-06 18:37:34 UTC
  - 30455079fe Merge pull request #39153 from nicholasmhughes/fixed-selinux.mode-config-predictability
  - 8d8ba9c7d2 added the new getconfig function to the test
  - a6a24e1a1b Addressed edge case when attempting to set the config file to 'Disabled'. The state should only check the file, since the in-memory setting won't disappear until after reboot.
  - 6858658cc2 The selinux.mode state only checked the current status of SELinux in memory (getenforce) when determining if changes needed to be made. The /etc/selinux/config file could have a different value, and it would not be changed. This commit enhances idempotency of the state in regards to both the in-memory and configuration file enforcement of SELinux.

- ISSUE #38081: (haraldrudell) x509 state or module cannot generate password protected private keys (refs: #39159)

- PR #39159: (clinta) Csr crl passphrase @ 2017-02-06 18:36:05 UTC
  - 7b5eb17cbe Merge pull request #39159 from clinta/csr-crl-passphrase
  - c0f84c6b17 Remove unnecessary pass
  - 4ebf7a3df4 Remove unnecessary pass statement
  - 6a8046970e fix csr bugs and pep8
  - 36dcf5f3da only overwrite if overwrite option is specified
  - 403000d375 recreate cert on bad password
- 6497094ba7 passphrase for crl
- 3ef809fb0f passphrase for csr

**PR #39162: (meaksh)** Adding more function to Snapper module @ 2017-02-06 18:33:53 UTC
- b240468525 Merge pull request #39162 from meaksh/snapper-module-improvements
- f950732fa0 pylint fixes
- aa2f9906e0 Removing extra spaces
- 9daa3f257 Adds 'snapper.create_config' unit tests
- d38ed505f8 Adds 'snapper.modify_snapshots' unit tests
- d5496cc99 Adds 'snapper.delete_snapshots' unit tests
- 3eeb6076b Snapper: Adding support for creating configurations
- 041e54d42a Snapper: Adding support for snapshot metadata modification
- eaf5de9dce Snapper: Adding support for deleting snapshots

**ISSUE #38370: (tjyang)** Salt-Cloud: There was a query error: Required field "deviceChange" not provided (not @optional) (refs: #39171)

**PR #39171: (techhat)** Raise an error for a disk size that is too small @ 2017-02-06 18:19:46 UTC
- 6f9251ebed Merge pull request #39171 from techhat/issue38370
- ec57a39c00 Typo
- 2ed2932387 Clean up debug logs
- 671282656a Raise an error for a disk size that is too small

**PR #39179: (mcalmer)** fix error parsing @ 2017-02-06 17:57:00 UTC
- 036f36dc9b Merge pull request #39179 from mcalmer/fix-dockerng-error-parsing
- 6750cc78e fix error parsing

**PR #39189: (morganwillcock)** Fix NetBSD sockstat parsing @ 2017-02-06 17:28:08 UTC
- 30f836dcb6 Merge pull request #39189 from morganwillcock/sockstat
- 344d13eff5 Fix NetBSD sockstat example
- 64b693195c Fix NetBSD sockstat parsing

**ISSUE #38003: (morganwillcock)** salt.runners.cache functions seem to ignore minion targeting parameter (refs: #39141)

**PR #39141: (UtahDave)** Don’t overwrite the minion_ids var that was passed @ 2017-02-03 20:56:25 UTC
- 6a9704189f Merge pull request #39141 from UtahDave/fix_cache_lookup_ZD1187
- 034601d15 return all minions' grains if no tgt
- f833bf3a79 Don't overwrite the minion_ids var that was passed

**PR #39164: (rallytime)** [2016.11] Merge forward from 2016.3 to 2016.11 @ 2017-02-03 17:57:07 UTC
- d19ce716f Merge pull request #39164 from rallytime/merge-2016.11
- 6504bb6b02 Merge branch '2016.3' into '2016.11'
  - 9de08af950 Apply fix from #38705 to 2016.3 branch (#39077)
  - da3053ea9b update vmware getting started doc (#39146)
• e78ca0f575 Fixing a weird edge case when using salt syndics and targetting via pillar. Without this fix the master of masters ends up in an infinite loop since the data returned from the minions is differently structured than if a sync was not in use. (#39145)

• cd8077ab81 Merge pull request #38804 from alexbleotu/root_dir_fix-2016.3-gh
  - b3bdd3b04a Add missing whiteline
  - c7715acd53 Merge pull request #3 from cro/ab_rootdirfix
  - e8cbafaf1 When running testsuite, salt.syspaths.ROOT_DIR is often empty.
  - b12dd4a26 Merge pull request #1 from cro/ab_rootdirfix
  - bffc537aca Remove extra if statements (rstrip will check for the presence anyway).
  - 97521b34e8 Second attempt to fix prepending of root_dir to paths

• 6ffeda3ee5 Clarify ipv6 option for minion and interface for master, closes #39118 (#39131)

• 646b9ea4e5 Don't abort pillar.get with merge=True if default is None (#39116)

• PR #39152: (twangboy) Remove files not needed by salt-minion @ 2017-02-03 17:11:11 UTC
  - ed12512045 Merge pull request #39152 from twangboy/win_installer
  - 5ff8a14317 Fix problem deleting files
  - 4524dd49d4 Remove files not needed by salt-minion

• ISSUE #38691: (lomeroe) win_lgpo module throws a key error when run with return_not_configured=True (refs: #39085, #38666)
  - PR #39085: (lomeroe) Backport #38666 to 2016.11
  - PR #38666: (lomeroe) correct issue when running lgpo.get with return_not_configured=True (refs: #39085)
  - PR #39086: (lomeroe) Backport #38165 to 2016.11
  - PR #38165: (lomeroe) have _in_range_inclusive function attempt to convert a string to an i...

• ISSUE #38241: (frogunder) mine.get and salt-ssh gives error message (refs: #38970)

• PR #38970: (gtmanfred) when using local_cache we have to pass the list of minions @ 2017-02-02 19:24:39 UTC
  - 4ec641b65 Merge pull request #38970 from gtmanfred/2016.11
  - ebb9df3ec7 when using local_cache we have to pass the list of minions

• ISSUE #39110: (morganwillcock) archive.extracted: 2016.11.2 returns state failure for some zip formats, if already extracted (refs: #39128)
  - PR #39128: (terminalmage) Fix archive.list on Windows

• ISSUE saltstack/salt#36712: (dmitrievav) s3.put function does not create s3 bucket (refs: #36714)
  - PR #39133: (rallytime) Backport #36714 to 2016.11
  - PR #36714: (dmitrievav) s3.put can’t create s3 bucket (refs: #39133)

• ISSUE #38689: (lomeroe) win_lgpo state fails to set single policy due to case sensitive check (refs: #39083, #39084, #38690)
  - PR #39084: (lomeroe) Backport #38690 to 2016.11
  - PR #38690: (lomeroe) correct checking of policy_class to compare with lower() version of t...

5550 Chapter 32. Release notes
### Previous releases

- **ISSUE #38100**: (skjaro) Problem with win_lgpo.py in salt 2016.11.0 (refs: #39083, #39089, #38779)
  - PR #39089: (lomeroe) Backport #38779 to 2016.11
  - PR #38779: (lomeroe) win_lgpo handle errors when 'encoding="unicode"' exists in ADMX file (refs: #39089)

- **ISSUE #38782**: (lomeroe) win_lgpo unable to find some Administrative Template policies (refs: #38783, #39083, #39090)
  - PR #39090: (lomeroe) Backport #38783 to 2016.11
  - PR #38783: (lomeroe) Perform a "starts-with" search to match ADML text names (refs: #39090)

- **ISSUE #38761**: (DaveOHenry) Cannot apply state that contains lgpo.set (refs: #39083, #39088)
  - PR #39088: (lomeroe) Backport #37262 to 2016.11
  - PR #37262: (lomeroe) correct issues in win_lgpo module (refs: #39088)

- **PR #39122**: (rallytime) [2016.11] Merge forward from 2016.3 to 2016.11 @ 2017-02-01 21:41:59 UTC
  - 50d72da3f6 Merge pull request #39122 from rallytime/merge-2016.11
  - a782b00ee1 Merge branch '2016.3' into '2016.11'
  - cc9b69b6bc Merge pull request #39091 from terminalmage/update-test-valid-docs
    - d76f0380d0 add debug logging for batch vars
    - b4afea2a25 Don't fail test if data is empty
    - b3a5d549c1 Account for trimmed value in 'salt -d' output
    - 909916c78e Run test_valid_docs in batches
  - bcee3d1ef6 Move fileclient tests to tests/integration/fileserver/fileclient_test.py (refs: #39087)
  - f8a6863d98 Merge pull request #39087 from rallytime/merge-2016.11
  - c3aaa536f3 _in_range_inclusive class method incorrectly called isinstance
  - ce263f9372 set_computer_policy and set_user_policy call "set" by the original function name (set) instead of the aliased function name set_
  - ff7d47bf0 correct tool extension guid for user registry policies
  - 08f0078ef3 spelling correction
  - 5fc40485f7 add updating gpt.ini file when ADM template policies are modified (gpt.ini file must exist with proper data for ADM policies to apply)

- **PR #39087**: (lomeroe) Backport #37375 to 2016.11 @ 2017-02-01 19:02:58 UTC
  - PR #37375: (lomeroe) add updating gpt.ini file when ADM template policies are modified (gp... (refs: #39087)
  - f8a6863d98 Merge pull request #39087 from lomeroe/bp-37375
  - c3aaa536f3 _in_range_inclusive class method incorrectly called isinstance
  - ce263f9372 set_computer_policy and set_user_policy call "set" by the original function name (set) instead of the aliased function name set_
  - ff7d47bf0 correct tool extension guid for user registry policies
  - 08f0078ef3 spelling correction
  - 5fc40485f7 add updating gpt.ini file when ADM template policies are modified (gpt.ini file must exist with proper data for ADM policies to apply)

- **PR #39094**: (rallytime) Add a bunch of missing doc module references @ 2017-02-01 18:56:27 UTC
  - c4ce6701af Merge pull request #39094 from rallytime/doc-build-warnings
  - b866427f59 Add a bunch of missing doc module references

- **PR #39108**: (janhorstmann) [Bugfix] Fix state x509.crl_managed @ 2017-02-01 18:32:43 UTC
  - d302bb747e Merge pull request #39108 from janhorstmann/fix-x509-state
  - 9f5c532510 [Bugfix] Fix state x509.crl_managed
• ISSUE #39100: (whytwolf) salt-run fileserver.update Exception (refs: #39107)
• ISSUE #39098: (FraaJad) state.event runner fails with TypeError: argument of type 'NoneType' is not iterable (refs: #39107)
• ISSUE #38638: (mirceaulinic) salt.cmd runner raises TypeError when function returns bool (refs: #39107)
• PR #39107: (mirceaulinic) Check if data['return'] is dict type @ 2017-02-01 18:21:46 UTC
  - bf61ec9515 Merge pull request #39107 from cloudflare/FIX-38638
  - 7c34815979 Check if data['return'] is dict type
• ISSUE #39065: (jak3kaj) primary bonding option is not applied (refs: #39068, #39069)
  - PR #39069: (jak3kaj) Update primary bonding option in rh_ip.py
• ISSUE #39065: (jak3kaj) primary bonding option is not applied (refs: #39068, #39069)
  - PR #39068: (jak3kaj) Update primary bonding option in debian_ip.py
• ISSUE #38704: (nasenbaer13) Archive extracted fails when another state run is queued (refs: #38705)
• PR #39076: (terminalmage) Re-submit PR #38705 against 2016.11 branch @ 2017-01-31 20:11:55 UTC
  - PR #38705: (nasenbaer13) Fix for #38704 archive extracted and dockerio states (refs: #39077, #39076)
  - 9836d7d29 Merge pull request #39076 from terminalmage/pr-38705
  - 15db8d47ed Fix for #38704 archive extracted and dockerio states
• ISSUE #39057: (sergeizv) modules.linux_lvm.fullversion provides incomplete info (refs: #39058)
• PR #39058: (sergeizv) Fix salt.modules.linux_lvm.fullversion @ 2017-01-31 19:01:12 UTC
  - 86b4b77bfe Merge pull request #39058 from sergeizv/fix-lvm-fullversion
  - e46c89f9ed Fix salt.modules.linux_lvm.fullversion
  - fb7ef98838 Fix mock emulating lvm version
• ISSUE #39051: (afletch) salt.roster.cache / salt.utils.cloud is_public_ip - incorrect public IP address (refs: #39066)
• PR #39066: (techhat) 127.0.0.0/8 is all loopback @ 2017-01-31 18:43:22 UTC
  - 721b245f90 Merge pull request #39066 from techhat/issue39051
  - ea43bb8101 127.0.0.0/8 is all loopback
• ISSUE #39070: (sergeizv) modules.linux_lvm.pvcreate misbehaves if all submitted devices are already LVM PVs (refs: #39071)
• PR #39071: (sergeizv) Fix modules.linux_lvm.pvcreate on existing LVM PVs @ 2017-01-31 18:36:54 UTC
  - c54d9f4e2a Merge pull request #39071 from sergeizv/fixed-lvm-pvcreate
  - f1e3e86e6a Fix modules.linux_lvm.pvcreate on existing LVM PVs
  - 0f84ca2487 Add test for modules.linux_lvm.pvcreate on existing LVM PVs
  - 3967992bdf Fix test for modules.linux_lvm.pvcreate
• PR #39048: (rallytime) [2016.11] Merge forward from 2016.3 to 2016.11 @ 2017-01-31 15:55:49 UTC
  - 88b171f863 Merge pull request #39048 from rallytime/merge-2016.11
  - b2b398773 Merge branch '2016.3' into '2016.11'
    - a24af5ac46 Merge pull request #39047 from rallytime/merge-2016.3
      - b732a1f646 Merge branch '2015.8' into '2016.3'
32.2. Previous releases

- 56ccae6ff7 Add 2015.8.14 release notes file (#39046)
- 5943fe65d3 Update 2015.8.13 release notes (#39037)
  - fef1b1133d Add 2016.3.6 release notes file (#39045)
  - 7e43f4ac32 [2016.3] Update release numbers for doc build (#39042)
  - ff324599d5 Update 2016.3.5 release notes (#39038)
  - 5b09dc4198 Merge pull request #39028 from terminalmage/clarify-delimiter-argument
    - f29ef071f3 Clarify delimiter argument
  - 1ff359fa58 Add CLI Example for rest_sample_utils.get_test_string function (#39030)
  - f13f9ef1e Enable __proxy__ availability in states, highstate, and utils. Enable __utils__ availability in proxies. (#38899)
- PR #39035: (cro) Add CLI Examples so tests will pass
- PR #39044: (rallytime) Add 2016.11.3 release notes file
- PR #39040: (rallytime) [2016.11] Update release numbers for doc build
- PR #39039: (rallytime) Update 2016.11.2 release notes
- PR #39005: (cro) Ungate the status.py module and raise unsupported errors in functions not executable on Windows. (refs: #39536)
- PR #39012: (terminalmage) Fix "invalid lexer" errors in docs build @ 2017-01-28 06:47:45 UTC
  - e70904c480 Merge pull request #39012 from terminalmage/invalid-lexer
  - 86801baac Fix "invalid lexer" errors in docs build
- PR #39003: (rallytime) [2016.11] Merge forward from 2016.3 to 2016.11 @ 2017-01-28 00:09:09 UTC
  - cea0f32936 Merge pull request #39003 from rallytime/merge-2016.11
  - 76e95087fd Merge branch '2016.3' into '2016.11'
  - da96221741 Merge pull request #38951 from DSRCorporation/bugs/37938_fix depends_decorator_memleak
    - 0b18f34678 Keep the only one record per module-function in depends decorator.
  - 8516ed7b70 Merge pull request #38982 from rallytime/fix-34780
    - 1583c5579a Set response when using "GET" method in s3 utils
  - cfdbe9e12 Merge pull request #38989 from alprs/docfix-state_pt3_environ

  – ffbd45062e Explain what it is about and how to configure that

32.2.83 Salt 2016.11.4 Release Notes

Version 2016.11.4 is a bugfix release for 2016.11.0.

Statistics

• Total Merges: 276
• Total Issue References: 63
• Total PR References: 223
• Contributors: 62 (Ch3LL, DennisHarper, DmitryKuzmenko, L4rS6, MasterNayru, Seb-Solon, The-Loeki, Utah-Dave, aabognah, alankrita, amontalban, ar dakuyumcu, attiasr, bdrung, bewing, cachedout, cro, defanator, discountbin, dmurphy18, drawsmcgraw, eldadru, garethgreenaway, githuedcr, gtmanfred, lkrist, isbm, jbadson, jeanpralo, jettero, jinn, joe-niland, kaszuba, lomeroe, lorengordon, mateiw, mcalmer, mcHugh19, meaksh, mirceaulinic, mlalpho, narendraingale2, nmadhok, rallytime, redbaron4, roaldnefs, s0undt3ch, skazi0, skizunov, smarsching, sofixa, sp1r, sthrasher, techhat, terminalmage, thatch45, thor, ticosax, twangboy, vutny, whiteinge, zero4def)

AIX Support Expanded

AIX support has been added for the following execution modules:

• user
• group
• network
• status
• timezone

Additionally, AIX is now supported in the disk.iostat remote-execution function, and the status beacon is now supported.
Minion Data Cache Enhancement

Memcache is now supported as a data store for the minion data cache. Memcache is an additional cache layer that keeps a limited amount of data fetched from the minion data cache for a limited period of time in memory that makes cache operations faster. It doesn't make much sense for the localfs cache driver but helps for more complex drivers like consul.

For more details see memcache_expire_seconds and other memcache_* options in the master config reference.

Docker Fixes

- Docker authentication has been re-organized. Instead of attempting a login for each push/pull (which was unnecessary), a new function called dockerng.login has been added, which authenticates to the registry and adds the credential token to the ~/.docker/config.json. After upgrading, if you have not already performed a docker login on the minion using the docker CLI, you will need to run dockerng.login to login. This only needs to be done once.

- A bug in resolving the tag name for images in a custom registry (where a colon can appear in the image name, e.g. myregistry.com:5000/image:tagname) has been fixed. In previous releases, Salt would use the colon to separate the tag name from the image name, and if there was no colon, the default tag name of latest would be assumed. However, this caused custom registry images to be misidentified when no explicit tag name was passed (e.g. myregistry.com:5000/image). To work around this in earlier releases, simply specify the tag name.

Salt-Cloud Fixes

2016.11.0 added support for templating userdata files for the ec2 driver, using the renderer option from the master config file. However, as the default renderer first evaluates jinja templating, followed by loading the data as a YAML dictionary, this results in unpredictable results when userdata files are comprised of non-YAML data (which they generally are).

2016.11.4 fixes this by only templating the userdata_file when it is explicitly configured to do so. This is done by adding a new optional parameter to the cloud profile called userdata_template. This option is used in the same way as the template argument in file.managed states, it is simply set to the desired templating renderer:

```yaml
my-ec2-config:
  # Pass userdata to the instance to be created
  userdata_file: /etc/salt/my-userdata-file
  userdata_template: jinja
```

If no userdata_template option is set in the cloud profile, then salt-cloud will check for the presence of the master configuration parameter userdata_renderer. If this is also not set, then no templating will be performed on the userdata_file.

In addition, the other cloud drivers which support setting a userdata_file (azurearm, nova, and openstack) have had templating support added to bring them to feature parity with the ec2 driver's implementation of the userdata_file option.
Changelog for v2016.11.3..v2016.11.4

- **PR #40708**: (Ch3LL) Add 2016.11.4 Release Note ChangeLog @ 2017-04-14 22:12:57 UTC
  - e5cd6086a7 Merge pull request #40708 from Ch3LL/2016.11.4_release
  - d228f6ee02 Add 2016.11.4 Release Note ChangeLog

- **PR #40685**: (Ch3LL) Fix errno code for filecache test for other operating systems. @ 2017-04-14 16:54:25 UTC
  - 77028a6c4e Merge pull request #40685 from Ch3LL/fixed_file
  - 9ea6e8b456 remove io and change to EROFS
  - 688791ff60 remove try-except and change errno
  - e30afc4c01 add exception type
  - acf33df08 change errno code for fileclient test

- **ISSUE #40688**: (jbadson) Syslog returner does not work with Python 2.6 (refs: #40689)

- **PR #40689**: (jbadson) Fixes bug that prevents syslog returner from working under Python 2.6 @ 2017-04-14 10:45:13 UTC
  - bc70772f9d Merge pull request #40689 from jbadson/fixed-syslog-returner
  - e5a3a7d217 Fixes bug that prevents syslog returner from working under Python 2.6

- **ISSUE #40658**: (sebw) State tomcat.war_deployed regression when WAR filename contains version (refs: #40690)

- **PR #40690**: (thor) Fixes #40658: even clearer and working(!) Tomcat version handling @ 2017-04-14 10:44:02 UTC
  - 983d35ad38 Merge pull request #40690 from thor/2016.11-tomcat
  - 09145ea1a5 Fixes unindexed strfmt curly braces for python 2.6
  - b78fc46b91 Fixes #40658: clearer version handling

- **PR #40686**: (twangboy) Fix 'salt-minion' service for Win 10 Creators Update 1703 @ 2017-04-13 20:00:12 UTC
  - 3cd9a50b22 Merge pull request #40686 from twangboy/fixed_service
  - b6ac4aa86d Fix service for win10 update

- **PR #40675**: (gtmanfred) use loader for getting war version @ 2017-04-13 19:58:30 UTC
  - ad4d6839fd Merge pull request #40675 from gtmanfred/2016.11
  - a61fc824c4 use loader for war extraction

- **ISSUE #38497**: (chrisLeeTW) local_batch client ignore external auth (refs: #40598)

- **PR #40598**: (rallytime) Back-port #40598 to 2016.11 @ 2017-04-13 19:58:16 UTC
  - PR #40598: (mchugh19) Ensure batch uses passed eauth token or credentials (refs: #40680)
  - 7ea526f59e Merge pull request #40680 from rallytime/bp-40598
  - cc1643eb1f Fix netapi lint
  - e790930f5a re-add batch support to cherrypy saltapi
  - 6eec04b2db pop out of kwargs
  - 260dd84758 Create eauth dict for passing into batch class
- PR #40681: (cachedout) Allow status beacon to run on all operating systems @ 2017-04-13 19:33:10 UTC
  - db68df23dd Merge pull request #40681 from cachedout/status_beacon
  - ecbb0d186f Allow status beacon to run on all operating systems

- PR #40678: (Ch3LL) fix test_fstype test for mac @ 2017-04-13 19:20:32 UTC
  - 39dd6e284d Merge pull request #40678 from Ch3LL/fix_mac_fstype

- PR #40665: (rallytime) Back-port #35665 to 2016.11 @ 2017-04-12 21:06:36 UTC
  - PR #35665: (sthresher) Speed up /jobs for salt-api when run under cherrypy. (refs: #40665)
  - 6df76f6687 Merge pull request #40665 from rallytime/bp-35665
  - 0f897b2426 Switch from comprehension to logic used in jobs runner. This makes it easier to deal with potential unicode in returns.
  - 78dd629f09 Fix compat issues with /jobs return values.
  - 4778bc7365 Speed up /jobs for salt-api when run under cherrypy.

- PR #40666: (gtmanfred) make sure userdata is always defined in ec2 @ 2017-04-12 21:06:00 UTC
  - 3e41a248a5 Merge pull request #40666 from gtmanfred/userdata
  - 5e92d0948 make sure userdata is always defined in ec2

- PR #40662: (twangboy) Backport msi-conformant-version function @ 2017-04-12 18:49:23 UTC
  - b245abbea5 Merge pull request #40662 from twangboy/backport_msi_versioning
  - 825832812b Backport msi-conformant-version function

- ISSUE #39868: (amontalban) archive.extracted issue when source_hash_update=True and extracted files does not exist (refs: #40551)

- PR #40551: (terminalmage) Fix four issues in archive.extracted state @ 2017-04-12 18:37:52 UTC
  - 92b5f03beb Merge pull request #40551 from terminalmage/issue39868
  - a722ca9ccf archive.extracted: also cleanup fileclient’s cached location
  - 5ea1f607b0 Fix mocking in unit tests
  - 8da51f31f Moar fixes for source_hash_update
  - 7103707d49 Remove unnecessary versionadded lines
  - a717881f53 Just get a hash for the source archive
  - 9da4eb18bf Check hash of cached source against source_hash before downloading archive
  - ad24fa59d Fix three issues in archive.extracted state

- PR #40637: (twangboy) Add unicode_literals import @ 2017-04-12 16:55:03 UTC
  - 0638418d22 Merge pull request #40637 from twangboy/fix_unicode_issues

- PR #40651: (twangboy) Fix status.diskusage for Windows on Py3 @ 2017-04-12 16:21:29 UTC
  - 491661f323 Merge pull request #40651 from twangboy/fix_diskusage_py3
  - 7c5079ec91 Correct capitalization problem with api call
- **ISSUE #40624**: (sumeetisp) Issue - grains.append (refs: #40631)
- **PR #40631**: (gtmanfred) if grain is defined as None still convert in append @ 2017-04-12 16:19:16 UTC
  - 3aabd85e53 Merge pull request #40631 from gtmanfred/grains
  - b0bd99c26d add comment and unit test
  - b21be752af if grain is defined as None still convert in append
- **ISSUE #40167**: (alias454) file.replace diff results output showing additional characters (refs: #40629)
- **PR #40629**: (aabognah) Fixing issue #40167 @ 2017-04-11 22:45:08 UTC
  - 3737289bee Merge pull request #40629 from aabognah/fix-bug-40167
  - 28f7744cb6 Fixing issue #40167 with file.replace where the diff output does not display correctly.
- **PR #40646**: (twangboy) Keep network.py execution module @ 2017-04-11 22:03:02 UTC
  - 2a22bea290 Merge pull request #40646 from twangboy/fix_win_network
  - 0f7a81cd34 Keep network.py execution module
- **PR #40645**: (rallytime) [2016.11] Merge forward from 2016.3 to 2016.11 @ 2017-04-11 20:59:13 UTC
  - e15a5d0fc3 Merge pull request #40645 from rallytime/merge-2016.11
  - 8de6497933 Merge branch '2016.3' into '2016.11'
    * 2ae9eaa176 Merge pull request #40638 from rallytime/bp-40571
      * 2d1c4be2df pkgrepo.managed: properly handle comments for debian
- **ISSUE #40594**: (anlutro) salt-ssh file.recurse adds a lot of unwanted directories (refs: #40642)
- **ISSUE #38458**: (duk3luk3) salt-ssh uses sudo to create cache dir, later fails to access it (refs: #40442)
- **PR #40642**: (DmitryKuzmenko) Correctly resolve relative cache path to absolute. @ 2017-04-11 20:43:57 UTC
  - PR #40442: (gtmanfred) allow file_client to figure out cachedir (refs: #40642)
    - 6c4ae3c914 Merge pull request #40642 from DSRCorporation/bugs/40594_ssh_cachedir
    - 055256c518 Correctly resolve relative cache path to absolute.
- **ISSUE #40075**: (afletch) salt-ssh temporary files - insecure permissions (refs: #40609)
- **PR #40609**: (gtmanfred) stat_file when keep is set, instead of mirroring all file permissions @ 2017-04-11 18:48:47 UTC
  - 8492cef7a5 Merge pull request #40609 from gtmanfred/2016.11
  - 6e34e2b5e5 stat file when placing it on server instead of caching
- **PR #40620**: (mateiw) SUSE specific changes to salt-api.service @ 2017-04-11 14:45:00 UTC
  - 05ac613efc Merge pull request #40620 from mateiw/2016.11-suse-saltapi-service
    - ce911a74b4 suse specific changes to salt-api.service
- **ISSUE #39463**: (githubcdr) Transport TCP minions don’t reconnect/recover (refs: #40614)
- **PR #40614**: (gtmanfred) add retries on authentications of the salt minion reconnecting @ 2017-04-10 22:42:16 UTC
  - b0a2414d68 Merge pull request #40614 from gtmanfred/tcp
  - a86b101ae6 add retries on authentications of the salt minion reconnecting
- **PR #40606**: (kaszuba) Use correct exec_driver in dockerng.sls module @ 2017-04-10 22:25:31 UTC
- f7e121a9ee Merge pull request #40606 from kaszuba/fix-dockerng-sls
- 3a0d6f108 Use correct exec_driver in dockerng.sls module

- **ISSUE #39863** (daswathn) Salt-Master not responding when the list of minions are high after upgrade to 2016.11.2 (refs: #40615)

- **PR #40615** (rallytime) Call out to _pki_minions() once, rather than in a loop in _check_list_minions() @ 2017-04-10 22:22:18 UTC
  - PR #34920: (cachedout) Key cache (refs: #40615)
  - b6cf948afe Merge pull request #40615 from rallytime/fix-39863
  - 1a9f03ab92 Call out to _pki_minions() once, rather than in a loop in _check_list_minions()

- **PR #40588** (rallytime) [2016.11] Merge forward from 2016.3 to 2016.11 @ 2017-04-07 19:30:14 UTC
  - 4fa58be222 Merge pull request #40588 from rallytime/merge-2016.11
  - 5a419b8aae Merge branch '2016.3' into '2016.11'
  - 83f6d3d3bb Merge pull request #40567 from terminalmage/fix-pillar-get-merge-lists
    * cb4db56eb5 Allow pillar.get to merge list as well as dictionaries
  - a8304cd5a1 Merge pull request #40552 from terminalmage/fix-hash-type-refs
    * 8c61f333ae Don't use __opts__get() for hash_type
  - 705e1d8a08 Merge pull request #40562 from Ch3LL/fix_vultrpy
    * 7f1ef72f83 Fix dockerng _get_client() regression
    * 00f8ef0c55 Merge pull request #40548 from Ch3LL/fix_vultrpy
      * 7710355e3a check for salt install fail on vultur test
      * aae3d14ea4 fix vultr cloud race condition to match on 0*

- **PR #40575** (rallytime) Back-port #40559 to 2016.11 @ 2017-04-07 15:42:26 UTC
  - PR #40559: (jinm) Fix v3 for https://github.com/saltstack/salt/issues/38472 (refs: #40575)
  - 3d07f637ca Merge pull request #40575 from rallytime/bp-40559
  - 8280e5256e Fix v3 for https://github.com/saltstack/salt/issues/38472

- **PR #40563** (terminalmage) Merge-forward 2016.3 --> 2016.11 @ 2017-04-07 15:08:20 UTC
  - PR #40562: (terminalmage) Fix dockerng _get_client() regression (refs: #40563)
  - PR #40481: (terminalmage) Backport auth and custom registry fixes from #40480 to 2016.3 branch (refs: #40563, #40562)
  - PR #40480: (terminalmage) Improved Docker auth handling and other misc. Docker improvements (refs: #40481)
  - 8bc432ef9 Merge pull request #40563 from terminalmage/merge-2016.3-2016.11
  - 0c608d7417 Add client_args_mock back to test
- a7a78da984 remove unused imports
- a6d68f50fe Merge remote-tracking branch 'upstream/2016.3' into merge-2016.3-2016.11
  * 0918311330 Don't mark files that already were deleted as errors
  * 51d88a16ec Merge branch 'zer0def-fix-31363' into 2016.3
    - 7f3cb5cf9 Merge branch 'fix-31363' of https://github.com/zer0def/salt into zer0def-fix-31363
    - 3c750c2b24 Changed rm_rf's argument to actually remove intended file. (refs #31363)
    - 9ed85f3c59 Remove directory content instead of directory itself when using force_clone in git.latest state. (refs #31363)
* cfba4cb422 Merge pull request #40534 from terminalmage/issue39892
  - ad88c58a09 Check master's ssh_minion_opts for fileservr/pillar values and ignore them
- 8da27c9e1d Merge pull request #40306 from terminalmage/issue40279
  - 57acef336 Merge branch 'issue40279' of https://github.com/terminalmage/salt into issue40279
  - 8bcdf1a761 Remove unused import for lint
  - 808ad76419 systemd.py: when getting all services, don't repeat gathering of systemd services
  - 2d219a67a Don't use context caching for gathering systemd services
* 97caac4c0a Merge pull request #40481 from terminalmage/docker-auth-handling-2016.3
  - dce1e0d4b Make sure we keep the cached client when clearing context
  - 1e2a04f05e Backport auth and custom registry fixes from #40480 to 2016.3 branch
* e62603d5eb Merge pull request #40505 from gtmanfred/2016.3
  - 9e2f9808ca update docs for logging handlers

- ISSUE #39778: (Talkless) pkgrepo.managed state always report changes with test=True on APT system (refs: #40571)
- PR #40571: (terminalmage) pkgrepo.managed: properly handle comments for debian (refs: #40638) @ 2017-04-06 21:55:46 UTC
  - fd757fffa3 Merge pull request #40571 from terminalmage/issue39778
  - 19160482d pkgrepo.managed: properly handle comments for debian
- ISSUE #40278: (UtahDave) cloud.action giving errors on 2016.11.1 (refs: #40572)
- PR #40572: (rallytime) Clean out kwargs dict in cloud.action before calling cloud driver function @ 2017-04-06 21:53:40 UTC
  - b1698e830e Merge pull request #40572 from rallytime/fix-40278
  - c978486452 Clean out kwargs dict in cloud.action before calling cloud driver function
- ISSUE #39842: (smarsching) File module removes trailing newline on Windows (refs: #39882)
- PR #39882: (smarsching) Fix handling of trailing newlines on Windows @ 2017-04-06 21:12:24 UTC
  - 62d8ad2b4b Merge pull request #39882 from smarsching/issue-39842
  - d485d1af44 Fix context for _splitlines_preserving_trailing_newline.
- 76cb7bf612 Fix trailing newlines on Windows (#39842).

- **PR #40451**: (isbm) Fileclient testcase (2016.11) @ 2017-04-06 19:53:31 UTC
  - ae13de622a Merge pull request #40451 from isbm/isbm-fileclient-testcase-2016.11
  - 74c6557dd Add space before in-lint comment for lint
  - 35fcb8b52d Fix race condition on cache directory creation
  - aba94495a5 Lintfix (Py3 code compat)
  - 9f9dc6e4e7 Add unit test case for fileclient

- **ISSUE #40084**: (podstava) profile fields in azurearm salt-cloud need to be actualized to sources (refs: #40564)

- **PR #40564**: (techhat) Update Azure ARM docs @ 2017-04-06 18:17:32 UTC
  - 74366c57a4 Merge pull request #40564 from techhat/azuredocs
  - 08d071bc68 Update Azure ARM docs

- **ISSUE #40005**: (vutny) ssh_known_hosts.present does not support SHA256 key fingerprints (refs: #40543)

- **PR #40543**: (rallytime) Add the "fingerprint_hash_type" option to ssh state and module @ 2017-04-05 21:21:16 UTC
  - cb9dcb1e1b Merge pull request #40543 from rallytime/fix-40005
  - 1ef816a55 Add the "fingerprint_hash_type" option to ssh state and module

- **PR #40540**: (DmitryKuzmenko) A quick fix for Cache has no 'list' attribute. @ 2017-04-05 18:50:18 UTC
  - PR #40494: (rallytime) [develop] Merge forward from 2016.11 to develop (refs: #40540)
  - 3f0695575a Merge pull request #40540 from DSRCorporation/bugs/40494_merge_forward_cache_list_fix
  - c0fd5634cf A quick fix for Cache has no 'list' attribute.

- **ISSUE #32662**: (anlutro) salt-cloud: allow templating of EC2 userdata, similar to deploy script (refs: #32698)

- **PR #40464**: (terminalmage) salt-cloud: Do not pass userdata_file through yaml renderer @ 2017-04-05 17:32:07 UTC
  - PR #32698: (techhat) Allow EC2 userdata to be templated (refs: #40464)
  - 28fc048030 Merge pull request #40464 from terminalmage/userdata-renderer
  - 84ee693006 Nova and openstack don't accept base64-encoded userdata
  - 73f4c43e2a Allow for userdata_template to be disabled in a cloud_profile
  - 78b4798b1b Update compile_template test to use StringIO
  - 5f7c5613ce Properly handle renderers which return StringIO objects
  - d551b0d857 Bring in salt.utils.stringio from develop branch
  - 6a6ef0ad8f Move userdata templating to salt.utils.cloud
  - b440d0c679 Update 2016.11.4 release notes for userdata_renderer -> userdata_template
  - a6183d93d3 Preserve windows newlines in salt.template.compile_template()
  - 04f02df5fe Try to read compiled template as StringIO
  - 79cc253bbf Only template the userdata_file if explicitly configured to do so
  - b580654f85 Update cloud docs to reflect userdata_renderer -> userdata_template
  - a6064fb2e4 Rename userdata_renderer -> userdata_template in master config docs
- 50f2b2831f Remove userdata_renderer value
- cc2186f35a Add templating support for other cloud drivers that support userdata_file
- be8d34c59b cc2: Add support for using userdata_renderer to template userdata_file
- eddbd41265 Openstack did not have templating support for userdata_file before 2016.11.4
- a85a416c72 Add userdata_renderer fix info to 2016.11.4 release notes
- 111188742a Add documentation for userdata_renderer
- 9ee2dcfc2d Add userdata_renderer master config param

- **PR #40530**: (dmurphy18) Update release information for 2016.11.4 for additional AIX support @ 2017-04-05 16:20:22 UTC
  - 990bde4c07 Merge pull request #40530 from dmurphy18/aix_docupd
  - fd93ca2b06 Added further support for functionality on AIX for 2016.11.4
  - 17b58917f2 Update release information for new AIX support

- **PR #40528**: (dmurphy18) Allow for nightly build designations in Salt versions @ 2017-04-04 20:34:26 UTC
  - 4d932691f1 Merge pull request #40528 from dmurphy18/salt_nightlybuild
  - d62a119fc1 Allow for nightly build designations in Salt versions

- **ISSUE #37699**: (gstattowiak) Artifactory state. Incorrect timeout error reporting. (refs: #40465)
- **PR #40465**: (rallytime) Artifactory Execution & State Module: Fixup Error Handling @ 2017-04-04 20:12:21 UTC
  - 0ed385210f Merge pull request #40465 from rallytime/fixed-37699
  - 8f084f7056 Update unit test to look for actual string comment
  - ef66b46ae Artifactory State: Only wrap main function call to module in try/except and wrap exc comment in str()
  - f10153900 Artifactory Module: catch URLErrors as well as HTTPErrors

- **ISSUE #39275**: (yhekma) Cache backend gets hit a lot (refs: #40497, #40429)
- **PR #40497**: (DmitryKuzmenko) Memcache documentation and minor updates. @ 2017-04-04 19:55:18 UTC
  - PR #40429: (DmitryKuzmenko) MemCache - a minion data cache booster. (refs: #40497, #40468)
  - 7a04ed2439 Merge pull request #40497 from DSRCorporation/features/39275_memcache
  - 82c45b1a52 Memcache documentation and minor updates.

- **ISSUE #38683**: (gstattowiak) require/order/failhard combination error (refs: #40502)
- **PR #40504**: (rallytime) Group checks for failhard setting in () in state.check_failhard function @ 2017-04-04 19:53:48 UTC
  - d654de52ed Merge pull request #40504 from rallytime/fixed-38683
  - eee4c28887 Group checks for failhard setting in () in state.check_failhard function

- **PR #40503**: (thatch45) first pass at adding support for pycryptodome installed as @ 2017-04-04 19:39:02 UTC
  - 4d5d7d9712 Merge pull request #40503 from thatch45/2016.11
  - e21fd54d1b fix lint on the lint ignores...
  - 60113248b1 pycryptodome adds RSA to the key header which the openssl
- 206dec63ff fix the cryptodome version lookup for the versions report
- d3b77092b5 good catch
- 31c6a10d1b first pass at adding support for pycryptodome installed as

- PR #40525: (dmurphy18) Add support for disk.iostat on AIX @ 2017-04-04 19:31:41 UTC
  - 0dd92c63ea Merge pull request #40525 from dmurphy18/aix_dskiostat
  - 712537272b Added support on AIX for disk.iostat

- PR #40496: (rallytime) Back-port #40415 to 2016.11 @ 2017-04-04 17:19:39 UTC
  - PR #40415: (defanator) Fix boto_vpc.create_route() to work with interface_id (refs: #40496)
  - a6291b17c1 Merge pull request #40496 from rallytime/bp-40415
  - f8b3006898 Fix boto_vpc.create_route() to work with interface_id

- ISSUE #39275: (yhekma) Cache backend gets hit a lot (refs: #40497, #40429)

- PR #40468: (techhat) Add __func_alias__ back in @ 2017-04-04 17:02:43 UTC
  - PR #40429: (DmitryKuzmenko) MemCache - a minion data cache booster. (refs: #40497, #40468)
  - 3eb8e0ba0f1 Merge pull request #40468 from techhat/cachealias
  - 6ec0baa9a0 Swap around aliases
  - 76e54a2900 Add __func_alias__ back in

- ISSUE #29104: (adithep) Merging Order warning (refs: #39109)

- PR #39109: (bdrung) Fix top_file_merging_strategy warning if env_order is set @ 2017-04-04 14:20:56 UTC
  - 8c0beaa8b Merge pull request #39109 from bdrung/fix-merge-order-warning
  - f8b9f0cab9 Simplify _get_envs() by using list comprehensions
  - 74a3b066ea Fix top_file_merging_strategy warning if env_order is set
  - ec2195f42 Remove duplicate client_envs variable definitions
  - 6279f7c120 fix do to pre correct on python randome function
  - 66b951af7 Fix up the doc for failover clarity

- PR #40495: (rallytime) [2016.11] Merge forward from 2016.3 to 2016.11 @ 2017-04-03 18:36:16 UTC
  - 02a1f642ab Merge pull request #40495 from rallytime/merge-2016.11
  - 8111909bb1 Merge branch '2016.3' into '2016.11'
  - 3d45a004b0 Merge pull request #40427 from terminalmage/clarify-master-tops-docs
    * bda781d8f9 Grammar fix
    * 0d7b0c4ef0 Improve the master_tops documentation
    * d27340a9f2 Add saltutil.sync_tops runner func

- PR #40466: (dmurphy18) Support for execution module status on AIX @ 2017-04-01 00:28:51 UTC
  - ac82972cb3 Merge pull request #40466 from dmurphy18/aix_status
  - 7c0b30d9a4 Support for AIX

- ISSUE #39275: (yhekma) Cache backend gets hit a lot (refs: #40497, #40429)
• **PR #40429**: (DmitryKuzmenko) MemCache - a minion data cache booster. (refs: #40497, #40468) @ 2017-03-31 20:21:00 UTC
  - fdb0250c95 Merge pull request #40429 from DSRCorporation/features/39275_memcache
  - 4475d1775d In-memory minion data cache.

• **ISSUE #38458**: (duk3luk3) salt-ssh uses sudo to create cache dir, later fails to access it (refs: #40442)

• **PR #40442**: (gtmanfred) allow file_client to figure out cachedir (refs: #40642) @ 2017-03-31 20:14:27 UTC
  - 31d4e6949c Merge pull request #40442 from gtmanfred/salt-ssh
  - 8367735063 allow file_client to figure out cachedir

• **PR #40456**: (rallytime) [2016.11] Merge forward from 2016.3 to 2016.11 @ 2017-03-31 17:51:11 UTC
  - 0cfcd188a9 Merge pull request #40456 from rallytime/merge-2016.11
  - 0daac46b68 Merge branch '2016.3' into '2016.11'
  - c26f4cc76c Merge pull request #40371 from terminalimage/pr-40344
    - a8bcaa73d7 Force use of posixpath when joining salt fileserver paths in gitfs
    - cafa08d8e0 Add ability for salt.utils.path_join to force the use of posixpath
  - df9df82959 Merge pull request #40379 from rallytime/tests-for-39855
    - 96259d6c63 Lint fix
    - 47ac1431e Create a unit test for the _replace_auth_key function in the ssh module

• **PR #40443**: (gtmanfred) prepend ssh_log_file with root_dir @ 2017-03-31 09:23:46 UTC
  - 8617be9c6d Merge pull request #40443 from gtmanfred/sshlog
  - 7f6046deec prepend ssh_log_file with root_dir

• **PR #40376**: (nmadhok) Backporting changes in vmware cloud driver from develop branch to 2016.11 branch @ 2017-03-30 22:35:13 UTC
  - 132d8b78b8 Merge pull request #40376 from nmadhok/2016.11
  - dd62310941 Adding unit tests for vmware_test
  - 36edf0af64 Add additional VMware related exceptions
  - 034ef307f7c Remove old vmware unit tests
  - 7cc144888da Backporting changes in vmware cloud driver from develop branch to 2016.11 branch

• **ISSUE #39692**: (djsly) tuned module and state are broken on 7.3 families. (refs: #40387, #39719, #39768)

• **PR #40387**: (redbaron4) More complete fix for 39692 @ 2017-03-30 22:29:05 UTC
  - dfaa670b66 Merge pull request #40387 from redbaron4/fixed-39692
  - 77a40a0e44 Lint fixes
  - 8c1adfa8f5 More complete fix for 39692

• **ISSUE #7287**: (dragozov) django.loaddata treats fixture list as arguments and prepends "--" for each (refs: #40404)

• **PR #40404**: (roaldnefs) Fix for fixtures in the djangomod module @ 2017-03-30 22:26:09 UTC
  - 313d212626f Merge pull request #40404 from roaldnefs/fixed-djangomod-loaddata
  - 92285cb045 Fix for fixtures in the djangomod module
• PR #40416: (lorenjgordon) Adds some missing file functions on Windows @ 2017-03-30 22:22:44 UTC
  - 5379899442 Merge pull request #40416 from lorenjgordon/win-file-funcs
  - 8eda25e10 Adds some missing file functions on Windows
• ISSUE #40417: (lorenjgordon) temp_file does not close the file handle (refs: #40418)
• PR #40418: (lorenjgordon) Closes handle to temporary file before returning the path @ 2017-03-30 22:22:03 UTC
  - 1fsd6db88f9 Merge pull request #40418 from lorenjgordon/close-temp-file
  - 7ba2809cf Closes handle to temporary file before returning the path
• PR #40430: (twangboy) Fix logic for __virtual__ in win_dsc and win_psget @ 2017-03-30 22:06:16 UTC
  - 5c78d55e10 Merge pull request #40430 from twangboy/fix_virtual
  - 08e95ce4f0 Add logging on __virtual__ failures
  - 43eb1a597 Fix logic for __virtual__
• PR #40431: (rallytime) [2016.11] Merge forward from 2016.3 to 2016.11 @ 2017-03-30 21:37:39 UTC
  - b855f29928 Merge pull request #40431 from rallytime/merge-2016.11
  - d5576d75e7 Merge branch '2016.3' into '2016.11'
  - b6770fd81f Merge pull request #40407 from aesdana/fix_rabbitmq_version_check
    * 4c0763fa2f Added split to cut off debian_revision from rabbitmq-server version Fixes #40396
  - d4fb45d9f8 Merge pull request #40424 from terminalimage/fixed-open-filehandle
    * 66251b63cf Fix open filehandles
  - 8708096365 Merge pull request #40399 from terminalimage/docker-py_version
    * 146575655 Add docker-py version to the versions report
  - ff1266b3a6 Merge pull request #40391 from Ch3LL/2016.3.7_release_notes
    * f532ec5288 initial 2016.3.7 release notes
  - 96bf9427b0 Merge pull request #40368 from Ch3LL/bump_version_3
    * a02fa7dd1f [2016.3] Bump previous version to 2016.3.6
• PR #40401: (roaldnefs) fix Ubuntu notation in docs/faq.rst @ 2017-03-29 20:28:31 UTC
  - 7d900d31ea Merge pull request #40401 from roaldnefs/fix-doc-faq
  - 21f161fecc fix Ubuntu notation in docs/faq.rst
• ISSUE #29028: (kevins9) state.sls fails to render state with pillar data: Jinja variable 'dict object' has no attribute (refs: #37795)
• PR #40390: (rallytime) Back-port #37795 to 2016.11 @ 2017-03-29 19:05:12 UTC
  - PR #37795: (jettero) please tell me where is the "error: 'dict object has no ..." (refs: #40390)
  - 70a3f6963ec Merge pull request #40390 from rallytime/bp-37795
  - 1ba15577bd Pylint fix
  - ec65924659 please tell me where is the "error: 'dict object has no attribute 'seek' " ?
• PR #40395: (rallytime) Handle AttributeError for dockerng_mod.docker attempt fails and docker is installed @ 2017-03-29 17:47:11 UTC
  - f8bff747dc Merge pull request #40395 from rallytime/catch-attribute-error-docker-test
- 99e8dccc18e Handle AttributeError for dockerng_mod.docker attempt fails and docker is installed

- **PR #40362**: (rallytime) [2016.11] Merge forward from 2016.3 to 2016.11 @ 2017-03-28 22:50:32 UTC
  - d7d3d68035 Merge pull request #40362 from rallytime/merge-2016.11
  - 4f1543c2a1 Merge branch '2016.3' into '2016.11'
    - 1381f97292 Merge pull request #40264 from meaksh/2016.3-gather_job_timeout-fix
      - 68dccae5b4 Makes sure "gather_job_timeout" is an integer

- **PR #40372**: (zer0def) Fixes related to cache directory argument changes in pip>=6. @ 2017-03-28 22:48:41 UTC
  - 2febd05896 Merge pull request #40372 from zer0def/pip-cache-fixes
  - d68067f1d7 Merge remote-tracking branch 'main/2016.11' into pip-cache-fixes
  - 4f32a23ca8 Fixed the test_install_download_cache_argument_in_resulting_command to accommodate introduced cache directory argument fixes and renamed it to test_install_download_cache_dir_arguments_in_resulting_command.
  - 9d0f94ebea Fixed unnecessary API changes introduced with suggested changes.

- **PR #40369**: (Ch3LL) [2016.11] Bump previous version to 2016.3.6 @ 2017-03-28 18:50:39 UTC
  - 6162698c87 Merge pull request #40369 from Ch3LL/bump_version_11
  - 7597d96edb [2016.11] Bump previous version to 2016.3.6

- **ISSUE #40322**: (Whissi) ssh_auth.absent: Wrong comment when test=True (refs: #40333)

- **ISSUE #40321**: (Whissi) state.alternatives: Wrong comment when test=True (refs: #40333)

- **PR #40333**: (gtmanfred) fix some test=True comments @ 2017-03-28 16:11:01 UTC
  - 2d2cb5b837 Merge pull request #40333 from gtmanfred/2016.11
  - 559620db fix some test=True comments

- **PR #40347**: (rallytime) [2016.11] Merge forward from 2016.3 to 2016.11 @ 2017-03-28 02:39:31 UTC
  - bb37f133fc Merge pull request #40347 from rallytime/merge-2016.11
  - e77e86db3a Merge branch '2016.3' into '2016.11'
  - 17ab1da0ab Merge pull request #40345 from twangboy/fixed_osx_build
    - 3207d670c5 Fix osx build
  - 7ab10491ab Merge pull request #40338 from UtahDave/fixed_cherrypy_ssl_error_link
    - 28b501950 Upstream cherrypy moved to Github from Bitbucket
  - **PR saltstack/salt#40332**: (zer0def) Fixes related to cache directory argument changes in pip>=6. (refs: #40346)

- **PR #40346**: (cachedout) Revert "Fixes related to cache directory argument changes in pip>=6." @ 2017-03-27 23:17:29 UTC
  - a572b46183 Merge pull request #40346 from saltstack/revert-40332-pip-cache-fixes
  - b4753d1a5a Revert "Fixes related to cache directory argument changes in pip>=6."

- **ISSUE #40296**: (L4rS6) Wrong documentation in mount.mounted (refs: #40326)

- **PR #40326**: (L4rS6) Update mount state documentation (Fixes: #40296) @ 2017-03-27 23:15:53 UTC
  - a91bab867e Merge pull request #40326 from L4rS6/update-mount-state-doc
- a717c527a1 Update mount state documentation (Fixes: #40296)

- **PR #40328**: (L4rS6) Fixes wrong compared extra_mount_ignore_fs_keys key. @ 2017-03-27 23:14:22 UTC
  - ca2980cfb0 Merge pull request #40328 from L4rS6/fix-mount-state-extra-ignore-fs-key
  - f0f68b9033 Fixes wrong compared extra_mount_ignore_fs_keys key.

- **PR #40329**: (isbm) Merge tops (backport) @ 2017-03-27 23:13:47 UTC
  - 3a65cd0297 Merge pull request #40329 from isbm/isbm-merge-tops-201611
  - a762c9edd Merge output from master_tops

- **PR #40285**: (rallytime) Dockerng unit tests fixes: isolate global variables @ 2017-03-27 23:05:03 UTC
  - 2b78b2f1bc4 Merge pull request #40285 from rallytime/docker-test-fixes
  - 0263a52e50 Mock out the get_client_args mocks in the dockerng module tests more aggressively
  - 887d0e253 Add one more dockerng.version mock that was missed previously
  - 8d31d2c4d1 Add a couple more patches for docker.version information
  - a79c6eab0 Clean up dockerng unit tests to avoid global variables and fixup some patching

- **PR #40341**: (twangboy) Fix service.create, fix docs @ 2017-03-27 21:46:19 UTC
  - 01efc842c1 Merge pull request #40341 from twangboy/fix_win_service
  - 6736457ec8 Docs for create
  - 652f08f8a Fix service.create, fix docs

- **PR #40332**: (zer0def) Fixes related to cache directory argument changes in pip>=6. @ 2017-03-27 21:01:15 UTC
  - 8eacbc66c0 Merge pull request #40332 from zer0def/pip-cache-fixes
  - 7976840100 Fixes related to cache directory changes in pip>=6.

- **PR #40337**: (Ch3LL) Add archive.extracted with use_cmd_unzip argument @ 2017-03-27 21:00:23 UTC
  - ceb1b9bc6 Merge pull request #40337 from Ch3LL/add_unzip_test
  - 882b1b4cb8 add use_cmd_unzip test

- **PR #40312**: (rallytime) Update minion data cache documentation @ 2017-03-27 20:56:55 UTC
  - a192597ec2 Merge pull request #40312 from rallytime/cache-docs
  - 53630b55b Update minion data cache documentation

- **PR #40315**: (rallytime) [2016.11] Merge forward from 2016.3 to 2016.11 @ 2017-03-27 15:11:25 UTC
  - 7f16754619 Merge pull request #40315 from rallytime/merge-2016.11
  - c65d62f60 Merge branch '2016.3' into '2016.11'
    - 7e21153d3a Merge pull request #40300 from meaksh/2016.3-adding-timeouts-parameters-to-cmd_batch
      - 91746f281 Fixes testing opts dict for batch unit tests
      - b1de79abcf Adds custom 'timeout' and 'gather_job_timeout' to 'local_batch' client

- **PR #40313**: (techhat) Add minimum and maximum to calls to calc @ 2017-03-27 14:54:15 UTC
  - a9a73bf8de Merge pull request #40313 from techhat/calcref
  - 7106a86258 Use named kwargs
- 822f3b81c3 Add minimum and maximum to calls to calc

- **ISSUE #40247**: (eldadru) `boto_rds.delete` `wait_for_deletion` checks `rds` status incorrectly and always loop until timeout (refs: #40277)

- **PR #40277**: (eldadru) Fixing `boto_rds.py` `delete()` `wait_for_deletion`, if statement was inco... @ 2017-03-24 22:29:25 UTC
  - 9d0762deca Merge pull request #40277 from eldadru/Fix-40247-boto_rds-delete-wait-for-deletion-failure
  - 3c15a32764 Fixing `boto_rds.py` `delete()` `wait_for_deletion`, if statement was incorrectly checking the return value of `boto_rds.py exists()` method.

- **PR #40280**: (bewing) Clean up temporary file in `net.load_template` @ 2017-03-24 22:27:04 UTC
  - **PR #40273**: (bewing) Clean up temporary file in `net.load_template` (refs: #40280)
  - 6c29c81d01 Merge pull request #40280 from bewing/bp_40273
  - f028e939f5 Clean up temporary file in `net.load_template`

- **ISSUE #37972**: (ebauman) `salt-run` execution for master with no AAAA record adds significant execution time (refs: #40310)

- **PR #40310**: (gtmanfred) add warning when no host/dns record is found for fqdn_ip @ 2017-03-24 21:55:20 UTC
  - 839b620f32 Merge pull request #40310 from gtmanfred/2016.11
  - cff027d5c6 add warning when no host/dns record is found for fqdn

- **PR #40288**: (dmurphy18) Execution module network support for AIX @ 2017-03-24 20:10:36 UTC
  - eb86d55478 Merge pull request #40288 from dmurphy18/aix_network
  - b53a95dab1 Further update to us in similar to review comments
  - 59c0bdc14d Updated for review comments
  - 031c957ba Execution module network support for AIX

- **PR #40308**: (rallytime) Back-port #38835 to 2016.11 @ 2017-03-24 19:00:46 UTC
  - **PR #38835**: (UtahDave) Cache docs (refs: #40308)
  - 492806253 Merge pull request #40308 from rallytime/bp-38835
  - 3ba50d3e52 add info about what is cached
  - 77e886af9 fix config example
  - 61f2f9a339 Add documentation for the Minion data cache

- **PR #40287**: (rallytime) [2016.11] Merge forward from 2016.3 to 2016.11 @ 2017-03-24 16:50:23 UTC
  - 12a9fd43e9 Merge pull request #40287 from rallytime/merge-2016.11
  - 77415369c Merge branch '2016.3' into '2016.11'
  - 0e2d523ea Merge pull request #40260 from lubyou/fix-join_domain
    - 1cb15d1ea8 use win32api.FormatMessage() to get the error message for the system code
  - 0c62b356d3 Merge pull request #40275 from UtahDave/2016.3/local
    - 9f0c9802c2 remove reference to `auth_minion`
  - 57ce474d73 Merge pull request #40265 from terminalmage/issue40219
    - 1a731e0216 Pop off the version when aggregating pkg states
• 0055fda3e9 Properly aggregate version when passed with name
• 62d7650fc Don’t aggregate both name/pkgs and sources in pkg states

– b208630d85 Merge pull request #40201 from sergeizv/cloud-roster-fixes-2016.3
  • d87b377ad2 cloud roster: Don’t stop if minion wasn’t found in cloud cache index
  • a6865e0283 cloud roster: Check whether show_instance succeeded on node
  • 1b45c8e8c2 cloud roster: Check provider and profile configs for ssh_username
  • a18250b2e4 cloud roster: Return proper target name
  • 637930b2b3 cloud roster: Fix extracting instance’s info
  • dd1d3ac74 cloud roster: Work with custom conf dir

• PR #40250: (techhat) Add wait_for_fun() to set_tags() @ 2017-03-23 16:42:13 UTC
  – PR #40225: (techhat) Add wait_for_fun() to set_tags() (refs: #40250)
  – b7f9100e6d Merge pull request #40250 from techhat/settags
  – baf7a046d Add wait_for_fun() to set_tags()

• ISSUE #39976: (peterhirn) win_lgpo missing policies, eg. Prevent the usage of OneDrive for file storage (refs: #40255, #40253)

• PR #40255: (lomeroe) backport #40253 @ 2017-03-23 16:36:44 UTC
  – PR #40253: (lomeroe) correct method of getting ‘text’ of the XML object to compare to the ... (refs: #40255)
  – 904e144ae4 Merge pull request #40255 from lomeroe/fix_39976_2016.11
  – 0e9f5820cc backport #40253

• PR #40240: (rallytime) [2016.11] Merge forward from 2016.3 to 2016.11 @ 2017-03-23 14:14:11 UTC
  – PR #40237: (rallytime) [2016.11] Merge forward from 2016.3 to 2016.11 (refs: #40240)
  – 720a362c7a Merge pull request #40240 from rallytime/merge-2016.11
  – 5c5b74b09a Merge branch ’2016.3’ into ’2016.11’
    • 35ced607dd Merge pull request #40226 from terminalmage/issue40149
      – 2a8df9384c Fix wrong errno in systemd.py
    • 24c4ae9c21 Merge pull request #40232 from rallytime/update-release-notes
      – 2ead188b4f Update release notes for 2016.3.6
    • c59ae9a82c Merge pull request #39855 from Foxlik/use_regex_to_compare_authorized_keys
      – d46845a5b6 Add newline at end of file
      – d4a3c8a66a Use regular expression instead of split when replacing authorized_keys
    • fd10430018 Merge pull request #40221 from rallytime/bp-39179
      – 07dc2de084 fix error parsing
    • a27a2cc3bb Merge pull request #40206 from cro/sign_pub_take2
      – 01048de83f leave sign_pub_messages off on minion by default.
      – a82b005507 Leave sign_pub_messages off by default.
    • d1abb4cbba Merge pull request #40193 from rallytime/bp-40117
- cf1857904b More optimization.
- 5a08266814 Removed debug statement
- f557f7c6bb Added fix for issue 39393
- bb62278b73 Reverting changes.
- a9107cde44 Added if condition for broken link.
  - 0f1ff4d4a8 Merge pull request #40196 from twangboy/win_fix_deps
  - 6761527793 Update dependencies for PyOpenSSL
  - b0501515cb Merge pull request #40184 from terminalmage/link-reactor-example
    - a42be82993 Link to minion start reactor example from FAQ.
- ISSUE #39445: (systemtrap) state file.copy for directories does not set ownership recursively (refs: #40030)
- PR #40231: (rallytime) Back-port #40030 to 2016.11 @ 2017-03-22 23:14:40 UTC
  - PR #40030: (narendraingale2) Added changes for fix_39445 (refs: #40231)
  - c40376250f Merge pull request #40231 from rallytime/bp-40030
  - 4d1c687cbd Using lchown insted of chown.
  - 52h3d986b5 Added changes for fix_39445
  - PR saltstack/salt#40225: (techhat) Add wait_for_fun() to set_tags() (refs: #40239)
- PR #40239: (cachedout) Revert "Add wait_for_fun() to set_tags()" @ 2017-03-22 22:59:16 UTC
  - e39f5cbf40 Merge pull request #40239 from saltstack/revert-40225-waitforfun
  - 95bdab87b4 Revert "Add wait_for_fun() to set_tags()"
- PR #40225: (techhat) Add wait_for_fun() to set_tags() (refs: #40250) @ 2017-03-22 18:15:35 UTC
  - 11d2f5abec Merge pull request #40225 from techhat/waitforfun
  - 89b5010883 Add wait_for_fun() to set_tags()
- PR #40172: (dmurphy18) Fix solaris network @ 2017-03-22 17:41:56 UTC
  - c8cbb7df6 Merge pull request #40172 from dmurphy18/fix_solaris_network
  - a6218b9484 Updated use of tail on Solaris and Sun-like OS
  - 90e6a1d8f6 Further update to support correct tail in network for Solaris
  - 5b6d33dd70 Fix use of correct tail on Solaris for active_tcp
- PR #40210: (rallytime) Skip flaky test for now @ 2017-03-22 16:34:41 UTC
  - e9a4e8548b Merge pull request #40210 from rallytime/test-skip
  - 0ba773d86b Skip flaky test for now
- ISSUE #40204: (sofixa) InfluxDB returner present on salt-minion(installed via salt-bootstrap and updated via apt-get) has a bug (refs: #40209)
- PR #40209: (sofixa) change InfluxDB get_version to expect status code 204 @ 2017-03-21 21:42:26 UTC
  - 0b00489eb2 Merge pull request #40209 from sofixa/2016.11
  - e1cc7234ff change InfluxDB get_version to expect status code 204
- ISSUE #39775: (mirceaulinic) Proxy mine_interval config ignored (refs: #39935, #saltstack/salt`#39935`_, #39776)
- PR saltstack/salt#39935: (cro) Add special token to insert the minion id into the default_include path (refs: #40202)

- PR #40202: (cro) Revert "Add special token to insert the minion id into the default_include path" @ 2017-03-21 21:37:33 UTC
  - 66bc680d0a Merge pull request #40202 from saltstack/revert-39935-namespace_proxyCfg
  - bb7170747 Revert "Add special token to insert the minion id into the default_include path"

- PR #40199: (whiteinge) Ponysay emergency hotfix @ 2017-03-21 21:10:21 UTC
  - d8f0b79997 Merge pull request #40199 from whiteinge/ponysay-emergency-hotfix
  - 85ea61544 Add depends note
  - 5a271acfd6 Fix ponysay outputter hardcoded path

- PR #40194: (terminalmage) Change imports for dockerng tests @ 2017-03-21 19:34:55 UTC
  - 82cee58e72 Merge pull request #40194 from terminalmage/fix-docker-test-imports
  - 6caedeb8e8 Change imports for dockerng tests

- PR #40189: (rallytime) [2016.11] Merge forward from 2016.3 to 2016.11 @ 2017-03-21 18:02:51 UTC
  - 0b512f9ff8 Merge pull request #40189 from rallytime/merge-2016.11
  - a55c4138a8 Merge branch '2016.3' into '2016.11'
    - d46c58526 Merge pull request #40182 from terminalmage/dockerng-mod_watch-stopped
      - 4629a26f7 Add support for "stopped" state to dockerng's mod_watch
    - a0b4082484 Merge pull request #40171 from Ch3LL/2016.3.6_release
      - 9c6d8d892f additional PRs/issues for 2016.3.6 release notes
    - 33ba7821f7 Merge pull request #40120 from sergeizv/gce-expand-node-fix
      - 9d0f6e7e01 gce: Exclude GCENodeDriver objects from _expand_node result
    - 48843977c3 Merge pull request #40122 from meaksh/2016.3-yum-downloadonly-support
      - 067f3f77c2 Adding downloadonly support to yum/dnf module
    - 60e1d4e2f3 Merge pull request #40159 from cro/sign_pub
      - e663b761fb Fix small syntax error
      - 0a0f46fb14 Turn on sign_pub_messages by default. Make sure messages with no 'sig' are dropped with error when sign_pub_messages is True.

- ISSUE #39779: (sp1r) Pillar scheduling is broken (refs: #40034)

- ISSUE #38523: (MorphBonehunter) schedule not changed on pillar update after minion restart (refs: #40034)

- ISSUE #36134: (Ch3LL) carbon: multi-master with failover does not failover when master goes down (refs: #36437)

- PR #40034: (sp1r) Disallow modification of jobs from pillar with schedule execution module @ 2017-03-21 16:36:34 UTC
  - PR #36437: (DmitryKuzmenko) Keep the schedule jobs in ONE place. (refs: #40034)
  - d9cb222aa8 Merge pull request #40034 from sp1r/fixed-pillar-scheduling
  - 595f786327 fix evaluating jobs when "pillar" is missing in opts
  - 9d5db1910c fix initial data structure for schedule tests

32.2. Previous releases 5575
– d3a2489c9c schedule tests to ensure pillar jobs are not modified
– 27385ff49c added a check ensuring schedule is a dict before merging
– 14d71918b2 Fixes #39779

• PR #40160: (eldadru) Fix this issue: https://github.com/saltstack/salt/issues/40073, descr... @ 2017-03-20 21:37:43 UTC
  – 257c862c52 Merge pull request #40160 from eldadru/fix-issue-40073-boto-rds-describe-empty-dict
  – 954c871332 Fix this issue: https://github.com/saltstack/salt/issues/40073, describe return dictionary returned empty , probably as result of incorrect past merge (see discussion on issue)

• PR #40162: (rallytime) Make sure the tornado web server is stopped at the end of the test class @ 2017-03-20 20:35:21 UTC
  – aec504173a Merge pull request #40162 from rallytime/archive-integration-test-fixes
  – dd193cc740 Make sure the tornado web server is stopped at the end of the test class

• PR #40158: (rallytime) [2016.11] Merge forward from 2016.3 to 2016.11 @ 2017-03-20 20:34:23 UTC
  – 461e15f0f4 Merge pull request #40158 from rallytime/merge-2016.11
  – 88f3ebd7e9 Remove extra ”connect” kwarg caught by linter
  – f4d4768a6d Merge branch ’2016.3’ into ’2016.11’
    * 28e4fc17b6 Merge pull request #40123 from twangboy/win_fix_network
      * 06fdd55ef9 Adds support for inet_pton in Windows to network util
    * 35db79f59 Merge pull request #40141 from bobrik/fallback-resolve
      * af1545deed Use the first address if cannot connect to any

• PR #40165: (rallytime) Don’t try to run the dockerng unit tests if docker-py is missing @ 2017-03-20 20:33:19 UTC
  – b235f0953f Merge pull request #40165 from rallytime/gate-docker-unit-tests
  – f32d8a8683 Don’t try to run the dockerng unit tests if docker-py is missing

• PR #40085: (mirceaulinic) VRF arg and better doc for ping and traceroute @ 2017-03-20 19:48:57 UTC
  – db9fb58b82 Merge pull request #40085 from cloudflare/fix-ping-tr
  – 6cbdd6b54 Strip trailing whitespaces
  – 897a2a37c3 VRF arg and better doc for ping and traceroute

• PR #40095: (skizunov) dns_check should not try to connect when connect=False @ 2017-03-20 17:31:42 UTC
  – 3bac06f099 Merge pull request #40095 from skizunov/develop2
  – 880709f743 dns_check should not try to connect when connect=False

• PR #40096: (skizunov) When building up the ‘master_uri_list’, do not try to connect @ 2017-03-20 17:13:41 UTC
  – 31da90edd9 Merge pull request #40096 from skizunov/develop3
  – eb9a06d6f1 When building up the ‘master_uri_list’, do not try to connect

• PR #40111: (eldadru) Fixing simple issue 40081 - the key parameter of the method create ov... @ 2017-03-20 17:06:03 UTC
  – 5303386d93 Merge pull request #40111 from eldadru/fix-issue-40081-boto-rds-create-overwritten-key-parameter
• **PR #40118:** (rallytime) Add CLI Example for dockerng.get_client_args @ 2017-03-17 16:34:13 UTC
  - d2e376e8f2 Merge pull request #40118 from rallytime/cli-example
  - bb496b7f4 Add CLI Example for dockerng.get_client_args

• **PR #40097:** (rallytime) [2016.11] Merge forward from 2016.3 to 2016.11 @ 2017-03-17 15:17:08 UTC
  - bae5009aa Merge pull request #40097 from rallytime/merge-2016.11
  - e47f8d8d Merge branch '2016.3' into '2016.11'
  - 116201f345 Merge pull request #40059 from terminalmage/fixed-virtualenv-traceback
    - e3cfd29d6b Fix traceback when virtualenv.managed is invoked with nonexistent user
  - a01b52b9a3 Merge pull request #40090 from rallytime/bp-40056
    - ae01db7a update mention bot blacklist
  - d1570baa4c Merge pull request #40057 from cachedout/ollie_blacklist
    - 0ac2e83d37 Merge branch '2016.3' into ollie_blacklist
    - 5592c680b5 More mentionbot blacklists

• **ISSUE #39771:** (mirceaulinic) Empty __proxy__ dunder inside scheduler (refs: #40077)

• **PR #40077:** (mirceaulinic) Fix #39771 (Empty __proxy__ dunder inside scheduler) @ 2017-03-16 20:56:02 UTC
  - 9ef3e070c2 Merge pull request #40077 from cloudflare/fixed-39771
  - cd319e7e39 Add proxy kwarg to scheduler
  - c6e6dd1a04 ProxyMinion: correctly build the scheduler

• **PR #40088:** (rallytime) [2016.11] Merge forward from 2016.3 to 2016.11 @ 2017-03-16 19:58:44 UTC
  - b12720a56f Merge pull request #40088 from rallytime/merge-2016.11
  - 626b03885 Merge branch '2016.3' into '2016.11'
  - d36db1a6ee Merge pull request #40070 from Ch3LL/2016.3.6_release
    - a1f8b49bd1 update 2016.3.6 release notes with additional PR's
  - 8d8c7751 Merge pull request #40018 from meaksh/2016.3-handling-timeouts-for-manage.up-runner
    - 9f5c3b7dcd Allows one to set custom timeouts for 'manage.up' and 'manage.status'
    - 2102d9c75c Allows one to set 'timeout' and 'gather_job_timeout' via kwargs
  - 22fc5299a2 Merge pull request #40038 from velom/fixed-pip-freeze-parsing
    - 3fae91d879 correctly parse "pkg_name===version" from pip freeze
  - 3584f935fa Merge pull request #40053 from saltstack/rh_ip_patch
    - 219947acdb Update rh_ip.py
  - 837432d3d2 Merge pull request #40041 from terminalmage/issue40011
    - 5b5d1b375c Fix transposed lines in salt.utils.process

• **PR #40055:** (rallytime) Update "yaml" code-block references with "jinja" where needed @ 2017-03-16 16:30:38 UTC
  - 703ab23953 Merge pull request #40055 from rallytime/doc-build-warnings
- 72d16c9fa9 Update "yaml" code-block references with "jinja" where needed

- **PR #40072**: (meaksh) [2016.11] Allows overriding 'timeout' and 'gather_job_timeout' to 'manage.up' runner call @ 2017-03-16 15:31:46 UTC
  - PR #40018: (meaksh) Allows overriding 'timeout' and 'gather_job_timeout' to 'manage.up' runner call (refs: #40072)
  - e73a1d0e54 Merge pull request #40072 from meaksh/2016.11-handling-timeouts-for-manage.up-runner
  - 40246d3723 Allows one to set custom timeouts for 'manage.up' and 'manage.status'
  - ad232f1c01 Allows one to set 'timeout' and 'gather_job_timeout' via kwargs

- **PR #40045**: (terminalmage) Fix error when chhome is invoked by user.present state in Windows @ 2017-03-15 19:00:41 UTC
  - 2f78bd26ee Merge pull request #40045 from terminalmage/fix-windows-user-present
  - 359af3bb2b Fix error when chhome is invoked by user.present state in Windows

- **PR #40047**: (rallytime) Back-port #40000 to 2016.11 @ 2017-03-15 17:47:37 UTC
  - PR #40000: (skizunov) Fix exception in salt-call when master_type is 'disable' (refs: #40047)
  - 4067625676 Merge pull request #40047 from rallytime/bp-40000
  - 11766c7259 Fix exception in salt-call when master_type is 'disable'

- **PR #40023**: (jeanpralo) We need to match on .p not just strip '.p' otherwise it will remove a... @ 2017-03-14 23:14:56 UTC
  - 86fd79e09e Merge pull request #40023 from jeanpralo/fix-minions-cant-finish-by-char-p
  - d7b0c8a8e8 We need to match on .p not just strip '.p' otherwise it will remove any p from the string even if we have no dot

- **PR #40025**: (rallytime) [2016.11] Merge forward from 2016.3 to 2016.11 @ 2017-03-14 23:14:33 UTC
  - 277bd177f2 Merge pull request #40025 from rallytime/merge-2016.11
  - 029f28bbd5 Merge branch '2016.3' into '2016.11'
  - ee7f3b1200 Merge pull request #40021 from Ch3LL/2016.3.6_release
    - 537e4fba2a Add 2016.3.6 Release Notes
  - 26895b7be2 Merge pull request #40016 from terminalmage/fix-grains-test
    - 0ec81d4a0a Fixup a syntax error
    - 5d84b40bf0 Attempt to fix failing grains tests in 2016.3
